# TRADEMARK MANUAL OF EXAMINING PROCEDURE (TMEP)

UNITED STATES PATENT AND TRADEMARK OFFICE

April 2014

Foreword

The Trademark Manual of Examining Procedure (TMEP) may be downloaded free of charge from the United States Patent and Trademark Office (USPTO) website at [http://www.uspto.gov/trademarks/resources/TMEP\\_archives.jsp](http://www.uspto.gov/trademarks/resources/TMEP_archives.jsp).

The Manual is published to provide trademark examining attorneys in the USPTO, trademark applicants, and attorneys and representatives for trademark applicants with a reference work on the practices and procedures relative to prosecution of applications to register marks in the USPTO. The Manual contains guidelines for Examining Attorneys and materials in the nature of information and interpretation, and outlines the procedures which Examining Attorneys are required or authorized to follow in the examination of trademark applications.

Trademark Examining Attorneys will be governed by the applicable statutes, the Trademark Rules of Practice, decisions, and Orders and Notices issued by the Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office, Commissioners, or Deputy Commissioners. Policies stated in this revision supersede any previous policies stated in prior editions, examination guides, or any other statement of Office policy, to the extent that there is any conflict.

Suggestions for improving the form and content of the Manual are always welcome. They should be e-mailed to [tmtmep@uspto.gov](mailto:tmtmep@uspto.gov), or addressed to:

Commissioner for Trademarks  
Attention: Editor, Trademark Manual of Examining Procedure  
P.O. Box 1451  
Alexandria, Virginia 22313-1451

Editor

Deborah S. Cohn

Commissioner for Trademarks

# INTRODUCTION

---

## Constitutional Basis

The authority of Congress to provide for the registration of marks which are used in commerce stems from the power of Congress under the commerce clause of the Constitution of the United States to regulate commerce.

## Statutes

Under its authority to regulate commerce, Congress has over the years passed a number of statutes providing for the registration of marks in the USPTO. The provisions of statutes cannot be changed or waived by the USPTO. The statute now in effect is Public Law 489, 79th Congress, approved July 5, 1946, 60 Stat. 427, commonly referred to as the Trademark Act of 1946 or the Lanham Act. The Trademark Act of 1946 (as amended) forms Chapter 22 of Title 15 of the United States Code. In referring to a particular section of the Trademark Act, this Manual often gives the citation of the United States Code, e.g., 15 U.S.C. §1051. The text of the current statutes can be downloaded from the USPTO website at <http://www.uspto.gov>.

## Rules of Practice

Section 2 of Title 35 of the United States Code authorizes the Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office to establish regulations, not inconsistent with law, for the conduct of proceedings in the USPTO. The rules which govern the practices and procedures in the USPTO as they relate to the registration of marks are set forth in Title 37 of the Code of Federal Regulations.

The trademark rules are a part of the Code of Federal Regulations, which is a codification of Federal regulations under the provisions of The Federal Register Act of 1937 and The Administrative Procedure Act of 1946 and which is published pursuant to 44 U.S.C. §1510. Rules relating to patents, trademarks and copyrights are codified in Title 37 of the Code of Federal Regulations. The trademark rules constitute Part 2, the rules relating to assignments constitute Part 3, the classification of goods and services constitutes Part 6, the rules relating to filings under the Madrid Protocol constitute Part 7, and the rules relating to the representation of others before the USPTO constitute Parts 10 and 11. The text of the current rules is also available on the USPTO website at <http://www.uspto.gov>.

In creating numbers for rules, the number of the appropriate Part in Title 37 of the Code of Federal Regulations is placed first, followed by a decimal point and then the number of the rule, so that, for example, Trademark Rule 2.56 is Rule 56 in Part 2 of Title 37 of the Code of Federal Regulations. In the Code of Federal Regulations itself, and in material published in the Federal Register, the rules are identified by the term "sections." Thus, section 2.56 in 37 C.F.R. (37 CFR §2.56) is Trademark Rule 2.56.

Notices of proposed and final rulemaking are published in the Federal Register and in the *Official Gazette* of the USPTO, and posted on the USPTO website at <http://www.uspto.gov>.

The primary function of the rules of practice is to advise the public of the regulations that have been established in accordance with the statutes, which must be followed before the USPTO.

# TRADEMARK MANUAL OF EXAMINING PROCEDURE

## Director's Orders and Notices

From time to time the Director of the United States Patent and Trademark Office issues Orders and Notices relating to various specific situations that have arisen in operating the USPTO. Notices, circulars of information, or instructions and examination guides have also been issued by other USPTO officials under authority of the Director. These Orders and Notices are published in the *Official Gazette* of the USPTO, and posted on the USPTO website at <http://www.uspto.gov>. See notice at [72 Fed. Reg. 72999](#) (Dec. 26, 2007).

## Decisions

In addition to the statutory regulations, the actions taken by the examining attorneys in the examination of applications to register marks are to a great extent governed by decisions on prior cases. Applicants dissatisfied with an examining attorney's action may have it reviewed. In general, procedural matters may be reviewed by petition to the Director ( see [TMEP §1702](#)) and substantive matters may be reviewed by appeal to the Trademark Trial and Appeal Board ( see [TMEP §1501](#)).

## Trademark Manual of Examining Procedure

The *Trademark Manual of Examining Procedure* sets forth the guidelines and procedures followed by the examining attorneys at the USPTO. The manual may be downloaded free of charge from the USPTO website at <http://www.uspto.gov/>. See notice at [67 Fed. Reg. 18176](#) (April 15, 2002) regarding the dissemination of the manual in electronic format.

- First Edition, January 1974
- Revision 1, January 1976
- Revision 2, January 1977
- Revision 3, January 1978
- Revision 4, January 1979
- Revision 5, December 1982
- Revision 6, December 1983 (Incorporating Exam Guide Nos. 1-83 to 31-83)
- Revision 7, January 1986 (Incorporating Office practice and relevant caselaw prior to January 1986; drawing rules amendment effective Sept. 22, 1986; letter of protest procedures effective April 23, 1986; Exam Guide Nos. 1-83 to 2-86)
- Second Edition, May 1993 (Incorporating Office practice and relevant caselaw reported prior to April 1993)
- Revision 1, April 1997 (Incorporating Office practice and relevant caselaw reported prior to March 31, 1997)
- Revision 1.1, August 1997 (Corrected errors in Rev. 1)
- Third Edition, January 2002, issued March 18, 2002 (Incorporating Office practice and relevant caselaw reported prior to Jan. 24, 2002)
- Revision 1, June 2002, issued June 24, 2002 (Incorporating Office practice and relevant caselaw reported prior to June 24, 2002)
- Revision 2, May 2003, issued May 1, 2003 (Incorporating Office practice and relevant caselaw reported prior to April 21, 2003)
- Fourth Edition, April 2005, issued April 29, 2005 (Incorporating Office practice and relevant caselaw reported prior to March 25, 2005)
- Fifth Edition, September 2007, issued Sept. 30, 2007 (Incorporating Office practice and relevant caselaw reported prior to August 11, 2007)
- Sixth Edition, September 2009, issued Oct. 12, 2009 (Incorporating Office practice and relevant caselaw reported prior to Sept. 1, 2009)

## TRADEMARK MANUAL OF EXAMINING PROCEDURE

- Revision 1, October 2009, issued October 27, 2009 (Revising §§1202.02(c)(iii), 1206.03, and 1402.15)
- Revision 2, May 2010, issued May 21, 2010 (Incorporating amendments to 15 U.S.C. §§1058 and 1141k effective March 17, 2010 and signature, representation, and correspondence address rules amendments effective December 28, 2009; revising §§904.03(h), 904.03(i), 1109.15, 1109.15(a), and 1905)
- Seventh Edition, October 2010, issued Oct. 15, 2010 (Incorporating Office practice and relevant caselaw reported prior to Sept. 1, 2010)
- Eighth Edition, October 2011, issued Oct. 15, 2011 (Incorporating Office practice and relevant caselaw reported prior to Sept. 1, 2011)
- October 2012, issued Oct. 31, 2012 (Incorporating Office practice, amendments to the Trademark Rules, and relevant caselaw prior to Oct. 1, 2012)
- April 2013, issued April 30, 2013 (Incorporating Office practice and relevant caselaw reported prior to April 1, 2013)
- October 2013, issued Oct. 30, 2013 (Incorporating Office practice, amendments to the Trademark Rules, and relevant caselaw prior to Oct. 1, 2013)
- April 2014, issued April 30, 2014 (Incorporating Office practice and relevant caselaw reported prior to April 1, 2014)

### **Trademark Trial and Appeal Board Manual of Procedure**

References in this Manual to the *Trademark Trial and Appeal Board Manual of Procedure* (TBMP) refer to the Third Edition, Revision 2 (June 2013), currently available on the USPTO website at [http://www.uspto.gov/trademarks/process/appeal/Preface\\_TBMP.jsp](http://www.uspto.gov/trademarks/process/appeal/Preface_TBMP.jsp). The TBMP sets forth guidelines and practices followed in proceedings held before the Trademark Trial and Appeal Board.

## CHANGES: INDEX TO CHANGES IN TMEP APRIL 2014

Attention is directed to the following changes in the April 2014 TMEP.

SECTION	CHANGE
TMEP	Incorporated precedential case law issued prior to May 1, 2014.
401	Added cross reference.
401.01	Corrected information regarding filing receipts for §66(a) applications and added procedure for requesting correction of filing receipt. Clarified procedure for review of voluntary amendments filed prior to assignment of application to examining attorney.
403	Corrected procedure regarding duplicate courtesy copies of e-mails returned as undeliverable.
504.01	Clarified process for filing multiple assignments with the same execution date on the same date.
504.02	Clarified that Trademark database is not automatically updated upon recording of assignment.
602.01	Clarified the definition of “state.”
702.01	Clarified examination procedure for voluntary amendments filed prior to assignment of application to examining attorney.
714.03	Clarified procedure for applications with claim of priority under §44(d).
714.05	Clarified that Madrid Processing Unit should be notified if new issue is raised.
715.03(a)(2)(C)	Added petition decision cite.
716.02(i)	New section added: Pending Registry Agreement with ICANN for Marks Comprised Solely of gTLDs for Domain-Name Registry Operator and Registrar Services
718.02(a)	Clarified procedure for incomplete response to partial refusal or requirement.
718.03	Added cross references. Clarified procedures for unsigned responses, responses signed by unauthorized persons, properly signed but incomplete responses to final actions, and failure to respond to notice of incomplete response.
806.03(j)(i)	Updated procedures for adding or substituting a §44(e) basis to a §1(b) application after publication.
806.03(j)(ii)	Updated procedures for adding or substituting a §44(e) basis to a §1(b) application after issuance of the notice of allowance and before filing a statement of use.
806.03(j)(iii)	Updated procedures for adding or substituting a §44(e) basis to a §1(b) application after filing a statement of use.
808.02	Clarified that statements in the mark description regarding how a mark is used must not be printed on the registration certificate and added examples of descriptions containing an appropriate level of detail.
808.03	Deleted references to Trademark database.
808.03(a)	Added examples of accurate and complete descriptions from Exam Guide 2-08.
808.03(b)	Added examples of descriptions that may be entered by examiner’s amendment without prior approval of the applicant from Exam Guide 2-08.
808.03(c)(i)	Added example of an accurate but incomplete description where a description must be printed from Exam Guide 2-08.
808.03(c)(ii)	Added examples of accurate but incomplete descriptions where a description need not be printed from Exam Guide 2-08.
808.03(d)	Added examples of inaccurate descriptions from Exam Guide 2-08.
808.03(g)	Added new section: Unacceptable Statements in Mark Descriptions
809.01	Clarified that examining attorney has discretion to inquire regarding whether a term has meaning in a foreign language.
809.01(a)	Clarified procedure for entering entering translation/transliteration statement.
810	Changed “preliminary amendment” to “voluntary amendment” to reflect change in name of TEAS form.
819.01(g)	Changed “Preliminary amendments” to “Voluntary amendments” to reflect change in name of TEAS form.
819.02(b)	Changed “preliminary amendment” to “voluntary amendment” to reflect change in name of TEAS form.

<b>SECTION</b>	<b>CHANGE</b>
819.04	Changed “Preliminary Amendment” to “Voluntary Amendment Not in Response to USPTO Office Action/Letter” to reflect change in name of TEAS form.
904	Deleted reference to conditional refusal pending submission of acceptable specimen.
904.03(i)(C)(2)	Added case cite.
1002.01	Added case cite.
1005	Added case cite.
1106.01	Clarified procedure for issuance of notice of allowance and for failure to timely file statement of use or request for an extension of time to file a statement of use in response to a notice of allowance.
1202.02(b)(i)-1202.02(c)(iv)	Revised to clarify procedures for submission of applications for, and examination of, trade dress marks.
1202.02(c)	Section title revised: Drawings, Descriptions, and Disclaimers in Trade Dress Applications
1202.02(c)(i)	Section title revised: Drawings of Trade Dress Marks
1202.02(c)(i)(A)	New section: Functional Matter
1202.02(c)(i)(B)	New section: Nondistinctive Matter
1202.02(c)(i)(C)	New section: Drawings in §44 and §66(a) Applications
1202.02(c)(iii)(A)	New section: Functional Matter
1202.02(c)(iii)(B)	New section: Nondistinctive Matter
1202.11	Added case cite.
1203.03(b)(ii)	Added case cite.
1203.03(c)(i)	Clarified elements of legal test. Added case cites.
1203.03(c)(iii)	Added case cite.
1204	Updated case cite.
1204.01(a)	Added cross reference.
1205.01(d)(iv)	New section: Examples. Added examples from Exam Guide 2-12.
1206.02	Added case cite.
1207.01(a)(i)	Added case cite.
1207.01(a)(iii)	Added case cites.
1207.01(b)(iii)	Added case cite.
1207.01(d)(vii)	Added case cite.
1207.01(d)(xi)	Added case cite.
1209.01(c)(i)	Added case cites. Updated case cite.
1209.01(c)(ii)	Added case cites. Updated case cite.
1209.01(c)(iii)	Added case cite. Updated case cite.
1209.03(m)	Updated to incorporate guidance from Examination Guide 1-14.
1212.05(a)	Clarified parenthetical example to indicate that product design is not inherently distinctive.
1212.06	Added case cite.
1213.08(a)(iii)	New section: Unacceptable Statements in Disclaimers
1215-1215.10	Incorporated Examination Guide 1-14: Applications for Marks Comprised of gTLDs for Domain Name Registry Operator and Registrar Services
1215.02(d)	Revised section title: Marks Comprised Solely of gTLDs for Domain-Name Registry Operator and Registrar Services
1215.02(d)(i)	New section: Prior Registration(s) of the Same Mark for Goods or Services in the Same Field of Use
1215.02(d)(ii)	New section: Additional Proof that the Mark Used as a gTLD Will Be Perceived as a Mark
1215.02(d)(iii)	New section: Registry Agreement/ICANN Contract
1215.02(d)(iv)	New section: Legitimate Service for the Benefit of Others
1215.08(c)	Revised section title: Adding or Deleting “.” in Marks for Domain Name Registry Operator or Registrar Registration Services
1215.10	Revised section title: Marks Containing the Phonetic Equivalent of a Generic Top-Level Domain
1216.02	Added case cite.

<b>SECTION</b>	<b>CHANGE</b>
1303.01	Clarified that in applications based on §1(b), §44, or §66(a), applicant must assert that it is entitled to exercise legitimate control over use of the mark in commerce.
1304.08(f)(i)	Clarified that in applications based on §1(b), §44, or §66(a), applicant must assert that it is entitled to exercise legitimate control over use of the mark in commerce.
1306.06(f)(iii)	Clarified that in applications based on §1(b), §44, or §66(a), applicant must assert that it is entitled to exercise legitimate control over use of the mark in commerce.
1401.02(a)	Updated Class Headings based on changes in Nice Classification, 10th edition, version 2014.
1401.05(c)	Clarified nature of services classified in multiple classes on the basis of the purpose for which the service activity is rendered.
1402.01(b)	Added case cite.
1402.02	Added case cite.
1402.07(a)	Clarified that use of a class heading as an identification of goods or services is not deemed to include all the goods or services in the established scope of that class. Added case cite.
1402.11(a)(i)	Changed internal italic heading to numbered heading: Services Classified in Classes 35, 36, 37, 39, 40, 41, 44, and 45. Revised examples of acceptable identifications.
1402.11(a)(ii)	Changed internal italic heading to numbered heading: Content Providers. Clarified that content provider services may be classified in a variety of classes depending upon the nature of the activity provided, i.e., Information provider services, audiovisual content, and other services. Revised examples of acceptable identifications.
1402.11(a)(iii)	Changed internal italic heading to numbered heading: Provision of Telecommunications Connections to the Internet. Revised examples of acceptable identifications.
1402.11(a)(iv)	Changed internal italic heading to numbered heading: Office-Function-Type and Computerized Web Traffic Services. Revised examples of acceptable identifications.
1402.11(a)(v)	Changed internal italic heading to numbered heading: Computer Installation and Repair Services.
1402.11(a)(vi)	Changed internal italic heading to numbered heading: Computer Retail Services. Revised examples of acceptable identifications.
1402.11(a)(vii)	Changed internal italic heading to numbered heading: Computer Entertainment Services. Revised examples of acceptable identifications.
1402.11(a)(viii)	Changed internal italic heading to numbered heading: Computer Design and Development Services.
1402.11(a)(ix)	Changed internal italic heading to numbered heading: Database Services.
1402.11(a)(x)	Changed internal italic heading to numbered heading: Online Publications.
1402.11(a)(xi)	Added new section: Electronic Storage, Hosting of Data, and Cloud Computing.
1403.02(c)	Changed “preliminary amendment” to “voluntary amendment” to reflect change in name of TEAS form.
1502.01	Clarified procedure for requesting corrections of clerical or typographical errors.
1601.01(b)	Clarified procedure for requesting duplicate certificate of registration.
1713.02	Changed section title to “Failure to Respond to Notice of Incomplete Response or Denial of Request for Reconsideration with No Appeal Filed.” Revised to clarify procedure when applicant fails to respond to notice of incomplete response or denial of request for reconsideration and has not filed an appeal.
1715.03(a)	Revised to clarify that letters of protest regarding applications that will issue on the Supplemental Register must be submitted as soon as possible after the filing of the application.
1715.03(b)	Revised to clarify exceptions to rule that letters of protest filed more than 30 days after publication are generally denied as untimely and requirements for timely filing of letter of protest based on an application under Trademark Act §66(a).
1715.04	Revised to clarify the preferred format for letters of protest and the type of evidence that should be submitted.
1715.04(a)	Revised to clarify that duplicate letters of protest should not be sent.
1902.02(b)	Clarified procedure when basic application or registration is divided after international application is filed.

<b>SECTION</b>	<b>CHANGE</b>
1902.09	Clarified that international registration is dependent on the child application or registration of a basic application or registration.

## 101 Trademark Statute and Rules

The federal registration of trademarks is governed by the Trademark Act of 1946, 15 U.S.C. §§1051 *et seq.* (also known as the Lanham Act), and 37 C.F.R. Parts 2, 3, 6, 7, 10, and 11. The text of the Act and rules can be accessed and downloaded from the United States Patent and Trademark Office (“USPTO”) website at <http://www.uspto.gov/web/offices/tac/tmlaw2.pdf>.

## 102 United States Patent and Trademark Office Website

The USPTO website <http://www.uspto.gov> provides access to a wide variety of information about patents and trademarks, and offers electronic filing of trademark documents.

The Trademark Electronic Business Center on the USPTO website contains all the information needed for the entire registration process. A customer may search the Trademark database for conflicting marks using the Trademark Electronic Search System (“TESS”), file applications and other trademark documents online using the Trademark Electronic Application System (“TEAS”), check the status of applications and registrations and view and print images of the contents of trademark application and registration records through the Trademark Status and Document Retrieval (“TSDR”) portal at <http://tsdr.uspto.gov/>. See [TMEP §104](#) regarding TESS, [TMEP §108.01](#) regarding TSDR, [TMEP §109.01](#) regarding electronic image records, and [TMEP §301](#) for further information about electronic filing.

Trademark information available for downloading from the USPTO website includes the trademark statute and rules, *Trademark Manual of Examining Procedure*, *Trademark Trial and Appeal Board Manual of Procedure*, *Acceptable Identification of Goods and Services Manual*, *Federal Register* notices, *Official Gazette* notices, examination guides, and fee schedules.

Certified or uncertified copies of trademark documents can also be purchased over the Internet. See [TMEP §111](#) for further information.

### 103 Trademark Forms

Trademark documents can be filed electronically through TEAS, on the USPTO website at <http://www.uspto.gov/trademarks/teas/index.jsp>. See [TMEP §301](#) regarding TEAS. Additional forms may be available online at <http://www.uspto.gov/trademarks/teas/forms-index.jsp>, or through the Trademark Assistance Center (“TAC”) ( *see* [TMEP §108.02](#)).

Requests for recordation of assignments and other documents affecting title to an application or registration can be filed through the Electronic Trademark Assignment System (“ETAS”) at <http://etas.uspto.gov>.

The Electronic System for Trademark Trials and Appeals (“ESTTA”), at <http://estta.uspto.gov/>, can be used to file requests for extensions of time to oppose, notices of opposition, petitions to cancel, appeals, motions, briefs, notices of change of address, and other documents in Trademark Trial and Appeal Board (“Board”) proceedings .

### 104 Trademark Searching

X-Search, the USPTO's computerized search system, contains text and images of registered marks, and marks in pending and abandoned applications. X-Search is used by examining attorneys when searching for conflicting marks during examination.

The public may conduct searches free of charge using TESS, on the USPTO website at <http://www.uspto.gov>. Like X-Search, TESS provides access to text and images of registered marks and marks in pending and abandoned applications. Additional information, including current status, for pending trademark applications and registered trademarks can be obtained by entering the trademark serial number or registration number in the TSDR database. *See* [TMEP §108.01](#). TESS and TSDR are available in Patent and Trademark Resource Centers (“PTRCs”) ( *see* [TMEP §112](#)).

The public may use the X-Search system and view the internal Trademark database without charge in the Public Search Facility, which is located on the first floor of the James Madison Building - East Wing, 600 Dulany Street, Alexandria, Virginia, and is open from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday, except on Federal holidays within the District of Columbia. The Public Search Facility also contains copies of State emblems and official signs and hallmarks of member countries of the Paris Convention for the Protection of Industrial Property, which are protected under Article 6 *ter* of the Convention ( *see* [TMEP §1205.02](#)). The Public Search Facility does not contain copies of the official insignia of state- and federally recognized Native American tribes. X-Search or TESS can be used to search for these insignia.

If a mark includes a design element, it can be searched by using a design code. To locate the proper design code(s), the public can use the *Design Search Code Manual* on the USPTO website at <http://www.uspto.gov>.

For some marks, the USPTO has added a pseudo mark to the search data to assist users in identifying relevant marks related to their search term. The “pseudo mark” field, which is not displayed, often contains spellings that are very similar or phonetically equivalent to the word mark. For example, if “4U” appears in the mark, the term “for you” would be added to the pseudo-mark field. This provides an additional search tool for locating marks that contain an alternative or intentionally corrupted spelling for a normal English word.

Pseudo mark entries are not displayed or printed in the search results and are not part of the official application or registration.

USPTO personnel cannot conduct trademark searches for the public. A private trademark attorney will obtain a search and provide an opinion on the availability of a proposed mark, for a fee, prior to filing a trademark application. To find the names of private attorneys who handle trademark matters, consult telephone listings or the attorney referral service of a state bar or local bar association (see American Bar Association Lawyer Referral Directory). The USPTO cannot aid in the selection of an attorney, nor can the Trademark Assistance Center provide any legal advice. See 37 C.F.R. §2.11.

The public can search the trademark assignment records of the Assignment Recordation Branch on the USPTO website at <http://assignments.uspto.gov/assignments>. Assignment records can also be searched in the Public Search Facility. See [TMEP §503.08](#) for further information about the accessibility of assignment records.

## 105 General Information Booklet Concerning Trademarks

The booklet entitled *Basic Facts About Trademarks* contains information and instructions for registering a trademark or service mark. The booklet can be accessed or downloaded from the USPTO website at <http://www.uspto.gov/>, or may be obtained by calling TAC. See [TMEP §108.02](#) regarding TAC.

## 106 The Official Gazette

The *Official Gazette* (“OG”), issued every Tuesday, is a publication of the USPTO, which is available free of charge on the USPTO website.

*Trademark Official Gazette* (“TMOG”). The TMOG, posted at <http://www.uspto.gov/news/og/tindex.jsp>, contains an illustration of each mark published for opposition on the Principal Register, marks registered on the Principal Register under 15 U.S.C. §1051(d), and marks registered on the Supplemental Register on the date of the particular issue in which the marks appear. Effective July 15, 2003, the USPTO publishes the TMOG only in electronic form. See notice at [68 Fed. Reg. 37803](#) (June 25, 2003).

*USPTO Notices*. The TMOG does not contain USPTO Notices. Such notices are posted separately in the general information section of the *Official Gazette*, at <http://www.uspto.gov/news/og/index.jsp>. This section includes such general information as notices of changes in rules or Office procedures for both patents and trademarks; notices to parties who cannot be reached by mail; and indices of trademark registrations issued, renewed, cancelled, amended, or corrected on the date of the particular issue in which the marks appear.

Effective January 1, 2008, the USPTO discontinued the separate weekly publication of USPTO notices in paper form. See notice at [72 Fed. Reg. 72999](#) (Dec. 26, 2007).

## 107 Trademark Manuals

The following manuals may be downloaded free of charge from the USPTO website at <http://www.uspto.gov/trademarks/index.jsp>:

- [Trademark Manual of Examining Procedure](#) (“TMEP”)

- [Trademark Trial and Appeal Board Manual of Procedure](#) (“TBMP”)
- [Acceptable Identification of Goods and Services Manual](#)

The TMEP may also be purchased from the Government Printing Office (“GPO”) at <http://bookstore.gpo.gov/>. GPO’s general information telephone numbers are (202) 512-1800 and (866) 512-1800.

## 108 Status Inquiries

### 108.01 Internet Information

The TSDR database on the USPTO website at <http://tsdr.uspto.gov/> provides detailed information about the status and prosecution history of trademark applications and registrations. The TSDR database is available 24 hours a day, 7 days a week.

The TSDR database is normally updated shortly after our internal databases are updated. However, the TSDR database may not reflect changes in ownership that have been recorded in the Assignment Recordation Branch. There are circumstances in which the Trademark database will be updated automatically upon the recordation of a change of ownership. See [TMEP §504](#). In all other cases, the new owner must separately notify the Trademark Operation in writing of the recordation of a document, and request that the Trademark database be updated manually. See [TMEP §§503.01\(a\)](#), [504.01](#), and [505-505.02](#).

Information about documents recorded with the Assignment Recordation Branch can be viewed through Assignments on the Web (AOTW) at <http://assignments.uspto.gov>.

See also [TMEP §109.01](#) regarding public access to electronic images of the contents of trademark application and registration and Board proceeding records.

### 108.02 Personal Telephone Assistance

If additional information regarding the status of an application or registration is required, callers may telephone TAC at (571) 272-9250 or (800) 786-9199 and request a status check. TAC also provides general information about the trademark registration process. Telephone assistance is available from 8:30 a.m. to 8:00 p.m., Eastern Time, Monday through Friday, except on Federal holidays within the District of Columbia.

Walk-in service is available from 8:30 a.m. to 5:00 p.m. Eastern Time, Monday through Friday, except on Federal holidays within the District of Columbia.

The Trademark Assistance Center will gladly answer questions about the application process. However, USPTO employees cannot:

- conduct trademark searches for the public ( see [TMEP §104](#));
- comment on the validity of registered marks ( see [TMEP §1801](#));
- answer questions as to whether a particular mark or type of mark is eligible for registration;
- offer legal advice or opinions about common-law trademark rights, state registrations, or trademark infringement claims; or
- aid in the selection of a private trademark attorney or search firm (37 C.F.R. §2.11).

See TMEP Chapter 1800 regarding public inquiries about applications and registrations.

### 108.03 Due Diligence: Duty to Monitor Status

Trademark applicants and registrants should monitor the status of their applications or registrations in cases where a notice or action from the USPTO is expected. Inquiries regarding the status of pending matters should be made during the following time periods:

- (1) During the pendency of an application, an applicant should check the status of the application every six months between the filing date of the application and issuance of a registration; and
- (2) After filing an affidavit of use or excusable nonuse under §8 or §71 of the Trademark Act, or a renewal application under §9 of the Act, a registrant should check the status of the registration every six months until the registrant receives notice that the affidavit or renewal application has been accepted.

Should the status inquiry reveal that a document is lost, that no action has been taken regarding correspondence that was submitted, or that some other problem exists, the applicant or registrant must promptly request corrective action. 37 C.F.R. §2.146(i). Failure to act diligently and follow up with appropriate action may result in denial of the requested relief. The USPTO may deny petitions to reactivate abandoned applications and cancelled registrations when a party fails to inquire about the status of a pending matter within a reasonable time. See [TMEP §§1705.05](#) and [1714.01\(d\)](#).

Written status inquiries are discouraged, because they can delay processing. Whenever possible, status inquiries should be made through the TSDR database. If additional information regarding the status of an application or registration is required, callers may telephone TAC at (571) 272-9250 or (800) 786-9199.

### 109 Access to Records

*18 U.S.C. §2071 Concealment, removal, or mutilation generally.*

(a)

Whoever willfully and unlawfully conceals, removes, mutilates, obliterates, or destroys, or attempts to do so, or, with intent to do so takes and carries away any record, proceeding, map, book, paper, document, or other thing, filed or deposited with any clerk or officer of any court of the United States, or in any public office, or with any judicial or public officer of the United States, shall be fined under this title or imprisoned not more than three years, or both.

(b)

Whoever, having the custody of any such record, proceeding, map, book, document, paper, or other thing, willfully and unlawfully conceals, removes, mutilates, obliterates, falsifies, or destroys the same, shall be fined under this title or imprisoned not more than three years, or both; and shall forfeit his office and be disqualified from holding any office under the United States. As used in this subsection, the term "office" does not include the office held by any person as a retired officer of the Armed Forces of the United States.

*37 CFR §2.27(b)*

Except as provided in paragraph (e) of this section, access to the file of a particular pending application will be permitted prior to publication under §2.80 upon written request.

*37 CFR §2.27(d)*

Except as provided in paragraph (e) of this section, the official records of applications and all proceedings relating thereto are available for public inspection and copies of the documents may be furnished upon payment of the fee required by § 2.6.

*37 CFR §2.27(e)*

Anything ordered to be filed under seal pursuant to a protective order issued or made by any court or by the Trademark Trial and Appeal Board in any proceeding involving an application or registration shall be kept confidential and shall not be made available for public inspection or copying unless otherwise ordered by the court or the Board, or unless the party protected by the order voluntarily discloses the matter subject thereto. When possible, only confidential portions of filings with the Board shall be filed under seal.

In order to inspect the contents of a trademark application or registration record, it is not necessary to show good cause or to have a power to inspect from the applicant or registrant.

### 109.01 Electronic Image Records

The public may view and print images of the contents of trademark application and registration records through the TSDR portal on the USPTO website at <http://tsdr.uspto.gov/>. Electronic images of Board proceeding records are also available on the USPTO website at <http://ttabvue.uspto.gov/ttabvue/>. TSDR and TTABVUE are available 24 hours a day, seven days a week, free of charge.

The public may also view and print images of the contents of trademark application and registration records through the Trademark Image Capture and Retrieval System (“TICRS”), available in the Public Search Facility on the USPTO premises. See [TMEP §402](#).

### 109.02 Paper Files

Effective April 12, 2004, the USPTO no longer creates paper files for all trademark applications or paper copies of certain trademark-related documents that are submitted to the USPTO in electronic format. Furthermore, the USPTO does not generate paper copies of certain trademark documents that the USPTO creates, except for copies that are sent to recipients by mail. See New USPTO Policies Regarding (1) *Generation of Paper Copies of Trademark-Related Documents* and (2) *Public Access to Existing Paper Copies of Trademark-Related Documents* (TMOG Apr. 6, 2004), at <http://www.uspto.gov/web/offices/com/sol/og/2004/week14/pattmcp.htm>. All these documents can be viewed through TICRS and TSDR.

*Procedure for Requesting Paper Files.* A member of the public must make a request for access to the file. The request must include the name and phone number of the person requesting the file. USPTO personnel must keep a record of all files being removed, and enter the new location of the file (e.g., charged to non-USPTO personnel) in the Trademark database. The public must inspect the file on the premises of the USPTO, and nothing may be removed from the file without written authorization from the Office of the Commissioner for Trademarks. Requests for files should be made at the following locations:

- *Files Located Within the Trademark Operation or at the Board.* A request for access to a paper file that is located within the Trademark Operation or at the Board should be directed to TAC, located in the James Madison Building - East Wing, Concourse Level, 600 Dulany Street, Alexandria, VA, between 8:30 a.m. and 5:00 p.m. This includes files located in the law offices, Pre-Examination Section, ITU Unit, and Post Registration Section. See *Official Gazette* notice dated April 6, 2004, posted at [http://www.uspto.gov/web/trademarks/notice\\_paperfiles.htm](http://www.uspto.gov/web/trademarks/notice_paperfiles.htm). The file will usually be available to the requester within a few days.
- *Files Located at the Warehouse.* Requests for access to paper files located at the warehouse should be directed either (1) to TAC, located in the James Madison Building - East Wing, Concourse Level, 600 Dulany Street, Alexandria, VA, between 8:30 a.m. and 5:00 p.m. or (2) to the File Information Unit, located on the third floor of the Randolph Square Building, 2800 South Randolph Street, Arlington, VA, between 7:00 a.m. and 6:00 p.m. This includes files for abandoned applications,

cancelled and expired registrations, and terminated Trademark Trial and Appeal Board proceedings. The file will usually be available to the requester within a few days.

The public can check TSDR to determine where a file is located.

Paper files for abandoned applications and cancelled and expired registrations are stored in the warehouse for two years after the date of abandonment, cancellation, or expiration, and then destroyed. See notice at 980 TMOG 16, reprinted at 1232 TMOG 625 (March 21, 2000). See TBMP §120.03 regarding the retention schedule for the files of terminated Board proceedings.

No file or related document may be removed from the premises occupied by the USPTO, except as required by the issue process or other official process, unless specifically authorized by the Director. 18 U.S.C. §2071(b). If such authorization is given, the employee having custody will be responsible for complying with the requirements of law.

See [TMEP §503.08](#) regarding the accessibility of assignment records.

### **109.03 Making Copies of Materials in Records**

The public may print images of the contents of trademark application, registration, and Board proceeding records through TSDR or TTABVUE on the USPTO website at <http://www.uspto.gov>. See [TMEP §109.01](#).

The public can also print electronic copies of records pertaining to applications or registrations through TESS ( see [TMEP §104](#)), and prosecution histories through TSDR ( see [TMEP §108.01](#)) on the USPTO website. There is no charge for use of these databases.

The public may also print trademark documents from TICRS, TTABVUE, TSDR, or X-Search in the Public Search Facility on the USPTO premises. There is a fee for printing images of documents in the Public Search Facility. See [TMEP §104](#).

Photocopiers for making copies of paper files are available to the public on the premises of the USPTO for a fee.

See [TMEP §111](#) regarding requests that the USPTO provide copies of trademark documents.

## **110 Decisions Available to the Public**

*37 CFR §2.27(c)*

Decisions of the Director and the Trademark Trial and Appeal Board in applications and proceedings relating thereto are published or available for inspection or publication.

Precedential decisions of the Director and the Board are noted as such and published in the United States Patents Quarterly (cited as USPQ or USPQ2d), which is a periodical reporting service of a non-governmental publishing company. The USPTO does not print these decisions in its own publications. Non-precedential decisions of the Director and the Board are not published.

Both precedential and non-precedential decisions are available for viewing, downloading, and printing via TTABVUE.

A weekly summary of final decisions issued by the Board appears on the USPTO website at <http://www.uspto.gov> and in each issue of the *Official Gazette*.

See [TMEP §1803](#) regarding decisions that are available under the Freedom of Information Act.

## 111 Requests for Copies of Trademark Documents

The public may print images of the contents of trademark application, registration, and Board proceeding records through TSDR or TTABVUE on the USPTO website at <http://www.uspto.gov>. See [TMEP §109.01](#). The public can also print electronic copies of records pertaining to applications or registrations through TESS ( *see* [TMEP §104](#)), and prosecution histories through TSDR ( *see* [TMEP §108.01](#)) on the USPTO website. There is no charge for use of these databases.

The public may purchase certified or uncertified copies of trademark documents (e.g., application or registration records, trademark title and status reports, etc.). Fee schedules are posted on the USPTO website. Requests for copies of trademark documents are handled by the Document Services Branch of the Public Records Division of the USPTO.

Copies of trademark documents can be ordered through the USPTO website at <http://www.uspto.gov>, for delivery by the United States Postal Service. The fee must be paid by credit card, EFT, or deposit account authorization. Requests for copies of trademark documents may also be e-mailed to [dsd@uspto.gov](mailto:dsd@uspto.gov), with an authorization to charge the fee to a credit card or deposit account.

Requests for certified or uncertified copies of trademark documents may be mailed to: Mail Stop Document Services, Director of the United States Patent and Trademark Office, P. O. Box 1450, Alexandria VA 22313-1450. 37 C.F.R. §2.190(d).

## 112 Patent and Trademark Resource Centers

There is a network of PTRCs throughout the United States that provides access to many of the same products and services offered at the USPTO. A list of the PTRCs and their telephone numbers appears on the USPTO website at <http://www.uspto.gov> and in each issue of the *Official Gazette*.

Information available free of charge at the PTRCs includes the text of the trademark statute and rules ( *see* [TMEP §101](#)); the *Trademark Manual of Examining Procedure*; *Trademark Trial and Appeal Board Manual of Procedure*; *Acceptable Identification of Goods and Services Manual*; and the Trademark Electronic Search System. Photocopiers are generally provided for a fee.

The scope of PTRC collections, hours of operation, services, and fees (where applicable) may vary from one center to another.

# Chapter 200 Application Filing Date

---

<b>201</b>	<b>What Constitutes Filing Date</b>
201.01	Effective Filing Date Controls for Purposes of Determining Priority for Publication or Issue
201.02	Constructive Use Priority
<b>202</b>	<b>Requirements for Receiving a Filing Date</b>
202.01	Clear Drawing of the Mark
202.02	Listing of Recognizable Goods or Services
202.03	Filing Fee for At Least One Class of Goods or Services
202.03(a)	Fee Payment Refused or Charged Back By Financial Institution
202.03(a)(i)	Processing Fee for Payment Refused or Charged Back By Financial Institution
<b>203</b>	<b>Review for Compliance With Minimum Requirements</b>
<b>204</b>	<b>Defective or Informal Applications</b>
204.01	Filing Date Cancelled if Minimum Filing Requirements not Met
204.02	Resubmission of Applications
204.03	Examining Attorney’s Handling of Applications That Are Erroneously Accorded a Filing Date
<b>205</b>	<b>Filing Date Is Not Normally Changed</b>
<b>206</b>	<b>Effective Filing Date</b>
206.01	Amendment of §1(b) Application from Principal Register to Supplemental Register upon Filing of Allegation of Use
206.02	Application Claiming Priority under §44(d) or §67
206.03	Applications Filed Before November 16, 1989, That Are Amended to the Supplemental Register on or After November 16, 1989
206.04	Examining Attorney’s Action After Conducting New Search

## 201 What Constitutes Filing Date

In an application under §1 or §44 of the Trademark Act, 15 U.S.C. §1051 or §1126, the filing date of an application is the date on which all the elements set forth in 37 C.F.R. §2.21(a) ( *see* [TMEP §202](#)) are received in the United States Patent and Trademark Office (“USPTO”).

In a request for an extension of protection of an international registration to the United States under §66(a) of the Trademark Act, 15 U.S.C. §1141f(a), the filing date is: (1) the international registration date, if the request for extension of protection to the United States is made in an international application; or (2) the date that the subsequent designation was recorded by the International Bureau of the World Intellectual Property Organization (“IB”), if the request for extension of protection to the United States is made in a subsequent designation. 15 U.S.C. §1141f(b); 37 C.F.R. §7.26. See [TMEP §§1904 et seq.](#) for further information about §66(a) applications.

Granting a filing date to an application does not necessarily mean that all requirements for registration have been satisfied. It is possible that registration could be refused on a substantive ground. See [TMEP §818](#) for a list of potential grounds of refusal. If registration is not refused on any substantive basis (or if the applicant overcomes any substantive refusals), the applicant must comply with any procedural requirements

issued by the examining attorney during examination, in accordance with applicable rules and statutes, in order to obtain a registration.

### **201.01 Effective Filing Date Controls for Purposes of Determining Priority for Publication or Issue**

The filing date of an application ( *see* [TMEP §201](#)) is also the effective filing date, *except* where: (1) the applicant is entitled to priority under 15 U.S.C. §1126(d) or §1141g ( *see* [TMEP §206.02](#)); (2) the applicant amends an intent-to-use application filed under 15 U.S.C. §1051(b) to the Supplemental Register ( *see* [TMEP §206.01](#)); or (3) the application was filed before November 16, 1989, the applicant had not used the mark in commerce for one year before the application filing date, and the applicant amends to the Supplemental Register on or after November 16, 1989 ( *see* [TMEP §206.03](#)). The effective filing date is controlling for purposes of determining priority for publication or issue ( *see* [TMEP §1208.01](#)) and constructive use priority ( *see* [TMEP §201.02](#)).

### **201.02 Constructive Use Priority**

Under 15 U.S.C. §§1057(c) and 1141f(b), filing *any* application for registration on the Principal Register, including an intent-to-use application, constitutes constructive use of the mark, provided the application matures into a registration. *See Cent. Garden & Pet Co. v. Doskocil Mfg. Co.*, \_\_\_ USPQ2d \_\_\_, Opp'n Nos. 91188816, 91190058, Canc. No. 92050852 (TTAB Aug. 16, 2013). Upon registration, filing affords the applicant nationwide priority over others, except: (1) parties who used the mark before the applicant's filing date; (2) parties who filed in the USPTO before the applicant; or (3) parties who are entitled to an earlier priority filing date based on the filing of a foreign application under 15 U.S.C. §1126(d) or §1141g ( *see* [TMEP §206.02](#)). *See Zirco Corp. v. Am. Tel. and Tel. Co.*, 21 USPQ2d 1542 (TTAB 1991); *Aktieselskabet AF 21. November 2001 v. Fame Jeans Inc.*, 525 F.3d 8, 86 USPQ2d 1527 (D.C. Cir. 2008).

## **202 Requirements for Receiving a Filing Date**

Under 37 C.F.R. §2.21(a), the USPTO will grant a filing date to an application under §1 or §44 of the Trademark Act that is in the English language and contains all of the following:

- (1) The name of the applicant;
- (2) A name and address for correspondence;
- (3) A clear drawing of the mark;
- (4) A listing of the goods or services; and
- (5) The filing fee for at least one class of goods or services.

The filing date requirements apply to both the Principal and the Supplemental Register. *Kraft Group LLC v. Harpole*, 90 USPQ2d 1837 (TTAB 2009) (use in commerce is not required for receipt of a filing date for an application requesting registration on the Supplemental Register).

If an application does not satisfy all the above requirements, it will not be given a filing date. The USPTO will notify the applicant of the reason(s) why the application was not given a filing date, and refund the application filing fee.

The applicant must provide a physical address to which paper correspondence can be mailed in order to receive a filing date. An e-mail address and authorization to send communications by e-mail cannot be substituted for a physical address. A post office box is acceptable.

Applications that do not meet the minimum requirements for receipt of a filing date are referred to as “informal.” See [TMEP §203](#) regarding review for compliance with minimum filing requirements, and [TMEP §§204](#) *et seq.* for information about how the USPTO handles informal applications.

In an application under §66(a) of the Trademark Act, 15 U.S.C. §1141f(a) (i.e., a request for extension of protection of an international registration to the United States), compliance with the minimum filing requirements of §66(a) of the Act will be determined by the IB prior to sending the application to the USPTO. See [TMEP §§1904](#) *et seq.* for further information about §66(a) applications.

## 202.01 Clear Drawing of the Mark

In a §66(a) application, the drawing must meet the requirements of the Madrid Protocol and the *Common Regulations Under the Madrid Agreement Concerning the International Registration of Marks and the Protocol Relating to That Agreement*, which are available on the IB’s website at <http://www.wipo.int/madrid/en/>. The IB will determine whether the drawing meets these requirements before sending the application to the USPTO. See [TMEP §§1904](#) *et seq.* for further information about §66(a) applications.

Under 37 C.F.R. §2.21(a)(3), a §1 or §44 applicant must submit “a clear drawing of the mark” to receive a filing date, except in applications for registration of sound, scent, and other non-visual marks. A separate drawing page (or digital image of a separate drawing page in an application filed through the Trademark Electronic Application System (“TEAS”)) is not mandatory, but is encouraged. See [TMEP §807.09](#) regarding “drawings” in applications for registration of non-visual marks.

A “drawing” is simply a depiction of the mark for which registration is sought. 37 C.F.R. §2.52. A drawing that includes multiple elements that do not comprise an identifiable mark, or that consists of wording describing the mark, does not constitute a clear drawing of the mark.

An application that includes two or more drawings displaying materially different marks does not meet the requirement for a “clear drawing of the mark.” Therefore, an application is denied a filing date if it includes two or more drawings displaying materially different marks. See *Humanoids Group v. Rogan*, 375 F.3d 301, 71 USPQ2d 1745 (4th Cir. 2004).

However, if an applicant (1) submits a separate drawing page showing a mark in a paper application, (2) enters a standard character mark in the “Mark Information” field of an application filed through TEAS, or (3) attaches a .jpg file containing a mark to the “Mark Information” field of a TEAS application, and a different mark appears elsewhere in the application, the drawing page or mark shown in the “Mark Information” field on TEAS will control for purposes of determining the nature and elements of the mark. The USPTO will grant a filing date to the application, and disregard any other mark that appears elsewhere in the application. The applicant will not be permitted to amend the mark if the amendment is a material alteration of the mark on the drawing page in a paper application or the “Mark Information” field in a TEAS application. See *In re L.G. Lavorazioni Grafite S.r.l.*, 61 USPQ2d 1063 (Dir USPTO 2001). See 37 C.F.R. §2.72 and [TMEP §§807.14](#) *et seq.* regarding material alteration of a mark.

A specimen showing the mark does not satisfy the requirement for a drawing. If the only depiction of the mark is on a specimen (e.g., an advertisement, a photograph of the goods, or the overall packaging), then there is no drawing, and the application will be denied a filing date.

See [TMEP §§807](#) *et seq.* for additional information about the examination of drawings.

See also [TMEP §204.03](#) regarding the examining attorney's handling of applications that are erroneously granted a filing date.

## 202.02 Listing of Recognizable Goods or Services

The USPTO will deny a filing date to an application under §1 or §44 of the Trademark Act if the application does not identify recognizable goods or services. See [TMEP §1402.02](#) for further information.

## 202.03 Filing Fee for At Least One Class of Goods or Services

In an application under §1 or §44 of the Trademark Act, the applicant must pay the filing fee for at least one class of goods or services before an application can be given a filing date. 37 C.F.R. §2.21(a)(5). The fee can be paid by credit card, check, money order, electronic funds transfer ("EFT"), or by an authorization to charge a deposit account. 37 C.F.R. §2.207. See [TMEP §§405](#) *et seq.* for additional information about fees.

The amount of the trademark application filing fee varies depending on whether the application is filed through TEAS or on paper. An applicant has three choices. The applicant can file:

- A paper application at the highest fee per class, set forth in 37 C.F.R. §2.6(a)(1)(i);
- A regular TEAS application at a lower fee per class, set forth in 37 C.F.R. §2.6(a)(1)(ii); or
- A TEAS Plus application ( *see* [TMEP §§819](#) *et seq.*) at the lowest fee per class, set forth in 37 C.F.R. §2.6(a)(1)(iii).

See [TMEP §§819](#) *et seq.* regarding TEAS Plus. *See also* notices at [70 Fed. Reg. 2952 \(Jan. 19, 2005\)](#) and [70 Fed. Reg. 38768 \(July 6, 2005\)](#). The current fee schedule is available on the USPTO website at <http://www.uspto.gov>.

The complete fee for at least a single class must be submitted with the application as filed. Partial or piecemeal fee payments are unacceptable and will be returned.

If an application does not include a filing fee for at least a single class, the USPTO will deny a filing date. *In re Buckhead Marketing & Distribution, Inc.*, 71 USPQ2d 1620 (Dir USPTO 2004); *In re Paulsen*, 35 USPQ2d 1638 (Comm'r Pats. 1995). If a filing date has been granted when the USPTO discovers that the applicant has not paid the filing fee for at least a single class, the filing date will be cancelled. *See* [TMEP §204.01](#).

See [TMEP §§202.03\(a\)](#) and [405.06](#) regarding payments that are refused or charged back by financial institutions, and [TMEP §405.03](#) regarding deposit accounts.

The filing fee for a §66(a) application will be sent to the USPTO by the IB, pursuant to Article 8 of the Madrid Protocol. Generally, the examining attorney should not require additional fees during examination, except where the application is divided due to a change in ownership with respect to some but not all of the

goods/services. See [TMEP §810](#) for further information about application filing fees, and [TMEP §§1904 et seq.](#) for further information about §66(a) applications.

### **202.03(a) Fee Payment Refused or Charged Back By Financial Institution**

Where a check submitted as payment of an application filing fee is returned to the USPTO unpaid, or an EFT or credit card payment is refused or charged back by a financial institution, the application is treated as though the fee had never been paid.

If the original application was accompanied by an authorization to charge fee deficiencies to a deposit account (37 C.F.R. §2.208), then the application filing fee and the processing fee required by 37 C.F.R. §2.6(b)(12) ( see [TMEP §§202.03\(a\)\(i\)](#) and [405.06](#)) are charged to the deposit account, and the original filing date remains unchanged.

However, if the original application was not accompanied by an authorization to charge deficient fees to a deposit account that has sufficient funds to cover the fee, and the applicant has not paid the filing fee for at least one class of goods or services, the filing date is void and will be cancelled. *In re Paulsen*, 35 USPQ2d 1638 (Comm'r Pats. 1995).

In some cases, the applicant will have resubmitted the fee before the USPTO discovers that the payment was refused. In these cases, the USPTO will change the filing date to the date when the fee for a single class of goods or services was resubmitted.

In a multiple-class application, if the fee for at least a single class has been paid, but the payment of the filing fee for additional class(es) is refused, the filing date of the application is not affected. The applicant must: (1) resubmit the fee for the additional class(es), or delete the additional class(es); and (2) pay the processing fee required by 37 C.F.R. §2.6(b)(12). The applicant must pay the processing fee even if the applicant chooses to delete the additional class(es).

See [TMEP §§202.03\(a\)\(i\)](#) and [405.06](#) regarding payments refused by financial institutions, and [TMEP §204.03](#) regarding the examining attorney's handling of applications that are erroneously granted a filing date.

### **202.03(a)(i) Processing Fee for Payment Refused or Charged Back By Financial Institution**

There is a fee for processing any payment refused (including a check returned unpaid) or charged back by a financial institution. 37 C.F.R. §2.6(b)(12). See [TMEP §405.06](#). However, this is not a filing date requirement. If an applicant resubmits the filing fee without paying the processing fee, the USPTO will give the application a filing date as of the date of resubmission, and the examining attorney will require submission of the processing fee during examination.

## **203 Review for Compliance With Minimum Requirements**

In applications under §66(a) of the Trademark Act, 15 U.S.C. §1141f(a), the IB will determine whether the application complies with §66(a) prior to sending the request for extension of protection of an international registration to the USPTO. See [TMEP §§1904 et seq.](#) for further information about §66(a) applications.

Applications under §1 or §44 of the Act are given a receipt date ( *see* [TMEP §303.01](#)) and then reviewed for compliance with the minimum requirements for granting a filing date ( *see* 37 C.F.R. §2.21(a) and [TMEP §202](#) for a list of these requirements).

If the minimum requirements of 37 C.F.R. §2.21 have been met, the USPTO assigns a filing date as of the date of receipt in the USPTO. See [TMEP §§401](#) *et seq.* regarding the processing of new applications that meet the minimum requirements for receipt of a filing date, and [TMEP §§204](#) *et seq.* regarding the processing of applications that do not meet these minimum requirements.

The minimum requirements for receipt of a filing date under 37 C.F.R. §2.21(a) apply to all applications under §§1 and 44 of the Act, whether filed electronically or on paper. When an application is filed electronically, the TEAS system will not accept the transmission if the fields corresponding to the minimum filing requirements are not filled in. However, if the fields are filled in with incomplete or inappropriate information, the TEAS system will accept the transmission, but the USPTO will deny the application a filing date upon review for compliance with minimum filing requirements. For example, if the services were identified as “miscellaneous services,” TEAS would accept the transmission, but the USPTO would not give the application a filing date ( *see* [TMEP §§202.02](#) and [1402.02](#)).

## **204 Defective or Informal Applications**

If an application under §1 or §44 of the Trademark Act does not meet the minimum requirements for receipt of a filing date set forth in 37 C.F.R. §2.21(a) (see [TMEP §202](#)), the application is void. These applications are also referred to as “incomplete” or “informal.”

### **204.01 Filing Date Cancelled if Minimum Filing Requirements not Met**

Applications under §1 or §44 of the Trademark Act are initially assigned a filing date and serial number and then reviewed for compliance with the minimum requirements for receipt of a filing date set forth in 37 C.F.R. §2.21(a). If the minimum filing requirements have not been met, the USPTO cancels the filing date and serial number, refunds any filing fee submitted, and sends a notice to the applicant explaining why the application is defective.

See [TMEP §204.02](#) regarding the procedures for requesting review of the denial of a filing date by the Office of the Deputy Commissioner for Trademark Examination Policy.

### **204.02 Resubmission of Applications**

The USPTO prefers that all applications be filed through TEAS. However, if the USPTO denies a filing date in a paper application, the applicant may resubmit the original papers or a copy of the original papers, together with the item(s) necessary to correct the defect(s), and a new filing fee. The applicant should cross off the cancelled serial number. *A filing fee for at least a single class of goods or services must be included when the applicant resubmits an application, even if the applicant has not yet received a refund of the fee previously submitted.*

The new filing date will be the date on which a complete application, including all elements required by 37 C.F.R. §2.21(a), is received in the USPTO. Note that applications claiming priority under §44(d) of the Trademark Act must meet all filing date requirements within six months of the filing date of the foreign application. 37 C.F.R. §2.34(a)(4)(i); [TMEP §§806.01\(c\)](#) and [1003.02](#).

If an applicant believes that the USPTO committed an error in denying the application a filing date, the applicant may submit a request to restore the filing date. See [TMEP §1711](#). The USPTO prefers that the applicant file a new application, including the required application filing fee, using TEAS, located at <http://www.uspto.gov>. After the applicant receives a new serial number, the applicant should submit a request to restore the original filing date. To ensure proper routing and processing, the Office prefers that the request also be filed electronically. In TEAS, the Request to Restore Filing Date form can be accessed by clicking on the link entitled “Petition Forms.” Alternatively, the request should be faxed to the Office of the Deputy Commissioner for Trademark Examination Policy at 571-273-8950.

The request should: (1) include the new serial number; (2) state the reason(s) why the applicant believes the filing date was denied in error; and (3) include a copy of any Notice of Incomplete Trademark Application received from the USPTO. Although applicants have two (2) months from the issuance date of a Notice of Incomplete Trademark Application to file a request to restore the original filing date (37 C.F.R. §2.146(d)), it is recommended that the applicant file the request immediately upon receipt of the new serial number, to expedite processing.

### **204.03 Examining Attorney’s Handling of Applications That Are Erroneously Accorded a Filing Date**

Sometimes an application under §1 or §44 that does not meet the minimum requirements of 37 C.F.R. §2.21 for receipt of a filing date is erroneously referred to an examining attorney for examination. In this situation, if the examining attorney discovers the error *before* issuing an action in the case, then the examining attorney should have the application declared informal. The USPTO will cancel the filing date and serial number, refund any filing fee submitted, and send a notice to the applicant explaining why the application is defective.

See [TMEP §204.01](#).

If, however, an examining attorney discovers *after* issuing an action that the application as filed did not meet the minimum requirements for receipt of a filing date, then the examining attorney must issue a supplemental Office action, refusing registration on the ground that the application was not eligible to receive a filing date. Any outstanding refusals and requirements must be maintained and incorporated into the supplemental Office action. The applicant should be given six months to comply with all filing date requirements. If the applicant fails to qualify for a filing date within the response period, the application is void. If a filing fee was submitted with the original application, the examining attorney must have the filing fee refunded and update the USPTO’s automated records to indicate that the application is abandoned.

If the applicant complies with the filing date requirements within six months of the issuance of the examining attorney’s Office action, the application will receive a new filing date as of the date on which the applicant satisfied all minimum filing date requirements. In such a case, the examining attorney must conduct a new search of Office records for conflicting marks, and issue another Office action if necessary.

### **205 Filing Date Is Not Normally Changed**

After an application has been given a filing date, the USPTO will normally not vacate the filing date or physically alter the designation of the original filing date in the Trademark database, except where the application as originally filed was erroneously accorded a filing date ( see [TMEP §204.03](#)) or where the Office grants restoration of a filing date ( see [TMEP §§204.02](#) and [1711](#)).

In an application under §1 or §44 of the Trademark Act, if the application met the minimum requirements for receipt of a filing date ( see [TMEP §202](#)) when originally filed, but during examination it is discovered

that the applicant did not have a right to apply on the assigned filing date (e.g., because the applicant did not own the mark), the application is *void*, because a valid application was not created. See [TMEP §§803.06](#) and [1201.02\(b\)](#). The USPTO will *not* refund the filing fee in such a case. If, subsequent to the assigned filing date, the applicant became eligible to apply, the applicant may file a new application (including a filing fee).

## 206 Effective Filing Date

The filing date of an application ( see [TMEP §201](#)) is also the *effective* filing date, *except* in the situations described in the subsections below. In these situations, the USPTO does not alter the original filing date in its automated records.

In the situations described below, because the effective filing date will likely be subsequent to the date on which the examining attorney searched USPTO records for conflicting marks, the examining attorney must conduct another search.

### 206.01 Amendment of §1(b) Application from Principal Register to Supplemental Register upon Filing of Allegation of Use

An applicant relying on a bona fide intention to use the mark in commerce under 15 U.S.C. §1051(b) is not eligible for registration on the Supplemental Register until the applicant has submitted an acceptable amendment to allege use under 15 U.S.C. §1051(c) or statement of use under 15 U.S.C. §1051(d). 37 C.F.R. §§2.47(d) and 2.75(b).

If an application is based solely on §1(b), and the applicant files an acceptable amendment to allege use or statement of use *and* an acceptable amendment to the Supplemental Register, the USPTO will consider the filing date of the amendment to allege use or statement of use to be the effective filing date of the application. 37 C.F.R. §2.75(b). The examining attorney must conduct a new search of USPTO records for conflicting marks. See [TMEP §206.04](#) regarding examining attorney's action after conducting a new search.

Amendment of an application from the Supplemental to the Principal Register does not change the effective filing date of an application. *Kraft Group LLC v. Harpole*, 90 USPQ2d 1837 (TTAB 2009) (filing date did not change when applicant who originally sought registration on the Supplemental Register without alleging use in commerce amended to seek registration on the Principal Register under §1(b)).

See [TMEP §§816.02](#) and [1102.03](#) for additional information about examination of intent-to-use applications on the Supplemental Register.

### 206.02 Application Claiming Priority under §44(d) or §67

When an applicant is entitled to priority based on a foreign application, the effective filing date is the date on which the foreign application was first filed in the foreign country. The priority claim for the United States application must be filed within six months after the filing date of the foreign application. 15 U.S.C. §§1126(d)(1) and 1141g; 37 C.F.R. §§2.34(a)(4)(i) and 7.27(c); [TMEP §§1003.02](#) and [1904.01\(e\)](#).

In an application under §44(d) of the Trademark Act, the applicant can submit a priority claim after the filing date of the United States application if: (1) the applicant submits the priority claim within the six-month priority period (37 C.F.R. §2.35(b)(5)); and (2) the applicant was entitled to priority on the filing date of

the United States application. If the priority claim is submitted after the examining attorney has conducted a search of USPTO records for conflicting marks, he or she must conduct a new search.

In an application under §66(a) of the Act, the priority claim must be set forth in the international application or subsequent designation filed with the IB. The priority claim will be part of the request for extension of protection sent to the USPTO by the IB. See [TMEP §1904.01\(e\)](#).

### **206.03 Applications Filed Before November 16, 1989, That Are Amended to the Supplemental Register on or After November 16, 1989**

In an application filed before November 16, 1989, the date of the amendment to the Supplemental Register becomes the effective filing date of the application if: (1) the applicant had not used the mark in commerce for one year before the application filing date; and (2) the applicant amends to the Supplemental Register on or after November 16, 1989. See [TMEP §816.02](#).

### **206.04 Examining Attorney's Action After Conducting New Search**

When the effective filing date changes to a later date, the examining attorney must conduct a new search of USPTO records for conflicting marks. If the search shows that because of the new, later effective filing date, there is a later-filed conflicting application that now has an earlier filing date, the examining attorney must suspend action of the subject application pending disposition of the other application, if the application is otherwise in condition for suspension. See [TMEP §§1208 et seq.](#) regarding the procedures for handling conflicting marks in pending applications. If the examining attorney is handling a later-filed application that has been suspended pending disposition of the subject application, the examining attorney must withdraw the application from suspension and either approve it for publication or take action on any other outstanding issues. If a later-filed conflicting application is being handled by a different examining attorney, the examining attorney should contact the other examining attorney to notify him or her of the change in the effective filing date of the subject application.

<b>310</b>	<b>Computing Period for Response to Office Action or Notice</b>

### **301 Electronic Filing**

The Trademark Electronic Application System (“TEAS”) makes electronic filing available on the United States Patent and Trademark Office (“USPTO”) website, at <http://www.uspto.gov>. TEAS can be used to file all forms related to a domestic application or registration, or for filings under the Madrid Protocol. TEAS offers a group of specific forms that require direct data entry in designated fields, and/or the attachment of a .jpg or .pdf image file. For documents for which a specific TEAS form has not yet been developed, TEAS also offers a “global form” approach. On the global form, the filer can indicate the type of filing through the use of a pull-down menu from one of four categories: Intent-to-Use matters; Post-Registration matters; Petitions and similar matters; and a miscellaneous category. The filer then uploads a .jpg or .pdf image file that contains the complete text for the actual filing.

When a document is filed electronically, either as a specific TEAS form or through the global form approach, the USPTO generally receives it within seconds after filing. TEAS almost immediately displays a “Success” page that confirms receipt. This page is evidence of filing should any question arise as to the filing date of the document, and may be printed or copied-and-pasted into an electronic record for storage. From the “Success” page, the filer can click on a link to a PDF receipt that includes a summary of the filed information and general processing information. TEAS also separately sends an e-mail acknowledgement of receipt that includes the same information. Electronic filing creates an automatic entry of receipt of this filing into the USPTO’s automated system, which helps to avoid improper abandonment or cancellation.

Under 37 C.F.R. §2.195(a)(2), correspondence transmitted electronically using TEAS is considered filed on the date the USPTO receives the transmission, in Eastern Time, regardless of whether that date is a Saturday, Sunday, or Federal holiday within the District of Columbia.

See [TMEP §611.01\(c\)](#) regarding signature of documents filed electronically.

See [TMEP §§807.05](#) *et seq.* regarding drawings in electronically transmitted applications, and [TMEP §904.02\(a\)](#) regarding specimens in electronically transmitted applications.

Requests for recordation of assignments and other documents affecting title to an application or registration can be filed through the Electronic Trademark Assignment System (“ETAS”) on the USPTO website at <http://etas.uspto.gov>.

The Electronic System for Trademark Trials and Appeals (“ESTTA”), at <http://estta.uspto.gov/>, can be used to file requests for extensions of time to oppose, notices of opposition, petitions to cancel, appeals, motions, briefs, notices of change of address, and other documents in Board proceedings.

If a document transmitted through TEAS, ETAS, or ESTTA is due on a Saturday, Sunday, or a Federal holiday within the District of Columbia, the document will be considered timely if the USPTO receives the transmission on or before the following day that is not a Saturday, Sunday, or a Federal holiday within the District of Columbia. 37 C.F.R. §2.196; [TMEP §308](#).

See [TMPE §§819](#) *et seq.* regarding TEAS Plus.

## 302 Trademark Correspondence and Signature Requirements - In General

*37 CFR §2.193 Trademark correspondence and signature requirements.*

(a) Signature required. Each piece of correspondence that requires a signature must bear: (1) A handwritten signature personally signed in permanent ink by the person named as the signatory, or a true copy thereof; or

(2) An electronic signature that meets the requirements of paragraph (c) of this section, personally entered by the person named as the signatory. The Office will accept an electronic signature that meets the requirements of paragraph (c) of this section on correspondence filed on paper, by facsimile transmission (§2.195(c)), or through TEAS or ESTTA.

(b) Copy of original signature. If a copy, such as a photocopy or facsimile copy of an original signature is filed, the filer should retain the original as evidence of authenticity. If a question of authenticity arises, the Office may require submission of the original.

(c) Requirements for electronic signature. A person signing a document electronically must: (1) Personally enter any combination of letters, numbers, spaces and/or punctuation marks that he or she has adopted as a signature, placed between two forward slash (“/”) symbols in the signature block on the electronic submission; or

(2) Sign the verified statement using some other form of electronic signature specified by the Director.

(d) Signatory must be identified. The name of the person who signs a document in connection with a trademark application, registration, or proceeding before the Trademark Trial and Appeal Board must be set forth in printed or typed form immediately below or adjacent to the signature, or identified elsewhere in the filing (e.g., in a cover letter or other document that accompanies the filing).

(e) Proper person to sign. Documents filed in connection with a trademark application or registration must be signed by a proper person. Unless otherwise specified by law, the following requirements apply: (1) Verification of facts. A verification in support of an application for registration, amendment to an application for registration, allegation of use under §2.76 or §2.88, request for extension of time to file a statement of use under §2.89, or an affidavit under section 8, 12(c), 15, or 71 of the Trademark Act must be sworn to or supported by a declaration under §2.20, signed by the owner or a person properly authorized to sign on behalf of the owner. A person who is properly authorized to verify facts on behalf of an owner is: (i) A person with legal authority to bind the owner (e.g., a corporate officer or general partner of a partnership);

(ii) A person with firsthand knowledge of the facts and actual or implied authority to act on behalf of the owner; or

(iii) An attorney as defined in §11.1 of this chapter who has an actual written or verbal power of attorney or an implied power of attorney from the owner.

(2) Responses, amendments to applications, requests for express abandonment, requests for reconsideration of final actions, and requests to divide. Responses to Office actions, amendments to applications, requests for express abandonment, requests for reconsideration of final actions, and requests to divide must be signed by the owner of the application or registration, someone with legal authority to bind the owner (e.g. a corporate officer or general partner of a partnership), or a practitioner qualified to practice under §11.14 of this chapter, in accordance with the following guidelines: (i) If the owner is represented by a practitioner qualified to practice before the Office under §11.14 of this chapter, the practitioner must sign, except where the owner is required to sign the correspondence; or

(ii) If the owner is not represented by a practitioner qualified to practice under §11.14 of this chapter, the individual owner or someone with legal authority to bind the owner (e.g., a corporate officer or general partner of a partnership) must sign. In the case of joint owners who are not represented by a qualified practitioner, all must sign.

(3) Powers of attorney and revocations of powers of attorney. Powers of attorney and revocations of powers of attorney must be signed by the individual applicant, registrant or party to a proceeding pending before the Office, or by someone with legal authority to bind the applicant, registrant, or party (e.g., a corporate officer or general partner of a partnership). In the case of joint applicants, registrants, or parties, all must sign.

Once the applicant, registrant or party has designated a qualified practitioner(s), the named practitioner may sign an associate power of attorney appointing another qualified practitioner(s) as an additional person(s) authorized to prosecute the application or registration. If the applicant, registrant, or party revokes the original power of attorney, the revocation discharges any associate power signed by the practitioner whose power has been revoked. If the practitioner who signed an associate power withdraws, the withdrawal discharges any associate power signed by the withdrawing practitioner upon acceptance of the request for withdrawal by the Office.

(4) Petitions to revive under §2.66. A petition to revive under §2.66 must be signed by someone with firsthand knowledge of the facts regarding unintentional delay.

(5) Petitions to Director under §2.146. A petition to the Director under §2.146 must be signed by the petitioner, someone with legal authority to bind the petitioner (e.g., a corporate officer or general partner of a partnership), or a practitioner qualified to practice under §11.14 of this chapter, in accordance with the following guidelines: (i) If the petitioner is represented by a practitioner qualified to practice before the Office under §11.14 of this chapter, the practitioner must sign; or

(ii) If the petitioner is not represented by a practitioner authorized to practice before the Office under §11.14 of this chapter, the individual petitioner or someone with legal authority to bind the petitioner (e.g., a corporate officer or general partner of a partnership) must sign. In the case of joint petitioners, all must sign.

(6) Requests for correction, amendment or surrender of registrations. A request for correction, amendment or surrender of a registration must be signed by the owner of the registration, someone with legal authority to bind the owner (e.g., a corporate officer or general partner of a partnership), or a practitioner qualified to practice before the Office under §11.14 of this chapter. In the case of joint owners who are not represented by a qualified practitioner, all must sign.

(7) Renewal applications. A renewal application must be signed by the registrant or the registrant’s representative.

(8) Designations and revocations of domestic representative. A designation or revocation of a domestic representative must be signed by the applicant or registrant, someone with legal authority to bind the applicant or registrant (e.g., a corporate officer or general partner of a partnership), or a practitioner qualified to practice under §11.14 of this chapter. In the case of joint applicants or registrants, all must sign.

(9) Requests to change correspondence address in an application or registration. A notice of change of correspondence address in an application or registration must be signed by the applicant or registrant, someone with legal authority to bind the applicant or registrant (e.g., a corporate officer or general partner of a partnership), or a practitioner qualified to practice under §11.14 of this chapter, in accordance with the following guidelines: (i) If the applicant or registrant is represented by a practitioner qualified to practice before the Office under §11.14 of this chapter, the practitioner must sign; or

(ii) If the applicant or registrant is not represented by a practitioner qualified to practice before the Office under §11.14, the individual applicant or registrant or someone with legal authority to bind the applicant or registrant (e.g., a corporate officer or general partner of a partnership) must sign. In the case of joint applicants or joint registrants, all must sign.

(10) Cover letters. A person transmitting paper documents to the Office may sign a cover letter or transmittal letter. The Office neither requires cover letters nor questions the authority of a person who signs a communication that merely transmits paper documents.

(f) Signature as certification. The presentation to the Office (whether by signing, filing, submitting, or later advocating) of any document by any person, whether a practitioner or non-practitioner, constitutes a certification under §11.18(b) of this chapter. Violations of §11.18(b) of this chapter may jeopardize the validity of the application or registration, and may result in the imposition of sanctions under §11.18(c) of this chapter. Any practitioner violating §11.18(b) of this chapter may also be subject to disciplinary action. See §§10.23(c)(15) [old rule] and 11.18(d) of this chapter.

(g) Separate copies for separate files.(1) Since each file must be complete in itself, a separate copy of every document to be filed in connection with a trademark application, registration, or inter partes proceeding must be furnished for each file to which the document pertains, even though the contents of the documents filed in multiple files may be identical.

(2) Parties should not file duplicate copies of correspondence in a single application, registration, or proceeding file, unless the Office requires the filing of duplicate copies. The Office may dispose of duplicate copies of correspondence.

(h) Separate documents for separate branches of the Office. Since different branches or sections of the Office may consider different matters, each distinct subject, inquiry or order must be contained in a separate document to avoid confusion and delay in answering correspondence.

(i) Certified documents required by statute. When a statute requires that a document be certified, a copy or facsimile transmission of the certification is not acceptable.

The USPTO recommends filing through TEAS whenever possible. See [TMEP §301](#). Trademark documents may also be sent through the United States Postal Service (“USPS”), delivered by a courier service, or hand carried to the USPTO. Except for documents listed in [TMEP §306.01](#), correspondence may be transmitted by facsimile (“fax”). (Note that an application for registration of a mark may *not* be filed by fax, but can be filed through TEAS. 37 C.F.R. §§2.195(d)(1) and 2.197(a)(2)). Certain documents can be sent through e-mail ( see [TMEP §304](#)).

See [TMEP §§304](#) *et seq.* regarding e-mail, [TMEP §§305](#) *et seq.* regarding mailing documents to the USPTO, [TMEP §§306](#) *et seq.* regarding fax transmission, and [TMEP §307](#) regarding hand delivery.

### 302.01 Original Documents Generally Not Required

When a party files a copy of a document related to an application or registration, the USPTO will normally not require the party to submit the original document. Copies (e.g., photocopies or fax transmissions) are acceptable unless a document is required by statute to be certified (e.g., a certified copy of a final court order pursuant to 15 U.S.C. §1119). However, the party who filed the copy should retain the original in case questions arise as to the authenticity of the signature on the photocopy or faxed correspondence. See 37 C.F.R. §2.193(b).

Original certificates of registration are not required for requests for amendment or correction of a registration under §7 of the Trademark Act, and owners are strongly discouraged from submitting them. See [TMEP §§1609.01\(b\)](#) and [1609.10](#).

### 302.02 Multiple Copies of Documents Should Not Be Filed

37 CFR §2.193(g)(2)

Parties should not file duplicate copies of correspondence in a single application, registration, or proceeding file, unless the Office requires the filing of duplicate copies. The Office may dispose of duplicate copies of correspondence.

As a general rule, only one copy of each document should be filed, unless more than one copy is specifically required by statute or rule, or a USPTO employee specifically requests more than one copy.

When filing a document electronically or by fax, a party should *not* send a follow-up copy unless the USPTO specifically requests a follow-up copy. 37 C.F.R. §2.193(g)(2). Submission of duplicate documents can delay processing.

### **302.03 Identifying the Nature of Documents Filed**

#### **302.03(a) Correspondence Pertaining to Trademark Applications**

Documents filed through TEAS or ESTTA are automatically transmitted to the appropriate location and entered into the record of the appropriate application or Trademark Trial and Appeal Board (“Board”) proceeding.

For paper documents, to ensure the timely entry into the official record, every piece of correspondence filed in the USPTO pertaining to a trademark application should be identified at the beginning by a heading or caption and by the serial number of the application to which the document pertains. 37 C.F.R. §2.194(b)(1). Cover letters and transmittal letters should identify the material that they accompany.

To expedite processing, *all* incoming documents pertaining to an application should include the following identifying data:

- (1) Serial number;
- (2) Filing date;
- (3) Mark;
- (4) A title indicating the nature of the document;
- (5) Law office (identified in the most recent Office action);
- (6) Name of examining attorney identified on the most recent Office action;
- (7) Issuance date of the Office action to which the document is in response, if applicable;
- (8) The name, address (including ZIP code), and telephone number of the applicant or the applicant’s attorney; and
- (9) The applicant’s or attorney’s e-mail address.

To facilitate the matching of responses to Office actions with the correct records, examining attorneys’ Office actions issued on paper include peel-off response labels that reference the application serial number, the mark and the assigned law office. If filing a response on paper, the applicant is encouraged to affix this label to the upper right-hand corner of the response.

#### **302.03(b) Correspondence Pertaining to Trademark Registrations**

Documents filed through TEAS or ESTTA are automatically transmitted to the appropriate location and entered into the record of the appropriate registration or Board proceeding.

For paper filings, correspondence relating to a registered trademark should identify the registration by specifying the mark, the registrant’s name, and the registration number. 37 C.F.R. §2.194(b)(2).

Paper correspondence filed under 15 U.S.C. §§1057, 1058, 1059, and 1141k should be directed to the Post Registration Section of the Office.

Paper petitions to cancel a registered mark should be directed to the Board.

Court orders relating to registered trademarks should be sent to the Office of the Solicitor. *See* [TMEP §1610](#).

### 303 Receipt of Documents by the Office

*37 CFR §2.195 Receipt of trademark correspondence.*

(a) Date of receipt and Express Mail date of deposit. Trademark correspondence received in the Office is given a filing date as of the date of receipt except as follows:

(1) The Office is not open for the filing of correspondence on any day that is a Saturday, Sunday, or Federal holiday within the District of Columbia. Except for correspondence transmitted electronically under paragraph (a)(2) of this section or transmitted by facsimile under paragraph (a)(3) of this section, no correspondence is received in the Office on Saturdays, Sundays, or Federal holidays within the District of Columbia.

(2) Trademark-related correspondence transmitted electronically will be given a filing date as of the date on which the Office receives the transmission.

(3) Correspondence transmitted by facsimile will be given a filing date as of the date on which the complete transmission is received in the Office unless that date is a Saturday, Sunday, or Federal holiday within the District of Columbia, in which case the filing date will be the next succeeding day that is not a Saturday, Sunday, or Federal holiday within the District of Columbia.

(4) Correspondence filed in accordance with §2.198 will be given a filing date as of the date of deposit as “Express Mail” with the United States Postal Service.

(b) Correspondence delivered by hand. Correspondence may be delivered by hand during hours the Office is open to receive correspondence.

(c) Facsimile transmission. Except in the cases enumerated in paragraph (d) of this section, correspondence, including authorizations to charge a deposit account, may be transmitted by facsimile. The receipt date accorded to the correspondence will be the date on which the complete transmission is received in the Office, unless that date is a Saturday, Sunday, or Federal holiday within the District of Columbia. *See* §2.196. To facilitate proper processing, each transmission session should be limited to correspondence to be filed in a single application, registration or proceeding before the Office. The application serial number, registration number, or proceeding number should be entered as a part of the sender’s identification on a facsimile cover sheet.

(d) Facsimile transmissions are not permitted and if submitted, will not be accorded a date of receipt, in the following situations:

(1) Applications for registration of marks;

(2) Drawings submitted under §2.51, §2.52, §2.72, or §2.173;

(3) Correspondence to be filed with the Trademark Trial and Appeal Board, except notices of ex parte appeal;

(4) Requests for cancellation or amendment of a registration under section 7(e) of the Trademark Act; and certificates of registration surrendered for cancellation or amendment under section 7(e) of the Trademark Act; and

(5) Madrid-related correspondence submitted under §7.11, §7.21, §7.14, §7.23, §7.24, or §7.31.

(e) Interruptions in U.S. Postal Service.

(1) If the Director designates a postal service interruption or emergency within the meaning of 35 U.S.C. 21(a), any person attempting to file correspondence by “Express Mail Post Office to Addressee” service who was unable to deposit the correspondence with the United States Postal Service due to the interruption or emergency may petition the Director to consider such correspondence as filed on a particular date in the Office.

(2) The petition must:

(i) Be filed promptly after the ending of the designated interruption or emergency;

(ii) Include the original correspondence or a copy of the original correspondence; and

(iii) Include a statement that the correspondence would have been deposited with the United States Postal Service on the requested filing date but for the designated interruption or emergency in “Express Mail” service; and that the correspondence attached to the petition is the original correspondence or a true copy of the correspondence originally attempted to be deposited as Express Mail on the requested filing date.

(3) Paragraphs (e)(1) and (e)(2) of this section do not apply to correspondence that is excluded from the Express Mail procedure pursuant to §2.198(a)(1).

#### 303.01 Date of Receipt

Correspondence transmitted through TEAS is considered to have been filed on the date the USPTO receives the transmission, in Eastern Time, regardless of whether that date is a Saturday, Sunday, or Federal holiday within the District of Columbia. 37 C.F.R. §2.195(a)(2).

For paper correspondence, the date of actual receipt in the USPTO is assigned as the filing date of all correspondence. 37 C.F.R. §2.195(a). However, under 37 C.F.R. §§2.195(a)(1) and (3), no paper correspondence is “received” in the USPTO on Saturdays, Sundays, or Federal holidays within the District of Columbia. *See* [TMEP §308](#) regarding response periods that end on a Saturday, Sunday, or Federal holiday within the District of Columbia.

The filing date of an e-mail communication ( *see* [TMEP §§304 et seq.](#)) or fax transmission ( *see* [TMEP §§306 et seq.](#)) is the date the complete transmission is received in the USPTO, unless that date is a Saturday, Sunday, or Federal holiday within the District of Columbia, in which case the filing date is the next succeeding day that is not a Saturday, Sunday, or Federal holiday within the District of Columbia. 37 C.F.R.

§§2.195(a)(1) and (3). However, if the communication is properly filed using the “certificate of transmission” procedure under 37 C.F.R. §2.197, the USPTO looks to the date on the certificate to determine whether the filing is timely. [TMEP §§304.05](#) and [306.05\(c\)](#).

Similarly, if a document is mailed to the USPTO using the “certificate of mailing” procedure under 37 C.F.R. §2.197 ( *see* [TMEP §§305.02](#) *et seq.*), the filing date is the date of receipt in the USPTO, but the USPTO looks to the date on the certificate to determine whether the filing is timely. [TMEP §305.02\(e\)](#).

See [TMEP §1904.01\(b\)](#) regarding the filing date of a request for an extension of protection of an international registration to the United States under §66(a) of the Trademark Act, 15 U.S.C. §1141f(a).

## **303.02 Acknowledgment of Receipt**

### **303.02(a) TEAS “Success” Page**

When a document is filed electronically, the USPTO generally receives it within seconds after filing. TEAS almost immediately displays a “Success” page that confirms receipt. This page may be printed or copied-and-pasted into an electronic record for storage, and used as evidence of filing should any question arise as to the filing date of the document.

### **303.02(b) “Mail Room Date” Label Showing Receipt**

The USPTO places a bar code label indicating the date of receipt on every application, part of an application, amendment, letter, or other document submitted to the USPTO on paper. The label is referred to as the “Mail Room Date” label, and it establishes the date of receipt (i.e., the filing date) of any document. Before 1998, the USPTO used a stamp, known as the “Office Date Stamp,” to indicate the date of receipt of incoming documents.

### **303.02(c) Postcard Receipt**

For documents filed on paper, a party may obtain a receipt by enclosing a self-addressed, stamped postcard identifying the document. The USPTO will place a label indicating the receipt date on the card and return it to the party who filed the document.

The identifying data on the postcard should be complete and specific. The nature of the document being filed (e.g., application, affidavit, amendment, appeal, petition); the name of the applicant or registrant; the mark; the application filing date or registration date; and the application serial number, registration number, or proceeding number should be included if available. Each specific element of the filing should be listed on the postcard (e.g., written application, drawing page, fee, specimen) so that the postcard can be used as evidence that the element was submitted if it is lost or disassociated from the record.

The party submitting the postcard is responsible for placing proper postage on the self-addressed postcard, and for ensuring that the proper mailing address appears on the postcard. See [TMEP §303.02\(c\)\(i\)](#) regarding the use of postage meters.

If a postcard with proper postage accompanies application documents that are mailed to the USPTO, a bar code label indicating the serial number assigned to the application will be applied to the postcard.

If the postcard accompanies application documents that are hand delivered, the bar code label will not be applied to the postcard because the application has not yet been serialized. Therefore, if application documents are hand carried, the applicant may submit a second postcard with proper postage so that, upon serialization, the USPTO may send the additional card, with a bar code label indicating the serial number, to the applicant.

When documents for more than one application or registration are filed under a single cover, a return postcard should be attached to each document for which a receipt is desired.

### **303.02(c)(i) Postage on Return Receipt Postcards**

The party submitting a return receipt postcard ( *see* [TMEP §303.02\(c\)](#)) is responsible for placing proper postage on the self-addressed postcard. Proper postage means that it has a stamp(s) in the correct amount or a meter stamp postmark that complies with USPS requirements.

The USPS provides in its Domestic Mail Manual that the date in a meter postmark must be the actual date of deposit, with limited exceptions, and that meter postmarks used to prepay reply postage must *not* show the date. The USPS will not accept for mailing a post card that contains a postage meter date more than ten days old. Thus, a return receipt postcard containing a dated meter postmark may not be delivered by the USPS, because the postcard will be mailed by the Office substantially after the date on which the meter postmark is printed on the card.

Therefore, to ensure the receipt of a confirmation post card, the party filing the postcard should: (1) affix postage stamps to their postcards, or purchase already-stamped post cards from the USPS; or (2) if a postage meter is used, ensure that the meter postmark does not show the date, and follow the instructions in the postage meter license agreement regarding prepay reply postage. *See* notice at 1246 TMOG 42 (May 8, 2001).

## **304 Electronic Mail**

### **304.01 Communications Acceptable Via Electronic Mail**

Applicants and registrants may use e-mail to conduct informal communications regarding a particular application or registration as an alternative to telephone communications. *See* TMEP §§[709.04](#) and [709.05](#).

For example, an applicant may submit via e-mail:

- Questions regarding an outstanding Office action that do not constitute a response;
- Authorization to issue an examiner's amendment or priority action ( *see* [TMEP §§707.01](#) and [708.01](#));
- Objection to an examiner's amendment ( *see* [TMEP §§707](#) and [707.02](#));
- Notification of termination of a cancellation proceeding that is the basis for suspension ( *see* [TMEP §716.02\(a\)](#)).
- A request to arrange a convenient time to speak by telephone.

*See* TMEP §[304.02](#) regarding communications that are not acceptable via e-mail.

Attachments. The USPTO will accept legible attachments to e-mail in .jpg or .pdf format. The USPTO will not accept or open attachments in any other format.

The examining attorney must ensure that all relevant informal e-mail communications from applicants are entered into the electronic record. See [TMEP §§709.04](#) and [709.05](#) for further information.

### **304.02 Communications Not Acceptable Via Electronic Mail**

E-mail may *not* be used to file applications for registration of marks, responses to Office actions, pre- or post-publication amendments to an application, changes of correspondence address, appointments or revocations of attorneys, attorney withdrawal requests, petitions, documents required by statute to show use of a mark in commerce or to request an extension of time to show such use, and post-registration maintenance documents or proposed amendments. These documents may be filed electronically using TEAS.

Further, e-mail may not be used to request an advisory opinion as to the likelihood of overcoming a refusal or requirement. The examining attorney should advise the applicant to file a formal response for consideration of arguments regarding any refusal or requirement.

See TMEP §[304.01](#) regarding communications that are acceptable via e-mail, §[709.04](#) regarding telephone and e-mail communications, and §[709.05](#) regarding informal communications.

The Board does not accept e-mail communications.

### **304.03 Authorization of Electronic Mail Communications from the USPTO**

The USPTO will send communications concerning an application or registration by e-mail only if e-mail communication is authorized by the applicant, registrant, or a practitioner qualified under 37 C.F.R. §11.14 who has been authorized by the applicant or registrant to act on its behalf .

The applicant, registrant, or qualified practitioner may authorize the USPTO to communicate by e-mail by so indicating in the initial application or in any official written communication. The authorization must include the e-mail address to which e-mail is to be sent. If the applicant, registrant, or the applicant's qualified practitioner authorizes the USPTO to send official communications by e-mail, one primary e-mail address may be designated, as well as up to four secondary e-mail addresses for duplicate courtesy copies of the correspondence. See [TMEP §403](#) regarding treatment of undeliverable e-mail correspondence.

It is the responsibility of the applicant, registrant, or qualified practitioner to notify the USPTO of any changes of e-mail address. See [TMEP §609.03](#).

The Office considers any authorization for e-mail communications to end upon the date of registration of a mark.

See [TMEP §304.06](#) regarding outgoing e-mail.

### **304.04 Date of Receipt of Electronic Mail**

The date of receipt of an incoming e-mail communication is the date the communication is received in the USPTO. 37 C.F.R. §2.195(a)(1).

See [TMEP §304.05](#) regarding certificates of transmission by e-mail.

### 304.05 Certificate of Transmission by Electronic Mail

Under 37 C.F.R. §2.197, e-mail correspondence will be considered to be timely filed, even if received after the due date, if the correspondence is: (1) transmitted to the USPTO by e-mail on or before the due date; and (2) accompanied by a certificate attesting to the date of transmission. See [TMEP §§306.05 et seq.](#) regarding the certificate of transmission procedure under 37 C.F.R. §2.197.

If e-mail correspondence is timely filed with a certificate of transmission, but is not received by or is lost within the USPTO, the correspondence will be considered timely based on the date of transmission set forth on the certificate of transmission, if the party who transmitted the correspondence: (1) informs the USPTO in writing of the previous e-mail transmission of the correspondence within two months after becoming aware that the USPTO has no evidence of its receipt; (2) provides a copy of the previously transmitted correspondence, including the certificate of transmission; and (3) submits a statement attesting to the personal knowledge of transmission of the correspondence. 37 C.F.R. §2.197(b). The statement attesting to the personal knowledge of transmission does not have to be verified. See [TMEP §306.05\(d\)](#) for additional information about correspondence that is transmitted with a certificate of transmission but not received by or lost within the USPTO.

The following wording is suggested for the certificate of transmission:

#### CERTIFICATE OF TRANSMISSION

I hereby certify that this correspondence is being transmitted by electronic mail to the United States Patent and Trademark Office on the date shown below.

\_\_\_\_\_  
(Typed or Printed Name of Person Signing Certificate)

\_\_\_\_\_  
(Signature)

\_\_\_\_\_  
(Date)

See [TMEP §304.07](#) regarding signature of electronic mail.

Responses to examining attorneys' Office actions cannot be filed by e-mail. See [TMEP §304.02](#). Therefore, the certificate of transmission by e-mail procedure cannot be used for such responses.

### 304.06 Outgoing Electronic Mail

The USPTO will not send formal e-mail notices or correspondence to an applicant, registrant, or practitioner qualified under 37 C.F.R. §11.14 unless the applicant, registrant, or qualified practitioner authorizes the USPTO to do so. [TMEP §304.03](#).

When authorized to communicate by e-mail, the USPTO may send notices regarding Office actions and other official correspondence to the e-mail address designated by the applicant, registrant, or qualified practitioner. If the applicant, registrant, or qualified practitioner authorizes the USPTO to send official communications by e-mail, one primary e-mail address may be designated, as well as up to four secondary e-mail addresses for duplicate courtesy copies of the correspondence. See [TMEP §403](#) regarding treatment of undeliverable e-mail correspondence.

The USPTO is not required to send Office actions and other official correspondence by e-mail whenever the applicant or registrant authorizes e-mail correspondence. The USPTO may send correspondence by e-mail, regular mail, fax, or other appropriate means.

See [TMEP §304.08](#) regarding addresses for e-mail correspondence directed to the USPTO.

### 304.07 Signature of Electronic Mail

An applicant, registrant or attorney may sign an e-mail communication by entering a "symbol" that he or she has adopted as a signature between two slashes. See 37 C.F.R. §2.193(c) and [TMEP §611.01\(c\)](#).

In addition, the USPTO will accept an e-mail communication containing the "/s/" ("/(signature)/") notation in lieu of a signature.

A scanned image of a document signed in ink is also acceptable, as long as the image is attached in .jpg or .pdf format.

Under 37 C.F.R. §11.18(b), the use of an electronic signature under 37 C.F.R. §2.193(c) or an "/s/" notation, will be understood to constitute a certification that:

- (1) The correspondence has been read by the applicant, registrant, or attorney;
- (2) The filing of the correspondence is authorized;
- (3) To the best of the signatory's knowledge, information, and belief, there is good ground to support the correspondence; and
- (4) The correspondence is not presented for purposes of delay.

The signatory must personally sign the communication. 37 C.F.R. §2.193(c)(1). See TMEP §§[611.02](#), [611.01\(b\)](#), and [611.01\(c\)](#).

### **304.08 E-Mail Addresses for Correspondence with the Office**

Where an applicant or registrant is permitted to send communications to the USPTO by e-mail ( see [TMEP §304.01](#)), the applicant or registrant should send e-mail to the address set forth on the correspondence sent by the USPTO. Applicants and registrants should *not* send e-mail to more than one address in the USPTO, and should not send courtesy copies of an e-mail message (e.g., “Cc” or “Bcc”) to additional e-mail addresses within the USPTO.

Responses to examining attorneys’ Office actions cannot be filed by e-mail. See [TMEP §304.02](#).

### **304.09 “Confirmation” Copies of E-Mail Communications Should Not Be Sent to the Office**

Applicants, registrants, and attorneys should *not* send “confirmation” copies of e-mail communications to the USPTO by fax, regular mail, or any other means, because this can delay processing.

## **305 Mailing Documents to the Office**

### **305.01 Mailing Addresses**

Documents filed through TEAS are automatically sent to the appropriate location.

For trademark-related documents filed on paper, except for documents sent to the Assignment Recordation Branch for recordation, requests for copies of trademark documents, and certain documents filed under the Madrid Protocol (listed below), all trademark-related correspondence that is mailed to the USPTO should be addressed to:

Commissioner for Trademarks  
P.O. Box 1451  
Alexandria, Virginia 22313-1451

The names of individual employees should *not* be placed on the *envelopes* in which official communications are sent to the USPTO. Envelopes may be marked “Attention: Trademark Examining Operation.” Responses to Office actions should include the name of the examining attorney in the heading.

#### *Documents Filed Under the Madrid Protocol*

International applications under 37 C.F.R. §7.11, subsequent designations under 37 C.F.R. §7.21, responses to irregularity notices under 37 C.F.R. §7.14, requests to record changes in the International Register under 37 C.F.R. §§7.23 and 7.24, requests for transformation under 37 C.F.R. §7.31, requests to note replacement under 37 C.F.R. §7.28, and petitions to the Director to review the actions of the USPTO’s Madrid Processing Unit, when filed by mail, must be mailed to:

Madrid Processing Unit  
600 Dulany Street  
Alexandria, Virginia 22314-5793

37 C.F.R. §§2.190(e) and 7.4(b).

*Documents to be Recorded in Assignment Recordation Branch*

To expedite processing, the USPTO recommends filing requests to record documents through the USPTO website, at <http://etas.uspto.gov>. Documents filed electronically are recorded much faster than their paper counterparts. Paper documents and cover sheets to be recorded in the Assignment Recordation Branch should be sent to Mail Stop Assignment Recordation Services, Director of the United States Patent and Trademark Office, P. O. Box 1450, Alexandria VA 22313-1450. 37 C.F.R. §§2.190(c) and 3.27.

*Requests for Copies of Trademark Documents*

Copies of trademark documents can be ordered through the USPTO website at <http://www.uspto.gov>. Requests for copies of documents can also be faxed or e-mailed to the USPTO, with an authorization to charge the fee to a credit card or USPTO deposit account. See [TMEP §111](#) for additional information.

All other requests for certified or uncertified copies of trademark documents should be sent to: Mail Stop Document Services, Director of the United States Patent and Trademark Office, P. O. Box 1450, Alexandria VA 22313-1450. 37 C.F.R. §§2.190(d).

**305.02 Certificate of Mailing Procedure***37 CFR §2.197 Certificate of mailing or transmission.*

(a) Except in the cases enumerated in paragraph (a)(2) of this section, correspondence required to be filed in the Office within a set period of time will be considered as being timely filed if the procedure described in this section is followed. The actual date of receipt will be used for all other purposes.

(1) Correspondence will be considered as being timely filed if:

(i) The correspondence is mailed or transmitted prior to expiration of the set period of time by being:

(A) Addressed as set out in §2.190 and deposited with the U.S. Postal Service with sufficient postage as first class mail; or

(B) Transmitted by facsimile to the Office in accordance with §2.195(c); and

(ii) The correspondence includes a certificate for each piece of correspondence stating the date of deposit or transmission. The person signing the certificate should have a reasonable basis to expect that the correspondence would be mailed or transmitted on or before the date indicated.

(2) The procedure described in paragraph (a)(1) of this section does not apply to:

(i) Applications for the registration of marks under 15 U.S.C. 1051 or 1126; and

(ii) Madrid-related correspondence filed under §7.11, §7.21, §7.14, §7.23, §7.24 or §7.31.

(b) In the event that correspondence is considered timely filed by being mailed or transmitted in accordance with paragraph (a) of this section, but not received in the Office, and an application is abandoned, a registration is cancelled or expired, or a proceeding is dismissed, terminated, or decided with prejudice, the correspondence will be considered timely if the party who forwarded such correspondence:

(1) Informs the Office of the previous mailing or transmission of the correspondence within two months after becoming aware that the Office has no evidence of receipt of the correspondence;

(2) Supplies an additional copy of the previously mailed or transmitted correspondence and certificate; and

(3) Includes a statement that attests on a personal knowledge basis or to the satisfaction of the Director to the previous timely mailing or transmission. If the correspondence was sent by facsimile transmission, a copy of the sending unit's report confirming transmission may be used to support this statement.

(c) The Office may require additional evidence to determine whether the correspondence was timely filed.

In 37 C.F.R. §2.197, there is a “certificate of mailing or transmission” procedure to avoid lateness due to mail delay. This procedure may be used for all trademark correspondence **except**:

- Applications for registration of marks;
- International applications under 37 C.F.R. §7.11;
- Subsequent designations under 37 C.F.R. §7.21;
- Responses to notices of irregularity under 37 C.F.R. §7.14;
- Requests to record changes of ownership under 37 C.F.R. §7.23;
- Requests to record restrictions of the holder's right of disposal, or the release of such restrictions, under 37 C.F.R. §7.24; and
- Requests for transformation under 37 C.F.R. §7.31.

37 C.F.R. §§2.197(a)(2) and 7.4(e).

Under the certificate of mailing or transmission procedure, correspondence is considered to be timely even if received after the due date, if the correspondence was: (1) deposited with the United States Postal Service as first class mail or transmitted to the USPTO by facsimile transmission before the expiration of the filing period; and (2) accompanied by a certificate attesting to the date of deposit or transmission.

Filers must retain a copy of the correspondence, including the signed and dated certificate. *In re Sasson Licensing Corp.*, 35 USPQ2d 1510 (Comm'r Pats. 1995).

See [TMEP §§305.02\(a\)](#) *et seq.* regarding the certificate of mailing procedure, and [TMEP §§306.05](#) *et seq.* regarding the certificate of facsimile transmission procedure.

### **305.02(a) When Certificate of Mailing Procedure May Not Be Used**

The certificate of mailing procedure may be used for all trademark filings *except*:

- An application to register a mark;
- International applications under 37 C.F.R. §7.11;
- Subsequent designations under 37 C.F.R. §7.21;
- Responses to notices of irregularity under 37 C.F.R. §7.14;
- Requests to record changes of ownership under 37 C.F.R. §7.23;
- Requests to record restrictions of the holder's right of disposal, or the release of such restrictions, under 37 C.F.R. §7.24; and
- Requests for transformation under 37 C.F.R. §7.31.

37 C.F.R. §§2.197(a)(2) and 7.4(e).

### **305.02(b) Mailing Requirements**

The correspondence must be deposited in the United States mail, properly addressed (see [TMEP §305.01](#) for mailing addresses), and the envelope must have sufficient postage as first class mail. Since first class mail services of the USPS are not available in foreign countries, the certificate of mailing procedure may not be used for sending mail to the USPTO from a foreign country.

### **305.02(c) Location and Form of Certificate**

The certificate of mailing must: (1) state the date of deposit in the mail, which must be a date within the set filing period (this includes the last day of the period, or the succeeding day that is not a Saturday, Sunday, or Federal holiday within the District of Columbia when the last day of the period falls on a Saturday, Sunday, or Federal holiday within the District of Columbia); and (2) be signed by a person who has a reasonable basis to expect the correspondence to be deposited in the mail on the date indicated. The signature of the certificate must be separate from any signature for the correspondence being deposited.

The best location for the certificate of mailing is at the beginning of the correspondence to which it pertains, typed in its entirety.

The certificate of mailing should be separated from contents of the correspondence that are on the same page. Several blank lines between the contents and the certificate will suffice.

If the certificate of mailing does not fit on the correspondence to which it pertains, the certificate may be placed on a separate sheet of paper that is attached securely to the correspondence. The separate sheet must exhibit or bear a complete identification of the nature of the document or fee as well as an identification of the application, registration, and/or proceeding to which the document pertains (including serial number or registration number). The separate sheet may be a cover letter or transmittal letter, with the certificate placed at the bottom of the letter and signed separately from the letter. If there is any doubt concerning the correspondence to which a certificate of mailing on a separate sheet relates, the USPTO will not accept the certificate.

There must be a certificate of mailing for each piece of correspondence. When correspondence for more than one application or registration is mailed in a single envelope, each item of correspondence must have its own certificate of mailing. Similarly, when more than one type of correspondence is submitted in connection with the same application, each item of correspondence must have its own certificate of mailing.

It is suggested that the certificate be signed by the applicant or the party involved in the proceeding, or by the attorney for such person. If someone else signs, it should be a responsible person in a position to know that the mail will be deposited on the date specified.

The USPTO accepts the date of deposit stated in the certificate of mailing on the basis of the statement of personal knowledge. The USPTO does not normally inspect the postmark on the envelope.

### **305.02(d) Wording of Certificate of Mailing**

The following wording is suggested for the certificate of mailing.

## CERTIFICATE OF MAILING

I hereby certify that this correspondence is being deposited with the United States Postal Service as first class mail in an envelope addressed to: Commissioner for Trademarks, P.O. Box 1451, Alexandria, Virginia 22313-1451 on the date shown below:

\_\_\_\_\_  
(Typed or Printed Name of Person Signing Certificate)

\_\_\_\_\_  
(Signature)

\_\_\_\_\_  
(Date)

### **305.02(e) Effect of Certificate of Mailing**

The filing date assigned to paper correspondence is the date of actual receipt in the USPTO. 37 C.F.R. §2.195(a). The USPTO does not retain the envelopes in which material is received or record the date of the postmark.

The date of deposit indicated on the certificate of mailing is used only to determine whether the correspondence was deposited with the USPS within the filing period. Therefore, if the correspondence is actually received in the USPTO within the filing period, the certificate of mailing is ignored. If, however, the USPTO receives the correspondence after the filing period has expired, the USPTO looks to see whether a certificate of mailing was included. If no certificate is found, the correspondence is untimely.

When a document received after the expiration of the filing period includes a signed certificate of mailing, and the date of deposit on the certificate is within the filing period, the USPTO considers the correspondence to be timely filed.

If the filing period ends on a Saturday, Sunday, or Federal holiday within the District of Columbia, the correspondence is considered timely if the date of deposit on the certificate of mailing is the next succeeding day that is not a Saturday, Sunday or Federal holiday within the District of Columbia ( *see* 37 C.F.R. §2.196 and [TMEP §308](#) ).

Whenever it is necessary to change the effective filing date of an application (e.g., when an application filed under §1(b) of the Trademark Act is amended to request registration on the Supplemental Register after

submission of an allegation of use), the date of actual receipt rather than the date on the certificate is the new effective filing date. See [TMEP §§206](#) *et seq.* as to changes in the effective filing date of an application.

### **305.02(f) Correspondence Mailed Pursuant to 37 C.F.R. §2.197 but Not Received by Office**

If correspondence filed with a certificate of mailing is not received by (or is lost within) the USPTO, the USPTO will consider the correspondence to be timely based on the date of deposit stated in the certificate of mailing if the party who filed the correspondence:

- (1) informs the USPTO in writing of the previous mailing of the correspondence within two months after becoming aware that the USPTO has no evidence of receipt of the correspondence;
- (2) supplies an additional copy of the previously mailed correspondence, including a copy of the signed and dated certificate of mailing ( *see In re Sasson Licensing Corp.*, 35 USPQ2d 1510 (Comm'r Pats. 1995)); and
- (3) includes a statement attesting to the previous timely mailing on the basis of the signer's personal knowledge. This statement does not have to be verified.

37 C.F.R. §2.197(b).

The two-month time period for notifying the USPTO begins to run from the date that the party who filed the correspondence became aware that the USPTO has no evidence of receipt of the correspondence, unless the USPTO has issued a written action, such as a notice of abandonment or cancellation. In such situations, the issue date of the USPTO written action will serve as the starting point for measuring timeliness. *See* 37 C.F.R. §§2.146(d) and 2.197(b)(1). *See also* [TMEP §1705.04](#).

The required evidence should be sent to the area in the USPTO where the misplaced or lost document was intended to be filed, e.g., the law office, ITU/Divisional Unit, or Post Registration Section.

If all three criteria listed above cannot be met, the only remedy available is a petition to revive under 37 C.F.R. §2.66 (if appropriate) or a petition under 37 C.F.R. §2.146, which must include a petition fee, and a statement that attests on a personal knowledge basis to the previous timely mailing, along with any additional evidence. *See* 37 C.F.R. §§2.66 and 2.146; [TMEP §§1702](#) through [1708](#) regarding petitions under 37 C.F.R. §2.146 and [TMEP §§1714](#) *et seq.* regarding petitions to revive.

The above procedure does not apply to the filing of an application for registration of a mark, or to the Madrid-related documents listed in 37 C.F.R. §2.197(a)(2) and [TMEP §305.02\(a\)](#).

The USPTO may require additional evidence relating to the mailing or transmission of correspondence. 37 C.F.R. §2.197(c). *See, e.g., In re Klein*, 6 USPQ2d 1547 (Comm'r Pats. 1987), *aff'd sub nom. Klein v. Peterson*, 696 F. Supp. 695, 8 USPQ2d 1434 (D.D.C. 1988), *aff'd*, 866 F.2d 412, 9 USPQ2d 1558 (Fed. Cir. 1989), *cert. denied*, 490 U.S. 1091 (1989).

### **305.02(g) Correspondence Deposited as First Class Mail Pursuant to 37 C.F.R. §2.197 and Returned by the U.S. Postal Service**

The USPS requires that all domestic first class mail that weighs 16 ounces or more be presented to a retail clerk at a USPS office. All such mail that is not presented to a retail clerk at a USPS office (e.g., is placed in a mailbox) will be returned by the USPS. The USPS has posted notice of this requirement on mailboxes. The "Express Mail" service of the USPS is not affected.

Correspondence must be deposited with the USPS as first class mail in compliance with any and all applicable requirements of the USPS to be considered “[d]eposited with the U.S. Postal Service,” within the meaning of 37 C.F.R. §2.197(a)(1)(i)(A). Therefore, correspondence returned by the USPS as not mailed in compliance with USPS requirements concerning mail weighing sixteen ounces or more is not entitled to any benefit under 37 C.F.R. §2.197. *See* notice at 1192 TMOG 43 (Nov. 12, 1996).

### 305.02(h) Certificate of Mailing Requirements Strictly Enforced

The requirements of 37 C.F.R. §2.197 are strictly enforced, and the USPTO denies petitions to consider a document timely filed as of the date on the certificate if a party fails to comply with these requirements.

A party’s inadvertent failure to comply with the requirements of a rule is not considered an extraordinary situation that would warrant waiver of a rule under 37 C.F.R. §2.146(a)(5) or §2.148. *See Honigsbaum v. Lehman*, 903 F. Supp. 8, 37 USPQ2d 1799 (D.D.C. 1995), *aff’d mem.*, 95 F.3d 1166 (Fed. Cir. 1996) (Commissioner did not abuse his discretion in refusing to waive requirements of 37 C.F.R. §1.10(c) and grant filing date to patent application, where applicant failed to produce “Express Mail” customer receipt or any other evidence that application was actually deposited with USPS as “Express Mail”); *In re Sasson Licensing Corp.*, 35 USPQ2d 1510 (Comm’r Pats. 1995) (failure to retain executed hard copy of certificate of mailing under 37 C.F.R. §1.8 not extraordinary situation that would justify waiver of rule); *Gustafson v. Strange*, 227 USPQ 174 (Comm’r Pats. 1985) (counsel’s unawareness of 37 C.F.R. §1.8 not extraordinary situation warranting waiver of a rule); *In re Chicago Historical Antique Automobile Museum, Inc.*, 197 USPQ 289 (Comm’r Pats. 1978) (lateness due to mail delay not deemed to be extraordinary situation, because certificate of mailing procedure under 37 C.F.R. §1.8 was available to petitioner).

### 305.03 “Express Mail”

#### *37 CFR §2.198 Filing of correspondence by “Express Mail.”*

(a)(1) Except for documents listed in paragraphs (a)(1)(i) through (vii) of this section, any correspondence received by the Office that was delivered by the “Express Mail Post Office to Addressee” service of the United States Postal Service (USPS) will be considered filed with the Office on the date of deposit with the USPS. The Express Mail procedure does not apply to:

- (i) Applications for registration of marks;
- (ii) Amendments to allege use under section 1(c) of the Act;
- (iii) Statements of use under section 1(d) of the Act;
- (iv) Requests for extension of time to file a statement of use under section 1(d) of the Act;
- (v) Affidavits of continued use under section 8 of the Act;
- (vi) Renewal requests under section 9 of the Act; and
- (vii) Requests to change or correct addresses.

(2) The date of deposit with USPS is shown by the “date in” on the “Express Mail” label or other official USPS notation. If the USPS deposit date cannot be determined, the correspondence will be accorded the date of receipt in the Office as the filing date.

(b) Correspondence should be deposited directly with an employee of the USPS to ensure that the person depositing the correspondence receives a legible copy of the “Express Mail” mailing label with the “date-in” clearly marked. Persons dealing indirectly with the employees of the USPS (such as by deposit in an “Express Mail” drop box) do so at the risk of not receiving a copy of the “Express Mail” mailing label with the desired “date-in” clearly marked. The paper(s) or fee(s) that constitute the correspondence should also include the “Express Mail” mailing label number thereon. *See* paragraphs (c), (d) and (e) of this section.

(c) Any person filing correspondence under this section that was received by the Office and delivered by the “Express Mail Post Office to Addressee” service of the USPS, who can show that there is a discrepancy between the filing date accorded by the Office to the correspondence and the date of deposit as shown by the “date-in” on the “Express Mail” mailing label or other official USPS notation, may petition the Director to accord the correspondence a filing date as of the “date-in” on the “Express Mail” mailing label or other official USPS notation, provided that:

(1) The petition is filed within two months after the person becomes aware that the Office has accorded, or will accord, a filing date other than the USPS deposit date;

(2) The number of the “Express Mail” mailing label was placed on the paper(s) or fee(s) that constitute the correspondence prior to the original mailing; and

(3) The petition includes a true copy of the “Express Mail” mailing label showing the “date-in,” and of any other official notation by the USPS relied upon to show the date of deposit.

(d) Any person filing correspondence under this section that was received by the Office and delivered by the “Express Mail Post Office to Addressee” service of the USPS, who can show that the “date-in” on the “Express Mail” mailing label or other official notation entered by the USPS was incorrectly entered or omitted by the USPS, may petition the Director to accord the correspondence a filing date as of the date the correspondence is shown to have been deposited with the USPS, provided that:

(1) The petition is filed within two months after the person becomes aware that the Office has accorded, or will accord, a filing date based upon an incorrect entry by the USPS;

(2) The number of the “Express Mail” mailing label was placed on the paper(s) or fee(s) prior to the original mailing; and

(3) The petition includes a showing that establishes, to the satisfaction of the Director, that the correspondence was deposited in the “Express Mail Post Office to Addressee” service prior to the last scheduled pickup on the requested filing date. Any showing pursuant to this paragraph must be corroborated by evidence from the USPS or evidence that came into being within one business day after the deposit of the correspondence in the “Express Mail Post Office to Addressee” service of the USPS.

(e) If correspondence is properly addressed to the Office pursuant to §2.190 and deposited with sufficient postage in the “Express Mail Post Office to Addressee” service of the USPS, but not received by the Office, the party who mailed the correspondence may petition the Director to consider such correspondence filed in the Office on the USPS deposit date, provided that:

(1) The petition is filed within two months after the person becomes aware that the Office has no evidence of receipt of the correspondence;

(2) The number of the “Express Mail” mailing label was placed on the paper(s) or fee(s) prior to the original mailing;

(3) The petition includes a copy of the originally deposited paper(s) or fee(s) showing the number of the “Express Mail” mailing label thereon, a copy of any returned postcard receipt, a copy of the “Express Mail” mailing label showing the “date-in,” a copy of any other official notation by the USPS relied upon to show the date of deposit, and, if the requested filing date is a date other than the “date-in” on the “Express Mail” mailing label or other official notation entered by the USPS, a showing pursuant to paragraph (d)(3) of this section that the correspondence was deposited in the “Express Mail Post Office to Addressee” service prior to the last scheduled pickup on the requested filing date; and

(4) The petition includes a statement that establishes, to the satisfaction of the Director, the original deposit of the correspondence and that the copies of the correspondence, the copy of the “Express Mail” mailing label, the copy of any returned postcard receipt, and any official notation entered by the USPS are true copies of the originally mailed correspondence, original “Express Mail” mailing label, returned postcard receipt, and official notation entered by the USPS.

(f) The Office may require additional evidence to determine whether the correspondence was deposited as “Express Mail” with the USPS on the date in question.

### *Documents Excluded From 37 C.F.R. §2.198*

Trademark Rule 2.198, 37 C.F.R. §2.198, provides a procedure for obtaining a filing date as of the date that correspondence is deposited as “Express Mail” with the USPS. However, this procedure does **not** apply to the following trademark documents:

- Applications for registration of marks;
- Amendments to allege use under §1(c) of the Trademark Act, 15 U.S.C. §1051(c);
- Statements of use under §1(d) of the Trademark Act, 15 U.S.C. §1051(d);
- Requests for extension of time to file a statement of use under §1(d) of the Trademark Act, 15 U.S.C. §1051(d);
- Affidavits of continued use under §8 of the Trademark Act, 15 U.S.C. §1058;
- Renewal applications under §9 of the Trademark Act, 15 U.S.C. §1059;
- Requests to change or correct addresses;
- Combined filings under §§8 and 9 of the Trademark Act, 15 U.S.C. §§1058 and 1059;
- Combined affidavits or declarations under §§8 and 15 of the Trademark Act, 15 U.S.C. §§1058 and 1065;
- Responses to notices of irregularity under 37 C.F.R. §7.14;
- Requests for transformation under 37 C.F.R. §7.31; and
- Requests to note replacement under §7.28.

37 C.F.R. §§2.198(a)(1) and 7.4(b)(2). See notice at 67 Fed. Reg. 36099 (May 23, 2002), available at <http://www.uspto.gov/web/offices/com/sol/notices/expmailrule2.pdf>.

If the documents listed above are filed by “Express Mail,” they will receive a filing date as of the date of receipt in the USPTO and *not* the date of deposit with USPS. 37 C.F.R. §2.195(a). See [TMEP §303.01](#).

### *Lost Documents*

If one of the documents listed above is sent by “Express Mail” but is lost within the USPTO, and the applicant or registrant presents proof of actual receipt in the form of evidence that a USPTO employee signed for or acknowledged the “Express Mail” package (e.g., an “Express Mail” mailing label that bears an Office date stamp or label or the signature of a USPTO employee, or evidence from the USPS website showing that the document was actually received in the USPTO), the USPTO will grant the document a filing date as of the

*date of actual receipt in the USPTO.* The applicant or registrant must submit a true copy of the document(s), and an affidavit or declaration under 37 C.F.R. §2.20 attesting to the contents of the “Express Mail” package. See [TMEP §1711](#) regarding restoration of application filing dates, [TMEP §1712.01](#) regarding reinstatement of abandoned applications, and [TMEP §§1712.02](#) *et seq.* regarding reinstatement of cancelled or expired registrations.

If a document is sent by “Express Mail” but is not received by or is lost within the USPTO, and the applicant does not have proof of actual receipt in the USPTO, the USPTO will not grant a filing date to the document.

*Certificate of Mailing Under 37 C.F.R. §2.197 for Documents Sent by Express Mail*

For documents other than applications for registration of marks and the Madrid-related documents listed in 37 C.F.R. §2.197(a)(2) ( *see* [TMEP §305.02\(a\)](#)), the certificate of mailing procedure of 37 C.F.R. §2.197 may be used for documents sent by “Express Mail” as well as documents sent by first class mail. Under the certificate of mailing procedure, correspondence is considered to be timely filed even if received after the due date, if the correspondence is deposited with the USPS with sufficient postage as first class mail before the expiration of the filing period and accompanied by a certificate attesting to the date of deposit. Correspondence sent by “Express Mail” is deemed to meet the requirements of 37 C.F.R. §2.197(a)(1)(i)(A) for postage as first class mail, because the postage for “Express Mail” exceeds the postage required for first class mail. However, to use the certificate of mailing procedure for documents mailed by “Express Mail,” the filer must place a certificate attesting to the date of deposit and meeting the requirements of 37 CFR §2.197(a)(1)(ii) on the document prior to mailing. See [TMEP §§305.02](#) *et seq.* for further information about the certificate of mailing procedure.

The following wording is suggested for a certificate of mailing when correspondence is sent by “Express Mail:”

#### CERTIFICATE OF MAILING

I hereby certify that this correspondence is being deposited with the United States Postal Service as “Express Mail” in an envelope addressed to: Commissioner for Trademarks, P.O. Box 1451, Alexandria, Virginia 22313-1451 on the date shown below:

\_\_\_\_\_  
(Typed or Printed Name of Person Signing Certificate)

\_\_\_\_\_  
(Signature)

\_\_\_\_\_  
(Date)

*Documents Not Excluded From 37 C.F.R. §2.198*

The procedures for filing documents by “Express Mail” under 37 C.F.R. §2.198 may be used for documents *not expressly excluded by 37 C.F.R. §2.198(a)*, e.g., documents filed with the Board or the Assignment Recordation Branch of the Office. These documents are entitled to a filing date as of the date of deposit with USPS if the filer meets the requirements of 37 C.F.R. §2.198. The rule requires: (1) the document must be sent through the “Express Mail Post Office to Addressee” service of the USPS; (2) it must be deposited prior to the last scheduled pickup on the relevant date; (3) it must be properly addressed in accordance with the requirements of 37 C.F.R. §2.190; and (4) the number of the “Express Mail” mailing label must be placed on the document prior to mailing.

If a document not excluded by 37 C.F.R. §2.198(a) is filed in accordance with the requirements of 37 C.F.R. §2.198, but the document is not given a filing date as of the date of deposit as “Express Mail,” the filer may request the USPTO to change the filing date of the document, pursuant to 37 C.F.R. §2.198(c), (d) or (e). Rule 2.198(c) applies when there is a discrepancy between the filing date assigned by the USPTO and the “date-in” entered by the USPS on the “Express Mail” mailing label; Rule 2.198(d) applies when the “date-in” is incorrectly entered or omitted by the USPS; and Rule 2.198(e) applies when correspondence deposited with the USPS as “Express Mail” is not received by (or is lost within) the USPTO. A petition to change the filing date of a document pursuant to 37 C.F.R. §2.198 must:

- (1) be filed within two months of the issuance date of the action from which relief is requested, or, if there is no “issuance of an action,” within two months of the date that the party who filed the correspondence became aware that there was a problem with the USPTO’s receipt of the correspondence (37 C.F.R. §§2.146(d), 2.198(c)(1), 2.198(d)(1), and 2.198(e)(1); [TMEP §1705.04](#));
- (2) include a showing that the number of the “Express Mail” mailing label was placed on the correspondence prior to the original mailing (37 C.F.R. §§2.198(c)(2), 2.198(d)(2), and 2.198(e)(2));
- (3) include a true copy of the “Express Mail” mailing label with the “date-in” clearly marked (37 C.F.R. §§2.198(c)(3), 2.198(d)(3), and 2.198(e)(3));
- (4) if the filer contends that the “date-in” was entered incorrectly by the USPS, include: (a) a showing that the correspondence was deposited as “Express Mail” prior to the last scheduled pickup on the requested filing date; and (b) evidence from the USPS or evidence that came into being *after* deposit and within one business day of the deposit of the correspondence as “Express Mail” (37 C.F.R. §2.198(d)(3)); and
- (5) if the correspondence is lost within or never received by the USPTO, include: (a) a true copy of the originally deposited correspondence showing the number of the “Express Mail” mailing label; and (b) a statement, signed by the person who deposited the documents as “Express Mail” with the USPS, setting forth the date and time of deposit, and stating that the copies of the correspondence and “Express Mail” mailing label accompanying the petition are true copies of those originally sent (37 C.F.R. §§2.198(e)(3) and 2.198(e)(4)).

When correspondence not excluded by 37 C.F.R. §2.198(a) is placed in an “Express Mail” drop box after the box has been cleared for the last time on a given day, it is considered to have been deposited as of the date of receipt indicated on the “Express Mail” mailing label by the USPS employee. *See* notice at 61 Fed. Reg. 56439 (Nov. 1, 1996) and 1192 TMOG 95 (Nov. 26, 1996).

### **305.04 Interruptions in U.S. Postal Service**

#### *37 CFR §2.195(e) Interruptions in U.S. Postal Service.*

(1) If the Director designates a postal service interruption or emergency within the meaning of 35 U.S.C. 21(a), any person attempting to file correspondence by “Express Mail Post Office to Addressee” service who was unable to deposit the correspondence with the United States Postal Service due to the interruption or emergency may petition the Director to consider such correspondence as filed on a particular date in the Office.

(2) The petition must:

- (i) Be filed promptly after the ending of the designated interruption or emergency;
- (ii) Include the original correspondence or a copy of the original correspondence; and

(iii) Include a statement that the correspondence would have been deposited with the United States Postal Service on the requested filing date but for the designated interruption or emergency in “Express Mail” service; and that the correspondence attached to the petition is the original correspondence or a true copy of the correspondence originally attempted to be deposited as Express Mail on the requested filing date.

(3) Paragraphs (e)(1) and (e)(2) of this section do not apply to correspondence that is excluded from the Express Mail procedure pursuant to §2.198(a)(1).

Under 35 U.S.C. §21(a) and 37 C.F.R. §2.195(e), if there is an interruption or emergency in the United States Postal Service, the Director may consider correspondence to have been filed in the Office on a particular date if the correspondence or a copy thereof is: (1) filed promptly after the ending of the designated interruption or emergency; and (2) accompanied by a statement indicating that such correspondence would have been filed on that particular date if it were not for the designated interruption or emergency in the United States Postal Service. This procedure does not apply to correspondence that is excluded from the “Express Mail” procedure pursuant to §2.198(a)(1). 37 C.F.R. §2.195(e)(3). See [TMEP §305.03](#) regarding “Express Mail.”

### 306 Facsimile Transmission (Fax)

*37 CFR §2.195 (Extract) Receipt of trademark correspondence.*

(a) \* \* \* Trademark correspondence received in the Office is given a filing date as of the date of receipt except as follows: \* \* \*

(3) Correspondence transmitted by facsimile will be given a filing date as of the date on which the complete transmission is received in the Office unless that date is a Saturday, Sunday, or Federal holiday within the District of Columbia, in which case the filing date will be the next succeeding day that is not a Saturday, Sunday, or Federal holiday within the District of Columbia. \* \* \* \* \*

(c) Facsimile transmission. Except in the cases enumerated in paragraph (d) of this section, correspondence, including authorizations to charge a deposit account, may be transmitted by facsimile. The receipt date accorded to the correspondence will be the date on which the complete transmission is received in the Office, unless that date is a Saturday, Sunday, or Federal holiday within the District of Columbia. See §2.196. To facilitate proper processing, each transmission session should be limited to correspondence to be filed in a single application, registration or proceeding before the Office. The application serial number, registration number, or proceeding number should be entered as a part of the sender’s identification on a facsimile cover sheet.

(d) Facsimile transmissions are not permitted and if submitted, will not be accorded a date of receipt, in the following situations:

- (1) Applications for registration of marks;
- (2) Drawings submitted under §2.51, §2.52, §2.72, or §2.173;
- (3) Correspondence to be filed with the Trademark Trial and Appeal Board, except notices of ex parte appeal;
- (4) Requests for cancellation or amendment of a registration under section 7(e) of the Trademark Act; and certificates of registration surrendered for cancellation or amendment under section 7(e) of the Trademark Act; and
- (5) Madrid-related correspondence submitted under §7.11, §7.21, §7.14, §7.23, §7.24, or §7.31. \* \* \* \* \*

The USPTO permits the filing of certain correspondence by fax. See [TMEP §306.03](#) regarding the date of receipt of correspondence that is filed by fax.

A certificate of transmission may be used to establish timely filing in the event that the correspondence is transmitted within the response period but is received in the Office after expiration of the response period, or is not received by or lost within the Office. See [TMEP §§306.05 et seq.](#) regarding the requirements for the certificate of transmission procedure.

#### 306.01 Documents that May Not Be Filed by Facsimile Transmission

All trademark documents *except the documents listed below* may be filed by fax, and are eligible for the benefits of the certificate of transmission provided for in 37 C.F.R. §2.195.

The following types of trademark correspondence may *not* be filed by facsimile transmission and, if submitted by fax, will not be given a filing date:

- (1) Trademark applications;
- (2) Drawings submitted under 37 C.F.R. §§2.51, 2.52, 2.72, or 2.173;
- (3) Requests for cancellation or amendment of a registration under 15 U.S.C. §1057(e);
- (4) Certificates of registration;
- (5) Correspondence to be filed with the Board, except a notice of ex parte appeal;

- (6) Madrid-related correspondence submitted under 37 C.F.R. §7.11, §7.14, §7.21, §7.23, §7.24, or §7.31; and
- (7) Documents that are required by statute to be certified (e.g., certified copies of court orders).

37 C.F.R. §§2.195(d) and 7.4(d). Applications for registration of marks may be filed through TEAS.

When any trademark document specifically excluded from the fax transmission procedure is received in the USPTO by fax, the document will not be accepted. *Vibe Records, Inc. v. Vibe Media Group LLC*, 88 USPQ2d 1280 (TTAB 2008) (faxed notice of opposition unacceptable and can be given no effect). As a courtesy, the USPTO will attempt to notify senders whenever correspondence that falls within one of these prohibitions is sent to the USPTO by fax.

### **306.02 Fax Machines Designated to Accept Relevant Trademark Documents**

The fax machines that are designated to accept trademark documents are attended between the business hours of 8:30 a.m. and 5:00 p.m., Eastern Time, Monday through Friday, excluding Federal holidays within the District of Columbia.

Submissions by fax should be transmitted to the location for which they are intended. A USPTO Contacts List, which includes fax numbers, is available on the USPTO website at <http://www.uspto.gov>, and appears periodically in the *Official Gazette*. In addition, questions about fax numbers may be directed to the Trademark Assistance Center at (571) 272-9250 or (800) 786-9199.

The USPTO does not formally acknowledge receipt of documents transmitted by fax, but USPTO fax machines will usually confirm to the sending unit that the transmission is complete.

Each fax machine location in the USPTO maintains a log comprising a collection of daily activity sheets recording all fax transmissions received. These logs can be used as evidence of receipt in the USPTO, and may be used to reinstate applications and registrations. The individual activity report that pertains to a particular transmission received in the USPTO is kept with the correspondence.

### **306.03 Effect of Filing by Fax**

The filing date of correspondence received in the USPTO by fax, regardless of whether it contains a certificate of transmission, is the date that the complete transmission is received by a USPTO fax machine, unless the transmission is completed on a Saturday, Sunday, or Federal holiday within the District of Columbia. Correspondence for which transmission is completed on a Saturday, Sunday, or Federal holiday within the District of Columbia is given a filing date as of the next succeeding day that is not a Saturday, Sunday, or Federal holiday within the District of Columbia. 37 C.F.R. §2.195(a)(3).

For example, a 20-minute fax transmission to the USPTO from California starting on a Friday at 8:45 p.m. Pacific Time would be completed at 9:05 p.m. Pacific Time. The complete transmission would be received in the USPTO at approximately 12:05 a.m. Eastern Time on Saturday. The filing date accorded to the correspondence is the date of the following business day, which in this case would be Monday (assuming that Monday is not a Federal holiday within the District of Columbia).

The phrase “complete transmission” means that the transmission was received in its entirety. For example, if page one of a ten-page fax transmission is received in the USPTO at 11:55 p.m. on a Tuesday and page ten of that transmission is received at 12:05 a.m. Wednesday, the filing date accorded to that correspondence

will be the date of that Wednesday (assuming that Wednesday is not a Federal holiday within the District of Columbia).

If the sender wants the correspondence to be considered timely filed as of the date that the transmission began, the correspondence must include a certificate of transmission under 37 C.F.R. §2.197(a). See [TMEP §306.05\(c\)](#) regarding the effect of a certificate of transmission.

### 306.04 Procedure for Filing by Fax

Each transmission session should be limited to correspondence to be filed in a single application or other proceeding before the Office. The application serial number or registration number should be entered as a part of the sender's identification on a facsimile cover sheet. 37 C.F.R. §2.195(c). Applicants should wait until an application serial number is assigned before filing any document related to a new application by fax. See 37 C.F.R. §2.194(a).

It is recommended that each transmission include a cover sheet that, in addition to stating the application serial number or registration number, specifies the mark, the number of pages being transmitted, and the name, address, fax number, and telephone number of the transmitting party.

Each facsimile-transmitted document must be legible. The preferred size of the document being submitted is 8½ inches by 11 inches, letter size or A4 paper. Because equipment used by the Office cannot print a document larger than 8½ inches by 11 inches, correspondence should not be transmitted on larger paper.

When correspondence is filed by facsimile transmission, it is recommended that the sending facsimile machine generate a report confirming transmission for each transmission session. This report should be retained by the applicant, along with the original correspondence, as evidence of content and date of transmission.

Unless specifically requested to do so by the Office, parties should *not* mail follow up copies of documents transmitted by fax. 37 C.F.R. §2.193(g)(2). This can delay processing.

### 306.05 Certificate of Transmission Procedure

#### *37 CFR §2.197 Certificate of mailing or transmission.*

(a) Except in the cases enumerated in paragraph (a)(2) of this section, correspondence required to be filed in the Office within a set period of time will be considered as being timely filed if the procedure described in this section is followed. The actual date of receipt will be used for all other purposes.

(1) Correspondence will be considered as being timely filed if:

(i) The correspondence is mailed or transmitted prior to expiration of the set period of time by being:

(A) Addressed as set out in §2.190 and deposited with the U.S. Postal Service with sufficient postage as first class mail; or

(B) Transmitted by facsimile to the Office in accordance with §2.195(c); and

(ii) The correspondence includes a certificate for each piece of correspondence stating the date of deposit or transmission. The person signing the certificate should have a reasonable basis to expect that the correspondence would be mailed or transmitted on or before the date indicated.

(2) The procedure described in paragraph (a)(1) of this section does not apply to:

(i) Applications for the registration of marks under 15 U.S.C. 1051 or 1126; and

(ii) Madrid-related correspondence filed under §7.11, §7.21, §7.14, §7.23, §7.24 or §7.31.

(b) In the event that correspondence is considered timely filed by being mailed or transmitted in accordance with paragraph (a) of this section, but not received in the Office, and an application is abandoned, a registration is cancelled or expired, or a proceeding is dismissed, terminated, or decided with prejudice, the correspondence will be considered timely if the party who forwarded such correspondence:

(1) Informs the Office of the previous mailing or transmission of the correspondence within two months after becoming aware that the Office has no evidence of receipt of the correspondence;

(2) Supplies an additional copy of the previously mailed or transmitted correspondence and certificate; and

(3) Includes a statement that attests on a personal knowledge basis or to the satisfaction of the Director to the previous timely mailing or transmission. If the correspondence was sent by facsimile transmission, a copy of the sending unit's report confirming transmission may be used to support this statement.

(c) The Office may require additional evidence to determine whether the correspondence was timely filed.

Trademark Rule 2.197, 37 C.F.R. §2.197, provides a certificate of transmission procedure to avoid lateness when correspondence is faxed within the response period but is received in the USPTO after expiration of the response period, or not received, or lost within the USPTO. The certificate of transmission procedure can be used for any correspondence that can be filed by fax. See [TMEP §306.01](#) regarding documents that can be filed by fax.

Under the certificate of transmission procedure, certain correspondence will be considered to be timely filed even if received after the end of the filing period, if the correspondence is transmitted by fax to the USPTO before the expiration of the filing period and accompanied by a certificate attesting to the date of transmission.

The person signing the certificate certifies the expectation that the transmission would be initiated before midnight, local time, on the date specified.

Filers must retain a copy of the correspondence, including the signed and dated certificate. See *In re Sasson Licensing Corp.*, 35 USPQ2d 1510 (Comm'r Pats. 1995).

See [TMEP §306.05\(d\)](#) regarding the procedure for establishing the timely filing of correspondence that was faxed to the USPTO with a certificate of transmission under 37 C.F.R. §2.197, but was lost or misplaced.

See [TMEP §304.05](#) regarding certificates of transmission by e-mail.

### **306.05(a) Location and Form of Certificate of Transmission**

The certificate of transmission should be clearly labeled as such and should include a reference to the registration number or application serial number, the date of transmission, and the signature of the person attesting that the document is being transmitted on a certain date.

When possible, the certificate should appear on the document being transmitted, rather than on a separate sheet of paper. See notices at 58 Fed. Reg. 54494 (Oct. 22, 1993) and 1157 TMOG 87, 92-93 (Dec. 28, 1993).

If the certificate of facsimile transmission is presented on a separate paper, it *must* identify the document, and the application or registration to which it relates.

### **306.05(b) Wording of Certificate of Transmission**

The following wording is suggested for the certificate of transmission:

### CERTIFICATE OF TRANSMISSION

I hereby certify that this correspondence is being facsimile transmitted to the United States Patent and Trademark Office on the date shown below.

\_\_\_\_\_  
(Typed or Printed Name of Person Signing Certificate)

\_\_\_\_\_  
(Signature)

\_\_\_\_\_  
(Date)

#### **306.05(c) Effect of Certificate of Transmission**

As noted in [TMEP §306.03](#), the filing date given to correspondence received by fax transmission is the date that the complete transmission is received by a USPTO fax machine, unless the transmission is completed on a Saturday, Sunday, or Federal holiday within the District of Columbia, in which case the filing date is the next succeeding day that is not a Saturday, Sunday, or Federal holiday within the District of Columbia.

The date of transmission on the certificate is used only to determine whether the correspondence was transmitted to the USPTO within the filing period. Therefore, if the complete transmission is actually received in the USPTO within the filing period, the certificate of transmission is ignored. If the transmission is completed after the expiration of the filing period, the USPTO looks at the correspondence to see if a certificate of transmission was included. If no certificate is found, the correspondence is untimely.

If the correspondence includes a signed certificate of transmission, and the date of transmission on the certificate is within the filing period, the correspondence is considered to be timely.

For example, if a West Coast applicant transmitted correspondence by fax on the last day of the response period, beginning before 9:00 p.m. Pacific Time (midnight Eastern Time) but completed after 9:00 p.m. Pacific Time, the USPTO would give the correspondence a filing date as of the next business day, because that is the date on which the USPTO received the complete transmission. However, if the practitioner affixed a certificate of transmission to the faxed correspondence indicating that the correspondence was being transmitted on the last day of the response period, then the correspondence would be considered timely filed, even though the transmission completed after 9:00 p.m. Pacific Time (midnight Eastern Time) was received in the USPTO the day after the deadline for response.

If the filing period ends on a Saturday, Sunday or Federal holiday within the District of Columbia, the correspondence will be considered to be timely if the date of transmission on the certificate is the next succeeding day that is not a Saturday, Sunday or Federal holiday within the District of Columbia ( *see* 37 C.F.R. §2.196 and [TMEP §308](#)).

Whenever it is necessary to change the effective filing date of an application (e.g., when an application filed under §1(b) of the Trademark Act is amended to request registration on the Supplemental rather than the Principal Register after submission of an allegation of use) and the correspondence included a certificate of transmission under 37 C.F.R. §2.197, the date of actual receipt (as stamped or labeled on the relevant correspondence) rather than the date on the certificate is used as the new effective filing date. See [TMEP §§206](#) *et seq.* as to changes in the effective filing date of an application.

### **306.05(d) Correspondence Transmitted by Fax Pursuant to 37 C.F.R. §2.197 but Not Received by Office**

Rule 2.197(b) sets forth procedures for requesting that correspondence be considered timely when the correspondence is filed with a certificate of transmission, but is not received by or is lost within the USPTO. Such correspondence will be considered timely based on the date of transmission set forth on the certificate of transmission, if the party who transmitted the correspondence:

- (1) informs the USPTO in writing of the previous fax transmission of the correspondence within two months after becoming aware that the USPTO has no evidence of receipt of the correspondence;
- (2) supplies an additional copy of the previously transmitted correspondence, including a copy of the signed and dated certificate of transmission ( *see In re Sasson Licensing Corp.*, 35 USPQ2d 1510 (Comm'r Pats. 1995)); and
- (3) includes a statement attesting to the previous timely transmission on the basis of the signer's personal knowledge. A copy of the sending unit's report confirming transmission may be used to support this statement. The statement does not have to be verified.

The party who transmitted the correspondence must notify the USPTO of the transmission of the correspondence within two months after becoming aware that the USPTO has no evidence of receipt of the correspondence. 37 C.F.R. §§2.146(d) and 2.197(b)(1). Where no written action is generated that can be used as a starting point for measuring timeliness, the two-month deadline runs from the date that the party who filed the correspondence became aware that there was a problem with the filing date. See [TMEP §1705.04](#).

The required evidence should be directed to the area in the USPTO where the misplaced or lost document was intended to be filed, e.g., the law office, ITU/Divisional Unit, or Post Registration Section.

If *all* the above criteria cannot be met, the only remedy available is a petition to revive under 37 C.F.R. §2.66 (if appropriate), or a petition under 37 C.F.R. §2.146, which must include a petition fee, and a statement that attests on a personal knowledge basis to the previous timely transmission, along with any additional evidence. See 37 C.F.R. §§2.66 and 2.146; [TMEP §§1702](#) through [1708](#) regarding petitions under 37 C.F.R. §2.146, and [TMEP §§1714](#) *et seq.* regarding petitions to revive.

The above procedure does *not* apply to submissions that are excluded from the certificate of mailing or transmission procedures under 37 C.F.R. §2.195(d) or §2.197(a)(2). See [TMEP §306.01](#).

The USPTO may require evidence relating to the transmission of correspondence under 37 C.F.R. §2.197(a), to establish an actual date of transmission. 37 C.F.R. §2.197(c). See, e.g., *In re Klein*, 6 USPQ2d 1547

(Comm'r Pats. 1987), *aff'd sub nom. Klein v. Peterson*, 696 F. Supp. 695, 8 USPQ2d 1434 (D.D.C. 1988), *aff'd*, 866 F.2d 412, 9 USPQ2d 1558 (Fed. Cir. 1989), *cert. denied*, 490 U.S. 1091 (1989).

### **306.06 Requirements for Certificate of Transmission Strictly Enforced**

The requirements of 37 C.F.R. §2.197 are strictly enforced, and petitions to consider a document timely filed as of the date on the certificate are denied when a party fails to comply with these requirements. A party's inadvertent failure to comply with the requirements of a rule is not considered an extraordinary situation that would warrant waiver of the rule under 37 C.F.R. §2.146(a)(5) or §2.148. See [TMEP §305.02\(h\)](#) and cases cited therein.

### **307 Hand Delivery**

*Trademark Operation, Madrid Processing Unit, and Trademark Trial and Appeal Board.* Correspondence may be hand-delivered between 8:30 a.m. and 5:00 p.m., Eastern Time, Monday through Friday, except Federal holidays within the District of Columbia, to the following location:

Trademark Assistance Center  
James Madison Building - East Wing  
Concourse Level  
600 Dulany Street  
Alexandria, Virginia

Trademark examining attorneys *will not* accept documents for filing (either with or without fees).

If the filer wants a receipt, he or she should provide a card, which will be date-labeled and handed back to the person delivering the document. When a card is used for receipt, it should include the applicant's name, the application serial number or registration number, the mark, and the title or a description of the document being filed. The card should also specify the items submitted (e.g., drawing, specimen, fee). See [TMEP §303.02\(c\)](#).

*Customer Service Window.* The USPTO strongly encourages parties who are hand-delivering trademark correspondence to bring it directly to the Trademark Assistance Center at the address listed above. Use of any patent box for trademark-related correspondence is strongly discouraged, and may result in delayed processing. However, the USPTO will accept trademark correspondence delivered to the Customer Service Window located in the Randolph Building, 401 Dulany Street, Alexandria, Virginia. The USPTO will stamp postcard-type receipts to acknowledge the receipt of correspondence filed at the Customer Service Window. The Customer Service Window is open from 8:30 a.m. until 12:00 midnight, Monday through Friday, except Federal holidays within the District of Columbia.

See [TMEP §309](#) regarding unscheduled closings of the USPTO.

### **308 Period Ending on Saturday, Sunday, or Federal Holiday**

35 U.S.C. §21(b)

When the day, or the last day, for taking any action or paying any fee in the United States Patent and Trademark Office falls on Saturday, Sunday, or a Federal holiday within the District of Columbia, the action may be taken, or the fee paid, on the next succeeding secular or business day.

37 CFR §2.196

Whenever periods of time are specified in this part in days, calendar days are intended. When the day, or the last day fixed by statute or by regulation under this part for taking any action or paying any fee in the Office falls on a Saturday, Sunday, or Federal holiday within the District of Columbia, the action may be taken, or the fee paid, on the next succeeding day that is not a Saturday, Sunday, or a Federal holiday.

( *See also* 37 C.F.R. §2.145 for time for appeal to court and civil action.)

Any action or fee that is due on a date falling on a Saturday, Sunday, or a Federal holiday within the District of Columbia is considered timely if the action is received, or the fee paid, on the following day that is not a Saturday, Sunday, or a Federal holiday within the District of Columbia. This applies to all documents, whether filed through TEAS or on paper.

The following days are Federal holidays in the District of Columbia, under 5 U.S.C. §6103:

- New Year's Day, January 1.
- Birthday of Martin Luther King, Jr., the third Monday in January.
- Washington's Birthday, the third Monday in February.
- Memorial Day, the last Monday in May.
- Independence Day, July 4.
- Labor Day, the first Monday in September.
- Columbus Day, the second Monday in October.
- Veterans Day, November 11.
- Thanksgiving Day, the fourth Thursday in November.
- Christmas Day, December 25.
- Inauguration Day (January 20 of each fourth year after 1965), *except* when it falls on a Saturday (*see* Note below).

As to the observance of holidays that fall on Saturday, 5 U.S.C. §6103 also provides:

(b)(1) *Instead of a holiday that occurs on a Saturday, the Friday immediately before is a legal public holiday....*

*NOTE:* If Inauguration Day (January 20 of each fourth year after 1965) falls on a Saturday, the preceding Friday is *not* a legal public holiday for purposes of 35 U.S.C. §21. When Inauguration Day falls on Sunday, the next succeeding day selected for the public observance of the inauguration of the President is a legal public holiday. 5 U.S.C. §6103(c).

### **309 Unscheduled Closings of the United States Patent and Trademark Office**

When the USPTO is officially closed by executive order of the President or by the Office of Personnel Management for an entire day because of some unscheduled event, such as adverse weather conditions, the USPTO will consider that day to be a "Federal holiday within the District of Columbia" under 35 U.S.C. §21. 37 C.F.R. §2.2(d). Any action or fee due that day is considered timely if the action is taken, or the fee paid, on the next succeeding business day that the USPTO is open.

However, when the USPTO is open for business during any *part* of a business day between 8:30 a.m. and 5:00 p.m., documents are due on that day even though the USPTO may be officially closed for some period

of time during the business day because of an unscheduled event. TEAS, or the procedures of 37 C.F.R. §2.197, may be used, as appropriate, for the filing of documents during unscheduled closings of the USPTO.

### **310 Computing Period for Response to Office Action or Notice**

The deadline for responding to an Office action, notice of allowance, or other notice issued by the USPTO is computed from the date of issuance of the action or notice to the date the response is received in the USPTO. See [TMEP §303.01](#) regarding the date of receipt in the USPTO.

For example, a response to an examining attorney's Office action dated August 31 is due on the following February 28 (or 29 if it is a leap year); a response to an Office action dated February 28 is due on August 28 and not on the last day of August. *Ex parte Messick*, 7 USPQ 57 (Comm'r Pats. 1930).

Under 37 C.F.R. §2.197, correspondence is considered to be timely filed even if it is received after the expiration of the filing period, if the correspondence was deposited with the USPS as first class mail or transmitted to the USPTO by facsimile transmission before the expiration of the filing period and accompanied by a certificate attesting to the date of mailing or transmission. See [TMEP §§305.02](#) *et seq.* regarding the certificate of mailing procedure, and [TMEP §§306.05](#) *et seq.* regarding the certificate of transmission procedure.

If a document or fee is due on a Saturday, Sunday, or a Federal holiday within the District of Columbia, the document or fee is considered timely if it is received on or before the following day that is not a Saturday, Sunday or a Federal holiday within the District of Columbia. 35 U.S.C. §21(b); 37 C.F.R. §2.196; [TMEP §308](#).

See [TMEP §309](#) regarding unscheduled closings of the USPTO.

405.03	Deposit Accounts
405.04	Refunds
405.05	Electronic Funds Transfer
405.06	Payments Refused or Charged Back by Financial Institutions

## 401 Processing New Applications

Upon receipt in the USPTO, trademark applications filed under §1 or §44 of the Trademark Act are given a date of receipt and reviewed for compliance with the minimum requirements for receipt of a filing date ( *see* [TMEP §202](#)). See [TMEP §§201](#) and [1904.01\(b\)](#) regarding the filing date of applications under §66(a) of the Trademark Act.

If an application meets the minimum filing date requirements of 37 C.F.R. §2.21, it is given a filing date and serial number.

See [TMEP §§204](#) *et seq.* regarding the processing of applications that are not entitled to a filing date and [TMEP §702.01](#) for information on the order of examination.

### 401.01 Filing Receipts

#### *TEAS Applications*

When an application is filed electronically, the United States Patent and Trademark Office (“USPTO”) generally receives it within seconds after filing, and TEAS almost immediately displays a “Success” page that confirms receipt. This page is evidence of filing should any question arise as to the application filing date, and may be printed or copied-and-pasted into an electronic record for storage. TEAS also separately sends an e-mail acknowledgement of receipt, which includes a summary of the filed information and general processing information. No paper filing receipt is sent by the USPTO to the applicant.

The applicant or its attorney should immediately review the summary of the filed information for accuracy. If the information in the summary is inconsistent with the information transmitted by applicant, the applicant or attorney should notify the USPTO by sending an e-mail message to [TEAS@uspto.gov](mailto:TEAS@uspto.gov).

#### *Section 66(a) Applications*

For §66(a) applications (i.e., requests for extensions of protection of international registrations to the United States), the USPTO sends a filing receipt to the correspondence address of record. See [TMEP §§1904.02\(i\)](#) regarding the correspondence address in §66(a) applications.

The applicant or its attorney should review the information on the filing receipt for accuracy and notify the USPTO in writing of any discrepancy. A request for correction of a filing receipt should be directed to the Commissioner for Trademarks, P.O. Box 1451, Alexandria, Virginia 22313-1451, or sent via e-mail to [TMfilingreceipt@uspto.gov](mailto:TMfilingreceipt@uspto.gov). See [TMEP §1904.13\(b\)](#) regarding corrections to §66(a) applications.

#### *Paper Applications Under §1 or §44*

For paper applications under §1 or §44 of the Trademark Act, after an application has been given a filing date, a filing receipt is sent to the applicant. The filing receipt identifies the following: (1) the mark; (2) the application serial number, filing date, and register; (3) the type of mark (e.g., trademark or service mark); (4) the statutory basis or bases for filing, if provided at the time of filing; (5) the identification of goods and/or services, and international classes; (6) information about the applicant (and the applicant's attorney, if provided); and (7) the address to be used for correspondence. See [TMEP §201](#) for further information about what constitutes the filing date.

The applicant or attorney should review the information on the filing receipt for accuracy and notify the USPTO in writing of any discrepancy. A request for correction of a filing receipt should be directed to the Commissioner for Trademarks, P.O. Box 1451, Alexandria, Virginia 22313-1451, or sent via e-mail to [TMfilingreceipt@uspto.gov](mailto:TMfilingreceipt@uspto.gov).

An applicant should send a request for correction of a filing receipt *only* if the information on the filing receipt is inconsistent with the information in the application as filed. If the applicant made an error in the application, the applicant should file an amendment rather than a request for correction of the filing receipt.

An electronic form for filing voluntary amendments is available through TEAS. *Note:* A voluntary amendment filed before the application is assigned to an examining attorney is placed in the record for consideration at the time the application is assigned and will not be examined out of order. Moreover, the mere filing of a voluntary amendment does not guarantee that the amendment will be accepted. For example, the examining attorney will not accept a voluntary amendment that materially alters the mark shown on the original drawing, or that expands the scope of the goods and/or services in the original application. See [TMEP § 702.01](#) for information on the order of examination, [TMEP §807.14](#) regarding material alteration of a mark, and [TMEP §1402.07](#) regarding the scope of the identification of goods and services for purposes of amendment.

### **401.02 Application Serial Numbers**

Each application for registration is assigned an eight-digit serial number comprised of a two-digit series code and six additional numbers assigned by order of filing within the series code. To ensure that a communication is correctly routed within the Office, applicants must include the entire eight-digit number on all communications related to a particular application.

As a general rule, the serial numbers of applications filed prior to the 1905 - 1920 Acts are preceded by the series code "70."

Applications filed under the 1905 - 1920 Acts (i.e., applications filed through July 4, 1947) were preceded by the series code "71." The last serial number was 526,346.

As of July 5, 1947, applications were filed under the 1946 Act, beginning with number 526,500 and running through number 700,943 (preceded by the series code “71”).

On January 3, 1956, a new series of serial numbers preceded by the series code “72” was started, after a change in record-keeping methods. This series ran through number 467,233, issued on August 31, 1973.

A new series of serial numbers preceded by the series code “73” began with applications filed on September 4, 1973, which was the first day of receipt of mail after the adoption of the international classification of goods and services as of September 1, 1973 ( *see* [TMEP §1401.02](#)).

A new series of serial numbers preceded by the series code “74” began with applications filed on November 16, 1989, the date on which the Trademark Law Revision Act of 1988 took effect.

A new series of serial numbers preceded by the series code “75” began with applications filed on October 1, 1995.

A new series of serial numbers preceded by the series code “76” began with applications filed on March 20, 2000.

A series of serial numbers preceded by the series code “77” began September 14, 2006 for applications filed through TEAS on or after that date.

A series of serial numbers preceded by the series code “78” was used for TEAS applications filed prior to September 14, 2006.

A series of serial numbers preceded by the series code “85” began April 1, 2010 for all applications filed through TEAS on or after that date.

A series of serial numbers preceded by the series code “86” began July 1, 2013 for all applications filed through TEAS on or after that date.

Effective November 2, 2003, a series of serial numbers preceded by the series code “79” is used for requests for extension of protection of international registrations to the United States under §66(a) of the Trademark Act.

A range of serial numbers, beginning with number 975,000, is used for applications that are created through the “dividing” of an application ( *see* [TMEP §§1110 et seq.](#)).

See [TMEP §1205.02](#) regarding series code “89.”

### **401.03 Data Entry**

For applications filed through TEAS, the data provided by the applicant is loaded directly into the Trademark database.

For applications filed on paper, the application documents are scanned and the data is manually entered into the Trademark database, which is used by USPTO employees to obtain information about the location, status, prosecution history, ownership, and correspondence address for applications and registrations. This

information is available to the public through the Trademark Status and Document Retrieval (“TSDR”) database, available on the USPTO’s website at <http://tsdr.uspto.gov/>.

#### **401.04 Creation of Application Records**

For TEAS applications, the USPTO maintains an electronic record containing all incoming and outgoing documents. See [TMEP §402](#).

For paper applications, the USPTO scans all incoming documents and creates an electronic record. The USPTO also creates a paper file jacket and places all incoming documents into the file jacket. The examining attorney works from the electronic record, and outgoing communications are put into the electronic record only.

All applications are electronically routed to the law offices.

#### **402 Electronic Application and Registration Records**

The USPTO maintains TICRS, an internal database that includes images of the contents of trademark application and registration records. Members of the public who visit the USPTO’s Public Search Facility may use TICRS, free of charge, and can print images of documents from TICRS for a fee.

The public may also view and print images of the contents of trademark application and registration records through the Trademark Status and Document Retrieval (“TSDR”) portal on the USPTO website at <http://tsdr.uspto.gov/>. Electronic images of Trademark Trial and Appeal Board proceeding records are also available on the USPTO website at <http://ttabvue.uspto.gov/ttabvue/>. TSDR and TTABVUE are available 24 hours a day, seven days a week, free of charge.

#### **402.01 USPTO No Longer Creates Paper Copies of Certain Trademark-Related Documents**

Effective April 12, 2004, the USPTO no longer creates paper file copies of certain trademark-related documents that are submitted to the USPTO in electronic format. Furthermore, the USPTO does not generate paper copies of certain trademark documents that the USPTO creates, except for copies that are sent to recipients by mail. See *New USPTO Policies Regarding (1) Generation of Paper Copies of Trademark-Related Documents and (2) Public Access to Existing Paper Copies of Trademark-Related Documents* ( T M O G A p r . 6 , 2 0 0 4 ) , at <http://www.uspto.gov/web/offices/com/sol/og/2004/week14/pattmcp.htm>.

All these documents can be viewed through TICRS and TSDR.

The USPTO still provides certified paper copies of all trademark documents, upon request and payment of the appropriate fee. See [TMEP §111](#).

#### **403 Correspondence Returned as Undeliverable**

If a paper Office action or notice (e.g., a notice of allowance) is returned to the USPTO because the United States Postal Service has not been able to deliver it, the time for response will not be extended unless the USPTO sent the Office action or notice to the wrong address due to a USPTO error.

If the USPTO sent the Office action or notice to the wrong address due to a USPTO error, the USPTO will reissue the Office action or notice and provide the applicant/registrant with a new response period. A “USPTO error in sending the Office action or notice to the wrong address” means that the USPTO either entered the correspondence address incorrectly or failed to properly enter a notice of change of address filed *before* the date on which the action was issued. The transmittal of correspondence or a response on letterhead bearing a new address is *not* a proper notice of change of address. The applicant or attorney must specifically request that the correspondence address be changed. See [TMEP §§609.02](#) and [609.02\(a\)](#).

If the Office action or notice was sent to the correspondence address of record (see [TMEP §§609](#) *et seq.* regarding the correspondence address), but was returned as undeliverable, the USPTO will try to obtain the correct address and forward the Office action or notice. However, the time for response will not be extended.

The USPTO scans the returned action and envelope into TIGRS.

If outgoing e-mail to a primary e-mail correspondence address of record is returned as undeliverable, the USPTO will send a paper copy to the correspondence address of record. See [TMEP §§304](#) *et seq.* regarding e-mail communications. This practice may not be followed for undeliverable duplicate courtesy copies of correspondence because the primary address is the correspondence address of record. See [TMEP §§609.01](#) and [609.02](#).

See [TMEP §§717](#) *et seq.* regarding the reissuing of examining attorney’s Office actions.

#### 404 Documents Not Returnable

*37 CFR §2.25 Documents not returnable.*

Except as provided in §2.27(e), documents filed in the Office by the applicant or registrant become part of the official record and will not be returned or removed.

Documents filed in the USPTO by the applicant or registrant become part of the official record and will not be returned or removed. 37 C.F.R. §2.25. If, for a valid reason, the applicant does not want certain information to become part of a public record, the applicant should consider options such as redacting confidential portions of documents prior to their submission. See [TMEP §§1702](#), [1705](#), and [1708](#) regarding filing a petition to the Director to waive the rule regarding removal of documents from the official record.

Documents ordered to be filed under seal pursuant to a protective order issued by a court or by the TTAB, pursuant to 37 C.F.R. §2.27(e), are not made part of the record available to the public.

The USPTO will furnish copies of the contents of trademark application, registration, and TTAB proceeding records upon request and payment of the required fee. See [TMEP §111](#).

#### 405 Fees

*37 CFR §2.207 Methods of payment.*

(a) All payments of money required in trademark cases, including fees for the processing of international trademark applications and registrations that are paid through the Office, shall be made in U.S. dollars and in the form of a cashier’s or certified check, Treasury note, national bank note, or United States Postal Service money order. If sent in any other form, the Office may delay or cancel the credit until collection is made. Checks and money orders must be made payable to the Director of the United States Patent and Trademark Office. (Checks made payable to the Commissioner of Patents and Trademarks will continue to be accepted.) Payments from foreign countries must be payable and immediately negotiable in the United States for the full amount of the fee required. Money sent to the Office by mail will be at the risk of the sender, and letters containing money should be registered with the United States Postal Service.

(b) Payments of money required for trademark fees may also be made by credit card, except for replenishing a deposit account. Payment of a fee by credit card must specify the amount to be charged to the credit card and such other information as is necessary to process the charge, and is subject to collection of the fee. The Office will not accept a general authorization to charge fees to a credit card. If credit card information is

provided on a form or document other than a form provided by the Office for the payment of fees by credit card, the Office will not be liable if the credit card number becomes public knowledge.

See 37 C.F.R. §2.6(a)(i) and [TMEP §§810](#) *et seq.* regarding the fee for filing an application for registration.

See [TMEP §1903.02](#) regarding payment of fees to the IB through the USPTO.

### 405.01 Credit Cards

Under 37 C.F.R. §2.207, the USPTO accepts payment of fees by credit card, subject to actual collection of the fee.

Any payment of a fee by credit card must be in writing. 37 C.F.R. §2.191. A form for authorizing charges to a credit card can be accessed through TEAS for all filings for which a filing fee is required. Parties who file on paper can download a Credit Card Payment Form (PTO-2038) from the USPTO's website at <http://www.uspto.gov/>. The USPTO does not put the Credit Card Payment Form in application or registration records.

A party is not required to use the USPTO's Credit Card Payment Form when paying a fee by credit card. However, if a party provides a credit card charge authorization in another form or document (e.g., in the body of an application, cover letter, response to an Office action, or other correspondence relating to a trademark application or registration), the credit card information becomes part of the public record. 37 C.F.R. §2.207(b).

All credit card authorizations must include: (1) a valid credit card number; (2) a valid expiration date; (3) the name of the cardholder with the cardholder's signature and the date; (4) a billing address, including zip code; (5) a description and purpose of the payment; and (6) a specific payment amount. See [TMEP §§611.01](#) *et seq.* regarding signature of documents.

If a Credit Card Payment Form or other document authorizing the USPTO to charge a fee to a credit card does not contain the information necessary to charge the fee to the credit card, the form will be returned and the fee will not be processed. USPTO employees will not accept oral instructions to complete the Credit Card Payment Form or otherwise charge a fee to a credit card.

The USPTO will only accept an authorization to charge a fee in a specific dollar amount to a credit card.

The USPTO currently accepts charges to the following credit cards: AMERICAN EXPRESS®, DISCOVER®, MASTER CARD®, and VISA®.

Any refund of a fee paid by credit card will be by a credit to the credit card account to which the fee was charged. 37 C.F.R. §2.209(a).

*See* notice at 65 Fed. Reg. 33452 (May 24, 2000) and 1235 TMOG 38 (June 13, 2000).

See [TMEP §405.06](#) regarding credit card authorizations that are refused or charged back by a financial institution.

### 405.02 Checks

Trademark Rule 2.207(a), 37 C.F.R. §2.207(a), provides that:

All payments of money required in trademark cases, including fees for the processing of international trademark applications and registrations that are paid through the Office, shall be made in U.S. dollars and in the form of a cashier's or certified check, Treasury note, national bank note, or United States Postal Service money order. If sent in any other form, the Office may delay or cancel the credit until collection is made....

#### **405.02(a) Personal Checks**

It is the practice of the USPTO to accept, as "conditional" payment of a fee, a signed uncertified check (e.g., a personal check). If an uncertified check clears, then the USPTO considers the fee paid as of the date it received the check.

However, if such a check is returned unpaid, then the fee remains unpaid, and the document that included the returned check is processed as though the fee had been omitted. See *In re Paulsen*, 35 USPQ2d 1638 (Comm'r Pats. 1995). See [TMEP §405.06](#) for further information about processing checks that are returned unpaid.

Under 37 C.F.R. §2.6(b)(12), there is a processing fee for any check returned to the USPTO unpaid.

#### **405.03 Deposit Accounts**

##### *37 CFR §2.208*

(a) For the convenience of attorneys, and the general public in paying any fees due, in ordering copies of records, or services offered by the Office, deposit accounts may be established in the Office upon payment of the fee for establishing a deposit account (§2.6(b)(13)). A minimum deposit of \$1,000 is required for paying any fees due or in ordering any services offered by the Office. The Office will issue a deposit account statement at the end of each month. A remittance must be made promptly upon receipt of the statement to cover the value of items or services charged to the account and thus restore the account to its established normal deposit. An amount sufficient to cover all fees, copies, or services requested must always be on deposit. Charges to accounts with insufficient funds will not be accepted. A service charge (§2.6(b)(13)) will be assessed for each month that the balance at the end of the month is below \$1,000.

(b) A general authorization to charge all fees, or only certain fees to a deposit account containing sufficient funds may be filed in an individual application, either for the entire pendency of the application or with respect to a particular document filed. An authorization to charge a fee to a deposit account will not be considered payment of the fee on the date the authorization to charge the fee is effective as to the particular fee to be charged unless sufficient funds are present in the account to cover the fee.

(c) A deposit account holder may replenish the deposit account by submitting a payment to the Office. A payment to replenish a deposit account must be submitted by one of the methods set forth in paragraphs (c)(1), (c)(2), (c)(3), or (c)(4) of this section.

(1) A payment to replenish a deposit account may be submitted by electronic funds transfer through the Federal Reserve Fedwire System, which requires that the following information be provided to the deposit account holder's bank or financial institution:

- (i) Name of the Bank, which is Treas NYC (Treasury New York City);
- (ii) Bank Routing Code, which is 021030004;
- (iii) United States Patent and Trademark Office account number with the Department of the Treasury, which is 13100001; and
- (iv) The deposit account holder's company name and deposit account number.

(2) A payment to replenish a deposit account may be submitted by electronic funds transfer over the Office's Internet Web site (<http://www.uspto.gov>).

(3) A payment to replenish a deposit account may be addressed to: Director of the United States Patent and Trademark Office, Attn: Deposit Accounts, 2051 Jamieson Avenue, Suite 300, Alexandria, Virginia 22314.

A party cannot charge a fee to a deposit account unless he or she has prior authorization to do so. The Office of Finance maintains a list of persons authorized to request transactions by deposit account. The USPTO will not charge a fee to a deposit account unless the person requesting the charge appears on the authorized list or files a proper request to have his or her name added to the authorized list.

An authorization to charge a fee to a deposit account must be made in a written document signed and submitted by an authorized person. It cannot be entered by examiner's amendment unless the record contains a written authorization signed and submitted by an authorized person. If there is no written authorization already in the record, the applicant may fax or e-mail the authorization to the examining attorney.

If an applicant submits an authorization to charge a filing fee to a deposit account that has insufficient funds to cover the fee, the applicant has not paid the fee.

If a deposit account has insufficient funds to cover an authorization to charge the initial filing fee for an application for registration, the USPTO will not grant a filing date to the application. 37 C.F.R. §2.21(a)(5). See [TMEP §204.01](#).

When a deposit account contains insufficient funds to cover a fee that has been authorized, the USPTO notifies the party who filed the authorization of the fee deficiency. If the fee in question is statutory (e.g., the filing fee for a notice of appeal, statement of use, or request for extension of time to file a statement of use), the fee deficiency must be cured before the expiration of the statutory filing period. If the deadline for filing the fee is not set by statute, the party who filed the authorization may cure the fee deficiency within the set period for response to the Office action.

A showing that the deposit account contained sufficient funds on the date on which the authorization was first filed, as opposed to the date on which USPTO personnel attempted to charge the fee, will not cure the fee deficiency. Trademark Rule 2.208 clearly requires that sufficient funds to cover all outstanding charge authorizations be on deposit at all times. The funds must be available in the account at the time the authorization is presented for debiting.

See [TMEP §1104.09\(g\)](#) regarding fee deficiencies in amendments to allege use, [TMEP §1108.02\(c\)](#) regarding fee deficiencies in requests for extensions of time to file a statement of use, [TMEP §1109.15\(a\)](#) regarding fee deficiencies in statements of use, [TMEP §1604.06\(c\)](#) regarding fee deficiencies in affidavits under §8 of the Act, and [TMEP §1606.05\(c\)](#) regarding fee deficiencies in renewal applications.

## 405.04 Refunds

### *37 CFR §2.209*

(a) The Director may refund any fee paid by mistake or in excess of that required. A change of purpose after the payment of a fee, such as when a party desires to withdraw a trademark application, appeal or other trademark filing for which a fee was paid, will not entitle a party to a refund of such fee. The Office will not refund amounts of twenty-five dollars or less unless a refund is specifically requested, and will not notify the payor of such amounts. If a party paying a fee or requesting a refund does not provide the banking information necessary for making refunds by electronic funds transfer (31 U.S.C. 3332 and 31 CFR part 208), or instruct the Office that refunds are to be credited to a deposit account, the Director may require such information, or use the banking information on the payment instrument to make a refund. Any refund of a fee paid by credit card will be by a credit to the credit card account to which the fee was charged.

(b) Any request for refund must be filed within two years from the date the fee was paid, except as otherwise provided in this paragraph. If the Office charges a deposit account by an amount other than an amount specifically indicated in an authorization (§2.208(b)), any request for refund based upon such charge must be filed within two years from the date of the deposit account statement indicating such charge, and include a copy of that deposit account statement. The time periods set forth in this paragraph are not extendable.

Under 35 U.S.C. §42(d) and 37 C.F.R. §2.209, only money paid by mistake or in excess (when a fee is not required by statute or rule, or is not required in the amount paid) may be refunded. A mere change of purpose after the payment of money does not entitle a party to a refund. For example, if a party deletes a class from an application, or decides that it no longer wishes to go forward with an application or appeal, the party is not entitled to a refund.

If an examining attorney or other USPTO employee erroneously requires a fee, the USPTO will refund the fee submitted in response to the erroneous requirement.

The USPTO will refund the filing fee for an application that is denied a filing date, or a filing fee that is untimely (e.g., the fee for a statement of use or request for an extension of time to file a statement of use filed after expiration of the statutory filing period). However, after the USPTO has processed an application or other document, the USPTO will not refund the filing fee. The USPTO will not refund an application

filing fee when registration is refused, nor will it refund a fee when a timely filed document (such as a statement of use under 15 U.S.C. §1051(d) or affidavit of use or excusable nonuse under 15 U.S.C. §1058) is rejected for failure to meet the requirements of the statute and rules.

Refund requests should be sent to Mail Stop 16, Director of the USPTO, P.O. Box 1450, Alexandria, VA 22313-1450.

When a USPTO employee determines that a refund is appropriate, the employee should submit the request to the TMFinance e-mail box with the information necessary for processing the refund.

#### **405.05 Electronic Funds Transfer**

The Electronic Funds Transfer (“EFT”) payment method allows customers to send a payment over the Internet as easily as writing a check. In general, the Automated Clearing House performs EFT transactions through the Federal Reserve system. The customer must establish a User ID and Password. For further information, see <http://www.uspto.gov/teas/payment.htm>.

#### **405.06 Payments Refused or Charged Back by Financial Institutions**

If a check is returned unpaid, or an EFT or credit card is refused or charged back by a financial institution, the document that accompanied the payment is processed as though the fee had been omitted. *See In re Paulsen*, 35 USPQ2d 1638 (Comm’r Pats. 1995). If the document included an authorization to charge deficient fees to a deposit account (37 C.F.R. §2.208) that has sufficient funds to cover the fee, the USPTO charges the fee in question, together with a fee for processing the payment that was refused, to the deposit account.

If the document was not accompanied by an authorization to charge fees to a deposit account, the USPTO notifies the party who filed the document of the fee deficiency in a written action. If the deadline for filing the fee is not set by statute, the fee may be resubmitted within the period set for response to the Office action.

If the fee in question is statutory (e.g., a filing fee for an appeal, statement of use, or request for extension of time to file a statement of use), the fee must be resubmitted before the expiration of the statutory filing period.

Under 37 C.F.R. §2.6(b)(12), there is a fee for processing any payment that is refused or charged back by a financial institution. This fee covers the work done by USPTO personnel in processing the payment that is refused or charged back. The requirement for submission of the processing fee is strictly enforced. The USPTO will not approve a pending application for publication or registration, or take any other requested action in an application or registration, until all outstanding fees, including the processing fee, have been paid. Any request for waiver of this processing fee should be referred to the Office of the Deputy Commissioner for Trademark Examination Policy.

See [TMEP §§202.03\(a\)](#) and [202.03\(a\)\(i\)](#) regarding the processing of an application in which the application filing fee payment is refused or charged back by a financial institution, [TMEP §1104.09\(g\)](#) regarding fee deficiencies in amendments to allege use, [TMEP §1108.02\(c\)](#) regarding fee deficiencies in requests for extensions of time to file a statement of use, [TMEP §1109.15\(a\)](#) regarding fee deficiencies in statements of use, [TMEP §1604.06\(c\)](#) regarding fee deficiencies in affidavits under §8 of the Act, and [TMEP §1606.05\(c\)](#) regarding fee deficiencies in renewal applications.

## **504 Automatic Updating of Ownership of Trademark Applications and Registrations in Trademark Database**

- 504.01 Circumstances in Which Trademark Database Will Not Be Automatically Updated
- 504.02 Processing Time for Automatic Updating
- 504.03 Correction to Automatic Update - Last Recorded Owner Does Not Have Clear Chain of Title
- 504.04 Automatic Updating Does Not Apply to Requests for Recordation Filed Before November 2, 2003
- 504.05 Automatic Updating Does Not Apply to §66(a) Applications and Registered Extensions of Protection

## **505 Requesting Update of Ownership Information When the Trademark Database Does Not Automatically Update After a Document is Recorded**

- 505.01 Request to Update Ownership Information in Pending Application
- 505.02 Request to Update Ownership Information After Registration

## **501 Assignment of Marks**

### **501.01 Assignability of Marks in Applications and Registrations**

#### *15 U.S.C. §1060(a)*

(1) A registered mark or a mark for which an application to register has been filed shall be assignable with the good will of the business in which the mark is used, or with that part of the good will of the business connected with the use of and symbolized by the mark. Notwithstanding the preceding sentence, no application to register a mark under section 1(b) shall be assignable prior to the filing of an amendment under section 1(c) to bring the application into conformity with section 1(a) or the filing of the verified statement of use under section 1(d), except for an assignment to a successor to the business of the applicant, or portion thereof, to which the mark pertains, if that business is ongoing and existing.

(2) In any assignment authorized by this section, it shall not be necessary to include the good will of the business connected with the use of and symbolized by any other mark used in the business or by the name or style under which the business is conducted.

(3) Assignments shall be by instruments in writing duly executed...

#### *37 CFR §3.1 (Extract)*

\*\*\* Assignment means a transfer by a party of all or part of its right, title and interest in a patent, patent application, registered mark or a mark for which an application to register has been filed.

### **501.01(a) Assignability of Intent-to-Use Applications**

In an application under §1(b) of the Trademark Act, 15 U.S.C. §1051(b), the applicant cannot assign the application before the applicant files an allegation of use (i.e., either an amendment to allege use under 15 U.S.C. §1051(c) or a statement of use under 15 U.S.C. §1051(d)), except to a successor to the applicant's business, or portion of the business to which the mark pertains, if that business is ongoing and existing. Section 10 of the Trademark Act, 15 U.S.C. §1060; 37 C.F.R. §3.16.

The primary purpose of this provision is to ensure that a mark may only be assigned along with some business or goodwill, and to prevent "trafficking" in marks.

As a general rule, the United States Patent and Trademark Office ("USPTO") does not investigate or evaluate the validity of assignments. Therefore, the examining attorney should issue an inquiry concerning the compliance of an assignment with the cited provisions of §10 only if:

(1) The application itself includes a statement indicating that the assignee is not a successor to the original applicant's business, or portion of the business to which the mark pertains, if that business is ongoing and existing; or

(2) All of the following conditions are present:(a) The assignment is executed before the filing of an allegation of use;

(b) The applicant submits the assignment document for inclusion in the application record; and

(c) The assignment document fails to include the relevant language from §10 to the effect that the assignment includes the entire business of the applicant/assignor or the portion of the business to which the mark pertains.

The examining attorney should not require the submission of assignment documents to determine compliance.

If the examining attorney issues an inquiry, the applicant's statement that the assignment was in compliance with the cited provision of §10 is sufficient to resolve the issue. This statement may be entered through an examiner's amendment.

The assignment of an intent-to-use application to someone who is not the successor to the applicant's business before filing an allegation of use renders the application void, and any resulting registration must be cancelled.

*Cent. Garden & Pet Co. v. Daskocil Mfg. Co.*, 108 USPQ2d 1134, 1146, (TTAB 2013); *Clorox Co. v. Chemical Bank*, 40 USPQ2d 1098, 1105-06 (TTAB 1996); *cf. Amazon Techs., Inc. v. Wax*, 95 USPQ2d 1865, 1872 (TTAB 2010) (finding "the assignment from one joint applicant to another, where the assignee joint applicant was and remains an owner of the application," more akin to a "relinquishment" of ownership rights by one joint owner than a true "assignment" to a different legal entity, and thus not prohibited under §10).

### **501.01(b) Assignability of Extensions of Protection of International Registrations to the United States**

Under §72 of the Trademark Act, 15 U.S.C. §1141 *l*, an extension of protection to the United States may be assigned, together with the goodwill associated with the mark, only to a person who is a national of, is domiciled in, or has a bona fide and effective industrial or commercial establishment in a country that is party to the Madrid Protocol (or in a country that is a member of an intergovernmental organization that is a party to the Madrid Protocol). See [TMEP §501.07](#) for further information about assignment of §66(a) applications and registered extensions of protection to the United States, and [TMEP Chapter 1900](#) for further information about the Madrid Protocol.

### **501.02 Assignments Must Be in Writing**

*15 U.S.C. §1060(a)(3)*

(Extract) Assignments shall be by instruments in writing duly executed. \*\*\*

### **501.03 Effect of Failure to Record Assignment**

*15 U.S.C. §1060(a)(3)*

(Extract)

(3) \*\*\*Acknowledgment shall be prima facie evidence of the execution of an assignment, and when the prescribed information reporting the assignment is recorded in the United States Patent and Trademark Office, the record shall be prima facie evidence of execution.

(4) An assignment shall be void against any subsequent purchaser for valuable consideration without notice, unless the prescribed information reporting the assignment is recorded in the United States Patent and Trademark Office within 3 months after the date of the assignment or prior to the subsequent purchase.

See [TMEP §§503](#) *et seq.* regarding the recordation of assignments in the Assignment Recordation Branch of the USPTO.

### **501.04 Foreign Assignee May Designate Domestic Representative**

*15 U.S.C. §1060(b)*

An assignee not domiciled in the United States may designate by a document filed in the United States Patent and Trademark Office the name and address of a person resident in the United States on whom may be served notices or process in proceedings affecting the mark. Such notices or process may be served upon the person so designated by leaving with that person or mailing to that person a copy thereof at the address specified in the last designation so filed. If the person so designated cannot be found at the address given in the last designation, or if the assignee does not designate by a document filed in the United States Patent and Trademark Office the name and address of a person resident in the United States on whom may be served notices or process in proceedings affecting the mark, such notices or process may be served upon the Director.

*37 CFR §3.61*

If the assignee of a patent, patent application, trademark application or trademark registration is not domiciled in the United States, the assignee may designate a domestic representative in a document filed in the United States Patent and Trademark Office. The designation should state the name and address of a person residing within the United States on whom may be served process or notice of proceedings affecting the application, patent or registration or rights thereunder.

An assignee not domiciled in the United States may designate, by a document filed with the USPTO, the name and address of a domestic representative. 15 U.S.C. §§1051(e), 1058(f), 1059(c), and 1060(b); 37 C.F.R. §3.61; [TMEP §610](#). The USPTO encourages assignees who do not reside in the United States to designate domestic representatives.

When an assignee designates a domestic representative, the designation should be in a document separate from the assignment document. One copy of the designation of domestic representative should be sent to the Assignment Recordation Branch with the document to be recorded. In addition, the assignee should send a separate copy of the designation to the Trademark Branch of the USPTO (“Trademark Operation”) for each registration or application to which an assignment pertains, so that a copy of the designation can be entered in each official record that is identified in the assignment document. 37 C.F.R. §2.193(g).

### **501.05 Assignee Stands in Place of Applicant or Registrant**

*15 U.S.C. §1127 (Extract)*

The terms “applicant” and “registrant” embrace the legal representatives, predecessors, successors and assigns of such applicant or registrant.

*37 CFR §3.71(d) Trademarks.*

The assignee of a trademark application or registration may prosecute a trademark application, submit documents to maintain a trademark registration, or file papers against a third party in reliance on the assignee’s trademark application or registration, to the exclusion of the original applicant or previous assignee. The assignee must establish ownership in compliance with § 3.73(b).

An assignee, like an applicant, must be a natural or juristic person. See 15 U.S.C. §1127 and [TMEP §803](#).

### **501.06 Partial Assignments**

A trademark may be owned by two or more persons ( see [TMEP §803.03\(d\)](#)), and a co-owner may assign his or her interest in a mark. Also, a party who is the sole owner of a mark may transfer a portion (e.g. , 50%) of his or her interest in the mark to another party.

A trademark owner may also assign a separate portion of a business, together with the good will and trademarks associated with that portion of the business, but retain rights in the mark for uses pertaining to another part of the business. See *VISA, U.S.A., Inc. v. Birmingham Trust National Bank*, 696 F.2d 1371, 216 USPQ 649 (Fed. Cir. 1982), cert. denied, 464 U.S. 826, 220 USPQ 385 (1983). Accordingly, one or more trademarks of a company can be validly assigned if the assignor transfers the good will associated with only some of the goods/services on which that mark appears. After a registration has been assigned with respect to only some of the goods/services, both owners must file the necessary renewal applications and affidavits of continued use or excusable nonuse under 15 U.S.C. §1058 or §1141k to maintain the registration. If only one party files, only those goods/services in the registration for which that party owns

the mark are continued or renewed. See TMEP §§[1604](#) *et seq.* and [1613](#) regarding affidavits of continued use or excusable nonuse, and TMEP §§[1606](#) *et seq.* and [1614](#) regarding renewal.

A trademark owner may not use an assignment to impose geographic restrictions on a registration. This must be done by way of a concurrent use proceeding before the Trademark Trial and Appeal Board, or pursuant to a final determination by a federal court. 15 U.S.C. §1052(d). See [TMEP §§1207.04](#) *et seq.* and [Trademark Trial and Appeal Board Manual of Procedure](#) (“TBMP”) Chapter 1100 regarding concurrent use registration. However, the Assignment Recordation Branch of the USPTO will record an assignment purporting to transfer rights in an unrestricted registration for less than the entire United States, because it is a transfer that may affect title to the registration. As noted in [TMEP §503.01\(c\)](#), the Assignment Recordation Branch does not examine the substance of documents submitted for recording. The act of recording the document is not a determination of the validity or effect of the purported assignment and does not create a concurrent use registration.

A trademark owner who files a partial assignment is strongly encouraged to file a separate request to divide so that the USPTO can more effectively track and administer applications and post registration filings, and ensure that USPTO records accurately reflect current ownership information. In pending applications in which a partial assignment and a request to divide are filed, the ITU/Divisional Unit will process the request to divide and ensure that the USPTO records reflect current ownership information. Because the assignment records of the parent application do not appear in the newly created child application, the ITU staff will place a copy of the Trademark Assignment Abstract of Title for the parent application in the trademark records of the child application. The abstract will be viewable via the Trademark Image Capture Retrieval System (“TICRS”) and the Trademark Status and Document Retrieval (“TSDR”) portal on the USPTO website at <http://tsdr.uspto.gov/>. The assignment information in the parent application will remain accessible via the Assignment database on the USPTO website at <http://assignments.uspto.gov/assignments>. After the request to divide is processed and the child application is created, any new recordations in the child application will appear in the Assignment database. See [TMEP §§1615](#) *et seq.* regarding requests to divide registrations in which ownership has changed with respect to some but not all of the goods/services, and [TMEP §§1110](#) *et seq.* regarding request to divide pending applications.

## **501.07 Assignment of Extension of Protection of International Registration to the United States**

*15 U.S.C. §1141I Assignment of an Extension of Protection:*

An extension of protection may be assigned, together with the goodwill associated with the mark, only to a person who is a national of, is domiciled in, or has a bona fide and effective industrial or commercial establishment either in a country that is a Contracting Party or in a country that is a member of an intergovernmental organization that is a Contracting Party.

Under §72 of the Trademark Act, 15 U.S.C. §1141 *I*, an extension of protection of an international registration to the United States may be assigned, together with the goodwill associated with the mark, only to a person who is a national of, is domiciled in, or has a bona fide and effective industrial or commercial establishment in a country that is a party to the Madrid Protocol (or in a country that is a member of an intergovernmental organization that is a party to the Madrid Protocol).

Because the extension of protection remains part of the international registration, assignments of extensions of protection to the United States must be recorded at the International Bureau of the World Intellectual Property Organization (“IB”). The IB will notify the USPTO of any changes in ownership, including changes in owner name, recorded in the International Register. The USPTO will record only those assignments (or other documents affecting title) that have been recorded in the International Register, and will automatically update the USPTO’s Trademark database to reflect these changes.

See [TMEP §§1906.01](#) and [1906.01\(a\)](#) for information about recording changes of ownership of international registrations with the IB.

Section 10 of the Trademark Act and 37 C.F.R. Part 3 do not apply to assignments of international registrations or extensions of protection to the United States. 37 C.F.R. §7.22.

See [TMEP §§1110.11](#) and [1615.02](#) regarding division of an extension of protection to the United States after ownership of an international registration has changed with respect to some, but not all, of the goods/services.

## 502 Establishing Ownership of Applications or Registrations

*37 CFR §3.73(a) (Extract)*

\* \* \* The original applicant is presumed to be the owner of a trademark application or registration, unless there is an assignment.

*Section 1 or § 44 Applications.* In an application or registration based on §1 or §44 of the Trademark Act, 15 U.S.C. §1051 or §1126, an assignee is not required to record the assignment in order to take an action with respect to an application or registration. However, an assignee must establish ownership in order to take action in an application or registration. 37 C.F.R. §3.73(b); [TMEP §502.01](#). In addition, the assignee must record the assignment (or other document affecting title) with the Assignment Recordation Branch of the USPTO to obtain a certificate of registration in the name of the assignee. 37 C.F.R. §3.85; [TMEP §§502.02\(a\)](#) and [502.03](#). Moreover, it is advisable for an applicant or registrant to record the assignment to ensure that it is valid, under §10(a)(4) of the Trademark Act, against subsequent purchasers for valuable consideration without notice. See [TMEP §501.03](#).

*Section 66(a) Applications.* In an application under §66(a) of the Trademark Act or a registered extension of protection, the new owner must record the assignment with the IB in order to take an action with respect to an application or registration, or to obtain a certificate of registration in the name of a new owner. [TMEP §§502.01](#), [502.02\(b\)](#), and [502.03](#). See [TMEP §501.07](#) regarding the assignment of extensions of protection of international registrations, and [TMEP §§1906.01](#) and [1906.01\(a\)](#) for information about recording changes of ownership of international registrations with the IB.

### 502.01 Establishing the Right to Take Action in Application or Registration

*37 CFR §3.73(b)*

(1) In order to request or take action in a patent or trademark matter, the assignee must establish its ownership of the patent or trademark property of paragraph (a) of this section to the satisfaction of the Director. The establishment of ownership by the assignee may be combined with the paper that requests or takes the action. Ownership is established by submitting to the Office a signed statement identifying the assignee, accompanied by either:

(i) Documentary evidence of a chain of title from the original owner to the assignee (e.g., copy of an executed assignment). For trademark matters only, the documents submitted to establish ownership may be required to be recorded pursuant to §3.11 in the assignment records of the Office as a condition to permitting the assignee to take action in a matter pending before the Office. For patent matters only, the submission of the documentary evidence must be accompanied by a statement affirming that the documentary evidence of the chain of title from the original owner to the assignee was or concurrently is being submitted for recordation pursuant to §3.11; or

(ii) A statement specifying where documentary evidence of a chain of title from the original owner to the assignee is recorded in the assignment records of the Office (e.g., reel and frame number).

(2) The submission establishing ownership must show that the person signing the submission is a person authorized to act on behalf of the assignee by:

(i) Including a statement that the person signing the submission is authorized to act on behalf of the assignee; or

(ii) Being signed by a person having apparent authority to sign on behalf of the assignee, e.g., an officer of the assignee.

*Applications and Registrations Based on §§1 and 44 of the Trademark Act.* In an application or registration based on §1 or §44 of the Trademark Act, when a party other than the owner of record attempts to take an action with respect to an application or registration (e.g., filing a response to an Office action, allegation of use under 15 U.S.C. §1051(c) or §1051(d), request for an extension of time to file a statement of use under

15 U.S.C. §1051(d)(2), affidavit of continued use or excusable nonuse under 15 U.S.C. §1058 (“§8 affidavit”), or renewal application under 15 U.S.C. §1059 (“§9 renewal application”), the party must establish ownership of the application or registration. To establish ownership, the new owner must either: (1) record the assignment (or other document affecting title) with the Assignment Recordation Branch of the USPTO, and notify the Trademark Operation that the document has been recorded; or (2) submit other evidence of ownership, in the form of a document transferring ownership from one party to another, or an explanation, in the form of an affidavit or declaration under 37 C.F.R. §2.20, that a valid transfer of legal title has occurred. 37 C.F.R. §3.73(b)(1). The document(s) must show clear chain of title from the original owner to the party who is taking the action.

See 37 C.F.R. §3.85 and [TMEP §§502.02\(a\)](#) and [502.03](#) regarding issuance of a certificate of registration in the name of a new owner.

*Section 66(a) Applications and Registered Extensions of Protection.* In an application under §66(a) of the Trademark Act or a registered extension of protection, the new owner must record the assignment with the IB in order to take an action with respect to an application or registration. The new owner does not have the option of submitting documentary evidence of ownership, pursuant to 37 C.F.R. §3.73(b).

The IB will notify the USPTO of any changes in ownership, including changes in owner name, recorded in the International Register. The USPTO will record only those assignments (or other documents affecting title) that have been recorded in the International Register. See [TMEP §501.07](#) for further information about assignment of extensions of protection of international registrations, and [TMEP §§1906.01](#) and [1906.01\(a\)](#) for information about recording changes of ownership of international registrations with the IB. The document(s) must show clear chain of title from the original owner to the party who is taking the action.

Part 3 of 37 C.F.R. does not apply to §66(a) applications and registered extensions of protection. 37 C.F.R. §7.22.

## **502.02 Pending Applications - Issuance of Registration Certificate in Name of Assignee or in Applicant’s New Name**

### **502.02(a) Applications Under §§1 and 44 of the Trademark Act**

*37 CFR §3.85 Issue of registration to assignee.*

The certificate of registration may be issued to the assignee of the applicant, or in a new name of the applicant, provided that the party files a written request in the trademark application by the time the application is being prepared for issuance of the certificate of registration, and the appropriate document is recorded in the Office. If the assignment or name change document has not been recorded in the Office, then the written request must state that the document has been filed for recordation. The address of the assignee must be made of record in the application file.

*Document Must Be Recorded with Assignment Recordation Branch.* In an application under §1 or §44 of the Trademark Act, a new owner must record the assignment, change of name, or other document affecting title with the Assignment Recordation Branch of the USPTO to obtain a certificate of registration in the name of the new owner (or in applicant’s new name). 37 C.F.R. §3.85. However, the registration will not issue in the name of the new owner, unless the ownership field in the Trademark database is updated to reflect the recorded assignment prior to approval of the mark for publication or registration on the Supplemental Register in an application based on §1(a) or §44, 15 U.S.C. §1051(a) or §1126, or prior to acceptance of the statement of use in an intent-to-use application based on §1(b).

Under 37 C.F.R. §3.85, a new owner bears the burden of recording *and* notifying appropriate USPTO personnel of assignments or changes of name to ensure that the registration issues in the name of the new

owner, as necessary. However, for some documents recorded on or after November 2, 2003, recording a document with the Assignment Recordation Branch will automatically update ownership in the Trademark database even if the new owner does not notify the Trademark Operation that the document has been recorded.

See [TMEP §§504](#) and [504.01](#) regarding the circumstances in which the Trademark database will be automatically updated. Thus, if the recorded document does not meet the criteria for automatic updating set forth in [TMEP §§504](#) and [504.01](#), or if there is insufficient time for the Assignment Recordation Branch to process a recently recorded document for automatic updating (*see* [TMEP §504.02](#)), the new owner must file a written request that the certificate issue in the name of the new owner. The new owner can search the Assignment Recordation Branch's database, i.e., the Electronic Trademark Assignment System ("ETAS"), at USPTO [Assignments on the Web](#) to determine whether the assignment has been recorded, and can check TSDR at <http://tsdr.uspto.gov/> to determine whether the Trademark database has been updated to reflect the change of ownership. A request that a registration issue in a new name should be directed to the examining attorney, and should state that the appropriate document has been recorded (or filed for recordation) and that the applicant wants the registration to issue in the name of the assignee or the new name of the applicant.

The request should specify the assignee's address and set forth the assignee's citizenship or state of incorporation or organization (for United States assignees), or country of incorporation or organization (for foreign assignees). If the assignee is a domestic partnership or domestic joint venture, the request should set forth the names, legal entities, and national citizenship (or the state or country of organization) of all general partners or active members. See [TMEP §502.02\(c\)](#) regarding an examining attorney's handling of an application in which the mark has been assigned.

If the applicant states that a request to record a change of ownership has been filed with the Assignment Recordation Branch but is not yet recorded, and the application is in condition to be approved for publication or registration on the Supplemental Register, the examining attorney should suspend action pending recordation of the document and entry of the information into the Trademark database. See [TMEP §§716](#) *et seq.* regarding suspension.

*Clear Chain of Title Required.* A request that a registration issue in the name of a new owner will not be granted unless documents recorded in the Assignment Recordation Branch show clear chain of title from the original applicant to the new owner. The examining attorney should check the Assignment Recordation Branch's database ("Assignment database") on the USPTO website at [Assignments on the Web](#) to ensure that there is clear chain of title. If the Assignment database shows clear chain of title, the examining attorney should ensure that the Trademark database is updated, if necessary.

*Example:* ABC Corporation owns Application 1. ABC Corporation files an assignment of the entire interest and goodwill of the business, transferring ownership of Application 1 to DEF Incorporated. DEF Incorporated later files an assignment of the entire interest and goodwill of the business transferring ownership of Application 1 to XYZ Corporation. The Assignment database shows clear chain of title from ABC Corporation to DEF Incorporated to XYZ Corporation.

If the Assignment database does not show clear chain of title, the examining attorney must not update the Trademark database. If it is necessary to issue an Office action regarding other outstanding issues, the examining attorney should advise the applicant that it must record the necessary documents if it wants the registration to issue in the name of the new owner. If it is not otherwise necessary to issue an Office action, the examining attorney should enter a Note to the File in the record indicating that the Trademark database cannot be updated because there is no clear chain of title in the new owner. If the applicant does not record the necessary documents to show clear chain of title in the new owner, the registration will issue in the name of the party who has clear chain of title according to the Assignment database.

*Time for Recordation and Filing of Request for Issuance in Name of New Owner.* To ensure that the registration issues in the name of the new owner, the new owner should record the assignment before the mark is approved for publication or registration on the Supplemental Register in an application based on §1(a) or §44, or prior to acceptance of a statement of use in an application based on §1(b). The USPTO cannot ensure that a request to issue the certificate in a new name filed after the mark has been approved for publication or registration will be processed in time for the registration to issue in the name of the new owner.

If, before a mark is approved for publication or registration, an applicant has recorded the appropriate document and filed a proper request that the certificate issue in the name of the new owner, but the registration does not issue in the name of the new owner, the USPTO will issue a certificate of correction. See 15 U.S.C. §1057(g), 37 C.F.R. §2.174, and [TMEP §1609.10\(a\)](#) regarding the procedures for requesting correction of a USPTO error, and [TMEP §502.03](#) regarding issuance of a new certificate of registration to the new owner of a registered mark.

### **502.02(b) Applications Under §66(a) of the Trademark Act**

In an application under §66(a) of the Trademark Act, a new owner must record any assignment, change of name, or other document affecting title with the IB. The document(s) must show clear chain of title from the original owner to the party who is taking the action. See [TMEP §501.07](#) regarding assignment of §66(a) applications, and [TMEP §§1906.01](#) and [1906.01\(a\)](#) regarding requests to record changes with the IB. The IB will notify the USPTO when the change of ownership, including change of owner name, is recorded in the International Register. The USPTO will record only those assignments (or other documents affecting title) that have been recorded in the International Register, and will automatically update the “Ownership” field in the Trademark database. A new owner can check TSDR at <http://tsdr.uspto.gov/> to determine whether the Trademark database has been updated to reflect a change in ownership that has been recorded with the IB.

If the Trademark database has not been updated, before the mark is approved for publication the new owner should file a written request that the registration issue in the name of the new owner. The request that a registration issue in the name of the new owner should be directed to the examining attorney, and should state that the appropriate document has been recorded (or filed for recordation) with the IB, and that the applicant wants the registration to issue in the name of the assignee or the new name of the applicant. The request should specify the assignee’s address, and set forth the assignee’s citizenship or state of incorporation or organization (for United States assignees), or country of incorporation or organization (for foreign assignees). If the assignee is a domestic partnership or domestic joint venture, the request should set forth the names, legal entities, and national citizenship (or state or country of organization or incorporation) of all general partners. See [TMEP §502.02\(c\)](#) regarding an examining attorney’s handling of an application after a mark has been assigned.

If the applicant states that a request to record a change of ownership has been filed with the IB but is not yet recorded, and the application is in condition to be approved for publication, the examining attorney should suspend action pending recordation of the document and entry of the information into the Trademark database. See [TMEP §§716](#) *et seq.* regarding suspension.

If, before a mark is approved for publication, an applicant has recorded the appropriate document with the IB and filed a proper request that the certificate issue in the name of the new owner, but the registration does not issue in the name of the new owner, the USPTO will issue a certificate of correction. See 15 U.S.C.

§1057(g), 37 C.F.R. §2.174, and [TMEP §1609.10\(a\)](#) regarding the procedures for requesting correction of a USPTO error.

### **502.02(c) Examining Attorney's Action Regarding Assignment**

If, prior to approval for publication for opposition or registration on the Supplemental Register, or prior to acceptance of a statement of use in an application under §1(b), the applicant advises the examining attorney, or the examining attorney learns through another source, that an assignment has been recorded, the examining attorney should check the Assignment database at [Assignments on the Web](#) to ensure that there is clear chain of title, and should ensure that the Trademark database is updated before approving the mark for publication or registration.

In general, the examining attorney should only issue an Office action questioning whether an assignment has occurred if an entity attempts to take action with respect to the application and USPTO records show ownership in another party. In this situation, the assignee must establish entitlement to take the action, either by recordation of an assignment or submission of proof of the assignment. 37 C.F.R. §3.73(b); [TMEP §502.01](#).

During initial examination, the examining attorney should not suspend action or delay issuance of a final action to await recordation of a document. However, if the applicant submits a request indicating that the relevant document *has been submitted for recordation* and the application is in condition to be approved for publication for opposition or registration on the Supplemental Register, the examining attorney should suspend the application until the document has been recorded and the information regarding the assignment or the change of name has been entered into the Trademark database.

Similarly, during examination of the statement of use in an application under §1(b), the examining attorney should withhold final approval for registration until the relevant document has been recorded and the information regarding the assignment or the applicant's new name has been entered in the Trademark database. If the application is in condition to be approved for publication or registration, the examining attorney should suspend action pending recordation of the document and entry of the information into the Trademark database. See [TMEP §§716](#) *et seq.* regarding suspension.

### **502.03 Issuance of New Certificate to Assignee of Registrant**

*Registrations Under §§ 1 and 44 of the Trademark Act.* In registrations that issued based on applications under §1 or §44 of the Trademark Act, the USPTO will issue a new certificate of registration of the mark for the unexpired part of the registration period in the name of the new owner (or in the registrant's new name), if the new owner/registrant: (1) records the appropriate document (e.g., assignment document, change of name) with the Assignment Recordation Branch; (2) files a written request that a certificate of registration be issued in the new owner's name; *and* (3) pays the required fee (37 C.F.R. §§2.6(a)(8) and 3.41). The new owner, someone with legal authority to bind the new owner (e.g., a corporate officer or general partner of a partnership), or a practitioner qualified to practice under 37 C.F.R. §11.14 ("qualified practitioner") must sign the request for a new certificate. 15 U.S.C. §1057(d); 37 C.F.R. §§2.171(a) and 3.85. The recorded document(s) must show clear chain of title from the original registrant to the party requesting issuance of a new certificate. See [TMEP §§503.03](#) *et seq.* regarding the requirements for recording.

Upon request and payment of the appropriate fee ( *see* [TMEP §111](#)), the Document Services Branch of the USPTO will provide a certified copy of the registration that reflects ownership according to the records

shown in the Assignment database. The certified copy will not show any transfer of ownership that has not been recorded with the Assignment Recordation Branch.

See [TMEP §1604.07\(c\)](#) regarding the issuance of a notification of acceptance of a §8 affidavit in the name of the new owner of a registration, and [TMEP §1606.06](#) regarding renewal in the name of the new owner.

*Registered Extensions of Protection of International Registrations to the United States.* In a registered extension of protection, the new owner must record the assignment, change of name, or other document affecting title with the IB. See [TMEP §501.07](#) regarding assignment of registered extensions of protection, and [TMEP §§1906.01](#) and [1906.01\(a\)](#) regarding requests to record changes in the International Register. The IB will notify the USPTO when the change of ownership, including a change of owner name, is recorded in the International Register, and the USPTO will record the change in the Assignment database and update the “Ownership” field in the Trademark database. The USPTO will record only those assignments (or other documents affecting title) that have been recorded in the International Register. The recorded document(s) must show clear chain of title from the original owner to the party requesting issuance of a new certificate.

The USPTO will issue a new certificate of registration of the mark for the unexpired part of the registration period in the name of the new owner, if the new owner: (1) records the appropriate document (e.g., assignment document, change of name certificate) with the IB; (2) files a written request with the Assignment Recordation Branch that a certificate of registration be issued in the new owner’s name; *and* (3) pays the required fee (37 C.F.R. §2.6(a)(8)). The new owner, someone with legal authority to bind the new owner (e.g., a corporate officer or general partner of a partnership), or a qualified practitioner must sign the request for a new certificate. 15 U.S.C. §1057(d); 37 C.F.R. §2.171(a).

Upon request and payment of the appropriate fee ( *see* [TMEP §111](#)), the Document Services Branch of the USPTO will provide a certified copy of the registration that reflects ownership according to the records shown in the Assignment database. The certified copy will not show any transfer of ownership that has not been recorded with the IB.

Section 10 of the Trademark Act and 37 C.F.R. Part 3 do not apply to assignments of an international registration. 37 C.F.R. §7.22.

## **503 Recording with Assignment Recordation Branch**

### **503.01 Effect of Recording a Document**

*37 CFR §3.54 Effect of recording.*

The recording of a document pursuant to §3.11 is not a determination by the Office of the validity of the document or the effect that document has on the title to an application, a patent, or a registration. When necessary, the Office will determine what effect a document has, including whether a party has the authority to take an action in a matter pending before the Office.

#### **503.01(a) Recording May Not Update Ownership Information**

Recording a document with the Assignment Recordation Branch does not necessarily change or update the ownership of record shown in the Trademark database. There are circumstances in which the Trademark database will be updated automatically upon the recordation of an assignment, change of name, or other document transferring title. See [TMEP §§504](#) and [504.01](#). In all other cases, the new owner must separately notify the Trademark Operation in writing of the recordation of a document, and request that the Trademark

database be updated manually. See TMEP §§[504.01](#) and [505](#). See also [TMEP §§502.02](#) *et seq.* and [502.03](#) regarding issuance of a certificate of registration in the name of a new owner.

### **503.01(b) Recording Does Not Update Correspondence Address in Trademark Database**

The USPTO will only communicate with the applicant or the applicant's attorney at the correspondence address listed in the Trademark database. If an assignment document is recorded with the Assignment Recordation Branch and it includes a new correspondence address, the USPTO will not enter the change of correspondence address or update the Trademark database. The mere inclusion of the new correspondence address on documents filed with the Assignment Recordation Branch does not effect a change in the correspondence address in the Trademark database, even if the ownership information is automatically updated. The USPTO will not change the correspondence address unless a separate written request is made to explicitly change the correspondence address. See [TMEP §609.02\(f\)](#) regarding correspondence after recordation of a change of ownership, and [TMEP §§504](#) *et seq.* regarding automatic updating of ownership information in the Trademark database after recordation of a document with the Assignment Recordation Branch.

### **503.01(c) Recording Is Not a Determination of Validity**

The Assignment Recordation Branch does not examine the substance of documents submitted for recording. The act of recording a document is a ministerial act, and not a determination of the document's validity or of its effect on title to an application or registration. The USPTO will determine the effect of a document only when an assignee attempts to take an action in connection with an application or registration (e.g., when an assignee files a statement of use under 15 U.S.C. §1051(d)(1) or a §8 affidavit). 37 C.F.R. §3.54.

### **503.01(d) Recording Does Not Constitute Response to Office Action**

Recording a document with the Assignment Recordation Branch does *not* constitute a response to an outstanding Office action.

### **503.01(e) Conditional Assignment**

If an assignment is conditional on a given act or event at the time of its execution, the USPTO will view the submission of the assignment for recordation as an indication that the act or event has occurred. See 37 C.F.R. §3.56.

## **503.02 Documents that the Office Will Record**

### *37 CFR §3.11 Documents which will be recorded.*

(a) Assignments of applications, patents, and registrations, accompanied by completed cover sheets as specified in §§3.28 and 3.31, will be recorded in the Office. Other documents, accompanied by completed cover sheets as specified in §§3.28 and 3.31, affecting title to applications, patents, or registrations, will be recorded as provided in this part or at the discretion of the Director.

(b) Executive Order 9424 of February 18, 1944 (9 FR 1959, 3 CFR 1943-1948 Comp., p. 303) requires the several departments and other executive agencies of the Government, including Government-owned or Government-controlled corporations, to forward promptly to the Director for recording all licenses, assignments, or other interests of the Government in or under patents or patent applications. Assignments and other documents affecting title to patents or patent applications and documents not affecting title to patents or patent applications required by Executive Order 9424 to be filed will be recorded as provided in this part.

The USPTO records assignments of trademark applications and registrations, accompanied by completed cover sheets. The USPTO also records documents that affect title to a trademark application or registration, such as certificates issued by appropriate authorities showing a change of name of a business or a merger

of businesses. Although a mere change of name does not constitute a change of legal entity, it is a proper link in the chain of title. Documents of merger are also proper links in the chain of title.

Some instruments that relate to registered marks or to marks in pending applications may be recorded, even though they do not constitute a transfer or change of title to the mark or do not convey the entire title or interest in the business in which the mark is used. Typically, these instruments are license agreements, security agreements, and agreements between parties limiting future extension of use of a mark with regard to the goods/services or other circumstances of use. These instruments are recorded to give third parties notification of equitable interests or other matters relevant to the ownership of a mark.

The USPTO may also record a partial assignment of an interest in a mark. See [TMEP §501.06](#).

In an application under §66 of the Trademark Act or a registered extension of protection, the new owner must record any change of ownership, including a change of owner name, with the IB, who will record the change in the International Register and notify the USPTO accordingly. The USPTO will record only those assignments (or other documents affecting title) that have been recorded in the International Register. See [TMEP §§1906.01](#) and [1906.01\(a\)](#) for information about recording changes of ownership of international registrations with the IB. Section 10 of the Trademark Act and 37 C.F.R. Part 3 do not apply to assignments of §66(a) applications and registered extensions of protection. 37 C.F.R. §7.22. See [TMEP §501.07](#).

### **503.03 Requirements for Recording**

#### **503.03(a) Formal Requirements for Documents**

*Applications and Registrations Based on §§1 and 44 of the Trademark Act.* All documents submitted for recording must be accompanied by a cover sheet that meets the requirements of 37 C.F.R. §3.31. See [TMEP §503.03\(e\)](#).

To expedite recordation, new owners are encouraged to file requests for recordation electronically through ETAS, on the USPTO website at <http://etas.uspto.gov>. Documents filed electronically are recorded much faster than paper documents. Using ETAS, a party can create and submit a Trademark Assignment Recordation Form Cover Sheet by completing an online form, and attach the supporting legal documentation as an image in tagged image file format (“TIFF”) for submission via the Internet.

See [TMEP §§503.03\(b\)](#) *et seq.* regarding the requirements for recordation.

*Section 66(a) Applications and Registered Extensions of Protection.* In a §66(a) application or a registered extension of protection, the new owner must record the change of ownership, including a change of owner name, with the IB, who will record the change in the International Register and notify the USPTO accordingly.

See [TMEP §501.07](#). The IB does not require supporting documents. See [TMEP §§1906.01](#) and [1906.01\(a\)](#) for information about recording changes of ownership of international registrations with the IB.

#### **503.03(b) Supporting Documents**

To record an assignment document or other document affecting title to a trademark application or registration, a legible cover sheet and one of the following must be submitted:

- (1) A copy of the document;

- (2) A copy of an extract from the document evidencing the effect on title; or
- (3) A statement signed by both the party conveying the interest *and* the party receiving the interest explaining how the conveyance affects title.

37 C.F.R. §3.25(a).

To record a name change, only a legible cover sheet is required. 37 C.F.R. §3.25(b).

Documents filed through ETAS must be in TIFF format. When printed to a paper size of either 21.6 by 27.9 cm (8½ by 11 inches) or 21.0 by 29.7 cm (DIN size A4), a 2.5 cm (one-inch) margin must be present on all sides. 37 C.F.R. §3.25(c)(1).

All paper documents submitted for recordation must be submitted on white and non-shiny paper that is either 8½ by 11 inches (21.6 by 27.9 cm) or DIN size A4 (21.0 by 29.7 cm) with a one-inch (2.5 cm) margin on all sides in either case. Only one side of each page may be used. Original documents should not be submitted, because the USPTO does not return recorded documents. 37 C.F.R. §3.25(c)(2).

Documents that do not meet these requirements will not be recorded. 37 C.F.R. §3.51. See [TMEP §503.05](#).

### **503.03(c) English Language Requirement**

The USPTO will not record a document that is not in the English language, unless it is accompanied by an English translation that is signed by the translator. 37 C.F.R. §3.26.

### **503.03(d) Fee for Recording**

All requests to record documents with the Assignment Recordation Branch must be accompanied by the appropriate fee. A fee is required for *each* application and registration against which a document is recorded, as identified in the cover sheet. 37 C.F.R. §§2.6 and 3.41. The fee does not depend on the length of the document.

If the Assignment Recordation Branch determines that materials submitted for recording do not meet the recording requirements, the fee is not refunded.

### **503.03(e) Cover Sheet**

Each document submitted for recording in the Assignment Recordation Branch must be accompanied by a cover sheet that meets the requirements of 37 C.F.R. §3.31. Only one set of documents and cover sheets to be recorded should be filed. 37 C.F.R. §3.28.

To expedite recordation, new owners are encouraged to file requests for recordation electronically through ETAS, on the USPTO website, at <http://etas.uspto.gov>. Documents filed electronically are recorded much faster than paper documents. Using ETAS, a new owner can create a Trademark Assignment Recordation Form Cover Sheet by completing an online form, and attach the supporting legal documentation as a TIFF image for submission via the Internet.

If the new owner files the assignment or name change on paper, the cover sheet must be legible. 37 C.F.R. §3.25(a). The USPTO has a trademark cover sheet form that can be downloaded from the USPTO website

at <http://www.uspto.gov/web/forms/pto1594.pdf>. Questions regarding cover sheets should be directed to the Assignment Recordation Branch. Contact information is provided on the USPTO website at <http://etas.uspto.gov/>. See notice at 1140 TMOG 65, 69 (July 28, 1992). Use of the USPTO's cover sheet form is preferred, but is not mandatory.

Under 37 C.F.R. §3.31, a trademark cover sheet must contain the following:

- The name of the party conveying the interest;
- The name and address of the party receiving the interest;
- The entity (e.g., individual, corporation, partnership, etc.) and citizenship of the party receiving the interest (e.g., the citizenship of an individual, the state or country of incorporation or organization of a corporation, etc.). If the party receiving the interest is a domestic partnership or domestic joint venture, the names, entity, and citizenship (or the state or country of organization or incorporation) of all general partners or active members that compose the partnership or joint venture;
- A description of the interest conveyed or transaction to be recorded (e.g., assignment, license, change of name, merger, security agreement);
- Each application serial number or registration number against which the document is to be recorded, if known. If the application serial number is not known, the party seeking to record the document must submit a copy of the application and/or a reproduction of the mark and an estimate of the date that the USPTO received the application;
- The name and address of the party to whom correspondence concerning the request to record the document should be sent;
- The date the document was executed; and
- The signature of the party submitting the document. For a document filed electronically, the person who signs the cover sheet must either: (1) place a symbol comprised of letters, numbers, and/or punctuation marks between forward slash marks (e.g., “/Thomas O’Malley/”) in the signature block on the electronic submission; or (2) sign the cover sheet using another form of electronic signature specified by the Director.

The cover sheet should also include:

- The entity and citizenship of the conveying party (e.g., the citizenship of an individual, state or country of incorporation or organization of a corporation, or names and citizenship of the general partners of a domestic partnership);
- The number of applications and/or registrations identified in the cover sheet;
- The total fee; and
- An identification or description of the mark.

In addition, if the receiving party has designated a domestic representative ( see [TMEP §§501.04](#) and [610](#)), the cover sheet should include an indication to this effect.

Documents that are not accompanied by a completed cover sheet will not be recorded. 37 C.F.R. §3.51.

Separate patent and trademark cover sheets should be submitted for documents that include interests in, or transactions involving, both patents and trademarks. If a cover sheet contains both patent and trademark

information, any information contained therein about pending patent applications will become public record upon recordation. 37 C.F.R. §§3.28 and 3.31(b).

### **503.04 Address for Submitting Documents for Recording**

To expedite recordation, new owners are encouraged to file requests to record documents with the Assignment Recordation Branch electronically through ETAS, on the USPTO website, at <http://etas.uspto.gov>. Paper documents and cover sheets to be recorded in the Assignment Recordation Branch should be sent to Mail Stop Assignment Recordation Services, Director of the United States Patent and Trademark Office, P. O. Box 1450, Alexandria VA 22313-1450. 37 C.F.R. §§2.190(c) and 3.27.

### **503.05 Recording Procedure and Recordation Date**

*Applications and Registrations Under §§ 1 and 44 of the Trademark Act.* The recording of documents in the Assignment Recordation Branch of the USPTO is governed by 37 C.F.R. Part 3.

To expedite recordation, new owners are encouraged to file requests for recordation electronically through ETAS, on the USPTO website, at <http://etas.uspto.gov>. Using ETAS, a new owner can create and submit a Trademark Assignment Recordation Form Cover Sheet by completing an online form, and attach the supporting legal documentation as a TIFF image for submission via the Internet. Documents filed electronically are recorded much faster than paper documents.

The date of recordation is the date that the USPTO receives a cover sheet that meets the requirements of 37 C.F.R. §3.31 and a document affecting title that meets the requirements of 37 C.F.R. §3.25. *See* 37 C.F.R. §3.51.

The party recording the document should carefully review the document and cover sheet for accuracy and completeness. The USPTO only examines the materials submitted for form, to determine whether the requirements for recording (*see* [TMEP §§503.03](#) *et seq.*) have been met.

If the materials submitted meet the requirements for recordation, the Assignment Recordation Branch will record the document and cover sheet. Only the data specified on the cover sheet will be entered in the Assignment database. After recording the document and cover sheet, the USPTO will issue a notice of recordation that reflects the data as recorded in the Assignment database. The party recording the document should carefully review the notice of recordation. *See* [TMEP §§503.06](#) *et seq.* regarding correction of errors in a cover sheet or recorded document.

Under 37 C.F.R. §3.51, the USPTO will return documents that do not meet the requirements for recording (e.g., documents submitted without a completed cover sheet, the appropriate fee, or an English translation, where applicable) to the sender for correction. The returned documents, stamped with the original date of receipt in the USPTO, will be accompanied by a notice of non-recordation indicating that, if the returned documents are corrected and resubmitted to the USPTO within a specified period of time, the USPTO will assign the original filing date of the documents as the recordation date. The USPTO will not extend the time period specified in the letter. If the returned documents are corrected and resubmitted *after* the time specified in the letter, the recordation date is the date on which the USPTO receives corrected documents that meet the requirements for recording. The certificate of mailing and transmission procedures of 37 C.F.R. §2.197 and the “Express Mail” procedure of 37 C.F.R. §2.198 may be used for resubmitting the returned documents, to avoid lateness due to mail delay.

If documents submitted for recording are returned unrecorded by the Assignment Recordation Branch, and the submitter believes that the documents were returned in error, he or she may file a petition to the Director under 37 C.F.R. §2.146. See [TMEP §§1702](#) through [1708](#) regarding petitions.

Applicants and registrants can search the Assignment database at [Assignments on the Web](#) to determine whether an assignment has been recorded.

*Section 66(a) Applications and Registered Extensions of Protection.* In an application under §66(a) of the Trademark Act or a registered extension of protection, the IB will notify the USPTO of any changes in ownership, including a change of owner name, recorded in the International Register, and of the date of recordation. The USPTO will record only those assignments (or other documents affecting title) that have been recorded in the International Register. See [TMEP §501.07](#) for further information about assignment of §66(a) applications and registered extensions of protection, and [TMEP §§1906.01](#) and [1906.01\(a\)](#) for information about recording changes of ownership of international registrations with the IB.

Section 10 of the Trademark Act and 37 C.F.R. Part 3 do not apply to assignments of an international registration. 37 C.F.R. §7.22.

## 503.06 Correction of Errors in Cover Sheet or Recorded Document

*37 CFR §3.34 Correction of cover sheet errors.*

(a) An error in a cover sheet recorded pursuant to §3.11 will be corrected only if:

- (1) The error is apparent when the cover sheet is compared with the recorded document to which it pertains, and
- (2) A corrected cover sheet is filed for recordation.

(b) The corrected cover sheet must be accompanied by a copy of the document originally submitted for recording and by the recording fee as set forth in §3.41.

Once a document is recorded with the Assignment Recordation Branch, the Assignment Recordation Branch will not remove the document from the record relating to that application or registration. See [TMEP §503.06\(e\)](#).

During the recording process, the Assignment Recordation Branch will check to see that a trademark cover sheet is complete and record the data exactly as it appears on the cover sheet. Once the document is recorded, the USPTO will issue a notice of recordation.

The party recording the document should carefully review the notice of recordation.

Typographical errors made by the USPTO will be corrected promptly and without charge upon written request directed to the Assignment Recordation Branch. For any other error, the party recording the document is responsible for filing the documents and paying the recordation fees necessary to correct the error, using the procedures set forth in [TMEP §§503.06\(a\)](#) through [503.06\(d\)](#).

In an application under §66(a) of the Trademark Act or a registered extension of protection, any request to correct an error in a document recorded with the IB must be corrected at the IB. Such a request cannot be sent to the IB through the USPTO. See [TMEP §§1906.01](#) *et seq.* for information about requests to record changes in the International Register.

### 503.06(a) Typographical Errors in Cover Sheet

A party may correct typographical errors on a previously recorded cover sheet by submitting the following to the Assignment Recordation Branch: (1) a completed new cover sheet containing the correct information;

(2) a copy of the originally recorded assignment document (or other document affecting title); (3) a copy of the previously recorded, original cover sheet containing the erroneous information; and (4) the required fee for each application or registration to be corrected (37 C.F.R. §§2.6 and 3.41). 37 C.F.R. §3.34. See [TMEP §503.03\(e\)](#) for information about the cover sheet. The original cover sheet is required for the Assignment Recordation Branch to identify the nature of the correction. A copy of the original cover sheet may be obtained using [Assignments on the Web](#) on the USPTO website by typing in the reel and frame number of the previously recorded assignment, clicking on the “View Recorded Assignment” icon, and printing a copy of the cover sheet.

If the corrective documents are filed electronically via ETAS, the party filing the correction should check the box titled “Corrective Assignment” in the “Nature of the Conveyance” field and fill in the mandatory fields, which include: (1) identification of the parts of the cover sheet that need to be corrected (i.e., name of receiving party, or trademark application serial number or registration number); (2) the reel and frame number where the original cover sheet is recorded; and (3) identification of the nature of the conveyance that was originally recorded (e.g., assignment of entire interest, security interest, name change, or merger).

If the corrective documents are filed on paper using the form provided by the Assignment Recordation Branch, the party filing the correction should check the box titled “Other” in the section titled “Nature of Conveyance” and, in the space provided, state the following: “Corrective assignment to correct the previously recorded assignment against Property Number ^ (insert trademark application serial number or registration number) recorded at ^ (identify the reel and frame number where the original cover sheet is recorded).”

The Assignment Recordation Branch will compare the new cover sheet containing the corrected information with the original cover sheet and the originally recorded assignment document (or other document affecting title) to determine whether the correction is typographical in nature. If the error is typographical in nature, the Assignment Recordation Branch will record the new cover sheet and correct the Assignment database. If the assignment document (or other document affecting title) cannot be recorded, the Assignment Recordation Branch will issue a notice indicating the reason for non-recordation.

If ownership information is incorrect in the USPTO’s Trademark database, see [TMEP §§505–505.02](#) regarding requests to update ownership information in applications and registrations.

### **503.06(a)(i) Typographical Errors in Cover Sheet that Do Not Affect Title to Application or Registration**

If the original cover sheet contains a typographical error that does not affect title to the application or registration against which the original assignment, name change, or other interest is recorded, the Assignment Recordation Branch will correct the Assignment database and permit the recording party to keep the original date of recordation.

### **503.06(a)(ii) Typographical Errors in Cover Sheet that Do Affect Title to Application or Registration**

If the original cover sheet contains a typographical error that affects title to the application or registration against which the assignment, name change, or other interest is recorded, the recording party will not be entitled to keep the original date of recordation. See [TMEP §503.05](#). Rather, the Assignment Recordation

Branch will correct its automated records and change the date of recordation to the date on which the corrected cover sheet was received in the USPTO.

### **503.06(b) Typographical Errors in Recorded Assignment Document**

If there is a typographical error in the recorded assignment document (or other document affecting title) rather than in the cover sheet, the party responsible for the erroneous document (e.g., the assignor) must either record a new document with the Assignment Recordation Branch or make corrections to the original document and re-record it. If the assignor is not available to correct an original document or execute a new one, the assignee may submit an affidavit or declaration for recordation in which the assignee identifies the error and requests correction. The affidavit or declaration must: (1) be signed by someone with firsthand knowledge of the facts and (2) identify the current owner of the property and explain why the originally recorded document was erroneous. To record the affidavit or declaration, the assignee must file: (1) a new complete cover sheet; (2) the affidavit or declaration; (3) a copy of the originally recorded document with the corrections thereto initialed and dated by the party signing the affidavit or declaration; and (4) the required fee for each application or registration to be corrected (37 C.F.R. §§2.6 and 3.41). See *In re Abacab Int'l Computers Ltd.*, 21 USPQ2d 1078 (Comm'r Pats. 1987). See [TMEP §503.03\(e\)](#) for information about the cover sheet.

In an application under §66(a) of the Trademark Act or a registered extension of protection, any request to correct an error in a document recorded with the IB must be corrected at the IB. Such a request cannot be sent to the IB through the USPTO.

### **503.06(c) Assignment, Change of Name, or Other Interest Improperly Filed and Recorded by Another Person Against Owner's Application or Registration**

When the owner of an application or registration discovers that another party has improperly recorded an assignment, name change, or other interest against the owner's application or registration, the owner should initially contact the party who filed the improper recording and have that party record corrective documents. See [TMEP §503.06\(a\)](#) regarding typographical errors in the cover sheet. If that party files corrective documents, the Assignment Recordation Branch will record the assignment, change of name, or other interest in the correct application or registration, and remove any references to the application or registration in which the improper recording was made. The assignment, change of name, or other interest will remain at the reel and frame number where it was originally recorded, but a search of the assignment records will not associate the improper recording with the owner's property.

If the party who recorded the improper document cannot be located or is unwilling to file corrective documents, the owner must file documents to correct the record. Depending on the nature of the error that resulted in the improper recordation, the owner has two options.

If the existing evidence of record clearly demonstrates that the improper assignment, change of name, or other interest recorded against the owner's application or registration ("owner's property") was the result of a typographical error in identifying the application or registration number (e.g., the party who improperly filed mistakenly transposed property numbers), and the improper recording was filed by someone who is not the owner and does not have proper chain of title, the owner may submit a request to the Office of the Deputy Commissioner for Trademark Examination Policy to have any reference of the improper recording removed from the owner's property. The owner must submit the request in writing, detailing the erroneous information and providing the reel and frame number where the document is recorded, and ask that the recording not be associated with the owner's property. The request should be faxed to 571-273-8950. The

request will only be granted if the current assignment records show on their face that a typographical error caused the recordation against the wrong property and the error was made by someone other than the owner. The request will not be granted if there is a dispute regarding ownership.

If the record as a whole shows that the application or registration number is consistent with the identified mark and nothing on the face of the recorded document indicates there was an error in identifying the application or registration number, the owner may record corrective documents with the Assignment Recordation Branch. A corrective assignment, name change, or other interest must include: (1) a new complete cover sheet containing the correct owner information; (2) an affidavit or declaration identifying the correct owner, stating why the previously recorded document was not proper, and providing the reel and frame number where the original cover sheet and underlying document is recorded; and (3) the required fee for each application or registration to be corrected (37 C.F.R. §§2.6 and 3.41). See [TMEP §503.03\(e\)](#) for information about the cover sheet.

The affidavit or declaration must: (1) be signed by someone with firsthand knowledge of the facts; (2) identify the current owner of the application or registration; and (3) state why the document recorded against the application or registration was erroneous, and that the last correct owner or assignee has been and continues to be the owner of the application or registration.

If corrective documents are filed electronically via ETAS, the owner should check the box titled “Corrective Assignment” in the “Nature of the Conveyance” field and fill in the following required information in the fields provided: (1) identification of the parts of the assignment or change of name that need to be corrected (e.g., name of the receiving party, or trademark application serial number or registration number); (2) the reel and frame number where the original cover sheet is recorded; and (3) identification of the nature of the conveyance that was originally recorded (e.g., assignment of entire interest, change of name). The owner should also write the name of the correct owner of the application or registration in both the assignor (name of the conveying party) and assignee (name of the receiving party) fields to make clear that ownership of the application or registration never changed and the chain of title remains in the last correct owner or assignee.

If the corrected documents are filed on paper using the form provided by the Assignment Recordation Branch, the owner should check the box titled “Other” in the section titled “Nature of Conveyance” and, in the space provided, state the following: “Corrective assignment to correct the previously recorded assignment against Property Number ^ (insert trademark application serial number or registration number) recorded at ^ (identify the reel and frame number where the original cover sheet is recorded).” The owner should also write the name of the correct owner of the application or registration in both the assignor (name of the conveying party) and assignee (name of the receiving party) fields to make clear that ownership of the application or registration never changed and the chain of title remains in the last correct owner or assignee.

Whether filed via ETAS or on paper, if all the filing requirements are met in instances where nothing on the face of the recorded document indicates that there was an error in identifying the application or registration number, the Assignment Recordation Branch will record the corrected assignment or change of name in the identified application or registration, but will not remove the improper recording. However, anyone searching and reviewing the assignment records will see the corrective documents, which clarify the chain of title.

In the rare case of a dispute in ownership where one party attempts to appropriate ownership of the application or registration by filing an assignment document (or other document affecting title), the other party’s recourse is to record an affidavit or declaration (as explained above) with the Assignment Recordation Branch in support of its position. As noted above, the USPTO’s recordation of documents purporting to affect chain

of title is a purely ministerial act and is not an Office determination of the document's validity or of its effect on title to an application or registration. See 37 C.F.R. §3.54; [TMEP §503.01\(c\)](#).

#### **503.06(d) Owner Must Notify Trademark Operation of Correction**

Recording a corrective document with the Assignment Recordation Branch generally does not change or update the information to be corrected in the Trademark database. The owner must also separately notify the Trademark Operation in writing that the corrective document has been recorded and identify the corrected information.

See [TMEP §504.03](#) regarding correction of the Trademark database where it has been automatically updated to show ownership of an application or registration in a party who does not have clear chain of title as evidenced by the Assignment database, and [TMEP §§505](#) *et seq.* regarding requests to update ownership information.

#### **503.06(e) Recorded Documents Not Removed from Assignment Records**

Except in situations where typographical errors have been corrected following the procedures set forth in [TMEP §503.06\(c\)](#), once an assignment or other document is recorded against an application or registration, the Assignment Recordation Branch will not remove the document from the records relating to that application or registration in the Assignment database, even if the assignment or other document is subsequently found to be invalid.

The goal of the USPTO is to maintain a complete history of claimed interests in a mark. Since the act of recording a document is not a determination of the document's validity, maintaining a complete record of claimed interests does not preclude an owner from using a mark, or from establishing its ownership of the mark in a proper forum, such as a federal court. *In re Ratny*, 24 USPQ2d 1713 (Comm'r Pats. 1992).

#### **503.06(f) Petitions to Correct or “Expunge” Assignment Records**

To correct an error in a recorded document, the owner of an application or registration should record corrective documents with the Assignment Recordation Branch, in accordance with the procedures outlined in [TMEP §§503.06](#) through [503.06\(d\)](#).

If the Assignment Recordation Branch denies the request to correct the error, the owner may file a petition to the Director under 37 C.F.R. §2.146. See [TMEP Chapter 1700](#) regarding petitions.

However, petitions to correct, modify, or “expunge” assignment records are rarely granted. Such petitions are granted only if the petitioner can prove that: (1) the normal corrective procedures outlined in [TMEP §§503.06](#) through [503.06\(d\)](#) will not provide the petitioner with adequate relief; and (2) the integrity of the assignment records will not be affected by granting the petition.

Even if a petition to “expunge” a document is granted with respect to a particular application or registration, the images of the recorded document remain in the records of the Assignment Recordation Branch. The USPTO will delete the links to the application or registration that was the subject of the petition, so that no information about the recorded document will appear when someone searches for that application or

registration number in the Assignment database. However, the image of the document remains at the same reel and frame number, and it will still appear when that reel and frame number is viewed.

### **503.07 “Indexing” Against Recorded Document Not Permitted**

The USPTO does not process requests for “indexing” or “cross-referencing” additional trademark registration numbers or application serial numbers against a document previously recorded in the Assignment Recordation Branch.

Therefore, even when an assignment document (or other document affecting title) has already been recorded in the Assignment Recordation Branch in connection with a trademark application or registration, a party who wants to record that document against additional applications or registrations must submit the following:

(1) A copy of the originally recorded assignment document (or other document affecting title), a copy of an extract from the recorded document evidencing the effect on title, or a statement signed by both the party conveying the interest and the party receiving the interest explaining how the conveyance affects title (this may comprise a copy of the previously recorded documents on which the Assignment Recordation Branch has stamped the reel and frame numbers at which they are recorded);

(2) A completed cover sheet ( *see* [TMEP §503.03\(e\)](#)) that includes the number of each additional registration and/or application against which recordation of the assignment document (or other document affecting title) is requested; and

(3) The appropriate recording fee (37 C.F.R. §§2.6 and 3.41).

The USPTO will assign a new date of recordation for the additional applications or registrations, update the Assignment database, and create an electronic record of the cover sheet and assignment document (or other document affecting title), which will become part of the official record. *See* notice at 1157 TMOG 12 (Dec. 7, 1993).

### **503.08 Accessibility of Assignment Records**

The Assignment Recordation Branch of the USPTO maintains separate records for patents and trademarks. 15 U.S.C. §1060(a)(5); 37 C.F.R. §2.200(a)(1).

The public can search the trademark assignment records of the Assignment Recordation Branch on the USPTO website at <http://assignments.uspto.gov/assignments>.

Assignments of trademark applications and registrations are open to public inspection upon recordation in the Assignment Recordation Branch. *See* 37 C.F.R. §3.31(b) and [TMEP §503.03\(e\)](#) regarding the submission of separate cover sheets for documents that include interests in, or transactions involving, both patents and trademarks.

Before 1955, documents were recorded in bound volumes. The location of documents in these volumes is designated by “liber and page,” that is, by the number of the book (liber) and the number of the page in the book. Since 1955, documents have been recorded on microfilm, and are available for immediate inspection in the Trademark Assignment Search Room. The location of these documents is designated by “reel and frame,” that is, by the number of the reel on which they are microfilmed and the number of the frame on the reel.

All assignment records related to pre-1955 trademark records were transferred to the National Archives and Records Administration (“NARA”) in 1990. The USPTO still maintains records of all trademark assignments recorded on or after January 1, 1955.

All trademark assignment records from 1837 to December 31, 1954 are maintained and available for public inspection in the National Archives Research Room located at the Washington National Records Center Building, 4205 Suitland Road, Suitland, Maryland 20746. Assignments recorded before 1837 are maintained at the National Archives and Records Administration, 841 South Pickett Street, Alexandria, Virginia 22304.

Copies of assignment records recorded on or after January 1, 1955 may be ordered from the USPTO upon payment of the fee required by 37 C.F.R. §2.6. An order for a copy of an assignment record should identify the reel and frame at which it is recorded in the Assignment Recordation Branch. If the correct reel and frame numbers are not identified (e.g., the order identifies the document only by the name of the registrant and the number of the registration, or by the name of the applicant and the serial number of the application), the USPTO will charge an additional fee for the time spent searching for the document.

Requests for copies of pre-1955 trademark assignment records should be directed to NARA. Payment of the fees required by NARA should accompany all requests for copies. 37 C.F.R. §2.200(a)(2).

### **503.08(a) Trademark Assignment Abstracts of Title**

Members of the public may obtain trademark assignment abstracts of title to particular registrations or applications from the Document Services Branch of the Public Records Division of the USPTO, upon payment of the fee required by 37 C.F.R. §2.6. *See* notices at 1140 TMOG 65, 66 (July 28, 1992) and 1165 TMOG 13 (Aug. 2, 1994).

## **504 Automatic Updating of Ownership of Trademark Applications and Registrations in Trademark Database**

Prior to November 2, 2003, recording a document with the Assignment Recordation Branch of the USPTO did not automatically change the ownership record in the Trademark database. To change the ownership record in the Trademark database, a new owner had to notify the Trademark Operation that ownership had changed. 37 C.F.R. §3.85.

Effective November 2, 2003, except in the limited circumstances set forth in [TMEP §504.01](#), the USPTO will automatically update the ownership information in the Trademark database of registrations and pending applications when one of the following documents is recorded with the Assignment Recordation Branch:

- Assignment of entire interest and goodwill;
- Nunc Pro Tunc Assignment of entire interest and goodwill;
- Merger; or
- Name Change.

In these situations, it is unnecessary for the new owner to notify the Trademark Operation of the change of ownership, or to file a request in a pending application that the certificate of registration issue in the name of the new owner. In all other situations, the new owner must separately notify the Trademark Operation in writing that ownership has changed in order to update the ownership information in the Trademark database.

To ensure that the Trademark database is automatically updated, the party filing the assignment, merger, or name change should identify the “Nature of the Conveyance” by checking the “Assignment,” “Merger,” or “Name Change” box in the “Nature of Conveyance” field and should not check the “Other” box.

The Trademark database will show only the last recorded owner, not the complete chain of title. The complete chain of title can be obtained from the Assignment Recordation Branch’s database on the USPTO website at [Assignments on the Web](#). The “Ownership” field in the Trademark database will be automatically updated whether or not the records of the Assignment Recordation Branch show clear chain of title transferring ownership to the last recorded owner. The Trademark database will include the reel and frame number and execution date of the recorded document, as well as a notation to “Check Assignments.” Examining attorneys must check assignment records to ensure that the owner of record in the Trademark database has clear chain of title. If there is no clear chain of title, the ownership information should be changed to the last owner with clear chain of title and a Note to the File should be entered in the record to document the change.

Trademark owners can search the [Assignment database](#) to determine whether an assignment has been recorded and can check TSDR at <http://tsdr.uspto.gov/> to determine whether the Trademark database has been updated.

*Note - Filing Multiple Assignments with the Same Execution Date on the Same Date:* When multiple assignments with the same execution date are filed on the same date, the ownership information in the Trademark database will not be automatically updated. See the note in [TMEP §504.01](#) for further information.

### **504.01 Circumstances in Which Trademark Database Will Not Be Automatically Updated**

In the circumstances discussed below, the USPTO will **not** automatically update the Trademark database to show the change in ownership, even if the appropriate document is recorded in the Assignment Recordation Branch on or after November 2, 2003. In these situations, the applicant must separately notify the Trademark Operation in writing that the assignment or other title document has been recorded, and request that the Trademark database be updated to show title in the new owner. 37 C.F.R. §3.85; [TMEP §§502.02](#) *et seq.* and [502.03](#). See [TMEP §505.01](#) regarding requests to update ownership information in pending applications and [TMEP § 505.02](#) regarding requests to update ownership information after registration.

(1) *Execution Date Conflicts with Previously Recorded Document.* If a previously recorded assignment, merger, change of name, security interest document, or any other recorded document for the same application or registration has an execution date that is the same as or later than the execution date of the subsequently recorded document, the Trademark database will not be automatically updated. Office personnel will have to review the assignment records and update the database manually. *Note - Filing Multiple Assignments with the Same Execution Date on the Same Date:* When requests to record multiple assignments (or other documents transferring title) with the same execution date are filed on the same date, the ownership information in the Trademark database is not automatically updated. Office personnel must manually update the ownership information after reviewing the entire chain of title to identify the proper owner. This review is done when a written request to update ownership information is filed in accordance with [TMEP §505](#). Therefore, information regarding the proper order of the multiple transfers should be included in the written request to the Trademark Operation so that proper chain of title may be determined and the ownership record updated accordingly in the Trademark database.

(2) *Blackout Period: Ownership of Pending Applications Cannot be Updated During Certain Time Periods.* The Trademark database will not be automatically updated to show a change of ownership during the following stages of the registration process:(a) For §§1(a) and 44 applications:

- Between approval for publication and issuance of registration.

(b) For §1(b) applications:

- Between approval for publication and issuance of notice of allowance; and
- Between acceptance of the statement of use and issuance of the registration.

(3) *Maximum Number of Ownership Changes.* The Trademark database will not be automatically updated if the maximum number of ownership changes permitted for the following time periods has been reached:

- Prior to publication – up to nine changes of ownership.
- Between publication and registration – up to nine additional changes of ownership.

In the situations described above, new owners must file a written request with the Trademark Operation, as set forth in [TMEP §505](#), to have the Trademark database updated. See [TMEP §504](#) regarding the types of assignment documents for which the USPTO will automatically update the ownership information in the Trademark database.

## 504.02 Processing Time for Automatic Updating

Recording a change of ownership does not simultaneously and automatically update the Trademark database with the new owner information. The process for automatically updating the Trademark database requires that the Assignment Recordation Branch: (1) record the document transferring title in the Assignment database; and (2) extract the trademark assignment information from the Assignment database and send it electronically to the Trademark Operation for automatic updating. The Assignment Recordation Branch will extract trademark assignment information from the Assignment database and transmit it to the Trademark Operation once a week.

To expedite recordation with the Assignment Recordation Branch, new owners are encouraged to file requests for recordation electronically through ETAS on the USPTO website, at <http://etas.uspto.gov>.

If a trademark owner wants the Trademark database updated within a certain time frame, and there is insufficient time for the Assignment Recordation Branch to process a recently recorded title document for automatic updating, the owner should notify the Trademark Operation in writing of the change of ownership. 37 C.F.R. §3.85; [TMEP §§502.02 et seq.](#) and [502.03](#). Trademark owners can search the Assignment Recordation Branch's database at [Assignments on the Web](#) to determine whether an assignment has been recorded, and can check TSDR at <http://tsdr.uspto.gov/> to determine whether the Trademark database has been updated.

## 504.03 Correction to Automatic Update - Last Recorded Owner Does Not Have Clear Chain of Title

In the situations set forth in [TMEP §504](#), the Trademark database will be automatically updated to show the last recorded owner regardless of whether the Assignment database shows that the last recorded owner has clear chain of title. If the Trademark database is automatically updated to show ownership of an application or registration in a party who does not have clear chain of title as evidenced by the Assignment database, the owner of the application or registration may file a written request to have the "Ownership" field in the Trademark database corrected. The USPTO will grant a request for correction of the "Ownership" field if:

- (1) The Trademark database was automatically updated to show ownership in a party who does not have clear chain of title according to the Assignment database; *and*
- (2) At the time the Trademark database was automatically updated in the name of the incorrect party, the Assignment database showed clear chain of title in the party requesting correction of the “Ownership” field in the Trademark database.

The correction of the Trademark database will not be automatically reflected in the Assignment database. To correct the assignment records, a party must follow the procedures set forth in [TMEP §§503.06](#) *et seq.* for correcting errors in the Assignment database.

*Example:* ABC Corporation owns Application No. 1. An assignment of the entire interest and goodwill is filed for recordation, transferring ownership of Application 1 from ZED Corporation to XYZ Corporation. The Assignment Recordation Branch records the assignment and transmits the trademark assignment information to the Trademark Operation. The Trademark database is automatically updated to show XYZ Corporation as the new owner of Application 1. The Trademark Operation will correct its database, upon ABC Corporation’s request, because the Assignment database does not show clear chain of title from ABC Corporation to XYZ Corporation, and the Assignment database shows clear chain of title in ABC Corporation.

In all other situations, a party requesting correction of the ownership records of the Trademark Operation must follow the procedures for correcting errors in recorded documents or cover sheets, as set forth in [TMEP §§503.06](#) *et seq.* That is, the party must first file corrective documents with the Assignment Recordation Branch, pay the recordation fees necessary to correct the error, and notify the Trademark Operation in writing that the corrective documents have been recorded.

Prior to registration, a request for correction of the “Ownership” field in the Trademark database should be made in an amendment directed to the examining attorney. If such a request is filed after publication, it will be handled in accordance with standard procedures for processing amendments after publication, as set forth in [TMEP §§1505.01](#) *et seq.* In a §1(b) application, if a request for correction of the “Ownership” field is filed between the issuance of the notice of allowance and the submission of a statement of use, the USPTO will place the request in the file for consideration at the time of examination of the statement of use. 37 C.F.R. §2.77; [TMEP §1107](#).

After registration, a request for correction of the “Ownership” field should be submitted in writing to the Post Registration Section in the form of a request for correction under §7(g) of the Trademark Act and 37 C.F.R. §2.174. See [TMEP §505.02](#) regarding proper procedures for requests to update ownership information for registrations.

### **504.04 Automatic Updating Does Not Apply to Requests for Recordation Filed Before November 2, 2003**

The automatic updating procedures discussed in §§[504.01](#) through [504.03](#) apply to all assignments, mergers, and name changes recorded in the Assignment Recordation Branch on or after November 2, 2003, even if the request for recordation was filed before November 2, 2003.

These procedures do not apply to assignments, mergers, or name changes that were recorded in the Assignment Recordation Branch prior to November 2, 2003. For documents recorded prior to November 2, 2003, the

new owner must notify the Trademark Operation in writing of the change of ownership and request that the Trademark database be updated manually. 37 C.F.R. §3.85.

### **504.05 Automatic Updating Does Not Apply to §66(a) Applications and Registered Extensions of Protection**

The procedures discussed in §§[504.01](#) through [504.04](#) do not apply to §66(a) applications and registered extensions of protection of international registrations to the United States. Changes of ownership, including a change of owner name, of international registrations and requests for extensions of protection of international registrations to the United States must be recorded with the IB. The USPTO will record only those assignments (or other documents of title) that have been recorded in the International Register. The USPTO's Trademark database will be automatically updated to reflect any change of ownership that is recorded in the International Register. See [TMEP §501.07](#) for further information about assignment of §66(a) applications and registered extensions of protection, and [TMEP §§1906.01](#) and [1906.01\(a\)](#) for information about recording changes of ownership of international registrations with the IB.

### **505 Requesting Update of Ownership Information When the Trademark Database Does Not Automatically Update After a Document is Recorded**

As noted in [TMEP §504.01](#), in certain cases, the recordation of a document with the Assignment Recordation Branch does not automatically update the ownership information in the Trademark database. Therefore, the new owner must separately notify the Trademark Operation in writing that the change in ownership has been recorded, so that the ownership information is updated in the Trademark database. See [TMEP §505.01](#) regarding the procedures for requesting that ownership information be updated in pending applications, and [TMEP §505.02](#) regarding the procedures for requesting that ownership information be updated after registration.

#### **505.01 Request to Update Ownership Information in Pending Application**

Prior to registration, a request to update the ownership information in the Trademark database should be made in writing and directed to the examining attorney. To expedite processing, new owners are encouraged to file the request online using the Trademark Electronic Application System (“TEAS”), available on the USPTO website at <http://www.uspto.gov/trademarks/teas/>. To notify the Trademark Operation of a request before an application is approved for publication, the request may be submitted using the TEAS form entitled “Voluntary Amendment Not in Response to USPTO Office Action/Letter.” If such a request is filed after an application is published for opposition but before the notice of allowance or registration has issued, it may be submitted using the TEAS form entitled “Post-Approval/Publication/Post-Notice of Allowance (NOA) Amendment Form,” and will be handled in accordance with standard procedures for processing amendments after publication, as set forth in [TMEP §§1505.01](#) *et seq.*

In a §1(b) application, after issuance of the notice of allowance, if the Trademark database has not been automatically updated, the notification of the change in ownership should be made when filing the statement of use or a request for extension of time for filing a statement of use. *See* 37 C.F.R. §2.77; [TMEP §1107](#). To update the Trademark database prior to submitting these documents, the applicant may file a petition to the Director pursuant to Trademark Rule 2.146, to request a waiver of Trademark Rule 2.77 to allow the change to be entered. 37 C.F.R. §§2.146(a)(3), 2.146(a)(5), 2.148; *see* [TMEP §1700](#) regarding petitions.

See TMEP §§[502.02\(a\)](#) and [\(b\)](#) regarding issuance of a certificate of registration in the name of the new owner.

### **505.02 Request to Update Ownership Information After Registration**

If the new owner does not identify the assignment conveyance document properly (see TMEP §504), or in the situations described in TMEP §504.01, the Trademark database will not automatically update to show the changes in ownership. To have the Trademark database updated, the new owner must either: (1) file a written request to amend the registration pursuant to §7(d) of the Trademark Act, 15 U.S.C. §1057(d); or (2) include the new owner information when submitting a post registration maintenance filing pursuant to §8 or §9 of the Trademark Act, 15 U.S.C. §1058 or §1059.

The TEAS form entitled “Section 7 Request for Amendment or Correction of Registration Certificate” should be used to file the request to update the ownership information in the Trademark database. See [TMEP §502.03](#) regarding issuance of a new certificate in the name of the new owner. Thus, if the new owner of the registration is not taking a post registration action, such as filing a §8 affidavit, and wishes to update the ownership records, the owner must:

- (1) Record the appropriate document (e.g., assignment, change of name) with the Assignment Recordation Branch;
- (2) File a written request that the Trademark database be updated under §7(d), signed by the new owner, someone with legal authority to bind the new owner (e.g., a corporate officer or general partner of a partnership), or a qualified practitioner; *and*
- (3) Pay the required fee (37 C.F.R. §§2.6(a)(8) and 3.41).

15 U.S.C. §1057(d); 37 C.F.R. §§2.171(a) and 3.85. The USPTO’s Trademark records must show clear chain of title from the original registrant to the new owner. See [TMEP §502.03](#).

# Chapter 600 Attorney, Representative, and Signature

---

<b>601</b>	<b>Owner of Mark May Be Represented by a Qualified Practitioner</b>
601.01	USPTO Cannot Aid in Selection of an Attorney
601.02	Communications with Applicant or Registrant Who Is Represented by an Attorney
<b>602</b>	<b>Persons Authorized to Practice Before USPTO in Trademark Matters</b>
602.01	Attorneys Licensed to Practice in the United States
602.02	Non-Attorneys

611.06(e)	Signature by Foreign Companies and Corporations
611.06(f)	Signature by Unincorporated Association
611.06(g)	Signature by Limited Liability Company
611.06(h)	Signature by Limited Liability Partnership

*NOTE: This chapter sets forth the procedures for recognition of representatives, signature of documents, and establishing and maintaining the correspondence address in pending applications for registration, and documents filed with the Post Registration Section of the Office. For a statement of practice concerning representation of others, signature of documents, and establishing and maintaining the correspondence address in proceedings before the Trademark Trial and Appeal Board (“Board”), parties should refer to the Trademark Trial and Appeal Board Manual of Procedure (“TBMP”), Chapter 100, available on the United States Patent and Trademark Office (“USPTO”) website at <http://www.uspto.gov>, or contact the Board at (571) 272-8500.*

## **601 Owner of Mark May Be Represented by a Qualified Practitioner**

The owner of a mark may represent himself or herself in prosecuting an application or maintaining a registration, or may be represented by a practitioner authorized under 37 C.F.R. §11.14 to practice in trademark cases (“qualified practitioner”). 37 C.F.R. §§2.11, 11.14(e). See [TMEP §§602–602.03\(e\)](#).

### **601.01 USPTO Cannot Aid in Selection of an Attorney**

The USPTO cannot aid in the selection of a qualified practitioner. 37 C.F.R. §2.11.

If it is apparent that an applicant or registrant is unfamiliar with the procedures for prosecuting an application or maintaining a registration and needs more detailed or technical assistance than the USPTO staff is permitted

to give, the USPTO staff may suggest that it may be desirable to employ an attorney who is familiar with trademark matters. The following is an example of language that may be used in the Office action:

The applicant may wish to hire a trademark attorney because of the technicalities involved in the application. The United States Patent and Trademark Office cannot aid in the selection of an attorney. 37 C.F.R. §2.11.

## 601.02 Communications with Applicant or Registrant Who Is Represented by an Attorney

*37 CFR §2.18(a)(7)*

Once the Office has recognized a practitioner qualified under §11.14 of this chapter as the representative of an applicant or registrant, the Office will communicate and conduct business only with that practitioner, or with another qualified practitioner from the same firm. The Office will not conduct business directly with the applicant or registrant, or with another practitioner from a different firm, unless the applicant or registrant files a revocation of the power of attorney under §2.19(a), and/or a new power of attorney that meets the requirements of §2.17(c). A written request to change the correspondence address does not revoke a power of attorney.

If an applicant or registrant is represented by a qualified practitioner, the USPTO will conduct business only with the practitioner, unless that representation is terminated. 37 C.F.R. §2.18(a)(7). If the applicant or registrant contacts the USPTO regarding the application or registration, he or she will be advised that the USPTO will only conduct business with the qualified practitioner. USPTO employees may answer general questions about the application or registration record and the procedures for obtaining and maintaining a registration, and are encouraged to refer the applicant or registrant to publicly available information on the USPTO's website. See [TMEP §1805](#) regarding general inquiries from the public.

An applicant or registrant may not authorize an examiner's amendment or change of correspondence address, and the USPTO will not accept responses or amendments signed by the applicant or registrant if there is a qualified practitioner of record. See 37 C.F.R. §2.18(a)(7). See [TMEP §§611–611.06\(h\)](#) regarding signature of documents filed in the USPTO.

An applicant or registrant may revoke the authority of a qualified practitioner to represent the applicant or registrant. 37 C.F.R. §2.19(a)(1). An applicant or registrant who wishes to revoke the power of attorney should be encouraged to file the revocation through the Trademark Electronic Application System ("TEAS"). See [TMEP §606](#) regarding revocation of power of attorney.

See [TMEP §604.03](#) regarding changes of attorney, [TMEP §604.02](#) regarding the duration of recognition as a representative, and TBMP §§114-114.08 regarding representation of parties to proceedings before the Board.

## 602 Persons Authorized to Practice Before USPTO in Trademark Matters

*37 CFR §2.17(a) Authority to practice in trademark cases.*

Only an individual qualified to practice under §11.14 of this chapter may represent an applicant, registrant, or party to a proceeding before the Office in a trademark case.

*37 CFR §11.14 Individuals who may practice before the Office in trademark and other non-patent matters.*

(a) Attorneys. Any individual who is an attorney as defined in §11.1 may represent others before the Office in trademark and other non-patent matters. An attorney is not required to apply for registration or recognition to practice before the Office in trademark and other non-patent matters. Registration as a patent practitioner does not itself entitle an individual to practice before the Office in trademark matters.

(b) Non-lawyers. Individuals who are not attorneys are not recognized to practice before the Office in trademark and other non-patent matters, except that individuals not attorneys who were recognized to practice before the Office in trademark matters under this chapter prior to January 1, 1957, will be recognized as agents to continue practice before the Office in trademark matters. Except as provided in the preceding sentence, registration as a patent agent does not itself entitle an individual to practice before the Office in trademark matters.

(c) Foreigners. Any foreign attorney or agent not a resident of the United States who shall file a written application for reciprocal recognition under paragraph (f) of this section and prove to the satisfaction of the OED Director that he or she is registered or in good standing before the patent

or trademark office of the country in which he or she resides and practices and is possessed of good moral character and reputation, may be recognized for the limited purpose of representing parties located in such country before the Office in the presentation and prosecution of trademark matters, provided: the patent or trademark office of such country allows substantially reciprocal privileges to those permitted to practice in trademark matters before the Office. Recognition under this paragraph shall continue only during the period that the conditions specified in this paragraph obtain.

(d) Recognition of any individual under this section shall not be construed as sanctioning or authorizing the performance of any act regarded in the jurisdiction where performed as the unauthorized practice of law.

(e) No individual other than those specified in paragraphs (a), (b), and (c) of this section will be permitted to practice before the Office in trademark matters on behalf of a client. Any individual may appear in a trademark or other non-patent matter in his or her own behalf. Any individual may appear in a trademark matter for:

(1) A firm of which he or she is a member,

(2) A partnership of which he or she is a partner, or

(3) A corporation or association of which he or she is an officer and which he or she is authorized to represent, if such firm, partnership, corporation, or association is a party to a trademark proceeding pending before the Office.

(f) Application for reciprocal recognition. An individual seeking reciprocal recognition under paragraph (c) of this section, in addition to providing evidence satisfying the provisions of paragraph (c) of this section, shall apply in writing to the OED Director for reciprocal recognition, and shall pay the application fee required by §1.21(a)(1)(i) of this subchapter.

An individual qualified to practice under 37 C.F.R. §11.14 may represent an applicant or registrant in trademark matters before the USPTO. 37 C.F.R. §2.17(a). Under 37 C.F.R. §11.14, only the following individuals may represent an applicant or registrant in a trademark case:

An attorney as defined in 37 C.F.R. §11.1 (i.e., an attorney who is a member in good standing of the bar of the highest court of a state in the United States);

A Canadian patent agent who is registered with the USPTO's Office of Enrollment and Discipline ("OED") and in good standing as a patent agent under 37 C.F.R. §11.6(c) for the limited purpose of representing parties located in Canada;

A Canadian attorney or agent who has been granted recognition by the Director of Enrollment and Discipline ("OED Director") for the limited purpose of representing parties located in Canada, pursuant to 37 C.F.R. §11.14(f); or

An individual who is not an attorney but was recognized to practice before the USPTO in trademark cases prior to January 1, 1957.

See [TMEP §602.03\(a\)](#) regarding Canadian attorneys and agents, and TBMP §§114-114.08 regarding representation of parties to Board proceedings.

## **602.01 Attorneys Licensed to Practice in the United States**

An attorney who is a member in good standing of the bar of the highest court of a state in the United States (which includes the District of Columbia and any Commonwealth or territory of the United States) may practice before the USPTO in trademark matters. 37 C.F.R. §§2.17(a), 11.1 (definitions of Attorney and State), 11.14(a). No application for recognition to practice before the USPTO is necessary. The USPTO does not give an examination for eligibility or maintain a register of United States attorneys entitled to practice in trademark cases. An attorney meeting the requirements of 37 C.F.R. §11.14 who files a power of attorney pursuant to 37 C.F.R. §2.17(c), appears in person, or signs a document on behalf of an applicant or registrant will be accepted as the representative of the applicant or registrant. 37 C.F.R. §2.17(b). A qualified practitioner may also be recognized as the applicant's representative if the practitioner is identified as the attorney of record in the application, even when the application is signed by the applicant. A telephone call from an attorney does not satisfy the "appearance" requirements of 37 C.F.R. §2.17(b).

Only individuals, not law firms, are entitled to be recognized to represent an applicant or registrant. Generally, attorneys who have not specifically been mentioned in a power of attorney may discuss but not conclude business with the USPTO over the telephone. However, if an attorney from the same United States firm as the attorney of record claims to be authorized by the attorney of record to conduct business and approve amendments with respect to a specific application or registration, the USPTO will permit the attorney to

conclude business, and will note this fact in any resulting examiner's amendment, priority action, or Office action. See 37 C.F.R. §2.18(a)(7).

## 602.02 Non-Attorneys

*37 CFR §2.17(f) Non-lawyers.*

A non-lawyer may not act as a representative except in the limited circumstances set forth in §11.14(b) of this chapter. Before any non-lawyer who meets the requirements of §11.14(b) of this chapter may take action of any kind with respect to an application, registration or proceeding, a written authorization must be filed, signed by the applicant, registrant, or party to the proceeding, or by someone with legal authority to bind the applicant, registrant, or party (e.g., a corporate officer or general partner of a partnership).

*37 CFR §11.14(b) Non-lawyers.*

Individuals who are not attorneys are not recognized to practice before the Office in trademark and other non-patent matters, except that individuals not attorneys who were recognized to practice before the Office in trademark matters under this chapter prior to January 1, 1957, will be recognized as agents to continue practice before the Office in trademark matters. Except as provided in the preceding sentence, registration as a patent agent does not itself entitle an individual to practice before the Office in trademark matters.

Non-attorneys are not permitted to practice except under the limited circumstances specified in 37 C.F.R. §11.14(b), set forth above. 5 U.S.C. §§500(b), (d); 37 C.F.R. §§2.17(f), 11.14(e).

See [TMEP §608.01](#) regarding unauthorized practice, and [TMEP §§611–611.06\(h\)](#) regarding signature of documents filed in the USPTO.

## 602.03 Foreign Attorneys and Agents

*37 CFR §11.14(c) Foreigners.*

Any foreign attorney or agent not a resident of the United States who shall file a written application for reciprocal recognition under paragraph (f) of this section and prove to the satisfaction of the OED Director that he or she is registered or in good standing before the patent or trademark office of the country in which he or she resides and practices and is possessed of good moral character and reputation, may be recognized for the limited purpose of representing parties located in such country before the Office in the presentation and prosecution of trademark matters, provided: the patent or trademark office of such country allows substantially reciprocal privileges to those permitted to practice in trademark matters before the Office. Recognition under this paragraph shall continue only during the period that the conditions specified in this paragraph obtain.

*37 CFR §11.14 (f) Application for reciprocal recognition.*

An individual seeking reciprocal recognition under paragraph (c) of this section, in addition to providing evidence satisfying the provisions of paragraph (c) of this section, shall apply in writing to the OED Director for reciprocal recognition, and shall pay the application fee required by §1.21(a)(1)(i) of this subchapter.

Generally, only an attorney as defined in 37 C.F.R. §11.1 may represent an applicant or registrant before the USPTO. 5 U.S.C. §§500(b), and (d); 37 C.F.R. §§2.17(a), 11.14(a), (e). In very limited circumstances, Canadian agents or attorneys registered or in good standing before the Canadian Intellectual Property Office may file an application for reciprocal recognition to represent parties located in Canada. 37 C.F.R. §§2.17(e), 11.14(c), (f). See TMEP §602.03(a) regarding Canadian attorneys and agents.

A foreign attorney or agent may be recognized to represent parties located in the country in which the foreign attorney resides and practices, only if:

- (1) He or she applies in writing to the OED Director for reciprocal recognition and pays the fee required by 37 C.F.R. §1.21(a)(1)(i);
- (2) He or she proves to the satisfaction of the OED Director that he or she is registered or in good standing before the patent or trademark office of the country in which he or she resides and practices and is possessed of good moral character and reputation; and
- (3) The patent or trademark office of that foreign country allows substantially reciprocal privileges to those permitted to practice before the USPTO.

37 C.F.R. §§11.14(c), (f). The application for reciprocal recognition must be filed and granted prior to practicing before the USPTO in trademark matters. A foreign attorney or agent may not practice before the USPTO in trademark matters prior to being recognized by the OED Director. Practice before the USPTO in trademark matters includes preparing and prosecuting applications for trademark registration and otherwise representing a party to a proceeding before the USPTO. 37 C.F.R. §11.5(b)(2). The OED Director grants recognition only in the form of a written communication. A foreign attorney or agent not recognized to practice before the USPTO in trademark cases should allow adequate time to file and obtain recognition before representing a party before the USPTO.

Currently, a Canadian attorney or agent who is registered or in good standing with the Canadian Intellectual Property Office is the only foreign attorney or agent who may be recognized as meeting the above criteria. See [TMEP §602.03\(a\)](#) regarding Canadian attorneys and agents.

### **602.03(a) Canadian Attorneys and Agents**

*37 CFR §2.17(e) Canadian attorneys and agents.*

(1) A Canadian patent agent who is registered and in good standing as a patent agent under §11.6(c) may represent parties located in Canada before the Office in trademark matters.

(2) A Canadian attorney or agent who is registered or in good standing with the Canadian Intellectual Property Office, but not registered as a patent agent under §11.6(c), may represent parties located in Canada if he or she has been authorized to do so by the Director of the Office of Enrollment and Discipline, pursuant to §11.14(f) of this chapter.

A Canadian attorney or agent may represent parties located in Canada only if:

(1) He or she is registered with the USPTO and in good standing as a patent agent under 37 C.F.R. §11.6(c); or

(2) He or she files an application for and is granted recognition by the OED Director under 37 C.F.R. §11.14(c). To be recognized under 37 C.F.R. §11.14(c), an individual must file a written application and pay the fee required by 37 C.F.R. §1.21(a)(1)(i) prior to representing a party before the USPTO. The application must include proof that the individual meets the requirements of 37 C.F.R. §11.14(c), and must be addressed to the OED Director, Mail Stop OED, Director of the U.S. Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313-1450. 37 C.F.R. §11.14(f).

37 C.F.R. §2.17(e).

Once recognized by OED, a Canadian attorney or agent can only represent parties located in Canada. 37 C.F.R. §2.17(e)(1). Thus, he or she cannot represent a party located in the United States or in another foreign country before the USPTO. For example, he or she cannot represent a Canadian national who resides in California and has access to a mailing address in Canada.

If a Canadian attorney or agent is designated or acts as a representative of a party in a trademark matter, the USPTO staff must verify that the attorney or agent is recognized by OED, even if the individual files a document through TEAS and checks a box indicating that he or she is an authorized Canadian attorney or agent who has been granted recognition by OED. See [TMEP §611.02\(a\)](#) regarding TEAS checkoff boxes. OED maintains a combined list of recognized Canadian trademark attorneys or agents and registered Canadian patent agents, which is available only on the USPTO's internal computer network.

After verifying that the Canadian attorney or agent is recognized by OED, the USPTO staff should enter an appropriate Note to the File in the record. If the individual has not been recognized by OED, the USPTO will treat any document filed by that individual as a document filed by an unauthorized person. See [TMEP §§611.05–611.05\(c\)](#) for information about processing these documents.

If a USPTO employee suspects that an individual who does not meet the requirements of 37 C.F.R. §§11.6(c) or 11.14(c) is engaging in widespread unauthorized practice by representing applicants or registrants, he or she should bring the matter to the attention of the Administrator for Trademark Policy and Procedure in the Office of the Deputy Commissioner for Trademark Examination Policy (“Administrator”).

### **602.03(b) Foreign Attorneys and Agents from Countries Other than Canada**

A foreign attorney or agent who resides and practices in a foreign country other than Canada and who is not a member in good standing of the bar of the highest court of a state in the United States may not practice before the USPTO unless he or she establishes that he or she meets the requirements of 37 C.F.R. §11.14. 5 U.S.C. §§500(b), (d). Any such attorney or agent who attempts to represent a party in a trademark matter should be advised that he or she must file a written application for reciprocal recognition with OED and pay the fee required by 37 C.F.R. §1.21(a)(1)(i); that the application must be filed and granted prior to representing a party before the USPTO; and that the application must include proof that the attorney or agent is in good standing with the foreign patent or trademark office in the country in which the attorney or agent resides, that the attorney or agent is possessed of good moral character and reputation, and that the USPTO Director has recognized that the foreign patent or trademark office provides substantially reciprocal rights to United States attorneys. 37 C.F.R. §§11.14(c), (f).

### **602.03(c) Documents Filed by Foreign Attorneys and Agents**

A foreign attorney or agent who is not authorized to practice before the USPTO under 37 C.F.R. §11.14 may receive correspondence from the USPTO and transmit it to the applicant or registrant. However, a foreign attorney or agent cannot prepare an application, response, post-registration maintenance document, or other document to be filed in the USPTO, sign responses to Office actions, or authorize issuance of examiner’s amendments and priority actions. Preparing a document, authorizing an amendment to an application, and submitting legal arguments in response to a requirement or refusal all constitute examples of representation of a party in a trademark matter. *See* 37 C.F.R. §11.5(b)(2); [TMEP §608.01](#).

If a foreign attorney or agent who does not meet the requirements of 37 C.F.R. §11.14(c) is designated or acts as a representative of a party in a trademark matter, the USPTO will treat any document submitted by the attorney or agent as a document filed by an unauthorized party and follow the procedures in [TMEP §§611.05–611.05\(c\)](#).

### **602.03(d) Representatives of Holders of International Registrations**

In the case of an application under Trademark Act §66(a), 15 U.S.C. §1141f(a), or a registered extension of protection, the applicant’s appointed representative as communicated from the International Bureau of the World Intellectual Property Organization (“IB”) is considered the correspondence address of record only. If an individual with an address outside the United States is identified as applicant’s appointed representative for purposes of correspondence, the individual will not be recognized by the USPTO as applicant’s attorney or qualified practitioner without further clarification of his or her qualifications under 37 C.F.R. §11.14. *See* [TMEP §609.01\(a\)](#) regarding correspondence in §66(a) applications, and [TMEP §§611–611.06\(h\)](#) regarding signature on documents filed in the USPTO.

### **602.03(e) Identification of Foreign Attorney in Original Application**

If a new application identifies an attorney or agent with an address outside the United States (e.g., if a foreign address is set forth in the “attorney” section of a TEAS form) and the examining attorney must issue an

Office action regarding any refusals and/or requirements, the Office action must include an advisory that unless the individual meets the requirements of 37 C.F.R. §11.14, he or she is not authorized to practice before the USPTO in trademark matters and may not represent the applicant in the particular trademark application, and that any power of attorney to the individual is void *ab initio*. The Office action should be sent to the correspondence address of record as established in the original application. If the identified individual can establish that he or she is a qualified attorney (e.g., a member in good standing of the bar of the highest court of a U.S. state) who has an address outside the United States, he or she is a qualified practitioner under 37 C.F.R. §§11.1, 11.14(a),(c).

If an Office action is not necessary (i.e., the application is otherwise eligible for approval for publication or registration on the Supplemental Register), the USPTO staff must ensure that the USPTO database does not include the identified individual in the “Attorney” field. The correspondence address should remain unchanged.

See [TMEP §609.04](#) regarding correspondence with parties not domiciled in the United States.

## 603 Standards of Conduct

### *37 CFR §11.15*

Refusal to recognize a practitioner. Any practitioner authorized to appear before the Office may be suspended, excluded, or reprimanded in accordance with the provisions of this Part. Any practitioner who is suspended or excluded under this Part shall not be entitled to practice before the Office in patent, trademark, or other non-patent matters while suspended or excluded.

Part 11 of Title 37 of the Code of Federal Regulations pertains to representation of others before the USPTO. Part 11 identifies and defines individuals entitled to practice before the USPTO, sets forth a procedure for investigations and disciplinary proceedings, and establishes rules of professional conduct and responsibility.

## 604 Recognition as a Representative

### 604.01 Three Ways To Be Recognized as a Representative

#### *37 CFR §2.17(b)*

(1) Recognition of practitioner as representative. To be recognized as a representative in a trademark case, a practitioner qualified under §11.14 of this chapter may:

- (i) File a power of attorney that meets the requirements of paragraph (c) of this section;
- (ii) Sign a document on behalf of an applicant, registrant, or party to a proceeding who is not already represented by a practitioner qualified under §11.14 of this chapter from a different firm; or
- (iii) Appear in person on behalf of an applicant, registrant, or party to a proceeding who is not already represented by a practitioner qualified under §11.14 of this chapter from a different firm.

(2) Signature as certificate of authorization to represent. When a practitioner qualified under §11.14 of this chapter appears in person or signs a document pursuant to paragraph (b) of this section, his or her personal appearance or signature shall constitute a representation to the Office that he or she is authorized to represent the person or entity on whose behalf he or she acts. The Office may require further proof of authority to act in a representative capacity.

To be recognized as a representative, a qualified practitioner may:

- File a power of attorney signed by the individual applicant or registrant or someone with legal authority to bind a juristic applicant or registrant (e.g., a corporate officer or general partner of a partnership);
- Sign a document on behalf of an applicant or registrant who is not already represented by a qualified practitioner from a different firm; or
- Appear in person on behalf of an applicant or registrant who is not already represented by a qualified practitioner from a different firm.

37 C.F.R. §2.17(b). A foreign attorney or agent who has not been recognized by the OED Director pursuant to 37 C.F.R. §11.14(c) or registered as a patent agent pursuant to 37 C.F.R. §11.6(c) may not be recognized as a representative.

Generally, as long as no other qualified practitioner from a different firm has been previously appointed, it is not necessary for a qualified practitioner to file a power of attorney or obtain special authorization in a trademark case. A qualified practitioner who appears in person or signs a document on behalf of an applicant or registrant will be accepted as the representative of the applicant or registrant. 37 C.F.R. §2.17(b)(2). (A qualified practitioner may also be recognized as the applicant's representative if the practitioner is identified as the attorney of record in the application, even when the application is signed by the applicant.) A telephone call from a qualified practitioner does not satisfy the "appearance" requirements of 37 C.F.R. §2.17(b). An individual not meeting the requirements of 37 C.F.R. §2.17(b) will not be recognized as a representative, and may not sign responses or authorize amendments to an application. See [TMEP §611.03\(b\)](#) regarding signature on such documents.

Once the USPTO has recognized a qualified practitioner as the representative of an applicant or registrant, the USPTO will communicate and conduct business only with that practitioner or with another qualified practitioner from the same United States firm. The USPTO will not conduct business directly with the applicant or registrant, or with a qualified practitioner from a different firm, unless the applicant or registrant files a new power of attorney or revokes the previous power, or the previously recognized practitioner files a request to withdraw. 37 C.F.R. §§2.17(c)(2), 2.18(a)(7), 2.19. See [TMEP §§604.02](#) regarding duration of recognition, [605.03](#) regarding associate powers of attorney, [606](#) regarding revocation of power of attorney, and [607](#) regarding withdrawal of attorney of record.

See [TMEP §§609.01](#) and [609.02–609.02\(f\)](#) regarding changing the correspondence address, and [TBMP §§114-114.08](#) regarding representation of parties to Board proceedings.

## 604.02 Duration of Recognition

### *37 CFR §2.17(g) Duration of power of attorney.*

(1) For purposes of recognition as a representative, the Office considers a power of attorney filed while an application is pending to end when the mark registers, when ownership changes, or when the application is abandoned.

(2) The Office considers a power of attorney filed after registration to end when the mark is cancelled or expired, or when ownership changes. If the power was filed in connection with an affidavit under section 8, 12(c), 15 or 71 of the Trademark Act, renewal application under section 9 of the Act, or request for amendment or correction under section 7 of the Act, the power is deemed to end upon acceptance or final rejection of the filing.

*Pending Applications.* For purposes of recognition as a representative, the USPTO considers a power of attorney filed while an application is pending to end when the mark is registered, when ownership changes, or when the application is abandoned. 37 C.F.R. §2.17(g)(1).

*Post Registration.* For purposes of recognition as a representative by the Post Registration Section of the Office, the USPTO considers a power of attorney filed in connection with an affidavit under 15 U.S.C. §1058, §1062(c), §1065, or §1141k ("affidavit under §8, §12(c), §15, or §71"), a renewal application under 15 U.S.C. §1059 ("§9 renewal application"), or a request for amendment or correction under 15 U.S.C. §1057 ("§7 request") to end upon acceptance or final rejection of the filing. 37 C.F.R. §2.17(g)(2). Due to the length of time that may elapse between the filing of these documents (which could be 10 years or more), the USPTO will recognize a qualified practitioner who transmits one of these documents even absent a new power of attorney or revocation of a previous power.

*Example 1:* A qualified practitioner (Attorney A) transmits an affidavit under §8, and the USPTO issues an Office action in connection with the affidavit. If another qualified practitioner from a different firm (Attorney B) wants to respond to the Office action, Attorney B must file a new

power of attorney and/or revocation of the previous power, signed by the registrant or someone with legal authority to bind the registrant (e.g., a corporate officer or general partner of a partnership), before the USPTO will act on the response or correspond with Attorney B.

*Example 2:* A qualified practitioner (Attorney A) transmits an affidavit under §8, and the USPTO accepts the affidavit. If another qualified practitioner from a different firm (Attorney B) later files a §7 request, the USPTO will recognize and correspond with Attorney B regardless of whether a new power of attorney or revocation of the previous power is filed.

*Example 3:* A qualified practitioner (Attorney A) transmits an affidavit under §8, and the USPTO issues an Office action in connection with the affidavit. If another qualified practitioner from a different firm (Attorney B) wants to file a §7 request before the USPTO accepts or issues a final rejection of the §8 affidavit, Attorney B must file a new power of attorney and/or revocation of the previous power, signed by the registrant or someone with legal authority to bind the registrant (e.g., a corporate officer or general partner of a partnership), before the USPTO will act on the §7 request or correspond with Attorney B.

The USPTO also considers a power of attorney filed after registration to end when the registration is cancelled or expired or when ownership changes. 37 C.F.R. §2.17(g)(2). Therefore, the USPTO will not enter a request to withdraw as attorney or revocation of a power of attorney filed in connection with a cancelled or expired registration, unless it is accompanied by a petition to reinstate the registration. See [TMEP §605.04](#) regarding powers of attorney filed after registration.

*Change of Ownership.* For purposes of recognition as a representative, the USPTO considers a power of attorney filed in connection with an application or registration to end when ownership changes. 37 C.F.R. §2.17(g). After a change in ownership has been recorded, if a new qualified practitioner appears on behalf of the new owner, the USPTO will communicate and conduct business with that practitioner even absent a new power of attorney or revocation of the previous power. If the previously recognized practitioner appears on behalf of the new owner (which might occur when the new owner is a related company), the USPTO will continue to conduct business and correspond with that practitioner. The previously recognized practitioner does not have to file a new power of attorney signed by the new owner. See [TMEP §609.02\(f\)](#) regarding correspondence after recordation of a change of ownership.

*Effect on Attorney and Correspondence Information in USPTO Records.* In the situations discussed above, when the USPTO deems a power of attorney to end for purposes of recognition as a representative, the USPTO will not automatically change the attorney and correspondence address in its Trademark database, because it is possible that the previously recognized practitioner still represents the applicant or registrant and wants to continue receiving correspondence. The USPTO will continue to recognize the previously recognized practitioner if he or she appears or signs a document on behalf of the applicant or registrant. However, if a new qualified practitioner appears in person or signs a document, the Office will recognize the new qualified practitioner pursuant to 37 C.F.R. §2.17(b), and correspond with him or her, without requiring a new power of attorney or revocation of the previous power. See [TMEP §§609.02–609.02\(f\)](#) regarding changes of correspondence address.

These practices also apply where a qualified practitioner is recognized by appearing in person or signing or filing a document on behalf of the party whom he or she represents. 37 C.F.R. §2.17(b); [TMEP §604.01](#).

*Board Proceedings.* See TBMP §§114-114.08 regarding representation of parties to Board proceedings, and TBMP §§117-117.02 regarding correspondence in Board proceedings.

### **604.03 Change of Attorney**

Once the USPTO recognizes a qualified practitioner as the representative of an applicant or registrant, a new qualified practitioner from a different firm is not permitted to represent the applicant or registrant until: (1) the applicant or registrant revokes the previous power of attorney; (2) the applicant or registrant submits a new power of attorney naming the new qualified practitioner; or (3) the previously recognized practitioner

files a request to withdraw. 37 C.F.R. §§2.18(a)(7), 2.19(b). Until such action is taken, the new qualified practitioner cannot sign responses to Office actions, authorize issuance of examiner's amendments or priority actions, expressly abandon an application, authorize a change of correspondence address, or otherwise represent the applicant or registrant.

If an applicant or registrant is already represented by a qualified practitioner, and a new qualified practitioner from a different firm wishes to take action with respect to the application or registration, the new practitioner must file a revocation of the previous power of attorney or new power of attorney naming the new qualified practitioner, signed by the individual applicant or registrant or someone with legal authority to bind a juristic applicant or registrant (e.g., a corporate officer or general partner of a partnership), before the USPTO will accept filings by or correspond with the new practitioner. 37 C.F.R. §2.18(a)(7). The new practitioner may not sign the revocation of the previous power him or herself. See 37 C.F.R. §2.17(c) and [TMEP §605.01](#) regarding requirements for power of attorney, and [TMEP §606](#) regarding revocation of power of attorney.

Absent a revocation or new power, if the new qualified practitioner signs a response, amendment, or request to change the correspondence address, the USPTO will treat this as a document filed by an unauthorized party and follow the procedures in [TMEP §§611.05–611.05\(c\)](#).

For purposes of recognition as a representative of an applicant or registrant, the USPTO considers a power of attorney filed while an application is pending to end with respect to a particular application when the mark is registered, when the application is abandoned, or when ownership changes. 37 C.F.R. §2.17(g)(1). The USPTO considers a power of attorney filed after registration to end when the registration is cancelled or expired or when ownership changes. 37 C.F.R. §2.17(g)(2). If the power is filed in connection with an affidavit under §8, §12(c), §15, or §71, a §9 renewal application, or a §7 request, the power is deemed to end upon acceptance or final rejection of the filing. *Id.* [TMEP §604.02](#). In these situations, it is not necessary to file a new power of attorney or revocation of the previous power before a new qualified practitioner may take action. See [TMEP §605.04](#) regarding the processing of powers of attorney filed after registration.

See TBMP §§114-114.08 regarding representation of parties to Board proceedings, and TBMP §§117-117.02 regarding correspondence in Board proceedings.

## 605 Powers of Attorney

### 605.01 Requirements for Power of Attorney

*37 CFR §2.17(c) Requirements for power of attorney.*

A power of attorney must:

- (1) Designate by name at least one practitioner meeting the requirements of §11.14 of this chapter; and
- (2) Be signed by the individual applicant, registrant, or party to a proceeding pending before the Office, or by someone with legal authority to bind the applicant, registrant, or party (e.g., a corporate officer or general partner of a partnership). In the case of joint applicants or joint registrants, all must sign. Once the applicant, registrant, or party has designated a practitioner(s) qualified to practice under §11.14 of this chapter, that practitioner may sign an associate power of attorney appointing another qualified practitioner(s) as an additional person(s) authorized to represent the applicant, registrant, or party. If the applicant, registrant, or party revokes the original power of attorney (§2.19(a)), the revocation discharges any associate power signed by the practitioner whose power has been revoked. If the practitioner who signed an associate power withdraws (§2.19(b)), the withdrawal discharges any associate power signed by the withdrawing practitioner upon acceptance of the request for withdrawal by the Office.

A power of attorney must: (1) designate by name at least one individual qualified practitioner; and (2) be signed by the individual applicant or registrant or someone with legal authority to bind a juristic applicant or registrant (e.g., a corporate officer or general partner of a partnership). In the case of joint applicants or registrants, all must sign. 37 C.F.R. §§2.17(c), 2.193(e)(3). See [TMEP §611.01\(c\)](#) regarding signature of documents transmitted electronically.

If a power specifies only the name of a law firm, the USPTO will treat it as a correspondence address rather than a power of attorney. See [TMEP §§609–609.04](#) regarding the correspondence address.

A qualified practitioner cannot sign an original power of attorney on behalf of his or her client. An original power of attorney, other than one associating an additional attorney with an already recognized attorney (see [TMEP §605.03](#)), must be signed by the individual applicant or registrant or someone with legal authority to bind a juristic applicant or registrant (e.g., a corporate officer or general partner of a partnership).

However, the filing of a power of attorney is not mandatory in a trademark case. Thus, if a power of attorney is signed by an improper person (e.g., by the named attorney) and no other qualified practitioner has been previously appointed, the USPTO generally will not require a properly signed power. If the improperly signed power of attorney is accompanied by a document that is signed by a qualified practitioner or includes the name and address of a qualified practitioner, the USPTO may recognize that qualified practitioner under 37 C.F.R. §2.17(b), separate and apart from the improperly signed power. See [TMEP §604.01](#) regarding the three ways that a qualified practitioner may be recognized as a representative, [TMEP §609.01](#) regarding establishment of the correspondence address in a new application, and [TMEP §609.02\(a\)](#) regarding the limited situations in which the USPTO will change the correspondence address to that of a qualified practitioner absent a written request to change the correspondence address.

*Example:* If the original application contains the name and address of a qualified practitioner (e.g., the “Attorney” section of a TEAS application contains the name and address of an attorney from a United States firm or a Canadian attorney or agent who has been recognized by the OED Director), and the application includes a power of attorney signed by the named practitioner, the USPTO will disregard the improperly signed power. However, the USPTO will recognize and correspond with the named qualified practitioner, pursuant to 37 C.F.R. §2.17(b).

However, if an applicant or registrant is already represented by a qualified practitioner, and a new qualified practitioner wishes to take action with respect to the application or registration, the new qualified practitioner must file a new power of attorney or revocation of the previous power, signed by the individual applicant or registrant or someone with legal authority to bind a juristic applicant or registrant (e.g., a corporate officer or general partner of a partnership), before the USPTO will accept filings by or correspond with the new qualified practitioner. 37 C.F.R. §2.18(a)(7). See [TMEP §604.03](#) regarding change of attorney, and [TMEP §606](#) regarding revocation of power of attorney.

If two or more qualified practitioners are named in a power of attorney and one practitioner changes firms, any of the named practitioners can sign and submit a notice of change of correspondence address setting forth a new address, even if the new address is at a new firm. It is not necessary to submit a new power signed by the applicant or registrant when a named practitioner changes firms. See [TMEP §§609.02–609.02\(f\)](#) regarding changes of correspondence address.

To expedite processing, the USPTO recommends that powers of attorney be filed through TEAS, at <http://www.uspto.gov>. When powers of attorney are filed through TEAS, the data is automatically entered into the USPTO’s automated records.

## 605.02 Power of Attorney Relating to More than One Application or Registration

*37 CFR §2.17(d) Power of attorney relating to multiple applications or registrations.*

(1) The owner of an application or registration may appoint a practitioner(s) qualified to practice under §11.14 of this chapter for up to twenty applications or registrations that have the identical owner name and attorney through TEAS.

(2) The owner of an application or registration may file a power of attorney that relates to more than one trademark application or registration, or to all existing and future applications and registrations of that owner, on paper. A person relying on such a power of attorney must:

(i) Include a copy of the previously filed power of attorney; or

(ii) Refer to the power of attorney, specifying the filing date of the previously filed power of attorney; the application serial number (if known), registration number, or inter partes proceeding number for which the original power of attorney was filed; and the name of the person who signed the power of attorney; or, if the application serial number is not known, submit a copy of the application or a copy of the mark, and specify the filing date.

Using TEAS, at <http://www.uspto.gov>, an applicant or registrant may appoint a qualified practitioner for up to 20 existing applications or registrations that have the identical owner and qualified practitioner. 37 C.F.R. §2.17(d)(1). A power of attorney relating to future applications cannot be filed through TEAS.

An applicant or registrant may file a power of attorney *on paper* that relates to more than one trademark application or registration, or to all existing and future applications and registrations. Someone relying on such a power of attorney must: (1) include a copy of the previously filed power of attorney; or (2) refer to the previously filed power of attorney, specifying: the filing date of the power; the application serial number (if known), registration number, or inter partes proceeding number for which the original power of attorney was filed; and the name of the party who signed the power of attorney; or, if the application serial number is not known, submit a copy of the application or a copy of the mark, and specify the filing date. 37 C.F.R. §2.17(d)(2). If the applicant or registrant meets these requirements, the USPTO will accept the power of attorney.

### **605.03 Associate Powers of Attorney**

Once the applicant or registrant has designated a qualified practitioner, the practitioner may sign an associate power of attorney, appointing another qualified practitioner -- including one from a different law firm -- as an additional person authorized to represent the applicant or registrant. 37 C.F.R. §2.17(c)(2)). Note, however, that appointment of an associate attorney from a different law firm does not change the correspondence address from that of the practitioner designated by the applicant or registrant. 37 C.F.R. §2.18(a)(7); *see* TMEP §§609, 609.01-609.02(b).

If the applicant or registrant revokes the original power of attorney, the revocation also discharges any associate power signed by the practitioner whose power has been revoked. 37 C.F.R. §2.17(c)(2).

If the practitioner who signed an associate power withdraws, the withdrawal discharges any associate power signed by the withdrawing practitioner upon acceptance of the request for withdrawal by the USPTO. 37 C.F.R. §2.17(c)(2).

### **605.04 Power of Attorney Filed After Registration**

To expedite processing, the USPTO recommends that powers of attorney be filed through TEAS, at <http://www.uspto.gov>. When powers of attorney are filed through TEAS, the data is automatically entered into the USPTO's automated records.

When a new power of attorney is filed *on paper* after registration, the USPTO scans an image of the document into its automated records, but does not change the attorney information unless the registrant concurrently takes a separate action, such as filing an affidavit under §8.

For purposes of recognition as a representative, the USPTO considers a power of attorney filed while an application is pending to end with registration, when the application is abandoned, or when ownership changes. 37 C.F.R. §2.17(g)(1). If the power is filed in connection with an affidavit under §8, §12(c), §15, or §71, a §9 renewal application, or a §7 request, the power is deemed to end upon acceptance or final rejection of the filing. 37 C.F.R. §2.17(g)(2). [TMEP §604.02](#).

See also [TMEP §1612](#) regarding powers of attorney filed after registration, and [TMEP §609.02\(e\)](#) regarding changing the correspondence address after registration.

## 606 Revocation of Power of Attorney

### *37 CFR §2.19(a) Revocation.*

(1) Authority to represent an applicant, registrant or party to a proceeding before the Office may be revoked at any stage in the proceedings of a trademark case, upon written notification signed by the applicant, registrant, or party to the proceeding, or by someone with legal authority to bind the applicant, registrant, or party (e.g., a corporate officer or general partner of a partnership). In the case of joint applicants or joint registrants, all must sign.

(2) When a power of attorney is revoked, the Office will communicate directly with the applicant, registrant, or party to the proceeding, or with the new attorney or domestic representative if appropriate.

(3) A request to change the correspondence address does not revoke a power of attorney.

(4) A new power of attorney that meets the requirements of §2.17(c) will be treated as a revocation of the previous power.

Once a qualified practitioner has been recognized as the representative of an applicant or registrant, the applicant or registrant may revoke the power of attorney by filing a written revocation. To expedite processing, the USPTO recommends that revocations of powers of attorney be filed through TEAS, at <http://www.uspto.gov>.

*Signature.* The revocation must be personally signed by the individual applicant or registrant or by someone with legal authority to bind a juristic applicant or registrant (e.g., a corporate officer or general partner of a partnership). In the case of joint applicants or registrants, all must sign. 37 C.F.R. §§2.19(a), 2.193(e)(3).

A new qualified practitioner cannot sign a revocation of the previous power of attorney. A new qualified practitioner may submit a revocation and new appointment of power of attorney through TEAS by e-mailing the text form to the applicant or registrant for electronic signature from within TEAS, or by attaching a .jpg or .pdf image of a handwritten pen-and-ink revocation/appointment signed by the applicant or registrant. See [TMEP §611.01\(c\)](#) regarding electronic signature. A new qualified practitioner should not directly sign the TEAS revocation form.

*Effect on Correspondence Address.* If the applicant or registrant files a new power of attorney with the revocation of the previous power of attorney, the address in the new power of attorney becomes the correspondence address of record. If the applicant or registrant files a revocation without a new power of attorney, correspondence will be sent either: (1) directly to the applicant or registrant or to the correspondence address designated by the applicant or registrant; or (2) if the revocation is transmitted by a qualified practitioner, to the qualified practitioner who signed the cover letter or action accompanying the revocation. See [TMEP §§609.02, 609.02\(a\)](#).

*New Power Treated as Revocation.* If the applicant or registrant files a new power of attorney naming a new qualified practitioner as its representative, this will be treated as a revocation of any previous power of attorney, even if the applicant or registrant does not specifically revoke the previous power. 37 C.F.R. §2.19(a)(4).

*Request to Change Correspondence Address Does Not Revoke Power of Attorney.* A written request to change the correspondence address does not revoke a power of attorney. 37 C.F.R. §§2.18(a)(7), 2.19(a)(3). See [TMEP §604.03](#) regarding changes of attorney, and [TMEP §§609.02–609.02\(f\)](#) regarding changes of correspondence address.

*Processing Revocations Filed After Registration.* For purposes of recognition as a representative, the USPTO considers a power of attorney to end with registration. 37 C.F.R. §2.17(g)(1). If the power is filed in connection with an affidavit under §8, §12(c), §15, or §71, a §9 renewal application, or a §7 request, the

power is deemed to end upon acceptance or final rejection of the filing. 37 C.F.R. §2.17(g)(2). [TMEP §604.02](#).

After registration, if the registrant files a paper request to revoke a power of attorney appointed before registration, the USPTO scans an image of the revocation into its automated records but does not update the attorney information unless the registrant concurrently takes a separate action such as filing an affidavit under §8. [TMEP §1612](#). When a request to revoke a power of attorney is filed through TEAS after registration, the data is automatically entered into the USPTO's records. [TMEP §§605.04, 1612](#).

*Board Proceedings.* See TBMP §116.01 regarding revocation of authority to represent parties to Board proceedings.

## 607 Withdrawal of Attorney of Record

Previously set forth in 37 C.F.R. §10.40, the requirements for withdrawing as an attorney are now set forth in 37 C.F.R. §11.116. To withdraw from representation of another in trademark matters, the attorney must also comply with the permission and notification requirements set forth in Trademark Rule 2.19(b), 37 C.F.R. §2.19(b). See 37 C.F.R. §11.116(c) (stating that the “practitioner must comply with applicable law requiring notice to or permission of a tribunal when terminating a representation”); see also 37 C.F.R. §11.1 (defining “tribunal” to include “the Office”).

*May Not Prejudice Applicant or Registrant.* A qualified practitioner may withdraw from representing an applicant or registrant, but may not withdraw in a way that would prejudice the applicant or registrant. 37 C.F.R. §11.116(b). *In re Legendary, Inc.*, 26 USPQ2d 1478 (Comm’r Pats. 1992) (denying the attorney’s request to withdraw where the request was filed on the last day of the period for response to an Office action and attorney stated neither that the applicant was given due notice of the attorney’s withdrawal from employment, nor that the attorney had delivered all documents and property in his file concerning the prosecution of the application to the applicant). See 37 C.F.R. §11.116 regarding mandatory and permissive withdrawal from representation by an attorney.

*Form.* To expedite processing, the USPTO recommends that all requests to withdraw be filed through TEAS, at <http://www.uspto.gov>. The TEAS form can be used to request withdrawal on any application or registration that is currently active. For registrations, the form requires entry of the original application serial number rather than the registration number. If filed on paper, the request should be titled “Request for Permission to Withdraw as Attorney of Record.”

*Requirements for Request.* A request to withdraw must include the following:

- (1) A statement of the reason(s) for the request to withdraw;
- (2) The application serial number or registration number; and
- (3) Either of the following;
  - A statement that the practitioner has given due notice to the client that the practitioner is withdrawing from employment and will be filing the necessary documents with the USPTO; that the client was given notice of the withdrawal, at least two months before the expiration of the response period, if applicable; that the practitioner has delivered to the client all documents and property in the practitioner’s file concerning the application or registration to which the client is entitled; and that the practitioner has notified the client of any responses or other filings that may be due, and of the deadline for the response or filing ( see 37 C.F.R. §11.116(d)). *In re Slack*, 54 USPQ2d 1504 (Comm’r Pats. 2000); or

- If there is more than one qualified practitioner of record, a statement that representation by co-counsel is ongoing.

37 C.F.R. §2.19(b). The request should also include the present mailing address of the practitioner who is withdrawing and the present mailing address of the applicant or registrant.

The requirement for a statement that the client was given notice of the withdrawal at least two months before the expiration of any outstanding response period does not apply where the practitioner states that his or her representation was terminated by the applicant/registrant when less than two months remained in the response period.

The request to withdraw should be filed soon after the practitioner notifies the applicant or registrant of his or her intent to withdraw. 37 C.F.R. §2.19(b).

These requirements apply to all requests to withdraw, whether withdrawal is mandatory or permissive. They also apply where a qualified practitioner was recognized by appearing in person or by filing a document on behalf of the party whom he or she represents. See 37 C.F.R. §2.17(b); [TMEP §604.01](#).

*Processing TEAS Requests.* Requests to withdraw filed through TEAS are processed electronically, and generally are automatically granted if they meet the requirements listed above.

*Processing Paper Requests.* For paper filings, a request for permission to withdraw filed before registration will be handled by the appropriate managing attorney, or, if a notice of allowance has issued and the application is awaiting the filing of a statement of use, by the supervisor of the ITU/Divisional Unit. After registration, a paper request for permission to withdraw will be handled by the supervisor of the Post Registration Section.

The managing attorney or supervisor will approve or deny the paper request, notify the applicant or registrant and the practitioner of the approval or denial of the request, and place a copy of this notification in the record.

If the request is approved, the managing attorney or supervisor should ensure that the correspondence address is changed in the USPTO's Trademark database. It is the responsibility of the managing attorneys or supervisors to establish procedures that permit withdrawal requests to be given priority and acted on promptly.

For paper filings, if the practitioner who seeks to withdraw is also the domestic representative, the managing attorney or supervisor should inquire as to whether the practitioner intends to withdraw as domestic representative. This inquiry should be made by telephone or e-mail, if possible. If the practitioner withdraws as domestic representative, the managing attorney or supervisor must ensure that the "Domestic Representative" field in the USPTO's Trademark database is updated.

*Requests Filed After Registration.* For purposes of recognition as a representative, the USPTO considers a power of attorney to end with registration. 37 C.F.R. §2.17(g)(1). If the power is filed in connection with an affidavit under §8, §12(c), §15, or §71, a §9 renewal application, or a §7 request, the power is deemed to end upon acceptance or final rejection of the filing. 37 C.F.R. §2.17(g)(2). [TMEP §604.02](#).

After registration, if a practitioner appointed before registration files a *paper* request for permission to withdraw, the USPTO scans an image of the request into its Trademark database but does not update the attorney information unless the registrant concurrently takes a separate action such as filing an affidavit under §8. [TMEP §1612](#). When a proper request to withdraw is filed through TEAS after registration, the

request is automatically granted, and the data is automatically entered into the USPTO's records. TMEP §§[605.04](#), [1612](#).

*Requests Filed in Abandoned Application.* The USPTO will not process a request for permission to withdraw in an abandoned application. When a qualified practitioner files a request to withdraw in an abandoned application, the USPTO scans an image of the request into TIGRS and TDR but does not update the attorney information in its Trademark database. See [TMEP §1612](#) regarding withdrawal after registration.

*Board Proceedings.* See TBMP §§116.02-116.05 regarding withdrawal as the representative of a party to a Board proceeding.

## 608 Unauthorized Practice

### 608.01 Actions by Unauthorized Persons Not Permitted

*37 CFR §11.5(b)(2) Practice before the Office in trademark matters.*

Practice before the Office in trademark matters includes, but is not limited to, consulting with or giving advice to a client in contemplation of filing a trademark application or other document with the Office; preparing and prosecuting an application for trademark registration; preparing an amendment which may require written argument to establish the registrability of the mark; and conducting an opposition, cancellation, or concurrent use proceeding; or conducting an appeal to the Trademark Trial and Appeal Board.

An individual who is not authorized under 37 C.F.R. §11.14 to practice before the USPTO in trademark cases ([TMEP §§602–602.03\(e\)](#)) is not permitted to represent a party in the prosecution of a trademark application, in the maintenance of a registration, or in a proceeding before the USPTO. 5 U.S.C. §§500(b), (d); 37 C.F.R. §§2.17(a), 11.14(a), (e).

An individual who does not meet the requirements of 37 C.F.R. §11.14 cannot: prepare an application, response, post-registration maintenance document, or other document to be filed in the USPTO; sign amendments, responses to Office actions, petitions to the Director under 37 C.F.R. §2.146, requests to change the correspondence address, or letters of express abandonment; authorize issuance of examiner's amendments and priority actions; or otherwise represent an applicant, registrant, or party to a proceeding in the USPTO.

See [TMEP §§611.03–611.03\(i\)](#) regarding signature of documents filed in the USPTO. Presenting an amendment to an application and submitting legal arguments in response to a refusal are examples of representation of the applicant or registrant. 37 C.F.R. §11.5(b)(2); [TMEP §611.03\(b\)](#). However, a non-practitioner employee of a qualified practitioner may work under the supervision of the practitioner to prepare documents for review and signature by and assist the practitioner in trademark matters before the USPTO. 37 C.F.R. §11.5(b).

When an applicant or registrant is represented by a qualified practitioner, the USPTO encourages the practice of direct communication with the appointed practitioner. Although paralegals and legal assistants may relay information between the examining attorney and the appointed practitioner, they are not authorized to conduct business before the USPTO. For example, paralegals and legal assistants cannot authorize issuance of examiner's amendments or priority actions, even if only conveying the appointed practitioner's approval by indicating that the appointed practitioner has approved the amendment or action.

Once the USPTO recognizes a qualified practitioner as representing an applicant or registrant, a new qualified practitioner from a different firm is not permitted to represent the applicant or registrant until the applicant or registrant revokes the power of attorney of the previously recognized practitioner, or the previously recognized practitioner withdraws. [TMEP §604.03](#).

An individual who is not authorized under 37 C.F.R. §11.14 may transmit and receive correspondence. Such an individual may also sign a verification on behalf of an applicant or registrant, if he or she meets the requirements of 37 C.F.R. §2.193(e)(1) (e.g., has firsthand knowledge of the facts and actual or implied authority to act on behalf of the applicant or registrant ( *see* [TMEP §§611.03\(a\), 804.04](#))).

Any individual, whether a practitioner or non-practitioner, who presents a document to the USPTO (whether by signing, filing, submitting, or later advocating the document) is subject to 37 C.F.R. §11.18(b). 37 C.F.R. §2.193(f); *see* [TMEP §611.01\(a\)](#).

If a USPTO employee suspects that an individual who does not meet the requirements of 37 C.F.R. §11.14 is engaging in widespread unauthorized practice by representing applicants or registrants, he or she should bring the matter to the attention of the Administrator for Trademark Policy and Procedure in the Office of the Deputy Commissioner for Trademark Examination Policy.

See [TMEP §§611–611.06\(h\)](#) regarding signature of documents filed in the USPTO.

### **608.02 Individuals Excluded, Suspended, or Unauthorized to Practice Before the USPTO**

Occasionally, the Director of the USPTO suspends or excludes a particular individual from practice before the USPTO. 35 U.S.C. §32; 37 C.F.R. §11.56. Notice of the suspension or exclusion is published in the *Official Gazette* and the decision is posted in the FOIA Reading Room <http://des.uspto.gov/Foia/OEDReadingRoom.jsp>. A suspended or excluded individual is not a qualified practitioner. See *generally* 37 C.F.R. §11.58 (a suspended or excluded individual may not practice before the USPTO).

Also, the USPTO sometimes learns that a person who does not meet the requirements of 37 C.F.R. §11.14 is engaged in the widespread unauthorized practice of representing applicants and registrants before the USPTO.

In these cases, the Administrator for Trademark Policy and Procedure (“Administrator”) will notify the USPTO staff accordingly, and the USPTO will send a written notice to the affected applicant or registrant, indicating that:

- (1) The individual is not entitled to practice before the USPTO in trademark matters, and, therefore, may not represent the applicant or registrant;
- (2) Any power of attorney is void *ab initio*;
- (3) The individual may not sign responses to Office actions, authorize examiner’s amendments or priority actions, conduct interviews with USPTO employees or otherwise represent an applicant, registrant, or party to a proceeding before the Office; and
- (4) All correspondence concerning the application or registration will be sent to the domestic representative if appropriate, or, alternatively, to the applicant or registrant at its address of record.

The USPTO will change the correspondence address to that of the applicant, registrant, or domestic representative, as appropriate.

If an Office action is outstanding and no response has been received, the examining attorney or Post Registration staff must issue a supplemental action, addressed to the applicant or registrant, that restates any outstanding refusals and/or requirements, includes a new six-month response period, and states that a response signed by the individual applicant or registrant, someone with legal authority to bind a juristic applicant or

registrant (e.g., a corporate officer or general partner of a partnership) ( *see* [TMEP §§611.06–611.06\(h\)](#) ), or a qualified practitioner ( *see* [TMEP §§602–602.03\(e\)](#) ) must be submitted within the response period. See [TMEP §711.02](#) regarding supplemental Office actions.

If the examining attorney or Post Registration staff receives a response to an Office action signed by an excluded or suspended practitioner, or a person who appears to be engaged in deliberate or widespread unauthorized practice of law, he or she must prepare a notice of incomplete response, addressed to the applicant or registrant, granting the applicant or registrant additional time to perfect the response, pursuant to 37 C.F.R. §2.65(b). See [TMEP §§611.05 et seq.](#), [712.03](#), and [718.03\(b\)](#) for further information.

USPTO employees must also notify the Administrator of the receipt of a document signed by such a person.

## 609 Correspondence, with Whom Held

### *37 CFR §2.18 Correspondence, with whom held.*

(a) Establishing the correspondence address. (1) If a written power of attorney that meets the requirements of §2.17 is filed, the Office will send correspondence to the practitioner designated in the power.

(2) If a practitioner qualified under §11.14 of this chapter transmits a document(s) on behalf of an applicant, registrant, or party to a proceeding who is not already represented by another qualified practitioner from a different firm, the Office will send correspondence to the practitioner transmitting the documents.

(3) If an application, registration or proceeding is not being prosecuted by a practitioner qualified under §11.14 of this chapter and the applicant, registrant, or party to the proceeding designates a correspondence address in writing, the Office will send correspondence to the designated address if appropriate.

(4) If an application, registration or proceeding is not being prosecuted by a practitioner qualified under §11.14 of this chapter and the applicant, registrant, or party to the proceeding has not designated a correspondence address in writing, but a domestic representative has been appointed, the Office will send correspondence to the domestic representative if appropriate.

(5) If the application, registration or proceeding is not being prosecuted by a practitioner qualified under §11.14 of this chapter, the applicant, registrant, or party to the proceeding has not designated a correspondence address, and no domestic representative has been appointed, the Office will send correspondence directly to the applicant, registrant, or party to the proceeding.

(6) The Office will send correspondence to only one address in an ex parte matter.

(7) Once the Office has recognized a practitioner qualified under §11.14 of this chapter as the representative of an applicant or registrant, the Office will communicate and conduct business only with that practitioner, or with another qualified practitioner from the same firm. The Office will not conduct business directly with the applicant or registrant, or with another practitioner from a different firm, unless the applicant or registrant files a revocation of the power of attorney under §2.19(a), and/or a new power of attorney that meets the requirements of §2.17(c). A written request to change the correspondence address does not revoke a power of attorney.

(b) Changing the correspondence address. (1) If a physical or e-mail correspondence address changes, the applicant, registrant, or party to a proceeding must file a written request to change the correspondence address. The request should be promptly filed.

(2) A request to change the correspondence address must be made in writing, signed by the applicant, registrant, or party to a proceeding, someone with legal authority to bind the applicant, registrant, or party (e.g., a corporate officer or general partner of a partnership), or a practitioner qualified to practice under §11.14 of this chapter, in accordance with §2.193(e)(9).

(3) If an applicant or registrant files a new power of attorney that meets the requirements of §2.17(c), the Office will change the correspondence address to that of the practitioner named in the power.

(4) If a practitioner qualified under §11.14 of this chapter transmits a document(s) on behalf of an applicant, registrant, or party to a proceeding who is not already represented by another qualified practitioner, the Office will construe this as including a request to change the correspondence address to that of the practitioner, and will send correspondence to the practitioner.

(c) Post registration filings under sections 7, 8, 9, 12(c), 15, and 71. (1) Even if there is no new power of attorney or written request to change the correspondence address, the Office will change the correspondence address upon the examination of an affidavit under section 8, 12(c), 15 or 71 of the Trademark Act, renewal application under section 9 of the Act, or request for amendment or correction under section 7 of the Act. If a practitioner qualified under §11.14 of this chapter transmits the affidavit, renewal application, or section 7 request, the Office will send correspondence to the practitioner. If the owner of the registration is not represented by a qualified practitioner, the Office will send correspondence directly to the owner, or to the domestic representative if appropriate, in accordance with paragraph (a).

(2) Once the Office establishes a correspondence address upon examination of an affidavit, renewal application, or section 7 request, a written request to change the address in accordance with the requirements of paragraph (b)(2) of this section is required to change the address during the pendency of that filing.

See TBMP §§117–117.08 for information about correspondence in Board proceedings.

### 609.01 Establishing the Correspondence Address

When a trademark application is filed, the USPTO enters into its Trademark database an address (consisting of a name, street address or post office box, city, state and postal code, foreign country (if applicable), and an e-mail address if provided) where correspondence from the USPTO will be sent. This often differs from the applicant's address.

The USPTO may send official communications concerning an application by e-mail only if the applicant or the applicant's qualified practitioner authorizes e-mail communications. See [TMEP §304.03](#).

The USPTO uses the following guidelines in entering the correspondence address in a new application:

- If the application is transmitted by a qualified practitioner, includes a power of attorney designating a qualified practitioner, or includes the name and address of a qualified practitioner, the USPTO will send correspondence to the practitioner;
- If an application is not being prosecuted by a qualified practitioner, but the applicant designates in writing a correspondence address other than its own address, the USPTO will send correspondence to that address if appropriate;
- If an application is not being prosecuted by a qualified practitioner and the applicant has not designated a correspondence address, but a domestic representative has been appointed, the USPTO will send correspondence to the domestic representative if appropriate; or
- If the application is not being prosecuted by a qualified practitioner, no domestic representative has been appointed, and the applicant has not designated a different address for correspondence, the USPTO will send correspondence directly to the applicant at its address of record.

37 C.F.R. §§2.18(a)–2.18(a)(5).

The USPTO uses these same guidelines to reestablish the correspondence address when a registrant files an affidavit under §8, §12(c), §15, or §71 of the Trademark Act, a §9 renewal application, or a §7 request. 37 C.F.R. §§2.18(c)–2.18(c)(2). The USPTO will update its Trademark database to indicate the name of the qualified practitioner who filed the affidavit, renewal application, or §7 request. Due to the length of time that may elapse between the filing of these documents (which could be ten years or more), the USPTO will recognize a qualified practitioner who transmits one of these documents even absent a new power of attorney or revocation of the previous power. See [TMEP §604.02](#) regarding the duration of recognition as a representative.

The USPTO will not undertake double correspondence with the applicant or registrant and the applicant's or registrant's qualified practitioner, or with more than one qualified practitioner. 37 C.F.R. §2.18(a)(6). However, if the applicant or the applicant's qualified practitioner authorizes the USPTO to send official communications by e-mail, the applicant or the applicant's qualified practitioner may designate one primary e-mail address and up to four secondary e-mail addresses for duplicate courtesy copies of the correspondence. See [TMEP §403](#) regarding treatment of outgoing e-mail correspondence that is returned as undeliverable.

If an application or other document is signed by a qualified practitioner, but the submission does not contain a separate address for that practitioner, the USPTO will correspond with the qualified practitioner in care of the correspondence address of record and direct such correspondence to the practitioner's attention. If an Office action is required, the USPTO will ask the practitioner to either specify his or her address for

correspondence or affirmatively state that the USPTO should continue to address correspondence to his or her attention in care of the previously submitted correspondence address. If the practitioner does not respond to the request, the USPTO will continue to send correspondence to the attention of the practitioner at the correspondence address of record.

See TBMP §§117–117.08 for information about correspondence in Board proceedings, [TMEP §609.01\(a\)](#) regarding correspondence in §66(a) applications, [TMEP §609.02–609.02\(f\)](#) for information about changing the correspondence address, and [TMEP §609.04](#) regarding correspondence with parties who are not domiciled in the United States.

### **609.01(a) Correspondence in §66(a) Applications**

The USPTO will send the first Office action in an application under §66(a) of the Trademark Act to the IB. The IB will send it to the applicant. The USPTO will send subsequent Office actions directly to the applicant, at the correspondence address set forth in the request for extension of protection to the United States, or to any correspondence address provided in a properly signed request to change the correspondence address. See [TMEP §1904.02\(h\)](#) for further information about Office actions in §66(a) applications.

The USPTO will accept a properly signed notice of change of the correspondence address in a §66(a) application or a registered extension of protection of an international registration to the United States, and will send correspondence to the new address. However, this will not change the representative designated in the international registration, to which the IB sends correspondence. A request to record a change of the name or address of the representative designated in the international registration must be filed with the IB; it cannot be filed through the USPTO. Forms for changing the name or address of the designated representative are available on the IB website at <http://www.wipo.int/madrid/en/forms>.

See [TMEP §§1906.01–1906.01\(i\)](#) regarding requests to record changes with the IB, and [TMEP §§602.03–602.03\(e\)](#) regarding foreign attorneys.

### **609.02 Changing the Correspondence Address**

Once the correspondence address is established, the USPTO will generally send correspondence to that address until a written request to change the address is submitted, signed by the practitioner whom the USPTO has recognized, or, if the applicant or registrant is not represented by a qualified practitioner, by the individual applicant or registrant or someone with legal authority to bind a juristic applicant or registrant (e.g., a corporate officer or general partner of a partnership). 37 C.F.R. §§2.18(b)(2) and 2.193(e)(9)–2.193(e)(9)(ii).

The mere transmittal of a response to an Office action bearing a new address does not effect a change in a correspondence address, except when a new owner takes an action in an application or registration (e.g., files a response to an Office action or statement of use) after recordation of a change of ownership, as discussed in [TMEP §609.02\(f\)](#).

The USPTO will not undertake double correspondence with the applicant or registrant and the applicant's or registrant's qualified practitioner, or with more than one qualified practitioner. 37 C.F.R. §2.18(a)(6). However, if the applicant or the applicant's qualified practitioner authorizes the USPTO to send official communications by e-mail, the applicant or the applicant's qualified practitioner may designate one primary e-mail address and up to four secondary e-mail addresses for duplicate courtesy copies of the correspondence. See [TMEP §403](#) regarding treatment of outgoing e-mail correspondence that is returned as undeliverable.

A written request to change the correspondence address does not revoke a power of attorney. 37 C.F.R. §§2.18(a)(7) and 2.19(a)(3). See [TMEP §606](#) regarding revocation.

See also TBMP §§117–117.08 for information about correspondence in Board proceedings.

### **609.02(a) Request to Change Correspondence Address Presumed**

The USPTO will construe the following as a written request to change the correspondence address:

- (1) If a qualified practitioner transmits documents on behalf of an applicant or registrant who is not already represented by another qualified practitioner from a different firm, the USPTO will construe this as including a request to change the correspondence address to that of the practitioner (however, the filing of an “associate power of attorney” or similar document does not change the correspondence address); or
- (2) If an applicant or registrant files a properly signed power of attorney ( *see* [TMEP §605.01](#)) designating a qualified practitioner, the USPTO will change the correspondence address to that of the practitioner named in the power, even if the applicant or registrant does not file a separate request to change the address.

37 C.F.R. §§2.18(b)(3) and (4). In these two situations, the USPTO will change the correspondence address to the address of the new qualified practitioner. In all other situations, a written request to change the correspondence address, signed by the individual applicant or registrant, someone with legal authority to bind a juristic applicant or registrant (e.g., a corporate officer or general partner of a partnership), or the qualified practitioner of record, is required. 37 C.F.R. §§2.18(b)(2) and 2.193(e)(9)–2.193(e)(9)(ii). See [TMEP §609.02\(b\)](#) regarding the requirements for a written request to change the correspondence address.

See also TBMP §§117–117.08 for information about correspondence in Board proceedings.

### **609.02(b) Requirements for Request to Change Correspondence Address**

A request to change the correspondence address must be in writing. 37 C.F.R. §2.18(b)(2). Once the USPTO recognizes a qualified practitioner as the representative of an applicant or registrant, only that practitioner or another qualified practitioner from the same United States firm may sign a request to change the address, unless the applicant or registrant files a revocation of the previous power and/or a new power of attorney, or the previously recognized practitioner files a request to withdraw. 37 C.F.R. §§2.193(e)(3), 2.193(e)(9)(i), and 11.18(a).

If the applicant or registrant is not represented by a qualified practitioner, the request must be signed by the individual applicant or registrant or someone with legal authority to bind a juristic applicant or registrant (e.g., a corporate officer or general partner of a partnership). In the case of joint applicants or registrants, all must sign. *See* 37 C.F.R. §§2.193(e)(9)(ii) and 11.14(e); [TMEP §611.02](#).

A request to change the correspondence address cannot be entered by examiner’s amendment. *See* 37 C.F.R. §2.18(b)(2).

To expedite processing, notices of change of correspondence address (including changes of e-mail correspondence address) should be filed through TEAS, at <http://www.uspto.gov/teas/e-TEAS/index.html>. The TEAS form can be used to change the correspondence address on any application or registration that

is currently active. When a notice is filed through TEAS, the data from the form is inputted directly into the USPTO's Trademark database.

If two or more qualified practitioners are named in a power, any of the named practitioners can sign and submit a notice of change of correspondence address setting forth a new address, even if the new address is at a new firm. See 37 C.F.R. §2.193(e)(9)(i). It is not necessary to submit a new power signed by the applicant or registrant when a named practitioner(s) changes firms.

See TBMP §§117–117.08 for information about correspondence in Board proceedings.

### **609.02(c) Processing Requests to Change the Correspondence Address Before Registration**

Once the correspondence address is established for a particular application, the USPTO will generally not change it unless there is a written request to do so, signed by the applicant or the qualified practitioner of record. 37 C.F.R. §§2.18(a)(7) and (b)(2). The mere transmittal of a response to an Office action bearing a new address for an applicant or an applicant's qualified practitioner does not effect a change in a correspondence address. See [TMEP §609.02\(b\)](#) for further information about the requirements for a written request to change the correspondence address, and [TMEP §609.02\(a\)](#) for discussion of situations in which a request to change the correspondence address is presumed.

When the request is filed through TEAS, the data from the form is inputted directly into the USPTO's Trademark database. When a request to change the correspondence address is filed *on paper*, the USPTO manually enters the new correspondence address into its Trademark database and places the request in the application record, but does not send a confirmation or other acknowledgment of the request to change the correspondence address. The applicant may check the TSDR database at <http://tsdr.uspto.gov> to determine whether the change of address has been entered into the USPTO's Trademark database.

The USPTO will not process a request to change the correspondence address in an abandoned application, unless submitted in conjunction with a petition to revive or request for reinstatement. When an applicant files a request to change the correspondence address in an abandoned application, the USPTO simply places the request in the record.

### **609.02(d) Changing the Correspondence Address in Multiple Applications or Registrations**

The TEAS change of correspondence address form can be used to change the correspondence address for more than one application or registration. An applicant or registrant may submit up to 300 application serial numbers at one time. For registered marks, the TEAS form requires entry of the original application serial number rather than the registration number. Requests to change the address for more than 300 applications/registrations cannot be submitted in a single TEAS form.

Global address updates (i.e., requests to change an address in every application or registration in which it appears) will not be accepted.

### **609.02(e) Changing the Correspondence Address After Registration**

As noted in [TMEP §609.01](#), the USPTO reestablishes the correspondence address upon the examination of an affidavit under §8, §12(c), §15, or §71 of the Trademark Act, a §9 renewal application, or a §7 request,

even if there is no new power of attorney or request to change the correspondence address. The USPTO will update its Trademark database to indicate the name of the qualified practitioner who filed the affidavit, renewal application, or §7 request, and update the correspondence address to that of the qualified practitioner. 37 C.F.R. §§2.17(g)(2) and 2.18(c)–2.18(c)(2). If the registrant is not represented by a qualified practitioner, the USPTO will update its Trademark database to indicate the registrant's address as shown in the affidavit, renewal application, or §7 request as the correspondence address of record. See [TMEP §604.02](#) regarding the duration of recognition as a representative.

Once the USPTO establishes a correspondence address upon examination of an affidavit, renewal application, or §7 request, a written request to change the address is required to effect a change of address during the pendency of that filing. 37 C.F.R. §§2.18(b)(2) and (c)(2); [TMEP §604.02](#). See [TMEP §609.02\(b\)](#) regarding the requirements for a written request to change the correspondence address.

Owners of registrations are encouraged to promptly notify the USPTO of any changes of address. 37 C.F.R. §2.18(b)(1). To expedite processing, the USPTO recommends that the notice of change of address be filed through TEAS, at <http://www.uspto.gov>. The TEAS form can be used to change the correspondence address on any registration that is currently active, but requires submission of the original application serial number rather than the registration number. When the notice is filed through TEAS, the data from the form is inputted directly into the USPTO's Trademark database.

The USPTO will not process a request to change the correspondence address in a cancelled or expired registration, unless submitted in conjunction with a petition or request for reinstatement of the registration. When a registrant files a request to change the correspondence address in a cancelled or expired registration, the USPTO simply places the request in the record.

See TBMP §§117–117.08 for information about correspondence in Board proceedings and [TMEP §604.03](#) regarding change of attorney.

### **609.02(f) Correspondence After Recordation of Change of Ownership**

For purposes of recognition as a representative, the USPTO considers a power of attorney to end when ownership changes. 37 C.F.R. §2.17(g)(1). [TMEP §604.02](#).

Recordation of an assignment (or other document changing title) with the Assignment Services Branch does not automatically update the correspondence address in the USPTO's Trademark database. See [TMEP §503.01\(b\)](#). To ensure that the Trademark database is updated to reflect the correct correspondence address, new owners should file a separate written request with the Trademark Operation to change the address, preferably through TEAS.

If the new owner does not file a separate written request with the Trademark Operation to change the correspondence address, but instead takes an action in connection with an application or registration by filing a properly signed communication (e.g., a response to an Office action or statement of use) bearing a new correspondence address, the USPTO may update its Trademark database to reflect the address of the new owner or the new owner's qualified practitioner even if the new owner does not specifically request a change of the correspondence address. In this situation, the USPTO will reestablish the correspondence address, using the guidelines set forth in [TMEP §609.01](#). If the new owner is not represented by a qualified practitioner, the correspondence address will be changed to reflect the address of the applicant or registrant, as set forth in the written communication.

If a new qualified practitioner appears in person or signs a document on behalf of the new owner, the USPTO will recognize the new practitioner even absent a new power of attorney or revocation of the previous power, pursuant to 37 C.F.R. §2.17(b)(1)(ii). See [TMEP §604.02](#). However, if the previously recognized qualified practitioner appears on behalf of the new owner (which might occur when the new owner is a related company), the USPTO will continue to conduct business and correspond with that practitioner. The previously recognized practitioner does not have to file a new power of attorney signed by the new owner.

See also TBMP §§117–117.08 regarding correspondence in Board proceedings and [TMEP §§505–505.02](#) regarding requests to update ownership information after recordation of a change of ownership.

### **609.03 Applicant Has Duty to Maintain Current and Accurate Correspondence Address**

The owner of an application or registration has a duty to maintain a current and accurate correspondence address. If the correspondence address changes, the USPTO must be promptly notified in writing, preferably through TEAS. See 37 C.F.R. §2.18(b)(1). This also applies to e-mail addresses, if the applicant or registrant has authorized the USPTO to send correspondence by e-mail ( see [TMEP §304.03](#)).

### **609.04 Correspondence with Parties Not Domiciled in the United States**

If an applicant or registrant has not clearly stated a preferred correspondence address, the USPTO will process correspondence as follows:

- If an applicant or registrant has appointed a qualified practitioner ( see [TMEP §§602–602.03\(e\)](#)), the USPTO will send correspondence to that practitioner.
- If the applicant or registrant is not represented by a qualified practitioner, and the applicant or registrant has appointed a domestic representative, the USPTO will send correspondence to the domestic representative if appropriate, unless the applicant or registrant designates in writing another correspondence address. However, the domestic representative is not authorized to prosecute an application or represent a party in a proceeding before the USPTO, unless the domestic representative is a qualified practitioner who has been recognized by the USPTO as the representative of the applicant or registrant. See [TMEP §610](#) regarding domestic representatives.
- If the applicant or registrant is not represented by a qualified practitioner ( see 37 C.F.R. §11.14), and the applicant or registrant does not designate a domestic representative, the USPTO will send correspondence directly to the applicant or registrant at its foreign address, unless the applicant or registrant designates in writing another correspondence address. See 37 C.F.R. §2.18(a)(5).

See [TMEP §609.01\(a\)](#) regarding correspondence in §66(a) applications.

## **610 Designation of Domestic Representative by Parties Not Domiciled in the United States**

*37 CFR §2.24 Designation and revocation of domestic representative by foreign applicant.*

(a)(1) If an applicant is not domiciled in the United States, the applicant may designate a domestic representative (i.e., a person residing in the United States on whom notices or process in proceedings affecting the mark may be served) by either:

(i) Setting forth the name and address of the domestic representative in the initial application; or

(ii) Filing a separate designation setting forth the name and address of the domestic representative, signed by the applicant, someone with legal authority to bind the applicant (e.g., a corporate officer or general partner of a partnership), or a practitioner qualified to practice under §11.14 of this chapter.

(2) If the applicant does not file a document designating the name and address of a person residing in the United States on whom notices or process in proceedings affecting the mark may be served, or if the last person designated cannot be found at the address given in the designation, then notices or process in proceedings affecting the mark may be served on the Director.

(3) The mere designation of a domestic representative does not authorize the person designated to represent the applicant unless qualified under §11.14 of this chapter.

(b) A request to change or revoke a designation of domestic representative must be signed by the applicant, someone with legal authority to bind the applicant (e.g., a corporate officer or general partner of a partnership), or a practitioner qualified to practice under §11.14 of this chapter.

*37 CFR §2.193(e)(8) Designations and revocations of domestic representative.*

A designation or revocation of a domestic representative must be signed by the applicant or registrant, someone with legal authority to bind the applicant or registrant (e.g., a corporate officer or general partner of a partnership), or a practitioner qualified to practice under §11.14 of this chapter. In the case of joint applicants or registrants, all must sign.

*Designation of Domestic Representative Encouraged.* An applicant, registrant, or party to a proceeding before the USPTO who is not domiciled in the United States may file a document designating the name and address of a domestic representative on whom may be served notices or process in proceedings affecting the mark. 15 U.S.C. §§1051(e), 1058(f), 1059(c), 1060(b), and 1141h(d). The USPTO encourages parties who do not reside in the United States to designate domestic representatives, but it is not mandatory. If the applicant, registrant, or party does not designate a domestic representative, the USPTO will not require a designation.

*May be Natural or Juristic Person.* The person designated as a domestic representative may be a natural person or a juristic person as defined in 15 U.S.C. §1127.

*Not the Same as Power of Attorney.* The designation of a domestic representative is not the same as a power of attorney. The designation serves a different purpose, namely, to provide a contact and address for service of process. The mere designation of a domestic representative does not authorize the person designated to practice before the USPTO (e.g., to prepare or prosecute the application, or represent a party in a proceeding before the USPTO). 37 C.F.R. §§2.24(a)(3) and 11.5(b)(2). Similarly, a power of attorney does not serve as a designation of a domestic representative, unless the power of attorney specifically states that the attorney is also the domestic representative on whom may be served notices or process in proceedings affecting the mark.

*Requirements.* A designation of domestic representative must include the name and address of the person designated and a clear statement that the party intends to designate this person as a domestic representative upon whom notices or process affecting the mark may be served. 37 C.F.R. §2.24(a)(1).

*Signature.* The designation must be in writing. If set forth in the initial application, a designation of domestic representative may be signed by a person properly authorized to sign the application on behalf of applicant. A person who is properly authorized to sign an application is:

- (1) A person with legal authority to bind the applicant (e.g., a corporate officer or general partner of a partnership);
- (2) A person with firsthand knowledge of the facts and actual or implied authority to act on behalf of the applicant or party; or
- (3) An attorney as defined in 37 C.F.R. §11.1 who has an actual written or verbal power of attorney or an implied power of attorney from the applicant or party.

37 C.F.R. §§2.193(e)(1)–2.193(e)(1)(iii); [TMEP §804.04](#).

If filed apart from the initial application, the designation must be signed by the individual applicant or registrant, someone with legal authority to bind a juristic applicant or registrant (e.g., a corporate officer or general partner of a partnership), or a qualified practitioner. In the case of joint applicants or registrants who are not represented by a qualified practitioner, all must sign. 37 C.F.R. §§2.24(b) and 2.193(e)(8).

*Duration.* An appointment of domestic representative remains in effect unless specifically revoked or supplanted by appointment of a new domestic representative.

*Revocation.* An applicant or registrant may revoke a designation of domestic representative. A revocation must be signed by the individual applicant or registrant, someone with legal authority to bind a juristic applicant or registrant, or a qualified practitioner. In the case of joint applicants or registrants who are not represented by a qualified practitioner, all must sign. 37 C.F.R. §§2.24(b) and 2.193(e)(8).

*Withdrawal.* A domestic representative may withdraw, in a written document signed by an individual domestic representative, or by someone legally authorized to bind a juristic domestic representative.

*Form.* To expedite processing, the USPTO recommends that designations and revocations of domestic representative be filed through TEAS, at <http://www.uspto.gov>.

See [TMEP §609.04](#) regarding correspondence with parties who are not domiciled in the United States.

## 611 Signature on Correspondence Filed in the United States Patent and Trademark Office

### 611.01 Signature and Certificate

#### 611.01(a) Signature as Certificate

*37 CFR §2.193(f) Signature as certification.*

The presentation to the Office (whether by signing, filing, submitting, or later advocating) of any document by any person, whether a practitioner or non-practitioner, constitutes a certification under §11.18(b) of this chapter. Violations of §11.18(b) of this chapter may jeopardize the validity of the application or registration, and may result in the imposition of sanctions under §11.18(c) of this chapter. Any practitioner violating §11.18(b) of this chapter may also be subject to disciplinary action. See §§10.23(c)(15) [old rule] and 11.18(d) of this chapter.

*37 CFR §11.18 Signature and certificate for correspondence filed in the Office.*

(a) For all documents filed in the Office in patent, trademark, and other non-patent matters, and all documents filed with a hearing officer in a disciplinary proceeding, except for correspondence that is required to be signed by the applicant or party, each piece of correspondence filed by a practitioner in the Office must bear a signature, personally signed or inserted by such practitioner, in compliance with §1.4(d)(1), §1.4(d)(2), or §2.193(a) of this chapter.

(b) By presenting to the Office or hearing officer in a disciplinary proceeding (whether by signing, filing, submitting, or later advocating) any paper, the party presenting such paper, whether a practitioner or non-practitioner, is certifying that—

(1) All statements made therein of the party's own knowledge are true, all statements made therein on information and belief are believed to be true, and all statements made therein are made with the knowledge that whoever, in any matter within the jurisdiction of the Office, knowingly and willfully falsifies, conceals, or covers up by any trick, scheme, or device a material fact, or knowingly and willfully makes any false, fictitious, or fraudulent statements or representations, or knowingly and willfully makes or uses any false writing or document knowing the same to contain any false, fictitious, or fraudulent statement or entry, shall be subject to the penalties set forth under 18 U.S.C. 1001 and any other applicable criminal statute, and violations of the provisions of this section may jeopardize the probative value of the paper; and

(2) To the best of the party's knowledge, information and belief, formed after an inquiry reasonable under the circumstances,

(i) The paper is not being presented for any improper purpose, such as to harass someone or to cause unnecessary delay or needless increase in the cost of any proceeding before the Office;

(ii) The other legal contentions therein are warranted by existing law or by a nonfrivolous argument for the extension, modification, or reversal of existing law or the establishment of new law;

(iii) The allegations and other factual contentions have evidentiary support or, if specifically so identified, are likely to have evidentiary support after a reasonable opportunity for further investigation or discovery; and

(iv) The denials of factual contentions are warranted on the evidence, or if specifically so identified, are reasonably based on a lack of information or belief.

(c) Violations of any of paragraphs (b)(2)(i) through (iv) of this section are, after notice and reasonable opportunity to respond, subject to such sanctions or actions as deemed appropriate by the USPTO Director, which may include, but are not limited to, any combination of—

(1) Striking the offending paper;

(2) Referring a practitioner's conduct to the Director of Enrollment and Discipline for appropriate action;

(3) Precluding a party or practitioner from submitting a paper, or presenting or contesting an issue;

(4) Affecting the weight given to the offending paper; or

(5) Terminating the proceedings in the Office.

(d) Any practitioner violating the provisions of this section may also be subject to disciplinary action.

### 611.01(b) Requirements for Signature

All correspondence that requires a signature must bear either a handwritten signature personally signed in permanent ink by the person named as the signatory, or an “electronic signature” that meets the requirements of 37 C.F.R. §2.193(c), personally entered by the signatory. The USPTO will accept a signature that meets the requirements of 37 C.F.R. §2.193(c) on all correspondence, whether filed on paper, by fax, or through TEAS or the Electronic System for Trademark Trials and Appeals (“ESTTA”). 37 C.F.R. §2.193(a)(2). See [TMEP §611.01\(c\)](#) regarding the signature of documents filed electronically.

All documents must be personally signed. 37 C.F.R. §§2.193(a)(1) and (c)(1). Another person (e.g., paralegal, legal assistant, secretary) may not sign the name of an attorney or other authorized signatory. See *In re Dermahose Inc.*, 82 USPQ2d 1793 (TTAB 2007); *In re Cowan*, 18 USPQ2d 1407 (Comm’r Pats. 1990).

The name of the person who signs a document must be set forth in printed or typed form immediately below or adjacent to the signature, or identified elsewhere in the filing (e.g., in a cover letter or other document that accompanies the filing). 37 C.F.R. §2.193(d). If the signatory’s name is not set forth in a document, the USPTO may require that it be stated for the record. This information can be entered through a Note to the File in the record.

Documents must be signed by a proper party. See TMEP §§[611.02](#) and [611.03–611.03\(i\)](#) for further information.

See TBMP §106.02 regarding signature of documents filed in Board proceedings, and TBMP §106.03 regarding the form of submissions in Board proceedings.

### 611.01(c) Signature of Documents Filed Electronically

*37 CFR §2.193 Trademark correspondence and signature requirements. (Extract)*

...

(c) Requirements for electronic signature. A person signing a document electronically must:

(1) Personally enter any combination of letters, numbers, spaces and/or punctuation marks that he or she has adopted as a signature, placed between two forward slash (“/”) symbols in the signature block on the electronic submission; or

(2) Sign the verified statement using some other form of electronic signature specified by the Director.

(d) Signatory must be identified. The name of the person who signs a document in connection with a trademark application, registration, or proceeding before the Trademark Trial and Appeal Board must be set forth in printed or typed form immediately below or adjacent to the signature, or identified elsewhere in the filing (e.g., in a cover letter or other document that accompanies the filing).

In a document filed in connection with a trademark application, registration, or proceeding before the Trademark Trial and Appeal Board through TEAS or ESTTA, the party filing the document does not apply a conventional signature. Instead, the filer does one of the following:

(1) The filer enters any combination of letters, numbers, spaces, and/or punctuation marks that the filer has adopted as a signature, placed between two forward slash (“/”) symbols. 37 C.F.R. §2.193(c). Examples of acceptable signatures include */ john doe/*, */ drl/*, and */ 544-4925/*. The signatory’s name must be set forth beneath the signature. 37 C.F.R. §2.193(d);

(2) The document is filled out online, printed in text form, and mailed or faxed to the signatory. The signatory signs the printed document in the traditional pen-and-ink manner. The signature portion, along with a declaration, if required, is scanned to create a .jpg or .pdf image file and attached to the document for electronic submission; or

(3) The document is completed online, and e-mailed to the signatory for electronic signature from within TEAS. The signatory signs the document and it is automatically returned via TEAS to the party who requested the signature.

The USPTO will also accept a signature that meets the requirements of paragraph (1) above on documents that are filed on paper. 37 C.F.R. §2.193(a)(2).

All documents must be personally signed. 37 C.F.R. §§2.193(a)(1), (c)(1), 11.18(a). The person(s) identified as the signatory must manually enter the elements of the electronic signature. Another person (e.g., paralegal, legal assistant, or secretary) may not sign the name of a qualified practitioner or other authorized signatory.

*See In re Dermahose Inc.*, 82 USPQ2d 1793 (TTAB 2007); *In re Cowan*, 18 USPQ2d 1407 (Comm'r Pats. 1990). Just as signing the name of another person on paper does not serve as the signature of the person whose name is written, typing the electronic signature of another person is not a valid signature by that person.

The Trademark Trial and Appeal Board has held that an electronic signature on an electronic transmission through ESTTA pertains to all the attachments to the transmission. *PPG Indus., Inc. v. Guardian Indus. Corp.*, 73 USPQ2d 1926 (TTAB 2005).

See TBMP §106.02 regarding signature of documents filed in Board proceedings, and TBMP §106.03 regarding the form of submissions in Board proceedings.

## **611.02 Signatures by Authorized Parties Required**

All documents filed in the USPTO must be properly signed. The USPTO staff must review the application or registration record to determine whether the applicant or registrant is represented by a qualified practitioner, and must ensure that all documents are properly signed.

Verifications of facts on behalf of an applicant or registrant must be personally signed by someone meeting the requirements of 37 C.F.R. §2.193(e)(1). *See* TMEP §§[611.03\(a\)](#) and [804.04](#).

Other documents must be personally signed by the applicant or registrant, someone with legal authority to bind a juristic applicant or registrant (e.g., a corporate officer or general partner of a partnership), or by a qualified practitioner. This includes amendments, responses to Office actions, petitions to the Director under 37 C.F.R. §2.146, letters of express abandonment, requests to divide, and requests to change the correspondence address. Generally, if the applicant or registrant is represented by a qualified practitioner, the practitioner must sign. 37 C.F.R. §§2.193(e)(2)(i), 2.193(e)(5)(i), 2.193(e)(9)(i), and 11.18(a). This applies to both in-house and outside counsel. If the applicant or registrant is not represented by a qualified practitioner, the document must be signed by the individual applicant or registrant or someone with legal authority to bind a juristic applicant or registrant (e.g., a corporate officer or general partner of a partnership).

In the case of joint applicants or registrants who are not represented by a qualified practitioner, all must sign. 37 C.F.R. §2.193(e)(2)(ii), 2.193(e)(5)(ii), 2.193(e)(9)(ii), and 11.14(e).

See [TMEP §§611.03–611.03\(i\)](#) for guidelines as to the proper person to sign specific documents, [TMEP §§611.06–611.06\(h\)](#) for guidelines on persons with legal authority to bind various types of legal entities, and [TMEP §611.04](#) for examples of authorized and potentially unauthorized parties.

### 611.02(a) TEAS Checkoff Boxes

On some of the TEAS forms, the person signing the response must confirm that he or she is authorized to sign the document by clicking one of three buttons indicating that he or she is: (1) an unrepresented applicant or registrant who has not previously been represented in this matter, or was previously represented by a qualified practitioner who has withdrawn or whose power has been revoked; (2) an attorney who is a member in good standing of the bar of the highest court of a state in the United States, and that if the applicant or registrant was previously represented by a different qualified practitioner, the previous power has been revoked, or the previously appointed practitioner has withdrawn; or (3) an authorized Canadian attorney or agent who has been granted recognition by OED, and if the applicant or registrant was previously represented by a different qualified practitioner, the previous power has been revoked, or the previously appointed practitioner has withdrawn. The USPTO will accept these statements unless there is conflicting information in the record or the USPTO is otherwise made aware of conflicting information.

*Example:* If an attorney lists a foreign address and checks the box indicating that he or she is a member in good standing of the bar of the highest court of a state in the United States, the USPTO will accept this statement, as long as there is no conflicting information in the record.

*Example:* If an attorney indicates that the applicant was previously unrepresented, or that the applicant was previously represented by another attorney who has withdrawn or whose power has been revoked, when, in fact, there is another attorney of record whose power has not been revoked, the USPTO must inquire into the signatory's authority to sign, because there is inconsistent information in the record.

*Example:* If the signatory identifies himself or herself as an "attorney," but does not check the box confirming that he or she is a member in good standing of the bar of the highest court of a state in the United States, the USPTO will inquire into the signatory's authority to sign, because there is inconsistent information in the record.

*Example:* If the signatory checks the box indicating that he or she is a person with legal authority to bind a juristic applicant (e.g., a corporate officer or general partner of a partnership), but sets forth a title that the USPTO would not normally accept (e.g., accountant, paralegal, or trademark administrator), the USPTO will inquire into the signatory's authority to sign, because there is inconsistent information in the record.

*Example:* If, instead of checking the "attorney in good standing" box, a United States attorney checks one of the other boxes (i.e., indicating that the applicant is not represented by an attorney, or that the attorney is an authorized Canadian, representing a Canadian applicant), an issue of signatory authority arises, and the USPTO will inquire into the signatory's authority to sign, because there is inconsistent information in the record.

*Exception:* If the signatory indicates that he or she is a Canadian attorney or agent who has been granted recognition by OED, the USPTO staff must still check the OED list to verify this information. See [TMEP §602.03\(a\)](#) for further information about Canadian attorneys and agents.

See [TMEP §§611.05\(a\)](#) and [712.03](#) regarding issuance of a notice of incomplete response where there is a question as to a signatory's authority to sign.

### 611.03 Proper Person to Sign

This section provides guidelines as to the proper person to sign various documents. Unless otherwise specified by law, the following guidelines should be followed.

#### 611.03(a) Verification

A verification must be sworn to or supported by a declaration signed by the owner of the application or registration or a person properly authorized to verify facts on behalf of the owner. A person who is properly authorized to verify facts on behalf of an owner is:

- A person with legal authority to bind the owner;
- A person with firsthand knowledge of the facts and actual or implied authority to act on behalf of the owner; or
- A qualified practitioner who has an actual written or verbal power of attorney or an implied power of attorney from the owner.

See 37 C.F.R. §§2.193(e)(1)–2.193(e)(1)(iii). Generally, the Office does not question the authority of the person who signs an affidavit or declaration verifying facts, unless there is an inconsistency in the record as to the signatory’s authority to sign. See [TMEP §804.04](#).

The broad definition of a “person properly authorized to sign on behalf of an owner” in 37 C.F.R. §2.193(e)(1) applies *only* to verifications of facts, such as applications for trademark registration, affidavits under §8 or §71 of the Trademark Act, amendments to allege use under 37 C.F.R. §2.76, statements of use under 37 C.F.R. §2.88, and declarations in support of substitute specimens or claims of acquired distinctiveness. It does *not* apply to powers of attorney, revocations of powers of attorney, responses to Office actions, amendments to applications, letters of express abandonment, petitions to the Director under 37 C.F.R. §2.146, consent agreements, or changes of correspondence address. For example, the “Trademark Administrator” of the applicant, who has firsthand knowledge of the facts alleged in the application, may sign the verified statement in support of the application, but unless he or she has legal authority to bind the applicant (e.g., is a corporate officer or general partner of a partnership), or is a qualified practitioner, he or she may not sign responses to Office actions or agree to examiner’s amendments.

### **611.03(b) Responses, Amendments to Applications, Requests for Express Abandonment, Requests for Reconsideration of Final Actions, and Requests to Divide**

Responses, amendments to applications, requests for express abandonment, requests for reconsideration of final actions, and requests to divide must be signed by the individual applicant or registrant, someone with legal authority to bind a juristic applicant or registrant, or a qualified practitioner, in accordance with the following guidelines:

- If the applicant or registrant is represented by a qualified practitioner, the practitioner must sign, except where the owner is required to sign the correspondence; or
- If the applicant or registrant is not represented by a qualified practitioner, the individual applicant or registrant or someone with legal authority to bind a juristic applicant or registrant must sign. In the case of joint applicants or registrants who are not represented by a qualified practitioner, all must sign.

See 37 C.F.R. §§2.62(b), 2.68(a), 2.74(b), 2.87(f), 2.163(b), 2.171(b)(1), 2.184(b)(2), 2.193(e)(2)–2.193(e)(2)(ii), 11.14(e), and 11.18(a).

See [TMEP §712.01](#) for further guidance as to who may sign a response to an examining attorney’s Office action.

### **611.03(c) Powers of Attorney and Revocations of Powers of Attorney**

Powers of attorney and revocations of powers of attorney must be signed by the individual applicant or registrant or someone with legal authority to bind a juristic applicant or registrant. In the case of joint applicants or registrants, all must sign. 37 C.F.R. §§2.17(c)(2), 2.19(a)(1), and 2.193(e)(3). Once the

applicant or registrant has designated a qualified practitioner(s), the named practitioner may sign an associate power of attorney appointing another qualified practitioner(s) as an additional person(s) authorized to prosecute the application or registration. 37 C.F.R. §2.17(c)(2). See [TMEP §§605.01, 605.03, and 606](#).

### **611.03(d) Petitions to Revive**

A petition to revive under 37 C.F.R. §2.66 must be signed by someone with firsthand knowledge of the facts regarding unintentional delay. 37 C.F.R. §§2.66(b)(2), 2.66(c)(2), and 2.193(e)(4); [TMEP §1714.01\(e\)](#). Any response to an Office action accompanying the petition must be signed by a qualified practitioner, or by the individual applicant or someone with legal authority to bind a juristic applicant (e.g., a corporate officer or general partner of a partnership) if the applicant is not represented by an authorized practitioner (see [TMEP §611.03\(b\)](#)).

### **611.03(e) Petitions to the Director**

A petition to the Director under 37 C.F.R. §2.146 must be signed by the petitioner, someone with legal authority to bind the petitioner, or a qualified practitioner, in accordance with the following guidelines:

- If the petitioner is represented by a qualified practitioner, the practitioner must sign; or
- If the petitioner is not represented by a qualified practitioner, the individual petitioner or someone with legal authority to bind a juristic petitioner must sign. In the case of joint petitioners, all must sign.

37 C.F.R. §§2.146(c), 2.193(e)(5)–2.193(e)(5)(ii), 11.14(e), and 11.18(a); [TMEP §1705.07](#).

### **611.03(f) Amendment, Correction, or Surrender of Registration**

A request for correction or amendment of a registration or a surrender of a registration must be signed by the individual owner of the registration, someone with legal authority to bind a juristic owner, or a qualified practitioner. In the case of joint owners who are not represented by a qualified practitioner, all must sign. 37 C.F.R. §§2.171(a), 2.173(b)(2), 2.175(b)(2), and 2.193(e)(6).

### **611.03(g) Renewal Applications**

A renewal application must be signed by the registrant or the registrant's representative. 37 C.F.R. §§2.183(a) and 2.193(e)(7). See [TMEP §§1606.06 and 1606.07](#) regarding filing and execution of renewal applications.

### **611.03(h) Designations and Revocations of Domestic Representative**

*Designation.* An applicant or registrant may designate a domestic representative by either:

- Setting forth the name and address of the domestic representative in the initial application for registration; or
- Filing a separate designation setting forth the name and address of the domestic representative, signed by the individual applicant or registrant, someone with legal authority to bind a juristic applicant or registrant, or a qualified practitioner. In the case of joint applicants or registrants, all must sign.

37 C.F.R. §§2.24(a)(1) and 2.193(e)(8).

*Revocation.* A revocation of domestic representative must be signed by the individual applicant or registrant, someone with legal authority to bind a juristic applicant or registrant, or a qualified practitioner. 37 C.F.R. §§2.24(b) and 2.193(e)(8).

See [TMEP §610](#) regarding the designation of a domestic representative by parties not domiciled in the United States.

### **611.03(i) Requests to Change Correspondence Address in an Application or Registration**

A request to change the correspondence address in an application or registration must be signed by the individual applicant or registrant, someone with legal authority to bind a juristic applicant or registrant, or a qualified practitioner, in accordance with the following guidelines:

- If the applicant or registrant is represented by a qualified practitioner, the practitioner must sign; or
- If the applicant or registrant is not represented by a qualified practitioner, the individual applicant or registrant or someone with legal authority to bind a juristic applicant or registrant must sign. In the case of joint applicants or joint registrants, all must sign.

See 37 C.F.R. §§2.18(b)(2), 2.193(e)(9)–2.193(e)(9)(ii), 11.14(e), and 11.18(a); [TMEP §609.02\(b\)](#).

### **611.04 Examples of Authorized and Potentially Unauthorized Signatories**

Set forth below is a list of examples of parties who are authorized and potentially unauthorized to sign responses, petitions to the Director under 37 C.F.R. §2.146, amendments, requests for express abandonment, and other documents that must be signed by the applicant or registrant, or by someone with legal authority to bind the applicant or registrant. This list is not exhaustive.

*Authorized Parties.* In the following situations, a signatory is presumed to be authorized to represent an applicant or registrant:

- Person identifies him/herself as an officer of a pro se applicant or registrant (e.g., “President,” “Vice President,” “Treasurer,” “Secretary”) of a domestic corporation or the equivalent for another type of business entity (e.g., “Partner” for a partnership, “Member” or “Principal” for a Limited Liability Company).
- Person signing for a previously pro se applicant or registrant identifies him/herself as an attorney in good standing of the bar of the highest court of any state in the United States who is practicing abroad (e.g., Mary Smith, member of New York State Bar, with offices in Nassau, Bahamas).
- Person signing for a foreign corporation identifies him/herself as “general counsel” or “in-house counsel” **AND** a “corporate officer” or another corporate officer position (e.g., “Secretary,” “Treasurer,” or “Vice President”).
- Person signing for a previously pro se applicant or registrant identifies him/herself as an attorney with a United States law firm or as “general counsel” or “in-house counsel” of a United States applicant.
- Person signing is a different attorney from the same United States-based firm as the current attorney of record.

- Person signing on behalf of a Canadian applicant or registrant is a Canadian trademark attorney or agent whom OED has recognized as qualified to represent parties located in Canada ( *see* [TMEP §602.03\(a\)](#)).
- Person signing identifies him/herself as an “officer” of a pro se corporate applicant.

*Potentially Unauthorized Parties.* In the following situations, a signatory is presumed to be unauthorized to represent an applicant or registrant:

- Person signing provides no title or position (e.g., applicant is Jack Smith, an individual citizen of the United States, and Mary Jones signs the response; or applicant is ABC Corporation, and Bill Miller, President, signs the original application, but Dave Wilson, with no listed title or position, signs the response).
- Person signing appears to be a foreign attorney (e.g., “solicitor” or “barrister” for a foreign entity), or is a foreign law consultant with a law firm in the United States.
- Person signing identifies him/herself as a non-attorney representing applicant or registrant in some other capacity (e.g., accountant, paralegal, trademark administrator, business manager, personal assistant, or legal secretary).
- Person signing provides the address of a foreign firm.
- Person signing in an application or registration owned by a foreign entity identifies him/herself as “attorney for applicant,” “attorney at law,” or similar language, but does not specify an address or firm.
- Person signing identifies him/herself as “attorney-in-fact.”
- Person signing in an application or registration owned by a foreign entity identifies him/herself as “in house counsel” or “general counsel,” with no other indication of officer status or recognition to practice in the United States or before the USPTO per 37 C.F.R. §§11.14(a) or (c).
- Person signing identifies him/herself as “representative of,” “agent for,” or “representing” applicant or registrant, with no other explanation.
- Person signing identifies him/herself as an “authorized signatory” but provides no other indication of the nature of the signer’s relationship to applicant or registrant.
- Person signing is a new attorney from a different firm, when the applicant or registrant had previously appointed a qualified practitioner and no new power of attorney or revocation of the previously appointed power has been made of record.

### **611.05 Processing Documents Signed by Someone Other Than the Applicant or the Applicant’s Designated Attorney**

When examining a document filed in connection with a trademark application or registration, the USPTO staff must ensure that all documents are signed by a proper party. *See* [TMEP §611.02](#).

When it appears that a response to an Office action is signed by an improper party, the USPTO staff must treat the response as incomplete. *See* [TMEP §611.05\(a\)](#).

When it appears that a document other than a response to an Office action (e.g., a proposed amendment to an application that is not responsive to an Office action, a petition to the Director under 37 C.F.R. §2.146, or an express abandonment) is signed by an improper party, the USPTO will notify the applicant or registrant that no action will be taken on the document, unless the applicant or registrant either: (1) establishes the signatory’s authority; or (2) submits a properly signed document.

See TBMP §106.02 for information about signature of documents filed in Board proceedings.

### **611.05(a) Notice of Incomplete Response when Authority of Person Signing Response Is Unclear**

If it appears that a response to an examining attorney's Office action is signed by an improper party, the examining attorney must treat the response as an incomplete response, and grant the applicant additional time to perfect the response, pursuant to 37 C.F.R. §2.65(b). See [TMEP §718.03\(b\)](#). The applicant must submit a response signed by the individual applicant, someone with legal authority to bind a juristic applicant (e.g., a corporate officer or general partner of a partnership), or a qualified practitioner. These same principles and procedures apply to responses to Office actions issued by other USPTO employees (e.g., staff in the Post Registration Section, ITU/Divisional Unit, Madrid Processing Unit, or Office of Petitions).

See also [TMEP §712.03](#).

### **611.05(b) Replying to a Notice of Incomplete Response**

If the person who signed the response is an authorized signer, the person may simply telephone or send an e-mail message to clarify the record, and the USPTO staff will make an appropriate Note to the File in the record, review the previously submitted response, and take the appropriate action.

A proper reply to a notice of incomplete response should state the nature of the relationship of the signer to the applicant or registrant. If the signer has legal authority to bind the applicant or registrant, the person should so state, and should set forth his or her title or position. If the signer is an attorney who may practice before the USPTO pursuant to 37 C.F.R. §11.14(a), the attorney should identify himself or herself as an attorney and indicate the bar of the U.S. state of which he or she is a member in good standing. If the signer meets the requirements of either 37 C.F.R. §§11.14(b) or (c), the person should explain how he or she meets these requirements. For example, a Canadian attorney or agent recognized to practice before the USPTO in trademark cases by OED ( see [TMEP §602.03\(a\)](#)) may simply state he or she has received recognition by OED as a Canadian practitioner under §§11.14(c) and (f).

In a pending application, if the person who signed the response is not an authorized signer, and all proposed amendments in the improperly signed response can be resolved by an examiner's amendment, the individual applicant or a person with legal authority to bind a juristic applicant (e.g., a corporate officer or general partner of a partnership) may telephone the examining attorney to authorize such an amendment. Otherwise, when the person who signed the response is not an authorized signer, the applicant must submit a response signed by the individual applicant, someone with legal authority to bind a juristic applicant, or a qualified practitioner. See [TMEP §§611.03\(b\)](#), [611.06–611.06\(h\)](#) , and [712.01](#) regarding the proper party to sign a response to an Office action.

See [TMEP §604.03](#) regarding changes of attorney.

### **611.05(c) Unsatisfactory Response or Failure to Respond**

*Pending Applications.* In a pending application, if an unsatisfactory response or no response is received to the notice of incomplete response, the USPTO will abandon the application for incomplete response. See [TMEP §718.03\(a\)](#) for procedures for holding an application abandoned for failure to respond completely.

*Post Registration.* If there is an inadequate response or no response to a notice of incomplete response issued in connection with an affidavit of use or excusable nonuse under §8 or §71, or a §9 renewal application, the USPTO will notify the registrant that the affidavit or renewal application remains unacceptable, and that the registration will be cancelled in due course. In the case of a §7 request, the USPTO will notify the registrant that the request for amendment or correction is abandoned.

## **611.06 Guidelines on Persons with Legal Authority to Bind Certain Juristic Entities**

### **611.06(a) Joint Owners**

Joint owners are individual parties and not a single entity. Where a document must be signed by someone with legal authority to bind joint owners, the document must be signed by all the owners. *See* 37 C.F.R. §§2.17(c)(2), 2.19(a)(1), 2.193(e)(2)(ii), 2.193(e)(3), 2.193(e)(5)(ii), 2.193(e)(6), 2.193(e)(8), and 2.193(e)(9)(ii).

### **611.06(b) Signature by Partnership**

Where a document must be signed by someone with legal authority to bind a partnership, a general partner must sign. Signature by all the general partners is not necessary. If the partnership comprises general partners who are juristic entities (e.g., the general partners are corporations), someone with legal authority to bind that type of juristic entity must sign.

In appropriate cases, a document filed by a partnership may be signed by an official other than a general partner, if the record contains an explanation or documentation indicating that the person signing the document has legal authority to bind the partnership.

### **611.06(c) Signature by Joint Venture**

Where a document must be signed by someone with legal authority to bind a joint venture, each party to the venture must sign. Although a joint venture has many attributes of a partnership, it is a special partnership, which is very limited in nature and scope. Generally, signature by each party to the joint venture is necessary.

In appropriate cases, a document filed by a joint venture may be signed by a general manager or other official rather than by each of the joint venturers, if the applicant or registrant states that the person who signed has legal authority to bind the joint venture under relevant state law.

### **611.06(d) Signature by Corporation**

Where a document must be signed by someone with legal authority to bind a corporation, a corporate officer must sign. An officer is a person who holds an office established in the articles of incorporation or corporate bylaws.

The usual titles for officers are President, Vice-President, Secretary, Treasurer, Chief Executive Officer, Chief Operating Officer, and Chief Financial Officer. In some organizations, the Treasurer is called a Comptroller or Controller, and these terms are acceptable. In Maine and Massachusetts the term “Clerk” identifies an officer of a corporation.

Modifications of these basic titles are acceptable if they include the officer title. Titles such as Vice-President for Sales, Executive Vice-President, Assistant Treasurer, Executive Secretary, and Administrative Secretary are acceptable.

The signature of the “Chairman” or “Chairman of the Board of Directors” is also acceptable, but not the signature of an individual director (e.g., the Vice-Chairman of the Board). The terms “Executive Secretary” and “Administrative Secretary” are acceptable because they include the officer-title “Secretary.”

Some titles are generally *not* accepted because they usually do not identify officers. For instance, a General Manager, or any other type of manager, is usually merely an employee, not an officer.

If the applicant or registrant states that the person who signed the response is authorized to bind the applicant or registrant under the articles of incorporation or bylaws, the USPTO will accept the signature.

A corporation cannot delegate authority to sign to someone who is not a corporate officer. *In re Textron, Inc.*, 183 USPQ 301 (Comm'r Pats. 1974). Therefore, documents purporting to authorize representation, even if signed by officers, will not be accepted as establishing authority of a person who does not have authority to legally bind the corporation under its bylaws or articles of incorporation.

When the applicant or registrant is a corporation, a statement that the signatory is an “officer” or “duly authorized officer” of the corporation is acceptable. However, it is unacceptable to state that the person who signed the verification is an “authorized signatory.”

### **611.06(e) Signature by Foreign Companies and Corporations**

There are significant differences between the legal entities established under the laws of the United States and legal entities established and recognized under the laws of foreign countries, and the titles and duties of officers of foreign corporations and companies often differ from those in the United States. In the case of foreign entities that are in the nature of corporations, the USPTO will accept the signature of a person considered to be equivalent to an officer under the law of the foreign country. Indication of a title identifying the signer as a type of officer – such as “Legal Officer” or “Information Officer” – is also sufficient.

In foreign countries, a person who holds the title “Manager” or “Director” is normally an officer or the equivalent of an officer.

The term “Procurist” is used in a number of countries to indicate an officer. For British companies, the terms “Registrar” and “Confidential Clerk” are the equivalent of officers.

If the applicant or registrant states that the person who signed the response holds a position that is the equivalent of an officer of a United States corporation, the USPTO will accept the signature.

Simply stating that a person has been granted authority to act on behalf of the applicant or registrant is insufficient. Documents purporting to authorize representation, even if signed by officers, will not be accepted as establishing the authority of a person who is not the equivalent of an officer. The applicant or

registrant must state that the signatory has authority to legally bind the applicant or registrant under its bylaws or articles of incorporation.

### **611.06(f) Signature by Unincorporated Association**

For organizations that are less formally organized than corporations (e.g., fraternal societies, unions, unincorporated associations, and governmental bodies), the titles for officers are less standardized. These organizations frequently use more individualistic terms for titles than the terms customarily used by corporations, and the officer positions themselves may not be as clearly or as formally provided for as is the case with corporations. Regardless of how unfamiliar the title is or how informal the position seems to be, the USPTO will accept the signature if the applicant or registrant states on the record that the signer has, within the framework of the particular organization, authority equivalent to that of an officer to act on behalf of the organization (i.e., has authority to legally bind the applicant or registrant under its bylaws or articles of formation). Some titles that have been accepted are Director, National Director, National Commander, Permanent Chairman, International Sponsor, Supreme Ruler, Royal Impresario, and Chairman of the Steering Committee.

### **611.06(g) Signature by Limited Liability Company**

A limited liability company (“LLC”) has attributes of both a corporation and a partnership. See [TMEP §803.03\(h\)](#). Laws vary to some extent as to the authority conferred on various individuals associated with the limited liability company. Generally, a “manager” has authority equivalent to an officer in a corporation.

Therefore, anyone identified as a manager, or equivalent, may sign. In addition, anyone with a corporate-officer-type title may sign. In some states, the members, who are the owners, also have authority to act on behalf of the limited liability company.

### **611.06(h) Signature by Limited Liability Partnership**

A limited liability partnership (“LLP”) has attributes of both a partnership and a corporation. See [TMEP §803.03\(k\)](#). Laws vary to some extent as to the authority conferred on various partners associated with the limited liability partnership. Generally, all partners are recognized as having general agency authority to bind the partnership in the ordinary course of business. Therefore, anyone identified as a partner may sign.

Many states provide for the filing of a Statement of Partnership Authority which specifically names partners having authority and/or limits the authority of certain individuals. If an individual who is not a named partner of the LLP has been recognized as having authority to bind the LLP, that person may sign, and must indicate his or her position as an individual designated in the LLP’s Statement of Partnership Authority.

## **701 Statutory Authority for Examination**

### *15 U.S.C. §1062 Publication.*

(a) Upon the filing of an application for registration and payment of the prescribed fee, the Director shall refer the application to the examiner in charge of the registration of marks, who shall cause an examination to be made...

(b) If the applicant is found not entitled to registration, the examiner shall advise the applicant thereof and of the reason therefor. The applicant shall have a period of six months in which to reply or amend his application, which shall then be reexamined. This procedure may be repeated until

(1) the examiner finally refuses registration of the mark or (2) the applicant fails for a period of six months to reply or amend or appeal, whereupon the application shall be deemed to have been abandoned, unless it can be shown to the satisfaction of the Director that the delay in responding was unintentional, whereupon such time may be extended.

## 702 Order of Work

### 702.01 Order of Examination

In general, applications are assigned for examination in the order in which they are received in the United States Patent and Trademark Office (“USPTO”), unless the application is made “special.” See [TMEP §702.02](#) regarding “special” applications. If a voluntary amendment is filed before the application is assigned for examination, it is placed in the record for consideration at the time the application is assigned to an examining attorney.

Generally, amended applications (i.e., applications that contain a response from the applicant), remands from the Trademark Trial and Appeal Board (“Board”), and statements of use are also reviewed in the order in which they are received in the USPTO.

Examining attorneys should act on applications that have been suspended as soon as they are removed from suspension. See [TMEP §§716-716.06](#) regarding suspension.

Examining attorneys should immediately act on inquiries regarding applications approved for publication or issue that are returned to the examining attorney to take action or provide information.

Where appropriate, the managing attorney may direct that a particular case be given special handling.

When an examining attorney resigns, the examining attorney should spend any remaining time in the Office getting his or her amended cases (including statements of use under 15 U.S.C. §1051(d) and appeal briefs), especially those with involved records, ready for final disposition.

### 702.02 “Special” Applications

While the USPTO normally processes applications in the order in which they are received, there are two procedures whereby an application can be made “special,” so that initial examination will be expedited.

*Request to Make Special - Registration Inadvertently Cancelled or Expired Under 15 U.S.C. §1058, §1059, or §1141k.* A new application for registration of a mark that was the subject of a previous registration that was inadvertently cancelled or expired under 15 U.S.C. §1058, §1059, or §1141k will be made “special” upon the request of the applicant if the applicant is the prior registrant or the assignee of the prior registrant. No petition fee is required in this situation. However, *the mark in the new application must be identical to the mark in the cancelled or expired registration, and the goods/services in the new application must be identical to or narrower than the goods/services in the cancelled or expired registration.*

A request to make an application special because a registration was inadvertently cancelled is reviewed in the Office of the Deputy Commissioner for Trademark Examination Policy. The applicant should first file the application via the Trademark Electronic Application System (“TEAS”). The applicant should then submit a request to make special that includes the newly assigned serial number and the number of the cancelled registration. To ensure proper routing and processing, the Office prefers that the request also be filed electronically. In TEAS, the Request to Make Special form can be accessed at <http://www.uspto.gov>.

If it is not possible to file the request electronically, it should be faxed to the attention of the Deputy Commissioner for Trademark Examination Policy at the following fax number: 571-273-0032.

If the request is submitted by mail, it should be submitted *separately* from the application, marked to the attention of the Deputy Commissioner for Trademark Examination Policy.

*Petition to Make Special.* A petition to make “special” is a request to the Director under 37 C.F.R. §2.146 to advance the initial examination of an application out of its regular order. See [TMEP §§1710-1710.02](#) regarding the petition requirements and filing procedure.

The examining attorney must promptly examine any application that has been made “special.”

## **702.03 Related Applications**

### **702.03(a) Companion Applications**

The term “companion applications” refers to pending applications filed by the same applicant. An application is pending until it registers or abandons. Pending applications include applications that have been approved for publication or for registration on the Supplemental Register, applications in the Intent-to-Use (“ITU”)/Divisional Unit, and revived or reinstated applications.

#### **702.03(a)(i) Companion Applications Not Previously Assigned for the Same or Similar Marks**

If an applicant has multiple pending applications, the issues in the applications are likely to be similar. When assigned a new application, an examining attorney will be assigned the companion applications filed within three months of the filing date of the first assigned application. If an applicant files more than ten applications within a three-month period, only the first ten will be assigned to one examining attorney. Examining attorneys are encouraged to assign all unassigned companion applications for the same or similar marks to themselves, even if the applications were filed outside the three-month period.

The assignment of companion applications is done electronically, based upon the owner’s name as set forth in the application. Therefore, the owner’s name should be set forth consistently in all applications.

See [TMEP §702.03\(a\)\(iv\)](#) regarding classification and identification in companion applications that have been published for opposition.

#### **702.03(a)(ii) Companion Applications Previously Assigned**

If the Trademark database indicates that a companion application has been assigned to a different examining attorney, the examining attorney should **not** transfer his or her application to the other examining attorney.

However, the examining attorney must review the electronic record of the earlier companion application before taking action in a later companion case, and should act consistently, unless it would be clear error ( *see* [TMEP §706.01](#)) to do so. If the examining attorney believes that acting consistently with the prior action(s) would be erroneous, he or she should bring the issue to the attention of the managing attorney or senior attorney.

See [TMPEP §702.03\(a\)\(iv\)](#) regarding classification and identification in companion applications that have been published for opposition.

### **702.03(a)(iii) Companion Registrations**

If the applicant previously filed a companion application that has matured into a registration, the examining attorney should *not* transfer his or her application to the prior examining attorney. Generally, in the later application, the examining attorney should act consistently with the registration, unless it would be clear error ( *see* [TMPEP §706.01](#)) to act consistently. However, the USPTO is not bound by the decisions of the examining attorneys who examined the applications for the applicant's previously registered marks, based on different records. Eligibility for registration must be determined on the basis of the facts that exist at the time registration is sought. *See* [TMPEP §1216.01](#) and cases cited therein.

See [TMPEP §702.03\(a\)\(iv\)](#) regarding classification and identification in companion registrations.

### **702.03(a)(iv) Classification and Identification in Companion Applications that Have Registered or Been Published for Opposition**

If a companion application has been published for opposition or has registered, the examining attorney may presume that the classification and identification of goods or services in the companion application or registration are acceptable, unless the identification or classification is clearly wrong. If the examining attorney accepts the classification and identification of goods or services because they were accepted in a companion application or registration, the examining attorney must note the companion application serial number or registration number in a Note to the File.

Sometimes, the classification and identification of goods and/or services in the prior companion application or registration is clearly wrong. For example, identifications and class assignments that were acceptable in the past may no longer be in accord with the current Nice Agreement classification system ( *see* [TMPEP §§1401.02–1401.02\(c\)](#) ) or with USPTO policy on acceptable identifications, which change periodically.

In these cases, the examining attorney cannot adopt the classification and identification listed in the companion application or registration. *See* [TMPEP §§1402.14, 1904.02\(c\)\(v\)](#).

### **702.03(b) Conflicting Applications**

The term “conflicting applications” refers to two or more pending applications that are filed by different applicants and may ultimately require a refusal of registration under §2(d) of the Trademark Act, 15 U.S.C. §1052(d), due to a likelihood of confusion between the marks. When assigned a new application, the examining attorney must search the USPTO's automated records to determine whether there are any conflicting applications. If there are conflicting applications, the examining attorney should *not* transfer the conflicting application to the examining attorney who acted on the first conflicting application. Instead, the examining attorney should examine the assigned application and issue an Office action that includes a notice to the applicant that there is a prior-filed application to register a mark that may be likely to cause confusion with the applicant's mark. *See* [TMPEP §§1208–1208.03\(c\)](#). The examining attorney handling the later-filed application should act consistently with the examining attorney who handled the earlier-filed application, unless it would be clear error ( *see* [TMPEP §706.01](#)) to act consistently. If necessary, the

examining attorney should review the electronic record of the earlier-filed application before taking an action in the later-filed conflicting application.

### 703 USPTO Does Not Issue Duplicate Registrations

The USPTO will not issue two or more identical registrations on the same register. If two applications on the same register would result in registrations that are exact duplicates, the USPTO will permit only one application to mature into registration, and will refuse registration in the other application. 37 C.F.R. §2.48. For instance, if two identical applications are filed by an applicant, and the USPTO has not taken action in either application, then the USPTO will refuse registration in both applications. However, if the USPTO has already taken action in one of the applications but not the other, then the USPTO will refuse registration in the second application.

The applicant may overcome the refusal(s) by abandoning one of the applications. If practicable, the USPTO will permit the applicant to choose which application should mature into registration. If one of the applications has matured into registration, the applicant may choose to either surrender the registration and allow the application to proceed to registration, or retain the registration and abandon the application.

*Basis.* Applications filed under or amended to §1 of the Trademark Act would result in duplicate registrations if the only difference between them is that one is based on use in commerce under §1(a) and the other is based on intent-to-use under §1(b). However, an application filed under §1 and an application filed under §44 that are otherwise identical would not result in duplicate registrations, nor would an application under §66(a) of the Trademark Act that is otherwise identical to an application filed under §1 or §44.

*Classification Change.* Where the international classification of goods/services has changed, a new application for registration of the same mark for the same goods/services in a different class will not result in a duplicate registration. For example, if applicant owns a registration of a mark for legal services in Class 42, and files a new application after January 1, 2007, for registration of the same mark for legal services in Class 45, this is not a duplicate.

*Standard Character/Typed Drawing.* An application for registration of a mark depicted in standard characters would result in a duplicate registration of an application of the same mark in “typed” format ( *see* [TMEP §807.03\(g\)](#)) for the same goods/services.

*Standard Character/Special Form.* A standard character drawing and a special form drawing of the same mark would not result in duplicate registrations.

*Overlapping Goods/Services.* Applications/registrations with identifications that include some of the same goods/services, but also different goods/services, would not result in duplicate registrations.

*Color.* A drawing in which the entire mark is lined for color ( *see* [TMEP §808.01\(b\)](#)), would result in a duplicate registration of a color drawing of the mark, if the colors are identical. See [TMEP §§807.07–807.07\(g\)](#) regarding color drawings.

If the applicant claims different shades of a color (e.g., purple in one and lavender in the other), any resulting registrations are not duplicates.

Where one application/registration is not completely lined for color (i.e., if the mark on the drawing includes color(s) in addition to unclaimed or unexplained black, white, and/or gray), this would not result in a duplicate

registration of an application seeking registration that includes a claim of the same color(s) in addition to a claim of color for, or an explanation of the presence of, the black/white/gray in the drawing. See [TMEP §§807.07\(d\)–807.07\(d\)\(iii\)](#) regarding drawings that include black/white/gray.

*Principal/Supplemental Register.* An application for registration of a mark on the Principal Register would not result in a duplicate of an application for registration of the same mark on the Supplemental Register.

*Registrations Issued Under Prior Acts.* If eligible, marks registered under the Acts of 1881, 1905, and 1920 may also be registered under the Act of 1946 ( *see* §46(b) of the Trademark Act of 1946). Even if the mark and the goods/services in a registration issued under the 1946 Act are identical to the mark and goods/services in a registration issued under a prior Act, the registrations are not considered duplicates. See [TMEP §§1601.04, 1601.05, 1602.02, and 1602.03](#) regarding registrations issued under prior Acts.

*Section 66(a) Application Based on Different Int'l Registration.* A §66(a) application would not result in a duplicate registration of another §66(a) application or registered extension of protection based on a different international registration.

When an application is a duplicate of a registration owned by the applicant, and USPTO records show that the registration is still active, the examining attorney must refuse registration. If the registration is subject to cancellation for failure to file an affidavit of continued use or excusable nonuse under 15 U.S.C. §1058 or §1141k, or due to expire for failure to file a renewal application under 15 U.S.C. §1059 (i.e., because the grace period has passed and no affidavit or renewal application has been filed), and the application is otherwise in condition for approval or final refusal, the examining attorney must suspend the application until the Trademark database is updated to show that the registration is cancelled or expired. See [TMEP §1611](#) for information about how the owner of a registration who has not timely filed a §8 or §71 affidavit or declaration or §9 renewal application may expedite the cancellation or expiration of its own registration.

## 704 Initial Examination

### 704.01 Initial Examination Must Be Complete

#### *37 CFR §2.61(a)*

Applications for registration, including amendments to allege use under section 1(c) of the Act, and statements of use under section 1(d) of the Act, will be examined and, if the applicant is found not entitled to registration for any reason, applicant will be notified and advised of the reasons therefor and of any formal requirements or objections.

The initial examination of an application by the examining attorney must be a *complete* examination. A complete examination includes a search for conflicting marks and an examination of the written application, any voluntary amendment(s) or other documents filed by applicant before an initial Office action is issued, the drawing, and any specimen(s) or foreign registration(s), to determine whether the mark is eligible for the type of registration requested, whether amendment is necessary, and whether all required fees have been paid.

If, on initial examination, the examining attorney finds the mark in an application for registration on the Principal Register to be in condition for publication for opposition, the examining attorney will approve the application for publication. Similarly, if the examining attorney finds the mark in an application for registration on the Supplemental Register to be in condition for registration, the examining attorney will approve the application for registration. The USPTO will send a notice of publication or certificate of registration to the applicant in due course.

If the application is not in condition to be approved for publication or issue, the examining attorney will write, telephone, or e-mail the applicant, as appropriate, informing the applicant of the reason(s) why the mark may not be registered and of the defect(s) that can be corrected or amended to make the application acceptable.

The examining attorney's first Office action must be complete, so the applicant will be advised of all requirements for amendment and all grounds for refusal, with the exception of use-related issues that are considered for the first time in the examination of an amendment to allege use under 15 U.S.C. §1051(c) or a statement of use under 15 U.S.C. §1051(d) in an intent-to-use application. See [TMEP §§1102.01 and 1202–1202.16\(c\)\(v\)\(B\)](#) regarding use-related issues that may be considered for the first time in the examination of an amendment to allege use or a statement of use. Every effort should be made to avoid piecemeal prosecution, because it prolongs the time needed to dispose of an application. See also [TMEP §706](#) regarding new issues raised by the examining attorney after the first Office action.

Examining attorneys must also clearly explain all refusals and requirements. For example, if the identification of goods/services is indefinite, the examining attorney must explain why the identification is not acceptable and, if possible, suggest an acceptable identification. See [TMEP §§705–705.08](#) for further information about examining attorneys' Office actions.

### **704.02 Examining Attorney's Search**

If the examining attorney finds no conflicting marks, but must write to the applicant about other matters, the examining attorney must inform the applicant that no conflicting marks have been found. This is commonly called the "search clause."

In an application filed under §1 or §44 of the Trademark Act, if the examining attorney cannot make a proper search or cannot examine the application properly due to a lack of adequate information, the examining attorney must specifically indicate what information is needed, request that it be furnished, and state that further action on the matter will be taken as soon as the information is received. See 37 C.F.R. §2.61(b) and [TMEP §814](#) regarding requirements for additional information.

If some but not all of the goods/services in a §66(a) application are so indefinite that the examining attorney cannot make a proper search, the examining attorney may defer the search in part. The examining attorney must specifically indicate the good/services for which a search has been conducted by listing the goods/services for which no conflicting marks have been found, and, if relevant, issuing a §2(d) refusal that is specifically limited to certain goods/services. See [TMEP §718.02\(a\)](#) regarding partial refusals.

If all the goods/services in a §66(a) application are so indefinite that the examining attorney cannot make a proper search, the examining attorney may defer the search. The examining attorney must issue a full refusal, require the necessary amendments to the goods/services, and state that further action on the merits with respect to likelihood of confusion will be considered as soon as a sufficiently definite identification of goods/services is received.

Before issuing a letter deferring action, the examining attorney should consult with the managing attorney or senior attorney.

### **704.03 Supervisory Examining Attorney May Indicate Action for Non-Signatory Examining Attorney**

When a non-signatory examining attorney examines an application, a supervisory examining attorney must thoroughly review the action. The usual procedure is for the non-signatory examining attorney to explain relevant information to the supervisory examining attorney, discussing any potential refusals or requirements. The supervisory examining attorney may indicate the action to be taken.

## **705 The Examining Attorney's Letter or Action**

If an examining attorney determines that a mark is not entitled to registration, or that amendment is required, the examining attorney will notify the applicant in a written Office action, or by e-mail or telephone communication, which is typically followed by a written action. This constitutes the examining attorney's official action.

Written Office actions may be of a variety of styles, including: (1) an "examiner's amendment" ( *see* [TMPEP §§707–707.03](#)), in which the examining attorney formally makes amendments to the application; (2) a "priority action" ( *see* [TMPEP §§708–708.05](#)), setting forth and explaining the requirements discussed by telephone with the individual applicant, someone with legal authority to bind a juristic applicant (e.g., a corporate officer or general partner of a partnership), or with a practitioner authorized to practice before the USPTO pursuant to 37 C.F.R. §11.14 ("qualified practitioner") designated by the applicant; (3) a letter explaining the bases for refusal(s) or requirement(s); (4) an examiner's amendment combined with a priority action ( *see* [TMPEP §708.05](#)); or (5) a suspension notice ( *see* [TMPEP §§716–716.06](#)). Office actions may be prepared through the use of standardized form paragraphs, in combination with language written to address the particular facts relevant to the refusal(s) or requirement(s). The examining attorney may send the Office action by regular mail or e-mail (if applicant has authorized e-mail communications). See [TMPEP §§304–304.09](#) regarding e-mail.

The USPTO encourages the use of examiner's amendments and priority actions whenever appropriate.

### **705.01 Language in Examining Attorney's Letter**

The examining attorney must indicate the status of the application at the beginning of each letter.

In first actions, this may be done by stating that the examining attorney has reviewed the application and made the determinations that follow, or by using language such as "Upon examination of this application..."

The examining attorney must acknowledge any document received before the first action by identifying the document and the date of its receipt.

In subsequent actions, examining attorneys should begin letters with a sentence such as, "This Office action is in response to applicant's communication filed on [date]." Other documents received, such as supplemental amendments, affidavits, and new drawings, should also be acknowledged.

Refusals to register should be couched in the statutory language of the section of the Trademark Act that is the basis of the refusal, and the examining attorney must cite the appropriate section of the Act. For example,

registration of a trademark should not be refused “because it is a surname,” but “because it *consists of matter that is primarily merely a surname under §2(e)(4) of the Trademark Act.*”

Registration must be refused only as to the specific register (i.e., Principal or Supplemental) for which registration is requested. However, when refusing registration on the Principal Register, the examining attorney should also state, to the extent possible, whether the record indicates that an amendment to the Supplemental Register or to seek registration on the Principal Register under §2(f) may be appropriate.

The words “capable” and “incapable” should be reserved for addressing an amendment to the Supplemental Register.

Examining attorneys are encouraged to use form paragraphs to accelerate the preparation of Office actions and increase the uniformity of the substance and appearance of these actions. However, examining attorneys should use the form paragraphs only if they apply to a particular situation, and should expand on the form paragraphs when necessary to explain and support the relevant requirements or refusals.

### **705.02 Examining Attorneys Should Not Volunteer Statements**

In Office actions, and e-mail and telephone communications, examining attorneys should not volunteer statements about applicants’ rights that are gratuitous and unnecessary to the examination of the matters presented in applications. The examining attorney’s responsibility is limited to evaluating the registrability of the mark presented in the application. *See In re Am. Physical Fitness Research Inst. Inc.*, 181 USPQ 127, 127-28 (TTAB 1974). *See also* [TMEP §1801](#).

### **705.03 Citation of Conflicting Marks**

When refusing registration under §2(d) of the Trademark Act, 15 U.S.C. §1052(d), based on a likelihood of confusion with a previously registered mark, the examining attorney must give the registration number(s) and attach to the Office action a copy of each cited registration, which will become part of the record. The examining attorney should explain the reasons that the mark in each cited registration is a basis for refusal under §2(d).

If an applicant notifies the USPTO that the USPTO failed to attach a cited registration, or that the USPTO attached a registration but did not cite the registration as a bar to registration in the Office action, the USPTO will reissue the Office action citing and attaching the relevant registration(s) and provide the applicant with a new response period.

### **705.04 Reference to Matter in Printed or Online Publications**

When the examining attorney refers to matter in a printed publication, the examining attorney should provide the citation for the publication, and include the relevant material with the Office action. It is not necessary to attach a published legal decision to an Office action. A citation is sufficient. *See* [TMEP §705.05](#) regarding citation of decisions.

When the examining attorney refers to an online publication, such as an article downloaded from the Internet, the examining attorney should provide any information that would aid a party in locating the document, including the complete URL address of the website, the time and date the search was conducted, and the

terms searched. See [TMEP §710.01\(b\)](#) for a discussion of the weight accorded to Internet evidence. See also [TMEP §710.01\(a\)](#) regarding evidence from a research database.

## 705.05 Citation of Decisions and USPTO Publications

When citing court or administrative decisions, the *United States Patents Quarterly* (USPQ or USPQ2d) citation should be given. If possible, a parallel citation to the United States Reports (U.S.), Federal Reporter (F., F.2d, or F.3d), or Federal Supplement (F. Supp. or F. Supp.2d) should also be given. The court or tribunal (2d Cir., C.C.P.A., Fed. Cir., TTAB, etc.) and the date of the decision should always be given.

When citing to a decision that is published and reported only in LexisNexis® and/or Westlaw®, for which there are no official print versions, the citing party should provide the name of the research service, case name, proceeding name and docket number, database identifier, court name, date, and screen, page, or paragraph numbers, if assigned. When citing to an unpublished decision of the Board, the examining attorney must either provide the Board's [TTABVUE](#) website address and explain how the applicant may locate and view the decision, or append the decision to the Office action.

*Non-Precedential Decisions.* Prior to December 27, 2006, it was the policy of the Trademark Trial and Appeal Board that Board opinions not designated as precedential should not be cited and, if cited, were to be disregarded. *Gen. Mills Inc. v. Health Valley Foods*, 24 USPQ2d 1270, 1275 n.9 (TTAB 1992). The Board has changed that policy. In announcing the change, the Board stated that:

[T]he Board will henceforth permit citation to any TTAB disposition as follows:

- The TTAB will continue its current practice of designating all final decisions as either precedential or not precedential. Unless specifically designated as precedential, an order on a motion should be considered not precedential.
- The TTAB will continue its practice of considering precedential decisions as binding upon the TTAB.
- A decision designated as not precedential is not binding upon the TTAB but may be cited for whatever persuasive value it might have.
- Citation to all TTAB decisions should be to the *United States Patent Quarterly*, if the decision appears therein; otherwise, to a USPTO public electronic database. If a non-precedential decision does not appear in the *United States Patent Quarterly* or the USPTO's public electronic databases, the citing party should append a copy of the decision to the motion or brief in which the decision is cited.
- Decisions of other tribunals may be cited to the extent allowed and for the purposes permitted by the tribunal that issued the decision.

[Citation of Opinions to the Trademark Trial and Appeal Board](#), OG Notice ( Jan. 23, 2007).

The examining attorney may cite sections of the *Trademark Manual of Examining Procedure* ("TMEP") or [Trademark Trial and Appeal Board Manual of Procedure](#) ("TBMP"). The abbreviations "TMEP" and "TBMP" are usually sufficient; however, if the person prosecuting the application appears to be unfamiliar with USPTO practice, the examining attorney should identify the Manuals by their full names in the first citation to the Manuals. It is not necessary to provide a copy of the relevant section(s) of the Manuals.

When the examining attorney cites a Director's order or notice, the examining attorney should provide the title and date of the notice, and the specific issue of the *Official Gazette* in which it may be found.

### **705.06 Reviewing and Signing of Letters**

Examining attorneys must review and sign every Office action using an electronic signature. The signature block should include the name, law office, telephone number, and e-mail address of the examining attorney. The signature block should be set forth as follows:

/Examining attorney's full name/  
Trademark Examining Attorney  
Law Office xxx  
(571) 272-xxxx  
\_\_\_\_\_@uspto.gov

If an examining attorney does not have signatory authority, he or she must sign the action and refer it to an authorized signatory examining attorney, who will review and approve the action. Review by a reviewer should ordinarily be done within two working days after receipt from the non-signatory examining attorney.

### **705.07 Processing Outgoing Office Actions**

A date is placed on all copies of paper Office actions when they are issued. For outgoing e-mail communications, including electronically issued Office actions, the date is applied automatically when the communication is released to the USPTO's electronic mail system.

One copy of the action signed by the examining attorney, along with any supporting evidence and/or copies of registered marks or pending applications cited as a bar to registration, is sent to the Trademark Image Capture and Retrieval System ("TICRS") and is available for review by the public through the Trademark Status and Document Retrieval ("TSDR") portal on the USPTO website at <http://tsdr.uspto.gov/>.

An applicant who authorizes e-mail communication will not receive the actual Office action by e-mail. Instead, upon issuance of the Office action, the USPTO will e-mail a notice to the applicant with a link or web address to access the Office action using TSDR. The Office action will not be attached to the e-mail notice. Upon receipt of the e-mail notice, the applicant may use the link or web address to view and print the actual Office action and any evidentiary attachments.

### **705.08 Six-Month Response Clause**

Generally, the examining attorney's letter or Office action should include a "six-month response clause" notifying the applicant that the applicant must respond to the action within six months of the issuance date to avoid abandonment under 15 U.S.C. §1062(b). See [TMEP §§711-711.02](#) regarding the deadline for response to an Office action.

The examining attorney must *not* include a six-month response clause in an examiner's amendment (see [TMPEP §§707–707.03](#)) or suspension notice (see [TMPEP §§716–716.06](#)), or in a situation where the time for response runs from the issuance date of a previous Office action (see [TMPEP §§711.01](#), [715.03\(c\)](#)).

## 706 New Matter Raised by Examining Attorney After First Action

If in the first Office action an examining attorney inadvertently failed to refuse registration on a clearly applicable ground or to make a necessary requirement, the examining attorney must take appropriate action to correct the inadvertent error in a subsequent action. Examining attorneys should exercise great care to avoid these situations, and should take this step only when the failure to do so would result in clear error (see [TMPEP §706.01](#)). After the first action, supervisors (e.g., supervisors reviewing the quality of the examining attorney's work) should not introduce any new reason for refusal that is not clearly justified under the Act or rules.

Since it is unusual to make a new refusal or requirement that could have been raised in the first action, an examining attorney who does make a new refusal or requirement must clearly explain why the refusal or requirement is necessary, and apologize for the delay in raising the issue, if appropriate. See [TMPEP §711.02](#) regarding supplemental Office actions.

Sometimes, the examining attorney must issue a new refusal or requirement because the applicant submits information that raises a new issue.

In a §66(a) application, the examining attorney cannot issue a new refusal more than 18 months after the date on which the International Bureau of the World Intellectual Property Organization (“IB”) forwards the request for extension of protection to the USPTO. Thus, if the examining attorney determines that a new ground of refusal exists, a second Office action raising this new ground may be issued only if time remains in the 18-month period. In such a case, the examining attorney must contact the Madrid Processing Unit (“MPU”) upon issuance of the Office action, so that a notification of the new ground of refusal can be sent to the IB. See [TMPEP §1904.03\(a\)](#).

### 706.01 “Clear Error”

The term “clear error” refers to an administrative internal guideline used by the USPTO to determine whether an examining attorney should issue a refusal or requirement that could or should have been raised in a previous action.

It is the policy of the USPTO to do a complete examination upon initial review of an application by an examining attorney, and to issue all possible refusals and requirements in the first Office action. See [TMPEP §704.01](#). The USPTO will not issue a new refusal or requirement that could or should have been made in an earlier Office action unless it is necessary to do so to prevent the issuance of a registration that would violate the Trademark Act or applicable rules. See, e.g., [TMPEP §706](#). For example, if evidence is discovered, after publication, that clearly demonstrates the proposed mark is a generic identifier for the goods, registration on either the Principal or Supplemental Register would be in violation of the Trademark Act and the Director will restore jurisdiction to the examining attorney to issue a new refusal of registration. See [TMPEP §1504.04](#). See also [TMPEP §1109.08](#) regarding the issuance of refusals and requirements during examination of a statement of use that could or should have been issued during initial examination of the application.

The internal “clear error” standard is merely an administrative guideline. It does not confer on an applicant any entitlement to a showing of clear error, nor does it impose a higher standard of proof on the examining attorney than is otherwise required to establish a prima facie case for the refusal or requirement.

Except as provided in 15 U.S.C. §1141h(c)(4), there is no restriction in the Trademark Act or Trademark Rules of Practice as to the period of time prior to registration when the USPTO may issue a new requirement or new refusal. The USPTO has a duty to issue valid registrations and has broad authority to correct errors made by examining attorneys and other USPTO employees. *See Last Best Beef LLC v. Dudas*, 506 F.3d 333, 340, 84 USPQ2d 1699, 1704 (4th Cir. 2007) (“[F]ederal agencies, including the USPTO, have broad authority to correct their prior errors.”); *see also BlackLight Power Inc. v. Rogan*, 295 F.3d 1269, 63 USPQ2d 1534 (Fed. Cir. 2002) (affirming that USPTO officials acted within their authority in a reasonable manner when withdrawing a patent from issuance in order to fulfill the USPTO’s mission to issue valid patents, even after Notice of Allowance, payment of the issue fee, and notification of the issue date, and with publication of the drawing and claim in the *Official Gazette*). Thus, if the USPTO discovers that a mistake made during examination would result in issuance of a registration in violation of the Trademark Act or applicable rules, the USPTO must issue any necessary requirements or refusals, even if they could or should have been previously raised.

The question of whether a refusal or requirement was procedurally proper is reviewable on petition under 37 C.F.R. §2.146. However, “[q]uestions of substance arising during the ex parte prosecution of applications, including, but not limited to, questions arising under sections 2, 3, 4, 5, 6 and 23 of the Act of 1946, are not considered to be appropriate subject matter for petitions to the Director.” 37 C.F.R. §2.146(b). Thus, the Director cannot consider on petition whether the issuance of or failure to issue a substantive refusal was a “clear error.” See [TMEP §1704](#) regarding petitionable subject matter, and [TMEP §1706](#) regarding the standard of review on petition.

On appeal, the Trademark Trial and Appeal Board will review only the correctness of the underlying substantive refusal of registration. *See In re Jump Designs, LLC*, 80 USPQ2d 1370, 1373-74 (TTAB 2006); *In re Sambado & Son, Inc.*, 45 USPQ2d 1312, 1314-15 (TTAB 1997).

## 707 Examiner’s Amendment

An examiner’s amendment should be used whenever appropriate to expedite prosecution of an application. An examiner’s amendment is a communication to the applicant in which the examining attorney states that the application has been amended in a specified way. Except in the situations listed in [TMEP §707.02](#), the amendment must be specifically authorized by the individual applicant, someone with legal authority to bind a juristic applicant (e.g., a corporate officer or general partner of a partnership), or the applicant’s qualified practitioner. *Cf.* 37 C.F.R. §§2.62(b), 2.74(b). See [TMEP §707.01](#) regarding the authorization of an examiner’s amendment. Authorization is usually given in a telephone conversation, e-mail communication, or interview between the examining attorney and the applicant or the applicant’s qualified practitioner. See [TMEP §§304–304.09](#) regarding e-mail.

The examining attorney may issue an examiner’s amendment whenever the required amendment does not have to be verified by the applicant. For example, in appropriate circumstances, an examiner’s amendment may be used to amend the identification of goods/services, enter a disclaimer, add the state of incorporation, or amend from the Principal to the Supplemental Register.

The following are examples of amendments that may *not* be made by examiner’s amendment: the dates of use, if verification would be required ( *see* [TMEP §903.04](#)); the mark on a special-form drawing ( *see* [TMEP §§807.04–807.04\(b\)](#)), if the changes would require the filing of a substitute special form drawing;

and amendments that require the submission of substitute specimen(s) ( *see* [TMEP §904.05](#)). An application cannot be expressly abandoned by examiner's amendment ( *see* [TMEP §718.01](#)).

An authorization to charge a fee to a deposit account cannot be entered by examiner's amendment, unless the record already contains a written authorization, signed and submitted by someone authorized to charge fees to the account. See [TMEP §405.03](#) regarding deposit accounts.

Examiner's amendments generally are not used when there are statutory refusals. However, if there is a potential statutory refusal, and an amendment will obviate the refusal, the examining attorney may attempt to resolve the issues through an examiner's amendment.

*Example:* If the applicant could overcome a surname refusal for a mark that is in use in commerce by amending to the Supplemental Register, the examining attorney may initiate telephone or e-mail contact and suggest the amendment. If the applicant authorizes the amendment, the examining attorney may issue an examiner's amendment amending the application to the Supplemental Register.

*Example:* If the mark contains the term "organic" and the applicant could overcome a potential deceptiveness refusal by amending the identification to state that the goods are organic, the examining attorney may initiate telephone or e-mail contact and suggest the amendment. If the applicant authorizes the amendment, the examining attorney may issue an examiner's amendment amending the identification.

*Example:* If the applicant could overcome a likelihood-of-confusion refusal as to several registrations by amending a vague or indefinite identification of goods/services, the examining attorney may initiate telephone or e-mail contact and suggest the amendment only if it would obviate the refusals as to all the registrations that would be cited. If the applicant agrees to the proposed amendment clarifying the identification, the examining attorney may issue an examiner's amendment. If the applicant does not agree with the examining attorney's suggested identification and proposes an amendment that would obviate the refusal as to some, but not all, of registrations, the examining attorney may issue a combined examiner's amendment/priority action. See [TMEP §708.05](#). However, when it is clear from the outset that amending the identification would not obviate the refusal as to one or more of the registrations, the examining attorney must not initiate telephone or e-mail contact, because it is not possible to offer the applicant a specific action to place the application in condition for publication, suspension, or registration.

*Example:* If the identification is vague or indefinite, the examining attorney may seek authorization to amend the identification by examiner's amendment, even when the amendment would not overcome a potential likelihood-of-confusion refusal. The examining attorney would then issue a notice of suspension. To ensure that the applicant understands that amending the identification will only put the application in condition for suspension, during the telephone or e-mail discussion, the examining attorney must notify the applicant of the prior pending application and the forthcoming suspension. The resulting examiner's amendment should also include this information.

See [TMEP §708.04](#) regarding priority actions involving statutory refusals.

An examining attorney without partial signatory authority must have proper authorization from the managing attorney, senior attorney, or a reviewing examining attorney before initiating an examiner's amendment.

See [TMEP §707.03](#) regarding the form of an examiner's amendment.

An applicant should **not** file correspondence confirming an examiner's amendment, because this will delay processing of the application. A written response to an examiner's amendment is not required.

If an applicant wishes to object to the examiner's amendment, this should be done immediately (preferably by telephone or e-mail), so that the objection can be considered before publication or issue. See [TMEP §1402.07\(e\)](#) regarding an applicant's objection to an examiner's amendment of the identification of goods/services on the ground that the examiner's amendment does not reflect the agreement between the applicant and the examining attorney.

Often an applicant will seek to respond to an outstanding Office action with an amendment or other response by telephone. The examining attorney is encouraged to enter an examiner's amendment if this amendment will immediately place the application in condition for publication for opposition, issuance of a registration, or suspension. See [TMEP §§716–716.06](#) regarding suspension. However, an applicant does not have an

unlimited right to the entry of an examiner's amendment in response to an Office action. If the applicant does not agree to an amendment that the examining attorney believes will immediately place the application in condition for publication for opposition or issuance of a registration, the applicant must file a complete written response to the outstanding Office action.

See [TMEP §708.05](#) regarding combined examiner's amendment/priority actions.

*NOTE:* In a §66(a) application, an examiner's amendment may *not* be issued on first action because the IB will not accept such amendments. Examiner's amendments may be issued on second and subsequent actions. See [TMEP §1904.02\(h\)](#) regarding Office actions in §66(a) applications.

### **707.01 Approval of Examiner's Amendment by Applicant or Applicant's Attorney**

Except in the situations set forth in [TMEP §707.02](#) in which an examiner's amendment is permitted without prior authorization by the applicant, an examining attorney may amend an application by examiner's amendment only after securing approval of the amendment from the individual applicant, someone with legal authority to bind a juristic applicant, or the applicant's qualified practitioner by telephone, e-mail, or in person during an interview. *Cf.* 37 C.F.R. §§2.62(b), 2.74(b). See TMEP §§[304.01](#), [304.02](#), [602](#), [709.01-709.05](#).

If the applicant is represented by a qualified practitioner, the examining attorney must communicate directly with the practitioner by phone or e-mail. If a qualified practitioner from the same firm as the qualified practitioner of record claims to be authorized by the practitioner of record to conduct business and approve amendments with respect to a specific application, the examining attorney will permit the practitioner to conduct business, and will note this fact in the examiner's amendment. Paralegals and legal assistants cannot authorize examiner's amendments, even if only conveying the appointed qualified practitioner's approval by indicating that the practitioner has approved the amendment.

If the applicant is pro se, the examining attorney must communicate directly with the individual applicant or with someone with legal authority to bind a juristic applicant (e.g., a corporate officer or general partner of a partnership). *Cf.* 37 C.F.R. §11.14(e). For joint applicants who are not represented by a qualified practitioner, each joint applicant must authorize the examiner's amendment. See [TMEP §§611.06–611.06\(h\)](#) for guidelines on persons who have legal authority to bind various types of applicants.

A non-attorney who is authorized to verify facts on behalf of an applicant under 37 C.F.R. §2.193(e)(1) is *not* entitled to authorize an examiner's amendment, unless he or she has legal authority to bind the applicant. The broad definition of "person properly authorized to sign on behalf of the applicant" in 37 C.F.R. §2.193(e)(1) ( *see* [TMEP §§611.03\(a\)](#), [804.04](#) ) does not apply to examiner's amendments.

The applicant or the applicant's qualified practitioner must actually authorize the examiner's amendment. The examining attorney may not leave an e-mail or voicemail message for the applicant or the qualified practitioner indicating that an amendment shall be entered if the applicant or practitioner does not respond to the message.

If an examining attorney contacts an applicant and reaches agreement to issue an examiner's amendment, but later determines that an Office action must be issued instead to state a refusal or requirement, the examining attorney should telephone or e-mail the applicant immediately to advise the applicant of the change of position.

Examining attorneys without partial signatory authority must advise applicants that issuance of the examiner's amendment is subject to review by a supervisory attorney.

### **707.02 Examiner's Amendment Without Prior Authorization by Applicant or Applicant's Attorney**

Examining attorneys have the discretion to amend applications by examiner's amendment without prior approval by the applicant or the applicant's qualified practitioner (sometimes referred to as a "no-call" examiner's amendment) in the following situations:

(1) In applications under §1 or §44, changes to international classification, either before or after publication ( *see Groening v. Mo. Botanical Garden*, 59 USPQ2d 1601, 1603 (Comm'r Pats. 1999));

(2) Deletion of "TM," "SM," "©," or "®" from the drawing;

(3) Addition of a description of the mark where an Office action or regular examiner's amendment is otherwise unnecessary *and* one of the following conditions applies:

(a) The record already contains an informal indication of what the mark comprises ( *see TMEP §808.03(b)*); *Example* - The cover letter accompanying a paper application refers to the mark as a stylized golf ball design. If appropriate, the examining attorney could enter an amendment that "the mark consists of the stylized design of a golf ball." *Example* - The application refers to the mark as a blue, red, and yellow ball and includes an accurate and properly worded color claim listing all colors in the mark, but the color yellow is omitted from the formal description of the colors in the mark ( *see TMEP §807.07(a)(ii)*). The examining attorney may enter an amendment of the formal color description to accurately reflect all colors in the mark;

(b) The mark consists only of wording in stylized font, with no color claim and with no design element, and the applicant did not provide the "literal element" of the mark in the appropriate field ( *see TMEP §808.03(b)*); or

(c) The mark includes no color claim and consists only of wording in combination with underlining or a common geometric shape used as a vehicle for the display of the wording ( *see TMEP §808.03(b)*).

(4) If the examining attorney determines that a description of the mark will not be printed in the *Official Gazette* or on the registration certificate, and it is unnecessary to issue an Office action or a regular examiner's amendment regarding other matters, the examining attorney may enter a Note to the File in the record or issue a "no-call" amendment to that effect. *See TMEP §808.03*;

(5) In applications under §1, amendment of the application to enter a standard character claim when the record clearly indicates that the drawing is intended to be in standard character form. *See TMEP §807.03(g)*;

(6) Correction of obvious misspellings, typographical errors, and redundancies in the identification of goods/services, or in an otherwise accurate and complete description of the mark. *See TMEP §§808.03(a), 1402.01(a)*; *Example* - The goods are identified as "T-shurtz." The examining attorney may amend to "T-shirts." However, "shurtz" may not be amended to "shirts" without calling the applicant, because "shurtz" (without the "T-" prefix) might also be a misspelling of "shorts."

(7) When an applicant fails to respond to a refusal or requirement that is expressly limited to only certain goods, services, and/or class(es), the examining attorney may issue an examiner's amendment deleting the goods/services/classes to which the refusal or requirement pertained. Similarly, when an applicant fails to respond to a requirement to amend some terminology in an otherwise acceptable identification of goods/services, the examining attorney may issue an examiner's amendment deleting the unacceptable terminology from the identification. *See TMEP §§718.02(a), 1402.13*;

(8) In applications under §1 or §44, deletion of bracketed material from an entry taken from the USPTO's [\*Acceptable Identification of Goods and Services Manual\*](#). Bracketed material sometimes appears in the Manual for informational purposes but should not be included in an identification of goods/services. If this material is entered in an identification, it will be automatically deleted in a TEAS Plus application. In a

TEAS or paper application, the examining attorney may delete the bracketed material with a “no-call” examiner’s amendment;

(9) If, in response to a general or specific inquiry about translation and/or transliteration of non-English wording in the mark, the applicant does not directly state that the term has no meaning in a foreign language but instead responds to the effect that “the mark has only trademark significance,” the examining attorney may enter a statement that “the term has no meaning in a foreign language” into the record. See [TMEP §809.01\(a\)](#);

(10) When an applicant provides a translation statement that has the proper translation but is in a format that is not suitable for printing, the examining attorney may “reformat” the statement, without changing the substance, into a simple, clear statement as to meaning. See [TMEP §809.03](#).

(11) When an application includes foreign wording that is not translated, and a translation of the same foreign wording appears in a prior registration for which the applicant has claimed ownership, and the translation is acceptable to the examining attorney, the examining attorney may enter the identical translation into the record. Note: If the application was filed using the TEAS Plus form and the translation was omitted, the examining attorney may not issue an examiner’s amendment without prior authorization. The examining attorney must take appropriate action requiring the translation and the additional TEAS Plus processing fee. 37 C.F.R. §§2.6(a)(1)(iv), 2.22(a)(16), (b); TMEP §§819.01, 819.01(m).

If the examining attorney must contact the applicant or the applicant’s qualified practitioner about other matters, or if the record contains any ambiguity as to the applicant’s intent, the examining attorney should advise the applicant that the above changes have been made.

If the applicant has authorized e-mail communication with the USPTO, the applicant will receive an e-mail notification when an examiner’s amendment is issued. The applicant may then view and/or print the examiner’s amendment from the USPTO website. If the applicant has not authorized e-mail communication with the USPTO, a copy of the examiner’s amendment will be sent to the applicant. Any applicant who disagrees with any of these changes should contact the examining attorney immediately after reviewing or receipt of the examiner’s amendment, preferably by telephone or e-mail.

*Note:* In a §66(a) application, an examiner’s amendment may not be issued on first action because the IB will not accept such amendments. Examiner’s amendments may be issued on second and subsequent actions. See [TMEP §1904.02\(h\)](#) regarding Office actions in §66(a) applications.

### **707.03 Form of the Examiner’s Amendment**

An examiner’s amendment should include the following information: the name, law office, telephone number, and e-mail address of the examining attorney; the name of the person interviewed; the date of the interview; the actual amendment; and, if applicable, a statement to the effect that the amendment has been authorized by the applicant or the applicant’s qualified practitioner.

The examiner’s amendment must not include a six-month response clause, because a written response by the applicant is not required for an examiner’s amendment.

The examiner’s amendment must include a search clause ( see [TMEP §704.02](#) ) if it is a first action, or if the applicant has not previously been advised of the results of a search.

The examining attorney must not state in the examiner’s amendment that the application is ready for publication or issue, because some unforeseen circumstance might require that further action be taken in the application.

The examiner's amendment must indicate any refusals or requirements that are withdrawn and/or continued by the examining attorney.

## 708 Priority Action

### 708.01 Priority Action Defined

A "priority action" is an Office action that is issued following a telephone conversation, personal interview, or e-mail communication in which the examining attorney and the individual applicant, someone with legal authority to bind a juristic applicant (e.g., a corporate officer or general partner of a partnership), or the applicant's qualified practitioner discuss the various issues raised in an application and what actions the applicant must take to put the application in condition for publication or registration. A priority action is generally used when the action requires verification by the applicant. The use of priority actions is encouraged to expedite examination.

A priority action should be issued according to the following procedure: (1) the examining attorney telephones or e-mails the applicant or applicant's qualified practitioner and requests that the applicant take some specific action, explaining the reasons; (2) the applicant or applicant's qualified practitioner specifically discusses the merits of the application with the examining attorney; (3) the examining attorney prepares and signs a priority action that fully discusses all refusals or requirements, includes evidence to support the refusals and/or requirements, and specifically describes what action the applicant may take in order to put the application into condition for publication or registration; and (4) the USPTO sends a copy of the priority action to the applicant.

If the evidence of record supports a statutory refusal of registration, a priority action may be issued only if the examining attorney believes that an amendment or explanation will obviate the refusal. See [TMEP §708.04](#).

See [TMEP §708.03](#) regarding the form of a priority action.

*Note:* In a §66(a) application, an examining attorney may issue a priority action as a first action. See [TMEP §1904.02\(h\)](#) regarding Office actions in §66(a) applications.

### 708.02 Discussion of Issues and Agreements

The examining attorney must discuss the issues with the individual applicant, a person with legal authority to bind a juristic applicant, or the applicant's qualified practitioner. The broad definition of "person properly authorized to sign on behalf of the applicant" in 37 C.F.R. §2.193(e)(1) ( see [TMEP §§611.03\(a\)](#), [804.04](#)) does not apply to priority actions.

Only the applicant, someone with legal authority to bind the applicant, or a qualified practitioner can agree to a priority action. If the applicant is represented by a qualified practitioner, the examining attorney must speak directly to the practitioner. See [TMEP §§602–602.03\(e\)](#) for guidelines on persons authorized to practice before the USPTO in trademark matters.

If a qualified practitioner from the same firm as the qualified practitioner of record claims to be authorized by the qualified practitioner of record to conduct business and approve amendments with respect to a specific application, the examining attorney will permit the practitioner to authorize issuance of the priority action, and will note this fact in the priority action.

Paralegals and legal assistants cannot authorize issuance of a priority action, even if only conveying the qualified practitioner's approval by indicating that the practitioner has agreed to the priority action.

If the applicant is pro se, the examining attorney must speak directly to the individual applicant or to someone with legal authority to bind a juristic applicant (e.g., a corporate officer or general partner of a partnership).

*Cf.* 37 C.F.R. §11.14(e). See [TMPEP §§611.06–611.06\(h\)](#) for guidelines on persons who have legal authority to bind various types of applicants.

A non-attorney who is authorized to verify facts on behalf of an applicant under 37 C.F.R. §2.193(e)(1) may not authorize issuance of a priority action, unless he or she also has legal authority to bind the applicant.

During the telephone conversation, e-mail discussion, or other communication, the examining attorney must fully discuss all refusals and requirements relating to the application, and explain the reason(s) for each refusal or requirement. Whenever possible, the examining attorney should suggest appropriate language for amendments. A priority action is *not* appropriate when:

1. the examining attorney leaves a voicemail or e-mail message for the applicant or applicant's qualified practitioner, but the applicant or practitioner does not call back or respond to the message;
2. the examining attorney telephones the applicant or applicant's attorney but the attorney does not have time to discuss the application and requests that the examining attorney send a letter; or
3. the examining attorney e-mails the applicant or applicant's attorney and merely states that there are problems with the application (e.g., indefinite identification, a disclaimer requirement, and clarification of entity type) and that a letter will be sent.

All the issues in the priority action must be discussed on the merits with the applicant or the applicant's qualified practitioner in a good-faith attempt to resolve any issues and place the application in condition for publication or registration, as appropriate. However, an agreement as to precisely how all issues will be resolved is not necessary.

*Example:* If the goods are identified as "computer equipment," the examining attorney may seek authorization to amend the identification to list the types of computer equipment. If the applicant or applicant's attorney does not agree to the suggested amendment, the examining attorney may issue a priority action that fully explains the identification requirement. It may also state that "the applicant will submit an acceptable identification of goods that specifies the common commercial names of the types of computer equipment." It is not necessary that there be an agreement that "the applicant will amend the identification of goods to, for example, computer keyboards, computer monitors, and computer printers."

The priority action may state that the applicant will follow one of two alternative courses of action, for example, providing either an amended drawing or a new specimen.

### **708.03 Form of the Priority Action**

The priority action should reference the date of the telephone call, e-mail message, or other communication, and the name and title (where appropriate) of the person who authorized the priority action. See [TMPEP §708.02](#) for information about who may authorize issuance of a priority action.

A priority action must include a six-month response clause ( *see* [TMPEP §705.08](#)) so that it is clear that the applicant must timely respond to the priority action to avoid abandonment of the application.

The priority action must include a search clause ( *see* [TMPEP §704.02](#)) if it is a first action, or if the applicant has not previously been advised of the results of a search.

The priority action must also: (1) fully discuss all refusals and/or requirements; (2) include sufficient evidence to support all refusals and/or requirements; and (3) specifically describe what action the applicant may take in order to put the application into condition for publication or registration. See [TMEP §708.02](#) regarding discussion of issues on the merits.

The examining attorney should discuss each issue separately, stating the reason for the refusal and/or requirement and/or citing the relevant sections of the statute, rules, and/or TMEP. The essential nature of the refusal or requirement, and any pertinent advisories relating thereto, must be clearly stated in the priority action, and fully supported by appropriate evidence (if applicable), because the action of the USPTO is based exclusively on the written record. 37 C.F.R. §2.191.

A priority action may be used for a final or nonfinal refusal or requirement. See [TMEP §708.04](#) regarding refusal of registration in a priority action, and [TMEP §§714–714.06](#) regarding final actions.

### **708.04 Refusal of Registration in Priority Action**

Priority actions are generally used when there are no statutory refusals. However, if there is sufficient evidence to support a statutory refusal, and the examining attorney believes that an amendment or explanation will obviate the refusal, the examining attorney may attempt to resolve the issues through a priority action.

*Example:* If the applicant could overcome a surname refusal by submitting a claim of acquired distinctiveness under §2(f) of the Trademark Act for a mark that has been used in commerce for more than five years, the examining attorney may initiate telephone or e-mail contact and discuss the refusal and the requirements for submitting a claim of acquired distinctiveness. See [TMEP §§1212–1212.10](#) regarding §2(f). Because the claim of five years of use is generally required to be supported by a properly signed affidavit or declaration under 37 C.F.R. §2.20, the examining attorney may issue a priority action that fully discusses the refusal, includes sufficient evidence to support the refusal, and reiterates the suggested amendment and requirement.

*Example:* If the applicant could overcome a likelihood-of-confusion refusal as to several registrations by amending a vague or indefinite identification of goods/services, the examining attorney may initiate telephone or e-mail contact and suggest the amendment. If the applicant or applicant's attorney does not authorize an examiner's amendment, the examining attorney may issue a priority action that fully discusses the refusal, includes sufficient evidence to support the refusal, and reiterates the suggested amendment to the identification. However, if amending the identification would obviate the refusal as to fewer than all of the registrations, the examining attorney must not initiate telephone or e-mail communication, and, therefore, may not issue a priority action.

*Example:* If there are multiple co-pending applications, and a likelihood-of-confusion refusal could be obviated as to some of the applications by amending the identification, the examining attorney may initiate telephone or e-mail contact and suggest the amendment only as to those applications. If the applicant or applicant's attorney does not authorize an examiner's amendment, the examining attorney may issue priority actions that fully discuss the refusal, include sufficient evidence to support the refusal, and reiterate the suggested amendment to the identification. The examining attorney may not issue a priority action for any co-pending applications where an amendment to the identification would not obviate the refusal.

*Example:* If the applicant could overcome a descriptiveness refusal for a mark that is in use in commerce by amending to the Supplemental Register, the examining attorney may initiate telephone or e-mail contact to discuss the refusal and suggest the amendment. If the applicant's attorney agrees that the mark is descriptive, but needs to consult with the applicant about amending to the Supplemental Register, the examining attorney may issue a priority action that fully discusses the refusal, includes sufficient evidence to support the refusal, and offers the option of amending to the Supplemental Register.

*Example:* If the applicant could overcome a geographically descriptive refusal for a mark that is in use in commerce by amending to the Supplemental Register, the examining attorney may initiate telephone or e-mail contact to discuss the refusal and suggest the amendment. Even if the applicant disagrees as to the merits of the underlying refusal, the examining attorney may issue a priority action that fully discusses the refusal, includes sufficient evidence to support the refusal, and reiterates the option of amending to the Supplemental Register.

In the priority action, the examining attorney must clearly state the basis for the refusal that was discussed, citing the relevant sections of the statute and rules, attaching evidence to support the refusal, and indicating the resolutions agreed upon or the options offered.

If the priority action includes a final refusal, the priority action must clearly indicate that the refusal is FINAL, and should contain any additional supporting evidence necessary for a complete record on appeal. See [TMPEP §§714–714.06](#) regarding final actions.

### **708.05 Combined Examiner’s Amendment/Priority Action**

An examining attorney may issue an Office action that combines an examiner’s amendment and priority action, if the requirements for both have been met. The examiner’s-amendment portion reflects the authorized amendments, and the priority-action section addresses the refusals and requirements that remain outstanding and to which the applicant must still respond. An examining attorney may not issue a “no-call” examiner’s amendment/priority action, because the issues in the priority action portion of the action have not been discussed with the applicant or applicant’s qualified practitioner.

The action must include a six-month response clause ( *see* [TMPEP §705.08](#)) so that it is clear that the applicant must timely respond to the issues raised in the priority action to avoid abandonment of the application. The action must also include the subheadings “Priority Action” and “Examiner’s Amendment” to facilitate processing.

*Example:* After determining that an application requires a disclaimer and clarification of the entity type and color claim, and that the specimen shows ornamental use of the mark, if the examining attorney obtains authorization from the applicant or applicant’s attorney only to amend the entity type and color claim, a combined examiner’s amendment/priority action may be issued. The examiner’s-amendment section memorializes the amendments to the entity type and color claim. The priority action portion fully addresses the ornamental refusal and disclaimer requirement, includes sufficient evidence to support each, and reiterates the action that would put the application in condition for publication or registration.

*Example:* If the examining attorney determines that an application lacks the necessary translation statement and that the specimen is unacceptable, and during a discussion of these issues the applicant agrees to entry of a suggested translation statement, but states that she needs to consider what to do about the specimen, the examining attorney may issue a combined examiner’s amendment/priority action. The examiner’s-amendment section memorializes the agreed-upon translation statement. The priority-action portion fully addresses the specimen refusal and includes all actions that would put the application in condition for publication or registration.

*Example:* If the application contains the “SM” symbol on the drawing, an indefinite identification, and an unclear entity type, the examining attorney may not issue a no-call examiner’s amendment/priority action to delete by examiner’s amendment the “SM” symbol and address by priority action the identification and entity requirements. Since no discussion occurred, the requirements for a priority action have not been met. However, the examining attorney may telephone or e-mail the applicant or applicant’s attorney, discuss the requirements, and issue a combined examiner’s amendment/priority action, if appropriate.

**NOTE:** In a §66(a) application, an examining attorney may not issue a combined examiner’s amendment/priority action as a first action. See [TMPEP §1904.02\(h\)](#) regarding Office actions in §66(a) applications.

### **709 Interviews**

A discussion between the applicant or applicant’s qualified practitioner and the examining attorney in which the applicant presents matters for the examining attorney’s consideration is considered an interview. An interview can be conducted in person, by telephone, or by e-mail. See [TMPEP §§304–304.09](#) regarding e-mail.

The application will not normally be processed out of turn as a result of the interview, and the interview does not extend the deadline for response to an outstanding Office action.

The examining attorney may not discuss inter partes questions with any of the interested parties. See [TMEP §1801](#).

### **709.01 Personal Interviews**

Personal interviews with examining attorneys concerning applications and other matters pending before the USPTO are permissible on any working day and must be in the office of the respective examining attorney, within office hours that the examining attorney may designate.

Personal interviews must be arranged in advance, preferably by fax, e-mail, or telephone. This will ensure that the assigned examining attorney will be available for the interview at the scheduled time and will have an opportunity to review the application record. The unexpected appearance of a qualified practitioner or applicant requesting an interview without any previous notice to the examining attorney is not appropriate.

An interview should be conducted only when it could serve to develop and clarify specific issues and lead to a mutual understanding between the examining attorney and the applicant. Interviews should not extend beyond a reasonable time.

The examining attorney should not hesitate to state that matter presented for consideration during the interview requires further research, if this is the case. Furthermore, the examining attorney may conclude an interview when it appears that no common ground can be reached.

During an interview with a pro se applicant who is not familiar with USPTO procedure, the examining attorney may in his or her discretion make suggestions that will advance the prosecution of the application, but these interviews should not be allowed to become unduly long.

When an agreement is reached during an interview but it is not possible to resolve all issues through an examiner's amendment, the examining attorney should enter a Note to the File in the record concerning the agreement, and request that the applicant incorporate the agreement in its response.

Sometimes, the examining attorney who conducted the interview is transferred, resigns, or retires, and examination of the application is taken over by another examining attorney. If there is an indication in the record that an interview was held, the new examining attorney should endeavor to ascertain whether any agreements were reached during the interview. The new examining attorney should take a position consistent with agreements previously reached, unless doing so would be a clear error ( see [TMEP §706.01](#)).

Except in unusual situations, no interview on the merits is permitted after the brief on appeal is filed, or after an application has been forwarded for publication or issue.

### **709.02 Persons Who May Represent Applicant in an Interview**

In general, interviews are not granted to persons who lack proper authority from the applicant. See [TMEP §§602–602.03\(e\)](#) regarding persons who may represent an applicant before the USPTO in a trademark matter, and [TMEP §§611.06–611.06\(h\)](#) for information on persons with legal authority to bind various types of juristic applicants.

The examining attorney may request proof of a person's authority if there is any reason to suspect that the person is not, in fact, a qualified practitioner who is authorized to represent the applicant. 37 C.F.R. §2.17(b)(2).

For an interview with an examining attorney who does not have signatory authority, arrangements should be made for the presence of an examining attorney who does have such authority and who is familiar with the application, so that an authoritative agreement may be reached, if possible, at the time of the interview.

USPTO employees are forbidden to engage in oral or written communication with a disbarred, suspended, or excluded practitioner ( *see* [TMEP §608.02](#)), unless the practitioner is the applicant.

Requests for interviews from third parties are inappropriate and should be directed to the Office of the Deputy Commissioner for Trademark Examination Policy. *See* [TMEP §1801](#).

### **709.03 Making Substance of Interview of Record**

The substance of an interview must always be made of record in the application, since the action of the USPTO is based exclusively on the written record. 37 C.F.R. §2.191. This should be done promptly after the interview while the matters discussed are fresh in the minds of the parties.

If possible, agreements reached in the interview should be incorporated in an examiner's amendment or priority action. Otherwise, to ensure that any agreements reached at an interview will be implemented, and to avoid subsequent misunderstanding, the examining attorney should include, in a Note to the File, a list of the issues discussed and indicate whether any agreement was reached. *See* [TMEP §709.04](#) for further information about Notes to the File.

The applicant or the applicant's qualified practitioner may also make the substance of an interview part of the record by incorporating a summary of the interview in the applicant's response to the Office action. If there is any disagreement between the examining attorney and the applicant as to the substance of the interview, the written record governs. 37 C.F.R. §2.191.

### **709.04 Telephone and E-Mail Communications**

Examining attorneys should initiate telephone or e-mail communications (i.e., "informal communications") whenever possible to expedite prosecution of an application. Similarly, applicants and qualified practitioners may telephone or e-mail examining attorneys, if they feel that a telephone call or e-mail will advance prosecution of an application. *See* [TMEP §709.05](#) regarding guidelines for informal communications. Therefore, all documents filed in connection with the application should include the telephone number of the applicant or the applicant's qualified practitioner.

The examining attorney must respond to telephone calls and e-mail messages within a reasonable time, normally the same working day and never later than the next working day.

Generally, the examining attorney who prepared the action, and not the supervisory or reviewing examining attorney, should be the person contacted by telephone or e-mail. However, a non-signatory examining attorney must secure proper authorization from the managing attorney, senior attorney, or reviewing examining attorney before approving an amendment.

The action of the USPTO is based exclusively on the written record and all relevant communications, including informal communications, must be made part of the record. 37 C.F.R. §2.191. Therefore, the examining attorney must use an examiner's amendment ( *see* [TMEP §§707–707.03](#)), or priority action ( *see* [TMEP §§708–708.05](#)), upload all relevant e-mail communications, and enter a Note to the File regarding issues discussed by telephone. *See* [TMEP §709.03](#).

Notes to the File must not summarize arguments or legal conclusions. Rather, the Note to the File must merely list the issues discussed and indicate any agreement that may have been reached. If no agreement was reached, that should be noted also.

If an examining attorney does not respond to a telephone or e-mail message within two business days, the applicant may telephone the law office manager or supervisor. Contact information is available on the USPTO website at [http://www.uspto.gov/trademarks/contact\\_trademarks.jsp](http://www.uspto.gov/trademarks/contact_trademarks.jsp).

### 709.05 Informal Communications

An applicant may conduct informal communications with an examining attorney regarding a particular application by telephone, e-mail ( *see* [TMEP §§304.01-304.02](#) ), or fax. Informal communications should be conducted only if they serve to develop and clarify specific issues and lead to a mutual understanding between the examining attorney and the applicant. For example, an applicant may telephone or send an e-mail regarding:

- Questions regarding an outstanding Office action that do not constitute a response;
- Authorization to issue an examiner's amendment or priority action ( *see* [TMEP §§707.01, 708.01](#) );
- Objection to an examiner's amendment ( *see* [TMEP §§707, 707.02](#) );
- Notification of termination of a cancellation proceeding that is the basis for suspension ( *see* [TMEP §716.02\(a\)](#) ); or
- A request to arrange a convenient time to speak by telephone.

Informal communications may not be used to request advisory opinions as to the likelihood of overcoming a substantive refusal. The examining attorney should advise the applicant to file a formal response for consideration of arguments regarding any substantive refusal.

If the examining attorney determines that continuing (or prolonged) informal communications by telephone or e-mail will not serve to further develop and clarify specific issues and lead to a mutual understanding between the examining attorney and the applicant, he or she must advise the applicant to file a formal response.

An informal communication does not constitute a response to an outstanding Office action and does not extend the deadline for response.

Relevant e-mail and phone communications must be made part of the record, because the USPTO uses them in decision making, and anything used in decision making must be made of record. 37 C.F.R. §2.191. Therefore, the examining attorney must upload all relevant e-mail communications and must enter a Note to the File regarding issues discussed by telephone. See [TMEP §709.04](#) for further information about Notes to the File.

The applicant should monitor the status of an application after an informal communication to avoid abandonment. For example, if the applicant expects an examiner's amendment or priority action to be issued and the status does not show that it has been sent, the applicant should promptly contact the examining attorney to inquire. Reviewing the status may be done through the Trademark Status and Document Retrieval ("TSDR") database at <http://tsdr.uspto.gov/>, or by calling the Trademark Assistance Center ("TAC") at

(571) 272-9250 or (800) 786-9199. See [TMEP §§108.03](#) and [1705.05](#) regarding the duty to monitor the status of an application in cases where a notice or action from the USPTO is expected.

## **709.06 Interviews Prior to Filing Application**

No interviews are permitted before the filing of an application. If a party has general questions about how to file an application, he or she can call the Trademark Assistance Center at (571) 272-9250 or (800) 786-9199. See [TMEP §108.02](#).

USPTO employees cannot give advice on trademark law. It is inappropriate for USPTO personnel to give legal advice, to act as a counselor for individuals, or to recommend a qualified practitioner. 37 C.F.R. §2.11.

## **710 Evidence**

### **710.01 Evidence Supporting Refusal or Requirement**

In general, the examining attorney must always support his or her action with relevant evidence and ensure that proper citations to the evidence are made in the Office action.

All evidence that the examining attorney relies on in making a requirement or refusal must be placed in the record and copies must be sent to the applicant.

In appropriate cases, the examining attorney may also present evidence that may appear contrary to the USPTO's position, with an appropriate explanation as to why this evidence was not considered controlling. In some cases, this may foreclose objections from an applicant and present a more complete picture if there is an appeal. Cf. *In re Federated Dep't Stores Inc.*, 3 USPQ2d 1541, 1542 n.2 (TTAB 1987) (noting that the examining attorney is not obligated to provide every story found in a LexisNexis® search though it may present a more complete picture).

#### **710.01(a) Evidence from Research Database**

If evidence is obtained from a research database, the record should include an indication of the specific search that was conducted. The record should indicate the libraries and/or files that were searched and the results. If the examining attorney does not review all of the documents located in a search, the record should indicate the number of documents that were reviewed. The search summary should be made a part of the record and will provide most of this information. Information not indicated on the search summary, such as the number of documents viewed, should be stated in narrative in the Office action. The Office action should include a citation to the research service, indicating the service, the library and the file searched, and the date of the search (e.g., "LEXIS®, News and Business, All News (Sept. 25, 2009)").

When evidence is obtained from a research database, the examining attorney does not have to make all stories of record. It is sufficient to include only a portion of the search results, as long as that portion is a representative sample of what the entire search revealed. *In re Vaughan Furniture Co.*, 24 USPQ2d 1068, 1069 n.2 (TTAB 1992). See also *In re Federated Dep't Stores Inc.*, 3 USPQ2d 1541, 1542 n.2 (TTAB 1987).

See [TMEP §710.01\(b\)](#) regarding evidence originating in foreign publications.

### 710.01(b) Internet Evidence

Articles downloaded from the Internet are admissible as evidence of information available to the general public, and of the way in which a term is being used by the public. However, the weight given to this evidence must be carefully evaluated, because the source may be unknown. See *In re Total Quality Grp. Inc.*, 51 USPQ2d 1474, 1475-76 (TTAB 1999); *Raccioppi v. Apogee Inc.*, 47 USPQ2d 1368, 1370-71 (TTAB 1998). When making Internet evidence part of the record, the examining attorney must both (1) provide complete information as to the date the evidence was published or accessed from the Internet, and its source (e.g., the complete URL address of the website), and (2) download and attach the evidence to the Office action. See *Safer Inc. v. OMS Invs. Inc.*, 94 USPQ2d 1031, 1039 (TTAB 2010). Providing only a website address or hyperlink to Internet materials is insufficient to make such materials of record. *In re Powermat Inc.*, 105 USPQ2d 1789, 1791 (TTAB 2013); *In re HSB Solomon Assocs. LLC*, 102 USPQ2d 1269, 1274 (TTAB 2012). Because of the transitory nature of Internet postings, websites referenced only by address or hyperlinks may be modified or deleted at a later date without notification. See *Safer Inc.*, 94 USPQ2d at 1039. Thus, information identified only by website address or hyperlink would not be available for verification by the applicant to corroborate or refute. See *In re HSB Solomon Assocs. LLC*, 102 USPQ2d at 1274.

A list of Internet search results generally has little probative value, because such a list does not show the context in which the term is used on the listed web pages. *In re Thomas Nelson, Inc.*, 97 USPQ2d 1712, 1715 (TTAB 2011); see *In re Bayer AG*, 488 F.3d 960, 967, 82 USPQ2d 1828, 1833 (Fed. Cir. 2007) (deeming Google® search results that provided very little context of the use of ASPIRINA to be “of little value in assessing the consumer public perception of the ASPIRINA mark”); *In re Tea and Sympathy, Inc.*, 88 USPQ2d 1062, 1064 n.3 (TTAB 2008) (finding truncated Google® search results entitled to little probative weight without additional evidence of how the searched term is used); *In re Thomas*, 79 USPQ2d 1021, 1026 (TTAB 2006) (rejecting an applicant’s attempt to show weakness of a term in a mark through citation to a large number of Google® “hits” because the “hits” lacked sufficient context); *In re King Koil Licensing Co.*, 79 USPQ2d 1048, 1050 (TTAB 2006) (noting that web page links “do little to show the context within which a term is used on the web page that could be accessed by the link”); *In re Remacle*, 66 USPQ2d 1222, 1223 n.2 (TTAB 2002) (finding the print-out of Internet search results to be of little probative value due to insufficient text to determine the nature of the information or its relevance); *In re Fitch IBCA Inc.*, 64 USPQ2d 1058, 1060 (TTAB 2002) (noting that “[e]vidence of actual use of a phrase by a website has far greater probative value” than a search summary). The examining attorney should attach copies of the website pages that show how the term is actually used.

As long as it is written in the English language, information originating on foreign websites or in foreign news publications that are accessible to the United States public may be relevant to discern United States consumer impression of a proposed mark. The probative value of such evidence will vary depending upon the context and manner in which the term is used. In *Bayer*, NEXIS® evidence that originated in foreign publications was deemed to be of “some probative value with respect to prospective consumer perception in the United States,” the Court noting “the growing availability and use of the internet as a resource for news, medical research results, and general medical information.” 488 F.3d at 969, 82 USPQ2d at 1835. In *Remacle*, the Board held evidence from a website in Great Britain admissible, noting that:

[I]t is reasonable to assume that professionals in medicine, engineering, computers, telecommunications and many other fields are likely to utilize all available resources, regardless of country of origin or medium. Further, the Internet is a resource that is widely available to these same professionals and to

the general public in the United States. Particularly in the case before us, involving sophisticated medical technology, it is reasonable to consider a relevant article from an Internet web site, in English, about medical research in another country, Great Britain in this case, because that research is likely to be of interest worldwide regardless of its country of origin.

66 USPQ2d at 1224 n.5. However, the weight given to such evidence depends upon the context and manner in which the term is used. In *King Koil*, the Board gave only “limited probative value” to the contents of websites of commercial entities outside the United States showing use of the term “breathable” in relation to mattresses and bedding, stating that:

[C]onsumers may visit foreign web sites for informational purposes, even if they are more likely to focus on internet retailers that can easily ship items or make items available for pick up in a store in a location convenient to the purchaser. That would appear especially likely in a case such as this, where the item in question, a mattress, is large and potentially more expensive to ship than a smaller item. Accordingly, while we do not discount entirely the impact of foreign web sites in this case, we find them of much more limited probative value than in the *Remacle* case.

79 USPQ2d at 1050. *See also In re Cell Therapeutics, Inc.*, 67 USPQ2d 1795, 1797-98 (TTAB 2003) (relying on NEXIS® items from foreign wire services to support a refusal and distinguishing earlier decisions that accorded such evidence little probative value given the sophisticated public and the widespread use of personal computers that increase access to such sources).

With respect to evidence taken from the online Wikipedia® encyclopedia, at [www.wikipedia.org](http://www.wikipedia.org), the Board has noted that “[t]here are inherent problems regarding the reliability of Wikipedia entries because Wikipedia is a collaborative website that permits anyone to edit the entries,” and has stated as follows:

[T]he Board will consider evidence taken from Wikipedia so long as the non-offering party has an opportunity to rebut that evidence by submitting other evidence that may call into question the accuracy of the particular Wikipedia information. Our consideration of Wikipedia evidence is with the recognition of the limitations inherent with Wikipedia (e.g., that anyone can edit it and submit intentionally false or erroneous information)...

As a collaborative online encyclopedia, Wikipedia is a secondary source of information or a compilation based on other sources. As recommended by the editors of Wikipedia, the information in a particular article should be corroborated. The better practice with respect to Wikipedia evidence is to corroborate the information with other reliable sources, including Wikipedia’s sources.

*In re IP Carrier Consulting Grp.*, 84 USPQ2d 1028, 1032-33 (TTAB 2007).

Given its inherent limitations, any information obtained from Wikipedia® should be treated as having limited probative value. If the examining attorney relies upon Wikipedia® evidence and makes it of record, then additional supportive and corroborative evidence from other sources should also be made of record, especially when issuing final actions.

The examining attorney should check applicant’s own website for information about the goods/services. See *In re Promo Ink*, 78 USPQ2d 1301, 1303 (TTAB 2006), where the Board rejected applicant’s argument that it was improper for the examining attorney to rely on evidence obtained from applicant’s website when the application was based on intent to use and no specimens were yet required. According to the Board,

“[T]he fact that applicant has filed an intent-to-use application does not limit the examining attorney’s evidentiary options, nor does it shield an applicant from producing evidence that it may have in its possession.” *Id.*; see also *In re Reed Elsevier Props. Inc.*, 482 F.3d 1376, 1379, 82 USPQ2d 1378, 1380 (Fed. Cir. 2007); *In re Ameritox Ltd.*, 101 USPQ2d 1081, 1084-85 (TTAB 2011).

When a document found on the Internet is not the original publication, the examining attorney or Trademark Law Library staff should try to obtain a copy of the originally published document, if practicable. Electronic-only documents are considered to be original publications, and scanned images are considered to be copies of original publications. Internet Usage Policy Notice, 64 Fed. Reg. 33056, 33063 (June 21, 1999).

See TBMP §1208.03 for further information regarding the use of material obtained through the Internet in ex parte proceedings.

### **710.01(c) Record Must Be Complete Prior to Appeal**

The record in any application should be complete prior to appeal. 37 C.F.R. §2.142(d). Accordingly, if an examining attorney or applicant attempts to introduce new evidence at the time of the appeal, the new evidence will generally be excluded from the record. TBMP §1207.01; see *In re Fitch IBCA, Inc.*, 64 USPQ2d 1058, 1059 n.2 (TTAB 2002); *In re Trans Cont’l Records, Inc.*, 62 USPQ2d 1541, 1541 n.2 (TTAB 2002). However, the Board may consider evidence submitted after appeal, despite its untimeliness, if the non-offering party: (1) does not object to the evidence; and (2) discusses the evidence or otherwise treats it as being of record. See TBMP §1207.03 and cases cited therein. Therefore, examining attorneys and applicants should: (a) object to the new evidence but not substantively discuss it; (b) object to the new evidence and, while preserving the objection, discuss why it in any event does not support the offeror’s position; or (c) consider the new evidence.

Whenever an examining attorney objects to evidence submitted by an applicant, the objection should be raised as soon as possible and continued in the examining attorney’s brief, or the Board may consider the objection to be waived. See *In re Broyhill Furniture Indus., Inc.*, 60 USPQ2d 1511, 1513 n.3 (TTAB 2001).

If the applicant or examining attorney wishes to introduce new evidence at the time of or during appeal, the party seeking to introduce the new evidence may request the Board to suspend the appeal and remand the case. See TBMP §1207.02 and [TMEP §1504.05](#) regarding requests for remand.

The Board may take judicial notice of definitions from printed dictionaries that were not made of record prior to appeal, and may do so either sua sponte or upon request of the applicant or examining attorney.

See *In re La Peregrina Ltd.*, 86 USPQ2d 1645, 1647 n.3 (TTAB 2008); *In re Piano Factory Grp., Inc.*, 85 USPQ2d 1522, 1525 n.6 (TTAB 2006); *In re Canron, Inc.*, 219 USPQ 820, 821 (TTAB 1983); TBMP §1208.04. However, the better practice is to ensure that the relevant material is included in the record prior to appeal. When requesting that the Board take judicial notice of a printed dictionary definition, the examining attorney must provide sufficient information regarding the source of the definition (e.g., a copy of the title page of the dictionary). See *In re Gregory*, 70 USPQ2d 1792, 1793 (TTAB 2004) (declining to take judicial notice of dictionary definitions submitted with examining attorney’s appeal brief, because neither the photocopied pages nor the examining attorney’s brief specified the dictionaries from which the copies were made); TBMP §1208.04.

Due to concerns about the reliability of online dictionary definitions that are not also available in printed form, the Board will not take judicial notice of this type of evidence unless the online dictionary is readily

available and verifiable. See *In re Red Bull GmbH*, 78 USPQ2d 1375, 1378 (TTAB 2006) (taking judicial notice of an *Encarta Dictionary* definition, because the dictionary was a widely known reference, readily available in specifically denoted editions via the Internet and CD-ROM and thus was “the electronic equivalent of a print publication,” which could be easily verified; refusing to take judicial notice of a definition from www.wordsmyth.net, because the source of the definition was not identified on the submitted website excerpt or by the examining attorney and thus could not be verified); *In re CyberFinancial.Net, Inc.*, 65 USPQ2d 1789, 1791 n.3 (TTAB 2002) (taking judicial notice of online dictionary that was also available in printed form); *In re Total Quality Grp., Inc.*, 51 USPQ2d 1474, 1476 (TTAB 1999) (declining to take judicial notice of online dictionary that did not exist in printed format, because the source was unknown and the Board was unsure whether the dictionary was readily available or reliable, stating that the evidence should have been made of record prior to appeal, so applicant would have the opportunity to check the reliability of the evidence and offer rebuttal evidence).

## 710.02 Search for Evidence Indicating No Refusal or Requirement Necessary

USPTO practice is to indicate the results of a search for evidence when the examining attorney considers an issue and determines that no action will be taken on it. This information is helpful for internal review. A Note to the File should be entered in the record to reflect that a search for evidence was conducted in any case in which the examining attorney determines that a search would be useful for review of the application, but that no further action is required.

The examining attorney should simply note the parameters of the search conducted *without stating any opinions or conclusions*.

For instance, in the case of a search of telephone directories for surnames, the record should indicate only the directories investigated and the number of occurrences of the surname. Or, in the case of a search for the meaning of a term, the record should show the sources checked and whether the term was found.

The Note to the File should *not* provide any of the examining attorney's analysis, opinions, or conclusions regarding the evidence when the examining attorney determines that a refusal or requirement is not appropriate. Nor should the examining attorney place in the record copies of e-mail messages or other communications between the examining attorney and other USPTO personnel concerning the application. And the examining attorney should not refer to, or place copies of, any registration or pending application that was considered in a §2(d) search, unless the examining attorney determines that there is a conflict and issues an Office action based on the application or registration.

## 710.03 Evidence of Third-Party Registrations

The Trademark Trial and Appeal Board does not take judicial notice of registrations, and the submission of a list of registrations does not make these registrations part of the record. *In re 1st USA Realty Prof'ls, Inc.*, 84 USPQ2d 1581, 1583 (TTAB 2007); *In re Duofold Inc.*, 184 USPQ 638, 640 (TTAB 1974); TBMP §1208.02. Furthermore, the submission of a copy of a commercial search report is not proper evidence of third-party registrations. *In re Hub Distrib., Inc.*, 218 USPQ 284, 285 (TTAB 1983).

To make registrations of record, copies of the registrations or the complete electronic equivalent (i.e., complete printouts taken from the USPTO's Trademark database) must be submitted. *In re Ruffin Gaming LLC*, 66 USPQ2d 1924, 1925 n.3 (TTAB 2002); *In re Volvo Cars of N. Am. Inc.*, 46 USPQ2d 1455, 1456 n.2 (TTAB 1998); *In re Broadway Chicken Inc.*, 38 USPQ2d 1559, 1561 n.6 (TTAB 1996); *In re Smith & Mehaffey*, 31 USPQ2d 1531, 1532 n.3 (TTAB 1994).

If the applicant's response includes improper evidence of third-party registrations, the examining attorney must object to the evidence in the first Office action following the response. Otherwise the Board may consider the objection to be waived. See *In re Houston*, 101 USPQ2d 1534, 1536 (TTAB 2012) (finding that the examining attorney's failure to advise applicant of the insufficiency of the list of registrations when it was proffered during examination constituted a waiver of any objection to consideration of that list); *In re 1st USA Realty Prof'ls*, 84 USPQ2d at 1583 (allowing evidence of a list of third-party registrations because the examining attorney did not advise applicant of the insufficiency of the list while there was still time to correct the mistake); *In re Broyhill Furniture Indus., Inc.*, 60 USPQ2d 1511, 1513 n.3 (TTAB 2001) (finding examining attorney's objection to a listing of third-party registrations waived because it was not raised in the Office action immediately following applicant's response in which applicant's reliance on the listing as evidence was indicated). If the applicant files an appeal, the examining attorney should continue the objection to the evidence in his or her appeal brief.

## 711 Deadline for Response to Office Action

The statutory period for response to an examining attorney's Office action is six months from the Office action's date of issuance. 15 U.S.C. §1062(b); 37 C.F.R. §2.62(a). The examining attorney has no discretion to shorten or extend this period. Thus, the applicant must file a response within six months unless the examining attorney has issued a supplemental action resetting the period for response. See [TMEP §711.02](#) regarding supplemental Office actions.

In a §66(a) application, a response to an Office action must be sent to the USPTO, not the IB, and is due in the USPTO within six months of the date on which the USPTO sends the action to the IB, not the date on which the IB processes the refusal. See [TMEP §1904.02\(h\)](#) for further information about Office actions and responses in §66(a) applications.

To expedite processing, the USPTO recommends that responses to Office actions be filed through TEAS, at <http://www.uspto.gov>.

Filing an amendment to allege use does not extend the deadline for filing a response to an outstanding Office action, appeal to the Board, or petition to the Director. 37 C.F.R. §2.64(c)(1); [TMEP §1104](#).

See [TMEP §310](#) for information about computing the response period, [TMEP §§305.02](#) and [306.05](#) for certificate of mailing and certificate of facsimile transmission procedures to avoid lateness, and [TMEP §§718.02](#) and [718.03-718.03\(a\)](#) regarding abandonment for failure to respond or incomplete response to an Office action.

### 711.01 Time May Run from Previous Action

In most cases, the six-month statutory period to respond to an Office action runs from the issuance date of the Office action. In some situations, the examining attorney's Office action does not re-start the beginning of a statutory response period. For example, a notice that an applicant's response was incomplete ( see [TMEP §718.03](#)), or a notice that an applicant's request for reconsideration of a final action fails to overcome a refusal or satisfy an outstanding requirement ( see [TMEP §§715.03\(a\), \(c\)](#)), does not begin a new response period. In all cases in which the statutory response period runs from the date of a previous Office action,

the examining attorney must include a statement to that effect in the Office action, and must omit the six-month response clause.

### **711.02 Supplemental Office Action Resetting Response Period**

Sometimes the examining attorney must issue a supplemental Office action that resets the six-month statutory period for response. If the examining attorney discovers after issuing an action that a refusal or requirement that should have been raised was overlooked, the examining attorney must issue a supplemental Office action addressing the issue and resetting the period for response. See [TMEP §706](#). The examining attorney must also issue a supplemental Office action if a new issue arises after the issuance date of a previous Office action (e.g., during examination of an amendment to allege use).

If the examining attorney issues a supplemental Office action, a new six-month response period will begin running from the issuance date of the supplemental action. See 15 U.S.C. §1062(b). In a supplemental Office action, the examining attorney should: (1) indicate that the action is supplemental to and supersedes the previous action; (2) specifically identify all of the outstanding refusals and/or requirements; and (3) include the standard six-month response clause.

In a §66(a) application, the examining attorney cannot issue a new refusal more than 18 months after the date on which the IB forwards the request for extension of protection to the USPTO. 15 U.S.C. §1141h(c); [TMEP §1904.03\(a\)](#).

See [TMEP §717](#) regarding reissuing of Office actions.

## **712 Signature on Response to Office Action**

A response to an Office action must be personally signed by a qualified practitioner or, if the applicant is not represented by a qualified practitioner, by the individual applicant or someone with legal authority to bind a juristic applicant (e.g., a corporate officer, or a general partner of a partnership). 37 C.F.R. §§2.62(b), 2.193(e)(2), 11.18(a). The examining attorney must review the application record to determine whether the applicant is represented by a qualified practitioner (see 37 C.F.R. §11.14), and must ensure that all responses and amendments are properly signed. See [TMEP §§611.03\(b\)](#) and [712.02](#) regarding the proper person to sign, and [TMEP §611.06](#) as to persons who have legal authority to bind various types of juristic entities.

The signatory must personally sign his or her name. See 37 C.F.R. §2.193(a); [TMEP §611.01\(b\)](#). For electronic signatures on document filed through TEAS, the signatory must personally enter the elements of the electronic signature. See 37 C.F.R. §2.193(c); [TMEP §§611.01\(b\), \(c\)](#).

The name of the person who signs the response should be set forth in printed or typed form immediately below or adjacent to the signature, or identified elsewhere in the filing (e.g., in a cover letter or other document that accompanies the filing). [TMEP §611.01\(b\)](#).

### **712.01 Persons Who May Sign Response**

If an applicant is represented by a qualified practitioner, the practitioner must personally sign the response. 37 C.F.R. §§2.193(e)(2)(i), 11.18(a). This applies to both in-house and outside counsel.

If the applicant or registrant is not represented by a qualified practitioner, the individual applicant or someone with legal authority to bind a juristic applicant (e.g., a corporate officer or general partner of a partnership)

must sign the response. 37 C.F.R. §§2.62(b), 2.193(e)(2)(ii). In the case of joint applicants who are not represented by a qualified practitioner, all must sign the response. §2.193(e)(2)(ii). See [TMEP §611.06](#) for guidelines as to persons who have legal authority to bind various types of juristic entities. A person who is authorized to verify facts on behalf of an applicant under 37 C.F.R. §2.193(e)(1) is *not* entitled to sign responses to Office actions, unless he or she also has legal authority to bind the applicant or is a qualified practitioner.

*Example:* A corporate manager might have the firsthand knowledge and implied authority to act on behalf of the applicant required to verify facts under 37 C.F.R. §2.193(e)(1) and still not have legal authority to bind the applicant.

If the applicant is represented by a qualified practitioner, and the response consists only of a declaration (e.g., if the verification was omitted from the initial application and no other issues were raised in the Office action), the response may be signed by a person authorized to verify facts on behalf of an applicant under 37 C.F.R. §2.193(e)(1) ( see [TMEP §804.04](#)), and no separate signature by the practitioner is required.

However, if the response includes a verification and also contains legal arguments or amendments, the response must be signed by the practitioner. See 37 C.F.R. §2.193(e)(2).

Similarly, if the applicant is not represented by a qualified practitioner, and the response consists only of a declaration, the response may be signed by a person authorized to verify facts on behalf of an applicant under 37 C.F.R. §2.193(e)(1), and no separate signature by the applicant or someone with legal authority to bind the applicant is required. However, if the response includes a verification and also contains legal arguments or amendments, the response must be signed by the individual applicant or someone with legal authority to bind a juristic applicant. 37 C.F.R. §§2.62(b), 2.74(b), 2.193(e)(2).

The examining attorney must ensure that the record establishes the authority of the person who signs the response. If a response to an Office action appears to be signed by an unauthorized person (e.g., a foreign attorney who is not authorized to practice before the USPTO or a corporate employee who does not have legal authority to bind the applicant), the examining attorney must treat the response as incomplete and require the applicant to submit a properly signed response. The response cannot be ratified by an examiner's amendment. See [TMEP §§608.01, 611.05–611.05\(c\)](#), and [712.03](#) for further information.

See [TMEP §§602–602.03\(e\)](#) regarding persons who are authorized to represent others before the USPTO, and [TMEP §611.04](#) for examples of authorized and potentially unauthorized signatories.

These same principles apply to authorizations of examiner's amendments and priority actions. See [TMEP §§707.01, 708.02](#).

## 712.02 Unsigned Response

The examining attorney should treat an unsigned response as an incomplete response, and should either call the applicant to obtain permission to enter an examiner's amendment from an authorized party (if appropriate), or issue a notice of incomplete response granting the applicant additional time to perfect the response, pursuant to 37 C.F.R. §2.65(b). See [TMEP §718.03\(b\)](#). To issue a notice of incomplete response, the examining attorney should use the "Examiner's Non-Responsive Amendment" (or, if appropriate, "SU – Examiner's Non-Responsive Amendment") selection for a response to a nonfinal action or the "Examiner's Action Continuing a Final Refusal – 30-day Letter" (or, if appropriate, "SU – Examiner's Action Continuing a Final Refusal – 30-day Letter") selection if the response is to a final action. In either instance, the notice of incomplete response must not include a six-month response clause.

If the applicant is not represented by a qualified practitioner and the response does not require a signed verification ( *see* [TMEP §§804-804.05](#)), the applicant or a person with legal authority to bind a juristic applicant (e.g., a corporate officer or general partner of a partnership) may either request that the amendment(s) be entered through an examiner's amendment or submit a properly signed copy of the response. If the applicant is represented by a qualified practitioner, that practitioner must submit the response or request entry of an examiner's amendment. A duplicate of the original response can be submitted through TEAS (using the response to Office action form) or a properly signed copy of the original document can be submitted by fax (unless it is excluded by 37 C.F.R. §2.195(d)). In a TEAS Plus application, the response must be filed through TEAS or the application will lose TEAS Plus status (see [TMEP §819.02\(b\)](#)). The examining attorney must defer action on the merits of the response until the applicant files a properly signed response.

The substitute response must be personally signed by a qualified practitioner or, if the applicant is not represented by a qualified practitioner, by the individual applicant or someone with legal authority to bind a juristic applicant (e.g., a corporate officer or general partner of a partnership). 37 C.F.R. §§2.62(b), 2.193(e)(2), and 11.18(a); *see* [TMEP §§611.03\(b\)](#).

If an applicant fails to submit a properly signed response within the time granted under 37 C.F.R. §2.65(b), the examining attorney must hold the application abandoned for failure to file a complete response. *See* [TMEP §718.03](#). In this situation, the applicant cannot file a petition to revive under 37 C.F.R. §2.66. The applicant's recourse is to file a petition to the Director to reverse the examining attorney's holding of abandonment under 37 C.F.R. §2.146. *See* [TMEP §1713.02](#).

### **712.03 Response Signed by an Unauthorized Person**

*Notice of Incomplete Response.* When it appears that a response to an Office action was signed by an improper party (e.g., a foreign attorney who is not authorized to practice before the USPTO, a corporate employee who does not have legal authority to bind the applicant, or, when the applicant is represented by a qualified practitioner, someone other than the practitioner or another qualified practitioner from the same firm), the examining attorney must treat the response as incomplete. The examining attorney must issue a notice of incomplete response granting the applicant additional time to perfect the response, pursuant to 37 C.F.R. §2.65(b) ( *see* [TMEP §§ 611.05\(a\), 718.03\(b\)](#)). The examining attorney must defer action on the merits of the response until a properly signed response is filed.

*Applicant's Reply to Notice of Incomplete Response.* If the person who signed the response was authorized to sign, the applicant's reply to the notice of incomplete response should state the nature of the relationship of the signer to the applicant. If the signer has legal authority to bind the applicant, the person should so state, and should set forth his or her title or position. If the signer is an attorney authorized to practice before the USPTO pursuant to 37 C.F.R. §11.14(a), the attorney should identify him or herself as an attorney and indicate the United States state bar of which he or she is a member in good standing. If the signer meets the requirements of either 37 C.F.R. §11.14(b) or (c), the person should explain how he or she meets these requirements. *See* [TMEP §611.05\(b\)](#) for further information.

If the person who signed the response is not an authorized signer, the applicant is unrepresented, and all proposed amendments in the improperly signed response can be resolved by an examiner's amendment, the individual applicant or a person with legal authority to bind a juristic applicant may telephone the examining attorney to authorize such an amendment. If the applicant is represented by a qualified practitioner, that practitioner must authorize any examiner's amendment. Otherwise, the applicant must submit a response signed by the applicant or someone with legal authority to bind the applicant ( *see* [TMEP §§712.01 et seq.](#)), or by a qualified practitioner. This should be done through TEAS (using either the "Response to Office

Action” or “Request for Reconsideration after Final Office Action” form, as appropriate), or may be done by fax (unless it is excluded by 37 C.F.R. §2.195(d)). In a TEAS Plus application, the response must be filed through TEAS, or the application will lose TEAS Plus status ( *see* [TMEP §819.02\(b\)](#)). *See* [TMEP §611.01\(c\)](#) regarding signature of documents submitted through TEAS. When a response is signed by an unauthorized party, it is not acceptable for the applicant to ratify the response through an examiner’s amendment.

*Unsatisfactory Response or No Response.* If no acceptable response is received within the time granted under 37 C.F.R. §2.65(b), the examining attorney must hold the application abandoned for failure to file a complete response. *See* [TMEP §718.03](#). In this situation, the applicant cannot file a petition to revive under 37 C.F.R. §2.66. The applicant’s recourse is to file a petition to the Director to reverse the examining attorney’s holding of abandonment under 37 C.F.R. §2.146. *See* [TMEP §1713.01](#) regarding the standard of review for reversing an examining attorney’s holding of abandonment due to incomplete response.

## 713 Examination of Amendments and Responses to Office Actions

### *37 CFR §2.63 Reexamination.*

(a) After response by the applicant, the application will be reexamined or reconsidered. If registration is again refused or any formal requirement[s] is repeated, but the examiner’s action is not stated to be final, the applicant may respond again.

(b) After reexamination the applicant may respond by filing a timely petition to the Director for relief from a formal requirement if: (1) The requirement is repeated, but the examiner’s action is not made final, and the subject matter of the requirement is appropriate for petition to the Director ( *see* §2.146(b)); or (2) the examiner’s action is made final and such action is limited to subject matter appropriate for petition to the Director. If the petition is denied, the applicant shall have until six months from the date of the Office action which repeated the requirement or made it final or thirty days from the date of the decision on the petition, whichever date is later, to comply with the requirement. A formal requirement which is the subject of a petition decided by the Director may not subsequently be the subject of an appeal to the Trademark Trial and Appeal Board.

The examining attorney will consider the applicant’s response and will determine whether the mark may be approved for publication or registration. The examining attorney must carefully consider all arguments, comments, and amendments made or proposed by the applicant.

If the applicant’s response has put the application in condition for approval for publication for opposition or registration on the Supplemental Register, the examining attorney will approve the application for publication or registration, as appropriate.

If the applicant’s response has not put the application in condition for publication or registration, the examining attorney will issue an Office action, or telephone or e-mail the applicant, depending on the circumstances.

If the applicant’s response neither resolves all of the outstanding issues nor raises any new issues, and the applicant has had an opportunity to reply to all points raised by the examining attorney, the examining attorney’s next action should be stated to be final. *See* [TMEP §§714-714.05\(f\)](#).

If the examining attorney has cited an earlier-filed conflicting application, and the applicant responds by arguing that there is no likelihood of confusion, the examining attorney should suspend the application pending disposition of the conflicting application, if applicant’s arguments are not persuasive. *See* [TMEP §716.02\(c\)](#) regarding suspension pending disposition of an earlier-filed conflicting application, [TMEP](#)

[§716.03](#) regarding the applicant's request to remove an application from suspension, and [TMEP §§1208-1208.02\(f\)](#) regarding conflicting marks in pending applications.

### **713.01 Previous Action by Different Examining Attorney**

When assigned to act on an application that was previously handled by a different examining attorney, the examining attorney should act consistently with the examining attorney who handled the earlier-filed application, unless it would be clear error ( *see* [TMEP §706.01](#)) to act consistently.

### **713.02 Noting All Outstanding Refusals or Requirements**

Every refusal or requirement made in a prior Office action that is still outstanding must be referenced in any subsequent action, including Notices of Suspension. In addition, when a particular refusal or requirement has been withdrawn, obviated, or satisfied because of applicant's response or otherwise, the examining attorney should notify the applicant in any action that immediately follows.

Noting all outstanding refusals and requirements is done only as a courtesy to prevent any misunderstanding. A refusal or requirement issued in a previous action remains in effect unless the examining attorney specifically indicates that it has been withdrawn, obviated, or satisfied. Thus, if an examining attorney issues an Office action that does not mention an outstanding refusal or requirement that was raised in a previous action, the refusal or requirement may nonetheless be made final in a subsequent action, if the application is otherwise in condition to be made final.

### **713.03 Response to Applicant's Arguments**

When the applicant submits arguments attempting to overcome a refusal or requirement, the examining attorney must respond to the applicant's arguments.

In response to a refusal under §2(d) of the Trademark Act, 15 U.S.C. §1052(d), the applicant may respond that the cited registration should be cancelled because the registrant has not filed the required maintenance documents.

The examining attorney must not withdraw a refusal of registration under §2(d) until the Trademark database shows that the registration is cancelled or expired. To allow ample time for processing of timely filed post-registration maintenance documents, the USPTO waits until 30 days *after* the expiration of the grace period before updating its records to show that the registration is cancelled or expired.

If the examining attorney determines that 30 days have passed since the expiration of the grace period, but the Trademark database does not indicate that the registration is cancelled or expired, the examining attorney should contact the Supervisor of the Post Registration Section and request that the database be updated to show that the registration is cancelled or expired. If a party other than the examining attorney determines that 30 days have passed since the expiration of the grace period, but the Trademark database does not indicate that the registration is cancelled or expired, the party should contact the Trademark Assistance Center at (571) 272-9250 or (800) 786-9199 and request that the database be updated to show that the registration is cancelled or expired.

## **714 Final Action**

*37 CFR §2.64 Final action.*

(a) On the first or any subsequent reexamination or reconsideration the refusal of the registration or the insistence upon a requirement may be stated to be final, whereupon applicant's response is limited to an appeal, or to a compliance with any requirement, or to a petition to the Director if permitted by §2.63(b).

(b) During the period between a final action and expiration of the time for filing an appeal, the applicant may request the examiner to reconsider the final action. The request must be signed by the applicant, someone with legal authority to bind the applicant (e.g., a corporate officer or general partner of a partnership), or a practitioner qualified to practice under §11.14, in accordance with the requirements of §2.193(e)(2). The filing of a request for reconsideration will not extend the time for filing an appeal or petitioning the Director, but normally the examiner will reply to a request for reconsideration before the end of the six-month period if the request is filed within three months after the date of the final action. The Office will enter amendments accompanying requests for reconsideration after final action if the amendments comply with the rules of practice in trademark cases and the Act.

(c)(1) If an applicant in an application under section 1(b) of the Act files an amendment to allege use under §2.76 during the six-month response period after issuance of a final action, the examiner shall examine the amendment. The filing of an amendment to allege use does not extend the deadline for filing a response to an outstanding Office action, appeal to the Trademark Trial and Appeal Board, or petition to the Director.

(2) If the amendment to allege use under §2.76 is acceptable in all respects, the applicant will be notified of its acceptance.

(3) If, as a result of the examination of the amendment to allege use under §2.76, the applicant is found not entitled to registration for any reason not previously stated, applicant will be notified and advised of the reasons and of any formal requirements or refusals. The Trademark Examining Attorney shall withdraw the final action previously issued and shall incorporate all unresolved refusals or requirements previously stated in the new non-final action.

### **714.01 Not Permissible on First Action**

A first action by an examining attorney may not be a final action. An applicant is entitled to at least one opportunity to reply to any issue raised by the examining attorney.

### **714.02 Not Permissible on Suspension**

A letter of suspension cannot be made final. See [TMEP §§716-716.06](#) regarding suspension.

### **714.03 When Final Action is Appropriate**

Final action is appropriate when a clear issue has been developed between the examining attorney and the applicant, i.e., the examining attorney has previously raised all outstanding issues and the applicant has had an opportunity to respond to them.

For a second action to be made final, all requirements or refusals must have been made in the first action.

No refusal or requirement may be made final, even if it is a repeated refusal or requirement, unless the entire action is made final. Thus, if the examining attorney makes a new refusal or requirement in a second or subsequent action, a repeated refusal or requirement may not be made final, but instead should be maintained.

In an application with a claim of priority based on §44(d) in which the applicant has indicated an intent to rely on §44(e) as a basis for registration, the examining attorney may not issue a final action until the applicant submits a copy of the foreign registration. When the application is otherwise in condition for final refusal, the examining attorney must suspend action on the application pending receipt of a copy of the foreign registration. The notice of suspension must indicate all outstanding refusals or requirements that will be made final upon receipt of the foreign registration if no new issues are raised. See [TMEP §§716.02\(b\), 1003.04\(a\), \(b\)](#).

Second actions should be final actions whenever possible. While an applicant is entitled to a full and fair hearing, it is in the public interest that prosecution be limited to as few actions as is consistent with proper examination. Neither the Act nor the rules of practice give an applicant the right to an extended prosecution.

See [TMPEP §§714.05-714.05\(f\)](#) for further discussion of when an examining attorney should issue a nonfinal action rather than a final action, and [TMPEP §714.06](#) regarding final actions that are premature.

#### **714.04 Form of the Final Action**

When making an action final, the examining attorney must restate any requirements or refusals that remain outstanding, and must cite the rule(s) and/or statute(s) that provide the basis for these refusals or requirements.

The examining attorney should place all evidence in support of his or her refusal in the record at the time the final action is issued.

The final action should include a clear and unequivocal statement that the refusal or requirement is final. When there is more than one ground set out as the basis for the final action, the action may begin or conclude with a paragraph containing wording such as “This action is made FINAL” or “This is a FINAL action,” which covers all grounds.

The final action must also mention any refusals or requirements that have been obviated, withdrawn, or satisfied. See [TMPEP §713.02](#).

The examining attorney must include a statement that the only proper response to a final action is an appeal to the Board (or a petition to the Director, if permitted under 37 C.F.R. §2.63(b)), or compliance with the outstanding requirement(s). 37 C.F.R. §2.64(a).

A final action must include a six-month response clause ( see [TMPEP §705.08](#)) so that it is clear that the applicant must file a timely response to avoid abandonment of the application.

#### **714.05 Delineating New Issues Requiring Issuance of Nonfinal Action**

It is sometimes difficult to determine what constitutes a new issue requiring a new nonfinal action, rather than a final action, after receipt of a response. See [TMPEP §§714.05\(a\)–714.05\(f\)](#) regarding the propriety of issuing a final action in specific situations, and [TMPEP §§715.03\(b\)](#) and [715.04\(b\)](#) regarding new issues presented in a request for reconsideration of an examining attorney’s final action.

In a §66(a) application, the Madrid Processing Unit should be notified if a new issue is raised. See [TMPEP §1904.03\(a\)](#). However, the examining attorney cannot issue a new refusal more than 18 months after the date on which the IB forwards the request for an extension of protection to the USPTO. See [TMPEP §1904.03\(a\)](#).

#### **714.05(a) Unacceptable Amendment Proposed By Applicant**

If an applicant submits an unacceptable amendment in response to a refusal or requirement issued by the examining attorney, the amendment generally does not raise a new issue.

If the applicant submits an amendment that is not offered in response to a refusal or requirement, and the amendment is not acceptable, the examining attorney generally must issue a new nonfinal action with a six-month response clause, addressing the issues raised by the amendment and continuing all other refusals and requirements. The following are examples of amendments that would require a new nonfinal action:

(1) Amendments to the drawing, unless the examining attorney had previously required that the drawing be amended or the amendment is acceptable and does not raise other issues;

(2) Amendments to the drawing that materially alter the mark, if the examining attorney had required a new drawing because the original drawing was of poor quality that could not be reproduced, but had not previously raised the issue of material alteration. *See* TMEP §714.05(c) regarding advisory statements;

(3) Amendments to the Supplemental Register and amendments to assert acquired distinctiveness under 15 U.S.C. §1052(f), unless the amendment overcomes an outstanding refusal or requirement or is irrelevant to an outstanding refusal (*see* TMEP §714.05(a)(i)).

The following are examples of amendments that do not require a new nonfinal action:

(1) An amendment to disclaim the entire mark, which never raises a new issue because an entire mark may not be disclaimed. *See* TMEP §1213.06.

(2) An amendment withdrawing a prior amendment that was submitted in response to a refusal or requirement made by the examining attorney in an Office action (e.g., an amendment to the Supplemental Register or disclaimer) does not raise a new issue.

Moreover, evidence or amendments that are merely cumulative and are not significantly different from material previously submitted do *not* raise a new issue that requires the examining attorney to issue a nonfinal action. *See In re GTE Educ. Servs.*, 34 USPQ2d 1478, 1480 (Comm'r Pats. 1994) (finding examining attorney properly determined that no new issue had been raised in request for reconsideration of final refusal based on inadequate specimens, because the substitute specimens submitted with the request were deficient for same reason as the original specimens).

### **714.05(a)(i) Amendment to Supplemental Register or Submission of Claim of Acquired Distinctiveness**

If registration is refused under §2(e)(1), §2(e)(2), or §2(e)(4), of the Trademark Act, 15 U.S.C. §§1052(e)(1), 1052(e)(2), 1052(e)(4), or on grounds pertaining to other non-inherently distinctive subject matter (e.g., product or container configurations (*see* [TMEP §§1202.02\(b\)\(i\), \(ii\)](#)), color marks (*see* [TMEP §1202.05\(a\)](#)), or marks that comprise matter that is purely ornamental (*see* [TMEP §1202.03](#))), an amendment to the Supplemental Register or to claim acquired distinctiveness under 15 U.S.C. §1052(f) generally presents a new issue. This is true even if the examining attorney previously issued an advisory statement indicating that the examining attorney believed the mark to be unregistrable on the Supplemental Register or under §2(f). If the examining attorney determines that the amendment does not overcome the refusal, the examining attorney should issue a new nonfinal refusal of registration with a six-month response clause.

In an application based on §1(b), the applicant may respond to one of the refusals listed above by filing an allegation of use that complies with the minimum requirements of 37 C.F.R. §2.76(e), together with an amendment to the Supplemental Register or an amendment seeking registration under §2(f). If such an amendment could overcome the refusal, but the allegation of use fails to establish use of the mark in commerce or, in combination with other evidence of record, fails to demonstrate use of the subject matter as a mark, the examining attorney must issue a new nonfinal action refusing registration. *See* TMEP §§[904.07\(a\), \(b\)](#). The examining attorney must also advise the applicant as follows:

If the applicant submitted an amendment to the Supplemental Register, the examining attorney must advise the applicant that: (1) the amendment to the Supplemental Register is acceptable; (2) the refusal is moot; and (3) if the applicant amends the application back to §1(b) in response to the new refusal, the amendment to the Supplemental Register must also be withdrawn and the original refusal will be reinstated or made final, as appropriate. *See* TMEP §§[714.05\(a\)](#), [715.03\(a\)\(2\)\(A\)](#), and [715.04\(a\)](#) regarding withdrawal of a prior amendment submitted in a request for reconsideration.

If the applicant submitted an amendment seeking registration under §2(f), the examining attorney must advise the applicant that: (1) the amendment to §2(f) is acceptable, (2) the refusal is moot, and (3) if the §2(f) amendment is based solely on five years' use and the applicant amends the application back to §1(b) in response to the new refusal, the §2(f) amendment must also be withdrawn and the original refusal will

be reinstated or made final, as appropriate. See TMEP §§[714.05\(a\)](#), [715.03\(a\)\(2\)\(A\)](#), and [715.04\(a\)](#) regarding withdrawal of a prior amendment submitted in a request for reconsideration.

However, if the applicant responds to one of the refusals listed above by submitting an amendment to the Supplemental Register, but does not concurrently file an allegation of use that complies with the minimum requirements of 37 C.F.R. §2.76(e), the examining attorney must refuse registration under §23 of the Trademark Act, 15 U.S.C. §1091, on the ground that the mark is not in lawful use in commerce. See 37 C.F.R. §2.75(b); [TMEP §1102.03](#). If the applicant responds to the refusal by filing a proper allegation of use, the examining attorney will proceed as noted above.

See [TMEP §816.04](#) regarding refusal of registration after an amendment to the Supplemental Register, [TMEP §1212.02\(h\)](#) regarding refusal of registration after an applicant submits a claim of acquired distinctiveness under §2(f), and [TMEP §1212.09\(a\)](#) regarding a §2(f) claim in a §1(b) application based on prior use.

If an amendment to the Supplemental Register or to claim acquired distinctiveness under §2(f) is irrelevant to the outstanding refusal(s), and there are otherwise no new issues, the examining attorney may issue a final action. For example, if registration is refused under Trademark Act §2(a), §2(b), §2(d), §2(e)(3), or §2(e)(5), an amendment to the Supplemental Register or a claim of distinctiveness under §2(f) does *not* raise a new issue and does not preclude the examining attorney from issuing a final refusal. See *In re Juleigh Jeans Sportswear, Inc.*, 24 USPQ2d 1694, 1696 (TTAB 1992) (noting that an amendment to the Supplemental Register in response to a §2(a) refusal does not raise a new issue). Likewise, in a §66(a) application, an amendment to the Supplemental Register does not raise a new issue, because a mark in a §66(a) application is not eligible for registration on the Supplemental Register. See 15 U.S.C. §1141h(a)(4). Thus, an amendment to the Supplemental Register cannot overcome the refusal.

See TMEP §§[715.03\(b\)](#) and [715.04\(b\)](#) regarding new issues presented in a request for reconsideration of an examining attorney's final action.

### **714.05(a)(ii) Amendment of Identification of Goods/Services**

If the applicant responds to a nonfinal Office action requiring an amendment to the identification of goods/services, and the examining attorney determines that the identification is still unacceptable, generally the examining attorney must issue a final requirement to amend the identification of goods/services. There are only two exceptions to this rule:

- (1) If the amended identification is broader in scope than the original identification, *and* the prior Office action failed to advise the applicant that amendments broadening the identification are prohibited under 37 C.F.R. §2.71(a), the examining attorney may not issue a final Office action.
- (2) If the amended identification sets forth goods/services in multiple classes, but the applicant has not submitted all the requirements for a multiple-class application (e.g., specimens and fees for all classes), *and* the prior Office action failed to advise the applicant that the missing elements were required, the examining attorney may not issue a final Office action. See [TMEP §§1403–1403.01](#) regarding the requirements for multiple-class applications.

If the examining attorney issues a *nonfinal* action requiring amendment of the identification because it is indefinite, and the applicant responds with an amended identification that is definite, but is otherwise unacceptable (e.g., because it includes a registered trademark or service mark ( see [TMEP §1402.09](#))), this is not considered a new issue, and the examining attorney must issue a final Office action requiring amendment of the identification.

However, if the examining attorney issues a *final* action requiring amendment of the identification because it is indefinite, and the applicant responds with an amended identification that is definite but is otherwise unacceptable (e.g., because it includes a registered mark), the examining attorney should treat the response as incomplete, and grant the applicant additional time to cure this deficiency, pursuant to 37 C.F.R. §2.65(b).

See [TMEP §718.03\(b\)](#) for further information about granting an applicant additional time to perfect an incomplete response. *Examining attorneys are encouraged to try to resolve these issues by examiner's amendment.*

### **714.05(b) Section 2(d) Refusal Based on Earlier-Filed Application that Has Matured Into Registration**

The examining attorney must issue a new nonfinal action when first refusing registration under §2(d) of the Trademark Act, 15 U.S.C. §1052(d), as to an earlier-filed application that has registered, even if the applicant had been advised of the existence of the earlier-filed application in a prior Office action. See [TMEP §716.02\(c\)](#) regarding procedure when application is suspended pending the disposition of more than one earlier-filed conflicting application.

In a §66(a) application, a new nonfinal refusal under §2(d) may be issued more than 18 months after the date on which the IB forwards the request for extension of protection to the USPTO, provided that the USPTO had notified the IB of the conflicting application prior to expiration of the 18-month period. See [TMEP §1904.03\(b\)](#).

### **714.05(c) Advisory Statement Cannot Serve as Foundation for Final Refusal or Requirement**

Except as provided in [TMEP §714.05\(a\)\(ii\)](#), an advisory statement in an Office action indicating that a refusal or requirement will be issued if specified circumstances arise cannot serve as the foundation for issuing a final requirement or refusal in the next action. To establish the foundation for issuing a final refusal or requirement in the next Office action, an initial requirement or refusal must relate to matter that is of record at the time of the action.

### **714.05(d) Submission of Consent Agreement or Assertion of Unity of Control in Response to §2(d) Refusal**

*Consent Agreement.* If an applicant files a consent agreement in response to a *nonfinal* refusal under §2(d) of the Trademark Act, and the examining attorney finds the consent agreement insufficient to overcome the refusal, the examining attorney should issue a final refusal, assuming the application is otherwise in condition for final refusal.

If an applicant files an executed consent agreement in response to a *final* refusal under §2(d) of the Trademark Act, and the examining attorney finds the consent agreement insufficient to overcome the refusal, the examining attorney should issue a *new final* refusal, i.e., an “Examiner’s Subsequent Final Refusal,” with a six-month response clause. However, the examining attorney should not issue a subsequent final refusal if the applicant merely states that it is negotiating a consent agreement.

*Assertion of Unity of Control.* If an applicant asserts unity of control ( see [TMEP §1201.07](#)) in response to a *nonfinal* refusal under §2(d), and the examining attorney determines that unity of control has not been established, the examining attorney should issue a final refusal, assuming that the application is otherwise in condition for final refusal.

If an applicant asserts unity of control in response to a *final* refusal under §2(d), and the examining attorney determines that unity of control has not been established, the examining attorney should issue an “Examiner’s Subsequent Final Refusal, ” with a six-month response clause.

#### **714.05(e) Submission of Substitute Specimen in Response to Refusal for Failure to Show Use of the Mark in Commerce**

If the applicant responds to an Office action refusing registration by submitting a substitute specimen that does not show use of the mark in commerce for the same or a different “use-in-commerce” reason, the examining attorney must issue a final refusal because the substitute specimen does not present a new issue. See [TMPEP §904.07\(b\)](#).

If an applicant submits a substitute specimen in response to a *nonfinal* refusal for failure to show use of the mark in commerce, and unlike in the original specimen, the mark on the substitute specimen now does not agree with the mark on the drawing ( see [TMPEP §807.12](#)), but the specimen would otherwise be acceptable to show use in commerce in connection with the goods/services, the examining attorney may allow the applicant to amend the drawing if such an amendment would not constitute a material alteration of the mark. If any remaining issues can be handled by examiner’s amendment, and the mark is a standard character mark, the examining attorney may give the applicant the option to amend the drawing by examiner’s amendment. If not, the examining attorney must issue a final refusal that also gives the applicant the option to overcome the refusal by submitting a substitute drawing.

If an amendment of the drawing would be a material alteration, the examining attorney must issue a final refusal, assuming the application is otherwise in condition for final refusal, because the substitute specimen does not present a new issue.

See [TMPEP §904.07\(a\)](#) for further information about refusal of registration because the specimen does not show the mark used in commerce.

#### **714.05(f) Submission of Substitute Specimen in Response to Refusal for Failure to Show the Applied-For Mark Functioning as a Mark**

Because the examining attorney has advised the applicant of the appropriate response options, which may include the general requirements for a substitute specimen, if the applicant responds to a failure-to-function refusal by submitting a specimen that does not show the mark in commerce for a reason such as those set out in [TMPEP §904.07\(a\)](#), the examining attorney must issue a final refusal, as no new issue is presented. By contrast, if the applicant responds to the Office action refusing registration by submitting a substitute specimen that reflects failure to function as a mark for a different substantive reason, such as the examples listed in [TMPEP §904.07\(b\)](#), the examining attorney must issue a new nonfinal Office action because the substitute specimen presents a new issue.

If an applicant submits a substitute specimen in response to a *nonfinal* refusal for failure to show the applied-for mark functioning as a mark, and unlike in the original specimen, the mark on the substitute specimen now does not agree with the mark on the drawing ( see [TMPEP §807.12](#)), but the specimen would otherwise be acceptable to identify the goods/services of the applicant and indicate the source of those goods/services, the examining attorney may allow the applicant to amend the drawing if such an amendment would not constitute a material alteration of the mark. If any remaining issues can be handled by examiner’s amendment, and the mark is a standard character mark, the examining attorney may give the applicant the

option to amend the drawing by examiner's amendment. If not, the examining attorney must issue a final refusal that also gives the applicant the option to overcome the refusal by submitting a substitute drawing.

If an amendment of the drawing would be a material alteration, the examining attorney must issue a final refusal, assuming the application is otherwise in condition for final refusal, because the substitute specimen does not present a new issue.

See [TMEP §904.07\(b\)](#) for further information about refusal of registration because the specimen does not show the applied-for mark functioning as a mark.

## **714.06 Applicant's Recourse When Final Action is Premature**

If an applicant believes that a refusal to register or a requirement has been made final prematurely, the applicant must raise the issue while the application is still pending before the examining attorney. It is not a ground for appeal to the Trademark Trial and Appeal Board. TBMP §1201.02. The applicant may raise the matter by filing a request for reconsideration with the examining attorney, or by contacting the managing attorney or senior attorney in the examining attorney's law office. If the examining attorney does not withdraw the finality, the applicant may file a petition to the Director under 37 C.F.R. §2.146. See [TMEP Chapter 1700](#) regarding petitions.

If, on request for reconsideration, the examining attorney finds the final action to have been premature, the examining attorney should issue a new nonfinal action with a six-month response clause.

## **715 Action After Issuance of Final Action**

### **715.01 Proper Response to Final Action**

An applicant must respond to a final action within six months of the issuance date. 15 U.S.C. §1062(b); 37 C.F.R. §2.62(a).

In general, the only proper response to a final action is a notice of appeal to the Board, a petition to the Director if permitted under 37 C.F.R. §2.63(b)(2), or compliance with an outstanding requirement. 37 C.F.R. §2.64(a). For an application filed under Section 1(b) in which the applicant has filed a timely "insurance" extension request (i.e., in conjunction with the statement of use or within the same six-month period that the statement of use is filed; see TMEP §§[1108.03-1108.03\(a\)](#), [1109.16\(c\)](#)), when the six-month response period to a final Office action will expire before the expiration of the extension period, the applicant may respond to the final action by requesting suspension until the end of the extension period in order to overcome any refusal and/or satisfy any requirement raised in the action. See TMEP §§[716.02\(f\)](#), [716.06](#), [1109.16\(d\)](#).

After a final refusal to register on the Principal Register, an amendment requesting registration on the Supplemental Register or registration on the Principal Register under §2(f) of the Trademark Act may be a proper response in some circumstances. See TMEP §§[714.05\(a\)\(i\)](#), [816.04](#), [1212.02\(h\)](#).

### **715.02 Action After Final Action**

Once an action has been properly made final, the examining attorney normally should not change his or her position. However, this does not mean that an applicant's amendment or argument will not be considered after final action. An amendment may be accepted and entered if it places the application in condition for publication or registration, or will put the application in better form for appeal (i.e., reduce the issues on

appeal). For example, an amendment requesting registration on the Supplemental Register or on the Principal Register under §2(f) may be a proper response to a final refusal of registration on the Principal Register in some circumstances. See TMEP §§[714.05\(a\)\(i\)](#), [816.04](#), [1212.02\(h\)](#).

The examining attorney should issue an examiner's amendment ( see [TMEP §707](#) ) if it will immediately put the application in condition for publication or registration or reduce the issues on appeal.

If the applicant files a response that complies with all outstanding requirements and overcomes all outstanding refusals, the examining attorney should approve the application for publication or registration, as appropriate.

The applicant may request reconsideration after final action, within six months of the issuance date of the final action. However, filing a request for reconsideration does *not* extend the time for filing a notice of appeal to the Board or petition to the Director under 37 C.F.R. §2.63(b)(2). 37 C.F.R. §2.64(b).

See [TMEP §716.06](#) regarding suspension after final action.

### **715.03 Request for Reconsideration After Final Action**

Under 37 C.F.R. §2.64(b), the applicant may file a request for reconsideration before the deadline for filing an appeal to the Board.

However, filing a request for reconsideration does *not* extend the deadline for filing a notice of appeal or petition to the Director under 37 C.F.R. §2.63(b) (2). 37 C.F.R. §2.64(b); [TMEP §715.03\(c\)](#). The USPTO cannot extend the statutory deadline for filing an appeal. See 15 U.S.C. §1062(b); 37 C.F.R. §2.142(a); but see TMEP §[1714.01\(a\)\(ii\)](#) (concerning filing a petition to revive an abandoned application with a notice of appeal when an applicant fails to respond to a final action). Therefore, if an applicant files a request for reconsideration of a final action and wants to preserve the right to appeal if the request is unsuccessful, the applicant must file a notice of appeal (with the fee required by 37 C.F.R. §2.6) before the expiration of the six-month period for response to the final action, or the application will be abandoned. See [TMEP §§715.04-715.04\(b\)](#) for information about processing a request for reconsideration filed with a notice of appeal. If the request for reconsideration is unsuccessful, and the applicant has not timely filed a notice of appeal, the application will be abandoned for incomplete response. See 15 U.S.C. §1062(b); 37 C.F.R. §2.65(a).

The examining attorney should construe any document filed after final action that responds to the outstanding refusals or requirements as a request for reconsideration. If the request for reconsideration does not overcome or resolve all outstanding refusals and requirements, the examining attorney must follow the procedures outlined in TMEP §§[715.03\(a\)\(2\)](#) and (b) and [715.04\(a\) and \(b\)](#). Any Office action issued in connection with those procedures should discuss any new evidence submitted with the request for reconsideration.

Regardless of whether an applicant submits new evidence with a request for reconsideration, the examining attorney may introduce additional evidence directed to the issue(s) for which reconsideration is sought. TBMP §1207.04; see *In re Davey Prods. Pty Ltd.*, 92 USPQ2d 1198, 1200-01 (TTAB 2009); *In re Giger*, 78 USPQ2d 1405, 1406-07 (TTAB 2006). If the evidence in the request for reconsideration is significantly different from the evidence currently of record, the examining attorney must issue a new final refusal, i.e., an "Examiner's Subsequent Final Refusal," with a six-month response clause. See TMEP §§[715.03\(b\)](#), [715.04\(b\)](#).

In determining the appropriate action to take upon receipt of a request for reconsideration, the examining attorney must determine whether: (1) the applicant has timely filed a notice of appeal; and (2) the request for reconsideration presents a new issue. See TMEP §§[715.03\(a\)](#), [715.03\(b\)](#), and [715.04–715.04\(b\)](#) for further information as to how examining attorneys should handle requests for reconsideration.

### **715.03(a) Examining Attorney’s Action When No New Issue is Presented in Request for Reconsideration and No Notice of Appeal Has Been Filed**

If a request for reconsideration presents no new issues and the applicant has not filed a notice of appeal, the examining attorney must consider whether to: (1) approve the application for publication or registration; (2) deem the application abandoned for an incomplete response; or (3) issue an Office action.

#### **715.03(a)(1) Request for Reconsideration Resolves All Outstanding Issues**

If the request for reconsideration convinces the examining attorney that a refusal or requirement should be withdrawn, and no other issues remain, the examining attorney may withdraw the refusal or requirement and approve the application for publication or registration.

#### **715.03(a)(2) Request for Reconsideration Does Not Resolve All Outstanding Issues**

##### **715.03(a)(2)(A) Withdrawal of Prior Amendment**

If, in a request for reconsideration that does not overcome or resolve all outstanding issues, the applicant also withdraws a prior amendment submitted in response to a refusal or requirement made by the examining attorney in an Office action (e.g., an amendment to the Supplemental Register or disclaimer), this does not raise a new issue.

##### **715.03(a)(2)(B) Time Remaining in Response Period**

If the applicant has made a good-faith, but incomplete, attempt to comply, and there is more than 30 days remaining in the response period, the examining attorney must issue a “Request for Reconsideration Denied – No Appeal Filed - Time Remaining” (or, if appropriate, “SU - Request for Reconsideration Denied – No Appeal Filed - Time Remaining”) that: (1) acknowledges the request for reconsideration; (2) indicates that it is denied and explains why it does not overcome or resolve the final refusal; (3) states that the final refusal is maintained; and (4) advises the applicant that the time for appeal runs from the issuance date of the final Office action. The examining attorney should advise the applicant that the applicant has the remainder of the response period to comply with any outstanding requirement and/or to file a notice of appeal to the Board. The Office action must *not* include a six-month response clause. See [TMEP §705.08](#).

##### **715.03(a)(2)(C) No Time Remaining in Response Period – Discretion to Provide Thirty Days to Complete Response**

If the applicant has made a good-faith but incomplete attempt to comply and there is no time remaining or fewer than 30 days remaining in the six-month response period, the examining attorney has discretion under 37 C.F.R. §2.65(b) to issue an “Examiner’s Action Continuing a Final Refusal – 30 day Letter” that gives the applicant additional time to resolve the matters that remain outstanding. See [TMEP §718.03\(b\)](#). The Office action must *not* include a six-month response clause. This additional time should be granted *only* if the record indicates that the applicant can place the application in condition for approval by completing the response. See *In re P.T. Polymindo Permata*, 109 USPQ2d 1256 (Dir USPTO 2013). Granting additional

time to complete a response under 37 C.F.R. §2.65(b) does not extend the deadline for filing an appeal to the Board (or petition to the Director under 37 C.F.R. §2.63(b)(2), if appropriate). *See* 15 U.S.C. §1062(b); 37 C.F.R. §2.142(a).

If the examining attorney believes that an examiner's amendment ( *see* [TMEP §§707 et seq.](#)) will immediately put the application in condition for publication or registration, the examining attorney should attempt to contact the applicant to obtain authorization to issue an examiner's amendment.

#### **715.03(a)(2)(D) No Time Remaining in Response Period – Abandon for Incomplete Response**

If the examining attorney is not persuaded by the request for reconsideration and the applicant has not made a good-faith effort to comply with the outstanding requirements and/or to overcome all outstanding refusals, and there is no time remaining in the response period, the application must be deemed abandoned due to incomplete response. The examining attorney must issue an “Abandoned Due to Incomplete Response” action.

If the examining attorney denies the request for reconsideration and holds the application abandoned for incomplete response, the applicant may file a petition to the Director under 37 C.F.R. §2.146 to reverse the examining attorney’s holding of abandonment. However, the Director will reverse the examining attorney’s action on petition only where there has been clear error or an abuse of discretion. *In re GTE Educ. Servs.*, 34 USPQ2d 1478, 1479-80 (Comm'r Pats. 1994); *In re Legendary Inc.*, 26 USPQ2d 1478, 1479 (Comm'r Pats. 1992); [TMEP §1713.01](#). The unintentional delay standard of 37 C.F.R. §2.66 does not apply in this situation. *See* [TMEP §§1713.02](#) and [1714.01\(f\)\(ii\)\(A\)](#).

#### **715.03(a)(2)(E) Responses Signed by Unauthorized Persons, Unsigned Responses, TEAS Responses Consisting Only of a Signature, and TEAS Responses Missing Significant Data or Attachments**

If an examining attorney receives a response to a final action signed by an unauthorized person, an unsigned response to a final action, a TEAS response to a final action that consists only of a signature, or a TEAS response to a final action missing significant data or attachments, the examining attorney should not hold the application abandoned for failure to respond completely. If there are more than 30 days remaining in the response period, the examining attorney must issue a “Request for Reconsideration Denied – No Appeal Filed - Time Remaining” (or, if appropriate, “SU - Request for Reconsideration Denied – No Appeal Filed - Time Remaining”). If there are fewer than 30 days remaining in the response period, the examining attorney must issue an “Examiner’s Action Continuing a Final Refusal – 30 day Letter” that gives the applicant additional time to complete the response, with an appropriate explanation. In either case, the Office action must *not* include a six-month response clause. *See* [TMEP § 705.08](#). Granting additional time to complete a response under 37 C.F.R. §2.65(b) does not extend the deadline for filing an appeal to the Board (or petition to the Director under 37 C.F.R. §2.63(b)(2), if appropriate). *See* 15 U.S.C. §1062(b); 37 C.F.R. §2.142(a).

If the applicant then fails to submit a complete response (or a request for reconsideration) that resolves all outstanding issues, or fails to respond, the examining attorney must hold the application abandoned for failure to file a complete response. Thus, after providing the applicant one opportunity to perfect, if the

applicant fails to do so within the six-month period (or the additional 30 days), the examining attorney must then follow the standard procedure regarding incomplete responses. See [TMEP §718.03](#).

### **715.03(b) Examining Attorney's Action When New Issue or New Evidence is Presented in Request for Reconsideration and No Notice of Appeal Has Been Filed**

If the request for reconsideration includes an amendment that presents a new issue, whether related to the final refusal or not, the examining attorney must issue a nonfinal action with a six-month response clause that addresses the new issue and maintains the final refusal. For example, if the applicant's request for reconsideration contains a §2(f) claim of acquired distinctiveness in response to a final §2(e)(1) refusal, and the claim fails to place the application in condition for approval, the examining attorney must issue a nonfinal action. See [TMEP §714.05\(a\)\(i\)](#). However, if the applicant withdraws a prior amendment submitted in response to a refusal or requirement made by the examining attorney in an Office action (e.g., an amendment to the Supplemental Register or §2(f) claim of acquired distinctiveness submitted in response to a §2(e)(1) refusal or a disclaimer submitted in response to a requirement), this does not raise a new issue. See [TMEP §§715.03\(a\)\(2\)\(A\)](#) and [715.04\(a\)](#).

Whenever the examining attorney issues a new *nonfinal* action after review of an applicant's request for reconsideration, the Office action should explain that the applicant must respond to all requirements or refusals within six months of the issuance date of the action, but that the applicant should not file an appeal to the Board because an appeal would be premature under 15 U.S.C. §1070 and 37 C.F.R. §2.141(a). If the applicant's response to the new nonfinal action does not resolve all outstanding requirements or refusals and put the application in condition for publication or registration, the examining attorney must issue an "Examiner's Subsequent Final Refusal" with a six-month response clause. This provides the applicant the opportunity to file an appeal.

Evidence or amendments that are merely cumulative and are not significantly different from material previously submitted do *not* raise a new issue that requires the examining attorney to issue a new final or nonfinal action. *In re GTE Educ. Servs.*, 34 USPQ2d 1478, 1480 (Comm'r Pats. 1994) (finding examining attorney properly determined that no new issue had been raised in request for reconsideration of final refusal based on inadequate specimens, because the substitute specimens submitted with the request were deficient for the same reason as original specimens).

If the request for reconsideration does not raise a new issue, but presents new evidence that is significantly different from evidence previously submitted, the examining attorney must issue an "Examiner's Subsequent Final Refusal," with a six-month response clause. This provides applicant with the opportunity to respond before filing an appeal. Any response to the subsequent final refusal will be treated as a new request for reconsideration and processed according to the guidelines set forth in [TMEP §§715.03–715.03\(b\)](#).

*Example:* If an applicant files an executed consent agreement in response to a final refusal under §2(d) of the Trademark Act, and the examining attorney finds the consent agreement insufficient to overcome the refusal, the examining attorney must issue an "Examiner's Subsequent Final Refusal." However, the examining attorney should not issue a subsequent final refusal if the applicant merely states that it is negotiating a consent agreement. See [TMEP §714.05\(d\)](#).

*Example:* The examining attorney must issue an "Examiner's Subsequent Final Refusal" if the applicant asserts unity of control ( see [TMEP §1201.07](#) ) in response to a final refusal under §2(d), and the examining attorney determines that unity of control has not been established. See [TMEP §714.05\(d\)](#).

Submission of new arguments in response to the same refusal or requirement does not raise a new issue that requires the examining attorney to issue a subsequent final or nonfinal action. Generally, if the same refusal

or requirement was made before, the examining attorney does not have to issue a subsequent final or nonfinal action.

See [TMPEP §§714.05–714.05\(f\)](#) for further information about delineating new issues that require issuance of a nonfinal action.

Sometimes action on an application is suspended after a final refusal has issued. If the grounds for refusal remain operative after the application is removed from suspension and no new issues have been raised, the examining attorney must issue an “Examiner’s Subsequent Final Refusal,” with a six-month response clause. See [TMPEP §716.06](#).

In a §66(a) application, the examining attorney cannot issue a new refusal more than 18 months after the date the IB forwards the request for extension of protection to the USPTO. See [TMPEP §1904.03\(a\)](#).

### **715.03(c) Time for Appeal Runs from Issuance Date of Final Action**

Filing a request for reconsideration does not stay the time for responding to a final refusal. See 15 U.S.C. §1062(b); 37 C.F.R. §§2.64(b), 2.142(a). If the examining attorney denies an applicant’s request for reconsideration, the deadline for filing a notice of appeal to the Board (or petition to the Director if permitted by 37 C.F.R. §2.63(b)(2)) runs from the issuance date of the final action. If this deadline has expired and the applicant has not filed a notice of appeal, the application will be abandoned due to an incomplete response.

15 U.S.C. §1062(b); 37 C.F.R. §2.65(a). The applicant may not file a petition to revive under 37 C.F.R. §2.66, based on unintentional delay. See [TMPEP §1714.01\(f\)\(ii\)\(A\)](#). The applicant’s recourse is to file a petition to the Director under 37 C.F.R. §2.146 to reverse the examining attorney’s holding of abandonment.

However, the Director will reverse the examining attorney’s action on petition only where there has been clear error or an abuse of discretion. See [TMPEP §1713.01](#).

### **715.04 Request for Reconsideration Filed in Conjunction With Notice of Appeal**

The Board has jurisdiction over an application upon the filing of the notice of appeal. In response to a request from an applicant, the Board may remand an application to the examining attorney for consideration of specific facts or issues. 37 C.F.R. §2.142(d). See TBMP §1209 regarding remand during an ex parte appeal, TBMP §515 regarding remand to the examining attorney during an inter partes proceeding, and [TMPEP §1504.05](#) regarding requests for remand.

If an applicant files a notice of appeal with a request for reconsideration, the Trademark Trial and Appeal Board will acknowledge the appeal, suspend further proceedings with respect to the appeal, including the applicant’s time to file an appeal brief, and remand the application to the examining attorney for review of the request for reconsideration. TBMP §1204. See TBMP Chapter 1200 and [TMPEP §§1501–1501.07](#) for further information about ex parte appeals.

If, upon remand, the examining attorney determines that the outstanding refusal or requirement should be withdrawn, the examining attorney may approve the application for publication or registration. In this

situation, the appeal is moot. If there are remaining unresolved refusals, the request for reconsideration should be denied. *See* [TMEP §715.04\(a\)](#).

### **715.04(a) Examining Attorney's Action When No New Issue is Presented in Request for Reconsideration and Notice of Appeal Has Been Filed**

If the request for reconsideration does not overcome or resolve the issues on appeal, and no new issue is presented therein, the examining attorney must issue a “Request for Reconsideration Denied – Return to TTAB” (or, if appropriate, “SU - Request for Reconsideration Denied - Return to TTAB”) that: (1) acknowledges the request for reconsideration; (2) indicates that it is denied and explains why it does not overcome all refusals or satisfy all requirements; (3) identifies the final refusal(s) and/or requirements that are maintained and any that are satisfied or withdrawn; and (4) advises the applicant that the Board will be notified to resume the appeal. An Office action denying reconsideration of the final action must *not* include a six-month response clause.

If, in a request for reconsideration that does not overcome or resolve the issues on appeal, the applicant also withdraws a prior amendment submitted in response to a refusal or requirement made by the examining attorney in an Office action (e.g., an amendment to the Supplemental Register or disclaimer), this does not raise a new issue.

### **715.04(b) Examining Attorney's Action When New Issue or New Evidence is Presented and Notice of Appeal Has Been Filed**

If the request for reconsideration includes an amendment that presents a new issue, the examining attorney must issue a new nonfinal Office action with a six-month response clause that addresses the new issue and maintains the refusals or requirements previously made final. For example, if the applicant’s request for reconsideration contains a §2(f) claim of acquired distinctiveness in response to a final §2(e)(1) refusal, and the claim fails to place the application in condition for approval, a nonfinal action may be appropriate. *See* [TMEP §714.05\(a\)\(i\)](#).

Whenever the examining attorney issues a new *nonfinal* action after remand of an application by the Board, the Office action should explain that the applicant must respond to all refusals and/or requirements within six months of the issuance date of the action, but should not file another appeal to the Board. If the applicant’s response to the new nonfinal action does not resolve all outstanding refusals and/or requirements and put the application in condition for publication or registration on the Supplemental Register, the examining attorney must issue an “Examiner’s Subsequent Final Refusal,” with the six-month response clause omitted from the action. The subsequent final action should also notify the applicant that the appeal will be resumed. When proceedings with respect to the appeal are resumed, the Board will take further appropriate action with regard to any additional ground of refusal. *See* TBMP §1209.01.

If the request for reconsideration does not raise a new issue, but presents new evidence that is significantly different from evidence previously submitted by the applicant, the examining attorney must issue an “Examiner’s Subsequent Final Refusal,” with a six-month response clause. This provides the applicant with the opportunity to respond before the appeal. For example, if an applicant files a consent agreement in response to a final refusal under §2(d) of the Trademark Act, and the examining attorney finds the consent agreement insufficient to overcome the refusal, the examining attorney must issue an “Examiner’s Subsequent Final Refusal” that discusses applicant’s consent agreement. However, the examining attorney should not issue a subsequent final refusal if the applicant merely states that it is negotiating a consent agreement. *See*

[TMEP §714.05\(d\)](#). Any response to the subsequent final action will be treated as a new request for reconsideration and processed according to the guidelines set forth in [TMEP §§715.04–715.04\(b\)](#).

Evidence or amendments that are merely cumulative and are not significantly different from material previously submitted do *not* raise a new issue that requires the examining attorney to issue a new nonfinal or subsequent final action. *In re GTE Educ. Servs.*, 34 USPQ2d 1478, 1480 (Comm'r Pats. 1994) (finding examining attorney properly determined that no new issue had been raised in request for reconsideration of final refusal based on inadequate specimens, because the substitute specimens submitted with the request were deficient for the same reason as the original specimens).

Submission of new arguments in response to the final refusal or requirement does not raise a new issue that requires the examining attorney to issue a new nonfinal or subsequent final action.

See [TMEP §§714.05–714.05\(f\)](#) for further information about delineating new issues that require issuance of a nonfinal action.

In a §66(a) application, the examining attorney cannot issue a new refusal more than 18 months after the date the IB forwards the request for extension of protection to the USPTO. See [TMEP §1904.03\(a\)](#).

## 716 Suspension of Action by USPTO

*37 CFR §2.67 Suspension of action by the Patent and Trademark Office.*

Action by the Patent and Trademark Office may be suspended for a reasonable time for good and sufficient cause. The fact that a proceeding is pending before the Patent and Trademark Office or a court which is relevant to the issue of registrability of the applicant's mark, or the fact that the basis for registration is, under the provisions of Section 44(e) of the Act, registration of the mark in a foreign country and the foreign application is still pending, will be considered prima facie good and sufficient cause. An applicant's request for a suspension of action under this section filed within the 6-month response period ( *see* §2.62) may be considered responsive to the previous Office action. The first suspension is within the discretion of the Examiner of Trademarks and any subsequent suspension must be approved by the Director.

The term "suspension of action" means suspending action *by the examining attorney*. It does not mean suspending or extending an applicant's time to respond. The Trademark Act requires that an applicant respond within six months of an examining attorney's Office action, and the examining attorney has no discretion to suspend or extend the time for the applicant's response. *See* 15 U.S.C. §1062(b). However, an applicant's timely filed request for suspension for good cause may constitute a proper response to an Office action.

When an acceptable ground for suspension is immediately apparent (e.g., prior-filed applications for conflicting marks are pending), the examining attorney will suspend an application only when the application is in condition for approval or final action, except for the matter on which suspension is based. Otherwise, the applicant must request suspension. See [TMEP §716.02](#) regarding the circumstances under which action may be suspended.

### 716.01 Form of Suspension Notice

In a suspension notice, the examining attorney must specifically state that action is suspended and must omit any reference to a six-month response period. If the application is in condition for a final action but for the matter necessitating suspension, the notice of suspension must clearly indicate which refusals or requirements have been resolved, if any, and which will be made final when the application is removed

from suspension. When the application is removed from suspension, the examining attorney must promptly issue a final action, assuming that no new issues have arisen.

## **716.02 Circumstances Under Which Action May Be Suspended**

Under 37 C.F.R. §2.67, an examining attorney has the discretion to suspend an application “for good and sufficient cause.” The most common reasons for suspension of an application are discussed below.

As a general rule, the USPTO will not suspend an application to give an applicant time to secure a consent agreement.

Any request to stay a deadline for responding to an Office action pending disposition of a petition to the Director should be directed to the Deputy Commissioner for Trademark Examination Policy. If such a request is sent to the examining attorney, the examining attorney should forward it to the Office of the Deputy Commissioner for Trademark Examination Policy. The examining attorney should *not* suspend action on an application pending a decision on petition to the Director except upon express permission from the Office of the Deputy Commissioner for Trademark Examination Policy. See 37 C.F.R. §2.146(g); [TMEP §1705.06](#).

### **716.02(a) Applicant’s Petition to Cancel Cited Registration**

If the examining attorney refuses registration under §2(d) of the Trademark Act in view of the mark in a prior registration, the applicant may file a petition to cancel the registration under 15 U.S.C. §1064 and, within a proper response period, inform the examining attorney that the petition to cancel has been filed.

This will constitute a proper response to the §2(d) refusal, and may be done by telephone, if there are no other outstanding issues that require a written response. The examining attorney will then suspend further action until the termination of the cancellation proceeding, if the application is otherwise in condition for approval or final refusal. The applicant should provide the number of the cancellation proceeding, if available; however, if the applicant does not provide the cancellation number, the examining attorney may ascertain it from USPTO records.

The examining attorney should suspend further action only if the applicant states that the cancellation proceeding has already been filed or is being filed concurrently with the response to the Office action.

Although the examining attorney will determine the status of the cancellation proceeding through a routine status check ( see [TMEP §716.04](#)), the applicant may call or e-mail to advise the examining attorney when the registration has been cancelled, in order to avoid a delay in removing the application from suspension.

The examining attorney must not remove the application from suspension and withdraw the §2(d) refusal until the Trademark database shows that the registration is cancelled or expired.

When an application is suspended pending resolution of a cancellation proceeding, it is possible that a settlement agreement filed in the proceeding may be contingent upon the approval of an amendment or acceptance of a consent agreement filed in the suspended application, and the consequent approval of the application for publication. The Board has no jurisdiction over the application that is pending before the examining attorney. Thus, the applicant must file the amendment or consent agreement with the examining attorney, not with the Board. The examining attorney must consider the amendment or agreement and take appropriate action, including approving the application for publication, if appropriate. See TBMP §605.03(c).

In rare circumstances, the examining attorney may issue an Office action advising an applicant of a conflicting mark in an earlier-filed application and, during the response period, the mark registers and the applicant files a petition to cancel the registration. Although the applicant may respond to the Office action by informing the examining attorney that the petition to cancel has been filed, the examining attorney may not suspend under these circumstances because the application would not be in condition for final refusal if the registration is not cancelled. The examining attorney must first issue a non-final Office action refusing registration. The applicant may then respond by requesting suspension pending the outcome of the cancellation proceeding.

See [TMEP §716.02\(e\)](#) regarding suspension pending cancellation of a cited registration under §8 or §71 of the Act or expiration of a cited registration for failure to renew under §9 of the Act.

### **716.02(b) Submission of Copy of Foreign Registration in §44(d) Application**

When an applicant who claims the benefit of a prior foreign application under §44(d) of the Act, 15 U.S.C. §1126(d), is required to submit a copy of a foreign registration, the applicant may respond to the requirement by stating that the foreign application is still pending. The examining attorney should then suspend further action pending receipt of a copy of the foreign registration, if the application is otherwise in condition for approval for publication, allowance for registration on the Supplemental Register, or final action. See [TMEP §1003.04\(a\)](#).

If an applicant asserts a claim of priority under §44(d) in addition to another basis, before suspending the application, the examining attorney must inquire whether the applicant wishes to retain §44(e) as a second basis for registration (based on the foreign registration that will issue from the foreign application on which the applicant relied for priority). However, if the application is filed via TEAS and indicates that the applicant is *not* relying on §44(e) as an additional basis for registration and is only asserting §44(d) to receive a priority filing date, the examining attorney will not inquire and will not suspend further action, but must ensure that the Trademark database is updated accordingly. See [TMEP §1003.04\(b\)](#) for further information.

If the applicant responds that it intends to assert a dual basis for registration and the application is otherwise in condition for approval for publication, allowance for registration on the Supplemental Register, or final action, the examining attorney should suspend further action pending receipt of the foreign registration.

During the suspension period, the examining attorney will issue an Office action approximately every six months after suspension to inquire as to the status of the foreign application. If the applicant does not respond to the inquiry, the application will be abandoned. See [TMEP §716.05](#).

The examining attorney may suspend the application pending receipt of the foreign registration only in a §44(d) application before issuance of the Notice of Allowance. In a §44(e) application, the examining attorney will not suspend the application pending submission of the foreign registration, unless the applicant establishes that it cannot obtain a copy of the foreign registration due to extraordinary circumstances (e.g., war or natural disaster). [TMEP §1004.01](#). However, the examining attorney may suspend a §44(e) application pending receipt of proof of renewal of the foreign registration. [TMEP §1004.01\(a\)](#).

### **716.02(c) Conflicting Marks in Pending Applications**

When there are conflicting marks in pending applications, action on the application with the later effective filing date will be suspended (if the application appears to be otherwise in condition for publication or issue or for a final action) until the mark in the conflicting application with the earlier effective filing date is either

registered or abandoned. 37 C.F.R. §2.83(c). See [TMEP §§1208–1208.02\(f\)](#) for more information about conflicting marks in pending applications.

If the examining attorney has cited an earlier-filed pending application, the applicant may respond by arguing that there is no likelihood of confusion between the marks. If the examining attorney is not persuaded by the applicant's arguments, the examining attorney should suspend the later-filed application pending disposition of the earlier-filed conflicting application. The suspension notice should include a statement that the applicant's arguments were not persuasive. It is not necessary to address the merits of the applicant's arguments prior to the initial suspension. See [TMEP §716.03](#) regarding the applicant's request to remove an application from suspension.

If the examining attorney discovers that an earlier-filed pending application was abandoned, but that a petition to revive is pending, the examining attorney should suspend the later-filed application pending disposition of the petition to revive. If the petition to revive is granted, the later-filed application will remain suspended until the mark in the earlier-filed application is registered or the earlier-filed application is again abandoned.

When an application is suspended pending the disposition of more than one earlier-filed conflicting application, and one of the conflicting applications matures into registration, the examining attorney will normally not issue a refusal of registration until all the remaining conflicting application(s) are registered or abandoned, in order to avoid issuing piecemeal refusals. However, if deemed appropriate, the examining attorney does have the discretion to issue a refusal of registration under §2(d) in this situation.

Sometimes, the applicant will file an opposition to the registration of the earlier-filed conflicting mark. In this situation, it is possible that a settlement agreement filed in the Board proceeding may be contingent upon the approval of an amendment or acceptance of a consent agreement filed in the suspended application, and the consequent approval of the application for publication. The Board has no jurisdiction over the application that is pending before the examining attorney. Thus, the applicant must file the amendment or consent agreement with the examining attorney, not with the Board. The examining attorney must consider the amendment or agreement and take appropriate action. See TBMP §605.03(c).

### **716.02(d) Inter Partes or Court Proceeding**

When an examining attorney learns that a proceeding relevant to the registrability of an applicant's mark is pending before the Trademark Trial and Appeal Board or a court, the examining attorney should call the proceeding to the applicant's attention. If the applicant is not a party to the inter partes or court proceeding, the examining attorney must explain why the proceeding is relevant to the registrability of the applicant's mark. If the examining attorney believes the proceeding may result in a decision that supports a refusal of registration of the applicant's mark, the examining attorney must issue the refusal and give the applicant an opportunity to respond before suspending the application.

When an applicant requests suspension because a proceeding relevant to the registrability of the applicant's mark is pending before the Board or a court, the applicant must submit a copy of the relevant pleadings, the docket number of the proceeding, and a written explanation of why the proceeding is relevant to the registrability of the mark. Normally, a court proceeding is not considered relevant to the registrability of a mark unless the remedy requested in the proceeding is cancellation, abandonment, or amendment of a relevant application or registration. However, when resolution of the court action requires the court to consider questions of USPTO policy or procedure, the examining attorney should not assume that the court would prefer to decide such questions absent the USPTO's decision in the consideration of an application. In these instances, action on an application should generally not be suspended. It is important to review

the relevant pleadings, including the complaint and answer, before determining whether suspension is appropriate. The Office of the Solicitor may be consulted if there is a question as to whether suspension of the application is appropriate.

A third party who wishes to request suspension of a pending application because a proceeding relevant to the registrability of the mark is pending before a court must do so by filing a letter of protest. See [TMEP §1715–1715.06](#). The litigation must be specifically identified and a copy of the relevant pleadings must be enclosed. The litigation must involve a federally registered mark or prior pending application, and the protestor must allege that there is a likelihood of confusion between this mark and the mark in the application that is the subject of the letter of protest. Normally, a court proceeding is not considered relevant to the registrability of a mark unless the remedy requested in the proceeding is abandonment or amendment of the application that is the subject of the letter of protest. If the letter of protest is granted, the examining attorney is informed that a request for suspension has been received based on an alleged likelihood of confusion with a registered mark or prior pending application that is the subject of pending litigation.

Before an application is suspended, the applicant must respond to all outstanding issues raised in the examining attorney's Office action that are not related to the proceeding. The examining attorney should not suspend the application unless all matters not related to the proceeding are resolved or in condition for final action.

See [TMEP §716.02\(a\)](#) regarding suspension pending disposition of an applicant's petition to cancel a cited registration under 15 U.S.C. §1064, [TMEP §716.02\(c\)](#) regarding suspension of later-filed conflicting marks, [TMEP §716.03](#) regarding the applicant's request to remove an application from suspension, and TBMP §605.03(c) regarding filing an amendment or consent agreement in a pending application owned by the plaintiff pursuant to a settlement agreement between the parties in an ex parte proceeding before the Board.

### **716.02(e) Pending Cancellation or Expiration of Cited Registration**

When the owner of a registration submits a timely affidavit or declaration of continued use or excusable nonuse under 15 U.S.C. §1058 (“§8 affidavit”) or §1141k (“§71 affidavit”) or an application for renewal under 15 U.S.C. §1059, the USPTO's automated records are updated to indicate receipt of the document and the action taken on the document. The USPTO's automated records are updated 30 days after the grace period expires to indicate that a registration is cancelled or expired if:

- (1) No §8 or §71 affidavit has been filed before the end of the six-month grace period following the sixth year after the date of registration (or publication under §12(c) of the Trademark Act, 15 U.S.C. §1062(c), for §8 affidavits);
- (2) No §8 or §71 affidavit has been filed before the end of the six-month grace period following the end of any ten-year period after the date of registration; or
- (3) No §9 renewal application has been filed before the end of the six-month grace period following the expiration of the previous term of registration.

See [TMEP §§1602–1602.04](#) regarding the duration of a registration, [TMEP §1604.04](#) regarding the due dates for §8 affidavits, [TMEP §1606.03](#) regarding the due dates for §9 renewal applications, and [TMEP §1613.04](#) regarding the due dates for §71 affidavits.

To avoid inadvertent cancellation or expiration of a registration due to a delay in entering a timely filed affidavit or renewal application into the records of the USPTO, the USPTO waits until 30 days *after* the expiration of the grace period for filing the §8 or §71 affidavit or §9 renewal application before updating its records to show that the registration is cancelled or expired.

The examining attorney must confirm the status of the cited registration to ensure that it is still active before issuing any refusal of registration under Trademark Act §2(d) or filing a brief on appeal of a §2(d) refusal.

If the examining attorney is ready to issue a *nonfinal* refusal of registration under §2(d), and the Trademark database shows that the registration is still active, the examining attorney must issue the refusal even if the grace period for filing a §8 or §71 affidavit or §9 renewal application for the cited registration has passed and the Trademark database does not indicate that the owner has filed a §8 or §71 affidavit or §9 renewal application. The examining attorney must not suspend the application, but must advise the applicant that the grace period for filing the §8 or §71 affidavit or §9 renewal application has passed and that it appears that the registration may be subject to cancellation under §8 or §71 and/or expiration under §9.

If the examining attorney is ready to issue a *final* refusal of registration under §2(d), and the cited registration is in the grace period for filing a §8 or §71 affidavit or §9 renewal application, the examining attorney must suspend action pending a determination of whether the registrant timely files, and the USPTO accepts, the §8 or §71 affidavit and/or whether the registration is renewed. If the registrant timely files, and the USPTO accepts, the §8 or §71 affidavit and/or the cited registration is renewed, the examining attorney will remove the application from suspension and issue the final refusal.

Similarly, if the examining attorney is ready to issue a denial of a request for reconsideration of a final refusal of registration under §2(d), and the cited registration is in the grace period for filing a §8 or §71 affidavit or §9 renewal application, the examining attorney must suspend action. If the registrant timely files, and the USPTO accepts, the §8 or §71 affidavit and/or the cited registration is renewed, the examining attorney will remove the application from suspension and issue an Examiner's Subsequent Final Refusal, thereby giving the applicant six months in which to file an appeal.

If the grace period for filing a §8 or §71 affidavit or §9 renewal application for the cited registration has passed, and the examining attorney is ready to issue a *final* refusal of registration under §2(d), or a denial of a request for reconsideration of a final refusal of registration under §2(d), the examining attorney must not issue the action until the USPTO's automated records indicate that the owner has filed the §8 or §71 affidavit or §9 renewal application, and the USPTO has accepted the §8 or §71 affidavit or granted renewal.

Instead, the examining attorney must suspend action for six months pending final disposition of the cited registration.

If the grace period for filing a §8 or §71 affidavit or §9 renewal application for the cited registration has passed, and the examining attorney is ready to write an appeal brief, the examining attorney must request a remand so that the application can be suspended pending final disposition of the cited registration. The Board will issue an order suspending the appeal and remanding the case to the examining attorney. If the cited registration is cancelled or expires, the examining attorney must withdraw the §2(d) refusal and notify the applicant that it has been withdrawn. If an appropriate affidavit or renewal application is filed for the cited registration, the examining attorney must notify the Board; the Board will resume proceedings and reset the time for filing the examining attorney's appeal brief. Similarly, if the cited registration is cancelled or expires, but the §2(d) refusal is only one of the issues on appeal, the examining attorney must notify the Board of the status of the cited registration. The Board will resume proceedings and reset the time for filing a brief. See TBMP §1213 regarding the suspension of an ex parte appeal pending cancellation of the cited registration under §8, §9, or §71 of the Act.

The examining attorney cannot withdraw a refusal of registration under §2(d) until the Trademark database shows that the registration is cancelled or expired. If the examining attorney determines that 30 days have passed since the expiration of the grace period, but the Trademark database does not indicate that the registration has been cancelled or expired, the examining attorney should contact the Supervisor of the Post

Registration Section and request that the database be updated to show that the registration is cancelled or expired.

See [TMEP §1611](#) for information about how the owner of a registration who has not timely filed a §8 or §71 affidavit or §9 renewal application may expedite the cancellation or expiration of its own registration.

### **716.02(f) Pending Expiration of “Insurance” Extension Request**

When the applicant files a timely “insurance” extension request (i.e., in conjunction with the statement of use or within the same six-month period that the statement of use is filed; see [TMEP §§1108.03-1108.03\(a\)](#), [1109.16\(c\)](#)), there are rare instances when the six-month period for response to a final Office action may expire before the statutory period for filing the statement of use. If the applicant can overcome any grounds for refusal and/or comply with any requirement raised in the final action before expiration of the time for filing the statement of use, but not within the time for responding to the final Office action, the applicant must still file a timely response to the Office action. The response must state that the applicant intends to comply with the statutory requirements for filing the statement of use on or before the expiration of the statutory filing period and request suspension of the application. The examining attorney should then suspend the application for only the amount of time remaining in the statutory period for filing the statement of use. The applicant will then have until the end of the extension period to overcome any grounds for refusal and/or comply with any requirement.

*Example:* The notice of allowance issues on September 30, 2010 and a statement of use and/or extension request is due on or before March 30, 2011. The applicant files a statement of use on October 15, 2010. On November 5, 2010, the examining attorney issues an Office action regarding the acceptability of the specimen and the applicant responds on November 8, 2010 but does not correct the specimen deficiency. The examining attorney then issues a final Office action on November 29, 2010 regarding the specimen issue. If the applicant files a timely “insurance” extension request on or before March 30, 2011, this would extend the time to perfect the statement of use to September 30, 2011. However, the applicant must still respond to the final Office action by May 29, 2011 (i.e., within six months of issuance of the final Office action). The response must include a request to suspend the application or the application will be abandoned for failure to respond. The examining attorney would then suspend the application until September 30, 2011, which is the date of expiration of the extension period and the deadline for complying with the statutory requirements for a statement of use.

If the applicant files a response to the final Office action prior to the expiration of the statutory period for filing a statement of use, and the response overcomes the grounds for refusal and/or complies with any requirement, the examining attorney will remove the application from suspension and withdraw the refusal.

If the applicant files a response to the final Office action prior to expiration of the deadline for filing the statement of use, but the response does not overcome the grounds for refusal and/or comply with any requirement, the examining attorney must issue an “Examiner’s Subsequent Final Refusal,” thereby reissuing the final refusal, and the applicant will have six months to respond. See [TMEP §§716.06](#), [1109.16\(d\)](#).

### **716.02(g) Pending Correction of or Limitation to an International Registration**

In a §66(a) application, if it appears that there is an error in the classification of the goods/services in the underlying international registration, the applicant may contact the International Bureau (IB) to request correction of or a limitation to the international registration. In such cases, the USPTO will suspend prosecution of the §66(a) application if the applicant requests suspension in a timely response to an Office

action requiring amendment of the identification, or any other matter, and supports the suspension request with a copy of the request for correction filed with the IB. See [TMEP §1904.02\(c\)\(iv\)](#).

### **716.02(h) Pending Recordation of an Assignment Document**

During initial examination, the examining attorney should not suspend action or delay issuance of a final action to await recordation of a document. However, in an application under §1 or §44, if the applicant states that a request to record a change of ownership has been filed with the Assignment Recordation Branch but is not yet recorded, and the application is in condition to be approved for publication or registration on the Supplemental Register, the examining attorney should suspend the application until the document has been recorded and the information regarding the assignment or the change of name has been entered into the Trademark database. In an application under §66(a), if the applicant states that a request to record a change of ownership has been filed with the IB but is not yet recorded, and the application is in condition to be approved for publication, the examining attorney should suspend action pending recordation of the document and entry of the information into the Trademark database. See [TMEP §§502.02\(a\)-\(c\)](#).

Similarly, during examination of the statement of use in an application under §1(b), the examining attorney should withhold final approval for registration until the relevant document has been recorded and the information regarding the assignment or the applicant's new name has been entered in the Trademark database. See [TMEP §502.02\(c\)](#).

### **716.02(i) Pending Registry Agreement with ICANN for Marks Comprised Solely of gTLDs for Domain-Name Registry Operator and Registrar Services**

With regard to an application for a mark composed solely of a gTLD for domain-name registry operator and registrar services, the examining attorney may issue an information request under Trademark Rule 2.61(b), 37 C.F.R. 2.61(b), that requires the applicant to submit a verified statement indicating whether the applicant has in place, or has applied for, a Registry Agreement with the Internet Corporation for Assigned Names and Numbers ("ICANN") designating the applicant as the Registry Operator for the gTLD identified by its mark. If, in response, the applicant indicates that it has a currently pending application before ICANN for a Registry Agreement for the gTLD identified by its mark, and the applicant has otherwise demonstrated that the mark consisting of the gTLD could function as a mark, the examining attorney may suspend the application until the resolution of the applicant's pending application with ICANN. See [TMEP §§1215.02\(d\) 1215.02\(d\)\(iv\)](#) regarding examination of marks comprised solely of gTLDs for domain-name registry operator and registrar services.

### **716.03 Applicant's Arguments Against Suspension**

If an examining attorney suspends action on an application, and the applicant believes the suspension is improper, the applicant may file a request to remove the application from suspension. The applicant should state the reasons for the belief that the suspension is improper and attach any relevant evidence.

If persuaded by the request, the examining attorney should remove the application from suspension, resume examination of the application, and take appropriate action.

If not persuaded by the request, the examining attorney must issue a new suspension action *that addresses the applicant's arguments and explains the reasons why the request is not granted*. The applicant's recourse is to file a petition to the Director to review the examining attorney's action continuing the suspension. The

Director will reverse the examining attorney's action only where there has been clear error or an abuse of discretion. See [TMEP Chapter 1700](#) for information about petitions.

If an applicant argues preemptively against suspension based on a conflicting mark in a prior-filed application, and the examining attorney finds the arguments unpersuasive, the examining attorney must include a statement to that effect in the suspension notice. The recommended practice is to briefly address the merits of the unpersuasive arguments prior to an initial suspension.

#### **716.04 Suspended Docket Checked**

A legal instruments examiner ("LIE") will review each case in the suspended docket at least every six months to determine whether continued suspension is appropriate. If the LIE determines that the application should remain suspended, he or she should report the suspension check in the Trademark database. If suspension is no longer necessary, the LIE will notify the examining attorney and the examining attorney will take the appropriate action.

#### **716.05 Inquiry by Examining Attorney Regarding Suspended Application**

In certain circumstances, if the application has been suspended for six months or more, the examining attorney will issue an Office action inquiring as to the status of the matter on which suspension was based. For example, if action is suspended pending the receipt of a copy of a foreign registration or proof of renewal of a foreign registration, the examining attorney will inquire every six months during the suspension period as to the status of the foreign application or registration. Similarly, for applications that are suspended pending the outcome of a civil action, the examining attorney will inquire every six months as to the status of the proceeding. If the foreign application or the civil action is still pending, a statement by the applicant to this effect is a proper response.

If the applicant does not respond to the suspension inquiry, the application will be abandoned for failure to respond. To expedite processing, the USPTO recommends that the applicant's response to a suspension inquiry be filed through TEAS, at <http://www.uspto.gov/trademarks/teas/index.jsp>, using the "Response to Suspension Inquiry or Letter of Suspension" form.

The examining attorney should *not* issue any inquiry if the relevant information is available in the USPTO databases, including information regarding the status of a proceeding pending in the USPTO (e.g., an inter partes proceeding).

#### **716.06 Suspension After Final Action**

If the examining attorney determines that action on an application should be suspended after issuance of a final refusal, the examining attorney must issue a suspension notice. This may occur, for example, when the applicant files a petition to cancel a cited registration or in the limited circumstance in a Section 1(b) application when the applicant files a timely "insurance" extension request but the six-month response period may expire before the end of the extension period. See [TMEP §§716.02\(a\) and \(f\)](#), [1109.16\(d\)](#). The examining attorney should not "withdraw the finality" of the refusal in order to suspend; however, in the suspension notice, the examining attorney should inform the applicant that the refusal of registration is continued but that it is not necessary to respond to the final refusal until the application is removed from suspension.

If the application is eventually removed from suspension and the grounds for refusal remain operative, the examining attorney should issue an “Examiner’s Subsequent Final Refusal,” thereby reissuing the final refusal, and the applicant will have six months to respond. It is inappropriate to remove the case from suspension and immediately declare the application abandoned.

## 717 Reissuing an Office Action

Sometimes, an Office action must be reissued because the action has been returned as undeliverable or because the applicant notifies the USPTO that the applicant did not receive the Office action. In these situations, the USPTO will not extend the deadline for response, unless the Office action was sent to the wrong address due to a USPTO error.

If there was a USPTO error, the USPTO will issue an Office action notifying the applicant that it may view and print the Office action via the TSDR portal on the USPTO website at <http://tsdr.uspto.gov/>. The applicant will be given a new response period.

If there was no USPTO error, the USPTO will issue an Office action notifying the applicant that it may view and print the original Office action via the TSDR portal on the USPTO website, but that the deadline for applicant’s response will not be extended.

A “USPTO error in sending the Office action to the wrong address” means that the USPTO either entered the correspondence address incorrectly or failed to enter a proper notice of change of address filed *before* the date on which the action was issued. The transmittal of a response on letterhead bearing a new address is *not* a proper notice of change of address. The applicant must specifically instruct the USPTO to change the correspondence address. 37 C.F.R. §2.18(b). Applicants and attorneys have a duty to maintain a current and accurate correspondence address. This also applies to e-mail addresses, if the applicant has authorized the USPTO to send correspondence by e-mail. 37 C.F.R. §2.18(b)(1). See [TMEP §§609.02–609.02\(f\)](#).

See [TMEP §717.01](#) regarding Office actions returned as undeliverable, and [TMEP §717.02](#) regarding non-receipt of Office actions.

### 717.01 Returned Office Action

If an Office action is returned to the USPTO because the United States Postal Service was not able to deliver it, or because an outgoing e-mail communication was undeliverable, USPTO personnel will review the record to determine whether the correspondence address was entered correctly and/or whether the applicant has filed a notice of change of address. See [TMEP §717](#) regarding the reissuance of an Office action sent to the wrong address due to a USPTO error.

If the USPTO is ultimately unsuccessful in delivering or redelivering the Office action, the returned action and envelope will be scanned into the TICRS database. If no communication from the applicant is received within the period for response, the application will be abandoned.

If outgoing e-mail is returned as undeliverable, the USPTO will send a paper copy to the correspondence address of record. See [TMEP §304](#) regarding e-mail and [TMEP §403](#) for more information about returned correspondence.

### **717.02 Non-Receipt of Office Action**

If an applicant notifies the USPTO that the applicant did not receive an action, either before or after the expiration of the response period, the examining attorney must check to determine whether the action was sent to the correspondence address of record. See [TMEP §§609–609.04](#).

If the Office action was sent to the correspondence address of record, and there is time remaining in the response period, the examining attorney should direct the applicant to view the full record on the TSDR portal on the USPTO website, and advise the applicant that the deadline for response runs from the original issuance date and that a response must be received in the USPTO before this deadline to avoid abandonment.

If the response period has expired, the examining attorney should advise the applicant that the application is abandoned, and that the applicant may file a petition to revive under 37 C.F.R. §2.66. See [TMEP §§1714–1714.01\(g\)](#) regarding petitions to revive. In either situation, the examining attorney should enter an appropriate Note to the File in the application record.

If there is evidence in the record that the USPTO sent the Office action to the wrong address due to a USPTO error ( see [TMEP §717](#)), the USPTO will reissue the action and provide the applicant with a new response period. The examining attorney should first ensure that the correspondence address has been corrected, and then e-mail the internal TM Clerical Support mailbox, stating that the action was sent to the wrong address, and requesting that the action be reissued with a new response period. The deadline for response will run from the new issuance date. If the application had been abandoned, it will be reinstated. See [TMEP §1712.01](#) regarding reinstatement of applications that are abandoned due to USPTO error.

## **718 Abandonment**

An abandoned application is an application for registration that is removed from the USPTO docket of pending applications because of express abandonment or because the applicant failed to take appropriate action within the specified response period.

### **718.01 Express Abandonment by Applicant or Applicant’s Attorney**

*37 CFR §2.68 Express abandonment (withdrawal) of application.*

(a) Written document required. An applicant may expressly abandon an application by filing a written request for abandonment or withdrawal of the application, signed by the applicant, someone with legal authority to bind the applicant (e.g., a corporate officer or general partner of a partnership), or a practitioner qualified to practice under §11.14 of this chapter, in accordance with the requirements of §2.193(e)(2).

(b) Rights in the mark not affected. Except as provided in §2.135, the fact that an application has been expressly abandoned shall not, in any proceeding in the Office, affect any rights that the applicant may have in the mark in the abandoned application.

*37 CFR §2.135 Abandonment of application or mark.*

After the commencement of an opposition, concurrent use, or interference proceeding, if the applicant files a written abandonment of the application or of the mark without the written consent of every adverse party to the proceeding, judgment shall be entered against the applicant. The written consent of an adverse party may be signed by the adverse party or by the adverse party’s attorney or other authorized representative.

To expedite processing, the USPTO recommends that letters of express abandonment be filed through TEAS, at <http://www.uspto.gov>. Generally, all express abandonments filed via TEAS are processed electronically and the Trademark database is automatically updated to indicate that the application has been expressly abandoned and generates a notice to the applicant that the application is abandoned. However, in the later stages after the application has been approved for publication, the TEAS system will not automatically

process an incoming express abandonment, and the express abandonment must be reviewed manually. The Office is generally unable to withdraw a mark from publication or issue unless the express abandonment is received and processed at least twenty days before the scheduled publication date or registration issuance date.

Paper letters of express abandonment are reviewed by examining attorneys.

All letters of express abandonment must be signed by the individual applicant, someone with legal authority to bind a juristic applicant (e.g., an officer of a corporation or general partner of a partnership), or a qualified practitioner. 37 C.F.R. §2.68(a); *see* TMEP §§[608.01](#), [611.02](#). The same principles that govern the signature of responses to Office actions (*see* [TMEP §§712](#), [712.01](#)) apply to the signature of express abandonments.

For express abandonments filed on paper, the examining attorney must ensure that the letter of express abandonment is signed by a proper party. If the applicant is represented by a qualified practitioner, the practitioner must personally sign the letter of express abandonment. 37 C.F.R. §§2.193(e)(2)(i), 11.18(a).

If the applicant is pro se, the letter of express abandonment must be personally signed by the individual applicant or someone with legal authority to bind a juristic applicant. 37 C.F.R. §§2.193(e)(2)(ii), 11.14(e).

See [TMEP §611.06](#) for more information about persons who have legal authority to bind various types of juristic applicants, and [TMEP §§611.05–611.05\(b\)](#) and [712.03](#) regarding documents signed by unauthorized parties.

An application cannot be expressly abandoned by examiner's amendment.

When an applicant files a letter of express abandonment on paper that meets the requirements of 37 C.F.R. §2.68(a), the examining attorney should perform a database transaction expressly abandoning the application, effective as of the filing date of the letter of express abandonment, which will generate a letter notifying the applicant that the application is abandoned.

If it is unclear whether a document is a letter of abandonment, the examining attorney should contact the applicant to inquire about his or her intention before abandoning the application.

If an applicant files an express abandonment of an application that is not the subject of an inter partes proceeding before the Trademark Trial and Appeal Board, and wants to withdraw the abandonment to resume prosecution of the application, the applicant must petition the Director under 37 C.F.R. §2.146(a)(3) to request withdrawal of the express abandonment, within two months of the effective date of abandonment.

37 C.F.R. §2.146(d). However, such a petition will be granted only in an extraordinary situation. *In re Glaxo Grp. Ltd.*, 33 USPQ2d 1535 (Comm'r Pats. 1993); *cf. Christiane E, LLC v. Int'l Expeditions, Inc.*, 106 USPQ2d 2042 (TTAB 2013).

If the applicant files a written request to abandon the application after the commencement of an opposition proceeding, the request for abandonment must be filed with the Board, and must include the written consent of every adverse party to the proceeding. If the applicant files a request for abandonment without the written consent of every adverse party to the proceeding, judgment will be entered against the applicant. 37 C.F.R. §2.135. If an applicant whose application is the subject of an opposition proceeding files an express abandonment of the application after the commencement of the opposition proceeding, but before receipt of the Board's notice of the filing of the opposition, the Board will allow the applicant an opportunity to obtain and submit the written consent of every adverse party or to withdraw the abandonment because an unconsented abandonment, if not withdrawn, may result in entry of judgment against the applicant in the opposition. TBMP §602.01. It is not necessary to obtain consent of a potential opposer during an extension of time to oppose. TBMP §218.

In a §66(a) application, an applicant may file a letter of express abandonment either with the USPTO or with the IB.

## 718.02 Failure by Applicant to Take Required Action During Statutory Period

*15 U.S.C. §1062(b)*

If the applicant is found not entitled to registration, the examiner shall advise the applicant thereof and of the reason therefor. The applicant shall have a period of six months in which to reply or amend his application, which shall then be reexamined. This procedure may be repeated until (1) the examiner finally refuses registration of the mark or (2) the applicant fails for a period of six months to reply or amend or appeal, whereupon the application shall be deemed to have been abandoned, unless it can be shown to the satisfaction of the Director that the delay in responding was unintentional, whereupon such time may be extended.

Under 15 U.S.C. §1062(b) and 37 C.F.R. §2.65(a), an application becomes abandoned if the applicant fails to respond, or fails to respond completely, within the six-month statutory response period. See [TMEP §§718.03–718.03\(c\)](#) regarding incomplete responses. When an applicant is granted additional time to perfect its response under 37 C.F.R. §2.65(b) ([TMEP §718.03\(b\)](#)), but fails to respond or responds late, the date of abandonment is not affected. It remains the day after the date on which the six-month response period ends, since the grant of additional time to *perfect* a response does not extend the statutory six-month response period.

The examining attorney has no authority to accept a late response. If an applicant files a late response, the examining attorney must immediately send a notice to the applicant stating that the response was untimely; that the application is abandoned; and that the applicant may file a petition to revive under 37 C.F.R. §2.66 if the failure to timely respond was unintentional. See [TMEP §§1714–1714.01\(g\)](#) regarding petitions to revive.

See [TMEP §718.02\(a\)](#) regarding partial abandonment.

### 718.02(a) Partial Abandonment

*General Rule.* Trademark Rule 2.65(a), 37 C.F.R. §2.65(a), provides that if a refusal or requirement is expressly limited to certain goods/services, and the applicant fails to file a response, or fails to respond completely, to the refusal or requirement, the application will be abandoned only as to those particular goods/services.

*Exception - Requirements for Fees to Cover All Classes in a Multiple-Class Application.* If the fees paid in a multiple-class application are sufficient to cover one class but insufficient to cover all the classes, the examining attorney will require that the applicant submit the additional fees or specify the classes to which the original fee(s) should be applied. Under such circumstances, it is not appropriate to give a partial-abandonment advisory. If the applicant does not respond to the Office action, the entire application will be abandoned.

*Office Action Must State That Refusal Applies Only to Certain Goods, Services or Classes.* If the examining attorney issues a refusal or requirement that applies only to certain goods/services/class(es) in any Office action (i.e., a first or subsequent nonfinal Office action, final action, or denial of a request for reconsideration), this must be expressly stated in the Office action. Partial abandonment applies only if the Office action expressly states that a refusal or requirement is limited to only certain goods/services/class(es). Unless the action includes a **clear and explicit** statement that the refusal or requirement applies to only certain goods/services/class(es), the refusal or requirement will apply to all the goods/services/class(es), and failure to respond to the action will result in abandonment of the entire application.

*Incomplete Response to Partial Refusal or Requirement.* Partial abandonment may also occur when an applicant fails to file a complete response to a final refusal or final requirement that is expressly limited to only certain goods/services/class(es). If an applicant files an incomplete response to a nonfinal action that is limited to only certain goods/services/class(es), the examining attorney should generally issue an action making all outstanding requirements and refusals final rather than partially abandoning the application. See [TMEP §§718.03–718.03\(b\)](#) regarding incomplete responses. When an examining attorney holds an application abandoned for failure to file a complete response, the applicant’s recourse is to file a petition to the Director under 37 C.F.R. §2.146 to reverse the holding. See [TMEP §1713.01](#). If an applicant files an incomplete response to a final action that is limited to only certain goods/services/class(es) and there is time remaining in the response period to file a notice of appeal, the examining attorney must treat it as a request for reconsideration and deny the request, but must wait to issue the partial abandonment until all time to respond has expired. If there is no time remaining to appeal, the examining attorney must issue an examiner’s amendment deleting (abandoning) the goods/services/classes to which the refusal or requirement pertained. The examiner’s amendment must clearly set forth the changes that will be made to the identification of goods/services. No prior authorization from the applicant or its attorney is needed to issue an examiner’s amendment in this situation.

*Failure to Respond to Partial Refusal or Requirement.* When an applicant fails to respond to a refusal or requirement that is expressly limited to only certain goods/services/class(es), the examining attorney should issue an examiner’s amendment deleting (abandoning) the goods/services/classes to which the refusal or requirement pertained. The examiner’s amendment should clearly set forth the changes that will be made to the identification of goods/services in the application. No prior authorization from the applicant or the applicant’s qualified practitioner is needed to issue an examiner’s amendment in this situation. [TMEP §707.02](#). If the failure to respond to the partial refusal or requirement was unintentional, the applicant may file a petition to revive the deleted goods/services/classes under 37 C.F.R. §2.66, within two months of the issuance date of the examiner’s amendment. See [TMEP §§1714 et seq.](#) regarding petitions to revive.

*Failure to Perfect Appeal of Partial Refusal or Requirement.* Partial abandonment can also occur when a partial refusal or requirement is upheld on appeal, and the applicant fails to perfect an appeal to, or an appeal is dismissed by, the Court of Appeals for the Federal Circuit or civil court, or when an applicant withdraws or fails to prosecute an appeal of a partial refusal to the Board. In these situations, the examining attorney should issue an examiner’s amendment deleting (abandoning) the goods/services/class(es) to which the appeal pertained. No prior authorization from the applicant or the applicant’s qualified practitioner is needed to issue an examiner’s amendment in this situation.

*Use of Headings in Office Actions Encouraged.* When issuing a partial refusal or requirement, the examining attorney is encouraged to use the heading “Partial Refusal” or “Partial Requirement,” so the record is clear that the refusal or requirement applies only to certain goods/services/class(es).

*Use of Abandonment Advisory in Office Actions.* When issuing a partial refusal or requirement, the examining attorney should advise the applicant that if the applicant does not respond to the Office action within the response period, certain goods/services/class(es) will be deleted from the application (abandoned) and the application will proceed forward with only the remaining goods/services/class(es).

*Requirements for Amendment of Identification of Goods/Services.* See [TMEP §1402.13](#) regarding an examining attorney’s requirement for amendment of an identification of goods/services that includes some

terminology that is indefinite and some terminology that is acceptable, and the processing of applications in which an applicant fails to respond to such a requirement.

### 718.03 Incomplete Response

#### 37 CFR §2.65

(a) If an applicant fails to respond, or to respond completely, within six months after the date an action is issued, the application shall be deemed abandoned unless the refusal or requirement is expressly limited to only certain goods and/or services. If the refusal or requirement is expressly limited to only certain goods and/or services, the application will be abandoned only as to those particular goods and/or services. A timely petition to the Director pursuant to §§2.63(b) and 2.146 or notice of appeal to the Trademark Trial and Appeal Board pursuant to §2.142, if appropriate, is a response that avoids abandonment of an application.

(b) When action by the applicant filed within the six-month response period is a bona fide attempt to advance the examination of the application and is substantially a complete response to the examiner's action, but consideration of some matter or compliance with some requirement has been inadvertently omitted, opportunity to explain and supply the omission may be given before the question of abandonment is considered.

Under 15 U.S.C. §1062(b) and 37 C.F.R. §2.65(a), an applicant must respond completely to each issue raised in the examining attorney's Office action to avoid abandonment. Generally, a response is incomplete if it: (1) does not address one or more of the requirements or refusals made in the Office action; (2) is unsigned; (3) is signed by an unauthorized person; or (4) is a response to a final action that does not overcome all refusals or satisfy all requirements, when the response period has expired, and the applicant has not timely filed a notice of appeal. See [TMEP §§715.03\(a\) 715.03\(a\)\(2\)\(E\)](#).

#### *Exception - TEAS Responses Consisting Only of a Signature or Missing Significant Data or Attachments.*

Occasionally, the USPTO receives a response to an Office action filed through TEAS that consists only of a signature or is missing significant data or attachments. This is generally due to user error. If an examining attorney receives a TEAS response to a nonfinal action that consists only of a signature or is missing significant data or attachments, the examining attorney should not issue a notice of incomplete response granting the applicant additional time to complete the response. Instead, the examining attorney must issue a final action, and include sufficient evidence and arguments for all refusals and requirements in preparation for a possible appeal, if the application is in condition for final action. If the application is not in condition for final action (e.g., because a prior pending application has matured into a registration), the examining attorney should issue another nonfinal action, with a six-month response clause, explaining why the response was incomplete, continuing all outstanding refusals and requirements, and addressing any new issues. . See [TMEP §715.03\(a\)\(2\)\(E\)](#) regarding TEAS responses to final actions that consist only of a signature or are missing significant data or attachments.

*Unsigned Responses.* If a response is unsigned, the examining attorney must obtain a properly signed copy before acting on the merits of the response, regardless of whether the Office action was final or nonfinal.

The examining attorney must issue a notice of incomplete response, granting the applicant additional time to perfect the response pursuant to 37 C.F.R. §2.65(b). See [TMEP §§715.03\(a\)\(2\)\(E\)](#), [718.03\(b\)](#). The applicant must submit a properly signed copy of the response, or, if all issues raised are proper subject matter for an examiner's amendment, the individual applicant, someone with legal authority to bind a juristic applicant (e.g., a corporate officer or general partner of a partnership), or the applicant's previously recognized qualified practitioner may authorize the examining attorney to enter an examiner's amendment. A new qualified practitioner who has not yet appeared may not authorize an examiner's amendment, because a telephone call from a qualified practitioner does not satisfy the "appearance" requirements of 37 C.F.R. §2.17(b). See [TMEP §604.01](#). If all issues raised are not proper subject matter for an examiner's amendment, the applicant may *not* ratify the unsigned response through an examiner's amendment. See [TMEP §712.02](#).

If the applicant fails to submit a properly signed response within the time granted under 37 C.F.R. §2.65(b) or the time remaining in the six-month response period, the examining attorney must hold the application abandoned for failure to file a complete response. See [TMEP §718.03\(a\)](#).

*Responses Signed by Unauthorized Persons.* If a response is signed by an unauthorized party (e.g., a foreign attorney who is not a member in good standing of the bar of the highest court of a state in the United States, which includes the District of Columbia and any Commonwealth or territory of the United States) or a corporate employee who does not have legal authority to bind the applicant), the examining attorney must obtain a properly signed copy before acting on the merits of the response, regardless of whether the Office action was final or nonfinal. The examining attorney must issue a notice of incomplete response, granting the applicant additional time to perfect the response pursuant to 37 C.F.R. §2.65(b). See [TMEP §§715.03\(a\)\(2\)\(E\), 718.03\(b\)](#). The applicant must submit a response signed by the individual applicant, someone with legal authority to bind a juristic applicant (see [TMEP §§611.06, 712.01](#)), or by a qualified practitioner (see [TMEP §§602–602.03\(e\)](#)). 37 C.F.R. §2.62(b). If a response was signed by an unauthorized party, it is not acceptable for the applicant to ratify the response through an examiner’s amendment. See [TMEP §§611.05–611.05\(b\)](#) and [712.03](#) for further information. If the applicant fails to submit a properly signed response within the time granted under 37 C.F.R. §2.65(b) or the time remaining in the six-month response period, the examining attorney must hold the application abandoned for failure to file a complete response. See [TMEP §718.03\(a\)](#) regarding holdings of abandonment for failure to respond completely.

*Properly Signed but Incomplete Responses to Nonfinal Actions.* When an applicant files an incomplete response to a nonfinal action (i.e., does not address one or more of the requirements or refusals made in the Office action), the examining attorney should not hold the application abandoned. Instead, the examining attorney should generally issue a final action, if the application is in condition for final action. In limited circumstances, the examining attorney has discretion to issue a notice of incomplete response granting the applicant additional time to complete the response if the response meets the requirements of 37 C.F.R. §2.65(b) (see [TMEP §718.03\(b\)](#)). If the application is not in condition for final action, and the response does not meet the requirements of 37 C.F.R. §2.65(b), the examining attorney should issue another nonfinal action, explaining why the response was incomplete, and continuing all outstanding refusals and requirements.

A written disagreement with the examining attorney’s refusal or requirement may be a complete response to a nonfinal action with respect to that refusal or requirement.

*Properly Signed but Incomplete Responses to Final Actions.* If the applicant files a properly signed but incomplete response which does not meet the criteria in 37 C.F.R. §2.65(b) for granting additional time to complete the response, there is no time remaining in the six-month response period, and no notice of appeal has been filed, the examining attorney must hold the application abandoned due to incomplete response. See [TMEP §§715.03\(a\)\(2\)\(D\), 718.03\(a\)](#).

*Non-Responsive Communications.* An inquiry, a request to extend the response period, or a communication on a matter unrelated to the preceding Office action should be treated as a non-responsive communication, not as an incomplete response. See [TMEP §719](#) for further information.

*Failure to Respond to Notice of Incomplete Response.* If the examining attorney issues a notice of incomplete response, and the applicant fails to respond or submits an unsatisfactory response to the notice within the time granted under 37 C.F.R. §2.65(b), or fails to file a complete response within the time remaining in the six-month response period, the examining attorney must hold the application abandoned due to incomplete response. See [TMEP §§715.03\(a\)\(2\)\(D\), 718.03\(b\)](#).

See [TMPEP §717.02](#) regarding the procedure for handling an applicant's claim that the applicant did not receive the Office action.

### **718.03(a) Holding of Abandonment for Failure to Respond Completely**

Generally, the examining attorney should not hold an application abandoned when an applicant timely files a properly signed but incomplete response to a **nonfinal** action (i.e., the response does not address one or more of the requirements or refusals made in the Office action) or a TEAS response to a nonfinal action consisting of only a signature or missing significant data or attachments. See [TMPEP §718.03](#).

The examining attorney may hold an application abandoned after **final** action if (1) the applicant files a properly signed but incomplete response which does not include a good-faith effort to comply and the time for responding to the final action has expired or (2) the applicant fails to respond to a notice of incomplete response. In such cases, the examining attorney should issue an "Abandoned Due to Incomplete Response" action, without a six-month response clause (see [TMPEP §705.08](#)), stating that the application is abandoned due to an incomplete response, and explaining why.

The applicant may contact the managing attorney or senior attorney and request review of the examining attorney's action. If the managing attorney or senior attorney believes that the holding of abandonment was improper, he or she will direct the examining attorney to reverse the holding of abandonment. Otherwise, the applicant's recourse is to file a petition requesting that the Director exercise supervisory authority under 37 C.F.R. §2.146 and reverse the holding of abandonment. See [TMPEP §1713.01](#).

See [TMPEP §715.03\(a\)](#) regarding action on an incomplete response to a final action before the response period has expired.

### **718.03(b) Granting Additional Time to Perfect Response**

Under 37 C.F.R. §2.65(b), the examining attorney has discretion to give an applicant additional time to perfect the response if:

- (1) the response was filed within the six-month period;
- (2) the response was a bona fide attempt to advance the examination;
- (3) the response was a substantially complete response to the examining attorney's action; and
- (4) consideration of some matter or compliance with some requirement was inadvertently omitted.

Generally, this discretion should be exercised in connection with a response to a final action. If an applicant makes a good faith, but incomplete, effort to comply in response to a nonfinal action, the examining attorney generally should issue a final action. See [TMPEP §§715.03-715.03\(c\)](#) regarding processing requests for reconsideration after final action.

If the examining attorney decides that the response meets all four criteria, he or she should issue a notice of incomplete response explaining why the response is incomplete and granting the applicant 30 days, or to the end of the response period set forth in the action, whichever is longer, to perfect the response. The examining attorney must not include a six-month response clause in the action.

If the examining attorney grants the applicant additional time to complete a response under 37 C.F.R. §2.65(b), the time for filing an appeal to the Trademark Trial and Appeal Board (or a petition to the Director under 37 C.F.R. §2.63(b)) is not extended. The applicant must file a notice of appeal (or petition) within six months of the issuance date of the final action. 15 U.S.C. §1062(b); 37 C.F.R. §§2.64(b), 2.142(a).

If the applicant fails to complete the response within the time granted pursuant to 37 C.F.R. §2.65(b), the examining attorney must hold the application abandoned for failure to file a complete response. See [TMEP §718.03\(a\)](#). In this situation, the applicant cannot file a petition to revive due to unintentional delay, pursuant to 37 C.F.R. §2.66. The applicant's recourse is to file a petition to the Director under 37 C.F.R. §2.146 to reverse the examining attorney's holding of abandonment. See [TMEP §1713.02](#). The Director will reverse the examining attorney's action on petition only where there has been clear error or an abuse of discretion. See [TMEP §1713.01](#).

If the application is abandoned for failure to file a complete response, but the applicant did not receive the action granting additional time to complete a response, or was unable to respond to the action due to some other extraordinary circumstance, the applicant may file a petition requesting that the Director exercise supervisory authority under 37 C.F.R. §2.146 and reverse the holding of abandonment. See [TMEP §1713.02](#).

### **718.04 Failure to File Statement of Use**

Under 15 U.S.C. §1051(d)(4), an application under §1(b) of the Act is abandoned if the applicant fails to timely file a statement of use or request for an extension of time to file a statement of use. 37 C.F.R. §§2.65(c), 2.88(h); [TMEP §§1108.01, 1109.04](#).

The ITU/Divisional Unit will abandon the application if the applicant fails to file a statement of use or request for an extension of time to file a statement of use within six months of the issuance date of the notice of allowance, or within a previously granted extension period. The USPTO will send a computer-generated notice of abandonment to the applicant.

If the failure to timely file the statement of use or extension request was unintentional, the applicant may file a petition to revive under 15 U.S.C. §1051(d)(4) and 37 C.F.R. §2.66. See [TMEP §§1714–1714.01\(g\)](#).

### **718.05 Failure to Perfect Appeal**

An application may become abandoned because of withdrawal of, or failure to prosecute, an appeal to the Trademark Trial and Appeal Board. See 15 U.S.C. §1062(b); TBMP §1203.02(a); [TMEP §1501](#).

An application may also become abandoned because of failure to perfect an appeal, or dismissal of an appeal, to the Court of Appeals for the Federal Circuit or civil court.

See [TMEP §718.02\(a\)](#) regarding partial abandonment due to failure to perfect an appeal.

### **718.06 Notice of Abandonment for Failure to Respond**

If no response is received by the USPTO within six months of the issuance date of an Office action, the application is sent to the examining attorney to be abandoned or partially abandoned, as appropriate. The examining attorney must check the record to ensure that there is no response and that the Office action was sent to the correspondence address of record. See [TMEP §717](#) regarding reissuing an Office action that was sent to the wrong address due to a USPTO error. The examining attorney must also check to see whether the Office action contained a partial refusal or requirement. See [TMEP §718.02\(a\)](#) regarding partial abandonment.

An application is considered to be abandoned as of the day after the date on which a response was due, even though the examining attorney performs the Trademark database transaction that reports the abandonment at a later date. The USPTO sends a computer-generated notice of abandonment to the correspondence address listed in the application.

Applications that are abandoned after ex parte appeals or inter partes proceedings are considered abandoned as of the date of the action by the Board that caused the application to abandon (e.g., affirming the examining attorney's refusal or sustaining an opposition). However, the Trademark database transaction reporting the abandonment is not performed until a month after expiration of the period for appeal from the Board's decision.

### **718.07 Revival or Reinstatement of Abandoned Application - New Search Required**

When an abandoned application is revived or reinstated, the examining attorney must conduct a new search of USPTO records for conflicting marks. If the search shows that the same examining attorney handled a later-filed conflicting application that has been approved for publication, the examining attorney should request jurisdiction ([TMEP §1504.04\(a\)](#)) and suspend the later-filed application pending disposition of the earlier-filed (revived) application. 37 C.F.R. §2.83(c); [TMEP §1208.02\(c\)](#).

If the new search shows that the same examining attorney handled a later-filed conflicting application that has been approved for registration, the examining attorney should withdraw the application from issue (if possible) and suspend it. However, if a later-filed conflicting application is already registered, the USPTO is without authority to cancel the registration. The examining attorney must refuse registration of the earlier-filed (revived) application under 15 U.S.C. §1052(d). In this situation, an applicant may file a petition to cancel the registration under Section 14 of the Trademark Act, 15 U.S.C. §1064.

If the later-filed conflicting application is being handled by a different examining attorney, the examining attorney handling the earlier-filed (revived) application should e-mail the other examining attorney to notify him or her of the revival or reinstatement. The examining attorney handling the later-filed application will follow the procedures set forth above.

See [TMEP §§1714–1714.01\(g\)](#) regarding petitions to revive, [TMEP §1712.01](#) regarding reinstatement of applications abandoned due to USPTO error, and [TMEP §1713.01](#) regarding petitions to reverse an examining attorney's holding of abandonment.

### **719 Non-Responsive Communications**

An inquiry, a request to extend the response period, or a communication on a matter unrelated to the outstanding Office action should be treated as a “non-responsive communication,” not as an incomplete response to an outstanding Office action. If the applicant files a non-responsive communication while an Office action is outstanding, the examining attorney should send the applicant a letter (i.e., Examiner's Non-Responsive Amendment) acknowledging receipt of the communication, noting that the communication is non-responsive, and advising the applicant that, to avoid abandonment, a response to the outstanding Office action must be received within six months of the issuance date of the outstanding Office action. If

no response to the Office action is received within six months of the issuance date, the application must be abandoned for failure to respond.

## **720 Fraud Upon the USPTO**

If an examining attorney suspects the possibility of fraud upon the USPTO in the ex parte examination of a trademark application, the following procedure must be followed.

- (1) The examining attorney must bring the matter to the attention of the managing attorney.
- (2) If the managing attorney concurs with the examining attorney as to the possibility of fraud upon the USPTO, the managing attorney will bring the matter to the attention of the Administrator for Trademark Policy and Procedure.
- (3) If the Administrator believes that the matter warrants further action, he or she will make an appropriate recommendation to the Commissioner for Trademarks.

Under no circumstances should any USPTO communication pertaining to fraud be made, either orally or in writing, by anyone in the Trademark Examining Operation, except as set forth in paragraphs 1 and 2 above.

These issues may ultimately be referred to the Office of Enrollment and Discipline.

# Chapter 800 Application Requirements

---

<b>801</b>	<b>Types of Applications</b>
801.01	Single or Combined Application
801.01(a)	Single (Single-Class) Application
801.01(b)	Combined (Multiple-Class) Application
801.02	Principal Register or Supplemental Register
801.02(a)	Act of 1946, Principal Register
801.02(b)	Act of 1946, Supplemental Register
<b>802</b>	<b>Application Form</b>
<b>803</b>	<b>Applicant</b>
803.01	Who May Apply
803.02	Name of Applicant
803.02(a)	Individual
803.02(b)	Partnership, Joint Venture, or Other “Firm”
803.02(c)	Corporation and Association
803.03	Legal Entity of Applicant
803.03(a)	Individual or Sole Proprietorship
803.03(b)	Partnership, Joint Venture, or Other “Firm”
803.03(c)	Corporation, Association, Organization, and Company
803.03(d)	Joint Applicants
803.03(e)	Trusts, Conservatorships, and Estates
803.03(e)(i)	Business Trusts
803.03(f)	Governmental Bodies and Universities
803.03(g)	Banking Institutions
803.03(h)	Limited Liability Companies
803.03(i)	Common Terms Designating Entity of Foreign Applicants
803.03(j)	Federally Recognized Indian Tribe
803.03(k)	Limited Liability Partnerships
803.04	Citizenship of Applicant
803.05	Address of Applicant
803.06	Applicant May Not Be Changed
<b>804</b>	<b>Verification and Signature</b>
804.01	Form and Wording of Verification in §1 or §44 Application
804.01(a)	Verification with Oath
804.01(a)(i)	Verification Made in Foreign Country
804.01(b)	Declaration in Lieu of Oath
804.02	Averments Required in Verification of Application for Registration - §1 or §44 Application
804.03	Time Between Execution and Filing of Documents - §1 or §44 Application
804.04	Persons Authorized to Sign Verification or Declaration
804.05	Verification of §66(a) Application
<b>805</b>	<b>Identification and Classification of Goods and Services</b>
<b>806</b>	<b>Filing Basis</b>
806.01	Requirements for Establishing a Basis
806.01(a)	Use in Commerce - §1(a)
806.01(b)	Intent-to-Use - §1(b)
806.01(c)	Foreign Priority - §44(d)
806.01(d)	Foreign Registration — §44(e)
806.01(e)	Extension of Protection of International Registration - §66(a)
806.02	Multiple Bases
806.02(a)	Procedure for Asserting More Than One Basis
806.02(b)	Applicant May File Under Both §1(a) and §1(b) in the Same Application

- 806.02(c) Examination of Specimens of Use in a Multiple-Basis Application
- 806.02(d) Abandonment of Multiple-Basis Applications
- 806.02(e) Allegation of Bona Fide Intention to Use Mark in Commerce Required Even if Application Is Based on Both §44 and §1(a)
- 806.02(f) Section 44(d) Combined With Other Bases
- 806.02(g) Not Necessary to Repeat Allegation of Bona Fide Intention to Use Mark in Commerce in Multiple-Basis Application
- 806.03 Amendments to Add or Substitute a Basis
  - 806.03(a) When Basis Can be Changed
  - 806.03(b) Applicant May Add or Substitute a §44(d) Basis Only Within Six-Month Priority Period
  - 806.03(c) Amendment From §1(a) to §1(b)
  - 806.03(d) Amendment From §44 to §1(b)
  - 806.03(e) Allegation of Use Required to Amend From §1(b) to §1(a)
  - 806.03(f) Use in Commerce as of Application Filing Date Required to Add or Substitute §1(a) as a Basis in §44 Application
  - 806.03(g) Amendment From §1(b) to §44
  - 806.03(h) Effect of Substitution of Basis on Application Filing Date
  - 806.03(i) Verification of Amendment Required
  - 806.03(j) Petition to Amend Basis After Publication - §1 or §44 Application
    - 806.03(j)(i) Amending the Basis of a §1(b) Application After Publication But Before Issuance of Notice of Allowance
    - 806.03(j)(ii) Amending the Basis of a §1(b) Application Between Issuance of Notice of Allowance and Filing of Statement of Use
    - 806.03(j)(iii) Amending the Basis of a §1(b) Application After Filing of Statement of Use But Before Approval for Registration
  - 806.03(k) Basis Cannot be Changed in §66(a) Application
  - 806.03(l) §66(a) Basis Cannot be Added to §1 or §44 Application
- 806.04 Deleting a Basis
  - 806.04(a) Deletion of §1(b) Basis After Publication or Issuance of the Notice of Allowance
  - 806.04(b) Retention of §44(d) Priority Filing Date Without Perfecting §44(e) Basis
- 806.05 Review of Basis Prior to Publication or Issue
- 807 Drawing**
  - 807.01 Drawing Must Show Only One Mark
  - 807.02 Drawing Must Be Limited to Mark
  - 807.03 Standard Character Drawings
    - 807.03(a) Requirements for Standard Character Drawings
    - 807.03(b) List of Standard Characters
    - 807.03(c) Drawings Containing Both a Standard Character Claim and Designs or Other Elements
    - 807.03(d) Changing From Special Form Elements to Standard Characters, or the Reverse, May be a Material Alteration
    - 807.03(e) Standard Character Drawing and Specimen of Use
    - 807.03(f) Standard Character Drawing and Foreign Registration
    - 807.03(g) Drawings in “Typed” Format With No Standard Character Claim
    - 807.03(h) Drawings Where the Format Is Unclear
    - 807.03(i) Typed Drawings
  - 807.04 Special Form Drawings
    - 807.04(a) Characteristics of Special Form Drawings
    - 807.04(b) When Special Form Drawing Is Required

## APPLICATION REQUIREMENTS

- 807.05 Electronically Submitted Drawings
  - 807.05(a) Standard Character Drawings Submitted Electronically
    - 807.05(a)(i) Long Marks in Standard Character Drawings
  - 807.05(b) Special Form Drawings Submitted Electronically
  - 807.05(c) Requirements for Digitized Images
- 807.06 Paper Drawings
  - 807.06(a) Type of Paper and Size of Mark
  - 807.06(b) Long Marks in Standard Character Drawings
  - 807.06(c) Separate Drawing Page Preferred
- 807.07 Color in the Mark
  - 807.07(a) Requirements for Color Drawings
    - 807.07(a)(i) Color Must Be Claimed as a Feature of the Mark
    - 807.07(a)(ii) Applicant Must Specify the Location of the Colors Claimed
  - 807.07(b) Color Drawings Filed Without a Color Claim
  - 807.07(c) Color Drawings Filed With an Incorrect Color Claim
  - 807.07(d) Color Drawings that Contain Black, White, or Gray
    - 807.07(d)(i) Applications Under §1
    - 807.07(d)(ii) Applications Under §44
    - 807.07(d)(iii) Applications Under §66(a)
  - 807.07(e) Black-and-White Drawings and Color Claims
  - 807.07(f) Black-and-White Drawings that Contain Gray or Black-and-White Drawings with a Mark Description that Refers to Black, White, or Gray
    - 807.07(f)(i) TEAS, TEAS Plus, and §66(a) Applications
    - 807.07(f)(ii) Applications Filed on Paper
  - 807.07(g) Drawings in Applications Filed Before November 2, 2003
- 807.08 Broken Lines to Show Placement
- 807.09 “Drawing” of Sound, Scent, or Non-Visual Mark
- 807.10 Three-Dimensional Marks
- 807.11 Marks With Motion
- 807.12 Mark on Drawing Must Agree with Mark on Specimen or Foreign Registration
  - 807.12(a) Applications Under §1 of the Trademark Act
    - 807.12(a)(i) Role of Punctuation in Determining Whether Mark on Drawing Agrees with Mark on Specimen
      - 807.12(a)(ii) Punctuation on the Drawing but Not on the Specimen
      - 807.12(a)(iii) Punctuation on the Specimen but Not on the Drawing
    - 807.12(b) Applications Under §44 of the Trademark Act
    - 807.12(c) Applications Under §66(a) of the Trademark Act
    - 807.12(d) Mutilation or Incomplete Representation of Mark
    - 807.12(e) Compound Word Marks and Telescoped Marks
- 807.13 Amendment of Mark
  - 807.13(a) Amendment of Mark in Applications Under §§1 and 44
  - 807.13(b) Mark in §66(a) Application Cannot be Amended
- 807.14 Material Alteration of Mark
  - 807.14(a) Removal or Deletion of Matter from Drawing
  - 807.14(b) Addition or Deletion of Previously Registered Matter
  - 807.14(c) Addition or Deletion of Punctuation
  - 807.14(d) Amendments to Correct “Internal Inconsistencies”
  - 807.14(e) Amendments to Color Features of Marks
    - 807.14(e)(i) Black-and-White Drawings
    - 807.14(e)(ii) Marks that Include Color and Other Elements
    - 807.14(e)(iii) Color Marks

- 807.14(f) Material Alteration: Case References
- 807.15 Substitute Drawings
- 807.16 Amendment of Drawings by the USPTO
- 807.17 Procedures for Processing Unacceptable Amendments to Drawings
- 807.18 Mark Drawing Code
- 808 Description of Mark**
  - 808.01 Guidelines for Requiring Description
    - 808.01(a) Meaning of Term in Mark
    - 808.01(b) Lining and Stippling Statements for Drawings
  - 808.02 Description Must Be Accurate and Concise
  - 808.03 Examination Procedure for Descriptions
    - 808.03(a) Accurate and Complete Descriptions
    - 808.03(b) No Description in Application
    - 808.03(c) Accurate But Incomplete Description in Application or Amendment
      - 808.03(c)(i) Accurate But Incomplete Descriptions in Cases Where a Description is Needed to Clarify the Mark and Must be Printed
      - 808.03(c)(ii) Accurate But Incomplete Descriptions in Cases Where a Description Need Not Be Printed
    - 808.03(d) Inaccurate Description in Application or Amendment
    - 808.03(e) Amending Descriptions
    - 808.03(f) Updating Design Coding
    - 808.03(g) Unacceptable Statements in Mark Descriptions
- 809 Translation and Transliteration of Non-English Wording in Mark**
  - 809.01 Examining Applications for Marks Comprising Non-English Wording that Do Not Include an Accurate Translation or Transliteration
    - 809.01(a) Inquiry/Applicant's Response Regarding Meaning in a Foreign Language
    - 809.01(b) Limited Exceptions to Rules for Translations
      - 809.01(b)(i) Foreign Terms Appearing in English Dictionary
      - 809.01(b)(ii) Foreign Articles or Prepositions Combined with English Terms
      - 809.01(b)(iii) Words From Dead or Obscure Languages
  - 809.02 Equivalency in Translation
  - 809.03 Printing of Translations and Transliterations
- 810 Filing Fee**
  - 810.01 Collection of Fees for Multiple Classes
  - 810.02 Refunds
- 811 Designation of Domestic Representative**
- 812 Identification of Prior Registrations of Applicant**
  - 812.01 Proving Ownership of Prior Registrations
- 813 Consent to Register by Particular Living Individual Whose Name or Likeness Appears in the Mark**
  - 813.01 Statement Printed in Official Gazette and on Registration Certificate
    - 813.01(a) Name or Likeness Is That of a Living Individual
    - 813.01(b) Name or Likeness Is Not That of a Living Individual
    - 813.01(c) Updating the Trademark Database
- 814 Requesting Additional Information**
- 815 Application Filed on Supplemental Register**
  - 815.01 Marks Eligible for Principal Register Not Registrable on Supplemental Register
  - 815.02 Elements Required
  - 815.03 Filing on Supplemental Register Is Not an Admission That the Mark Has Not Acquired Distinctiveness
  - 815.04 Basis for Refusal of Registration of Matter That Is Incapable

- 816** **Amending Application to Supplemental Register**
- 816.01 How to Amend
- 816.02 Effective Filing Date
- 816.03 Amendment to Different Register
- 816.04 Amendment After Refusal
- 816.05 Amendment After Decision on Appeal
- 817** **Preparation of Application for Publication or Registration**
- 818** **Application Checklist**
- 819** **TEAS Plus**
- 819.01 TEAS Plus Filing Requirements
- 819.01(a) Type of Mark
- 819.01(b) Applicant's Name and Address
- 819.01(c) Applicant's Legal Entity and Citizenship
- 819.01(d) Name and Address for Paper Correspondence
- 819.01(e) E-mail Address and Authorization for the USPTO to Send Correspondence By E-Mail
- 819.01(f) Basis or Bases for Filing

## **801 Types of Applications**

The wording “type of application” refers to the kind of application by which registration is requested, e.g., whether the application is a single-class application or a multiple-class application, or whether registration is sought on the Principal Register or on the Supplemental Register.

See TMEP [Chapter 700](#) regarding the examination of applications in general, and [Chapter 1300](#) regarding the examination of applications for service marks, collective marks, and certification marks.

## **801.01 Single or Combined Application**

### **801.01(a) Single (Single-Class) Application**

A single-class application limits the goods or services for which registration is sought to goods or services in only one of the classes in the classification schedules. The application may recite more than one item, if the items recited are all classified in one class. See [TMEP §§1401](#) *et seq.* for additional information about classification.

### **801.01(b) Combined (Multiple-Class) Application**

A combined or multiple-class application is an application to register the mark for items classified in two or more classes. The applicant must pay a filing fee for each class. The class numbers and corresponding goods or services must be listed separately, from the lowest to the highest number.

See [TMEP §§1403](#) *et seq.* for further information about combined applications.

## **801.02 Principal Register or Supplemental Register**

### **801.02(a) Act of 1946, Principal Register**

The primary provision for registration in the Trademark Act of 1946 is for registration on the Principal Register (15 U.S.C. §§1051 through 1072). When a mark has been registered on the Principal Register, the mark is entitled to all the rights provided by the Act. The advantages of owning a registration on the Principal Register include the following:

- Constructive notice to the public of the registrant's claim of ownership of the mark (15 U.S.C. §1072);
- A legal presumption of the registrant's ownership of the mark and the registrant's exclusive right to use the mark nationwide on or in connection with the goods/services listed in the registration (15 U.S.C. §§1057(b) and 1115(a));
- A date of constructive use of the mark as of the filing date of the application (15 U.S.C. §1057(c); [TMEP §201.02](#));
- The ability to bring an action concerning the mark in federal court (15 U.S.C. §1121);
- The ability to file the United States registration with the United States Customs Service to prevent importation of infringing foreign goods (15 U.S.C. §1124);
- The registrant's exclusive right to use a mark in commerce on or in connection with the goods or services covered by the registration can become "incontestable," subject to certain statutory defenses (15 U.S.C. §§1065 and 1115(b)); and
- The use of the United States registration as a basis to obtain registration in foreign countries.

If the applicant seeks registration on the Principal Register, the application should state that registration is requested on the Principal Register. However, if the applicant does not specify a register, the United States

Patent and Trademark Office (“USPTO”) will presume that the applicant seeks registration on the Principal Register.

### **801.02(b) Act of 1946, Supplemental Register**

Certain marks that are not eligible for registration on the Principal Register, but are capable of distinguishing an applicant’s goods or services, may be registered on the Supplemental Register. Sections 23 through 28 of the Trademark Act, 15 U.S.C. §§1091 through 1096, provide for registration on the Supplemental Register.

This is a continuation of the register provided for in the Act of March 19, 1920. Marks registered on the Supplemental Register are excluded from receiving the advantages of certain sections of the Act of 1946. The excluded sections are listed in §26 of the Act, 15 U.S.C. §1094. *See Otter Products LLC v. BaseOneLabs LLC*, 105 USPQ2d 1252, 1256 (TTAB 2012) (finding that while ownership of a registration on the Supplemental Register established opposer’s standing to oppose registration of applicant’s mark, it did not establish that opposer owned a proprietary interest in a mark).

If the applicant seeks registration on the Supplemental Register, the application should state that registration is requested on the Supplemental Register. If no register is specified, the USPTO will presume that the applicant seeks registration on the Principal Register.

See [TMEP §§815](#) and [816](#) *et seq.* regarding examination procedure relating to the Supplemental Register.

An applicant may not seek registration on both the Principal and the Supplemental Register in the same application. If an applicant requests registration on both the Principal and the Supplemental Register in the same application, the examining attorney must require that the applicant amend to specify only one register, or file a request to divide under 37 C.F.R. §2.87.

A mark in an application under §66(a) of the Trademark Act, 15 U.S.C. §1141f(a), based on a request for extension of protection of an international registration to the United States, cannot be registered on the Supplemental Register. 15 U.S.C. §1141h(a)(4); 37 C.F.R. §§2.47(c) and 2.75(c).

## **802 Application Form**

Applications under §66(a) of the Trademark Act are sent to the USPTO electronically by the International Bureau of the World Intellectual Property Organization (“IB”).

The USPTO prefers that applicants file applications under §1 or §44 of the Trademark Act through the Trademark Electronic Application System (“TEAS”), available at <http://www.uspto.gov> (using either a TEAS or TEAS Plus application form), or on the USPTO’s pre-printed scannable form. The applicant may obtain the USPTO’s pre-printed scannable form by calling the Trademark Assistance Center at (571) 272-9250 or (800) 786-9199.

The amount of the trademark application filing fee varies, depending upon whether the application (or the amendment adding classes to an existing application) is filed through TEAS or on paper. *See* [TMEP §810](#). An applicant has three choices. The applicant can file:

- A paper application at the higher fee per class, set forth in 37 C.F.R. §2.6(a)(1)(i);
- A regular TEAS application at a lower fee per class, set forth in 37 C.F.R. §2.6(a)(1)(ii); or
- A TEAS Plus application ( *see* [TMEP §§819](#) *et seq.*) at the lowest fee per class, set forth in 37 C.F.R. §2.6(a)(1)(iii).

The current fee schedule is available on the USPTO website at <http://www.uspto.gov>.

*Note:* Applications that are downloaded from TEAS or TEAS Plus, printed, and mailed to the USPTO are considered paper applications and are subject to the paper application filing fee.

Trademark applications may not be filed by facsimile (“fax”) transmission. 37 C.F.R. §2.195(d)(1); [TMEP §306.01](#).

The USPTO strongly discourages self-created forms, but will accept them if they meet the requirements for receipt of a filing date set forth in 37 C.F.R. §2.21(a) ( *see* [TMEP §202](#)). If a self-created form is used, the application should be on letter size (i.e., 8½ inches (21.6 cm.) by 11 inches (27.9 cm.)) paper, typewritten, double spaced, with margins of at least 1½ inches (3.8 cm.) at the left and top of the pages. The application should be written on only one side of the paper.

The application must be in the English language. 37 C.F.R. §§2.21(a) and 2.32(a).

The USPTO does not generally require the submission of original documents, so the applicant may file a copy of a signed application. 37 C.F.R. §§2.193(a) and (b); [TMEP §302.01](#).

See [TMEP §§819](#) *et seq.* regarding TEAS Plus applications.

## 803 Applicant

### 803.01 Who May Apply

An application to register a mark must be filed by the owner of the mark or, in the case of an intent-to-use application under 15 U.S.C. §1051(b), by the person who is entitled to use the mark in commerce. Normally the owner of a mark is the person who applies the mark to goods that he or she produces, or uses the mark in the sale or advertising of services that he or she performs. See [TMEP §§1201](#) *et seq.* regarding ownership, and [TMEP §§501](#) and [502](#) *et seq.* regarding assignment of marks and changes of ownership.

If an applicant is not the owner of (or entitled to use) the mark at the time the application is filed, the application is void and cannot be amended to specify the correct party as the applicant, because the applicant did not have a right that could be assigned. 37 C.F.R. §2.71(d). See [TMEP §803.06](#) and cases cited therein.

Applicants may be natural persons or juristic persons. Juristic persons include corporations, partnerships, joint ventures, unions, associations, and other organizations capable of suing and being sued in a court of law. 15 U.S.C. §1127. An operating division, or the like, that is merely an organizational unit of a company and not a legal entity that can sue and be sued, may not own or apply to register a mark. See [TMEP §1201.02\(d\)](#).

Nations, states, municipalities, and other related types of bodies operating with governmental authorization may apply to register marks that they own. See *National Aeronautics & Space Admin. v. Record Chemical Co. Inc.*, 185 USPQ 563 (TTAB 1975); *In re U.S. Department of the Interior*, 142 USPQ 506 (TTAB 1964).

The question of whether an application can be filed in the name of a minor depends on state law. If the minor can validly enter into binding legal obligations, and can sue or be sued, in the state in which he or she is domiciled, the application may be filed in the name of the minor. Otherwise, the application should

be filed in the name of a parent or legal guardian, clearly setting forth his or her status as a parent or legal guardian. An example of the manner in which the applicant should be identified in such cases is:

John Smith, United States citizen, (parent/legal guardian) of Mary Smith.

If the record indicates that the named applicant is a minor, the examining attorney must inquire as to whether the person can validly enter into binding legal obligations under the law of the state in which he or she is domiciled. If the minor cannot enter into binding legal obligations, the examining attorney must require correction of the applicant-identifying information in the manner shown above, if necessary.

If a minor comes of age during the prosecution of an application in which his or her parent/legal guardian is identified as the applicant, the application may be amended to change the applicant's name. No assignment is required in such cases. However, the minor must also state his or her citizenship. See also TMEP Chapter 500 regarding assignments, name changes, and issuance of a registration in the name of an assignee or in an applicant's new name.

See also [TMEP §§1002](#) *et seq.* regarding eligibility to file an application under §44 of the Trademark Act, 15 U.S.C. §1126, and [TMEP §1901](#) regarding eligibility to file a request for an extension of protection of an international registration to the United States under §66(a) of the Act, 15 U.S.C. §1141f(a).

## **803.02 Name of Applicant**

The name of the applicant should be set out in its correct legal form. For example, a corporate applicant should be identified by the name set forth in the articles of incorporation.

If the applicant's legal name includes the assumed name under which it does business, an assumed name designation should be used to connect the actual name with the assumed name. Assumed name designations include "d.b.a." (doing business as), "a.k.a." (also known as), and "t.a." (trading as). The particular assumed name designation used is optional. Only the abbreviation of the assumed name designation will be printed in the *Official Gazette* and on the certificate of registration. If an applicant gives the assumed name designation in full, the abbreviation will automatically be used for printing purposes.

### **803.02(a) Individual**

If the applicant is an individual person who is doing business under an assumed business name, the individual's name should be set forth, followed by an assumed name designation (e.g., d.b.a., a.k.a., or t.a.) and by the assumed business name.

If an individual indicates that he or she is doing business under a corporate designation (e.g., Corporation, Corp., Incorporated, Inc., Limited, Ltd.), the USPTO will presume that relevant state law permits such a practice. The assumed name will be printed on the registration certificate.

If the application reflects an inconsistency between the owner name and the entity type as to whether a corporation or an individual owns the mark, the examining attorney must require the applicant to clarify the record regarding ownership (e.g., if the name of an individual appears as the applicant, but the entity is listed as a corporation, or if a business is named as the applicant but the entity is listed as an individual). However, in view of the broad definition of a "person properly authorized to sign on behalf of the applicant" in 37 C.F.R. §2.193(e)(1) ( *see* [TMEP §§611.03\(a\)](#) and [804.04](#) ), the fact that the title of the person signing an application

refers to a different entity is not in itself considered an inconsistency between owner and entity type that would warrant an inquiry as to who owns the mark.

See [TMEP §803.03\(a\)](#) for information about identifying an individual applicant's entity, and [TMEP §§803.06](#) and [1201.02\(c\)](#) regarding USPTO policies regarding correction of an applicant's name and entity.

### **803.02(b) Partnership, Joint Venture, or Other “Firm”**

If a partnership, joint venture, or other “firm” has been organized under a particular business name, the application should be filed in that name. If the partnership or firm has not been organized under a business name, the names of the members should be listed as though they composed a company name. If a partnership or joint venture is doing business under an assumed name, this may be indicated, using an assumed name designation. See [TMEP §803.02](#) regarding assumed name designations, and [TMEP §803.03\(b\)](#) for information about identifying a partnership or joint venture as a legal entity.

### **803.02(c) Corporation and Association**

If the applicant is a corporation, the official corporate name must be set out as the applicant's name. Listing an assumed business name is optional. The name of a division of the applicant should *not* be included in or along with the applicant's name. If the applicant wishes to indicate in the application that actual use of the mark is being made by a division of the applicant, the applicant may provide a statement that “the applicant, *through its division* [specify name of division], is using the mark in commerce.” This statement should not appear in conjunction with the listing of the applicant's name, and will not be printed on the registration certificate.

In unusual situations, one corporation may also be doing business under another name, even another corporate name. This sometimes happens, for example, when one corporation buys out another. In the unusual situation where a corporate applicant provides a DBA (“doing business as”) that includes a corporate designation (e.g., Corporation, Corp., Incorporated, Inc., Limited, Ltd.) in addition to its official corporate name, the USPTO will presume that relevant state law permits such a practice. The DBA will be printed on the registration certificate.

Associations should be identified by the full, official name of the association.

See [TMEP §803.03\(c\)](#) for information about identifying a corporation or association as a legal entity.

### **803.03 Legal Entity of Applicant**

Immediately after the applicant's name, the application should set out the applicant's form of business, or legal entity, such as partnership, joint venture, corporation, or association. The words “company” and “firm” are indefinite for purposes of designating a domestic applicant's legal entity, because those words do not identify a particular type of legal entity in the United States. (However, the word “company” is acceptable to identify entities organized under the laws of foreign countries that are equivalent or analogous to United States corporations or associations. See [TMEP §803.03\(i\)](#).)

Whether the USPTO will accept the identification of an applicant's entity depends on whether that entity is recognized by the applicant's state of domicile.

If other material in the record indicates that the applicant is a different type of entity than is set out in the written application, the examining attorney must ask for an explanation, and require amendment if necessary. However, in view of the broad definition of a “person properly authorized to sign on behalf of the applicant” in 37 C.F.R. §2.193(e)(1) ( *see* [TMEP §§611.03\(a\)](#) and [804.04](#)), no explanation is usually required merely because the person signing a declaration has a title that refers to a different type of entity. See [TMEP §§803.06](#) and [1201.02\(c\)](#) regarding USPTO policies governing correction of an applicant’s name.

### **803.03(a) Individual or Sole Proprietorship**

*Individual.* For an individual, it is not necessary to specify “individual,” but it is acceptable to do so. The applicant may state that he or she is doing business under a specified assumed company name. [TMEP §803.02](#).

In an application for international registration, if the applicant is a natural person, he or she must indicate his or her name and may include the country of which he or she is a national. *Common Regulations Under the Madrid Agreement Concerning the International Registration of Marks and the Protocol Relating to That Agreement* (“Common Regs.”), Rule 9(4)(b)(i) (2008). The international application does not require this information, but when the information is included, the IB will forward the nationality of the applicant to the USPTO. In a §66(a) application, if the “Nationality of Applicant” field appears in the Trademark Image Capture and Retrieval System (“TICRS”) (which is available to the public through the Trademark Status and Document Retrieval (“TSDR”) portal on the USPTO website at <http://tsdr.uspto.gov/>), this means that the applicant is an individual rather than a juristic entity, and that applicant’s citizenship is the country corresponding to the two-letter code set forth in this field. The list of country codes appears in the MM2 International Registration application form at [http://www.wipo.int/export/sites/www/madrid/en/forms/docs/form\\_mm2.pdf](http://www.wipo.int/export/sites/www/madrid/en/forms/docs/form_mm2.pdf). A separate statement that applicant is an individual will not appear in TICRS, and the “Legal Nature” and “Legal Nature: Place Incorporated” fields will state “Not Provided.”

If the “Nationality of Applicant” field appears in TICRS, the examining attorney may enter the relevant information into the Trademark database, or ask the LIE to enter it. No inquiry as to the applicant’s entity or citizenship is necessary. If the “Nationality of Applicant” field does not appear in TICRS, the examining attorney must require that the applicant indicate its entity and citizenship. Examining attorneys cannot rely on the “Entitlement Nationality,” “Entitlement Establishment,” or “Entitlement Domiciled” fields for the applicant’s citizenship because these fields merely indicate the basis for the applicant’s entitlement to file an application through the Madrid system, not the national citizenship of the individual applicant.

*Sole Proprietorship.* An applicant may identify itself as a sole proprietorship. If an applicant does so, the applicant must also indicate the state where the sole proprietorship is organized, in addition to the name and national citizenship of the sole proprietor.

If the application specifically identifies the applicant as a sole proprietorship and indicates the state of organization of the sole proprietorship and the name and citizenship of the sole proprietor, the USPTO will accept the characterization of the entity. On the other hand, if the application refers to a sole proprietorship but lacks some of the necessary information or is ambiguous as to whether the applicant should be identified as a sole proprietorship or as an individual, the examining attorney must require appropriate clarification of the entity type.

A sole proprietorship generally means a business which has only one owner. Therefore, if an application identifies two persons or two different entities as a “sole proprietorship,” this is an ambiguity that requires

clarification of the entity type. Note, however, that in California a husband and wife can be classified as a sole proprietorship.

### **803.03(b) Partnership, Joint Venture, or Other “Firm”**

After setting forth the applicant’s name and entity, the application of a partnership or a joint venture should specify the state or country under whose laws the partnership or joint venture is organized. 37 C.F.R. §2.32(a)(3)(ii). In addition, domestic partnerships must set forth the names, legal entities, and national citizenship (for individuals), or state or country of organization (for businesses), of all general partners or active members that compose the partnership or joint venture. 37 C.F.R. §§2.32(a)(3)(iii) and (iv). These requirements apply to both general and limited partnerships. They also apply to a partnership that is a general partner in a larger partnership. Limited partners or silent or inactive partners need not be listed. The following format should be used:

“ \_\_\_\_\_, a (partnership, joint venture) organized under the laws of \_\_\_\_\_, composed of \_\_\_\_\_ (name, legal entity, and citizenship of individual partner; or name, legal entity, and state or country of incorporation or organization of juristic partner).”

In the case of a domestic partnership consisting of ten or more general partners, if the partnership agreement provides for the continuing existence of the partnership in the event of the addition or departure of specific partners, the USPTO will require that the applicant provide the names, legal entities, and national citizenship (or the state or country of organization) of the principal partners only. If there are more than ten principal partners, the applicant need list only the first ten principal partners. If there is no class of principal partners, the applicant may list any ten general partners.

Upon the death or dissolution of a partner or other change in the members that compose a domestic partnership, that legal entity ceases to exist and any subsequent arrangement constitutes a new entity, unless the partnership agreement provides for continuation of the partnership in the event of changes in partners. This same principle also applies to joint ventures. See [TMEP Chapter 500](#) regarding changes of ownership.

The rule requiring names and citizenships of general partners seeks to provide relevant information in the record, given the legal effects of partnership status in the United States. Because the USPTO does not track the varying legal effects of partnership status in foreign countries, and the relevance of the additional information has not been established, the same requirement for additional information does not apply to foreign partnerships.

The term “firm” is not an acceptable designation of the applicant’s entity, because it does not have a universally understood meaning. The examining attorney must require a definite term such as “partnership” or “joint venture” when it is necessary to identify these entities.

See [TMEP §803.03\(k\)](#) regarding limited liability partnerships.

### **803.03(c) Corporation, Association, Organization, and Company**

*Corporation.* In the United States, the term “corporation” is proper for juristic entities incorporated under the laws of the various states or under special federal statutes. In addition to specifying that an applicant is a corporation, the application must specify the applicant’s state (for United States corporations) or country of incorporation (for foreign corporations). It is customary to follow the applicant’s name by the words “a corporation of the state (or country) of . . .” This also applies to a nonprofit or tax-exempt corporation. If

no state or country of incorporation, or the incorrect state or country of incorporation, is given for an applicant corporation, this defect may be corrected by amendment. The amendment does not have to be verified. If a corporation exists by virtue of a specific state or federal statute, this should be stated.

*Association.* “Association” and “nonprofit association” are acceptable terms to identify juristic entities organized under state laws or federal statutes that govern this form of organization. A domestic association must specify the state under whose laws the applicant is organized or exists, and indicate whether the association is incorporated or unincorporated. A foreign association must specify the country under whose laws the applicant is organized or exists and indicate whether the association is incorporated or unincorporated, unless the country and the designation or description “association/associazione” appear in Appendix D. This also applies to a domestic or foreign nonprofit or tax-exempt association. If an association exists by virtue of a specific state or federal statute, this should be stated. Verification is not required.

*Company.* The term “company” is indefinite for describing a United States entity because it does not identify a particular juristic entity, but is acceptable to identify entities organized under the laws of foreign countries that are equivalent or analogous to United States corporations or associations. See [TMEP §803.03\(i\)](#) and TMEP [Appendix D](#) regarding foreign companies.

*Organization.* “Organization” and “nonprofit organization” are indefinite to identify juristic entities. If an applicant’s entity type is identified as a “nonprofit organization,” the examining attorney must require amendment of the entity, or proof that such a legal entity exists under the appropriate state statute or foreign country law.

### **803.03(d) Joint Applicants**

An application may be filed in the names of joint applicants or joint owners. *Ex parte Pacific Intermountain Express Co.*, 111 USPQ 187 (Comm’r Pats. 1956); *Ex parte Edward Taylor and Isabelle Stone Taylor doing business as Baby’s Spray-Tray Co.*, 18 USPQ 292 (Comm’r Pats. 1933). The terms “joint applicant(s)” or “joint owner(s)” reflects the relationship of multiple applicants as to a particular mark, but does not identify a particular type of legal entity in the United States. Therefore, the application must name each of the joint applicants, and must set forth the citizenship (or the state or nation of organization for a juristic applicant) of each of the joint applicants. 37 C.F.R. §§2.32(a)(2) and (3); [TMEP §§803.02](#) and [803.03](#).

The application may also state the joint applicant relationship; however, where an application identifies two or more individuals or entities as the applicant, and separately sets forth the citizenship or state of organization of each, the USPTO will presume that the entity is that of joint applicants, if the record is not otherwise contradictory. If, however, the legal entity is set out as “joint applicant(s)” or “joint owner(s),” the examining attorney must require each applicant to clarify the nature of its legal entity as an individual or juristic person.

An application by joint applicants must be verified by all the applicants, since they are individual parties and not a single entity. However, if only one of the joint applicants signs the verification, the USPTO will presume that he or she is signing on behalf of all the joint applicants, and will not require an additional verification or declaration, unless there is evidence in the record indicating that the party who signed the application was not in fact authorized to sign on behalf of all the joint applicants under 37 C.F.R. §2.193(e)(1).

This does not apply to a response to an Office action submitted by joint applicants who are not represented by a practitioner authorized under 37 C.F.R. §11.14 to practice in trademark cases (“qualified practitioner”).

Such a response must be signed personally by each of the joint applicants. 37 C.F.R. §§2.62(b) and 2.193(e)(2); [TMEP §611.06\(a\)](#). See [TMEP §§611.03\(a\)](#) and [804.04](#) regarding persons authorized to sign a verification on behalf of an applicant.

Joint applicants are not the same as a joint venture. A joint venture is a single applicant, in the same way that a partnership is a single applicant. See [TMEP §803.03\(b\)](#) regarding joint ventures.

### **803.03(e) Trusts, Conservatorships, and Estates**

If a trust is the owner of a mark in an application, the examining attorney must ensure that the trustee(s) is identified as the applicant. Thus, the examining attorney should require that the trust's application be captioned as follows:

The Trustees of the XYZ Trust, a California trust, the trustees comprising John Doe, a United States citizen, and the ABC Corporation, a Delaware corporation.

The application must first refer to the trustee(s) as the applicant and indicate the name of the trust, if any. Then the state under whose laws the trust exists must be set forth. Finally, the names and citizenship of the individual trustees must be listed. If there are more than ten individual trustees, the applicant need list only the first ten trustees.

The same format generally applies to conservatorships and estates as follows:

The Conservator of Mary Jones, a New York conservatorship, the conservator comprising James Abel, a United States citizen.

The Executors of the John Smith estate, a New York estate, the executors comprising Mary Smith and James Smith, United States citizens.

#### **803.03(e)(i) Business Trusts**

Most states recognize an entity commonly identified as a "business trust," "Massachusetts trust," or "common-law trust." A business trust has attributes of both a corporation and a partnership. Many states have codified laws recognizing and regulating business trusts; other states apply common law. The USPTO will accept the entity designation "business trust," or any appropriate variation provided for under relevant state law.

The business trust is created under the instructions of the instrument of trust. Generally, the "trustee" has authority equivalent to an officer in a corporation. Laws vary to some extent as to the authority conferred on various individuals associated with the business trust.

The application must first refer to the trustee(s) as the applicant and indicate the name of the trust, if any. The state under whose laws the trust exists, and the names and citizenship (or state of incorporation or organization) of the individual trustees, must also be set forth. Accordingly, the examining attorney should require that the business trust's application be captioned as follows:

The Trustees of the DDT Trust, a California business trust, the trustees comprising Sue Smith, a United States citizen, and the PDQ Corporation, a Delaware corporation.

For the purpose of service of process, the business trust is essentially like a corporation. Therefore, it is not necessary to identify the beneficiaries or equitable owners of the business trust in identifying the entity.

### **803.03(f) Governmental Bodies and Universities**

It is difficult to establish any rigid guidelines for designating the entity of a governmental body. Due to the variety in the form of these entities, the examining attorney must consider each case on an individual basis. The following are just a few examples of acceptable governmental entities:

Department of the Air Force, an agency of the United States.

Maryland State Lottery Agency, an agency of the State of Maryland.

City of Richmond, Virginia, a municipal corporation organized under the laws of the Commonwealth of Virginia.

These examples are not exhaustive of the entity designations that are acceptable.

The structure of educational institutions varies significantly. The following are examples of acceptable university entities:

Board of Regents, University of Texas System, a Texas governing body.

University of New Hampshire, a nonprofit corporation of New Hampshire.

Auburn University, State University, Alabama.

These examples are not exhaustive of the entity designations that are acceptable.

The designations “education institution” and “educational organization” are not acceptable. If the applicant uses either of these designations to identify the entity, the examining attorney must require the applicant to amend the entity designation to a legally recognized juristic entity.

### **803.03(g) Banking Institutions**

The nature of banking institutions is strictly regulated and, thus, there are a limited number of types of banking entities. Some banking institutions are federally chartered while others are organized under state law. The following are examples of acceptable descriptions of banking institutions:

First American Bank of Virginia, a Virginia corporation.

Pathway Financial, a federally chartered savings and loan association.

This is not an exhaustive listing of acceptable entity designations.

### **803.03(h) Limited Liability Companies**

Most states recognize an entity commonly identified as a “limited liability company” or “LLC.” The entity has attributes of both a corporation and a partnership. Therefore, the USPTO must accept the entity designation “limited liability company.” The examining attorney may accept appropriate variations of this entity, with proof that the entity exists under the law of the relevant state. For example, some states recognize an entity identified as a “low-profit-limited-liability company” or “L3C,” which combines the features of a for-profit LLC and a nonprofit organization.

If “LLC” or “L3C” appears in the applicant’s name, but the entity is listed as a corporation, the examining attorney must inquire as to whether the applicant is a limited liability company or a corporation.

The applicant must indicate the state under whose laws the limited liability company is established. It is not necessary to list the “members” or owners of the limited liability company when identifying the entity.

See [TMEP §611.06\(g\)](#) regarding the proper party to sign a response to an Office action filed by a limited liability company that is not represented by an attorney.

*Limited Liability Corporation.* A business organization known as a “limited liability corporation” is currently not recognized. If an applicant’s entity type is identified as a limited liability corporation, the examining attorney must inquire as to whether the applicant is a limited liability company or a corporation. If the applicant believes that it is a limited liability corporation, then the applicant must provide proof that such a legal entity exists under the appropriate state statute.

See [TMEP §803.03\(k\)](#) regarding limited liability partnerships.

### **803.03(i) Common Terms Designating Entity of Foreign Applicants**

In designating the legal entity of foreign applicants, acceptable terminology is not always the same as for United States applicants. The word “corporation” as used in the United States is not necessarily equivalent to juristic entities of foreign countries; the word “company” is sometimes more accurate. If the applicant is from the United Kingdom or another commonwealth country (e.g., Canada or Australia) and the term “company” (or the abbreviation “co.,”) is used, no inquiry is needed. “Limited company” is also acceptable in China and in commonwealth countries. There is a list of commonwealth countries on the commonwealth website at <http://www.thecommonwealth.org/Internal/142227/members/>. In any other case, when the term “company” is used, the examining attorney must clarify what type of entity is applying.

“Limited corporation” is also an acceptable entity designation for a foreign applicant.

[Appendix D](#) of this manual lists common foreign designations, and their abbreviations, used by various foreign countries to identify legal commercial entities. The appendix also includes a description (Joint Stock Company, Cooperative Society, Trading Partnership, etc.) of the foreign designation and, in some cases, the equivalent United States entity. If a foreign designation, its abbreviation, or a description appears in the appendix, the examining attorney may accept any of those terms as the entity designation without further inquiry. The applicant may also choose to specify the legal entity by indicating the entity that would be its equivalent in the United States. However, if an applicant identifies itself by a name that includes a foreign entity designation in Appendix D (e.g., “Business SpA”), but provides a characterization of the entity that

does not match the description (e.g., General Partnership), the examining attorney must clarify the nature of the applicant's entity.

If a foreign entity designation, its abbreviation, or its description does not appear in [Appendix D](#), the examining attorney must inquire further into the specific nature of the entity. The examining attorney may request a description of the nature of the foreign entity, if necessary.

The applicant must also specify the foreign country under whose laws it is organized, but no additional information is required, even if additional information would be required for a United States entity of the same name. For example, it is not necessary to set forth the names and citizenship of the partners of a foreign partnership. The rule requiring names and citizenships of general partners (37 C.F.R. §2.32(a)(3)(iii)) seeks to provide relevant information in the record, given the legal effects of partnership status in the United States.

Because the USPTO does not track the varying legal effects of partnership status in foreign countries, and the relevance of the additional information has not been established, the same requirement for additional information does not apply to foreign partnerships.

Foreign entities may be organized under either national or provincial laws. However, the TEAS form requires an applicant to specify the state or foreign country under which it is legally organized, but does not permit an applicant to specify a foreign province or geographical region in this field. Therefore, if the applicant is organized under the laws of a foreign province or geographical region, the applicant should select as the entity type the choice of "Other," which will allow entry within the free-text field provided at "Specify Entity Type" of both the type of entity and the foreign province or geographical region under which it is organized (e.g., "corporation of Ontario"). In the next section, "State or Country Where Legally Organized," the country (e.g., "Canada") should then be selected from the pull-down menu.

### **803.03(j) Federally Recognized Indian Tribe**

A federally recognized Indian tribe, organized under the laws of the United States, is an acceptable designation of an applicant's entity.

### **803.03(k) Limited Liability Partnerships**

Most states recognize an entity commonly identified as a "limited liability partnership" ("LLP"). An LLP is separate and distinct from a limited partnership, and is more closely associated with a limited liability company in that it has attributes of both a corporation and a partnership. Therefore, the USPTO will accept the entity designation "limited liability partnership." The examining attorney may accept appropriate variations of this entity (e.g., "limited liability limited partnership" or "LLLPP"), with proof that the entity exists under the law of the relevant state.

The applicant must indicate the state under whose laws the limited liability partnership is established. It is not necessary to list the partners of the limited liability partnership when identifying the entity.

See [TMEP §611.06\(h\)](#) regarding the proper party to sign a response to an Office action filed by a limited liability partnership that is not represented by a qualified practitioner.

See also [TMEP §803.03\(h\)](#) regarding limited liability companies.

### 803.04 Citizenship of Applicant

An application for registration must specify the applicant's citizenship or the state or nation under whose laws the applicant is organized. 37 C.F.R. §2.32(a)(3). If ambiguous terms are used, the examining attorney must require the applicant to clarify the record by setting forth the citizenship with greater specificity. For example, the term "American" is ambiguous because it could refer to a citizen of North, South, or Central America. Therefore, "United States" or "U.S.A." is the appropriate citizenship designation for applicants who are citizens of the United States of America. However, terms such as "Brazilian," "Colombian," and "Welsh" are acceptable citizenship designations because each refers to a specific country.

An individual applicant should set forth the country of which he or she is a citizen. Current citizenship information must be provided; a statement indicating that the applicant has applied for citizenship in any country is not relevant or acceptable. If an individual is not a citizen of any country, a statement to this effect is acceptable.

In an application for international registration, if the applicant is a natural person, he or she must indicate his or her name and may include the country of which he or she is a national. Common Regs, Rule 9(4)(b)(i). The international application does not require this information, but when the information is included, the IB will forward the nationality of the applicant to the USPTO. In a §66(a) application, if the "Nationality of Applicant" field appears in TICRS, this means that the applicant is an individual rather than a juristic entity, and that applicant's citizenship is the country corresponding to the two-letter code set forth in this field. The list of country codes appears in the MM2 International Registration application form, which can be found at <http://www.wipo.int/pct/en/appguide/>. A separate statement that applicant is an individual will not appear in TICRS, and the "Legal Nature" and "Legal Nature: Place Incorporated" fields will state "Not Provided."

If the "Nationality of Applicant" field appears in TICRS, the examining attorney may enter the relevant information into the Trademark database, or ask the LIE to enter it. No inquiry as to the applicant's entity or citizenship is necessary. If the "Nationality of Applicant" field does not appear in TICRS, the examining attorney must require that the applicant indicate its entity and citizenship. Examining attorneys cannot rely on the "Entitlement Nationality," "Entitlement Establishment," or "Entitlement Domiciled" fields for the applicant's citizenship because these fields merely indicate the basis for the applicant's entitlement to file an application through the Madrid system, not the national citizenship of the individual applicant.

If an applicant asserts dual citizenship, the applicant must choose which citizenship will be printed in the *Official Gazette* and on the registration certificate. The USPTO will print only one country of citizenship for each person in the *Official Gazette* and on the registration certificate, and the automated records of the USPTO will indicate only one country of citizenship for each person.

For a corporation, the application must set forth the United States state or foreign country of incorporation. 37 C.F.R. §2.32(a)(3)(ii).

Foreign entities may be organized under either national or provincial laws. However, the TEAS form requires an applicant to specify the state or foreign country under which it is legally organized, but does not permit an applicant to specify a foreign province or geographical region in this field. Therefore, if the applicant is organized under the laws of a foreign province or geographical region, the applicant should select as the entity type the choice of "Other," which will allow entry within the free-text field provided at

“Specify Entity Type” of both the type of entity and the foreign province or geographical region under which it is organized (e.g., “corporation of Ontario”). In the next section, “State or Country Where Legally Organized,” the country (e.g., “Canada”) should then be selected from the pull-down menu.

For an association, the application must set forth the United States state or foreign country under whose laws the association is organized or incorporated. 37 C.F.R. §2.32(a)(3)(ii). See [TMEP §803.03\(c\)](#).

A partnership or other firm must set forth the United States state or foreign country under the laws of which the partnership is organized. Domestic partnerships must also provide citizenship information for each general partner in the partnership. 37 C.F.R. §2.32(a)(3)(iii). This requirement also applies to a partnership that is a general partner in a larger partnership. See [TMEP §803.03\(b\)](#) for the proper format for identifying a partnership. Given the varying legal effects of partnership status in foreign countries, the relevance of the name and citizenship information for each partner has not been established. Therefore, for foreign partnerships, it is not necessary to provide the names and citizenship of the partners. See [TMEP §803.03\(i\)](#) for further information about foreign applicant entities.

For joint applicants or a joint venture, the application should set forth the citizenship or United States state or foreign country of organization of each party. Domestic joint ventures must also provide citizenship information for all active members of the joint venture. 37 C.F.R. §2.32(a)(3)(iv). See [TMEP §803.03\(b\)](#) for the proper format for identifying a joint venture.

### **803.05 Address of Applicant**

The written application must specify the applicant’s mailing address. 37 C.F.R. §2.32(a)(4). Addresses should include the United States Postal Service ZIP code or its equivalent for addresses outside the United States. The applicant’s address may consist of a post office box.

For an individual, the application must set forth either the business address or the residence address.

If the application sets out more than one address, the applicant should designate the address to be included on the registration certificate.

For a partnership or other firm, only the address of the business need be set forth -- not the addresses of the partners or members.

For a corporation or association, the business address should be set forth. If the corporation’s business address is not in its state of incorporation, the applicant should set out the address where the applicant is domiciled.

For joint applicants, the application should include addresses for each party.

The application must also include an address for correspondence concerning the application. See 37 C.F.R. §§2.18 and 2.21(a)(2). This is referred to as the correspondence address. See [TMEP §§609](#) *et seq.*

### **803.06 Applicant May Not Be Changed**

While an application can be amended to correct an inadvertent error in the manner in which an applicant’s name is set forth ( see [TMEP §1201.02\(c\)](#)), an application cannot be amended to substitute another entity as the applicant. If the application was filed in the name of a party who had no basis for his or her assertion

of ownership of (or entitlement to use) the mark as of the filing date, the application is void, and registration must be refused. 37 C.F.R. §2.71(d); [TMEP §1201.02\(b\)](#). *Huang v. Tzu Wei Chen Food Co. Ltd.*, 849 F.2d 1458, 7 USPQ2d 1335 (Fed. Cir. 1988); *Great Seats, Ltd. v. Great Seats, Inc.*, 84 USPQ2d 1235 (TTAB 2007); *American Forests v. Sanders*, 54 USPQ2d 1860 (TTAB 1999), *aff'd*, 232 F.3d 907 (Fed. Cir. 2000); *In re Tong Yang Cement Corp.*, 19 USPQ2d 1689 (TTAB 1991); *In re Lettmann*, 183 USPQ 369 (TTAB 1974); *Dunleavy v. Koepfel Steel Products, Inc.*, 114 USPQ 43 (Comm'r Pats. 1957), *aff'd*, 328 F.2d 939, 140 USPQ 582 (C.C.P.A. 1964); *Richardson Corp. v. Richardson*, 51 USPQ 144 (Comm'r Pats. 1941); *Celanese Corp. of America v. Edwin Crutcher*, 35 USPQ 98 (Comm'r Pats. 1937). The USPTO will not refund the application filing fee in such a case.

A void application cannot be cured by amendment or assignment. The true owner may file another application (with a new filing fee) in its name or, if the applicant who is refused later becomes the owner of the mark, he or she may file another application (with a new filing fee) at that time.

See [TMEP §1201.02\(c\)](#) for examples of correctable and non-correctable errors in identifying the applicant, [TMEP §803.01](#) regarding minor applicants, and [TMEP §1201.02\(e\)](#) and [TMEP Chapter 500](#) regarding the situation in which the true owner of a mark files an application and transfers ownership to another party *after* the filing date.

## 804 Verification and Signature

An application must include a statement that is verified by the applicant or by someone who is authorized to verify facts on behalf of an applicant. 15 U.S.C. §§1051(a)(3) and 1051(b)(3); 37 C.F.R. §§2.32(b), 2.33(a), and 2.193(e)(1).

In an application under §1 or §44 of the Trademark Act, a signed verification is not required for receipt of an application filing date under 37 C.F.R. §2.21(a). If the initial application does not include a proper verified statement, the examining attorney must require the applicant to submit a verified statement that relates back to the original filing date. See [TMEP §§804.01](#) *et seq.* regarding the form of the oath or declaration, [TMEP §804.02](#) regarding the essential allegations required to verify an application for registration of a mark, and [TMEP §804.04](#) regarding persons properly authorized to sign a verification on behalf of an applicant.

In §66(a) applications, the verified statement is part of the international registration on file at the IB. 37 C.F.R. §2.33(e). See [TMEP §§804.05](#) and [1904.01\(c\)](#).

### 804.01 Form and Wording of Verification in §1 or §44 Application

The format of the verification in an application under §1 or §44 of the Trademark Act may be: (1) the classical form for verifying, which includes an oath (jurat) ( *see* [TMEP §804.01\(a\)](#)); or (2) a declaration under 37 C.F.R. §2.20 or 28 U.S.C. §1746 instead of an oath ( *see* [TMEP §804.01\(b\)](#)).

#### 804.01(a) Verification with Oath

The verification is placed at the end of the application. It should first set forth the venue; followed by the signer's name (or the words "the undersigned"); then the necessary statements ([TMEP §804.02](#)); concluding with the signature. After the signature, there should be the jurat for the officer administering the oath, and an indication of the officer's authority (such as notarial seal).

The form of the verification depends on the law of the jurisdiction where the document is executed, so variations of the above form are acceptable. If there is a question as to the validity of the verification, the examining attorney should ask the applicant if the verification complies with the laws of the applicant's jurisdiction. See [TMEP §804.01\(a\)\(i\)](#) regarding verifications made in a foreign country.

If the verification is notarized but does not include the notarial seal, the examining attorney must require a substitute affidavit or declaration under 37 C.F.R. §2.20.

If the verification is notarized but has not been dated, the applicant must submit either a statement from the notary public attesting to the date of signature and notarization, or a substitute affidavit or declaration under 37 C.F.R. §2.20.

### **804.01(a)(i) Verification Made in Foreign Country**

Verification (with oath) made in a foreign country may be made: (1) before any diplomatic or consular officer of the United States; or (2) before any official authorized to administer oaths in the foreign country.

In those foreign countries that are members of The Hague Convention Abolishing the Requirement of Legislation for Foreign Public Documents, a document verified before a foreign official should bear or have appended to it an apostille (i.e., a certificate issued by an official of the member country).

Member countries, territories, and Departments in Europe participating in this Convention are: Anquilla, Antigua & Barbuda, Argentina, Armenia, Australia, Austria, Bahamas, Bailiwick of Guernsey, Barbados, Belarus, Belgium, Belize, Bermuda, Bosnia & Herzegovina, Botswana, British Antarctic, British Guiana (Guyana), British Solomon Islands, Cayman, Croatia, Cyprus, Dominica, El Salvador, Falkland Islands, Figi, Finland, France, French Guiana, Germany, Gibraltar, Gilbert & Ellice Islands (Kiribati), Greece, Grenada, Guadeloupe, Hong Kong, Hungary, Isle of Man, Jersey, Israel, Italy, Japan, Latvia, Lesotho, Liechtenstein, Lithuania, Luxembourg, Macedonia, Malawi, Malta, Marshall Islands, Martinique, Mauritius, Mexico, Montserrat, Netherlands, New Hebrides (Vanuatu), Norway, Panama, Portugal, Reunion, Saint Christopher & Nevis, Saint Helena, Saint Lucia, Saint Vincent, San Marino, Seychelles, Slovenia, South Africa, Southern Rhodesia (Zimbabwe), Spain, Suriname, Swaziland, Switzerland, Tonga, Turkey, Turks & Caicos, United Kingdom & Northern Ireland, and the Virgin Islands.

An apostille must be square shaped with sides at least 9 centimeters long. The following is the prescribed form for an apostille:

<p><b>APOSTILLE</b></p> <p><b>(Convention de La Haye du Oct. 5, 1961)</b></p> <p>1. Country: _____  This public document</p> <p>2. has been signed by _____</p> <p>3. acting in capacity of _____</p> <p>4. bears the seal/stamp of _____</p> <p><b>CERTIFIED</b></p> <p>5. at _____</p> <p>6. the _____</p> <p>7. by _____</p> <p>8. No. _____</p> <p>9. Seal/stamp: _____</p> <p>10. Signature: _____</p>
---

See notice at 1013 TMOG 3 (December 1, 1981).

If a verification is made before a foreign official in a country that is not a member of the Hague Convention, the foreign official's authority must be proved by a certificate of a diplomatic or consular officer of the United States. 15 U.S.C. §1061.

Declarations under 37 C.F.R. §2.20 and 28 U.S.C. §1746 by foreign persons do not have to be made before a United States diplomatic or consular officer, or before a foreign official authorized to administer oaths. A declaration under 28 U.S.C. §1746 that is executed outside the United States must allege that "I declare (or certify, verify, or state) under penalty of perjury under the laws of the United States of America that the foregoing is true and correct." See [TMEP §804.01\(b\)](#).

See <http://www.state.gov/www/authenticate/index.html> for updated information about the Hague Convention.

### **804.01(b) Declaration in Lieu of Oath**

Under 35 U.S.C. §25, the USPTO is authorized to accept a declaration under 37 C.F.R. §2.20 or 28 U.S.C. §1746 instead of an oath. These declarations can be used whenever the Act or rules require that a document be verified or under oath.

When the language of 37 C.F.R. §2.20 or 28 U.S.C. §1746 is used with a document, the document is said to have been subscribed to (signed) by a written declaration rather than verified by oath (jurat).

When a declaration is used in lieu of an oath, the party must include in place of the oath (jurat) the statement that “all statements made of his or her own knowledge are true and all statements made on information and belief are believed to be true.” Preferably, this language is placed at the end of the document.

In addition, the declaration must warn the declarant that willful false statements and the like are punishable by fine or imprisonment, or both (18 U.S.C. §1001). 35 U.S.C. §25(b). Trademark Rule 2.20 requires that the warning contain the additional language that such statements may jeopardize the validity of the application (or document) or any registration resulting therefrom. A declaration under 37 C.F.R. §2.20 should read as follows:

The undersigned being warned that willful false statements and the like are punishable by fine or imprisonment, or both, under 18 U.S.C. 1001, and that such willful false statements and the like may jeopardize the validity of the application or document or any registration resulting therefrom, declares that all statements made of his/her own knowledge are true; and all statements made on information and belief are believed to be true.

---

(Signature)

---

(Print or Type Name and Position)

---

(Date)

Instead of using the language of 37 C.F.R. §2.20, an applicant may use the language of 28 U.S.C. §1746, which provides as follows:

Wherever, under any law of the United States or under any rule, regulation, order, or requirement made pursuant to law, any matter is required or permitted to be supported, evidenced, established, or proved by the sworn declaration, verification, certificate, statement, oath, or affidavit, in writing of the person making the same (other than a deposition, or an oath of office, or an oath required to be taken before a specific official other than a notary public), such matter may, with like force and effect, be supported, evidenced, established, or proved by the unsworn declaration, certificate, verification, or statement, in writing of such person which is subscribed by him, as true under penalty of perjury, and dated, in substantially the following form:

1 If executed outside the United States, its territories, possessions, or commonwealths: “I declare (or certify, verify, or state) under penalty of perjury under the laws of the United States of America that the foregoing is true and correct. Executed on (date).(Signature)”.

2 If executed within the United States, its territories, possessions, or commonwealths: “I declare (or certify, verify, or state) under penalty of perjury that the foregoing is true and correct. Executed on (date).(Signature)”.

*NOTE: Title 35 of the United States Code pertains specifically to the USPTO and, therefore, is preferred to 28 U.S.C. §1746, which is a statute of general application relating to verification on penalty of perjury.*

A declaration that does not attest to an awareness of the penalty for perjury is unacceptable. 35 U.S.C. §25.

*In re Hoffmann-La Roche Inc.*, 25 USPQ2d 1539 (Comm’r Pats. 1992) (failure to include a statement attesting to an awareness of the penalty for perjury, which is the very essence of an oath, is not a “minor defect” that can be provisionally accepted under 35 U.S.C. §26), *overruled on other grounds*, *In re Moisture Jamzz Inc.*, 47 USPQ2d 1762, 1764 (1997); *In re Stromsholmens Mekaniska Verkstad AB*, 228 USPQ 968 (TTAB 1986); *In re Laboratories Goupil, S.A.*, 197 USPQ 689 (Comm’r Pats. 1977).

The signatory must personally sign his or her name. It is unacceptable for a person to sign another person’s name to a declaration pursuant to a general power of attorney. See *In re Dermahose Inc.*, 82 USPQ2d 1793 (TTAB 2007); *In re Cowan*, 18 USPQ2d 1407 (Comm’r Pats. 1990). In a TEAS submission, the person(s) identified as the signer(s) must manually enter the elements of the electronic signature. The rules do not provide authority for an attorney to sign another person’s declaration. *Dermahose*, 82 USPQ2d at 1795. See [TMEP §611.01\(c\)](#) regarding signature of documents filed through TEAS.

If a declaration under 37 C.F.R. §2.20 or 28 U.S.C. §1746 is not dated, the examining attorney must require the applicant to state the date on which the declaration was signed. This statement does not have to be verified, and may be entered through a Note to the File in the record.

See [TMEP §804.02](#) regarding the essential allegations required to verify an application for registration of a mark.

## **804.02 Averments Required in Verification of Application for Registration - §1 or §44 Application**

The requirements for the verified statement in applications under §1 or §44 of the Trademark Act are set forth in §§1(a)(3), 1(b)(3), and 44 of the Trademark Act, 15 U.S.C. §§1051(a)(3), 1051(b)(3), and 1126, and 37 C.F.R. §§2.33, 2.34, and 2.193(e)(1). These allegations are required regardless of whether the verification is in the form of an oath ([TMEP §804.01\(a\)](#)) or a declaration ([TMEP §804.01\(b\)](#)). See [TMEP §804.05](#) regarding the requirements for verification of a §66(a) application.

*Truth of Facts Recited.* Under 15 U.S.C. §§1051(a)(3)(B) and 1051(b)(3)(C), the verification of an application for registration must include an allegation that “to the best of the verifier’s knowledge and belief, the facts recited in the application are accurate.” 37 C.F.R. §§2.33(b)(1) and (2). The language in 37 C.F.R. §2.20 that “all statements made of [the verifier’s] own knowledge are true, and all statements made on information and belief are believed to be true” satisfies this requirement.

*Use in Commerce.* If the filing basis is §1(a), the applicant must submit a verified statement that the mark is in use in commerce on or in connection with the goods or services listed in the application. If the verification is not filed with the original application, the verified statement must also allege that the mark

was in use in commerce on or in connection with the goods or services listed in the application *as of the application filing date*. 37 C.F.R. §2.34(a)(1)(i).

*Bona Fide Intention to Use in Commerce.* If the filing basis is §1(b), §44(d), or §44(e), the applicant must submit a verified statement that the applicant has a bona fide intention to use the mark in commerce on or in connection with the goods or services listed in the application. 15 U.S.C. §§1051(b)(3)(B), 1126(d)(2), and 1126(e). If the verification is not filed with the original application, the verified statement must also allege that the applicant has had a bona fide intention to use the mark in commerce on or in connection with the goods or services listed in the application *as of the application filing date*. 37 C.F.R. §§2.34(a)(2), 2.34(a)(3)(i), and 2.34(a)(4)(ii).

*Ownership or Entitlement to Use.* In an application based on §1(a), the verified statement must allege that the verifier *believes the applicant to be the owner of the mark* and that no one else, to the best of his or her knowledge and belief, has the right to use the mark in commerce, either in the identical form or in such near resemblance as to be likely, when applied to the goods or services of the other person, to cause confusion or mistake, or to deceive. 15 U.S.C. §§1051(a)(3)(A), (D); 37 C.F.R. §2.33(b)(1).

In an application based on §1(b) or §44, the verified statement must allege that the verifier *believes the applicant to be entitled to use the mark in commerce* and that no one else, to the best of his or her knowledge and belief, has the right to use the mark in commerce, either in the identical form or in such near resemblance as to be likely, when applied to the goods or services of the other person, to cause confusion or mistake, or to deceive. *See* 15 U.S.C. §1051(b)(3)(A); 37 C.F.R. §2.33(b)(2).

While the correct language for an application filed under §1(b) or §44 is “entitled to use,” if a §1(b) or §44 applicant files a verification stating that the applicant is the owner of the mark, the USPTO will accept the verification, and will not require a substitute verification stating that the applicant is entitled to use the mark.

*Concurrent Use.* The verification for concurrent use should be modified to indicate an exception, i.e., that no one else *except as specified in the application* has the right to use the mark. 15 U.S.C. §1051(a)(3)(D). *See* [TMEP §§1207.04](#) *et seq.* regarding concurrent use registration.

Related-company use does not require stating an exception, because the statement that no one else has the right to use the mark refers only to adverse users and not to licensed or permitted use. *See* [TMEP §§1201.03](#) *et seq.* regarding use by related companies.

*Affirmative, Unequivocal Averments Based on Personal Knowledge Required.* The verification must include affirmative, unequivocal averments that meet the requirements of the Act and the rules. Statements such as “the undersigned [person signing the declaration] has been informed that the applicant is using [or has a bona fide intention to use] the mark in commerce...” or wording that disavows the substance of the declaration, are unacceptable.

*Substitute Verification.* If the verified statement does not include all the necessary averments, the examining attorney will require a substitute or supplemental affidavit or declaration under 37 C.F.R. §2.20.

## **804.03 Time Between Execution and Filing of Documents - §1 or §44 Application**

*Documents Must Be Filed Within a Reasonable Time After Execution*

All applications and documents must be filed within a reasonable time after their execution. Under 37 C.F.R. §2.33(c), if the verified statement supporting an application for registration is not filed within a reasonable time after it is signed, the USPTO will require the applicant to submit a substitute affidavit or declaration under 37 C.F.R. §2.20 of the applicant's continued use or bona fide intention to use the mark in commerce.

Re-execution is also required where an allegation of use (i.e., either an amendment to allege use under 15 U.S.C. §1051(c) or a statement of use under 15 U.S.C. §1051(d)) or request for extensions of time to file a statement of use is not filed within a reasonable time after the date of execution. 37 C.F.R. §§2.76(i), 2.88(k), and 2.89(h); [TMEP §§1104.09](#), [1108.02\(b\)](#), and [1109.11\(c\)](#).

The USPTO considers one year between execution and filing as reasonable for all applications and all documents. No new verification should be required if the document is filed within one year of execution.

If an application, allegation of use, or request for extension of time to file a statement of use is filed more than one year after its execution, the examining attorney will require that the applicant submit re-executed documents, or a statement that is verified or includes a declaration under 37 C.F.R. §2.20, of the applicant's continued use or bona fide intent to use the mark in commerce, as appropriate.

#### *Documents Cannot Be Filed Before They Are Executed*

If an applicant files an application that is signed and lists a date of execution that is subsequent to the application filing date, the examining attorney will inquire as to the actual date on which the application was signed. However, where an application is executed in a foreign country located across the international date line, the fact that an application shows a date of execution as of the day after the application filing date is not inconsistent with its having been executed before filing. No inquiry is required in this limited situation.

### **804.04 Persons Authorized to Sign Verification or Declaration**

#### *37 CFR §2.33(a)*

The application must include a statement that is signed in accordance with the requirements of §2.193 and verified (sworn to) or supported by a declaration under §2.20 by a person properly authorized to sign on behalf of the applicant under §2.193(e)(1).

#### *37 CFR §2.193(e)(1) Verification of facts.*

A verification in support of an application for registration, amendment to an application for registration, allegation of use under §2.76 or §2.88, request for extension of time to file a statement of use under §2.89, or an affidavit under section 8, 12(c), 15, or 71 of the Trademark Act must be sworn to or supported by a declaration under §2.20, signed by the owner or a person properly authorized to sign on behalf of the owner. A person who is properly authorized to verify facts on behalf of an owner is:

- (i) A person with legal authority to bind the owner (e.g., a corporate officer or general partner of a partnership);
- (ii) A person with firsthand knowledge of the facts and actual or implied authority to act on behalf of the owner; or
- (iii) An attorney as defined in §11.1 of this chapter who has an actual written or verbal power of attorney or an implied power of attorney from the owner.

The Trademark Act does not specify the appropriate person to verify facts on behalf of an applicant. The definition of a "person properly authorized to sign on behalf of the applicant" is set forth in 37 C.F.R. §2.193(e)(1). This definition applies to applications for registration, amendments to allege use, statements of use, requests for extensions of time to file statements of use, affidavits of continued use or excusable nonuse under 15 U.S.C. §1058, affidavits of incontestability under 15 U.S.C. §1065, and combined filings under 15 U.S.C. §§1058 and 1059. 37 C.F.R. §§2.76(b)(1), 2.88(b)(1), 2.89(b)(3), and 2.161(b). It also applies to declarations supporting amendments to dates of use, use of substitute specimens, claims of acquired distinctiveness under 15 U.S.C. §1052(f), amendments changing the basis for filing, and requests for amendment or correction of registrations under 15 U.S.C. §1057. 37 C.F.R. §2.193(e)(1).

Generally, the USPTO does not question the authority of the person who signs a verification, unless there is an inconsistency in the record as to the signatory's authority to sign. The USPTO presumes that the

verification or declaration is properly signed. In view of the broad definition of a “person properly authorized to sign on behalf of the applicant” in 37 C.F.R. §2.193(e)(1), the fact that an application is signed by someone whose title refers to a different entity is not considered an inconsistency that warrants an inquiry as to whether the verification was properly signed.

*Example:* If an application is filed by “ABC Company, Inc.,” and the verification is signed by an officer of “XYZ Company, Inc.,” the USPTO will presume that XYZ Company, Inc. is a related company properly authorized to sign on behalf of ABC Company, Inc.

The signatory should set forth his or her name and title, or state the relationship between the applicant and the person who signed the verification.

If the person signing the verification is identified as a different person than the individual named as the applicant, or as representing a different legal entity than the juristic applicant, the USPTO generally will not question whether the proper party is listed as the applicant.

*Example:* If the applicant is identified as Mary Smith, an individual citizen of the U.S., and the application is signed by John Smith, the USPTO will not question whether the proper party is listed as applicant.

*Example:* If the applicant is John Smith, an individual citizen of the U.S., and the application is signed by John Smith, President, XYZ, Inc., the USPTO will not question whether the proper party is listed as applicant.

If a qualified practitioner signs a verification on behalf of an applicant, the USPTO will not require a power of attorney or other documentation stating that the practitioner is authorized to sign.

This policy applies to both individual applicants and juristic applicants.

The broad definition of a “person properly authorized to sign on behalf of the applicant” in 37 C.F.R. §2.193(e)(1) applies *only* to verifications of facts by the applicant. It does *not* apply to powers of attorney, revocations of powers of attorney, responses to Office actions, letters of express abandonment, or changes to the correspondence address. 37 C.F.R. §§2.193(e)(2), (3), and (9).

A non-attorney who is authorized to verify facts on behalf of an applicant under 37 C.F.R. §2.193(e)(1) is *not* necessarily entitled to sign responses to Office actions, or to authorize examiner’s amendments and priority actions. Preparing a document, authorizing an amendment to an application, and submitting legal arguments in response to an examining attorney’s requirement or refusal of registration all constitute examples of representation of the applicant in a trademark matter. 37 C.F.R. §11.5(b)(2). Under 5 U.S.C. §500(d) and 37 C.F.R. §11.14(e), non-attorneys may not represent a party in a trademark proceeding before the USPTO. See [TMEP §§611.03\(b\)](#), [611.06](#) *et seq.*, and [712](#) *et seq.* regarding signature on responses to Office actions.

The signatory must personally sign his or her name. 37 C.F.R. §§2.193(a)(1) and (c)(1). It is unacceptable for a person to sign another person’s name to a verification pursuant to a general power of attorney. See *In re Dermahose Inc.*, 82 USPQ2d 1793 (TTAB 2007); *In re Cowan*, 18 USPQ2d 1407 (Comm’r Pats. 1990). In a TEAS submission, the person whose name is affixed to the verification must manually enter the elements of the electronic signature. The rules do not provide authority for an attorney to sign another person’s declaration. *Dermahose*, 82 USPQ2d at 1795.

The name of the person who signs a document submitted in connection with an application must be set forth in printed or typed form immediately below or adjacent to the signature, or identified elsewhere in the filing (e.g., in a cover letter or other document that accompanies the filing). 37 C.F.R. §2.193(d). If the signatory’s

name is not set forth in a document, the USPTO may require that it be stated for the record. This information can be entered through a Note to the File.

In applications under §66(a) of the Act, the verified statement is part of the international registration on file at the IB. 37 C.F.R. §2.33(e). The IB establishes that an international registration includes a signed declaration before it sends the request for extension of protection to the USPTO. Generally, the examining attorney should not issue any inquiry regarding the authority of the signatory to verify the application. If the applicant needs to file a request for correction of the declaration, the request should be filed with the IB.

However, if the applicant voluntarily files a substitute declaration with the USPTO, it will be examined according to the same standards used for examining any other declaration. See [TMEP §804.05](#) regarding verification of §66(a) applications.

### **804.05 Verification of §66(a) Application**

In applications under §66(a) of the Act, the request for extension of protection to the United States must include a declaration that the applicant has a bona fide intention to use the mark in commerce that can be controlled by the United States Congress. The declaration must include a statement that the person making the declaration believes applicant to be entitled to use the mark in commerce, and that to the best of his/her knowledge and belief no other person, firm, corporation, or association has the right to use the mark in commerce, either in the identical form thereof or in such near resemblance thereto as to be likely, when used on or in connection with the goods/services of such other person, to cause confusion, or to cause mistake, or to deceive. 15 U.S.C. §1141(f)(a). The declaration must be signed by: (1) a person with legal authority to bind the applicant; (2) a person with firsthand knowledge of the facts and actual or implied authority to act on behalf of the applicant; or (3) a qualified practitioner who has an actual written or verbal power of attorney or an implied power of attorney from the applicant.

The verified statement in a §66(a) application is part of the international registration on file at the IB. 37 C.F.R. §2.33(e). The IB will have established that the international registration includes this declaration before it sends the request for extension of protection to the USPTO. The examining attorney should generally not issue any inquiry regarding the verification of the application. If the applicant needs to file a request for correction of the declaration, the request should be filed with the IB. However, if the applicant voluntarily files a substitute declaration with the USPTO, it will be examined according to the same standards used for examining any other declaration.

### **805 Identification and Classification of Goods and Services**

An application must include a list of the particular goods or services on or in connection with which the applicant uses or intends to use the mark. 37 C.F.R. §2.32(a)(6). See [TMEP §§1402](#) *et seq.* for further information about identifying goods and services in an application.

The applicant should designate the international class number(s) that are appropriate for the identified goods or services, if this information is known. 37 C.F.R. §2.32(a)(7). See [TMEP §§1401](#) *et seq.* for more information about classification.

### **806 Filing Basis**

A filing basis is the statutory basis for filing an application for registration of a mark in the United States. An applicant must specify and meet the requirements of one or more bases. 37 C.F.R. §2.32(a)(5). There are five filing bases: (1) use of a mark in commerce under §1(a) of the Trademark Act, 15 U.S.C. §1051(a);

(2) bona fide intention to use a mark in commerce under §1(b) of the Act, 15 U.S.C. §1051(b); (3) a claim of priority, based on an earlier-filed foreign application under §44(d) of the Act, 15 U.S.C. §1126(d); (4) ownership of a registration of the mark in the applicant's country of origin under §44(e) of the Act, 15 U.S.C. §1126(e); and (5) extension of protection of an international registration to the United States, under §66(a) of the Act, 15 U.S.C. §1141f(a). 37 C.F.R. §2.34.

An applicant is not required to specify the basis for filing to receive a filing date. *Kraft Group LLC v. Harpole*, 90 USPQ2d 1837 (TTAB 2009). If a §1 or §44 application does not specify a basis, the examining attorney must require in the first Office action that the applicant specify the basis for filing and submit all the elements required for that basis. If the applicant timely responds to the first Office action, but fails to specify a basis for filing, or fails to submit all the elements required for a particular basis, the examining attorney will issue a final Office action, if the application is otherwise in condition for final action.

In a §66(a) application, the basis for filing will have been established in the international registration on file at the IB.

See 37 C.F.R. §2.34 and [TMEP §§806.01](#) *et seq.* for a list of the requirements for each basis.

## 806.01 Requirements for Establishing a Basis

The requirements for establishing a basis are set forth in [TMEP §§806.01\(a\)](#) through [806.01\(e\)](#). If these requirements are not met in the original application, the examining attorney will require the applicant to comply with them in the first Office action.

### 806.01(a) Use in Commerce - §1(a)

Under 15 U.S.C. §1051(a) and 37 C.F.R. §2.34(a)(1), to establish a basis under §1(a) of the Trademark Act, the applicant must:

- (1) Submit a verified statement that the mark is in use in commerce on or in connection with the goods or services listed in the application. 15 U.S.C. §1051(a)(3)(C). If this verified statement is not filed with the initial application, the verified statement must also allege that the mark was in use in commerce on or in connection with the goods or services listed in the application *as of the application filing date* (37 C.F.R. §2.34(a)(1)(i));
- (2) Specify the date of the applicant's first use of the mark anywhere on or in connection with the goods or services (37 C.F.R. §2.34(a)(1)(ii); [TMEP §903.01](#));
- (3) Specify the date of the applicant's first use of the mark in commerce as a trademark or service mark (37 C.F.R. §2.34(a)(1)(iii); [TMEP §903.02](#)); and
- (4) Submit one specimen for each class, showing how the applicant actually uses the mark in commerce (37 C.F.R. §§2.34(a)(1)(iv) and 2.56; [TMEP §§904](#) *et seq.*).

The Trademark Act defines "commerce" as commerce which may lawfully be regulated by Congress, and "use in commerce" as the bona fide use of a mark in the ordinary course of trade. 15 U.S.C. §1127; 37 C.F.R. §2.34(c). See [TMEP §§901](#) *et seq.*

An applicant may claim both use in commerce under §1(a) of the Act and intent-to-use under §1(b) of the Act as a filing basis in the same application, but may not assert both §1(a) and §1(b) for the identical goods or services. 37 C.F.R. §2.34(b)(1); [TMEP §806.02\(b\)](#).

An applicant may not claim a §1(a) basis unless the mark was in use in commerce on or in connection with all the goods or services covered by the §1(a) basis as of the application filing date. 37 C.F.R. §2.34(a)(1)(i). *Cf. E.I. du Pont de Nemours & Co. v. Sunlyra Int'l, Inc.*, 35 USPQ2d 1787, 1791 (TTAB 1995).

If the applicant claims use in commerce in addition to another filing basis, but does not specify which goods or services are covered by which basis, the USPTO may defer examination of the specimen(s) until the applicant identifies the goods or services for which use is claimed. [TMEP §806.02\(c\)](#).

### **806.01(b) Intent-to-Use - §1(b)**

In an application based on 15 U.S.C. §1051(b), the applicant must submit a verified statement that the applicant has a bona fide intention to use the mark in commerce on or in connection with the goods or services listed in the application. 15 U.S.C. §1051(b)(3)(B). If the verified statement is not filed with the initial application, the verified statement must also allege that the applicant had a bona fide intention to use the mark in commerce on or in connection with the goods or services *as of the filing date of the application*. 37 C.F.R. §2.34(a)(2).

Prior to registration, the applicant must file an allegation of use (i.e., either an amendment to allege use under 15 U.S.C. §1051(c) or a statement of use under 15 U.S.C. §1051(d)) that states that the applicant is using the mark in commerce on or in connection with the goods or services, includes dates of use and a filing fee for each class, and includes one specimen evidencing such use for each class. See 37 C.F.R. §2.76 and [TMEP §§1104](#) *et seq.* regarding amendments to allege use, and 37 C.F.R. §2.88 and [TMEP §§1109](#) *et seq.* regarding statements of use.

Once an applicant claims a §1(b) basis for any or all of the goods or services, the applicant may not amend the application to seek registration under §1(a) of the Act for those goods or services unless the applicant files an allegation of use under §1(c) or §1(d) of the Act. 37 C.F.R. §2.35(b)(8).

See TMEP Chapter 1100 for additional information about intent-to-use applications.

### **806.01(c) Foreign Priority - §44(d)**

Section 44(d) of the Act provides a basis for receipt of a priority filing date, but not a basis for publication or registration. Before the application can be approved for publication, or for registration on the Supplemental Register, the applicant must establish a basis under §1(a), §1(b), or §44(e) of the Act. 37 C.F.R. §2.34(a)(4)(iii); [TMEP §1003.03](#). If the applicant claims a §1(b) basis, the applicant must file an allegation of use before the mark can be registered. See [TMEP §806.01\(b\)](#) regarding the requirements for a §1(b) basis.

Under 15 U.S.C. §1126(d) and 37 C.F.R. §2.34(a)(4), the requirements for receipt of a priority filing date based on a previously filed foreign application are:

- (1) The applicant must file a claim of priority within six months of the filing date of the foreign application. 37 C.F.R. §§2.34(a)(4)(i) and 2.35(b)(5);
- (2) The applicant must: (a) specify the filing date, serial number, and country of the first regularly filed foreign application; or (b) state that the application is based upon a subsequent regularly filed application in the same foreign country, and that any prior-filed application has been withdrawn, abandoned, or otherwise disposed of, without having been laid open to public inspection and without having any rights outstanding, and has not served as a basis for claiming a right of priority. 37 C.F.R. §§2.34(a)(4)(i)(A) and (B). *See also* Paris Convention Article 4(D); and

(3) The applicant must verify that the applicant has a bona fide intention to use the mark in commerce on or in connection with the goods and/or services listed in the application. 15 U.S.C. §1126(d)(2). This allegation is required even if use in commerce is asserted in the application. [TMPEP §806.02\(e\)](#). If the verified statement is not filed with the initial application, the verified statement must also allege that the applicant had a bona fide intention to use the mark in commerce *as of the filing date of the application*. 37 C.F.R. §2.34(a)(4)(ii).

The scope of the goods/services covered by the §44 basis in the United States application cannot exceed the scope of the goods/services in the foreign application or registration. 37 C.F.R. §2.32(a)(6); [TMPEP §1402.01\(b\)](#).

If an applicant properly claims a §44(d) basis in addition to another basis, the applicant may retain the priority filing date without perfecting the §44(e) basis. 37 C.F.R. §§2.35(b)(3) and (4). See [TMPEP §806.04\(b\)](#) regarding processing an amendment electing not to perfect a §44(e) basis, and [TMPEP §806.02\(f\)](#) regarding the examination of applications that claim §44(d) in addition to another basis.

See [TMPEP §§1003](#) *et seq.* for further information about §44(d) applications.

### **806.01(d) Foreign Registration — §44(e)**

Under 15 U.S.C. §1126(e) and 37 C.F.R. §2.34(a)(3), the requirements for establishing a basis for registration under §44(e), relying on a registration granted by the applicant's country of origin, are:

- (1) The applicant must submit a true copy, a photocopy, a certification, or a certified copy of the registration in the applicant's country of origin. 37 C.F.R. §2.34(a)(3)(ii); [TMPEP §§1004.01](#) and [1004.01\(b\)](#);
- (2) The application must include the applicant's verified statement that it has a bona fide intention to use the mark in commerce on or in connection with the identified goods and/or services. 15 U.S.C. §1126(e). This allegation is required even if use in commerce is asserted in the application. [TMPEP §806.02\(e\)](#). If the verified statement is not filed with the initial application, the verified statement must also allege that the applicant had a bona fide intention to use the mark in commerce *as of the application filing date*. 37 C.F.R. §2.34(a)(3)(i); and
- (3) The applicant's country of origin must either be a party to a convention or treaty relating to trademarks to which the United States is also a party, or extend reciprocal registration rights to nationals of the United States by law. See [TMPEP §§1002](#) *et seq.*

If the applicant does not submit a certification or a certified copy of the registration from the country of origin, the applicant must submit a true copy or photocopy of a document that has been issued to the applicant by, or certified by, the intellectual property office in the applicant's country of origin. A photocopy of an entry in the intellectual property office's gazette (or other official publication) or a printout from the intellectual property office's website is not, by itself, sufficient to establish that the mark has been registered in that country and that the registration is in full force and effect. See [TMPEP §1004.01](#).

The scope of the goods/services covered by the §44 basis in the United States application cannot exceed the scope of the goods/services in the foreign registration. 37 C.F.R. §2.32(a)(6); [TMPEP §1402.01\(b\)](#).

An application may be based on more than one foreign registration. If the applicant amends an application to rely on a different foreign registration, this is not considered a change in basis; however, the application must be republished. [TMPEP §1004.02](#). See [TMPEP §§806.03](#) *et seq.* regarding amendments to add or substitute a basis.

See [TMEP §§1004](#) *et seq.* for further information about §44(e) applications.

### **806.01(e) Extension of Protection of International Registration - §66(a)**

Section 66(a) of the Act, 15 U.S.C. §1141f(a), provides for a request for extension of protection of an international registration to the United States. *See* 37 C.F.R. §2.34(a)(5). The request must include a declaration of a bona fide intention to use the mark in commerce that is verified by the applicant for, or holder of, the international registration. The verified statement is part of the international registration on file at the IB. 37 C.F.R. §2.33(e). The IB will have established that the international registration includes this declaration before it sends the request for extension of protection to the USPTO. Generally, the examining attorney need not review the international registration to determine whether there is a proper declaration of intent to use, or issue any inquiry regarding the initial verification of the application. However, if the applicant voluntarily files a substitute declaration with the USPTO, it will be examined according to the same standards used for examining any other declaration. *See* [TMEP §804.05](#).

A §66(a) applicant cannot change the basis or claim more than one basis. 37 C.F.R. §§2.34(b)(3) and 2.35(a).

*See* [TMEP §1904.09](#) regarding the limited circumstances under which a §66(a) application can be transformed into an application under §1 or §44.

Section 66(a) requires transmission of a request for extension of protection by the IB to the USPTO. It cannot be added or substituted as a basis in an application originally filed under §1 or §44.

Under 15 U.S.C. §1141g and Madrid Protocol Article 4(2), the §66(a) applicant may claim a right of priority within the meaning of Article 4 of the Paris Convention if:

- (1) The request for extension of protection contains a claim of priority;
- (2) The request for extension of protection specifies the filing date, serial number, and the country of the application that forms the basis for the claim of priority; *and*
- (3) The date of international registration or the date of the recordal of the subsequent designation requesting an extension of protection to the United States is not later than six months after the date of the first regular national filing (within the meaning of Article 4(A)(3) of the Paris Convention) or a subsequent application (within the meaning of Article 4(C)(4) of the Paris Convention).

*See* Common Regs., Rule 9(4)(a)(iv); *Guide to the International Registration of Marks under the Madrid Agreement and the Madrid Protocol* (2009) (“*Guide to International Registration*”), Para. B.II.07.32.

### **806.02 Multiple Bases**

#### **806.02(a) Procedure for Asserting More Than One Basis**

In a §66(a) application, the applicant cannot claim more than one basis. 37 C.F.R. §2.34(b)(3).

In an application under §1 or §44 of the Trademark Act, the applicant may claim more than one basis, if the applicant satisfies all requirements for each basis claimed. 37 C.F.R. §2.34(b)(1). The applicant must clearly indicate that more than one basis is claimed, and must separately list each basis, followed by the goods or services to which that basis applies. If some or all of the goods or services are covered by more than one basis, this must be stated. 37 C.F.R. §§2.34(b)(2) and 2.35(b)(6).

*Example:* Based on use - SHIRTS AND COATS, in Class 25; Based on intent to use - DRESSES, in Class 25.

The applicant may assert different bases for different classes, and may also assert different bases as to different goods or services within a class.

When a single class has different bases for goods or services within the same class, the USPTO uses parentheses to indicate the specific basis for specific goods or services. When entering this information into the Trademark database for goods and services under §1(a) or §1(b), the examining attorney or legal instruments examiner (“LIE”) must refer to “use in commerce” or “intent to use” rather than referring to the statutory citation. However, for goods and services under §44, the statutory citation must be identified.

*Example:* Class 025: (Based on Use in Commerce) Pants; (Based on Intent to Use) Shirts

*Example:* Class 025: (Based on 44(e)) Pants

When all bases do not apply to all classes in a multiple-basis, multiple-class application, each class must include a basis notation.

*Example:*

Class 016: (Based on 44(e)) Greeting cards and postcards

Class 025: (Based on Use in Commerce) Shoes; (Based on Intent to Use) Shirts

Class 041: (Based on 44(e)) Entertainment, namely, live performances by a musical band

The applicant may claim a §44 basis in addition to *either* a §1(a) *or* a §1(b) basis for the same goods or services. When an application has a §44 and §1(b) dual basis for the same goods or services, the §1(b) basis information must always appear after the §44 basis information.

*Example:* Class 005: (Based on 44(e)) (Based on Intent to Use) Gene therapy products, namely, pharmaceutical preparation vectors for use in gene therapy; (Based on Intent to Use) Pharmaceutical preparations containing nucleic acids for use in the treatment of viral and bacterial infections

Note: the applicant may not assert both a §1(a) and §1(b) basis for the identical goods or services. 37 C.F.R. §2.34(b)(1).

### **806.02(b) Applicant May File Under Both §1(a) and §1(b) in the Same Application**

An applicant may rely on both §1(a) and §1(b) in the same application. The applicant may not assert both a §1(a) and §1(b) basis for the identical goods or services in the same application, but the applicant may assert a §1(a) basis for some of the goods or services and a §1(b) basis for other goods or services. This can occur in either a single or multiple-class application. 37 C.F.R. §2.34(b)(1).

When the applicant asserts both §1(a) and §1(b) as bases for registration in the same application, the USPTO will publish the mark for opposition and will issue a notice of allowance ( *see* [TMEP §§1106 et seq.](#)) if there is no successful opposition. The goods/services for which a §1(a) basis is asserted will remain in the application pending the filing and approval of a statement of use for the goods/services based on §1(b), unless the applicant files a request to divide. See [TMEP §§1110 et seq.](#) regarding requests to divide. If the applicant fails to timely file a statement of use or request for an extension of time to file a statement of use

in response to a notice of allowance, the entire application will be abandoned, unless the applicant files a request to divide before the expiration of the deadline for filing the statement of use. [TMEP §806.02\(d\)](#).

### **806.02(c) Examination of Specimens of Use in a Multiple-Basis Application**

If the applicant claims use in commerce in addition to another basis, but does not specify which goods/services are covered by which basis, the USPTO may defer examination of the specimens until the applicant identifies the goods/services for which use is claimed. A proper examination of specimens requires consideration of the particular goods/services on or in connection with which the mark is used.

### **806.02(d) Abandonment of Multiple-Basis Applications**

If an applicant fails to respond to an Office action or notice of allowance pertaining to only one basis of a multiple-basis application, the failure to respond will result in abandonment of the entire application, unless the applicant files a request to divide under 37 C.F.R. §2.87 and notifies the examining attorney that the request has been filed. See [TMEP §§1110](#) *et seq.* regarding requests to divide. If the failure to respond was unintentional, the applicant may file a petition to revive. See [TMEP §§1714](#) *et seq.* regarding petitions to revive.

### **806.02(e) Allegation of Bona Fide Intention to Use Mark in Commerce Required Even if Application Is Based on Both §44 and §1(a)**

Any application filed under §44(d) or §44(e) must include a verified statement that the applicant has a bona fide intention to use the mark in commerce even if §1(a) (use in commerce) is asserted as an additional filing basis. *Cf. In re Paul Wurth S.A.*, 21 USPQ2d 1631 (Comm'r Pats. 1991).

If an application is based on both §1(b) and §44, it is not necessary to repeat the allegation that the applicant has a bona fide intention to use the mark in commerce.

### **806.02(f) Section 44(d) Combined With Other Bases**

If an applicant properly claims priority under §44(d), 15 U.S.C. §1126(d), in addition to a §1 basis, the applicant may elect not to perfect the §44(e) basis (based on the foreign registration that will issue from the application on which the applicant relies for priority) and still retain the priority filing date. 37 C.F.R. §§2.35(b)(3) and (4).

The examining attorney must advise the applicant that it may retain the priority filing date even if it does not perfect the §44(e) basis, and inquire whether the applicant wishes to retain §44(e) as a second basis for registration. See [TMEP §806.04\(b\)](#) regarding the processing of an application in which an applicant elects not to perfect a §44(e) basis, and [TMEP §1003.04\(b\)](#) regarding the procedures to follow when an applicant claims priority under §44(d) in addition to another basis.

### **806.02(g) Not Necessary to Repeat Allegation of Bona Fide Intention to Use Mark in Commerce in Multiple-Basis Application**

If an application is based on both §1(b) and §44, it is not necessary to repeat the allegation that the applicant has a bona fide intention to use the mark in commerce. Therefore, when an applicant adds or substitutes §1(b) or §44 as a filing basis, it is not necessary to submit a new verification of the applicant's bona fide

intention to use the mark in commerce if there is already one in the record with respect to the goods or services covered by the new basis.

### **806.03 Amendments to Add or Substitute a Basis**

#### **806.03(a) When Basis Can be Changed**

*Section 1 or §44 Application - Before Publication.* The applicant may add or substitute a basis before publication, provided that the applicant meets all requirements for the new basis. 37 C.F.R. §2.35(b)(1).

*Section 1 or §44 Application - After Publication.* In an application that is not the subject of an inter partes proceeding before the Trademark Trial and Appeal Board, if an applicant wants to add or substitute a basis after a mark has been published for opposition, the applicant must first petition the Director to allow the examining attorney to consider the amendment. If the Director grants the petition, and the examining attorney accepts the added or substituted basis, the mark must be republished. 37 C.F.R. §2.35(b)(2). See [TMEP §§806.03\(j\)](#) *et seq.* for further information.

Amendment of an application that is the subject of an inter partes proceeding before the Trademark Trial and Appeal Board is governed by 37 C.F.R. §2.133(a). See [Trademark Trial and Appeal Board Manual of Procedure](#) (“TBMP”) §514.

*Section 66(a) Application.* In a §66(a) application, the applicant cannot change the basis, unless the applicant meets the requirements for transformation under §70(c) of the Trademark Act, 15 U.S.C. §1141j(c), and 37 C.F.R. §7.31. 37 C.F.R. §2.35(a); [TMEP §806.03\(k\)](#).

#### **806.03(b) Applicant May Add or Substitute a §44(d) Basis Only Within Six-Month Priority Period**

An applicant may add or substitute a §44(d) basis only during the six-month priority period following the filing date of the foreign application. 37 C.F.R. §2.35(b)(5). See [TMEP §806.02\(f\)](#) regarding §44(d) combined with another basis.

#### **806.03(c) Amendment From §1(a) to §1(b)**

In an application filed under §1(a), if the §1(a) basis fails, either because the specimens are unacceptable or because the mark was not in use in commerce when the application was filed, the applicant may substitute §1(b) as a basis. The USPTO will presume that the applicant had a continuing valid basis. 37 C.F.R. §2.35(b)(3).

Although there is a presumption of a continuing valid basis, when amending from §1(a) to §1(b), the applicant must confirm the presumption by submitting a verified statement that the applicant has a bona fide intention to use the mark in commerce on or in connection with the goods/services, and that the applicant had a bona fide intention to use the mark in commerce on or in connection with the goods/services as of the application filing date. 15 U.S.C. §1051(b)(3)(B); 37 C.F.R. §2.34(a)(2).

If the applicant wishes to substitute §1(b) as a basis after publication of an application filed under §1(a), the applicant must petition the Director to allow the examining attorney to consider the amendment. 37 C.F.R. §2.35(b)(2). In a multiple-basis application, if a notice of allowance has issued for those goods/services based on §1(b), the petition will not be granted unless a request to divide the application is submitted with

the petition. The goods/services to be amended from §1(a) to §1(b) must be divided out in order to process the amendment because republication is required. (37 C.F.R. §2.35(b)(2)). The petitioner may include all the goods/services based on §1(a) in the child application or only those to which the amendment to §1(b) applies. If dividing within a class, in addition to the fee for filing a request to divide, an application filing fee is required. See 37 C.F.R. §2.87 and [TMEP §§1110 et seq.](#) regarding requests to divide.

Note that in a §1(b) application, once an applicant has filed a statement of use, the applicant may not withdraw the statement of use. 37 C.F.R. §2.88(g); [TMEP §1109.17](#). Thus, an applicant may not amend the basis from §1(a) to §1(b) after a statement of use has been filed. See [TMEP §1104.10](#) regarding withdrawing an amendment to allege use.

See [TMEP §§806.03\(j\)](#) *et seq.* regarding amendment of the basis after publication.

### **806.03(d) Amendment From §44 to §1(b)**

An applicant may amend the basis from §44 to §1(b). The USPTO will presume that the applicant had a continuing valid basis, because the applicant had a bona fide intention to use the mark in commerce as of the application filing date. 37 C.F.R. §2.35(b)(3). *Karsten Mfg. Corp. v. Editoy AG*, 79 USPQ2d 1783 (TTAB 2006). It is not necessary to submit a new verification of the applicant's bona fide intention to use the mark in commerce if such a verification is already in the record with respect to the goods/services covered by the new basis. See [TMEP §806.03\(i\)](#).

Applicant must clearly indicate whether it wants to: (1) add the §1(b) basis and maintain the §44 basis; or (2) replace the §44 basis with the §1(b) basis.

In a §44(d) application, the applicant may substitute §1(b) as a basis and still retain the priority filing date. 37 C.F.R. §§2.35(b)(3) and (4); [TMEP §806.03\(h\)](#). If the applicant chooses to add the §1(b) basis and maintain the §44 basis, the examining attorney cannot approve the mark for publication until the applicant files a copy of the foreign registration. See [TMEP §806.02\(f\)](#).

See [TMEP §806.03\(j\)](#) regarding amendment of the basis after publication.

### **806.03(e) Allegation of Use Required to Amend From §1(b) to §1(a)**

An applicant who claims a §1(b) basis for any or all of the goods or services may not amend the application to seek registration under §1(a) of the Act for those goods or services, unless the applicant files an allegation of use. 37 C.F.R. §2.35(b)(8). See [TMEP §§1103, 1104 et seq.](#), and [1109 et seq.](#) regarding allegations of use.

### **806.03(f) Use in Commerce as of Application Filing Date Required to Add or Substitute §1(a) as a Basis in §44 Application**

An applicant can add or substitute a basis only if the applicant meets all the requirements for the new basis. 37 C.F.R. §2.35(b)(1). Therefore, an applicant may not amend a §44 application to claim a §1(a) basis unless the applicant: (1) verifies that the mark is in use in commerce on or in connection with the goods or services listed in the application, and that the mark was in use in commerce on or in connection with the goods or services listed in the application as of the application filing date; (2) provides a specimen, with a verified statement that the specimen was in use in commerce as of the application filing date; and (3) supplies the date of first use anywhere and the date of first use in commerce of the mark. 15 U.S.C. §1051(a)(1);

37 C.F.R. §§2.34(a)(1), 2.59(a), and 2.71(c)(1); [TMEP §§806.01\(a\)](#), [806.03\(i\)](#), [903.01](#), [903.02](#), [903.04](#), and [904.05](#).

If an applicant began using the mark in commerce *after* the application filing date, the applicant cannot add or substitute §1(a) as a basis. However, the applicant may add or substitute §1(b) as a basis, and concurrently file an amendment to allege use. See [TMEP §806.03\(d\)](#) regarding amendment of the basis from §44 to §1(b), and [TMEP §§1104](#) *et seq.* regarding amendments to allege use.

### **806.03(g) Amendment From §1(b) to §44**

An applicant may amend the basis from §1(b) to §44, if the applicant meets the requirements of §44 as of the filing date of the amendment. It is not necessary to submit a new verification of the applicant's bona fide intention to use the mark in commerce if such a verification is already in the record with respect to the goods/services covered by the new basis. See [TMEP §806.03\(i\)](#).

When an applicant adds §44(e) as a basis, the applicant must submit a copy of the foreign registration (and a translation, if necessary) with the amendment. 37 C.F.R. §2.34(a)(3)(ii); [TMEP §§1004.01](#) and [1004.01\(b\)](#).

The applicant may add a claim of priority under §44(d) only within the six-month priority period following the filing date of the foreign application. 37 C.F.R. §2.35(b)(5). See [TMEP §806.02\(f\)](#) regarding §44(d) combined with another basis.

If the amendment is filed before publication, the applicant must clearly indicate whether it wants to: (1) add the §44 basis and maintain the §1(b) basis; or (2) replace the §1(b) basis with the §44 basis. If the applicant chooses to add §44 and maintain the §1(b) basis, the application will proceed to publication with a dual basis. See [TMEP §§806.03\(j\)](#) *et seq.* regarding amendment of the basis after publication.

### **806.03(h) Effect of Substitution of Basis on Application Filing Date**

When the applicant substitutes one basis for another, the applicant must meet the requirements for the new basis. The applicant will retain the original filing date, provided that the applicant has had a continuing valid basis for registration since the application filing date. Unless there is contradictory evidence in the record, the USPTO will presume that there was a continuing valid basis for registration. See 37 C.F.R. §2.35(b)(3); *Kraft Group LLC v. Harpole*, 90 USPQ2d 1837 (TTAB 2009); *Karsten Mfg. Corp. v. Editoy AG*, 79 USPQ2d 1783 (TTAB 2006).

If the applicant properly asserts a claim of priority under §44(d) during the six-month priority period, the applicant will retain the priority filing date, no matter which basis for registration is ultimately established, provided that the applicant has had a continuing valid basis for registration. See 37 C.F.R. §2.35(b)(3) and (4); [TMEP §§806.02\(f\)](#) and [1003](#).

If there is no continuing valid basis, the application is void, and registration will be refused. In this situation, the applicant cannot amend the filing date, and the USPTO will not refund the filing fee. See [TMEP §205](#).

### **806.03(i) Verification of Amendment Required**

An applicant who adds or substitutes use in commerce under §1(a) as a basis must verify that the mark is in use in commerce on or in connection with the goods/services covered by the §1(a) basis, and that the

mark was in use in commerce on or in connection with these goods/services as of the filing date of the application. 37 C.F.R. §2.34(a)(1)(i).

An applicant who adds or substitutes §1(b), §44(d), or §44(e) as a basis must verify that the applicant has a bona fide intention to use the mark in commerce on or in connection with the goods/services covered by the amendment, and that the applicant had a bona fide intention to use the mark in commerce on or in connection with these goods/services as of the filing date of the application, unless a verified statement of the applicant's bona fide intention to use the mark in commerce has already been filed with respect to all the goods/services covered by the new basis. 37 C.F.R. §§2.34(a)(2), 2.34(a)(3)(i), and 2.34(a)(4)(ii).

*Example:* If a §44 application originally included a verified statement that the applicant had a bona fide intention to use the mark in commerce, it is not necessary to repeat this statement if the applicant later adds or substitutes a §1(b) basis for the goods/services covered by the §44 basis.

See [TMEP §804.04](#) regarding persons who may sign a verification on behalf of an applicant under 37 C.F.R. §2.193(e)(1).

### **806.03(j) Petition to Amend Basis After Publication - §1 or §44 Application**

*37 CFR §2.35(b)(2)*

After publication, an applicant may add or substitute a basis in an application that is not the subject of an inter partes proceeding before the Trademark Trial and Appeal Board, but only with the express permission of the Director, after consideration on petition. Republication will be required. The amendment of an application that is the subject of an inter partes proceeding before the Board is governed by §2.133(a).

In an application that is not the subject of an inter partes proceeding before the Trademark Trial and Appeal Board, if an applicant wants to add or substitute a basis after a mark has been published for opposition, the applicant must petition the Director to allow the examining attorney to consider the amendment. 37 C.F.R. §2.35(b)(2). Amendment of an application that is the subject of an inter partes proceeding before the Trademark Trial and Appeal Board is governed by 37 C.F.R. §2.133(a) ( *see* TBMP §514).

When granting a petition to amend the basis, the Director will restore jurisdiction to the examining attorney to consider the amendment, *except* in a §1(b) application in which the notice of allowance has issued. See [TMEP §806.03\(j\)\(ii\)](#) regarding amendment of the basis after issuance of a notice of allowance.

If the examining attorney accepts the new basis, the mark must be republished to provide notice to third parties who may wish to oppose registration based on issues that arise in connection with the new basis. 37 C.F.R. §2.35(b)(2).

If the examining attorney does not accept the new basis, he or she will issue an Office action using standard examination procedures *except* in a §1(b) application in which a notice of allowance has issued and no statement of use has been filed. See [TMEP §806.03\(j\)\(ii\)](#) regarding amendment of the basis after issuance of a notice of allowance.

Any petition to change the basis must be filed before issuance of the registration. To avoid the possible issuance of a registration without consideration of the petition, an applicant should submit the petition no later than six weeks after publication.

The Director will not grant a petition to amend the basis after publication if the amendment could substantially delay prosecution of the application. For example, the Director will deny petitions to amend the basis after publication in the following situations:

- Once the Director has granted a petition to amend the basis after publication, the Director will not thereafter grant a second petition to amend the basis with respect to the same application.
- If an applicant had previously deleted a §1(b) basis after a notice of allowance had issued, the Director will not grant a petition to re-assert §1(b) as a basis for registration. This would require issuance of a new notice of allowance and could result in filing of a statement of use more than 36 months after issuance of the first notice of allowance, which is not permitted under §1(d) of the Act, 15 U.S.C. §1051(d).

See [TMEP §806.03\(j\)\(i\)](#) regarding amendment of the basis in a §1(b) application between publication and issuance of a notice of allowance, and [TMEP §806.03\(j\)\(ii\)](#) regarding amendment of the basis after issuance of a notice of allowance.

Petitions to amend the basis after publication are processed by the Office of Petitions, which is part of the Office of the Deputy Commissioner for Trademark Examination Policy.

### **806.03(j)(i) Amending the Basis of a §1(b) Application After Publication But Before Issuance of Notice of Allowance**

An applicant who wants to add or substitute a §44(e) basis to a §1(b) application after publication must petition the Director to allow the examining attorney to consider the amendment. 37 C.F.R. §2.35(b)(2); [TMEP §806.03\(j\)](#). The applicant must submit a copy of the foreign registration (and a translation, if necessary) with the petition. 37 C.F.R. §2.34(a)(3)(ii); [TMEP §§ 1004.01](#) and [1004.01\(b\)](#). If the petition is granted, the mark must be republished. 37 C.F.R. §2.35(b)(2); [TMEP § 806.03\(j\)](#).

The petition must indicate whether applicant wants to delete or retain the §1(b) basis. The applicant has two options:

- (1) Applicant may request to delete the §1(b) basis and substitute §44(e) if the examining attorney accepts the §44(e) basis. If the petition is granted, the examining attorney will be instructed to examine the §44(e) basis in accordance with standard examination procedures and to delete the §1(b) basis if the §44(e) basis is accepted. If the examining attorney accepts the §44(e) basis, the examining attorney must ensure that: (a) the §1(b) basis is deleted, (b) the foreign registration information is entered into the Trademark database, and (c) the application is scheduled for republication. If registration of the mark is not successfully opposed, a registration will issue. If the examining attorney does not accept the §44(e) basis, the examining attorney will issue an Office action notifying the applicant of the reason(s). The applicant may elect to withdraw the amendment adding the §44(e) basis and proceed under §1(b) as the sole basis without republication; or
- (2) Applicant may request to add §44(e) and retain the §1(b) basis. If the petition is granted, the examining attorney will be instructed to examine the §44(e) basis in accordance with standard examination procedures. If the examining attorney accepts the §44(e) basis, the examining attorney must ensure that: (a) the foreign registration information is entered into the Trademark database and (b) the application is scheduled for republication with a dual basis. If registration of the mark is not successfully opposed, a notice of allowance will issue. If the examining attorney does not accept the §44(e) basis, the examining attorney will issue an Office action notifying the applicant of the

reason(s). The applicant may elect to withdraw the amendment adding the §44(e) basis and proceed under §1(b) as the sole basis without republication.

### **806.03(j)(ii) Amending the Basis of a §1(b) Application Between Issuance of Notice of Allowance and Filing of Statement of Use**

An applicant who wants to add or substitute a §44(e) basis in a §1(b) application after issuance of the notice of allowance and before filing a statement of use must petition the Director to allow the examining attorney to consider the amendment. The applicant must submit a copy of the foreign registration (and a translation, if necessary) with the petition. 37 C.F.R. §2.34(a)(3)(ii); [TMEP §§ 1004.01](#) and [1004.01\(b\)](#). If the petition is granted, the mark must be republished. 37 C.F.R. §2.35(b)(2); [TMEP §806.03\(j\)](#).

The petition must indicate whether applicant wants to delete or retain the §1(b) basis. The applicant has three options:

- (1) The applicant may request to delete the §1(b) basis and substitute §44(e). If the petition is granted, the Office of Petitions will have the notice of allowance cancelled and instruct the examining attorney to examine the §44(e) basis in accordance with standard examination procedures. If the examining attorney accepts the §44(e) basis, the examining attorney must ensure that: (a) the §1(b) basis is deleted, (b) the foreign registration information is entered into the Trademark database, and (c) the application is scheduled for republication. If registration of the mark is not successfully opposed, a registration will issue. If the examining attorney does not accept the new basis, the examining attorney will issue an Office action advising the applicant of the reasons. The applicant cannot re-assert the §1(b) basis;
- (2) The applicant may request to add §44(e) and perfect the §1(b) basis by filing a statement of use with the petition. The Director will not grant a petition to add §44(e) and retain the §1(b) basis after issuance of the notice of allowance unless a statement of use is filed with the petition because examination of the §44(e) basis could substantially delay prosecution of the application. If the petition is granted, the examining attorney will examine the §44(e) basis during examination of the statement of use. If the examining attorney accepts the §44(e) basis and the statement use, the examining attorney must ensure that: (a) the foreign registration information is entered into the Trademark database and (b) the application is scheduled for republication with a dual basis. If registration of the mark is not successfully opposed, a registration will issue. If the examining attorney does not accept the §44(e) basis or the statement of use, the examining attorney will issue an Office action notifying the applicant of the reason(s). The applicant may elect to withdraw the amendment adding the §44(e) basis and, if the statement of use is acceptable, proceed to registration without republication; or
- (3) The applicant may request to add a §44(e) basis and request that the §1(b) basis be deleted only if the examining attorney accepts the §44(e) basis. Applicants who request to maintain the §1(b) basis pending acceptance of the §44(e) basis must also file a request for extension of time to file a statement of use when due (or a statement of use) or the application will be abandoned. 37 C.F.R. §2.89. If the petition is granted, the examining attorney will be instructed to examine the §44(e) basis in accordance with standard examination procedures. If the examining attorney accepts the §44(e) basis, the examining attorney must ensure that: (a) the notice of allowance is cancelled, (b) the §1(b) basis is deleted, (c) the foreign registration information is entered into the Trademark database, and (d) the application is scheduled for republication. If the mark is not successfully opposed, a registration will issue. If the examining attorney does not accept the §44(e) basis, the examining attorney is unable to issue an Office action since the notice of allowance is still pending. Therefore, the examining attorney will notify the applicant by telephone or e-mail of the reasons why the

amendment is unacceptable. The applicant may then (1) agree to delete the §1(b) basis so that the notice of allowance can be cancelled and an examiner's amendment and/or appropriate Office action regarding the requested basis amendment can be issued, (2) withdraw the request to amend the basis to §44(e), or (3) request that the amendment remain pending until a statement of use is filed. The examining attorney should also enter an appropriate Note to the File in the record.

See also 37 C.F.R. §2.77 and [TMEP §§1107](#) *et seq.*

#### *Amendments That Apply to Less Than All the Goods/Services*

The Director will not grant a petition to amend the basis to §44(e) after issuance of the notice of allowance and before the filing of a statement of use, if the foreign registration does not include all of the goods/services covered by the §1(b) basis, unless the applicant concurrently files: (1) a request to divide out the goods/services to which the amendment applies; or (2) an amendment deleting the goods/services not covered by the amendment. See 37 C.F.R. §2.87 and [TMEP §§1110](#) *et seq.* regarding requests to divide.

### **806.03(j)(iii) Amending the Basis of a §1(b) Application After Filing of Statement of Use But Before Approval for Registration**

An applicant who wants to add or substitute a §44(e) basis after filing a statement of use must petition the Director to allow the examining attorney to consider the amendment. The applicant must submit a copy of the foreign registration (and a translation, if necessary) with the petition. 37 C.F.R. §2.34(a)(3)(ii); [TMEP §§ 1004.01](#) and [1004.01\(b\)](#). If the petition is granted, the mark must be republished. 37 C.F.R. §2.35(b)(2); [TMEP §806.03\(j\)](#).

While an applicant may not withdraw the statement of use (37 C.F.R. §2.88(g); [TMEP §1109.17](#)), the applicant may elect not to perfect the use basis and substitute §44(e). The statement of use, specimen(s), and any materials submitted with the statement of use will remain part of the record even if the §1(b) basis is deleted. See 37 C.F.R. §2.25.

If the examining attorney accepts the §44(e) basis and the applicant is not perfecting the statement of use, the examining attorney must ensure that: (a) the §1(b) basis is deleted, (b) the dates of use are deleted, (c) the foreign registration information is entered into the Trademark database, and (d) the mark is scheduled for republication. If the mark is not successfully opposed, a registration will issue.

If the examining attorney does not accept the §44(e) basis, the examining attorney will issue an Office action notifying the applicant of the reason(s) and address any additional issue(s) that arise during examination of the statement of use. If an Office action has already been issued, the examining attorney must issue a supplemental action, with a new six-month response period, notifying the applicant that the §44 basis is unacceptable. The examining attorney must indicate that the action is supplemental to the previous action and incorporate all outstanding issues by reference to the previous action. The applicant may choose to withdraw the request to amend the §44(e) basis.

Filing a petition to add or substitute a §44(e) basis does not relieve the applicant of the duty to file a response to an outstanding Office action or to take any other action required in an application. See [TMEP §§711](#) *et seq.* regarding the deadline for response to an Office action. If the applicant has filed a petition to delete the §1(b) basis and substitute §44(e), but the petition has not yet been acted on, the applicant may respond to an outstanding refusal or requirement by informing the examining attorney that a petition has been filed

to substitute §44(e). The applicant must also respond to any outstanding issues regarding the statement of use unless the applicant no longer intends to perfect the statement of use.

### **806.03(k) Basis Cannot be Changed in §66(a) Application**

In a §66(a) application, the applicant cannot change the basis, unless the applicant meets the requirements for transformation under §70(c) of the Trademark Act, 15 U.S.C. §1141j(c), and 37 C.F.R. §7.31. 37 C.F.R. §2.35(a). See [TMEP §§1904.09](#) *et seq.* regarding transformation.

### **806.03(l) §66(a) Basis Cannot be Added to §1 or §44 Application**

Section 66(a) requires transmission of a request for extension of protection by the IB to the USPTO. It cannot be added or substituted as a basis in an application originally filed under §1 or §44.

## **806.04 Deleting a Basis**

If an applicant claims more than one basis, the applicant may delete a basis at any time, before or after publication. 37 C.F.R. §2.35(b)(1). No petition to the Director is required to delete a basis from a multiple-basis application after publication. When the applicant deletes a basis, the applicant must also delete any goods or services covered solely by that basis. 37 C.F.R. §2.35(b)(7).

To expedite processing, the USPTO recommends that a request to delete a §1(b) basis from a multiple-basis application be filed through TEAS, at <http://www.uspto.gov>.

### **806.04(a) Deletion of §1(b) Basis After Publication or Issuance of the Notice of Allowance**

If all of the goods/services/classes in an application are based on §1(b) and §44(e), the applicant may file a request to delete the §1(b) basis by amendment at any time, except as set forth below. 37 C.F.R. §2.35(b)(1).

No petition to the Director is required to delete a §1(b) basis from a multiple-basis application after publication. To expedite processing, the USPTO recommends that any request to delete a §1(b) basis be filed through TEAS, at <http://www.uspto.gov>, using the “Request to Delete §1(b) Basis” form.

If the application has some goods/services/classes based solely on §1(b) and some goods/services/classes based solely on §1(a) or §44(e) and the applicant wants to delete the §1(b) goods/services/classes after publication or issuance of the notice of allowance, the applicant must submit a post-publication amendment requesting the deletion and that the application proceed to registration for the other goods/services/classes that are not based on §1(b). To expedite processing, the USPTO recommends that any request to delete the §1(b) goods/services/classes be filed through TEAS, at [www.uspto.gov](http://www.uspto.gov), using the “Post-Publication Amendment” form. For further information on filing post-publication amendments, see [TMEP §1505](#).

If a notice of allowance has issued, the request must be filed: (1) within six months of the issuance date of the notice of allowance, or within a previously granted extension of time to file a statement of use; or (2) between the filing date of the statement of use and the date on which the examining attorney approves the mark for registration. If filed on paper, the request should be directed to the ITU Unit. The ITU Unit will cancel the notice of allowance, and take the necessary steps to delete the §1(b) basis and schedule the issuance of the registration.

If filed on paper before issuance of the notice of allowance, the request should be faxed to Post Publication Amendments/Corrections at 571-270-9007. The request will be reviewed by paralegal specialists in the Office of Petitions, who will delete the §1(b) basis and schedule the issuance of the registration.

### **806.04(b) Retention of §44(d) Priority Filing Date Without Perfecting §44(e) Basis**

If an applicant properly claims §44(d) in addition to another basis, the applicant may elect not to perfect a §44(e) basis and still retain the §44(d) priority filing date. 37 C.F.R. §§2.35(b)(3) and (4); [TMEP §§806.01\(c\)](#) and [806.02\(f\)](#).

When a §44(d) applicant elects not to proceed to registration under §44(e), the USPTO does not delete the §44(d) priority claim from the Trademark database. Both the §44(d) priority claim and the other basis will remain in the Trademark database.

Sometimes, a §44(d) applicant who elects not to perfect a §44(e) basis will file an amendment “deleting” the §44 basis. In this situation, the USPTO will presume that the applicant wants to retain the priority claim, unless the applicant specifically states that it wants to delete the priority claim and instead rely on the actual filing date of the application in the United States.

If the applicant is not entitled to priority (e.g., because the United States application was not filed within six months of the foreign filing), the examining attorney should ensure that the priority claim is deleted from the Trademark database, and should conduct a new search of USPTO records for conflicting marks.

### **806.05 Review of Basis Prior to Publication or Issue**

If an application claims more than one basis, the examining attorney must ensure that the record clearly and accurately shows which goods are covered by which basis before approving the application for publication for opposition or registration on the Supplemental Register. If there are any errors, the examining attorney must ensure that the Trademark database is corrected.

See [TMEP § 806.02\(a\)](#) for information regarding entering multiple bases in the Trademark database when the applicant asserts different bases for different classes, or different bases as to different goods or services within a class.

## **807 Drawing**

The drawing shows the mark sought to be registered. 37 C.F.R. §2.52. An applicant must submit a clear drawing with the original application in order to receive a filing date in any application for registration of a mark, except in applications for registration of sound, scent, and other non-visual marks. See 37 C.F.R. §§2.21(a)(3) and 37 C.F.R. 2.52(e); see also [TMEP §807.09](#) regarding “drawings” in applications for registration of non-visual marks. Submitting a specimen showing how the mark is or may be used (e.g., the overall packaging, a photograph of the goods, or an advertisement) does not satisfy the requirement for a clear drawing of the mark. See [TMEP §202.01](#).

The drawing is used to reproduce the mark in the *Trademark Official Gazette* and on the registration certificate.

The main purpose of the drawing is to provide notice of the nature of the mark sought to be registered. The drawing of a mark is promptly entered into the automated records of the USPTO and is available to the

public through the Trademark Electronic Search System (“TESS”) and the Trademark Status and Document Retrieval (“TSDR”) database on the USPTO website at <http://tsdr.uspto.gov/>. Timely public notification of the filing of applications is important, because granting a filing date to an application potentially establishes a date of constructive use of the mark ( *see* [TMEP §201.02](#)). Therefore, an application must include a clear drawing of the mark to receive a filing date. 37 C.F.R. §2.21(a)(3); [TMEP §202.01](#).

Examining attorneys must require applicants to comply promptly with the drawing rules. Requests to defer drawing corrections until the application is approved for publication or registration should be denied.

There are two forms of drawings: “special form drawings” and “standard character drawings.” See 37 C.F.R. 2.52(a) and (b); *see also* [TMEP §§807.03](#) *et seq.* for information about standard character drawings, and [TMEP §§807.04](#) *et seq.* for information about special form drawings. ( *Note*: “Typed” drawings are acceptable for applications filed before November 2, 2003. *See* [TMEP §807.03\(i\)](#).)

The mark in the drawing must agree with the mark as used on the specimen in an application under §1 of the Trademark Act, 15 U.S.C. §1051; as applied for or registered in a foreign country in an application under §44, 15 U.S.C. §1126; or as it appears in the international registration in an application under §66(a), 15 U.S.C. §1141f(a). 37 C.F.R. §2.51; [TMEP §§807.12](#) *et seq.* and [1011.01](#).

In a TEAS application, the drawing must be submitted electronically through TEAS, and must meet the requirements of 37 C.F.R. §§2.52 and 2.53 ( *see* [TMEP §§807.05](#) *et seq.*). In a paper application, the drawing must be submitted on paper and must meet the requirements of 37 C.F.R. §§2.52 and 2.54 ( *see* [TMEP §§807.06](#) *et seq.*).

### **807.01 Drawing Must Show Only One Mark**

An application must be limited to only one mark. 15 U.S.C. §1051(a)(1); 37 C.F.R. §2.52. *See In re International Flavors & Fragrances Inc.*, 183 F.3d 1361, 1366, 51 USPQ2d 1513, 1516 (Fed. Cir. 1999)

Under 37 C.F.R. §2.21(a)(3), an applicant must submit “a clear drawing of the mark” to receive a filing date. An application that includes two or more drawings displaying materially different marks does not meet this requirement. Two marks are considered to be materially different if the substitution of one for the other would be a material alteration of the mark, within the meaning of 37 C.F.R. §2.72 ( *see* [TMEP §§807.14](#) *et seq.*).

Accordingly, if an applicant submits two or more drawing pages, the application is denied a filing date, because the applicant has not met the requirement for a clear drawing of the mark. *See* [TMEP §202.01](#) for further information. *See also* *Humanoids Group v. Rogan*, 375 F.3d 301, 71 USPQ2d 1745 (4th Cir. 2004).

However, if an applicant submits a separate drawing page in a paper application showing a mark, and a different mark appears in the written application, the application will receive a filing date, and the drawing page will control for purposes of determining what the mark is. The USPTO will disregard the mark in the written application. *In re L.G. Lavorazioni Grafite S.r.l.*, 61 USPQ2d 1063 (Dir USPTO 2001). Similarly, if an applicant enters a standard character mark, or attaches a digitized image of a mark, in the “Mark” field of a TEAS application, and a different mark appears in another field, the application will receive a filing date, and the mark entered in the “Mark” field will control for purposes of determining what the mark is.

The USPTO will not deny a filing date if the drawing shows spatially separate elements. If the applicant submits an application where the “drawing” is composed of multiple elements on a separate page, multiple elements on a single digitized image, or multiple elements in a separate area of the body of the application,

the applicant has met the requirement of 37 C.F.R. §2.21(a)(3) for a clear drawing of the mark. The examining attorney must determine whether the matter presented for registration is a single mark projecting a unitary commercial impression. See [TMEP §807.12\(d\)](#) regarding “mutilation” or incomplete representation of the mark.

If the examining attorney determines that spatially separate elements constitute two or more different marks, the examining attorney should refuse registration under §§1 and 45 of the Trademark Act, 15 U.S.C. §§1051 and 1127, on the ground that the applicant seeks registration of more than one mark. See *In re Hayes*, 62 USPQ2d 1443 (TTAB 2002); *In re Elvis Presley Enterprises, Inc.*, 50 USPQ2d 1632 (TTAB 1999); *In re Walker-Home Petroleum, Inc.*, 229 USPQ 773 (TTAB 1985); *In re Jordan Industries, Inc.*, 210 USPQ 158 (TTAB 1980); *In re Audi NSU Auto Union AG*, 197 USPQ 649 (TTAB 1977); *In re Magic Muffler Service, Inc.*, 184 USPQ 125 (TTAB 1974); *In re Robertson Photo-Mechanix, Inc.*, 163 USPQ 298 (TTAB 1969). This refusal may apply in any application, regardless of the filing basis.

When registration is refused because the matter presented on the drawing does not constitute a single mark, the application filing fee will not be refunded. The applicant may amend the drawing if the amendment does not materially alter the mark, or may submit arguments that the matter on the drawing does in fact constitute a single mark. See [TMEP §§807.14](#) *et seq.* regarding material alteration, and [TMEP §807.14\(a\)](#) regarding deletion of matter from the drawing.

Under 37 C.F.R. §2.52(b)(2), even if registration is sought for a three-dimensional mark, the applicant must submit a drawing depicting a single rendition of the mark. See [TMEP §807.10](#). If the applicant submits a drawing that depicts a three-dimensional mark in multiple renditions, the examining attorney will require a substitute drawing depicting the mark in a single rendition. If the applicant believes that its mark cannot be adequately depicted in a single rendition, the applicant may file a petition under 37 C.F.R. §2.146 requesting that the rule be waived. See [TMEP Chapter 1700](#) regarding petitions.

If the mark is duplicated in some form on the drawing (e.g., a typed word and a stylized display of the same word), this is generally not considered to be two materially different marks, and deletion of one of the marks is permitted.

See [TMEP §§1214](#) *et seq.* regarding the refusal of registration of a mark with a “phantom” element on the ground that it includes more than one mark in a single application.

See also *In re Upper Deck Co.*, 59 USPQ2d 1688 (TTAB 2001) (hologram used on trading cards in varying shapes, sizes, contents, and positions constitutes more than one “device” as contemplated by §45 of the Trademark Act).

## **807.02 Drawing Must Be Limited to Mark**

The drawing allows the USPTO to properly code and index the mark for search purposes, indicates what the mark is, and provides a means for reproducing the mark in the *Official Gazette* and on the certificate of registration. Therefore, matter that appears on the specimen that is not part of the mark should not be placed on the drawing. Purely informational matter such as net weight, contents, or business addresses are generally not considered part of the mark.

Quotation marks and hyphens should not be included in the mark on a drawing, unless they are a part of the mark. See [TMEP §§807.12\(a\)\(i\)](#) through (a)(iii) and [807.14\(c\)](#) regarding the role of punctuation in determining whether the mark on the drawing agrees with the mark on the specimen. The drawing may not

include extraneous matter such as the letters “TM,” “SM,” the copyright notice ©, or the federal registration notice ®. See [TMEP §§906](#) *et seq.* regarding use of the federal registration notice.

See [TMEP §807.14\(a\)](#) regarding requirements for removal of matter from the drawing.

### 807.03 Standard Character Drawings

*37 CFR §2.52(a) Standard character (typed) drawing.*

Applicants who seek to register words, letters, numbers, or any combination thereof without claim to any particular font style, size, or color must submit a standard character drawing that shows the mark in black on a white background. An applicant may submit a standard character drawing if:

- (1) The application includes a statement that the mark is in standard characters and no claim is made to any particular font style, size, or color;
- (2) The mark does not include a design element;
- (3) All letters and words in the mark are depicted in Latin characters;
- (4) All numerals in the mark are depicted in Roman or Arabic numerals; and
- (5) The mark includes only common punctuation or diacritical marks.

Effective November 2, 2003, Trademark Rule 2.52, 37 C.F.R. §2.52, was amended to replace the term “typed” drawing with “standard character” drawing. Applicants who seek to register a mark without any claim as to the manner of display must submit a standard character drawing that complies with the requirements of 37 C.F.R. §2.52(a).

#### 807.03(a) Requirements for Standard Character Drawings

A standard character drawing must show the mark in black on a white background. An applicant may submit a standard character drawing if:

- The mark does not include a design element;
- All letters and words in the mark are depicted in Latin characters;
- All numerals in the mark are depicted in Roman or Arabic numerals;
- The mark includes only common punctuation or diacritical marks; and
- No stylization of lettering and/or numbers is claimed in the mark.

37 C.F.R. §2.52(a).

If the applicant files an application on paper, the applicant may depict the mark in any font style; may use bold or italicized letters; and may use both uppercase and lowercase letters, all uppercase letters, or all lowercase letters, since no claim is made to any *particular* font style, size, or color. The applicant does not have to display the mark in all uppercase letters. If filing electronically via the Trademark Electronic Application System (“TEAS”), the applicant may neither depict the mark in any particular font style nor use bold or italicized letters. TEAS will automatically convert any wording typed into the standard-character field to a standardized typeface.

Superscripts, subscripts, exponents, or other characters that are not in the USPTO’s standard character set ( see [TMEP §807.03\(b\)](#)) are *not* permitted in standard character drawings. *In re AFG Industries Inc.*, 17 USPQ2d 1162 (TTAB 1990) (special form drawing required for raised numeral). The degree symbol is permitted.

Underlining is not permitted in a standard character drawing.

*Standard Character Claim Required.* An applicant who submits a standard character drawing must also submit the following standard character claim:

The mark consists of standard characters without claim to any particular font style, size, or color.

This statement will appear in the *Official Gazette* and on the certificate of registration.

### **807.03(b) List of Standard Characters**

The USPTO has created a standard character set that lists letters, numerals, punctuation marks, and diacritical marks that may be used in a standard character drawing. The standard character set is available on the USPTO website at <http://www.uspto.gov/teas/standardCharacterSet.html>. If the applicant has claimed standard character format and the drawing includes elements that are not in the set, then the examining attorney must treat the drawing as a special form drawing, ensure that the mark drawing code is changed, and require the applicant to delete the standard character claim. See [TMEP §807.18](#) concerning mark drawing codes.

In a §66(a) application, if the drawing includes elements that are not in the standard character set, the examining attorney must require deletion of the standard character claim even if the international registration indicates that the mark is in standard characters. See the IB's *Guide to International Registration*, Para. B.II.07.44.

### **807.03(c) Drawings Containing Both a Standard Character Claim and Designs or Other Elements**

If the application contains a standard character claim, but the mark includes a design element, or color, or a claim of a particular style or size of lettering, or other elements such that the mark does not meet the requirements of 37 C.F.R. §2.52(a), then the examining attorney must: (1) treat the drawing as a special form drawing; (2) require that the applicant delete the standard character claim from the record; (3) ensure that the appropriate mark drawing code is entered into the Trademark database; and (4) if appropriate, add design search codes. See [TMEP §807.18](#) concerning mark drawing codes and [TMEP §104](#) regarding design codes.

Similarly, a standard character claim is not acceptable where the characters form shapes or designs, such as emoticons.

### **807.03(d) Changing From Special Form Elements to Standard Characters, or the Reverse, May be a Material Alteration**

A special form drawing containing a design element, color, a claim to a particular style or size of lettering, or other distinctive elements cannot be amended to a standard character drawing, unless the examining attorney determines that the amendment is not material. 37 C.F.R. §2.72.

Conversely, a standard character drawing cannot be amended to a special form drawing containing a design element, color, or a claim to a distinctive style or size of lettering, unless the examining attorney determines

that the amendment is not material. 37 C.F.R. §2.72. See [TMEP §§807.14](#) *et seq.* regarding material alteration.

### **807.03(e) Standard Character Drawing and Specimen of Use**

When the applicant submits a standard character, the mark shown in the drawing does not necessarily have to appear in the same font style, size, or color as the mark shown on the specimen of use. However, the examining attorney must review the mark depicted on the specimen to determine whether a standard character claim is appropriate, or whether a special form drawing is required.

If the examining attorney determines that the standard characters are displayed in a distinctive manner that changes the meaning or overall commercial impression of the mark, the examining attorney must process the drawing as a special form drawing, and require the applicant to delete the standard character claim. As with all drawings, the mark on the drawing must be a substantially exact representation of the mark used on the specimen in an application under §1 of the Trademark Act. 37 C.F.R. §§2.51(a) and (b); [TMEP §§807.12\(a\)](#) *et seq.*

The examining attorney may delete the standard character claim by examiner's amendment after obtaining approval from the applicant or the applicant's qualified practitioner. When deleting a standard character claim, the examining attorney must ensure that the mark drawing code is changed. See [TMEP §807.18](#) concerning mark drawing codes.

See [TMEP §807.04\(b\)](#) for further information as to when a special form drawing is required.

### **807.03(f) Standard Character Drawing and Foreign Registration**

In a §44 application, if the applicant claims standard characters, the examining attorney must ensure that the foreign registration also claims standard characters. *See* 37 C.F.R. §2.51(c); [TMEP §807.12\(b\)](#).

If the foreign registration certificate does not indicate that the mark is in standard characters (or the equivalent), the examining attorney must inquire whether the foreign registration includes a claim that the mark is in standard characters (or the legal equivalent). The applicant must either submit an affirmative statement that the foreign registration includes a claim that the mark is in standard characters (or the legal equivalent), or delete the standard character claim in the United States application. A statement that the foreign registration includes a claim that the mark is in standard characters may be entered in the record through a Note to the File if there are no other outstanding issues.

[Appendix E](#) of this manual lists countries that register marks in standard characters or the equivalent. For countries on this list, if all letters and words in the mark are in block capital or capital and lowercase Latin characters, all numerals are Roman or Arabic numerals, the mark includes only common punctuation or diacritical marks, and no stylization of lettering and/or numbers is claimed, the examining attorney need not inquire whether the registered mark in the foreign registration is in standard characters or the equivalent, unless the applicant has indicated that the mark is *not* standard characters or the equivalent. If the applicant has indicated that the mark is *not* in standard characters or the equivalent, but the foreign registration is from a country on the list and the mark meets the standards set forth above, the examining attorney must inquire about the discrepancy. In response to the inquiry, the applicant must either amend the application to claim standard characters, or confirm that the mark is not in standard characters or the equivalent. If a particular country is not on this list, the examiner must inquire as to whether the mark in the foreign registration is for a mark in standard characters or the equivalent.

The examining attorney may delete the standard character claim by examiner's amendment after obtaining approval from the applicant or applicant's qualified practitioner. When deleting a standard character claim, the examining attorney must ensure that the mark drawing code is changed. See [TMEP §807.18](#) concerning mark drawing codes.

### **807.03(g) Drawings in “Typed” Format With No Standard Character Claim**

*Section 1 Applications.* If the application does not include a standard character claim, but the mark is shown in a format that would have been considered “typed” prior to November 2, 2003 (i.e., the mark is shown in capital letters, or the mark is specified as “typed” in the body of the application, on a separate drawing page, or on a cover letter filed with the application), the drawing will initially be coded and entered into the automated records of the USPTO as a special form drawing. However, the examining attorney must treat the drawing of the mark as a standard character drawing, and ensure that a standard character claim is entered into the record.

If the application is ready to be published for opposition, the examining attorney should enter the standard character claim by a no-call examiner's amendment. In this situation, no prior authorization from the applicant is required to add a claim by an examiner's amendment. See [TMEP §707.02](#). If an Office action is necessary, it must include a requirement that the applicant submit a standard character claim.

Once the applicant submits a standard character statement, the examining attorney should ensure that the mark drawing code is changed to 4 ( see [TMEP §807.18](#)).

*Section 44 Applications.* In a §44 application, the applicant cannot claim standard characters unless the foreign registration also claims standard characters. See [TMEP §807.03\(f\)](#).

*Section 66(a) Applications.* In a §66(a) application, the request for extension of protection forwarded by the IB normally indicates whether there is a standard character claim in the international registration. However, due to differences in requirements for standard character claims in different countries, there may be situations where the mark in the international registration meets the USPTO's requirements for a standard character claim, but no standard character claim is set forth in the international registration. If the international registration does not indicate that the mark is in standard characters, and the applicant seeks to amend the §66(a) application to add a standard character claim, the examining attorney must contact the Supervisor of the Madrid Processing Unit (“MPU”) via e-mail for instructions on how to proceed. The applicant may not add a standard character claim unless the mark meets the United States requirements for a standard character claim, as set forth in 37 C.F.R. §2.52(a) ( see [TMEP §§807.03\(a\) and \(b\)](#)).

### **807.03(h) Drawings Where the Format Is Unclear**

*Section 1 Applications.* When it is unclear from the record whether the submitted drawing was intended to be a standard character drawing, the examining attorney must contact the applicant for clarification. For example, clarification is needed if the font style used in the mark on the drawing does not match the font style used on the specimen and there is no standard character claim in the application, or if the applicant files a paper application in which the mark is printed or written by hand. If the mark is intended to be in standard characters, then the examining attorney must require that the applicant amend the application to include the standard character claim. This may be done by examiner's amendment. Once the applicant submits this statement, the examining attorney should ensure that the mark drawing code is changed to 4 ( see [TMEP §807.18](#)).

*Section 44 Applications.* In a §44 application, the applicant cannot claim standard characters unless the foreign registration also claims standard characters. See [TMEP §807.03\(f\)](#).

*Section 66(a) Applications.* In a §66(a) application, the request for extension of protection forwarded by the IB normally indicates whether there is a standard character claim in the international registration. However, due to differences in requirements for standard character claims in different countries, there may be situations where the mark in the international registration meets the USPTO's requirements for a standard character claim, but no standard character claim is set forth in the international registration. If the international registration does not indicate the mark is in standard characters, and the applicant seeks to amend the §66(a) application to add a standard character claim, the examining attorney must contact the MPU Supervisor via e-mail for instructions on how to proceed. The applicant may not add a standard character claim unless the mark meets the United States requirements for a standard character claim, as set forth in 37 C.F.R. §2.52(a) ( see [TMEP §§807.03\(a\) and \(b\)](#)).

Alternatively, if the international registration indicates that the mark is in standard characters, but the drawing includes elements that are not in the standard character set, the examining attorney must require deletion of the standard character claim even if the international registration indicates that the mark is in standard characters. See the IB's *Guide to International Registration*, Para. B.II.07.44.

The *Guide to the International Registration* provides that if an Office “considers that the mark is not in standard characters, it may issue a refusal, for example, on the ground that the international registration covers two marks (one in standard characters and one in special characters) or that it is simply not clear for what protection is sought.” Para. B.II.14.09. See [TMEP §807.01](#) regarding multiple marks and §§[1214](#) *et seq.* regarding phantom marks.

### **807.03(i) Typed Drawings**

Prior to November 2, 2003, “standard character” drawings were known as “typed” drawings. The mark on a typed drawing had to be typed entirely in capital letters. A typed mark is the legal equivalent of a standard character mark.

### **807.04 Special Form Drawings**

*37 CFR §2.52(b) (Extract) Special form drawing.*

Applicants who seek to register a mark that includes a two or three-dimensional design; color; and/or words, letters, or numbers or the combination thereof in a particular font style or size must submit a special form drawing. The drawing should show the mark in black on a white background, unless the mark includes color.

\*\*\*\*\*

#### **807.04(a) Characteristics of Special Form Drawings**

A “special form drawing” is a drawing that presents a mark comprised, in whole or in part, of special characteristics such as elements of design or color, style(s) of lettering, or unusual form(s) of punctuation.

All special form drawings must be of a quality that will reproduce satisfactorily for scanning into the USPTO's database. If the drawing is not of a quality that will reproduce satisfactorily for scanning and printing in the *Official Gazette* and on the certificate of registration, the examining attorney must require a new drawing.

If there is any doubt as to whether the drawing is acceptable, the examining attorney should contact the Office of Trademark Quality Review.

Pasted material, taped material, and correction fluid are not acceptable because they do not reproduce satisfactorily.

See [TMEP §807.18](#) concerning mark drawing codes.

### **807.04(b) When Special Form Drawing Is Required**

A special form drawing is required if words, letters, or numerals are presented in a distinctive form that engenders an uncommon or “special” commercial impression that would be altered or lost were registration to issue based on a standard character drawing. *In re Morton Norwich Prods., Inc.*, 221 USPQ 1023, 1023 (TTAB 1983) (holding LABID not registrable without a special form drawing because the specimen showed the letter “a” in smaller lettering with a diacritical accent that set off the “BID” portion of the mark, when the word “BID” had an accepted meaning as applied to drug prescriptions, i.e., “twice a day”); *see In re United Servs. Life Ins. Co.*, 181 USPQ 655, 656 (TTAB 1973) (holding FOR LIFE INSURANCE SEE US not registrable without a special form drawing because the specimen showed the “US” portion of the mark in significantly larger lettering and underlined, suggesting a double entendre because “US” could stand for applicant’s name “United Services” or for the pronoun “us”); *In re Dartmouth Mktg. Co.*, 154 USPQ 557, 558 (TTAB 1967) (finding “luncheon time” presented “in an uncommon manner to the extent that a prospective purchaser’s initial impression of the mark might well be other than that which applicant may intend to convey by the well understood term ‘luncheon time’”).

A special form drawing is required for marks that contain superscripts, subscripts, exponents, or other characters that are not in the USPTO’s standard character set. *In re AFG Indus. Inc.*, 17 USPQ2d 1162, 1164 (TTAB 1990) (requiring special form drawing for raised numeral). See [TMEP §807.03\(b\)](#) regarding the USPTO’s standard character set.

The USPTO encourages the use of standard character drawings. As a general rule, an applicant may submit a standard character drawing when a word, letter, numeral, or combination thereof creates a distinct commercial impression apart from any stylization or design element appearing on the specimen. If a mark remains the same in essence and is recognizable regardless of the form or manner of display that is presented, displaying the mark in standard character format affords a quick and efficient way of showing the essence of the mark. *In re wTe Corp.*, 87 USPQ2d 1536, 1539-40 (TTAB 2008) (reversing refusal on the ground that the standard character mark on the drawing was not a substantially exact representation of the mark as actually used, finding that SPECTRAMET creates a distinct commercial impression apart from any stylization or design element appearing on the specimens, on which the letter “C” was displayed with an arrow design); *see In re Oroweat Baking Co.*, 171 USPQ 168 (TTAB 1971) (holding requirement for special form drawing to register OROWEAT displayed with wheat designs in the letter “O” improper); *In re Elec. Reps. Ass’n*, 150 USPQ 476 (TTAB 1966) (finding special form drawing not required when acronym makes an impression apart from design).

When an application is for a mark in standard characters, the examining attorney must consider the manner in which the mark is used on the specimen, and decide whether the mark includes an essential element or feature that cannot be produced by the use of standard characters. See [TMEP §§807.12\(a\)–807.12\(a\)\(iii\)](#) regarding agreement between the mark on the drawing and the mark used on the specimen.

If the examining attorney determines that the mark in a standard character drawing should have been presented in special form, the applicant may submit a special form drawing if the amendment would not result in a material alteration of the mark. See 37 C.F.R. §2.72; [TMEP §§807.14–807.14\(f\)](#). If a standard character

drawing is amended to a special form drawing, the examining attorney must ensure that the mark drawing code is changed. See [TMEP §807.18](#) concerning mark drawing codes.

### **807.05 Electronically Submitted Drawings**

The drawing in a TEAS application must meet the requirements of 37 C.F.R. §§2.52 and 2.53.

The USPTO has waived the requirement of 37 C.F.R. §2.53(c) that drawings have a length and width of no less than 250 pixels and no more than 944 pixels. See notice at [69 Fed. Reg. 59809](#) (Oct. 6, 2004). However, applicants are encouraged to continue to submit drawings with a length and width of no less than 250 pixels and no more than 944 pixels.

#### **807.05(a) Standard Character Drawings Submitted Electronically**

If an applicant is filing a standard character drawing, the applicant must enter the mark in the appropriate data field. The applicant must also submit a standard character claim, which is automatically generated once the applicant selects the standard character option. 37 C.F.R. §2.52(a)(1).

When an application for a standard character mark is filed through TEAS, the characters entered in the appropriate data field in the TEAS application or TEAS response form are automatically checked against the USPTO's standard character set. See [TMEP §807.03\(b\)](#) regarding the standard character set.

If all the characters in the mark are in the standard character set, the USPTO will create a digitized image that meets the requirements of 37 C.F.R. §2.53(c), and automatically generate the standard character statement. The application record will indicate that standard characters have been claimed and that the USPTO has created the image. The examining attorney need not check the standard character mark against the standard character set during examination.

#### **807.05(a)(i) Long Marks in Standard Character Drawings**

As noted in [TMEP §807.05\(a\)](#), when an applicant files an application for a standard character mark through TEAS, the applicant must enter the mark in the appropriate data field.

A single line can consist of no more than 26 characters, including spaces. If the applicant enters a mark that exceeds 26 characters into the standard character word mark field, the USPTO's automated system will break the mark, so that it fits into the *Official Gazette*. After 26 characters, the mark will automatically continue onto the next line. The online TEAS instructions provide further information about breaks in long standard character marks. If a standard character mark exceeds 26 characters, and the applicant has a preference as to where the mark will be broken, the applicant should use the special form option, and attach a digitized image that meets the requirements of 37 C.F.R. §2.53(c). See [TMEP §807.05\(c\)](#) regarding the

requirements for digitized images. If the applicant selects the special form option, the applicant may not include a standard character claim.

### **807.05(b) Special Form Drawings Submitted Electronically**

If the mark is in special form, the applicant must attach a digitized image of the mark that meets the requirements of 37 C.F.R. §2.53(c) to the “Mark” field on the electronic application. See [TMEP §807.05\(c\)](#).

### **807.05(c) Requirements for Digitized Images**

The mark image must be in .jpg format, and should be scanned at no less than 300 dots per inch and no more than 350 dots per inch, to produce the highest quality image. All lines must be clean, sharp, and solid, must not be fine or crowded, and must produce a high-quality image. 37 C.F.R §2.53(c). It is recommended that mark images have a length of no less than 250 pixels and no more than 944 pixels, and a width of no less than 250 pixels and no more than 944 pixels.

Mark images should have little or no white space appearing around the design of the mark. If scanning from a paper image of the mark, it may be necessary to cut out the mark and scan it with little or no surrounding white space. Failure to do this may cause the mark to appear very small in the USPTO’s automated records, such that it may be difficult to recognize all words or design features of the mark. To ensure that there is a clear image of the mark in the automated records of the USPTO, examining attorneys and LIEs should view the mark on the Publication Review program available on the USPTO’s internal computer network. If the mark is not clear, the examining attorney must require a new drawing that meets the requirements of 37 C.F.R. §§2.52 and 2.54.

When color is not claimed as a feature of the mark, the image must be depicted only in black and white. When scanning an image, the applicant should confirm that the settings on the scanner are set to create a black-and-white image file, not a color image file.

Mark images may not include extraneous matter such as the symbols TM or SM, or the registration notice ®. The image should be limited to the mark. See [TMEP §807.02](#).

## **807.06 Paper Drawings**

*37 CFR §2.52(d) Paper drawings.*

A paper drawing must meet the requirements of §2.54.

*37 CFR §2.54 Requirements for drawings submitted on paper.*

The drawing must meet the requirements of §2.52. In addition, in a paper submission, the drawing should:

- (a) Be on non-shiny white paper that is separate from the application;
- (b) Be on paper that is 8 to 8.5 inches (20.3 to 21.6 cm.) wide and 11 to 11.69 inches (27.9 to 29.7 cm.) long. One of the shorter sides of the sheet should be regarded as its top edge. The image must be no larger than 3.15 inches (8 cm) high by 3.15 inches (8 cm) wide;
- (c) Include the caption “DRAWING PAGE” at the top of the drawing beginning one inch (2.5 cm.) from the top edge; and
- (d) Depict the mark in black ink, or in color if color is claimed as a feature of the mark.
- (e) Drawings must be typed or made with a pen or by a process that will provide high definition when copied. A photolithographic, printer’s proof copy, or other high quality reproduction of the mark may be used. All lines must be clean, sharp and solid, and must not be fine or crowded.

Paper drawings may be filed by mail or hand delivery. Drawings may *not* be submitted by facsimile transmission. 37 C.F.R. §2.195(d)(2).

The drawing must meet the requirements of 37 C.F.R. §§2.52 and 2.54.

### **807.06(a) Type of Paper and Size of Mark**

*Size of Mark.* The mark on the drawing should be no larger than 3.15 inches high by 3.15 inches wide (8 cm high by 8 cm wide). 37 C.F.R. §2.54(b).

The USPTO will create a digitized image of all drawings submitted on paper. The examining attorney must view the mark on the Publication Review program, available on the USPTO's internal computer network. If the display of the mark appears to be clear and accurate, the examining attorney will presume that the drawing meets the size requirements of the rule.

*Type of Paper and Recommended Format.* The drawing should:

- Be on non-shiny white paper that is separate from the application;
- Be on paper that is 8 to 8.5 inches (20.3 to 21.6 cm.) wide and 11 to 11.69 inches (27.9 to 29.7 cm.) long. One of the shorter sides of the sheet should be regarded as its top edge;
- Include the caption "DRAWING PAGE" at the top of the drawing beginning one inch (2.5 cm.) from the top edge; and
- Depict the mark in black ink, or in color if color is claimed as a feature of the mark.

37 C.F.R. §§2.54(a) through (d).

The drawing must be typed or made with ink or by a process that will provide high definition when scanned. A photolithographic, printer's proof copy, or other high-quality reproduction of the mark may be used. All lines must be clean, sharp, and solid, and must not be fine or crowded. 37 C.F.R. §2.54(e).

### **807.06(b) Long Marks in Standard Character Drawings**

Because all standard character drawings are stored in USPTO systems as an image, a standard character drawing must meet the 3.15 inch (8 cm) by 3.15 inch (8 cm) requirement of 37 C.F.R. §2.54(b). If the mark is too long to meet this requirement, applicant must submit an image on which the mark is broken in an appropriate place. It is suggested that the applicant use 14-point type to ensure that the mark will be legible in the *Official Gazette* and on the certificate of registration.

If an applicant submits an image on which the mark exceeds the size requirements of 37 C.F.R. §2.54(b), the USPTO will reduce the image so that it will meet these requirements. See [TMEP §807.06\(a\)](#). This could cause the mark to appear very small. To ensure that the mark will be legible in the *Official Gazette* and on the certificate of registration, the examining attorney should view the mark on the Publication Review program available on the USPTO's internal computer network. If the mark is not legible, the examining attorney must require a new drawing that meets the requirements of 37 C.F.R. §§2.52 and 2.54.

### **807.06(c) Separate Drawing Page Preferred**

The USPTO recommends that an applicant submit a drawing of the mark on a separate page from the written application. 37 C.F.R. §2.54(a). However, a separate drawing page is not mandatory. Instead of a drawing page, an applicant may include a drawing of the mark embedded in the application, in either the heading or the body of the application.

If the applicant identifies a separate page as a drawing (e.g., by labeling it as a drawing, or providing a heading with the applicant's name, address and the subject goods/services), this will be the only drawing considered.

A mark depicted on the specimen or in the foreign registration certificate will not be considered a drawing.

If there is no separate drawing page, the examining attorney must review the application to determine what the mark is. If an embedded drawing meets the requirements of 37 C.F.R. §§2.51, 2.52, and 2.54, the examining attorney should accept it and not require a substitute drawing.

Effective October 30, 1999, a separate drawing page is considered part of the written application, not a separate element. Dates of use, disclaimers, descriptions of the mark, identifications of goods/services, and other information that appears on the drawing are also considered part of the written application. This applies to substitute drawings as well as original drawings. If there is an inconsistency between the information on the drawing page and the information in the body of the application, the examining attorney must require clarification.

If an applicant submits a separate drawing page showing a mark, and a different mark appears in the written application, the drawing page controls for purposes of determining what the mark is. See [TMEP §807.01](#).

## 807.07 Color in the Mark

*37 CFR §2.52(b)(1) Marks that include color.*

If the mark includes color, the drawing must show the mark in color, and the applicant must name the color(s), describe where the color(s) appear on the mark, and submit a claim that the color(s) is a feature of the mark.

If the applicant wishes to register the mark in color, the applicant must submit a color drawing and meet the requirements of 37 C.F.R. §2.52(b)(1). See [TMEP §§807.07\(a\)](#) *et seq.* regarding the requirements for color drawings. If the applicant does not claim color as a feature of the mark, the applicant must submit a black-and-white drawing.

Generally, if the applicant has not made a color claim, the description of the mark should not mention color(s), because reference to color in the description of a non-color mark creates a misleading impression. [TMEP §808.02](#). However, in some cases, it may be appropriate to submit a black-and-white drawing and a description of the mark that refers to black, white, and/or gray, if the applicant states that color is not claimed as a feature of the mark. This occurs where the black, white, or gray is used as a means to indicate areas that are not part of the mark, such as background or transparent areas; to depict a certain aspect of the mark that is not a feature of the mark, such as dotted or broken-line outlining to show placement of the mark; to represent shading or stippling; or to depict depth or three-dimensional shape. See [TMEP §§807.07\(f\)](#) *et seq.* regarding applications with black-and-white drawings and mark descriptions that refer to black, white, or gray with no corresponding color claim; [TMEP §§807.07\(d\)](#) *et seq.* regarding color drawings that contain black, white, or gray, and [TMEP §807.07\(e\)](#) regarding black-and-white drawings and color claims.

See [TMEP §§1202.05](#) *et seq.* regarding the registration of marks that consist solely of one or more colors used on particular objects.

### 807.07(a) Requirements for Color Drawings

For applications filed on or after November 2, 2003, the USPTO does not accept black-and-white drawings with a color claim, or drawings that show color by use of lining patterns. 37 C.F.R. §2.52(b)(1).

If the mark includes color, the drawing must show the mark in color. In addition, the application must include: (1) a claim that the color(s) is/are a feature of the mark; and (2) a color location statement in the “Description of the Mark” field naming the color(s) and describing where the color(s) appear(s) on the mark.

37 C.F.R. §2.52(b)(1). A color drawing will not publish without both of these statements. See [TMEP §807.07\(a\)\(i\)](#) regarding the color claim, and [TMEP §807.07\(a\)\(ii\)](#) regarding the color location statement.

### **807.07(a)(i) Color Must Be Claimed as a Feature of the Mark**

If an applicant submits a color drawing, or a description of the mark that indicates the use of color on the mark, the applicant must claim color as a feature of the mark. 37 C.F.R. §2.52(b)(1). If the color claim is unclear or ambiguous, the examining attorney must require clarification. If the color claim or mark description references changeable colors, the examining attorney must require an amended mark description that deletes the reference to the color in the mark varying or being changeable and restricts the description to only those colors shown on the drawing. See [TMEP §807.01](#). Alternatively, the applicant may amend to a black-and-white drawing, if the amendment would not constitute a material alteration. A properly worded color claim would read as follows:

The color(s) *<name the color(s)>* is/are claimed as a feature of the mark.

The color claim must include the generic name of the color(s) claimed. The color claim may also include a reference to a commercial color identification system. The USPTO does not endorse or recommend any one commercial color identification system.

In an application filed on or after November 2, 2003, an applicant cannot file a color drawing with a statement that “no claim is made to color” or “color is not a feature of the mark.” If this occurs, the examining attorney must require the applicant to claim color as a feature of the mark. The applicant may not substitute a black-and-white drawing, unless the examining attorney determines that color is non-material.

### **807.07(a)(ii) Applicant Must Specify the Location of the Colors Claimed**

If an applicant submits a color drawing, in addition to claiming the color(s), the applicant must include a separate statement specifying where the color(s) appear(s) on the mark. 37 C.F.R. §2.52(b)(1). This statement is often referred to as a “color location statement.” In a TEAS application, the color location statement should be set forth in the “Description of the Mark” field. A properly worded color location statement would read as follows:

The mark consists of *<specify the color(s) and literal or design element(s) on which the color(s) appear, e.g., a red bird sitting on a green leaf>*.

If the color location statement is unclear or ambiguous, the examining attorney must require clarification.

If the statement references changeable colors, the examining attorney must require an amended mark description that deletes the reference to the color in the mark varying or being changeable and restricts the description to only those colors shown on the drawing. See [TMEP §807.01](#). However, if the record contains an accurate and properly worded color claim listing all the colors, and an informal description of where the colors appear, but one of the colors is omitted from the formal description of the colors in the mark, the examining attorney may enter an amendment of the color description that accurately reflects the location of all colors in the mark without prior approval by the applicant or the applicant’s qualified practitioner.

See [TMEP §707.02](#).

Example – A TEAS applicant includes a statement in the “Miscellaneous” field that refers to the mark as a blue, red, and yellow ball and includes an accurate and properly worded color claim listing all colors in the mark, but omits the color yellow from the description of the mark. The examining attorney may enter an amendment of the description to accurately reflect all colors in the mark;

The color location statement must include the generic name of the color claimed. The statement may also include a reference to a commercial color identification system. The USPTO does not endorse or recommend any one commercial color identification system.

It is usually not necessary to indicate shades of a color, but the examining attorney has the discretion to require that the applicant indicate shades of a color, if necessary to accurately describe the mark.

See [TMEP §1202.05\(e\)](#) for additional information regarding the requirement for a written explanation of a mark consisting solely of color.

### **807.07(b) Color Drawings Filed Without a Color Claim**

If the applicant submits a color drawing but does not include a color claim in the written application, and if the color is a material element of the mark, the examining attorney must require the applicant to submit a claim that color(s) is a feature of the mark, and a separate color location statement in the “Description of the Mark” field naming the color(s) and specifying where the color(s) appear(s) on the mark.

In an application under §1, if the examining attorney determines that color is a non-material element of the drawing, the applicant may be given the option of submitting a black-and-white drawing.

In an application under §44, the drawing of the mark must be a substantially exact representation of the mark in the foreign registration. 37 C.F.R. §2.51(c). If a §44 application is based on a foreign registration that depicts the mark in color, but no claim of color is made in the registration document, the examining attorney must inquire whether the foreign registration includes the color(s) shown as claimed features of the mark. The applicant must either: (1) submit an affirmative statement that color is a feature of the mark, and comply with the United States requirements for drawings in color; or (2) submit a statement that although the mark is registered in its country of origin featuring a color depiction of the mark, no claim of color is made in that registration. If the examining attorney determines that color is a non-material element of the drawing, the applicant may be given the option of submitting a black-and-white drawing. See [TMEP §§807.12\(b\)](#) and [1011.01](#).

In an application under §66(a), the drawing of the mark must be a substantially exact representation of the mark as it appears in the international registration. 37 C.F.R. §2.51(d); [TMEP §807.12\(c\)](#). The IB will include a reproduction that is identical to the reproduction in the international registration when it forwards the request for extension of protection of the international registration to the United States. The mark in a §66(a) application cannot be amended. [TMEP §807.13\(b\)](#).

Generally, when a mark is depicted in color, the §66(a) application will contain a claim of the colors featured in the mark. However, because some countries accept color drawings of marks that do not include a color claim, there may be cases where no claim of color has been made in the international registration, but the reproduction of the mark contains color. In these cases, the examining attorney should require the applicant to submit either: (1) a claim of the color(s) featured in the mark and a separate statement in the “Description of the Mark” field describing where the color(s) appear(s) in the mark; or (2) a statement that no claim of color is made with respect to the international registration, and a black-and-white reproduction of the same

mark depicted in the international registration to comply with United States drawing requirements. 37 C.F.R. §2.52(b).

### **807.07(c) Color Drawings Filed With an Incorrect Color Claim**

When the color shown in the drawing page in a paper application, or in the digitized image of the drawing in a TEAS application, is inconsistent with the color claimed in the written application (e.g., the mark is shown in blue in the drawing, but the color claimed is orange), the drawing controls. The color claim may be corrected to conform to the drawing. The drawing may not be corrected to conform to the color claim, unless the examining attorney determines that the amendment is non-material.

### **807.07(d) Color Drawings that Contain Black, White, or Gray**

When color is claimed as a feature of the mark, the applicant must submit a color claim that identifies each color and a separate color location statement describing where each color appears in the mark. 37 C.F.R. §2.52(b)(1); [TMEP §807.07\(a\)](#). The applicant must claim all colors shown in the mark; the applicant cannot claim color for some elements of the mark and not others. *See id.* For example, when the drawing includes solid black lettering as well as elements in other colors, the applicant must claim the color black as a feature of the mark and include reference to the black lettering in the color location statement. The applicant may not state that solid black lettering represents all colors, or that it represents the particular color of the label, product, packaging, advertisement, website, or other specimen on which the mark appears at any given time.

If color is claimed as a feature of the mark, the drawing may include black, white, and/or gray used in two ways: (1) as claimed features of the mark; and/or (2) as a means to depict a certain aspect of the mark *that is not a feature of the mark*, such as dotted or broken-line outlining to show placement of the mark on a product or package; to represent shading or stippling; to depict depth or three-dimensional shape; or to indicate areas that are not part of the mark, such as background or transparent areas. *See* [TMEP §§807.08](#) and [808.01\(b\)](#).

The terms “background” and “transparent areas” refer to the white or black portions of the drawing which are not part of the mark, but appear or will appear in the particular color of the label, product, packaging, advertisement, website, or other acceptable specimen on which the mark is or will be displayed. The applicant may not claim that the background or transparent areas represent all colors or that they represent the particular color of the label, product, packaging, advertisement, website, or other specimen on which the mark appears at any given time.

If the applicant claims color as a feature of the mark, the examining attorney must require the applicant to:

- state that the color(s) black, white, and/or gray (and all other colors in the drawing) are claimed as a feature of the mark, and describe where the colors appear on the mark; or
- if appropriate, state that the black, white, and/or gray in the drawing represents background, outlining, shading, and/or transparent areas and is not part of the mark.

These statement(s) may be submitted in either a written amendment to the application or by an examiner's amendment. The examining attorney must ensure that the statement(s) is entered into the database. The statement(s) will be printed on the registration certificate.

The only exception to the requirement to claim or explain any black, white, and/or gray shown on the drawing is that, if the background of the drawing is white and it is clear that the white background is not part of the

mark, no explanation of the white background is required. For example, if the drawing depicts the letters “ABC” in solid blue on a white background, or depicts a solid purple and green flower on a white background, no statement about the white background is required. On the other hand, if the shape of each of the letters “ABC” is outlined in blue with an enclosed white interior, or if the purple and green flower is enclosed in a green or black rectangle, square, or circle with a white interior, the applicant must explain the purpose of the interior white areas on the drawing.

### **807.07(d)(i) Applications Under §1**

If the drawing includes black, white, gray tones, gray shading, and/or gray stippling, and also includes other colors (e.g., red, turquoise, and beige), and the color claim does not include the black/white/gray, the examining attorney must require the applicant to either: (1) add the black/white/gray to the color claim and to the color location statement; or (2) if appropriate, add a statement that “The <black/white/gray> in the drawing represents background, outlining, shading, and/or transparent areas and is not part of the mark.”

*Drawing must match the specimen of use.* The drawing of the mark must be a substantially exact representation of the mark as used on or in connection with the goods or services, as shown by the specimen. 37 C.F.R. §§2.51 and 2.72(a)(1). See [TMEP §§807.12\(a\)](#) *et seq.*

For example, if the drawing shows a red flower and the letters XYZ in the color black, the specimen must show the mark in the same colors. If the specimen depicts the lettering in a color other than solid black (e.g., green), the applicant must: (1) submit an amended drawing that depicts the lettering in the color shown on the specimen, if the amendment would not materially alter the mark; and (2) amend the color claim and the color location statement to match the new drawing, e.g., replace the word “black” with the word “green.” Alternatively, the applicant may submit a substitute specimen showing use of the mark in the colors depicted on the drawing, or, if deleting the colors from the drawing would not materially alter the mark, the applicant may delete the color claim and substitute a black-and-white drawing for the color drawing. 37 C.F.R. §2.72.

### **807.07(d)(ii) Applications Under §44**

If the applicant claims any color as a feature of the mark in the foreign registration, the applicant must claim the same color(s) in the United States application. If the foreign registration includes a color claim and also includes black, white, and/or gray that is not claimed as a feature of the mark, the applicant must state that the black/white/gray in the drawing represents background, outlining, shading, and/or transparent areas and is not part of the mark. See 37 C.F.R. §§2.51(c) and 2.72(c)(1); [TMEP §§807.12\(b\)](#) and [1011.01](#).

In applications under §44, the drawing of the mark, including any color claim, must match the mark in the foreign registration. See 37 C.F.R. 2.51(c). An applicant under §44 who is claiming color in the United States application must state for the record that the foreign registration includes a claim of color, unless the foreign registration clearly indicates that color is a feature of the registered mark. The statement that the foreign registration includes a claim of color will not be printed on the United States registration certificate.

### **807.07(d)(iii) Applications Under §66(a)**

If the applicant claims color as a feature of the mark, and the drawing also includes black, white, and/or gray that is not mentioned in the international registration color claim, the applicant must either: (1) claim the black/white/gray as color(s) in the United States application and describe the location of the

black/white/gray; or (2) state that the black/white/gray in the drawing represents background, outlining, shading, and/or transparent areas and is not part of the mark.

### **807.07(e) Black-and-White Drawings and Color Claims**

If an applicant submits a black-and-white drawing that is lined for color ( *see* [TMEP §808.01\(b\)](#)), or if the applicant submits a black-and-white drawing with an application that includes a color claim, the examining attorney must require the applicant to submit a color drawing, a claim that color(s) are a feature of the mark, and a separate statement naming the color(s) and describing where they appear on the mark. If, however, the examining attorney determines that the color is a non-material element of the drawing, the applicant may instead be given the option of submitting a black-and-white drawing that is not lined for color, or deleting the color claim in the written application, whichever is applicable.

If an applicant submits a black-and-white drawing that is not lined for color, and there is no color claim in the written application, generally the applicant cannot substitute a color drawing and claim color, unless the examining attorney determines that the color is a non-material element of the drawing.

### **807.07(f) Black-and-White Drawings that Contain Gray or Black-and-White Drawings with a Mark Description that Refers to Black, White, or Gray**

#### **807.07(f)(i) TEAS, TEAS Plus, and §66(a) Applications**

If the applicant submits a black-and-white drawing that contains gray or stippling that produces gray tones, and the application states that color is not claimed as a feature of the mark, no further inquiry is required. Similarly, if an applicant submits a black-and-white drawing and a description of the mark that references black, white, and/or gray, and the applicant states that color is not claimed as a feature of the mark, no further inquiry is required and no change to the description of the mark is required.

The word “No” in the “Color Mark” field on a TEAS or TEAS Plus application, or in the “Mark in Color” field on a §66(a) application, is sufficient to indicate that color is not claimed as a feature of the mark, even if the application contains the notation “grayscale” in reference to the drawing.

When a mark contains stippling, it is generally not necessary to require a statement that the stippling represents shading or is a feature of the mark, unless the examining attorney believes such a statement is necessary to accurately describe the mark. See [TMEP §808.01\(b\)](#) regarding stippling statements.

#### **807.07(f)(ii) Applications Filed on Paper**

If the applicant submits a black-and-white drawing on paper and the application is silent about whether color is claimed as a feature of the mark, the presence of any gray in the drawing creates an ambiguity as to whether black, white, and/or gray are claimed as a feature of the mark. Similarly, if an applicant submits a black-and-white drawing on paper and the application is silent about whether color is claimed as a feature of the mark, the inclusion of a description of the mark that refers to black/white/gray creates an ambiguity as to whether black/white/gray is claimed as a feature of the mark. In these cases, the examining attorney must require that the applicant submit one of the following:

- (1) A statement that the mark is not in color. The applicant may submit the statement, or the examining attorney may obtain the information in a telephone interview or e-mail exchange with the applicant

- or the applicant's qualified practitioner, and enter a Note to the File in the record that the mark is not in color; or
- (2) A statement that the color(s) black, white, and/or gray is a feature of the mark, and a separate statement naming the color(s) and describing where the color(s) appear(s) on the mark.

### **807.07(g) Drawings in Applications Filed Before November 2, 2003**

Prior to November 2, 2003, the USPTO did not accept color drawings. An applicant who wanted to show color in a mark was required to submit a black-and-white drawing, with a statement describing the color(s) and where they appeared on the mark. Alternatively, the applicant could use a color lining system that previously appeared in 37 C.F.R. §2.52 but was deleted from the rule effective October 30, 1999. *See* notice at [64 Fed. Reg. 48900](#), 48903 (Sept. 8, 1999) and 1226 TMOG 103, 106 (Sept. 28, 1999).

In applications filed prior to November 2, 2003, it was presumed that color was claimed as a feature of the mark, unless the applicant specifically stated that no claim was made to color, or that color was not claimed as a feature of the mark.

For applications filed before November 2, 2003, unless the application included a statement that color was not claimed as a feature of the mark (or that no claim was made to color), the applicant may voluntarily submit a color drawing under the current rules, with the requisite color claim and a separate description of the color(s) in the mark.

A registrant may substitute a color drawing for a black-and-white drawing in a registration where color is claimed, by filing a §7 request to amend the registration certificate. The request must include: (1) a color drawing; (2) a color claim; (3) a description of where the color appears in the mark; and (4) the fee required by 37 C.F.R. §2.6. *See* [TMEP §1609.02\(e\)](#).

### **807.08 Broken Lines to Show Placement**

*37 CFR §2.52(b)(4) Broken lines to show placement.*

If necessary to adequately depict the commercial impression of the mark, the applicant may be required to submit a drawing that shows the placement of the mark by surrounding the mark with a proportionately accurate broken-line representation of the particular goods, packaging, or advertising on which the mark appears. The applicant must also use broken lines to show any other matter not claimed as part of the mark. For any drawing using broken lines to indicate placement of the mark, or matter not claimed as part of the mark, the applicant must describe the mark and explain the purpose of the broken lines.

Occasionally, the position of the mark on the goods, or on a label or container, may be a feature of the mark.

If necessary to adequately depict the commercial impression of the mark, the examining attorney may require the applicant to submit a drawing that shows the placement of the mark by surrounding the mark with a proportionately accurate broken-line representation of the particular goods, packaging, or advertising on which the mark appears. The applicant must also use broken lines to show any other matter not claimed as part of the mark. For any drawing using broken lines to indicate placement of the mark, or matter not claimed as part of the mark, the applicant must include a written description of the mark and explain the purpose of the broken lines, e.g., by indicating that the matter shown by the broken lines is not a part of the mark and that it serves only to show the position of the mark. 37 C.F.R. §2.52(b)(4).

The drawing should clearly define the matter the applicant claims as its mark. *See In re Water Gremlin Co.*, 635 F.2d 841, 208 USPQ 89 (C.C.P.A. 1980); *In re Famous Foods, Inc.*, 217 USPQ 177 (TTAB 1983).

Because the matter depicted in broken lines is not part of the mark, it should not be considered in determining likelihood of confusion. *In re Homeland Vinyl Products, Inc.*, 81 USPQ2d 1378 (TTAB 2006). See [TMEP §1202.02\(c\)\(i\)](#) regarding drawings in trade dress applications.

## 807.09 “Drawing” of Sound, Scent, or Non-Visual Mark

*37 CFR §2.52(e) Sound, scent, and non-visual marks.*

An applicant is not required to submit a drawing if the mark consists only of a sound, a scent, or other completely non-visual matter. For these types of marks, the applicant must submit a detailed description of the mark.

The applicant is not required to submit a drawing if the mark consists solely of a sound (e.g., music or words and music), a scent, or other completely non-visual matter. In a paper application, the applicant should clearly indicate in the application that the mark is a “NON-VISUAL MARK.” If the applicant is submitting a TEAS application for a sound mark, the applicant should select “Sound Mark” as the mark type. If the applicant is submitting a TEAS application for a scent mark, the applicant should indicate that the mark type is “Standard Character” and should type “Scent Mark” in the “Standard Character” field. The USPTO will enter the proper mark drawing code when the application is processed. Non-visual marks are coded under mark drawing code 6 in the automated search system. See [TMEP §807.18](#) regarding mark drawing codes.

If the applicant selects “Sound Mark” as the mark type, the applicant will be required to indicate whether it is attaching an audio file. The applicant should submit an audio reproduction of any sound mark. See 37 C.F.R. §2.61(b). The purpose of this reproduction is to supplement and clarify the description of the mark. The reproduction should contain only the mark itself; it is not meant to be a specimen. The reproduction must be in an electronic file in .wav, .wmv, .wma, .mp3, .mpg, or .avi format and should not exceed 5 MB in size because TEAS cannot accommodate larger files.

Audio files can only be attached to TEAS application forms. To submit an electronic file in connection with any other TEAS form (e.g., Response to Office Action or Statement of Use/Amendment to Allege Use), the file must be sent after the TEAS document is transmitted, as an attachment to an e-mail message directed to TEAS@uspto.gov, with clear instructions that the electronic file should be associated with “the application filed under Serial No. <specify>.” See *In re Powermat Inc.*, 105 USPQ2d 1789, 1791 (TTAB 2013). Note, however, that audio files attached to an e-mail currently cannot exceed 9 MB.

For paper filings, reproductions of sound marks must be submitted on compact discs (“CDs”), digital video discs (“DVDs”), videotapes, or audiotapes. See *id.* The applicant should clearly and explicitly indicate that the reproduction of the mark contained on the disc or tape is meant to supplement the mark description and that it should be placed in the paper file jacket and not be discarded.

If the mark is a composite comprising both visual and non-visual matter, the applicant must submit a drawing depicting the visual matter, and include a description of the non-visual matter in the “Description of the Mark” field.

The applicant must also submit a detailed description of the mark for all non-visual marks. 37 C.F.R. 2.52(e). If the mark comprises music or words set to music, the applicant should generally submit the musical score sheet music to supplement or clarify the description of the mark. See 37 C.F.R. §2.61(b). In a TEAS application or response, the score should be attached as a .jpeg or .pdf file in the “Additional Statements” section of the form, under “Miscellaneous Statements.”

See [TMPEP §§904.03\(f\)](#) and [1202.15](#) regarding specimens for sound marks, and [TMPEP §904.03\(m\)](#) regarding specimens for scent and flavor marks.

### 807.10 Three-Dimensional Marks

*37 CFR §2.52(b)(2) Three dimensional marks.*

If the mark has three-dimensional features, the drawing must depict a single rendition of the mark, and the applicant must indicate that the mark is three-dimensional.

If the mark is three-dimensional, the drawing should present a single rendition of the mark in three dimensions. *In re Schaefer Marine, Inc.*, 223 USPQ 170, 171 n.1 (TTAB 1984). The applicant must include a description of the mark indicating that the mark is three-dimensional.

Under 37 C.F.R. §2.52(b)(2), the applicant is required to submit a drawing that depicts a single rendition of the mark. If the applicant believes that its mark cannot be adequately depicted in a single rendition, the applicant may file a petition under 37 C.F.R. §2.146 requesting that the rule be waived. See [TMPEP Chapter 1700](#) regarding petitions. See [TMPEP §§1202.02\(c\)\(i\)](#) regarding drawings in trade dress applications and [1202.02\(c\)\(ii\)](#) regarding information required in descriptions for trade dress marks comprising product design or product packaging, or trade dress for services.

### 807.11 Marks With Motion

*37 CFR §2.52(b)(3) Motion marks.*

If the mark has motion, the drawing may depict a single point in the movement, or the drawing may depict up to five freeze frames showing various points in the movement, whichever best depicts the commercial impression of the mark. The applicant must also describe the mark.

If the mark includes motion (i.e., a repetitive motion of short duration) as a feature, the applicant may submit a drawing that depicts a single point in the movement, or the applicant may submit a square drawing that contains up to five freeze frames showing various points in the movement, whichever best depicts the commercial impression of the mark. The applicant must also submit a detailed written description of the mark. 37 C.F.R. §2.52(b)(3).

See [TMPEP §904.03\(l\)](#) regarding specimens for motion marks.

### 807.12 Mark on Drawing Must Agree with Mark on Specimen or Foreign Registration

*37 CFR §2.51 Drawing required.*

(a) In an application under section 1(a) of the Act, the drawing of the mark must be a substantially exact representation of the mark as used on or in connection with the goods and/or services.

(b) In an application under section 1(b) of the Act, the drawing of the mark must be a substantially exact representation of the mark as intended to be used on or in connection with the goods and/or services specified in the application, and once an amendment to allege use under §2.76 or a statement of use under §2.88 has been filed, the drawing of the mark must be a substantially exact representation of the mark as used on or in connection with the goods and/or services.

(c) In an application under section 44 of the Act, the drawing of the mark must be a substantially exact representation of the mark as it appears in the drawing in the registration certificate of a mark duly registered in the applicant's country of origin.

(d) In an application under section 66(a) of the Act, the drawing of the mark must be a substantially exact representation of the mark as it appears in the international registration.

### 807.12(a) Applications Under §1 of the Trademark Act

For applications under §1 of the Trademark Act, the drawing must always be compared to the specimen of record to determine whether they match. 37 C.F.R. §§2.51(a) and (b). The first step is to analyze whether the mark in the drawing is a substantially exact representation of the mark shown on the specimen.

In an application filed under §1(a) of the Trademark Act, the drawing of the mark must be a substantially exact representation of the mark as used on or in connection with the goods/services, as shown by the specimen. 37 C.F.R. §§2.51(a) and 2.72(a)(1).

In an application filed under §1(b) of the Act, the drawing of the mark must be a substantially exact representation of the mark as intended to be used on or in connection with the goods/services, *and* as actually used as shown by the specimen filed with the amendment to allege use or statement of use. 37 C.F.R. §§2.51(b) and 2.72(b)(1).

If the mark in the drawing is not a substantially exact representation of the mark shown in the specimen, the second step is to determine whether an amendment to the drawing to agree with the mark shown on the specimen would be a material alteration of the mark in the original drawing. If the answer is “no,” the applicant must submit either an amended drawing or a substitute specimen. If the answer is “yes,” the applicant must submit a substitute specimen and no amendment to the drawing is allowed. 37 C.F.R. §§2.72(a) and (b); see [TMEP §§807.14](#) *et seq.* for more information about material alteration.

Extraneous matter shown on the specimen that is not part of the mark (e.g., the symbols “TM” or “SM,” the registration notice ®, the copyright notice ©, or informational matter such as net weight or contents) may not be shown on the drawing. See [TMEP §807.14\(a\)](#) regarding deletion of non-distinctive matter.

See [TMEP §1214.02](#) regarding the agreement of the mark on the drawing with the mark on the specimen in an application that seeks registration of a mark with a “phantom” or changeable element, and [TMEP §1215.02\(c\)](#) regarding the agreement of the mark on the drawing with the mark on the specimen in an application that seeks registration of a domain name mark.

### **807.12(a)(i) Role of Punctuation in Determining Whether Mark on Drawing Agrees with Mark on Specimen**

In assessing discrepancies in punctuation between the mark on the drawing and the mark shown on the specimen, the general rule is that:

- (1) Extraneous, non-distinctive punctuation that appears on the specimen may be omitted from the mark on the drawing, because an acceptable specimen may contain additional matter used with the mark on the drawing, so long as the mark on the drawing makes a separate and distinct commercial impression apart from the other matter. See [TMEP §807.12\(d\)](#) and cases cited therein regarding “mutilation” of the mark.
- (2) Punctuation in the mark on the drawing must also appear on the specimen because a mark sought to be registered under §1 must be “used in commerce,” and if the punctuation on the drawing does not appear on the specimen, the mark on the drawing is not used in commerce.

See [TMEP §1215.08\(c\)](#) regarding the addition or deletion of a “.” in marks for domain name registry or registration services.

### **807.12(a)(ii) Punctuation on the Drawing but Not on the Specimen**

If a drawing contains punctuation, the elements of punctuation are presumed to be part of the mark. Thus, if there is punctuation in the mark on the drawing, the punctuation must also appear on the specimen or the drawing is not considered to be a substantially exact representation of the mark as used in commerce. If deletion of the punctuation from the drawing does not alter the commercial impression, the drawing may

be amended to match the specimen. If deletion of the punctuation changes the commercial impression, i.e., constitutes a material alteration, the applicant must submit a substitute specimen to match the original drawing. See [TMEP §§807.14](#) *et seq.* regarding material alteration.

For example, if the mark on the drawing is “ALL THE KING’S MEN,” and the mark on the specimen is ALL THE KING’S MEN, the mark on the drawing is not a substantially exact representation of the mark as used in commerce. Since the deletion of the quotation marks from the drawing would not change the commercial impression of the mark, the drawing may be amended to match the specimen. The applicant has the option to either: (1) amend the drawing to delete the punctuation; or (2) submit a new specimen showing use of the mark with the punctuation.

However, if the mark on the drawing is GOT MILK?, and the mark on the specimen is GOT MILK, the deletion of the punctuation from the drawing would constitute a material alteration because it changes the commercial impression from a question to a statement. Therefore, the drawing may not be amended and the applicant must submit a substitute specimen that includes punctuation in order for the drawing to be a substantially exact representation. See [TMEP §§807.14](#) *et seq.*

### **807.12(a)(iii) Punctuation on the Specimen but Not on the Drawing**

Generally, extraneous, non-distinctive punctuation marks that appear on the specimen may be omitted from the drawing, if the matter on the drawing makes an impression separate and apart from the punctuation marks that appear on the specimen. See [TMEP §807.12\(d\)](#). For example, if the mark on the drawing is HOME RUN, and the mark on the specimen is “HOME RUN,” the drawing is considered a substantially exact representation of the mark as used on the specimen. The quotation marks on the specimen are nondistinctive and do not change the commercial impression of the mark, so it is unnecessary to amend the drawing or require a substitute specimen.

However, in rare instances, the punctuation marks on the specimen result in a mark with a different commercial impression than the mark shown on the drawing. For example, if the mark on the specimen is PREGNANT?, and the mark on the drawing is PREGNANT, the mark on the drawing is not a substantially exact representation of the mark as actually used. The question mark on the specimen transforms the word PREGNANT from a mere statement to a question, and, therefore, changes the commercial impression of the mark. Moreover, the drawing cannot be amended to add the punctuation because it would result in a material alteration. Therefore, the applicant must submit a new specimen showing the mark without the punctuation. *In re Guitar Straps Online, LLC*, 103 USPQ2d 1745, 1751-52 (TTAB 2012) (finding the mark GOT STRAPS on the drawing not a substantially exact representation of the mark GOT STRAPS? on the specimen). See [TMEP §§807.14](#) *et seq.*

### **807.12(b) Applications Under §44 of the Trademark Act**

In a §44 application, the drawing of the mark must be “a substantially exact representation of the mark as it appears in the drawing in the registration certificate of the mark registered in the applicant’s country of origin.” 37 C.F.R. §§2.51(c) and 2.72(c)(1). The standard for determining whether the mark in the drawing agrees with the mark in the foreign registration is stricter than the standard used to determine whether a specimen supports use of a mark in an application under §1 of the Trademark Act. See [TMEP §1011.01](#).

The drawing in the United States application must display the entire mark as registered in the foreign country. The applicant may not limit the mark to part of the mark shown in the foreign registration, even if it creates a separate and distinct commercial impression.

*Exception:* Non-material informational matter that appears on the foreign registration, such as net weight or contents, or the federal registration notice, may be omitted or deleted from the drawing.

When the mark on the drawing does not agree with the mark on the foreign registration, the applicant cannot amend the drawing of the mark if the amendment would materially alter the mark on the original drawing. 37 C.F.R. §2.72(c); [TMEP §§807.14](#) *et seq.* and [1011.01](#).

If the United States application has a black-and-white drawing, and color appears in the foreign registration, or color is claimed or described as a feature of the mark in the foreign registration, the mark in the United States drawing does not agree with the mark in the foreign registration. In general, the black-and-white drawing in the United States application should be amended to agree with the colored mark in the foreign registration, unless the proposed amendment would be a material alteration.

If the United States application has a color drawing, the same colors must be part of the mark in the foreign registration. Whether the drawing in the United States application can be amended depends upon whether the amendment would be a material alteration of the mark. If the United States application has a color drawing but the drawing in the foreign registration is in black and white with no color claim, the applicant must either: (1) amend the drawing in the United States application to a black-and-white drawing, if the amendment would not be a material alteration; or (2) delete the §44 basis and proceed under §1.

See [TMEP §1214.02](#) regarding the agreement of the mark on the drawing with the mark on the foreign registration in an application that seeks registration of a mark with a “phantom” or changeable element.

### **807.12(c) Applications Under §66(a) of the Trademark Act**

In an application under §66(a) of the Trademark Act, the drawing of the mark must be a substantially exact representation of the mark as it appears in the international registration. 37 C.F.R. §2.51(d). The IB will include a reproduction that is identical to the reproduction in the international registration when it forwards the request for extension of protection of the international registration to the United States. It is, therefore, unnecessary for the examining attorney to compare the drawing in the §66(a) application with the reproduction in the international registration. See [TMEP §§1904](#) *et seq.* for further information about §66(a) applications.

The mark in a §66(a) application cannot be amended. [TMEP §807.13\(b\)](#).

*Exception:* Non-material informational matter that appears on the international registration, such as net weight or contents, or the federal registration notice, may be omitted or deleted from the drawing.

Because the drawing requirements in other countries often differ from those in the United States, an ambiguity may arise when the international registration contains no color claim, but the reproduction of the mark in the international registration is in color. In such cases, the §66(a) applicant must either: (1) make a color claim to clarify that the depicted color(s) is a feature of the mark and submit a description of the location of the color(s); or (2) submit a black-and-white reproduction of the mark. See 37 C.F.R. §§2.52(b) and 2.52(b)(1). This is not considered to be an amendment to the mark, but rather a clarification of the ambiguity.

If the USPTO receives a notification of correction to a mark in the International Register from the IB, the examining attorney must conduct a new search of the mark as corrected and, if appropriate, issue a provisional refusal of the request for extension of protection as corrected on all applicable grounds. The USPTO must notify the IB of the provisional refusal within 18 months of notification of the correction. See [TMEP](#)

[§1904.03\(f\)](#) regarding notifications of corrections to the International Register. If the reproduction of the corrected mark features color, the applicant will be required to comply with the requirements for a color drawing ( *see* [TMEP §§807.07\(a\)](#) *et seq.*). 37 C.F.R. §2.52(b)(1).

### **807.12(d) Mutilation or Incomplete Representation of Mark**

In an application under §1 of the Trademark Act, the mark on the drawing must be a complete mark, as evidenced by the specimen. When the representation on a drawing does not constitute a complete mark, it is sometimes referred to as a “mutilation” of the mark. This term indicates that essential and integral subject matter is missing from the drawing. An incomplete mark may not be registered. *See In re Chemical Dynamics Inc.*, 839 F.2d 1569, 5 USPQ2d 1828 (Fed. Cir. 1988); *In re Miller Sports Inc.*, 51 USPQ2d 1059 (TTAB 1999); *In re Boyd Coffee Co.*, 25 USPQ2d 2052 (TTAB 1993); *In re Semans*, 193 USPQ 727 (TTAB 1976).

However, in a §1 application, an applicant has some latitude in selecting the mark it wants to register. The mere fact that two or more elements form a composite mark does not necessarily mean that those elements are inseparable for registration purposes. An applicant may apply to register any element of a composite mark if that element presents, or will present, a separate and distinct commercial impression apart from any other matter with which the mark is or will be used on the specimen.

In a §44 application, the standard is stricter. [TMEP §1011.01](#). The drawing in the United States application must display the entire mark as registered in the country of origin. The applicant may not register part of the mark in the foreign registration, even if it creates a distinct commercial impression.

In any application, if registration is refused on the ground that the mark on the drawing does not agree with the mark as shown on the specimen or foreign registration, the applicant may not amend the drawing if the amendment would materially alter the mark on the original drawing. 37 C.F.R. §2.72; [TMEP §§807.14](#) *et seq.* and [1011.01](#).

This issue will not arise in a §66(a) application, because the IB includes a reproduction that is identical to the reproduction in the international registration when it forwards the request for extension of protection of the international registration to the United States. The mark in a §66(a) application cannot be amended. [TMEP §807.13\(b\)](#).

In the following cases, an element of a composite mark was found **not** to present a separate and distinct commercial impression apart from any other matter with which the mark was or would be used on the specimen: *See Chemical Dynamics*, 839 F.2d at 1569, 5 USPQ2d at 1828 (registration of design of medicine dropper and droplet properly refused, where the proposed mark is actually used as an integral part of a unified mark that includes a design of a watering can, and does not create a separate commercial impression); *In re Lorillard Licensing Co.*, 99 USPQ2d 1312 (TTAB 2011) (finding that the drawing was not a substantially exact representation of the proposed mark, an orange-and-green color combination for the packaging of cigarettes, as appearing on the specimen); *In re Pharmavite LLC*, 91 USPQ2d 1778 (TTAB 2009) (Board affirmed refusal to register a mark comprised of the design of two bottles, finding that it does not create a separate and distinct commercial impression apart from the mark shown on the specimen and further that it is not a substantially exact representation of the mark shown on the specimen); *In re Yale Sportswear Corp.*, 88 USPQ2d 1121 (TTAB 2008) (Board affirmed refusal to register “UPPER 90,” finding that it does not form a separate and distinct commercial impression apart from the degree symbol that appears on the specimen); *Miller Sports*, 51 USPQ2d at 1059 (proposed mark comprising the letter “M” and skater design properly refused, where the “M” portion of applicant’s “Miller” logo is so merged in presentation with remainder of logo that it does not create a separate commercial impression); *Boyd Coffee*, 25 USPQ2d

2052 (proposed mark comprising cup and saucer design properly refused as mutilation of mark actually used, which includes the cup and saucer design as well as a sunburst design, since the cup and saucer design does not create a separate and distinct commercial impression apart from the sunburst design); *In re Sperouleas*, 227 USPQ 166 (TTAB 1985) (design unregistrable apart from wording that appears on specimen, where the words are not only prominent but are also physically merged with the design, such that the design does not make a separate commercial impression); *In re Volante Int'l Holdings*, 196 USPQ 188 (TTAB 1977) (mark consisting of a design of a double-headed girl, a dragon, and a tree is not a substantially exact representation of the mark actually used, which incorporates the visually inseparable and intertwined term "VIRGIN"); *In re Library Restaurant, Inc.*, 194 USPQ 446 (TTAB 1977) (the words "THE LIBRARY" are so intimately related in appearance to other elements of the mark actually used that it is not possible to conclude that the pictorial features by themselves create a separate commercial impression); *Semans*, 193 USPQ at 727 (the term "KRAZY," displayed on the specimen on the same line and in the same script as the expression "MIXED-UP," does not in itself function as a registrable trademark apart from the unitary phrase "KRAZY MIXED-UP"); *In re Mango Records*, 189 USPQ 126 (TTAB 1975) (the typed mark "MANGO" is so uniquely juxtaposed with the pictorial elements of the composite that it is not a substantially exact representation of the mark as used on the specimen and does not show the mark in the unique manner used thereon).

An element of a proposed mark was found to create a separate commercial impression in the following cases: *In re Servel, Inc.*, 181 F.2d 192, 85 USPQ 257 (C.C.P.A. 1950) (refusal to register the term "SERVEL" as a mutilation of the mark "SERVEL INKLINGS" reversed, where the specimen displays an insignia between the words "SERVEL" and "INKLINGS," and "INKLINGS" is printed in a large and different kind of type); *In re Royal BodyCare Inc.*, 83 USPQ2d 1564 (TTAB 2007) (Board reversed refusal to register the term "NANOCEUTICAL," finding that the term is actually used in a manner that creates a commercial impression separate and apart from the house mark or trade name "RBC's"); *In re Big Pig, Inc.*, 81 USPQ2d 1436 (TTAB 2006) ("PSYCHO" creates a separate commercial impression apart from additional wording and background design that appears on the specimen, where the word "PSYCHO" is displayed in a different color, type style and size, such that it stands out); *In re 1175856 Ontario Ltd.*, 81 USPQ2d 1446 (TTAB 2006) (refusal to register "WSI" and globe design reversed, since the letters "WSI" and globe design create a separate commercial impression apart from a curved design element that appears on the specimen); *In re Raychem Corp.*, 12 USPQ2d 1399, 1400 (TTAB 1989) (Board reversed refusal to register "TINEL-LOCK" as mutilation of mark "TRO6AI-TINEL-LOCK-RING," noting that part or stock number does not usually function as a source identifier, and that the "fact that hyphens connect both the part number and the generic term to the mark does not, under the circumstances presented in this case, create a unitary expression such that 'TINEL-LOCK' has no significance by itself as a trademark."); *In re National Institute for Automotive Service Excellence*, 218 USPQ 745 (TTAB 1983) (design of meshed gears "is distinctive in nature" and "creates a commercial impression separate and apart from the words superimposed thereon"); *In re Schecter Bros. Modular Corp.*, 182 USPQ 694 (TTAB 1974) (where specimens show mark consisting in part of RAINAIRE together with its shadow image, it is not a mutilation of mark to delete shadow image from drawing since RAINAIRE creates the essential impression); *In re Emco, Inc.*, 158 USPQ 622 (TTAB 1968) (Board concluded that the law and the record supported applicant's position that RESPONSER is registrable without addition of the surname MEYER).

See [TMPEP §807.14\(c\)](#) regarding the effect of the addition or deletion of punctuation on the commercial impression of the mark.

### 807.12(e) Compound Word Marks and Telescoped Marks

Like any other drawing, a drawing of a compound word mark or telescoped mark must be a substantially exact representation of the mark as it appears on the specimen in a §1 application or on the foreign registration in a §44 application.

A compound word mark is comprised of two or more distinct words, or words and syllables, that are represented as one word (e.g., BOOKCHOICE, PROSHOT, MAXIMACHINE, PULSAIR). Often, each word or syllable in a compound word mark is displayed or highlighted by: (1) capitalizing the first letter of each word or syllable (e.g., TimeMaster); or (2) presenting the words or syllables in a different color, script, or size (e.g., RIBtype).

If the drawing depicts the mark as a compound word mark, but the specimen shows the mark as two separate words, or vice versa, the examining attorney must determine whether the specimen is a substantially exact representation of the mark on the drawing and/or whether an amendment to the drawing would be a material alteration of the mark. See *In re Innovative Companies, LLC*, 88 USPQ2d 1095 (TTAB 2008) (FREEDOMSTONE not a substantially exact representation of FREEDOM STONE, but amendment of FREEDOMSTONE to FREEDOM STONE not deemed a material alteration). For example, if the drawing depicts the mark as BOOKCHOICE, but the specimen shows it as BOOK CHOICE, the mark on the specimen is not a substantially exact representation of the mark on the drawing. An amendment to the drawing would not be a material alteration. However, depending upon the nature of the goods/services, a disclaimer might be required. Note that a specimen showing the mark as BookChoice would be a substantially exact representation.

A telescoped mark is comprised of two or more words that share letters (e.g., SUPERINSE). A telescoped word must be presented as a unitary term with the letters shared. The telescoped element may not be represented as two words, because the shared letter is an aspect of the commercial impression, (e.g., SUPERINSE, not SUPE RINSE or SUPER RINSE).

See [TMPEP §§1213.05\(a\)](#) *et seq.* regarding disclaimers in telescoped and compound word marks.

### 807.13 Amendment of Mark

*37 CFR §2.72 Amendments to description or drawing of the mark.*

(a) In an application based on use in commerce under section 1(a) of the Act, the applicant may amend the description or drawing of the mark only if:

(1) The specimens originally filed, or substitute specimens filed under §2.59(a), support the proposed amendment; and

(2) The proposed amendment does not materially alter the mark. The Office will determine whether a proposed amendment materially alters a mark by comparing the proposed amendment with the description or drawing of the mark filed with the original application.

(b) In an application based on a bona fide intention to use a mark in commerce under section 1(b) of the Act, the applicant may amend the description or drawing of the mark only if:

(1) The specimens filed with an amendment to allege use or statement of use, or substitute specimens filed under §2.59(b), support the proposed amendment; and

(2) The proposed amendment does not materially alter the mark. The Office will determine whether a proposed amendment materially alters a mark by comparing the proposed amendment with the description or drawing of the mark filed with the original application.

(c) In an application based on a claim of priority under section 44(d) of the Act, or on a mark duly registered in the country of origin of the foreign applicant under section 44(e) of the Act, the applicant may amend the description or drawing of the mark only if:

(1) The description or drawing of the mark in the foreign registration certificate supports the amendment; and

(2) The proposed amendment does not materially alter the mark. The Office will determine whether a proposed amendment materially alters a mark by comparing the proposed amendment with the description or drawing of the mark filed with the original application.

### **807.13(a) Amendment of Mark in Applications Under §§1 and 44**

*Section 1(a) Application.* The mark in an application under §1(a) of the Trademark Act can be amended if the specimen supports the amendment and the amendment does not materially alter the mark. 37 C.F.R. §2.72(a). See [TMEP §§904](#) *et seq.* regarding specimens, and [TMEP §§807.14](#) *et seq.* regarding material alteration.

*Section 1(b) Application.* The mark in an application under §1(b) of the Trademark Act can be amended if the specimen filed with an amendment to allege use or statement of use supports the amendment, and the amendment does not materially alter the mark. 37 C.F.R. §2.72(b). See [TMEP §§904](#) *et seq.* regarding specimens, [TMEP §§1104](#) *et seq.* regarding amendments to allege use, [TMEP §§1109](#) *et seq.* regarding statements of use, and [TMEP §§807.14](#) *et seq.* regarding material alteration.

*Section 44 Application.* The mark in an application under §44 of the Trademark Act can be amended if the mark in the foreign registration certificate supports the amendment, and the amendment does not materially alter the mark. 37 C.F.R. §2.72(c). See [TMEP §1011.01](#) regarding the requirement that the mark on the drawing in a §44 application be a substantially exact representation of the mark as it appears in the foreign registration certificate, and [TMEP §§807.14](#) *et seq.* regarding material alteration.

### **807.13(b) Mark in §66(a) Application Cannot be Amended**

The Madrid Protocol and the Common Regs. do not permit amendment of the mark in an international registration. If the holder of the international registration wants to change the mark in any way, even slightly, the holder must file a new international application. The IB's *Guide to International Registration*, Para. B.II.72.02, provides as follows:

[T]here is no provision for a mark that is recorded in the International Register to be amended in any way, either on renewal or at any other time. If the holder wishes to protect the mark in a form which differs, even slightly, from the mark as recorded, he must file a new international application. This is true even if the mark has been allowed to be changed in the basic application, the registration resulting from the basic application or the basic registration, as the case may be....

Accordingly, because an application under §66(a) of the Trademark Act is a part of the international registration, 37 C.F.R. §2.72 makes no provision for amendment of the mark in a §66(a) application, and the USPTO will not permit any such amendments. See notice at 68 FR 55748, 55756 (Sept. 26, 2003). See [TMEP §1904.02\(j\)](#).

*Exception:* Non-material informational matter that appears on the international registration, such as net weight or contents, or the federal registration notice, may be omitted or deleted from the drawing.

However, the applicant must comply with United States requirements regarding drawings and descriptions of the mark. See [TMEP §1904.02\(k\)](#).

Similarly, after registration, a registrant generally cannot amend under §7 of the Trademark Act a mark in a registered extension of protection under §7 of the Trademark Act, except to add a standard character claim if the registered mark complies with the requirements of 37 C.F.R. §§2.52(a)(1)-(5). [TMEP §§1609.01\(a\)](#) and [1609.02](#).

See [TMEP §§1904.03\(f\)](#) and [1904.14](#) regarding notifications of corrections in the International Register with respect to pending §66(a) applications and registered extensions of protection.

### **807.14 Material Alteration of Mark**

Trademark Rule 2.72, 37 C.F.R. §2.72, prohibits any amendment of the mark in an application under §1 or §44 of the Trademark Act that materially alters the mark on the drawing filed with the original application.

The test for determining whether an amendment is a material alteration is as follows:

The modified mark must contain what is the essence of the original mark, and the new form must create the impression of being essentially the same mark. The general test of whether an alteration is material is whether the mark would have to be republished after the alteration in order to fairly present the mark for purposes of opposition. If one mark is sufficiently different from another mark as to require republication, it would be tantamount to a new mark appropriate for a new application.

*In re Hacot-Colombier*, 105 F.3d 616, 620, 41 USPQ2d 1523, 1526 (Fed. Cir. 1997), quoting *Visa Int'l Service Ass'n v. Life-Code Systems, Inc.*, 220 USPQ 740,743-44 (TTAB 1983). This test applies to both an amendment of the description of a mark and an amendment of the mark on a drawing. *In re Thrifty, Inc.*, 274 F.3d 1349, 61 USPQ2d 1121 (Fed. Cir. 2001).

Although the test refers to republication, it also applies to amendments to marks proposed before publication. Material alteration is the standard used for evaluating amendments to marks in all phases of prosecution, i.e., before publication, after publication, and after registration. See [TMEP §§1609.02](#) *et seq.* regarding amendment of registered marks.

As a general rule, the addition of any element that would require a further search will constitute a material alteration. *In re Pierce Foods Corp.*, 230 USPQ 307 (TTAB 1986). However, while the question of whether a new search would be required is a factor to be considered in deciding whether an amendment would materially alter a mark, it is not necessarily the determining factor. *In re Who? Vision Systems, Inc.*, 57 USPQ2d 1211 (TTAB 2000); *In re Vienna Sausage Mfg. Co.*, 16 USPQ2d 2044 (TTAB 1990).

Each case must be decided on its own facts, and these general rules are subject to exceptions. The controlling question is always whether the old and new forms of the mark create essentially the same commercial impression.

See [TMEP §807.14\(a\)](#) regarding amendments to delete matter from a drawing, [TMEP §807.14\(b\)](#) regarding the addition or deletion of previously registered matter, [TMEP §807.14\(c\)](#) regarding the addition or deletion of punctuation, [TMEP §§1202.02-1202.02\(e\)](#) regarding registration of trade dress marks and [1202.02\(c\)\(i\)](#) regarding drawings in trade dress applications, and [TMEP §§1215.08](#) *et seq.* regarding material alteration in marks comprised, in whole or in part, of domain names.

#### **807.14(a) Removal or Deletion of Matter from Drawing**

An applicant may request deletions from the mark on the drawing, and the examining attorney may approve the request if he or she believes the deletions are appropriate and would not materially alter the mark. 37 C.F.R. §2.72.

Deletion of matter from the mark can result in a material alteration. See *In re Dillard Department Stores, Inc.*, 33 USPQ2d 1052 (Comm'r Pats. 1993) (proposed deletion of highly stylized display features of mark "IN•VEST•MENTS" held to be a material alteration of a registered mark). However, nondistinctive matter may be deleted, if it does not constitute a material alteration. For example, the deletion of the generic name of the goods or services would not generally be considered a material alteration, unless it was so integrated into the mark that the deletion would alter the commercial impression. In some circumstances, nondistinctive matter may be deleted if the overall commercial impression is not altered. Also, deletions of matter determined to be unregistrable under §§2(a) or 2(b) of the Act, 15 U.S.C. §1052(a) or (b) ( see [TMEP §§1203 and 1204](#)), are sometimes permissible.

If a specimen shows that matter included on a drawing is not part of the mark, the examining attorney may require that such matter be deleted from the mark on the drawing, if the deletion would not materially alter the mark. See *In re Sazerac Co., Inc.*, 136 USPQ 607 (TTAB 1963) and cases cited therein.

The symbols "TM," "SM," and the registration notice ® must be deleted from the drawing.

Informational matter, such as net weight and volume statements, lists of contents, addresses, and similar matter, should also be deleted from the mark, unless it is truly part of a composite mark and the removal of this matter would alter the overall commercial impression. If unregistrable matter, including informational matter and the name of the goods, is incorporated in a composite mark in such a way that its removal would change the commercial impression of the mark or make it unlikely to be recognized, the matter may remain on the drawing and be disclaimed. See [TMEP §1213.03\(b\)](#) regarding disclaimer of such matter. However, this type of matter rarely is part of a composite mark.

Functional matter that is part of an otherwise registrable trade dress mark may also be removed or deleted from the drawing by depicting that matter in broken or dotted lines. Since functionality is an absolute bar to registration on the Principal Register or the Supplemental Register, features of a trade dress mark that are deemed functional under trademark law are never capable of acquiring trademark significance and are not registrable. Therefore, such removal or deletion of the functional features generally will not be considered a material alteration of the mark, regardless of the filing basis of the application. See [TMEP §§1202.02\(a\)–\(a\)\(viii\)](#) regarding functionality and [1202.02\(c\)\(i\)](#) regarding drawings in trade dress applications.

See [TMEP §807.14\(b\)](#) regarding deletion of previously registered matter.

### **807.14(b) Addition or Deletion of Previously Registered Matter**

*Addition.* An amendment adding an element that the applicant has previously registered for the same goods or services may be permitted. The rationale is that "[t]he addition of applicant's well-known registered mark to the mark sought to be registered ... is not a material change which would require republication of the mark." *Florasynth Laboratories Inc. v. Mühlens*, 122 USPQ 284 (Comm'r Pats. 1959) (addition of applicant's previously registered mark "4711" to the mark "ELAN" held not a material alteration). However, the addition of matter that the applicant has previously registered for *different* goods or services is not permissible. *In re Hacot-Colombier*, 105 F.3d 616, 620, 41 USPQ2d 1523, 1526 (Fed. Cir. 1997); *In re Nationwide Industries Inc.*, 6 USPQ2d 1882, 1886 (TTAB 1988). An amendment adding previously registered matter is also unacceptable if it substantially alters the original mark. *In re John LaBatt Ltd.*, 26 USPQ2d 1077, 1078 (Comm'r Pats. 1992) ("Here, the applicant does not seek to merely add an element from one registration to another. Rather, the applicant seeks to eliminate its original mark, and substitute another. The exception to the material alteration rule clearly does not encompass cases where the original mark disappears.").

*Deletion.* The question of whether a proposed amendment to *delete* previously registered matter from a mark is a material alteration should be determined without regard to whether the matter to be deleted is the subject of an existing registration.

### **807.14(c) Addition or Deletion of Punctuation**

Punctuation, such as quotation marks, hyphens, periods, commas, and exclamation marks generally does not significantly alter the commercial impression of the mark. See, e.g., *In re Litehouse, Inc.*, 82 USPQ2d 1471 (TTAB 2007) and cases cited therein. See also *In re Promo Ink*, 78 USPQ2d 1301, 1305 (TTAB 2006) (the Board found the mark PARTY AT A DISCOUNT! to be merely descriptive, specifically noting that "[t]his punctuation mark does not significantly change the commercial impression of the mark. It would simply emphasize the descriptive nature of the mark to prospective purchasers...").

However, punctuation may be incorporated into a mark in such a way that the commercial impression of the mark would be changed by the addition or deletion of such punctuation. See *In re Guitar Straps Online, LLC*, 103 USPQ2d 1745, 1748 (TTAB 2012) (finding “the proposed addition of a question mark to the mark ‘GOT STRAPS’ constitutes a material alteration because it changes the commercial impression of the original mark from a declaratory statement to an interrogative phrase”); *Richards-Wilcox Mfg. Co.*, 181 USPQ 735 (Comm’r Pats. 1974), *overruled on other grounds*, *In re Umax Data System, Inc.*, 40 USPQ2d 1539 (Comm’r Pats. 1996) (proposed change of FYE[R-W]ALL and design to FYER-WALL in block letters denied as material alteration, in part, because brackets changed commercial impression of mark as the initial letters of applicant’s name, “R” and “W,” were no longer emphasized). For example, unlike most cases where the addition of an exclamation point does not affect the commercial impression of a mark, the addition of an exclamation point to the mark MOVE IT transforms the words from a mere command to relocate an object to an exclamatory statement – MOVE IT! – often used to order a person out of the way, and, therefore, changes the commercial impression of the mark.

Some other examples, though not exhaustive, are:

- the addition or deletion of a question mark, which changes a statement into a question or vice versa ( See *In re Guitar Straps Online*, 103 USPQ2d at 1748);
- the addition or deletion of spaces between the syllables of a term, which may change the commercial impression created by the separate syllables or the unitary word; and
- the addition or deletion of a period before the term “.com,” which can change wording to or from a website address.

See also [TMEP §§807.12\(a\)\(i\)–\(iii\)](#) regarding the role of punctuation in determining whether the mark on the drawing agrees with the mark on the specimen(s).

### **807.14(d) Amendments to Correct “Internal Inconsistencies”**

The USPTO will determine whether a proposed amendment materially alters a mark by comparing the proposed amendment with the description or drawing of the mark filed with the original application. 37 C.F.R. §§2.72(a)(2), 2.72(b)(2), and 2.72(c)(2).

Prior to October 30, 1999, in certain limited circumstances, the USPTO would accept an amendment that corrected an “internal inconsistency” in an application as originally filed, without regard to the issue of material alteration. Because 37 C.F.R. §§2.72(b), (c), and (d) did not expressly prohibit an amendment that materially altered the mark on the original drawing, the USPTO would accept an amendment to correct an

“internal inconsistency,” even if the amendment materially altered the mark on the original drawing. An application was considered “internally inconsistent” if the mark on the original drawing did not agree with the mark on the specimen in an application based on use, or with the mark on the foreign registration in an application based on §44 of the Act. See *In re ECCS Inc.*, 94 F.3d 1578, 39 USPQ2d 2001 (Fed. Cir. 1996); *In re Dekra e.V.*, 44 USPQ2d 1693 (TTAB 1997).

Effective October 30, 1999, 37 C.F.R. §2.72 was amended to prohibit amendments that materially alter the mark on the drawing filed with the original application. Furthermore, 37 C.F.R. §2.52 was amended to state that the “drawing depicts the mark sought to be registered.” Accordingly, the USPTO no longer accepts amendments to cure “internal inconsistencies,” if these amendments materially alter the mark on the original drawing. *In re Who? Vision Systems, Inc.*, 57 USPQ2d 1211 (TTAB 2000). See also *In re Tetrafluor Inc.*, 17 USPQ2d 1160 (Comm'r Pats. 1990) (examining attorney properly refused to accept amendment to “correct a typographical error” that materially altered mark on original drawing page).

If a paper application includes a separate drawing page showing a mark, and a different mark appears in the written application, the drawing controls for purposes of determining what the mark is. See [TMEP §§202.01](#) and [807.01](#). *In re L.G. Lavorazioni Grafite S.r.l.*, 61 USPQ2d 1063 (Dir USPTO 2001). Similarly, if an applicant enters a standard character mark, or attaches a digitized image of a mark, in the “Mark” field on a TEAS application, and a different mark appears in another field, the mark entered in the “Mark” field will control for purposes of determining what the mark is. The applicant may not amend the mark if the amendment is a material alteration of the mark on the drawing.

For example, if the applicant submits a drawing page showing the word mark “ABC and design,” the applicant may not amend the application to delete the wording “and design,” and add a design feature to the letters “ABC.” However, the applicant may amend the drawing to “ABC.” *In re Meditech Int’l Corp.*, 25 USPQ2d 1159 (TTAB 1990) (mark comprised of a design of blue star found to be a material alteration of the typed words “DESIGN OF BLUE STAR”).

### **807.14(e) Amendments to Color Features of Marks**

If a proposed amendment to a color feature of a mark does not change the commercial impression of the mark, the amendment is unlikely to have an adverse impact on public notice. In such cases, the mark need not be republished, and the proposed amendment would not be deemed a material alteration.

Whenever a proposed color amendment is refused as a material alteration, the examining attorney must clearly explain why the proposed amendment changes the meaning or overall impression of the mark, or impacts the likelihood of confusion analysis.

#### **807.14(e)(i) Black-and-White Drawings**

The amendment of a black-and-white special form drawing to one claiming a color(s) as a feature of the mark generally does not constitute a material alteration.

If a mark is initially depicted in a black-and-white special form drawing in which no color is claimed, the drawing is presumed to contemplate the use of the mark in any color, without limitation. See, e.g., *In re Data Packaging Corp.*, 453 F.2d 1300, 1302, 172 USPQ 396, 397 (C.C.P.A. 1972). The amendment of the

black-and-white drawing to one claiming a particular color as a feature of the mark is, therefore, a restriction or limitation of the applicant's rights.

### **807.14(e)(ii) Marks that Include Color and Other Elements**

The extent to which color contributes to the commercial impression created by a mark is often determined by the type of mark in question (i.e., word mark, design mark, or trade dress). In some cases, color may play only an incidental or insignificant part in creating the commercial impression of a mark, such as the color lettering of a word mark. In other cases, color is the only feature of the mark that creates a commercial impression, such as where the mark consists only of color(s) applied to goods or their packaging, or to articles used in the sale or advertising services.

#### *Word Marks*

In general, the addition, deletion, or amendment of color lettering in a word mark does not result in a material alteration of the mark.

Word marks may appear as stylized marks in color lettering. With the possible exception of generic wording, as discussed below, the literal portions of word marks are likely to be the dominant portions that create the greatest commercial impression. *Inter-State Oil Co., Inc. v. Questor Corp.*, 209 USPQ 583, 586 (TTAB 1980). In most cases, the color in the lettering is unlikely to have a significant impact on the commercial impression created by the mark.

*Exception – Generic Terms.* Generic terms are incapable of functioning as marks denoting source, and are not registrable on the Principal Register under §2(f) or on the Supplemental Register. However, if the generic wording appears in color lettering, the color portion may be capable of functioning as a source indicator. See, e.g., *Courtenay Communications Corp., v. Hall*, 334 F.3d 210, 216, 67 USPQ2d 1210, 1214 (2nd Cir. 2003) and cases cited therein (“There are many examples of legally protected marks that combine generic wording with distinctive lettering, coloring, or other design elements.”). With respect to such generic word marks, the color element of the wording is likely to be the more dominant portion in creating the commercial impression of the mark. Therefore, in cases where the entire literal portion is generic, a proposed amendment to the color portion of the word mark generally would be a material alteration.

#### *Design Marks*

In general, the addition, deletion, or amendment of color features in a design mark does not result in a material alteration of the mark.

In a color design mark, the design portion is likely to be the most dominant portion of the mark in creating a commercial impression. Although the color portion is part of the mark, it only appears in the context of the design and is not a separable element. The color portion is, therefore, less likely than the design portion to play a significant role in likelihood of confusion or trademark selection considerations. For example, the fact that two different designs, such as a red hat design and a red boat design, may appear in identical colors is unlikely to result in a finding of likelihood of confusion. In contrast, if two boat designs are identical in stylization, it is likely that the designs would be held to be confusingly similar regardless of any differences in their respective colors.

*Exception - Color Impacts the Meaning or Significance of the Mark.* An amendment that causes the mark to have a new meaning or significance in the context of the goods or services is likely to be a material

alteration. For example, the amendment of a blue colored drop for “spring water,” which looks like a rain drop, to a red drop, which looks like blood, would probably be a material alteration because the change in the color of the drop has altered the meaning or commercial impression of the mark. An amendment of a rainbow design, consisting of an arc with a spectrum of colors, to a black or solid-colored arc, would be a material alteration, regardless of the goods or services, because the amended mark is just an arc and is no longer identifiable as a rainbow.

*Exception – Color is the Dominant Portion of the Mark.* Generally, if the color portion to be amended constitutes the dominant or most significant part of the entire mark, it becomes more likely that the proposed color amendment is a material alteration. For example, if the design mark consists solely of a common geometric shape, the color element is likely to be the dominant element of the mark. As a result, amending the color of a common geometric shape is likely to be a material alteration.

Another factor to consider in assessing the dominance of the color element of the mark is the size or prominence of the color design or graphic element to be amended in proportion to the rest of the mark. For example, if it is clear that the mark consists of the overall color scheme of a product’s trade dress, such as the product package or container, an amendment to a particular color element that is small or insignificant in proportion to the entire mark is unlikely to be a material alteration. Conversely, an amendment to a color element that is large in proportion to the entire mark, or is a dominant element of the overall color scheme, is more likely to be a material alteration. For example, if a mark consists solely of the color scheme or pattern of a package or container that is equally divided into two colors, amending one or both colors is more likely to be a material alteration.

### **807.14(e)(iii) Color Marks**

The amendment of any color in a color mark is a prohibited material alteration.

Color marks are marks that consist solely of one or more colors used on particular objects or substances as a source identifier (as opposed to marks that include color in addition to other elements). See [TMEP §§1202.05 et seq.](#) Color marks generally appear in a drawing with the outline or configuration of the goods on which they appear to show the placement of the color mark. However, the shape or configuration of the goods is not part of the mark. The mark is comprised solely of the color as applied to the object or substance, in the manner depicted and described, so that changing or amending the color of the mark would always change the entire commercial impression created by the mark.

An amendment of the mark to show the same color on a different object is also generally a material alteration (e.g., an amendment of a drawing of a blue hammer to a blue saw). A color takes on the characteristics of the object to which it is applied, and the commercial impression of a color may change depending on the object to which it is applied. See *In re Thrifty, Inc.*, 274 F.3d 1349, 1353, 61 USPQ2d 1121, 1124 (Fed. Cir. 2001) (“[A] word mark retains its same appearance when used on different objects, but color is not immediately distinguishable as a service mark when used in similar circumstances”); *In re Hayes*, 62 USPQ2d 1443 (TTAB 2002); [TMEP §1202.05\(c\)](#).

See [TMPEP §807.07\(e\)](#) regarding black-and-white drawings in an application that includes a color claim, and [TMPEP §807.07\(c\)](#) regarding incorrect color claims.

### 807.14(f) Material Alteration: Case References

Proposed amendments to marks were held to be material alterations in the following decisions: *In re Thrifty, Inc.*, 274 F.3d 1349, 61 USPQ2d 1121 (Fed. Cir. 2001) (amendment describing a mark as the color blue applied to an unlimited variety of objects found to be a material alteration of the mark on the original drawing, which depicted the color blue applied to a building); *In re Hacot-Colombier*, 105 F.3d 616, 41 USPQ2d 1523 (Fed. Cir. 1997) (proposed addition of house mark to conform to mark on foreign registration found to be material alteration of mark on drawing filed with original application); *In re Guitar Straps Online, LLC*, 103 USPQ2d 1745 (TTAB 2012) (proposed amendment from “GOT STRAPS” to “GOT STRAPS?” found to be a material alteration); *In re Who? Vision Systems, Inc.*, 57 USPQ2d 1211 (TTAB 2000) (proposed amendment from “TACILESENSE” to “TACTILESENSE” found to be material alteration); *In re Meditech Int’l Corp.*, 25 USPQ2d 1159, 1160 (TTAB 1990) (“[a] drawing consisting of a single blue star, as well as a drawing consisting of a number of blue stars, would both be considered material alterations vis-à-vis a drawing consisting of the typed words ‘DESIGN OF A BLUE STAR’”); *In re Vienna Sausage Mfg. Co.*, 16 USPQ2d 2044 (TTAB 1990) (addition of wording “MR. SEYMOUR” to design mark held to be a material alteration); *In re The Wine Society of America Inc.*, 12 USPQ2d 1139 (TTAB 1989) (proposed amendment to replace typed drawing of “THE WINE SOCIETY OF AMERICA” with a special form drawing including those words with a crown design and a banner design bearing the words “IN VINO VERITAS” held to be a material alteration); *In re Nationwide Industries, Inc.*, 6 USPQ2d 1882 (TTAB 1988) (addition of house mark “SNAP” to product mark “RUST BUSTER” held a material alteration); *In re Pierce Foods Corp.*, 230 USPQ 307 (TTAB 1986) (addition of house mark “PIERCE” to “CHIK’N-BAKE” held a material alteration).

Proposed amendments to marks were found *not* to constitute a material alteration in the following cases: *In re Innovative Companies, LLC*, 88 USPQ2d 1095 (TTAB 2008) (amendment from “FREEDOMSTONE” to “FREEDOM STONE” held not a material alteration); *Paris Glove of Canada, Ltd. v. SBC/Sportco Corp.*, 84 USPQ2d 1856, 1862 (TTAB 2007) (“AQUASTOP” depicted on one line in semicircular form not material alteration of “AQUA STOP” depicted on two lines in rectangular form; the Board found that “the commercial impression of the mark is dependent upon the literal terms AQUA STOP and not on the rectangular, semicircular or linear forms of display”); *In re Finlay Fine Jewelry Corp.*, 41 USPQ2d 1152 (TTAB 1996) (“NEW YORK JEWELRY OUTLET” not material alteration of “NY JEWELRY OUTLET”); *In re Larios S.A.*, 35 USPQ2d 1214 (TTAB 1995) (“VINO DE MALAGA LARIOS” and design not material alteration of “GRAN VINO MALAGA LARIOS” with similar design); *Visa Int’l Service Ass’n v. Life-Code Systems, Inc.*, 220 USPQ 740 (TTAB 1983) (amendment inverting the design portion of the mark held not a material alteration).

### 807.15 Substitute Drawings

When requiring a substitute drawing, the examining attorney must inform the applicant of the specific reason for rejecting the existing drawing and explain what type of amendment is needed to comply with the rules.

If the examining attorney requires a change in the drawing, the applicant must submit a substitute drawing, except in the limited circumstances discussed in [TMPEP §807.16](#) in which the USPTO will amend or correct a drawing. The USPTO will not return the original drawing to the applicant. 37 C.F.R. §2.25.

If the examining attorney requires correction of a standard character drawing, the applicant may select “Standard Characters” in the Mark Information section of the TEAS Response to Office Action form and enter the proposed amended mark. If the required change is to a special-form drawing, the applicant may select “Special Form” in the Mark Information section of the TEAS Response to Office Action form and attach a digitized image of the substitute drawing to the form or submit a separate drawing page if the response is filed on paper. The USPTO will accept a substitute drawing embedded in a paper response to an Office action if the substitute drawing meets the requirements of 37 C.F.R. §§2.51 and 2.52.

When the applicant voluntarily submits a substitute drawing, the examining attorney must determine whether the substitute drawing is acceptable. See [TMEP §807.17](#) regarding the procedures for processing unacceptable amendments to drawings.

When a substitute drawing is submitted and accepted, the original drawing is replaced by the substitute drawing. The examining attorney must ensure that the automated records of the USPTO reflect the amended mark, and have the Trademark database corrected, if necessary. The original drawing remains in the record.

The examining attorney must also ensure that the mark drawing code is changed, if necessary. See [TMEP §807.18](#) concerning mark drawing codes.

### **807.16 Amendment of Drawings by the USPTO**

If the examining attorney requires correction of a standard character drawing, the applicant may submit a substitute drawing ( see [TMEP §807.15](#)), or may request that the USPTO amend the drawing. If only a minor correction to a standard character drawing (such as deletion of the letters “TM”) is required, the examining attorney may correct the drawing on his or her own initiative, or may require the applicant to submit a substitute drawing.

When correcting a standard character drawing, the examining attorney must create a new drawing page, and have the new drawing page scanned. The examining attorney must also ensure that the “Word Mark” field in the Trademark database is corrected.

When the correction involves a special form drawing, the examining attorney will delete matter from the drawing only if the matter to be deleted is sufficiently separate from the matter that is to remain. If the matter to be deleted is not sufficiently separate from the matter that is to remain, the applicant must submit a substitute drawing. If the examining attorney deletes matter from the drawing, the examining attorney must ensure that the corrected drawing is scanned, and that it appears in the Trademark database, before the mark is approved for publication or registration.

The examining attorney must also ensure that the mark drawing code is changed, if necessary. See [TMEP §807.18](#) concerning mark drawing codes.

### **807.17 Procedures for Processing Unacceptable Amendments to Drawings**

If an applicant submits an amendment to the drawing and the examining attorney determines that the amendment is unacceptable, the examining attorney must issue an action refusing to accept the amendment and advising the applicant that the amendment will not be entered, and that the previous drawing remains the operative drawing. If the unacceptable amended drawing has been entered into the automated records of the USPTO, the examining attorney must ensure that the automated records are modified to reflect that the previous drawing is operative.

The applicant must respond to the Office action to avoid abandonment. If the applicant submits arguments in support of acceptance of the amendment and the examining attorney determines that the amendment is still unacceptable, the examining attorney must issue a final refusal of the amendment, if the application is otherwise in condition for final action.

### 807.18 Mark Drawing Code

*Standard Character Drawings.* Standard character drawings are coded in the USPTO's automated system as mark drawing code 4. Prior to November 2, 2003, typed drawings ( *see* [TMEP §807.03\(i\)](#)) were coded as mark drawing code 1. Mark drawing code 1 is not available for applications filed on or after November 2, 2003. Applications that were filed before November 2, 2003, may be amended to mark drawing code 1, if appropriate for that drawing. Only mark drawing code 4 should be used for standard character drawings.

*Special Form Drawings.* Marks comprising only a design are coded as mark drawing code 2; marks comprising words plus a design are coded as mark drawing code 3; and marks comprising stylized letters and/or numerals with no design feature are coded as mark drawing code 5. All marks consisting of words, numerals, and/or diacritical symbols for which no standard character claim ( *see* [TMEP §807.03\(a\)](#)) has been submitted are coded as mark drawing code 5.

*Non-Visual Marks.* "Drawings" of non-visual marks ( *see* [TMEP §807.09](#)) are coded as mark drawing code 6.

## 808 Description of Mark

37 CFR §2.37

A description of the mark must be included if the mark is not in standard characters. In an application where the mark is in standard characters, a description may be included and must be included if required by the trademark examining attorney.

37 CFR §2.52(b)(5) *Description of mark.*

A description of the mark must be included.

### 808.01 Guidelines for Requiring Description

For applications filed on or after May 13, 2008, a description of the mark is required for any mark not in standard characters.

Therefore, the examining attorney must require a description of the mark if:

- the applicant is claiming a particular font style, size, or color of words, letters, or numbers (37 C.F.R. §2.52(a));
- the mark contains a design element;
- the mark includes non-Latin characters;
- the mark includes non-Roman or non-Arabic numerals;
- the mark includes uncommon punctuation or diacritical marks;
- the mark is three-dimensional, or is a configuration of the goods or packaging ([TMEP §§807.10](#) and [1202.02\(c\)\(ii\)](#));
- the drawing includes broken lines to show placement or to indicate a portion of the product or packaging that is not part of the mark ([TMEP §§807.08](#) and [1202.02\(c\)\(ii\)](#));
- the mark includes color ([TMEP §§807.07\(a\)](#) and [1202.05\(e\)](#));

- the mark includes motion ([TMEP §807.11](#));
- the mark is a sound, scent, or non-visual mark ([TMEP §807.09](#));
- the mark appears in standard characters, but an element of the mark is unclear or ambiguous; or
- the mark consists of characters from the standard character set ([TMEP §807.03\(b\)](#)), but the characters are displayed in a manner that affects the meaning or significantly contributes to the overall commercial impression of the mark, such as using standard characters that create emoticons ([TMEP §807.03\(c\)](#)).

37 C.F.R. §§2.37 and 2.52.

### **808.01(a) Meaning of Term in Mark**

A statement that a term has no meaning in the relevant industry should *not* be entered as a description of the mark, nor should it be printed. If such a statement is entered as a description of the mark, the examining attorney must ensure that the statement is deleted from the “Description of the Mark” field in the Trademark database and enter an appropriate Note to the File in the record. The document containing the information deleted from the Trademark database will remain of record for informational purposes. See [TMEP §808.03](#) regarding printing of descriptions of the mark.

See [TMEP §§809](#) *et seq.* regarding translation and transliteration of non-English wording and non-Latin characters.

### **808.01(b) Lining and Stippling Statements for Drawings**

*Current Practice.* For applications filed on or after November 2, 2003, the USPTO does not accept black-and-white drawings lined for color. 37 C.F.R. §2.52(b)(1); [TMEP §807.07\(a\)](#). Thus, the examining attorney should not require the applicant to enter a statement that the lining or stippling represents shading or is a feature of the mark, unless the examining attorney believes such a statement is necessary to accurately describe the mark.

See [TMEP §§808.03](#) *et seq.* and [817](#) regarding printing of lining and stippling statements and other descriptions of the mark.

*Previous Practice.* Prior to October 30, 1999, an applicant who wanted to show color in a mark was required to use the USPTO’s color lining system. The color lining system required applicants to line their drawings using certain patterns designated for certain colors, and to provide a color lining statement describing where the colors appeared. The color lining system was deleted from the rule effective October 30, 1999; however, during a transitional period between October 30, 1999 and November 2, 2003, the USPTO continued to accept drawings that showed color by using this lining system. See notice at [64 Fed. Reg. 48900](#), 48903 (Sept. 8, 1999) and 1226 TMOG 103, 106 (Sept. 28, 1999). When an applicant submitted a drawing that included lining that was a feature of the mark and was not intended to indicate color, the applicant was required to submit a statement to that effect, so the record would be clear as to what applicant was claiming as the mark. Similarly, when an applicant submitted a drawing that included stippling for shading purposes, the applicant was required to submit a statement to that effect.

### **808.02 Description Must Be Accurate and Concise**

If a description of a mark is placed in the record, the description should state clearly and accurately what the mark comprises, and should not create a misleading impression by either positive statement or omission.

Statements regarding how a mark is used (e.g., that the mark is not used in a particular color) are not appropriate and, if submitted, must not be printed on the registration certificate. See [TMEP § 808.03\(g\)](#).

The description should describe all *significant* aspects of the mark, including both literal elements and design elements. Insignificant features need not be included in a description.

When a mark includes a large number of elements, they are not all necessarily *significant*. For example, background design elements can sometimes be considered insignificant if they do not change the overall commercial impression of the mark. In addition, it may be unnecessary to describe the placement of repetitive literal or design elements within a mark, as long as the description generally characterizes them and explains that the elements are repeated. Similarly, when a mark contains a substantial number of design elements, it may only be necessary to generally state in the description those elements that capture the essence of the mark. Please note that because of the requirement to describe where colors appear in the mark, marks that include color will generally have a more detailed description. 37 C.F.R. §2.52(b)(1). See [TMEP §§807.07\(a\)](#) *et seq.* regarding requirements for color drawings.

If a mark contains both wording and design features, the description should describe both aspects of the mark in order to be complete. The rare exception is for wording that is (1) not significant to the mark; and (2) would not be searched (e.g., purely informational matter such as product weight, lists of contents, and business addresses). The better – but not mandatory – practice with descriptions of non-standard character marks that include wording is to indicate that the wording is “in stylized font.”

Generally, if the applicant has not made a color claim, the description of the mark should not mention color, because a reference to color in the description of a non-colored mark creates a misleading impression. See [TMEP §§807.07](#) *et seq.* regarding color. However, in some cases, it may be appropriate to submit a black-and-white drawing and a description of the mark that refers to black, white, and/or gray if the applicant states that color is not claimed as a feature of the mark. See [TMEP §§807.07\(f\)](#) *et seq.* regarding applications that include mark descriptions that refer to black, white, or gray when there is no corresponding color claim.

If a trademark or a service mark that is registered to an entity other than the applicant is used in the description of the mark, the examining attorney must require that it be deleted and that generic wording be substituted. It is inappropriate to use a registered mark in a description because such a mark indicates origin in only one party and cannot be used to describe a mark used in connection with goods or services that originate in a party other than the registrant. *Cf. Camloc Fastener Corp. v. Grant*, 119 USPQ 264, 265, n.1 (TTAB 1958) (noting that if applicant prevailed in opposition proceeding, it would be required to delete registered mark from the identification of goods set forth in the application).

A description cannot be used to restrict the likely public perception of a mark. A mark’s meaning is based on the impression actually created by the mark in the minds of consumers, not on the impression that the applicant states the mark is intended to convey. However, an examining attorney may defer to the applicant’s phrasing of a description, so long as the description is accurate and complete. For example, if an element in a mark could reasonably be characterized in more than one way, the examining attorney should accept the applicant’s selection of one characterization over the other in the description.

The following are examples of descriptions containing an appropriate level of detail:

stretcher, green golf club bag with white balls and pink clubs; nurse with yellow hair and blue clothing holding a white syringe with pink fluid; and an orange man dressed in blue with a white and red thermometer.

Note: This level of detail is necessary because the description must incorporate the color location statement ( see [TMEP §807.07\(a\)\(ii\)](#)).

The mark consists of the stylized word “HOSPITAL” with the letter “S” in the form of a dollar sign and letter “L” in the form of a cast surrounded by a border containing a variety of images relating to a hospital including highly stylized images of doctors, nurses, patients, hospital equipment, an ambulance and building design containing the wording “EMERGENCY HOSPITAL”.

Note: Since the mark is not in color, it is not necessary to describe every element of the mark. Instead, due to the large number of elements in the mark, it is only necessary to describe the wording in the mark and generally characterize the background elements.

The mark consists of a group of stylized people each in the shape of a lowercase letter "E" and a fanciful dog also in the shape of a lowercase letter "E".

Note: The description would be incomplete if it did not indicate that the figures are in the shape of a lowercase letter "E"; however, it is not necessary to describe the individual details or placement of each figure.

The mark consists of the stylized wording "BETSTONE" on a background design.

Note: The description would be incomplete if it did not indicate that the mark consists of more than wording; however, it is not necessary to specifically identify a nondescript common geometric carrier.

The mark consists of Chinese characters and the stylized wording “M ITCHELL”.

Note: It is not necessary to include in the description of the mark the translation or transliteration of the Chinese characters. Though these elements would be searched, they are provided in the translation/transliteration statement.

The mark consists of an oval design with the stylized wording “OUTWIT OUTPLAY” and “OUTLAST”, the design of a stylized jungle containing a gorilla, elephants, and snakes and the stylized wording “SURVIVOR GABON EARTH’S LAST EDEN” within the oval.

Note: The description would be incomplete if it did not describe both the wording and design elements of the mark; however, it is not necessary to describe the placement of the elements within the oval.

See [TMEP §808.03](#) regarding the examination procedure for descriptions.

### 808.03 Examination Procedure for Descriptions

After having determined that a description of the mark is required because the mark is not in standard characters, the examining attorney must then consider whether the description should be printed in the *Official Gazette* and on the registration certificate. **Accurate and complete descriptions may always be printed.** In other situations, the decision to print – and to modify the description so that it is appropriate

for printing – depends on whether, in view of the nature or drawing of the particular mark in question, a description is necessary to clarify the mark for the public.

For example, pursuant to longstanding policy, a description must *always* be printed if:

- (1) The mark is three-dimensional, or a configuration of the goods or packaging ([TMEP §§807.10](#) and [1202.02\(c\)\(ii\)](#));
- (2) The drawing includes broken lines to show position or placement or to indicate a portion of the product or packaging that is not part of the mark ([TMEP §§807.08](#) and [1202.02\(c\)\(ii\)](#));
- (3) The mark includes color ([TMEP §§807.07\(a\)](#) and [1202.05\(e\)](#));
- (4) The mark includes motion ([TMEP §807.11](#)); or
- (5) The mark is a sound, scent, or other non-visual mark (37 C.F.R. §§2.37, 2.52(e); [TMEP §§807.09](#) and [808.01](#)).

In rare instances, a description must be printed when the mark consists of characters from the standard character set, but the characters are displayed in a manner that affects the meaning or significantly contributes to the overall commercial impression of the mark, for example, emoticons such as :) or :( . Note that a standard character claim is not acceptable where the characters form shapes or designs, such as emoticons ([TMEP §807.03\(c\)](#)).

If the examining attorney determines that a description provided by the applicant will not be printed, notice to the applicant is not required. The examining attorney must either enter a Note to the File in the record stating that the description should not be printed or issue an examiner's amendment stating that the description will not be printed. Generally, the examining attorney may use either option, but a Note to the File should be used where the examining attorney will issue an Office action regarding other matters. An examiner's amendment without the prior approval of the applicant ( *see* [TMEP §707.02](#)) may be used where it is unnecessary to issue an Office action or a regular examiner's amendment regarding other matters.

The examining attorney must then either: (1) delete the mark description from the "Description" field in the relevant Trademark database; or (2) send the examiner's amendment or an e-mail instruction (where only a Note to the File was entered) to the LIE for appropriate action.

The foregoing procedures ensure that a description not intended for printing will not be printed. They further ensure that at the publication review stage, the Note to the File or examiner's amendment reflects the determination not to print.

The following sections explain how to handle various scenarios relating to the description requirement. Regarding TEAS applications, please note that although TEAS Plus applications for non-standard character marks cannot be validated and filed unless an entry is made in the "Description" field, "regular" TEAS applications can be filed without entry of a description. The "regular" TEAS application will, however, display a warning message in non-standard character mark applications where no entry has been made in the "Description of the Mark" field. The warning message will indicate that although the description is not a filing date requirement, it must be provided at some point in the prosecution, or the application will not proceed to registration (assuming, of course, that all other requirements have been satisfied).

### **808.03(a) Accurate and Complete Descriptions**

If the application contains an accurate and complete description of the mark, no further action regarding the description is necessary and it will be printed in the *Official Gazette* and on the certificate of registration.

Obvious misspellings, typographical errors and redundancies in an otherwise accurate and complete description may be corrected by examiner's amendment without the prior approval of the applicant ( *see* [TMEP §707.02](#)).

The following are examples of accurate and complete descriptions:

The mark consists of the words "SUSHI SUSHI" represented in stylized font.

Note: If an application containing this mark was submitted without a description, the description could be added by examiner's amendment without the prior approval of the applicant ( *see* [TMEP §§707.02, 808.03\(b\)](#)).

heidi.com

The mark consists of the wording "HEIDI.COM" in stylized font appearing below a stylized design of a girl's head.

The mark consists of the word “LULU” in stylized font having a backwards second “L” adjacent to an abstract symbol of a sun and the word “COMPANY” in stylized font positioned underneath the second “U” and the sun.

The mark consists of an image of a building with a window with four panes with the words “JUST SMILES” in a large, stylized font with lines above the dot in the letter “I” representing shine or glow and the words “DENTISTRY FOR FAMILIES ON THE GO” in smaller, block-letter font.

The mark consists of a series of circles stylistically representing a group of bubbles, such series being located on the handle of a water bottle. The outline of the bottle depicted in broken lines in the drawing is intended to show the placement of the mark when used and is not part of the mark.

Note: Any mark whose drawing includes broken lines must have a printed description.

The mark consists of the three-dimensional configuration of a recessed window portion of a thermostat. The portion of the thermostat that comprises the mark is shown in solid lines in the drawing. The matter shown in broken lines in the drawing is not part of the mark. The dotted lines merely show the position of the mark in the configuration of the goods.

Note: Any mark whose drawing includes broken lines must have a printed description.

The mark consists of the color kelly green applied to the vehicles used in performing pest-control services. The matter shown in broken lines serves to show the placement of the mark on the vehicle and is not part of the mark.

Note: Any mark whose drawing includes broken lines must have a printed description.

### **808.03(b) No Description in Application**

If the description is not submitted with the initial application, the examining attorney must ensure that a description is included in the record. Applications that include vague statements such as “the mark contains wording and a design,” “the mark contains a miscellaneous design,” and “the mark consists of words” should be treated as the equivalent of accurate but incomplete descriptions.

For TEAS applications for marks that consist only of wording in stylized font, with no design element, the applicant’s completion of the “Literal Element” field may be accepted for purposes of compliance with the rule, even if an unacceptably vague statement or no information is entered in the “Description of the Mark”

field. In these cases, where the description need not be printed, the “Literal Element” information need not be copied into the “Description of the Mark” field in the relevant Trademark database.

Likewise, for §66(a) applications for marks that consist only of wording in stylized font, with no design element, the applicant’s completion of the “Textual Elements of Mark” field may be accepted for purposes of compliance with the rule. In these cases, where the description need not be printed, the “Textual Elements of Mark” information need not be copied into the “Description” field in the relevant Trademark database.

Similarly, in any application for a mark that includes color, the applicant’s provision of a color location statement (either in the original application or in response to a requirement) may be accepted for purposes of compliance with the rule. For TEAS applications, a color location statement provided in the initial application will automatically appear in the “Description” field in the relevant Trademark database and should remain there for printing. For paper applications, the color location statement is placed in the “Description” field in the relevant Trademark database and should remain there for printing.

Where an Office action or regular examiner’s amendment is otherwise unnecessary, in the following situations the examining attorney may enter a description by examiner’s amendment without the prior approval of the applicant (as with any examiner’s amendment, the examining attorney is thereby providing the applicant with notice and an opportunity to disagree):

- The mark consists only of wording in stylized font, with no color claim and with no design element (note that an examiner’s amendment would only be necessary where the applicant also failed to provide the “Literal Element,” which can serve as a description for this type of mark);
- The mark includes no color claim and consists only of wording in combination with underlining or a common geometric shape used as a vehicle for the display of the wording; or
- The record already contains an informal indication of what the mark comprises, such as where the cover letter of a paper application refers to the mark as “a stylized golf ball design.”

See [TMEP §707.02](#).

The following are examples of descriptions that may be entered by examiner’s amendment without prior approval of the applicant:

The mark consists of the stylized wording “GROB” within a rectangle.

The mark consists of the stylized wording "LIGHTYEAR ALLIANCE" with a curved line to the right of the wording.

The mark consists of the stylized wording "GSC PARTNERS" with a curved line between "GSC" and "PARTNERS".

The mark consists of the stylized letters "P" "A" "C" "T" each within a shaded circle and the stylized wording "PURE ADVANCED COSMETIC TECHNOLOGY" underneath.

The mark consists of the stylized wording “H BLOCK” within a square with a horizontal line between “H” and “BLOCK”.

The mark consists of the stylized wording “REECE & NICHOLS” with the ampersand within a square.

In the foregoing examples, a description is necessary to comply with the requirements of the rule, but need not be printed in the *Official Gazette* or on the registration. In such cases, the “no-call” examiner’s amendment ([TMEP §707.02](#)) should neither be sent to the LIE nor entered for printing by the examining attorney. Where printing of the description is unnecessary, the examiner’s amendment must indicate that the description will not be printed in the *Official Gazette* or on the registration certificate. This indication in the examiner’s amendment ensures that at the publication review stage, the description is not mistakenly entered for printing.

On the other hand, where an Office action or examiner’s amendment regarding other matters is necessary, a description should be required in the Office action or entered by examiner’s amendment. If a response to an Office action requiring the description fails to include a description but resolves all other issues, and one of the special situations set out above applies, the examining attorney may do a “no-call” examiner’s amendment ([TMEP §707.02](#)) at that time. If all other issues have not been resolved, the requirement for a description must be maintained or made final, as appropriate.

For marks that include a design element of any kind that are not covered by the special situations set out above, the examining attorney must either issue a requirement for the description, or enter a description by examiner’s amendment, *with* the prior approval of the applicant. Once a description of the mark is received in response to an Office action or through an examiner’s amendment, the examining attorney must follow

the procedures set forth in the other parts of [TMEP §§808.03\(c\)-\(d\)](#) (i.e., determine whether the description is accurate and complete, accurate and incomplete, or inaccurate, and proceed accordingly).

### **808.03(c) Accurate But Incomplete Description in Application or Amendment**

If the description accurately describes some elements of the proposed mark but does not describe other elements, the USPTO will *require amendment to complete the description only if the description will be printed in the Official Gazette and on the certificate of registration.*

#### **808.03(c)(i) Accurate But Incomplete Descriptions in Cases Where a Description is Needed to Clarify the Mark and Must be Printed**

If the examining attorney determines that a description must be printed in the *Official Gazette* and on the registration certificate because it is necessary to clarify the proposed mark, the examining attorney needs to ensure that the description accurately addresses *all* significant elements of the mark. If the description is incomplete, the examining attorney must require amendment to ensure that the description is complete and accurate. The amendment may be done by examiner's amendment, with the prior approval of the applicant.

The following is an example of an accurate but incomplete description where a corrected description must be printed:

The mark consists of a hot dog in a bun with face, hands and feet wearing a grass skirt and grass hat.

Note: This description is incomplete because it does not reference the two beach umbrellas and palm trees behind the hot dog. It must be completed and printed because it is necessary to clarify the mark.

#### **808.03(c)(ii) Accurate But Incomplete Descriptions in Cases Where a Description Need Not Be Printed**

Alternatively, if the examining attorney determines that the description need not be printed, the examining attorney need not require the applicant to amend or withdraw an incomplete or inartfully worded description, so long as the description does not misdescribe those elements of the mark addressed in the description. In such a case, although the incomplete description remains part of the application record, it must not be printed

in the *Official Gazette* and on the certificate of registration. The examining attorney must follow the procedure described in [§808.03](#) for descriptions provided by the applicant that need not be printed.

The following are examples of accurate but incomplete descriptions where a description need not be printed:

The mark consists of a dog design.

Note: This description is incomplete because it does not include the wording in the mark. Unless it is amended to be complete, the description must not be printed in the *Official Gazette* and certificate of registration because it is not necessary to clarify the proposed mark.

The mark consists of the word “SUSHI” represented in stylized font.

Note: This description is incomplete because it does not include the second “SUSHI”. Unless it is amended to be complete, the description must not be printed.

### **808.03(d) Inaccurate Description in Application or Amendment**

If the examining attorney determines that the description misdescribes some element of the mark, such that the description is inconsistent with the mark shown on the drawing, *the examining attorney must require the applicant to amend the description, even if the description will not be printed.* An inaccurate description must be corrected to accurately reflect the mark regardless of whether the description will be printed. The amendment of the description may be done by examiner’s amendment, with the prior approval of the applicant.

The following are examples of inaccurate descriptions:

The mark consists of two overlapping triangles with two stars positioned below.

Note: This description is inaccurate because there are three stars in the mark.

The mark consists of the design of a single grape leaf with an attached vine in front of a full moon design.

Note: This description is inaccurate because the mark contains a crescent moon design.

The mark consists of the stylized wording “FLORIDA’S FOOD SERVICE” to the left of a stylized chef design.

Note: This description is inaccurate because the term “FLORIDA” includes an “S” in the description. The change in the spelling of “FLORIDA” would not be considered an obvious misspelling because it is unclear whether the applicant intended for the mark to include the “S”. Either the mark or the description must be amended.

The mark consists of the stylized wording “FLOODS FOR LESS” with a pool of water under the wording.

Note: This description is inaccurate because the mark includes the numeral “4” rather than the word “FOR”.

C<sup>3</sup> Reduct

The mark consists of the stylized wording “C THREE REDUCT”.

Note: This description is inaccurate because the mark includes the superscript number “3” following the letter “C” rather than the word “THREE”. A proper description could refer to the numeral as “3” or “CUBED”.

### **808.03(e) Amending Descriptions**

Generally, amending the description of the mark is liberally permitted, so long as the drawing supports the description. In rare cases where the amendment of the description constitutes a material alteration of the mark on the drawing or of the description filed with the original application, amendment will not be permitted.

See 37 C.F.R. §2.72; *In re Thrifty, Inc.*, 274 F.3d 1349, 61 USPQ2d 1121 (Fed. Cir. 2001). See [TMEP §§807.14 et seq.](#) regarding material alteration.

### **808.03(f) Updating Design Coding**

Particularly when a description is not included in the initial application, the examining attorney should ensure that the design coding is updated in accordance with the description, where appropriate and necessary. The examining attorney should ensure the design coding of all significant elements of the mark, specifically

those that the examining attorney used in conducting a search. The examining attorney may update the “Design Code” field by making the appropriate entries in the Trademark database or by sending an e-mail message to the internal TM Design Code Correct mailbox that contains instructions regarding the changes to be made.

If additional codes beyond those searched have been coded for a particular design, deleting the extra codes is unnecessary.

### **808.03(g) Unacceptable Statements in Mark Descriptions**

A statement that purports to limit a mark by excluding color(s) or other features that do not appear in a mark is not appropriate for inclusion in a description of a mark. Statements regarding any purported “exclusion” usually feature a limitation on the mark, often in an attempt to satisfy third parties that have infringement concerns. In some cases, the applicant has a written agreement with a potential opposer that addresses this issue. However, descriptions are solely to be used to describe the mark shown in the drawing and are not to be used to describe how the mark does not and will not appear. See [TMEP §808.02](#).

Although these additional restrictive statements are uncommon, when they do appear the facts are generally as follows. The mark features a design and color is not claimed as a feature of the mark. The description of the mark is amended by the applicant to include a reference to a color or colors that the mark will not comprise. This type of statement is inappropriate and must be deleted from the description. For example, the following type of statement must not be included in a description of a mark: “The application and any registration resulting from the application exclude the color purple within or as part of the (design element) in the mark.”

Thus, when the applicant has not made a color claim, the description of the mark must not mention color(s), because reference to color in the description of a non-color mark creates a misleading impression. [TMEP §§807.07](#) and [808.02](#).

Accordingly, the description may not be used to state any limitations as to how a mark does not and will not appear. Any such statements must be deleted from the description if it is determined that the description needs to be printed. [TMEP §§808.02](#), [808.03](#). Although applicants may include such restrictive statements in the application record, they are not appropriate for the registration certificate. If it is determined that the description does not need to be printed, the description does not need to be amended to delete the restrictive statement unless some part of the description is inaccurate, in which case the restrictive statement must be deleted. [TMEP §808.03\(d\)](#).

### **809 Translation and Transliteration of Non-English Wording in Mark**

An application to register a mark that includes non-English wording must include an English translation of that wording. 37 C.F.R. §2.32(a)(9). This requirement also applies to compound word marks comprised of two or more distinct words (or words and syllables) that are represented as one word, in which one or more of the words in the mark appears to be non-English wording that would clearly be perceived as a distinct word(s) within the compound. For example, if the mark is GRINÇANTCOMPUTERS, the commercial impression is that the mark is comprised of the words GRINÇANT and COMPUTERS. In such a case, the application must include a translation of the French word GRINÇANT, which means “creaking” in English. If, however, the combination either suggests a single word or conveys a commercial impression other than a mark comprised of two separate words, no translation of the non-English portion should be required. Thus, if the mark is FELIZCITY, the commercial impression is that the mark is a play on the word “felicity” and

no translation of the term “feliz” (which means “happy” in English) is required. See [TMEP §809.01](#) regarding the procedure for examining applications for marks with non-English wording that do not include an accurate translation.

Similarly, an application for a mark that comprises non-Latin characters must include a transliteration of those characters, and either an English translation or a statement that this portion of the mark has no meaning in a foreign language. 37 C.F.R. §2.32(a)(10). A transliteration is the phonetic spelling, in corresponding Latin characters, of the word(s) in the mark that are in non-Latin characters. Examples of statements translating and transliterating a word in non-Latin characters are as follows:

The non-Latin characters in the mark transliterate to “Asahi” and this means “Rising Sun” in English.

or

The non-Latin characters in the mark transliterate to “Weidamei” and this has no meaning in a foreign language.

If an application for a mark comprising non-English wording or non-Latin characters does not include an accurate translation and/or transliteration, the examining attorney must require the applicant to submit a statement of translation/transliteration. 37 C.F.R. §§2.32(a)(9) and (10).

When an application or certificate of registration includes a translation, both the non-English wording and the English translation will appear in the records of the USPTO. See [TMEP §809.03](#) regarding the printing of the translation/transliteration statement in the *Official Gazette* and on the registration certificate.

In a TEAS Plus application, if the mark includes non-English wording, the initial application must include an English translation of that wording. 37 C.F.R. §2.22(a)(16). If the mark includes non-Latin characters, the application must include a transliteration of those characters. 37 C.F.R. §2.22(a)(17). If the applicant does not meet these requirements, the applicant must pay a processing fee per class to have the application examined as a regular TEAS application. See [TMEP §819.01\(m\)](#) for further information on translation and transliteration statements in TEAS Plus applications.

See [TMEP §809.01\(b\)](#) regarding the limited exceptions to the requirement to provide a translation of foreign wording in the mark.

### **809.01 Examining Applications for Marks Comprising Non-English Wording that Do Not Include an Accurate Translation or Transliteration**

In order to properly examine applications with non-English wording, the translation and transliteration of the non-English wording must be determined prior to performing a search of the mark. This is critical because the foreign equivalent of an English term may be regarded in the same way as the English term for purposes of determining descriptiveness, requiring disclaimer, and citing marks under §2(d) of the Act ( *see, e.g.,* [TMEP §§1207.01\(b\)\(vi\)](#) and [1209.03\(g\)](#)).

Therefore, if there is no translation and/or transliteration in the initial application, the examining attorney should ascertain the meaning of non-English wording before searching the mark.

The examining attorney may obtain the meaning of non-English wording through sources such as foreign language dictionaries and search engines. The examining attorney may also consult the Trademark Librarian or the Translations Branch, as appropriate.

If research by the examining attorney, the Trademark Library, and/or the Translations Branch indicates that the term has no meaning or no clear and exact equivalent in a foreign language, although no inquiry regarding the meaning in a foreign language is necessary, the examining attorney has the discretion under 37 C.F.R. §2.61(b) to make such an inquiry. The examining attorney should enter a Note to the File in the record indicating that the term has no meaning in a foreign language. In such cases, a statement regarding meaning should not be entered for printing in the *Official Gazette*.

If the examining attorney determines the meaning of the non-English term(s), he or she must search the terms as they appear in the application, the transliterated terms, and the English translation(s) for the terms, as applicable. The examining attorney must also require (under 37 C.F.R. §2.61(b)) that an accurate translation be made of record by the applicant using the researched translation or other accurate translation provided by applicant. If the applicant disputes a translation obtained through online resources, the examining attorney should supplement the record with evidence from the Trademark Librarian and/or the Translations Branch.

If the translation is provided or supplemented after the examining attorney has conducted a search for conflicting marks, the examining attorney must conduct a new search of the transliterated terms and/or the English translation(s) for the terms, as applicable.

### **809.01(a) Inquiry/Applicant's Response Regarding Meaning in a Foreign Language**

If it is necessary to make a separate inquiry regarding the meaning of non-English wording, the examining attorney should provide the applicant with the correct format for a translation or transliteration statement.

See [TMEP §809.03](#). If a general inquiry is made regarding meaning under 37 C.F.R. §2.61(b) (i.e., whether the term has significance in the relevant trade, any geographical significance, or any meaning in a foreign language), the applicant's response may not be in the correct format for the translation or transliteration statement. If necessary, the examining attorney should ensure that the translation or transliteration is entered in the relevant Trademark database, using the appropriate format. See TMEP §809.03. It is not necessary to issue an examiner's amendment in such cases.

If the applicant responds to an inquiry regarding the meaning of non-English wording by stating that "the term has no significance in the relevant trade, no geographical significance, and no meaning in a foreign language," the statement should not be entered into the relevant Trademark database. Similarly, if the applicant responds that "the mark has only trademark significance," or in some similar manner, the examining attorney should not enter the statement in the Trademark database.

### **809.01(b) Limited Exceptions to Rules for Translations**

There are three limited exceptions to the general rule requiring that all foreign wording be translated. See [TMEP §§809.01\(b\)\(i\) through \(iii\)](#).

#### **809.01(b)(i) Foreign Terms Appearing in English Dictionary**

It is generally unnecessary to provide a translation of a foreign term if the term appears in an English dictionary (e.g., croissant, fiesta or flambé). However, if a term that appears in the English dictionary appears in a mark as part of a foreign idiomatic phrase or other unitary expression, a translation of the idiomatic phrase or unitary expression is required. It would be illogical to break the phrase into its individual word elements and to translate only the individual words that do not appear in the English dictionary. Such a translation would serve no useful purpose because it would not convey the true commercial impression of the phrase.

*Example:* If the mark included the phrase “la fiesta grande,” an appropriate translation would be “the great celebration” or possibly “the great fiesta.” It would be inappropriate to translate only “la” and “grande.” The ultimate goal is to provide a translation that reflects the true meaning of the non-English wording in the mark and the commercial impression made by the entire phrase. See [TMEP §809.01](#) regarding equivalency in translation.

### **809.01(b)(ii) Foreign Articles or Prepositions Combined with English Terms**

It is generally unnecessary to provide a translation of foreign articles or prepositions, such as “de,” “le,” “la,” or “il,” when combined with English terms, because their meaning is generally understood and, in this context, they are being used to convey an impression different from their foreign meaning. For example, in the mark “LE CASE,” it is unnecessary to translate “LE.”

### **809.01(b)(iii) Words From Dead or Obscure Languages**

It is generally not necessary to translate words from dead or obscure languages. *Cf. General Cigar Co. Inc. v. G.D.M. Inc.*, 988 F. Supp. 647, 45 USPQ2d 1481 (S.D.N.Y. 1997) (applicant had no obligation to disclose that the term COHIBA for cigars means “tobacco” in the language of the Taino Indians in the Dominican Republic, because cigar smokers in the United States would not be aware of such a meaning). See [TMEP §§1207.01\(b\)\(vi\)](#) and [1209.03\(g\)](#) regarding the applicability of the doctrine of foreign equivalents to words from dead or obscure languages. The determination of whether a language is “dead” must be made on a case by case basis, based upon the meaning that the term would have to the relevant purchasing public.

*Example:* Latin is generally considered a dead language. However, if there is evidence that a Latin term is still in use by the relevant purchasing public (e.g., if the term appears in news articles), then a Latin term is not considered dead. The same analysis should be applied to other uncommon languages.

## **809.02 Equivalency in Translation**

The translation that should be relied upon in examination is the English meaning that has significance in the United States as the equivalent of the meaning in the non-English language. The following are examples of equivalency in translation:

- (1) “Chat Noir” - The exact equivalent in English is “black cat,” and this translation would undoubtedly be recognized by the purchasing public in this country. *Ex parte Odol-Werke Wien Gesellschaft M.B.H.*, 111 USPQ 286 (Comm’r Pats. 1956) (mark “Chat Noir” refused registration because the words “Black Cat” were already registered for related goods).
- (2) “Mais Oui” - The English equivalent of the phrase “mais oui” is “why, certainly,” or “why, of course,” and not the literal translation “but yes.” *In re Societe Des Parfums Schiaparelli, S.A.*, 122 USPQ 349 (TTAB 1959). A satisfactory translation must be some normal English expression that will be the equivalent in meaning of the term “mais oui” in French.
- (3) “Schwarzkopf” - The term can be literally translated as “black head,” but, even to German-speaking persons, the primary significance of “Schwarzkopf” is most likely that of a surname. Neither English nor foreign surnames should be translated. See [TMEP §1211](#) regarding surnames.

If any question arises as to the proper translation of a mark, the examining attorney may consult the Trademark Library or Translations Branch of the USPTO. The determination of the appropriate translation often requires consideration of the meaning in relation to the goods and/or services. See [TMEP §1207.01\(b\)\(vi\)](#) regarding the use of the doctrine of foreign equivalents in determining likelihood of confusion under 15 U.S.C. §1052(d), [TMEP §1209.03\(g\)](#) regarding the doctrine of foreign equivalents in determining questions of descriptiveness

under 15 U.S.C. §1052(e)(1), and [TMEP §1211.01\(a\)\(vii\)](#) regarding the doctrine of foreign equivalents in determining whether a term is primarily merely a surname under 15 U.S.C. §1052(e)(4).

### 809.03 Printing of Translations and Transliterations

Generally, non-English wording in a mark must be translated into English and the translation (and transliteration, if applicable) must be printed in the *Official Gazette* and on the registration certificate. A statement that a term has no meaning in a foreign language also should be printed.

Sometimes, translations that are not precise, or that give a variety of meanings, are placed in the record. While all possible translations, and discussions relative to meaning, are useful for informational purposes, not all such matter is appropriate for printing in the *Official Gazette* or on the certificate of registration. Only a translation that is the clear and exact equivalent ( see [TMEP §809.02](#)) should be printed. This normally means only one translation, because the existence of a variety of alternative translations, or the necessity of including explanatory context, usually indicates lack of a clearly recognized equivalent meaning.

If an applicant submits a translation that is too verbose or vague to be appropriate for printing, the examining attorney must require a clear, concise translation. The transliteration of non-Latin characters, if any, must be included in the statement to be printed. If necessary, the examining attorney should rewrite the statement via an examiner's amendment and ensure that the Trademark database is updated accordingly.

*Example:* The translation statement contains the proper translation, but the statement is not suitable for printing because it is too wordy. If the examining attorney is only "reformatting" the applicant's statement without changing the substance, the examining attorney should rewrite the translation statement into a simple, clear statement as to meaning, issue a "no-call" examiner's amendment ( see [TMEP §707.02](#)), and ensure that the Trademark database is updated accordingly.

*Example:* The translation statement is vague or is otherwise in need of clarification in order for the statement to be clear and concise. The examining attorney should contact the applicant and suggest a simple, clear statement. If the applicant agrees to amend the translation statement as suggested, the examining attorney should issue a regular examiner's amendment, and ensure that the Trademark database is updated accordingly. If the applicant and examining attorney cannot agree on wording, the examining attorney must issue an Office action to resolve the issue.

One of the following statement formats should be used, as appropriate:

- The English translation of the word " \_\_\_\_\_ " in the mark is " \_\_\_\_\_ "
- The English translation of the \_\_\_\_\_ word " \_\_\_\_\_ " in the mark is " \_\_\_\_\_ "
- The English translation of " \_\_\_\_\_ " is " \_\_\_\_\_ "
- The wording " \_\_\_\_\_ " has no meaning in a foreign language
- The non-Latin characters in the mark transliterate to " \_\_\_\_\_ " and this means " \_\_\_\_\_ " in English
- The \_\_\_\_\_ characters in the mark transliterate to " \_\_\_\_\_ " and this means " \_\_\_\_\_ " in English
- The non-Latin characters in the mark transliterate to " \_\_\_\_\_ " and this has no meaning in a foreign language

All information in the "Translation" and "Transliteration" fields in the application record will automatically be printed in the *Official Gazette* and on the certificate of registration. Accordingly, the examining attorney must ensure that the translation or transliteration is entered into the Trademark database. When an examining attorney determines that a translation should not be printed because it is unnecessary, the examining attorney must ensure that the translation is deleted from the Trademark database, and enter a Note to the File in the record indicating that the translation has been deleted. The document containing the information deleted

from the Trademark database will remain of record for informational purposes. See [TMEP §817](#) regarding preparation of an application for publication or issuance.

## 810 Filing Fee

An application under §1 or §44 of the Trademark Act must include a filing fee for each class of goods or services. 15 U.S.C. §§1051(a)(1), 1051(b)(1), and 1126.

The required filing fee for at least one class of goods or services must be received before an application can be given a filing date. 37 C.F.R. §2.21(a)(5).

The amount of the trademark application filing fee varies, depending upon whether the application (or the amendment adding classes to an existing application) is filed through TEAS or on paper. An applicant has three choices. The applicant can file:

- A paper application at the highest fee per class, set forth in 37 C.F.R. §2.6(a)(1)(i);
- A regular TEAS application at the lower fee per class, set forth in 37 C.F.R. §2.6(a)(1)(ii); or
- A TEAS Plus application ( *see* [TMEP §§819 et seq.](#)) at the lowest fee per class, set forth in 37 C.F.R. §2.6(a)(1)(iii).

*See* notices at [70 Fed. Reg. 2952](#) (Jan. 19, 2005) and [70 Fed. Reg. 38768](#) (July 6, 2005). The current fee schedule is available on the USPTO website at <http://www.uspto.gov>.

*Note:* Applications that are downloaded from TEAS or TEAS Plus, printed, and mailed to the USPTO are considered paper applications and are subject to the paper application filing fee.

An applicant who amends an application to add classes is entitled to the lower fee if the applicant files the amendment through TEAS (either as a voluntary amendment or a response to an examining attorney's Office action), or through an examiner's amendment. The applicant must pay the higher fee if the applicant files an amendment adding class(es) on paper. See [TMEP §§1403.02\(c\)](#) and [1403.06](#) for further information about fees in multiple-class applications.

See also [TMEP §§405 et seq.](#) regarding payment of fees to the USPTO, and [TMEP §§202.03\(a\)](#) and [202.03\(a\)\(i\)](#) regarding the processing of applications in which a check submitted as the application filing fee is returned unpaid, or an electronic funds transfer or credit card payment is refused or charged back by a financial institution.

The filing fee for a §66(a) application will be sent to the USPTO by the IB, pursuant to the provisions of the Madrid Protocol and the Common Regulations. The examining attorney should not require additional fees during examination.

### 810.01 Collection of Fees for Multiple Classes

A filing fee is required for each class in a multiple-class application under §1 or §44 of the Trademark Act. 37 C.F.R. §2.86(a)(2). The USPTO has established the following policy to ensure the collection of application filing fees from all applicants on an equitable basis.

In an application under §1 or §44, if the applicant has specifically authorized the USPTO to charge any additional fees to a deposit account, the examining attorney should ask the LIE to charge the fees, and proceed with examination of the application on the merits. If the applicant has not provided a specific authorization to charge an account, the examining attorney should attempt to contact the applicant to secure a written authorization to charge fees to a credit card or deposit account by fax or e-mail.

An authorization to charge a fee to a deposit account must be made in a written document signed and submitted by an authorized person. It cannot be entered by examiner's amendment unless the record already contains a written authorization, signed and submitted by someone who is authorized to charge fees to the account. See [TMEP §405.03](#) regarding deposit accounts.

If the examining attorney is able to secure a written authorization to charge fees to a credit card or deposit account, the examining attorney should have the LIE charge the necessary fees to the credit card or deposit account and proceed with examination. See [TMEP §§810, 1403.02\(c\)](#), and [1403.06](#) regarding the amount of the fee for adding classes to an application.

If an authorization to charge fees has not been provided and the examining attorney is unable to secure one, the examining attorney must issue a written Office action noting the deficiency and requiring either payment of the fees or deletion of classes. This policy applies to any application under §1 or §44 of the Trademark Act in which the applicant specifically delineates more than one class of goods or services and the applicant has paid the fee(s) for less than all the classes. The delineation may be by indicating class numbers or any other means demonstrating a clear intention to seek registration in multiple classes.

In limited circumstances, the examining attorney should advise the applicant that action on the merits of the application is deferred pending receipt of the applicant's response to the Office action requiring payment of missing fees or deletion of classes. In most cases, the examining attorney should simply act on the merits of the application and require the additional fees. For example, it would be inappropriate to defer action in a *pro se* application or in other cases where the applicant has in good faith attempted to pay the appropriate fees. Before issuing a letter deferring action until additional fees are paid, the examining attorney should consult with the managing attorney or senior attorney.

The filing fee for a §66(a) application will be sent to the USPTO by the IB, pursuant to the provisions of the Madrid Protocol and the Common Regulations. The examining attorney should not require additional fees during examination. The classification in a §66(a) application cannot be changed and additional classes cannot be added. See [TMEP §1401.03\(d\)](#) for further information.

## **810.02 Refunds**

Only money paid by mistake or in excess (when a fee is not required by the statute or rules, or is not required in the amount paid) may be refunded. A mere change of purpose after the payment of money does not entitle a party to a refund. For example, if an applicant deletes a class from an application, or withdraws an application, the applicant is not entitled to a refund. 37 C.F.R. §2.209.

The filing fee for an application that is denied a filing date will be refunded. After an application has been given a filing date and processed, the filing fee will normally not be returned. However, if an examining attorney erroneously requires a fee, the USPTO will refund any fee submitted in response to the erroneous requirement.

If the examining attorney determines that an applicant is entitled to a refund, he or she should submit the request to the [TMSFinance@uspto.gov](mailto:TMSFinance@uspto.gov) e-mail box with the information necessary for processing the refund.

If the examining attorney is uncertain as to whether a refund is appropriate, he or she should discuss the situation with the managing attorney or senior attorney.

See [TMEP §405.04](#) for additional information about processing refunds.

## 811 Designation of Domestic Representative

Under 15 U.S.C. §§1051(e) and 1141h(d) and 37 C.F.R. §2.24, an applicant not domiciled in the United States may file a document designating the name and address of a person residing in the United States on whom may be served notices or process in proceedings affecting the mark. See [TMEP §610](#) for further information. The USPTO encourages applicants who do not reside in the United States to designate domestic representatives. To expedite processing, the USPTO recommends that designations of domestic representative be filed through TEAS, at <http://www.uspto.gov>.

## 812 Identification of Prior Registrations of Applicant

*37 CFR §2.36*

Identification of prior registrations. Prior registrations of the same or similar marks owned by the applicant should be identified in the application.

Trademark Rule 2.36, 37 C.F.R. §2.36, states that prior registrations of the same or similar marks owned by the applicant should be identified in the application. The rule does not precisely define when an applicant should claim ownership of prior registration(s), and the examining attorney may exercise discretion in invoking the rule. The main purpose of the rule is to provide the examining attorney with information necessary for proper examination. The information does not have to be given in any specific form. The applicant's claim of ownership of prior registrations will be printed in the *Official Gazette* and on the registration certificate.

Normally, identification of a registration is necessary because the registration would, if not owned by the applicant, be a basis for refusal under §2(d) of the Act, 15 U.S.C. §1052(d). Occasionally, it is desirable to ask an applicant to identify a particular registration as being owned by the applicant merely to provide relevant information.

It is not necessary to assert ownership of expired or cancelled registrations. If the applicant wants to include a reference to a cancelled or expired registration, the applicant should indicate that the applicant owns the *mark* disclosed in the cancelled or expired registration, because technically one does not “own” a registration that is not in force and effect. Claims of ownership of pending applications, expired or cancelled registrations, and registrations that are unrelated to an application will not be printed.

Before approving an application that includes a claim of ownership of prior registrations for publication or registration, the examining attorney must ensure that the registrations are active. If a registration is not active, the claim of ownership should not be printed.

All information in the “Prior Registration” field in the application record in the Trademark database will automatically be printed in the *Official Gazette* and on the certificate of registration. Accordingly, when an examining attorney determines that a claim of ownership of a prior registration should not be printed (e.g., because the registration is no longer active or is irrelevant to the registrability of the mark in the subject

application), the examining attorney must ensure that the claim of ownership is deleted from the Trademark database, and enter a Note to the File in the record indicating that the claim has been deleted. The document containing the information deleted from the Trademark database will remain of record for informational purposes. See [TMEP §817](#) regarding preparation of an application for publication or issuance.

If the applicant owns numerous prior registrations, it is not necessary to list them all. The applicant should specifically identify the two or three registration numbers that are most relevant (due to the similarity of the marks and/or relatedness of the goods or services), and then indicate that it owns other registrations as well, e.g., “the applicant is the owner of Reg. Nos. <specify the numbers> and others.” If the applicant lists numerous prior registrations, the database will only show the first three registration numbers entered in the claim of ownership field and will automatically indicate “and others” as to any additional registration numbers. Therefore, the examining attorney must ensure that the claim of ownership identifies the two or three most relevant registration numbers.

In a TEAS Plus application, if the applicant owns one or more registrations for the *same* mark, the initial application must include a claim of ownership of the registration(s). If this information is not included in the initial application, the applicant must pay a processing fee per class to have the application examined as a regular TEAS application. 37 C.F.R. §2.22(a)(19). See [TMEP §819.01\(p\)](#) for further information.

### **812.01 Proving Ownership of Prior Registrations**

If an applicant includes a claim of ownership of a prior registration, or a pending application, in the application as filed, the examining attorney must accept the claim without further proof of ownership and must not cite the registration for likelihood of confusion under §2(d) of the Act or advise the applicant that there may be a conflict with the earlier-filed application.

If the applicant does not assert ownership of a pertinent registration in the application when it is filed, but the Trademark database indicates that an assignment was filed as to the registration, the examining attorney must check the database of the USPTO’s Assignment Recordation Branch to determine whether information contained in the database supports ownership of the registration in the applicant’s name. If records in the Assignment Recordation Branch’s database indicate that the registration is owned by the applicant, the examining attorney must not cite the registration for likelihood of confusion, but must call the registration to the applicant’s attention and ask the applicant to state that the applicant owns the registration, if accurate.

If the request is made in an Office action, the examining attorney must include a copy of the registration. If there are no other issues necessitating issuance of an Office action, the examining attorney may call or e-mail the applicant. The applicant’s statement claiming ownership may be placed in the record through an examiner’s amendment.

Generally, the applicant has the burden of proving ownership of a registration. The USPTO’s automated search system may not reflect the recordation of changes of ownership in the Assignment Recordation Branch. See [TMEP §§502](#) *et seq.* Therefore, if an applicant does not assert ownership of a pertinent registration in an application when it is filed, the registration must be cited against the current application under §2(d) because the USPTO’s records do not indicate that it is owned by the applicant. If so, the applicant must do one of the following to verify its ownership claim: (1) state for the record that the documents have been recorded in the Assignment Recordation Branch for a registration based on an application under §1 or §44 of the Trademark Act, or with the IB for a §66(a) registration; (2) submit copies of documents evidencing the chain of title; or (3) submit a statement, supported by an affidavit or declaration under 37 C.F.R. §2.20, that the applicant is the owner of the cited registration. This also applies to pending conflicting applications that are cited as a potential bar to registration.

A refusal under §2(d) cannot be overcome by a claim of ownership of a registration made by the applicant in another registration file when the USPTO's records do not indicate that the registration is owned by the applicant.

### **813 Consent to Register by Particular Living Individual Whose Name or Likeness Appears in the Mark**

When a name, portrait, or signature in a mark identifies a particular living individual, or a deceased president of the United States during the life of his widow, the mark can be registered only with the written consent of the individual, or of the president's widow, respectively. The requirement for consent also applies to the registration of a pseudonym, stage name, or nickname, if there is evidence that the name identifies a specific living individual who is publicly connected with the goods or services, is generally known, or is well known in the field relating to the relevant goods or services. See [TMEP §§1206](#) *et seq.* concerning refusal of registration under §2(c) of the Trademark Act, 15 U.S.C. §1052(c), when a mark in an application comprises the name, portrait, or signature of a living individual whose consent to register such name or likeness is not of record.

See [TMEP §1206.03](#) for information about when the examining attorney should issue an inquiry as to whether a name or likeness identifies a particular living individual.

Consent may be presumed where the individual whose name or likeness appears in the mark personally signs the application. See [TMEP §1206.04\(b\)](#) for further information.

If a consent to register is already part of the record in the file of a valid registration for a mark comprised in whole or in part of the same name, portrait, or signature for the same goods or services, the applicant may satisfy the requirement for a consent statement by claiming ownership of the registration and advising the examining attorney that the consent is of record therein. See [TMEP §1206.04\(c\)](#) for further information.

If a mark comprises the name or likeness of a living individual and consent to register is of record or is presumed from signature of the application ([TMEP §1206.04\(b\)](#)), a statement that the mark identifies a living individual whose consent is of record must be printed in the *Official Gazette* and on the registration certificate. See [TMEP §813.01\(a\)](#). If a name or likeness that could *reasonably* be perceived as that of a living individual is not that of a specific living individual, a statement to that effect is printed in the *Official Gazette* and on the registration certificate. See [TMEP §813.01\(b\)](#).

In a TEAS Plus application, if the mark includes an individual's name or portrait, the initial application must include either: (1) a statement that identifies the living individual whose name or likeness the mark comprises, and written consent of the individual; or (2) a statement that the name or portrait does not identify a living individual. If this statement does not appear in the initial application, the applicant must pay a processing fee per class to have the application examined as a regular TEAS application. 37 C.F.R. §2.22(a)(18). See [TMEP §819.01\(o\)](#) for further information.

See [TMPEP §§813.01\(b\)](#) and [1206.05](#) regarding statements that a name or likeness that could reasonably be perceived as that of a living individual is *not* that of a specific living individual.

## **813.01 Statement Printed in Official Gazette and on Registration Certificate**

### **813.01(a) Name or Likeness Is That of a Living Individual**

If a mark comprises the name or likeness of a living individual and consent to register is of record, a statement to that effect must be printed in the *Official Gazette* and on the registration certificate. The following are examples of acceptable statements:

The name, portrait, and/or signature shown in the mark identifies a living individual whose consent to register is made of record;

The name shown in the mark identifies a living individual whose consent is of record;

“<JOHN SMITH>” identifies a living individual whose consent is of record;

The portrait or likeness shown in the mark identifies a living individual whose consent is of record;

The portrait or likeness shown in the mark identifies John Smith, whose consent to register is made of record;

The signature shown in the mark identifies a living individual whose consent is of record;

The signature shown in the mark identifies “JOHN SMITH”, a living individual whose consent is of record; or

The name, portrait, and/or signature shown in the mark identifies <John Smith>, whose consent to register is made of record.

Only matter that actually appears in the mark should appear in capital letters within quotation marks.

Where the mark comprises a portrait, first name, pseudonym, nickname, surname of an individual who is well known in the field relating to the goods or services ( *see* [TMPEP §1206.03](#)), surname preceded by initials (e.g., “J.C. Jones”), or title of a living individual, the record must clearly identify the actual name of the individual and indicate that the name shown in the mark identifies that individual. A legible signature on the consent statement may in itself be sufficient to identify the individual’s name. If the actual name is unclear, the examining attorney must issue an inquiry. The name may be entered by examiner’s amendment, if appropriate.

Where the mark comprises the name or likeness of a living individual whose consent is of record, the consent statement must always be printed, even if the name that appears in the mark is that of the applicant. The statement must also be printed if consent is presumed from signature of the application ([TMPEP §1206.04\(b\)](#)), or if consent is of record in a valid registration owned by applicant ([TMPEP §1206.04\(c\)](#)).

Where consent is presumed from signature ([TMPEP §1206.04\(b\)](#)), the examining attorney must ensure that the required statement is entered in the Office’s database. The examining attorney must also enter a Note to the File in the record indicating that the statement must be printed. No prior approval by the applicant or the applicant’s qualified practitioner is required.

The examining attorney must ensure that the Trademark database is updated, if necessary. See [TMEP §813.01\(c\)](#).

### **813.01(b) Name or Likeness Is Not That of a Living Individual**

If a name or likeness that could reasonably be perceived as that of a living individual is *not* that of a specific living individual, a statement to that effect must be printed in the *Official Gazette* and on the registration certificate. The statement should read as follows:

“\_\_\_\_\_ does not identify a living individual.”

or

"The name(s), portrait(s), and/or signature(s) shown in the mark does not identify a particular living individual."

The applicant should explain any additional relevant circumstances. For example, if the matter identifies a certain character in literature or a deceased historical person, then a statement of these facts in the record may be helpful, but this information will not be printed in the *Official Gazette* or on the registration certificate.

No statement should be printed unless the name or portrait might *reasonably* be perceived as that of a specific living individual. This is true even if the applicant submits an unsolicited statement that a particular name or portrait does not identify a living individual.

Generally, if the name or likeness is such that an inquiry would have been required as to whether it identifies a living individual ( see [TMEP §1206.03](#)), and the applicant states that the mark does not identify a living individual, then the statement that the name or likeness does not identify a living individual should be printed.

The examining attorney must ensure that the Trademark database is updated, if necessary. See [TMEP §813.01\(c\)](#).

If the applicant owns a valid registration for a mark comprised in whole or in part of the same name, portrait, or signature for any goods or services, and the record for the registration contains a statement that the name or likeness is *not* that of a living individual, the applicant should claim ownership of the registration and advise the examining attorney that the statement is of record therein. The examining attorney may then enter the same statement in the record for the application, even if applicant does not resubmit or reference the statement. It is not necessary to issue an inquiry in this situation.

### **813.01(c) Updating the Trademark Database**

All statements in the Trademark database as to whether a mark comprises the name, portrait, or signature of a living individual whose consent is of record will automatically be printed in the *Official Gazette* and on the certificate of registration. Accordingly, when an examining attorney determines that such a statement should be printed, the examining attorney must ensure that the statement is entered into the database. Where consent is presumed from signature ([TMEP §1206.04\(b\)](#)), the examining attorney must also enter a Note to the File in the record indicating that the statement must be printed.

When an examining attorney determines that such a statement should *not* be printed, the examining attorney must ensure that the statement is deleted from the database. The examining attorney must also enter a Note to the File in the record indicating that the statement has been deleted. The document containing the

information deleted from the Trademark database will remain of record for informational purposes. See [TMEP §817](#) regarding preparation of an application for publication or issuance.

## 814 Requesting Additional Information

Sometimes, it is necessary for the examining attorney to request additional information from an applicant in order to examine the application properly, pursuant to 37 C.F.R. §2.61(b). If the applicant does not comply with a requirement for additional information, registration may be refused.

If the applicant does not comply with the examining attorney's request for information, the requirement should be repeated and, if appropriate, made final. See *In re AOP LLC*, 107 USPQ2d 1644, 1651 (TTAB 2013) ("Failure to comply with a request for information is grounds for refusal," where applicant provided equivocal responses to the examining attorney's questions and did not address this issue in its brief); *In re DTI Partnership LLP*, 67 USPQ2d 1699 (TTAB 2003) (deeming §2(e)(1) refusal moot, since failure to comply with requirement for information is sufficient basis, in itself, for refusal); *In re SPX Corp.*, 63 USPQ2d 1592 (TTAB 2002) (finding registration properly refused where applicant ignored request for information); *In re Page*, 51 USPQ2d 1660 (TTAB 1999) (finding intent-to-use applicant's failure to comply with requirement for information as to the intended use of the mark constituted grounds for refusal); *In re Babies Beat Inc.*, 13 USPQ2d 1729, 1731 (TTAB 1990) (finding registration properly refused where applicant failed to comply with examining attorney's request for copies of patent applications and other patent information); *In re Air Products and Chemicals, Inc.*, 192 USPQ 157, 158 (TTAB 1976) ("[Trademark Rule 2.61(b)] has the effect of law.").

The examining attorney may request literature, exhibits, affidavits or declarations, and general information concerning circumstances surrounding the mark, as well as, if applicable, its use or intended use. See 37 C.F.R. §2.61(b). Requests for information that is not public knowledge, but is within the knowledge of the applicant or available to the applicant, are particularly appropriate. The examining attorney should explain why the information is needed, if the reason is not obvious.

If applicant wants to provide information from its website in response to the examining attorney's request for information, applicant should attach the relevant information to its response. It is not sufficient to provide only the applicant's website address. In addition, a mere statement that information about the goods or services is available on applicant's website is an inappropriate response to the examining attorney's request for information, and insufficient to make the relevant information of record. See *In re Planalytics, Inc.*, 70 USPQ2d 1453 (TTAB 2004).

If applicant does not believe that it has relevant information, applicant should submit a statement to this effect.

An applicant's failure to comply with an information request may lead to the presumption that had applicant responded to the requirement, the response would have been unfavorable to the applicant. See *In re AOP LLC*, 107 USPQ2d at 1651 (noting because applicant had failed to comply with the examining attorney's information requirement, "to the extent there is any ambiguity regarding the origin and certification of applicant's goods we address both [merely descriptive and deceptively misdescriptive] refusals in the alternative based on the presumption that had applicant directly and fully responded to the examining attorney's inquiries, the responses would have been unfavorable,"); *In re Cheezwhse.com, Inc.*, 85 USPQ2d 1917, 1919 (TTAB 2008) (making factual presumptions unfavorable to the applicant in considering alternative statutory refusals under §§2(e)(2) and 2(e)(3), in view of the applicant's failure to comply with the examining attorney's requirement for information as to the geographic origin of the goods).

If the requested information is confidential, or if, for a valid reason, the applicant does not want to have the information become part of a public record, the applicant should consider redacting such portions of documents prior to their submission. Documents filed in the USPTO by the applicant become part of the official record and will not be returned or removed. 37 C.F.R. §2.25; [TMEP §404](#). Placing confidential information in the record is not required. Sometimes a written explanation or summary will suffice.

## 815 Application Filed on Supplemental Register

Sections 23 through 28 of the Trademark Act, 15 U.S.C. §§1091 through 1096, provide for registration on the Supplemental Register. Certain marks that are not eligible for registration on the Principal Register, but are capable of distinguishing an applicant's goods or services, may be registered on the Supplemental Register. Marks registered on the Supplemental Register are excluded from receiving the advantages of certain sections of the Act of 1946. The excluded sections are listed in 15 U.S.C. §1094. See [TMEP §801.02\(b\)](#).

If the applicant seeks registration on the Supplemental Register, the application should state that registration is requested on the Supplemental Register. If no register is specified, the USPTO will presume that the applicant seeks registration on the Principal Register.

A mark in an application under §66(a) of the Trademark Act, 15 U.S.C. §1141f(a), based on a request for extension of protection of an international registration to the United States, cannot be registered on the Supplemental Register. 15 U.S.C. §1141h(a)(4); 37 C.F.R. §§2.47(c) and 2.75(c).

Upon approval of the mark for registration, the record will indicate that the mark has been "Allowed for Supplemental Registration" rather than that the mark has been approved for publication. Marks on the Supplemental Register are not published for opposition, but are issued as registered marks on the date that they are printed in the *Official Gazette*.

Applications on the Supplemental Register are not subject to opposition under 15 U.S.C. §1063, but are subject to cancellation under 15 U.S.C. §1064. 15 U.S.C. §1092.

See [TMEP §§816](#) *et seq.* regarding amendments to the Supplemental Register.

### 815.01 Marks Eligible for Principal Register Not Registrable on Supplemental Register

A mark that is clearly eligible for the Principal Register may not be registered on the Supplemental Register. An application requesting registration on the Supplemental Register must be amended to the Principal Register, or refused registration, if the mark is registrable on the Principal Register. *Daggett & Ramsdell, Inc. v. I. Posner, Inc.*, 115 USPQ 96 (Comm'r Pats. 1957).

See [TMEP §§816 et seq.](#) regarding amendments to the Supplemental Register.

### 815.02 Elements Required

An application requesting registration on the Supplemental Register should state that the applicant requests registration on the Supplemental Register. If no register is specified, the USPTO will assume that the applicant is requesting registration on the Principal Register.

In an application under §1(b), the mark must be in lawful use in commerce on or in connection with the goods/services before the mark can register. 15 U.S.C. §1091(a). Under 37 C.F.R. §2.47(d), an intent-to-use applicant is not eligible for registration on the Supplemental Register until the applicant has filed an acceptable allegation of use. When the applicant amends to the Supplemental Register after filing an acceptable allegation of use, the effective filing date of the application is the date on which the applicant filed the allegation of use, i.e., the date on which the applicant met the minimum filing requirements of 37 C.F.R. §2.76(e) for an amendment to allege use ( *see* [TMEP §1104.01](#)), or 37 C.F.R. §2.88(e) for a statement of use ( *see* [TMEP §1109.01](#)). 37 C.F.R. §2.75(b). See also [TMEP §§816.02](#) and [1102.03](#) regarding intent-to-use applications and the Supplemental Register.

If an applicant submits a §1(b) application requesting registration on the Supplemental Register for which no acceptable allegation of use has been filed, the examining attorney must refuse registration under §23 of the Trademark Act, 15 U.S.C. §1091, on the ground that the mark is not in lawful use in commerce. The examining attorney will withdraw the refusal if the applicant submits an acceptable allegation of use.

If the application is based solely on §44, the applicant may seek registration on the Supplemental Register without alleging use in commerce or use anywhere in the world. 15 U.S.C. §1126(e); 37 C.F.R. §2.47(b); [TMEP §1009](#). However, the §44 applicant must verify that the applicant has a bona fide intention to use the mark in commerce. 15 U.S.C. §§1126(d) and (e); 37 C.F.R. §§2.34(a)(3)(i) and 2.34(a)(4)(ii).

### **815.03 Filing on Supplemental Register Is Not an Admission That the Mark Has Not Acquired Distinctiveness**

Under 15 U.S.C. §1095, registration of a mark on the Supplemental Register does not constitute an admission that the mark has not acquired distinctiveness.

### **815.04 Basis for Refusal of Registration of Matter That Is Incapable**

When the examining attorney refuses registration on the Supplemental Register on the ground that the proposed mark is incapable of distinguishing the applicant's goods or services, the examining attorney should cite §23(c) of the Trademark Act, 15 U.S.C. §1091(c), as a basis for refusal. *See In re Controls Corp. of America*, 46 USPQ2d 1308, 1309 n.2 (TTAB 1998).

## **816 Amending Application to Supplemental Register**

### **816.01 How to Amend**

If an application meets the requirements noted in [TMEP §815.02](#), the application may be amended by requesting that the words “Principal Register” be changed to “Supplemental Register,” or that “the application is amended to the Supplemental Register.”

An application under §66(a) of the Trademark Act cannot be amended to the Supplemental Register. Section 68(a)(4) of the Act, 15 U.S.C. §1141h(a)(4); 37 C.F.R. §§2.47(c) and 2.75(c).

### **816.02 Effective Filing Date**

#### *Intent-to-Use Applications*

As noted in [TMEP §815.02](#), an intent-to-use applicant may file an amendment to the Supplemental Register only after the applicant has begun using the mark and filed an acceptable allegation of use. 37 C.F.R. §2.47(d). In such a case, if the application is based *solely* on §1(b), the effective filing date of the application is the filing date of the allegation of use, i.e., the date on which the applicant met the minimum filing requirements of 37 C.F.R. §2.76(e) for an amendment to allege use ( *see* [TMEP §1104.01](#)), or 37 C.F.R. §2.88(e) for a statement of use ( *see* [TMEP §1109.01](#)). 37 C.F.R. §2.75(b); [TMEP §1102.03](#). When the applicant files an allegation of use that complies with the minimum requirements of 37 C.F.R. §2.76(e) and an amendment to the Supplemental Register in response to a refusal, the examining attorney must follow the procedures outlined in [TMEP §714.05\(a\)\(i\)](#).

Amendment of an application from the Supplemental to the Principal Register does not change the effective filing date of an application. *Kraft Group LLC v. Harpole*, 90 USPQ2d 1837 (TTAB 2009) (filing date did not change when an applicant who originally sought registration on the Supplemental Register, without alleging use in commerce, amended to seek registration on the Principal Register under §1(b)).

#### *Applications Filed Before November 16, 1989*

Prior to November 16, 1989, one year's lawful use of the mark in commerce was required to apply for registration on the Supplemental Register. Effective November 16, 1989, an applicant may apply for registration on the Supplemental Register at any time after commencing use of the mark in commerce.

An applicant may amend a pending application to request registration on the Supplemental Register at any time after use of the mark has commenced. The date of the amendment to the Supplemental Register becomes the effective filing date of the application if: (1) the applicant had not used the mark in commerce for one year before the application filing date; and (2) the applicant amends to the Supplemental Register on or after November 16, 1989.

See also [TMEP §§206](#) *et seq.* regarding effective filing date.

### **816.03 Amendment to Different Register**

Although there is no restriction on the number of times an applicant may amend from one register to another, one amendment is usually sufficient, and subsequent amendments should be avoided except for unusual circumstances.

### **816.04 Amendment After Refusal**

In an application under §1 or §44 of the Trademark Act, the applicant may amend to the Supplemental Register after a refusal to register on the Principal Register, including a final refusal. If the final refusal was under §2(e)(1), §2(e)(2), or §2(e)(4) of the Trademark Act, 15 U.S.C. §§1052(e)(1), 1052(e)(2), or 1052(e)(4), or on grounds pertaining to other non-inherently distinctive subject matter, amendment to the Supplemental Register is procedurally an acceptable response. *See* 37 C.F.R. §2.75. When the applicant files an allegation of use that complies with the minimum requirements of 37 C.F.R. §2.76(e) and an amendment to the Supplemental Register in response to a refusal, the examining attorney must follow the procedures outlined in [TMEP §714.05\(a\)\(i\)](#).

The applicant may argue the merits of the examining attorney's refusal of registration on the Principal Register and, in the alternative, request registration on the Supplemental Register. Similarly, the applicant

may seek registration on the Principal Register based on acquired distinctiveness under §2(f), 15 U.S.C. §1052(f), and, in the alternative, on the Supplemental Register. See [TMEP §1212.02\(c\)](#).

An amendment to the Supplemental Register after refusal presents a new issue requiring consideration by the examining attorney, unless the amendment is irrelevant to the outstanding refusal. If the examining attorney determines that the proposed mark is incapable of identifying and distinguishing the applicant's goods or services, the examining attorney must issue a nonfinal refusal of registration on the Supplemental Register, under §§23 and 45 of the Trademark Act, 15 U.S.C. §§1091 and 1127. See [TMEP §714.05\(a\)\(i\)](#).

An applicant may not seek registration of a mark on both the Principal and Supplemental Registers in the same application. See 15 U.S.C. §§1051, 1091; 37 C.F.R. §§2.46, 2.47. Therefore, if an applicant responds to a refusal or requirement by expressly amending to the Supplemental Register as to only certain goods/services/classes, the examining attorney will not accept the request to amend unless it is also accompanied by a request to divide. See [TMEP §§801.02\(b\)](#) and [1110-1110.10](#).

A mark in an application under §66(a) of the Trademark Act cannot be amended to the Supplemental Register. Section 68(a)(4) of the Act, 15 U.S.C. §1141h(a)(4); 37 C.F.R. §§2.47(c) and 2.75(c).

### **816.05 Amendment After Decision on Appeal**

An applicant may not amend to the Supplemental Register after the Trademark Trial and Appeal Board has affirmed a refusal of registration on the Principal Register. After having elected one of the remedies available for contesting the basis for the refusal, namely, appeal rather than amendment to the Supplemental Register, and having pursued the remedy to a conclusion, the applicant may not return to its previous position and pursue another remedy for the same refusal anew. In the following cases, the USPTO refused to grant petitions to reopen prosecution and return jurisdiction to the examining attorney to consider an amendment to the Supplemental Register after decision on appeal: *Ex parte Simoniz Co.*, 161 USPQ 365 (Comm'r Pats. 1969); *Ex parte Helene Curtis Industries, Inc.*, 134 USPQ 73 (Comm'r Pats. 1962); *Ex parte Sightmaster Corp.*, 95 USPQ 43 (Comm'r Pats. 1951). See also [TMEP §1501.06](#) and cases cited therein.

The applicant may file a new application requesting registration on the Supplemental Register.

### **817 Preparation of Application for Publication or Registration**

When an application is ready to be approved for publication or registration, the examining attorney must carefully review the application record to ensure the accuracy of the information contained therein and to ensure that all information that should be printed in the *Official Gazette* and on the certificate of registration has been properly entered into the Trademark database. The type of information that should be printed includes:

- (1) Disclaimer statements ([TMEP §§1213](#) *et seq.*);
- (2) Notations of acquired distinctiveness, i.e., “2(f)” or “2(f) in part as to . . .,” as appropriate ([TMEP §§1212](#) *et seq.*);
- (3) Lining and/or stippling statements, if necessary ([TMEP §808.01\(b\)](#));
- (4) Consent to register a name or portrait and/or statements that a name or portrait does or does not identify a living individual ([TMEP §§813.01](#) *et seq.*);
- (5) Translations of non-English wording and transliterations of non-Latin characters in the mark, or statements that the non-English wording or transliterated term has no meaning in English ([TMEP §809.03](#));

- (6) Ownership of related United States registrations ([TMEP §812](#));
- (7) Description of mark statements ([TMEP §§808 et seq.](#));
- (8) Dates of use of the mark in another form ([TMEP §903.07](#)); and
- (9) Color claims and color location statements ([TMEP §§807.07\(a\) et seq.](#)).

All statements in the Trademark database relating to the above-listed items will automatically be printed in the *Official Gazette* and on the registration certificate. Therefore, examining attorneys must ensure that information about these items that should *not* be printed (e.g., claims of ownership of unrelated or cancelled United States registrations, statements such as disclaimers that have been amended and are no longer valid, or unnecessary §2(f) statements) is deleted from the Trademark database. The documents containing the information deleted from the Trademark database will remain of record for informational purposes. It is not necessary to notify the applicant that the information will not be printed. If an applicant provides information by phone that should not be printed (e.g., a statement that a particular term has no meaning in the relevant industry), the examining attorney should enter a Note to the File in the record detailing the information that will not be entered into the database.

In addition, the examining attorney must check to ensure the accuracy of the following critical data elements:

- (1) The mark;
- (2) The register for which application is made;
- (3) The identification of goods and/or services;
- (4) International classification;
- (5) Filing date;
- (6) Dates of use for each class, if applicable;
- (7) Foreign application and registration data, if applicable;
- (8) Whether §1(b) of the Act is a basis for registration;
- (9) In a multiple-basis application, which goods are covered by which basis; and
- (10) In concurrent use cases, information as to the proposed geographic limitation.

If any of the above items are not accurately entered into the Trademark database, the examining attorney must ensure that the necessary correction(s) are made.

If there has been an assignment, the examining attorney must check the records of the Assignment Recordation Branch of the USPTO to ensure that there is a clear chain of title, and ensure that the change of ownership is entered into the Trademark database, if necessary. See [TMEP §§502.02\(a\)](#) and [502.02\(c\)](#).

## 818 Application Checklist

This section may be used to determine whether materials submitted as a trademark application are complete, and to ensure that appropriate requirements and refusals are made. See 37 C.F.R. §2.21 and [TMEP §202](#) regarding the elements that must be received before the USPTO will grant a filing date to an application.

An application for trademark registration must include the following:

- (1) a clear drawing of the mark (37 C.F.R. §§2.21(a)(3), 2.51 through 2.54; [TMEP §§202.01](#) and [807 et seq.](#));
- (2) a verified statement signed by a person properly authorized to sign on behalf of the applicant (15 U.S.C. §§1051(a)(3) and (b)(3); 37 C.F.R. §2.33; [TMEP §§804 et seq.](#));
- (3) a written application that includes the following:
  - (a) the date on which the application was signed;

- (b) the applicant's name, and DBA designation if appropriate (37 C.F.R. §2.32(a)(2); [TMEP §§803.02](#) *et seq.*);
- (c) the applicant's legal entity ([TMEP §§803.03](#) *et seq.*);
- (d) the country of which the applicant is a citizen, or the state or country of incorporation or organization of a juristic applicant (15 U.S.C. §§1051(a)(2) and (b)(2); 37 C.F.R. §§2.32(a)(3)(i) and (ii); [TMEP §803.04](#));
- (e) if the applicant is a domestic partnership or domestic joint venture, the names and citizenship (or state or country of incorporation or organization) of the general partners or active members of the joint venture (37 C.F.R. §2.32(a)(3)(iii) and (iv); [TMEP §§803.03\(b\)](#) and [803.04](#));
- (f) the applicant's domicile and post office address (15 U.S.C. §§1051(a)(2) and (b)(2); 37 C.F.R. §2.32(a)(4); [TMEP §803.05](#));
- (g) a statement that the applicant is using the mark in commerce in a §1(a) application, or has a bona fide intent to use the mark in commerce in an application under §1(b) or §44 (15 U.S.C. §§1051(a)(3)(C), 1051(b)(3)(B), 1126(d)(2), and 1126(e); 37 C.F.R. §§2.33(b)(1) and (2));
- (h) an identification of the goods/services (15 U.S.C. §§1051(a)(2) and (b)(2); 37 C.F.R. §2.32(a)(6); [TMEP §§1402](#) *et seq.*);
- (i) the class(es) of the goods/services, if known to the applicant (37 C.F.R. §2.32(a)(7); [TMEP §§1401](#) *et seq.*);
- (j) the dates when the mark was first used and first used in commerce with the goods/services in each class, in an application under §1(a) (15 U.S.C. §1051(a)(2); 37 C.F.R. §2.34(a)(1)(ii) and (iii); [TMEP §§903](#) *et seq.*);
- (k) a statement that the mark is being used by a related company or companies, in a §1(a) application where use of the mark is only by one or more related companies and inures to the applicant's benefit (37 C.F.R. §2.38; [TMEP §901.05](#));
- (l) if the applicant claims priority under §44(d), a claim of the benefit of the applicant's first-filed foreign application in a treaty country within the preceding six months, specifying the filing date, country, and serial number of such application (15 U.S.C. §1126(d); 37 C.F.R. §2.34(a)(4); [TMEP §§1003](#) *et seq.*);
- (m) a basis for filing (37 C.F.R. §§2.32(a)(5) and 2.34; [TMEP §§806](#) *et seq.*);
- (n) an averment by the person making the verification that he or she believes the applicant to be the owner of the mark sought to be registered in an application under §1(a), or to be entitled to use the mark in commerce in a §1(b) or §44 application (15 U.S.C. §1051(a)(3)(A) and 1051(b)(3)(A); 37 C.F.R. §§2.33(b)(1) and (2); [TMEP §804.02](#));
- (o) an averment that the mark is in use in commerce in a §1(a) application (37 C.F.R. §§2.33(b)(1) and 2.34(a)(1)(i); [TMEP §901](#));
- (p) an averment that, to the best of the verifier's knowledge and belief, no other person, firm, corporation, or association has the right to use such mark in commerce either in the identical form or in such near resemblance as to be likely, when used on or in connection with the goods of the other person, to cause confusion, or to cause mistake, or to deceive (15 U.S.C. §§1051(a)(3)(D) and (b)(3)(D); 37 C.F.R. §§2.33(b)(1) and (2); [TMEP §804.02](#));
- (q) a description of the mark, if the mark is not in standard characters (37 C.F.R. §2.37 and 2.52(b)(5); [TMEP §§808](#) *et seq.*);
- (r) if the mark includes color, a color claim naming the colors that are a feature of the mark, and a separate statement describing where the color(s) appear on the mark. (37 C.F.R. §2.52(b)(1); [TMEP §§807.07\(a\)](#) *et seq.*);
- (s) a translation of non-English wording and transliteration of non-Latin characters in the mark, if any ([TMEP §§809](#) *et seq.*);
- (t) a statement that identifies any living individual whose name or likeness the mark comprises and indicates that his or her consent is of record, or a statement that the name or portrait does not identify a living individual, if appropriate (15 U.S.C. §1052(c); [TMEP §§813.01](#) *et seq.*);
- (u) a claim of the applicant's ownership of prior registrations of the same or similar marks, if any (37 C.F.R. §2.36; [TMEP §812](#)); and

- (v) if the applicant seeks to register the mark in standard characters, a statement that “The mark consists of standard characters without claim to any particular font style, size, or color” ([TMPEP §807.03\(a\)](#));
- (3) a designation of a domestic representative is encouraged, if the applicant is not domiciled in the United States (15 U.S.C. §1051(e); 37 C.F.R. §2.24; [TMPEP §610](#));
- (4) a filing fee for each class of goods/services (15 U.S.C. §§1051(a)(1) and 1051(b)(1); 37 C.F.R. §2.6(a)(1); [TMPEP §§810 et seq.](#));
- (5) in a §44(e) application, a true copy, a photocopy, a certification, or a certified copy of the registration in the applicant’s country of origin, and a translation of the foreign registration if it is not in English (15 U.S.C. §1126(e); 37 C.F.R. §2.34(a)(3)(ii); [TMPEP §§1004.01 et seq.](#)); and
- (6) in a §1(a) application, one specimen for each class (15 U.S.C. §1051(a)(1); 37 C.F.R. §§2.34(a)(1)(iv), 2.56(a), and 2.86(a)(3); [TMPEP §§904 et seq.](#)).

See 15 U.S.C. §§1051(a)(3)(D) and 1052(d), 37 C.F.R. §2.99, and [TMPEP §§1207.04 et seq.](#) regarding requirements for applications for concurrent use registration.

See 37 C.F.R. §2.44 and [TMPEP §§1303 et seq.](#) regarding the requirements for collective trademark and collective service mark applications; 37 C.F.R. §2.44 and [TMPEP §§1304 et seq.](#) regarding collective membership mark applications, and 37 C.F.R. §2.45 and [TMPEP §§1306 et seq.](#) regarding certification mark applications.

The following are substantive grounds for refusal. Registration may be refused on the ground that:

- (1) The applicant is not the owner of the mark (15 U.S.C. §1051; [TMPEP §1201](#));
- (2) The subject matter for which registration is sought does not function as a mark (15 U.S.C. §§1051, 1052, 1053, and 1127) because, for example, the proposed mark:
  - (a) is used solely as a trade name ([TMPEP §1202.01](#));
  - (b) is functional, i.e., consists of a utilitarian design feature of the goods or their packaging (15 U.S.C. §1052(e)(5); [TMPEP §§1202.02\(a\) et seq.](#));
  - (c) is a nondistinctive configuration of the goods or their packaging ([TMPEP §§1202.02\(b\) et seq.](#));
  - (d) is mere ornamentation ([TMPEP §§1202.03 et seq.](#));
  - (e) is the generic name for the goods or services ([TMPEP §§1209.01\(c\) et seq.](#)); or
  - (f) is the title of a single creative work or the name of an author or performing artist ([TMPEP §§1202.08 et seq.](#) and [1202.09 et seq.](#));
- (3) The proposed mark comprises immoral or scandalous matter (15 U.S.C. §1052(a); [TMPEP §1203.01](#));
- (4) The proposed mark is deceptive (15 U.S.C. §1052(a); [TMPEP §§1203.02 et seq.](#));
- (5) The proposed mark comprises matter that may disparage or falsely suggest a connection with persons, institutions, beliefs, or national symbols, or bring them into contempt or disrepute (15 U.S.C. §1052(a); [TMPEP §§1203.03 et seq.](#));
- (6) The proposed mark comprises the flag, coat of arms, or other insignia of the United States or any State, municipality, or foreign nation (15 U.S.C. §1052(b); [TMPEP §§1204 et seq.](#));
- (7) The applicant’s use of the mark is or would be unlawful because it is prohibited by statute ([TMPEP §§1205 et seq.](#));
- (8) The proposed mark comprises a name, portrait, or signature identifying a particular living individual without the individual’s written consent, or the name, portrait, or signature of a deceased president of the United States during his widow’s life, without written consent of the widow (15 U.S.C. §1052(c); [TMPEP §§1206 et seq.](#));
- (9) The proposed mark so resembles a previously registered mark as to be likely, when used with the applicant’s goods and/or services, to cause confusion or mistake, or to deceive (15 U.S.C. §1052(d); [TMPEP §§1207 et seq.](#));
- (10) The proposed mark is merely descriptive or deceptively misdescriptive of the applicant’s goods and/or services (15 U.S.C. §1052(e)(1); [TMPEP §§1209 et seq.](#));

(11) The proposed mark is primarily geographically descriptive of the applicant's goods and/or services (15 U.S.C. §1052(e)(2); [TMEP §1210.01\(a\)](#));

(12) The proposed mark is primarily geographically deceptively misdescriptive of the applicant's goods and/or services (15 U.S.C. §1052(e)(3); [TMEP §1210.01\(b\)](#)); or

(13) The proposed mark is primarily merely a surname (15 U.S.C. §1052(e)(4); [TMEP §§1211 et seq.](#)).

An applicant may submit a claim and proof of distinctiveness of the mark or a portion of the mark, under §2(f). See 15 U.S.C. §§1052(f); [TMEP §§1212 et seq.](#)

A mark that is capable of distinguishing the applicant's goods or services may be registrable on the Supplemental Register, in an application under §1 or §44 of the Trademark Act. See 15 U.S.C. §§1091 through 1096; [TMEP §§815 et seq.](#)

The examining attorney will require a disclaimer of an unregistrable component of an otherwise registrable mark. See 15 U.S.C. §1056; [TMEP §§1213 et seq.](#)

## 819 TEAS Plus

TEAS Plus permits an applicant who files an application for registration of a trademark or service mark based on §1 or §44 of the Trademark Act, 15 U.S.C. §1051 or §1126, to pay a reduced filing fee, if the applicant:

- (1) Files a complete application, using the USPTO's TEAS Plus form, available at <http://www.uspto.gov>;
- (2) Agrees to file certain communications regarding the application, such as responses to Office actions, through TEAS; and
- (3) Agrees to receive communications concerning the application by e-mail.

A notice of final rulemaking setting forth the requirements for a TEAS Plus application was published at [70 Fed. Reg. 38768 \(July 6, 2005\)](#).

The requirements that must be met at the time of filing are set forth in 37 C.F.R. §2.22 ( see [TMEP §§819.01 et seq.](#)), and the requirements that must be met during the pendency of the application are set forth in 37 C.F.R. §2.23 ( see [TMEP §§819.02 et seq.](#)). If an applicant files a TEAS Plus application but does not meet these requirements, the applicant will be required to pay an additional TEAS Plus processing fee, i.e., the difference between the filing fee for a regular TEAS application and the reduced fee for a TEAS Plus application. 37 C.F.R. §2.6(a)(1)(iv). See [TMEP §819.04](#).

### 819.01 TEAS Plus Filing Requirements

To be eligible for the reduced fee, a TEAS Plus application must request registration of a trademark or service mark on the Principal Register, and must include the following at the time of filing:

- *Applicant's Name and Address*;
- *Applicant's Legal Entity and Citizenship* (or state or country of incorporation of a juristic applicant);
- *Paper Correspondence Address*. A name and address for paper correspondence;
- *E-mail Correspondence Address and Authorization*. An e-mail correspondence address and authorization for the USPTO to send correspondence to the applicant by e-mail;
- *Filing Basis or Bases*. One or more bases for filing, and all requirements of 37 C.F.R. §2.34 for each basis;

- *Identification and Classification of Goods/Services*. A correctly classified and definite identification of goods/services taken directly from the USPTO's *Acceptable Identification of Goods and Services Manual* ("USPTO ID Manual"), at <http://tess2.uspto.gov/netathtml/tidm.html>;
- *Filing Fee*. A filing fee per class for all classes listed in the application;
- *Signed Verification*. A verified statement, dated and signed by a properly authorized person;
- *Drawing*. A clear drawing of the mark comprising either: (1) a claim of standard characters and the mark, typed in the appropriate TEAS Plus field; or (2) a digitized image of a mark in special form. If the mark includes color, the digitized image must show the mark in color;
- *Color Claim and Description of Color(s)*. If the mark includes color, a claim that the color(s) is a feature of the mark; and a statement in the "Description of the Mark" field naming the color(s) and describing where the color(s) appears on the mark;
- *Description of Mark*. If the mark is not in standard characters, a description of the mark;
- *Prior Registrations for Same Mark*. If the applicant owns one or more registrations for the same mark, a claim of ownership of the registration(s), identified by the United States registration number(s);
- *Translation*. If the mark includes foreign wording, a translation of that wording;
- *Transliteration of Non-Latin Characters*. If the mark includes non-Latin characters, a transliteration of those characters;
- *Consent to Registration of Name or Portrait*. If the mark includes an individual's name or portrait, either: (1) a statement that identifies the living individual whose name or likeness the mark comprises, and written consent of the individual; or (2) a statement that the name or portrait does not identify a living individual;
- *Concurrent Use*. If the application is a concurrent use application, the application must meet the requirements of 37 C.F.R. §2.42;
- *Multiple-Class Applications*. If the application contains goods/services in more than one class, the application must meet the requirements of 37 C.F.R. §2.86; and
- *Section 44 Applications*. In a §44 application, the scope of the goods/services covered by the §44 basis may not exceed the scope of the goods/services in the foreign application or registration.

37 C.F.R. §2.22(a).

As long as the applicant has made a reasonable attempt to supply the required information in the initial application, the applicant has met the TEAS Plus filing requirements and generally will not lose TEAS Plus status if the information is later amended, either in response to an examining attorney's requirement or on the applicant's initiative, as long as the amendment is filed through TEAS or entered by examiner's amendment. See [TMEP §§819.01\(a\) through 819.01\(q\)](#) for further guidance as to when the additional fee will be required in particular situations.

If an applicant files a TEAS Plus application but does not meet these requirements, the examining attorney must issue an Office action requiring the applicant to pay the additional TEAS Plus processing fee. 37 C.F.R. §§2.6(a)(1)(iv) and 2.22(b). If a required field is filled with irrelevant or clearly inappropriate information, the required element will be considered omitted (e.g., if the notation "???" is entered as the translation in a mark that includes foreign wording).

When an application loses TEAS Plus status, the application will be examined as a regular TEAS application. The application will retain its original filing date, assuming that the initial application met the minimum filing requirements required of all applications, which are set forth in 37 C.F.R. §2.21. The examining

attorney must perform the proper transaction to change the application status in the USPTO's automated systems.

### **819.01(a) Type of Mark**

TEAS Plus is available only to applicants seeking registration of a trademark or service mark on the Principal Register under §1 and/or §44 of the Trademark Act. Applications for certification marks, collective marks, and collective membership marks and applications for registration on the Supplemental Register cannot be filed using TEAS Plus. 37 C.F.R. §2.22(c).

The additional fee will be required if the mark in a TEAS Plus application is amended to a collective, collective membership, or certification mark.

No additional fee will be required if the application is amended from the Principal to the Supplemental Register, as long as the amendment is filed through TEAS or entered by examiner's amendment.

TEAS Plus does not apply to applications filed under §66(a) of the Act, 15 U.S.C. §1141f(a), because they cannot be filed through TEAS.

### **819.01(b) Applicant's Name and Address**

The application must include the applicant's name and address. 37 C.F.R. §2.22(a)(1). The additional fee will be required if this information is omitted. 37 C.F.R. §§2.6(a)(1)(iv) and 2.22(b).

If the application includes this information, no additional fee will be required if the application is amended to clarify the information or to correct an inadvertent error, as long as the amendment is filed through TEAS or entered by examiner's amendment.

### **819.01(c) Applicant's Legal Entity and Citizenship**

The application must include the applicant's legal entity. 37 C.F.R. §2.22(a)(2). The application must also set forth the citizenship of an individual applicant, or the state or country of incorporation or organization of a juristic applicant. 37 C.F.R. §2.22(a)(3). The additional fee will be required if this information is omitted. 37 C.F.R. §§2.6(a)(1)(iv) and 2.22(b).

If the application includes this information, no additional fee will be required if the application is amended to clarify the information or correct an inadvertent error, as long as the amendment is filed through TEAS or entered by examiner's amendment.

Trademark Rule 2.22(a)(4) requires that where the applicant is a partnership, the application must include the names and citizenship of the applicant's general partners. However, the USPTO has waived the requirement that this information be provided at the time of filing. If this information is not included in the initial application, the applicant will not lose TEAS Plus status, but the information will be required before

the mark is approved for publication. *Note:* The requirement for the names and citizenship of the general partners applies only to domestic partnerships. 37 C.F.R. §2.32(a)(3)(iii); [TMEP §803.04](#).

### **819.01(d) Name and Address for Paper Correspondence**

The application must include a name and address to which the USPTO can send paper correspondence. 37 C.F.R. §2.22(a)(5). The additional fee will be required if this information is omitted. 37 C.F.R. §§2.6(a)(1)(iv) and 2.22(b). The application must also include an e-mail address and an authorization for the USPTO to send correspondence by e-mail. 37 C.F.R. §2.22(a)(6); [TMEP §819.01\(e\)](#). The USPTO will send most official correspondence to the applicant by e-mail, but a paper correspondence address is also required.

If the application includes this information, the applicant will not lose TEAS Plus status if the application is amended to clarify the information or to correct an inadvertent error, as long as the amendment is filed through TEAS or entered by examiner's amendment.

### **819.01(e) E-mail Address and Authorization for the USPTO to Send Correspondence By E-Mail**

The application must include an e-mail address and an authorization for the USPTO to send correspondence by e-mail. 37 C.F.R. §2.22(a)(6). TEAS Plus will not accept transmission of an application that does not include this information.

If the application includes an e-mail address and an authorization for the USPTO to send correspondence by e-mail, no additional fee will be required if the e-mail address is amended to correct an inadvertent error in the address, as long as the amendment is filed through TEAS or entered by examiner's amendment, or if the applicant changes the e-mail address via TEAS ( *see* [TMEP §609.02\(b\)](#)).

The additional fee will be required if the applicant or the applicant's qualified practitioner files a change of correspondence address, and the correspondence address change does not authorize e-mail correspondence. 37 C.F.R. §§2.6(a)(1)(iv), 2.23(a)(2) and 2.23(b); [TMEP §819.02\(a\)](#). The applicant cannot avoid paying the fee by subsequently agreeing to authorize e-mail correspondence.

### **819.01(f) Basis or Bases for Filing**

The application must include at least one basis for filing under §1 and/or §44 of the Act that meets the requirements of 37 C.F.R. §2.34. If more than one basis is set forth, the applicant must comply with the requirements of 37 C.F.R. §2.34 for each asserted basis. 37 C.F.R. §2.22(a)(7). Otherwise, applicant will lose TEAS Plus status and will be required to pay the TEAS Plus processing fee.

In a multiple-basis application, if the applicant fails to comply with the requirements of 37 C.F.R. §2.34 for one of the bases claimed in the initial application, the applicant cannot avoid paying the TEAS Plus processing fee by deleting the relevant basis.

#### **819.01(f)(i) Section 1(a) - Use in Commerce**

The requirements for establishing a §1(a) basis are set forth in 37 C.F.R. §2.34(a)(1). *See also* [TMEP §806.01\(a\)](#).

*Specimen(s).* The application must include one specimen showing how the applicant uses the mark in commerce for each class of goods/services. TEAS Plus will not accept transmission of a §1(a) application that does not include an attachment in the “Specimen” field. As long as the specimen depicts the mark, no additional fee will be required if registration is refused because the specimen is unacceptable.

An additional fee will be required if the mark on the specimen is materially different from the mark on the drawing. If the marks on the specimen and the drawing are materially different, the applicant has, in effect, failed to submit a specimen showing use of the mark sought to be registered. However, no additional fee will be required if the difference between the mark on the specimen and the mark on the drawing is not material.

*Example:* The mark on the drawing is ZZZZ, and the mark on the specimen is ZEBRAMAX. Amending the drawing to match the specimen would materially alter the mark on the drawing, so the applicant, in effect, has failed to submit a specimen showing use of the mark on the drawing. As a result, the applicant loses TEAS Plus status and the examining attorney will require the additional fee.

*Example:* The mark on the drawing is ZEBRAMAXX, and the mark on the specimen is ZEBRAMAX. The mark on the drawing is not a substantially exact representation of the mark on the specimen, but the difference between the marks is not material, so the applicant may amend the drawing, or submit a substitute specimen showing use of the mark on the drawing, without paying the additional fee.

*Verified Statement of Use in Commerce.* The application must include a verified statement that the mark is in use in commerce on or in connection with the goods/services listed in the application. The TEAS Plus form will always include this statement when the applicant asserts a §1(a) basis. See [TMPEP §819.01\(i\)](#) regarding verification.

*Dates of Use.* The application must include a date of first use of the mark anywhere and a date of first use of the mark in commerce for each class of goods/services. When the applicant indicates that it is filing under §1(a), the TEAS Plus form brings up free-text fields in which applicant must type the date of first use anywhere and date of first use in commerce. TEAS Plus will not accept the transmission unless these fields are completed in the appropriate format (MM/DD/YYYY). The applicant will not lose TEAS Plus status if the dates are later amended, as long as the amendment is filed through TEAS.

### **819.01(f)(ii) Section 1(b) - Intent to Use**

A §1(b) application must include a verified statement that the applicant has a bona fide intention to use the mark in commerce on or in connection with the goods/services listed in the application. 37 C.F.R. §2.34(a)(2). The TEAS Plus form will always include this statement when the applicant asserts a §1(b) basis. See [TMPEP §819.01\(i\)](#) regarding verification.

### **819.01(f)(iii) Section 44(e) - Foreign Registration**

The requirements for establishing a §44(e) basis are set forth in 37 C.F.R. §2.34(a)(3). See also [TMPEP §806.01\(d\)](#). The application must include a digitized image of a copy, a certification, or a certified copy of a registration in the applicant’s country of origin showing that the mark has been registered in that country, and that the registration is in full force and effect. If the foreign registration is not in the English language, the applicant must submit a translation.

The following are examples of situations where an additional fee will be required:

- *Foreign Registration Omitted.* TEAS Plus will not accept transmission of a §44(e) application that does not include an attachment in the “Foreign Registration” field. The additional fee will be required

if the applicant attaches inappropriate material, such as a copy of the drawing or of the foreign application. 37 C.F.R. §§2.6(a)(1)(iv) and 2.22(b).

- *Translation of Foreign Registration Omitted.* 37 C.F.R. §§2.22(a)(7) and 2.34(a)(3)(iii). The additional fee will be required if the foreign registration is not in the English language and the applicant does not include a translation.
- *Mark Not on Foreign Registration.* The additional fee will be required if the mark shown in the drawing does not appear on the foreign registration.
- *Material Alteration.* The additional fee will be required if the mark on the drawing is a material alteration of the mark on the foreign registration. However, no additional fee will be required if the difference between the mark on the foreign registration and the mark on the drawing is not material.

*Example:* The mark on the drawing is HI-TECH, and the mark on the foreign registration is HI-TECH! The mark on the drawing is unacceptable because it is not a substantially exact representation of the mark on the foreign registration, but the difference between the marks is not material, so the applicant may amend the drawing to match the foreign registration without paying the additional fee.

*Example:* The mark on the drawing is HI-TECH, and the mark on the foreign registration is TECHNIQUES. Amending the drawing to match the foreign registration would materially alter the mark on the drawing. The applicant loses TEAS Plus status and must pay the additional fee.

- *Goods/Services Exceed Scope of Foreign Registration.* The additional fee will be required if the examining attorney determines that the goods/services for which registration is sought under §44(e) in the United States application exceed the scope of those in the foreign registration. 37 C.F.R. §2.22(a)(8).

*Foreign Registration Due to Expire - No Fee Required.* No additional fee will be required if the foreign registration will expire before the United States registration will issue, and the applicant does not submit evidence in the initial application that the foreign registration will be in effect when the United States registration issues. Prior to registration, however, the applicant will be required to submit a digitized image of a copy, a certification, or a certified copy from the country of origin to establish that the foreign registration has been renewed.

*Bona Fide Intention to Use the Mark in Commerce.* The application must include a verified statement that the applicant has a bona fide intention to use the mark in commerce on or in connection with the goods/services listed in the application. The TEAS Plus form will always include this statement when the applicant asserts a §44(e) basis. See [TMEP §819.01\(I\)](#) regarding verification.

### **819.01(f)(iv) Section 44(d)**

The requirements for establishing a filing basis under §44(d) are set forth in 37 C.F.R. §2.34(a)(4). See also [TMEP §806.01\(c\)](#).

*Claim of Priority Filed Within Six Months of Foreign Filing.* The additional fee will be required if the claim of priority is not filed through TEAS within six months of the filing date of the foreign application. The applicant can submit the priority claim after the filing date of the United States application, as long as the priority claim is filed within six months after the foreign filing.

*First Filed Application.* The applicant must: (a) specify the filing date and country of the first regularly filed foreign application; or (b) state that the application is based upon a subsequent regularly filed application in the same foreign country, and that any prior-filed application has been withdrawn, abandoned, or otherwise disposed of, without having been laid open to public inspection and without having any rights outstanding,

and has not served as a basis for claiming a right of priority. The additional fee will be required if applicant does not meet this requirement.

*Goods/Services Exceed Scope of Foreign Registration.* The additional fee will be required if the examining attorney determines that the goods/services for which registration is sought under §44 in the United States application exceed the scope of those in the foreign application or registration. 37 C.F.R. §2.22(a)(8).

*Serial Number of Foreign Application Omitted - No Fee Required.* No additional fee is required if a §44(d) filing basis is asserted and the applicant fails to specify the serial number of the foreign application in the initial application, because some applicants will not yet know the serial number of the foreign application at the time of filing in the United States. However, the serial number must be provided before the application can be approved for publication. 37 C.F.R. §2.34(a)(4)(i)(A).

*Bona Fide Intention to Use the Mark in Commerce.* The application must include a verified statement that the applicant has a bona fide intention to use the mark in commerce on or in connection with the goods/services listed in the application. The TEAS Plus form will always include this statement when the applicant asserts a §44(d) basis. See [TMEP §819.01\(i\)](#) regarding verification.

### **819.01(g) Identification and Classification of Goods/Services**

*USPTO ID Manual.* The application must include correctly classified goods and/or services, with an identification of goods/services from the USPTO ID Manual. 37 C.F.R. §2.22(a)(8). The TEAS Plus form will automatically provide the correct class for goods/services selected from the USPTO ID Manual, and it will not permit the applicant to edit the “Classification” field.

To enter an identification of goods/services, the TEAS Plus form will instruct the applicant to enter search terms appropriate for the desired goods/services within the identified field on the TEAS Plus form. The TEAS Plus system will then retrieve relevant entries from the USPTO ID Manual, and the applicant must select one or more of the entries.

*Amendment of Identification.* No additional fee is required if the identification of goods/services is acceptable and correctly classified as filed, but is later amended, either in response to a requirement or on the applicant’s initiative. This is true even if the amendment is unacceptable.

*Example:* The goods are identified in the application as “pants” and “shirts,” and the applicant files a voluntary amendment to “pants, shirts and dresses.” The examining attorney will refuse the amended identification because “dresses” is beyond the scope of the original identification (37 C.F.R. §2.71(a)), but no additional fee will be required.

*Fill-in-the-Blank Element.* Some USPTO ID Manual entries require the applicant to complete parenthetical information (e.g., “specify the function of the programs”). The display of such entries will include a free-text field so the applicant can type the necessary information, following the instructions within the listing. If an applicant attempts to use such a listing without completing the required information, TEAS Plus will generate an error message.

No additional fee is required if the identification of goods/services has a fill-in-the-blank element, and the applicant inserts information that is a reasonable attempt to supply the required information in accordance with the instructions, but requires amendment because the inserted information: (1) sets forth goods/services in another class (e.g., headgear, namely, football helmets (headgear that is clothing is in Class 25, helmets are in Class 9)); (2) is indefinite (e.g., maternity clothing, namely, sportswear); or (3) is inaccurate ( [see TMEP §1402.05](#)).

However, an additional fee is required if the applicant leaves the fill-in-the-blank element empty, inserts information that is clearly inappropriate for the selected identification, or inserts additional goods/services that are unrelated to the selected identification. For example, an additional fee is required if the goods/services in the original application are identified as follows:

- “processed meat, namely, *laptop computers*;”
- “bicycle parts, namely, *bicycle parts*;”
- “cutlery, namely forks, knives, and *rain jackets for dogs*;” or
- “sound recordings featuring music, *and sunglasses*.”

In these situations, the applicant has, in effect, failed to submit an identification from the USPTO ID Manual. The additional fee is required even if the applicant deletes the unacceptable terminology.

*Classification.* Trademark Rule 2.22(a)(8) indicates that if the applicant classified the goods/services in the wrong class in the initial application, the applicant will lose TEAS Plus status and will be required to pay the additional fee for all classes in the application. However, this is unlikely to occur, because the TEAS Plus form will automatically provide the correct class for goods/services selected from the USPTO ID Manual, and it will not permit the applicant to edit the “Classification” field. No additional fee is required if the identification is acceptable and correctly classified as filed, but is amended during examination to add or substitute another class (e.g., amendment from “headwear” in Class 25 to “protective helmets for sports” in Class 9; or amendment from “footwear” in Class 25 to “orthopedic footwear” in Class 10), as long as the amendment is filed through TEAS or entered by examiner’s amendment. See [TMEP §819.03](#) regarding the addition of classes to a TEAS Plus application.

*Section 44 - Goods/Services Exceed Scope of Foreign Registration.* In a §44 application, the additional fee is required if the examining attorney determines that the goods/services for which registration is sought under §44 in the United States application exceed the scope of those in the foreign registration. 37 C.F.R. §2.22(a)(8).

### **819.01(h) Filing Fee**

The application must include a filing fee for each class of goods/services as required by 37 C.F.R. §2.6(a)(1)(iii). TEAS Plus will not accept transmission of an application that does not include a fee for each class.

See [TMEP §819.03](#) regarding the fee for adding a class during examination.

### **819.01(i) Drawing**

The application must include a clear drawing of the mark comprising either: (1) a claim of standard characters and the mark, typed in the appropriate TEAS Plus field; or (2) a digitized image of a mark in special form. 37 C.F.R. §2.22(a)(12). TEAS Plus requires the applicant to indicate whether the mark is stylized or in standard characters, and will not accept the transmission unless the applicant selects one of these options. If the applicant claims standard characters, TEAS Plus will not accept transmission unless something has been typed in the appropriate field. The TEAS Plus system will generate a digitized image of the standard character mark and attach it to the application.

A “clear drawing of the mark” is the same standard used in 37 C.F.R. §2.21(a)(3), which sets forth the requirements for receipt of an application filing date. Thus, if the TEAS Plus application does not include

a clear drawing of the mark, the application will be denied a filing date, in accordance with standard procedures for processing informal applications ( *see* [TMPEP §§202](#) *et seq.* and [204](#) *et seq.*). If the application meets the requirement for a clear drawing of the mark, the applicant will not lose TEAS Plus status if the examining attorney requires amendment of the drawing because it does not meet all the requirements of 37 C.F.R. §§2.51 through 2.53.

*Marks That Include Color.* If the mark includes color, the drawing must show the mark in color, or the applicant will lose TEAS Plus status. 37 C.F.R. §2.22(a)(12). The application must also include a color claim and a statement in the “Description of the Mark” field naming the color(s) and describing where they appear on the mark. 37 C.F.R. §§2.22(a)(14) and 2.52(b)(1). *See* [TMPEP §819.01\(j\)](#).

See [TMPEP §§807.03](#) *et seq.* for further information about standard character drawings, and [TMPEP §807.05\(c\)](#) for the requirements for digitized images.

### **819.01(j) Color Claim**

As noted above, if the mark includes color, the drawing must show the mark in color. 37 C.F.R. §2.22(a)(12). In addition, the application must include: (1) a claim that the color(s) is a feature of the mark; and (2) a statement in the “Description of the Mark” field naming the color(s) and describing where the color(s) appear on the mark. 37 C.F.R. §§2.22(a)(14) and 2.52(b)(1). The TEAS Plus form includes a checkbox in the “Color(s) Claimed” field to indicate whether the mark is in color. When the applicant checks this box, the applicant must name the colors claimed in the text field below the checkbox in the same “Color(s) Claimed” field. The applicant must then enter the color location statement in a separate “Description of the Mark” field.

As long as the initial application has a color drawing and applicant makes a reasonable attempt to identify the colors claimed in either the “Color(s) Claimed” field or the “Description of the Mark” field, no additional fee is required if the application is amended to clarify the information or to correct an inadvertent error, as long as the amendment is filed through TEAS or entered by examiner’s amendment. For example, applicant will not lose TEAS Plus status if the list of colors claimed is incomplete, or if the mark description does not identify the location of the colors claimed. However, the additional fee is required if the applicant fails to identify any colors.

See [TMPEP §§807.07\(a\)](#) *et seq.* for further information about color claims.

### **819.01(k) Description of the Mark**

If the mark is not in standard characters, the application must include a description of the mark. 37 C.F.R. §§2.22(a)(15) and 2.37. The applicant must enter the description in the “Description of the Mark” field of the TEAS Plus application.

TEAS Plus will not accept transmission of an application that does not include either: (1) a standard character claim; or (2) a description of the mark. If the applicant makes a good faith effort to describe the mark, no additional fee is required if the description is later amended, either in response to an examining attorney’s requirement or on applicant’s initiative, as long as the amendment is filed through TEAS or entered by examiner’s amendment. However, the additional fee is required if the applicant enters completely inappropriate information in the “Description of the Mark” field.

If the mark includes color, the “Description of the Mark” field should include a statement naming the color(s) and describing where the color(s) appear on the mark. See [TMEP §819.01\(j\)](#) regarding color claims.

The examining attorney should not require the applicant to delete an accurate description of the mark.

See [TMEP §§808](#) *et seq.* for further information about descriptions of the mark.

### **819.01(l) Verification**

The application must include a verified statement that meets the requirements of 37 C.F.R. §2.33, dated and signed by a person properly authorized to sign on behalf of the applicant pursuant to §2.193(e)(1). 37 C.F.R. §2.22(a)(11). If the application includes a signed verification, no additional fee is required if a substitute verification is later submitted, as long as it is submitted through TEAS.

To provide a signature, the applicant has the option of: (1) entering any combination of letters, numbers, spaces, and/or punctuation marks that the filer has adopted as a signature, placed between two forward slash (“/”) symbols in the TEAS Plus form (37 C.F.R. §2.193(c)(1)); (2) signing the verified statement in the traditional pen-and-ink manner, and attaching an image file of the signed document to the TEAS Plus form; or (3) completing the application online and e-mailing it to the signatory for electronic signature and automatic return via TEAS to the party who requested the signature. See [TMEP §611.01\(c\)](#). If the applicant elects to attach a verified statement with a pen-and-ink signature, the additional fee will be required if the attachment:

- fails to include a signature; or
- does not display the text of the verification and declaration (i.e., only displays a signature).

### **819.01(m) Translation and/or Transliteration**

If the mark includes non-English wording, the application must include an English translation of that wording. 37 C.F.R. §§2.22(a)(16) and 2.32(a)(9). If the mark includes non-Latin characters, the application must include a transliteration of those characters. 37 C.F.R. §§2.22(a)(17) and 2.32(a)(10). The TEAS Plus form does not include any edits to determine when a translation and/or transliteration is required.

If a translation and/or transliteration is omitted, the examining attorney will issue an Office action requiring the additional fee. 37 C.F.R. §§2.6(a)(1)(iv) and 2.22(b). If the initial application includes a translation and/or transliteration, no additional fee is required if the translation/transliteration is later amended, as long as the amendment is filed through TEAS or entered by examiner’s amendment. However, the additional fee will be required if the translation or transliteration comprises inappropriate material, such as the notation “???”

### **819.01(n) Multiple-Class Applications**

If the application contains goods/services in more than one class, the application must meet the requirements of 37 C.F.R. §2.86. 37 C.F.R. §2.22(a)(9). That is, the application must include:

- (1) An identification of goods/services in each class, from the USPTO ID Manual. 37 C.F.R. §§2.22(a)(8) and 2.86(a)(1). See [TMEP §819.01\(g\)](#);
- (2) An application filing fee for each class. 37 C.F.R. §§2.6(a)(1)(iii) and 2.86(a)(2). TEAS Plus will not accept transmission of an application that does not include a filing fee for each class; and

- (3) Either (a) dates of use and one specimen for each class, in an application under §1(a) of the Trademark Act; or (b) a statement that the applicant has a bona fide intention to use the mark in commerce on or in connection with all the goods/services specified in each class, in an application under §1(b) or §44 of the Trademark Act. 37 C.F.R. §2.86(a)(3).

### **819.01(o) Consent to Registration of Name or Portrait**

If the mark includes a name or portrait that could reasonably be perceived as the name or portrait of a particular living individual ( *see* [TMEP §§813](#) and [1206 et seq.](#)), the application must include either: (1) a statement that identifies the living individual whose name or likeness the mark comprises and written consent of the individual; or (2) a statement that the name or portrait does not identify a living individual. 37 C.F.R. §2.22(a)(18).

The additional fee is required if the mark includes an individual's name or portrait, and these statements are omitted. 37 C.F.R. §§2.6(a)(1)(iv) and 2.22(b).

*Exception:* If the applicant fails to include a consent to use a name or portrait that appears in the mark, but the individual's consent can be presumed because the individual named or shown in the mark personally signed the application ( *see* [TMEP §1206.04\(b\)](#)), the applicant will not lose TEAS Plus status.

If consent is of record in a valid registration owned by applicant, the applicant may satisfy the requirement for a consent statement by claiming ownership of the existing registration. *See* [TMEP §1206.04\(c\)](#).

If the initial application includes a statement regarding the name or likeness of an individual, no additional fee is required if the statement is later amended, as long as the amendment is filed through TEAS or entered by examiner's amendment.

The additional fee should be required only where it is clear that the name or likeness could reasonably be perceived as that of a living individual. The fee should be charged if the mark is comprised of a portrait, or of a first and last name. If the mark is comprised of a title, such as Mrs. Smith, a surname, or a first name only, the examining attorney must consider whether the name is that of a particular living individual ( *see* [TMEP §1206.03](#)), but should not require the additional fee.

*Example:* The mark is STEVEN JONES, and the application is silent as to whether this name identifies a living individual. The examining attorney must: (1) inquire whether the name or likeness is that of a specific living individual and advise the applicant that, if so, the individual's written consent to register the name must be submitted; and (2) require the additional TEAS Plus processing fee.

*Example:* The mark is DOCTOR JONES, and the application is silent as to whether this name identifies a living individual. If there is evidence that the name identifies an individual who is generally known or well known in the field relating to the relevant goods or services ( *see* [TMEP §§1206.02](#) and [1206.03](#)), the examining attorney must issue an inquiry and require the individual's written consent to register the name, but should not require the additional TEAS Plus processing fee. If there is no evidence that the individual is generally known or well known in the relevant field, the examining attorney should not inquire or require the additional fee.

*Example:* The mark is STEVEN, and the application is silent as to whether this name identifies a living individual. If there is no evidence that the individual is generally known or well known in the relevant field, the examining attorney should not inquire or require the additional fee. If there is evidence that the first name identifies an individual who is generally known or well known in the relevant field, the examining attorney must issue an inquiry and require the individual's written consent to register the name, but should not require the additional TEAS Plus processing fee.

See [TMEP §1206.03](#) for further information as to when the examining attorney should issue an inquiry as to whether a name or likeness is that of a particular living individual, and [TMEP §1206.02](#) regarding the connection between the individual and the relevant goods or services.

### **819.01(p) Prior Registration of the Same Mark**

If the applicant owns one or more registrations for the *same* (i.e., identical) mark as of the application filing date, the application must include a claim of ownership of the prior registration(s), identified by the United States registration number(s). 37 C.F.R. §§2.22(a)(19) and 2.36. See [TMEP §812](#). The TEAS Plus form accepts the entry of up to three registration numbers. If the applicant owns more than three registrations for the same mark, the TEAS Plus applicant may check the box “and others” after entering the numbers for the three claimed registrations.

The additional fee is required if a claim of ownership of registration(s) for the *same* mark is omitted. 37 C.F.R. §§2.6(a)(1)(iv) and 2.22(b). If the initial application includes an ownership claim for the same mark, the application will not lose TEAS Plus status if the claim is later amended, as long as the amendment is filed through TEAS or entered by examiner’s amendment.

No additional fee is required if a list of claimed registrations for the same mark is incomplete (e.g., applicant owns three registrations for the same mark and only claims two of them), but the examining attorney may require a claim of ownership of additional registrations for the same mark during examination.

No additional fee is required if an applicant fails to claim ownership of a registration(s) for a *similar* mark (e.g., mark in application is ABC and applicant fails to claim ownership of a registration for ABC WEB BUILDERS). However, the examining attorney will require a claim of ownership of similar marks during examination, where appropriate.

### **819.01(q) Concurrent Use Applications**

If the applicant seeks concurrent use registration, the application must comply with the requirements of 37 C.F.R. §2.42. 37 C.F.R. §2.22(a)(20). That is, the applicant must:

- Set forth the geographic area, the goods, and the mode of use for which applicant seeks registration; and
- State, to the extent of the applicant’s knowledge, the concurrent lawful use of the mark by others, setting forth their names and addresses; registrations issued to or applications filed by such others, if any; the geographic areas of such use; the goods on or in connection with which such use is made; the mode of such use; and the periods of such use.

If the elements for a concurrent use application are omitted, the examining attorney will issue an Office action requiring the additional fee. 37 C.F.R. §§2.6(a)(1)(iv) and 2.22(b). If the initial application includes a concurrent use claim with the proper elements, the application will not lose TEAS Plus status if an element is later amended, as long as the amendment is filed through TEAS or entered by examiner’s amendment.

See [TMEP §1207.04\(d\)\(i\)](#) for further information about the requirements for concurrent use applications.

## **819.02 Additional Requirements for a TEAS Plus Application**

### **819.02(a) Receipt of Communications by E-Mail**

Trademark Rule 2.22(a)(6), 37 C.F.R. §2.22(a)(6), requires that the application as filed include an e-mail address for correspondence and an authorization for the USPTO to send correspondence concerning the application to the applicant by e-mail. Trademark Rule 2.23(a)(2), 37 C.F.R. §2.23(a)(2), requires that the applicant maintain a valid e-mail correspondence address, and continue to receive correspondence by e-mail throughout the pendency of the application.

The additional fee will be required if the TEAS Plus applicant (or the applicant's qualified practitioner) files a change of correspondence address, and the correspondence address change does not authorize e-mail correspondence, or if it comes to the attention of the USPTO that the applicant has a change in e-mail address, but does not notify the USPTO of the new e-mail address, thereby causing correspondence from the USPTO to be undeliverable. 37 C.F.R. §§2.6(a)(1)(iv) and 2.23(b). The applicant cannot avoid paying the fee by subsequently agreeing to authorize e-mail correspondence.

When issuing a nonfinal action on a TEAS Plus application, the examining attorney will notify the applicant that the applicant must maintain a valid e-mail correspondence address, and continue to accept correspondence from the USPTO via e-mail throughout the examination process in order to avoid the additional fee. If the applicant files a request to change the correspondence address that does not authorize e-mail correspondence, the requirement for payment of the additional fee will be made final, assuming that the application is otherwise in condition for final refusal.

### **819.02(b) Additional Documents That Must be Filed Through TEAS**

In addition to the filing requirements set forth in 37 C.F.R. §2.22 ( *see* [TMEP §§819.01 et seq.](#)), to maintain TEAS Plus status, the applicant must file the following documents through TEAS:

- Responses to Office actions (except notices of appeal);
- Requests for reconsideration of final Office actions;
- Requests to change the correspondence address and/or owner's address;
- Appointment and/or revocation of power of attorney;
- Appointment and/or revocation of domestic representative;
- Voluntary amendments;
- Amendments to allege use under §1(c) of the Trademark Act, 15 U.S.C. §1051(c);
- Statements of use under §1(d) of the Trademark Act, 15 U.S.C. §1051(d);
- Requests for extensions of time to file a statement of use under §1(d) of the Trademark Act, 15 U.S.C. §1051(d); and
- Requests to delete a §1(b) basis in a multiple-basis application.

37 C.F.R. §2.23(a)(1). The additional fee(s) for each class of goods/services will be required if the applicant files one of these documents on paper. 37 C.F.R. §§2.6(a)(1)(iv) and 2.23(b).

When issuing a nonfinal action on a TEAS Plus application, the examining attorney will require that the applicant either: (1) respond through TEAS (or by examiner's amendment, if appropriate); or (2) if responding on paper, include the additional TEAS Plus processing fee with the response. If the applicant files a paper

response without the required fee, the requirement for payment of the fee will be made final, assuming that the application is otherwise in condition for final refusal. See [TMEP §§714 et seq.](#) regarding procedures for issuing a final refusal.

If a Notice of Allowance has issued and the applicant files a statement of use or request for an extension of time to file a statement of use on paper, or any other document that is required to be filed electronically, the ITU Unit staff will send a letter requiring payment of the additional fee. If the applicant fails to submit the fee, the examining attorney will require payment of the fee during examination of the statement of use.

### 819.03 Adding a Class During Examination

Amendments to classification are rare in TEAS Plus applications, since the identification of goods/services is taken from the USPTO ID Manual, and the TEAS Plus form does not permit the applicant to edit the “Classification” field. In the rare case where the TEAS Plus applicant amends the application to add a product or service that is within the scope of the original identification of goods/services, but is in a different class, the fee for the additional class is the reduced TEAS Plus fee, as long as the amendment is filed through TEAS or entered by examiner’s amendment. See [TMEP §1403.02\(c\)](#).

*Example:* The applicant selects the identification “hair shampoo” in Class 3. The applicant later adds “dandruff shampoo” in Class 5, which is within the scope of the original identification. The applicant will pay the reduced TEAS Plus fee, as long as the applicant has not lost TEAS Plus status for some other reason.

If the applicant adds a class after losing TEAS Plus status, the applicant must pay the regular TEAS fee if the fee is paid through TEAS or by examiner’s amendment, or the paper fee if the class is added by a paper amendment.

### 819.04 Procedures for Payment of TEAS Plus Processing Fee Per Class

A TEAS Plus applicant must pay a processing fee per class to have the application examined as a regular TEAS application if: (1) the initial application does not meet the requirements of 37 C.F.R. §2.22(a); (2) the applicant files one of the documents listed in 37 C.F.R. §2.23(a)(1) on paper; or (3) the applicant files a notice of change of correspondence address that does not authorize e-mail correspondence. 37 C.F.R. §§2.6(a)(1)(iv), 2.23(a)(2), and 2.23(b). The application will retain its original filing date, assuming the initial application met the minimum filing requirements that are mandatory for all applications under 37 C.F.R. §2.21(a).

*Processing Fee Must Be Paid for All Active Classes.* If the applicant loses TEAS Plus status, the applicant must pay the TEAS Plus processing fee per class *for all classes that are in the application at the time the examining attorney issues the Office action requiring the TEAS Plus processing fee.*

*Example:* The original application is for two classes. The applicant loses TEAS Plus status because in the original application, the applicant failed to include a transliteration of the Chinese characters in the mark. The first Office action includes: (1) a requirement for a transliteration; (2) a requirement for the additional fee for two classes; and (3) a refusal of registration as to one class under §2(d) of the Trademark Act. If the applicant responds by submitting a transliteration and deleting the class that was refused, the applicant must pay the processing fee for two classes, because there were two classes in the application when the Office action requiring the processing fee was issued.

*Example:* The original application is for two classes. One of the items in the identification has a fill-in-the-blank element and requires amendment. The first Office action includes: (1) a requirement to amend the identification of goods/services; and (2) a refusal of registration because the mark is merely descriptive of the goods. The applicant responds through TEAS by deleting a class and submitting evidence that the mark has acquired distinctiveness. The examining attorney issues another refusal. If the applicant responds on paper, the applicant is only required to pay the processing fee for one class, because the applicant deleted the second class before the applicant lost TEAS Plus status.

*Examiner's Amendment.* If all remaining issues can be handled through a telephone or e-mail conversation with the applicant or the applicant's qualified practitioner, and the applicant uses a deposit account to pay the fee or faxes an authorization to charge the fee to a credit card, the fee may be collected by examiner's amendment. However, a fee cannot be charged to a deposit account by examiner's amendment unless the record contains a written authorization, signed by someone who is authorized to charge fees to the account. If there is no written authorization in the record, the applicant may submit the authorization by fax or e-mail. See [TMEP §405.03](#) regarding deposit accounts.

*Combined Examiner's Amendment/Priority Action.* If all of the issues except payment of the processing fee are resolved by a telephone or e-mail conversation with the applicant or the applicant's qualified practitioner, the examining attorney may issue a combined Examiner's Amendment/Priority Action ([TMEP §708.05](#)) to enter the amendment(s) and require payment of the TEAS Plus processing fee.

*No Partial Refusal.* If the applicant loses TEAS Plus status, the requirement for the TEAS Plus processing fee applies to the entire application, so an Office action requiring the processing fee can never be a partial refusal.

*Paying the Processing Fee Through TEAS.* To pay the TEAS Plus processing fee through TEAS, the applicant must use the TEAS Response to Office Action ("ROA") form. The TEAS "Voluntary Amendment Not in Response to USPTO Office Action/Letter" form does not permit payment of the TEAS Plus processing fee. Also, if the requirement for the processing fee is issued in the first action, TEAS will not allow the applicant to use the TEAS ROA form to pay the fee until 48-72 hours after the Office action is entered into the Trademark database.

## 901 Use in Commerce

In an application based on use in commerce under §1(a) of the Trademark Act, 15 U.S.C. §1051(a), the applicant must use the mark in commerce on or in connection with all the goods and services listed in the application as of the application filing date. *See* 37 C.F.R. §2.34(a)(1)(i). The application must include a statement that the mark is in use in commerce, verified in an affidavit or declaration under 37 C.F.R. §2.20.

If the verification is not filed with the original application, it must also allege that the mark was in use in commerce on or in connection with the goods or services listed in the application as of the application filing date. 37 C.F.R. §2.34(a)(1)(i). *See* [TMEP §§804](#) *et seq.* regarding verification.

In an application based on “intent-to-use” under §1(b) of the Trademark Act, 15 U.S.C. §1051(b), the applicant typically begins use in commerce after the filing date. The application must include a verified statement that the applicant has a bona fide intention to use the mark in commerce on or in connection with the goods or services listed in the application as of the application filing date. Prior to registration, the applicant must actually use the mark in commerce on or in connection with all the goods or services specified in the application and file an allegation of use (i.e., either an amendment to allege use under 15 U.S.C. §1051(c) or a statement of use under 15 U.S.C. §1051(d)). *See* [TMEP §902](#).

A §1 applicant must use the mark in commerce even if the applicant asserts §44(d) or §44(e), 15 U.S.C. §1126(d) or §1126(e), as a second basis for filing. *See* [TMEP §§806.02](#) *et seq.* regarding filing on more than one basis.

Applicants relying *solely* on a foreign registration as the basis for registration under §44(e) of the Trademark Act are not required to assert actual use of the mark prior to registration in the United States. [TMEP §1009](#).

*See Crocker National Bank v. Canadian Imperial Bank of Commerce*, 223 USPQ 909 (TTAB 1984). However, to retain a valid registration, the registrant must file an affidavit or declaration of use of the mark in commerce under 15 U.S.C. §1058 at the appropriate times, and establish use in commerce or excusable nonuse. *See* [TMEP §§1604](#) *et seq.* regarding the affidavit or declaration of continued use or excusable nonuse.

Similarly, applicants requesting an extension of protection of an international registration to the United States under §66(a) of the Trademark Act are not required to assert actual use of the mark prior to registration in the United States. However, to retain a valid registration, the registrant must file an affidavit or declaration of use of the mark in commerce under 15 U.S.C. §1141k at the appropriate times, and establish use in commerce or excusable nonuse. See [TMEP §1613](#).

### 901.01 Definitions

The power of the federal government to register marks comes from the commerce clause of the Constitution. Section 1 of the Trademark Act, 15 U.S.C. §1051, permits application for registration of “a trademark used in commerce” (15 U.S.C. §1051(a)) or of a trademark that a person has a bona fide intention to use in commerce (15 U.S.C. §1051(b)).

Section 45 of the Trademark Act, 15 U.S.C. §1127, defines “commerce” as “all commerce which may lawfully be regulated by Congress.” Section 45 defines “use in commerce” as follows:

The term “use in commerce” means the bona fide use of a mark in the ordinary course of trade, and not made merely to reserve a right in a mark. For purposes of this Act, a mark shall be deemed to be in use in commerce--

(1) on goods when—

(A) it is placed in any manner on the goods or their containers or the displays associated therewith or on the tags or labels affixed thereto, or if the nature of the goods makes such placement impracticable, then on documents associated with the goods or their sale, and

(B) the goods are sold or transported in commerce, and

(2) on services when it is used or displayed in the sale or advertising of services and the services are rendered in commerce, or the services are rendered in more than one State or in the United States and a foreign country and the person rendering the services is engaged in commerce in connection with the services.

### 901.02 Bona Fide Use in the Ordinary Course of Trade

The definition of use in commerce ([TMEP §901.01](#)) was amended by the Trademark Law Revision Act of 1988 (TLRA), Public Law 100-667, 102 Stat. 3935, to add the phrase “the bona fide use of a mark in the ordinary course of trade, and not made merely to reserve a right in a mark.” The primary purpose of the amendment was to eliminate the practice of “token use,” or use made solely to reserve rights in a mark.

The legislative history of the TLRA makes it clear that the meaning of “use in the ordinary course of trade” will vary from one industry to another. The report of the House Judiciary Committee stated that:

While use made merely to reserve a right in a mark will not meet this standard, the Committee recognizes that “the ordinary course of trade” varies from industry to industry. Thus, for example, it might be in the ordinary course of trade for an industry that sells expensive or seasonal products to make infrequent sales. Similarly, a pharmaceutical company that markets a drug to treat a rare disease will make correspondingly few sales in the ordinary course of its trade; the company’s shipment to clinical investigators during the Federal approval process will also be in its ordinary course of trade....

H.R. Rep. No. 1028, 100th Cong. 2d Sess. 15 (1988).

The report of the Senate Judiciary Committee stated:

The committee intends that the revised definition of “use in commerce” be interpreted flexibly so as to encompass various genuine, but less traditional, trademark uses, such as those made in test markets, infrequent sales of large or expensive items, or ongoing shipments of a new drug to clinical investigators by a company awaiting FDA approval....

S. Rep. No. 515, 100th Cong. 2d Sess. 44-45 (1988). *See also Paramount Pictures Corp. v. White*, 31 USPQ2d 1768, 1774 n.8 (TTAB 1994), *aff’d*, 108 F.3d 1392 (Fed. Cir. 1997) (Table).

Therefore, some factors to consider when determining compliance with the statutory requirement for a “bona fide use of a mark in the ordinary course of trade” are: (1) the amount of use; (2) the nature or quality of the transaction; and (3) what is typical use within a particular industry. *See Automedx Inc. v. Artivent Corp.*, 95 USPQ2d 1976 (TTAB 2010) (finding sales of demonstration models of portable medical ventilators to military constituted bona fide use of mark in commerce); *see also Clorox Co. v. Salazar*, 108 USPQ2d 1083, 1086 (TTAB 2013) (finding that applicant had not made bona fide use of its mark in commerce, as applicant had not sold or transported goods bearing the mark in commerce as of the application filing date).

### 901.03 Commerce That May Be Lawfully Regulated By Congress

The scope of federal trademark jurisdiction is commerce that may be regulated by the United States Congress.

The types of commerce encompassed in this definition are interstate, territorial, and between the United States and a foreign country.

“Territorial commerce” is commerce within a territory of the United States (e.g., Guam, Puerto Rico, American Samoa, or the United States Virgin Islands) or between the United States and a territory of the United States.

Purely intrastate use does not provide a basis for federal registration. However, if intrastate use directly affects a type of commerce that Congress may regulate, this constitutes use in commerce within the meaning of the Act. *See Larry Harmon Pictures Corp. v. Williams Restaurant Corp.*, 929 F.2d 662, 18 USPQ2d 1292 (Fed. Cir. 1991), *cert. denied* 502 U.S. 823 (1991) (mark used to identify restaurant services rendered at a single-location restaurant serving interstate travelers is in “use in commerce”); *In re Silenus Wines, Inc.*, 557 F.2d 806, 194 USPQ 261 (C.C.P.A. 1977) (intrastate sale of imported wines by importer constitutes “use in commerce,” where goods bearing labels supplied by applicant were shipped to applicant in United States); *In re Gastown, Inc.*, 326 F.2d 780, 140 USPQ 216 (C.C.P.A. 1964) (automotive service station located in one state was rendering services “in commerce” because services were available to customers travelling interstate on federal highways); *U.S. Shoe Corp. v. J. Riggs West, Inc.*, 221 USPQ 1020, 1022 (TTAB 1984) (billiard parlor services satisfy the “use in commerce” requirements, where the record showed that applicant’s billiard parlor services were advertised in both Kansas and New York); *In re G.J. Sherrard Co.*, 150 USPQ 311 (TTAB 1966) (hotel located in only one state has valid use of its service mark in commerce because it has out-of-state guests, has offices in many states, and advertises in national magazines); *In re Federated Department Stores, Inc.*, 137 USPQ 670 (TTAB 1963) (mark used to identify retail department store services located in one state was in use in commerce, where the mark was used on credit cards issued to out-of-state residents, and on catalogs and advertisements shipped to out-of-state customers).

In some cases, services such as restaurant and hotel services have been deemed to be rendered in commerce because they are activities that have been found to be within the scope of the 1964 Civil Rights Act, which, like the Trademark Act, is predicated on the commerce clause. *See In re Ponderosa Motor Inns, Inc.*, 156 USPQ 474 (TTAB 1968); *In re Smith Oil Corp.*, 156 USPQ 62 (TTAB 1967).

The term “foreign” is not acceptable to specify the type of commerce in which a mark is used, because it does not clearly indicate that the mark is in use in a type of commerce that Congress can lawfully regulate.

Unless the “foreign commerce” involves the United States, Congress does not have the power to regulate it. Use of a mark in a foreign country does not give rise to rights in the United States if the goods or services are not sold or rendered in the United States. *Buti v. Impresa Perosa S.R.L.*, 139 F.3d 98, 45 USPQ2d 1985 (2d Cir. 1998); *Mother’s Restaurants Inc. v. Mother’s Bakery, Inc.*, 498 F. Supp. 847, 210 USPQ 207 (W.D.N.Y. 1980); *Linville v. Rivard*, 41 USPQ2d 1731 (TTAB 1996), *aff’d*, 133 F.3d 1446, 45 USPQ2d 1374 (Fed. Cir. 1998); *Aktieselskabet af 21.November 2001 v. Fame Jeans Inc.*, 77 USPQ2d 1861 (TTAB 2006). *See also Honda Motor Co., Ltd. v. Winkelmann*, 90 USPQ2d 1660 (TTAB 2009) (“[T]he evidence that applicant relies upon through its foreign registrations and Internet printouts does not demonstrate trademark use for the claimed goods. Further, these documents do not show that applicant has an intent to use the mark in the United States.”)

Offering services via the Internet has been held to constitute use in commerce, since the services are available to a national and international audience who must use interstate telephone lines to access a website. *See Planned Parenthood Federation of America, Inc. v. Bucci*, 42 USPQ2d 1430 (S.D.N.Y. 1997), *aff’d*, 152 F.3d 920 (2d Cir. 1998) (Table), *cert. denied*, 525 U.S. 834 (1998).

An applicant is not required to specify the type of commerce in which the mark is used. The USPTO presumes that an applicant who states that the mark is in use in commerce is stating that the mark is in use in a type of commerce that Congress can regulate, unless there is contradictory evidence in the record. *See [TMEP §901.04](#)* regarding the circumstances where an examining attorney should inquire as to whether the mark is in use in commerce that can be regulated by Congress.

### **901.04 Inquiry Regarding Use in Commerce**

It is the responsibility of the applicant and the applicant’s attorney to determine whether an assertion of use in commerce is supported by the relevant facts. The validity of an applicant’s assertion of use in commerce generally does not arise in *ex parte* examination. The examining attorney will normally accept the applicant’s verified claim of use in commerce without investigation into whether the use referred to constitutes “use in commerce.”

An applicant is not required to specify the type of commerce in which the mark is used. *See [TMEP §901.03](#)*. However, if the applicant specifically states that the mark is in use in commerce that cannot be regulated by Congress (e.g., “intrastate commerce” or “foreign commerce”), the applicant has not met the statutory requirement for a verified statement that the mark is in use in commerce, and a specification of the date of first use in commerce, as defined in §45 of the Trademark Act. Accordingly, the examining attorney must advise the applicant that it appears that the mark is not in use in a type of commerce that can be regulated by Congress and must require that the applicant either submit a verified statement that “the mark is in use in commerce that can be regulated by Congress,” or amend the basis of the application to a *bona fide* intention to use the mark in commerce under §1(b) of the Act, if permitted by 37 C.F.R. §2.35. *See [TMEP §806.03\(c\)](#)* regarding amendment of the basis from §1(a) to §1(b).

If the application record contains evidence or information indicating that the mark may not be in use in commerce that “may lawfully be regulated by Congress,” the examining attorney must ask the applicant whether there is use in commerce that may lawfully be regulated by Congress and require a satisfactory explanation or showing of such use. When necessary, the examining attorney may also require additional

information or evidence concerning the use of the mark to permit full consideration of the issue. 37 C.F.R. §2.61(b); [TMEP §814](#).

### **901.05 Use Only by Related Company**

If the applicant is not itself using the mark in commerce but the mark is being used by one or more related companies whose use inures to the applicant's benefit (15 U.S.C. §§1055 and 1127), this must be stated in the application or allegation of use. 37 C.F.R. §2.38(b); [TMEP §1201.03\(a\)](#). See [TMEP §903.05](#) regarding first use by a predecessor in title or related company.

See [TMEP §§1201.03](#) *et seq.* regarding use by related companies.

### **902 Allegations of Use for §1(b) Applications**

Section 1(b) of the Trademark Act permits the filing of an application to register a mark on the basis of the applicant's bona fide intention to use the mark in commerce for the identified goods or services. Before a registration can issue, however, the applicant must actually use the mark in commerce on or in connection with all the goods or services specified in the application and file an allegation of use of the mark in commerce (i.e., either an amendment to allege use under 15 U.S.C. §1051(c) or a statement of use under 15 U.S.C. §1051(d)) that states that the applicant is using the mark in commerce on or in connection with the goods or services, includes dates of use for each class, and includes one specimen evidencing such use for each class.

See 37 C.F.R. §2.76 and [TMEP §§1104](#) *et seq.* regarding amendments to allege use, and 37 C.F.R. §2.88 and [TMEP §§1109](#) *et seq.* regarding statements of use.

### **903 Dates of Use**

When asserting use of a mark in commerce, an applicant must specify the date of first use anywhere and the date of first use in commerce, either in an original application under §1(a) of the Trademark Act, or in an allegation of use in an application under §1(b). The dates of use must be verified, i.e., supported by an affidavit or declaration under 37 C.F.R. §2.20. See [TMEP §§804](#) *et seq.* regarding verification.

An applicant filing under §1(b) is not required to state dates of use in the original application, but must include dates of use in an allegation of use under §1(c) or §1(d).

A §1(b) applicant may assert dates of use that are earlier than the filing date of the application in an amendment to allege use or statement of use.

#### **903.01 Date of First Use Anywhere**

The date of first use anywhere is the date when the goods were first sold or transported or the services were first rendered under the mark, if such use is bona fide and in the ordinary course of trade. *See* 15 U.S.C. §1127 (definition of "use" within the definition of "abandonment of mark"). For every applicant, whether foreign or domestic, the date of first use of a mark is the date of the first use anywhere, in the United States

or elsewhere, regardless of whether the nature of the use was local or national, intrastate or interstate, or of another type.

### **903.02 Date of First Use in Commerce**

The date of first use in commerce is the date when the goods were first sold or transported, or the services were first rendered, under the mark in a type of commerce that may be lawfully regulated by Congress, if such use is bona fide and in the ordinary course of trade. See [TMEP §901.01](#) for definitions of “commerce” and “use in commerce,” and [TMEP §901.03](#) regarding types of commerce.

In a §1(a) application, the applicant may not specify a date of use that is later than the filing date of the application. If an applicant who filed under §1(a) did not use the mark in commerce before the application filing date, the applicant may amend the basis to §1(b). See [TMEP §§806.03](#) *et seq.* regarding amendments to the basis.

Neither a date of first use nor a date of first use in commerce is required to receive a filing date in an application based on use in commerce under §1(a) of the Act. If the application does not include a date of first use and/or a date of first use in commerce, the examining attorney must require that the applicant state the date of first use and/or date of first use in commerce. The dates must be supported by an affidavit or declaration under 37 C.F.R. §2.20. 37 C.F.R. §§2.34(a)(1) and 2.71(c).

An applicant may not file an application on the basis of use of a mark in commerce if such use has been discontinued.

### **903.03 Relation Between the Two Dates of Use**

The application or allegation of use must specify both the date of first use anywhere and the date of first use in commerce. If the first use made by the applicant was in commerce that may be regulated by Congress, the date of first use and the date of first use in commerce will be the same date.

The date of first use anywhere will always be either earlier than or the same as the date of first use in commerce. If the date of first use anywhere specified in an application or allegation of use is later than the date of first use in commerce, the examining attorney must require clarification.

The requirement that an applicant specify the date of first use anywhere as well as the date of first use in commerce applies to foreign applicants as well as domestic applicants in applications under §§1(a) and 1(b) of the Act. *In re Sevi S.p.A.*, 1 USPQ2d 1671 (TTAB 1986).

### **903.04 Amending Dates of Use**

Any amendment of the dates must be supported by an affidavit or declaration under 37 C.F.R. §2.20. 37 C.F.R. §2.71(c). The affidavit or declaration must be signed by someone properly authorized to sign on behalf of the applicant under 37 C.F.R. §2.193(e)(1). See [TMEP §611.03\(a\)](#).

In an application under §1(a) of the Trademark Act, the applicant may amend the dates of use to adopt a date of use that is later than the date originally stated, but before the application filing date. However, the applicant may not amend to specify a date of use that is later than the filing date of the application. 37 C.F.R. §2.71(c)(1). If an applicant who filed under §1(a) did not use the mark in commerce on or before the

application filing date, the applicant may amend the basis to §1(b). See [TMEP §§806.03](#) *et seq.* regarding amendments to the basis.

In an application under §1(b), after the applicant files an amendment to allege use, the applicant may not subsequently amend the dates of use to recite dates of use that are later than the filing of the amendment to allege use. If a §1(b) applicant did not use the mark in commerce before the filing date of the amendment to allege use, the applicant may withdraw the amendment to allege use before the application is approved for publication. 37 C.F.R. §2.76(h). See [TMEP §§1104.09\(d\)](#) and [1104.10](#).

In an application under §1(b), after the applicant files a statement of use, the applicant may not amend to recite dates of use that are later than the expiration of the statutory deadline for filing a statement of use (i.e., the amended dates must be within six months of the issuance date of the notice of allowance or before the expiration of an extension of time for filing a statement of use). 37 C.F.R. §2.71(c)(2). If a §1(b) applicant did not use the mark in commerce before the expiration of the deadline for filing a statement of use, the applicant may *not* withdraw the statement of use. 37 C.F.R. §2.88(g); [TMEP §1109.17](#).

A multiple-class application must include dates of use for each class. If a single-class application containing dates of use is amended to a multiple-class application, the dates-of-use clause must be amended to reflect dates of use for each class. See 37 C.F.R. §2.86(a)(3); [TMEP §1403.01](#). If a single-class application is amended to a multiple-class application, but the applicant does not set forth dates of use for the added classes, the examining attorney must inquire as to whether the dates of use apply to all classes and require an amendment, if necessary. A supporting affidavit or declaration is not necessary if the dates of use alleged in the original application or in an earlier-filed allegation of use apply to all classes.

A supporting affidavit or declaration is required for any *change* to the dates of use. 37 C.F.R. §2.71(c). However, if the applicant has properly verified the date of first use in commerce and, for whatever reason, seeks to amend the date of first use anywhere to the same date as the date of first use in commerce, a verified statement is not required if the originally specified date of first use anywhere is *earlier* than the date of first use in commerce. This is not considered a *change* to the dates of use, because the applicant has already sworn to a date of first use in commerce that necessarily requires, and logically includes, use of the mark “anywhere.” Thus, the applicant has, in fact, already verified in its original application or allegation of use that the date of first use of the mark anywhere is at least as early as the date of first use of the mark in commerce. Such an amendment may be entered by examiner’s amendment.

When the date of first use anywhere is *later* than the date of first use in commerce, an unverified amendment is inappropriate because the validity of the verification is called into question by the impossibility of first use anywhere being later than the first use in commerce.

Compare the following examples.

- (1) First use anywhere: March 6, 1985  
First use in commerce: February 10, 1985  
An amendment of the date of first use anywhere to February 10, 1985, must be verified, because the validity of the date of first use in commerce is called into question by the fact that the applicant has specified a later date of first use anywhere.
- (2) First use anywhere: March 6, 1985  
First use in commerce: April 10, 1985  
An unverified amendment of the date of first use anywhere to April 10, 1985, is acceptable, because first use in commerce logically includes use anywhere.
- (3) First use anywhere: March 1985  
First use in commerce: March 10, 1985  
An unverified amendment of the date of first use anywhere to March 10, 1985, is acceptable because the information in the

record is not contradictory on its face. There is only an apparent contradiction resulting from the way in which the USPTO construes the information when an applicant provides only the month and year (i.e., as indicating the last day of the month - see [TMEP §903.06](#) regarding indefinite dates of use).

This policy is not applicable to the converse. That is, an amendment to the date of first use in commerce to conform to the date of first use anywhere is a *change* (because first use anywhere does not necessarily include first use in commerce) and must be verified.

### **903.05 First Use by Predecessor or Related Company**

If the first use anywhere or the first use in commerce was by a predecessor in title to the applicant, or by a related company of the applicant ( *see* 15 U.S.C. §§1055 and 1127), the dates of use clause should state that the use on this date was by the applicant's predecessor in title, or by a related company of the applicant, as the case may be. *See* 37 C.F.R. §2.38(a). It is generally not necessary to give the name of the predecessor in title or the related company.

See [TMEP §§901.05](#) and [1201.03](#) *et seq.* regarding current use by a party other than the applicant.

### **903.06 Indefinite Dates of Use**

In specifying the dates of first use, the applicant should give dates that are as definite as possible.

The only date that will be recognized for USPTO proceedings is the latest definite date specified by the applicant. However, the applicant may use indefinite terms in describing dates if the applicant considers it necessary due to uncertainty as to the particular date. Although terms such as "at least as early as," "prior to," "before," "on or about," and "in" are acceptable for the record, these terms are not printed in the *Official Gazette* or on the certificate of registration.

When a month and year are given without a specified day, the date presumed for purposes of examination is the last day of the month. When only a year is given, the date presumed for purposes of examination is the last day of the year. Some examples are as follows:

- "Prior to January 1, 1955" is treated as December 31, 1954.
- "Before February 1961" is treated as January 31, 1961.
- "On or about June 18, 1987" is treated as June 18, 1987.
- "1990" is treated as December 31, 1990.
- "In November 1991" is treated as November 30, 1991.
- "In the 1920s" is treated as December 31, 1929.

When an applicant alleges only a year prefaced by vague or ambiguous language such as "in the Spring of," the USPTO will construe the date as the last day of that year, unless the applicant amends to specify a particular date or a particular month of the specified year.

When an applicant's date of first use in commerce is more specific than its date of first use anywhere, the above presumption can result in an unacceptable dates-of-use clause in which the date of first use in commerce precedes the date of first use anywhere. For example:

First use anywhere: 1991

First use in commerce: January 15, 1991

Usual presumption of first use anywhere: December 31, 1991 (which results in a logical inconsistency).

Therefore, when the above presumption would be applicable, and the result is a date of first use in commerce that precedes the date of first use anywhere, the examining attorney must contact the applicant by telephone or e-mail, if appropriate, for authorization to amend the date of first use anywhere to the same date as the date of the first use in commerce. This may be done by examiner's amendment.

Indefinite phraseology of the type described above is not considered to be misleading, because it does give notice that, when called upon to do so, the applicant may undertake to prove a date earlier than the one stated.

The presumed dates discussed above are *not* entered into the automated records of the USPTO, or printed in the *Official Gazette* or on the certificate of registration. Instead, only the information provided by the applicant is printed. Thus, if the applicant states that the mark was first used "at least as early as January of 1994," the date printed is "1/0/1994." If applicant states that the mark was first used "sometime in 1965," the date printed is "0/0/1965."

In an inter partes proceeding, a date of use must be established by appropriate evidence. A date of use set forth in an application or registration owned by applicant or registrant is not evidence on behalf of that applicant or registrant. 37 C.F.R. §2.122(b)(2); *Trademark Trial and Appeal Board Manual of Procedure* ("TBMP") §704.04.

See [TMEP §903.06\(a\)](#) regarding apparent discrepancies between dates of use and execution dates.

### **903.06(a) Apparent Discrepancies Between Dates of Use and Date of Execution**

If an application, or an allegation of use under §1(c) or §1(d), specifies a date of first use only by the year, or by the month and the year, and the date would be interpreted under [TMEP §903.06](#) as later than the date on which the application or allegation of use was *signed*, the USPTO will presume that the date specified is the date on which applicant signed the application or allegation of use. In this case, it is not necessary to amend the application to indicate the date of use more specifically. However, if the date specified would be interpreted as later than the *filing date* of the application or allegation of use, then amendment of the date of use, supported by an affidavit or declaration under 37 C.F.R. §2.20, is still required.

If an application or allegation of use specifies the date of signature only by the year, or by the month and the year, and the date would be interpreted under [TMEP §903.06](#) as later than the date(s) of first use, the USPTO will presume that the date of signature was on or after the date of first use.

### **903.07 Dates of Use in Another Form**

If the mark in the application is a composite mark, the applicant may specify dates of first use of a separable element of the composite mark. These dates will be printed on the certificate of registration for general

information. However, the applicant must also specify the dates of first use of the entire composite mark for which registration is being sought.

### **903.08 More than One Item of Goods or Services**

If more than one item of goods or services is specified in a particular class, the date of first use anywhere and date of first use in commerce do not have to pertain to every item in the class. It might be that the mark, although in use on all of the items at the time the application or allegation of use was filed, was first used on various items on differing dates, so that it would be cumbersome to designate the dates for all items individually. See *Sunshine Biscuits, Inc. v. Berke Bakeries, Inc.*, 106 USPQ 222 (PTO 1955); *Ex parte Wayne Pump Co.*, 88 USPQ 437 (PTO 1951).

There must be at least one specified item in a class to which the specified dates pertain. Where the dates of use do not pertain to all items, the applicant should designate the particular item(s) to which they do pertain. 37 C.F.R. §§2.34(a)(1)(v), 2.76(c), and 2.88(c).

Where the dates of use do not pertain to every item in the class, and the identification of goods or services is amended to delete the item(s) to which the dates of use pertain, the applicant must amend the dates-of-use clause to specify the dates that apply to an item that remains in the identification, and this item should be designated. See [TMEP §903.04](#) regarding amendments to dates of use.

If more than one item of goods or services is specified in a particular class, the USPTO will presume that the dates of use apply to all the goods or services, unless the applicant states otherwise.

Where more than one date is specified for a particular class, the earliest date will be printed in the *Official Gazette* and, if a registration issues, on the certificate of registration. The *Official Gazette* and registration certificate will not indicate which item is specified.

### **904 Specimens**

Specimens are required because they show the manner in which the mark is seen by the public. Specimens also provide supporting evidence of facts recited in the application.

An application for registration under §1(a) of the Trademark Act must include one specimen for each class, showing use of the mark on or in connection with the goods, or in the sale or advertising of the services, in commerce. 15 U.S.C. §1051(a)(1); 37 C.F.R. §§2.34(a)(1)(iv) and 2.56(a). If an application under §1(a) is filed without a specimen, the examining attorney must issue an Office action requiring the applicant to submit one specimen for each class, with an affidavit or declaration under 37 C.F.R. §2.20 stating that the specimen was in use in commerce on the filing date of the application. The Office action must also indicate registration is refused because the applicant has not provided evidence of use of the mark in commerce. 15 U.S.C. §§1051(a)(1) and 1127; 37 C.F.R. §§2.34(a)(1)(iv) and 2.56(a).

In an application for registration under §1(b) of the Trademark Act, no specimen is required at the time the application is filed. However, before a registration will issue, the applicant must file an allegation of use that includes one specimen for each class, showing use of the mark in commerce on or in connection with the goods or in the sale or advertising of the services. 37 C.F.R. §§2.56(a), 2.76(b)(2), and 2.88(b)(2).

No specimen showing use of the mark is required in an application based solely on §44 or §66(a) of the Trademark Act, 15 U.S.C. §1126 or §1141f(a). While a §44 or §66(a) applicant must assert a bona fide

intent to use the mark in commerce, the applicant is not required to assert actual use in commerce prior to registration. *Crocker National Bank v. Canadian Imperial Bank of Commerce*, 223 USPQ 909 (TTAB 1984); [TMEP §§1009](#) and [1904.01\(d\)](#).

If the nature of a specimen is unclear, the applicant must explain what it is and how it is used.

A copy or reproduction of the drawing is not an acceptable specimen. 37 C.F.R. §2.56(c).

Specimens of value should not be filed.

Interested parties, including potential opposers, may view and print images of the specimens in an application or registration file through the Trademark Status and Document Retrieval ("TSDR") portal on the USPTO website at <http://tsdr.uspto.gov/>. The USPTO does not permit specimens to be removed from the record. Furthermore, once filed, specimens remain part of the record and will not be returned to the applicant. 37 C.F.R. §2.25. This ensures that there is a complete record of the submissions made by the applicant. See notice at [64 Fed. Reg. 48900](#), 48901 (Sept. 8, 1999) and 1226 TMOG 103 (Sept. 28, 1999). See also [TMEP §404](#).

## 904.01 Number of Specimens

One specimen for each class is required in an application for registration under §1(a) of the Trademark Act, or in an allegation of use in an application under §1(b). If a single specimen supports multiple classes, the applicant should indicate which classes are supported by the specimen. The examining attorney need not require multiple copies of the specimen. The examining attorney should enter a Note to the File in the record indicating which class(es) the specimen supports.

### 904.01(a) More than One Item Specified in a Class

Generally, if more than one item of goods, or more than one service, is specified in one class in an application, it is usually not necessary to have a specimen for each product or service. When the range of items is wide or contains unrelated articles, the examining attorney may request additional specimen(s) under 37 C.F.R. §2.61(b).

If the goods are a "full line of pharmaceuticals," however, the examining attorney must require the applicant to provide evidence that it uses the mark in connection with pharmaceuticals to treat diseases or health problems in all chapters in the World Health Organization ("WHO") International Statistical Classification of Diseases and Related Health Problems. See 37 C.F.R. §2.61(b).

See [TMEP §1402.03](#) regarding broad identifications, [TMEP §1402.03\(b\)](#) regarding house marks, and [TMEP §1402.03\(c\)](#) regarding marks for "a full line of" a genre of products.

### 904.01(b) In Combined or Multiple-Class Applications

A combined (or multiple-class) application is a request to register the same mark for goods and/or services in multiple classes in a single application. There must be one specimen of the mark for each class. 15 U.S.C. §1051(a)(1); 37 C.F.R. §§2.34(a)(1)(iv) and 2.56(a). If a single specimen supports multiple classes, the applicant should indicate which classes are supported by the specimen. The examining attorney need not require multiple copies of the specimen. The examining attorney should enter a Note to the File in the record indicating which classes the specimen supports.

See [TMEP §§1403](#) *et seq.* regarding examination of multiple-class applications.

## 904.02 Physical Form of Specimens

### 904.02(a) Electronically Filed Specimens

In an electronically filed application, allegation of use, affidavit of use under 15 U.S.C. §1058 or §1141k of the Trademark Act (“§8 affidavit” or “§71 affidavit”), or response to an Office action, the specimen(s) must be in .jpg or .pdf format. 37 C.F.R. §§2.56(d)(4) and 2.161(g)(3). If the nature of the specimen is unclear, the applicant should explain what it is and how it is used. See [TMEP §904.03\(d\)](#) regarding electronic and digital media attachments and [§904.03\(f\)](#) regarding specimens for sound marks.

Sometimes, no visible specimen is in the record due to a technical problem during submission of the application. In this situation, the examining attorney should first send an e-mail to the TEAS mailbox to ask whether the problem can be fixed by uploading the file again. If it cannot, the examining attorney must ask the applicant to submit: (1) the specimen (or a facsimile) that was attached to the original TEAS submission; and (2) a statement by the person who transmitted the original TEAS submission that the specimen being submitted is a true copy of the specimen originally filed through TEAS. This statement does not have to be verified. Alternatively, the owner may submit a new specimen, together with an affidavit or declaration of use of the substitute specimen. See [TMEP §904.05](#) regarding the requirements for an affidavit or declaration supporting use of substitute specimens.

The Office prefers that the specimen, whether a true copy of the original or a substitute, be submitted electronically via the Trademark Electronic Application System (“TEAS”). In TEAS, the Response to Office Action form can be accessed by clicking on the link entitled “Response Forms” at <http://www.uspto.gov>.

### 904.02(b) Paper-Filed Specimens

In a paper-filed application, allegation of use, affidavit of use under §8 or §71 of the Trademark Act, or response to Office action, the specimen(s) must be flat and no larger than 8½ inches (21.6 cm.) wide by 11.69 inches (29.7 cm.) long. 37 C.F.R. §2.56(d)(1). The USPTO may create a photocopy or facsimile for the official record and destroy the original.

When the applicant cannot supply an actual specimen meeting these size requirements due to the nature or manner of use of the mark, the application, allegation of use, affidavit of use, or response must include a facsimile, such as a photograph, photocopy, or other acceptable reproduction, that is a suitable size and clearly shows how the mark is used on or in connection with the goods or in the sale or advertising of the services.

Facsimiles or photographs of actual specimens are preferred. Facsimiles should show the whole article to which the mark is applied, or enough of the article so that the nature of the article can be identified. The mark and all other pertinent written matter on the article should be clear and legible. For example, product photographs appearing on folders or brochures that show the trademark on the goods are acceptable facsimiles.

It is permissible to show the complete article in one photograph and the written matter in another, so that the written matter will be legible, or to show different views of an article either in a single photograph or in separate photographs.

A copy or reproduction of the drawing is not an acceptable specimen or facsimile. 37 C.F.R. §2.56(c).

If color is a feature of the mark, the applicant should submit facsimiles made by color photography, or by any process that reproduces in color. See [TMEP §904.02\(c\)\(ii\)](#).

If an applicant submits a specimen that exceeds the size requirements (a “bulky specimen”), the USPTO will create a facsimile of the specimen that meets the size requirements of the rule and destroy the original specimen. 37 C.F.R. §2.56(d)(2). If the copy of the specimen created by the USPTO does not adequately depict the mark, the examining attorney will require a substitute specimen that meets the size requirements of the rule and an affidavit or declaration verifying the use of the substitute specimen. See [TMEP §904.05](#) regarding affidavits supporting substitute specimens.

If necessary, the examining attorney may require one actual specimen for examination purposes, under 37 C.F.R. §§ 2.56(a) and 2.61(b).

## **904.02(c) Additional Requirements**

### **904.02(c)(i) Other Materials Required for Examination**

During examination, an examining attorney also has the discretion to request additional materials, under 37 C.F.R. §2.61(b), if necessary for proper examination of the mark. [TMEP §814](#). For example, if the mark is a configuration of the goods or of the container for the goods, the examining attorney may require one actual product or container. Or the examining attorney might require a complete copy of a publication in order to determine whether a mark is merely descriptive of the goods. See [TMEP §904.02\(c\)\(iii\)](#) regarding marks used on publications.

In specific cases, such as when an applicant submits additional materials in response to a requirement made by the examining attorney, and the materials do not meet the size parameters identified above, the USPTO may create facsimiles of these materials to be entered into the record and destroy the originals. However, the examining attorney should encourage the applicant to submit a photograph of the specimen(s) or evidence for the record.

### **904.02(c)(ii) Specimens for Marks Comprising Color**

If color is a feature of the mark, or if the mark consists solely of color, the specimen must show use of the color. 37 C.F.R. §2.51; [TMEP §807.12](#). *Note:* In an application filed on or after November 2, 2003, if an applicant submits a color drawing, or a description of the mark that indicates the use of color on the mark, the applicant must claim color as a feature of the mark. 37 C.F.R. §2.52(b)(1); [TMEP §807.07\(a\)\(i\)](#).

If the applicant submits a specimen that is not in color or not in the appropriate color, the examining attorney will require the applicant to file a substitute specimen that shows use of the appropriate color(s). See [TMEP §904.05](#) regarding substitute specimens.

See also [TMEP §1202.05\(f\)](#) regarding specimens showing use of marks that consist *solely* of color.

### **904.02(c)(iii) Specimens for Marks Used on Publications**

An application for registration of a mark for publications is treated the same as any other application with respect to specimen requirements. The USPTO does not require a complete copy of the publication or a title page in every case. However, the examining attorney may require a copy of the publication under

37 C.F.R. §2.61(b) if he or she believes it is necessary for proper examination. For example, a copy of the publication might be necessary to determine whether a mark is merely descriptive of the goods.

### 904.03 Material Appropriate as Specimens for Trademarks

For a trademark application under §1(a), allegation of use in an application under §1(b), or affidavit of use under §8 or §71 of the Trademark Act, the specimen must show the mark as used on or in connection with the goods in commerce. A trademark specimen should be a label, tag, or container for the goods, or a display associated with the goods. 37 C.F.R. §2.56(b)(1). A photocopy or other reproduction of a specimen of the mark as actually used on or in connection with the goods is acceptable. 37 C.F.R. §2.56(c).

See [TMEP §§1301.04](#) *et seq.* regarding service mark specimens, [TMEP §1304.08\(e\)](#) regarding collective membership mark specimens, [TMEP §1303.02\(b\)](#) regarding collective mark specimens, and [TMEP §1306.06\(b\)](#) regarding certification mark specimens.

#### 904.03(a) Labels and Tags

In most cases, where the trademark is applied to the goods or the containers for the goods by means of labels, a label is an acceptable specimen.

Shipping or mailing labels may be accepted if they are affixed to the goods or to the containers for the goods and if proper trademark usage is shown. *Electronic Communications, Inc. v. Electronic Components for Industry Co.*, 443 F.2d 487, 170 USPQ 118 (8th Cir. 1971), *cert. denied* 404 U.S. 833 (1971); *In re A.S. Beck Shoe Corp.*, 161 USPQ 168 (TTAB 1969). They are not acceptable if the mark as shown is merely used as a trade name and not as a trademark. An example of this is the use of the term solely as a return address. *In re Supply Guys, Inc.*, 86 USPQ2d 1488 (TTAB 2008); *Bookbinder's Sea Food House, Inc. v. Bookbinder's Restaurant, Inc.*, 118 USPQ 318 (Comm'r Pats. 1958); *I. & B. Cohen Bomzon & Co., Inc. v. Biltmore Industries, Inc.*, 22 USPQ 257 (Comm'r Pats. 1934). See [TMEP §1202.01](#) regarding trade name refusals.

In connection with labels whose appearance suggests that they are only for temporary use, the examining attorney may consider it necessary to make further inquiry as to how the specimen is used, under 37 C.F.R. §2.61(b), in order to properly examine the application. A response to the inquiry may include an additional specimen(s) if labels of a more permanent nature have by that time been adopted. However, nothing prohibits the registration of a mark in an application that contains only “temporary” specimens, provided that the specimens were actually used in commerce. *See In re Chica*, 84 USPQ2d 1845 (TTAB 2007) (specimen deemed unacceptable not because it was temporary but because it comprised a mere drawing of the goods with an illustration of how the mark may be displayed and not an actual specimen that applicant used in commerce).

#### 904.03(b) Stampings

Stamping a trademark on the goods, on the container, or on tags or labels attached to the goods or containers, is a proper method of trademark affixation. *See In re Crucible Steel Co. of America*, 150 USPQ 757 (TTAB 1966). The trademark may be imprinted in the body of the goods, as with metal stamping; it may be applied by a rubber stamp; or it may be inked on by using a stencil or template.

When a trademark is used in this manner, photographs or facsimiles showing the actual stamping or stenciling are acceptable as specimens.

When the specimen consists of a stamp on paper, the applicant must explain the nature of the specimen and how it is used.

### **904.03(c) Commercial Packaging**

The terminology “applied to the containers for the goods” means applied to any type of commercial packaging that is normal for the particular goods as they move in trade. Thus, a showing of the trademark on the normal commercial package for the particular goods is an acceptable specimen. For example, gasoline pumps are normal containers or “packaging” for gasoline.

A specimen showing use of the trademark on a vehicle in which the goods are marketed to the relevant purchasers may constitute use of the mark on a container for the goods, if this is the normal mode of use of a mark for the particular goods. *In re E.A. Miller & Sons Packing Co., Inc.*, 225 USPQ 592 (TTAB 1985). *But see In re Lyndale Farm*, 186 F.2d 723, 88 USPQ 377 (C.C.P.A. 1951).

### **904.03(d) Electronic and Digital Media Attachments to Paper Filings**

In the absence of alternative specimens, the USPTO will accept specimens consisting of compact discs (“CDs”), digital video discs (“DVDs”), videotapes, and audiotapes. *See* 37 C.F.R. §2.56(d)(3). Equipment for viewing or listening to these materials is available in the USPTO.

Compact discs, DVDs, audiotapes, and videotapes may contain files in .jpg, .pdf, .wav, .wmv, .wma, .mp3, .mpg, or .avi format. The USPTO is unable to review files in any other format. The USPTO prefers that the applicant submit small files of less than two minutes in duration. Only one specimen should be included on each tape or disc; however, in a multiple-class application, the applicant may include more than one specimen on the same disc or tape. If the nature of the specimen is unclear, the applicant should explain what it is and how it is used.

This section pertains only to CDs, DVDs, audiotapes, and videotapes attached to *paper* filings. Attachments to TEAS filings must be in .jpg or .pdf format. *See* 37 C.F.R. §2.56(d)(4); [TMEP §904.02\(a\)](#).

*See* [TMEP §904.03\(f\)](#) regarding specimens for sound marks, and [TMEP §904.03\(l\)](#) regarding specimens for motion marks. *See* also 37 C.F.R. §§2.56(d)(1) and (2) and [TMEP §904.02\(b\)](#) regarding the size requirements for specimens attached to paper filings, and the procedures for handling specimens that exceed these requirements.

### **904.03(e) Specimens for Trademarks Identifying Computer Programs, Movies, and Videos, or Audio Recordings**

The computer program, video, and movie industries have adopted the practice of applying trademarks that are visible only when the goods, that is, programs or movies, are displayed on a screen (e.g., on the first several frames of a movie).

An acceptable specimen might be a photograph or printout of a display screen projecting the identifying trademark of a computer program, or a photograph of a frame(s) of a movie or video bearing the mark. It is not necessary that purchasers see the mark prior to purchasing the goods, as long as the mark is applied to the goods or their containers, or to a display associated with the goods, and the goods are sold or transported in commerce. *In re Brown Jordan Co.*, 219 USPQ 375 (TTAB 1983) (holding that stamping the mark after

purchase of the goods, on a tag attached to the goods that are later transported in commerce, is sufficient use).

For downloadable computer software, an applicant may submit a specimen that shows use of the mark on an Internet website. Such a specimen is acceptable only if it creates an association between the mark and software and provides sufficient information to enable the user to download or purchase the software from the website. See *In re Azteca Systems, Inc.*, 102 USPQ2d 1955 (TTAB 2012). If the website simply advertises the software without providing a way to download, purchase, or order it, the specimen is unacceptable. See *In re Dell Inc.*, 71 USPQ2d 1725, 1727 (TTAB 2004); see also *In re Osterberg*, 83 USPQ2d 1220, 1224 (TTAB 2007). See [TMEP §904.03\(i\)](#) regarding electronic displays as specimens for trademarks.

Similarly, a specimen for audio recordings in Class 9 that shows use of the mark on an internet website must include a “download” or similar link to put the consumer on notice that the identified goods are available for download. Absent such a link or the equivalent thereof, the specimen on its face fails to show use of the mark in commerce for the goods. *In re Rogowski*, 104 USPQ2d 2012, 2014-15 (TTAB 2012).

Specimens for software may also indicate that the software is a “beta” version. This term is commonly used in the software field to identify a preliminary version of a product. Although some beta products may not be made available to consumers, others are. Thus, the appearance of this term on a specimen for software does not, by itself, necessarily mean that the relevant goods are not in actual use in commerce or that the specimen is unacceptable. However, if examination of the specimen indicates that the beta version is not in actual use in commerce, the examining attorney must refuse registration because applicant has not provided evidence of use of the applied-for mark in commerce. The statutory basis for refusal is 15 U.S.C. §§1051 and 1127. See [TMEP §1301.03\(a\)](#) regarding service mark specimens containing the term “beta.”

#### **904.03(f) Specimens for Sound Marks**

To show that a sound mark actually identifies and distinguishes the goods/services and indicates their source, an applicant must submit a specimen that contains a sufficient portion of the audio or video content to show how the mark is used on or in connection with the goods/services.

For paper filings, specimens for sound marks must be submitted on CDs, DVDs, videotapes, or audiotapes. 37 C.F.R. §2.56(d)(3). See [TMEP §904.03\(d\)](#). For TEAS applications under §1(a), the specimen can be attached to the application and must be an electronic file in .wav, .wmv, .wma, .mp3, .mpg, or .avi format. Audio files should not exceed 5 MB in size, and video files should not exceed 30 MB, because TEAS cannot accommodate larger files. To submit an electronic file in connection with any other TEAS form (e.g., Response to Office Action or Statement of Use/Amendment to Allege Use), the file must be sent after the TEAS document is transmitted, as an attachment to an e-mail message directed to TEAS@uspto.gov, with clear instructions that the electronic file should be associated with “the application filed under Serial No. <specify>.” See *In re Powermat Inc.*, 105 USPQ2d 1789, 1791 (TTAB 2013). Note, however, that audio and video files attached to an e-mail currently cannot exceed 9 MB.

See [TMEP §904.02\(a\)](#) regarding specimens filed electronically. See also [TMEP §§807.09](#) and [1202.15](#) regarding sound marks.

#### **904.03(g) Displays Associated with Goods**

A display must be associated directly with the goods offered for sale. It must bear the trademark prominently. However, it is not necessary that the display be in close proximity to the goods. See *In re Marriott Corp.*,

459 F.2d 525, 173 USPQ 799 (C.C.P.A. 1972); *Lands' End Inc. v. Manbeck*, 797 F. Supp. 511, 24 USPQ2d 1314 (E.D. Va. 1992).

Displays associated with the goods essentially comprise point-of-sale material such as banners, shelf-talkers, window displays, menus, and similar devices.

These items must be designed to catch the attention of purchasers and prospective purchasers as an inducement to make a sale. Further, the display must prominently display the trademark in question and associate it with, or relate it to, the goods. *In re Osterberg*, 83 USPQ2d 1220 (TTAB 2007); *In re Morganroth*, 208 USPQ 284 (TTAB 1980) (purported mark was so obfuscated on the specimen that it was not likely to make any impression on the reader). The display must be related to the sale of the goods such that an association of the two is inevitable. See *In re Bright of America, Inc.*, 205 USPQ 63 (TTAB 1979), and cases cited therein. See also *In re ITT Rayonier Inc.*, 208 USPQ 86 (TTAB 1980). Cf. *In re Shipley Co. Inc.*, 230 USPQ 691 (TTAB 1986); *In re Jones*, 216 USPQ 328 (TTAB 1982).

Folders, brochures, or other materials that describe goods and their characteristics or serve as advertising literature are not per se “displays.” *In re Schiapparelli Searle*, 26 USPQ2d 1520 (TTAB 1993); *In re Drilco Industrial Inc.*, 15 USPQ2d 1671 (TTAB 1990). In order to rely on such materials as specimens, an applicant must submit evidence of point-of-sale presentation. Such evidence must consist of more than an applicant's statement that copies of the material were distributed at sales presentations or tradeshow. A mere statement that advertising and promotional materials are used in connection with sales presentations is not sufficient, in and of itself, to transform advertising and promotional materials into displays used in association with the goods. *Osterberg*, 83 USPQ2d 1220, 1224 (“Applicant's declaration lacks sufficient detail to transform the web page from advertising into a display used in association with the goods. For example, there is no discussion regarding how the applicant used the web page at sales presentations to make an association between the mark and the products or whether consumers, in fact, associated the mark with the products. The use of advertising material in connection with the sales of a product does not ipso facto make it a display used in association with the goods sufficient to support technical trademark use for registration.”); see also *In re Anpath Group, Inc.*, 95 USPQ2d 1377 (TTAB 2010) (holding that pamphlet and flyer listing the URL of applicant's website and/or a telephone number for contacting sales representatives does not create the same point-of-sale situation as a detailed catalogue, a detailed web page, or a situation where there is the option of placing an order based upon detailed information from the specimen); *In re Ancha Electronics Inc.*, 1 USPQ2d 1318 (TTAB 1986); (holding that a photograph showing an informational flyer or leaflet clearly depicting the mark and presented on the goods at a trade show exhibit was an acceptable display associated with the goods); *In re Columbia Chase Corp.*, 215 USPQ 478 (TTAB 1982) (holding that folders and brochures describing goods and their characteristics or serving as advertising literature are not displays, and the appearance of marks and product photographs in such literature does not per se amount to use of a mark on displays without evidence of point-of-sale presentation).

An infomercial was held to be a display associated with the goods, where the goods were shown either immediately before or immediately after the trademark was displayed, and the information on how to order the goods was given within a reasonable time after the goods were shown. The Board found that the infomercial created an association between the trademark and the goods, and the test for constituting a display associated with the goods was, therefore, satisfied. *In re Hydron Techs., Inc.*, 51 USPQ2d 1531 (TTAB 1999).

Displays associated with the goods also exist in an electronic or online environment in the form of web pages. These “electronic displays” perform the same function as traditional displays and must meet the same standards for an acceptable specimen as traditional displays. See *In re Sones*, 590 F.3d 1282, 1288, 93

USPQ2d 1118, 1123 (Fed. Cir. 2009); *In re Dell Inc.*, 71 USPQ2d 1725, 1727 (TTAB 2004). See [TMEP §904.03\(i\)](#) regarding electronic displays.

### 904.03(h) Catalogs

In appropriate cases, catalogs are acceptable specimens of trademark use. *See Lands' End Inc. v. Manbeck*, 797 F. Supp. 511, 24 USPQ2d 1314 (E.D. Va. 1992). In that case, the applicant had applied to register “KETCH” for purses. The specimen was a catalog page that included a picture of the goods and, below the picture, the mark and a description of the goods. The Court stated, “The alleged trademark ‘KETCH’ appears prominently in large bold lettering on the display of purses in the Lands’ End specimen in a manner which closely associates the term with the purses.” 24 USPQ2d at 1315.

The Court determined that the catalog was not mere advertising and that it met the relevant criteria for displays associated with the goods. The Court evaluated the catalog specimen as follows:

A customer can identify a listing and make a decision to purchase by filling out the sales form and sending it in or by calling in a purchase by phone. A customer can easily associate the product with the word “KETCH” in the display.... The point of sale nature of this display, when combined with the prominent display of the alleged mark with the product, leads this court to conclude that this mark constitutes a display associated with the goods.

24 USPQ2d at 1316.

Accordingly, examining attorneys may accept any catalog or similar specimen as a display associated with the goods, provided that it: (1) includes a picture or a sufficient textual description of the relevant goods; (2) shows the mark in association with the goods; and (3) includes the information necessary to order the goods (e.g., an order form or a phone number, mailing address, or e-mail address for placing orders).

However, the inclusion of a phone number, Internet address, and/or mailing address merely as part of corporate contact information on an advertisement describing the product is not in itself sufficient to meet the criteria for a display associated with the goods. There must be an offer to accept orders or instructions on how to place an order. *See In re MediaShare Corp.*, 43 USPQ2d 1304,1306 (TTAB 1997) (finding applicant’s fact sheet brochure, which included an address and phone number but omitted any information as to product price and how to order applicant’s software, was merely advertising material). It is not necessary that the specimen list the price of the goods.

### 904.03(i) Electronic Displays

A web page that displays a product can constitute a “display associated with the goods” if it:

- (1) contains a picture or textual description of the identified goods;
- (2) shows the mark in association with the goods; and
- (3) provides a means for ordering the identified goods.

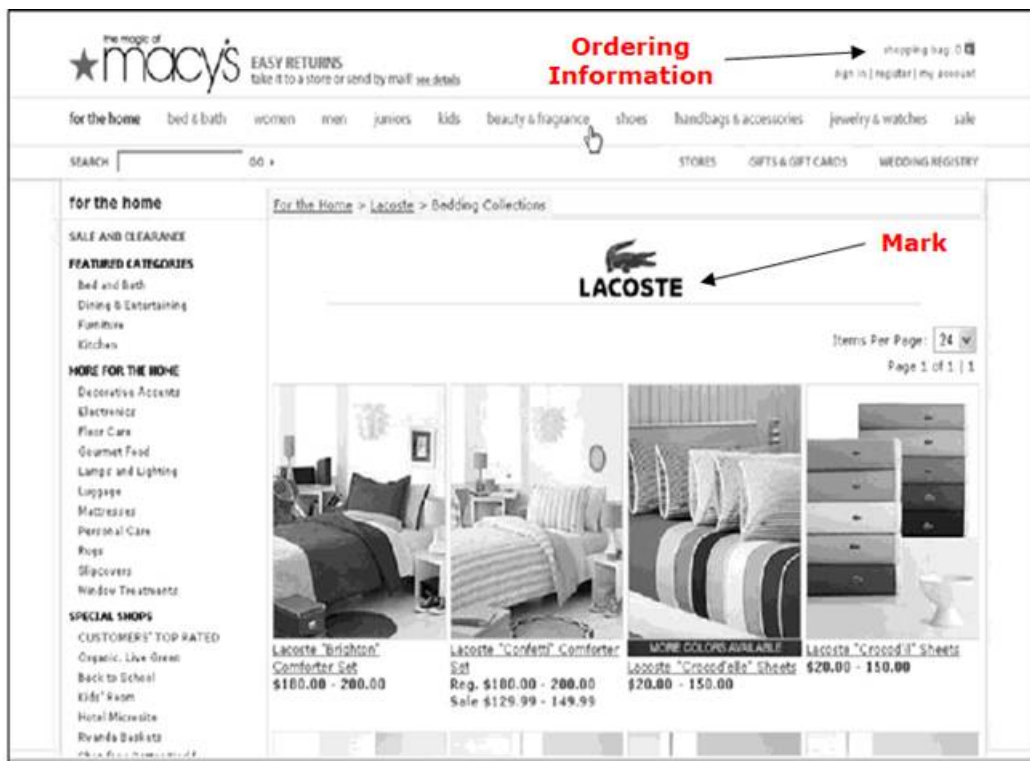

*See In re Sones*, 590 F.3d 1282, 1288, 93 USPQ2d 1118, 1123 (Fed Cir. 2009); *In re Azteca Sys., Inc.*, 102 USPQ2d 1955, 1957-58 (TTAB 2012); *In re Dell Inc.*, 71 USPQ2d 1725, 1727 (TTAB 2004); *Lands’ End v. Manbeck*, 797 F. Supp. 511, 514, 24 USPQ2d 1314, 1316 (E.D. Va. 1992).

The mark must also be displayed on the web page in a manner in which customers will recognize it as a mark. See *In re Morganroth*, 208 USPQ 284, 287-88 (TTAB 1980); see also *In re Osterberg*, 83 USPQ2d 1220, 1223 (TTAB 2007) (finding that CONDOMTOY CONDOM was not displayed so prominently on web page specimen that consumers would recognize it as a trademark for condoms). See [TMEP § 1202.04](#) regarding matter that is merely informational in nature.

Generally, a web page will display the trademark in association with a picture of the goods. However, in *Sones*, the Federal Circuit held that although a visual depiction of the goods “is an important consideration in determining whether a submitted specimen sufficiently associates a mark with the source of the goods,” a picture of the goods on the web page is not mandatory. *In re Sones*, at 1288, 93 USPQ2d at 1123. A textual description may suffice where “the actual features or inherent characteristics of the goods are recognizable from the textual description, given that the more standard the product is, the less comprehensive the textual description need be.” *Id.* at 1289, 93 USPQ2d at 1124.

An applicant need not describe a web-page specimen as a “display” for it to qualify as an acceptable display specimen, nor must the web page come from an applicant’s own website. A web page from a third-party website may be acceptable as a display if the mark is sufficiently associated with the applicant’s goods. See *In re Osterberg*, 83 USPQ2d at 1221, 1223-24 (finding the specimen unacceptable not because it was a web page from a third-party website, but because it neither showed the mark in association with the goods nor provided a means for ordering the goods). For instance, a manufacturer of bed linens may rely on a third-party retail vendor’s web page when the web page shows a picture of the bed linens in association with the mark and provides a means for ordering them, as shown in Example 1.

**Example 1:** Mark is associated with the goods, goods are pictured and described, and ordering information is provided.

**Mark:** LACOSTE

**Goods:** Coverlets, duvet covers, duvets, bed blankets, bed linen, bed sheets, pillow cases, bath linen, washing mitts

- The mark is placed below the website navigation tabs and is prominently displayed.
- The mark is physically close to the goods and is repeated in the links located under each product, indicating a direct association with the goods.
- No other marks appear to be used in connection with the goods apart from the alligator design and the product style names, all of which are associated with the goods.
- Product information is provided in the form of pictures and descriptions of the goods along with prices.
- There is a “shopping bag” at the top of the web page to enable direct ordering.
- Even if the web page did not include the larger LACOSTE mark, the LACOSTE marks depicted under the photographs of the goods (e.g., Lacoste “Brighton” Comforter Set or Lacoste “Confetti” Comforter Set) would be acceptable to show trademark use for the goods.
- If the proposed mark were “Macy’s” (as it appears in the upper-left corner), the web page would not be acceptable for goods because of the closer proximity and association of the other marks with the goods (i.e., the LACOSTE and alligator).

Similarly, a web page from a third-party, social-media website may also be accepted provided the web page satisfies the elements of a display specimen.

However, while a web page display associated with the goods is an acceptable specimen for goods, mere advertising material is not. *In re Anpath Grp.*, 95 USPQ2d 1377, 1380 (TTAB 2010); *In re Quantum Foods, Inc.*, 94 USPQ2d 1375, 1379 (TTAB 2010); *In re Osterberg*, 83 USPQ2d at 1224; *In re Dell Inc.*, 71 USPQ2d at 1727; *In re MediaShare Corp.*, 43 USPQ2d 1304, 1307 (TTAB 1997). Acceptable web-page displays are not merely advertising, but instead serve as point-of-sale displays, because the website on which the web page appears is, in effect, an electronic retail store, and the web page is a shelf-talker or banner which encourages the consumer to buy the product and provides the information necessary to do so. A consumer using the link on the web page to purchase the goods is the equivalent of a consumer seeing a shelf-talker and taking the item to the cashier in a store to purchase it. *See In re Dell Inc.*, 71 USPQ2d at 1727. The web page is, thus, a point-of-sale display by which an actual sale is made.

A point-of-sale display is “‘calculated to consummate a sale’”; that is, it includes the information necessary for the consumer to decide to purchase the goods, and it appears in a setting that allows the consumer to immediately buy the goods. *In re Quantum Foods, Inc.*, 94 USPQ2d at 1379 (quoting *In re Bright of Am., Inc.*, 205 USPQ 63, 71 (TTAB 1979)); *In re Anpath Grp.*, 95 USPQ2d at 1382; *In re MediaShare Corp.*, 43 USPQ2d at 1305; *Lands’ End Inc.*, 797 F. Supp. at 514, 24 USPQ2d at 1316. An advertisement, however, merely describes or touts the benefits of the goods, influences people to buy them, or informs the public about the goods and the company that provides them. *In re Anpath Grp.*, 95 USPQ2d at 1381-82; *In re Quantum Foods, Inc.*, 94 USPQ2d at 1379. It does not offer a way to directly purchase the goods, because it either does not contain an offer to accept orders for the goods or does not provide special instructions for

placing orders for the goods. *In re Quantum Foods, Inc.*, 94 USPQ2d at 1380; *In re Osterberg*, 83 USPQ2d at 1224.

Therefore, a web page that merely provides information about the goods, but does not provide a means of ordering them, is viewed as promotional material, which is not acceptable to show trademark use on goods.

See *In re Genitope Corp.*, 78 USPQ2d 1819, 1822 (TTAB 2006) (“[T]he company name, address and phone number that appears at the end of the web page indicates only location information about applicant; it does not constitute a means to order goods through the mail or by telephone, in the way that a catalog sales form provides a means for one to fill out a sales form or call in a purchase by phone.”). Merely providing a link to the websites of online distributors is not sufficient. There must be a means of ordering the goods directly from the applicant’s web page, such as a telephone number for placing orders or an online ordering process. *In re Quantum Foods, Inc.*, 94 USPQ2d at 1380; *In re Osterberg*, 83 USPQ2d at 1224.

When a web-page specimen appears to be merely advertising, statements by the applicant that the specimen is used in connection with the sale of the goods, without evidence or a detailed explanation of the manner of use, will not suffice to establish that the specimen is a display associated with the goods. *In re Osterberg*, 83 USPQ2d at 1224 (finding that applicant’s mere statement in a signed declaration that copies of the web page were distributed at sales presentation lacked sufficient detail to transform the web page from an advertisement into a display associated with the goods).

Whether a web-page display qualifies as an acceptable specimen is a question of fact, based on the evidence of record. *In re Azteca Sys., Inc.*, 102 USPQ2d at 1957 (citing *Lands’ End*, 797 F. Supp. at 514, 24 USPQ2d at 1316); *In re Hydron Techs. Inc.*, 51 USPQ2d 1531, 1533 (TTAB 1999). The presentation on the web page of the picture or description of the goods, the manner of the mark’s use in association with those goods, and the nature of the ordering information affect the specimen’s acceptability. Thus, a specimen that describes or displays a picture of the goods, shows the mark, and provides ordering information may nonetheless be unacceptable because it fails to demonstrate an association between the mark and the goods. Sometimes, a single fact or piece of evidence may be dispositive. Often, however, a combination of facts and evidence of record may be required to establish the acceptability of the specimen. If ordering information is not readily discernible from the submitted web page, the applicant may provide multiple, sequential web pages as part of the specimen to clarify the ordering process on the website.

See [TMPE §§904.03\(i\)\(A\)–904.03\(i\)\(C\)\(3\)](#) for further discussion of the various factors for assessing whether a web-page display is an acceptable specimen.

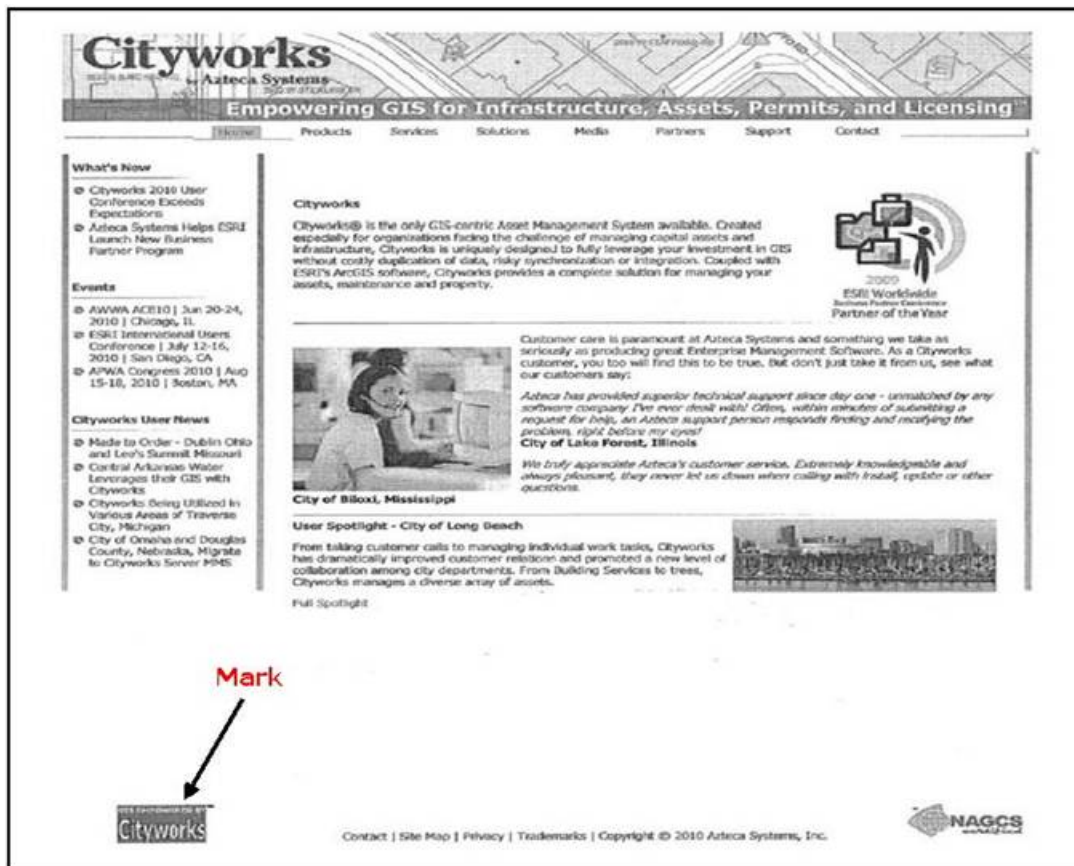

### **904.03(i)(A) Picture or Description of the Goods**

In order for a display to be associated with the goods, something on the web page must show or describe the goods for the consumer, that is, a picture or description of the goods. See *In re Sones*, 590 F.3d 1282, 1288-89, 93 USPQ2d 1118, 1123-24 (Fed. Cir. 2009). A description will suffice if “the actual features or inherent characteristics of the goods are recognizable from the textual description.” *Id.* at 1289, 93 USPQ2d at 1124. The level of detail required depends on the type of goods at issue. *Id.* Standard products (e.g., television sets, baseball gloves, or pet food) typically will not require a comprehensive description for the consumer to know what the goods are. Complicated or sophisticated products (e.g., computer products,

medical devices, or industrial machinery) may require a more detailed description, in the absence of a picture of the goods.

### 904.03(i)(B) Show the Mark in Association with the Goods

A web-page display specimen “must in some way evince that the mark is ‘associated’ with the goods and serves as an indicator of source.” *In re Sones*, 590 F.3d 1282, 1288, 93 USPQ2d 1118, 1123 (Fed. Cir. 2009). Assessing the “mark-goods” association on a web page involves many variables, including the prominence and placement of the mark, the content and layout of the web page, and the overall impression the web page creates. Web-page content and layout may sometimes distract consumers and prevent them from making the necessary connection between the mark and the identified goods. *In re Azteca Sys., Inc.*, 102 USPQ2d 1955, 1958 (TTAB 2012). Factors such as the proximity of the mark to the goods, the presence of other marks, intervening text between the mark and the goods, and the inclusion of other material that is unrelated or marginally related to the identified goods, tend to disrupt purchasers from making the mark-goods association, as shown in Example 2. *Id.*

**Example 2:** Applied-for mark is not associated with the goods.

**Mark:** GIS EMPOWERED BY CITYWORKS

**Goods:** Computer software for management of public works and utilities assets

- The applied-for mark is distant from the description of the software, and is separated from the description by more than fifteen lines of text concerning marginally related topics;
- Due to the appearance of a number of other marks on the web page, it is unclear whether any particular mark is associated and used in connection with the identified goods;
- The left sidebar includes links to articles and news about applicant's business and is not limited to the software goods.

The following features of a specimen particularly influence the mark-goods association analysis.

### **904.03(i)(B)(1) Prominence of Mark**

The more prominently an applied-for mark appears on a web page, the more likely the mark will be perceived as a trademark. A mark may appear more prominent when the specimen:

- presents the mark in larger font size or different stylization or color than the surrounding text;
- places the mark at the beginning of a line or sentence;
- positions the mark next to a picture or description of the goods; or
- uses the "TM" designation with the applied-for mark (however, the designation alone does not transform a mark into a trademark if other considerations indicate it does not function as a trademark).

Compare *In re Quantum Foods, Inc.*, 94 USPQ2d 1375, 1378 (TTAB 2010) (describing an applied-for mark as "prominently displayed" on the specimen when the mark appeared by itself above pictures relating to applicant's goods in relatively large font and in a different color than some of the other text on the page), with *In re Osterberg*, 83 USPQ2d 1220, 1223 (TTAB 2007) (finding the applied-for mark not prominently displayed because it was buried in text describing the mark and, while the mark was shown in bold font, so was other matter). See *In re Sones*, 590 F.3d 1282, 1289, 93 USPQ2d 1118, 1124 (Fed. Cir. 2009) ("Though not dispositive, the 'use of the designation "TM" . . . lends a degree of visual prominence to the term.'" (quoting *In re Dell Inc.*, 71 USPQ2d 1725, 1729 (TTAB 2004)); *In re Quantum Foods, Inc.*, 94 USPQ2d at 1378-79 (concluding that applicant's specimen did not show use of the applied-for mark as a trademark for the goods, despite the mark's "TM" designation); *In re Osterberg*, 83 USPQ2d 1220 at 1224, n.4 ("The mere use of a superscript 'tm' cannot transform a nontrademark term into a trademark." (citing *In re Brass-Craft Mfg. Co.*, 49 USPQ2d 1849, 1853 (TTAB 1998)).

These factors are not dispositive, and the web page as a whole must be assessed to determine whether the applied-for mark functions as a trademark for the identified goods. Alternatively, a mark may appear less prominent and less likely to be perceived as a trademark if it is:

- shown in the same font size, stylization, or color as the surrounding text;
- buried in a sentence; or
- encompassed within descriptive text such that the commercial impression of the mark is that of a descriptive term for the goods and not as a trademark.

See *In re Osterberg*, 83 USPQ2d at 1223.

### **904.03(i)(B)(2) Placement of Mark and Proximity to the Goods**

***Appearance in Website and E-mail Addresses*** . When a mark appears in the computer browser area as part of the URL, Internet address, or domain name of the website that houses the web page, consumers generally do not recognize this as trademark use. Instead, this use merely identifies the Internet location of the website where business is conducted and goods or services are offered. See, e.g., *In re Roberts*, 87 USPQ2d 1474, 1479-80 (TTAB 2008) (concluding that the mark IRESTMYCASE, which appeared as part of a website address, www.irestmymcase.com, on applicant's specimens, merely served as a contact address to reach the applicant and failed to function as a service mark for applicant's services); *In re Supply Guys, Inc.*, 86 USPQ2d 1488, 1493 (TTAB 2008) (“[A]pplicant's use of the term LEADING EDGE TONERS as part of the internet address, www.leadingedgetoners.com, . . . identifies the website where applicant conducts its retail sales services. Obviously, a website can be used for multiple purposes and the simple fact that a term is used as part of the internet address does not mean that it is a trademark for the goods sold on the website.”); *In re Eilberg*, 49 USPQ2d 1955, 1956 (TTAB 1998) (finding that the mark WWW.EILBERG.COM, when displayed in relatively small and subdued typeface below other contact information on applicant's letterhead, merely indicated the Internet location of applicant's website rather than functioning as a service mark for applicant's legal services). Similarly, the use of the mark embedded in an e-mail address would be viewed as part of the website address where applicant may be contacted, rather than as a trademark.

***Placement in a Location Typical for a Retail-Store Service Mark*** . A mark may be displayed at the top of a web page, separated from the relevant goods by the website navigation tabs, which may direct consumers to information about the goods, the applicant, and the website. Since it is customary for retailers to place their store marks in this location, such use of the applied-for mark is likely to be recognized as an online retail-store service mark, as shown in Example 3.

**Example 3:** Mark is associated with the services, but the specimen would not be acceptable as evidence of use of the mark as a trademark for the goods shown.

**Mark:** MACYS.COM

**Services:** Electronic retail department-store services

- The web page is not acceptable as evidence of use of the mark as a trademark for the goods shown because the mark is serving only as a service mark for retail store services featuring the goods of others (e.g., “Cuisinart” or “Polo by Ralph Lauren”).
- The mark is located in the upper-left corner where retail service marks usually appear and is adjacent to the greeting “Welcome to macys.com.”

- Other trademarks for various goods appear on the web page, such as “Cuisinart,” “Club Room,” “Charter Club,” and “Polo by Ralph Lauren,” which appear to be more directly associated with the goods.
- Retail store services indicia appear, such as “departments” on the right and “expresscheckout sign-in,” “bridal registry,” and “want a card? get one here” on the left.

The mark may also include wording (e.g., “market,” “store,” or “depot”) that indicates use as a service mark. Nevertheless, a mark appearing in a location where service marks normally appear may qualify as a trademark if the web page demonstrates an association between the applied-for mark and the identified goods, and otherwise meets the elements of an acceptable display specimen, as shown in Example 4. *See In re Supply Guys, Inc.*, 86 USPQ2d at 1495-96 (noting that “a mark may serve both as a trademark and service mark” and that one “must look to the perception of the ordinary customer to determine whether the term functions as a trademark”).

**Example 4:** Mark is associated with the goods, goods are pictured and described, and ordering information is provided.

**Mark:** HAPPY SOCKS

**Goods:** Clothes, namely, socks

- The mark is shown prominently in the upper-left corner of the web page, is followed by the “TM” designation, is placed in close proximity to the goods, and appears to be the only mark on the web page associated with the goods.
- The reference to “our socks” under “Add to cart” button reinforces trademark use of the mark because it conveys that the socks sold on the web page are produced by HAPPY SOCKS.
- The web page contains sufficient product details to make the decision to purchase the goods, including picture and description; size, color, and quantity options; price; and material content of the goods.
- The ordering information is in the form of an “Add to cart” button adjacent to the picture and description of goods.

Furthermore, if a mark appears on a web page in a location where trademarks normally are not placed, a “substantially larger and more prominent” placement of the mark thereon could result in acceptable trademark use, when the only products on the web page are the identified goods, the placement of the mark is such that the mark-goods association is evident, and the web page otherwise meets the elements of an acceptable display specimen. *See* Examples 5 and 6.

**Example 5:** Mark is associated with the goods, goods are pictured and described, and ordering information is provided.

**Mark:** COLE HAAN

**Goods:** Eyeglasses, sunglasses, cases for spectacles and sunglasses

- The mark is located in the upper-left corner of the web page and is prominently displayed.
- The mark is somewhat physically distant from the goods, but it appears to be the only mark on the web page associated with the goods, and the only products shown are the identified goods.
- Although the menu on the left, under “COLLECTIONS,” does include other marks, these marks do not appear to be used in connection with the goods (i.e., the other marks are not placed directly next to the pictures and descriptions of the goods) and the menu simply appears to inform consumers that they may also purchase from other brand-name “collections” on the website.
- Ordering information in the form of a “SHOPPING BAG” is included near the top of the web page.
- The mark may also function as a service mark for retail store services since the menu on the left of the web page contains various categories of goods sold in the store, identifies other brand names carried by the store, and provides a “STORES” link on the bottom for locating physical stores.

**Example 6:** Mark is associated with the goods, goods are pictured and described, and ordering information is provided.

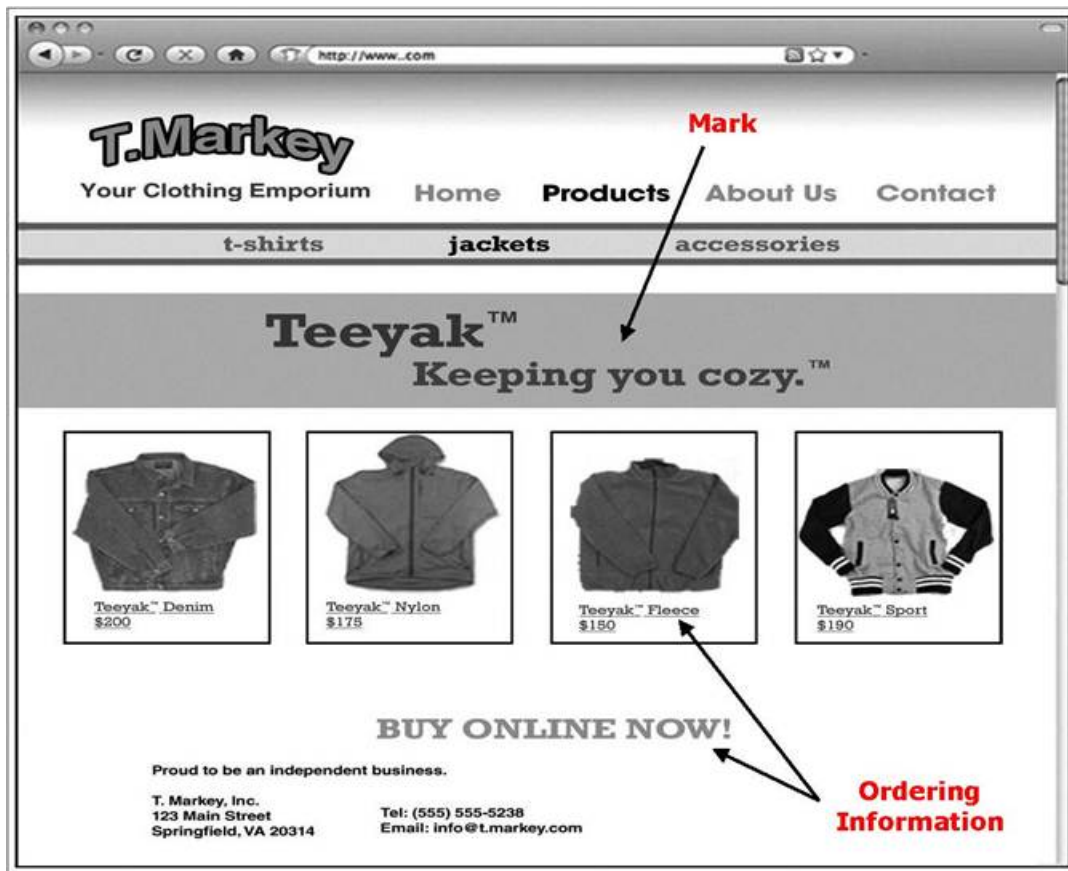

**Mark:** BROOKS BROTHERS

**Goods:** Bed sheets, dust ruffles, duvet covers, pillow cases, pillow shams, bed shams, bed spreads, towels, and wash cloths

- The mark is displayed prominently in large font and placed above the pictures of the goods.
- No other marks appear to be used in connection with the identified goods apart from the sheep design placed near the goods, which is also associated with the goods.
- The web page contains pictures and descriptions of the goods, size and color selections, and price information.
- The web page would also be an acceptable specimen if the mark were for retail store services because the mark is located where retail service marks are typically placed and the “FIND A STORE” tab indicates the presence of physical stores, thus reinforcing service mark usage.

**Displayed in or Near Corporate Contact Information** . A mark that appears on a web page only in conjunction with the corporate address, telephone number, and website and e-mail addresses, and/or is placed on the web page near boilerplate and standard information about the applicant or the website (e.g., “Home” and “About Us” links, legal notices, or technical requirements of the website) is less likely to be seen as a trademark and more likely to be perceived as a trade name under which the applicant conducts business. *See In re Walker Process Equip. Inc.*, 233 F.2d 329, 331-32, 110 USPQ 41, 43 (C.C.P.A. 1956) (indicating that the placement of the applied-for mark WALKER PROCESS EQUIPMENT INC. above wording denoting applicant’s location suggested that the mark was not used as a trademark, but as a trade name).

**Presence of Other Marks** . In some instances, the appearance of more than one mark (whether word or design marks) on the web page may distract consumers and make it less likely that they will perceive an association between the applied-for mark and the relevant goods. *See In re Azteca Sys., Inc.*, 102 USPQ2d 1955, 1958 (TTAB 2012). The placement of each mark, particularly the applied-for mark, in relation to the identified goods may affect whether it is associated with the goods and functions as a trademark (see Example 7) or, instead, serves as a service mark or trade name.

**Example 7:** Mark is associated with the goods, goods are pictured and described, and ordering information is provided.

**Mark:** KEEPING YOU COZY.

**Goods:** Jackets

- The mark is placed below the website navigation tabs and is prominently displayed in large font followed by the “TM” designation.
- The mark is physically close to the goods and would be perceived to be associated with them.
- The web page features product information in the form of pictures and descriptions of the goods along with prices.
- The links under each product combined with the “BUY ONLINE NOW!” instruction indicate that direct ordering is possible.
- If the proposed mark were “T. Markey Your Clothing Emporium” (as it appears in the upper-left corner), the web page would not be acceptable for goods because it is located where service marks are commonly placed and seems to function as a retail store service mark, there is other matter separating the mark from the goods, and there are other marks placed closer to the goods and better associated with the goods.

The nature of the wording and design elements of each mark on the specimen and the appearance of the same or similar elements in the various marks may also influence whether the applied-for mark would be perceived as a trademark for the relevant goods, as in Example 8.

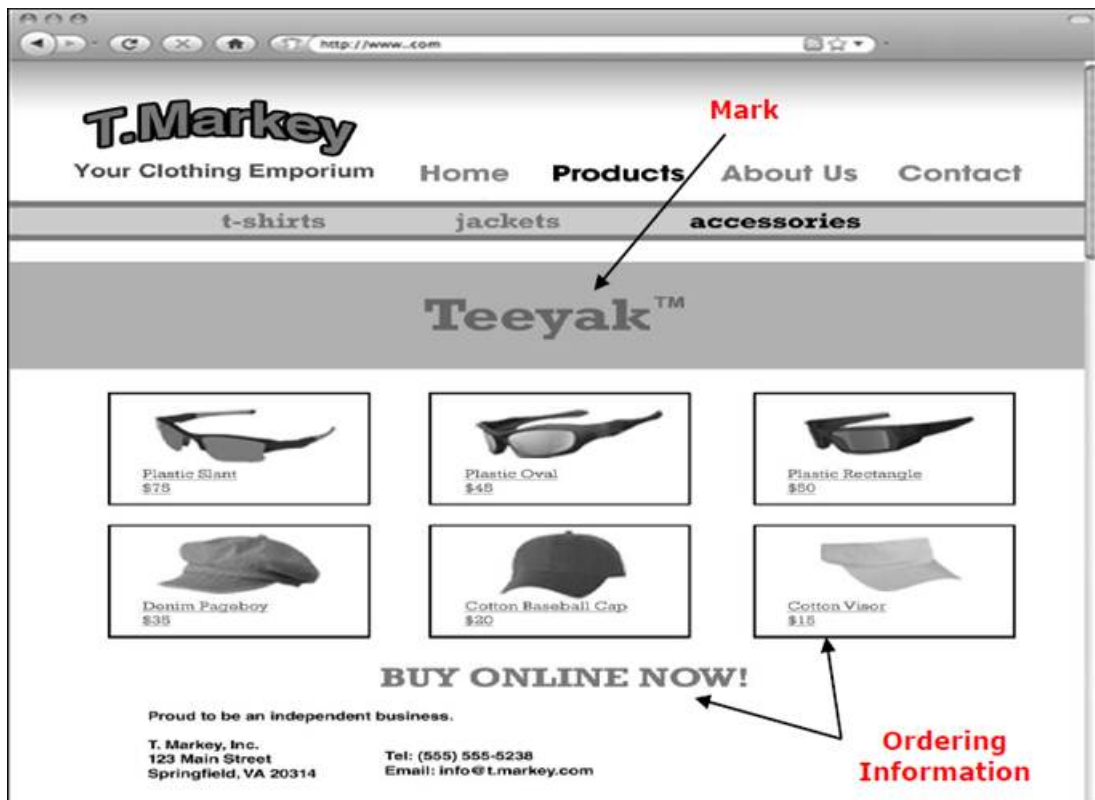

**Example 8:** Mark is associated with the goods, goods are pictured and described, and ordering information is provided.

**Mark:** T.MARKEY YOUR CLOTHING EMPORIUM

**Goods:** Shirts

- The mark is located on the top of the web page and is prominently displayed.
- Although the mark is placed above the website navigation tabs and appears in conjunction with a slogan that refers to retail store services (i.e., “Your Clothing Emporium”), the mark still appears to be associated with the goods because the goods are shown immediately below the navigation tabs and the identified goods are the only products displayed.
- Another mark appears to be used in connection with the goods (i.e., “Let T.Markey Bundle You Up.” and design). However, multiple marks may function as a source indicator for the same goods. Here, both marks contain the same term “T.Markey,” suggesting the marks indicate the same source, and both are placed near and in association with the goods.
- The web page provides product information in the form of pictures and descriptions of the goods, prices, and size options.
- The telephone number is an acceptable means of ordering, even though it is not accompanied with special ordering instructions, because there is sufficient product information to make the decision to purchase the goods and the telephone number is prominently displayed and positioned in close proximity to the product information, implying that the goods may be ordered by calling the telephone number. If the telephone number had been listed near or as part of applicant’s address, it would not be sufficient ordering information since it would be perceived as part of the corporate contact information and not as a means for purchasing the goods.

Association is more likely when the applied-for mark is physically near the goods and no other marks appear to be used in connection with the goods, as in Example 9.

**Example 9:** Mark is associated with the goods, goods are pictured and described, and ordering information is provided.

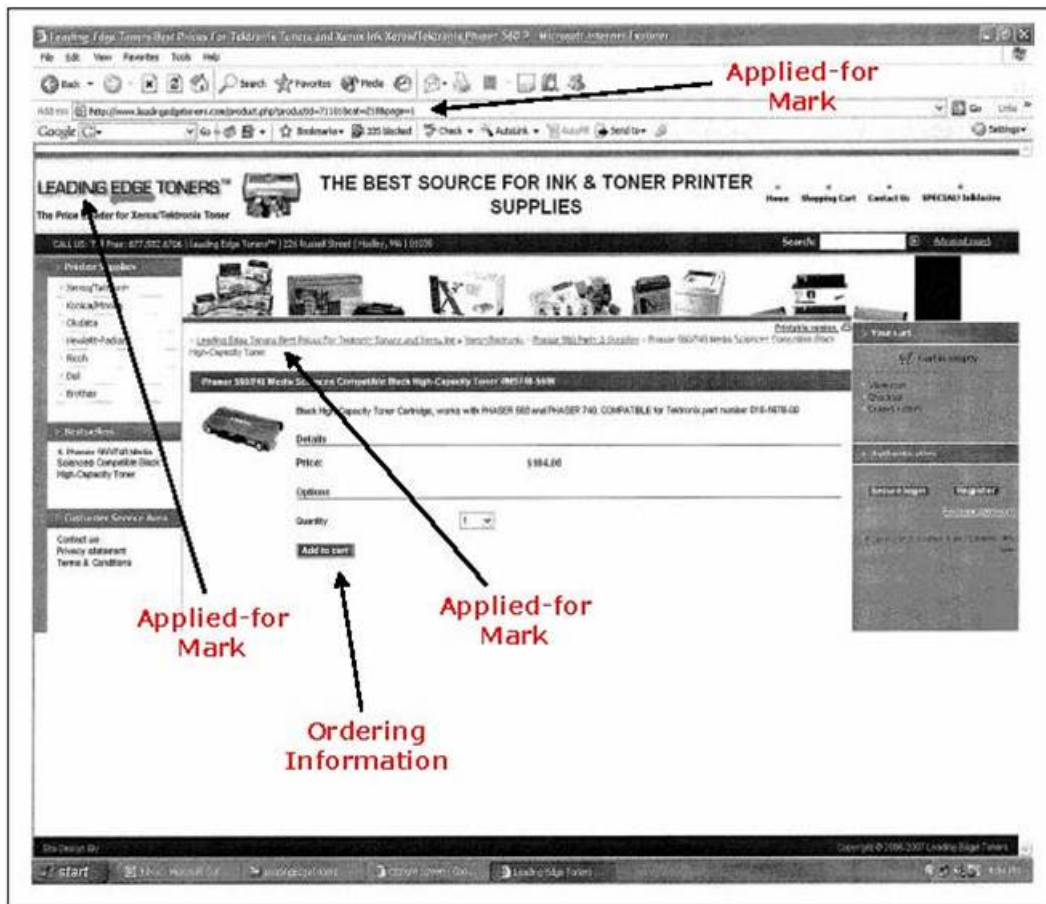

**Mark:** TEEYAK

**Goods:** Sunglasses and hats

- The mark appears below the website navigation tabs and is prominently displayed in large font followed by the “TM” designation.
- The mark is physically close to the goods and is directly associated with them.
- Although another mark (i.e., “T.Markey Your Clothing Emporium”) appears on the web page, it seems to function as a retail store service mark since it is located where service marks are commonly placed, there is other matter separating the mark from the goods, and there is another mark placed closer to the goods and better associated with them.
- Product information is provided in the form of pictures and descriptions of the goods along with prices.
- The links under each product combined with the “BUY ONLINE NOW!” instruction indicate that direct ordering is possible.

- In the absence of links and the “BUY ONLINE NOW!” instruction, the telephone number would not be acceptable ordering information because it appears to be part of corporate contact information provided to obtain information about the product or the company and not intended as a means of placing or accepting orders.

Association becomes less likely if other marks are used in connection with the goods and appear to be trademarks for those goods, as in Example 10.

**Example 10:** Applied-for mark does not function as a trademark.

**Mark:** LEADING EDGE TONERS

**Goods:** Numerous goods including toner, toner cartridges, ink sticks, components for laser toner cartridges, and printer parts

- Use of the applied-for mark in the URL identifies the website where applicant's retail services are conducted and does not show trademark use.
- The applied-for mark functions as a service mark for retail store or distributorship services, rather than as a trademark, because it appears in the upper-left corner of the web page where service marks normally appear and there are other marks that appear to be used in connection with the goods.
- The use of the applied-for mark in phrases containing third-party trademarks that are used to identify goods of third parties (e.g., "Leading Edge Toners Best Prices for Tektronix Toners" or "The Price Leader for Xerox/Tektronix Toner.") does not constitute trademark use and, instead, signifies that the applicant is a retail store or distributorship that sells the goods of others.

### 904.03(i)(C) Ordering Information

A point-of-sale web-page display must provide a means of ordering the goods, either directly from the web page itself (e.g., web page contains a "shop online" button or link) or from information gleaned from the web page (e.g., web page lists a telephone number designated for ordering). See *In re Quantum Foods, Inc.*, 94 USPQ2d 1375, 1378-79 (TTAB 2010); *In re Osterberg*, 83 USPQ2d 1220, 1224 (TTAB 2007). If the web page offers no way to purchase the goods, the web page is merely an advertisement and not a display associated with the goods. See *In re Quantum Foods, Inc.*, 94 USPQ2d at 1378-80; *In re Osterberg*, 83 USPQ2d at 1224; *In re Genitope Corp.*, 78 USPQ2d 1819, 1822 (TTAB 2006).

Indicators of the ability to buy the goods via the web page may include:

- a sales order form to place an order, an online process to accept an order, such as "shopping cart" functionality, or special instructions on how to order;
- information on minimum quantities;
- indication of methods of payment ;
- information about shipment of the goods; and/or
- means of contacting the applicant to place an order.

See *In re Anpath Grp.*, 95 USPQ2d 1377, 1381 (TTAB 2010); *In re Quantum Foods, Inc.*, 94 USPQ2d at 1379.

Determining the sufficiency of ordering information is a nuanced analysis requiring an examination of the web page content and layout in terms of the level of detail provided about both the goods and the means for ordering them. The more specific and clear the means of immediately and directly ordering the goods on the web page (e.g., "shopping cart" or "Call 1-800-xxx-xxxx to Order Now"), the less detailed the information about the product features and specifications needs to be (e.g., price, size, color, or style), as shown in Example 11.

**Example 11:** Mark is associated with the goods, goods are pictured and described, and ordering information is provided.

**Mark:** RING IN THE NEW YEAR WITH OUR RINGS

**Goods:** Rings

- The mark is placed on the bottom of the web page and is followed by the “TM” designation.
- The mark is close to the picture of the goods and contains the term “RINGS” which references the goods.
- The “SHOP ONLINE” tab and the “SHOP” link indicate direct ordering via the web page.
- Web page is also acceptable for goods if the proposed mark were “T.Markey Jewelry” (in upper-left corner) because it is located close to the picture of the goods and both the proposed mark and the “T.Markey Jewelry” mark indicate common origin since it can be inferred that the wording “OUR RINGS” in the proposed mark refers to rings by T.Markey Jewelry.

Conversely, the more detailed the product information is on the web page, the less detailed the ordering information needs to be (e.g., providing a telephone number without specifically stating that it be used to

place orders). See Example 8 at [TMEP §904.03\(i\)\(B\)\(2\)](#). Although pricing information is normally associated with ordering goods, the presence or absence of pricing on its own is not determinative of whether the web page provides sufficient ordering information. Compare *In re Dell Inc.*, 71 USPQ2d 1725, 1728-29 (TTAB 2004) (concluding that a web-page specimen used in connection with applicant's computer hardware, which provided information about the goods but did not show the price of the goods, met the requirements for a display associated with the goods), and [TMEP § 904.03\(h\)](#) (indicating that it is not necessary for a catalog specimen to list the price of the goods in order to meet the criteria for a display associated with the goods), with *In re Quantum Foods, Inc.*, 94 USPQ2d at 1379 (listing pricing information as information normally associated with ordering goods and noting the absence of pricing or other ordering information on the applicant's web page specimen to purchase the goods), and *In re MediaShare Corp.*, 43 USPQ2d 1304, 1305 (TTAB 1997) (concluding that applicant's specimen was merely advertising material because it lacked the price of the goods and other information normally associated with ordering goods). If the goods can be ordered via the information contained on the web page, then, presumably, the price will be presented at some point before the order is completed.

See [TMEP §§904.03\(i\)\(C\)\(1\)-904.03\(i\)\(C\)\(3\)](#) for a discussion of the common features of websites and the issues to consider when determining whether these features constitute sufficient means of ordering the goods.

### **904.03(i)(C)(1) “Shopping Cart” and “Shopping Bag” Buttons and Links**

Frequently used methods of ordering goods online include buttons and links identified as “shopping cart,” “shopping bag,” “add to cart,” and “buy” that permit a consumer to directly purchase the goods. See Example 3 at [TMEP §904.03\(i\)\(B\)\(2\)](#). The presence of these features conveys the web page's point-of-sale character. For intangible goods, such as downloadable computer software programs, buttons and links for downloading, buying, or ordering goods should be considered sufficient ordering information. See [TMEP §904.03\(e\)](#).

“Where to buy” buttons and links are usually unacceptable since they typically provide only contact information for the retailers, wholesalers, or distributors of the goods instead of functioning as a means of directly ordering the goods, as shown in Example 12. See *In re Osterberg*, 83 USPQ2d 1220, 1224 (TTAB 2007) (finding a “Where to Buy” link insufficient ordering information since the record contained no information about what the link included and applicant's explanation in the appeal brief indicated that the link provided consumers a list of distributors and their websites from whom goods may be purchased).

Intelx Inc. - About Inspiral Condoms Page 1 of 3

**Insufficient Ordering Information**

**Mark**

The Condom with Curves!

**Inspiral**

It is indeed a stunning work... a Nautilus shell.  
New York Times on Inspiral!

**Inspiral Condoms**

Intelx Inc. offers the most innovative condoms in and function. Consistently rated #1 (see reviews).

Inspiral is inspired by the natural beautiful curves of a Nautilus seashell.

The Inspiral Girl at the Playboy Mansion

Condoms no longer look or act like regular condoms anymore!

That's why Inspiral is also called a **Condomtoy™** condom. The bold spirals of Inspiral condom work in a patented "spring-action", making spiraling ridges when worn on the penis. These spirals give fantastic friction to both partners.

In other words, the big spiral tip on the condom clings snugly to the penis head and then twists and turns all around... just as you do, creating **CRAZY sexual friction!** Part condom, part toy!

It's already the most talked about new condom in the world!

Inspiral is independently rated "my favorite" condom in user surveys since 1998.

While Inspiral's latex curves add more pleasing friction... the equally exciting good news is: Inspiral is a triple-clipped condom giving it unmatched strength characteristics.

A condom with beautiful curves was never before possible until now! Inspiral is a state-of-the-art condom made by a patented new process developed in India.

Dr. A.V.K. Reddy, MD, is the Inspiral designer the New York Times calls the

**Example 12:** Web page specimen is not acceptable because, among other things, it lacks ordering information.

**Mark:** CONDOMTOY CONDOM

**Goods:** Condoms

- The web page provides no means of ordering goods. While there is a "Where to Buy" button at the top, the record does not contain the underlying page the button would lead consumers to. While the applicant explained in the appeal brief that the link connects shoppers with distributors of the goods, the TTAB found this to be insufficient because consumers were not able to immediately and directly purchase the goods.
- The applied-for mark is not associated with the goods because (1) the packaging for the goods shown on the web page shows the trademark "Inspiral" and not the applied-for mark, (2) the applied-for mark is not prominently displayed since it is buried in text and is not the first word of a sentence, and (3) while the applied-for mark is shown in bold font, the web page contains other descriptive terms that also appear in bold font.

- The applicant submitted a declaration that lacked sufficient detail or explanation of how the web page is used at the point of sale.

### **904.03(i)(C)(2) Telephone Numbers and E-mail Addresses**

In most cases, telephone numbers and e-mail addresses alone will not transform mere advertising into point-of-sale displays even though it is common to sell products on-line or over the telephone. *See In re Anpath Grp.*, 95 USPQ2d 1377, 1382 (TTAB 2010). However, they may suffice if accompanied by special instructions for placing or accepting orders, such as “call now to buy” or “e-mail your order.” If no ordering instructions appear, telephone numbers and e-mail addresses may be sufficient if: (1) the web page contains enough product and ordering information to enable the consumer to buy the goods (e.g., the web page shows the goods; offers size, color, or quantity selections; price; identifies credit card payment options; or states shipping methods); (2) the record contains an explanation or evidence that clearly supports the conclusion that the telephone number or e-mail address can be used for ordering, rather than merely for obtaining information about the goods or the ordering process; or (3) the telephone number or e-mail address is prominently placed close to the goods, indicating it as a means of ordering (see Example 8). *See In re Valenite Inc.*, 84 USPQ2d 1346, 1349 (TTAB 2007); *In re Osterberg*, 83 USPQ2d at 1224 (indicating that applicant’s web-page specimen might have met the ordering information requirement for a point-of-purchase display if the web page had contained a telephone number or online process for ordering the goods, or if the record otherwise showed that “a purchase [could] be made directly from the webpage or from information provided in the webpage”).

However, even where a web page provides sufficient product information for the consumer to make the decision to purchase the goods, a telephone number or e-mail address may not show the requisite means of ordering if it only appears with applicant’s corporate contact information, as shown in Example 13. *See In re Genitope Corp.*, 78 USPQ2d 1819, 1822 (TTAB 2006) (concluding that the company name, address, and phone number appearing at the end of applicant’s web page “indicate[d] only location information about applicant; it [did] not constitute a means to order goods through the mail or by telephone, in the way that a catalog sales form provides a means for one to fill out a sales form or call in a purchase by phone”).

**Insufficient Ordering Information**

**Mark**

**Product Overview - MyVax® Personalized Immunotherapy**

Our lead product candidate, MyVax® Personalized Immunotherapy (previously referred to as GTOP-99), is an investigational treatment based on the unique genetic makeup of a patient's tumor and is designed to activate a patient's immune system to identify and attack cancer cells. As such, MyVax® Personalized Immunotherapy is commonly referred to as a patient-specific or personalized immunotherapy, an active idiotypic immunotherapy, or a patient-specific or personalized cancer vaccine. This type of immunotherapy is intended to stimulate an active and durable immune response specifically against an individual patient's malignant cells. Each therapy is also tumor-specific, so that in theory, cells other than those of the tumor should not be affected. These are important differences compared to passive immunotherapies for non-Hodgkin's lymphoma (NHL), such as monoclonal antibodies that, while in circulation, target cell surface markers present on both malignant and non-malignant cells in every patient.

MyVax® Personalized Immunotherapy combines a protein derived from the patient's own tumor with an immunologic carrier protein and is administered with an immunologic adjuvant. The tumor-derived protein that is unique to each patient is the antibody expressed by the tumor cells. Each antibody has unique portions, collectively known as the idiotype, which can be recognized by the immune system. The antibody that is unique to a given patient's tumor is often referred to as the idiotype protein. Genitope's immunotherapy consists of the idiotype protein and a foreign carrier protein administered with an adjuvant to enhance the immune response.

Immunologic carrier proteins are themselves strong antigens and are used to increase the immunogenicity of the patient-specific idiotypic. Adjuvants are molecules that attract and activate immune system cells at the site of immunization, which enhances the immune response. Currently, Genitope uses keyhole limpet hemocyanin, or (KLH), as a carrier protein for the idiotypic protein and granulocyte macrophage-colony stimulating factor, or GM-CSF, as an adjuvant.

Active immunotherapies, similar to MyVax® Personalized Immunotherapy, for the treatment of NHL have been studied in clinical trials since the late 1980's. Results from these trials suggest that active immunotherapy may induce long-term remission and may improve survival of NHL patients. Despite these results, further development of this immunotherapeutic approach has been limited by manufacturing difficulties. We have developed a proprietary manufacturing process that overcomes many of these historical manufacturing limitations. MyVax® Personalized Immunotherapy is currently in a pivotal Phase 3 trial and additional Phase 2 trials for the treatment of B-cell non-Hodgkin's lymphoma.

For more information on personalized immunotherapy and our product, please see the Patient Backgrounder in the Patient Resources section of our website.

**Insufficient Ordering Information**

**Example 13:** Web-page specimen is not acceptable because it lacks ordering information.

**Mark:** Design of “fingerprint man”

**Goods:** Biopharmaceutical preparations used to treat cancer in humans, namely, individualized cancer treatments prepared specifically for each individual patient from whom tumor tissue has been received.

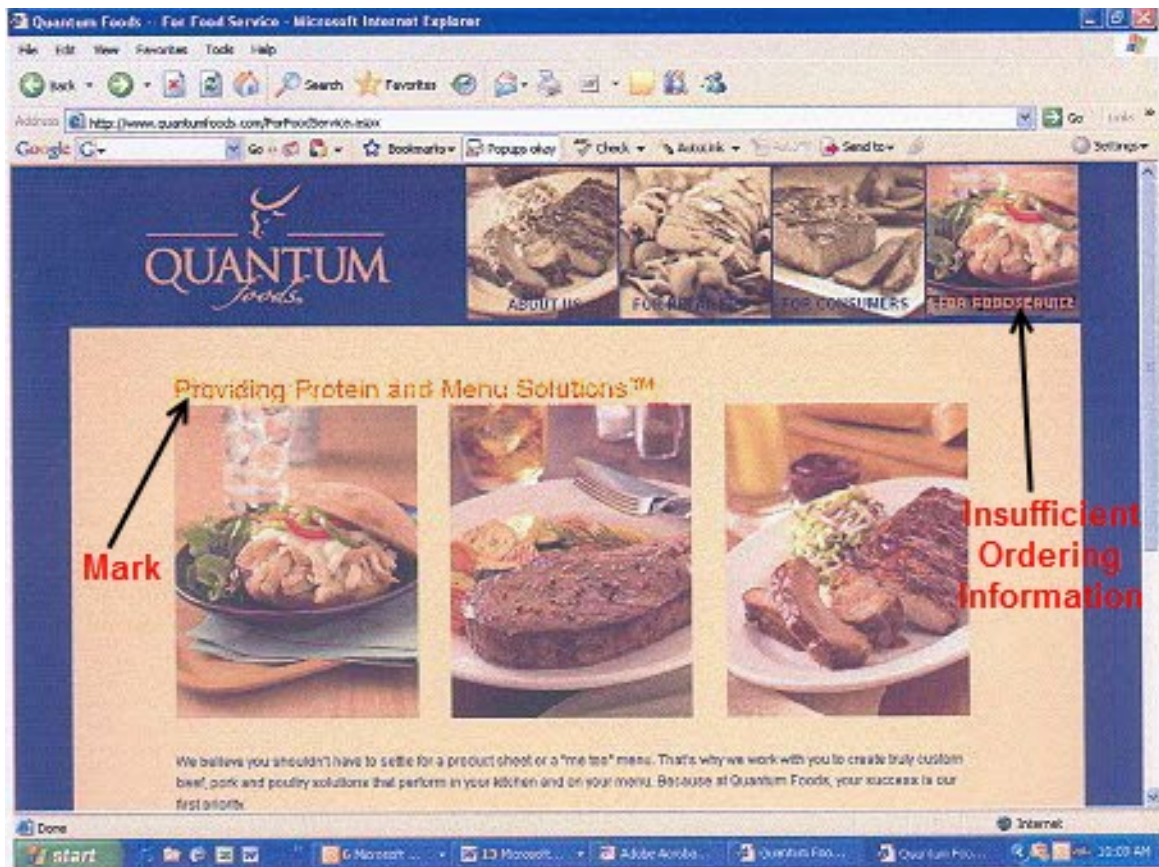

- The web page provides no actual means of ordering goods since it states that the study is closed to patient registration and provides a link to “click here for more information” about the product instead of to order the product, and the page to which the link leads is not of record.
- The company name, address, and telephone number at the bottom is only information about applicant’s location and not a means of ordering goods.

By contrast, an e-mail address may be an acceptable means of ordering if the address itself indicates that orders may be placed or are accepted via e-mail (e.g., [order@t.markey.com](mailto:order@t.markey.com)).

The rare case of specialized industrial goods or similarly complex or sophisticated goods for which technical assistance is required in selecting the product or determining the product specifications may present a special situation as to a telephone number showing the requisite ability to order. In such a special situation, the telephone number would suffice if product information is available on the web page or website and the evidentiary record adequately explains the specialized nature of the goods, the industry practice for ordering them, and the need to consult with sales staff over the telephone to place customized orders. In the case *In re Valenite Inc.*, the Board found a web page containing a link to an online catalog, along with a toll-free number and links to customer service and technical support, to be an acceptable specimen, where the goods (industrial tools) were specialized industrial goods, and the record contained declaration evidence that purchase of the goods requires careful calculation and technical knowledge, and that the phone numbers were in fact used to order the goods. 84 USPQ2d at 1349-50 (“[A]pplicant’s website, in addition to showing pictures of the goods, provides an on-line catalog, technical information apparently intended to further the prospective purchaser’s determination of which particular product to consider, an online calculator and both a link to, and phone number for, customer service representatives. Therefore, applicant’s website provides the prospective purchaser with sufficient information that the customer can select a product and call customer service to confirm the correctness of the selection and place an order.”). Cf. *In re U.S. Tsubaki, Inc.*, 109 USPQ2d 2002, 2007 (TTAB 2014) (stating that “where it is asserted that the nature of the goods and the consumers . . . require more involved means for ordering products, it is critical that the examining attorney be provided with detailed information about the means for ordering goods, and that such information be corroborated by sufficient evidentiary support.”). The *Valenite* decision should not be interpreted as a broad-reaching change in USPTO practice regarding the determination of whether a website page constitutes a display associated with the goods. If it appears that the web page merely provides information about the goods, but does not provide a means of ordering the goods directly from the applicant’s web page, it should be viewed as promotional material and a refusal should be issued. *Id.* at 2009 (finding that specimens did not contain adequate information for making a decision to purchase the goods and placing an order and, therefore, were advertisements). Given the narrow range of scenarios to which this decision applies, examining attorneys generally should avoid suggesting reliance on *Valenite* to overcome a specimen refusal.

### **904.03(i)(C)(3) “Contact Us,” “Customize,” or “Configure” Buttons and Links**

“Contact Us” buttons and links usually are not acceptable because they generally do not enable direct ordering of the goods. These buttons and links typically route consumers to a different web page that offers only an invitation to obtain more information about the goods, or about the retailers, wholesalers, or distributors who actually sell the goods, as shown in Example 14. See, e.g., *In re Quantum Foods, Inc.*, 94 USPQ2d 1375, 1379 (TTAB 2010) (noting that the “contact us” link on applicant’s web-page specimen did not take customers to an order form, but instead routed to a web page with applicant’s e-mail address and telephone number); cf. *In re Genitope Corp.*, 78 USPQ2d 1819, 1822 (TTAB 2006) (stating that the web page did not provide a link to order the goods or explain how to order them, where the web page contained a link for “click here for more information” and provided links for “Patient Backgrounder” and “Patient Resources” for “more information on personalized immunotherapy and our products”).

**Example 14:** Web-page specimen is not acceptable because it lacks ordering information.

**Mark:** PROVIDING PROTEIN AND MENU SOLUTIONS

**Goods:** Processed meats, beef, pork, poultry and seafood sold in portions; fully cooked entrees consisting primarily of meat, beef, pork, poultry or seafood

- The web page provides no means of ordering goods (e.g., no sales form, pricing, offers to accept orders, special instructions for ordering, or opportunity and means to order online) and the minimal product information makes it unclear what the goods are.
- The TTAB found insufficient applicant's claims that placing the cursor over "FOODSERVICE" reveals a drop-down menu from which the "contact us" link is selected, which brings up a web page containing an e-mail address and telephone number for applicant's customer service department for ordering the goods.
- Simply providing a "contact us" link does not convert advertising into a display and, in fact, the "contact us" link here does not even enable ordering, but only leads to applicant's contact information. While the "Contact Us" web page was rejected as untimely, the TTAB stated that, although it may

ultimately result in a sale, the “Contact Us” web page “appears to be no more calculated to do so than any corporate contact e-mail address or phone number that would result in the call or e-mail being referred to the sales office.” *In re Quantum Foods, Inc.*, 94 USPQ2d 1375, 1377 n.2 (TTAB 2010).

By analogy, a seller’s contact information that often appears in advertisements does not provide a sufficient means of ordering, in contrast to a telephone number on a sales form designated to accept orders. *In re Genitope Corp.*, 78 USPQ2d at 1822.

Similarly, “Customize” and “Configure” buttons and links that allow customers to configure the goods generally are insufficient by themselves, since such features only enable personalization and not necessarily purchase of the goods. For these buttons and links to be deemed adequate means of ordering, the record must contain evidence that they permit customers to actually buy the goods. *See In re Dell Inc.*, 71 USPQ2d 1725, 1727 (TTAB 2004) (finding that a “Customize It” link was sufficient ordering means when the information on the website clearly indicated that the goods could be bought online via the link).

### **904.03(i)(D) Beta Websites**

In some cases a specimen may consist of an excerpt from a website labeled as “beta.” This term is commonly used to describe a preliminary version of a product or service. Although some beta websites may not be accessible to consumers, others are. Thus, the use of this term in connection with an apparently functioning website shown in a specimen does not, by itself, necessarily mean that the relevant goods or services shown on the website are not in actual use in commerce or that the specimen is unacceptable. However, if examination of the specimen indicates that the beta version is not in actual use in commerce, the examining attorney must refuse registration because applicant has not provided evidence of use of the applied-for mark in commerce. The statutory basis for refusal is 15 U.S.C. §§1051 and 1127. See [TMEP §1301.03\(a\)](#) regarding service mark specimens containing the term “beta.”

### **904.03(j) Manuals**

If printed matter included with the goods functions as a part of the goods, such as a manual that is part of a kit for assembling the product, then placement of the mark on that printed matter does show use on the goods. *In re Ultraflight Inc.*, 221 USPQ 903, 906 (TTAB 1984) (“We believe the instruction manual is as much a part of applicant’s goods as are the various parts that are used to build the gliders. Application of the mark to the manual of assembly instructions, then, must be considered affixation to the goods.”).

### **904.03(k) Specimens for Marks that are Impracticable to Place on Goods, Packaging, or Displays**

The USPTO may accept another document related to the goods or the sale of the goods when it is impracticable to place the mark on the goods, packaging, or displays associated with the goods. 15 U.S.C. §1127 (definition of “use in commerce”); 37 C.F.R. §2.56(b)(1). This provision is not intended as a general alternative to submitting labels, tags, containers, or displays associated with the goods; it applies *only* to situations when the nature of the goods makes use on these items impracticable. For example, in rare circumstances it may be impracticable to place the mark on the goods or packaging for the goods if the goods are natural gas, grain that is sold in bulk, or chemicals that are transported only in tanker cars. In such instances, an acceptable specimen might be an invoice, a bill of lading, or a shipping document that shows the mark for the goods.

A mere assertion of impracticability does not suffice to establish that traditional trademark use is impracticable. Rather, the record must indicate that the goods are, in fact, of such a nature. In *In re Settec, Inc.*, 80 USPQ2d 1185 (TTAB 2006), the applicant asserted that placing the mark on the goods or on displays associated with the goods in the traditional manner was impracticable because the purpose of the goods was to provide digital media copy protection to media content providers, and placing the mark on the final product available to the ultimate end-user would impair the value of the goods, because the end-user would thereby be armed with an additional piece of the encryption puzzle. The Board rejected this contention, finding that there were a variety of ways in which applicant could use its mark in the traditional manner without making it available to the end-user.

### **904.03(l) Specimens for Motion Marks**

To show that a motion mark actually identifies and distinguishes the goods/services and indicates their source, an applicant must submit a specimen that depicts the motion sufficiently to show how the mark is used on or in connection with the goods/services, and that matches the required description of the mark.

Although the drawing for a motion mark may depict a single point in the movement, or up to five freeze frames showing various points in the movement, an acceptable specimen should show the entire repetitive motion in order to depict the commercial impression conveyed by the mark (e.g., a video clip, a series of still photos, or a series of screen shots).

For TEAS applications under §1(a) in which the specimen is an electronic file in .wav, .wmv, .wma, .mp3, .mpg, or .avi format, the electronic file can be attached to the application, but should not exceed 5 MB for audio files and 30 MB for video files because TEAS cannot accommodate larger files. To submit an electronic file in connection with any other TEAS form (e.g., Response to Office Action or Statement of Use/Amendment to Allege Use), the file must be sent after the TEAS document is transmitted, as an attachment to an e-mail message directed to TEAS@uspto.gov, with clear instructions that the electronic file should be associated with “the application filed under Serial No. <specify>.” Note, however, that audio and video files attached to an e-mail currently cannot exceed 9 MB. See [TMEP §904.02\(a\)](#) regarding specimens filed electronically. See also [TMEP §807.11](#) regarding drawings for motion marks.

### **904.03(m) Specimens for Scent and Flavor Marks**

To show that the specimen for a scent or flavor mark actually identifies and distinguishes the goods and indicates their source, an applicant must submit a specimen that contains the scent or flavor and that matches the required description of the scent or flavor. In most cases, the specimen will consist of the actual goods themselves because the examining attorney must be able to smell or taste the scent or flavor in order to determine whether the specimen shows use of the mark in connection with the goods. When submitting such a specimen, the applicant should clearly indicate on the specimen itself that it is a specimen for a scent or flavor mark application so that the USPTO will properly route the actual specimen to the examining attorney.

A “scratch and sniff” sticker for a scent mark is an acceptable specimen, provided that it is part of the packaging for the goods or is used in such a manner as to identify the goods and indicate their source.

See also [TMEP §§807.09](#) and [1202.13](#) regarding scent and flavor marks.

## 904.04 Material Not Appropriate as Specimens for Trademarks

### 904.04(a) Drawing or “Picture” of the Mark

A photocopy of the drawing required by 37 C.F.R. §2.51 is not a proper specimen. 37 C.F.R. §2.56(c). Similarly, the specimen may not be a “picture” of the mark, such as an artist’s drawing, a printer’s proof, or a computer graphic that merely illustrates what the mark looks like and is not actually used on or in connection with the goods in commerce. *See In re Chica*, 84 USPQ2d 1845 (TTAB 2007) (specimen deemed unacceptable because it comprised a mere drawing of the goods with an illustration of how the mark may be displayed and not an actual specimen that applicant used in commerce).

### 904.04(b) Advertising Material

Advertising material is generally not acceptable as a specimen for goods. Any material whose function is merely to tell the prospective purchaser about the goods, or to promote the sale of the goods, is unacceptable to support trademark use. Similarly, informational inserts are generally not acceptable to show trademark use. *In re MediaShare Corp.*, 43 USPQ2d 1304 (TTAB 1997); *In re Schiapparelli Searle*, 26 USPQ2d 1520 (TTAB 1993); *In re Drilco Industrial Inc.*, 15 USPQ2d 1671 (TTAB 1990); *In re ITT Rayonier Inc.*, 208 USPQ 86 (TTAB 1980); *In re Bright of America, Inc.*, 205 USPQ 63 (TTAB 1979). However, an instruction sheet may be an acceptable specimen. *In re Ultraflight Inc.*, 221 USPQ 903 (TTAB 1984). See [TMEP §904.03\(j\)](#) regarding manuals and [TMEP §904.04\(c\)](#) regarding package inserts.

The following types of items are generally considered advertising, and unless they comprise point-of-sale material, are not acceptable as specimens of use on goods: advertising circulars and brochures; price lists; announcements; press releases; listings in trade directories; and business cards. Moreover, material used by the applicant to conduct its internal business is unacceptable as a specimen of use on goods. These materials include all documents whose sole function is to carry out the applicant’s business dealings, such as invoices, bill heads, waybills, warranties, and business stationery. *See In re Chicago Rawhide Mfg. Co.*, 455 F.2d 563, 173 USPQ 8 (C.C.P.A. 1972); *In re Bright of America, supra*; *Varian Associates v. IMAC Corp.*, 160 USPQ 283 (N.D. Ill. 1968); *Upco Co. v. Speed Crete of La., Inc.*, 154 USPQ 555 (TTAB 1967); *Dynacolor Corp. v. Beckman & Whitley, Inc.*, 134 USPQ 410 (TTAB 1962); *Pendleton Woolen Mills v. Eloesser-Heynemann Co.*, 133 USPQ 211 (TTAB 1962); *Boss Co. v. Homemaker Rugs, Inc.*, 117 USPQ 255 (N.D. Ill. 1958).

As to display of trademarks on company uniforms, *see In re McDonald’s Corp.*, 199 USPQ 702 (TTAB 1978); *Toro Mfg. Corp. v. John B. Stetson Co.*, 161 USPQ 749 (TTAB 1969).

Bags and other packaging materials bearing the name of a retail store and used by the store merely for packaging items of sold merchandise are not acceptable to show trademark use of the store name for the products sold by the store (e.g., bags at cash register). When used in this manner, the name merely identifies

the store. *See In re The Pennsylvania Fashion Factory, Inc.*, 198 USPQ 568 (TTAB 1978), *aff'd*, 588 F.2d 1343, 200 USPQ 140 (C.C.P.A. 1978).

### **904.04(c) Package Inserts**

If material inserted in a package with the goods is merely advertising material, then it is not acceptable as a specimen of use on or in connection with the goods. Material that is only advertising does not necessarily cease to be advertising because it is placed inside a package.

Package inserts such as invoices, announcements, order forms, bills of lading, leaflets, brochures, printed advertising material, circulars, press releases, and the like are not acceptable specimens to show use on goods. *See In re Bright of America, Inc.*, 205 USPQ 63 (TTAB 1979).

### **904.05 Affidavit Supporting Substitute Specimens**

If the specimen is unacceptable, the examining attorney will require the applicant to submit a substitute specimen. Generally, when submitting a substitute specimen, the applicant must include an affidavit or declaration under 37 C.F.R. §2.20 verifying that the substitute specimen is in use in commerce. Similarly, when submitting an additional specimen in support of a multiple-class application that is not identical to the specimen originally filed, the applicant must include an affidavit or declaration under 37 C.F.R. §2.20 verifying that the new specimen was in use in commerce as of the pertinent date indicated in this section. The affidavit or declaration must be signed by someone properly authorized to verify facts on behalf of the applicant under 37 C.F.R. §2.193(e)(1). 37 C.F.R. §2.59.

In an application under §1(a) of the Trademark Act, the affidavit or declaration must state that the substitute or additional specimen was in use in commerce at least as early as the application filing date. 37 C.F.R. §2.59(a). If the applicant cannot provide an acceptable substitute specimen, supported by an affidavit or declaration of use in commerce as of the filing date of the application, the applicant may amend the basis to §1(b). See [TMEP §§806.03](#) *et seq.* regarding amendments to the basis.

In an application under §1(b) of the Act, an applicant who files a substitute or additional specimen after an amendment to allege use under §1(c) of the Act must include an affidavit or declaration stating that applicant used the substitute or additional specimen in commerce on or in connection with the goods/services prior to filing the amendment to allege use. 37 C.F.R. §2.59(b)(1). An applicant who files a substitute specimen after a statement of use under §1(d) of the Act must verify that the substitute or additional specimen was in use in commerce before the expiration of the deadline for filing a statement of use (i.e., within six months of the issuance date of the notice of allowance or before the expiration of an extension of time for filing a statement of use). 37 C.F.R. §2.59(b)(2).

If the dates of use change as the result of the submission of new specimen(s), the applicant must file an amendment of the dates of use, supported by an affidavit or declaration under 37 C.F.R. §2.20. *See* 37 C.F.R. §2.71(c); [TMEP §903.04](#).

In some situations, however, an affidavit or declaration of use of substitute specimens is not necessary. For instance, if the specimen originally filed is cut from a larger object, it is not necessary to provide an affidavit or declaration when a sample (or a photograph) of the complete object is submitted to corroborate the original

specimen. In these circumstances, the additional specimen is supplemental, and the examining attorney may consider the original specimens to have been satisfactory.

### **904.06 Translation of Matter on Specimens**

If there is matter printed on a specimen that is not in English and that is necessary to permit proper examination, the examining attorney must either include a translation of this matter in the record or require that the applicant submit a translation of this matter. 37 C.F.R. §2.61(b). If the examining attorney determines that a translation is necessary, he or she should limit the requirement in an appropriate manner to avoid placing an unnecessary burden on the applicant.

### **904.07 Requirements for Substitute Specimens and Statutory Refusals**

#### **904.07(a) Whether the Specimen Shows the Mark Used in Commerce**

An application for registration under §1(a) of the Trademark Act or an allegation of use in an application under §1(b) of the Act must include one specimen per class showing use in commerce of the applied-for mark on or in connection with the goods, or in the sale or advertising of the services. 15 U.S.C. §§1051(a)(1), 1051(c) and 1051(d)(1); 37 C.F.R. §§2.34(a)(1)(iv), 2.56(a), 2.76(b) and 2.88(b). Initially, the examining attorney must review the specimen to determine whether the applied-for mark appears on the specimen, the specimen shows use for the specific goods/services identified, and the specimen otherwise shows the applied-for mark in "use in commerce."

The following non-exhaustive list reflects examples of "use-in-commerce" problems that may be raised on initial review of specimens:

- No specimen is submitted;
- The applied-for mark does not appear on the specimen;
- The specimen does not show use of the applied-for mark on or in connection with any of the relevant goods or in the sale or advertising of the services;
- The specimen is a printer's proof of an advertisement for services;
- The specimen is altered/mutilated/unprintable or illegible;
- The specimen is merely advertising material for goods;
- The specimen is merely a picture or drawing of the mark;
- The specimen is a photocopy of the drawing;
- The specimen is an electronic display associated with the goods (e.g., an online catalog, or web page display for goods), and fails to include ordering information or pricing;
- The specimen is a non-electronic point of sale display and fails to show use of the mark as a "display associated with the goods."

In an Office action addressing such specimen issues, the examining attorney must indicate that registration is refused because applicant has not provided evidence of use of the applied-for mark in commerce. The statutory basis for refusal is 15 U.S.C. §§1051 and 1127. The examining attorney must also require the applicant to submit a substitute specimen and, if necessary, a supporting affidavit or declaration under 37 C.F.R. §2.20. If the refusal is made because the specimen is altered, mutilated, or illegible, the applicant may respond by submitting a true, unaltered copy of the originally submitted specimen that is clear and

readable, with a statement by the person who transmitted it that it is a true copy of the specimen that was originally submitted. [TMEP §904.02\(a\)](#); *see* [TMEP §904.02\(b\)](#).

### **904.07(a)(i) Action After Submission of Substitute Specimen**

If the applicant responds to the Office action refusing registration by submitting a substitute specimen that does not show use of the mark in commerce for the same or a different “use-in-commerce” reason, such as the examples listed above, the examining attorney must issue a final refusal because the substitute specimen does not present a new issue. For example, if the original specimen was a photocopy of the drawing, and the applicant submits, in a response to the refusal, a substitute specimen that comprises advertising for its goods, this does not present a new issue. However, if the applicant responds to the refusal by submitting a substitute specimen that fails to show the applied-for mark functioning as a trademark or service mark (e.g., shows the mark is merely ornamental), this presents a new issue that requires issuance of a new nonfinal Office action. See [TMEP §904.07\(b\)](#) for a contrasting list of substantive reasons, relating to failure to function as a mark, that might present a new issue. Therefore, the examining attorney must issue a new refusal as to the substitute specimen, and must maintain the prior refusal as to the original specimen and indicate that the substitute specimen did not obviate the initial refusal.

If the applicant responds to the “use-in-commerce” refusal by submitting a substitute specimen, and unlike in the original specimen, the mark on the substitute specimen now does not agree with the mark on the drawing ( *see* [TMEP §807.12](#)), but the specimen would otherwise be acceptable to show use in commerce in connection with the goods/services, the examining attorney may allow the applicant to amend the drawing if such an amendment would not constitute a material alteration of the mark. If any remaining issues can be handled by examiner’s amendment, and the mark is a standard character mark, the examining attorney may give the applicant the option to amend the drawing by examiner’s amendment. If not, the examining attorney must issue a final refusal that also gives the applicant the option to overcome the refusal by submitting a substitute drawing.

If an amendment of the drawing would be a material alteration, the examining attorney must issue a final refusal (assuming the application is otherwise in condition for final refusal) because the substitute specimen does not present a new issue.

See [TMEP §714.05](#) regarding new issues requiring issuance of nonfinal action.

### **904.07(b) Whether the Specimen Shows the Applied-for Mark Functioning as a Mark**

The examining attorney must also evaluate the specimen to determine whether the applied-for mark is used in a way that shows that: (1) it identifies the goods/services of the applicant and distinguishes them from the goods/services of others; and (2) it indicates the source of those goods/services. If use on the specimen fails in either regard, the record lacks the requisite evidence that the applied-for mark functions as a mark. The following non-exhaustive list reflects examples where review of the specimen would indicate a failure to function as a mark:

- Applied-for mark is used solely as a trade name ([TMEP §1202.01](#))
- Applied-for mark is mere ornamentation ([TMEP §1202.03](#));
- Applied-for mark is merely informational matter ([TMEP §§1202.04](#) and [1301.02\(a\)](#));
- Applied-for mark identifies the name or pseudonym of a performing artist or author ([TMEP §1202.09\(a\)](#));
- Applied-for mark identifies the title of a single creative work ([TMEP §1202.08](#));

- Applied-for mark identifies a model number or grade designation ([TMEP §1202.16](#));
- Applied-for mark is merely a background design or shape that does not create a commercial impression separable from the entire mark ([TMEP §1202.11](#));
- Applied-for mark identifies a process, system, or method ([TMEP §1301.02\(e\)](#));
- Applied-for mark is used to refer to activities that are not considered “services” ([TMEP §§1301.01 et seq.](#));
- Applied-for mark is used solely as a domain name ([TMEP §1215.02](#));
- Applied-for mark is used solely to identify a character ([TMEP §1301.02\(b\)](#)).

If the deficiency in a specimen amounts to failure to demonstrate use of the applied-for mark as a trademark and/or service mark, the examining attorney must issue a "failure-to-function" refusal of registration on the ground that the applied-for mark does not function as a trademark or service mark, in addition to advising the applicant of the appropriate response options, which may include requiring the applicant to submit a substitute specimen. The statutory basis for refusal is 15 U.S.C. §§1051, 1052, and 1127 for trademarks, or 15 U.S.C. §§1051, 1052, 1053, and 1127 for service marks. See *In re Osmotica Holdings Corp.*, 95 USPQ2d 1666 (TTAB 2010); *In re Supply Guys, Inc.*, 86 USPQ2d 1488 (TTAB 2008); *In re wTe Corp.*, 87 USPQ2d 1536 (TTAB 2008); *In re DSM Pharmaceuticals, Inc.*, 87 USPQ2d 1623 (TTAB 2008). Generally, when initially refusing registration on the ground that the subject matter does not function as a mark, the examining attorney should advise the applicant that the refusal will be reconsidered if the applicant submits a substitute specimen showing proper use of the applied-for mark as a trademark or service mark and, if necessary, a supporting affidavit or declaration. See [TMEP §904.05](#) regarding affidavits supporting new specimens. However, in instances where the nature of the mark, such as with informational marks, indicates that consumers would never perceive the mark as source indicating, regardless of the manner of use, no such advisory need be given.

### **904.07(b)(i) Action After Submission of Substitute Specimen**

Because the examining attorney has advised the applicant of the appropriate response options, which may include the general requirements for a substitute specimen, if the applicant responds to the failure-to-function refusal by submitting a specimen that does not show the mark in use in commerce for a reason such as those set out in [TMEP §904.07\(a\)](#), the examining attorney must issue a final refusal, as no new issue is presented. For example, if the original specimen was refused as ornamental and the substitute specimen does not show the applied-for mark, the examining attorney may issue a final refusal. By contrast, if the applicant responds to the Office action refusing registration by submitting a substitute specimen that reflects failure to function as a mark for a different substantive reason, such as the examples listed in [TMEP §904.07\(b\)](#), the examining attorney must issue a new nonfinal Office action because the substitute specimen presents a new issue. For example, if the original specimen shows the mark used merely as a domain name, and the applicant submits a substitute specimen that shows the mark used in an ornamental manner, this presents a new issue. Therefore, the examining attorney must issue a new refusal as to the substitute specimen, and must maintain the prior failure-to-function refusal as to the original specimen and indicate that the substitute specimen did not obviate the initial refusal. If the applicant responds to the refusal by submitting a substitute specimen that fails to show the applied-for mark functioning as a trademark or service mark for the same reason as the original specimen (e.g., the original specimen was refused as ornamental and the substitute specimen also reflects ornamental use), this does not present a new issue and the examining attorney must issue a final Office action.

If the applicant responds to the failure-to-function refusal by submitting a substitute specimen, and unlike in the original specimen, the mark on the substitute specimen now does not agree with the mark on the drawing (see [TMEP §807.12](#)), but the specimen would otherwise be acceptable to identify the goods/services

of the applicant and indicate the source of those goods/services, the examining attorney may allow the applicant to amend the drawing if such an amendment would not constitute a material alteration of the mark.

If any remaining issues can be handled by examiner's amendment, and the mark is a standard character mark, the examining attorney may give the applicant the option to amend the drawing by examiner's amendment. If not, the examining attorney should issue a final refusal that also gives the applicant the option to overcome the refusal by submitting a substitute drawing.

If an amendment of the drawing would be a material alteration, the examining attorney must issue a final refusal (assuming the application is otherwise in condition for final refusal), because the substitute specimen does not present a new issue. See [TMEP §714.05](#).

See [TMEP §714.05](#) regarding new issues requiring issuance of nonfinal action, [§§1202](#) *et seq.* regarding matter that does not function as a trademark, and [TMEP §§1301.02](#) *et seq.* regarding matter that does not function as a service mark.

## 905 Method of Use

The applicant is not required to specify the method or intended method of use of a mark. However, the examining attorney has the discretion under 37 C.F.R. §2.61(b) to inquire as to the method or intended method of use of the mark if this information is needed to properly examine the application. See [TMEP §814](#). See also *In re Page*, 51 USPQ2d 1660, 1665 (TTAB 1999).

## 906 Federal Registration Notice

The owner of a mark registered in the United States Patent and Trademark USPTO may give notice that the mark is registered by displaying with the mark the words "Registered in United States Patent and Trademark Office," the abbreviation "Reg. U.S. Pat. & Tm. Off.," or the letter R enclosed within a circle, ®. 15 U.S.C. §1111.

The registration symbol should be used only on or in connection with the goods or services that are listed in the registration.

The federal registration symbol may not be used with marks that are not actually registered in the USPTO. Even if an application is pending, the registration symbol may not be used until the mark is registered.

Registration in a state of the United States does not entitle a person to use the federal registration notice. *Du-Dad Lure Co. v. Creme Lure Co.*, 143 USPQ 358 (TTAB 1964).

A party may use terms such as "trademark," "trademark applied for," "TM" and "SM" regardless of whether a mark is registered. These are not official or statutory symbols of federal registration.

### 906.01 Foreign Countries That Use Registration Symbol ®

In addition to the United States, several countries recognize use of the symbol ® to designate registration. When a foreign applicant's use of the symbol on the specimens is based on a registration in a foreign country, the use is appropriate.

The following foreign countries use the ® symbol to indicate that a mark is registered in their country:

- Belgium
- China (People's Republic)
- Costa Rica
- Denmark
- Ecuador
- Germany
- Guatemala
- Hungary
- Luxembourg
- Netherlands
- Nicaragua
- Poland
- Sweden

### 906.02 Improper Use of Registration Symbol

Improper use of the federal registration symbol that is deliberate and intended to deceive or mislead the public is fraud. *See* [TMEP §906.04](#). However, misunderstandings about use of federal registration symbols are more frequent than occurrences of actual fraudulent intent. Common reasons for improper use of the federal registration symbol that do not indicate fraud are:

- Mistake as to the requirements for giving notice (confusion often occurs between notice of *trademark* registration, which may not be given until after registration, and notice of claim of *copyright*, which must be given before publication by placing the notice © on material when it is first published);
- Inadvertence in not giving instructions (or adequate instructions) to the printer, or misunderstanding or voluntary action by the printer;
- The mistaken belief that registration in a state or foreign country gives a right to use the registration symbol ( *see Brown Shoe Co., Inc. v. Robbins*, 90 USPQ2d 1752 (TTAB 2009) ; *Du-Dad Lure Co. v. Creme Lure Co.*, 143 USPQ 358 (TTAB 1964));
- Registration of a portion of the mark ( *see Coca-Cola Co. v. Victor Syrup Corp.*, 218 F.2d 596, 104 USPQ 275 (C.C.P.A. 1954));
- Registration of the mark for other goods ( *see Duffy-Mott Co., Inc. v. Cumberland Packing Co.*, 424 F.2d 1095, 165 USPQ 422 (C.C.P.A. 1970), *aff'g* 154 USPQ 498 (TTAB 1967); *Meditron Co. v. Meditronic, Inc.*, 137 USPQ 157 (TTAB 1963));
- A recently expired or cancelled registration of the subject mark ( *see Rieser Co., Inc. v. Munsingwear, Inc.*, 128 USPQ 452 (TTAB 1961));
- Another mark to which the symbol relates on the same label ( *see S.C. Johnson & Son, Inc. v. Gold Seal Co.*, 90 USPQ 373 (Comm'r Pats. 1951)).

*See also Sauquoit Paper Co., Inc. v. Weistock*, 46 F.2d 586, 8 USPQ 349 (C.C.P.A. 1931); *Dunleavy Co. v. Koepfel Metal Furniture Corp.*, 134 USPQ 450 (TTAB 1962), *aff'd*, 328 F.2d 939, 140 USPQ 582 (C.C.P.A. 1964); *Radiant Mfg. Corp. v. Da-Lite Screen Co.*, 128 USPQ 132 (TTAB 1961); *Tobacco By-Products & Chemical Corp. v. Smith*, 106 USPQ 293 (Comm'r Pats. 1955), *modified* 243 F.2d 188, 113 USPQ 339 (C.C.P.A. 1957).

### 906.03 Informing Applicant of Apparent Improper Use

If a specimen in an application shows the federal registration symbol used with the mark that is the subject of the application, or with any portion of this mark, the examining attorney must determine from USPTO

records whether or not such matter is registered. If it is not, and if the symbol does not appear to indicate registration in a foreign country ( *see* [TMEP §906.01](#)), the examining attorney must point out to the applicant that the records of the USPTO do not show that the mark with which the symbol is used on the specimens is registered, and that the registration symbol may not be used until a mark is registered in the USPTO. The examining attorney should not require any explanation or comment from the applicant concerning the use of the symbol in relation to the mark.

#### **906.04 Fraud**

Improper use of the federal registration symbol, ®, that is deliberate and intends to deceive or mislead the public or the USPTO is fraud. *See Copelands' Enterprises Inc. v. CNV Inc.*, 945 F.2d 1563, 20 USPQ2d 1295 (Fed. Cir. 1991); *Wells Fargo & Co. v. Lundeen & Associates*, 20 USPQ2d 1156 (TTAB 1991).

The examining attorney may not issue a refusal of registration based on fraud. If it appears to the examining attorney that fraud on the USPTO has been committed, the examining attorney must follow the procedures outlined in [TMEP §720](#).

#### **907 Compliance with Other Statutes**

*37 CFR §2.69 Compliance with other laws.*

When the sale or transportation of any product for which registration of a trademark is sought is regulated under an Act of Congress, the Patent and Trademark Office may make appropriate inquiry as to compliance with such Act for the sole purpose of determining lawfulness of the commerce recited in the application.

Use of a mark in commerce must be lawful use to be the basis for federal registration of the mark. Under 37 C.F.R. §2.69, the USPTO may inquire about compliance with federal laws to confirm that the applicant's use of the mark in commerce is lawful. Generally, the USPTO presumes that an applicant's use of the mark in commerce is lawful and does not inquire whether such use is lawful unless the record or other evidence shows a clear violation of law, such as the sale or transportation of a controlled substance. See 21 U.S.C. §§801-971 (The Controlled Substances Act ("CSA") makes it unlawful to: manufacture, distribute, dispense, or possess a controlled substance; and sell, offer for sale, or use any facility of interstate commerce to transport drug paraphernalia). Regardless of state law, the federal law provides no exception to the above-referenced provisions for marijuana for "medical use." See *Gonzales v. Raich*, 545 U.S. 1, 27, 29 (2005); see also *United States v. Oakland Cannabis Buyers' Coop.*, 532 U.S. 483, 491 (2001); U.S. Const. Art. VI. Cl. 2. The examining attorney must inquire about compliance with federal laws or refuse registration based on the absence of lawful use in commerce when a court or the responsible federal agency has issued a finding of noncompliance under the relevant statute or where there has been a per se violation of the relevant statute. *Kellogg Co. v. New Generation Foods Inc.*, 6 USPQ2d 2045 (TTAB 1988); *Medtronic, Inc. v. Pacesetter Systems, Inc.*, 222 USPQ 80 (TTAB 1984).

For the purpose of determining whether to issue an inquiry, the USPTO will not regard apparent technical violations, such as labeling irregularities on specimens, as violations. For example, if a package fails to show all required labeling information, the examining attorney should not take any action. Likewise, the USPTO does not routinely solicit information regarding label approval under the Federal Alcohol Administration Act or similar acts.

See [TMEP §1205](#) regarding refusal of registration of matter that is protected by a statute or convention.

# Chapter 1000 Applications Under Section 44

---

<b>1001</b>	<b>Section 44 Applications - General</b>
<b>1002</b>	<b>Eligible Applicants Under §44</b>
1002.01	Eligible Applicants Under §44(e)
1002.02	Eligible Applicants Under §44(d)
1002.03	Establishing Entitlement Under a Treaty
1002.04	Establishing Country of Origin
1002.05	United States Applicants
<b>1003</b>	<b>Section 44(d) - Priority Filing Date Based on a Foreign Application</b>
1003.01	The “First-Filed” Requirement
1003.02	Priority Claim Must Be Filed Within Six Months of Foreign Filing
1003.03	Basis for Registration Required
1003.04	Suspension Awaiting a Foreign Registration
1003.04(a)	Applications Based Solely on Section 44
1003.04(b)	Multiple-Basis Applications
1003.04(c)	Periodic Inquiries Issued as to Status of Foreign Application
1003.05	Section 44(d) and Priority for Publication
1003.06	Applicants May File Under both §§44(d) and 44(e)
1003.07	Application May Be Based on More than One Foreign Application
1003.08	Abandonment of the Foreign Application
<b>1004</b>	<b>Applications Based on Foreign Registrations Under §44(e)</b>
1004.01	Copy of Foreign Registration Required
1004.01(a)	Status of the Foreign Registration

1011.03	Amendment of Drawing
1011.04	Drawings and Descriptions of Three-Dimensional and Non-Visual Marks
<b>1012</b>	<b>Identification of Goods and Services</b>
<b>1013</b>	<b>Designation of Domestic Representative by Applicants Not Domiciled in the United States</b>
<b>1014</b>	<b>Section 44 Applications for the Supplemental Register</b>
<b>1015</b>	<b>Section 44 Registration Independent of Underlying Foreign Registration</b>
<b>1016</b>	<b>International Registration As Basis for §44 Application</b>

## **1001 Section 44 Applications - General**

The United States has assumed certain obligations from agreements adopted at the Paris Convention for the Protection of Industrial Property of 1883 and subsequent revisions to these agreements. The United States is also a member of the Inter-American Convention for Trademarks and Commercial Protection (also known as the “Pan-American Convention”), the Buenos Aires Convention for the Protection of Trade Marks and Commercial Names, the World Trade Organization, and certain other treaties and agreements. See [TMEP](#)

[§1002.03](#) and [Appendix B](#) of this Manual for additional information about treaties and international agreements.

Section 44 of the Trademark Act, 15 U.S.C. §1126, implements these agreements. Section 44 applications fall into two basic categories: (1) United States applications relying on foreign applications to secure a priority filing date in the United States under §44(d); and (2) United States applications relying on ownership of foreign registrations as a basis for registration in the United States under §44(e). See [TMEP §§1003](#) *et seq.* regarding §44(d), and [TMEP §§1004](#) *et seq.* regarding §44(e).

Section 44(d) of the Act provides only a basis for receipt of a priority filing date, *not* a basis for publication or registration. See [TMEP §1003.03](#).

An applicant may file an application based solely on §44, or may claim §44 in addition to §1(a) or §1(b) as a filing basis. An applicant who claims more than one basis must comply with all application requirements for each basis asserted. 37 C.F.R. §2.34. See [TMEP §§806.02–806.02\(g\)](#) regarding multiple-basis applications and §§[806.03\(j\)](#)-[806.03\(j\)\(iii\)](#) regarding amending the basis after publication.

In an application based solely on §44, the applicant must submit a verified statement that the applicant has a bona fide intention to use the mark in commerce, but use in commerce is not required prior to registration. [TMEP §1009](#).

In limited circumstances, applicants domiciled in the United States may be entitled to file under §44, if they meet the requirements of the Act. See [TMEP §1002.05](#).

See [TMEP Chapter 1900](#) regarding international registration under the Madrid Protocol.

## 1002 Eligible Applicants Under §44

### 1002.01 Eligible Applicants Under §44(e)

To be eligible for registration under §44(e), an applicant must meet the following requirements:

- (1) The applicant's country of origin must be a party to a treaty or agreement with the United States that provides for registration based on ownership of a foreign registration, or must extend reciprocal registration rights to nationals of the United States (15 U.S.C. §1126(b)); and
- (2) The applicant must be the owner of a valid registration *in the applicant's country of origin* (15 U.S.C. §1126(c) and (e)).

See [TMEP §1002.04](#) regarding the applicant's country of origin, and [TMEP §1002.03](#) and [Appendix B](#) for information about how to determine whether a particular country is a party to a treaty or agreement, or provides reciprocal registration rights to United States nationals.

If an applicant does not meet the requirements listed above, the examining attorney must refuse registration under §44(e). See *SARL Corexco v. Webid Consulting Ltd.*, \_\_\_ USPQ2d \_\_\_, Cancellation No. 92056456 (TTAB Mar. 27, 2014). The applicant may amend the application to claim §1(a) or §1(b) as a basis. See [TMEP §§806.03](#) *et seq.* regarding amendment of the basis.

An applicant domiciled in the United States cannot obtain registration under §44(e) unless the applicant is the owner of a registration from an eligible country other than the United States and the applicant can establish that the foreign country is the applicant's country of origin. See [TMEP §1002.05](#).

See [TMEP §§1004](#) *et seq.* for additional information about the requirements for registration under §44(e).

## 1002.02 Eligible Applicants Under §44(d)

To be eligible for a priority filing date under §44(d), an applicant must meet the following requirements:

- (1) The applicant's country of origin must be a party to an international treaty or agreement with the United States that provides a right of priority, or must extend reciprocal rights to priority to United States nationals; and
- (2) The foreign application that is the basis for the priority claim must be filed in a country that either is a party to a treaty or agreement with the United States that provides a right of priority, or extends reciprocal rights to priority to United States nationals.

15 U.S.C. §§1126(b) and (d).

See [TMEP §1002.04](#) regarding the applicant's country of origin, and [TMEP §1002.03](#) and [Appendix B](#) for information about how to determine whether a particular country is a party to an international treaty or agreement that provides a right of priority to United States nationals.

If an applicant does not meet the requirements listed above, the examining attorney must advise the applicant that it is not entitled to priority. If the applicant has not claimed another filing basis, the examining attorney must require the applicant to claim and perfect an acceptable basis before the application can be approved for publication or registration on the Supplemental Register. See [TMEP §1003.03](#) regarding registration basis for §44 applications and [TMEP §§806.03](#) *et seq.* regarding amendment of the basis. The examining attorney must ensure that the priority claim is deleted from the Trademark database and conduct a new search of the records of the United States Patent and Trademark Office ("USPTO") for conflicting marks.

To obtain a priority filing date under §44(d), the foreign application does *not* have to be filed in the applicant's country of origin. However, to obtain registration under §44(e) based on the foreign registration that will issue from the application on which the applicant relies for priority, the applicant must establish that the country in which the application was filed is its country of origin. [TMEP §1002.01](#). Therefore, if the applicant files a §44(d) priority claim based on an application from a treaty country other than the country in which the applicant is domiciled, the examining attorney must advise the applicant that in order to rely on the registration issuing from the identified foreign application as its basis for registration, the applicant will be required to establish that the country where the foreign application was filed is its country of origin.

It is important to keep in mind that while §44(d) provides a basis for filing and a priority filing date, it does not provide a basis for publication or registration. A party who files under §44(d) must establish a basis for registration. 37 C.F.R. §2.34(a)(4)(iii); [TMEP §1003.03](#). For example, a French corporation may rely on a first-filed application in Canada for its priority claim under §44(d), regardless of whether Canada is the applicant's country of origin. However, before the mark can be published for opposition in the United States, the French corporation must do one of the following: (1) establish Canada as its country of origin and rely on the prospective Canadian registration as its basis for registration in the United States (see [TMEP §§1002.01](#) and [1002.04](#)); (2) assert use in commerce under §1(a) and/or a bona fide intention to use in

commerce under §1(b) as its basis for publication in the United States; or (3) rely on a registration from France as its basis for registration in the United States.

An applicant domiciled or organized in the United States may claim priority under §44(d) based on ownership of an application *in a treaty country other than the United States*. See [TMEP §1002.05](#).

See [TMEP §§1003](#) *et seq.* for additional information about the requirements for obtaining a priority filing date under §44.

### 1002.03 Establishing Entitlement Under a Treaty

In a §44 application, the examining attorney must confirm that: (1) both the applicant's country of origin and the country where the applicant has filed the application or obtained registration are parties to a treaty or agreement with the United States (or that they extend reciprocal rights to United States nationals by law); *and* (2) the specific benefit that the applicant is claiming under §44 (i.e., the right to a priority filing date under §44(d) and/or the right to registration under §44(e)) is provided for under the treaty or agreement. See [TMEP §§1002.01](#) and [1002.02](#).

To determine whether a particular country has a treaty with the United States that provides for the benefit that the applicant is claiming under §44, examining attorneys should consult [Appendix B](#) of this manual.

Appendix B lists the members of the Paris Convention, Inter-American Convention, Buenos Aires Convention, World Trade Organization, European Union ("EU"), and certain countries entitled to reciprocal treatment under other international agreements, as well as websites where examining attorneys can obtain updated information about these treaties or agreements.

In a §44 application or an amendment adding or substituting §44 as a basis, an eligible applicant may rely on an application filed in or registration issued by certain common offices of several states. A "common office of several states" refers to an entity serving as the issuing office for trademark registrations for an established group of countries. Examples include the Benelux Trademark Office, servicing Belgium, The Netherlands, and Luxembourg; and the African Intellectual Property Organization ("OAPI"), which issues registrations covering all member states (i.e., Benin, Burkina-Faso, Cameroon, Central African Republic, Chad, Congo, Equatorial Guinea, Gabon, Guinea, Guinea-Bissau, Ivory Coast, Mali, Mauritania, Niger, Senegal, and Togo).

An applicant may also claim the benefits of §44 based on an application for or registration of a Community Trade Mark, if the applicant has a bona fide and effective industrial or commercial establishment in a country or state that is a member of the EU, formerly known as the European Community (EC) or European Economic Community (EEC). See Appendix B for a list of these countries.

If an eligible applicant filed an application or obtained a registration in a country that is a member of the Paris Convention, Inter-American Convention, World Trade Organization, or European Union, the applicant can claim the benefits of either §44(d) or §44(e), if the applicant meets the requirements of those sections. An eligible applicant may also file under *either* §44(e) or §44(d) based on an application filed or registration obtained in Taiwan. On the other hand, if the applicant filed an application or obtained a registration in a country that is a member of the Buenos Aires Convention, the applicant may seek registration under §44(e), but may *not* obtain a priority filing date under §44(d). See [Appendix B](#) for additional information.

In the case of agreements not covered in [Appendix B](#), an applicant can establish its eligibility for the benefits of §44 by providing evidence of statutes or agreements establishing reciprocity between the United States

and the relevant country. Examining attorneys may also consult sources such as *Trademarks Throughout the World* (Anne-Laure Covin, 5th ed. 2008) and *World Trademark Law and Practice* (Ethan Horwitz, 2nd ed. 2008), available to USPTO employees in the Trademark Law Library, for information about the trademark laws of foreign countries. Additional resources are listed in Appendix B.

See [TMEP §1002.01](#) for information about how the examining attorney should handle an application in which the applicant is not entitled to registration under §44(e), and [TMEP §1002.02](#) for information about how the examining attorney should handle an application in which the applicant is not entitled to priority under §44(d).

#### 1002.04 Establishing Country of Origin

To obtain registration under §44(e), the applicant must be the owner of a valid registration from the applicant's country of origin. *Kallamni v. Khan*, 101 USPQ2d 1864 (TTAB 2012) (finding that registrant's shipment of product did not create a bona fide and effective commercial establishment in the European Union, that registrant had not established the European Union as his country of origin, and therefore registrant's European Union registration could not serve as a basis for registration under §44(e)); [TMEP §1002.01](#). To obtain a priority filing date under §44(d), the applicant's country of origin must be a treaty country, but the foreign application that is the basis for the priority claim does not have to be filed in the applicant's country of origin. [TMEP §1002.02](#). An applicant domiciled or organized in the United States may be entitled to registration under §44(e) if the applicant can also claim a country of origin other than the United States. See [TMEP §1002.05](#).

Section §44(c) of the Trademark Act defines the applicant's country of origin as "the country in which he has a bona fide and effective industrial or commercial establishment, or if he has not such an establishment, the country in which he is domiciled, or if he has not a domicile in any of the countries described in paragraph (b) of this section, the country of which he is a national." Under this definition, an applicant can have more than one country of origin.

If a §44 applicant is domiciled or incorporated in the country claimed, the examining attorney should presume that the country is the applicant's country of origin, and should not issue any inquiry about the applicant's country of origin.

If a §44(d) applicant is not domiciled, incorporated, or organized in a treaty country, the examining attorney must require the applicant to establish that it was domiciled, incorporated, or organized, or had a bona fide and effective industrial or commercial establishment, in a treaty country during the six-month priority period beginning at the date of filing of the foreign application. See [TMEP §1002.02](#).

If a §44(e) applicant is not domiciled, incorporated, or organized in the country that issued the foreign registration, the examining attorney must require the applicant to establish that the country is its country of origin as of the date of issuance of the foreign registration. In this context, applicant is to be construed broadly, as defined in 15 U.S.C. §1127, to embrace the legal representatives, predecessors, successors, and assigns of the original owner of the foreign application or registration. Thus, an applicant for registration in the United States who is the assignee of a foreign registration, but cannot establish that the country which issued the registration is its country of origin prior to the assignment, or to the filing of the United States application, may still claim the benefit of registration under §44(e) because the requirement that the applicant be the owner of a valid registration from the applicant's country of origin was perfected by its predecessor in interest.

Generally, a written statement by the applicant or the applicant's attorney that the applicant has had a bona fide and effective industrial or commercial establishment in the relevant country during the six-month priority period beginning at the date of filing of the foreign application (for §44(d) applicants), or as of the date of issuance of the foreign registration (for §44(e) applicants), will be sufficient to establish that the country is the applicant's country of origin. This statement does not have to be verified. If a §44(d) applicant establishes its country of origin by submitting this statement, and later perfects its §44 basis by submitting a foreign registration issued by the same country, it is not necessary to require another statement as to the foreign registration.

If the application is otherwise eligible for approval for publication, or in condition to be allowed for registration on the Supplemental Register, the examining attorney may attempt to contact the applicant by telephone or e-mail to obtain the statement. If the examining attorney is unable to reach the applicant by telephone or e-mail, he or she must issue an Office action. If the applicant responds by telephone or e-mail, the examining attorney must issue an examiner's amendment to enter the statement into the record.

If any evidence in the record contradicts the applicant's assertion that it has a bona fide and effective industrial or commercial establishment in the relevant country, the examining attorney should require the applicant to set forth the specific circumstances which establish that the applicant maintains a bona fide and effective industrial or commercial establishment in the country. Relevant factors include the presence of production facilities, business offices, and personnel.

The presence of an applicant's wholly owned subsidiary in a country does not, by itself, establish country of origin. *In re Aktiebolaget Electrolux*, 182 USPQ 255 (TTAB 1974). The fact that the applicant is wholly owned by a foreign company does not establish country of origin. *Karsten Mfg. Corp. v. Editoy AG*, 79 USPQ2d 1783 (TTAB 2006).

The sale of goods or services outside the United States through related companies or licensees does not create a bona fide commercial establishment and thus does not establish country of origin. *Id.* See also *Ex parte Blum*, 138 USPQ 316 (Comm'r Pats. 1963) (country of origin cannot be established by relying on contractual relationships with a licensee in another country).

The United States, by definition, is not a country that has a treaty with the United States. Therefore, the term "country of origin" in §§44(b) and (c) means a country other than the United States. *In re Fisons Ltd.*, 197 USPQ 888 (TTAB 1978). See [TMEP §1002.05](#).

See [TMEP §1002.01](#) for information about how the examining attorney should handle an application in which the applicant is not entitled to registration under §44(e), and [TMEP §§1002.02](#) and [1003.01](#) for information about how the examining attorney should handle an application in which the applicant is not entitled to priority under §44(d).

## 1002.05 United States Applicants

Section 44(b) of the Trademark Act provides that, "Any person whose country of origin is a party to any convention or treaty relating to trademarks, trade or commercial names, or the repression of unfair competition, to which the United States is also a party, or extends reciprocal rights to nationals of the United States by law, shall be entitled to the benefits of this section...."

Section 44(i) of the Act provides that "[c]itizens or residents of the United States shall have the same benefits as are granted by this section to persons granted by this section to persons described in subsection [44](b)...."

However, §44(i) does not provide an independent basis for a United States applicant to register a mark under §44(e). *In re Pony Int'l Inc.*, 1 USPQ2d 1076 (Comm'r Pats. 1986).

The United States, by definition, is not a country that has a treaty with the United States. Therefore, the term “country of origin” in §44(b) means some country other than the United States, and the term “person” in §44(b) means a person who can claim a country of origin other than the United States. *In re Fisons Ltd.*, 197 USPQ 888 (TTAB 1978).

An applicant domiciled in the United States may claim priority under §44(d) based on ownership of an application in a treaty country *other than the United States*, even if the other country is not the applicant’s country of origin. *See In re ETA Systems Inc.*, 2 USPQ2d 1367 (TTAB 1987), *dec. withdrawn on other grounds* (TTAB, November 28, 1988); *In re International Barrier Corp.*, 231 USPQ 310 (TTAB 1986). *See* [TMEP §1002.02](#).

However, an applicant domiciled in the United States may not obtain registration under §44(e) unless the applicant is the owner of a registration from an eligible country other than the United States *and* the applicant can establish that the foreign country is the applicant’s country of origin. *See Karsten Mfg. Corp. v. Editoy*, 79 USPQ2d 1783 (TTAB 2006); *In re International Barrier Corp.*, *supra*; *In re Fisons*, *supra*. *See* [TMEP §1002.01](#).

For example, a Texas corporation may assert a priority claim under §44(d) based on ownership of an application in Mexico, regardless of whether Mexico is its country of origin. However, this applicant must also assert a valid basis for registration ( *see* [TMEP §1003.03](#)). The applicant may do so by asserting use in commerce under §1(a) and/or a bona fide intention to use in commerce under §1(b) as its basis for publication. The applicant cannot obtain registration in the United States under §44(e) unless the applicant establishes that Mexico is one of its countries of origin.

*See* [TMEP §1002.04](#) regarding the applicant’s country of origin, and [TMEP §1002.03](#) and [Appendix B](#) for information about how to determine whether a particular country is a party to an international treaty or agreement that provides for priority and/or registration based on ownership of a foreign registration.

*See also* [TMEP §1002.01](#) for information about how the examining attorney should handle an application in which the applicant is not entitled to registration under §44(e), and [TMEP §§1002.02](#) and [1003.01](#) for information about how the examining attorney should handle an application in which the applicant is not entitled to priority under §44(d).

### **1003 Section 44(d) - Priority Filing Date Based on a Foreign Application**

Section 44(d) of the Trademark Act, 15 U.S.C. §1126(d), provides for a priority filing date to eligible applicants ( *see* [TMEP §1002.02](#)) who have filed an application in a treaty country as defined by §44(b) ( *see* [TMEP §1002.03](#)). If an eligible applicant files the United States application claiming §44(d) priority within six months of filing the first application to register the mark in a treaty country, the filing date of the first-filed foreign application is the effective filing date of the United States application.

The requirements for receipt of a priority filing date under §44(d) are:

(1) The eligible applicant must file a claim of priority within six months of the filing date of the first-filed foreign application. 15 U.S.C. §1126(d)(1); 37 C.F.R. §§2.34(a)(4)(i) and 2.35(b)(5); [TMEP §§1003.01](#) and [1003.02](#).

(2) The applicant must: (a) specify the filing date and country of the first regularly filed foreign application; or (b) state that the application is based upon a subsequent regularly filed application in the same foreign country, and that any prior-filed application has been withdrawn, abandoned, or otherwise disposed of, without having been laid open to public inspection and without having any rights outstanding, and has not served as a basis for claiming a right of priority. 15 U.S.C. §1126(d); 37 C.F.R. §§2.34(a)(4)(i)(A) and (B).

(3) The applicant must verify that the applicant has a bona fide intention to use the mark in commerce on or in connection with the goods or services listed in the application. 15 U.S.C. §1126(d)(2). If the verified statement is not filed with the initial application, the verified statement must also allege that the applicant has had a bona fide intention to use the mark in commerce since the filing date of the application. 37 C.F.R. §2.34(a)(4)(ii).

(4) Both the non-United States applicant's country of origin and the country where the foreign application is filed must be a party to an international treaty or agreement with the United States that provides a right of priority, or must extend reciprocal rights to priority to United States nationals. 15 U.S.C. §1126(b) and (d); TMEP §§[1002.02](#), [1002.03](#), and [1002.04](#).

(5) The scope of the goods covered by the §44 basis cannot exceed the scope of the goods or services in the foreign application. 37 C.F.R. §2.32(a)(6); [TMEP §1402.01\(b\)](#).

(6) The applicant must specify the serial number of the foreign application. 37 C.F.R. §2.34(a)(4)(i)(A); Paris Convention Article 4(D)(5).

If the applicant is not domiciled in the United States, the applicant may designate a domestic representative, that is, a person residing in the United States on whom may be served notices or process in proceedings affecting the mark. 15 U.S.C. §1051(e); [TMEP §610](#). This can be done through the Trademark Electronic Application System ("TEAS"), at <http://www.uspto.gov>.

The priority filing date also constitutes a constructive date of first use in the United States under 15 U.S.C. §1057(c) ( see [TMEP §201.02](#)), if the application matures into a registration. See *SCM Corp. v. Langis Foods Ltd.*, 539 F.2d 196, 190 USPQ 288 (D.C. Cir. 1976). Therefore, the priority date cannot be later than the filing date of the U.S. application.

Section 44(d) of the Act provides only a basis for receipt of a priority filing date, *not* a basis for publication or registration. See [TMEP §1003.03](#).

In a §44(d) application, both the actual date the application was received in the USPTO and the priority date will appear in the Trademark database.

### **1003.01 The "First-Filed" Requirement**

The application relied upon under §44(d) must be the applicant's first application filed in any treaty country for the same mark and for the same goods or services. The USPTO will presume that the application identified as the basis for the priority claim was the first filed, unless there is contradictory evidence in the record (e.g., in the application itself or submitted via a Letter of Protest that has been accepted; see [TMEP §1715.01](#) regarding appropriate subjects to be raised in a letter of protest). If the first-filed application was withdrawn, abandoned, or otherwise disposed of without having any rights outstanding, and did not serve as a basis for claiming a right of priority, the §44(d) priority claim may be based upon a subsequently filed application in the same foreign country or common office of several states. Generally, a written explanation by the applicant or the applicant's attorney that the first-filed application was withdrawn, abandoned, or otherwise disposed of without having any rights outstanding, and did not serve as a basis for claiming a right of priority, will be sufficient.

The requirement for the same goods or services means that the goods or services cannot exceed the scope of the goods or services in the foreign application and must be different from those covered by any previous application or registration for the mark in a treaty country. Thus, for example, if evidence in the record indicates that an applicant who owns a French registration for “coats, hats, and ties” subsequently files an application with the Office for Harmonization in the Internal Market (“OHIM”) for “coats, hats, ties, and shoes,” and then files a United States application within six months seeking a priority filing date for “coats, hats, ties, and shoes” based on the OHIM application, the §44(d) priority claim would be valid only as to “shoes” because the OHIM application was not the first filed in a treaty country for “coats, hats, and ties.” Note, however, that if the foreign application that formed the basis for the French registration is still within the six-month priority period, because, for example, the French registration was issued on the filing date of the foreign application, that foreign application can serve as a basis for priority for the “coats, hats, and ties.”

If the examining attorney determines that the application relied on was not the first filed in any treaty country as to some or all of the goods/services, the examining attorney must advise the applicant that it is not entitled to priority as to the relevant goods/services. If the applicant has not claimed another filing basis, the examining attorney must require the applicant to claim and perfect a basis for any goods/services not entitled to priority before the application can be approved for publication or for registration on the Supplemental Register. See [TMEP §1003.03](#) regarding registration basis for §44 applications and [TMEP §§806.03](#) *et seq.* regarding amendment of the basis.

If the applicant is not entitled to priority as to any goods/services, the examining attorney must ensure that the priority claim is deleted from the Trademark database. If the applicant is entitled to priority as to some, but not all, of the goods/services, the examining attorney must ensure that the identification in the Trademark database indicates those goods/services that have priority. See [TMEP §806.02\(a\)](#). The examining attorney must also conduct a new search of USPTO records for conflicting marks as to any goods/services not entitled to priority.

### **1003.02 Priority Claim Must Be Filed Within Six Months of Foreign Filing**

An applicant must file a claim of priority within six months *after* the filing date of the foreign application. 15 U.S.C. §1126(d)(1); 37 C.F.R. §§2.34(a)(4)(i) and 2.35(b)(5); Paris Convention Article 4(C)(3). The applicant can submit the priority claim after the filing date of the United States application, as long as the claim of priority is submitted within six months of the foreign filing and the claimed priority date is earlier than the filing date of the U.S. application.

*Example:* If an eligible applicant files in France on December 6, 2011, and in the United States on January 12, 2012, the applicant can add a priority claim to the United States application on or before June 6, 2012, if the applicant meets the requirements of §44(d). The applicant cannot add a priority claim to the United States application after June 6, 2012.

If an applicant claims priority under §44(d), but does not specify the filing date of the foreign application, the examining attorney must require that the applicant specify the date of the foreign filing.

If the applicant submits a claim of priority more than six months after the date of the foreign filing, the examining attorney must advise the applicant that it is not entitled to priority. 15 U.S.C. §1126(d); 37 C.F.R. §§2.34(a)(4)(i) and 2.35(b)(5). If the applicant has not claimed another filing basis, the examining attorney must require the applicant to claim and perfect an acceptable basis before the application can be approved for publication or for registration on the Supplemental Register. See [TMEP §1003.03](#) regarding registration basis for §44 applications and [TMEP §§806.03](#) *et seq.* regarding amendment of the basis. The examining

attorney should ensure that the priority claim is deleted from the Trademark database, and should conduct a new search of USPTO records for conflicting marks.

If the priority period ends on a Saturday, Sunday, or Federal holiday within the District of Columbia, the priority claim may be filed no later than the following day that is not a Saturday, Sunday, or a Federal holiday within the District of Columbia. Paris Convention Article 4(C)(3); 35 U.S.C. §21(b); 37 C.F.R. §2.196.

### **1003.03 Basis for Registration Required**

Section 44(d) of the Act provides a basis for receipt of a priority filing date, but not a basis for publication or registration. Before an application may be approved for publication, or allowed for registration on the Supplemental Register, the applicant must establish a basis for registration under §1(a), §1(b), or §44(e) of the Act. 37 C.F.R. §2.34(a)(4)(iii). See TMEP §[1002.02](#) regarding applications that are entitled to a priority filing date under §44(d), but are not entitled to registration under §44(e) because the foreign application was filed in a treaty country that is not the applicant's country of origin.

An applicant may claim more than one basis for registration (i.e., §44(e) in addition to §1(a) or §1(b)). If the applicant claims a §1(b) basis, the applicant must file an allegation of use (i.e., either an amendment to allege use under 15 U.S.C. §1051(c) or a statement of use under 15 U.S.C. §1051(d)) before the mark can be registered. See TMEP §[806.01\(b\)](#) regarding the requirements for a §1(b) basis and TMEP §§[1004-1004.02](#) regarding the requirements for registration under §44(e).

A §44(d) applicant may not assert a basis under §66(a) of the Trademark Act, based on an extension of protection of an international registration to the United States. 37 C.F.R. §§2.34(b)(3) and 2.35(a).

### **1003.04 Suspension Awaiting a Foreign Registration**

#### **1003.04(a) Applications Based Solely on Section 44**

In a §44(d) application filed via TEAS, the applicant is asked to specifically indicate that it does not intend to rely on §44(e) as a basis for registration, but wishes only to assert a valid claim of priority. If the applicant does not do so, an intent to rely on §44(e) is presumed and, when filed, the application will include a statement that the applicant intends to rely on §44(e) as a basis for registration.

If, on initial examination of the application, there are no refusals, requirements, or prior pending applications, the examining attorney will suspend action on the application pending receipt of the foreign registration. The suspension notice must include a search clause ( *see* [TMEP §704.02](#)).

If, on initial examination, the examining attorney issues any refusals or other requirements, the Office action must also include a requirement that the applicant submit the foreign registration when it becomes available. Depending upon the applicant's response, the examining attorney will take appropriate action to place the application in condition for approval for publication, allowance for registration on the Supplemental Register, or final action on all other issues, and will then suspend further action pending receipt of the foreign registration. In the notice of suspension, the examining attorney must reference any continued refusals or requirements. See TMEP §[716.01](#).

If, on initial examination, the only other issue is a prior pending application, the examining attorney will suspend action on the application pending receipt of the foreign registration and resolution of the prior pending application. The suspension notice must include a search clause (see TMEP §[704.02](#)). If the foreign

registration is submitted while the prior pending application is pending, the application will be re-suspended and the suspension letter will state that the foreign registration has been received but will not be examined until the prior pending application either abandons or registers. If the prior pending application abandons before the applicant submits the foreign registration, the examining attorney will re-suspend the application pending receipt of the foreign registration. The suspension letter must state that the prior pending application has abandoned and no longer poses a potential bar to registration. However, if the prior pending application registers before the foreign registration is submitted, the examining attorney will issue a non-final Office action with a §2(d) refusal and a requirement that the applicant submit the foreign registration when it becomes available. If the applicant responds, but the foreign registration cannot yet be provided, the application will be re-suspended. The suspension notice must indicate whether the §2(d) refusal is continued or withdrawn. See TMEP §[716.01](#).

If the TEAS application indicates that the applicant is not relying on §44(e) and no other basis for registration is claimed, the examining attorney must inquire since the application lacks a basis for registration. If, on initial examination, there are no refusals or requirements that would otherwise necessitate issuance of an Office action, this inquiry may be made via telephone or e-mail, if e-mail communication is authorized. The following actions should be taken based on the applicant's response to the inquiry:

- If the applicant responds that it intends to rely on §44(e) as the basis, the examining attorney must enter a Note to the File in the record and suspend the application pending receipt of the foreign registration. The suspension letter must include a search clause. See TMEP §§[704.02](#) and [1003.04\(a\)](#).
- If the applicant responds that it intends to rely solely on §1(b) as the basis, the examining attorney must issue an examiner's amendment so specifying.
- If the applicant responds that it intends to rely solely on §1(a) and the application does not include a specimen, dates of use, and/or the proper declaration, the examining attorney must issue a priority action specifying what actions the applicant must take. See TMEP §[708.01](#).

If, however, there are other refusals or requirements, or the applicant cannot be reached by telephone or e-mail, the examining attorney must issue an Office action that includes the inquiry regarding whether the applicant intends to rely on §44(e) as a registration basis and note that, if so, the foreign registration is required when it becomes available.

If a §44(d) application filed on paper is silent as to whether the applicant intends to rely on §44(e), the USPTO will presume that the applicant intends to rely on §44(e) as a basis for registration and follow the same procedures as for TEAS applications.

### **1003.04(b) Multiple-Basis Applications**

If an applicant properly claims §44(d) as a basis for receipt of a priority filing date and asserts §1 as a second basis, the applicant may elect not to perfect the §44 basis and still retain the priority filing date. 37 C.F.R. §2.35(b)(3) and (4). If the application is filed via TEAS and indicates that the applicant is relying on §44(e) as a basis for registration, the examining attorney must follow the procedures in [TMEP §1003.04\(a\)](#) with respect to the §44(e) basis. If the application indicates that the applicant is not relying on §44(e) as an additional basis for registration and is only asserting §44(d) to receive a priority filing date, the examining attorney must ensure that the Trademark database is updated accordingly.

When an application filed on paper is silent as to whether the applicant intends to rely on §44(e) as an additional basis for registration, the examining attorney must inquire as to whether the applicant intends to rely on the §44(e) basis. If, on initial examination, there are no refusals or requirements that would otherwise

necessitate issuance of an Office action, this inquiry may be made via telephone or e-mail, if e-mail communication is authorized. If the applicant intends to perfect the §44 basis, the examining attorney must enter a Note to the File in the record and suspend the application pending receipt of the foreign registration.

If the applicant does not wish to perfect the §44 basis, the examining attorney must issue an examiner's amendment to this effect. If the applicant cannot be reached by telephone or e-mail, the examining attorney must enter a Note to the File in the record indicating the unsuccessful attempt to contact the applicant and suspend action on the application pending receipt of the foreign registration. The suspension notice must include a search clause (see [TMEP §704.02](#)).

If it is necessary to issue an Office action regarding any refusals or requirements, including a prior pending application, the examining attorney must inquire as to whether the applicant intends to perfect §44 as a second basis for registration and note that, if so, the foreign registration is required when it becomes available. After a response is received, if the application is in condition for approval for publication, allowance on the Supplemental Register, or final action, the examining attorney will suspend further action pending submission of the foreign registration and, if appropriate, resolution of the prior pending application. The examining attorney must suspend the application even if the response fails to indicate whether the applicant intends to perfect the §44 basis. In the notice of suspension, the examining attorney must reference any refusals or requirements that are continued. See [TMEP §716.01](#).

See [TMEP §1003.04\(a\)](#) with respect to suspension procedures when there is a prior pending application.

### **1003.04(c) Periodic Inquiries Issued as to Status of Foreign Application**

Examining attorneys must issue inquiries as to the status of the foreign application in applications that have been suspended for more than six months. See [TMEP §716.05](#). If the applicant does not respond to this inquiry within six months of the issuance date, the application will be abandoned for failure to respond to an Office action.

If the applicant is unable to furnish a copy of the foreign registration before the expiration of time to respond to the inquiry, the applicant should advise the examining attorney of this fact. This may be done by telephone or e-mail. If the applicant states that the foreign registration has not yet issued, the examining attorney will issue a new notice of suspension.

If the applicant states that the foreign registration has issued, but fails to send a copy, the examining attorney must issue an Office action requiring a copy. 15 U.S.C. §1126(e); 37 C.F.R. §2.34(a)(3)(ii).

To expedite processing, the USPTO recommends that the applicant's response to a suspension inquiry be filed through TEAS, at <http://www.uspto.gov>, using the Response to Suspension Inquiry or Letter of Suspension form.

### **1003.05 Section 44(d) and Priority for Publication**

To determine priority for publication under 37 C.F.R. §2.83, an application filed in the United States under §44(d) will be treated as if it were filed in the United States on the same date as the filing in the foreign country. The §44(d) application will receive priority over any application filed after the §44(d) applicant's priority filing date that might otherwise be a possible bar to registration under §2(d) of the Trademark Act due to a likelihood of confusion. See [TMEP §§1208](#) *et seq.* regarding conflicting marks in pending applications.

In some cases, another United States application filed after the §44(d) applicant's priority date may proceed to publication or registration because the §44(d) applicant had not yet filed in the United States when the examining attorney searched USPTO records for conflicting marks. If the USPTO learns that a §44(d) application is entitled to priority over another pending application before the other mark registers, the USPTO will take appropriate action to give the §44(d) application the priority to which it is entitled.

If an examining attorney discovers a conflicting application entitled to priority under §44(d) after taking action in a case, the examining attorney should issue a supplemental action correcting the situation. If the mark has been published, the examining attorney must request jurisdiction before issuing the action, unless a notice of allowance has issued. See [TMEP §§1504.01](#) and [1504.04\(a\)](#) regarding the examining attorney's jurisdiction.

However, if the conflicting mark has already registered, the USPTO does not have the authority to cancel the registration *sua sponte*. The §44(d) applicant must take action to enforce its priority rights, e.g., by filing a petition to cancel the registration with the Trademark Trial and Appeal Board.

### **1003.06 Applicants May File Under both §§44(d) and 44(e)**

In some cases, a §44 applicant may have already received, before filing in the USPTO, a foreign registration as a result of the same foreign application upon which the applicant relies for priority under §44(d). This may occur in countries that do not examine applications prior to registration. In this situation, the applicant may file under both §§44(d) and 44(e).

An applicant may also claim priority under §44(d) based upon a foreign application, and proceed to registration under §44(e) based upon a different foreign registration. Both foreign countries must be parties to a treaty or agreement with the United States and the foreign registration must be from a country of origin of the applicant. If the applicant amends an application to rely on a different foreign registration, this is not considered a change in basis, but may require republication. See [TMEP §1004.02](#).

### **1003.07 Application May Be Based on More than One Foreign Application**

An applicant may file an application in the United States based on more than one foreign application for different goods or services, or for different classes, if the applicant meets the requirements of §44(d) with respect to each foreign application on which the United States application is based. The applicant must specify which goods or services, or which classes, are covered by which foreign application. The mark in each foreign application must be the same mark for which registration is sought in the United States application.

### **1003.08 Abandonment of the Foreign Application**

If the foreign application relied on under §44(d) is abandoned during the prosecution of the United States application, the applicant may amend the application to rely on another basis. See [TMEP §§806.03](#) *et seq.*

If the applicant met the requirements of §44(d) on the filing date of the United States application, the applicant will retain the priority filing date even if the foreign application is abandoned. 37 C.F.R. §2.35(b)(4).

In this situation, the USPTO will presume that the applicant had a continuing valid basis, because the applicant had at least a bona fide intention to use the mark in commerce as of the application filing date, unless there is contradictory evidence in the record. *See* 37 C.F.R. §2.35(b)(3) and [TMEP §806.03\(h\)](#).

## 1004 Applications Based on Foreign Registrations Under §44(e)

If an eligible applicant ( *see* [TMEP §1002.01](#)) owns a valid registration from the applicant's country of origin, the applicant may base its United States application on that foreign registration under §44(e).

A §44(e) application must meet the following requirements:

- (1) The applicant must be the owner of a valid registration in the applicant's country of origin. 15 U.S.C. §§1126(c) and (e). *See* [TMEP §§1002.01](#) and [1002.04](#) regarding country of origin.
- (2) The applicant's country of origin must be a party to a treaty or agreement with the United States that provides for registration based on ownership of a foreign registration, or must extend reciprocal registration rights to nationals of the United States. 15 U.S.C. §1126(b). *See* [TMEP §§1002.03](#), [1002.04](#), and [1002.05](#).
- (3) The applicant must submit a true copy, a photocopy, a certification, or a certified copy of the registration in the applicant's country of origin. 15 U.S.C. §1126(e); 37 C.F.R. §2.34(a)(3)(ii); [TMEP §1004.01](#).
- (4) The applicant must verify that the applicant has a bona fide intention to use the mark in commerce on or in connection with the goods or services listed in the application. 15 U.S.C. §1126(e). If the verified statement is not filed with the initial application, the verified statement must also allege that the applicant has had a bona fide intention to use the mark in commerce since the application filing date. 37 C.F.R. §2.34(a)(3)(i).
- (5) The scope of the goods covered by the §44(e) basis cannot exceed the scope of the goods or services in the foreign registration. 37 C.F.R. §2.32(a)(6); [TMEP §1402.01\(b\)](#).

If the applicant is not domiciled in the United States, the applicant is encouraged to designate a domestic representative, i.e., a person residing in the United States on whom may be served notices or process in proceedings affecting the mark. 15 U.S.C. §1051(e); [TMEP §610](#). This can be done through TEAS, at <http://www.uspto.gov>.

An applicant may not file an application under §44(e), or amend an application to add or substitute a §44(e) basis, before the registration in the applicant's country of origin has issued. An applicant can file under §44(d) within six months after the filing date of an application in the applicant's country of origin ( *see* [TMEP §1003 et seq.](#)). However, once this six-month priority period has passed, an applicant cannot file an application in the United States based on a pending foreign application.

### 1004.01 Copy of Foreign Registration Required

Section 44(e) of the Trademark Act, 15 U.S.C. §1126(e), requires “a true copy, a photocopy, a certification, or a certified copy of the registration in the country of origin of the applicant.” If a copy of the foreign registration is not included with the application as filed, the examining attorney must require submission of a copy of the foreign registration in the first Office action. The copy must show the name of the owner, the mark, and the goods or services for which the mark is registered.

If the applicant submits a copy of the foreign registration, it must be a copy of a document that has been issued to the applicant by or certified by the intellectual property office in the applicant's country of origin.

A photocopy of the intellectual property office's publications or a printout from the intellectual property office's website is not sufficient to establish that the mark has been registered in that country and that the registration is in full force and effect, unless accompanied by a certification from the issuing office.

An English translation of a registration from the country of origin by itself is not an acceptable "copy" of the foreign registration. A certification or copy of the registration as issued by the intellectual property office of the country of origin is required, along with an English translation. 37 C.F.R. §2.34(a)(3)(ii). See [TMEP §1004.01\(b\)](#) regarding translation of foreign registrations.

If an applicant files more than one application in the United States based on the same foreign registration, the applicant must file a copy of the foreign registration (and its English translation, if applicable), in each of the United States applications. 37 C.F.R. §2.193(g).

In a §44(e) application, the examining attorney will not suspend the application pending submission of a copy of the foreign registration, unless the applicant establishes that it cannot obtain a copy of the foreign registration due to extraordinary circumstances (e.g., war or natural disaster). However, the examining attorney may suspend the application pending receipt of proof of renewal of the foreign registration ( *see* [TMEP §1004.01\(a\)](#)).

### **1004.01(a) Status of the Foreign Registration**

The foreign registration must be in force at the time the United States issues the registration based on that foreign registration. *In re Societe D'Exploitation de la Marque Le Fouquet's* , 67 USPQ2d 1784 (TTAB 2003); *Marie Claire Album S.A. v. Kruger GmbH & Co. KG* , 29 USPQ2d 1792 (TTAB 1993); *Fioravanti v. Fioravanti Corrado S.R.L.* , 230 USPQ 36 (TTAB 1986), *recon denied* 1 USPQ2d 1304 (TTAB 1986). [Appendix B](#) of this manual lists the terms of registration in various foreign countries.

If the record indicates that the foreign registration has expired or will expire before the United States registration will issue, the examining attorney must require that an applicant submit a certificate of renewal or other certification from the intellectual property office of the foreign country, or a copy of the foreign registration that shows that the foreign registration has been renewed and will be in force at the time the registration issues in the United States, along with an English translation. 37 C.F.R. §2.34(a)(3)(iii). See [TMEP §1004.01\(b\)](#) regarding translation of foreign registrations and renewal documents. A photocopy of the intellectual property office's publications or a printout from the intellectual property office's website is not sufficient to establish that the registration has been renewed in that country and is in full force and effect, unless accompanied by a certification from the issuing office. Currently, the only exception is for renewals of Singapore registrations. As of January 1, 2009, Singapore ceased issuing certificates confirming that a registration has been renewed. Therefore, a printout from the Singapore intellectual property office website showing the extended expiration date of the foreign registration is acceptable as proof of renewal.

Generally, the examining attorney should require proof of renewal if it appears that the foreign registration will expire within six months after the date of approval for publication. If the applicant states that renewal is pending in the foreign country, the examining attorney should suspend the application pending receipt of proof of renewal.

If an applicant submits a certified copy or certification of the foreign registration that is certified by the foreign government agency who issued the foreign registration, the examining attorney should inquire concerning renewal only if the certified copy of the foreign registration indicates that the registration will expire *after* the date on which the foreign government agency issued the certified copy or certification of

the foreign registration. For example, if a certified copy of a foreign registration was issued by the trademark agency in the foreign country on January 5, 2009, and the certified copy indicates that the registration expired on June 1, 2008, no inquiry is necessary. The USPTO presumes that the foreign country would not have issued a certified copy of the registration unless the registration had been renewed. This applies *only* to a certified copy or certification issued *by the foreign trademark agency*. If the copy of the registration is not certified by the foreign trademark agency, and the record indicates that the foreign registration will expire before the United States registration will issue, the examining attorney must require that the applicant submit a copy of the foreign registration showing that the registration has been renewed.

If the examining attorney determines that the foreign registration is not in force, the examining attorney will refuse registration under §44(e). The applicant may amend the application to claim another basis. See [TMEP §§806.03](#) *et seq.* regarding amendments to the basis.

For information about recent changes in the term of registration in a foreign country, examining attorneys may consult resources such as *Trademarks Throughout the World* (Anne-Laure Covin, 5<sup>th</sup> ed. 2008) and *World Trademark Law and Practice* (Ethan Horwitz, 2<sup>nd</sup> ed. 2008), available to USPTO employees in the Trademark Law Library. Additional resources are listed in [Appendix B](#).

### **1004.01(b) Translation of the Foreign Registration or Renewal Document**

If the foreign registration, certificate of renewal, or other certification of renewal from the intellectual property office of the foreign country is not in English, the applicant must provide a translation. 37 C.F.R. §2.34(a)(3)(ii)-(iii). The translator should sign the translation, but does not have to swear to the translation.

### **1004.02 Application May Be Based on More than One Foreign Registration**

A United States application may be based on more than one foreign registration. The applicant must meet all requirements of the Trademark Act and rules for each foreign registration upon which the United States application is based, and must specify which goods/services are covered by which foreign registration.

If a §44 applicant amends an application to rely on a different foreign registration after publication, this is not considered a change in basis. However, if the amendment is acceptable, the application must be republished. See [TMEP §1505.03\(a\)](#) regarding post-publication amendments that require republication.

## **1005 Ownership of the Foreign Application or Registration**

### *Section 44 Claimed in Original Application*

If an applicant claims §44 as the filing basis in the original United States application, or if the applicant omits the basis from the original United States application and subsequently claims §44 as the basis, the applicant must be the owner of the foreign application or registration on the filing date of the United States application. See *In re De Luxe, N.V.*, 990 F.2d 607, 26 USPQ2d 1475 (Fed. Cir. 1993); *SARL Corexco v. Webid Consulting Ltd.*, \_\_\_ USPQ2d \_\_\_, Cancellation No. 92056456 (TTAB Mar. 27, 2014); *In re Tong Yang Cement Corp.*, 19 USPQ2d 1689 (TTAB 1991).

Generally, the applicant is not required to submit a copy of the foreign application to receive a priority filing date. See [TMEP §1003](#). However, if other evidence in the record calls into question the applicant's ownership of the foreign application on the filing date of the United States application, the examining attorney must

require the applicant to establish its ownership of the foreign application on the date of filing in the United States. For example, if the United States application includes a priority claim under §44(d), and the applicant then attempts to perfect its §44 filing basis by submitting a foreign registration showing a different owner name from that of the United States applicant, this difference raises a question as to the applicant's ownership of the underlying foreign application. Therefore, the examining attorney must issue a request for information under §2.61(b), requiring the applicant to establish its ownership of the foreign application on the date of filing in the United States, and advise the applicant that if it did not own the foreign application on the filing date of the United States application, the applicant is not entitled to priority and the claim will be deleted. The examining attorney must also refuse registration under §44(e) because the record indicates that the applicant is not the owner of a valid registration in the applicant's country of origin. 15 U.S.C. §1126(c) and (e); [TMEP §1002.01](#). If the applicant provides proof that it was the owner of the foreign application on the date of filing in the United States, the application will retain the priority filing date. However, the applicant must additionally satisfy the requirements for registration under §44(e).

Proof of ownership must show the applicant for registration in the United States as the owner of the foreign application or registration as of the date of filing in the United States and may consist, for example, of a copy of an assignment document, a statement from the agency administering the trademark register in the foreign country establishing that the applicant was the owner of the foreign application or registration as of the United States application filing date, or a printout from the intellectual property office's website. Note that while a website printout may suffice for purposes of establishing ownership, for purposes of proof of the status of a foreign registration, a printout generally is not acceptable. See [TMEP §§1004.01](#), 1004.01(a). If the transfer of ownership took place before the United States application filing date, the §44 basis will be considered valid.

If a §44(d) applicant was not the owner of the foreign application on the United States application filing date, the examining attorney must advise the applicant that it is not entitled to priority, ensure that the priority claim is deleted from the Trademark database, and conduct a new search of the USPTO's records for conflicting marks. [TMEP §1002.02](#).

If a §44(e) applicant was not the owner of the foreign registration on the United States application filing date, the examining attorney must refuse registration under §44(e). The applicant may amend the application to claim §1(a) or §1(b) as a basis. See [TMEP §§806.03–806.03\(i\)](#) regarding amendment of the basis.

#### *Section 44 Added to or Substituted for Valid Section 1 Basis*

If an application is properly filed based on §1(a) or §1(b), and the applicant later amends the application to add or substitute §44 as a basis, the applicant must be the owner of the foreign application or registration as of the filing date of the amendment adding or substituting a §44 claim of priority or basis for registration.

*See SARL Corexco v. Webid Consulting Ltd.*, \_\_\_ USPQ2d \_\_\_, Cancellation No. 92056456 (TTAB Mar. 27, 2014). Note that the applicant may amend to add a claim of priority under §44(d) only within the six-month priority period following the filing date of the foreign application. 37 C.F.R. §2.35(b)(5). See [TMEP §§806.03](#) *et seq.* regarding amendments to change the basis.

If the applicant owned the foreign application or registration on the filing date of the amendment, but did not own the foreign application or registration on the filing date of the United States application, the applicant will retain the original filing date in the United States, as long as there was a continuing valid basis since the application filing date. 37 C.F.R. §2.35(b)(3); [TMEP §806.03\(h\)](#).

If the applicant was not the owner of the foreign application on the filing date of an amendment adding a §44(d) priority date, the examining attorney must advise the applicant that it is not entitled to priority and ensure that the priority claim is not entered in the Trademark database. [TMEP §1002.02](#).

If the applicant was not the owner of the foreign registration on the filing date of the amendment adding or substituting a §44(e) basis, the examining attorney must refuse registration under §44(e). The applicant may amend the application to reassert or claim §1(a) or §1(b) as the basis.

See [TMEP §§806.03–806.03\(i\)](#) regarding amendment of the basis and [TMEP §1006](#) regarding assignment of §44 applications.

## 1006 Assignment of §44 Applications

A §44 applicant may assign the foreign application or registration and/or the United States application from the original applicant to another party.

### *Assignee Must Be Eligible for the Benefits of §44*

In order to continue to claim the benefits of §44 after such an assignment, the assignee of the United States application must be eligible for the benefits of §44. *Karsten Mfg. Corp. v. Editoy*, 79 USPQ2d 1783 (TTAB 2006); *Nestle Co., Inc. v. Grenadier Chocolate Co., Ltd.*, 212 USPQ 214 (TTAB 1981); *In re Fisons Ltd.*, 197 USPQ 888 (TTAB 1978). See [TMEP §1002.01](#) regarding applicants eligible for registration under §44(e), and [TMEP §1002.02](#) regarding applicants eligible for a priority filing date under §44(d).

To be eligible for registration under §44(e), the assignee must establish that the country that issued the relevant registration is the assignee's country of origin. [TMEP §§1002.01](#) and [1002.04](#). See also [TMEP §1004](#) regarding the requirements for registration under §44(e).

To be eligible for a priority filing date under §44(d), any non-United States assignee must establish that the assignee's country of origin is a party to an international treaty or agreement with the United States that provides a right of priority, or extends reciprocal rights of priority to United States nationals. See [TMEP §§1002.02](#), [1002.03](#), and [1002.04](#). See also [TMEP §1003](#).

In an application based solely on §44, if the assignee is not entitled to registration under §44(e), the examining attorney must refuse registration under that basis. The applicant may amend the application to claim §1(a) or §1(b) as a basis. In *Karsten, supra*, the Board held that the assignment of a properly filed §44 application to a party who is not eligible to claim the benefits of §44 does not render the application void, as long as there is a continuing valid basis for registration. See [TMEP §§806.03](#) *et seq.* regarding amendment of the basis.

In a §44(d) application, if the assignee is not eligible for a priority filing date (i.e., a non-United States applicant whose country of origin is not a party to any convention or treaty as outlined in §44(b)), the examining attorney must advise the assignee that it is not entitled to priority, ensure that the priority claim is deleted from the Trademark database, and conduct a new search of USPTO records for conflicting marks. [TMEP §1002.02](#).

### *Assignee Does Not Have To Be the Owner of the Underlying Foreign Application or Registration*

The Trademark Act requires that an applicant own the underlying application or registration at the time of filing in the United States (or as of the filing date of the amendment adding or substituting §44 as a basis, for an application originally based on §1(a) or §1(b), and later amended to add or substitute §44 as a basis). [TMEP §1005](#). However, if the applicant was the owner of the foreign application or registration on the filing date of the United States application (or amendment adding or substituting §44 as a basis), the applicant may assign the United States application to another party without assigning the underlying foreign application or registration to that party. *In re De Luxe N.V.*, 990 F.2d 607, 26 USPQ2d 1475 (Fed. Cir. 1993). Therefore, examining attorneys should not require proof of assignment of the underlying foreign application or registration when an applicant assigns the United States application.

#### *Designation of Domestic Representative Encouraged*

If the United States application is assigned to a party who is not domiciled in the United States, the assignee may file an appointment of a domestic representative with the assignment of the United States application. 15 U.S.C. §1060(b); 37 C.F.R. §3.61. See [TMEP §610](#). The USPTO encourages parties who do not reside in the United States to designate domestic representatives. This can be done through TEAS, at <http://www.uspto.gov>.

### **1007 Standards for Registration Under Section 44**

Although §44 exempts eligible applicants from the use requirements of §1 of the Trademark Act, §44 applicants must meet all other requirements for registration set forth in the Trademark Act and relevant rules. Registration in a foreign country does not automatically ensure eligibility for registration in the United States. *In re Rath*, 402 F.3d 1207, 1214, 74 USPQ2d 1174, 1179 (Fed. Cir. 2005) ("[I]t is impossible to read section 44(e) to require the registration of foreign marks that fail to meet United States requirements for eligibility. Section 44 applications are subject to the section 2 bars to registration..."); *In re Mastic Inc.*, 829 F.2d 1114, 4 USPQ2d 1292 (Fed. Cir. 1987); *In re Etablissements Darty et Fils*, 759 F.2d 15, 225 USPQ 652 (Fed. Cir. 1985); *Order Sons of Italy in America v. Marofa S.A.*, 38 USPQ2d 1602 (TTAB 1996).

The foreign registration that is the basis for the United States application may include disclaimers or may be on a secondary register, equivalent to the Supplemental Register. The United States application will be reviewed according to the standards for registrability in the United States, and the examining attorney will not require a disclaimer, amendment to the Supplemental Register, or any other amendment unless it is required under United States law and USPTO policy.

See [TMEP §1306.08](#) regarding the registration of certification marks under §44.

### **1008 Bona Fide Intention to Use the Mark in Commerce**

Any application filed under §44(d) or §44(e) on either the Principal or the Supplemental Register must include a verified statement that the applicant has a bona fide intention to use the mark in commerce. See [TMEP §1101](#) for additional information about this requirement. If the verified statement is not filed with the initial application, the verified statement must also allege that the applicant has had a bona fide intention to use the mark in commerce as of the application filing date. 37 C.F.R. §§2.34(a)(3)(i) and 2.34(a)(4)(ii).

The allegation of the applicant's bona fide intention to use the mark in commerce is required even if use in commerce is asserted in the application. *In re Paul Wurth, S.A.*, 21 USPQ2d 1631 (Comm'r Pats. 1991).

*See also In re Unisearch Ltd.*, 21 USPQ2d 1559 (Comm'r Pats. 1991) (requirement for verified statement of bona fide intent to use the mark in commerce held not contrary to Paris Convention).

### **1009 Allegation of Use and Specimen of Use Not Required Prior to Registration**

Although §44 applicants must assert a bona fide intention to use the mark in commerce, §44 applicants do not have to allege use or provide specimens or dates of use prior to registration on either the Principal or Supplemental Register in an application based solely on §44. *Crocker National Bank v. Canadian Imperial Bank of Commerce*, 223 USPQ 909 (TTAB 1984). However, if a §44 applicant wishes to assert use in commerce under §1(a) or a bona fide intention to use the mark in commerce under §1(b) as an additional basis, then the applicant must comply with *all* applicable requirements related to the second basis asserted.

If the applicant provides specimens gratuitously in a §44 application, the examining attorney may refer to the specimens to determine issues unrelated to use, such as whether the mark is merely descriptive.

When the §44 application, as submitted, raises questions concerning the registrability of the mark, the examining attorney may request an explanation, information, literature, or other materials to assist in consideration of the application. 37 C.F.R. §2.61(b); [TMEP §814](#).

### **1010 Proof of Acquired Distinctiveness in §44 Applications**

A §44 applicant may assert that a mark has acquired distinctiveness under 15 U.S.C. §1052(f) if the applicant establishes that the mark has become distinctive of its goods or services *in commerce* in the same manner that any other applicant must. For these purposes, the applicant may not rely on use other than use in commerce that may be regulated by the United States Congress, that is, the applicant may not rely on use solely in a foreign country or between two foreign countries. See [TMEP §1212.08](#) and cases cited therein for further information about claims of acquired distinctiveness in §44 applications.

### **1011 Drawings**

Applicants filing under §44 must comply with the drawing requirements of 37 C.F.R. §§2.51 through 2.54. See [TMEP §§807](#) *et seq.* regarding drawings.

#### **1011.01 Substantially Exact Representation of Mark in Foreign Registration**

The drawing of the mark must be “a substantially exact representation of the mark as it appears in the drawing in the registration certificate of a mark duly registered in the country of origin of the applicant.” 37 C.F.R. §2.51(c); [TMEP §807.12\(b\)](#).

The “substantially exact representation” standard is construed narrowly. Only slight, inconsequential variations between the mark in the United States application and the mark shown in the foreign registration are permitted. *In re Hacot-Colombier*, 105 F.3d 616, 618, 41 USPQ2d 1523, 1525 (Fed. Cir. 1997); *In re Larios S.A.*, 35 USPQ2d 1214, 1216 (TTAB 1995); *United Rum Merchants Ltd. v. Distillers Corp. (S.A.) Ltd.*, 9 USPQ2d 1481, 1484 (TTAB 1988). For example, non-material informational matter such as net weight or contents may be deleted. Beyond such limited exceptions, however, any difference between the mark on the drawing and the mark in the foreign registration requires the examining attorney to refuse registration. *In re Hacot-Colombier*, 105 F.3d at 619, 41 USPQ2d at 1525.

The standard for determining whether the mark in the drawing agrees with the mark in the foreign registration is stricter than the standard used to determine whether specimens support use of a mark in an application under §1 of the Trademark Act. In *United Rum Merchants*, the Trademark Trial and Appeal Board reasoned that a stricter standard is appropriate in §44 cases because §44 applications represent an exception to the use requirements of the Act, and that this exception should be construed narrowly to ensure that a foreign applicant cannot obtain a registration in the United States of matter that could not have been registered in the foreign country. 9 USPQ2d at 1483-84.

If the mark in the foreign registration is in standard characters, the mark in the United States application must also be in standard characters. If the foreign registration certificate does not indicate that the mark is in standard characters (or the legal equivalent), the examining attorney must inquire whether the foreign registration includes a claim that the mark is in standard characters. The applicant must either submit an affirmative statement that the foreign registration includes a claim that the mark is in standard characters (or the legal equivalent), or delete the standard character claim in the United States application. See [TMEP §807.03\(f\)](#) for further information. See also Appendix E, which lists countries that register marks in standard characters or the equivalent.

Likewise, if the mark in the foreign registration is in special form, the drawing of the mark in the United States application must appear in the same special form. If the mark in the foreign registration shows color, the applicant must submit a color photocopy of the foreign registration. All claims of color made in the foreign registration must also be made in the United States application. The applicant must also comply with all requirements for a color drawing of the mark. See 37 C.F.R. §2.52(b)(1) and [TMEP §§807.07 et seq.](#) regarding the requirements for claiming color.

If the foreign registration is not issued in color, the examining attorney may require evidence to establish that a colored mark in a United States application is a substantially exact representation of the mark in the foreign registration. For example, the examining attorney may require evidence of the foreign country's procedure for designating color when the foreign registration does not reflect the colors shown on the United States application.

If a §44 application is based on a foreign registration that depicts the mark in color, but no claim of color is made in the registration document, the examining attorney must inquire whether the foreign registration includes a claim of color(s) as a feature of the mark. The applicant must either: (1) submit an affirmative statement that color is claimed as a feature of the mark in the foreign registration; or (2) submit a statement that although the mark is registered in its country of origin featuring a color depiction of the mark, no claim of color is made in that registration. If the examining attorney determines that the color is a non-material element of the drawing, the applicant may be given the option of submitting a black-and-white drawing. See [TMEP §807.07\(b\)](#).

The mark on the drawing in the United States application may not be a translation or transliteration of the mark in the foreign registration.

If the United States application is based on both a foreign registration and use in commerce, the mark on the drawing in the United States application must not only be a substantially exact representation of the

mark in the foreign registration, but also may not differ in a material way from the mark shown on the specimen(s) of record. See [TMEP §§807.12\(b\)](#) and [807.14](#) *et seq.*

### 1011.02 One Mark Per Application

If the foreign application or registration covers a series of distinct marks, the applicant must file separate applications in the United States to register each of the marks the applicant wishes to register in the United States. For example, some countries permit registration of several versions of a mark in a single application. In the United States, separate applications are required. The drawing in the United States application must show only one mark. 37 C.F.R. §2.52; [TMEP §807.01](#).

### 1011.03 Amendment of Drawing

Section 44 applicants often try to amend the mark in the United States application to overcome an objection that the mark in the drawing does not agree with the mark in the foreign registration. Amendments to drawings in §44 applications are governed by 37 C.F.R. §2.72(c). An applicant cannot amend the drawing in the United States application to conform to the mark in the foreign registration if the amendment would result in a material alteration of the mark on the drawing submitted with the original application in the United States. *In re Hacot-Colombier*, 105 F.3d 616, 41 USPQ2d 1523 (Fed. Cir. 1997); *In re Wine Society of America Inc.*, 12 USPQ2d 1139 (TTAB 1989). Thus, when a §44 applicant proposes to amend its drawing, the examining attorney must consider: (1) whether the proposed amendment of the drawing would result in a material alteration of the mark on the original drawing; and (2) whether the proposed amendment would result in a mark that is a substantially exact representation of the mark in the foreign registration. In *In re Larios S.A.*, 35 USPQ2d 1214, 1216 (TTAB 1995), the Trademark Trial and Appeal Board held that the mark “GRAN VINO MALAGA LARIOS” and design on the drawing originally filed with the United States application was not a substantially exact representation of the mark “VINO DE MALAGA LARIOS” with a similar design in the foreign registration; however, the Board found that amendment of the drawing to conform to the foreign registration was *not* a material alteration within the meaning of 37 C.F.R. §2.72. The Board noted that “[t]he material alteration test ... is not quite as rigorous as the substantially exact representation standard and thus allows for a bit more leeway or flexibility with respect to ... amendment of the drawing...” 35 USPQ2d at 1217. See [TMEP §§807.14](#) *et seq.* regarding material alteration.

### 1011.04 Drawings and Descriptions of Three-Dimensional and Non-Visual Marks

If the foreign application or registration depicts several views of a three-dimensional mark, the examining attorney must require the applicant to comply with 37 C.F.R. §2.52(b)(2), and submit an acceptable drawing that depicts a single rendition of the mark. See generally [TMEP §§807](#) *et seq.* regarding drawings. In the alternative, the applicant may petition the Director, pursuant to 37 C.F.R. §2.146(a)(5), to waive the requirement and accept a drawing featuring multiple views of the mark. See TMEP Chapter 1700 regarding petitions to the Director.

In all such cases, the applicant must indicate that the mark is three-dimensional. 37 C.F.R. §2.52(b)(2); [TMEP §807.10](#). If necessary to adequately depict the commercial impression of the mark, the applicant may be required to submit a drawing that shows the placement of the mark by surrounding the mark with a proportionately accurate broken-line representation of the particular goods, packaging, or advertising on which the mark appears. The applicant must also use broken lines to show matter not claimed as part of the mark. For any drawing using broken lines to indicate placement of the mark, or matter not claimed as part of the mark, the applicant must include a written description of the mark and explain the purpose of the

broken lines, e.g., by indicating that the matter shown by the broken lines is not a part of the mark and that it serves only to show the position of the mark. 37 C.F.R. §2.52(b)(4); [TMEP §807.08](#).

With respect to sound, scent, and other non-visual marks, an applicant is not required to submit a drawing, but must submit a detailed description of the mark. [TMEP §807.09](#). If the foreign registration includes a drawing, such as a musical staff depicting the notes of which a sound mark is comprised, the United States application need not include such a drawing. As the drawing of the mark must be a substantially exact representation of the mark in the foreign registration, and the description of the mark defines the mark sought to be registered in a non-visual mark, the description of the mark in the United States application must be substantially comparable to any description of the mark in the foreign application or registration. 37 C.F.R. §§2.51(c) and 2.52(e).

## 1012 Identification of Goods and Services

The identification of goods and services in a §44 application must comply with the same standards that govern other applications.

If the United States application is based on §44, the identification of goods and services covered by the §44 basis may not exceed the scope of the goods and services identified in the foreign registration. 37 C.F.R. §2.32(a)(6). See *Marmark Ltd. v. Nutrexp S.A.*, 12 USPQ2d 1843 (TTAB 1989); *In re Löwenbräu München*, 175 USPQ 178 (TTAB 1972).

See [TMEP §1402.01\(b\)](#) for more information about the identification of goods or services in a §44 application.

## 1013 Designation of Domestic Representative by Applicants Not Domiciled in the United States

An applicant not domiciled in the United States may file a document designating the name and address of a person residing in the United States upon whom notices or process in proceedings affecting the mark may be served. 15 U.S.C. §1051(e); 37 C.F.R. §2.24; [TMEP §610](#). The USPTO encourages parties who do not reside in the United States to designate domestic representatives. This can be done through TEAS, at <http://www.uspto.gov>.

## 1014 Section 44 Applications for the Supplemental Register

A §44 applicant may apply to register a mark on the Supplemental Register, and a §44 applicant may amend an application from the Principal Register to the Supplemental Register without filing any allegation of use.

It is not necessary to change the application filing date after an amendment to the Supplemental Register in a §44 application. See [TMEP §1008](#) regarding the requirement for an allegation of the applicant's bona fide intention to use the mark in commerce in a §44 application.

## 1015 Section 44 Registration Independent of Underlying Foreign Registration

Once issued, the United States registration issuing from a §44 application exists independent of the underlying foreign registration and is subject to all provisions of the Trademark Act that apply to all other registrations, such as affidavits of use, renewals, amendments under 15 U.S.C. §1057(e), assignments, and similar matters.

15 U.S.C. §1126(f). See *Imperial Tobacco Ltd. v. Philip Morris, Inc.*, 899 F.2d 1575, 14 USPQ2d 1390 (Fed. Cir. 1990); *Exxon Corp. v. Oxon Italia S.p.A.*, 219 USPQ 907 (TTAB 1982); *Reynolds Televator*

*Corp. v. Pfeffer*, 173 USPQ 437 (TTAB 1972); *Sinclair v. Deb Chemical Proprietaries Ltd.*, 137 USPQ 161 (TTAB 1963).

### 1016 International Registration As Basis for §44 Application

An international registration issued by the International Bureau of the World Intellectual Property Organization (“IB”) can be the basis for a §44(e) application only if the international registration shows that there is an extension of protection of the international registration to applicant’s country of origin. See TMEP Chapter 1900 regarding international registration. A *request* for an extension of protection of the international registration to applicant’s country of origin is not sufficient.

An applicant should submit a copy of the registration (or certificate of extension of protection) issued by the national trademark office in the applicant’s country of origin. 15 U.S.C. §1126(e); 37 C.F.R. §2.34(a)(3)(ii). If the applicant’s country of origin does not issue registrations or certificates of extension of protection, the applicant may submit a copy of the international registration, showing that protection of the international registration has been extended to applicant’s country of origin. A copy of a request for an extension of protection of the international registration to applicant’s country of origin is not sufficient.

If the applicant is not domiciled or incorporated in the relevant country, examining attorney must require the applicant to establish that the country is its country of origin. See [TMEP §1002.04](#).

The applicant must meet all the requirements of the Trademark Act and the Trademark Rules of Practice for §44(e) applications. The requirements for §66(a) applications are not applicable.

The identification of goods/services covered by the §44(e) basis may not exceed the scope of the goods/services identified in the registered extension of protection in the applicant’s country of origin. 37 C.F.R. §2.32(a)(6); [TMEP §1012](#).

An extension of protection of an international registration cannot be the basis for a §44(d) application, because neither the international application nor the request for extension of protection is the first application filed in a treaty country for the same mark for the same goods or services. 15 U.S.C. §1126(d); 37 C.F.R. §§2.34(a)(4)(i)(A) and (B); [TMEP §1003.01](#). The basic application or basic registration upon which the international registration is based was the first-filed application.

If an applicant wants to base a §44(e) application on the basic registration that was the basis for the international registration, the applicant must submit a copy of the basic registration issued by the Office of Origin, i.e., the country or intergovernmental organization who issued the registration which provided the basis for the international registration (see [TMEP §1901](#) regarding the Office of Origin). The applicant cannot submit the international registration, because an international registration does not provide protection in the territory of the Contracting Party whose office is the Office of Origin. Madrid Protocol Article 3 *bis*.

# Chapter 1100 Intent-to-Use Applications and Requests to Divide

---

<b>1101</b>	<b>Bona Fide Intention To Use the Mark In Commerce</b>

1110.11(a)	Dividing a §66(a) Application After Change of Ownership with Respect to Some but Not All of the Goods/Services
1110.12	Division of Registrations

## 1101 Bona Fide Intention To Use the Mark In Commerce

Section 1(b) of the Trademark Act, 15 U.S.C. §1051(b), provides that an applicant may file an application based on a bona fide intention to use a mark in commerce “under circumstances showing the good faith of such person.”

A verified statement of the applicant’s bona fide intention to use the mark in commerce must be included in intent-to-use (“ITU”) applications under §1(b), and in applications under §§44 and 66(a). 15 U.S.C. §§1051(b)(3)(B), 1126(d)(2), 1126(e), and 1141f(a). See [TMEP §§804.02](#) and [1008](#) regarding the requirements for a verified statement in §§1(b) and 44 applications, and [§1904.01\(c\)](#) regarding the requirement for a declaration of the applicant’s bona fide intention to use the mark in commerce in a §66(a) application.

If the verification is not filed with the initial application, the verified statement must also allege that the applicant has had a bona fide intention to use the mark in commerce since the filing date of the application. 37 C.F.R. §§2.34(a)(2), 2.34(a)(3)(i) and 2.34(a)(4)(ii). See [TMEP §§804–804.05](#) regarding verifications.

A verified statement of the applicant’s continued bona fide intention to use the mark in commerce must also be included in a request for an extension of time to file a statement of use. 15 U.S.C. §1051(d)(2); 37 C.F.R. §§2.89(a)(3), (b)(3); [TMEP §§1108.02](#) and [1108.02\(e\)](#).

Reasonable variations in the wording of the statement may be acceptable. For example, the applicant may state that it has “a bona fide intention to use in commerce the mark on or in connection with . . .,” or may use the words “good faith” instead of “bona fide.” *In re B.E.L.-Tronics Ltd.*, 24 USPQ2d 1397, 1400 (Comm’r Pats. 1992). However, the wording “in commerce” is required and cannot be varied. *In re Custom Techs Inc.*, 24 USPQ2d 1712 (Comm’r Pats. 1991); *In re B.E.L.-Tronics*, 24 USPQ2d at 1400

See [TMEP §1201.03\(a\)](#) regarding an assertion by an intent-to-use applicant of a bona fide intention to use the mark in commerce through a related company.

See [TMEP §1008](#) regarding the requirement for an allegation of a bona fide intention to use the mark in commerce in an application filed under §44 of the Trademark Act.

The USPTO will *not* evaluate the good faith of an applicant in the ex parte examination of applications. Generally, the applicant's sworn statement of a bona fide intention to use the mark in commerce will be sufficient evidence of good faith in the ex parte context. Consideration of issues related to good faith may arise in an inter partes proceeding, but the USPTO will not make an inquiry in an ex parte proceeding unless evidence of record clearly indicates that the applicant does not have a bona fide intention to use the mark in commerce.

## 1102 Initial Examination of Intent-to-Use Applications

In an intent-to-use application, the examining attorney will potentially examine the application twice: first, when it is initially filed based on a bona fide intention to use the mark in commerce under 15 U.S.C. §1051(b), and second, when the applicant files an allegation of use (i.e., either an amendment to allege use under 15 U.S.C. §1051(c) or a statement of use under 15 U.S.C. §1051(d)). See [TMEP §§1104–1104.11](#) regarding amendments to allege use, and [TMEP §§1109–1109.18](#) regarding statements of use. After receipt of the application, the examining attorney will initially examine the application to determine whether the mark is eligible for registration but for the lack of evidence of use. If the mark is determined to be eligible, the mark will be approved for publication and then published for opposition. If the applicant has not submitted an amendment to allege use before approval for publication, and the application is not successfully opposed, the USPTO will issue a notice of allowance. 15 U.S.C. §1063(b)(2); 37 C.F.R. §2.81(b). See [TMEP §§1106–1106.04](#) regarding notice of allowance. In such a case, the applicant must submit a statement of use. 15 U.S.C. §1051(d)(1); 37 C.F.R. §2.88.

An intent-to-use application is subject to the same requirements and examination procedures as other applications, except as specifically noted. The examining attorney must raise all possible refusals and requirements in initial examination.

### 1102.01 Substantive Refusals

To the fullest extent possible, the examining attorney will examine an intent-to-use application for registrability under Trademark Act §§1, 2(a), 2(b), 2(c), 2(d), and 2(e), 15 U.S.C. §§1051 and 1052(a), (b), (c), (d), and (e), according to the same procedures and standards that apply to any other application. That is, the examining attorney must make all appropriate refusals and/or requirements with respect to issues such as ownership, deceptiveness, likelihood of confusion, mere descriptiveness, geographic significance, and surname significance. *In re Bacardi & Co. Ltd.*, 48 USPQ2d 1031, 1035 (TTAB 1997); *In re Am. Psychological Ass'n*, 39 USPQ2d 1467, 1469 (Comm'r Pats. 1996).

The examining attorney should not issue a requirement or refusal under these sections during examination of the statement of use if the issue could or should have been raised during initial examination, unless the failure to issue the refusal or requirement would be a clear error. See [TMEP §§706.01, 1109.08](#).

Where a significant length of time has elapsed since the initial examination, a mark may have become descriptive or even generic as applied to the goods/services. In such a case, since the evidence of the descriptive or generic use would not have been available during initial examination, the requirement or refusal must be issued during second examination.

The examining attorney should investigate all possible issues regarding registrability through all available sources. If appropriate, the examining attorney may require that the applicant provide literature or an explanation concerning the intended manner of use of the mark, or the meaning of the mark in relation to

the goods/services, under 37 C.F.R. §2.61(b). See [TMEP §814](#); *In re DTI P'ship LLP*, 67 USPQ2d 1699, 1701 (TTAB 2003); *In re Page*, 51 USPQ2d 1660, 1665 (TTAB 1999).

The examining attorney should also search applicant's website to see if it provides information about the goods/services. See [TMEP §710.01\(b\)](#); *In re Promo Ink*, 78 USPQ2d 1301, 1303 (TTAB 2006) (rejecting applicant's argument that it was improper for the examining attorney to rely on evidence obtained from applicant's website when the application was based on intent to use and no specimens were yet required, and stating that "[t]he fact that applicant has filed an intent-to-use application does not limit the examining attorney's evidentiary options, nor does it shield an applicant from producing evidence that it may have in its possession.").

While the examining attorney must examine and act on all possible issues in the initial examination of the application, requirements or refusals specifically tied to use of the mark (e.g., ornamentation) should generally be addressed after the applicant submits an allegation of use *and* a specimen showing use of the mark in commerce. See [TMEP §§1202–1202.17\(e\)\(vi\)](#) regarding use as a mark. However, an examining attorney may review a §1(b) application for which no allegation of use and specimen have been submitted, and believe it likely that a refusal of registration on the ground that the subject matter does not function as a mark may be made after an allegation of use is submitted. In that instance, this potential refusal should be brought to the applicant's attention in the first action issued by the USPTO. This is done strictly as a courtesy. If information regarding this possible ground for refusal is not provided to the applicant before the allegation of use is filed, the USPTO is not precluded from later refusing registration on this basis.

## 1102.02 Drawings

The examination of the drawing during initial examination, before submission of an allegation of use and specimen, will focus primarily on the form of the drawing and compliance with 37 C.F.R. §§2.52, 2.53, and 2.54. Intent-to-use applicants must comply with all formal requirements related to drawings, whether in standard characters or in special form. See [TMEP §§807–807.18](#). See [TMEP §1104.10\(b\)\(vi\)](#) regarding examination of the drawing after submission of an amendment to allege use, and [TMEP §1109.12](#) regarding examination of the drawing after submission of a statement of use. The applicant may not amend the mark in a drawing if the amendment constitutes a material alteration of the mark. 37 C.F.R. §2.72(b)(2).

## 1102.03 Intent-to-Use Applications and the Supplemental Register

A mark in an intent-to-use application under 15 U.S.C. §1051(b) is not eligible for registration on the Supplemental Register until the applicant has submitted an acceptable allegation of use (i.e., either an amendment to allege use that meets the requirements of 37 C.F.R. §§2.76(b) and (c), or a statement of use that meets the requirements of 37 C.F.R. §§2.88(b) and (c)). 37 C.F.R. §§2.47(d), 2.75(b).

If an intent-to-use applicant requests registration on the Supplemental Register before filing an acceptable allegation of use, the examining attorney will refuse registration under §23 of the Trademark Act, 15 U.S.C. §1091, on the ground that the mark is not in lawful use in commerce. See 37 C.F.R. §2.75(b); [TMEP §714.05\(a\)\(i\)](#). If an application is based on intent-to-use in addition to another basis, registration of the entire application will be refused on the Supplemental Register unless the applicant either deletes the §1(b) basis or files a request to divide. See [TMEP §§1110–1110.12](#) regarding requests to divide. The examining attorney will withdraw the refusal if the applicant submits an acceptable allegation of use.

If an application is based solely on §1(b), and the applicant files an acceptable amendment to allege use or statement of use *and* an acceptable amendment to the Supplemental Register, the USPTO will consider the

filing date of the amendment to allege use or statement of use to be the effective filing date of the application. 37 C.F.R. §2.75(b); [TMEP §206.01](#). The filing date of an amendment to allege use is the date on which the applicant meets the minimum filing requirements of 37 C.F.R. §2.76(e), and the filing date of a statement of use is the date on which the applicant meets the minimum filing requirements of 37 C.F.R. §2.88(e). Due to the change in the effective filing date, the examining attorney must conduct a new search of USPTO records for conflicting marks. In this situation, the USPTO does not alter the original filing date in its automated records. [TMEP §206](#). If the new search shows that a later-filed conflicting application now has an earlier filing date (based on the change in the effective filing date of the subject application), the examining attorney must suspend action on the subject application pending disposition of the other application, if the application is otherwise in condition for suspension. See [TMEP §§1208–1208.03\(c\)](#) regarding the procedures for handling conflicting marks in pending applications.

Amendment of an application from the Supplemental to the Principal Register does not change the effective filing date of an application. *Kraft Grp. LLC v. Harpole*, 90 USPQ2d 1837, 1840 (TTAB 2009) (stating the filing date did not change when applicant, who originally sought registration on the Supplemental Register without alleging use in commerce, amended to seek registration on the Principal Register under §1(b), because use in commerce is not required for receipt of a filing date on the Supplemental Register).

When the applicant files an allegation of use that complies with the minimum requirements of 37 C.F.R. §2.76(e) together with an amendment to the Supplemental Register, the examining attorney must follow the procedures outlined in [TMEP §714.05\(a\)\(i\)](#).

See [TMEP §§815–816.05](#) for additional information about the Supplemental Register.

## 1102.04 Claims of Acquired Distinctiveness under §2(f)

See [TMEP §§1212.09–1212.09\(b\)](#) regarding claims of distinctiveness under §2(f), 15 U.S.C. §1052(f), in intent-to-use applications.

## 1103 Allegations of Use

While §1(b) of the Trademark Act provides for *filing* an application based on the applicant's bona fide intent to use the mark in commerce, registration cannot be granted until the applicant files an allegation of use. The allegation of use must include verified dates of first use ( *see* [TMEP §§903–903.08](#)), and a specimen of use for each class of goods/services ( *see* [TMEP §§904–904.07\(b\)](#), [1301.04–1301.04\(d\)](#)).

An allegation of use may be filed as either an amendment to allege use or a statement of use. The principal difference between the amendment to allege use and the statement of use is the *time* of filing. The amendment to allege use may be filed after the application filing date but before approval of the mark for publication. 37 C.F.R. §2.76(a); [TMEP §1104.03](#). If the applicant does not file an acceptable amendment to allege use during initial examination, or if an amendment to allege use is filed and withdrawn, and the USPTO issues a notice of allowance under 15 U.S.C. §1063(b)(2) ( *see* [TMEP §§1106–1106.04](#)), the applicant must file a statement of use within six months of the issuance date of the notice of allowance, or within an extension of time granted for filing of the statement of use. 15 U.S.C. §1051(d); 37 C.F.R. §2.88(a). See [TMEP §§1109–1109.18](#) regarding statements of use.

The applicant may *not* file the allegation of use during the period after approval of the mark for publication and before issuance of the notice of allowance. 37 C.F.R. §§2.76(a), 2.88(a); [TMEP §1104.03](#). This period is known as the “blackout period.” See [TMEP §1104.03\(b\)](#).

See [TMEP §§1104.02](#) and [1109.05](#) regarding the form for filing allegations of use.

## **1104 Amendment to Allege Use Under §1(c) of the Act**

As previously stated, an intent-to-use applicant under 15 U.S.C. §1051(b) must file either an amendment to allege use under 15 U.S.C. §1051(c) or a statement of use under 15 U.S.C. §1051(d) before issuance of the registration. This section pertains only to amendments to allege use. Statements of use are discussed in [TMEP §§1109-1109.18](#).

An amendment to allege use is treated as a non-responsive filing. Therefore, filing an amendment to allege use does not relieve the applicant of the duty to file a response to an outstanding Office action or to take any other action required in the case, including filing a notice of appeal to the Board or a petition to the Director. See 37 C.F.R. §2.64(c)(1). See [TMEP §1104.07](#) regarding the filing of an amendment to allege use in conjunction with an appeal. Therefore, the applicant must file a separate response to any outstanding Office action. Failure to respond to an outstanding Office action will result in abandonment of the application. See [TMEP §718.06](#) regarding notice of abandonment for failure to respond.

### **1104.01 Minimum Filing Requirements for an Amendment to Allege Use**

The amendment to allege use must include the following minimum elements before it will be referred to the examining attorney for examination on the merits:

- (1) the prescribed fee for at least one class;
- (2) one specimen or facsimile of the mark as used in commerce; and
- (3) a verification or declaration signed by the applicant or a person properly authorized to sign on behalf of the applicant that the mark is in use in commerce.

37 C.F.R. §2.76(e).

An amendment to allege use that omits the allegation of use in commerce, but asserts a verified date of first use in commerce, may be accepted as substantially in compliance with the minimum filing requirement of 37 C.F.R. §2.76(e)(3) for a verified statement that the mark is in use in commerce. Cf. *In re Carnicon Dev. Co.*, 34 USPQ2d 1541, 1543 (Comm’r Pats. 1992) (holding that the petitioner’s verified date of first use in commerce and the statement that the mark was used in advertising combined to substantially comply with the “the mark is in use in commerce” requirement for purposes of filing a statement of use); *In re Conservation Tech. Inc.*, 25 USPQ2d 1079, 1080 (Comm’r Pats. 1992) (finding, for purposes of the requirement that the statement of use state that “the mark is in use in commerce,” the wording “in use in commerce at least since” satisfied the requirement based on the term “since,” defined as “from a definite past time until now”). The examining attorney will require an allegation that the “mark is in use in commerce” during examination.

See [TMEP §1104.08](#) regarding the requirements for a complete amendment to allege use.

### **1104.01(a) Review by Legal Instruments Examiner for Compliance with Minimum Filing Requirements**

A legal instruments examiner (“LIE”) will conduct a preliminary review of an amendment to allege use to determine whether it is timely and complies with the minimum requirements of 37 C.F.R. §2.76(e). If so, the LIE will refer the amendment to allege use to the examining attorney for examination on the merits.

With respect to the requirement that the amendment to allege use include a verification or declaration signed by the applicant, or a person properly authorized to sign on behalf of the applicant, that the mark is in use in commerce, the LIE will review the document only to determine whether it bears a signed verification stating that the mark is in use in commerce. The examining attorney will determine whether the amendment to allege use was filed by the owner. See [TMEP §1104.10\(b\)\(i\)](#).

See [TMEP §1104.01\(b\)](#) regarding processing an amendment to allege use that does not meet minimum filing requirements, and [TMEP §1104.03\(c\)](#) regarding processing an untimely amendment to allege use.

### **1104.01(b) Processing an Amendment to Allege Use that Does Not Meet Minimum Filing Requirements**

If an amendment to allege use is timely, but does not comply with the minimum filing requirements of 37 C.F.R. §2.76(e) ( see [TMEP §1104.01](#)), the LIE will advise the applicant in writing of the deficiency. The applicant may correct the deficiency, provided the applicant does so before the mark is approved for publication. 37 C.F.R. §2.76(g). If an acceptable amendment to correct the deficiency is not filed before the mark is approved for publication, the amendment to allege use will not be referred to the examining attorney and will not be examined on the merits. *Id.*

If the filing fee for at least a single class is omitted or is deficient (e.g., if the fee is charged to a deposit account with insufficient funds, an electronic funds transfer (“EFT”) or credit card payment is refused or charged back by a financial institution, or a check is returned unpaid), the LIE will advise the applicant that the applicant must repay the fee before the mark is approved for publication, or the amendment to allege use will not be examined. In addition, when an EFT or credit card is refused or a check is returned unpaid, the applicant must pay the processing fee required by 37 C.F.R. §2.6(b)(12). This processing fee must be paid even if the applicant withdraws the amendment to allege use. See [TMEP §405.06](#) regarding payments that are refused.

If the amendment to allege use does not include a specimen, the LIE will advise the applicant that the applicant must submit a specimen, supported by an affidavit or declaration under 37 C.F.R. §2.20 stating that the specimen is in use in commerce on or in connection with the goods/services, before the mark is approved for publication, or the USPTO will not examine the amendment to allege use.

If the amendment to allege use is not signed, the LIE will notify the applicant of the deficiency and advise that the applicant must submit a properly signed amendment to allege use before the mark is approved for publication, or the USPTO will not examine the amendment to allege use.

An amendment to allege use that does not meet the minimum filing requirements will remain in the record. If the applicant does not correct all deficiencies before approval of the mark for publication, the examining attorney will not examine the amendment to allege use. In such a case, if the applicant has submitted the

fee, the fee will not be refunded and cannot be applied to a later-filed statement of use. If the mark is published for opposition and a notice of allowance issues, the applicant must file a statement of use or request for extension of time to file a statement of use within six months of the date of issuance to avoid abandonment of the application.

If the applicant wishes to establish that the amendment to allege use as filed met the minimum requirements of 37 C.F.R. §2.76(e), the applicant must file a petition under 37 C.F.R. §2.146. In addition to the petition fee (37 C.F.R. §2.6(a)(15)), the petition should include a copy of the amendment to allege use and specimen, and any evidence establishing that the amendment to allege use as filed met the minimum filing requirements.

See [Chapter 1700](#) for additional information about petitions. If the petition is granted, the amendment to allege use will be considered filed on the date it was originally received in the USPTO.

See [TMEP §1104.03\(c\)](#) regarding processing an untimely amendment to allege use.

### **1104.01(c) Processing Defective Amendment to Allege Use Filed with Other Amendments**

After the LIE has taken appropriate action on a defective amendment to allege use ( *see* [TMEP §1104.01\(b\)](#)), the LIE will process any other amendments filed with the amendment to allege use and refer the application to the assigned examining attorney for appropriate action on those other amendments.

If the amendment to allege use did not meet the minimum filing requirements of 37 C.F.R. §2.76(e), the examining attorney will act on any other amendments in the application without considering the amendment to allege use. The examining attorney should issue requirements or refusals according to standard examination procedure without considering the amendment to allege use. Any specimen submitted becomes part of the record and may be relied on in relation to issues other than use.

If the examining attorney determines that the LIE erred in holding that the amendment to allege use did not meet the minimum filing requirements of 37 C.F.R. §2.76(e), the examining attorney should advise the applicant by telephone or e-mail that the amendment to allege use will be examined on the merits and to disregard the LIE's action, and should enter an appropriate Note to the File in the record.

### **1104.02 Form of Amendment to Allege Use**

To expedite processing, the USPTO recommends that an applicant file an amendment to allege use through the Trademark Electronic Application System (“TEAS”), available at <http://www.uspto.gov>. Alternatively, the owner may call the Trademark Assistance Center at (571) 272-9250 or (800) 786-9199 to obtain a pre-printed paper form (“Trademark/Service Mark Allegation of Use”) that may be used to file either a statement of use or an amendment to allege use. The applicant may mail, fax, or hand-deliver the completed form to the USPTO. If the form is faxed, it must be accompanied by an authorization to charge the filing fee to a credit card or deposit account. The credit card authorization form is available at <http://www.uspto.gov/web/forms/2038.pdf>. If the amendment to allege use is filed through TEAS, payment must be made by credit card, deposit account, or EFT. Paper forms may be delivered by hand or courier to the Trademark Assistance Center (“TAC”), at James Madison Building, East Wing, Concourse Level, 600 Dulany Street, Alexandria, Virginia. TAC is open 8:30 a.m. to 5:00 p.m., Eastern Time, Monday through Friday, except on Federal holidays within the District of Columbia.

If the applicant does not file the amendment to allege use electronically or use the pre-printed paper form designed by the USPTO, the applicant should submit the amendment to allege use in a document separate from other amendments, with the caption “Allegation of Use” appearing at the top of the first page of the

document. 37 C.F.R. §2.76(d). However, this format is not mandatory. The USPTO will accept and enter any document that includes an amendment to allege use, if it meets the minimum filing requirements set forth in 37 C.F.R. §2.76(e), regardless of whether it is properly titled or includes other amendments.

See [TMEP §1104.01](#) regarding the minimum filing requirements that must be met before an amendment to allege use can be referred to an examining attorney for examination, and [TMEP §1104.08](#) regarding the requirements for a complete amendment to allege use.

### **1104.03 Time for Filing Amendment to Allege Use**

An applicant may file an amendment to allege use at any time between the application filing date and the date the examining attorney approves the mark for publication. 37 C.F.R. §2.76(a).

An amendment to allege use may be filed after commencement of an ex parte appeal. See [TMEP §1104.07](#).

An applicant may not file either an amendment to allege use or a statement of use between the date the examining attorney approves the mark for publication and the date of issuance of the notice of allowance. This period, during which no allegation of use may be filed, is known as the “blackout period.” See [TMEP §1104.03\(b\)](#).

#### **1104.03(a) Use on All Goods/Services Required Before Filing**

An applicant may not file an amendment to allege use until the applicant has used the mark in commerce on or in connection with *all* goods/services for which the applicant seeks registration under §1(b), unless the applicant files a request to divide. 37 C.F.R. §2.76(c). If the applicant files an amendment to allege use before using the mark on or in connection with all the goods/services, but does not file a request to divide, the examining attorney will require the applicant to: (1) withdraw the amendment to allege use ( see [TMEP §1104.11](#)); (2) delete from the application the goods/services not covered by the amendment to allege use ( see [TMEP §1104.10\(b\)\(iii\)](#)); or (3) file a request to divide out the goods/services that are not yet in use ( see [TMEP §§1110–1110.12](#)).

#### **1104.03(b) The “Blackout Period”**

Under 37 C.F.R. §2.76(a), an applicant may not file an amendment to allege use pursuant to 15 U.S.C. §1051(c) after the date that the application is approved for publication by the examining attorney. Under 37 C.F.R. §2.88(a), an applicant may not file a statement of use pursuant to 15 U.S.C. §1051(d) before the date of issuance of the notice of allowance. These two rules combine to create a period of time when neither an amendment to allege use nor a statement of use may be filed. This period is known as the “blackout period.” Any statement of use or amendment to allege use filed during this period will be deemed untimely and the fee refunded. *In re Sovran Fin. Corp.*, 25 USPQ2d 1537 (Comm’r Pats. 1991). See [TMEP §1104.03\(c\)](#) regarding processing amendments to allege use filed during the blackout period.

Intent-to-use applicants under 15 U.S.C. §1051(b) are encouraged to check the TSDR database on the USPTO website at <http://tsdr.uspto.gov/> to determine the status of the application before filing an amendment to allege use.

If a review of the prosecution history of the application shows that the application has been approved for publication and a notice of allowance has not issued or was cancelled, the blackout period is in effect and an amendment to allege use may not be filed.

### **1104.03(c) Processing Amendment to Allege Use Filed During the Blackout Period**

If an applicant files an amendment to allege use during the blackout period, the USPTO will notify the applicant that the amendment to allege use is untimely and will not be processed, and refund the filing fee. See 37 C.F.R. §2.76(a).

The examining attorney must not cancel an approval of or withdraw an application from publication to process an untimely amendment to allege use. Furthermore, the examining attorney must not suspend an application or take any other similar action to extend the time for filing an amendment to allege use.

The USPTO will not retain an untimely amendment to allege use and process it as a statement of use. However, the applicant may resubmit an untimely amendment to allege use as a statement of use after the notice of allowance issues.

### **1104.04 Processing Timely Amendment to Allege Use Located After Publication**

If an amendment to allege use is timely ( *see* [TMEP §1104.03](#)) and complies with the minimum filing requirements so that it may be examined on the merits ( *see* [TMEP §1104.01](#)), but the mark was published for opposition before the amendment to allege use was examined, the USPTO will proceed as follows.

The examining attorney will contact the applicant or the applicant's attorney by telephone or e-mail, and give the applicant the opportunity to withdraw the amendment to allege use. The examining attorney should advise the applicant that the application will be withdrawn from publication if the amendment to allege use is not withdrawn. See 37 C.F.R. §2.76(h) and [TMEP §1104.11](#) regarding withdrawal of amendment to allege use.

#### *Amendment to Allege Use Withdrawn*

If the applicant withdraws the amendment to allege use, the examining attorney should advise applicant that a notice of allowance will issue if the application is not successfully opposed, and that the applicant must file a statement of use, or request for an extension of time to file a statement of use, within six months after the issuance of the notice of allowance. The examining attorney should advise applicant that, instead of filing a statement of use, the applicant may file a written request that the USPTO treat the amendment to allege use as a statement of use. Such a request *must be filed within six months after the issuance of the notice of allowance*, and should be faxed to the ITU/Divisional Unit at (571) 273-9550. The examining attorney should enter a Note to the File in the record reflecting the substance of the communication with the applicant. The filing date of the statement of use will be the date of receipt of the applicant's written request to treat the amendment to allege use as a statement of use.

The applicant has the option of receiving a refund of the filing fee for the amendment to allege use, or applying the fee toward the statement of use. If the applicant requests a refund, the examining attorney should ask an LIE to arrange for the refund.

Because §1(d)(1) of the Trademark Act, 15 U.S.C. §1051(d)(1), explicitly requires that a statement of use be filed within six months *after* the issuance date of the notice of allowance, the USPTO cannot process

the amendment to allege use as a statement of use unless the applicant files a written request within six months after the issuance date of the notice of allowance. If the applicant does not file a statement of use, a request for an extension of time to file a statement of use, or a written request to treat the amendment to allege use as a statement of use within six months after the issuance of the notice of allowance, the application will be abandoned, even if the amendment to allege use is still in the record and the filing fee for the amendment to allege use has not been refunded.

#### *Amendment to Allege Use Not Withdrawn*

If the applicant does not withdraw the amendment to allege use, and no notice of allowance has issued, the examining attorney must withdraw the application from publication. If the notice of allowance has issued, the examining attorney must ask the ITU/Divisional Unit to cancel the notice of allowance. The examining attorney should enter an appropriate Note to the File in the record, and then examine the amendment to allege use. If the amendment to allege use can be approved, and does not raise any issues that require the examining attorney to issue an Office action requiring a response, the examining attorney should approve the amendment to allege use. The mark must then be republished.

If examination of the amendment to allege use raises issues that would require the examining attorney to issue requirements or refusals in an Office action, the examining attorney should request jurisdiction for the purpose of issuing the relevant requirements or refusals. See [TMEP §1504.04\(a\)](#). The proposed Office action setting forth the relevant requirements or refusals must accompany the request for jurisdiction. If the applicant ultimately complies with all requirements and overcomes all refusals, the amendment to allege use will be approved. The mark must then be republished.

#### *Applications that are the Subject of an Opposition*

If a notice of opposition has been filed when a timely amendment to allege use is associated with the application, the Board will usually suspend the opposition proceeding and remand the application to the examining attorney for examination of the amendment to allege use. The examining attorney should follow the procedures explained above, except that no request for jurisdiction is necessary. Once the amendment to allege use is ultimately approved or withdrawn, the application should be referred back to the Board for appropriate action. [Trademark Trial and Appeal Board Manual of Procedure](#) (“TBMP”) §219.

#### *Applications that are the Subject of an Extension of Time to Oppose*

If the application is under an extension of time to file an opposition when the amendment to allege use is associated with the application, the potential opposer must continue to file further request(s) for extension(s) of time to oppose, or file a notice of opposition, if it wishes to preserve its right to oppose if the amendment to allege use is withdrawn by the applicant or approved by the examining attorney. TBMP §219. The Board will not suspend the potential opposer’s time to file a notice of opposition. See notice at 68 Fed. Reg. 55748, 55760 (Sept. 26, 2003).

### **1104.05 Amendment to Allege Use Filed in Conjunction with Application**

If an applicant files an intent-to-use application under 15 U.S.C. §1051(b), and, at the same time, files an amendment to allege use asserting dates of use before the filing date of the application, the applicant will

be required to comply with all requirements related to the amendment to allege use, including the payment of the required fees for all classes.

### **1104.06 Processing Amendment to Allege Use Received Before Application Is Assigned to an Examining Attorney**

If an amendment to allege use is received before an application has been assigned to an examining attorney, the LIE will review the amendment to allege use to determine whether it complies with the minimum filing requirements of 37 C.F.R. §2.76(e) and will take appropriate action. See [TMEP §§1104.01–1104.01\(c\)](#).

If the amendment to allege use complies with the minimum filing requirements, it will be placed in the record and examined on the merits when the application is assigned to an examining attorney. If it does not, the LIE will advise the applicant in writing of the deficiency and advise the applicant that it must correct the deficiency before the mark is approved for publication, or the amendment to allege use will not be examined on the merits. See 37 C.F.R. §2.76(g).

### **1104.07 Amendments to Allege Use and Ex Parte Appeals**

An amendment to allege use may be filed together with a notice of appeal to the Trademark Trial and Appeal Board, or it may be filed while an appeal is pending.

Once the appeal is filed, the Board has jurisdiction over the application. If the applicant files the amendment to allege use *with* the notice of appeal, the Board will institute the appeal, suspend action on the appeal, and remand the case to the examining attorney to examine the amendment to allege use. When the applicant files the amendment to allege use *after* commencement of the appeal, the Board may, in its discretion, suspend action on the appeal and remand the application to the examining attorney for consideration of the amendment to allege use, or it may continue action on the appeal, thus deferring examination of the amendment to allege use until after disposition of the appeal.

If the Board remands the application, the examining attorney should continue examination according to standard examining procedures until final resolution of any new issues that arise in the examination of the amendment to allege use. If all issues are resolved or made the subject of a final action, the examining attorney should refer the application back to the Board for resumption of the appeal. TBMP §1206.01.

If the examining attorney withdraws the refusal or requirement that is the subject of the appeal, he or she should advise the applicant or the applicant's attorney by telephone or e-mail, and enter an appropriate Note to the File in the record.

### **1104.08 Requirements for a Complete Amendment to Allege Use**

The requirements for a *complete* amendment to allege use are:

- (1) a verified statement that the applicant is believed to be the owner of the mark and that the mark is in use in commerce, specifying the dates of the applicant's first use of the mark anywhere and first use of the mark in commerce, and setting forth or incorporating by reference those goods/services specified in the application on or in connection with which the mark is in use in commerce;
- (2) one specimen or facsimile per class of the mark as used in commerce that meets the requirements of 37 C.F.R. §2.56; and
- (3) the prescribed fee for each class ( see 37 C.F.R. §2.6(a)).

37 C.F.R. §2.76(b).

### **1104.09 Acceptance of Amendment to Allege Use that Meets Minimum Filing Requirements by Examining Attorney**

At the outset, the examining attorney must accept the submission of the amendment to allege use if it is timely filed and meets the minimum filing requirements, unless USPTO records show title in a party other than the party filing the amendment to allege use or the applicant specifies an intention to retain goods/services not yet in use and does not file a request to divide. *See* TMEP §§ [1104.01](#), [1104.03–1104.03\(c\)](#), [1104.10\(b\)\(i\)](#), and [1104.10\(b\)\(ii\)](#). Acceptance of the amendment to allege use does not signify that all the requirements of 37 C.F.R. §§2.76(b) and (c) for a complete amendment to allege have been met and the application is in condition for approval for publication.

The examining attorney must accept the amendment to allege use to ensure that (1) a computer-generated notice advising the applicant that the amendment to allege use has been accepted and forwarded to the examining attorney for substantive review is issued and (2) the basis of the application is changed from §1(b) to §1(a). Thus, even if the amendment to allege use raises issues related to, for example, the dates of use, inconsistencies between the mark on the drawing and the mark on the specimen, ornamentation, or descriptiveness, the examining attorney must accept it before issuing an Office action that addresses the relevant refusals or requirements.

*See* [TMEP §§1104.10–1104.10\(b\)\(vii\)](#) regarding examination of an amendment to allege use for compliance with statutory requirements.

### **1104.10 Examination of Amendment to Allege Use on the Merits for Compliance with Statutory Requirements**

After accepting an amendment to allege use that meets the requirements discussed above ( *see* TMEP §§ [1104.01](#), [1104.03–1104.03\(c\)](#), [1104.09](#)), the examining attorney will then examine it on the merits to determine compliance with all statutory requirements (e.g., valid ownership, acceptable specimen, and fees for all classes of goods/services). If all statutory requirements are met, no further action with regard to the amendment to allege use is necessary.

#### **1104.10(a) Issuance of Office Action Related to Amendment to Allege Use**

If, after examination on the merits, the examining attorney determines that the amendment to allege use necessitates any refusals or requirements, an Office action must be issued. Before issuing the Office action, the examining attorney must accept the amendment to allege use. *See* [TMEP §1104.09](#). If the amendment to allege use was filed before the application was assigned to the examining attorney, the Office action must address all refusals or requirements related to both the application and the amendment to allege use. If the amendment to allege use is referred to an examining attorney after issuance of an Office action, the examining attorney must accept it, if appropriate, and issue a supplemental Office action that supersedes any outstanding action, incorporates all outstanding refusals and/or requirements, and provides a new six-month response period.

Generally, the Office action must be nonfinal, because the issues arising from examination of the amendment to allege use would be raised for the first time. In rare cases, an issue arising from examination of the amendment to allege use will already have been raised. For example, if the examining attorney issued a final refusal of registration in a §1(a) application because the specimen failed to show use of the mark in

commerce or failed to demonstrate use as a mark, the applicant may amend the application to seek registration under §1(b). If the applicant subsequently submits an amendment to allege use that includes the same specimen (or a different specimen that is deficient for the same reason), no new issue is raised because the requirement to submit a specimen showing acceptable use of the mark in commerce has already been raised.

*Cf. In re GTE Educ. Servs.*, 34 USPQ2d 1478, 1480 (Comm'r Pats. 1994) (holding that examining attorney properly determined that no new issue had been raised in request for reconsideration of final refusal based on inadequate specimens, where the substitute specimens submitted with the request were deficient for the same reason as the original specimens).

If the application is suspended at the time the amendment to allege use is referred for examination, the examining attorney must accept and review it. If no further action on the amendment to allege use is required because all statutory requirements are satisfied, the application must be resuspended. If the amendment to allege use does not meet all statutory requirements, the examining attorney must remove the application from suspension and issue a nonfinal Office action that maintains and continues any requirements and refusals that were operative at the time of the suspension.

If the amendment to allege use is referred for examination at the same time as a response to an outstanding Office action, or when a response is awaiting review, the examining attorney must accept it and review both the response and the amendment to allege use. If the amendment to allege use does not meet all statutory requirements, the examining attorney must issue a new nonfinal Office action that includes all refusals and/or requirements related to the amendment to allege use and maintains and continues all refusals and/or requirements not overcome or satisfied by the response. If the amendment to allege use meets all statutory requirements, the examining attorney must issue a final refusal regarding all refusals and/or requirements not overcome or satisfied by the response, or approve the mark for publication if all refusals and/or requirements have been overcome or satisfied.

See [TMPEP §§1104.01–1104.01\(c\)](#) regarding the minimum filing requirements for an amendment to allege use, [TMPEP §§1104.03–1104.03\(c\)](#) regarding the time for filing an amendment to allege use, [TMPEP §1104.07](#) regarding an amendment to allege use filed with a notice of appeal or after commencement of an appeal, [TMPEP §1104.09](#) regarding acceptance of an amendment to allege use that meets minimum filing requirements, and [TMPEP §§1104.10–1104.10\(b\)\(vii\)](#) regarding examination of an amendment to allege use on the merits.

## **1104.10(b) Common Examination Issues Related to Amendments to Allege Use**

The following sections represent the most common issues to be considered during examination of an amendment to allege use. These sections do not exhaust all possible grounds for issuing a refusal or making a requirement. Moreover, any amendments filed with an amendment to allege use that do not pertain to use of the proposed mark (e.g., changes to the identification of goods/services or drawing), must be separately considered and examined according to standard examination procedures.

### **1104.10(b)(i) Ownership**

The examining attorney must confirm that the proper party has filed the amendment to allege use. Only the applicant or a valid assignee under §10 of the Trademark Act, 15 U.S.C. §1060, may file an amendment to allege use. If USPTO records show title in a party other than the party filing the amendment to allege use, the examining attorney must refuse registration on the ground that the amendment to allege was not filed by the owner of record. *See* 37 C.F.R. §2.76(b)(1)(i). In such cases, the examining attorney must withhold acceptance of the amendment to allege use until the party who filed the amendment to allege use establishes ownership. If the party filing the amendment to allege use was not the owner of the mark at the time of

filing, the true owner may file a substitute amendment to allege use (including the filing fee for each class) on or before the date the application is approved for publication.

If the party filing the amendment to allege use was the owner at the time of filing, the party may submit evidence to establish chain of title within the response period specified in the Office action. *See* 37 C.F.R. §§3.71(d), 3.73(b). To establish ownership, the party who filed the amendment to allege use must either: (1) record an assignment or other document of title with the Assignment Recordation Branch, and include a statement in the response to the Office action that the document has been recorded; or (2) submit other evidence of ownership, in the form of a document transferring ownership from one party to another or an explanation, in the form of an affidavit or declaration under 37 C.F.R. §2.20, that a valid transfer of legal title has occurred. 37 C.F.R. §3.73(b)(1). *See* [TMEP §502.01](#) regarding establishing the right to take action in an application or registration.

If an amendment to allege use is filed by the owner of the mark, but there is a minor error in the manner in which the name of the owner is identified, the mistake may be corrected by amendment. *See* [TMEP §1201.02\(c\)](#) for examples of correctable and non-correctable errors in how the applicant is identified.

*See* 37 C.F.R. §3.85 and [TMEP §502.02\(a\)](#) regarding the issuance of a registration certificate in the name of the new owner, and [TMEP §502.02\(c\)](#) regarding an examining attorney's handling of an application after the mark has been assigned.

### **1104.10(b)(ii) Verification and Date of Execution**

The verification must be signed by the applicant or a person properly authorized to sign on behalf of the applicant. 37 C.F.R. §2.76(b)(1). *See* 37 C.F.R. §2.193(e)(1) and [TMEP §611.03\(a\)](#) as to who is properly authorized to sign on behalf of an applicant. Generally, the USPTO will not question the authority of the person who signs a verification unless there is an inconsistency in the record as to the signatory's authority to sign.

If the amendment to allege use is not filed within one year after it is signed, the examining attorney must require a substitute or supplemental verification or declaration under 37 C.F.R. §2.20 stating that the mark is still in use in commerce. *See* 37 C.F.R. §2.76(i); [TMEP §804.03](#).

*See* [TMEP §§611–611.06\(h\)](#) regarding signature on correspondence filed in the USPTO.

### **1104.10(b)(iii) Identification of Goods/Services**

The examining attorney must examine the identification of goods/services in an amendment to allege use to ensure that it conforms to the goods/services specified in the application. The applicant may delete, limit, or clarify the goods/services, but may not add to or expand the identification. 37 C.F.R. §2.71(a). The amendment to allege use must specify *all* the goods/services for which the applicant seeks registration under §1(a), by listing or incorporating by reference the goods/services on or in connection with which the mark is in use in commerce. *See* 37 C.F.R. §2.76(b)(1)(ii). To incorporate the goods/services by reference, the applicant may state that the mark is in use on “those goods/services identified in the application” or “those goods/services identified in the application except . . . [followed by an identification of the goods/services to be deleted].”

If goods/services identified in the application are omitted from the amendment to allege use and it is not accompanied by a request to divide, the omitted goods/services must be deleted from the application and

the amendment to allege use accepted. However, if an amendment to allege use is submitted for only some of the goods/services and the applicant specifies an intention to retain the goods/services not yet in use, the amendment to allege may not be accepted until a request to divide the goods/services that are not in use is filed. *See* 37 C.F.R. §2.76(c); [TMEP §1104.03\(a\)](#).

If the amendment to allege use includes an amended identification of goods/services, to determine whether the amended identification is acceptable and within the scope of the previous identification, the amended identification must be examined in relation to the last acceptable identification of record. [TMEP §§1402.07\(d\), \(e\)](#). When the amended goods/services exceed the scope of a previous acceptable identification, the amended goods/services must be refused. If both an amendment to allege use and a response to an outstanding Office action are received and the two filings contain different amendments to the identification of goods/services, this creates an ambiguity that must be clarified by the applicant.

If the applicant lists *all* the goods/services identified in the application in the section of a pre-printed amendment to allege use paper form designated for the identification of goods/services that are not in use (the effect of which is a representation that the mark was not used in connection with any goods/services), then the applicant has not expressed an intention to delete these goods/services, and the examining attorney must inquire as to the discrepancy.

#### **1104.10(b)(iv) Use in Commerce and Dates of Use**

An amendment to allege use must include a verified statement that “the mark is in use in commerce,” and must specify the dates of the applicant’s first use of the mark and first use of the mark in commerce for each class of goods/services. 37 C.F.R. §2.76(b)(1)(ii). The applicant may amend the dates of use if the applicant supports the amendment with an affidavit or declaration under 37 C.F.R. §2.20. 37 C.F.R. §2.71(c). The applicant may not amend the dates of use to recite dates of use that are subsequent to the filing of the amendment to allege use. However, the applicant may withdraw the amendment to allege use. 37 C.F.R. §2.76(h).

The requirement for a verified statement that “the mark is in use in commerce” is a minimum filing requirement that must be satisfied before the amendment to allege use may be examined on the merits. 37 C.F.R. §2.76(e)(3). *See* [TMEP §§1104.01–1104.01\(c\)](#) regarding amendments to allege use that do not meet minimum filing requirements.

#### **1104.10(b)(v) Specimen**

An amendment to allege use must include a specimen for each class of goods/services. The examining attorney must review the specimen for compliance with all relevant requirements. *See* [TMEP §§904.03–904.03\(m\)](#) regarding material that is appropriate as a trademark specimen, [TMEP §§1301.04 \*et seq.\*](#) regarding material that is appropriate as a service mark specimen, and [TMEP §§1202–1202.17\(e\)\(vi\)](#) and [1301.02–1301.02\(f\)](#) regarding use as a mark.

If the applicant submits a substitute specimen in conjunction with an amendment to allege use, the applicant must verify that the applicant used the substitute specimen in commerce on or in connection with the goods/services prior to filing the amendment to allege use. Similarly, if the applicant submits an additional specimen in support of a multiple-class application that is not identical to the specimen originally filed, the applicant must verify that the applicant used the new specimen in commerce on or in connection with the goods/services prior to filing the amendment to allege use. *See* [TMEP §904.05](#) regarding affidavit supporting substitute specimens.

If, in fact, the mark was first used on dates other than those asserted in the amendment to allege use, the dates of use must be corrected. 37 C.F.R. §2.71(c). See TMEP §§[903.04](#) and [1104.10\(b\)\(iv\)](#) regarding amendment of the dates of use.

If the amendment to allege use is filed through TEAS, the specimen must be a digitized image in .jpg or .pdf format. 37 C.F.R. §2.56(d)(4). See [TMEP §904.02\(a\)](#) for additional information about electronically filed specimens.

### **1104.10(b)(vi) Drawing**

Under 37 C.F.R. §2.51(b), the drawing in an intent-to-use application must be a substantially exact representation of the mark as intended to be used *and* as actually used, as shown on the specimen filed with the amendment to allege use. An applicant may not amend the mark in the original drawing if the amendment constitutes a material alteration of the mark. 37 C.F.R. §2.72(b)(2); [TMEP §§807.14–807.14\(f\)](#). The same standards that apply to use applications in determining whether the specimens supports use of the mark and whether an amendment to the drawing can be permitted also apply to amendments to allege use.

Therefore, if the mark in the drawing filed with the original application is not a substantially exact representation of the mark as used on the specimen filed with the amendment to allege use, the examining attorney must require: (1) *either* submission of a new specimen or an amendment of the mark in the drawing to agree with the mark shown on the specimen, if such an amendment would not be a material alteration of the mark as shown in the original drawing; or (2) submission of a new specimen, if amendment of the mark would be a material alteration of the mark as shown in the original drawing. *See* 37 C.F.R. §2.72(b)(2). *See* [TMEP §§807.14–807.14\(f\)](#) regarding material alteration.

### **1104.10(b)(vii) Fees**

While the payment of the fee for at least one class is enough to meet the minimum filing requirements for an amendment to allege use (37 C.F.R. §2.76(e)(1)), the examining attorney must require payment of fees to cover *all* classes identified in the application before approving the amendment to allege use. The applicant may amend the identification to delete class(es).

If class(es) that do not broaden the scope of the identification are added to the application after the filing of the amendment to allege use, the examining attorney must require payment of the fee(s) for filing the amendment to allege use in the added class(es), in addition to the fee(s) required by 37 C.F.R. §2.6(a)(1) for adding class(es) to the application. *See* TMEP §[1402.06](#) regarding amendments to the identification, §[1402.07](#) regarding the scope of the identification for purposes of amendment, and §[1403.02\(c\)](#) regarding the amount of the fee(s) for adding class(es) to an application.

If the applicant submits a filing fee that is deficient (e.g., if the fee is charged to a deposit account with insufficient funds, a check is returned unpaid, or an EFT or credit card payment is refused or charged back by a financial institution), the examining attorney must require repayment of the fee before approving the amendment to allege use. In addition, when an EFT or credit card is refused, or a check is returned unpaid, the examining attorney must require a processing fee under 37 C.F.R. §2.6(b)(12). This processing fee must

be paid even if the applicant withdraws the amendment to allege use or deletes a class(es). See [TMEP §405.06](#) regarding payments that are refused.

### **1104.11 Amendment and Withdrawal of Amendment to Allege Use**

The applicant may amend the amendment to allege use to correct deficiencies or errors, to overcome a refusal, or to comply with a requirement.

The applicant may withdraw the amendment to allege use at any time before approval of the mark for publication. 37 C.F.R. §2.76(h). The USPTO will *not* refund the fee for filing an amendment to allege use that is withdrawn (except as provided in [TMEP §1104.04](#)). The applicant may authorize the withdrawal via an examiner's amendment. In order to process the withdrawal, if the amendment to allege use is timely and meets the minimum filing requirements, it must first be accepted before it may be withdrawn. See [TMEP §§1104.01–1104.01\(c\)](#) regarding minimum filing requirements for amendment to allege use, [TMEP §§1104.03–1104.03\(c\)](#) regarding time for filing an amendment to allege use, and [TMEP §1104.09](#) regarding acceptance of amendment to allege use that meets minimum filing requirements.

The withdrawn amendment to allege use, specimen(s), and any other materials filed with the amendment to allege use will remain part of the record.

If the applicant wishes to request withdrawal of an amendment to allege use during an ex parte appeal, the applicant should direct the request to the Trademark Trial and Appeal Board.

If the applicant withdraws the amendment to allege use, the application will be processed as an intent-to-use application under 15 U.S.C. §1051(b), subject to publication and issuance of a notice of allowance. After the notice of allowance issues, the applicant must file a statement of use under 15 U.S.C. §1051(d). See [TMEP §§1109–1109.18](#) for information on statements of use.

If the amendment to allege use is withdrawn, the examining attorney will withdraw any requirements or refusals specifically related to use of the mark, such as objections related to the form of the verified statement itself, the agreement of the mark as used on the specimens with the mark shown on the drawing, or the use of the applied-for designation as a trademark or service mark evidenced by the specimen. The examining attorney should also withdraw any requirement or refusal related to the execution of the amendment to allege use.

The examining attorney should maintain any requirement or refusal arising from the amendment to allege use not specifically related to the dates of use or use of the mark, such as refusals under 15 U.S.C. §§1052(e)(1), 1052(e)(2), 1052(e)(3), or 1052(e)(4). The amendment to allege use, specimen(s), and any materials submitted with the amendment to allege use may be relied on to support refusals or requirements under these sections. Furthermore, if the amendment to allege use contains an amendment to the identification of goods/services and the amended identification is acceptable and within the scope of the previous identification, the amended identification remains of record and replaces all previous identifications. [TMEP §§1104.10\(b\)\(iii\), 1402.07\(e\)](#).

### **1105 Publication of Intent-to-Use Applications for Opposition**

If an amendment to allege use has been submitted and accepted, the intent-to-use application is processed as a use application. If the examining attorney determines that the mark is entitled to registration, the examining attorney will approve the mark for publication and the mark will be published for opposition. If

the application is not successfully opposed, the mark will register and the USPTO will issue a certificate of registration. 15 U.S.C. §1063(b)(1); 37 C.F.R. §2.81(a).

If no amendment to allege use has been accepted for an intent-to-use application, and the examining attorney determines that the mark is entitled to registration but for the submission of an allegation of use, the examining attorney will approve the mark for publication and the mark will be published for opposition. If the application is not successfully opposed, the USPTO will issue a notice of allowance. 15 U.S.C. §1063(b)(2); 37 C.F.R. §2.81(b).

## 1106 Notice of Allowance

### 1106.01 Issuance of the Notice of Allowance

Section 13(b)(2) of the Trademark Act, 15 U.S.C. §1063(b)(2), provides for issuance of a notice of allowance if a §1(b) application is published for opposition and is not successfully opposed. The notice of allowance in an intent-to-use application will issue about eight weeks after the date the mark was published. The USPTO does not publish any notification in the *Official Gazette* that a notice of allowance has been issued. The notice of allowance is a key document because its issue date establishes the due date for filing a statement of use. See 37 C.F.R. §2.88(a).

The accuracy of the information stated on the notice of allowance is important. If there are any errors in the notice of allowance, or if the applicant believes that the notice of allowance issued in error (e.g., because an amendment to allege use was previously approved by the USPTO or the filing basis of the application should not be designated as intent-to-use under §1(b)), the applicant should notify the ITU/Divisional Unit immediately, preferably by fax or telephone. See [TMEP §1106.04](#). Telephone and fax numbers may be found on the USPTO website at <http://www.uspto.gov>.

If an applicant asserts other bases for registration in addition to §1(b), the USPTO will publish the mark for opposition and will issue a notice of allowance if there is no successful opposition. The goods/services for all the bases will remain in the application pending the filing and approval of a statement of use for the goods/services based on §1(b), unless the applicant files a request to divide, a request to delete the §1(b) goods/services, or a request to delete the §1(b) basis when there is an additional basis for registration. See [TMEP §806.04\(a\)](#) regarding the deletion of a §1(b) basis after issuance of a notice of allowance, [TMEP §1107](#) regarding amendments after notice of allowance, and [TMEP §§1110–1110.11\(a\)](#) regarding requests to divide.

If the applicant fails to timely file a statement of use or a request for an extension of time to file a statement of use in response to a notice of allowance, the entire application will be abandoned unless, before the expiration of the deadline for filing the statement of use, the applicant files a request to divide, a request to delete the §1(b) goods/services, or a request to delete the §1(b) basis when there is an additional basis for registration. 37 C.F.R. §2.88(a), (h); [TMEP §806.02\(d\)](#). For example, if the goods/services are based on both §44(e) and §1(b), the failure to file a timely statement of use or extension request will result in the abandonment of the entire application. The applicant may file a petition to revive if the delay in filing the

statement of use, extension request, or request to delete the §1(b) basis was unintentional. See [TMEP §§1714, 1714.01, 1714.01\(b\)–\(g\)](#).

### **1106.02 Action by Examining Attorney After Issuance of the Notice of Allowance**

If, after issuance of the notice of allowance but before submission of the statement of use, the USPTO determines that a clear error ( see [TMEP §706.01](#)) was made in approving the mark for publication, the USPTO will cancel the notice of allowance and return the application to examination. The examining attorney will issue an appropriate Office action that includes the relevant requirement or refusal and informs the applicant of the cancellation of the notice of allowance. See [TMEP §1106.03](#) regarding cancellation of the notice of allowance.

After the notice of allowance issues, the examining attorney has jurisdiction to act in the case. 37 C.F.R. §2.84(a). Therefore, the examining attorney does not have to request jurisdiction to take an action, as would be required after publication but before the notice of allowance issues. See *id.* However, after a notice of allowance issues, the examining attorney should not make a refusal or requirement that could or should have been made during initial examination of the application unless the initial failure to make the refusal or requirement was a clear error. If the examining attorney determines that he or she must make a refusal or requirement after issuance of the notice of allowance that could or should have been made during initial examination, the examining attorney must consult with his/her managing attorney or senior attorney before taking the action. This must be done whether the action is to be taken before, during, or after examination of the statement of use, and regardless of whether the notice of allowance is cancelled. This applies to any refusal that arguably could or should have been made during initial examination, such as most refusals under §2(d) or §2(e)(1) of the Act.

Neither the Trademark Act nor the Trademark Rules of Practice restrict the USPTO from issuing a new requirement or new refusal at any time prior to registration. The USPTO has a duty to issue valid registrations and has broad authority to correct errors made by examining attorneys and other USPTO employees. See *Last Best Beef LLC v. Dudas*, 506 F.3d 333, 340, 84 USPQ2d 1699, 1704 (4th Cir. 2007) (“[F]ederal agencies, including the USPTO, have broad authority to correct their prior errors.”); see also *BlackLight Power Inc. v. Rogan*, 295 F.3d 1269, 63 USPQ2d 1534 (Fed. Cir. 2002) (concluding that USPTO officials acted within their authority to withdraw a patent from issuance in order to fulfill the USPTO’s mission to issue valid patents, even after issuance of a Notice of Allowance, payment of the issue fee and notification of the issue date, and with publication of the drawing and claim in the *Official Gazette*).

Thus, if the USPTO discovers that a mistake was made during initial examination that would result in issuance of a registration in violation of the Trademark Act or applicable rules, the USPTO must issue any necessary requirements or refusals, even if they could or should have been raised during initial examination.

See [TMEP §1109.08](#) regarding the issuance of refusals and requirements during examination of a statement of use.

### **1106.03 Cancellation of Notice of Allowance**

If the USPTO cancels the notice of allowance before the filing or examination of the statement of use, the USPTO will refund any fees paid in conjunction with a statement of use or request(s) for extension(s) of time to file a statement of use, except where: (1) the applicant files a request to delete the §1(b) basis from a multiple-basis application ( see [TMEP §806.04\(a\)](#)); or (2) the notice of allowance is cancelled as a result

of an amendment to the filing basis after publication, pursuant to a petition to the Director ( *see* [TMEP §806.03\(j\)\(ii\)](#)).

Cancellation of the notice of allowance is done by the ITU/Divisional Unit of the USPTO. To request that a notice of allowance be cancelled, a USPTO employee must send an e-mail request to the ITU/Divisional Unit's internal mailbox with a clear statement of the reason why the notice of allowance is being cancelled. The ITU staff will enter an appropriate Note to the File in the record, stating who requested the cancellation and why. When the notice of allowance is cancelled, the examining attorney must inform the applicant that this has been done.

When the notice of allowance is cancelled and reexamination is required, the application is returned to the examining attorney. The examining attorney does not have to request jurisdiction to issue an Office action.

If an Office action issues and the applicant subsequently overcomes all refusals and complies with any requirements made in the Office action, the examining attorney must approve the mark for republication.

If the application is returned to initial examination, any statement of use previously submitted will remain in the record but will not be examined unless it is resubmitted with the required fee as an amendment to allege use or statement of use at the appropriate time.

If the applicant files a statement of use or request for an extension of time to file a statement of use after the notice of allowance has been cancelled, the ITU/Divisional Unit will inform the applicant in writing that the statement of use or extension request is untimely, and will refund the filing fee.

#### **1106.04 Correction of Errors in Notice of Allowance**

When the applicant receives a notice of allowance, the applicant should check the accuracy of the information.

If there are any errors in the notice of allowance, the applicant should notify the ITU/Divisional Unit of the USPTO immediately, preferably by fax or telephone. Telephone and fax numbers may be found on the USPTO website at [www.uspto.gov](http://www.uspto.gov).

##### *Correction of USPTO Error*

If an error in the notice of allowance was the result of a USPTO error (e.g., entering data incorrectly or failing to enter a timely filed amendment), the USPTO will determine whether the change requires republication. If necessary, the ITU staff will contact the examining attorney by e-mail to approve the change and determine whether republication is required.

If the change may be made without republication, the ITU staff will make the correction and issue a corrected notice of allowance. *The USPTO will not issue a new notice of allowance or extend the time for filing a statement of use.*

If republication is required, and no action by the examining attorney that requires a response is necessary, the ITU staff will make the correction, cancel the notice of allowance, and refund any fees paid for filing a statement of use or request(s) for extension of time to file a statement of use. The application will then be scheduled for republication. If the application is not successfully opposed, the USPTO will issue a new notice of allowance.

If the examining attorney must issue an Office action that requires a response as a result of the requested correction, the ITU staff will cancel the notice of allowance, refund any fees paid for filing a statement of

use or request(s) for extension of time to file a statement of use, and forward the application to the examining attorney for further action.

### *Correction of Applicant's Error*

If an error in the notice of allowance is the result of an applicant's error (e.g., providing incorrect information in the application or in an amendment to the application), the applicant must file a written amendment, which will be processed like any other amendment filed after issuance of the notice of allowance and before filing of the statement of use. See [TMEP §1107](#).

## **1107 Amendment After Issuance of the Notice of Allowance and Before Filing of the Statement of Use**

Generally, the only amendments that may be entered in an application between the issuance of the notice of allowance and the submission of a statement of use are: (1) the deletion of specified goods/services from the identification of goods/services; (2) the deletion of a basis in a multiple-basis application; and (3) changes of attorney and changes of address. See 37 C.F.R. §2.77(a). The "deletion of specified goods/services," within the meaning of 37 C.F.R. §2.77, means the elimination of an existing item in an identification of goods/services in its entirety. Deletion is distinct from other types of amendments to limit an identification, such as amendments to limit the goods/services as to types, channels of trade or classes of purchasers, or to restrict an existing item in scope by the introduction of some qualifying language, or the substitution of specific terms for more general terms.

The USPTO will normally not consider any other amendment to the application during this period. If the applicant submits any other amendment during this period, the USPTO will place the amendment in the record for consideration at the time of examination of the statement of use. 37 C.F.R. §2.77(b). The ITU staff will advise the applicant in writing that the amendment has been received but that it will not be considered until the examining attorney examines the statement of use unless the applicant files a petition to the Director. The ITU staff will enter a Note to the File in the record directing the examining attorney's attention to the amendment.

The applicant may file a petition under 37 C.F.R. §§2.146(a)(3) and (a)(5) to waive 37 C.F.R. §2.77 to permit an examining attorney to examine an amendment (other than an amendment deleting a basis or deleting specified goods/services) during the period between the issuance of the notice of allowance and the filing of the statement of use. *In re Upsher-Smith Labs. Inc.*, 45 USPQ2d 1371, 1373 (Comm'r Pats. 1997), *partially superseded by rule change on other grounds*; [TMEP §1107.01](#). The petition must be accompanied by the fee required by 37 C.F.R. §2.6. See [TMEP Chapter 1700](#) regarding petitions.

The filing of an amendment after issuance of the notice of allowance does not extend the deadline for filing the statement of use. Unless the notice of allowance is cancelled because the amendment requires republication, the applicant must file a statement of use or request for an extension of time to file a statement of use.

See [TMEP §1106.04](#) regarding correction of errors in a notice of allowance, [TMEP §806.04\(a\)](#) regarding the deletion of a §1(b) basis after issuance of a notice of allowance, and [TMEP §806.03\(j\)\(ii\)](#) regarding

amendments to add or substitute a basis between issuance of the notice of allowance and filing the statement of use.

### **1107.01 Examination of Amendment Filed After the Notice of Allowance Issues but Before a Statement of Use Is Filed**

As noted in [TMEP §1107](#), an applicant may file a petition to the Director under 37 C.F.R. §§2.146(a)(3) and (a)(5) to waive 37 C.F.R. §2.77 to permit an examining attorney to examine an amendment (other than an amendment deleting a basis or deleting specified goods/services) during the period between the issuance of a notice of allowance and the filing of a statement of use. *In re Upsher-Smith Labs., Inc.*, 45 USPQ2d 1371, 1373 (Comm'r Pats. 1997), *partially superseded by rule change on other grounds*. If such a petition is granted, the examining attorney will either accept or reject the proposed amendment(s) in accordance with the following procedures:

*Amendment Acceptable; Republication Not Required:* If an examining attorney determines that an amendment is acceptable and republication is not required, the examining attorney will call or e-mail the applicant to notify the applicant of the acceptance, and enter a Note to the File in the record indicating that the proposed amendment has been accepted and that the applicant has been notified of the acceptance. The examining attorney will instruct the LIE to enter the amendment. The application will await the filing of a statement of use or extension request.

*Amendment Acceptable; Republication Required:* If an examining attorney determines that the amendment is acceptable but republication is required, the examining attorney will notify the applicant by telephone or e-mail that the amendment cannot be accepted at this time because republication is required, and that the amendment may be resubmitted when the statement of use is filed. The examining attorney must also enter a Note to the File that the applicant has been so notified. The USPTO cannot republish the application after issuance of the notice of allowance and prior to submission of the statement of use and will not cancel the notice of allowance to allow republication unless there was USPTO error, since this could substantially delay prosecution of the application. The applicant may resubmit the amendment with the statement of use so that republication can occur.

*Amendment Unacceptable:* If an examining attorney determines that an amendment is unacceptable, the examining attorney will call or e-mail the applicant to notify the applicant that the amendment is not accepted, and enter a Note to the File in the record indicating that the proposed amendment is unacceptable and that the applicant has been so notified. The application will await filing of a statement of use or extension request. The applicant must accept the refusal to enter the amendment, but may again request to amend the application when filing the statement of use.

*Examiner's Amendment Required; Republication Not Required:* If an examining attorney determines that an examiner's amendment is necessary, and republication is not required, the examining attorney will prepare, but not send, the examiner's amendment. The examiner's amendment must contain a statement that republication is not required. The examining attorney must e-mail the internal TMPHOTOCOMP mailbox, with the unsent examiner's amendment attached, along with instructions for entering the requested amendment. The body of the e-mail message must include a statement that republication is not required. The Office of Trademark Program Control will enter and mail the examiner's amendment.

*The granting of a petition to examine an amendment between issuance of the notice of allowance and filing of the statement of use does not extend the deadline for filing a statement of use or request for an extension of time to file a statement of use (unless the notice of allowance is cancelled). Regardless of whether an applicant has received a response to a proposed amendment, the applicant must file its extension request or*

statement of use when it becomes due. The extension request or statement of use may refer to the proposed amended identification.

See [TMEP §1505.03–1505.03\(b\)](#) for examples of situations where republication is and is not required.

## 1108 Requests for Extensions of Time to File the Statement of Use

Section 1(d) of the Trademark Act, 15 U.S.C. §1051(d), requires that a statement of use be filed within six months after the issuance of the notice of allowance, or before the expiration of a previously granted extension of time to file a statement of use. If the mark is not in use in commerce before the expiration of the six-month period following the issuance of the notice of allowance, the applicant must file a request for an extension of time to file a statement of use within the six-month period to avoid abandonment of the application. See 15 U.S.C. §1051(d)(4).

The first six-month extension may be requested without a showing of good cause. Up to four additional six-month extensions may be requested; each must include a showing of good cause. See 15 U.S.C. §1051(d)(2). Thus, the total time available for filing the statement of use may not be extended beyond thirty-six months from the issuance date of the notice of allowance. See 15 U.S.C. §1051(d).

**To expedite processing**, it is recommended that the applicant file the extension request through TEAS, at <http://www.uspto.gov>. Alternatively, an applicant may call the Trademark Assistance Center at (571) 272-9250 or (800) 786-9199 to obtain a pre-printed paper form. The applicant may mail, fax, or hand-deliver the completed form to the USPTO. If the form is faxed, it must be accompanied by an authorization to charge the filing fee to a credit card or deposit account. The credit card authorization form is available at <http://www.uspto.gov/web/forms/2038.pdf>. If the extension request is filed though TEAS, payment must be made by credit card, deposit account, or EFT.

Paper forms may be delivered by hand or courier to the Trademark Assistance Center (“TAC”), at James Madison Building, East Wing, Concourse Level, 600 Dulany Street, Alexandria, Virginia, 22314. TAC is open 8:30 a.m. to 5:00 p.m., Eastern Time, Monday through Friday, except on Federal holidays within the District of Columbia.

Extension requests are processed by the ITU/Divisional Unit of the USPTO.

### 1108.01 Time for Filing Requests for Extensions of Time to File the Statement of Use

Under 15 U.S.C. §1051(d), the applicant must file an extension request within six months of the issuance date of the notice of allowance, or before the expiration of a previously granted extension; otherwise the application is abandoned. 15 U.S.C. §1051(d)(4); 37 C.F.R. §§2.65(c), 2.88(h), 2.89(a)–(b).

Extensions of time are granted in six-month increments. 37 C.F.R. §2.89(c). Only one extension request may be filed in each six-month extension period that has been granted. The first extension request must be filed within six months of the date the notice of allowance issued. The second and subsequent extension requests must be filed before the expiration of the previously granted extension period. The total time available for filing the statement of use may not be extended beyond thirty-six months from the issuance date of the notice of allowance. 15 U.S.C. §§1051(d)(1)–1051(d)(2); 37 C.F.R. §2.89(e)(1). If a statement of use is not filed by the end of thirty-six months, the application will be abandoned and cannot be revived. 37 C.F.R. §2.88(h).

One extension request may be filed with or after a statement of use is filed (sometimes called an “insurance” extension request), if there is time remaining in the existing six-month period during which the statement of use was filed. Granting the extension request may not extend the time for filing the statement of use more than thirty-six months beyond the issuance of the notice of allowance. See [TMEP §1108.03](#) regarding filing an “insurance” extension request.

An applicant will receive the full benefit of each extension period before a subsequent extension period will begin to run. The six-month period following the issuance of the notice of allowance, or any subsequent six-month extension period, will not be cut short by the grant of an extension request. No extension will be granted for more than six months. 37 C.F.R. §2.89(c).

*Example:* The following table presents an example of the complete timeline for filing five extension requests that meet the requirements of 15 U.S.C. §1051(d) and 37 C.F.R. §2.89.

<b>Document</b>	<b>Issue/Filing Date</b>	<b>Period Covered</b>
Notice of allowance	Issued June 7, 2010	Through December 7, 2010 (1 <sup>st</sup> 6 months provided by statute)
First extension request	File from June 8, 2010 through December 7, 2010	Through June 7, 2011
Second extension request	File from December 8, 2010 through June 7, 2011	Through December 7, 2011
Third extension request	File from June 8, 2011 through December 7, 2011	Through June 7, 2012
Fourth extension request	File from December 8, 2011 through June 7, 2012	Through December 7, 2012
Fifth and last extension request	File from June 8, 2012 through December 7, 2012	Through June 7, 2013
Statement of use	File from December 7, 2012 through June 7, 2013	N/A

The USPTO will notify the applicant of the grant or denial of an extension request, and of the reasons for a denial. However, failure to notify the applicant of the grant or denial of an extension request before the expiration of the requested extension does not relieve the applicant of the duty to file a statement of use or further extension request. 37 C.F.R. §2.89(g).

Under 37 C.F.R. §2.195(a)(2), an extension request filed through TEAS is considered to have been filed on the date the USPTO receives the transmission (Eastern Time), regardless of whether that date is a Saturday, Sunday, or Federal holiday within the District of Columbia. When an extension request is filed electronically, TEAS almost immediately displays a “Success” page that confirms receipt. This page is evidence of filing should any question arise as to the filing date of the extension request, and it may be printed or copied-and-pasted into an electronic record for storage. TEAS also separately sends an e-mail acknowledgement of receipt, which includes a summary of the filed information.

A paper extension request is considered timely if it is received in the Office by the due date or mailed or transmitted by the due date with a certificate of mailing or facsimile transmission under 37 C.F.R. §2.197.

See TMEP §§[305.02–305.02\(h\)](#) and [§§306.05–306.05\(d\)](#) for certificate of mailing and certificate of facsimile transmission procedures to avoid lateness.

## 1108.02 Requirements for Request for an Extension of Time to File a Statement of Use

### *First Extension Request*

The first request for an extension of time to file a statement of use must include: (1) a written extension request from the applicant, before expiration of the six-month period following issuance of the notice of allowance; (2) the prescribed fee for each class of goods/services; and (3) a verified statement signed by the applicant or a person properly authorized to sign on behalf of the applicant ([TMEP §804](#)) that the applicant has a continued bona fide intention to use the mark in commerce, specifying those goods/services identified in the notice of allowance on or in connection with which the applicant has a continued bona fide intention to use the mark in commerce. 37 C.F.R. §2.89(a).

### *Second and Subsequent Extension Requests*

A second or subsequent extension request must be submitted before expiration of a previously granted extension of time and must include: (1) a written extension request from the applicant; (2) the prescribed fee for each class of goods/services; (3) a verified statement signed by the applicant or a person properly authorized to sign on behalf of the applicant that the applicant has a continued bona fide intention to use the mark in commerce, specifying those goods/services identified in the notice of allowance on or in connection with which the applicant has a continued bona fide intention to use the mark in commerce; **and** (4) a showing of good cause, as required by 37 C.F.R. §2.89(d). 37 C.F.R. §2.89(b). Extensions of time under 37 C.F.R. §2.89(b) (i.e., second and subsequent extension requests) are granted in six-month increments and may not aggregate more than 24 months. 37 C.F.R. §2.89(c).

## 1108.02(a) Ownership

The party filing the extension request must be the owner of the application, i.e., the person or entity who is entitled to use the mark, at the time of filing. *See* 15 U.S.C. §1051(d)(2); 37 C.F.R. §§2.89(a)(3), 2.89(b)(3).

If the party filing the extension request is not the owner of record, the request should include either a statement that the assignment or other document of title is recorded (or filed for recordation) in the Assignment Recordation Branch of the USPTO, or other evidence that the party filing the extension request is the owner of the application in accordance with 37 C.F.R. §§3.71(d) and 3.73(b). (*Note:* An application under §1(b) cannot be assigned before the applicant files an allegation of use, except to a successor to the applicant's business, or portion of the business to which the mark pertains. *See* [TMEP §501.01\(a\)](#).)

If the extension request is filed by someone other than the owner of record and does not include the necessary evidence of ownership, the ITU staff will issue an Office action denying the request. If the party who filed the extension request was the owner at the time of filing, the applicant may submit evidence to establish the chain of title after expiration of the statutory filing period, within the time provided in the Office action advising the applicant of the denial.

To establish ownership, the new owner must either: (1) record an assignment or other document of title with the Assignment Recordation Branch, *and* state in the response to the Office action that the document has been recorded; or (2) submit other evidence of ownership, in the form of a document transferring ownership from one party to another or an explanation, supported by an affidavit or declaration under 37 C.F.R. §2.20 that a valid transfer of legal title has occurred. 37 C.F.R. §3.73(b)(1); [TMEP §502.01](#). The

USPTO recommends that requests to record documents with the Assignment Recordation Branch be filed through Electronic Trademark Assignment System (“ETAS”) at <http://etas.uspto.gov>.

If an extension request is filed by the owner, but there is a minor error in the manner in which the name of the owner is set out, the mistake may be corrected by amendment. See [TMEP §1201.02\(c\)](#) for examples of correctable and non-correctable errors.

If the party who filed the extension request was not the owner at the time of filing, the true owner may not file a substitute extension request unless there is time remaining in the statutory period for filing the extension request. *Cf. In re Colombo Inc.*, 33 USPQ2d 1530, 1531 (Comm’r Pats. 1994) (indicating that a statement of use filed by the wrong party cannot be corrected with a properly signed verification unless it is submitted within the statutory period for filing the statement of use). See [TMEP §1108.05](#) for applicant’s recourse if an extension request is denied.

If the applicant notifies the ITU/Divisional Unit during the processing of an extension request that an assignment or other document of title has been recorded, and there is a clear chain of title, the ITU staff will update the owner of record in the Trademark database. See 37 C.F.R. §3.85 and [TMEP §502.02\(a\)](#) regarding the issuance of a registration certificate in the name of a new owner, and [TMEP §504](#) regarding the circumstances in which the “Ownership” field in the Trademark database will be automatically updated after recordation of a document with the Assignment Recordation Branch, even if the new owner does not notify the Trademark Operation that the document has been recorded.

### **1108.02(b) Verification**

The extension request must be verified by someone properly authorized to sign on behalf of applicant. If the extension request is unsigned or signed by the wrong party, a properly signed substitute verification must be submitted before the expiration of the deadline for filing the statement of use. 37 C.F.R. §§2.89(a)(3), 2.89(b)(3). See 37 C.F.R. §2.193(e)(1) and [TMEP §611.03\(a\)](#) regarding persons properly authorized to sign on behalf of applicant. Generally, the USPTO will not question the authority of the person who signs a verification unless there is an inconsistency in the record as to the signatory’s authority to sign.

If the extension request is not filed within one year after it is signed, the USPTO will require a substitute verification or declaration under 37 C.F.R. §2.20 that the applicant still has a bona fide intention to use the mark in commerce. 37 C.F.R. §2.89(h); see [TMEP §804.03](#).

See [TMEP §611](#) regarding signature on correspondence filed with the USPTO.

### **1108.02(c) Filing Fees**

A filing fee sufficient to cover at least one class must be submitted within the statutory time for filing the extension request, or the request will be denied. 37 C.F.R. §§2.89(a)(2), 2.89(b)(2). In a multiple-class application, if the applicant files a fee sufficient to pay for at least one class, but insufficient to cover all the classes, the ITU staff will issue a notice of fee deficiency allowing the applicant thirty days to remit the amount by which the fee is deficient or specify the class(es) to be abandoned. If the USPTO does not receive a timely response to a fee deficiency letter, the USPTO will apply the fees paid to the lowest-numbered class(es) in ascending order, and will delete from the application the remaining class(es) of goods/services not covered by the submitted fees. See 37 C.F.R. §§2.89(a)(2), 2.89(b)(2).

If the filing fee for at least a single class is omitted or is deficient (e.g., if the fee is charged to a deposit account with insufficient funds, an EFT or credit card payment is refused or charged back by a financial institution, or a check is returned unpaid), the fee for at least one class of goods/services must be submitted before the expiration of the statutory filing period. See 37 C.F.R. §§2.89(a)(2), 2.89(b)(2). If the extension request was not accompanied by an authorization to charge deficient fee(s) to a deposit account (37 C.F.R. §2.208) that has sufficient funds to cover the fee, and the applicant does not resubmit the fee before expiration of the statutory deadline, the extension request will be denied and the application will be abandoned. See 37 C.F.R. §§2.89(a)(2), 2.89(b)(2). In addition, when an EFT or credit card is refused or a check is returned unpaid, the applicant must pay the processing fee required by 37 C.F.R. §2.6(b)(12). See [TMEP §405.06](#) regarding payments that are refused.

### **1108.02(d) Identification of Goods/Services**

The applicant must identify or reference the goods/services on or in connection with which the applicant still has a bona fide intention to use the mark in commerce in the extension request. 15 U.S.C. §1051(d)(2); 37 C.F.R. §§2.89(a)(3), 2.89(b)(3). The goods/services identified in the extension request must conform to those identified in the notice of allowance. 37 C.F.R. §2.89(f). If the applicant wants to delete goods/services from the application, the applicant should clearly specify those goods/services to be deleted.

The applicant may incorporate by reference the goods/services listed in the notice of allowance. See 37 C.F.R. §2.89(f). This is advisable where applicant intends to retain all the goods/services identified in the notice of allowance, to avoid the possibility that goods/services may be inadvertently omitted. Thus, the applicant may specify the goods/services by referring to “those goods/services identified in the notice of allowance” or “those goods/services identified in the notice of allowance except . . . [followed by a listing of the goods/services to be deleted].” *Id.*

If the applicant lists the goods/services with specificity in the extension request, and omits any goods/services that were listed in the notice of allowance, the USPTO will presume these goods/services to be deleted. 37 C.F.R. §2.89(f). The applicant may not thereafter request that the goods/services be reinserted in the application. *Id.* In this situation, the applicant cannot file a petition under 37 C.F.R. §2.66, claiming unintentional delay in filing an extension request for the omitted goods/services.

If an applicant files an extension request on a pre-printed paper form provided by the USPTO and fails to check either of the boxes available for identifying the goods/services on or in connection with which the applicant has a continued bona fide intention to use the mark in commerce, the ITU staff will assume that the applicant has a continued bona fide intention to use the mark in commerce on or in connection with all the goods/services identified in the notice of allowance, and will grant the extension request, if it meets all other requirements of 15 U.S.C. §1051(d)(2) and 37 C.F.R. §2.89. *In re Omega-3 Mktg., Inc.*, 35 USPQ2d 1158, 1159 (Comm’r Pats. 1994).

If the applicant lists goods/services to be deleted and the result would be to delete *all* of the goods/services in the notice of allowance, or if the applicant fails to identify or incorporate by reference *any* goods/services, the USPTO will presume this was a clerical error. Applicant will be allowed to correct the mistake. The ITU staff will issue a letter noting that no goods/services were specified or incorporated by reference in the extension request, and granting applicant thirty days in which to submit a verified statement clarifying the goods/services. However, if by mistake the applicant lists goods/services to be deleted and removal does not result in the deletion of all goods/services, the goods/services specifically listed will be deleted and may not later be reinserted.

See [TMEP §1107](#) regarding amendments to the identification of goods/services filed between the issuance of the notice of allowance and the filing date of the statement of use.

### **1108.02(e) Bona Fide Intention to Use the Mark in Commerce**

A request for an extension of time to file a statement of use must include a verified statement that the applicant has a continued bona fide intention to use the mark in commerce on or in connection with the goods/services identified in the notice of allowance. 37 C.F.R. §2.89(a)(3), 2.89 (b)(3). This is a statutory requirement that must be satisfied before expiration of the statutory period for filing the extension request. 15 U.S.C. §1051(d)(2). *In re Custom Techs., Inc.*, 24 USPQ2d 1712 (Comm'r Pats. 1991).

The USPTO will accept an allegation of actual use in commerce as meeting the requirement for an allegation of bona fide intention to use the mark in commerce in an extension request. *In re Vitamin Beverage Corp.*, 37 USPQ2d 1537, 1539 (Comm'r Pats. 1995).

See [TMEP §1101](#) for additional information about the requirement for an allegation of the applicant's bona fide intention to use the mark in commerce.

### **1108.02(f) Good Cause Required for Extensions Beyond the First Six-Month Extension**

No showing of good cause is required in the first request for an extension of time to file a statement of use, but each subsequent extension request must include a showing of good cause. *See* 15 U.S.C. §1051(d)(2); 37 C.F.R. §§2.89(a), 2.89(b)(4), 2.89(d). The showing of good cause must include a statement of the applicant's ongoing efforts to make use of the mark in commerce on or in connection with each of the goods/services covered by the extension request. 37 C.F.R. §2.89(d). Efforts to use the mark in commerce may include product or service research or development, market research, manufacturing activities, promotional activities, steps to acquire distributors, steps to obtain required governmental approval, or other similar activities. *Id.* In the alternative, a satisfactory explanation for the failure to make such efforts may be submitted. *Id.*

A mere assertion that the applicant is engaged in ongoing efforts is not enough; the efforts must be specified. *In re Comdial Corp.*, 32 USPQ2d 1863, 1864 (Comm'r Pats. 1993). However, the USPTO will not require a detailed explanation or evidence in a showing of good cause. The statement concerning good cause only has to refer to the types of activities listed in the rule or similar types of activities. For example, the applicant may simply state that the applicant is engaged in manufacturing and promotional activities.

The applicant may also satisfy the requirement for a showing of good cause by asserting that the applicant believes it has made valid use of the mark in commerce and (1) is in the process of preparing a statement of use but may need additional time to file it, or (2) is concurrently filing a statement of use but is requesting the extension of time to file a statement of use in case the USPTO finds the original statement of use to be fatally defective. However, such a statement will be accepted only once as a statement of the applicant's ongoing efforts to make use of the mark in commerce. Repetition of these same allegations in a subsequent extension request is not, without more, deemed to be a statement of the applicant's ongoing efforts, as required by 37 C.F.R. §2.89(d). *In re SPARC Int'l Inc.*, 33 USPQ2d 1479, 1480 (Comm'r Pats. 1993), *partially overruled on other grounds, by In re El Taurino Rest., Inc.*, 41 USPQ2d 1220 (Comm'r Pats. 1996). If these allegations are repeated, the extension request will be denied.

If an extension request does not include a showing of good cause, or if the showing of good cause in an extension request is deemed insufficient, the ITU staff will issue an Office action denying the extension

request but granting the applicant thirty days to overcome the denial by submitting a verified showing of good cause (or a substitute extension request that includes a showing of good cause). This showing may be submitted even if the statutory period for filing the statement of use has expired.

### **1108.03 Only One Extension Request May Be Filed with or After a Statement of Use**

An applicant may file a request for an extension of time to file a statement of use with a statement of use, or after filing the statement of use if there is time remaining in the existing six-month period in which the statement of use was filed, provided that granting the extension request would not extend the time for filing the statement of use more than thirty-six months beyond the issuance of the notice of allowance. 37 C.F.R. §2.89(e)(1). *The applicant may not request any further extensions of time after this request. Id.*

The purpose of such a request, sometimes called an “insurance” extension request, is to secure additional time to correct any deficiency in the statement of use that must be corrected before the expiration of the deadline for filing the statement of use. See [TMPEP §1109.16\(a\)](#) regarding the deficiencies that must be cured before expiration of the statutory filing period. Consider the following examples:

*Example:* If the notice of allowance was issued February 6, 2009, and the applicant files a statement of use on August 6, 2009 (but does not file an “insurance” extension request), the applicant has until August 6, 2009 to cure any deficiency that must be corrected before the expiration of the statutory period for filing the statement of use. After August 6, 2009, it is too late to file an “insurance” extension request, because no time remains in the existing six-month period in which the statement of use was filed.

*Example:* If the notice of allowance was issued February 6, 2009, the applicant could file a statement of use, together with an “insurance” extension request, on or before August 6, 2009. If the extension request were granted, this would give the applicant until February 6, 2010 to cure any deficiency that must be corrected before the expiration of the statutory filing period. No further extension request may be filed.

*Example:* If the notice of allowance was issued February 6, 2009, and the applicant filed a statement of use on February 7, 2009, the applicant could file an “insurance” extension request within the time remaining in the existing six-month period in which the statement of use was filed, i.e., on or before August 6, 2009. If the request were granted, this would give the applicant until February 6, 2010 to cure any deficiency that must be corrected before the expiration of the statutory filing period. No further extension request may be filed.

*Example:* If the notice of allowance was issued February 6, 2009, and the applicant files a request for an extension of time to file a statement of use on August 6, 2009, the applicant has until February 6, 2010 to file a statement of use or a second extension request. If the applicant files a statement of use, together with an “insurance” extension request, on or before February 6, 2010, and the extension request is granted, the applicant would have until August 6, 2010 to cure any deficiency that must be corrected before the expiration of the statutory filing period. No further extension request may be filed.

An “insurance” extension request filed with or after a statement of use must meet all relevant requirements, including payment of the applicable fee. If the request is not the first request for an extension of time, and thus a showing of good cause is required, the applicant may satisfy the requirement for a showing of good cause by asserting that the applicant believes that it has made valid use of the mark in commerce, as evidenced by the statement of use, but that if the statement of use is found to be fatally defective, the applicant will need additional time to correct defects or file a substitute statement of use. 37 C.F.R. §2.89(e)(2); [TMPEP §1108.02\(f\)](#).

The filing fee for the “insurance” extension request will not be refunded, even if the extension is not needed to perfect the statement of use.

In a multiple-class application, the “insurance” extension request must cover all of the classes stated in the notice of allowance. If the applicant intends to submit an “insurance” extension request for less than all of the classes, the applicant must either (1) identify in the extension request the classes being deleted or (2) submit a request to divide for those classes that will retain the §1(b) filing basis and a separate extension request for those classes. A request to divide may be filed electronically using TEAS. See [TMPEP §§1110–1110.11\(a\)](#) regarding a request to divide an application and [TMPEP §1110.07](#) regarding dividing

an application when the statement of use is due. If the applicant does not comply with these requirements, the ITU staff will contact the applicant to clarify the deficiencies and process the “insurance” extension request accordingly. If the ITU staff issues a letter regarding the deficiencies and the applicant fails to respond within the time permitted, the “insurance” extension request will not be processed.

If the applicant files an “insurance” extension request in conjunction with a statement of use, and the applicant submits fees sufficient for one but not both filings, the USPTO will apply the fees as follows: (1) if there is enough money to cover the extension request, the USPTO will apply the fees to the extension request to avoid abandonment of the application; or (2) if there is enough money to cover the statement of use, but not enough to cover the extension request, the USPTO will apply the fees to the statement of use. See [TMEP §1110.07](#) regarding the application of fees when an applicant submits a request to divide along with an extension request and statement of use.

If an applicant files an “insurance” extension request with a statement of use and the extension request is defective, the ITU staff will deny the request and advise the applicant of the reason for denial. If the statement of use meets the minimum requirements for examination on the merits, the ITU staff will then forward the application to the examining attorney. If there is time remaining in the current period for filing a statement of use, the applicant may file a substitute extension request.

See [TMEP §1108.03\(a\)](#) regarding the processing of an extension request after a statement of use has been referred to an examining attorney.

### **1108.03(a) Processing Extension Request Filed After Statement of Use Has Been Referred to Examining Attorney**

Under 37 C.F.R. §2.89(e)(1), an applicant may file a request for an extension of time to file a statement of use after filing a statement of use if: (1) there is time remaining in the existing six-month period in which the statement of use was filed; (2) no extension request was filed together with the statement of use; and (3) granting the extension would not extend the time for filing the statement of use more than thirty-six months beyond the issuance of the notice of allowance. See [TMEP §1108.03](#).

When an extension request is filed after the statement of use has been referred to the examining attorney, the request will be referred to the examining attorney. The USPTO will not examine the extension request unless the applicant needs the extension to perfect the statement of use.

If the examining attorney issues a requirement or refusal based on the statement of use, the examining attorney should note in the Office action that the extension request is being referred to the ITU/Divisional Unit for processing of the extension request. The filing of such an extension request is not in itself a proper response to an outstanding Office action, and does *not* extend the time for responding to an outstanding Office action. See [TMEP §§1109.16\(c\) and \(d\)](#). If the examining attorney does not issue a requirement or refusal based on the statement of use, the USPTO will not take formal action on the extension request.

The USPTO will not refund the filing fee for the extension request, even if the extension is not needed to perfect the statement of use.

### **1108.04 Recourse After Denial of Extension Request**

If an extension request is denied, the applicant will be notified of the reason(s) for denial.

To avoid abandonment of the application, the applicant must meet the minimum requirements for filing the extension request on or before the deadline for filing a statement of use.

If the USPTO denies the extension request because the applicant failed to meet minimum filing requirements on or before the statutory deadline, and there is time remaining in the applicant's existing period for filing the statement of use, the applicant may file the statement of use and/or a substitute extension request.

Otherwise, the applicant's only recourse after denial of the extension request is a petition under 37 C.F.R. §§2.89(g) and 2.146, or a petition to revive under 37 C.F.R. §2.66, if appropriate. See [TMEP §1108.05](#) regarding petitions that may be filed after the denial of an extension request.

The minimum filing requirements that must be satisfied before expiration of the statutory deadline are: (1) a verified statement, signed by a person properly authorized to sign on behalf of the applicant, that the applicant has a continued bona fide intention to use the mark in commerce; (2) an identification of the goods/services on or in connection with which the applicant has a continued bona fide intention to use the mark in commerce; and (3) payment of the prescribed fee for at least one class of goods or services. *In re El Taurino Rest., Inc.*, 41 USPQ2d 1220, 1222 (Comm'r Pats. 1996).

### **1108.05 Petitions from Denial of Request for an Extension of Time to File a Statement of Use**

If an extension request is denied, and there is no time remaining in the statutory filing period, the application is abandoned. Applicant's recourse is as follows:

- *Petition to Revive Under 37 C.F.R. §2.66.* If the applicant unintentionally failed to comply with the minimum filing requirements (see [TMEP §1108.04](#) for a list of these requirements), the applicant may file a petition to revive under 37 C.F.R. §2.66, within two months of the issuance date of the denial of the extension request, and must include the fee required by 37 C.F.R. §2.6. See [TMEP §§1714–1714.01\(g\)](#) regarding petitions to revive.
- *Request for Reinstatement.* If the applicant has proof that shows on its face that the extension request met the minimum requirements when filed, the applicant may request reinstatement within two months of the issuance date of the denial of the extension request. For example, if the extension request is denied due to the omission of a fee, and the applicant has proof that shows on its face that the fee was included, the applicant may request reinstatement. No fee is required for the reinstatement request. The request should be directed to the ITU/Divisional Unit. See [TMEP §1712.01](#) regarding the types of evidence that support reinstatement.
- *Petition Under 37 C.F.R. §2.146.* The applicant may file a petition under 37 C.F.R. §2.146 if the applicant believes that the ITU staff's denial of an extension request was improper (e.g., if applicant contends that the extension request actually met the requirements of 15 U.S.C. §1051(d)(2) and 37 C.F.R. §2.89, but was improperly denied). 37 C.F.R. §§2.89(g), 2.146(a)(3). For example, the applicant might file a petition claiming that the denial was improper if the ITU staff denied an extension request because the applicant's showing of good cause was insufficient, but applicant believes that the showing was sufficient. The applicant must file the petition within two months of the issuance date of the denial of the extension request, and must include the fee required by 37 C.F.R. §2.6. 37 C.F.R. §§2.146(c), (d). See [TMEP Chapter 1700](#) regarding petitions.

Filing a petition or request for reinstatement does not stay the time for filing a statement of use or further extension request. See 37 C.F.R. §2.89(g). However, if the applicant fails to file a statement of use or further request(s) for extension(s) of time to file a statement of use during the pendency of a petition, the applicant will be given an opportunity to perfect the petition by paying the fee(s) for each missed extension

request and filing the last extension request, or statement of use, that should have been filed. *In re Moisture Jamzz, Inc.*, 47 USPQ2d 1762, 1763-64 (Comm’r Pats. 1997).

If a petition is granted, the term of the requested six-month extension will run from the date of the expiration of the previously existing six-month period for filing a statement of use. 37 C.F.R. §2.89(g).

No petition or request for reinstatement will be granted if it would extend the deadline for filing a statement of use beyond thirty-six months after the issuance of the notice of allowance. *See* 15 U.S.C. §1051(d)(2); 37 C.F.R. §2.89(e)(1).

## **1109 Statement of Use Under §1(d) of the Trademark Act**

As noted in [TMEP §1103](#), an intent-to-use applicant must file an allegation of use in order to obtain a registration. This section discusses statements of use only. *See* [TMEP §§1104–1104.11](#) regarding amendments to allege use.

Under 15 U.S.C. §1051(d), a statement of use must be filed within six months of the issuance date of the notice of allowance, or within a previously granted extension of time to file a statement of use.

### **1109.01 Minimum Filing Requirements for a Statement of Use**

The statement of use must meet the following minimum filing requirements before it may be referred to an examining attorney for examination on the merits:

- (1) the prescribed fee for at least one class;
- (2) one specimen of the mark as used in commerce; and
- (3) a verification or declaration signed by the applicant or a person properly authorized to sign on behalf of the applicant that the mark is in use in commerce.

37 C.F.R. §2.88(e).

A statement of use that omits the allegation of use in commerce, but asserts a verified date of first use in commerce, may be accepted as substantially in compliance with the minimum filing requirement of 37 C.F.R. §2.88(e)(3) for a verified statement that the mark is in use in commerce. *In re Carnicon Dev. Co.*, 34 USPQ2d 1541, 1543 (Comm’r Pats. 1992); *see In re Conservation Tech. Inc.*, 25 USPQ2d 1079, 1080 (Comm’r Pats. 1992). The examining attorney will require an allegation that the “mark is in use in commerce” during examination. *See* [TMEP §1109.09](#).

*See* [TMEP §1109.02](#) regarding review of the statement of use for compliance with minimum filing requirements, and [TMEP §1109.06](#) regarding the requirements for a complete statement of use.

### **1109.02 Review for Compliance with Minimum Filing Requirements**

Statements of use are reviewed by the ITU/Divisional Unit to determine whether they are timely and in compliance with the minimum requirements listed in 37 C.F.R. §2.88(e). If the statement of use is untimely, either because it is premature or late, the ITU staff will notify the applicant in writing that the statement of use cannot be considered because it is untimely, and refund the filing fee.

If the statement of use is timely, but does not comply with one or more of the minimum filing requirements of 37 C.F.R. §2.88(e), the ITU staff will notify the applicant in writing of the defect and advise the applicant that the USPTO will not examine the statement of use on the merits unless the applicant corrects the defect before expiration of the deadline for filing a statement of use.

If the statement of use is filed by someone other than the owner of record, the ITU staff will issue an Office action granting the applicant thirty days in which to submit evidence to establish chain of title. See [TMEP §1109.10](#) for further information.

If the applicant does not correct the deficiency before the expiration of the statutory deadline, the application will be abandoned. In such a case, the USPTO will *not* refund the filing fee.

The applicant may not withdraw the statement of use and return the application to the previous status of awaiting filing of the statement of use, even if the statement of use fails to meet the minimum filing requirements. 37 C.F.R. §2.88(g); [TMEP §1109.17](#). However, in limited circumstances, an applicant may file an “insurance” extension request with or after the filing of a statement of use, if there is time remaining in the existing six-month period in which the statement of use was filed, in order to gain more time to comply with the statutory requirements for filing the statement of use. 37 C.F.R. §2.89(e)(1). See [TMEP §§1108.03](#) and [1109.16\(c\)](#) for further information.

### **1109.02(a) Petition to Review Refusal Based on Noncompliance with Minimum Filing Requirements**

If the ITU staff determines that a statement of use does not meet the minimum filing requirements of 37 C.F.R. §2.88(e), and there is no time remaining in the statutory filing period, the applicant’s recourse is as follows:

- *Petition to Revive Under 37 C.F.R. §2.66.* If the applicant unintentionally failed to comply with the minimum filing requirements, the applicant may file a petition to revive under 37 C.F.R. §2.66 within two months of the issuance date of the notice of abandonment. See [TMEP §§1714–1714.01\(g\)](#) regarding petitions to revive.
- *Request for Reinstatement.* If the applicant has *proof that shows on its face* that the statement of use met the minimum requirements when filed, the applicant may request reinstatement, within two months of the issuance date of the notice of abandonment. For example, if the statement of use is rejected due to the omission of a specimen or fee, and the applicant has proof that shows on its face that the missing element was included, the applicant may request reinstatement. No fee is required. The request should be directed to the ITU/Divisional Unit. See [TMEP §1712.01](#) regarding the types of evidence that support reinstatement.
- *Petition Under 37 C.F.R. §2.146.* If the applicant contends that the statement of use met the minimum requirements of 37 C.F.R. §2.88(e) when filed but was improperly denied by the ITU staff, and the applicant does *not* have proof that shows *on its face* that the statement of use was complete when filed ( *see* [TMEP §1712.01](#)), the applicant may file a petition under 37 C.F.R. §2.146(a)(3), asking the Director to review the action of the ITU staff. The petition must be filed within two months of the issuance date of the notice of abandonment, and must include the petition fee required by 37 C.F.R. §2.6, proof in the form of an affidavit or declaration under 37 C.F.R. §2.20, and any available evidence showing that the statement of use was complete when filed. TMEP §§2.146(c), (d). See [TMEP §1705.03](#) regarding proof of facts on petition.

No petition or request for reinstatement will be granted if it would extend the deadline for filing a statement of use beyond thirty-six months after the issuance of the notice of allowance. *See* 15 U.S.C. §1051(d)(2).

### **1109.03 Use on All Goods/Services Required Before Filing**

The applicant may not file a statement of use until the applicant has made use of the mark in commerce on or in connection with *all* goods/services specified in the notice of allowance, unless the applicant files a request to divide. 37 C.F.R. §2.88(c). *See* [TMEP §§1110–1110.11\(a\)](#) regarding requests to divide.

If the applicant files a statement of use for some of the goods/services identified in the notice of allowance, and a request for an extension of time to file a statement of use for other goods/services that are identified in the notice of allowance, but does not file a request to divide, the ITU/Divisional Unit will issue an Office action granting the applicant additional time to either: (1) file a request to divide, or (2) delete the goods/services that are not in use from the application. If the applicant met the minimum requirements for filing the statement of use and extension request before expiration of the deadline for filing the statement of use, the applicant may file the request to divide after expiration of the statutory deadline for filing the statement of use. If the applicant does not file an acceptable request to divide within the time specified in the Office action, the goods/services that are not covered by the statement of use will be deleted from the application.

*See* [TMEP §1109.13](#) regarding examination of a statement of use that omits, but does not expressly delete, some of the goods/services identified in the notice of allowance.

### **1109.04 Time for Filing Statement of Use**

The statement of use must be filed within six months after the issuance date of the notice of allowance or within a previously granted extension of time for filing a statement of use. *See* [TMEP §§1108–1108.05](#) regarding extension requests.

If the applicant does not timely file a statement of use within this time period, the application is abandoned. 15 U.S.C. §1051(d)(4); 37 C.F.R. §2.88(h). If the failure to timely file a statement of use is unintentional, the applicant may file a petition to revive under 37 C.F.R. §2.66. *See* [TMEP §§1714–1714.01\(g\)](#).

A statement of use filed through TEAS is considered to have been filed on the date the USPTO receives the transmission, regardless of whether that date is a Saturday, Sunday, or federal holiday within the District of Columbia. 37 C.F.R. §2.195(a)(2).

A statement of use filed on paper is considered timely if it is received in the Office by the due date or mailed or transmitted by the due date with a certificate of mailing or facsimile transmission in accordance with 37 C.F.R. §2.197. *See* [TMEP §§305.02](#) and [306.05](#) for certificate of mailing and certificate of facsimile transmission procedures to avoid lateness.

Any statement of use filed after the examining attorney approves the mark for publication but before the issuance of the notice of allowance is untimely and will not be considered. The USPTO will refund the filing fee. 37 C.F.R. §§2.76(a), 2.88(a); *see* [TMEP §§1104.03\(b\), \(c\)](#).

### 1109.05 Form of Statement of Use

To expedite processing, it is recommended that the statement of use be filed through TEAS, available at <http://www.uspto.gov>. When a statement of use is filed electronically, TEAS almost immediately displays a “Success” page that confirms receipt. This page is evidence of filing should any question arise as to the filing date of the document, and it may be printed or copied-and-pasted into an electronic record for storage. TEAS also separately sends an e-mail acknowledgement of receipt, which includes a summary of the filed information.

Alternatively, the applicant may call the Trademark Assistance Center at (571) 272-9250 or (800) 786-9199 to obtain a pre-printed paper form. The completed form may be mailed, faxed, or hand-delivered to the USPTO. If the form is faxed, it must be accompanied by an authorization to charge the filing fee to a credit card or deposit account. The credit card authorization form is available at <http://www.uspto.gov/web/forms/2038.pdf>. If a statement of use is filed through TEAS, payment must be made by credit card, deposit account, or EFT. Paper forms may be delivered by hand or courier to the Trademark Assistance Center (“TAC”), at James Madison Building, East Wing, Concourse Level, 600 Dulany Street, Alexandria, Virginia. TAC is open 8:30 a.m. to 5:00 p.m., Eastern Time, Monday through Friday, except on Federal holidays within the District of Columbia.

If the applicant does not file electronically or use the USPTO’s pre-printed paper form, the statement of use should be captioned as an “Allegation of Use.” 37 C.F.R. §2.88(d). However, this format is not mandatory. The USPTO will accept and enter a document that meets the minimum filing requirements set forth in 37 C.F.R. §2.88(e), regardless of whether it is properly titled.

### 1109.06 Requirements for a Complete Statement of Use

A *complete* statement of use must include the following elements:

- (1) a verified statement that the applicant is believed to be the owner of the mark and that the mark is in use in commerce on or in connection with the goods or services, specifying the dates of the applicant’s first use of the mark and first use of the mark in commerce, and setting forth or incorporating by reference those goods/services specified in the notice of allowance on or in connection with which the mark is in use in commerce;
- (2) one specimen per class of the mark as used in commerce; and
- (3) the fee per class required by 37 C.F.R. §2.6.

37 C.F.R. §2.88(b).

### 1109.07 Examination of the Statement of Use — In General

If the statement of use is timely and complies with the minimum filing requirements of 37 C.F.R. §2.88(e), the ITU staff will refer it to the examining attorney for examination on the merits. If available, the same examining attorney who initially examined the application will examine the statement of use. Examination of the statement of use is sometimes referred to as “second examination.”

The examining attorney will review the statement of use to confirm that it meets the requirements of the Act and the rules. See [TMEP §1109.06](#) for the requirements for a complete statement of use.

The examining attorney will examine the specimen to confirm that it shows appropriate use as a mark on or in connection with the goods/services identified in the statement of use (see [TMEP §§1202–1202.17\(e\)\(vi\)](#) regarding use of subject matter as a trademark, and [TMEP §§1301.02–1301.02\(f\)](#) regarding use of matter as a service mark), and will also determine whether the mark shown on the drawing is a substantially exact representation of the mark as used on the specimen ( see [TMEP §§807.12\(a\)–807.12\(a\)\(iii\)](#), and [1109.12](#)).

If the applicant has complied with the statutory requirements for a statement of use before the expiration of the deadline for filing the statement of use, the applicant may amend or correct the statement of use during examination. See [TMEP §§1109.16\(a\)–\(d\)](#) regarding compliance with statutory requirements before the expiration of the time for filing the statement of use.

If the examining attorney finds the statement of use acceptable, the USPTO will notify the applicant that the statement of use is approved. See [TMEP §1109.18](#) regarding approval of the statement of use. The USPTO will then issue the registration and publish notice of the registration in the *Official Gazette*. The application is not again subject to opposition.

See [TMEP §1109.15](#) regarding statements of use filed on paper for multiple-class applications and [TMEP §§1109.16–1109.16\(d\)](#) regarding the issuance of Office actions and correction of defects in a statement of use.

### **1109.08 Examination of the Statement of Use – New Requirements and Refusals**

Generally, in examining the statement of use, the USPTO will issue only requirements or refusals concerning matters related to the statement of use. The examining attorney should not make a requirement or refusal concerning matters that could or should have been raised during initial examination, unless the failure to do so in initial examination constitutes a clear error, i.e., would result in issuance of a registration in violation of the Act or applicable rules. See [TMEP §706.01](#) regarding “clear error.”

If the examining attorney determines that he or she must make a refusal or requirement that could or should have been made during initial examination of the application, the examining attorney must consult the managing attorney or senior attorney before taking the action. This applies to any refusal that arguably could or should have been made during initial examination, such as most refusals under §2(d) or §2(e)(1) of the Act.

The examining attorney must act on all new issues arising in the examination of the statement of use. For example:

- The examining attorney must issue a refusal if the specimen fails to show use of the designation as a mark. See [TMEP §§1202–1202.17\(e\)\(vi\)](#) and [1301.02–1301.02\(f\)](#) regarding use as a mark.
- The examining attorney must issue an appropriate refusal or requirement if there is evidence that the mark has become descriptive or generic as applied to the goods/services during the time that has elapsed since initial examination.

Generally, the USPTO will not conduct any search for conflicting marks or issue any refusals under §2(d) of the Act in the examination of the statement of use. However, if the examining attorney determines that

a second search is necessary, the examining attorney will conduct a second search and take any action that is appropriate.

### **1109.09 Use in Commerce**

The filing of a verified statement that “the mark is in use in commerce” is a minimum requirement that must be satisfied before the expiration of the statutory period for filing the statement of use. 15 U.S.C. §1051(d)(1); 37 C.F.R. §2.88(e)(3). If the examining attorney determines, before taking an action in connection with the statement of use, that the verified statement of use in commerce has been omitted, the examining attorney should refer the application to the ITU/Divisional Unit for appropriate action.

An application that omits the allegation of use in commerce, but asserts a verified date of first use in commerce, is considered to be substantially in compliance with the minimum filing requirements under 37 C.F.R. §2.88(e)(3). *In re Carnicon Dev. Co.*, 34 USPQ2d 1541 (Comm’r Pats. 1992); *see also In re Conservation Tech. Inc.*, 25 USPQ2d 1079 (Comm’r Pats. 1992). Thus, if the applicant files a statement containing a verified date of first use *in commerce* on or before the expiration of the period for filing the statement of use, the applicant has met the minimum filing requirements. The examining attorney must require a verified statement that the “mark is in use in commerce” before approving the statement of use. This statement may be filed after expiration of the deadline for filing the statement of use, within the period for response to the examining attorney’s Office action.

An applicant is not required to specify the method of use or the type of commerce in which a mark is used. [TMEP §§901.03, 905.](#)

### **1109.09(a) Dates of Use**

The statement of use must include the dates of the applicant’s first use of the mark and first use of the mark in commerce on or in connection with the goods/services specified in the notice of allowance. 15 U.S.C. §1051(d)(1); 37 C.F.R. §2.88(b)(1)(ii). Where the applicant claims a §1(a) filing basis for some of the goods/services and a §1(b) filing basis for other goods/services, the statement of use must include dates of use for the §1(b) goods/services that are covered by the notice of allowance. 37 C.F.R. §2.88(b)(1)(ii). *See* [TMEP §903.08](#) regarding applications in which more than one date is specified for a particular class.

Setting forth the dates of use is not a minimum filing requirement that must be met before the application will be referred to the examining attorney. If the dates of use are omitted from the statement of use, but the statement that “the mark is in use in commerce” is included, the dates may be supplied after the expiration of the statutory period for filing the statement of use. The applicant may also amend or correct the dates of use after the expiration of the deadline for filing the statement of use, if the applicant meets the requirements of 37 C.F.R. §2.71(c)(2). Any amendment to the dates of use must be verified. 37 C.F.R. §2.71(c).

The date of first use in commerce may not be earlier than the date of first use anywhere. [TMEP §903.03.](#)

The applicant must state dates of use for each class. 37 C.F.R. §2.86(b). The dates of first use for each class must apply to at least one item in the class but do not have to apply to more than one item. However, the applicant must have used the mark in commerce on all items listed in the notice of allowance before filing the statement of use, unless the applicant files a request to divide. 37 C.F.R. §2.86(b), 2.88(c); [TMEP §1109.03](#). *See* [TMEP §1110.07](#) regarding the division of an application in which a statement of use is due.

While the dates of use may be supplied after expiration of the statutory filing period, the applicant must make valid use of the mark in commerce on or in connection with all the goods/services in the application before the expiration of the statutory filing period. *See* 37 C.F.R. §2.71(c)(2). If the applicant attempts to amend the dates of use to state a date of first use in commerce that is later than the time permitted for filing the statement of use, the examining attorney must refuse registration because the applicant failed to make use within the time permitted, and also inform the applicant that the application is deemed abandoned. When refusing registration on this ground, the examining attorney must issue a regular Office action with a six-month response clause. *See* [TMEP §1109.16\(b\)](#).

### **1109.09(b) Specimens**

The examining attorney must examine the specimens to confirm that they show use of the subject matter as a mark on or in connection with the goods/services identified in the statement of use. *See* TMEP §§[1202–1202.17\(e\)\(vi\)](#) regarding use of subject matter as a trademark, and TMEP §§[1301.02–1301.02\(f\)](#) regarding use of matter as a service mark. The examining attorney must also determine whether the mark as used on the specimens is a substantially exact representation of the mark on the drawing. *See* TMEP §§[807.12\(a\)–807.12\(a\)\(iii\)](#), [1109.12](#). The examining attorney must issue requirements and refusals, as appropriate, based on the examination of the specimens, subject to the same standards that govern the examination of specimens in a §1(a) application. [TMEP §§904–904.07\(b\)](#).

The submission of at least one specimen with a statement of use is a minimum filing requirement. 15 U.S.C. §1051(d)(1); 37 C.F.R. §2.88(e)(2); *In re Campbell*, 33 USPQ2d 1055 (Comm’r Pats. 1993). If the examining attorney determines, before taking an action regarding the statement of use, that no specimen was submitted with the statement of use, the examining attorney should refer the application to the ITU/Divisional Unit for appropriate action.

In a multiple-class application, the applicant must submit one specimen for each class of goods/services in the statement of use before the statement of use may be approved. 37 C.F.R. §§2.86(b), 2.88(b)(2). However, only one specimen for one class is needed to comply with the minimum filing requirements. If at least one specimen is filed within the time permitted for filing the statement of use, the applicant may submit specimen(s) for the other class(es) after the expiration of the statutory filing period, if the applicant verifies that the additional specimen(s) was in use in commerce before the expiration of the deadline for filing the statement of use. 37 C.F.R. §2.59(b).

If the applicant files at least one specimen with the statement of use, but the specimen is unacceptable, the applicant may provide a substitute specimen after the expiration of the time permitted for filing the statement of use, provided that the applicant verifies that the substitute specimen was in use in commerce before the expiration of the deadline for filing the statement of use. 37 C.F.R. §2.59(b). If the applicant does not provide an acceptable specimen that was in use in commerce before the expiration of the deadline, the examining attorney must refuse registration because the applicant failed to make use of the mark within the time permitted, and inform the applicant that the application is deemed abandoned. The examining attorney must issue a regular Office action with a six-month response clause. [TMEP §1109.16\(b\)](#). *See* [TMEP §1108.03](#) regarding the filing of an “insurance” request for an extension of time to file a statement of use in order to gain additional time to make proper use of the mark.

If the dates of first use change as a result of the submission of a new specimen, the applicant must amend the dates of use in the statement of use. The amendment must be supported by an affidavit or declaration. 37 C.F.R. §2.71(c); [TMEP §1109.09\(a\)](#).

If the statement of use is filed electronically using TEAS, the applicant must submit a digitized image of the specimen in .jpg or .pdf format. 37 C.F.R. §2.56(d)(4). See [TMEP §904.02\(a\)](#) for additional information about electronically filed specimens.

## 1109.10 Ownership

### *Review by the ITU/Divisional Unit*

Section 1(d)(1) of the Trademark Act, 15 U.S.C. §1051(d)(1), requires that “the applicant shall file ... a verified statement that the mark is in use in commerce ...” within six months of the notice of allowance, or within a previously granted extension of time to file a statement of use. The party filing the statement of use must be the owner of the mark at the time of filing. This is a statutory requirement that must be satisfied before the expiration of the deadline for filing the statement of use. *In re Colombo, Inc.*, 33 USPQ2d 1530 (Comm’r Pats. 1994).

If the party who files a statement of use was the owner of the mark at the time of filing, evidence to establish ownership may be provided after expiration of the deadline for filing the statement of use. However, if the party who files a statement of use was not the owner of the mark at the time of filing, and no time remains in the statutory period for filing the statement of use, the application is abandoned.

The question of whether the statement of use was filed by the owner is determined by the ITU/Divisional Unit. If a statement of use is filed by someone other than the owner of record, the ITU staff will issue an Office action granting the applicant thirty days in which to submit evidence to establish chain of title. If the party who filed the statement of use was the owner at the time of filing, evidence to establish ownership may be provided after expiration of the deadline for filing the statement of use. See 37 C.F.R. §§3.71(d), 3.73(b). To establish ownership, the new owner must either: (1) record an assignment or other document of title with the Assignment Recordation Branch, and include a statement in the response to the Office action that the document has been recorded; or (2) submit other evidence of ownership, in the form of a document transferring ownership from one party to another, or an explanation, supported by an affidavit or declaration under 37 C.F.R. §2.20, that a valid transfer of legal title occurred prior to filing the statement of use. 37 C.F.R. §3.73(b)(1); [TMEP §502.01](#).

If the applicant does not establish that the party who filed the statement of use was the owner of the application at the time of filing, the ITU/Divisional Unit will abandon the application. The true owner may then file a petition to revive under 37 C.F.R. §2.66, accompanied by either a substitute statement of use or request for extension of time to file a statement of use, provided that granting the petition would not extend the period for filing the statement of use beyond thirty-six months after the issuance date of the notice of allowance. See [TMEP §1714.01\(b\)](#) regarding the requirements for petitions to revive.

If a statement of use is filed by the owner of the mark, but there is a minor error in the manner in which the name of the owner is set out, the mistake may be corrected by amendment. See [TMEP §1201.02\(c\)](#) for examples of correctable and non-correctable errors.

### *Review by Examining Attorney*

If an examining attorney determines, *before* taking an action in connection with the statement of use, that the statement of use was filed by someone other than the owner of record, the examining attorney should return the statement of use to the ITU/Divisional Unit for appropriate action.

If the examining attorney determines, *after* taking an action regarding the statement of use, that the statement of use was filed by someone other than the owner of record, the examining attorney must require the applicant to submit evidence to establish chain of title, as discussed above. If the party who filed the statement of use was not the owner of the mark at the time of filing, and no time remains in the statutory period for filing the statement of use, the examining attorney must refuse registration because no acceptable statement of use was filed within the time permitted, and inform the applicant that the application is deemed abandoned.

When refusing registration on this ground, the examining attorney must issue a regular Office action with a six-month response clause. See [TMEP §1109.16\(b\)](#).

### **1109.11 Verification and Execution**

The requirement that a statement of use include a signed verification or declaration is a minimum filing requirement. 15 U.S.C. §1051(d)(1); 37 C.F.R. §2.88(e)(3); *In re Kinsman*, 33 USPQ2d 1057 (Comm'r Pats. 1993).

If, before taking an action in connection with the statement of use, the examining attorney determines that the statement of use does not include a signed verification or declaration, the examining attorney should return the application to the ITU/Divisional Unit for appropriate action.

#### **1109.11(a) Authority of Signatory**

A statement of use must include a statement that is signed and verified by a person properly authorized to sign on behalf of the applicant under 37 C.F.R. §2.193(e)(1). 37 C.F.R. §2.88(b)(1). Anyone who can verify the initial application may verify the statement of use. Generally, if the statement of use is filed by the owner of the mark, the USPTO will not question the authority of the person who signs a verification unless there is an inconsistency in the record as to the signatory's authority to sign. See [TMEP §611.03\(a\)](#).

#### **1109.11(b) Verification of Essential Elements**

The examining attorney must review the verified statement of use to confirm that it conforms to the requirements of the Act and the rules. The verified statement must include an allegation that the applicant believes it is the owner of the mark, and a verification of the dates of use and identification of the goods/services. 15 U.S.C. §1051(d)(1); 37 C.F.R. §2.88(b)(1). See [TMEP §1109.10](#) regarding ownership, [TMEP §1109.09\(a\)](#) regarding dates of use, and [TMEP §1109.13](#) regarding the identification of goods/services.

The averment of ownership is an essential element of the verification. 37 C.F.R. §2.88(b)(1)(i). If it is omitted, the examining attorney must require the applicant to submit a verified statement that the applicant is the owner of the mark. This statement may be submitted after expiration of the time for filing the statement of use.

#### **1109.11(c) Date of Execution**

If the statement of use was executed before the stated dates of use, the examining attorney must require that the statement be re-executed. See [TMEP §903.06\(a\)](#) regarding apparent discrepancies between dates of use and execution dates, and [TMEP §§903.04](#) and [1109.09\(a\)](#) regarding amendment of the dates of use.

If the statement of use is filed more than one year after the date of execution, the examining attorney will require a substitute verification or declaration under 37 C.F.R. §2.20 stating that the mark is still in use in commerce. See 37 C.F.R. §2.88(k); [TMEP §804.03](#).

#### **1109.11(d) Signature of Electronically Transmitted Statement of Use**

See [TMEP §611.01\(c\)](#) regarding signature of documents filed through TEAS.

#### **1109.12 Drawing**

Under 37 C.F.R. §2.51(b), the drawing in an intent-to-use application must be a substantially exact representation of the mark as intended to be used *and* as actually used upon filing the allegation of use. An applicant may not amend the mark in a drawing if the amendment is a material alteration of the mark on the drawing originally submitted with the application. 37 C.F.R. §2.72(b)(2); [TMEP §§807.13\(a\), 807.14–807.14\(f\)](#). Also, the mark in the drawing must agree with the mark as used on the specimen(s). [TMEP §§807.12\(a\)–807.12\(a\)\(iii\)](#). The same standards that apply to §1(a) applications for determining whether a specimen supports use of the mark and whether an amendment to the mark may be permitted also apply in the examination of the statement of use.

Therefore, if the mark in the drawing filed with the application is not a substantially exact representation of the mark as used on the specimen, the examining attorney must require: (1) *either* submission of a new specimen *or* an amendment of the mark in the drawing, if the amendment of the mark would not be a material alteration of the mark on the original drawing; or (2) submission of a new specimen, if the amendment of the mark would be a material alteration of the mark on the original drawing. 37 C.F.R. §2.72(b)(2).

#### **1109.13 Identification of Goods/Services in Statement of Use**

The statement of use must either list or incorporate by reference the goods/services specified in the notice of allowance on or in connection with which the mark is in use in commerce. 15 U.S.C. §1051(d)(1); 37 C.F.R. §2.88(b)(1)(ii). The goods/services specified in the statement of use must conform to the goods/services identified in the notice of allowance. 37 C.F.R. §2.88(i)(1). To incorporate the goods/services by reference, the applicant may state that the mark is in use on “those goods/services identified in the notice of allowance” or “those goods/services identified in the notice of allowance except ... [followed by an identification of the goods/services to be deleted].” If the applicant omits any goods/services that were listed in the notice of allowance, the ITU/Divisional Unit will delete these goods/services from the application. The applicant may not thereafter reinsert the deleted goods/services. 37 C.F.R. §2.88(i)(2). In this situation, the applicant cannot file a petition under 37 C.F.R. §2.66, claiming unintentional delay in filing a statement of use for the omitted goods/services.

If the applicant fails to identify or incorporate by reference any goods or services, or if the applicant lists all the goods/services in the section of a pre-printed paper form designated for the identification of goods that are not in use, the Office will permit applicant to correct the mistake. The ITU staff will issue a letter

noting that no goods or services were specified or incorporated by reference in the statement of use, and granting the applicant thirty days in which to submit a verified statement clarifying the goods/services.

### 1109.14 Classification

If the mark published in the wrong class of the goods/services, the examining attorney must ensure that the classification is corrected. This may be done in an examiner's amendment without prior approval by the applicant ( *see* [TMEP §707.02](#)). Republication is not required.

If class(es) are added to the application after the filing of the statement of use, the examining attorney must require payment of the fee(s) for filing the statement of use for the added class(es), in addition to the fee(s) required by 37 C.F.R. §2.6(a)(1) for adding a class(es) to the application. [TMEP §1403.02\(c\)](#).

### 1109.15 Filing Fees

Payment of the filing fee for at least a single class is a minimum filing requirement. *See* 37 C.F.R. §§2.88(b)(3), (e)(i); *In re L.R. Sport Inc.*, 25 USPQ2d 1533 (Comm'r Pats. 1992).

In a multiple-class application, if the applicant files a statement of use electronically, TEAS will require payment of the fees for all classes. However, if the applicant files a statement of use for a multiple-class application on paper and includes the fee for only one class of goods/services, the ITU staff will issue an Office action granting the applicant 30 days in which to submit the missing fees to cover *all* classes or specify the class(es) to be abandoned. The additional fees may be paid after the time for filing the statement of use has expired, within the period for response to the Office action. If the applicant does not submit the fees or specify the classes to be abandoned within the set time period, the USPTO will apply the fees paid to the lowest-numbered class(es) in ascending order, and will delete the goods/services in the higher-numbered class(es) from the application. 37 C.F.R. §2.88(b)(3).

If an applicant files a statement of use and a request to divide the application at the same time, and the fees submitted are sufficient for one but not both, the fees will be applied first to the statement of use, and the applicant will be notified of the deficiency. *See* [TMEP §§1110.02](#) and [1110.07](#) for further information about filing fees for requests to divide.

If the applicant files an "insurance" extension request in conjunction with a statement of use ( *see* [TMEP §1108.03](#)), and the applicant submits fees sufficient for one but not both, the USPTO will apply the fees as follows: (1) if there is enough money to cover the extension request, the USPTO will apply the fees to the extension request to avoid abandonment of the application; or (2) if there is enough money to cover the statement of use, but not enough to cover the extension request, the USPTO will apply the fees to the statement of use.

*See* [TMEP §1109.15\(a\)](#) regarding returned checks, EFT and credit card payments that are refused by financial institutions, and fees charged to deposit accounts with insufficient funds.

#### 1109.15(a) Processing Deficient Fees

If the filing fee for at least a single class is deficient (e.g., if the fee is charged to a deposit account with insufficient funds, an EFT or credit card payment is refused or charged back by a financial institution, or a check is returned unpaid), the fee for at least one class of goods/services must be repaid before the expiration of the statutory filing period, or the application will be abandoned.

If a check is returned unpaid or an EFT or credit card payment is refused, and the statement of use was accompanied by an authorization to charge deficient fee(s) to a deposit account (37 C.F.R. §2.208) that has sufficient funds to cover the fee, the USPTO will charge the filing fee for the statement of use and the fee for processing the returned check or refused payment (37 C.F.R. §2.6(b)(12)) to the deposit account.

If the examining attorney determines, *before* taking an action regarding the statement of use, that the filing fee for at least a single class of goods or services has not been paid, the examining attorney should e-mail the ITU/Divisional Unit and request that the SOU Processing Complete status be withdrawn and that the ITU staff notify the applicant in writing of the defect. See [TMEP §1109.15](#).

If the examining attorney determines, *after* taking an action regarding the statement of use, that the filing fee for at least a single class of goods or services has not been paid, and there is time remaining in the statutory period for filing the statement of use, the examining attorney will issue an Office action refusing registration on the ground that the filing fee for the statement of use was not paid and will require the applicant to submit the filing fee on or before the statutory deadline. If the fee was not paid because a check was returned unpaid, or an EFT or credit card was refused, the examining attorney will also require submission of the processing fee required by 37 C.F.R. §2.6(b)(12). The processing fee may be paid after expiration of the statutory deadline for filing the statement of use.

If the fee for at least a single class has not been paid, and there is no time remaining in the statutory period for filing the statement of use, the examining attorney will issue an Office action refusing registration and stating that the application is abandoned because a proper statement of use was not filed within the time required by statute. 37 C.F.R. §§2.88(e)(1), (h). In such a case, the examining attorney must issue a regular Office action, with a six-month response clause. If the applicant does not establish within the six-month response period that the fee for at least a single class of goods/services was paid prior to the expiration of the statutory filing period, the application will be abandoned.

If the fee for at least a single class is paid before expiration of the statutory deadline, but the fee(s) for additional class(es) are deficient, the examining attorney will issue an Office action requiring the applicant to submit the missing fees to cover *all* class(es) or specify the class(es) to be abandoned. The additional fees may be paid after the time for filing the statement of use has expired, within the six-month period for response to the examining attorney's Office action. If the applicant does not submit the fees or specify the classes to be abandoned within the set time period, the USPTO will apply the fees paid to the lowest-numbered class(es) in ascending order, and will delete the goods/services in the higher-numbered class(es) from the application. 37 C.F.R. §2.88(b)(3).

If the statement of use has been approved and the mark is registered when the Office learns that the fee for the statement of use was deficient, the USPTO will cancel the registration as inadvertently issued, because the statutory requirements for registration have not been met. If the fee for at least a single class of goods/services was not paid before the expiration of the statutory filing period, the application will be abandoned. If the fee for at least a single class of goods/services was timely paid, but the fees for additional class(es) have not been paid, the USPTO will restore the application to pendency and refer it to the examining attorney for appropriate action.

See [TMEP §405.06](#) regarding payments that are refused.

## 1109.16 Correcting Defects in Statement of Use

The applicant must comply with the statutory requirements for filing a statement of use (37 C.F.R. §2.88(b)) before the expiration of the deadline for filing the statement of use (i.e., within six months of the issuance date of the notice of allowance or before the expiration of an extension of time for filing a statement of use).

Other defects may be cured after the expiration of the statutory filing period, within the period for response to the Office action notifying the applicant of the defect. See [TMEP §1109.16\(a\)](#) regarding defects that must be cured before the expiration of the statutory filing period.

### 1109.16(a) Statutory Requirements that Must Be Met Within Statutory Filing Period

The applicant must comply with the statutory requirements for filing a statement of use (37 C.F.R. §2.88(b)) before expiration of the period for filing the statement of use (i.e., within six months of the issuance date of the notice of allowance or before the expiration of an extension of time for filing a statement of use). Thus, the following deficiencies must be cured before expiration of the statutory filing period:

- (1) *Specimens and Dates of Use in Commerce.* The applicant must make valid use of the mark in commerce and must provide one specimen that was in use before the expiration of the time permitted for filing the statement of use. 37 C.F.R. §2.59(b)(2). If the applicant does not provide an acceptable specimen that was in use in commerce before the expiration of the deadline for filing the statement of use, the examining attorney must refuse registration because the applicant failed to make use within the time permitted. See [TMEP §1109.09\(b\)](#). The examining attorney must refuse registration on the same grounds if the applicant attempts to amend the dates of use to state a date of first use in commerce that is later than the time permitted for filing the statement of use. 37 C.F.R. §2.71(c)(2); [TMEP §1109.09\(a\)](#).
- (2) *Filing by Owner.* The party filing the statement of use must be the owner of the mark at the time of filing. If the party who filed the statement of use was not the owner at the time of filing the statement of use, the applicant may not provide a substitute statement of use (or the equivalent) in the name of the true owner after the expiration of the deadline for filing the statement of use. *In re Colombo, Inc.*, 33 USPQ2d 1530 (Comm'r Pats. 1994). Therefore, if the party filing the statement of use was not the owner of the mark at the time of filing, and no time remains in the statutory period for filing the statement of use, the application will be abandoned for failure to file a statement of use. See [TMEP §1109.10](#) for further information.
- (3) *Verification.* The statement of use must be verified by the applicant or a person properly authorized to sign on behalf of the applicant under 37 C.F.R. §2.193(e)(1). If the statement of use is unsigned or signed by the wrong party, a substitute verification must be filed before the expiration of the statutory period for filing the statement of use. 37 C.F.R. §2.88(e)(3). Generally, however, the USPTO does not question the authority of the person who verifies a statement of use. See [TMEP §1109.11\(a\)](#).
- (4) *Filing Fee for At Least a Single Class.* Payment of the filing fee for at least a single class is a statutory requirement that must be satisfied before the expiration of the statutory period for filing the statement of use. See [TMEP §§1109.15, 1109.15\(a\)](#).

When refusing registration on the above grounds, the examining attorney must issue a regular Office action with a six-month response clause. This gives the applicant six months to establish that it met the statutory requirements on or before the expiration of the time for filing the statement of use. See [TMEP §1109.16\(b\)](#).

### **1109.16(b) Issuance of Examining Attorney’s Office Action Holding that a Statement of Use Does Not Meet the Statutory Requirements**

When the examining attorney determines that the applicant did not meet the statutory requirements within the period for filing the statement of use, the examining attorney must issue an Office action refusing registration on the ground that the applicant did not file a statement of use that meets the requirements of 15 U.S.C. §1051(d)(1). If there is time remaining in the statutory filing period, the Office action should state that the deficiency must be cured before the expiration of the deadline for filing the statement of use.

If there is no time remaining in the statutory filing period, the examining attorney must issue an Office action with a six-month response clause, stating that the application will be abandoned for failure to timely file a statement of use that meets the requirements of §1(d)(1) of the Act. Even though the statutory filing period has expired, the Office action must include a six-month response clause. This gives the applicant six months to establish that it met the statutory requirements on or before the expiration of the time for filing the statement of use.

If the applicant fails to respond to the Office action, the application will be abandoned for failure to respond.

If the applicant responds to the Office action, but does not establish that the requirements for filing a statement of use had been satisfied *as of the expiration of the deadline for filing the statement of use*, the examining attorney will make the refusal of registration final. If the applicant does not respond, the application will be abandoned for failure to respond to the final refusal.

See [TMEP §1109.16\(e\)](#) regarding the applicant’s recourse after an examining attorney’s refusal of registration on the ground that the applicant did not comply with the statutory requirements for filing the statement of use within the statutory filing period.

### **1109.16(c) Requesting an Extension of Time to File a Statement of Use for the Purpose of Compliance with Statutory Filing Requirements**

In limited circumstances, an applicant may file a request for an extension of time to file a statement of use after filing a statement of use, in order to gain more time to comply with the statutory requirements for filing the statement of use (sometimes called an “insurance” extension request). An applicant may file an extension request after filing a statement of use only if: (1) there is time remaining in the existing six-month period in which the statement of use was filed; (2) no extension request was filed together with the statement of use; *and* (3) granting the extension would not extend the time for filing the statement of use more than thirty-six months beyond the issuance of the notice of allowance. 37 C.F.R. §2.89(e)(1). See [TMEP §1108.03](#) regarding the time periods and requirements for filing an “insurance” extension request, and [TMEP §1108.03\(a\)](#) regarding the procedures for processing such a request.

The filing of an “insurance” extension request is not in itself a proper response to an Office action, and does not extend the six-month period for response to the Office action. See [TMEP §1109.16\(d\)](#).

*Example:* Assume that a notice of allowance issues July 3, 2009, the applicant files a statement of use on July 22, 2009, and the examining attorney issues an Office action requiring substitute specimens on August 6, 2009. The applicant may file an “insurance” extension request on or before

January 3, 2010, which would give the applicant until July 3, 2010 to make proper use of the mark. However, the applicant must file a response to the Office action on or before February 6, 2010. See [TMEP §1109.16\(d\)](#) for information about responding to an Office action in this situation.

### **1109.16(d) Response to Office Action Required Within Six Months of Issuance Date Regardless of Expiration Date of Period for Filing the Statement of Use**

In limited circumstances, when the applicant files a timely “insurance” extension request in conjunction with or after filing a statement of use ( *see* [TMEP §§1108.03–1108.03\(a\)](#), [1109.16\(c\)](#)) and the examining attorney has issued an Office action, the six-month period for response to the Office action will expire before the statutory deadline for filing the statement of use. To avoid abandonment, the applicant must respond within six months of the issuance date of the Office action, regardless of the expiration date of the time for filing the statement of use.

If the time for filing the statement of use expires after the time for responding to a **nonfinal** Office action, and the applicant believes that it can cure a deficiency raised in the Office action before expiration of the time for filing the statement of use, the applicant should timely respond to the Office action, stating in the response that it intends to comply with the statutory requirements for filing the statement of use on or before the expiration of the statutory filing period.

If the applicant files such a response, the examining attorney must *not* suspend the application. Instead, the examining attorney must make final any outstanding refusal or requirement. The applicant will then have six months from the issuance date of the final Office action to cure statutory deficiencies. Of course, applicant still must comply with the statutory requirements for filing the statement of use before the expiration date of the deadline for filing the statement of use.

*Example:* If the deadline for filing the statement of use expires on July 3, 2009, and the examining attorney issues a final Office action requiring substitute specimens on March 4, 2009, the applicant has until September 4, 2009 to file the substitute specimens, but the applicant must verify that the specimens were in use in commerce on or before July 3, 2009.

If the applicant files a proper response to the final Office action within six months of the date of issuance, *and* complies with the statutory requirements for filing the statement of use before the expiration of the period for filing the statement of use, the examining attorney will withdraw the refusal based on non-compliance with the statutory requirements for filing the statement of use.

If the time for filing the statement of use expires after the time for responding to a **final** Office action, and the applicant can overcome any grounds for refusal or comply with any requirement raised in the final action before expiration of the time for filing the statement of use, but not within the time for responding to the final Office action, the applicant must still file a timely response to the Office action. The response must state that the applicant intends to comply with the statutory requirements for filing the statement of use on or before the expiration of the statutory filing period and request suspension of the application. The examining attorney will then suspend the application for only the amount of time remaining in the statutory period for filing the statement of use. The applicant will then have until the end of the extension period to overcome any grounds for refusal or comply with any requirement.

*Example:* The notice of allowance issues on September 30, 2010 and a statement of use and/or extension request is due on or before March 30, 2011. The applicant files a statement of use on October 15, 2010. On November 5, 2010, the examining attorney issues an Office action regarding the acceptability of the specimen and the applicant responds on November 8, 2010 but does not correct the specimen deficiency. The examining attorney then issues a final Office action on November 29, 2010 regarding the specimen issue. If the applicant files a timely “insurance” extension request on or before March

30, 2011, this would extend the time to perfect the statement of use to September 30, 2011. However, the applicant must still respond to the final Office action by May 29, 2011 (i.e., within six months of issuance of the final Office action). The response must include a request to suspend the application or the application will be abandoned for failure to respond. The examining attorney would then suspend the application until September 30, 2011, which is the date of expiration of the extension period and the deadline for complying with the statutory requirements for a statement of use.

If the applicant files a response to the final Office action prior to the expiration of the statutory period for filing a statement of use, and the response overcomes the grounds for refusal and/or complies with any requirement, the examining attorney will remove the application from suspension and withdraw the refusal.

If the applicant files a response to the final Office action prior to expiration of the statutory period for filing the statement of use, but the response does not overcome the grounds for refusal and/or comply with any requirement, the examining attorney must issue an “Examiner’s Subsequent Final Refusal,” thereby reissuing the final refusal, and the applicant will have six months to respond. See [TMEP §716.06](#).

### **1109.16(e) Applicant’s Recourse After Refusal of Registration**

If the applicant unintentionally fails to meet the minimum requirements for *filing* a statement of use within the time permitted, as set forth in 37 C.F.R. §2.88(e) ( *see* [TMEP §1109.01](#)), the applicant may file a petition to revive under 37 C.F.R. §2.66. However, if the applicant met the minimum filing requirements of 37 C.F.R. §2.88(e), but the examining attorney refuses registration on the ground that the applicant failed to satisfy the statutory requirements for a *complete* statement of use on or before the statutory deadline (e.g., because the specimen is unacceptable or the dates of use are subsequent to the deadline for filing the statement of use), the applicant cannot overcome the refusal by filing a petition to revive under 37 C.F.R. §2.66. [TMEP §1714.01\(f\)\(ii\)\(B\)](#). The applicant’s only recourse is to appeal the examining attorney’s refusal of registration to the Trademark Trial and Appeal Board.

See 37 C.F.R. §2.88(b) and [TMEP §1109.16\(a\)](#) regarding the statutory requirements that must be met within the statutory period for filing the statement of use (i.e., within six months of the issuance date of the notice of allowance or before the expiration of an extension of time for filing a statement of use).

### **1109.17 Withdrawal of the Statement of Use Prohibited**

Once an applicant has filed a statement of use, the applicant may not withdraw the statement of use, even if the USPTO determines that the statement of use does not comply with the minimum filing requirements. 37 C.F.R. §2.88(g); *In re Informix Software, Inc.*, 32 USPQ2d 1861 (Comm’r Pats. 1993). Thus, an applicant may not amend the basis from §1(a) to §1(b) after a statement of use has been filed.

See [TMEP §1109.16\(e\)](#) regarding the applicant’s recourse after an examining attorney’s refusal of registration on the ground that applicant did not meet the statutory requirements for filing a statement of use before the expiration of the statutory deadline.

### **1109.18 Approval of the Statement of Use**

Approval of the statement of use indicates that the mark is eligible for registration. If the examining attorney determines that the application is in condition for registration, the examining attorney will approve the mark for registration under §1(d) of the Trademark Act, 15 U.S.C. §1051(d). Before approving the mark for registration, the examining attorney must ensure that the information contained in the record is accurate,

that all amendments filed by the applicant have been examined, that material that should be printed in the *Official Gazette* and on the registration certificate has been properly entered into the Trademark database, and that material that should not be printed has been deleted from the Trademark database. See [TMEP §817](#) regarding preparation of an application for publication or registration. If an assignment has been recorded, the examining attorney should ensure that the ownership information in the Trademark database is updated to reflect the true owner of record. See [TMEP §502.02\(c\)](#). The examining attorney must also perform the appropriate transaction to ensure that the computer-generated notice of approval of the statement of use is issued.

If the applicant filed an amendment to the Supplemental Register with or after filing a statement of use, and the application is otherwise in condition to be approved for registration, the examining attorney must approve the statement of use and approve the application for registration on the Supplemental Register. See [TMEP §1102.03](#) regarding the examination of intent-to-use applications for registration on the Supplemental Register.

## 1110 Request to Divide an Application

### *37 CFR §2.87 Dividing an application.*

(a) Application may be divided. An application may be divided into two or more separate applications upon the payment of a fee for each new application created and submission by the applicant of a request in accordance with paragraph (d) of this section.

(b) Fee. In the case of a request to divide out one or more entire classes from an application, only the fee for dividing an application as set forth in §2.6(a)(19) will be required. However, in the case of a request to divide out some, but not all, of the goods or services in a class, the applicant must submit the application filing fee as set forth in §2.6(a)(1) for each new separate application to be created by the division, in addition to the fee for dividing an application.

(c) Time for filing. (1) A request to divide an application may be filed at any time between the application filing date and the date on which the trademark examining attorney approves the mark for publication; or during an opposition, concurrent use, or interference proceeding, upon motion granted by the Trademark Trial and Appeal Board.

(2) In an application under section 1(b) of the Act, a request to divide may also be filed with a statement of use under §2.88 or at any time between the filing of a statement of use and the date on which the trademark examining attorney approves the mark for registration.

(3) In a multiple-basis application, a request to divide out goods or services having a particular basis may also be filed during the period between the issuance of the notice of allowance under section 13(b)(2) of the Act and the filing of a statement of use under §2.88.

(d) Form. A request to divide an application should be made in a separate document from any other amendment or response in the application. The title "Request to Divide Application" should appear at the top of the first page of the document.

(e) Outstanding time periods apply to newly created applications. Any time period for action by the applicant which is outstanding in the original application at the time of the division will apply to each separate new application created by the division, except as follows:

(1) If an Office action pertaining to less than all the classes in a multiple-class application is outstanding, and the applicant files a request to divide out the goods, services, and/or class(es) to which the Office action does not pertain before the response deadline, a response to the Office action is not due in the new (child) application(s) created by the division of the application;

(2) If an Office action pertaining to less than all the bases in a multiple-basis application is outstanding, and the applicant files a request to divide out the goods/services having the basis or bases to which the Office action does not pertain before the response deadline, a response to the Office action is not due in the new (child) application(s) created by the division of the application; or

(3) In a multiple-basis application in which a notice of allowance has issued, if the applicant files a request to divide out the goods/services having the basis or bases to which the notice of allowance does not pertain before the deadline for filing the statement of use, the new (child) applications created by the division are not affected by the notice of allowance.

(f) Signature. The request to divide must be signed by the applicant, someone with legal authority to bind the applicant (e.g., a corporate officer or general partner of a partnership), or a practitioner who meets the requirements of §11.14, in accordance with the requirements of §2.193(e)(2).

(g) Section 66(a) applications - change of ownership with respect to some but not all of the goods or services. (1) When the International Bureau of the World Intellectual Property Organization notifies the Office that an international registration has been divided as the result of a change of ownership with respect to some but not all of the goods or services, the Office will construe the International Bureau's notice as a request to divide. The Office will record the partial change of ownership in the Assignment Services Branch, and divide out the assigned goods/services from the original (parent) application. The Office will create a new (child) application serial number, and enter the information about the new application in its automated records.

(2) To obtain a certificate of registration in the name of the new owner for the goods/services that have been divided out, the new owner must pay the fee(s) for the request to divide, as required by §2.6 and paragraph (b) of this section. The examining attorney will issue an Office action in the child application requiring the new owner to pay the required fee(s). If the owner of the child application fails to respond, the child application will be abandoned. It is not necessary for the new owner to file a separate request to divide.

(3) The Office will not divide a section 66(a) application based upon a change of ownership unless the International Bureau notifies the Office that the international registration has been divided.

### 1110.01 Application May Be Divided

Under 37 C.F.R. §2.87(a), an applicant may divide the application into two or more separate applications upon payment of the applicable fees. When dividing an application, the applicant preserves the filing date for all the goods/services covered by the application. See 37 C.F.R. §2.87(b) and [TMEP §1110.02](#) regarding the fees for a request to divide.

An applicant may request division of an application for any reason. For example, in an intent-to-use application, the applicant may wish to proceed to publication or registration with the goods/services on or in connection with which the applicant has used the mark in commerce and retain an active intent-to-use application for any remaining goods/services.

The applicant *must* file a request to divide if the applicant files an amendment to allege use before making use on all the goods/services for which applicant seeks registration under §1(b), or a statement of use before making use on all the goods/services specified in the notice of allowance for which applicant seeks registration. 37 C.F.R. §§2.76(c), 2.88(c); [TMEP §§1104.03\(a\), 1109.03](#).

### 1110.02 Fees for Filing Request to Divide

*Request to Divide Out One or More Entire Classes.* With a request to divide out one or more entire classes from an application, only the fee for dividing the application (“divisional fee”), as set forth in 37 C.F.R. §2.6(a)(19), is required. 37 C.F.R. §2.87(b). A divisional fee is required for each new (child) application created by the division of the original (parent) application. No separate application filing fee is required for any new applications created.

*Request to Divide Out Some, But Not All, of the Goods/Services in a Single Class.* A request to divide out some, but not all, of the goods/services in a single class must be accompanied by both: (1) the divisional fee for each new (child) application created by the division of the original (parent) application (37 C.F.R. §2.6(a)(19)); *and* (2) an application filing fee for each new separate application created by the division, as set forth in 37 C.F.R. §2.6(a)(1). 37 C.F.R. §2.87(b). The amount of the new application filing fee depends on the method used to file the original application and request to divide, as follows:

- If the original application was filed through TEAS Plus and the request to divide is filed through TEAS, then the new application filing fee is the same as the TEAS Plus application filing fee (37 C.F.R. §2.6(a)(1)(iii));
- If the original application was not filed through TEAS Plus, and the request to divide is filed through TEAS, then the new application filing fee is the same as the TEAS application filing fee (37 C.F.R. §2.6(a)(1)(ii));
- If the request to divide is filed on paper, then the new application filing fee is the same as the fee for filing an application on paper (37 C.F.R. §2.6(a)(1)(i)), regardless of how the original application was filed.

The current fee schedule is available on the USPTO website at <http://www.uspto.gov>.

If the request to divide does not include the required fee(s), the ITU/Divisional Unit will notify the applicant in writing of the deficiency and grant the applicant time to submit the required fees. The applicant must submit the fee(s) within the time permitted, or the request to divide will be considered abandoned and the

application will not be divided. If the applicant does not submit the necessary fees, the ITU/Divisional Unit will notify the applicant that the request to divide is considered abandoned.

See [TMEP §1110.07](#) regarding the application of fees when an applicant files a request to divide in conjunction with a statement of use and/or request for an extension of time to file a statement of use, but submits insufficient fees.

### **1110.03 Time for Filing Request to Divide**

An applicant may file a request to divide at any time between the filing of the application and the date the examining attorney approves the mark for publication; or during an opposition, concurrent use, or interference proceeding, upon motion granted by the Trademark Trial and Appeal Board. 37 C.F.R. §2.87(c)(1).

A request to divide a §1(b) application may also be filed with a statement of use, or at any time between the filing of a statement of use and the date the examining attorney approves the mark for registration. 37 C.F.R. §2.87(c)(2).

In a *multiple-basis* application, a request to divide out goods/services having a particular basis may also be filed during the period between the issuance of the notice of allowance and the filing of the statement of use. 37 C.F.R. §2.87(c)(3).

If the USPTO receives a request to divide at any other time, the USPTO will deny the request, and refund any fees submitted with the request.

### **1110.04 Form and Processing of Request to Divide**

A request to divide can be filed either on paper or through TEAS.

In TEAS, the applicant can file a request to divide directly as part of the TEAS “Allegation of Use” form, but only when the request to divide is limited to the creation of only one child application. If the applicant wishes to create more than one child application, or if the request to divide is being made in a context other than an “Allegation of Use” scenario, the applicant can still file electronically by doing the following: (1) choose the “Miscellaneous Forms” offering within TEAS, and (2) select therein the “Request to Divide Application” choice from the list of forms. A “Request to Divide Registration” offering is also available in the “Registration Maintenance/Renewal/Correction Forms” category.

A paper request to divide should be made in a separate document from any other amendment or response in the application. The title “Request to Divide Application” should appear at the top of the first page of the document. 37 C.F.R. §2.87(d).

All requests to divide must be immediately referred to the ITU/Divisional Unit for processing, unless the application is the subject of a proceeding before the Trademark Trial and Appeal Board. See [TMEP §1110.09](#) regarding requests to divide applications that are the subject of a proceeding at the Board.

In pending applications in which a request to divide is filed, the ITU/Divisional Unit will process the request to divide and ensure that the USPTO records reflect current ownership information. Because the assignment records of the parent application do not appear in the newly created child application, the ITU staff will place a copy of the Trademark Assignment Abstract of Title for the parent application in the trademark records of the child application. The abstract will be viewable via the Trademark Image Capture Retrieval

System (“TICRS”) and the Trademark Status and Document Retrieval (“TSDR”) portal on the USPTO website at <http://tsdr.uspto.gov/>. The assignment information in the parent application will remain accessible via the assignment database on the USPTO website at <http://assignments.uspto.gov/assignments>. After the request to divide is processed and the child application is created, any new recordings in the child application will appear in the assignment database. See [TMEP §501.06](#) regarding partial assignments.

### **1110.05 Outstanding Time Periods Apply to Newly Created Applications**

Any outstanding deadline in effect at the time an application is divided applies not only to the original application, but also to each separate new application created by the division of the application, **except** in the following circumstances:

- (1) If an Office action pertaining to less than all the classes in a multiple-class application is outstanding, and the applicant files a request to divide out the goods, services, and/or class(es) to which the Office action does not pertain before the response deadline, a response to the Office action is not due in the new (child) application(s) created by the division of the application;
- (2) If an Office action pertaining to less than all the bases in a multiple-basis application is outstanding, and the applicant files a request to divide out the goods/services having the basis or bases to which the Office action does not pertain before the response deadline, a response to the Office action is not due in the new (child) application(s) created by the division of the application; or
- (3) In a multiple-basis application in which a notice of allowance has issued, if the applicant files a request to divide out the goods/services having the basis or bases to which the notice of allowance does not pertain before the deadline for filing the statement of use, the new (child) application(s) created by the division is/are not affected by the notice of allowance.

37 C.F.R. §2.87(e).

### **1110.06 Signature of Request to Divide**

A request to divide must be signed by the applicant, someone with legal authority to bind the applicant (e.g., a corporate officer or general partner of a partnership), or a practitioner who meets the requirements of 37 C.F.R. §11.14 (“qualified practitioner”). 37 C.F.R. §§2.87(f), 2.193(e)(2). The ITU/Divisional Unit must ensure that the request to divide is signed by a proper party. If the applicant is represented by a qualified practitioner, the practitioner must sign the request to divide. 37 C.F.R. §§2.193(e)(2)(i), 11.18(a). If the applicant is pro se, the request must be signed by the individual applicant or someone with legal authority to bind a juristic applicant. 37 C.F.R. §§2.193(e)(2)(ii), 11.14(e). See [TMEP §§611.06\(a\)–611.06\(h\)](#) for more information about persons who have legal authority to bind various types of entities who are not represented by an attorney, and [TMEP §§611.05–611.05\(c\)](#) regarding processing documents signed by someone other than the applicant or the applicant’s designated qualified practitioner.

### **1110.07 Dividing an Application when Statement of Use Is Due**

Filing a request to divide does not extend the deadline for filing a statement of use or request for an extension of time to file a statement of use.

Any outstanding deadline in effect at the time the application is divided applies not only to the original application, but also to each new application created by the division of the application. 37 C.F.R. §2.87(e). Therefore, if a notice of allowance has issued and a statement of use is due, a statement of use, or request

for extension of time to file a statement of use, is due in each separate new application created by the division, unless the following exception applies:

- In a multiple-basis application, if the applicant files a request to divide out the goods/services having the basis or bases to which the notice of allowance does not pertain before the deadline for filing the statement of use, the new (child) application(s) created by the division are not affected by the notice of allowance. 37 C.F.R. §2.87(e)(3); [TMEP §1110.05](#).

A request to divide *must* be filed if the applicant files a statement of use before making use of the mark in commerce on all the goods/services specified in the notice of allowance as based on §1(b), unless the applicant deletes the goods/services that are not in use. 37 C.F.R. §2.88(c); [TMEP §1109.03](#).

Requests to divide are given priority in processing over any other document, with one exception: if the applicant submits a request for extension of time to file a statement of use that covers all the goods/services in the application at the same time as or before the request to divide, *and* the extension request applies to the resulting applications, the extension request will be processed first. This provides the applicant with an extension that applies to all resulting applications without requiring additional fees for extension requests.

When the applicant files a request to divide goods/services that are in use from goods/services that are not yet in use, the USPTO puts the goods/services in use in the newly created (child) application, and retains the goods/services not in use in the original (parent) application. More child applications may later be created from the parent application.

When the applicant files a request to divide goods/services based solely on §44(e) from goods/services that are not yet in use, the USPTO puts the goods/services that are based solely on §44 in a newly created (child) application, and retains the goods/services not in use in the original (parent) application.

If the applicant submits a request to divide along with a statement of use and a request for an extension of time to file a statement of use, and the fees are insufficient to cover all three, the fees will be applied first to the extension request (if there is enough to cover the extension request), second to the statement of use, and last to the request to divide. See [TMEP §1108.02\(c\)](#) regarding fee deficiencies in extension requests, [TMEP §1109.15\(a\)](#) regarding fee deficiencies in statements of use, and [TMEP §1110.02](#) regarding fee deficiencies in requests to divide.

### **1110.08 Dividing an Application when Response to Office Action Is Due**

Filing a request to divide is not a proper response to an Office action and does not relieve an applicant of the duty to respond to any outstanding Office action or to take any other required action.

Any outstanding deadline in effect at the time the application is divided applies not only to the original application, but also to each new application created by the division of the application. 37 C.F.R. §2.87(e). Therefore, if a response to an Office action is due, the response is due in each separate new application created by the division of the application, unless one of the following exceptions applies:

- (1) If the Office action pertains to less than all the classes in a multiple-class application, and the applicant files a request to divide out the goods, services, or class(es) to which the Office action does not pertain before the response deadline, a response to the Office action is not due in the new (child) application(s) created by the division of the application.

- (2) If the Office action pertains to less than all the bases in a multiple-basis application, and the applicant files a request to divide out the goods/services having the basis or bases to which the Office action does not pertain before the response deadline, a response to the Office action is not due in the new (child) application(s) created by the division of the application.

37 C.F.R. §2.87(e)(1)-(2).

If the applicant files a request to divide goods/services that are subject to a refusal from goods/services that are not subject to a refusal, the USPTO puts the goods/services that are *not* subject to refusal in the new (child) application, and retains the goods/services that *are* subject to refusal in the original (parent) application. More child applications may later be created from the parent application.

When a request to divide is filed with a response to an Office action, the response should be entered first, and then the request to divide should be referred to the ITU/Divisional Unit. The ITU/Divisional Unit will process the request and then return the application to regular processing. See [TMEP §1110.04](#) regarding the form and processing of requests to divide.

### **1110.09 Dividing an Application Subject to a Proceeding at Trademark Trial and Appeal Board**

A request to divide may be filed during an opposition, concurrent use, or interference proceeding, upon motion granted by the Trademark Trial and Appeal Board. 37 C.F.R. §2.87(c). When an application is the subject of a proceeding before the Board, any request to divide must first be referred to the Board for appropriate action. If the Board determines that the request to divide should be granted, the Board will refer the request to the ITU/Divisional Unit with instructions for dividing the application. The ITU/Divisional Unit will process the request and then return the application to regular processing. See TBMP §516.

See TBMP §§1205.02–1205.02(b) regarding the filing of a request to divide filed with or after an appeal.

### **1110.10 Dividing a §44 Application**

When the applicant divides an application that includes a claim of priority under §44(d), the separate new (child) application(s) created through the division retain the priority filing date, provided that each new application meets the requirements of §44(d). This is true even if the applicant does not ultimately perfect a §44(e) basis. See 37 C.F.R. §§2.35(b)(3)-(4); [TMEP §§806.01\(c\)](#), [806.02\(f\)](#).

When an applicant requests division of an application that includes a copy of a foreign registration, the applicant does not have to provide additional copies for each new application created by the division.

### **1110.11 Dividing a §66(a) Application**

If ownership of an international registration changes for some but not all of the goods/services, the USPTO will not divide a §66(a) application unless the International Bureau of the World Intellectual Property Organization ("IB") notifies the USPTO that the international registration has been divided. 37 C.F.R. §2.87(g)(3). See [TMEP §1110.11\(a\)](#) for further information about division of a §66(a) application after a partial change of ownership.

In all other situations, a §66(a) applicant may divide a §66(a) application into two or more separate applications, if applicant meets all the requirements of 37 C.F.R. §2.87. See [TMEP §§1110.02–1110.06](#) for further requirements for filing a request to divide.

### **1110.11(a) Dividing a §66(a) Application After Change of Ownership with Respect to Some but Not All of the Goods/Services**

When ownership of an international registration changes for some but not all of the goods/services for all designated Contracting Parties, the International Bureau of the World Intellectual Property Organization (“IB”) will create a separate new international registration for the goods/services that have been transferred, and notify the USPTO accordingly. See the IB’s *Guide to the International Registration of Marks under the Madrid Agreement and the Madrid Protocol* (2009), Para. B.II.67.01.

When the IB notifies the USPTO of the division of an international registration resulting from a change of ownership with respect to some but not all of the goods/services, the USPTO will construe the IB’s notice as a request to divide. The USPTO will record the partial change of ownership in the Assignment Recordation Branch, and divide out the assigned goods/services from the original (parent) application. The USPTO will create a new (child) application serial number, and enter the information about the new application in its automated records. 37 C.F.R. §2.87(g)(1).

To obtain a certificate of registration in the name of the new owner for the goods/services that have been divided out, the new owner must pay the required fee(s) for the request to divide. 37 C.F.R. §§2.6, 2.87(b), 2.87(g)(2). The application will be forwarded to the examining attorney to issue an Office action in the new (child) application requiring the new owner to pay the required fees. See [TMEP §1110.02](#) regarding the amount of the fee(s) for a request to divide. If the owner of the child application fails to respond, the child application will be abandoned. The USPTO will not approve the child application for publication or registration until the new owner pays the required divisional fees. It is not necessary for the new owner to file a separate request to divide.

The USPTO will not divide a §66(a) application based upon a change of ownership, unless the IB notifies the USPTO that the international registration has been divided. 37 C.F.R. §2.87(g)(3).

See [TMEP §1615.02](#) regarding division of registered extensions of protection of international registrations, and [TMEP §501.07](#) regarding assignment of extensions of protection.

### **1110.12 Division of Registrations**

See [TMEP §§1615–1615.02](#) regarding division of registrations.

# Chapter 1200 Substantive Examination of Applications

---

## 1201

### Ownership of Mark

- 1201.01 Claim of Ownership May Be Based on Use By Related Companies
- 1201.02 Identifying the Applicant in the Application
  - 1201.02(a) Identifying the Applicant Properly
  - 1201.02(b) Application Void if Wrong Party Identified as the Applicant
  - 1201.02(c) Correcting Errors in How the Applicant Is Identified
  - 1201.02(d) Operating Divisions
  - 1201.02(e) Changes in Ownership After Application Is Filed
- 1201.03 Use by Related Companies
  - 1201.03(a) Use Solely by Related Company Must be Disclosed
  - 1201.03(b) No Explanation of Applicant's Control Over Use of Mark by Related Companies Required
    - 1201.03(c) Wholly Owned Related Companies
    - 1201.03(d) Common Stockholders, Directors, or Officers
    - 1201.03(e) Sister Corporations
    - 1201.03(f) License and Franchise Situations
  - 1201.04 Inquiry Regarding Parties Named on Specimens or Elsewhere in Record
  - 1201.05 Acceptable Claim of Ownership Based on Applicant's Own Use
  - 1201.06 Special Situations Pertaining to Ownership
    - 1201.06(a) Applicant Is Merely Distributor or Importer
    - 1201.06(b) Goods Manufactured in a Country Other than Where Applicant Is Located
  - 1201.07 Related Companies and Likelihood of Confusion
    - 1201.07(a) "Single Source" – "Unity of Control"
    - 1201.07(b) Appropriate Action with Respect to Assertion of Unity of Control
      - 1201.07(b)(i) When Either Applicant or Registrant Owns All of the Other Entity
      - 1201.07(b)(ii) Joint Ownership or Ownership of Substantially All of the Other Entity
      - 1201.07(b)(iii) When the Record Does Not Support a Presumption of Unity of Control
      - 1201.07(b)(iv) When the Record Contradicts an Assertion of Unity of Control

## 1202

### Use of Subject Matter as Trademark

- 1202.01 Refusal of Matter Used Solely as a Trade Name
- 1202.02 Registration of Trade Dress
  - 1202.02(a) Functionality of Trade Dress
    - 1202.02(a)(i) Statutory Basis for Functionality Refusal
    - 1202.02(a)(ii) Purpose of Functionality Doctrine
    - 1202.02(a)(iii) Background and Definitions
      - 1202.02(a)(iii)(A) Functionality
      - 1202.02(a)(iii)(B) "De Jure" and "De Facto" Functionality
    - 1202.02(a)(iv) Burden of Proof in Functionality Determinations
    - 1202.02(a)(v) Evidence and Considerations Regarding Functionality Determinations
      - 1202.02(a)(v)(A) Utility Patents and Design Patents
      - 1202.02(a)(v)(B) Advertising, Promotional, or Explanatory Material in Functionality Determinations
      - 1202.02(a)(v)(C) Availability of Alternative Designs in Functionality Determinations
      - 1202.02(a)(v)(D) Ease or Economy of Manufacture in Functionality Determinations
    - 1202.02(a)(vi) Aesthetic Functionality
    - 1202.02(a)(vii) Functionality and Service Marks
    - 1202.02(a)(viii) Functionality and Non-Traditional Marks
  - 1202.02(b) Distinctiveness of Trade Dress
    - 1202.02(b)(i) Distinctiveness and Product Design Trade Dress
    - 1202.02(b)(ii) Distinctiveness and Product Packaging Trade Dress
    - 1202.02(c) Drawings, Descriptions, and Disclaimers in Trade Dress Applications

1202.02(c)(i)	Drawings of Trade Dress Marks
1202.02(c)(i)(A)	Functional Matter
1202.02(c)(i)(B)	Nondistinctive Matter
1202.02(c)(i)(C)	Drawings in §44 and §66(a) Applications
1202.02(c)(ii)	Descriptions of Trade Dress Marks Required
1202.02(c)(iii)	Disclaimers of Unregistrable Elements of Trade Dress Marks
1202.02(c)(iii)(A)	Functional Matter
1202.02(c)(iii)(B)	Nondistinctive Matter
1202.02(c)(iv)	Three-Dimensional Marks
1202.02(d)	Trade Dress in §1(b) Applications
1202.02(e)	Trade Dress in §44 and §66(a) Applications
1202.02(f)	Identification of Goods/Services in Trade Dress Applications
1202.02(f)(i)	Product Design
1202.02(f)(ii)	Product Packaging
1202.03	Refusal on Basis of Ornamentation
1202.03(a)	Commercial Impression
1202.03(b)	Practices of the Trade
1202.03(c)	“Secondary Source”
1202.03(d)	Evidence of Distinctiveness
1202.03(e)	Ornamentation with Respect to §1(b), §44, and §66(a) Applications
1202.03(f)	Ornamentation: Case References
1202.03(f)(i)	Slogans or Words Used on the Goods
1202.03(f)(ii)	Designs Used on the Goods
1202.03(f)(iii)	Trade Dress on the Containers for the Goods
1202.03(g)	Ornamentation Cases and Acquired Distinctiveness
1202.04	Informational Matter
1202.05	Color as a Mark
1202.05(a)	Color Marks Never Inherently Distinctive
1202.05(b)	Functional Color Marks Not Registrable
1202.05(c)	Color as a Separable Element
1202.05(d)	Drawings of Color Marks Required
1202.05(d)(i)	Drawings of Color Marks in Trademark Applications
1202.05(d)(ii)	Drawings of Color Marks in Service Mark Applications
1202.05(d)(iii)	Amendment of Drawings of Color Marks
1202.05(d)(iv)	Drawings for Marks Including Both Color and Words or Design
1202.05(e)	Written Descriptions of Color Marks
1202.05(f)	Specimens for Color Marks
1202.05(g)	Special Considerations for Service Mark Applications
1202.05(h)	Color Marks in §1(b) Applications
1202.05(i)	Color Marks in §44 or §66(a) Applications
1202.06	Goods in Trade
1202.06(a)	Goods Must Have Utility to Others
1202.06(b)	Registration Must Be Refused if Trademark Not Used on Goods in Trade
1202.06(c)	Goods in Trade in §1(b), §44, and §66(a) Applications
1202.07	Marks That Identify Columns or Sections of Publications
1202.07(a)	Marks That Identify Columns or Sections of Printed Publications
1202.07(a)(i)	Syndicated Columns and Sections
1202.07(a)(ii)	Non-Syndicated Columns and Sections
1202.07(a)(iii)	Marks That Identify Columns and Sections of Printed Publications in §1(b), §44, and §66(a) Applications
1202.07(b)	Marks That Identify Columns and Sections of Online Publications

SUBSTANTIVE EXAMINATION OF APPLICATIONS

1202.08	Title of a Single Creative Work
1202.08(a)	What Constitutes a Single Creative Work
1202.08(b)	What Does Not Constitute a Single Creative Work
1202.08(c)	Complete Title of the Work – Evidence of a Series
1202.08(d)	Portion of a Title of the Work
1202.08(d)(i)	Mark Must Create a Separate Commercial Impression
1202.08(d)(ii)	Establishing a Series When the Mark is a Portion of the Title
1202.08(d)(iii)	Evidence that the Portion of the Title is Promoted or Recognized as a Mark
1202.08(e)	Identification of Goods/Services
1202.08(f)	Title of a Single Work in §1(b), §44, and §66(a) Applications
1202.09	Names of Artists and Authors
1202.09(a)	Names and Pseudonyms of Authors and Performing Artists
1202.09(a)(i)	Author or Performer’s Name – Evidence of a Series
1202.09(a)(ii)	Evidence that the Name is a Source Identifier
1202.09(a)(ii)(A)	Promotion and Recognition of the Name
1202.09(a)(ii)(B)	Control over the Nature and Quality of the Goods
1202.09(a)(iii)	Names of Authors and Performing Artists in §1(b), §44, and §66(a) Applications
1202.09(b)	Names of Artists Used on Original Works of Art
1202.10	Names and Designs of Characters in Creative Works
1202.10(a)	Names and Designs of Characters in Creative Works in §1(b), §44, or §66(a) Applications
1202.11	Background Designs and Shapes
1202.12	Varietal and Cultivar Names (Examination of Applications for Seeds and Plants)
1202.13	Scent, Fragrance, or Flavor
1202.14	Holograms
1202.15	Sound Marks
1202.16	Model or Grade Designations
1202.16(a)	Examination of Marks with Model and Grade Designations
1202.16(b)	Identifying Model and Grade Designations in Marks
1202.16(b)(i)	Model Designations
1202.16(b)(i)(A)	Stylization of Display
1202.16(b)(i)(B)	Size of Proposed Mark
1202.16(b)(i)(C)	Physical Location
1202.16(b)(ii)	Grade Designations
1202.16(c)	Procedures for Handling Marks with Model and Grade Designations
1202.16(c)(i)	Evidentiary Considerations when Issuing Model or Grade Designation Refusals
1202.16(c)(i)(A)	Model Designations
1202.16(c)(i)(B)	Grade Designations
1202.16(c)(ii)	Entire Mark Consists of Model or Grade Designation in §1(a) Applications
1202.16(c)(iii)	Composite Mark with Model or Grade Designation in §1(a) Applications
1202.16(c)(iii)(A)	Model or Grade Designations with Arbitrary and/or Suggestive Matter
1202.16(c)(iii)(B)	Model or Grade Designations with Descriptive, Generic, and/or Informational Matter
1202.16(c)(iv)	Drawing and Specimen Agreement Issues in §1(a) Applications
1202.16(c)(v)	Model or Grade Designation in §1(b), §44, or §66(a) Applications
1202.16(c)(v)(A)	Model Designations
1202.16(c)(v)(B)	Grade Designations
1202.17	Universal Symbols in Marks
1202.17(a)	Relevance of Universal Symbols to Examination

1202.17(b)	Reviewing Marks Containing Symbols
1202.17(b)(i)	Identifying Universal Symbols in Marks
1202.17(b)(ii)	Marks Displaying an Unusual Depiction of a Universal Symbol
1202.17(b)(iii)	Marks Displaying an Accurate Depiction of a Universal Symbol
1202.17(c)	Failure to Function
1202.17(c)(i)	Determining Whether a Universal Symbol Functions as a Source Indicator
1202.17(c)(i)(A)	Informational Universal Symbols
1202.17(c)(i)(B)	Ornamental Universal Symbols
1202.17(c)(ii)	Mark Consists Entirely of a Universal Symbol that Fails to Function
1202.17(c)(ii)(A)	Applications Based on Sections 1(b), 44, or 66(a)
1202.17(c)(ii)(B)	Applicant’s Response to Refusal
1202.17(c)(iii)	Mark Includes a Universal Symbol that Fails to Function
1202.17(d)	Other Relevant Refusals
1202.17(d)(i)	Merely Descriptive
1202.17(d)(ii)	Deceptive or Deceptively Misdescriptive
1202.17(e)	Universal Symbols Commonly Appearing in Marks
1202.17(e)(i)	Awareness Ribbon Symbols
1202.17(e)(ii)	Recycling Symbol
1202.17(e)(iii)	Caduceus, Rod of Asclepius, and Prescription Symbol
1202.17(e)(iv)	Religious Symbols
1202.17(e)(v)	Currency Symbols
1202.17(e)(vi)	Universal Prohibition Symbol
1202.18	Hashtag Marks
<b>1203</b>	<b>Refusal on Basis of Immoral or Scandalous Matter; Deceptive Matter; Matter which May Disparage, Falsely Suggest a Connection, or Bring into Contempt or Disrepute</b>
1203.01	Immoral or Scandalous Matter
1203.02	Deceptive Matter
1203.02(a)	Types of Deceptive Marks
1203.02(b)	Elements of a §2(a) Deceptiveness Refusal
1203.02(c)	Distinction between Marks Comprising Deceptive Matter (§2(a)) and Deceptively Misdescriptive Marks (§2(e)(1))
1203.02(d)	Determining Materiality
1203.02(d)(i)	Objective Criteria
1203.02(d)(ii)	Mere Personal Preference
1203.02(e)	Procedures for Issuing §2(a) Deceptive Refusals
1203.02(e)(i)	When the Mark is Clearly Misdescriptive
1203.02(e)(ii)	When It is Not Clear Whether the Mark is Misdescriptive
1203.02(f)	Responding to a §2(a) Deceptiveness Refusal
1203.02(f)(i)	Amending the Identification of Goods or Services
1203.02(f)(ii)	Other Arguments
1203.02(g)	Deceptive Matter: Case References
1203.03	Matter That May Disparage, Falsely Suggest a Connection, or Bring into Contempt or Disrepute
1203.03(a)	Definitions
1203.03(a)(i)	“Persons”
1203.03(a)(ii)	“Institutions”
1203.03(a)(iii)	“National Symbols”
1203.03(b)	Disparagement, Bringing into Contempt, and Bringing into Disrepute
1203.03(b)(i)	Elements of a §2(a) Disparagement Refusal

- 1203.03(b)(ii) Disparagement, Bringing into Contempt, and Bringing into Disrepute: Case References

- 1204.04(b)(i) Examples of Matter That May and May Not Be Deleted
- 1204.05 Resources
- 1205 Refusal on Basis of Matter Protected by Statute or Convention**
- 1205.01 Statutory Protection
- 1205.01(a) Examination Procedures for Marks Comprising a Red Crystal or Red Crescent on a White Background, or the Phrases “Red Crescent” or “Third Protocol Emblem”
- 1205.01(a)(i) First Use After December 8, 2005
- 1205.01(a)(ii) First Use On or Before December 8, 2005 – Grandfather Clause
- 1205.01(a)(iii) Date of First Use Not Specified
- 1205.01(a)(iv) Applicable Refusals
- 1205.01(a)(v) Amendments to Disclaim, Delete, or Amend the Unregistrable Symbol or Designation
- 1205.01(a)(vi) Parties Authorized to use the Red Crescent and Third Protocol Emblem
- 1205.01(b) Examination Procedures for Marks Comprising Matter Related to the United States Olympic Committee or the Olympics
- 1205.01(b)(i) Nature of the Mark
- 1205.01(b)(ii) Issuing Other Substantive Refusals
- 1205.01(b)(iii) Amendments to Disclaim, Delete, or Amend the Unregistrable Wording or Symbol
- 1205.01(b)(iv) Consent to Register
- 1205.01(b)(v) First Use On or After September 21, 1950
- 1205.01(b)(vi) First Use Before September 21, 1950 – Grandfather Clause
- 1205.01(b)(vii) Date of First Use Not Specified
- 1205.01(b)(viii) Geographic-Reference Exception
- 1205.01(c) Examination Procedures for Marks Containing Greek Red Cross or the Phrases “Red Cross” or “Geneva Cross”
- 1205.01(c)(i) Date of First Use is Before or After June 25, 1948

1205.01(c)(ii)	Date of First Use Not Specified
1205.01(c)(iii)	Applicable Refusals
1205.01(c)(iv)	Amendments to Disclaim, Delete, or Amend the Unregistrable Symbol or Designation
1205.01(d)	Examination Procedures for Marks Containing the Swiss Confederation Coat of Arms or Flag
1205.01(d)(i)	Refusal Under Sections 1 and 45: Swiss Coat of Arms Not in Lawful Use
1205.01(d)(i)(A)	When a Refusal Under Sections 1 and 45 Must Be Issued
1205.01(d)(i)(B)	When an Advisory Should Be Provided
1205.01(d)(i)(C)	When a Refusal Under Sections 1 and 45 Should Not Be Issued
1205.01(d)(i)(D)	Applicant's Response to Refusal
1205.01(d)(i)(E)	Refusals Based on Extrinsic Evidence
1205.01(d)(ii)	Refusal Under Section 2(b): Swiss Flag or Swiss Coat of Arms
1205.01(d)(ii)(A)	When a Refusal Under Section 2(b) Must Be Issued
1205.01(d)(ii)(B)	When an Advisory Should Be Provided
1205.01(d)(ii)(C)	When a Refusal Under Section 2(b) Should Not Be Issued
1205.01(d)(ii)(D)	Applicant's Response to Refusal
1205.01(d)(iii)	Other Refusals
1205.01(d)(iv)	Examples
1205.02	Article 6ter of the Paris Convention
<b>1206</b>	<b>Refusal on Basis of Name, Portrait, or Signature of Particular Living Individual or Deceased U.S. President Without Consent</b>
1206.01	Name, Portrait, or Signature of Particular Living Individual
1206.02	Connection With Goods or Services
1206.03	When Inquiry is Required
1206.04	Consent of Individual or President's Widow
1206.04(a)	Consent Statement Must Be Written Consent to Registration
1206.04(b)	Consent May Be Presumed From Signature of Application
1206.04(c)	New Consent Not Required if Consent is of Record in Valid Registration Owned by Applicant
1206.04(d)	Implicit Consent
1206.05	Names and Likenesses That Do Not Identify a Particular Living Individual
<b>1207</b>	<b>Refusal on Basis of Likelihood of Confusion, Mistake, or Deception</b>
1207.01	Likelihood of Confusion
1207.01(a)	Relatedness of the Goods or Services
1207.01(a)(i)	Goods or Services Need Not Be Identical
1207.01(a)(ii)	Goods May Be Related to Services
1207.01(a)(ii)(A)	Food and Beverage Products Versus Restaurant Services
1207.01(a)(iii)	Reliance on Identification of Goods/Services in Registration and Application
1207.01(a)(iv)	No "Per Se" Rule
1207.01(a)(v)	Expansion-of-Trade Doctrine
1207.01(a)(vi)	Evidence Showing Relatedness of Goods or Services
1207.01(b)	Similarity of the Marks
1207.01(b)(i)	Word Marks
1207.01(b)(ii)	Similarity In Appearance
1207.01(b)(iii)	Comparing Marks That Contain Additional Matter
1207.01(b)(iv)	Similarity in Sound – Phonetic Equivalents
1207.01(b)(v)	Similarity in Meaning
1207.01(b)(vi)	Doctrine of Foreign Equivalents
1207.01(b)(vi)(A)	Background

## SUBSTANTIVE EXAMINATION OF APPLICATIONS

1207.01(b)(vi)(B)	When an Ordinary American Purchaser Would “Stop and Translate”
1207.01(b)(vi)(C)	Likelihood of Confusion Factors Still Apply When Assessing Whether Marks are Confusingly Similar
1207.01(b)(vii)	Transposition of Terms
1207.01(b)(viii)	Marks Consisting of Multiple Words
1207.01(b)(ix)	Weak or Descriptive Marks
1207.01(b)(x)	Parody Marks
1207.01(b)(xi)	Color Marks
1207.01(c)	Design Marks
1207.01(c)(i)	Legal Equivalents – Comparison of Words and Their Equivalent Designs
1207.01(c)(ii)	Composite Marks Consisting of Both Words and Designs
1207.01(c)(iii)	Comparison of Standard Character Marks and Special Form Marks
1207.01(c)(iv)	Matter Depicted in Broken Lines
1207.01(d)	Miscellaneous Considerations
1207.01(d)(i)	Doubt Resolved in Favor of Registrant
1207.01(d)(ii)	Absence of Actual Confusion
1207.01(d)(iii)	Third-Party Registrations and Evidence of Third-Party Use
1207.01(d)(iv)	Collateral Attack on Registration Improper in Ex Parte Proceeding
1207.01(d)(v)	Classification of Goods/Services
1207.01(d)(vi)	Prior Decisions of Examining Attorneys
1207.01(d)(vii)	Sophisticated Purchasers
1207.01(d)(viii)	Consent Agreements
1207.01(d)(ix)	Fame of the Prior Registered Mark
1207.01(d)(x)	Conflicting Marks Owned by Different Parties
1207.01(d)(xi)	Family of Marks
1207.01(d)(xii)	Pharmaceuticals or Medicinal Products
1207.02	Marks That Are Likely to Deceive
1207.03	Marks Previously Used in United States but Not Registered
1207.04	Concurrent Use Registration
1207.04(a)	Concurrent Use – In General
1207.04(b)	Filing Basis of Application Seeking Concurrent Use Registration
1207.04(c)	Criteria for Requesting Concurrent Use Registration
1207.04(d)	Requirements for All Concurrent Use Applications
1207.04(e)	Applications Subject to Concurrent Use Proceeding Before the Trademark Trial and Appeal Board
1207.04(e)(i)	Preparing the Record for Publication
1207.04(f)	Application for Concurrent Use Registration Pursuant to Court Decree
1207.04(f)(i)	Preparing the Record for Publication
1207.04(g)	Application for Concurrent Use Registration Based on Final Board Decision in Prior Concurrent Use Proceeding
1207.04(g)(i)	Preparing the Record for Publication

## 1201 Ownership of Mark

Under §1(a)(1) of the Trademark Act, 15 U.S.C. §1051(a)(1), an application based on use in commerce must be filed by the owner of the mark. A §1(a) application must include a verified statement that the applicant believes it is the owner of the mark sought to be registered. 15 U.S.C. §1051(a)(3)(A); 37 C.F.R. §2.33(b)(1). An application that is not filed by the owner is void. *See* [TMEP §1201.02\(b\)](#).

An application under §1(b) or §44 of the Act, 15 U.S.C. §1051(b) or §1126, must be filed by a party who is entitled to use the mark in commerce, and must include a verified statement that the applicant is entitled to use the mark in commerce and that the applicant has a bona fide intention to use the mark in commerce as of the application filing date. 15 U.S.C. §§1051(b)(3), 1126(d)(2), and 1126(e); 37 C.F.R. §2.33(b)(2). When the person designated as the applicant is not the person with a bona fide intention to use the mark in commerce, the application is void. *See* [TMEP §1201.02\(b\)](#).

In a §1(b) application, before the mark can be registered, the applicant must file an amendment to allege use under 15 U.S.C. §1051(c) (*see* [TMEP §§1104-1104.11](#)) or a statement of use under 15 U.S.C. §1051(d) (*see* [TMEP §§1109-1109.18](#)) which states that the applicant is the owner of the mark. 15 U.S.C. §§1051(b)(3)(A) and (B); 37 C.F.R. §§2.76(b)(1)(i) and 2.88(b)(1)(i).

In a §44 application, the applicant must be the owner of the foreign application or registration on which the United States application is based as of the filing date of the United States application. *See* [TMEP §1005](#).

An application under §66(a) of the Trademark Act (i.e., a request for extension of protection of an international registration to the United States under the Madrid Protocol), must be filed by the holder of the international registration. 15 U.S.C. §1141e(a); 37 C.F.R. §7.25. The application must include a verified statement that the applicant has a bona fide intention to use the mark in commerce. 15 U.S.C. §1141(f)(a). The verified statement in a §66(a) application is part of the international registration on file at the International Bureau of the World Intellectual Property Organization (“IB”). The IB will have established that the international registration includes this verified statement before it sends the request for extension of protection to the United States Patent and Trademark Office (“USPTO”). *See* [TMEP §804.05](#). The request for extension of protection remains part of the international registration, and ownership is determined by the IB. *See* [TMEP §501.07](#) regarding assignment of §66(a) applications.

### 1201.01 Claim of Ownership May Be Based on Use By Related Companies

In an application under §1 of the Trademark Act, an applicant may base its claim of ownership of a trademark or a service mark on:

- (1) its own exclusive use of the mark;
- (2) use of the mark solely by a related company whose use inures to the applicant's benefit ( *see* [TMEP §§1201.03-1201.03\(f\)](#)); or
- (3) use of the mark both by the applicant and by a related company whose use inures to the applicant's benefit ( *see* [TMEP §1201.05](#)).

Where the mark is used by a related company, the owner is the party who controls the nature and quality of the goods sold or services rendered under the mark. The owner is the only proper party to apply for registration. 15 U.S.C. §1051. See [TMEP §§1201.03-1201.03\(f\)](#) for additional information about use by related companies.

The examining attorney should accept the applicant's statement regarding ownership of the mark unless it is clearly contradicted by information in the record. *In re L. A. Police Revolver and Athletic Club, Inc.*, 69 USPQ2d 1630 (TTAB 2003).

The USPTO does not inquire about the relationship between the applicant and other parties named on the specimen or elsewhere in the record, except when the reference to another party clearly contradicts the applicant's verified statement that it is the owner of the mark or entitled to use the mark. Moreover, where the application states that use of the mark is by a related company or companies, the examining attorney should not require any explanation of how the applicant controls such use.

The provisions discussed above also apply to service marks, collective marks, and certification marks, except that, by definition, collective marks and certification marks are not used by the owner of the mark, but are used by others under the control of the owner. 15 U.S.C. §§1053 and 1054. See *TMEP* §§[1303.01](#), [1304.03](#), and [1306.01\(a\)](#). In addition, an application for registration of a collective mark must specify the nature of the applicant's control over use of the mark. 37 C.F.R. §2.44; [TMEP §1303.02\(c\)\(i\)](#).

See [TMEP §1201.04](#) for information about when an examining attorney should issue an inquiry or refusal with respect to ownership.

## **1201.02 Identifying the Applicant in the Application**

### **1201.02(a) Identifying the Applicant Properly**

The applicant may be any person or entity capable of suing and being sued in a court of law. See [TMEP §§803-803.03\(k\)](#) for the appropriate format for identifying the applicant and setting forth the relevant legal entity. See [TMEP §1201.03\(a\)](#) regarding the form for indicating that the mark is used solely by a related company.

### **1201.02(b) Application Void if Wrong Party Identified as the Applicant**

An application must be filed by the party who is the owner of (or is entitled to use) the mark as of the application filing date. See [TMEP §1201](#).

An application based on use in commerce under 15 U.S.C. §1051(a) must be filed by the party who owns the mark on the application filing date. If the applicant does not own the mark on the application filing date, the application is *void*. 37 C.F.R. §2.71(d). *Huang v. Tzu Wei Chen Food Co.*, 849 F.2d 1458, 7 USPQ2d 1335 (Fed. Cir. 1988); *Great Seats, Ltd. v. Great Seats, Inc.*, 84 USPQ2d 1235, 1244 (TTAB 2007).

If the record indicates that the applicant is not the owner of the mark, the examining attorney should refuse registration on that ground. The statutory basis for this refusal is §1 of the Trademark Act, 15 U.S.C. §1051, and, where related company issues are relevant, §§5 and 45 of the Act, 15 U.S.C. §§1055 and 1127. The examining attorney should not have the filing date cancelled or refund the application filing fee.

In an application under §1(b) or §44 of the Trademark Act, 15 U.S.C. §1051(b) or §1126, the applicant must be entitled to use the mark in commerce on the application filing date, and the application must include a verified statement that the applicant has a bona fide intention to use the mark in commerce. 15 U.S.C. §§1051(b)(3)(A), 1051(b)(3)(B), 1126(d)(2), and 1126(e). When the person designated as the applicant was not the person with a bona fide intention to use the mark in commerce at the time the application was filed, the application is void. *Am. Forests v. Sanders*, 54 USPQ2d 1860, 1864 (TTAB 1999), *aff'd*, 232 F.3d 907 (Fed. Cir. 2000) (holding an intent-to-use application filed by an individual void, where the entity that had a bona fide intention to use the mark in commerce on the application filing date was a partnership composed of the individual applicant and her husband). However, the examining attorney will not inquire into the bona fides, or good faith, of an applicant's asserted intention to use a mark in commerce during ex parte examination, unless there is evidence in the record clearly indicating that the applicant does not have a bona fide intention to use the mark in commerce. See [TMEP §1101](#).

When an application is filed in the name of the wrong party, this defect cannot be cured by amendment or assignment. 37 C.F.R. §2.71(d); [TMEP §803.06](#). However, if the application was filed by the owner, but there was a mistake in the manner in which the applicant's name was set forth in the application, this may be corrected. See [TMEP §1201.02\(c\)](#) for examples of correctable and non-correctable errors.

See [TMEP §1201](#) regarding ownership of a §66(a) application.

### **1201.02(c) Correcting Errors in How the Applicant Is Identified**

If the party applying to register the mark is, in fact, the owner of the mark, but there is a mistake in the manner in which the name of the applicant is set out in the application, the mistake may be corrected by amendment. *U.S. Pioneer Elec. Corp. v. Evans Mktg., Inc.*, 183 USPQ 613 (Comm'r Pats. 1974). However, the application may *not* be amended to designate another entity as the applicant. 37 C.F.R. §2.71(d); [TMEP §803.06](#). An application filed in the name of the wrong party is void and cannot be corrected by amendment. *Huang v. Tzu Wei Chen Food Co.*, 849 F.2d 1458, 7 USPQ2d 1335 (Fed. Cir. 1988); *Great Seats, Ltd. v. Great Seats, Inc.*, 84 USPQ2d 1235, 1244 (TTAB 2007); *In re Tong Yang Cement Corp.*, 19 USPQ2d 1689 (TTAB 1991).

*Correctable Errors.* The following are examples of correctable errors in identifying the applicant:

- (1) *Trade Name Set Forth as Applicant.* If the applicant identifies itself by a name under which it does business, which is not a legal entity, then amendment to state the applicant's correct legal name is permitted. Cf. *In re Atl. Blue Print Co.*, 19 USPQ2d 1078 (Comm'r Pats 1990) (finding that Post Registration staff erred in refusing to allow amendment of affidavit under 15 U.S.C. §1058 to show registrant's corporate name rather than registrant's trade name).
- (2) *Operating Division Identified as Applicant.* If the applicant mistakenly names an operating division, which by definition is not a legal entity, as the owner, then the applicant's name may be amended. See [TMEP §1201.02\(d\)](#).
- (3) *Minor Clerical Error.* Minor clerical errors such as the mistaken addition or omission of "The" or "Inc." in the applicant's name may be corrected by amendment, as long as this does not result in a

change of entity. However, change of a significant portion of the applicant's name is not considered a minor clerical error.

- (4) *Inconsistency in Original Application as to Owner Name or Entity.* If the original application reflects an inconsistency between the owner name and the entity type, for example, an individual and a corporation are each identified as the owner in different places in the application, the application may be amended to clarify the inconsistency.

*Example: Inconsistency Between Owner Section and Entity Section of TEAS Form:* If the information in the "owner section" of a TEAS application form is inconsistent with the information in the "entity section" of the form, the inconsistency can be corrected, for example, if an individual is identified as the owner and a corporation is listed as the entity, the application may be amended to indicate the proper applicant name/entity.

*Signature of Verification by Different Entity Does Not Create Inconsistency.* In view of the broad definition of a "person properly authorized to sign on behalf of the applicant" in 37 C.F.R. §2.193(e)(1) ( see [TMEP §611.03\(a\)](#)), if the person signing an application refers to a different entity, the USPTO will presume that the person signing is an authorized signatory who meets the requirements of 37 C.F.R. §2.193(e)(1), and will not issue an inquiry regarding the inconsistency or question the signatory's authority to sign. If the applicant later requests correction to identify the party who signed the verification as the owner, the USPTO will not allow the amendment. For example, if the application is filed in the name of "John Jones, individual U.S. citizen," the verification is signed by "John Jones, President of ABC Corporation," and the applicant later proposes to amend the application to show ABC Corporation as the owner, the USPTO will not allow the amendment, because there was no inconsistency in the original application as to the owner name/entity.

- (5) *Change of Name.* If the owner of a mark legally changed its name before filing an application, but mistakenly lists its former name on the application, the error may be corrected, because the correct party filed, but merely identified itself incorrectly. *In re Techsonic Indus., Inc.*, 216 USPQ 619 (TTAB 1982).
- (6) *Partners Doing Business as Partnership.* If an applicant has been identified as "A and B, doing business as The AB Company, a partnership," and the true owner is a partnership organized under the name The AB Company and composed of A and B, the applicant's name should be amended to "The AB Company, a partnership composed of A and B."
- (7) *Non-Existent Entity.* If the party listed as the applicant did not exist on the application filing date, the application may be amended to correct the applicant's name. *See Accu Pers. Inc. v. Accustaff Inc.*, 38 USPQ2d 1443 (TTAB 1996) (holding application not void ab initio where corporation named as applicant technically did not exist on filing date, since four companies who later merged acted as a single commercial enterprise when filing the application); *Argo & Co. v. Springer*, 198 USPQ 626, 635 (TTAB 1978) (holding that application may be amended to name three individuals as joint applicants in place of an originally named corporate applicant which was never legally incorporated, because the individuals and non-existent corporation were found to be the same, single commercial enterprise); *Pioneer Elec.*, 183 USPQ 613 (holding that applicant's name may be corrected where the application was mistakenly filed in the name of a fictitious and non-existent party).

*Example 1:* If the applicant is identified as ABC Company, a Delaware partnership, and the true owner is ABC LLC, a Delaware limited liability company, the application may be amended to correct the applicant's name and entity if the applicant states on the record that "ABC Company, a Delaware partnership, did not exist as a legal entity on the application filing date."

*Example 2:* If an applicant is identified as "ABC Corporation, formerly known as XYZ, Inc.," and the correct entity is "XYZ, Inc.," the applicant's name may be amended to "XYZ, Inc." as long as "ABC Corporation, formerly known as XYZ, Inc." was not a different existing legal entity. *Cf. Custom Computer Serv. Inc. v. Paychex Prop. Inc.*, 337 F.3d 1334, 1337, 67 USPQ2d 1638, 1640 (Fed. Cir. 2003) (holding that the term "mistake," within the context of the rule regarding the misidentification of the person in whose name an extension of time to file an opposition was requested, means a mistake in the form of the potential opposer's name or its entity type and does not encompass the recitation of a different existing legal entity that is not in privity with the party that should have been named).

To correct an obvious mistake of this nature, a verification or declaration is not normally necessary.

*Non-Correctable Errors.* The following are examples of non-correctable errors in identifying the applicant:

- (1) *President of Corporation Files as Individual.* If the president of a corporation is identified as the owner of the mark when in fact the corporation owns the mark, and there is no inconsistency in the original application between the owner name and the entity type (such as a reference to a corporation in the entity section of the application), the application is void as filed because the applicant is not the owner of the mark.
- (2) *Predecessor in Interest.* If an application is filed in the name of entity A, when the mark was assigned to entity B before the application filing date, the application is void as filed because the applicant was not the owner of the mark at the time of filing. *Cf. Huang*, 849 F.2d at 1458, 7 USPQ2d at 1335 (holding as void an application filed by an individual two days after ownership of the mark was transferred to a newly formed corporation).
- (3) *Joint Venturer Files.* If the application is filed in the name of a joint venturer when the mark is owned by the joint venture, and there is no inconsistency in the original application between the owner name and the entity type (such as a reference to a joint venture in the entity section of the application), the applicant's name cannot be amended. *Tong Yang Cement*, 19 USPQ2d at 1689 .
- (4) *Sister Corporation.* If an application is filed in the name of corporation A and a sister corporation (corporation B) owns the mark, the application is void as filed, because the applicant is not the owner of the mark. *Great Seats*, 84 USPQ2d at 1244 (holding §1(a) application void where the sole use and advertising of the mark was made by a sister corporation who shared the same president, controlling shareholder, and premises as the applicant).
- (5) *Parent/Subsidiary.* If an application is filed in the name of corporation A, a wholly owned subsidiary, and the parent corporation (corporation B) owns the mark, the application is void as filed because the applicant is not the owner of the mark. See [TMEP §1201.03\(c\)](#) regarding wholly owned related companies.

### **1201.02(d) Operating Divisions**

An operating division that is not a legal entity that can sue and be sued does not have standing to own a mark or to file an application to register a mark. The application must be filed in the name of the company of which the division is a part. *In re Cambridge Digital Sys.*, 1 USPQ2d 1659, 1660 n.1 (TTAB 1986). An operating division's use is considered to be use by the applicant and not use by a related company; therefore, reference to related-company use is permissible but not necessary.

### **1201.02(e) Changes in Ownership After Application Is Filed**

See TMEP Chapter 500 regarding changes of ownership and changes of name subsequent to filing an application for registration, and [TMEP §§502.02–502.02\(b\)](#) regarding the procedure for requesting that a certificate of registration be issued in the name of an assignee or in an applicant's new name.

### **1201.03 Use by Related Companies**

Section 5 of the Trademark Act, 15 U.S.C. §1055, states, in part, as follows:

Where a registered mark or a mark sought to be registered is or may be used legitimately by related companies, such use shall inure to the benefit of the registrant or applicant for registration, and such use shall not affect the validity of such mark or of its registration, provided such mark is not used in such manner as to deceive the public.

Section 45 of the Act, 15 U.S.C. §1127, defines "related company" as follows:

The term “related company” means any person whose use of a mark is controlled by the owner of the mark with respect to the nature and quality of the goods or services on or in connection with which the mark is used.

Thus, §5 of the Act permits applicants to rely on use of the mark by related companies. Either a natural person or a juristic person may be a related company. 15 U.S.C. §1127.

The essence of related-company use is the control exercised over the nature and quality of the goods or services on or in connection with which the mark is used. When a mark is used by a related company, use of the mark inures to the benefit of the party who controls the nature and quality of the goods or services. This party is the owner of the mark and, therefore, the only party who may apply to register the mark. *Smith Int’l. Inc. v. Olin Corp.*, 209 USPQ 1033, 1044 (TTAB 1981).

Reliance on related-company use requires, *inter alia*, that the related company use the mark in connection with the same goods or services recited in the application. *In re Admark, Inc.*, 214 USPQ 302, 303 (TTAB 1982) (finding that related-company use was not at issue where the applicant sought registration of a mark for advertising-agency services and the purported related company used the mark for retail-store services).

A related company is different from a successor in interest who is in privity with the predecessor in interest for purposes of determining the right to register. *Wells Cargo, Inc. v. Wells Cargo, Inc.*, 197 USPQ 569, 570 (TTAB 1977), *aff’d*, 606 F.2d 961, 203 USPQ 564 (C.C.P.A. 1979).

See [TMEP §1201.03\(c\)](#) regarding wholly owned related companies, [§1201.03\(d\)](#) regarding corporations with common stockholders, directors, or officers, [§1201.03\(e\)](#) regarding sister corporations, and §1201.03(f) regarding license and franchise situations.

### **1201.03(a) Use Solely by Related Company Must be Disclosed**

If the mark is not being used by the applicant but is being used by one or more related companies whose use inures to the benefit of the applicant under §5 of the Act, these facts must be disclosed in the application. 37 C.F.R. §2.38(b). See *Indus. Abrasives, Inc. v. Strong*, 101 USPQ 420 (Comm’r Pats. 1954). Use that inures to the applicant’s benefit is a proper and sufficient support for an application and satisfies the requirement of 37 C.F.R. §2.33(b)(1) that a §1(a) application specify that the *applicant* has adopted and is using the mark.

The party who controls the nature and quality of the goods or services on or in connection with which the mark is used should be set forth as the applicant. In an application under §1(a) of the Trademark Act, the applicant should state in the body of the application that the applicant has adopted and is using the mark *through its related company* (or equivalent explanatory wording). In a §1(b) application, the statement that the applicant is using the mark through a related company should be included in the amendment to allege use under 15 U.S.C. §1051(c) ( see [TMEP §§1104-1104.11](#)) or statement of use under 15 U.S.C. §1051(d) ( see [TMEP §§1109-1109.18](#)).

The applicant is not required to give the name of the related-company user, unless it is necessary to explain information in the record that clearly contradicts the applicant’s verified claim of ownership of the mark.

The applicant may claim the benefit of use by a related company in an amendment to the application. *Greyhound Corp. v. Armour Life Ins. Co.*, 214 USPQ 473, 475 (TTAB 1982).

If the applicant and a related company both use the mark, but the applicant is relying on its own use in the application, the applicant does not have to include a reference to use by a related company. See [TMEP §1201.05](#).

### **1201.03(b) No Explanation of Applicant’s Control Over Use of Mark by Related Companies Required**

Where the application states that use of the mark is by a related company or companies, the USPTO does not require an explanation of how the applicant controls the use of the mark.

Similarly, the USPTO does not inquire about the relationship between the applicant and other parties named on the specimen or elsewhere in the record, except when the reference to another party clearly contradicts the applicant’s verified statement that it is the owner of the mark or entitled to use the mark. See [TMEP §1201.04](#).

### **1201.03(c) Wholly Owned Related Companies**

Related-company use includes situations where a wholly owned related company of the applicant uses the mark, or where the applicant is wholly owned by a related company that uses the mark.

Frequently, related companies comprise parent and wholly owned subsidiary corporations. Either a parent corporation or a subsidiary corporation may be the proper applicant, depending on the facts concerning ownership of the mark. The USPTO will consider the filing of the application in the name of either the parent or the subsidiary to be the expression of the intention of the parties as to ownership in accord with the arrangements between them. However, once the application has been filed in the name of either the parent or the wholly owned subsidiary, the USPTO will not permit an amendment of the applicant’s name to specify the other party as the owner. The applicant’s name can be changed only by assignment.

Furthermore, once an application has been filed in the name of either the parent or the wholly owned subsidiary, the USPTO will not consider documents (e.g., statements of use under 15 U.S.C. §1051(d) or affidavits of continued use or excusable nonuse under 15 U.S.C. §1058) filed in the name of the other party to have been filed by the owner. See *In re Media Cent. IP Corp.*, 65 USPQ2d 1637 (Dir USPTO 2002) (holding §8 affidavit filed in the name of a subsidiary and predecessor in interest of the current owner unacceptable); *In re ACE III Commc’ns, Inc.*, 62 USPQ2d 1049 (Dir USPTO 2001) (holding §8 affidavit unacceptable where the owner of the registration was a corporation, and the affidavit was filed in the name of an individual who asserted that she was the owner of the corporation).

Either an individual or a juristic entity may own a mark that is used by a wholly owned related company. *In re Hand*, 231 USPQ 487 (TTAB 1986).

### **1201.03(d) Common Stockholders, Directors, or Officers**

Corporations are not “related companies” within the meaning of §5 of the Trademark Act, 15 U.S.C. §1055, merely because they have the same stockholders, directors, or officers, or because they occupy the same premises. *Great Seats, Ltd. v. Great Seats, Inc.*, 84 USPQ2d 1235, 1243 (TTAB 2007) (holding that the fact that both the applicant corporation and the corporate user of the mark have the same president and controlling stockholder, and share the same premises, does not make them related companies); *In re Raven Marine, Inc.*, 217 USPQ 68, 69 (TTAB 1983) (holding statement that both the applicant corporation and

the corporate user of the mark have the same principal stockholder and officer insufficient to show that the user is a related company).

If an individual applicant is not the sole owner of the corporation that is using the mark, the question of whether the corporation is a “related company” depends on whether the applicant maintains control over the nature and quality of the goods or services such that use of the mark inures to the applicant’s benefit. A formal written licensing agreement between the parties is not necessary, nor is its existence sufficient to establish ownership rights. The critical question is whether the applicant sufficiently controls the nature and quality of the goods or services with which the mark is used. *See Pneutek, Inc. v. Scherr*, 211 USPQ 824, 833 (TTAB 1981) (holding that the applicant, an individual, exercised sufficient control over the nature and quality of the goods sold under the mark by the licensee that the license agreement vested ownership of the mark in the applicant).

Similarly, where an individual applicant is not the sole owner of the corporation that is using the mark, the fact that the individual applicant is a stockholder, director, or officer in the corporation is insufficient in itself to establish that the corporation is a related company. The question depends on whether the applicant maintains control over the nature and quality of the goods or services.

See [TMPEP §1201.03\(c\)](#) regarding use by wholly owned related companies.

### **1201.03(e) Sister Corporations**

The fact that two sister corporations are controlled by a single parent corporation does not mean that they are related companies. Where two corporations are wholly owned subsidiaries of a common parent, use by one sister corporation is not considered to inure to the benefit of the other, unless the applicant sister corporation exercises appropriate control over the nature and quality of the goods or services on or in connection with which the mark is used. *Great Seats, Ltd. v. Great Seats, Inc.*, 84 USPQ2d 1235, 1242 (TTAB 2007); *In re Pharmacia Inc.*, 2 USPQ2d 1883, 1884 (TTAB 1987); *Greyhound Corp. v. Armour Life Ins. Co.*, 214 USPQ 473, 475 (TTAB 1982).

See [TMPEP §1201.03\(c\)](#) regarding use by wholly owned related companies.

### **1201.03(f) License and Franchise Situations**

The USPTO accepts applications by parties who claim to be owners of marks through use by controlled licensees, pursuant to a contract or agreement. *Pneutek, Inc. v. Scherr*, 211 USPQ 824, 833 (TTAB 1981).

A controlled licensing agreement may be recognized whether oral or in writing. *In re Raven Marine, Inc.*, 217 USPQ 68, 69 (TTAB 1983).

If the application indicates that use of the mark is pursuant to a license or franchise agreement, and the record contains nothing that contradicts the assertion of ownership by the applicant (i.e., the licensor or franchisor), the examining attorney will not inquire about the relationship between the applicant and the related company (i.e., the licensee or franchisee).

Ownership rights in a trademark or service mark may be acquired and maintained through the use of the mark by a controlled licensee even when the only use of the mark has been made, and is being made, by the licensee. *Turner v. HMH Publ'g Co.*, 380 F.2d 224, 229, 154 USPQ 330, 334 (5th Cir. 1967), *cert. denied*, 389 U.S. 1006, 156 USPQ 720 (1967); *Cent. Fid. Banks, Inc. v. First Bankers Corp. of Fla.*, 225 USPQ

438, 440 (TTAB 1984) (holding that use of the mark by petitioner's affiliated banks considered to inure to the benefit of petitioner bank holding company, even though the bank holding company could not legally render banking services and, thus, could not use the mark).

Joint applicants enjoy rights of ownership to the same extent as any other "person" who has a proprietary interest in a mark. Therefore, joint applicants may license others to use a mark and, by exercising sufficient control and supervision of the nature and quality of the goods or services to which the mark is applied, the joint applicants/licensors may claim the benefits of the use by the related company/licensee. *In re Diamond Walnut Growers, Inc. and Sunsweet Growers Inc.*, 204 USPQ 507, 510 (TTAB 1979).

Stores that are operating under franchise agreements from another party are considered "related companies" of that party, and use of the mark by the franchisee/store inures to the benefit of the franchisor. *Mr. Rooter Corp. v. Morris*, 188 USPQ 392, 394 (E.D. La. 1975); *Southland Corp. v. Schubert*, 297 F. Supp. 477, 160 USPQ 375, 381 (C.D. Cal. 1968).

In all franchise and license situations, the key to ownership is the nature and extent of the control by the applicant over the goods or services to which the mark is applied. A trademark owner who fails to exercise sufficient control over licensees or franchisees may be found to have abandoned its rights in the mark. *See Hurricane Fence Co. v. A-1 Hurricane Fence Co.*, 468 F. Supp. 975, 986; 208 USPQ 314, 325 (S.D. Ala. 1979).

In general, where the application states that a mark is used by a licensee or franchisee, the USPTO does not require an explanation of how the applicant controls the use.

#### **1201.04 Inquiry Regarding Parties Named on Specimens or Elsewhere in Record**

The USPTO does not inquire about the relationship between the applicant and other parties named on the specimen or elsewhere in the record, except when the reference to another party clearly contradicts the applicant's verified statement that it is the owner of the mark or entitled to use the mark.

The examining attorney should inquire about another party if the record specifically states that another party is the owner of the mark, or if the record specifically identifies the applicant in a manner that contradicts the claim of ownership, for example, as a licensee. In these circumstances, registration should be refused under §1 of the Trademark Act, on the ground that the applicant is not the owner of the mark. Similarly, when the record indicates that the applicant is a United States distributor, importer, or other distributing agent for a foreign manufacturer, the examining attorney should require the applicant to establish its ownership rights in the United States in accordance with [TMEP §1201.06\(a\)](#).

Where the specimen of use indicates that the goods are manufactured in a country other than the applicant's home country, the examining attorney normally should not inquire whether the mark is used by a foreign manufacturer. *See* [TMEP §1201.06\(b\)](#). Also, where the application states that use of the mark is by related companies, an explanation of how the applicant controls use of the mark by the related companies is not required. *See* [TMEP §1201.03\(b\)](#).

#### **1201.05 Acceptable Claim of Ownership Based on Applicant's Own Use**

An applicant's claim of ownership of a mark may be based on the applicant's own use of the mark, even though there is also use by a related company. The applicant is the owner by virtue of the applicant's own use, and the application does not have to refer to use by a related company.

An applicant may claim ownership of a mark when the mark is applied on the applicant's instruction. For example, if the applicant contracts with another party to have goods produced for the applicant and instructs the party to place the mark on the goods, that is considered the equivalent of the applicant itself placing the mark on its own goods and reference to related-company use is not necessary.

## **1201.06 Special Situations Pertaining to Ownership**

### **1201.06(a) Applicant Is Merely Distributor or Importer**

A distributor, importer, or other distributing agent of the goods of a manufacturer or producer does not acquire a right of ownership in the manufacturer's or producer's mark merely because it moves the goods in trade. See *In re Bee Pollen from Eng. Ltd.*, 219 USPQ 163 (TTAB 1983); *Audioson Vertriebs - GmbH v. Kirksaeter Audiosonics, Inc.*, 196 USPQ 453 (TTAB 1977); *Jean D'Albret v. Henkel-Khasana G.m.b.H.*, 185 USPQ 317 (TTAB 1975); *In re Lettmann*, 183 USPQ 369 (TTAB 1974); *Bakker v. Steel Nurse of America Inc.*, 176 USPQ 447 (TTAB 1972). A party that merely distributes goods bearing the mark of a manufacturer or producer is neither the owner nor a related-company user of the mark.

If the applicant merely distributes or imports goods for the owner of the mark, registration must be refused under § 1 of the Trademark Act, *except* in the following situations:

(1) If a parent and wholly owned subsidiary relationship exists between the distributor and the manufacturer, then the applicant's statement that such a relationship exists disposes of an ownership issue. See [TMEP §1201.03\(c\)](#).

(2) If an applicant is the United States importer or distribution agent for a foreign manufacturer, then the applicant can register the foreign manufacturer's mark in the United States, if the applicant submits one of the following:

(a) written consent from the owner of the mark to registration in the applicant's name, or

(b) written agreement or acknowledgment between the parties that the importer or distributor is the owner of the mark in the United States, or

(c) an assignment (or true copy) to the applicant of the owner's rights in the mark as to the United States together with the business and good will appurtenant thereto.

See *In re Pharmacia Inc.*, 2 USPQ2d 1883 (TTAB 1987); *In re Geo. J. Ball, Inc.*, 153 USPQ 426 (TTAB 1967).

### **1201.06(b) Goods Manufactured in a Country Other than Where Applicant Is Located**

Where a specimen indicates that the goods are manufactured in a country other than the applicant's home country, the examining attorney normally should not inquire whether the mark is used by a foreign manufacturer. If, however, information in the record clearly contradicts the applicant's verified claim of ownership (e.g., a statement in the record that the mark is owned by the foreign manufacturer and that the applicant is only an importer or distributor), then registration must be refused under § 1, 15 U.S.C. § 1051,

unless registration in the United States by the applicant is supported by the applicant's submission of one of the documents listed in [TMEP §1201.06\(a\)](#).

## 1201.07 Related Companies and Likelihood of Confusion

### 1201.07(a) "Single Source" – "Unity of Control"

Section 2(d) of the Trademark Act, 15 U.S.C. §1052(d), requires that the examining attorney refuse registration when an applicant's mark, as applied to the specified goods or services, so resembles a registered mark as to be likely to cause confusion. In general, registration of confusingly similar marks to separate legal entities is barred by §2(d). See [TMEP §§1207–1207.01\(d\)\(xi\)](#). However, the Court of Appeals for the Federal Circuit has held that, where the applicant is related in ownership to a company that owns a registered mark that would otherwise give rise to a likelihood of confusion, the examining attorney must consider whether, in view of all the circumstances, use of the mark by the applicant is likely to confuse the public about the source of the applicant's goods because of the resemblance of the applicant's mark to the mark of the other company. The Court stated that:

The question is whether, despite the similarity of the marks and the goods on which they are used, the public is likely to be confused about the source of the hair straightening products carrying the trademark "WELLASTRATE." In other words, is the public likely to believe that the source of the product is Wella U.S. rather than the German company or the Wella organization.

*In re Wella A.G.*, 787 F.2d 1549, 1552, 229 USPQ 274, 276 (Fed. Cir. 1986); cf. *In re Wacker Neuson SE*, 97 USPQ2d 1408 (TTAB 2010) (finding that the record made clear that the parties were related and that the goods and services were provided by the applicant).

The *Wella* Court remanded the case to the Board for consideration of the likelihood of confusion issue. In ruling on that issue, the Board concluded that there was no likelihood of confusion, stating as follows:

[A] determination must be made as to whether there exists a likelihood of confusion as to *source*, that is, whether purchasers would believe that particular goods or services emanate from a single source, when in fact those goods or services emanate from more than a single source. Clearly, the Court views the concept of "source" as encompassing more than "legal entity." Thus, in this case, we are required to determine whether Wella A.G. and Wella U.S. are the same source or different sources....

The existence of a related company relationship between Wella U.S. and Wella A.G. is not, in itself, a basis for finding that any "WELLA" product emanating from either of the two companies emanates from the same source. Besides the existence of a legal relationship, there must also be a unity of control over the use of the trademarks. "Control" and "source" are inextricably linked. If, notwithstanding the legal relationship between entities, each entity exclusively controls the nature and quality of the goods to which it applies one or more of the various "WELLA" trademarks, the two entities are in fact separate sources. Wella A.G. has made of record a declaration of the executive vice president of Wella U.S., which declaration states that Wella A.G. owns substantially all the outstanding stock of Wella U.S. and "thus controls the activities and operations of Wella U.S., including the selection, adoption and use of the trademarks." While the declaration contains no details of how this control is exercised, the declaration is sufficient, absent contradictory evidence in the record, to establish that control over the use of all the "WELLA" trademarks in the United States resides in a single source.

*In re Wella A.G.*, 5 USPQ2d 1359, 1361 (TTAB 1987) (emphasis in original), *rev'd on other grounds*, 858 F.2d 725, 8 USPQ2d 1365 (Fed. Cir. 1988).

Therefore, in some limited circumstances, the close relationship between related companies will obviate any likelihood of confusion in the public mind because the related companies constitute a single source. See [TMEP §§1201.07\(b\)-1201.07\(b\)\(iv\)](#) for further information.

### **1201.07(b) Appropriate Action with Respect to Assertion of Unity of Control**

First, it is important to note that analysis under *Wella* is not triggered until an applicant affirmatively asserts that a §2(d) refusal is inappropriate because the applicant and the registrant, though separate legal entities, constitute a single source, or the applicant raises an equivalent argument. Examining attorneys should issue §2(d) refusals in any case where an analysis of the marks and the goods or services of the respective parties indicates a bar to registration under §2(d). The examining attorney should not attempt to analyze the relationship between an applicant and registrant until an applicant, in some form, relies on the nature of the relationship to obviate a refusal under §2(d).

Once an applicant has made this assertion, the question is whether the specific relationship is such that the two entities constitute a “single source,” so that there is no likelihood of confusion. The following guidelines may assist the examining attorney in resolving questions of likelihood of confusion when the marks are owned by related companies and the applicant asserts unity of control. (In many of these situations, the applicant may choose to attempt to overcome the §2(d) refusal by submitting a consent agreement or other conventional evidence to establish no likelihood of confusion. See [TMEP §1207.01\(d\)](#). Another way to overcome a §2(d) refusal is to assign all relevant registrations to the same party.)

#### **1201.07(b)(i) When Either Applicant or Registrant Owns All of the Other Entity**

If the applicant or the applicant’s attorney represents that *either* the applicant or the registrant owns *all* of the other entity, and there is no contradictory evidence, then the examining attorney should conclude that there is unity of control, a single source, and no likelihood of confusion. This would apply to an individual who owns all the stock of a corporation, and to a corporation and a wholly owned subsidiary or a subsidiary of a wholly owned subsidiary. In this circumstance, additional representations or declarations should generally *not* be required, absent contradictory evidence.

#### **1201.07(b)(ii) Joint Ownership or Ownership of Substantially All of the Other Entity**

*Either Applicant or Registrant Owns Substantially All of the Other Entity.* In *Wella*, the applicant provided a declaration stating that the applicant owned *substantially all* of the stock of the registrant and that the applicant thus controlled the activities of the registrant, including the selection, adoption, and use of trademarks. *In re Wella A.G.*, 5 USPQ2d 1359, 1361 (TTAB 1987), *rev'd on other grounds*, 858 F.2d 725, 8 USPQ2d 1365 (Fed. Cir. 1988). The Board concluded that this declaration alone, absent contradictory evidence, established unity of control, a single source, and no likelihood of confusion. *Id.* Therefore, if *either* the applicant or the registrant owns substantially all of the other entity and asserts control over the activities of the other entity, including its trademarks, and there is no contradictory evidence, the examining attorney should conclude that unity of control is present, that the entities constitute a single source, and that there is no likelihood of confusion under §2(d). In such a case, the applicant should generally provide these assertions in the form of an affidavit or declaration under 37 C.F.R. §2.20.

*Joint Ownership.* The examining attorney may also accept an applicant's assertion of unity of control when the applicant is shown in USPTO records as a joint owner of the cited registration, or the owner of the registration is listed as a joint owner of the application, and the applicant submits a written statement asserting control over the use of the mark by virtue of joint ownership, if there is no contradictory evidence.

### **1201.07(b)(iii) When the Record Does Not Support a Presumption of Unity of Control**

If neither the applicant nor the registrant owns all or substantially all of the other entity, and USPTO records do not show their joint ownership of the application or cited registration ( *see* [TMEP §1201.07\(b\)\(ii\)](#)), the applicant bears a more substantial burden to establish that unity of control is present. For instance, if both the applicant and the registrant are wholly owned by a third common parent, the applicant would have to provide detailed evidence to establish how one sister corporation controlled the trademark activities of the other to establish unity of control to support the contention that the sister corporations constitute a single source. *See In re Pharmacia Inc.*, 2 USPQ2d 1883 (TTAB 1987); *Greyhound Corp. v. Armour Life Ins. Co.*, 214 USPQ 473 (TTAB 1982). Likewise, where an applicant and registrant have certain stockholders, directors, or officers in common, the applicant must demonstrate with detailed evidence or explanation how those relationships establish unity of control. *See Pneutek, Inc. v. Scherr*, 211 USPQ 824 (TTAB 1981). The applicant's evidence or explanation should generally be supported by an affidavit or a declaration under 37 C.F.R. §2.20.

### **1201.07(b)(iv) When the Record Contradicts an Assertion of Unity of Control**

In contrast to those circumstances where the relationship between the parties may support a presumption of unity of control or at least afford an applicant the opportunity to demonstrate unity of control, some relationships, by their very nature, contradict any claim that unity of control is present. For instance, if the relationship between the parties is that of licensor and licensee, unity of control will ordinarily not be present. The licensing relationship suggests ownership in one party and control by that one party over only the use of a specific mark or marks, but not over the operations or activities of the licensee generally. Thus, there is no unity of control and no basis for concluding that the two parties form a single source. Precisely because unity of control is absent, a licensing agreement is necessary. The licensing agreement enables the licensor/owner to control specific activities to protect its interests as the sole source or sponsor of the goods or services provided under the mark. Therefore, in these situations, it is most unlikely that an applicant could establish unity of control to overcome a §2(d) refusal.

## **1202 Use of Subject Matter as Trademark**

In an application under §1 of the Act, the examining attorney must determine whether the subject matter for which registration is sought is used as a trademark by reviewing all evidence (e.g., the specimen and any promotional material) of record in the application. *See In re Safariland Hunting Corp.*, 24 USPQ2d 1380, 1381 (TTAB 1992) (examining attorney should look primarily to the specimen to determine whether a designation would be perceived as a source indicator, but may also consider other evidence, if there is other evidence of record).

Not everything that a party adopts and uses with the intent that it function as a trademark necessarily achieves this goal or is legally capable of doing so, and not everything that is recognized or associated with a party is necessarily a registrable trademark. As the Court of Customs and Patent Appeals observed in *In re The Standard Oil Co.*, 275 F.2d 945, 947, 125 USPQ 227, 229 (C.C.P.A. 1960):

The Trademark Act is not an act to register words but to register trademarks. Before there can be registrability, there must be a trademark (or a service mark) and, unless words have been so used, they cannot qualify for registration. Words are not registrable *merely* because they do not happen to be descriptive of the goods or services with which they are associated.

Sections 1 and 2 of the Trademark Act, 15 U.S.C. §§1051 and 1052, require that the subject matter presented for registration be a “trademark.” Section 45 of the Act, 15 U.S.C. §1127, defines that term as follows:

The term “trademark” includes any word, name, symbol, or device, or any combination thereof—

- (1) used by a person, or
- (2) which a person has a bona fide intention to use in commerce and applies to register on the principal register established by this Act,

to identify and distinguish his or her goods, including a unique product, from those manufactured or sold by others and to indicate the source of the goods, even if that source is unknown.

Thus, §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127, provide the statutory basis for refusal to register on the Principal Register subject matter that, due to its inherent nature or the manner in which it is used, does not function as a mark to identify and distinguish the applicant’s goods. The statutory basis for refusal of registration on the Supplemental Register of matter that does not function as a trademark because it does not fit within the statutory definition of a trademark is §§23 and 45 of the Trademark Act, 15 U.S.C. §§1091 and 1127.

When the examining attorney refuses registration on the ground that the subject matter is not used as a trademark, the examining attorney must explain the specific reason for the conclusion that the subject matter is not used as a trademark. See [TMEP §§1202.01–1202.16](#) for a discussion of situations in which it may be appropriate, depending on the circumstances, for the examining attorney to refuse registration on the ground that the proposed mark does not function as a trademark, *e.g.*, TMEP §§[1202.01](#) (trade names), [1202.02\(a\)–1202.02\(a\)\(viii\)](#) (functionality), [1202.03–1202.03\(g\)](#) (ornamentation), [1202.04](#) (informational matter), [1202.05–1202.05\(i\)](#) (color marks), [1202.06–1202.06\(c\)](#) (goods in trade), [1202.07–1202.07\(b\)](#) (columns or sections of publications), [1202.08–1202.08\(f\)](#) (title of single creative work), [1202.09–1202.09\(b\)](#) (names of artists and authors), [1202.11](#) (background designs and shapes), [1202.12](#) (varietal and cultivar names), and [1202.16](#) (model or grade designations).

The presence of the letters “SM” or “TM” cannot transform an otherwise unregistrable designation into a registrable mark. *In re Remington Prods. Inc.*, 3 USPQ2d 1714, 1715 (TTAB 1987); *In re Anchor Hocking Corp.*, 223 USPQ 85, 88 (TTAB 1984); *In re Minnetonka, Inc.*, 212 USPQ 772, 779 n.12 (TTAB 1981).

The issue of whether a designation functions as a mark usually is tied to the use of the mark, as evidenced by the specimen. Therefore, unless the drawing and description of the mark are dispositive of the failure to function without the need to consider a specimen, generally, no refusal on this basis will be issued in an intent-to-use application under §1(b) of the Trademark Act, 15 U.S.C. §1051(b), until the applicant has submitted a specimen(s) with an allegation of use (i.e., either an amendment to allege use under 15 U.S.C. §1051(c) or a statement of use under 15 U.S.C. §1051(d)). However, in a §1(b) application for which no specimen has been submitted, if the examining attorney anticipates that a refusal will be made on the ground that the matter presented for registration does not function as a mark, the potential refusal should be brought to the applicant’s attention in the first Office action. This is done strictly as a courtesy. If information

regarding this possible ground for refusal is not provided to the applicant before the allegation of use is filed, the USPTO is not precluded from refusing registration on this basis.

In an application under §44 or §66(a), where a specimen of use is not required prior to registration, it is appropriate for the examining attorney to issue a failure to function refusal where the mark on its face, as shown on the drawing and described in the description, reflects a failure to function. *See In re Right-On Co.*, 87 USPQ2d 1152, 1156-57 (TTAB 2008) (noting the propriety of and affirming an ornamentation refusal in a §66(a) application).

See [TMEP §§1301.02–1301.02\(f\)](#) regarding use of subject matter as a service mark; [TMEP §§1302-1305](#) regarding use of subject matter as a collective mark; and [TMEP §§1306-1306.08](#) regarding use of subject matter as a certification mark.

### **1202.01 Refusal of Matter Used Solely as a Trade Name**

The name of a business or company is a trade name. The Trademark Act distinguishes trade names from trademarks and service marks by definition. While a trademark is used to identify and distinguish the trademark owner's goods from those manufactured or sold by others and to indicate the source of the goods, "trade name" and "commercial name" are defined in §45 of the Act, 15 U.S.C. §1127, as follows:

The terms "trade name" and "commercial name" mean any name used by a person to identify his or her business or vocation.

The Trademark Act does not provide for registration of trade names. *See In re Letica Corp.*, 226 USPQ 276, 277 (TTAB 1985) ("[T]here was a clear intention by the Congress to draw a line between indicia which perform only trade name functions and indicia which perform or also perform the function of trademarks or service marks.").

If the examining attorney determines that matter for which registration is requested is merely a trade name, registration must be refused both on the Principal Register and on the Supplemental Register. The statutory basis for refusal of trademark registration on the ground that the matter is used merely as a trade name is §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127, and, in the case of matter sought to be registered for services, §§1, 2, 3, and 45, 15 U.S.C. §§1051, 1052, 1053, and 1127.

A designation may function as both a trade name and a trademark or service mark. *See In re Walker Process Equip. Inc.*, 233 F.2d 329, 332, 110 USPQ 41, 43 (C.C.P.A. 1956), *aff'g* 102 USPQ 443 (Comm'r Pats. 1954).

If subject matter presented for registration in an application is a trade name or part of a trade name, the examining attorney must determine whether it is also used as a trademark or service mark, by examining the specimen and other evidence of record in the application file. *See In re Diamond Hill Farms*, 32 USPQ2d 1383, 1384 (TTAB 1994) (holding that DIAMOND HILL FARMS, as used on containers for goods, is a trade name that identifies applicant as a business entity rather than a mark that identifies applicant's goods and distinguishes them from those of others).

Whether matter that is a trade name (or a portion thereof) also performs the function of a trademark depends on the manner of its use and the probable impact of the use on customers. *See In re Supply Guys, Inc.*, 86 USPQ2d 1488, 1491 (TTAB 2008) (finding that the use of trade name in "Ship From" section of Federal Express label where it serves as a return address does not demonstrate trademark use as the term appears

where customers would look for the name of the party shipping the package); *In re Unclaimed Salvage & Freight Co.*, 192 USPQ 165, 168 (TTAB 1976) (“It is our opinion that the foregoing material reflects use by applicant of the notation ‘UNCLAIMED SALVAGE & FREIGHT CO.’ merely as a commercial, business, or trade name serving to identify applicant as a viable business entity; and that this is or would be the general and likely impact of such use upon the average person encountering this material under normal circumstances and conditions surrounding the distribution thereof.”); *In re Lytle Eng'g & Mfg. Co.*, 125 USPQ 308 (TTAB 1960) (“‘LYTLE’ is applied to the container for applicant’s goods in a style of lettering distinctly different from the other portion of the trade name and is of such nature and prominence that it creates a separate and independent impression.”).

The presence of an entity designator in a name sought to be registered and the proximity of an address are both factors to be considered in determining whether a proposed mark is merely a trade name. *In re Univar Corp.*, 20 USPQ2d 1865, 1869 (TTAB 1991) (“[T]he mark ‘UNIVAR’ independently projects a separate commercial impression, due to its presentation in a distinctively bolder, larger and different type of lettering and, in some instances, its additional use in a contrasting color, and thus does more than merely convey information about a corporate relationship.”); *see also Book Craft, Inc. v. BookCrafters USA, Inc.*, 222 USPQ 724, 727 (TTAB 1984) (“That the invoices ... plainly show ... service mark use is apparent from the fact that, not only do the words ‘BookCrafters, Inc.’ appear in larger letters and a different style of print than the address, but they are accompanied by a design feature (the circularly enclosed ends of two books).”).

A determination of whether matter serves solely as a trade name rather than as a mark requires consideration of the way the mark is used, as evidenced by the specimen(s). Therefore, no refusal on that ground will be issued in an intent-to-use application under §1(b) until the applicant has submitted specimen(s) of use in conjunction with an allegation of use under 15 U.S.C. §1051(c) or 15 U.S.C. §1051(d).

## 1202.02 Registration of Trade Dress

Trade dress constitutes a “symbol” or “device” within the meaning of §2 of the Trademark Act, 15 U.S.C. §1052. *Wal-Mart Stores, Inc. v. Samara Bros.*, 529 U.S. 205, 209-210, 54 USPQ2d 1065, 1065-66 (2000). Trade dress originally included only the packaging or “dressing” of a product, but in recent years has been expanded to encompass the design of a product. It is usually defined as the “total image and overall appearance” of a product, or the totality of the elements, and “may include features such as size, shape, color or color combinations, texture, graphics.” *Two Pesos, Inc. v. Taco Cabana, Inc.*, 505 U.S. 763, 764 n.1, 23 USPQ2d 1081, 1082 n.1 (1992).

Thus, trade dress includes the design of a product (i.e., the product shape or configuration), the packaging in which a product is sold (i.e., the “dressing” of a product), the color of a product or of the packaging in which a product is sold, and the flavor of a product. *Wal-Mart* ., 529 U.S. at 205, 54 USPQ2d at 1065 (design of children’s outfits constitutes product design); *Two Pesos*, 505 U.S. at 763, 23 USPQ2d at 1081 (interior of a restaurant is akin to product packaging); *Qualitex Co. v. Jacobson Prods. Co.*, 514 U.S. 159, 34 USPQ2d 1161 (1995) (color alone may be protectible); *In re N.V. Organon*, 79 USPQ2d 1639 (TTAB 2006) (flavor is analogous to product design and may be protectible unless it is functional). However, this is not an exhaustive list, because “almost anything at all that is capable of carrying meaning” may be used as a “symbol” or “device” and constitute trade dress that identifies the source or origin of a product. *Qualitex*, 514 U.S. at 162, 34 USPQ2d at 1162. When it is difficult to determine whether the proposed mark is product packaging or product design, such “ambiguous” trade dress is treated as product design. *Wal-Mart* , 529 U.S. at 215, 54 USPQ2d at 1066. Trade dress marks may be used in connection with goods and services.

In some cases, the nature of a potential trade dress mark may not be readily apparent. A determination of whether the mark constitutes trade dress must be informed by the application content, including the drawing,

the description of the mark, the identification of goods or services, and the specimen, if any. If it remains unclear whether the proposed mark constitutes trade dress, the examining attorney may call or e-mail the applicant to clarify the nature of the mark, or issue an Office action requiring information regarding the nature of the mark, as well as any other necessary clarifications, such as a clear drawing and an accurate description of the mark. 37 C.F.R. §2.61(b). The applicant's response would then confirm whether the proposed mark is trade dress.

When an applicant applies to register a product design, product packaging, color, or other trade dress for goods or services, the examining attorney must separately consider two substantive issues: (1) functionality; and (2) distinctiveness. See *TrafFix Devices, Inc. v. Mktg. Displays, Inc.*, 532 U.S. 23, 28-29, 58 USPQ2d 1001, 1004-1005 (2001); *Two Pesos*, 505 U.S. at 775, 23 USPQ2d at 1086; *In re Morton-Norwich Prods., Inc.*, 671 F.2d 1332, 1343, 213 USPQ 9, 17 (C.C.P.A. 1982). See [TMEP §§1202.02\(a\)–1202.02\(a\)\(viii\)](#) regarding functionality and [1202.02\(b\)–1202.02\(b\)\(ii\)](#) and [1212–1212.10](#) regarding distinctiveness. In many cases, a refusal of registration may be necessary on both grounds. In any application where a product design is refused because it is functional, registration must also be refused on the ground that the proposed mark is nondistinctive because product design is never inherently distinctive. However, since product packaging may be inherently distinctive, in an application where product packaging is refused as functional, registration should also be refused on the ground that the proposed mark is nondistinctive. Even if it is ultimately determined that the product packaging is not functional, the alternative basis for refusal may stand.

If a proposed trade dress mark is ultimately determined to be functional, claims and evidence that the mark has acquired distinctiveness or secondary meaning are irrelevant and registration will be refused. *TrafFix*, 532 U.S. at 33, 58 USPQ2d at 1007.

With respect to the functionality and distinctiveness issues in the specific context of color as a mark, see [TMEP §1202.05\(a\)](#) and [\(b\)](#).

### **1202.02(a) Functionality of Trade Dress**

In general terms, trade dress is functional, and cannot serve as a trademark, if a feature of that trade dress is "essential to the use or purpose of the article or if it affects the cost or quality of the article." *Qualitex Co. v. Jacobson Prods. Co.*, 514 U.S. 159, 165, 34 USPQ2d 1161, 1163-64 (1995) (quoting *Inwood Labs., Inc. v. Ives Labs., Inc.*, 456 U.S. 844, 850, n.10, 214 USPQ 1, 4, n.10 (1982)).

#### **1202.02(a)(i) Statutory Basis for Functionality Refusal**

Before October 30, 1998, there was no specific statutory reference to functionality as a ground for refusal, and functionality refusals were thus issued as failure-to-function refusals under §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127.

Effective October 30, 1998, the Technical Corrections to Trademark Act of 1946, Pub. L. No. 105-330, §201, 112 Stat. 3064, 3069, amended the Trademark Act to expressly prohibit registration on either the Principal or Supplemental Register of functional matter:

- Section 2(e)(5) of the Trademark Act, 15 U.S.C. §1052(e)(5), prohibits registration on the Principal Register of "matter that, as a whole, is functional."
- Section 2(f) of the Act, 15 U.S.C. §1052(f), provides that matter that, as a whole, is functional may not be registered even on a showing that it has become distinctive.

- Section 23(c) of the Act, 15 U.S.C. §1091(c), provides that a mark that, as a whole, is functional may not be registered on the Supplemental Register.
- Section 14(3) of the Act, 15 U.S.C. §1064(3), lists functionality as a ground that can be raised in a cancellation proceeding more than five years after the date of registration.
- Section 33(b)(8) of the Act, 15 U.S.C. §1115(b)(8), lists functionality as a statutory defense to infringement in a suit involving an incontestable registration.

These amendments codified case law and the longstanding USPTO practice of refusing registration of functional matter.

### **1202.02(a)(ii) Purpose of Functionality Doctrine**

The functionality doctrine, which prohibits registration of functional product features, is intended to encourage legitimate competition by maintaining a proper balance between trademark law and patent law. As the Supreme Court explained, in *Qualitex Co. v. Jacobson Prods. Co.*, 514 U.S. 159, 164-165, 34 USPQ2d 1161, 1163 (1995):

The functionality doctrine prevents trademark law, which seeks to promote competition by protecting a firm's reputation, from instead inhibiting legitimate competition by allowing a producer to control a useful product feature. It is the province of patent law, not trademark law, to encourage invention by granting inventors a monopoly over new product designs or functions for a limited time, 35 U.S.C. Sections 154, 173, after which competitors are free to use the innovation. If a product's functional features could be used as trademarks, however, a monopoly over such features could be obtained without regard to whether they qualify as patents and could be extended forever (because trademarks may be renewed in perpetuity).

In other words, the functionality doctrine ensures that protection for utilitarian product features be properly sought through a limited-duration utility patent, and not through the potentially unlimited protection of a trademark registration. Upon expiration of a utility patent, the invention covered by the patent enters the public domain, and the functional features disclosed in the patent may then be copied by others – thus encouraging advances in product design and manufacture. In *TrafFix Devices, Inc. v. Mktg. Displays, Inc.*, 532 U.S. 23, 34-35, 58 USPQ2d 1001, 1007 (2001), the Supreme Court reiterated this rationale, also noting that the functionality doctrine is not affected by evidence of acquired distinctiveness.

Thus, even when the evidence establishes that consumers have come to associate a functional product feature with a single source, trademark protection will not be granted in light of the public policy reasons stated. *Id.*

### **1202.02(a)(iii) Background and Definitions**

#### **1202.02(a)(iii)(A) Functionality**

Functional matter cannot be protected as a trademark. 15 U.S.C. §§1052(e)(5) and (f), 1064(3), 1091(c), and 1115(b). A feature is functional as a matter of law if it is “essential to the use or purpose of the article or if it affects the cost or quality of the article.” *TrafFix Devices, Inc. v. Mktg. Displays, Inc.*, 532 U.S. 23, 33, 58 USPQ2d 1001, 1006 (2001); *Qualitex Co. v. Jacobson Prods. Co.*, 514 U.S. 159, 165, 34 USPQ2d 1161, 1163-64 (1995); *Inwood Labs., Inc. v. Ives Labs., Inc.*, 456 U.S. 844, 850, n.10, 214 USPQ 1, 4, n.10 (1982).

While some courts had developed a definition of functionality that focused solely on “competitive need” – thus finding a particular product feature functional only if competitors needed to copy that design in order to compete effectively – the Supreme Court held that this “was incorrect as a comprehensive definition” of functionality. *TrafFix*, 532 U.S. at 33, 58 USPQ2d at 1006. The Court emphasized that where a product feature meets the traditional functionality definition – that is, it is essential to the use or purpose of the product or affects its cost or quality – then the feature is functional, regardless of the availability to competitors of other alternatives. *Id.*; *see also Valu Eng'g, Inc. v. Rexnord Corp.*, 278 F.3d 1268, 1276, 61 USPQ2d 1422, 1427 (Fed. Cir. 2002) (“Rather, we conclude that the [ *TrafFix*] Court merely noted that once a product feature is found functional based on other considerations there is no need to consider the availability of alternative designs, because the feature cannot be given trade dress protection merely because there are alternative designs available” (footnote omitted).)

However, since the preservation of competition is an important policy underlying the functionality doctrine, competitive need, although not determinative, remains a significant consideration in functionality determinations. *Id.* at 1278, 1428.

The determination that a proposed mark is functional constitutes, for public policy reasons, an absolute bar to registration on either the Principal or the Supplemental Register, regardless of evidence showing that the proposed mark has acquired distinctiveness. *See TrafFix*, 532 U.S. at 29-33, 58 USPQ2d at 1005-1007; *see also In re Controls Corp. of Am.*, 46 USPQ2d 1308, 1312 (TTAB 1998) (rejecting applicant’s claim that “registration on the Supplemental Register of a de jure functional configuration is permissible if the design is ‘capable’ of distinguishing applicant’s goods”). Thus, if an applicant responds to a functionality refusal under §2(e)(5), 15 U.S.C. §1052(e)(5), by submitting an amendment seeking registration on the Supplemental Register, such an amendment does not introduce a new issue warranting a nonfinal Office action. *See TMEP §714.05(a)(i)*. Instead, the §2(e)(5) refusal must be maintained and made final, if appropriate.

*See TMEP §§1202.02(a)(v)–1202.02(a)(v)(D)* regarding evidentiary considerations pertaining to functionality refusals.

### **1202.02(a)(iii)(B) “De Jure” and “De Facto” Functionality**

Prior to 2002, the USPTO used the terms “*de facto*” and “*de jure*” in assessing whether “subject matter” (usually a product feature or the configuration of the goods) presented for registration was functional. This distinction originated with the Court of Customs and Patent Appeals’ decision in *In re Morton-Norwich Prods., Inc.*, 671 F.2d 1332, 213 USPQ 9 (C.C.P.A. 1982), which was discussed by the Federal Circuit in *Valu Eng'g, Inc. v. Rexnord Corp.*, 278 F.3d 1268, 1274, 61 USPQ2d 1422, 1425 (Fed. Cir. 2002):

Our decisions distinguish *de facto* functional features, which may be entitled to trademark protection, from *de jure* functional features, which are not. ‘In essence, *de facto* functional means that the design of a product has a function, i.e., a bottle of any design holds fluid.’ *In re R.M. Smith, Inc.*, 734 F.2d 1482, 1484, 222 USPQ 1, 3 (Fed. Cir. 1984). *De facto* functionality does not necessarily defeat registrability. *Morton-Norwich*, 671 F.2d at 1337, 213 USPQ at 13 (A design that is *de facto* functional, i.e., ‘functional’ in the lay sense ... may be legally recognized as an indication of source.’). *De jure* functionality means that the product has a particular shape ‘because it works better in this shape.’ *Smith*, 734 F.2d at 1484, 222 USPQ at 3.

However, in three Supreme Court decisions involving functionality – *TrafFix Devices, Inc. v. Mktg. Displays, Inc.*, 532 U.S. 23, 58 USPQ2d 1001 (2001), *Wal-Mart Stores, Inc. v. Samara Bros.*, 529 U.S. 205, 54 USPQ2d 1065 (2000), and *Qualitex Co. v. Jacobson Prods. Co.*, 514 U.S. 159, 34 USPQ2d 1161 (1995) – the Court did not use the “*de facto/de jure*” distinction. Nor were these terms used when the Trademark

Act was amended to expressly prohibit registration of matter that is “functional.” Technical Corrections to Trademark Act of 1946, Pub. L. No. 105-330, §201, 112 Stat. 3064, 3069 (1998). Accordingly, in general, examining attorneys no longer make this distinction in Office actions that refuse registration based on functionality.

*De facto* functionality is not a ground for refusal. *In re Ennco Display Sys. Inc.*, 56 USPQ2d 1279, 1282 (TTAB 2000); *In re Parkway Mach. Corp.*, 52 USPQ2d 1628, 1631 n.4 (TTAB 1999).

### **1202.02(a)(iv) Burden of Proof in Functionality Determinations**

The examining attorney must establish a prima facie case that the proposed trade dress mark sought to be registered is functional in order to make and maintain the §2(e)(5) functionality refusal. *See In re Becton, Dickinson & Co.*, 675 F.3d 1368, 1374, 102 USPQ2d 1372, 1376 (Fed. Cir. 2012); *Textron, Inc. v. U.S. Int'l Trade Comm'n*, 753 F.2d 1019, 1025, 224 USPQ 625, 629 (Fed. Cir. 1985); *In re R.M. Smith, Inc.*, 734 F.2d 1482, 1484, 222 USPQ 1, 3 (Fed. Cir. 1984). To do so, the examining attorney must not only examine the application content (i.e., the drawing, the description of the mark, the identification of goods or services, and the specimen, if any), but also conduct independent research to obtain evidentiary support for the refusal. In applications where there is reason to believe that the proposed mark may be functional, but the evidence is lacking to issue the §2(e)(5) refusal in the first Office action, a request for information pursuant to 37 C.F.R. §2.61(b) must be issued to obtain information from the applicant so that an informed decision about the validity of the functionality refusal can be made.

The burden then shifts to the applicant to present “competent evidence” to rebut the examining attorney’s prima facie case of functionality. *See In re Becton, Dickinson & Co.*, 675 F.3d at 1374, 102 USPQ2d at 1374; *Textron, Inc. v. U.S. Int'l Trade Comm'n*, 753 F.2d at 1025, 224 USPQ at 629; *In re R.M. Smith, Inc.*, 734 F.2d at 1484, 222 USPQ at 3; *In re Bio-Medicus Inc.*, 31 USPQ2d 1254, 1257 n.5 (TTAB 1993). The “competent evidence” standard requires proof by preponderant evidence. *In re Becton, Dickinson & Co.*, 675 F.3d at 1374, 102 USPQ2d at 1377.

The functionality determination is a question of fact, and depends on the totality of the evidence presented in each particular case. *In re Becton, Dickinson & Co.*, 675 F.3d at 1372, 102 USPQ2d at 1375; *Valu Eng'g, Inc. v. Rexnord Corp.*, 278 F.3d 1268, 1273, 61 USPQ2d 1422, 1424 (Fed. Cir. 2002); *In re Udor U.S.A., Inc.*, 89 USPQ2d 1978, 1979 (TTAB 2009); *In re Caterpillar Inc.*, 43 USPQ2d 1335, 1338 (TTAB 1997). While there is no set amount of evidence that an examining attorney must present to establish a prima facie case of functionality, it is clear that there must be evidentiary support for the refusal in the record. *See, e.g., In re Morton-Norwich Prods., Inc.*, 671 F.2d 1332, 1342, 213 USPQ 9, 16-17 (C.C.P.A. 1982) (admonishing both the examining attorney and the Board for failing to support the functionality determination with even “one iota of evidence”).

If the design sought to be registered as a mark is the subject of a utility patent that discloses the feature’s utilitarian advantages, the applicant bears an especially “heavy burden of showing that the feature is not functional” and “overcoming the strong evidentiary inference of functionality.” *TrafFix Devices, Inc. v. Mktg. Displays, Inc.*, 532 U.S. 23, 30, 58 USPQ2d 1001, 1005 (2001); *Udor U.S.A., Inc.*, 89 USPQ2d at 1979-80; *see* [TMEP §1202.02\(a\)\(v\)\(A\)](#).

### **1202.02(a)(v) Evidence and Considerations Regarding Functionality Determinations**

A determination of functionality normally involves consideration of one or more of the following factors, commonly known as the “*Morton-Norwich* factors”:

- (1) the existence of a utility patent that discloses the utilitarian advantages of the design sought to be registered;
- (2) advertising by the applicant that touts the utilitarian advantages of the design;
- (3) facts pertaining to the availability of alternative designs; and
- (4) facts pertaining to whether the design results from a comparatively simple or inexpensive method of manufacture.

*In re Becton, Dickinson & Co.*, 675 F.3d 1368, 1374-75, 102 USPQ2d 1372, 1377 (Fed. Cir. 2012); *In re Morton-Norwich Prods., Inc.*, 671 F.2d 1332, 1340-1341, 213 USPQ 9, 15-16 (C.C.P.A. 1982).

Since relevant technical information is often more readily available to an applicant, the applicant will often be the source of most of the evidence relied upon by the examining attorney in establishing a prima facie case of functionality in an ex parte case. *In re Teledyne Indus. Inc.*, 696 F.2d 968, 971, 217 USPQ 9, 11 (Fed. Cir. 1982); *In re Witco Corp.*, 14 USPQ2d 1557, 1560 (TTAB 1989). Therefore, in an application for a trade dress mark, when there is reason to believe that the proposed mark may be functional, the examining attorney must perform a search for evidence to support the *Morton-Norwich* factors. In applications where there is reason to believe that the proposed mark may be functional, the first Office action must include a request for information under 37 C.F.R. §2.61(b), requiring the applicant to provide information necessary to permit an informed determination concerning the functionality of the proposed mark. *See In re Babies Beat Inc.*, 13 USPQ2d 1729, 1731 (TTAB 1990) (finding that registration is properly refused where applicant failed to comply with examining attorney's request for copies of patent applications and other patent information). Such a request should be issued for most product design marks.

Accordingly, the examining attorney's request for information should pertain to the *Morton-Norwich* factors and: (1) ask the applicant to provide copies of any patent(s) or any pending or abandoned patent application(s); (2) ask the applicant to provide any available advertising, promotional, or explanatory material concerning the goods/services, particularly any material specifically related to the features embodied in the proposed mark; (3) inquire of the applicant whether alternative designs are available; and (4) inquire whether the features sought to be registered make the product easier or cheaper to manufacture. The examining attorney should examine the specimen(s) for information relevant to the *Morton-Norwich* factors, and conduct independent research of applicant's and competitors' websites, industry practice and standards, and legal databases such as LexisNexis®. The examining attorney may also consult USPTO patent records.

It is not necessary to consider all the *Morton-Norwich* factors in every case. The Supreme Court held that "[w]here the design is functional under the *Inwood* formulation there is no need to proceed further to consider if there is a competitive necessity for the feature." *TrafFix Devices, Inc. v. Mktg. Displays, Inc.*, 532 U.S. 23, 33, 58 USPQ2d 1001, 1006 (2001). Moreover, there is no requirement that all four of the *Morton-Norwich* factors weigh in favor of functionality to support a refusal. *See Valu Eng'g, Inc. v. Rexnord Corp.*, 278 F.3d 1268, 1276, 61 USPQ2d 1422, 1427 (Fed. Cir. 2002) ("once a product feature is found functional based on other considerations there is no need to consider the availability of alternative designs"); *In re Pohl-Boskamp GmbH & Co.*, 106 USPQ2d 1042 (TTAB 2013) (finding the flavor peppermint functional for nitroglycerin lingual spray based on evidence that peppermint oil, which imparts a flavor of peppermint, can improve the effectiveness of sublingual nitroglycerin spray); *In re Udor U.S.A., Inc.*, 89 USPQ2d 1978 (TTAB 2009) (affirming the functionality refusal of "a round disk head on a sprayer nozzle" where the third and fourth factors showed that applicant's competitors manufactured and marketed spray nozzles with similar features, the shape was preferred in the industry, and it appeared efficient, economical, and advantageous, even though applicant's utility patent and advertising did not weigh in favor of functionality); *In re N.V. Organon*, 79 USPQ2d 1639 (TTAB 2006) (holding orange flavor for pharmaceuticals to be functional based on applicant's touting of the utilitarian advantages of the flavor and the lack of evidence of acceptable

alternatives, even though the mark was not the subject of a patent or patent application and there was no evidence that the flavor affected the cost of the product); *In re Gibson Guitar Corp.*, 61 USPQ2d 1948 (TTAB 2001) (finding that since there was no utility patent, and no evidence that applicant's guitar configuration resulted from a simpler or cheaper method of manufacture, these factors did not weigh in Board's decision).

Evidence that the proposed mark is the subject of a utility patent that discloses the utilitarian advantages of the configuration at issue can be sufficient in itself to support a functionality refusal. *TrafFix*, 532 U.S. at 33, 58 USPQ2d at 1007 ("There is no need, furthermore, to engage ... in speculation about other design possibilities"); *In re Howard Leight Indus., LLC*, 80 USPQ2d 1507, 1515 (TTAB 2006) ("[W]e find that applicant's expired utility patent, which specifically discloses and claims the utilitarian advantages of applicant's earplug configuration and which clearly shows that the shape at issue 'affects the . . . quality of the device,' is a sufficient basis in itself for finding that the configuration is functional, given the strong weight to be accorded such patent evidence under *TrafFix*."). See [TMEP §1202.02\(a\)\(v\)\(A\)](#) for further discussion of utility patents.

It is important that the functionality inquiry focus on the utility of the feature or combination of features claimed as protectable trade dress. *Morton-Norwich*, 671 F.2d at 1338, 213 USPQ at 13. Generally, dissecting the design into its individual features and analyzing the utility of each separate feature does not establish that the overall design is functional. See 15 U.S.C. §1052(e)(5); *Teledyne*, 696 F.2d at 971, 217 USPQ at 11. However, it is sometimes helpful to analyze the design from the standpoint of its various features. See *Elmer v. ICC Fabricating Inc.*, 67 F.3d 1571, 1579-80, 36 USPQ2d 1417, 1422-23 (Fed. Cir. 1995) (rejecting the argument that the combination of individually functional features in the configuration resulted in an overall nonfunctional product design); *In re R.M. Smith, Inc.*, 734 F.2d 1482, 1484, 222 USPQ 1, 2 (Fed. Cir. 1984) (affirming the functionality determination, where the Board had initially considered the six individual features of the design, and then had concluded that the design as a whole was functional); *In re Controls Corp. of Am.*, 46 USPQ2d 1308, 1312 (TTAB 1998) (finding the entire configuration at issue functional because it consisted of several individual features, each of which was functional in nature).

Where the evidence shows that the overall design is functional, the inclusion of a few arbitrary or otherwise nonfunctional features in the design will not change the result. See *In re Becton, Dickinson & Co.*, 675 F.3d at 1374, 102 USPQ2d at 1376; *Textron, Inc. v. U.S. Int'l Trade Comm'n*, 753 F.2d 1019, 1025, 224 USPQ 625, 628-29 (Fed. Cir. 1985); *In re Vico Prods. Mfg. Co.*, 229 USPQ 364, 368 (TTAB 1985).

In the limited circumstances where a proposed trade dress mark is not functional overall, but contains insignificant elements that are functional, the examining attorney must issue a requirement for an amended drawing and allow applicant to remove or delete the functional elements from the drawing or depict them in broken or dotted lines to indicate that they are not features of the mark. See [TMEP §1202.02\(c\)\(i\)](#) regarding drawings in trade dress applications.

The question of whether a product feature is "functional" should not be confused with whether that product feature performs a "function" (i.e., it is *de facto* functional) or "fails to function" as a trademark. See [TMEP §1202.02\(a\)\(iii\)\(B\)](#) regarding *de facto* functionality. Usually, most objects perform a function, for example, a bottle holds liquid and a lamp provides light. However, only certain configurations that allow an object to work better are functional under §2(e)(5). As the *Morton-Norwich* court noted, "it is the 'utilitarian' design of a 'utilitarian' object with which we are concerned." 671 F.2d at 1338, 213 USPQ at 14. Similarly, a product feature that is deemed not functional under §2(e)(5) may lack distinctiveness such that it fails to

function as a trademark under §§ 1, 2, and 45 of the Trademark Act. See [TMEP §§ 1202.02\(b\)–1202.02\(b\)\(ii\)](#) for distinctiveness of trade dress.

## **1202.02(a)(v)(A) Utility Patents and Design Patents**

### *Utility Patents*

Utility patents cover the invention or discovery of a new and useful process, machine, article of manufacture, or composition of matter, or any new and useful improvement thereof. 35 U.S.C. § 101.

In *TrafFix Devices, Inc. v. Mktg. Displays, Inc.*, 532 U.S. 23, 29-30, 58 USPQ2d 1001, 1005 (2001), the Supreme Court resolved a circuit split regarding the proper weight to be afforded a utility patent in the functionality determination, stating:

A utility patent is strong evidence that the features therein claimed are functional. If trade dress protection is sought for those features the strong evidence of functionality based on the previous patent adds great weight to the statutory presumption that features are deemed functional until proved otherwise by the party seeking trade dress protection. Where the expired patent claimed the features in question, one who seeks to establish trade dress protection must carry the heavy burden of showing that the feature is not functional, for instance by showing that it is merely an ornamental, incidental, or arbitrary aspect of the device.

*See In re Becton, Dickinson & Co.*, 675 F.3d 1368, 1375, 102 USPQ2d 1372, 1377 (Fed. Cir. 2012) (utility patent supported functionality of closure cap for blood-collection tubes); *In re Bose Corp.*, 772 F.2d 866, 227 USPQ 1 (Fed. Cir. 1985) (shape of loudspeaker system enclosure found functional, per patent disclosure containing evidence of functionality); *In re Dietrich*, 91 USPQ2d 1622 (TTAB 2009) (patent evidence supported bicycle wheel configuration was functional); *In re Udor U.S.A., Inc.*, 89 USPQ2d 1978 (TTAB 2009)(functionality of spray nozzle head not supported by patent claims); *In re Visual Commc'ns Co.*, 51 USPQ2d 1141 (TTAB 1999) (patent disclosed functionality of light-emitting diode housings); *In re Edward Ski Prods., Inc.*, 49 USPQ2d 2001 (TTAB 1999) (ski mask found functional based on patent evidence); *In re Caterpillar Inc.*, 43 USPQ2d 1335 (TTAB 1997) (patent disclosures supported functionality of elevated sprocket configuration).

The Court in *TrafFix* went on to hold that where the evidence includes a utility patent that claims the product features at issue, it is unnecessary to consider evidence relating to the availability of alternative designs:

There is no need, furthermore, to engage, as did the Court of Appeals, in speculation about other design possibilities, such as using three or four springs which might serve the same purpose. Here, the functionality of the spring design means that competitors need not explore whether other spring juxtapositions might be used. The dual-spring design is not an arbitrary flourish in the configuration of MDI's product; it is the reason the device works. Other designs need not be attempted.

*TrafFix*, 532 U.S. at 33-34, 58 USPQ2d at 1007 (citation omitted).

Therefore, when presented with facts similar to those in *TrafFix* (i.e., where there is a utility patent establishing the utilitarian nature of the product design at issue), the examining attorney may properly issue a final functionality refusal based primarily on the utility patent. *In re Howard Light Indus., LLC*, 80 USPQ2d 1507, 1515 (TTAB 2006). Where functionality appears to be an issue, in the first Office action,

the examining attorney should ask the applicant to provide copies of any active, pending, or expired patent(s), and any pending or abandoned patent application(s). 37 C.F.R. §2.61(b). See *Valu Eng'g, Inc. v. Rexnord Corp.*, 278 F.3d 1268, 1279, 61 USPQ2d 1422, 1429 (Fed. Cir. 2002) (“We agree with the Board that an abandoned patent application should be considered under the first *Morton-Norwich* factor, because an applied-for utility patent that never issued has evidentiary significance for the statements and claims made in the patent application concerning the utilitarian advantages, just as an issued patent has evidentiary significance.”).

It is not necessary that the utility patent be owned by the applicant; a third-party utility patent is also relevant to the functionality determination, if the patent claims the features in the product design sought to be registered. See *AS Holdings, Inc. v. H & C Milcor, Inc.*, 107 USPQ2d 1829, 1834-35 (TTAB 2013); *In re Mars, Inc.*, 105 USPQ2d 1859, 1861 (TTAB 2013); *In re Dietrich*, 91 USPQ2d at 1627; *In re Am. Nat'l Can Co.*, 41 USPQ2d 1841, 1843 (TTAB 1997); *In re Virshup*, 42 USPQ2d 1403, 1405 (TTAB 1997); *In re Cabot Corp.*, 15 USPQ2d 1224 (TTAB 1990). In addition, a third-party patent may include other evidence directly related to the functionality of a proposed mark. In *Pohl-Boskamp GmbH & Co.*, the applicant sought to register the flavor of peppermint for use in connection with pharmaceutical preparations of nitroglycerin in the form of a lingual spray. The examining attorney made of record a third-party patent that described the results of two studies demonstrating that peppermint oil had therapeutic properties in the applicant's field of goods. *In re Pohl-Boskamp GmbH & Co.*, 106 USPQ2d 1042, 1046-48 (TTAB 2013). Therefore, the examining attorney may also consult patent databases, including the USPTO's patent records, to see if utility patents owned by applicant's competitors disclose the functional advantages of the product design that the applicant seeks to register.

It is important to read the patent to determine whether the patent actually claims the features presented in the proposed mark. If it does, the utility patent is strong evidence that the particular product features claimed as trade dress are functional. If it does not, or if the features are referenced in the patent, but only as arbitrary or incidental features, then the probative value of the patent as evidence of functionality is substantially diminished or negated entirely. *TrafFix*, 532 U.S. at 34, 58 USPQ2d at 1007 (noting that where a manufacturer seeks to protect arbitrary, incidental, or ornamental features of a product found in the patent claims, such as arbitrary curves in the legs or an ornamental pattern painted on the springs, functionality will not be established if the manufacturer can prove that those aspects do not serve a purpose within the terms of utility patent); *In re Udor U.S.A., Inc.*, 89 USPQ2d 1978, 80-82 (TTAB 2009) (finding that where the patent's language and a detailed comparison between the identified features of the patent drawing with the visible features of the trademark drawing established that the patent claims involved components neither shown nor described in the trademark design, the utility patent did not support a finding of functionality); see also *Black & Decker Inc. v. Hoover Serv. Ctr.*, 886 F.2d 1285, 12 USPQ2d 1250 (Fed. Cir. 1989) (lower court's reliance on and misinterpretation of a patent not in evidence as support for a finding of functionality was clear error); *In re Zippo Mfg. Co.*, 50 USPQ2d 1852 (TTAB 1999) (configuration of cigarette lighter not functional since patent covered slightly different exterior features and claimed internal mechanism); *In re Weber-Stephen Prods. Co.*, 3 USPQ2d 1659 (TTAB 1987) (patent evidence did not show utilitarian advantages of barbeque grill design sought to be registered). Where a utility patent claims more than what is sought to be registered, this fact does not establish the nonfunctionality of the product design, if the patent shows that the feature claimed as a trademark is an essential or integral part of the invention and has utilitarian advantages. Cf. *TrafFix*, 532 U.S. at 31, 58 USPQ2d at 1006-07 (nothing in the applied-for dual-spring traffic sign design pointed to arbitrary features).

The examining attorney should consider both the numbered claims and the disclosures in the written description, drawings, and abstract of the patent. In *Leight*, the Board found functionality based on both the claims and the disclosure. The Board rejected the applicant's argument that the examining attorney erred in looking to the claims made in applicant's patent, noting that the Supreme Court in *TrafFix* repeatedly

referred to a patent's claims as evidence of functionality. *Leight*, 80 USPQ2d at 1510-11. The examining attorney should also consider other evidence described in a patent that is relevant to the functionality of the mark at issue. *In re Pohl-Boskamp GmbH & Co.*, 106 USPQ2d at 1046-47.

Statements regarding utilitarian advantages of the design made in the course of the prosecution of the patent application can also be very strong evidence of functionality. *TrafFix*, 532 U.S. at 32, 58 USPQ2d at 1006 (“These statements [regarding specific functional advantages of the product design] made in the patent applications and in the course of procuring the patents demonstrate the functionality of the design. MDI does not assert that any of these representations are mistaken or inaccurate, and this is further strong evidence of the functionality of the dual-spring design.”); *M-5 Steel Mfg., Inc. v. O’Hagin’s Inc.*, 61 USPQ2d 1086, 1096 (TTAB 2001).

The fact that the proposed mark is *not* the subject of a utility patent does not establish that a feature of the proposed mark is nonfunctional. *TrafFix*, 532 U.S. at 32, 35, 58 USPQ2d at 1006-07; *In re Gibson Guitar Corp.*, 61 USPQ2d 1948, 1950 n.3, (TTAB 2001).

### *Design Patents*

Design patents cover the invention of a new, original, and ornamental design for an article of manufacture. 35 U.S.C. §171. A design patent is a factor that weighs against a finding of functionality, because design patents by definition protect only ornamental and nonfunctional features. However, ownership of a design patent does not in itself establish that a product feature is nonfunctional, and can be outweighed by other evidence supporting the functionality determination. *See In re Becton, Dickinson & Co.*, 675 F.3d at 1375, 102 USPQ2d at 1377; *In re R.M. Smith, Inc.*, 734 F.2d 1482, 1485, 222 USPQ 1, 3 (Fed. Cir. 1984); *Caterpillar*, 43 USPQ2d at 1339; *Am. Nat’l Can Co.*, 41 USPQ2d at 1843; *In re Witco Corp.*, 14 USPQ2d 1557, 1559 (TTAB 1989).

## **1202.02(a)(v)(B) Advertising, Promotional, or Explanatory Material in Functionality Determinations**

The applicant's own advertising touting the utilitarian aspects of its product design or product packaging is often strong evidence supporting a functionality refusal. *See, e.g., In re Becton, Dickinson & Co.*, 675 F.3d 1368, 1375-76, 102 USPQ2d 1372, 1377-78 (Fed. Cir. 2012); *AS Holdings, Inc. v. H & C Milcor, Inc.*, 107 USPQ2d 1829 (TTAB 2013); *Kistner Concrete Prods., Inc. v. Contech Arch Techs., Inc.*, 97 USPQ2d 1912 (TTAB 2011); *Mag Instrument, Inc. v. Brinkmann Corp.*, 96 USPQ2d 1701 (TTAB 2010); *In re N.V. Organon*, 79 USPQ2d 1639 (TTAB 2006); *In re Gibson Guitar Corp.*, 61 USPQ2d 1948 (TTAB 2001); *M-5 Steel Mfg., Inc. v. O’Hagin’s Inc.*, 61 USPQ2d 1086 (TTAB 2001); *In re Visual Commc’ns Co.*, 51 USPQ2d 1141 (TTAB 1999); *In re Edward Ski Prods., Inc.*, 49 USPQ2d 2001 (TTAB 1999); *In re Caterpillar Inc.*, 43 USPQ2d 1335 (TTAB 1997); *In re Bio-Medicus Inc.*, 31 USPQ2d 1254 (TTAB 1993); *In re Witco Corp.*, 14 USPQ2d 1557 (TTAB 1989).

An applicant will often assert that statements in its promotional materials touting the utilitarian advantages of the product feature are mere “puffery” and, thus, entitled to little weight in the functionality analysis. However, where the advertising statements clearly emphasize specific utilitarian features of the design claimed as a mark, the Board will reject such assertions of “puffing.” *See, e.g., Gibson Guitar*, 61 USPQ2d at 1951; *Goodyear Tire and Rubber Co. v. Interco Tire Corp.*, 49 USPQ2d 1705, 1716-17 (TTAB 1998); *Bio-Medicus*, 31 USPQ2d at 1260 (TTAB 1993); *Witco*, 14 USPQ2d at 1559-61 (TTAB 1989).

In *Gibson Guitar*, the Board found the design of a guitar body to be functional, noting that applicant's literature clearly indicated that the shape of applicant's guitar produced a better musical sound. Applicant's advertisements stated that "[t]his unique body shape creates a sound which is much more balanced and less 'muddy' than other ordinary dreadnought acoustics." 61 USPQ2d at 1951.

Where functionality appears to be an issue, in the first Office action, the examining attorney must ask the applicant to provide any available advertising, promotional, or explanatory material concerning the goods/services, particularly any material specifically related to the features embodied in the proposed mark. 37 C.F.R. §2.61(b). The examining attorney should also examine the specimen(s), and check to see if the applicant has a website on which the product is advertised or described.

In addition, examining attorney may check the websites of applicant's competitors for evidence of functionality. See *In re Van Valkenburgh*, 97 USPQ2d 1757, 1762-63, (TTAB 2011); *Gibson Guitar*, 61 USPQ2d at 1951. Industry and trade publications and computer databases may also be consulted to determine whether others offer similar designs and features or have written about the applicant's design and its functional features or characteristics. In *Gibson Guitar*, the record included an advertisement obtained from the website of a competitor whose guitar appeared to be identical in shape to applicant's configuration, touting the acoustical advantages of the shape of the guitar. 61 USPQ2d at 1951.

### **1202.02(a)(v)(C) Availability of Alternative Designs in Functionality Determinations**

An applicant attempting to rebut a prima facie case of functionality will often submit evidence of alternative designs to demonstrate that there is no "competitive need" in the industry for the applicant's particular product design. See [TMPEP §1202.02\(a\)\(iii\)\(A\)](#). In order to be probative, the alternative design evidence must pertain to the same category of goods as the applicant's goods. See, e.g., *In re Zippo Mfg. Co.*, 50 USPQ2d 1852, 1854 (TTAB 1999); *In re EBSCO Indus. Inc.*, 41 USPQ2d 1917, 1920 (TTAB 1997).

However, in *TrafFix Devices, Inc. v. Mktg. Displays, Inc.*, 532 U.S. 23, 58 USPQ2d 1001 (2001), the Supreme Court clearly indicated that if the record shows that a design is essential to the use or purpose of a product, or if it affects the cost or quality of the product, it is unnecessary to consider whether there is a competitive need for the product feature. The Court explained:

[W]e have said "in general terms, a product feature is functional, and cannot serve as a trademark, if it is essential to the use or purpose of the article or if it affects the cost or quality of the article." Expanding upon the meaning of this phrase, we have observed that a functional feature is one the "exclusive use of [which] would put competitors at a significant non-reputation-related disadvantage." The Court of Appeals in the instant case seemed to interpret this language to mean that a necessary test for functionality is "whether the particular product configuration is a competitive necessity." . . . This was incorrect as a comprehensive definition. As explained in *Qualitex, supra*, and *Inwood, supra*, a feature is also functional when it is essential to the use or purpose of the device or when it affects the cost or quality of the device . . . *Where the design is functional under the Inwood formulation there is no need to proceed further to consider if there is a competitive necessity for the feature.*

\* \* \*

*There is no need, furthermore, to engage, as did the Court of Appeals, in speculation about other design possibilities, such as using three or four springs which might serve the same purpose. Here, the functionality of the spring design means that competitors need not explore whether other spring juxtapositions might be used. The dual-spring design is not an arbitrary flourish in the configuration of MDI's product; it is the reason the device works. Other designs need not be attempted (emphasis added).*

*TrafFix*, 532 U.S. at 32-34, 58 USPQ2d at 1006-1007 (citations and additional internal quotations omitted); see also *In re Becton, Dickinson & Co.*, 675 F.3d 1368, 1376, 102 USPQ2d 1372, 1378 (Fed. Cir. 2012) (quoting *Valu Eng'g Inc. v. Rexnord Corp.*, 278 F.3d 1268, 1276, 61 USPQ2d 1422, 1427 (Fed. Cir. 2002)) (“[I]f functionality is found based on other considerations, there is ‘no need to consider the availability of alternative designs, because the feature cannot be given trade dress protection merely because there are alternative designs available.’”).

Nonetheless, since the preservation of competition is an important policy underlying the functionality doctrine, competitive need generally remains an important factor in a functionality determination. See *Valu Eng'g, Inc.*, 278 F.3d at 1277, 61 USPQ2d at 1428 (“[I]n determining ‘functionality,’ the Board must assess the effect registration of a mark would have on competition.”).

Accordingly, the examining attorney should request information about alternative designs in the initial Office action, pursuant to 37 C.F.R. §2.61(b), i.e., inquire whether alternative designs are available for the feature embodied in the proposed mark and whether the alternatives are more costly to produce.

Where the evidence indicates that the applicant’s configuration is the best or one of a few superior designs available, this evidence will strongly support a finding of functionality. See, e.g., *In re Dietrich*, 91 USPQ2d 1622, 1636 (TTAB 2009) (“[T]he question is not whether there are alternative designs that perform the same basic function, but whether the available designs work ‘equally well.’”) (citation omitted); *In re N.V. Organon*, 79 USPQ2d 1639, 1645-46 (TTAB 2006) (concluding that, since the record showed that orange flavor is one of the most popular flavors for medicine, it cannot be said that there are true or significant number of alternatives); *In re Gibson Guitar Corp.*, 61 USPQ2d 1948, 1951 (TTAB 2001) (finding that applicant had not shown there were alternative guitar shapes that could produce the same sound as applicant’s configuration, and noting that the record contained an advertisement obtained from the website of a competitor, whose guitar appeared to be identical in shape to applicant’s configuration, which stated that the shape of the guitar produces a better sound).

A configuration of a product or its packaging that embodies a superior design feature and provides a competitive advantage to the user is functional. In *N.V. Organon*, 79 USPQ2d at 1648-49, the Board found that by masking the unpleasant taste of the medicinal ingredients in pharmaceuticals, “flavor performs a utilitarian function that cannot be monopolized without hindering competition in the pharmaceutical trade. To allow registration of ‘an orange flavor’ as a trademark would give applicant potentially perpetual protection for this flavor, resulting in hindrance of competition.”

Functionality may be established by a single competitively significant application in the recited identification of goods, even if there is no anticompetitive effect in other areas of use, since competitors in that single area could be adversely affected. *Valu Eng'g*, 278 F.3d at 1278, 61 USPQ2d at 1428 (“[I]f the Board identifies any competitively significant single use in the recited identification of goods for which the mark as a whole is functional, the Board should deny registration.”).

If evidence shows the existence of a number of functionally equivalent alternative designs that work “equally well,” such that competitors do not need applicant’s design to compete effectively, this factor may not support functionality. *Dietrich*, 91 USPQ2d at 1636, citing *Valu Eng'g*, 278 F.3d at 1276, 61 USPQ2d at 1427. However, once deemed functional under other *Morton-Norwich* factors, the claimed trade dress cannot be registered merely because there are functionally equivalent alternative designs. *Valu Eng'g*, 278

F.3d at 1276, 61 USPQ2d at 1427. Existence of comparable alternative designs does not transform a functional design into a nonfunctional design. *Id.*

### **1202.02(a)(v)(D) Ease or Economy of Manufacture in Functionality Determinations**

A product feature is functional if it is essential to the use or purpose of the product *or if it affects the cost or quality of the product*. *Inwood Laboratories, Inc. v. Ives Laboratories, Inc.*, 456 U.S. 844, 850 n.10, 214 USPQ 1, 4 n.10 (1982) (emphasis added). Therefore, a showing that a product design or product packaging results from a comparatively simple or inexpensive method of manufacture will support a finding that the claimed trade dress is functional.

In many cases, there is little or no evidence pertaining to this factor. However, the examining attorney should still ask the applicant for information, under 37 C.F.R. §2.61(b), as to whether the subject design makes the product simpler or less costly to manufacture, since evidence on this issue weighs strongly in favor of a finding of functionality. *See, e.g., TrafFix Devices, Inc. v. Mktg. Displays, Inc.*, 532 U.S. 23, 32, 58 USPQ2d 1001, 1006 (2001); *In re Virshup*, 42 USPQ2d 1403, 1407 (TTAB 1997). Statements pertaining to the cost or ease of manufacture may sometimes also be found in informational or advertising materials. *See M-5 Steel Mfg., Inc. v. O'Hagin's Inc.*, 61 USPQ2d 1086, 1097 (TTAB 2001) (statements in promotional material that applicant's design results in reduced installation costs found to be evidence of the functionality of applicant's configurations of metal ventilating ducts and vents for tile or concrete roofs).

While evidence showing that a product feature results from a comparatively simple or inexpensive method of manufacture supports a finding that the design is functional, the opposite is not necessarily the case. That is, assertions by the applicant that its design is more expensive or more difficult to make, or that the design does not affect the cost, will not establish that the configuration is not functional. *In re Dietrich*, 91 USPQ2d 1622, 1637 (TTAB 2009) (“Even at a higher manufacturing cost, applicant would have a competitive advantage for what is essentially, as claimed in the patents, a superior quality wheel.”); *In re N.V. Organon*, 79 USPQ2d 1639, 1646 (TTAB 2006). Designs that work better or serve a more useful purpose may, indeed, be more expensive and difficult to produce.

### **1202.02(a)(vi) Aesthetic Functionality**

“Aesthetic functionality” refers to situations where the feature may not provide a truly utilitarian advantage in terms of product performance, but provides other competitive advantages. For example, in *Brunswick Corp. v. British Seagull Ltd.*, 35 F.3d 1527, 1531, 1533, 32 USPQ2d 1120, 1122, 1124 (Fed. Cir. 1994), *cert. denied*, 514 U.S. 1050 (1995), the Federal Circuit affirmed the Board's determination that the color black for outboard motors was functional because, while it had no utilitarian effect on the mechanical working of the engines, it nevertheless provided other identifiable competitive advantages, i.e., ease of coordination with a variety of boat colors and reduction in the apparent size of the engines.

The concept of “aesthetic functionality” (as opposed to “utilitarian functionality”) has for many years been the subject of much confusion. While the Court of Customs and Patent Appeals (the predecessor to the Court of Appeals for the Federal Circuit) appeared to reject the doctrine of aesthetic functionality in *In re DC Comics, Inc.*, 689 F.2d 1042, 1047-1050, 215 USPQ 394, 399-401 (C.C.P.A. 1982), the Supreme Court later referred to aesthetic functionality as a valid legal concept in *TrafFix Devices, Inc. v. Mktg. Displays, Inc.*, 532 U.S. 23, 33, 58 USPQ2d 1001, 1006 (2001). The confusion regarding aesthetic functionality stems in part from widespread misuse of the term “aesthetic functionality” in cases involving ornamentation issues, with some courts having mistakenly expanded the category of “functional” marks to include matter that is solely ornamental, essentially on the theory that such matter serves an “aesthetic function” or “ornamentation

function.” It is this incorrect use of the term “aesthetic functionality” in connection with ornamentation cases that was rejected by the Court of Customs and Patent Appeals. See *In re DC Comics, Inc.*, 689 F.2d 1042, 1047-1050, 215 USPQ 394, 397, 399-401 (C.C.P.A. 1982) (majority opinion and Rich, J., concurring) (holding, in a case involving features of toy dolls, that the Board had improperly “intermingled the concepts of utilitarian functionality and what has been termed ‘aesthetic functionality;’” and rejecting the concept of aesthetic functionality where it is used as a substitute for “the more traditional source identification principles of trademark law,” such as the ornamentation and functionality doctrines).

Where the issue presented is whether the proposed mark is ornamental in nature, it is improper to refer to “aesthetic functionality,” because the doctrine of “functionality” is inapplicable to such cases. The proper refusal is that the matter is ornamental and, thus, does not function as a mark under §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127. See [TMEP §§1202.03-1202.03\(g\)](#) regarding ornamentation.

The Supreme Court’s use of the term “aesthetic functionality” in the *TrafFix* case appears limited to cases where the issue is one of actual functionality, but where the nature of the proposed mark makes it difficult to evaluate the functionality issue from a purely utilitarian standpoint. This is the case with color marks and product features that enhance the attractiveness of the product. The color or feature does not normally give the product a truly utilitarian advantage (in terms of making the product actually perform better), but may still be found to be functional because it provides other real and significant competitive advantages and, thus, should remain in the public domain. See *Qualitex Co. v. Jacobson Prods. Co.*, 514 U.S. 159, 165, 34 USPQ2d 1161, 1163-1164 (1995) (stating that a product color might be considered functional if its exclusive use “would put competitors at a significant non-reputation-related disadvantage,” even where the color was not functional in the utilitarian sense).

In *M-5 Steel Mfg., Inc. v. O’Hagin’s Inc.*, 61 USPQ2d 1086, 1096 (TTAB 2001), the Board considered the proper use of the aesthetic functionality doctrine in connection with product designs for metal ventilating ducts and vents for tile or concrete roofs:

This case seems to involve elements of both utilitarian and aesthetic functionality. Here, for example, there is evidence of utility in applicant’s patent application, as well as statements touting the superiority of applicant’s design in applicant’s promotional literature, and statements that applicant’s design results in reduced costs of installation. On the other hand, there is no question that applicant’s roof designs which match the appearance of surrounding roof tiles are more pleasing in appearance because the venting tiles in each case are unobtrusive.

Citing extensively from the *TrafFix*, *Qualitex*, and *Brunswick* cases, the Board concluded that the product designs were functional for a combination of utilitarian and aesthetic reasons. *Id.* at 1097.

Note that this type of functionality determination – while employed in connection with a normally “aesthetic” feature such as color – is a proper use of the functionality doctrine, necessitating a §2(e)(5) refusal where the evidence establishes that a color or other matter at issue provides identifiable competitive advantages and, thus, should remain in the public domain. In *In re Florists’ Transworld Delivery Inc.*, 106 USPQ2d 1784 (TTAB 2013), for example, the record included evidence reflecting that, in the floral industry, color has significance and communicates particular messages (e.g., elegance, bereavement, Halloween), which extend to floral packaging. The Board found, therefore, that the examining attorney had demonstrated a competitive need for others in the industry to use black in connection with floral arrangements and packaging therefor and concluded that the proposed mark was functional under §2(e)(5). This is the opposite of an

ornamentation refusal, where the matter at issue serves no identifiable purpose other than that of pure decoration.

Generally speaking, examining attorneys should exercise caution in the use of the term “aesthetic functionality,” in light of the confusion that historically has surrounded this issue. In most situations, reference to aesthetic functionality will be unnecessary, since a determination that the matter sought to be registered is purely ornamental in nature will result in an ornamentation refusal under §§ 1, 2, and 45 of the Trademark Act, and a determination that the matter sought to be registered is functional will result in a functionality refusal under §2(e)(5). Use of the term “aesthetic functionality” may be appropriate in limited circumstances where the proposed mark presents issues similar to those involved in the *Florists’ Transworld Delivery*, *M-5 Steel*, and *Brunswick* cases discussed above – i.e., where the issue is one of true functionality under §2(e)(5), but where the nature of the mark makes the functionality determination turn on evidence of particular competitive advantages that are not necessarily categorized as “utilitarian” in nature. Any such use of the term “aesthetic functionality” should be closely tied to a discussion of specific competitive advantages resulting from use of the proposed mark at issue, so that it is clear that the refusal is properly based on the functionality doctrine and not on an incorrect use of “aesthetic functionality” to mean ornamentation.

See [TMEP §§1202.05](#) and [1202.05\(b\)](#) for additional discussion and case references regarding the functionality issue in connection with color marks.

### **1202.02(a)(vii) Functionality and Service Marks**

Although rare in the context of service mark applications, examining attorneys are not foreclosed from refusing registration based on functionality. In *Duramax Marine, LLC v. R.W. Fernstrum & Co.*, 80 USPQ2d 1780, 1793 (TTAB 2006), the Board held that a two-dimensional design of a marine heat exchanger (commonly known as a “keel cooler”), was not functional for “manufacture of marine heat exchangers to the order and specification of others.” It found “a significant difference between an application to register trade dress in the nature of product design as a mark for the product itself ... and an application to register a two-dimensional drawing that may look very much like such a product, but is used on labels, catalogs, brochures, and in various other ways as a mark for services;” and stated that “[t]he inquiry regarding functionality may need to be decidedly different” in cases involving a service mark.

The record showed that the keel cooler depicted in the proposed mark was “identical, or nearly so” to the depiction of a keel cooler in applicant’s expired patent; that opposer and at least one other party had been marketing keel coolers very similar to the proposed mark; and that the design sought to be registered appeared in applicant’s catalog of pre-manufactured keel coolers. *Id.* at 1786. The Board framed the question at issue as “whether any manufacturer of the formerly patented item should be free to utilize, in advertising its goods for sale, a realistic depiction of the item,” and stated that:

[W]e must balance against opposer’s argument for the extension of existing case law on functionality [to] what is shown by the record to be long use of the keel cooler depiction by applicant in the manner of a logo. Further, opposer has not discussed whether, when custom manufacturing services are involved, we should still apply the *TrafFix* test for functionality (a three-dimensional product design is functional if it is “essential to the use or purpose of the product or if it affects the cost or quality of the product”) to the product that results from purchasing the services, or whether the test should be adapted and focus on whether use of the two-dimensional design to be registered is essential to anyone who would provide the same service, or would, if unavailable, affect the cost or quality of the service.

*Id.* at 1794, citing *TrafFix Devices, Inc. v. Mktg. Displays, Inc.*, 532 U.S. 23, 58 USPQ2d 1001 (2001).

The Board held that opposer had failed to justify an extension of existing law to cover the circumstances of this case, but stated that its decision “does not foreclose the extension of *TraFFix* to service marks if circumstances in a future case warrant such an extension.” *Duramax*, 80 USPQ2d at 1794.

### **1202.02(a)(viii) Functionality and Non-Traditional Marks**

In addition to product design and product packaging, the functionality doctrine has been applied to other non-traditional proposed marks, such as sound, color, and flavor, and the same *Morton-Norwich* analysis, discussed above, applies to these marks. See, e.g., *Brunswick Corp. v. British Seagull Ltd.*, 35 F.3d 1527, 1532, 32 USPQ2d 1120, 1123 (Fed. Cir. 1994), *cert. denied*, 514 U.S. 1050 (1995) (finding the color black for outboard motors functional because it provided competitive advantages such as ease of coordination with a variety of boat colors and reduction in the apparent size of the engines); *In re Florists' Transworld Delivery Inc.*, 106 USPQ2d 1784, 1791 (TTAB 2013) (finding the color black for floral packaging functional because there was a competitive need for others in the industry to use black in connection with floral arrangements and flowers in order to communicate a desired sentiment or occasion such as elegance, bereavement, or Halloween); *In re Pohl-Boskamp GmbH & Co.*, 106 USPQ2d 1042 (TTAB 2013) (finding the flavor peppermint functional for nitroglycerin lingual spray based on evidence that peppermint oil, which imparts a flavor of peppermint, can improve the effectiveness of sublingual nitroglycerin spray); *In re Vertex Grp. LLC*, 89 USPQ2d 1694, 1700 (TTAB 2009) (affirming the refusal to register an alarm sound emitted by personal security alarms in the normal course of operation without showing of acquired distinctiveness); *Saint-Gobain Corp. v. 3M Co.*, 90 USPQ2d 1425, 1447 (TTAB 2007) (deep purple shade for coated abrasives held functional, the Board finding that coated abrasive manufacturers have a competitive need to use various shades of purple, including applicant's shade, and that “[i]n the field of coated abrasives, color serves a myriad of functions, including color coding, and the need to color code lends support for the basic finding that color, including purple, is functional in the field of coated abrasives having paper or cloth backing.”); *In re N.V. Organon*, 79 USPQ2d 1639, 1645-46 (TTAB 2006) (finding the flavor orange functional for pharmaceuticals where the evidence showed the flavor served to mask the otherwise unpleasant taste of the medicine flavor); see also *Qualitex Co. v. Jacobson Prods. Co.*, 514 U.S. 159, 165, 34 USPQ2d 1161, 1163-1164 (1995) (stating that a product color might be considered functional if its exclusive use “would put competitors at a significant non-reputation-related disadvantage,” even where the color was not functional in the utilitarian sense); TMEP §§ [1202.02\(a\)\(vi\)](#) and [1202.05\(b\)](#) (regarding aesthetic functionality and color marks).

Examining attorneys should also consider the functionality doctrine in relation to other types of non-traditional marks, such as scent. For example, an application to register scent for an air freshener or an application to register the sound of a ring tone for downloadable ring tones must be refused as functional, as the proposed marks are essential to the use or purpose of the goods. Cf. *Vertex*, 89 USPQ2d at 1703 (finding that the “ability of applicant's [security alarms] to emit a loud, pulsing sound is essential to their use or purpose” because the evidence showed that use of a loud sound as an alarm is important and that alternating sound pulses and silence is a “more effective way to use sound as an alarm than is a steady sound”).

### **1202.02(b) Distinctiveness of Trade Dress**

Regardless of whether a proposed trade dress mark is refused as functional under §2(e)(5), the examining attorney must also examine the mark for distinctiveness. Trade dress that is not inherently distinctive and that has not acquired distinctiveness under §2(f) must be refused registration. The statutory basis for the refusal of registration on the Principal Register on the ground that the trade dress is nondistinctive is §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127, for trademark applications, or §§1, 2, 3, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, 1053, and 1127, for service mark applications.

In *Wal-Mart Stores, Inc. v Samara Bros.*, 529 U.S. 205, 215, 54 USPQ2d 1065, 1069 (2000), the Supreme Court distinguished between two types of trade dress – product design and product packaging. If the trade dress falls within the category of product "design," it can never be inherently distinctive. *Id.* at 212, 54 USPQ at 1068 ("It seems to us that design, like color, is not inherently distinctive."). Moreover, the Court held that in close cases in which it is difficult to determine whether the trade dress at issue is product packaging or product design, "courts should err on the side of caution and classify ambiguous trade dress as product design, thereby requiring secondary meaning." *Id.* at 215, 54 USPQ2d at 1070; *see In re Slokevage*, 441 F.3d 957, 78 USPQ2d 1395 (Fed. Cir. 2006). ( *Note*: If the trade dress is functional, it cannot be registered despite acquired distinctiveness. *TraFFix Devices, Inc. v. Mktg. Displays, Inc.*, 532 U.S. 23, 33, 58 USPQ2d 1001, 1007 (2001)).

A claim of acquired distinctiveness under §2(f) will not overcome a functionality refusal, but may overcome a nondistinctiveness refusal. For example, if the examining attorney issues a refusal on the basis that a product packaging mark is functional and, in the alternative, is nondistinctive, and the applicant asserts acquired distinctiveness in response, the examining attorney must maintain the previously issued functionality refusal, if appropriate, and determine whether the applicant's evidence would be sufficient to overcome the nondistinctiveness refusal, if the functionality refusal is ultimately reversed.

If the examining attorney fails to separately address the sufficiency of the applicant's evidence of acquired distinctiveness, this may be treated as a concession that the evidence would be sufficient to establish distinctiveness, if the mark is ultimately found not to be functional. *See In re Dietrich*, 91 USPQ2d 1622, 1625 (TTAB 2009) (holding that an examining attorney had "effectively conceded that, assuming the mark is not functional, applicant's evidence is sufficient to establish that the mark has acquired distinctiveness," where the examining attorney rejected the applicant's §2(f) claim on the ground that applicant's bicycle wheel configuration was functional and thus unregistrable even under §2(f), but did not specifically address the sufficiency of the §2(f) evidence or the question of whether the mark would be registrable under §2(f), if it were ultimately found to be nonfunctional). *See* TMEP §§[1209.02\(a\)\(ii\)](#) and [1212.02\(i\)](#) regarding assertion of acquired distinctiveness in response to an Office action and claiming acquired distinctiveness with respect to incapable matter.

### **1202.02(b)(i) Distinctiveness and Product Design Trade Dress**

A mark that consists of product design trade dress is never inherently distinctive and is not registrable on the Principal Register unless the applicant establishes that the mark has acquired distinctiveness under §2(f). *Wal-Mart Stores, Inc. v. Samara Bros.*, 529 U.S. 205, 213-216, 54 USPQ2d 1065, 1069-70 (2000). Therefore, as a matter of law, product design cannot be considered inherently distinctive and cannot be registered without a showing of secondary meaning. *Id.* at 213-14, 54 USPQ2d at 1069. The Supreme Court noted that product design almost invariably serves purposes other than source identification, and that "[c]onsumers are aware . . . that, almost invariably, even the most unusual of product designs -- such as a cocktail shaker shaped like a penguin -- is intended not to identify the source, but to render the product itself more useful or appealing." *Id.*

In applications seeking registration of marks comprising product design, the examining attorney must refuse registration on the ground that the proposed mark is not inherently distinctive unless the applicant claims that the mark has acquired distinctiveness under §2(f) and provides sufficient evidence to show that the mark has acquired distinctiveness. The ground for the refusal is that the proposed mark consists of nondistinctive product design, and, thus, does not function as a mark under §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127. Because product design cannot be inherently distinctive as a matter of law, per *Wal-Mart*, if the applicant has not claimed acquired distinctiveness, supporting evidence for the refusal is unnecessary. 529 U.S. at 213-216, 54 USPQ2d at 1069-70. If the product design is not functional,

the mark may be registered on the Supplemental Register, or, if the applicant shows that the product design has acquired distinctiveness, on the Principal Register under §2(f). See TMEP §§[815–816.05](#) regarding the Supplemental Register, [1202.02\(a\)–1202.02\(a\)\(viii\)](#) regarding functionality, [1202.02\(b\)–1202.02\(b\)\(ii\)](#) regarding distinctiveness, and [1212–1212.10](#) regarding acquired distinctiveness. A refusal on the ground that the entire proposed mark is not inherently distinctive generally is not appropriate if the mark includes additional distinctive matter beyond just the product design, such as words and/or images. In such situations, the applicant may be required to disclaim or claim acquired distinctiveness in part as to any non-inherently distinctive elements.

In distinguishing between product packaging and product design trade dress, *Wal-Mart* instructs that, in “close cases,” courts should classify the trade dress as product design and, thus, require proof of secondary meaning. 529 U.S. at 215, 54 USPQ2d at 1070. In addition, product design can consist of design features that are incorporated in the product and need not implicate the entire product. *See id.* at 207, 213, 54 USPQ2d at 1066, 1069 (a “cocktail shaker shaped like a penguin” is product design, as is “a line of spring/summer one-piece seersucker outfits decorated with appliqués of hearts, flowers, fruits, and the like”); *In re Slokevage*, 441 F.3d 957, 961, 78 USPQ2d 1395, 1398 (Fed. Cir. 2006) (holding the mark to be product design trade dress where the mark was for clothing and consisted of a label with the words “FLASH DARE!” in a V-shaped background and cut-out areas located on each side of the label with the cut-out areas consisting of a hole in a garment and a flap attached to the garment with a closure device).

Applicants face a heavy burden in establishing distinctiveness in an application to register trade dress. *Stuart Spector Designs, Ltd. v. Fender Musical Instruments Corp.*, 94 USPQ2d 1549 (TTAB 2009); *see also Duraco Prods., Inc. v. Joy Plastic Enters., Ltd.*, 40 F.3d 1431, 1453, 32 USPQ2d 1724, 1742 (3d Cir. 1994) (“secondary meaning in a product configuration case will generally not be easy to establish”). A mere statement of five years’ use is generally not sufficient. *See, e.g., In re Ennco Display Sys. Inc.*, 56 USPQ2d 1279, 1284, 1286 (TTAB 2000). (noting the statutory language regarding acquired distinctiveness “is permissive, and the weight to be accorded [evidence of five years of substantially exclusive use] depends on the facts and circumstances of the particular case,” and finding evidence of seven to seventeen years of use insufficient to support a claim of acquired distinctiveness). Generalized sales and advertising figures by themselves will usually be insufficient proof of secondary meaning where the promotional material does not use the design alone but instead with other marks. *See In re Soccer Sport Supply Co.*, 507 F.2d 1400, 184 USPQ 345, 348 (CCPA 1975) (advertising displaying the design at issue along with word marks lacked the “nexus” that would tie together use of the design and the public’s perception of the design as an indicator of source); *In re Mogen David Wine Corp.*, 372 F.2d 539, 152 USPQ 593, 595 (CCPA 1967) (where a container design appeared with a word mark, any alleged association of the design with the company “was predicated upon the impression imparted by the [word] mark . . . rather than by any distinctive characteristic of the container per se.”). Further, a product design may become generic and, thus, cannot be registered regardless of an applicant’s claim of acquired distinctiveness. *See Stuart Spector Designs*, 94 USPQ2d at 1555 (noting that a design may be deemed incapable where it is, at a minimum, so common in the industry that it cannot be said to identify a particular source.”). Therefore, these common or basic shapes are not registrable on the Principal Register under §2(f) or on the Supplemental Register. See [TMEP §1212.02\(i\)](#) regarding acquired distinctiveness with respect to incapable matter.

For applications based on §1(b) of the Trademark Act, 15 U.S.C. §1051(b), the examining attorney must issue the nondistinctiveness refusal even if the applicant has not filed an allegation of use. See [TMEP §1202.02\(d\)](#) regarding trade dress in intent-to-use applications. For applications based on §44 or §66(a), even though the applicant does not need to show use in commerce, the same standards regarding product design apply and the examining attorney must still issue the nondistinctiveness refusal, assuming acquired

distinctiveness has not been established. See [TMEP §1010](#) regarding §44 applications and [TMEP §1212.08](#) regarding distinctiveness in §44 or §66(a) applications.

### 1202.02(b)(ii) Distinctiveness and Product Packaging Trade Dress

Product packaging trade dress may be inherently distinctive. *Wal-Mart Stores, Inc. v. Samara Bros.*, 529 U.S. 205, 212-13, 54 USPQ2d 1065, 1068 (2000) (“The attribution of inherent distinctiveness to certain . . . product packaging derives from the fact that the very purpose of . . . encasing [a product] in a distinctive packaging, is most often to identify the source of the product”). Therefore, in applications seeking registration of marks comprising product packaging, the examining attorney must assess inherent distinctiveness. If it is lacking, registration must be refused on the Principal Register on the ground that the proposed mark is nondistinctive trade dress under §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127, for trademark applications, or under §§1, 2, 3, and 45, 15 U.S.C. §§1051, 1052, 1053, and 1127, for service mark applications.

In *Wal-Mart Stores, Inc. v. Samara Bros.*, 529 U.S. 205, 215, 54 USPQ2d 1065, 1069 (2000), the Supreme Court discussed the distinction between the trade dress at issue in *Two Pesos, Inc. v. Taco Cabana, Inc.*, 505 U.S. 763, 23 USPQ2d 1081 (1992), and the product design trade dress (designs for children’s clothing) under consideration in *Wal-Mart*:

*Two Pesos* unquestionably establishes the legal principle that trade dress can be inherently distinctive, but it does not establish that *product-design* trade dress can be. *Two Pesos* is inapposite to our holding here because the trade dress at issue, the decor of a restaurant, seems to us not to constitute product design. It was either product packaging – which, as we have discussed, normally *is* taken by the consumer to indicate origin – or else some *tertium* quid that is akin to product packaging (citation omitted).

The examining attorney should be mindful of the Supreme Court’s admonishment that where there are close cases, trade dress should be classified as product design for which secondary meaning is always required. *Id.* at 215, 54 USPQ2d at 1070.

“[A] mark is inherently distinctive if ‘[its] intrinsic nature serves to identify a particular source.’” *Id.* at 210, 54 USPQ2d at 1068 (citing *Two Pesos, Inc. v. Taco Cabana, Inc.*, 505 U.S. 763, 768, 23 USPQ2d 1081, 1083 (1992)). The test for determining inherent distinctiveness set forth in *Seabrook Foods, Inc. v. Bar-Well Foods, Ltd.*, 568 F.2d 1342, 1344, 196 USPQ 289, 291 (C.C.P.A. 1977), although not applicable to product design trade dress, is still viable in the examination of product packaging trade dress. The examining attorney should consider the following *Seabrook* factors – whether the proposed mark is:

- (1) a “common” basic shape or design;
- (2) unique or unusual in a particular field;
- (3) a mere refinement of a commonly adopted and well-known form of ornamentation for a particular class of goods viewed by the public as a dress or ornamentation for the goods; or
- (4) capable of creating a commercial impression distinct from the accompanying words.

*Id.*; see also *In re Chippendales USA, Inc.*, 622 F.3d 1346, 1351, 96 USPQ2d 1681, 1684 (Fed. Cir. 2010) (stating that an abbreviated tuxedo costume consisting of wrist cuffs and a bowtie collar without a shirt “constitute[d] ‘trade dress’ because it was part of the ‘packaging’” for exotic dancing services); *Tone Bros., Inc. v. Sysco Corp.*, 28 F.3d 1192, 1205-07, 31 USPQ2d 1321, 1330-32 (Fed. Cir. 1994) (citing *Seabrook*) (reversing lower court’s summary judgment finding that the shape and appearance of the spice container at

issue was not inherently distinctive); *In re Mars, Inc.*, 105 USPQ2d 1859, 1869-71 (TTAB 2013) (finding applicant's packaging configuration for pet food, resembling many cans used in the pet food field, to be a common basic shape, even though it was inverted, and a mere refinement of existing trade dress within the field); *In re Chevron Intellectual Prop. Grp. LLC*, 96 USPQ2d 2026, 2029 (TTAB 2010) (affirming that applicant's "'three-dimensional, six-sided beveled shape' [pole spanner design used to promote services] is a mere refinement of a commonly used form of a gasoline pump ornamentation rather than an inherently distinctive service mark for automobile service station services."); *In re Brouwerij Bosteels*, 96 USPQ2d 1414, 1421-22 (TTAB 2010) (finding that product packaging trade dress in the nature of a beer glass and stand with wording and scrollwork would be perceived as a mere refinement of a commonly known glass and stand rather than an inherently distinctive indicator of source for the goods); *In re File*, 48 USPQ2d 1363, 1367 (TTAB 1998) (stating that novel tubular lights used in connection with bowling alley services would be perceived by customers as "simply a refinement of the commonplace decorative or ornamental lighting . . . and would not be inherently regarded as a source indicator."); *In re J. Kinderman & Sons Inc.*, 46 USPQ2d 1253, 1255 (TTAB 1998) ("while the designs [of packaging for electric lights for Christmas trees that] applicant seeks to register may be unique in the sense that we have no evidence that anyone else is using designs which are identical to them, they are nonetheless not inherently distinctive."); *In re Hudson News Co.*, 39 USPQ2d 1915, 1923 (TTAB 1996), aff'd per curiam, 114 F.3d 1207 (Fed. Cir. 1997) ("[f]or the 'blue motif' of a retail store to be registrable on the Principal Register without resort to Section 2(f), the trade dress would have to be immediately recognizable as a distinctive way of identifying the source of the store services."); *Yankee Candle Co. v. Bridgewater Candle Co., LLC*, 259 F.3d 25, 42-45, 59 USPQ2d 1720, 1730-32 (1st Cir. 2001) (finding trade dress for common elements of candle labels to be nondistinctive product packaging for which insufficient evidence of acquired distinctiveness had been shown).

Any one of the Seabrook factors, by itself, may be determinative as to whether the mark is inherently distinctive. See *Chippendales*, 622 F.3d at 1355, 96 USPQ2d at 1687; *Chevron*, 96 USPQ2d at 2028.

Where the proposed product packaging trade dress is not inherently distinctive, based on the analysis of the *Seabrook* factors and supporting evidence, and acquired distinctiveness has not been established, registration must be refused. *Chippendales*, 622 F.3d at 1351-52, 96 USPQ2d at 1684. The examining attorney must establish a prima facie case that the product packaging is not inherently distinctive. *Id.* at 1350, 96 USPQ2d at 1684. To meet this burden, the examining attorney must, at a minimum, set forth a "'reasonable predicate' for [the] position of no inherent distinctiveness," for example, by introducing evidence regarding the first *Seabrook* factor that competitors use similar basic shapes and designs. *In re Pacer Tech.*, 338 F.3d 1348, 1352, 67 USPQ2d 1629, 1632 (Fed. Cir. 2003) (finding evidence of design patents showing other adhesive container cap designs sufficient to establish prima facie case that applicant's adhesive container cap was not inherently distinctive). The USPTO is an agency of limited resources, and as such, it cannot be expected to shoulder the burden of conducting market research. *Id.*

For applications based on §1(b) of the Trademark Act, 15 U.S.C. §1051(b), unless the drawing, the description of the mark, and the examining attorney's search results are dispositive of the lack of distinctiveness without the need to consider a specimen, applications for product packaging trade dress generally will not be refused registration on the ground of nondistinctiveness until the applicant has filed an allegation of use. See [TMEP §1202.02\(d\)](#). For §44 and §66(a) applications, for which no allegation of use is required, a nondistinctiveness refusal may be issued, if appropriate, based on a review of the drawing, the description of the mark, and any evidence obtained from the examining attorney's search results. See [TMEP §1202.02\(e\)](#).

Regardless of the basis for filing, if a proposed product packaging mark is inherently distinctive, it may be registered on the Principal Register. See *In re Procter & Gamble Co.*, 105 USPQ2d 1119, 1123, 1126 (TTAB 2012) (finding the overall shape of a container with a cap, and the shape of the cap by itself, inherently distinctive for mouthwash); *In re Creative Beauty Innovations, Inc.*, 56 USPQ2d 1203, 1208 (TTAB 2000)

(bottle configuration found inherently distinctive); *In re Fre-Mar Indus., Inc.*, 158 USPQ 364, 367 (TTAB 1968) (“[A]lthough the particular shape is a commonplace one for flashlights, it is nevertheless so unique and arbitrary as a container in the tire repair field that it may be inherently distinctive and, therefore, by reason of its shape alone, serve to identify applicant’s goods and distinguish them from like goods of others.”); *In re Int’l Playtex Corp.*, 153 USPQ 377, 378 (TTAB 1967) (container configuration having the appearance of an ice cream cone found inherently distinctive packaging for baby pants).

If a proposed product packaging mark is *not* inherently distinctive, the mark may be registered on either the Principal Register under §2(f), upon proof that the mark has acquired distinctiveness or secondary meaning, or on the Supplemental Register. Secondary meaning is acquired when the public views the primary significance of the product packaging as identifying the source of the product rather than the product itself. *Wal-Mart*, 529 U.S. at 211, 54 USPQ2d at 1068. Whether five years’ use is sufficient depends on the degree to which the mark’s elements are unique or common in the field. This is determined by comparing the specific features comprising the mark with the evidence of competitors’ use of similar features for the identified goods or services. The more unique or unusual the features, the more likely that five years’ use may suffice, but the more common or basic the features, the less likely that five years’ use would suffice. See [TMPEP §1212](#) regarding claiming acquired distinctiveness and [TMPEP §1212.05](#) regarding claiming five years of use as proof of distinctiveness.

In the following cases, the applicant’s evidence was found to be sufficient to support a claim of acquired distinctiveness: *In re World’s Finest Chocolate, Inc.*, 474 F.2d 1012, 1015, 177 USPQ 205, 207 (C.C.P.A. 1973) (package design found to identify applicant’s candy bars and distinguish them from those of others); *Ex parte Haig & Haig Ltd.*, 118 USPQ 229, 230 (Comm’r Pats. 1958) (“[The decree] recited that because of the original, distinctive and peculiar appearance of the ‘Pinched Decanter’ the brand of whiskey in such bottles had come to be known and recognized by the public, by dealers and by consumers; and that the whiskey contained in such bottles had come to be identified with the ‘Pinched Decanter’ in the minds of the public generally.”).

See [TMPEP §§1212-1212.10](#) regarding acquired distinctiveness and [815-816.05](#) regarding the Supplemental Register. In *In re Usher, S.A.*, 219 USPQ 920, 921 (TTAB 1983), the evidence of secondary meaning was insufficient (holding that the configuration of a package for mint candies was not functional but the package design was not shown to possess secondary meaning). See also *Brouwerij Bosteels*, 96 USPQ2d at 1424 (evidence of acquired distinctiveness for product packaging trade dress in the nature of a beer glass and stand was insufficient).

### **1202.02(c) Drawings, Descriptions, and Disclaimers in Trade Dress Applications**

Applicants often submit drawings and descriptions of marks depicting trade dress and containing matter that is: (1) not part of the mark; (2) functional; (3) nondistinctive and capable; (4) nondistinctive and incapable; (5) inherently distinctive; or (6) a combination of these factors. To ensure proper examination, the drawing and description of such a mark must accurately depict the mark the applicant intends to register. For example, both the drawing and the description of the mark must clearly indicate those portions that are claimed as part of the mark and those that are not.

If the drawing does not meet the requirements of 37 C.F.R. §2.52, the examining attorney must require the applicant to submit a substitute drawing and a substitute description of the mark. The examining attorney may require the applicant to provide additional information, such as pictures of the goods, samples, or other

relevant materials pursuant to 37 C.F.R. §2.61(b), to assist in assessing the accuracy and completeness of the drawing and in crafting a comprehensive description of the mark.

### **1202.02(c)(i) Drawings of Trade Dress Marks**

Drawings of three-dimensional product design and product packaging trade dress marks may not contain elements that are not part of the mark (i.e., matter that is functional or incapable of trademark significance). If the mark comprises only a portion of product design or product packaging, solid lines must be used on the drawing to show the elements of the product design or product packaging that are claimed as part of the mark, and broken or dotted lines must be used to indicate the portions that are not claimed as part of the mark. 37 C.F.R. §2.52(b)(4); *see In re Water Gremlin Co.*, 635 F.2d 841, 844, 208 USPQ 89, 91 (C.C.P.A. 1980) (affirming the functionality of a circular-shaped container for the goods and the requirement for an amended drawing to either delete the representation of the container from the drawing or show it in dotted lines); [TMPEP §807.08](#).

Since elements on the drawing shown in broken or dotted lines are not part of the mark, they are generally excluded from the examining attorney's consideration during any §2(d) (likelihood of confusion) analysis. *See In re Homeland Vinyl Prods., Inc.*, 81 USPQ2d 1378, 1382 (TTAB 2006).

In rare instances where it is impractical to render certain elements of a mark in dotted or broken lines - for example, if those elements are proportionally so small as to render dotted lines illegible - or if dotted lines would result in an unclear depiction of the mark, the applicant may use solid lines. However, the applicant must insert a statement in the description of the mark identifying these elements and declaring that these elements are not part of the mark and that they serve only to show the position of the mark on the goods, as appropriate.

Usually, a drawing of a trade dress mark is depicted in a three-dimensional manner that gives the appearance of height, width, and depth to the mark. Generally, the drawing shows an illustrated rendering of the product design or product packaging, but a photograph of the product design or product packaging is also acceptable. Drawings consisting of either illustrated renderings or photographs of the proposed trade dress will both be subject to the same drawing requirements and must fairly represent the mark (e.g., the drawing shows matter not claimed as part of the mark in broken or dotted lines and it does not contain extraneous, purely informational matter such as net weight, contents, or business addresses).

If the nature of the mark remains unclear from the record, an examining attorney may clarify whether the mark is three-dimensional trade dress by calling or e-mailing the applicant, or issuing an Office action containing requirements about the nature of the mark under 37 C.F.R. §2.61(b), for a clear drawing, or for a revised description. Where appropriate, any relevant trade-dress-related refusals (e.g., mark is functional, mark is not inherently distinctive) may also be included in the Office action.

In cases where the drawing depicts a two-dimensional mark that could be interpreted as three-dimensional in nature and the record is unclear, the examining attorney may suggest that the applicant clarify that the mark is two-dimensional in the mark description. See [TMPEP §808.02](#). If the mark is two-dimensional in nature, the mark should not be characterized as three-dimensional (e.g., that the mark “*appears* three-dimensional”).

If the applicant is required to submit an amended drawing, the mark description must also be amended accordingly. See [TMEP §1202.02\(c\)\(ii\)](#) regarding description requirements for trade dress marks.

### **1202.02(c)(i)(A) Functional Matter**

Functional elements of a trade dress mark are never capable of acquiring trademark significance and are unregistrable, much like informational matter. 15 U.S.C. §1052(e)(5); *Qualitex Co. v. Jacobson Prods. Co.*, 514 U.S. 159, 34 USPQ2d 1161 (1995). Therefore, to show that they are not part of the mark, functional elements must be depicted in broken or dotted lines on the drawing to show the position or placement of the claimed portion of the mark. See 37 C.F.R. §2.52(b)(4); *In re Water Gremlin Co.*, 635 F.2d 841, 844, 208 USPQ 89, 91 (C.C.P.A. 1980); *In re Famous Foods, Inc.*, 217 USPQ 177, 177 (TTAB 1983). A requirement to amend the drawing to depict functional matter in broken or dotted lines is permitted and generally does not constitute material alteration of the mark, regardless of the filing basis. See [TMEP §807.14\(a\)](#). Such an amendment is permissible even in an application under §66(a) because it is not considered an amendment to the mark itself, but rather a change in the manner in which the mark is depicted on the drawing, in order to comply with United States drawing requirements, where functional elements are not considered part of the mark. See [TMEP §807.14](#) regarding material alteration and [TMEP §§1904.02\(j\)-\(k\)](#) regarding drawings in §66(a) applications.

A functionality refusal must issue in cases where the trade dress mark is overall functional. The statutory basis for the refusal is §2(e)(5) of the Trademark Act, 15 U.S.C. §1052(e)(5). When a trade dress mark is not overall functional, but contains minor or insignificant elements that are functional, the examining attorney must require an amended drawing showing the functional elements in broken or dotted lines rather than in solid lines. See 37 C.F.R. §2.52(b)(4); *Water Gremlin*, 635 F.2d at 844, 208 USPQ at 91; *Famous Foods*, 217 USPQ at 177. The Office action must explain that, because the mark includes functional elements, an amended drawing is required showing the functional elements in broken or dotted lines, and a corresponding amended mark description is required indicating the functional elements depicted in broken or dotted lines are not claimed as part of the mark. The applicant must provide the amended drawing regardless of whether the remaining portions of the mark are determined to be registrable. See [TMEP §1202.02\(a\)\(v\)](#) regarding evidence and considerations regarding functionality determinations and [TMEP §1202.02\(c\)\(ii\)](#) regarding descriptions of trade dress marks.

Functional matter cannot be disclaimed. See *Water Gremlin*, 635 F.2d at 844, 208 USPQ at 91 (“The examiner’s requirement to delete the [functional] design (or show it in dotted lines) was entirely in order.”); *Famous Foods*, 217 USPQ at 177 (stating that functional “[f]eatures which are not being claimed as part of applicant’s asserted [trade dress] mark should be shown in dotted lines”). A disclaimer states that the applicant does not claim exclusive rights to matter in the mark apart from the mark as a whole and allows the applicant to maintain rights in the disclaimed matter as part of its own mark. Therefore, with respect to three-dimensional trade dress marks, elements that are functional, or intended to show position or placement only, must be shown in broken or dotted lines on the drawing. See [TMEP §1202.02\(c\)\(iii\)](#) regarding disclaiming unregistrable portions of trade dress marks.

### **1202.02(c)(i)(B) Nondistinctive Matter**

Nonfunctional elements of a product design or product packaging trade dress mark that are inherently distinctive, that have acquired distinctiveness, or that are capable but for which acquired distinctiveness has not yet been established, may appear in solid lines on the drawing as part of the mark. Nonfunctional, nondistinctive elements that are capable of trademark significance but for which acquired distinctiveness has not been established must be disclaimed. A disclaimer is appropriate because, while these elements are not source indicators, they may still remain part of the mark. See 15 U.S.C. §§1051-1052, 1056(a), 1127.

The disclaimer must be provided regardless of whether the remaining portions of the mark are determined to be registrable.

Occasionally, a trade dress mark may include elements that are nonfunctional, yet incapable of trademark significance, such as a common or basic shape of a product itself or the packaging in which a product is sold. These elements must be depicted in broken or dotted lines on the drawing because such elements cannot be considered part of the mark. *Cf. Traffix Devices v. Mktg. Displays*, 532 U.S. 23, 32, 58 USPQ2d 1001, 1006 (2001) (noting that functional features of product design cannot serve as trademarks); *In re Famous Foods, Inc.*, 217 USPQ 177, 177 (TTAB 1983) (noting that functional features of product packaging should be shown in dotted lines). Usually, amendments of drawings to depict incapable elements in broken or dotted lines do not materially alter the mark because the incapable elements are, by definition, not source indicating. *See* 37 C.F.R. §2.52(b)(4); *In re Water Gremlin Co.*, 635 F.2d 841, 844, 208 USPQ 89, 91 (C.C.P.A. 1980). Therefore, the examining attorney must issue a requirement for an amended drawing that depicts the incapable elements in broken or dotted lines, and a corresponding amended mark description to reflect that the incapable elements shown in broken or dotted lines are not claimed as part of the mark. *See* 37 C.F.R. §2.52(b)(4). The applicant must provide the amended drawing regardless of whether the remaining portions of the mark are determined to be registrable.

See [TMPEP §807.14](#) regarding material alteration, [TMPEP §1202.02\(c\)\(ii\)](#) regarding descriptions of trade dress marks, [TMPEP §1011.03](#) regarding amendment of marks in §44 applications, and [TMPEP §§1904.02\(j\)-\(k\)](#) regarding amendment of marks in §66(a) applications.

### **1202.02(c)(i)(C) Drawings in §44 and §66(a) Applications**

For trade dress marks in §44 and §66(a) applications, an amendment of the drawing to depict functional or incapable matter in broken or dotted lines is permitted and generally not a material alteration of the mark. *See* [TMPEP §§807.08](#) and [1904.02\(k\)](#). Although the mark in a §44 or §66(a) application cannot be amended, a change in the manner in which the mark is depicted may be permitted, in order to comply with the United States drawing requirements. *See* [TMPEP §1011.03](#) regarding amendment of marks in §44 applications and [§1904.02\(j\)-\(k\)](#) regarding amendment of marks in §66(a) applications. For instance, since functional matter is not considered source indicating and is never part of the mark, displaying it in broken or dotted lines shows placement of the functional matter in relation to the registrable portions of the mark.

Similarly, in §44 or §66(a) applications, amendments to delete extraneous matter from photographs, or amendments of drawings from photographs to illustrated renderings showing elements of the mark in dotted or broken lines, will be accepted and will not be considered a material alteration of the mark.

### **1202.02(c)(ii) Descriptions of Trade Dress Marks Required**

An application for a trade dress mark must include an accurate description of the mark. *See* 37 C.F.R. §2.37. If an acceptable statement describing the mark is not in the record, the examining attorney must require the applicant to submit a description to clarify what the applicant seeks to register. The description must adequately describe the mark, with unnecessary matter kept to a minimum. The description must clearly indicate that the mark is “three-dimensional” and constitutes “product design” or “configuration” of the goods themselves or product “packaging” or a “container” in which the goods are sold, or that the trade dress is for services offered (e.g., interior of a restaurant, exterior of a retail establishment, or point-of-sale-display such as a costume used in connection with the services).

If applicable, the description must specify which elements on the drawing constitute the mark and are claimed as part of the mark and which are not. The description of the mark must make clear what any broken or dotted lines represent and include a statement that the matter shown in broken or dotted lines is not claimed as part of the mark. *See* 37 C.F.R. §2.52(b)(4); [TMPEP §§808-808.03\(f\)](#). This information must be included in the description. Statements only in a response to an Office action or elsewhere in the record are insufficient. The description must also avoid use of disclaimer-type language, such as “no claim is made to the ...,” because of the different legal significance of using broken lines versus submitting a disclaimer. *See* [TMPEP §1202.02\(c\)\(iii\)](#) regarding disclaimers of unregistrable elements of trade dress marks.

In cases where the drawing depicts a two-dimensional mark that could be interpreted as three-dimensional in nature, an applicant may clarify that the mark is two-dimensional in the mark description. *See* [TMPEP §808.02](#). If the mark is two-dimensional in nature, the applicant should not characterize the mark as three-dimensional (e.g., that the mark “*appears* three-dimensional”).

During the prosecution of a trade dress application, if the applicant is required to submit an amended drawing (e.g., showing broken or dotted lines to depict functional matter, to indicate nondistinctive and incapable matter, or to depict matter otherwise not claimed as part of the mark), the examining attorney must also require a corresponding amended description.

Examples of acceptable language for this purpose are: “The broken lines depicting [describe elements] indicate placement of the mark on the goods and are not part of the mark” or “The dotted lines outlining [the goods] are intended to show the position of the mark on the goods and are not part of the mark.”

For example, for the mark below,

an appropriate description (and color claim) of the mark could read:

The colors white, blue, light blue, and silver are claimed as a feature of the mark. The mark consists of the color blue applied to the cap of the container of the goods, a white background applied to the rest of the container, a blue rectangle with a silver border, a light blue curving band, and three light blue droplets. The dotted lines outlining the container and its cap indicate placement of the mark on the goods and are not part of the mark.

For the mark below,

an appropriate description (and color claim) of the mark would read:

The color red is claimed as a feature of the mark. The mark consists of a single transverse red stripe applied adjacent to one end of the three-dimensional elongated packaging for the goods. The dotted outline of the packaging is intended to show the position of the mark and is not part of the mark.

And for the mark below,

an appropriate description of the mark would read:

The mark consists of a three-dimensional configuration of a stringed musical instrument body. The neck, peghead, and other instrument parts shown in broken lines serve to show positioning of the mark and form no part of the mark.

The examining attorney must ensure that the description statement has been entered into the Trademark database, so that it will be printed in the *Official Gazette* and on the certificate of registration. See [TMEP §817](#).

See [TMEP §§1202.05\(d\)\(i\) and \(d\)\(ii\)](#) regarding drawings in applications for color marks consisting solely of one or more colors.

### **1202.02(c)(iii) Disclaimers of Unregistrable Elements of Trade Dress Marks**

A disclaimer states that the applicant does not claim exclusive rights to matter in the mark apart from the mark as a whole. [TMEP §1213](#). The applicant maintains rights in the disclaimed matter only as part of its mark. Thus, except in the rare case when a trade dress mark is unitary, unregistrable elements must be either depicted in broken or dotted lines on the drawing or disclaimed, as appropriate. Specifically, elements that are functional or otherwise incapable of trademark significance must be depicted in broken or dotted lines on the drawing. Elements that are nonfunctional but capable of acquiring trademark significance, but for which acquired distinctiveness has not been established, must be disclaimed. See [TMEP §§1202.02\(c\)\(iii\)\(A\)–\(B\)](#) regarding functional and nondistinctive matter that cannot be disclaimed.

Trade dress marks generally are not considered unitary, as each of the elements normally creates a separate commercial impression. As stated in the Federal Circuit decision *In re Slokevage*, 441 F.3d 957, 963, 78 USPQ2d 1395, 1400 (Fed. Cir. 2006), “trade dress, by its nature, contains distinct elements and is characterized as the combination of various elements to create an overall impression.” Although each element is combined with others to form one composite mark, each element retains its separate commercial impression such that the mark as a whole is typically not unitary. Therefore, when a mark contains a combination of trade dress and word/design elements, each element should be examined separately for distinctiveness, except in the rare instance where it is shown that the mark as a whole is unitary. If only one element is inherently distinctive, this is not enough to transform the entire mark into an inherently distinctive, unitary mark. See [TMEP §§1213.05-1213.05\(h\)](#)—regarding unitary marks.

### **1202.02(c)(iii)(A) Functional Matter**

Since functional elements of a trade dress mark are unregistrable as a matter of law and cannot form part of the mark, a disclaimer is not an appropriate means of addressing functional matter in a trade dress mark.

See *In re Water Gremlin Co.*, 635 F.2d 841, 844, 208 USPQ 89, 91 (C.C.P.A. 1980) (“The examiner’s requirement to delete the [functional] design (or show it in dotted lines) was entirely in order.”); *In re Famous Foods, Inc.*, 217 USPQ 177, 177 (TTAB 1983) (stating that functional “[f]eatures which are not being claimed as part of applicant’s asserted [trade dress] mark should be shown in dotted lines”). Instead, if the mark is not overall functional, an amendment of the drawing must be required to depict any minor or insignificant functional elements in broken or dotted lines. *Id.*; see [TMEP §1202.02\(c\)\(i\)](#). However, if the

mark is overall functional, registration must be refused under §2(e)(5) of the Trademark Act, 15 U.S.C. §1052(e)(5).

### **1202.02(c)(iii)(B) Nondistinctive Matter**

Sometimes, a trade dress mark, as a whole, is registrable but contains elements that are nondistinctive but capable. See [TMEP §1202.02\(c\)\(i\)\(B\)](#). In this situation, if acquired distinctiveness has not been established, the capable elements must be disclaimed because, while they are not source indicators, they are still part of the mark. See 15 U.S.C. §§1051-1052, 1056(a), 1127. The disclaimer must be provided regardless of whether the remaining portions of the mark are determined to be registrable. However, where the nondistinctive elements are incapable of acquiring distinctiveness, for example, common or basic shapes of product design or product packaging, such elements are not part of the mark and, therefore, must be depicted in broken or dotted lines rather than disclaimed. See 37 C.F.R. §2.52(b)(4); *cf. Traffix Devices v. Mktg. Displays*, 532 U.S. 23, 32, 58 USPQ2d 1001, 1006 (2001) (noting that functional features of product design cannot serve as trademarks); *In re Famous Foods, Inc.*, 217 USPQ 177, 177 (TTAB 1983) (noting that functional features of product packaging should be shown in dotted lines).

See [TMEP §1212.02\(e\)](#) regarding disclaimers of unregistrable components in applications to register marks on the Principal Register under §2(f), [TMEP §1212.02\(i\)](#) regarding acquired distinctiveness with respect to incapable matter, and [TMEP §§1213.03–1213.03\(d\)](#) regarding disclaimers of unregistrable components of marks. See also *In re Creative Goldsmiths of Wash., Inc.*, 229 USPQ 766, 768 (TTAB 1986) (“[I]t is within the discretion of an Examining Attorney to require the disclaimer of an unregistrable component (such as a common descriptive, or generic, name) of a composite mark sought to be registered on the Principal Register under the provisions of Section 2(f).”).

Regarding disclaimers of unregistrable components in applications to register marks on the Supplemental Register, see *In re Water Gremlin Co.*, 635 F.2d 841, 845 n.6, 208 USPQ 89, 91 n.6 (C.C.P.A. 1980) (“Section 6 is equally applicable to the Supplemental Register.”); *In re Wella Corp.*, 565 F.2d 143, 144, 196 USPQ 7, 8 (C.C.P.A. 1977) (mark comprising stylized lettering of BALSAM, with disclaimer of “BALSAM,” found registrable on Supplemental Register for hair conditioner and hair shampoo); *In re Carolyn’s Candies, Inc.*, 206 USPQ 356, 360 (TTAB 1980) (“Section 6 of the Trademark Act of 1946, which provides for the disclaimer of ‘unregistrable matter’, does not limit the disclaimer practice to marks upon the Principal Register.”).

### **1202.02(c)(iv) Three-Dimensional Marks**

In an application to register a mark with three-dimensional features, the applicant must submit a drawing that depicts the mark in a single rendition. 37 C.F.R. §2.52(b)(2). See [TMEP §807.10](#). To accurately reflect the exact nature of the mark, the mark description must state that the mark is three-dimensional in nature. This three-dimensional feature of the mark must be shown in the supporting specimens of use, in order for the drawing to comprise a substantially exact representation of the mark as actually used. Conversely, a specimen depicting a three-dimensional representation of a mark would not be acceptable to show use for a mark that is described or depicted as a two-dimensional mark. If the applicant believes it cannot adequately display its mark in a single rendition, it may petition the Director to waive the requirement and accept a drawing featuring multiple views of the mark. 37 C.F.R. §2.146(a)(5).

### **1202.02(d) Trade Dress in §1(b) Applications**

#### *Distinctiveness and Product Design*

A product design trade dress mark can never be inherently distinctive and is registrable only upon a showing of secondary meaning. *Wal-Mart Stores, Inc. v. Samara Bros.*, 529 U.S. 205, 212, 54 USPQ2d 1065, 1068 (2000); *In re Slokevage*, 441 F.3d 957, 962, 78 USPQ2d 1395, 1399 (Fed. Cir. 2006); [TMEP §1202.02\(b\)\(i\)](#). See TMEP §§[1202.02\(b\)](#) and [1202.02\(b\)\(i\)](#) regarding distinctiveness of product design trade dress. Therefore, if the mark is comprised of a product design, the examining attorney will refuse registration on the Principal Register on the ground that the proposed mark consists of a nondistinctive product design under §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127. The examining attorney must make this refusal even in an intent-to-use application under 15 U.S.C. §1051(b) for which no allegation of use has been filed.

#### *Distinctiveness and Product Packaging*

If the mark comprises product packaging trade dress for goods or services, the examining attorney must determine whether the mark is inherently distinctive. *Wal-Mart Stores, Inc. v. Samara Bros.*, 529 U.S. 205, 212-13, 54 USPQ2d 1065, 1068-69 (2000); *Two Pesos, Inc. v. Taco Cabana, Inc.*, 505 U.S. 763, 773-75, 23 USPQ2d 1081, 1085-86 (1992). See TMEP §§[1202.02\(b\)](#) and [1202.02\(b\)\(ii\)](#) regarding distinctiveness of product packaging trade dress. This usually requires consideration of the context in which the mark is used and the impression it would make on purchasers. Generally, no refusal based on lack of inherent distinctiveness will be issued in an intent-to-use application under 15 U.S.C. §1051(b) until the applicant has submitted specimen(s) with an allegation of use under §1(c) or §1(d) of the Trademark Act, 15 U.S.C. §§1051(c) or (d). However, if appropriate, the examining attorney has discretion to issue this refusal before a specimen is submitted. See *In re Mars, Inc.*, 105 USPQ2d 1859 (TTAB 2013).

#### *Functionality*

To determine whether a proposed product design or product packaging trade dress mark is functional, the examining attorney must consider how the asserted mark is used. Generally, in a §1(b) application, the examining attorney will not issue a refusal on the ground that the mark is functional until the applicant has filed an allegation of use under §1(c) or §1(d) of the Trademark Act, 15 U.S.C. §§1051(c) or (d).

In a §1(b) application for which no specimen has been submitted, if the examining attorney's research indicates that a refusal based on functionality or nondistinctive trade dress will be made, the potential refusal should be brought to the applicant's attention in the first Office action. This is done strictly as a courtesy. If information regarding this possible ground for refusal is not provided to the applicant before the allegation of use is filed, the USPTO is not precluded from refusing registration on this basis. If the functional nature of the mark is clearly apparent from the drawing, description of the mark, and research conducted by the examining attorney, without the need to await consideration of the specimen, a refusal based on functionality or nondistinctive trade dress may issue prior to the filing of the allegation of use. See *In re Mars, Inc.*, 105 USPQ2d 1859.

### **1202.02(e) Trade Dress in §44 and §66(a) Applications**

#### *Distinctiveness and Product Design*

A product design trade dress mark can never be inherently distinctive and is registrable only upon a showing of secondary meaning. *Wal-Mart Stores, Inc. v. Samara Bros.*, 529 U.S. 205, 212-213, 54 USPQ2d 1065, 1068-1069 (2000); *In re Slokevage*, 441 F.3d 957, 962, 78 USPQ2d 1395, 1399 (Fed. Cir. 2006); [TMEP §1202.02\(b\)\(i\)](#). See TMEP §§[1202.02\(b\)](#) and [1202.02\(b\)\(i\)](#) regarding distinctiveness of product design trade dress. Therefore, if the proposed mark is comprised of a product design, the examining attorney must

refuse registration on the Principal Register on the ground that the proposed mark consists of a nondistinctive product design under §§1, 2, and 45 of the Trademark Act. 15 U.S.C. §§1051, 1052, and 1127.

### *Distinctiveness and Product Packaging*

If the mark comprises product packaging trade dress for goods or services, the examining attorney must determine whether the mark is inherently distinctive. *Wal-Mart Stores, Inc. v. Samara Bros.*, 529 U.S. 205, 212-13, 54 USPQ2d 1065, 1068-69 (2000); *Two Pesos, Inc. v. Taco Cabana, Inc.*, 505 U.S. 763, 773-75, 23 USPQ2d 1081, 1085-86 (1992). See TMEP §§[1202.02\(b\)](#) and [1202.02\(b\)\(ii\)](#) regarding distinctiveness of product packaging trade dress. Because a specimen of use is not required prior to registration in these cases, it is appropriate for the examining attorney to issue the refusal where the mark on its face, as shown on the drawing and described in the description of the mark, reflects a lack of distinctiveness. *Cf. In re Right-On Co.*, 87 USPQ2d 1152, 1156-57 (TTAB 2008) (noting the propriety of and affirming an ornamentation refusal in a §66(a) application despite the lack of a specimen).

### *Functionality*

If the application itself (i.e., the drawing, the description of the mark, and identification of goods/services) and/or the evidence uncovered during an independent search support that the proposed mark is functional, the examining attorney must issue a refusal of registration on the Principal Register under §2(e)(5). See [TMEP §§1202.02\(a\)–1202.02\(a\)\(viii\)](#) regarding functionality.

## **1202.02(f) Identification of Goods/Services in Trade Dress Applications**

### **1202.02(f)(i) Product Design**

Trade dress includes the three-dimensional design or configuration of the product itself. In such cases, the drawing usually depicts the item listed in the identification of goods (e.g., the drawing shows a three-dimensional design of a guitar and the goods are “guitars”). However, sometimes the identification of goods/services in a product-design application includes different or unrelated products or services that are, on their face, inconsistent with the product design depicted on the drawing (e.g., the drawing shows a three-dimensional design of a guitar and the identification includes “drums and pianos” or “retail music stores”). This presents an issue of “inconsistent goods.” In rare cases, slight variations are acceptable if the products have a “consistent overall look” such that the changes do not alter the distinctive characteristics and the trade dress conveys a “single and continuing” commercial impression. *Cf. Rose Art Indus., Inc. v. Swanson*, 235 F.3d 165, 173, 57 USPQ2d 1125, 1131 (3d Cir. 2000) (quoting *Rose Art Indus., Inc. v. Raymond Geddes & Co.*, 31 F. Supp. 2d 367, 373, 49 USPQ2d 1180, 1184 (D.N.J. 1998), *rev’d on other grounds sub nom. Rose Art Indus., Inc. v. Swanson*, 235 F.3d 165, 57 USPQ2d 1125 (3d Cir. 2000)) (stating that trade dress protection for a series or line of products or packaging depends on them having a consistent overall look and remanding for proper application of the standard); *The Walt Disney Co. v. GoodTimes Home Video Corp.*, 830 F. Supp. 762, 766, 29 USPQ2d 1047, 1050 (S.D.N.Y. 1993) (setting forth the “consistent overall look” standard and applying it to a claim of protection for a line of packaging trade dress). For example, the drawing of a three-dimensional design of a guitar might reasonably reflect the consistent overall look of both guitars and ukuleles, which can share a very similar shape and appearance.

*Section 1(a) Applications:* Where the identification of goods/services, the description of the mark, or other evidence of record indicate that not all of the goods/services in the identification are represented in the three-dimensional mark depicted on the drawing, the examining attorney must refuse registration on the ground that the mark fails to function as a mark for the inconsistent goods/services. The statutory bases for

the refusal are §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127 for trademarks and §§1, 2, 3, and 45, 15 U.S.C. §§1051, 1052, 1053, and 1127, for service marks.

The examining attorney must specify the inconsistent goods/services subject to refusal and request evidence and/or additional specimens to substantiate use of the mark in connection with the inconsistent goods/services. 37 C.F.R. §2.61(b). The applicant may overcome the refusal by providing (1) additional specimens showing the inconsistent goods in the shape of the design depicted on the drawing or (2) sufficient evidence that the three-dimensional product design or configuration mark functions as a source indicator in connection with the inconsistent goods/services listed in the identification. The applicant may also delete the inconsistent goods/services.

The examining attorney must also examine the drawing and the specimen to determine whether the specific three-dimensional product design mark depicted on the drawing is a substantially exact representation of the mark shown on the specimen. [TMEP §807.12\(a\)](#).

*Section 1(b) Applications:* In a §1(b) application for which no specimen has been submitted, if the examining attorney anticipates that the applicant may not be able to show proper trademark use of the product design mark for the inconsistent goods/services, the potential refusal should be brought to the applicant's attention in the first action issued by the USPTO. This advisory is given strictly as a courtesy. If information regarding the possible ground for refusal is not provided to the applicant before the allegation of use is filed, the USPTO is not precluded from refusing registration after submission of the use allegation. When the record indicates that the product design would not be perceived as a mark for the inconsistent goods/services, the examining attorney may make the failure to function as a mark refusal prior to the filing of the allegation of use.

When an amendment to allege use under 15 U.S.C. §1051(c), or a statement of use under 15 U.S.C. §1051(d), is submitted in connection with a §1(b) application, the examining attorney should follow the procedures discussed above for product-design trade dress in §1(a) applications.

*Section 44 and Section 66(a) Applications:* A specimen is not required in a §44 or §66(a) application to show use of the proposed mark in commerce in connection with the identified goods/services. However, since these applications are otherwise examined under the same standards as applications under §1, it is appropriate for the examining attorney to refuse registration on the ground that the mark fails to function as a mark for the inconsistent goods/services where the drawing, the description of the mark, the identification of goods/services, or other evidence indicates that the identification includes goods/services that are, on their face, inconsistent with the specific three-dimensional product design depicted on the drawing (e.g., a three-dimensional toy car product design for "toy boats"). The statutory bases for the refusal are §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127, for trademarks and §§1, 2, 3, and 45, 15 U.S.C. §§1051, 1052, 1053, and 1127, for service marks. *Cf. In re Right-On Co.*, 87 USPQ2d 1152, 1156-57 (TTAB 2008) (noting the propriety of and affirming an ornamentation refusal, which is otherwise typically specimen based, in a §66(a) application). The examining attorney must also request evidence to substantiate that the proposed mark could function as a source indicator in connection with the inconsistent goods/services. 37 C.F.R. §2.61(b). This is not a requirement for specimens. To overcome the refusal, the applicant must provide evidence showing that the three-dimensional product design or configuration mark functions as a source

indicator in connection with the inconsistent goods/services listed in the identification. Absent such a showing, the identification of goods/services must be amended to delete the inconsistent goods/services.

### **1202.02(f)(ii) Product Packaging**

The three-dimensional packaging or wrapping in which a product is sold also constitutes trade dress. While a product-design drawing typically depicts the shape or configuration of the product listed in the identification of goods, product packaging can be in any shape or form that serves as packaging for the listed goods. For example, if the drawing depicts a three-dimensional computer mouse, the description of the mark states that the trade dress is product *packaging*, and the identified goods are “cosmetics and hair brushes,” it is conceivable that the goods could be sold in packaging shaped like a computer mouse, and it does not mean that the goods themselves must be in the shape of a computer mouse. However, where the drawing depicts a three-dimensional computer mouse, the description of the mark states that the trade dress is product *design or configuration*, the identified goods are “cosmetics and hair brushes,” and the goods are not in the shape of a computer mouse, this presents a potential issue of “inconsistent goods.” See [TMEP §1202.02\(f\)\(i\)](#).

In most cases, the specific three-dimensional product packaging depicted on the drawing houses the product being sold (e.g., the drawing shows a three-dimensional bottle and the goods are “wine”). However, in rare cases, the identification of goods may include products (or services) that appear, on their face, to be inconsistent with the type of packaging design depicted on the drawing (e.g., a drawing showing a three-dimensional bottle design for “automobiles” or other “inconsistent goods” that are not likely to be sold in bottles). In such cases, where the drawing, the description of the mark, the specimen, or any other evidence of record does not support that the three-dimensional product packaging depicted on the drawing would serve as packaging for the goods, the applicant must provide sufficient evidence that the proposed trade dress serves as the actual shape of the packaging for the inconsistent goods or has a “consistent overall look” across all the goods listed in the identification. *Cf. Rose Art Indus., Inc. v. Swanson*, 235 F.3d 165, 173, 57 USPQ2d 1125, 1131 (3d Cir. 2000) (quoting *Rose Art Indus., Inc. v. Raymond Geddes & Co.*, 31 F. Supp. 2d 367, 373, 49 USPQ2d 1180, 1184 (D.N.J. 1998), *rev’d on other grounds sub nom. Rose Art Indus., Inc. v. Swanson*, 235 F.3d 165, 57 USPQ2d 1125 (3d Cir. 2000)) (stating that trade dress protection for a series or line of products or packaging depends on them having a consistent overall look and remanding for proper application of the standard); *The Walt Disney Co. v. GoodTimes Home Video Corp.*, 830 F. Supp. 762, 766, 29 USPQ2d 1047, 1050 (S.D.N.Y. 1993) (setting forth the “consistent overall look” standard and applying it to a claim of protection for a line of packaging trade dress). In this situation, the same analysis, refusal, and requirements that apply to product design also apply to product packaging. See [TMEP §1202.02\(f\)\(i\)](#).

### **1202.03 Refusal on Basis of Ornamentation**

Subject matter that is merely a decorative feature does not identify and distinguish the applicant’s goods and, thus, does not function as a trademark. A decorative feature may include words, designs, slogans, or trade dress. This matter should be refused registration because it is merely ornamentation and, therefore, does not function as a trademark, as required by §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127.

Generally, the ornamentation refusal applies only to trademarks, not to service marks. See [TMEP §§1301.02–1301.02\(f\)](#) regarding matter that does not function as a service mark.

Matter that serves primarily as a source indicator, either inherently or as a result of acquired distinctiveness, and that is only incidentally ornamental or decorative, can be registered as a trademark. *In re Paramount Pictures Corp.*, 213 USPQ 1111, 1114 (TTAB 1982).

With regard to registrability, ornamental matter may be categorized along a continuum ranging from ornamental matter that is registrable on the Principal Register, to purely ornamental matter that is incapable of trademark significance and unregistrable under any circumstances, as follows:

- (1) Ornamental matter that serves as an identifier of a “secondary source” is registrable on the Principal Register. For example, ornamental matter on a T-shirt (e.g., the designation “NEW YORK UNIVERSITY”) can convey to the purchasing public the “secondary source” of the T-shirt (rather than the manufacturing source). Thus, even where the T-shirt is distributed by a party other than that identified by the designation, sponsorship, or authorization by the identified party is indicated. See [TMEP §1202.03\(c\)](#).
- (2) Ornamental matter that is neither inherently distinctive nor a secondary source indicator may be registered on the Principal Register under §2(f), if the applicant establishes that the subject matter has acquired distinctiveness as a mark in relation to the goods. See [TMEP §1202.03\(d\)](#).
- (3) Ornamental matter that is neither inherently distinctive nor an indicator of secondary source, and has not acquired distinctiveness, but is capable of attaining trademark significance, may be registered on the Supplemental Register in an application under §1 or §44 of the Trademark Act.
- (4) Some matter is determined to be purely ornamental and, thus, incapable of trademark significance and unregistrable on either the Principal Register or the Supplemental Register. See [TMEP §1202.03\(a\)](#).

The examining attorney should consider the following factors to determine whether ornamental matter can be registered: (1) the commercial impression of the proposed mark; (2) the relevant practices of the trade; (3) secondary source, if applicable; and (4) evidence of distinctiveness. These factors are discussed in the following sections.

### **1202.03(a) Commercial Impression**

The examining attorney must determine whether the overall commercial impression of the proposed mark is that of a trademark. Matter that is purely ornamental or decorative does not function as a trademark and is unregistrable on either the Principal Register or the Supplemental Register.

The significance of the proposed mark is a factor to consider when determining whether ornamental matter serves a trademark function. Common expressions and symbols (e.g., the peace symbol, “smiley face,” or the phrase “Have a Nice Day”) are normally not perceived as marks.

The examining attorney must also consider the size, location, and dominance of the proposed mark, as applied to the goods, to determine whether ornamental matter serves a trademark function. *In re Hulting*, 107 USPQ2d 1175, 1177-79 (TTAB 2013); *In re Lululemon Athletica Can. Inc.*, 105 USPQ2d 1684, 1687 (TTAB 2013) (quoting *In re Right-On Co.*, 87 USPQ2d 1152, 1156 (TTAB 2008)); *In re Dimitri’s Inc.*, 9 USPQ2d 1666, 1667 (TTAB 1988); *In re Astro-Gods Inc.*, 223 USPQ 621, 623 (TTAB 1984). A small, neat, and discrete word or design feature (e.g., small design of animal over pocket or breast portion of shirt) may be likely to create the commercial impression of a trademark, whereas a larger rendition of the same matter emblazoned across the front of a garment (or a tote bag, or the like) may be perceived merely as a decorative or ornamental feature of the goods. However, a small, neat, and discrete word or design feature will not necessarily be perceived as a mark in all cases. Moreover, the size of the mark on clothing is only

one consideration in determining the registrability of a mark. *In re Lululemon Athletica Can. Inc.*, 105 USPQ2d at 1689.

### 1202.03(b) Practices of the Trade

In determining whether a proposed mark is inherently distinctive, factors to be considered include whether the subject matter is unique or unusual in a particular field, as opposed to a mere refinement of a commonly adopted and well-known form of ornamentation for a particular class of goods that would be viewed by the public as a dress or ornamentation for the goods. *See, e.g., In re General Tire & Rubber Co.*, 404 F.2d 1396, 1398, 160 USPQ 415, 417 (C.C.P.A. 1969) (affirming the ornamentation refusal of a mark comprising three narrow white concentric rings of approximately equal width applied to the outer surface of a dark sidewall tire; mark was a refinement of the practice, which consumers were familiar with, of whitewalls as decoration on tires); *In re Chung, Jeanne & Kim Co.*, 226 USPQ 938, 941-42 (TTAB 1985) (finding that stripe design applied to sides of sport shoes was mere refinement of the common and well-known form of ornamentation in the field of sports shoes).

Even if a proposed mark is not inherently distinctive, it may be registered on the Principal Register if it has become distinctive of the applicant's goods in commerce. *See* [TMEP §1202.03\(d\)](#). The practices of the trade may be relevant in assessing the applicant's burden of proving that the proposed mark has become distinctive. Typically, more evidence is required if the proposed mark is a type of ornamental matter used so frequently in the relevant industry that consumers would be less apt to discern a source-indicating significance from its use. *See Anchor Hocking Glass Corp. v. Corning Glass Works*, 162 USPQ 288, 292-99 (TTAB 1969) (extensive evidence of record supported that cornflower design was recognized as a trademark for coffee percolators, culinary vessels, and utensils). *Cf. In re Villeroy & Boch S.A.R.L.*, 5 USPQ2d 1451, 1454 (TTAB 1987) (affirming refusal to register design of morning glories and leaves for tableware, the Board noting that the design "has not been shown to be other than another decorative pattern without trademark significance...").

If the applicant cannot show that the proposed mark has acquired distinctiveness, the mark in an application under §1 or §44 of the Trademark Act may be registered on the Supplemental Register if it is capable of distinguishing the applicant's goods or services. 15 U.S.C. §1091. The practices of the trade may be relevant in determining whether a proposed mark is capable of distinguishing the goods or services. If the practices of the trade suggest that certain matter performs the function of a trademark by signifying to purchasers and prospective purchasers the goods of a particular entity and distinguishing them from the goods of others, the matter is assumed to be capable of distinguishing the applicant's goods and, therefore, may be registered on the Supplemental Register. *See In re Todd Co.*, 290 F.2d 597, 599-600, 129 USPQ 408, 410 (C.C.P.A. 1961) (holding that repeating pattern of green lines, used to cover the entire back surface of safety paper products (e.g., checks), was registrable on the Supplemental Register for safety paper products, where the record showed that it had long been the practice in the industry to use distinctive overall surface designs to indicate origin of the products).

### 1202.03(c) "Secondary Source"

To show that a proposed mark that is used on the goods in a decorative or ornamental manner also serves a source-indicating function, the applicant may submit evidence that the proposed mark would be recognized as a mark through its use with goods or services other than those being refused as ornamental. To show secondary source, the applicant may show: (1) ownership of a U.S. registration on the Principal Register of the same mark for other goods or services based on use in commerce under §1 of the Trademark Act; (2) ownership of a U.S. registration on the Principal Register of the same mark for other goods or services based on a foreign registration under §44(e) or §66(a) of the Trademark Act for which an affidavit or declaration

of use in commerce under §8 or §71 has been accepted; (3) non-ornamental use of the mark in commerce on other goods or services; or (4) ownership of a pending use-based application for the same mark, used in a non-ornamental manner, for other goods or services. Ownership of an intent-to-use application for which no allegation of use under §1(c) or §1(d) of the Trademark Act, 15 U.S.C. §§1051(c) or (d), has been filed is not sufficient to show secondary source. If the applicant establishes that the proposed mark serves as an identifier of secondary source, the matter is registrable on the Principal Register.

In *In re Paramount Pictures Corp.*, 213 USPQ 1111, 1112 (TTAB 1982), the Board held that MORK & MINDY was registrable for decals because the applicant had a television series of that name and had previously registered MORK & MINDY for various goods and services, and found that the *primary* significance of the term MORK & MINDY to a prospective purchaser of decals was to indicate the television series and the principal characters of the television series. The Board held that the case was controlled by its decision in *In re Olin Corp.*, 181 USPQ 182 (TTAB 1973) (stylized “O” design registrable for T-shirts, where applicant had previously registered the “O” design for skis), in which that Board had stated:

It is a matter of common knowledge that T-shirts are “ornamented” with various insignia ... or ... various sayings such as “Swallow Your Leader.” In that sense what is sought to be registered could be construed to be ornamental. If such ornamentation is without any meaning other than as mere ornamentation it is apparent that the ornamentation could not and would not serve as an indicia of source. Thus, to use our own example, “Swallow Your Leader” probably would not be considered as an indication of source.

*Id.* at 182.

In *Paramount*, the Board stated that “[t]he ‘ornamentation’ of a T-shirt can be of a special nature which is [sic] inherently tells the purchasing public the source of the T-shirt, not the source of manufacture but the secondary source.” 213 USPQ at 1112. Applying the test set forth in *Olin*, the Board found that “the paired names ‘MORK & MINDY’, while certainly part of the ornamentation of the decal, also indicate source or origin in the proprietor of the Mork & Mindy television series in the same sense as the stylized ‘O’ in *Olin*.” *Id.* at 1113. The Board noted that “while purchasers may be accustomed to seeing characters’ names and images as part of the ornamentation of decals, T-shirts and the like, they are also accustomed to seeing characters’ names and images used as trademarks to indicate source of origin.” *Id.* at 1114.

*See also In re Watkins Glen Int’l, Inc.*, 227 USPQ 727, 729 (TTAB 1985) (reversing the refusal and finding stylized checkered flag design registrable for patches and clothing items, where applicant had previously registered WATKINS GLEN and checkered flag design (with “WATKINS GLEN” disclaimed) for services); *In re Expo ‘74*, 189 USPQ 48, 50 (TTAB 1975) (reversing the refusal and holding EXPO ‘74 registrable for handkerchiefs and T-shirts, since applicant, organizer of the 1974 World’s Fair, had previously registered EXPO ‘74 for other goods and services).

A series of ornamental uses of the proposed mark on various items will not establish that the proposed mark functions as an indicator of secondary source; use as a trademark for the other goods or services must be shown. *See In re Astro-Gods Inc.*, 223 USPQ 621 (TTAB 1984) (affirming the refusal to register ASTRO

GODS and design for T-shirts, despite applicant's ornamental use of the proposed mark on other goods and appearance of applicant's trade name "Astro Gods Inc." on the T-shirt as part of a copyright notice).

### **1202.03(d) Evidence of Distinctiveness**

As noted above, even if a proposed mark is not inherently distinctive, it may nevertheless be registered on the Principal Register under §2(f), 15 U.S.C. §1052(f), if it becomes distinctive of the applicant's goods in commerce. See [TMEP §§1212–1212.10](#) regarding acquired distinctiveness.

Generally, evidence of five years' use alone is not sufficient to show acquired distinctiveness of a mark that is mere ornamentation. Concrete evidence that the proposed mark is perceived as a mark for the relevant goods or services is required to establish distinctiveness. See *In re Owens-Corning Fiberglas Corp.*, 774 F.2d 1116, 227 USPQ 417 (Fed. Cir. 1985).

### **1202.03(e) Ornamentation with Respect to §1(b), §44, and §66(a) Applications**

Generally, the issue of ornamentation is tied to the use of the proposed mark as evidenced by the specimen. Therefore, unless the ornamental nature of the mark is clearly apparent from the drawing and description of the mark, no ornamentation refusal will be issued in an intent-to-use application until the applicant has submitted specimen(s) of use with an allegation of use under §1(c) or §1(d) of the Trademark Act, 15 U.S.C. §§1051(c) or (d).

In an application under §44 or §66(a), where a specimen of use is not required prior to registration, it is appropriate for the examining attorney to issue an ornamentation refusal where the proposed mark on its face, as shown on the drawing and described in the description, reflects a failure to function. *In re Right-On Co.*, 87 USPQ2d 1152, 1156-57 (TTAB 2008) (noting the propriety of and affirming an ornamentation refusal in a §66(a) application for a mark comprising pocket-stitching design for clothing).

### **1202.03(f) Ornamentation: Case References**

The following cases show the various ways in which ornamental matter was found not to function as a mark.

#### **1202.03(f)(i) Slogans or Words Used on the Goods**

Slogans or phrases used on items such as t-shirts and sweatshirts, jewelry, and ceramic plates have been refused registration as ornamentation that purchasers will perceive as conveying a message rather than indicating the source of the goods. See *In re Hulting*, 107 USPQ2d 1175, 1181 (TTAB 2013) (finding that proposed mark NO MORE RINOS! conveys a political slogan devoid of source-identifying significance); *In re Pro-Line Corp.*, 28 USPQ2d 1141 (TTAB 1993) (BLACKER THE COLLEGE SWEETER THE KNOWLEDGE primarily ornamental slogan that is not likely to be perceived as source indicator); *In re Dimitri's Inc.*, 9 USPQ2d 1666 (TTAB 1988) (SUMO, as used in connection with stylized representations of sumo wrestlers on applicant's T-shirts and baseball-style caps, serves merely as an ornamental feature of applicant's goods); *In re Original Red Plate Co.*, 223 USPQ 836 (TTAB 1984) (YOU ARE SPECIAL TODAY for ceramic plates found to be without any source-indicating significance); *In re Astro-Gods Inc.*, 223 USPQ 621, 624 (TTAB 1984) ("[T]he designation 'ASTRO GODS' and design is not likely to be perceived as anything other than part of the thematic whole of the ornamentation of applicant's shirts."); *Damn I'm Good Inc. v. Sakowitz, Inc.*, 514 F. Supp. 1357, 212 USPQ 684 (S.D.N.Y. 1981) (DAMN I'M GOOD, inscribed in large letters on bracelets and used on hang tags affixed to the goods, found to be without any source-indicating significance).

See also [TMEP §1202.04](#) regarding informational matter.

### **1202.03(f)(ii) Designs Used on the Goods**

*See In re General Tire & Rubber Co.*, 404 F.2d 1396, 160 USPQ 415 (C.C.P.A. 1969) (three narrow white concentric rings of approximately equal width applied to the outer surface of a dark sidewall tire considered just a refinement of a general ornamental concept rather than a trademark); *In re David Crystal, Inc.*, 296 F.2d 771, 132 USPQ 1 (C.C.P.A. 1961) (two parallel colored bands at the top of the sock, the upper band red, and the lower band blue, for men's ribbed socks held merely ornamental absent convincing evidence that the purchasing public recognized the design as a trademark); *In re Sunburst Prods., Inc.*, 51 USPQ2d 1843 (TTAB 1999) (combination of matching color of watch bezel and watch band and contrasting colors of watch case and watch bezel for sports watches found to be nothing more than a mere refinement of a common or basic color scheme for sports watches and, therefore, would not immediately be recognized or perceived as a source indicator); *In re Villeroy & Boch S.A.R.L.*, 5 USPQ2d 1451 (TTAB 1987) (floral pattern design of morning glories and leaves for tableware not distinctive and not shown to be other than decorative pattern without trademark significance).

### **1202.03(f)(iii) Trade Dress on the Containers for the Goods**

*See In re J. Kinderman & Sons Inc.*, 46 USPQ2d 1253 (TTAB 1998) (design of container for Christmas decorations that resembles a wrapped Christmas gift not inherently distinctive); *In re F.C.F. Inc.*, 30 USPQ2d 1825 (TTAB 1994) (rose design used on cosmetics packaging is essentially ornamental or decorative background and does not function as mark); *In re Petersen Mfg. Co.*, 2 USPQ2d 2032 (TTAB 1987) (design representing the rear panel of a container for hand tools held unregistrable as merely ornamental, notwithstanding §2(f) claim).

### **1202.03(g) Ornamentation Cases and Acquired Distinctiveness**

In the following cases, subject matter sought to be registered was found to have acquired distinctiveness as a trademark: *In re Jockey Int'l, Inc.*, 192 USPQ 579 (TTAB 1976) (inverted Y design used on underwear found to have acquired distinctiveness, where evidence showed extensive use on packaging and in advertising in a manner calculated to draw the attention of prospective purchasers to the design and for them to look at the design as a badge of origin); *Anchor Hocking Glass Corp. v. Corning Glass Works*, 162 USPQ 288 (TTAB 1969) (blue cornflower design for coffee percolators, culinary vessels, and utensils found to have acquired distinctiveness, where evidence showed extensive and prominent use of the design in advertising, use of the design on pins and aprons worn by sales promotion representatives in the course of their duties, and surveys and statements of purchasers indicating that they recognized the design as indicating origin in applicant).

### **1202.04 Informational Matter**

Slogans and other terms that are merely informational in nature, or common laudatory phrases or statements that would ordinarily be used in business or in the particular trade or industry, are not registrable. *See In re AOP LLC*, 107 USPQ2d 1644, 1655 (TTAB 2013) (finding AOP merely informational and not source-identifying for wine as it informs consumers of a certification process); *In re T.S. Designs, Inc.*, 95 USPQ2d 1669 (TTAB 2010) (holding CLOTHING FACTS merely an informational phrase and not a source identifier based on the likely consumer perception of the phrase used on a clothing label in connection with manufacturing information reminiscent of the "Nutrition Facts" label required for food products by the United States Food and Drug Administration); *In re Aerospace Optics, Inc.*, 78 USPQ2d 1861 (TTAB 2006)

(holding SPECTRUM fails to function as a mark for illuminated pushbutton switches, where the mark is used in a manner that merely informs potential purchasers of the multiple color feature of the goods, and the coloring and font in which the mark is displayed are not sufficient to imbue the term with source-identifying significance or to set it apart from other informational wording); *In re Volvo Cars of N. Am., Inc.*, 46 USPQ2d 1455 (TTAB 1998) (holding DRIVE SAFELY merely an informational phrase or slogan that would be perceived as an everyday, commonplace safety admonition that does not function as mark); *In re Manco Inc.*, 24 USPQ2d 1938, 1942 (TTAB 1992) (holding THINK GREEN and design for weatherstripping and paper products “merely an informational slogan devoid of trademark significance”); *In re Remington Prods., Inc.*, 3 USPQ2d 1714 (TTAB 1987) (holding PROUDLY MADE IN USA, for electric shavers, merely an informational slogan that is incapable of functioning as a mark, notwithstanding use of letters “TM” in connection with prominent display of slogan on packages for the goods and claim of acquired distinctiveness); *In re Tilcon Warren, Inc.*, 221 USPQ 86 (TTAB 1984) (holding WATCH THAT CHILD for construction material merely informational and not registrable notwithstanding long use); *In re Schwauss*, 217 USPQ 361, 362 (TTAB 1983) (finding FRAGILE for labels and bumper stickers merely informational and devoid of any source-identifying function).

The critical inquiry in determining whether a slogan or term functions as a trademark or service mark is how the proposed mark would be perceived by the relevant public. *In re Eagle Crest, Inc.* 96 USPQ 2d 1227, 1229-30 (TTAB 2010) (holding ONCE A MARINE, ALWAYS A MARINE to be an “old and familiar Marine expression...that should remain free for all to use”); see *In re Phoseon Technology Inc.*, 103 USPQ2d 1822, 1827 (TTAB 2012) (noting the critical inquiry in determining whether a mark, as used on the specimen, functions as a trademark is the “commercial impression it makes on the relevant public (e.g., whether the term sought to be registered would be perceived as a mark identifying the source of the goods or merely as an informational phrase.”). The more commonly a phrase is used in everyday parlance, the less likely the public will use it to identify only one source and the less likely the phrase will be recognized by purchasers as a trademark or service mark. *In re Eagle Crest*, 96 USPQ2d at 1229-30 (noting that “[a]s a matter of competitive policy, it should be close to impossible for one competitor to achieve exclusive rights’ in common phrases or slogans.” (quoting J. Thomas McCarthy, *McCarthy on Trademarks and Unfair Competition* §7.23 (4th ed. 2010))). Because the function of a trademark is to identify a single commercial source for particular goods or services, if consumers are accustomed to seeing a slogan used in connection with goods/services from many different sources, it is likely that consumers would not view the slogan as a source identifier for such goods/services. *Id.* at 1230.

Use of the TM notation in and of itself does not make an otherwise unregistrable term a trademark. *In re Volvo Cars*, 46 USPQ2d at 1461.

A slogan can function as a trademark if it is not merely descriptive and/or merely informational. See, e.g., *Roux Labs., Inc. v. Clairol Inc.*, 427 F.2d 823, 166 USPQ 34 (C.C.P.A. 1970) (affirming the Board’s dismissal of an opposition to the registration of HAIR COLOR SO NATURAL ONLY HER HAIRDRESSER KNOWS FOR SURE for hair coloring preparation since the evidence showed the slogan functioned as a mark); *In re The Hallicrafters Co.*, 153 USPQ 376 (TTAB 1967) (reversing the refusal to register where QUALITY THROUGH CRAFTSMANSHIP for radio equipment functioned as a mark). See [TMEP §1202.03\(f\)\(i\)](#) regarding ornamental slogans used on goods.

The statutory basis for refusal of trademark registration on the ground that the matter is merely informational is §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127, and, in the case of matter sought to be registered for services, §§1, 2, 3, and 45, 15 U.S.C. §§1051, 1052, 1053, and 1127. The applicant cannot overcome a refusal of trademark registration issued on the ground that the matter is merely informational by attempting to amend the application to seek registration on the Supplemental Register or pursuant to §2(f). See *In re Eagle Crest*, 96 USPQ2d at 1229 (noting that “[s]logans and other terms that

are considered to be merely informational in nature, or to be common laudatory phrases or statements that would ordinarily be used in business or in the particular trade or industry, are not registrable”). In support of the refusal, the examining attorney must provide evidence that the mark is a slogan or term incapable of being perceived as a trademark or service mark. This support may include evidence of decorative or informational use by other manufacturers on goods of a similar nature and evidence that the term or slogan is frequently used by parties in connection with the sale of their goods or services. *See id.* at 1230 (noting because consumers would be accustomed to seeing the phrase ONCE A MARINE, ALWAYS A MARINE “displayed on clothing items from many different sources, they could not view the slogan as a trademark indicating source of the clothing only in applicant”); *In re Wakefern Food Corp.*, 222 USPQ 76, 78 (TTAB 1984) (finding the relatively common merchandising slogan WHY PAY MORE! does not function as a mark which identifies and distinguishes applicant’s services from others).

If a slogan or term comprises a mark that is merely informational, then by its very nature it would not be seen as an indicator of source. Accordingly, registration must be refused even if the specimen of record shows what would otherwise be acceptable trademark or service mark use. Similarly, if there is sufficient evidence to indicate that consumers are accustomed to seeing a slogan or term used in connection with the relevant goods/services from many different sources, registration should be refused in §1(b), §44, and §66(a) applications because the slogan or term would not be perceived as a mark. *See In re Eagle Crest*, 96 USPQ2d at 1230 (holding that because the function of a trademark is to identify a single commercial source for particular goods/services, if consumers are accustomed to seeing a slogan used in connection with goods/services from many different sources, it is likely that consumers would not view the slogan as a source identifier for such goods/services).

See [TMEP §§1202.17\(c\)\(i\)\(A\)](#) regarding informational universal symbols and [1301.02\(a\)](#) regarding informational matter that does not function as a service mark.

## 1202.05 Color as a Mark

Color marks are marks that consist *solely* of one or more colors used on particular objects. For marks used in connection with goods, color may be used on the entire surface of the goods, on a portion of the goods, or on all or part of the packaging for the goods. For example, a color trademark might consist of purple used on a salad bowl, pink used on the handle of a shovel, or a blue background and a pink circle used on all or part of a product package. *See Qualitex Co. v. Jacobson Prods. Co.*, 514 U.S. 159, 34 USPQ2d 1161 (1995) (green-gold used on dry cleaning press pads held to be a protectible trademark where the color had acquired secondary meaning); *In re Owens-Corning Fiberglas Corp.*, 774 F.2d 1116, 227 USPQ 417 (Fed. Cir. 1985) (the color pink as applied to fibrous glass residential insulation registrable where the evidence showed the color had acquired secondary meaning). Similarly, service marks may consist of color used on all or part of materials used in the advertising and rendering of the services.

The registrability of a color mark depends on the manner in which the proposed mark is used. *Owens-Corning*, 774 F.2d at 1120, 227 USPQ at 419. A color(s) takes on the characteristics of the object or surface to which it is applied, and the commercial impression of a color will change accordingly. *See In re Thrifty, Inc.*, 274 F.3d 1349, 1353, 61 USPQ2d 1121, 1124 (Fed. Cir. 2001) (“a word mark retains its same appearance when used on different objects, but color is not immediately distinguishable as a service mark when used in similar circumstances”).

Color marks are never inherently distinctive, and cannot be registered on the Principal Register without a showing of acquired distinctiveness under §2(f) of the Trademark Act, 15 U.S.C. §1052(f). *Wal-Mart Stores, Inc. v. Samara Bros.*, 529 U.S. 205, 211-12, 54 USPQ2d 1065, 1068 (2000). See [TMEP §1202.05\(a\)](#) and cases cited therein.

Color, whether a single overall color or multiple colors applied in a specific and arbitrary fashion, is usually perceived as an ornamental feature of the goods or services. *Owens-Corning*, 774 F.2d at 1124, 227 USPQ at 422; *In re Hudson News Co.*, 39 USPQ2d 1915, 1923 (TTAB 1996), *aff'd per curiam*, 114 F.3d 1207 (Fed. Cir. 1997) (“blue motif” used in retail stores would likely be perceived by prospective purchasers as “nothing more than interior decoration” that “could be found in any number of retail establishments. Undoubtedly such features are usually perceived as interior decoration or ornamentation.”). However, color can function as a mark if it is used in the manner of a trademark or service mark and if it is perceived by the purchasing public to identify and distinguish the goods or services on or in connection with which it is used and to indicate their source. The United States Supreme Court has held that color alone may, sometimes, meet the basic legal requirements for a trademark. When it does, there is no rule that prevents color from serving as a mark. *Qualitex*, 514 U.S. at 161, 34 USPQ2d at 1162. If a color is not functional and is shown to have acquired distinctiveness on or in connection with the applicant’s goods or services, it is registrable as a mark.

Functional color marks are not registrable. See [TMEP §1202.05\(b\)](#) and cases cited therein.

### **1202.05(a) Color Marks Never Inherently Distinctive**

Color marks are never inherently distinctive. *Wal-Mart Stores, Inc. v. Samara Bros.*, 529 U.S. 205, 211-12, 54 USPQ2d 1065, 1068 (2000) (citing *Qualitex Co. v. Jacobson Prods. Co.*, 514 U.S. 159, 162-63, 34 USPQ2d 1161, 1162-63 (1995)); *In re Thrifty, Inc.*, 274 F.3d 1349, 1353, 61 USPQ2d 1121, 1124 (Fed. Cir. 2001). Therefore, the examining attorney must refuse to register a color mark on the Principal Register, unless the applicant establishes that the proposed mark has acquired distinctiveness under §2(f). The examining attorney must issue this refusal in *all* color mark applications where acquired distinctiveness has not been shown, regardless of the filing basis of the application. The ground for refusal is that the color is not inherently distinctive and, thus, does not function as a trademark under §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127, or does not function as a service mark under §§1, 2, 3, and 45, 15 U.S.C. §§1051, 1052, 1053, and 1127.

If the proposed color mark is not functional, it may be registrable on the Principal Register if it is shown to have acquired distinctiveness under §2(f). If it is not distinctive, it is registrable only on the Supplemental Register. See *In re Hudson News Co.*, 39 USPQ2d 1915, 1923 (TTAB 1996), *aff'd per curiam*, 114 F.3d 1207 (Fed. Cir. 1997) (“blue motif” applied to retail store services not registrable on Principal Register without resort to Section 2(f)); *Edward Weck Inc. v. IM Inc.*, 17 USPQ2d 1142, 1145 (TTAB 1990) (the color green, as uniformly applied to medical instruments, not barred from registration on the basis of functionality; however, evidence failed to establish the color had become distinctive of the goods); *In re Deere & Co.*, 7 USPQ2d 1401, 1403-04 (TTAB 1988) (the colors green and yellow, as applied to the body and wheels of machines, respectively, not barred from registration on the basis of functionality; evidence established the colors had become distinctive of the goods).

The burden of proving that a color mark has acquired distinctiveness is substantial. See *In re Owens-Corning Fiberglas Corp.*, 774 F.2d 1116, 227 USPQ 417 (Fed. Cir. 1985) (the color pink, as uniformly applied to fibrous glass residential insulation, shown to have acquired distinctiveness); *In re Lorillard Licensing Co.*, 99 USPQ2d 1312 (TTAB 2011) (finding the evidence insufficient to demonstrate that the applied-for mark, “namely, any orange text appearing on a green background,” had achieved acquired distinctiveness); *In re Benetton Grp. S.p.A.*, 48 USPQ2d 1214 (TTAB 1998) (evidence insufficient to establish that green rectangular background design had acquired distinctiveness as applied to clothing and footwear); *In re American Home Prods. Corp.*, 226 USPQ 327 (TTAB 1985) (tri-colored, three-dimensional, circular-shaped design found to have become distinctive of analgesic and muscle relaxant tablets); *In re Star Pharms., Inc.*, 225 USPQ 209 (TTAB 1985) (evidence found insufficient to establish that two-colored drug capsules and multi-colored

seeds or granules contained therein had become distinctive of methyltestosterone). A mere statement of long use is not sufficient. *See, e.g., Benetton*, 48 USPQ2d at 1216-17 (despite long use, record devoid of any evidence that the green rectangular background design has been used, promoted, or advertised as a mark). The applicant must demonstrate that the color has acquired source-indicating significance in the minds of consumers.

As noted above, the commercial impression of a color may change depending on the object to which it is applied. Therefore, evidence submitted to demonstrate acquired distinctiveness of a color may show consumer recognition with respect to certain objects, but not for other objects. *See Thrifty*, 274 F.3d at 1353, 61 USPQ2d at 1124. *Cf. Qualitex*, 514 U.S. at 163, 34 USPQ2d at 1162-63 (“The imaginary word ‘Suntost,’ or the words ‘Suntost Marmalade,’ on a jar of orange jam immediately would signal a brand or a product ‘source’; the jam’s orange color does not do so. But, over time, customers may come to treat a particular color on a product or its packaging (say, a color that in context seems unusual, such as pink on a firm’s insulating material or red on the head of a large industrial bolt) as signifying a brand. And, if so, that color would have come to identify and distinguish the goods -- *i. e.*, ‘to indicate’ their ‘source...’”).

### 1202.05(b) Functional Color Marks Not Registrable

A color mark is not registrable on the Principal Register under §2(f), or the Supplemental Register, if the color is functional. *See Qualitex Co. v. Jacobson Prods. Co.*, 514 U.S. 159, 165-66, 34 USPQ2d 1161 (1995); *Brunswick Corp. v. British Seagull Ltd.*, 35 F.3d 1527, 32 USPQ2d 1120 (Fed. Cir. 1994), *cert. denied*, 514 U.S. 1050 (1995); *In re Owens-Corning Fiberglas Corp.*, 774 F.2d 1116, 227 USPQ 417 (Fed. Cir. 1985). A color may be functional if it yields a utilitarian or functional advantage, for example, yellow or orange for safety signs. *Brunswick*, 35 F.3d 1527, 32 USPQ2d 1120 (holding the color black functional for outboard motors because, while the color did not provide utilitarian advantages in terms of making the engines work better, it nevertheless provided recognizable competitive advantages in terms of being compatible with a wide variety of boat colors and making the engines appear smaller); *In re Florists’ Transworld Delivery Inc.*, 106 USPQ2d 1784, 1791 (TTAB 2013) (finding the color black for floral packaging functional because there was a competitive need for others in the industry to use black in connection with floral arrangements and flowers to communicate a desired sentiment or occasion, such as elegance, bereavement, or Halloween); *Saint-Gobain Corp. v. 3M Co.*, 90 USPQ2d 1425, 1446-47 (TTAB 2007) (deep purple shade for coated abrasives held functional, the Board finding that opposer had established a prima facie case that coated abrasive manufacturers have a competitive need to be able to use various shades of purple, include applicant’s shade, which applicant had failed to rebut; and that “[i]n the field of coated abrasives, color serves a myriad of functions, including color coding, and the need to color code lends support for the basic finding that color, including purple, is functional in the field of coated abrasives having paper or cloth backing.”); *In re Ferris Corp.*, 59 USPQ2d 1587 (TTAB 2000) (color pink used on surgical wound dressings is functional because the actual color of the goods closely resembles Caucasian human skin); *In re Orange Commc’ns, Inc.*, 41 USPQ2d 1036 (TTAB 1996) (colors yellow and orange held to be functional for public telephones and telephone booths, since they are more visible under all lighting conditions in the event of an emergency); *In re Howard S. Leight & Assocs.*, 39 USPQ2d 1058 (TTAB 1996) (color coral held to be functional for earplugs, because it is more visible during safety checks). A color may also be functional if it is more economical to manufacture or use. For example, a color may be a natural by-product of the manufacturing process for the goods. In such a case, appropriation of the color by a single party would place others at a competitive disadvantage by requiring them to alter the manufacturing process.

*See also In re Pollak Steel Co.*, 314 F.2d 566, 136 USPQ 651 (C.C.P.A. 1963) (reflective color on fence found to be functional); *Kasco Corp. v. Southern Saw Serv. Inc.*, 27 USPQ2d 1501 (TTAB 1993) (color green used as wrapper for saw blades is functional when the color is one of the six colors used in a color-coding system to identify the type of blade); *R.L. Winston Rod Co. v. Sage Mfg. Co.*, 838 F. Supp.

1396, 29 USPQ2d 1779 (D. Mont. 1993) (color green used on graphite fishing rods found to be functional); *Russell Harrington Cutlery Inc. v. Zivi Hercules Inc.*, 25 USPQ2d 1965 (D. Mass. 1992) (color white used on cutlery handles found to be functional).

The doctrine of “aesthetic functionality” may apply in some cases where the evidence indicates that the color at issue provides specific competitive advantages that, while not necessarily categorized as purely “utilitarian” in nature, nevertheless dictate that the color remain in the public domain. *Brunswick*, 35 F.3d at 1533, 32 USPQ2d at 1124; *In re Florists’ Transworld Delivery Inc.*, 106 USPQ2d at 1787-88. See also *TrafFix Devices, Inc. v. Mktg. Displays, Inc.*, 532 U.S. 23, 33, 58 USPQ2d 1001, 1006 (2001) (Supreme Court discussed aesthetic functionality, distinguishing *Qualitex*, 514 US 159, 34 USPQ2d 1161, as a case where “aesthetic functionality was the central question...”). See [TMEP §1202.02\(a\)\(vi\)](#).

### **1202.05(c) Color as a Separable Element**

As with all trademarks and service marks, a color mark may contain only those elements that make a separable commercial impression. See [TMEP §807.12\(d\)](#). Accordingly, an applicant may not seek to register the color of the wording or design apart from the words or designs themselves if the color does not create a separate commercial impression. However, the applicant may register the color of the background material on which the words or design appear apart from the words or design. See [TMEP §1202.11](#) regarding background designs and shapes.

The commercial impression of a color may change depending on the object to which it is applied. *In re Thrifty, Inc.*, 274 F.3d 1349, 61 USPQ2d 1121 (Fed. Cir. 2001); *In re Hayes*, 62 USPQ2d 1443 (TTAB 2002). Granting an application for registration of color in the abstract, without considering the manner or context in which the color is used, would be contrary to law and public policy, because it would result in an unlimited number of marks being claimed in a single application. Cf. *In re Int’l Flavors & Fragrances Inc.*, 183 F.3d 1361, 1368, 51 USPQ2d 1513, 1517-18 (Fed. Cir. 1999) (mark with changeable or “phantom” element unregistrable because it would “encompass too many combinations and permutations to make a thorough and effective search possible” and, therefore, would not provide adequate notice to the public); *In re Upper Deck Co.*, 59 USPQ2d 1688, 1691 (TTAB 2001) (hologram of varying shapes, sizes, content, and positions used on trading cards constitutes more than one “device,” as contemplated by §45 of the Trademark Act). Only one mark can be registered in a single application. [TMEP §807.01](#).

### **1202.05(d) Drawings of Color Marks Required**

All marks, other than sound and scent marks, require a drawing. [TMEP §807](#). An application for a color mark that is filed without a drawing will be denied a filing date. 37 C.F.R. §2.21(a)(3). Similarly, an application for a color mark with a proposed drawing page that states “no drawing,” or sets forth only a written description of the mark, will be denied a filing date. The drawing provides notice of the nature of the mark sought to be registered. Only marks that are not capable of representation in a drawing, such as sound or scent marks, are excluded from the requirement for a drawing. Color marks are visual and should be depicted in color drawings, accompanied by: (1) a color claim naming the color(s) that are a feature of the mark; and (2) a separate statement naming the color(s) and describing where the color(s) appear and

how they are used on the mark. 37 C.F.R. §2.52(b)(1). See TMEP §§[807.07–807.07\(g\)](#) for color mark drawings and [808–808.03\(f\)](#) for description of the mark.

### **1202.05(d)(i) Drawings of Color Marks in Trademark Applications**

In most cases, the proposed color mark drawing will consist of a representation of the product or product package. The drawing of the mark must be a substantially exact representation of the mark as used, or intended to be used, on the goods. 37 C.F.R. §2.51. A depiction of the object on which the color is used is needed to meet this requirement.

The object depicted on the drawing should appear in broken or dotted lines. The broken or dotted lines inform the viewer where and how color is used on the product or product package, while at the same time making it clear that the shape of the product, or the shape of the product package, is not claimed as part of the mark. 37 C.F.R. §2.52(b)(4); [TMEP §807.08](#). In the absence of a broken-line drawing, the USPTO will assume that the proposed mark is a composite mark consisting of the product shape, or the product package shape, in a particular color.

#### *Color used on multiple goods*

If the proposed color mark is used on multiple goods, the drawing required will depend on the nature of the goods. The drawing of the mark must be a substantially exact representation of the mark as used, or intended to be used, on the goods. 37 C.F.R. §2.51. A drawing consisting of a depiction of only one of the goods will be accepted if the goods, or the portions of the goods on which the color appears, are similar in form and function so that a depiction of only one of the goods is still a substantially exact representation of the mark as used on all of the goods. For example, if the mark is the color purple used on refrigerators and freezers, a drawing of a purple freezer shown in broken lines (with a description of the mark claiming the color purple and indicating that it is used on the freezer) would be sufficient. Or, if the mark is the color pink used on the handles of rakes, shovels, and hoes, a drawing of any of those items depicted in dotted lines (with a description of the mark claiming the color pink and stating that the handle is pink) would be sufficient. Or, if the mark consists of product packaging for various food items that is always blue with a pink circle, a drawing of any one of the packages shown in dotted lines (with a description of the mark claiming the colors blue and pink and describing the location of the colors on the packaging) would be sufficient.

If the proposed color mark is used on multiple goods that are dissimilar or unrelated, or if color is used in different ways on different goods, so that a depiction of one of the goods is not a substantially exact representation of the mark as used on all of the goods (e.g., the color purple used on microscopes and vending machines), a separate application must be submitted for each item.

#### *Color used on liquids or powders*

Sometimes a color mark consists of color(s) used on liquids or powders. For example, the mark might consist of fuchsia body oil or red, white, and blue granular washing machine detergent. In these cases, the nature of the drawing will depend on the manner of use of the liquid or powder. If the liquid or powder is visible

through the product package, the drawing should consist of the shape of the product package shown in broken or dotted lines, with the description of the mark identifying the color(s) of the liquid or powder.

### **1202.05(d)(ii) Drawings of Color Marks in Service Mark Applications**

It is difficult to anticipate all of the issues that may arise when examining a proposed color mark for services because there are a myriad of ways that color can be used in connection with services. However, the following general guidelines will be used to determine the sufficiency of drawings in these cases:

- The purpose of a drawing is to provide notice to the public of the nature of the mark. As with color used on goods, a color service mark does not consist of color in the abstract. Rather, the mark consists of color used in a particular manner, and the context in which the color is used is critical to provide notice of the nature of the mark sought to be registered. Therefore, as with color marks used on goods, a drawing, supplemented with a written description of the mark, is required.
- The drawing must display the manner in which the mark is used in connection with the services. As with any application, only one mark can be registered in a single application. [TMEP §807.01](#). The mark depicted on the drawing, as used on the specimen, must make a separate and distinct commercial impression in order to be considered one mark. See *In re Thrifty, Inc.*, 274 F.3d 1349, 61 USPQ2d 1121 (Fed. Cir. 2001); *In re Chemical Dynamics Inc.*, 839 F.2d 1569, 5 USPQ2d 1828 (Fed. Cir. 1988). See [TMEP §1202.05\(c\)](#) regarding color as a separable element.
- If color is used in a variety of ways, but in a setting that makes a single commercial impression, such as a retail outlet with various color features, a broken-line drawing of the setting must be submitted, with a detailed description of the mark claiming the color(s) and describing the location of the color(s).
- If an applicant seeks to register a single color as a service mark used on a variety of items not viewed simultaneously by purchasers, e.g., stationery, uniforms, pens, signs, shuttle buses, store awning, and walls of the store, the drawing must display a solid-colored square with a dotted peripheral outline and include a detailed description of the mark identifying the color and describing its placement. *Thrifty*, 274 F.3d at 1353, 61 USPQ2d at 1124. Applicant will receive a filing date for its application. However, as yet, the issues raised by the use of this type of drawing, e.g., sufficient notice to the public and phantom marks, have not yet been decided by the USPTO. Cf. *In re Int'l Flavors & Fragrances Inc.*, 183 F.3d 1361, 1368, 51 USPQ2d 1513, 1517-18 (Fed. Cir. 1999). See [TMEP §1202.05\(c\)](#) regarding color as a separable element.
- The commercial impression of a color may change depending on the object on which it is applied. See *Thrifty*, 274 F.3d at 1353, 61 USPQ2d at 1124.

### **1202.05(d)(iii) Amendment of Drawings of Color Marks**

Because color marks are comprised solely of the color as applied to the product or product package, in the manner depicted on the drawing and explained in the description of the mark, amending the color of the proposed mark will always change the commercial impression of the mark. Thus, the amendment of any color in a color mark is a prohibited material alteration. Similarly, the amendment of the color mark to show the same color on a different object is also, generally, a material alteration, e.g., an amendment of a drawing of a blue hammer to a blue saw is a material alteration.

### **1202.05(d)(iv) Drawings for Marks Including Both Color and Words or Design**

Sometimes, a product or advertisement for a service will include both color and words or a design. For example, the surface of a toaster might be green, with the letters “ABC” and a design displayed on the

toaster. In this situation, the applicant must decide whether to seek registration for the color green used on toasters, the letters “ABC” with or without the design, the design alone, or some combination of these elements. If applicant only seeks registration for the use of the color, no word or design elements should appear on the drawing.

### **1202.05(e) Written Descriptions of Color Marks**

The drawing of a proposed color mark must be supplemented with: (1) a claim that the color(s) is a feature of the mark; and (2) a statement in the “Description of the Mark” field naming the color(s) and describing where the color(s) appear(s) and how they are used on the mark. 37 C.F.R. §2.52(b)(1). See TMEP §§[807.07–807.07\(g\)](#) for color mark drawings and [808–808.03\(f\)](#) for description of the mark .

The description of the mark must be clear and specific, use ordinary language, and identify the mark as consisting of the particular color as applied to the goods or services. If the color is applied only to a portion of the goods, the description must indicate the specific portion. Similarly, if the mark includes gradations of color, the description should so indicate. If the applicant is claiming a shade of color, the shade must be described in ordinary language, for example, “maroon,” “turquoise,” “navy blue,” “reddish orange.” This is required even if the applicant also describes the color using a commercial coloring system.

The applicant may not amend the description of the mark if the amendment is a material alteration of the mark on the drawing filed with the original application. 37 C.F.R. §2.72. See *In re Thrifty, Inc.*, 274 F.3d 1349, 61 USPQ2d 1121 (Fed. Cir. 2001). Cf. *In re Hacot-Colombier*, 105 F.3d 616, 41 USPQ2d 1523 (Fed. Cir. 1997). See [TMEP §§807.14–807.14\(f\)](#) regarding material alteration.

The description of a color mark must be limited to a single mark, because only one mark can be registered in a single application. See *In re Int'l Flavors & Fragrances Inc.*, 183 F.3d 1361, 51 USPQ2d 1513 (Fed. Cir. 1999); *In re Hayes*, 62 USPQ2d 1443 (TTAB 2002). See TMEP §§[807.01](#) regarding drawing must be limited to a single mark and [1202.05\(c\)](#) regarding color as a separable element.

### **1202.05(f) Specimens for Color Marks**

An application under §1 of the Trademark Act must be supported by a specimen that shows use of the proposed mark depicted on the drawing. Therefore, an applicant who applies to register a color mark must submit a specimen showing use of the color, either with a §1(a) application or with an allegation of use (i.e., either an amendment to allege use under 15 U.S.C. §1051(c) or a statement of use under 15 U.S.C. §1051(d)), in a §1(b) application. If a black-and-white specimen is submitted, the examining attorney will require a substitute specimen displaying the proposed color mark. See [TMEP §904.02\(c\)\(ii\)](#).

See TMEP §§[904.03–904.07\(b\)](#) regarding trademark specimens and [1301.04–1301.04\(d\)](#) regarding service mark specimens.

### **1202.05(g) Special Considerations for Service Mark Applications**

Although the applicant in *In re Thrifty, Inc.*, 274 F.3d 1349, 61 USPQ2d 1121 (Fed. Cir. 2001), argued that it applied for the color blue *per se* as a service mark, the Court determined that the drawing controlled, such that the application was for the color blue applied to a building. Although the Court did not reach the issue of color *per se* as a service mark, the Court acknowledged the special evidentiary problem associated with showing acquired distinctiveness in this context. *Id.* at 1353, 61 USPQ2d at 1124 (“[E]vidence submitted to demonstrate acquired distinctiveness of a color may show consumer recognition with respect to certain

objects (e.g., blue vehicle rental centers), but not for other objects (e.g., blue rental cars.”). Accordingly, any claim to color *per se* must be specific as to use and include evidence of acquired distinctiveness for each claimed use.

### **1202.05(h) Color Marks in §1(b) Applications**

A color mark can never be inherently distinctive. *Wal-Mart Stores, Inc. v. Samara Bros.*, 529 U.S. 205, 211-12, 54 USPQ2d 1065, 1068 (2000) (citing *Qualitex Co. v. Jacobson Prods. Co.*, 514 U.S. 159, 162-63, 34 USPQ2d 1161, 1162-63 (1995)); [TMEP §1202.05\(a\)](#). Therefore, the examining attorney must refuse to register a color mark on the Principal Register unless the applicant establishes that the mark has acquired distinctiveness under §2(f). The ground for refusal is that the color is not inherently distinctive and, thus, does not function as a trademark under §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127, or does not function as a service mark under §§1, 2, 3, and 45, 15 U.S.C. §§1051, 1052, 1053, and 1127.

The issue of whether the proposed color mark is functional requires consideration of the manner in which the mark is used. Generally, no refusal on these grounds will be issued in a §1(b) application until the applicant has submitted specimen(s) of use with an allegation of use (i.e., either an amendment to allege use under 15 U.S.C. §1051(c) or a statement of use under 15 U.S.C. §1051(d)). See [TMEP §§1102.01, 1202.02\(d\), 1202.03\(e\), and 1202.05\(b\)](#). The specimen(s) provide a better record upon which to determine the registrability of the mark. In appropriate cases, the examining attorney will bring the potential refusal to the applicant’s attention in the initial Office action. This is done strictly as a courtesy. If information regarding this possible ground for refusal is not provided to the applicant before the allegation of use is filed, the USPTO is not precluded from refusing registration on this basis.

### **1202.05(i) Color Marks in §44 or §66(a) Applications**

A color mark can never be inherently distinctive. *Wal-Mart Stores, Inc. v. Samara Bros.*, 529 U.S. 205, 211-12, 54 USPQ2d 1065, 1068 (2000) (citing *Qualitex Co. v. Jacobson Prods. Co.*, 514 U.S. 159, 162-63, 34 USPQ2d 1161, 1162-63 (1995)); [TMEP §1202.05\(a\)](#). Therefore, the examining attorney must refuse to register a proposed color mark on the Principal Register unless the applicant establishes that the mark has acquired distinctiveness under §2(f). The ground for refusal is that the color is not inherently distinctive and, thus, does not function as a trademark under §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127, or does not function as a service mark under §§1, 2, 3, and 45, 15 U.S.C. §§1051, 1052, 1053, and 1127.

If the record indicates that the proposed mark is functional, the examining attorney should issue a refusal of registration on the Principal Register under §2(f), or on the Supplemental Register. See [TMEP §§1202.02\(e\), 1202.03\(e\), and 1202.05\(b\)](#). *NOTE: A mark in a §66(a) application cannot be registered on the Supplemental Register under any circumstances. 15 U.S.C. § 1141h(a)(4); 37 C.F.R. §§2.47(c) and 2.75(c).*

### **1202.06 Goods in Trade**

Section 45 of the Trademark Act, 15 U.S.C. §1127, defines a “trademark” as a “word, name, symbol, or device, or any combination thereof” that is used or intended to be used in commerce “to *identify and distinguish his or her goods* (emphasis added).” Before rights in a term as a trademark can be established, the subject matter to which the term is applied must be “goods in trade.” Incidental items that an applicant uses in conducting its business (such as letterhead, invoices, reports, boxes, and business forms), as opposed

to items sold or transported in commerce for use by others, are not “goods in trade.” See *In re Shareholders Data Corp.*, 495 F.2d 1360, 181 USPQ 722 (C.C.P.A. 1974) (finding that reports are not goods in trade, where applicant is not engaged in the sale of reports, but solely in furnishing financial reporting services, and reports are merely conduit through which services are rendered); *In re Thomas White Int’l, Ltd.*, 106 USPQ2d 1158, 1162-63 (TTAB 2013) (finding that applicant’s annual report does not constitute a “good in trade,” but rather “is a common and necessary adjunct to the rendering of applicant’s investment management and research services, that is, it is one of the means through which it provides investment services”); *In re Ameritox Ltd.*, 101 USPQ2d 1081, 1085 (TTAB 2011) (finding no evidence that applicant was engaged in selling printed reports apart from its laboratory testing services and that the reports were part and parcel of the services); *In re MGA Entm’t, Inc.*, 84 USPQ2d 1743 (TTAB 2007) (stating that applicant’s trapezoidal cardboard boxes for toys, games, and playthings held to be merely point of sale containers for applicant’s primary goods and not separate goods in trade, where there was no evidence that applicant is a manufacturer of boxes or that applicant is engaged in selling boxes as commodities in trade); *In re Compute-Her-Look, Inc.*, 176 USPQ 445 (TTAB 1972) (finding that reports and printouts not goods in trade, where they are merely the means by which the results of a beauty analysis service is transmitted and have no viable existence separate and apart from the service); *Ex parte Bank of Am. Nat’l Trust and Sav. Ass’n*, 118 USPQ 165 (Comm’r Pats. 1958) (mark not registrable for passbooks, checks, and other printed forms, where forms are used only as “necessary ‘tools’ in the performance of [banking services], and [applicant] is not engaged either in printing or selling forms as commodities in trade.”).

The determination of whether an applicant’s identified goods comprise independent goods in trade, or are merely incidental to the applicant’s services, is a factual determination to be made on a case-by-case basis.

*In re Thomas White Int’l, Ltd.* 106 USPQ2d at 1161 (citing *Lens.com, Inc. v. 1-800 Contacts, Inc.*, 686 F.3d 1376, 1381-82, 103 USPQ2d 1672, 1676 (Fed. Cir. 2012)). Factors to consider include “whether [applicant’s good]: (1) is simply the conduit or necessary tool useful only to obtain applicant’s services; (2) is so inextricably tied to and associated with the service as to have no viable existence apart therefrom; and (3) is neither sold separately from nor has any independent value apart from the services.” *In re Thomas White Int’l, Ltd.*, 106 USPQ2d at 1162 (citing *Lens.com, Inc. v. 1-800 Contacts, Inc.*, 686 F.3d at 1382, 103 USPQ2d at 1676). None of these factors is dispositive. *Lens.com, Inc. v. 1-800 Contacts, Inc.*, 686 F.3d at 1382, 103 USPQ2d at 1676.

### 1202.06(a) Goods Must Have Utility to Others

Affixing a mark to an item that is transported in commerce does not in and of itself establish that the mark is used on “goods.” While a formal sale is not always necessary, items sold or transported in commerce are not “goods in trade” unless they have utility to others as the type of product named in the trademark application.

*Example:* Holiday greeting cards sent by a law firm to its clients are not “goods,” where applicant is merely sending its own cards through the mail as a holiday greeting, and the cards are not suitable for use by the recipients as a greeting card.

See *Gay Toys, Inc. v. McDonald’s Corp.*, 585 F.2d 1067, 199 USPQ 722 (C.C.P.A. 1978) (plaster mockup of toy truck not goods in trade where there is no evidence the mockup is actually used as a toy); *Paramount Pictures Corp. v. White*, 31 USPQ2d 1768 (TTAB 1994), *aff’d*, 108 F.3d 1392 (Fed. Cir. 1997) (mark not registrable for games, where purported games are advertising flyers used to promote applicant’s services and have no real utilitarian function or purpose as games); *In re Douglas Aircraft Co.*, 123 USPQ 271 (TTAB 1959) (books, pamphlets, and brochures that serve only to explain and advertise the goods in which applicant deals are not “goods”). Cf. *In re Snap-On Tools Corp.*, 159 USPQ 254 (TTAB 1968) (ball point pens used to promote applicant’s tools are goods in trade, where they have a utilitarian function and purpose, and have been sold to applicant’s franchised dealers and transported in commerce under mark); *In re United*

*Merchants & Mfrs., Inc.*, 154 USPQ 625 (TTAB 1967) (calendar used to promote applicant's plastic film constitutes goods in trade, where calendar has a utilitarian function and purpose in and of itself, and has been regularly distributed in commerce for several years).

In *In re MGA Entm't, Inc.*, 84 USPQ2d 1743, 1746 (TTAB 2007), the Board rejected applicant's argument that trapezoidal cardboard boxes for toys, games, playthings, puzzles, and laptop play units have use beyond holding the goods at the point of sale, in that the laptop play-unit box functions as an ongoing carrying case for the unit, and the puzzle box may be used to store puzzle pieces when not in use. Finding the boxes to be merely point-of-sale containers for the primary goods and not separate goods in trade, the Board stated that "the mere fact that original boxes or packaging may be used to store products does not infuse such boxes or packaging with additional utility such that they constitute goods in trade," and that there is neither any indication that the laptop computer boxes are labeled as a carrying case nor any evidence that applicant promotes the boxes as carrying cases or that children actually use them as carrying cases.

### **1202.06(b) Registration Must Be Refused if Trademark Not Used on Goods in Trade**

If the specimen, identification of goods, or other evidence in the record indicate that the applicant uses the proposed mark only on items incidental to conducting its own business, as opposed to items intended to be used by others, the examining attorney must refuse registration on the Principal Register under §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127, on the ground that the proposed mark is not used on "goods in trade."

If a mark is not used on "goods in trade," it is not registrable on the Principal Register under §2(f) of the Trademark Act, 15 U.S.C. §1052(f), or on the Supplemental Register.

If some but not all of the items listed in the identification of goods are found not to be "goods in trade," it is not necessary to refuse registration of the entire application, but the examining attorney must require that these items be deleted from the identification of goods before approving the mark for publication or registration.

### **1202.06(c) Goods in Trade in §1(b), §44, and §66(a) Applications**

In an intent-to-use application under §1(b) of the Trademark Act, 15 U.S.C. §1051(b), the question of whether a proposed mark is used on goods in trade usually does not arise until the applicant files an allegation of use (i.e., either an amendment to allege use under 15 U.S.C. §1051(c) or a statement of use under 15 U.S.C. §1051(d)) because this issue is based on the manner in which the mark is used. However, if the identification of goods in a §1(b) application includes items that do not appear to be goods in trade, the potential refusal should be brought to the applicant's attention in the first Office action. This is done strictly as a courtesy. If information regarding this possible ground for refusal is not provided to the applicant before the allegation of use is filed, the USPTO is not precluded from refusing registration on this basis. If the record indicates that the mark will not be used on goods in trade, without the need to await consideration of the specimen(s), the examining attorney may issue the refusal prior to the filing of the allegation of use.

In an application under §44 or §66(a), where a specimen of use is not required prior to registration, it is appropriate for the examining attorney to issue a refusal based on the lack of use on goods in trade where the record clearly indicates that the mark will not be used on goods in trade. *Cf. In re Right-On Co.*, 87

USPQ2d 1152, 1156-57 (TTAB 2008) (noting the propriety of and affirming an ornamentation refusal, which is otherwise typically specimen-based, in a §66(a) application).

## **1202.07 Marks That Identify Columns or Sections of Publications**

### **1202.07(a) Marks That Identify Columns or Sections of Printed Publications**

A column, section, or supplement of a printed publication is normally not considered to be separate “goods” or “goods in trade,” unless it is sold, syndicated, or offered for syndication separate and apart from the larger publication in which it appears. *In re Broad. Publ'ns*, , 135 USPQ 374 (TTAB 1962); *Ex parte Meredith Publ'g*, 109 USPQ 426 (Comm'r Pats. 1956). This is true even of a removable or separable “pullout” section of a newspaper or other publication. In *Meredith*, the issue was analyzed as follows:

The basic question is whether or not, under the circumstances of use, the section title is a name adopted and used by the publisher to identify his goods and distinguish them from those of others. The “goods” actually are magazines-not sections of magazines. When the magazine is purchased, the purchaser receives the sections whether he wants them or not, and it is doubtful that magazine readers *ordinarily* purchase a magazine merely to receive a section of it, or think of a magazine merely in terms of a section title. Sections of magazines are not in and of themselves articles of commerce other than as a part of an integrated whole; and we must therefore be concerned with whether a section title actually identifies and distinguishes, and if so, what it distinguishes. Under these circumstances it becomes necessary to ask: Was the mark adopted to identify a section of applicant’s magazine and distinguish it from sections of other publishers’ magazines, or was it adopted to distinguish one section of applicant’s magazine from the other sections of its magazine? *Ordinarily*, it is the latter (emphasis in original).

109 USPQ at 426.

The examining attorney may accept the statement of the applicant or applicant’s attorney that the column is syndicated. It is not necessary to set this forth in the identification of goods.

#### **1202.07(a)(i) Syndicated Columns and Sections**

Columns or sections that are separately sold, syndicated, or offered for syndication do constitute goods in trade. A mark that identifies a column or section that is separately syndicated or offered for syndication is registrable on the Principal Register without resort to §2(f) of the Trademark Act, 15 U.S.C. §1052(f), if registration is not barred by other sections of the Act.

#### **1202.07(a)(ii) Non-Syndicated Columns and Sections**

A column or section of a printed publication that is not separately sold, syndicated, or offered for syndication is not, in and of itself, considered to be separate goods in trade. Therefore, where the specimen, identification of goods, or other evidence in the record indicates that the mark identifies a column or section of a printed publication that is not separately sold, syndicated, or offered for syndication, the examining attorney should refuse registration on the Principal Register under §§1, 2, and 45 of the Trademark Act; 15 U.S.C. §§1051, 1052, and 1127, on the ground that the mark is not used on separate goods in trade.

Marks that identify non-syndicated columns or sections of printed publications are registrable on the Principal Register under §2(f) of the Trademark Act, 15 U.S.C. §1052(f), if the column or section is shown to have

acquired separate recognition and distinctiveness. An applicant who seeks registration on the Principal Register bears the burden of establishing, through evidence of promotion, long use, advertising expenditures, and breadth of distribution or sales figures, that the public has come to recognize the proposed mark as an indicator of source.

The evidence of acquired distinctiveness must show that the column or section title is used and promoted to distinguish applicant's column or section from the columns or sections of other publishers' publications, rather than merely to distinguish applicant's column or section from other columns or sections of applicant's publication. *Metro Publ'g v. San Jose Mercury News*, 987 F.2d 637, 25 USPQ2d 2049 (9th Cir. 1993); *In re Broad. Publ'ns*, 135 USPQ 374 (TTAB 1962).

The amount of evidence needed to establish distinctiveness must be evaluated by the examining attorney on a case-by-case basis, in light of the type of column or section. If the mark identifies a removable or pull-out section, a lesser degree of evidence might be required to establish distinctiveness. Of course, the amount of evidence needed to establish distinctiveness in any particular case will also vary depending on the strength or weakness of the mark. See [TMEP §§1212–1212.06\(e\)\(iv\)](#) regarding evidence of distinctiveness.

Marks that identify non-syndicated columns or sections of printed publications, but have not yet acquired distinctiveness under §2(f) of the Act, are registrable on the Supplemental Register in applications under §1 or §44 of the Trademark Act, if registration is not barred by other sections of the Act. *Ex parte Meredith Publ'g*, 109 USPQ 426 (Comm'r Pats. 1956).

### **1202.07(a)(iii) Marks That Identify Columns and Sections of Printed Publications in §1(b), §44, and §66(a) Applications**

Since a refusal to register a mark that identifies a column or section of a printed publication is based on whether the column or section is separately sold, syndicated, or offered for syndication, the issue ordinarily does not arise in an intent-to-use application under §1(b) of the Trademark Act, 15 U.S.C. §1051(b), until the applicant has filed an allegation of use (i.e., either an amendment to allege use under 15 U.S.C. §1051(c) or a statement of use under 15 U.S.C. §1051(d)). However, if the identification of goods suggests that the mark is intended to be used to identify a column or section of a printed publication that is not separately sold, syndicated, or offered for syndication, the potential refusal on the ground that the proposed mark is not used on separate goods in trade should be brought to the applicant's attention in the first Office action. This is done strictly as a courtesy. If information regarding this possible ground for refusal is not provided to the applicant prior to the filing of the allegation of use, the USPTO is not precluded from refusing registration on this basis. In cases where the record indicates that the mark will identify a column or section of a printed publication that is not separately sold or syndicated, the examining attorney may make the refusal prior to the filing of the allegation of use.

In an application under §44 or §66(a), where a specimen of use is not required prior to registration, it is appropriate for the examining attorney to refuse registration because the mark is not used on goods in trade where the record indicates that the mark will identify a column or section of a printed publication that is not separately sold, syndicated, or offered for syndication. *Cf. In re Right-On Co.*, 87 USPQ2d 1152, 1156-57

(TTAB 2008) (noting the propriety of and affirming an ornamentation refusal, which is otherwise typically specimen-based, in a §66(a) application).

### **1202.07(b) Marks That Identify Columns and Sections of Online Publications**

An online publication is considered a service rather than a product. Therefore, refusal of registration on the ground that the proposed mark is not used on goods in trade is inappropriate. Unlike a printed column or section, an online column or section can be accessed directly and can exist independent of any single publication. *See Ludden v. Metro Weekly*, 8 F. Supp. 2d 7, 14, 47 USPQ2d 1087, 1093 (D.D.C. 1998). Therefore, a mark that identifies an online column or section is registrable on the Principal Register without resort to §2(f) of the Trademark Act, 15 U.S.C. §1052(f), if registration is not barred by other sections of the Act.

### **1202.08 Title of a Single Creative Work**

The title, or a portion of a title, of a single creative work must be refused registration under §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127, unless the title has been used on a series of creative works. The title of a single creative work is not registrable on either the Principal or Supplemental Register. *Herbko Int'l, Inc. v. Kappa Books, Inc.*, 308 F.3d 1156, 1162, 64 USPQ2d 1375, 1378 (Fed. Cir. 2002) ("the title of a single book cannot serve as a source identifier"); *In re Cooper*, 254 F.2d 611, 615-16, 117 USPQ 396, 400 (C.C.P.A. 1958), *cert. denied*, 358 U.S. 840, 119 USPQ 501 (1958) ("A book title ... identifies a specific literary work ... and is not associated in the public mind with the publisher, printer or bookseller...."); *In re Posthuma*, 45 USPQ2d 2011 (TTAB 1998) (holding the title of a live theater production unregistrable); *In re Hal Leonard Publ'g Corp.*, 15 USPQ2d 1574 (TTAB 1990) (holding INSTANT KEYBOARD, as used on music instruction books, unregistrable as the title of a single work); *In re Appleby*, 159 USPQ 126 (TTAB 1968) (holding the title of single phonograph record, as distinguished from a series, does not function as mark).

As noted in *In re Cooper*, there is a compelling reason why the name or title of a book cannot be a trademark, which stems from copyright law. Unlike a copyright that has a limited term, a trademark can endure for as long as the trademark is used. Therefore, once copyright protection ends, and the work falls in the public domain, others must have the right to call the work by its name. *G. & C. Merriam Co. v. Syndicate Publ'g Co.*, 237 U.S. 618, 622 (1915); *In re Cooper*, 254 F.2d at 616, 117 USPQ at 400; *Mattel Inc. v. Brainy Baby Co.*, 101 USPQ2d 1140, 1144 (TTAB 2011). Moreover, if the work sought to be registered is not copyrighted, the public may copy it at once and would be as clearly entitled to call it by its name. *In re Cooper*, 254 F.2d at 616, 117 USPQ at 400.

See [TMEP §1301.02\(d\)](#) regarding the titles of radio and television programs.

### **1202.08(a) What Constitutes a Single Creative Work**

Single creative works include works in which the content does not change, whether that work is in printed, recorded, or electronic form. Materials such as books, sound recordings, downloadable songs, downloadable ring tones, videocassettes, DVDs, audio CDs, and films are usually single creative works. Creative works that are serialized, i.e., the mark identifies the entire work but the work is issued in sections or chapters, are still considered single creative works. A theatrical performance is also a single creative work, because the content of the play, musical, opera, or similar production does not significantly change from one performance to another. *In re Posthuma*, 45 USPQ2d 2011, 2014 (TTAB 1998). A cornerstone was considered a single creative work in an application for registration of FREEDOM STONE for "building stones used as landmarks

or cornerstones,” where the record showed that the proposed mark would identify only one building stone used as a landmark or cornerstone, to serve as the cornerstone for the Freedom Tower that is to be erected at the World Trade Center site in New York City. *In re Innovative Cos., LLC.*, 88 USPQ2d 1095, 1102 (TTAB 2008).

### **1202.08(b) What Does Not Constitute a Single Creative Work**

Generally, any creative work will not be considered a single creative work if evidence exists that it is part of a series (e.g., the work is labeled “volume 1,” “part 1,” or “book 1”) or is a type of work in which the content changes with each issue or performance. For example, single creative works do not include periodically issued publications, such as magazines, newsletters, comic books, comic strips, guide books, and printed classroom materials, because the content of these works changes with each issue.

A book with a second or subsequent edition in which the content changes *significantly* is not regarded as a single creative work. For example, a statement on the jacket cover that a cookbook is a “new and revised” version would indicate that it includes significant revisions. However, a new edition issued to correct typographical errors or that makes only minor changes is not considered to be a new work. Live performances by musical bands, television and radio series, and educational seminars are presumed to change with each presentation and, therefore, are not single creative works.

Computer software, computer games, coloring books, and activity books are not treated as single creative works.

The examining attorney must determine whether changes in content are significant based on any evidence in the application or record. The examining attorney may conduct additional research using the applicant’s website, Internet search engines, or Nexis® databases (and enter a Note to the File in the record, if appropriate). In addition, the examining attorney may issue a request for information under 37 C.F.R. §2.61(b).

### **1202.08(c) Complete Title of the Work – Evidence of a Series**

The name of a series of books or other creative works may be registrable if it serves to identify and distinguish the source of the goods. An applicant must submit evidence that the title is used on at least two different creative works. *In re Arnold*, 105 USPQ2d 1953, 1956 (TTAB 2013). A series is not established when only the format of the work is changed, that is, the same title used on a printed version of a book and a recorded version does not establish a series. *See Mattel Inc. v. Brainy Baby Co.*, 101 USPQ2d 1140, 1143 (TTAB 2011) (finding that a program recorded on both a VHS tape and a DVD were the same creative work, and that the addition of minor enhancements in the DVD did not transform this single work into a series). Likewise, use of the title on unabridged and abridged versions of the same work, or on collateral goods such as posters, mugs, bags, or t-shirts does not establish a series. Similarly, minimal variations of the same theatrical performance do not create a series. *See In re Posthuma*, 45 USPQ2d 2011, 2014 (TTAB 1998).

For example, if an application for the mark HOW TO RETIRE EARLY for “books” is refused because the specimen shows the mark used on a single creative work, the applicant may submit copies of other book covers showing use of the mark HOW TO RETIRE EARLY and any additional evidence to establish that the book is published each year with different content. It is not necessary to show that the mark was used

on the other works in the series prior to the filing date of the application or the allegation of use. However, evidence that the applicant intends to use the mark on a series is insufficient.

### **1202.08(d) Portion of a Title of the Work**

A portion of the title of any single creative work is registrable only if the applicant can show that the portion of the title meets the following criteria:

- (1) It creates a separate commercial impression apart from the complete title;
- (2) It is used on series of works; and
- (3) It is promoted or recognized as a mark for the series.

### **1202.08(d)(i) Mark Must Create a Separate Commercial Impression**

When registration is sought for a portion of a title, the mark must be used as a separable element on the specimen. The examining attorney should consider the size, type font, color, and any separation between the mark and the rest of the title when making this determination. *In re Scholastic Inc.*, 23 USPQ2d 1774, 1777 (TTAB 1992) ("[T]he words THE MAGIC SCHOOL BUS are prominently displayed on the books' covers, and are in a larger, bolder style of type and different color from the remainder of each title. Moreover, the words appear on a separate line above the remainder of each title."). If the portion of the title sought to be registered is not separable, the examining attorney must refuse registration on the ground that the mark is not a substantially exact representation of the mark as it appears on the specimen. See [TMEP §807.12\(d\)](#).

### **1202.08(d)(ii) Establishing a Series When the Mark is a Portion of the Title**

An applicant may establish that the portion of the title of a creative work is used on a series by submitting more than one book cover or CD cover with the mark used in all the titles. For example, if the mark on the drawing is "THE LITTLE ENGINE" and on the book it appears as "THE LITTLE ENGINE THAT WENT TO THE FAIR," registration should be refused because the mark is a portion of a title of a single work. See *In re Nat'l Council Books, Inc.*, 121 USPQ 198, 199 (TTAB 1959) (finding "NATIONAL" to be a portion of the title "NATIONAL GARDEN BOOK"). To establish use on a series, the applicant may submit additional book covers showing use of, e.g., "THE LITTLE ENGINE GOES TO SCHOOL," and "THE LITTLE ENGINE AND THE BIG RED CABOOSE."

### **1202.08(d)(iii) Evidence that the Portion of the Title is Promoted or Recognized as a Mark**

When a mark is used merely as a *portion of the title* of a creative work, the applicant has a heavier burden in establishing that the portion for which registration is sought serves as a trademark for the goods. *The mere use of the same words in more than one book title is insufficient to establish the words as a mark for a series.* The applicant must show that the public perceives the portion sought to be registered as a mark for the series. *In re Scholastic Inc.*, 23 USPQ2d 1774, 1777 (TTAB 1992) (holding THE MAGIC SCHOOL BUS used as a portion of the book titles in "THE MAGIC SCHOOL BUS AT THE WATERWORKS" and "THE MAGIC SCHOOL BUS INSIDE THE EARTH," functions as a mark for a series, because the record contained evidence of repeated use of the designation displayed prominently on book covers, as well as evidence that applicant promoted THE MAGIC SCHOOL BUS as a series title, that others used the

designation in book reviews to refer to a series of books, and that purchasers recognized the designation as indicating the source of a series of books).

### **1202.08(e) Identification of Goods/Services**

*Identification Need Not Reflect Use on a Series.* The identification of goods/services need not reflect that the applicant is using the title on a series of works (either written or recorded). It is sufficient that the record contains the evidence of a series.

*Creative Works in a List of Goods or Services.* A refusal of registration on the ground that the mark merely identifies the title of a single creative work can be made regardless of whether the creative work is the sole item in the identification of goods/services or is listed with other items. If the record contains information, or if the examining attorney learns from another source, that the mark identifies the title of a single creative work, the examining attorney must issue a partial refusal as to the relevant goods/services. A partial refusal is a refusal that applies only to certain goods/services, or to certain classes. See [TMEP §718.02\(a\)](#).

*Example:* An application for “newspapers, books in the field of finance, pencils, and coloring books” would be partially refused if the examining attorney determined, either from the application or from another source, that the mark identified the title of the “books in the field of finance.” The use of the same mark on other non-creative matter such as the pencils and coloring books does not overcome the refusal.

### **1202.08(f) Title of a Single Work in §1(b), §44, and §66(a) Applications**

The issue of whether a proposed mark is the title of a single creative work usually is tied to use of the mark, as evidenced by the specimen. Therefore, generally, no refusal will be issued in an intent-to-use application under §1(b) of the Trademark Act, 15 U.S.C. §1051(b), until the applicant has submitted a specimen with an allegation of use under §1(c) or §1(d) of the Act, 15 U.S.C. §1051(c) or (d).

However, in a §1(b) application for which no specimen has been submitted, if the examining attorney anticipates that a refusal will be made on the ground that the proposed mark is the title of a single creative work, the potential refusal should be brought to the applicant’s attention in the first action issued by the USPTO. This is done strictly as a courtesy. If information regarding this possible ground for refusal is not provided to the applicant before the allegation of use is filed, the USPTO is not precluded from refusing registration on this basis. In cases where the record indicates that the mark constitutes the title of a single work, the examining attorney may make the refusal prior to the filing of the allegation of use.

In an application under §44 or §66(a), where a specimen of use is not required prior to registration, it is appropriate for examining attorneys to issue the refusal where the record indicates that the mark will identify the title of a single work. *Cf. In re Right-On Co.*, 87 USPQ2d 1152, 1156-57 (TTAB 2008) (noting the propriety of and affirming an ornamentation refusal, which is otherwise typically specimen based, in a §66(a) application).

## **1202.09 Names of Artists and Authors**

### **1202.09(a) Names and Pseudonyms of Authors and Performing Artists**

Any mark consisting of the name of an author used on a written work, or the name of a performing artist on a sound recording, must be refused registration under §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127, if the mark is used solely to identify the writer or the artist. See *In re Polar Music Int’l AB*, 714 F.2d 1567, 1572, 221 USPQ 315, 318 (Fed. Cir. 1983); *In re Arnold*, 105 USPQ2d 1953, 1957-60 (TTAB 2013); *In re First Draft, Inc.* 76 USPQ2d 1183, 1190 (TTAB 2005); *In re Peter Spirer*,

225 USPQ 693, 695 (TTAB 1985). Written works include books or columns, and may be presented in print, recorded, or electronic form. Likewise, sound recordings may be presented in recorded or electronic form.

However, the name of the author or performer may be registered if:

- (1) It is used on a series of written or recorded works; and
- (2) The application contains sufficient evidence that the name identifies the source of the series and not merely the writer of the written work or the name of the performing artist.

*In re Arnold*, 105 USPQ2d at 1958.

If the applicant cannot show a series, or can show that there is a series but cannot show that the name identifies the source of the series, the mark may be registered on the Supplemental Register in an application under §1 or §44 of the Trademark Act. These types of marks may not be registered on the Principal Register under §2(f).

See also [TMEP §1301.02\(b\)](#) regarding personal names as service marks.

### **1202.09(a)(i) Author or Performer's Name – Evidence of a Series**

In an application seeking registration of an author's or performer's name, the applicant must provide evidence that the mark appears on at least two different works. Such evidence could include copies of multiple book covers or multiple CD covers that show the name sought to be registered. *See In re Polar Music Int'l AB*, 714 F.2d 1567, 1572, 221 USPQ 315, 318 (Fed. Cir. 1983). A showing of the same work available in different media, i.e., the same work in both printed and/or recorded or downloadable format, does not establish a series.

The identification of goods need not reflect that the applicant is using the name on a series of works (either written or recorded). It is sufficient that the record contains the evidence of a series.

### **1202.09(a)(ii) Evidence that the Name is a Source Identifier**

The use of the author's or performer's name on a series of works does not, in itself, establish that the name functions as a mark. The record must also show that the name serves as more than a designation of the writer or performer, i.e., that it also serves to identify the source of the series. *See In re Arnold*, 105 USPQ2d 1953, 1959-60 (TTAB 2013) (holding BLATANCY fails to function as a mark because it merely identifies the name of a performer featured on applicant's musical recordings, and finding the evidence relating to control over the mark and the nature and quality of the goods conflicting and of uncertain meaning); *In re First Draft*, 76 USPQ2d 1183, 1191 (TTAB 2005) (holding pseudonym FERN MICHAELS identifies only the author and does not function as a mark to identify and distinguish a series of fictional books because the "evidence of promotion" was "indirect and rather scant," despite applicant's showing that the name had been used as an author's name for 30 years; that 67 separate books had been published under the name, and approximately 6 million copies had been sold; that the book jackets listed the titles of other works by Fern Michaels and promoted her as a bestselling author; that the author had been inducted into the New Jersey Literary Hall of Fame; and that there was a [www.fernmichaels.com](http://www.fernmichaels.com) website); *In re Chicago Reader Inc.*, 12 USPQ2d 1079, 1080 (TTAB 1989) (holding CECIL ADAMS, used on the specimen as a byline and as part of the author's address appearing at the end of a column, merely identifies the author and does not function as a trademark for a newspaper column).

A showing that the name functions as a source identifier may be made by submitting evidence of either: (1) promotion and recognition of the name as a source indicator for the series ( *see* [TMEP §1202.09\(a\)\(ii\)\(A\)](#)); or (2) the author's or performer's control over the name and quality of his or her works in the series ( *see* [TMEP §1202.09\(a\)\(ii\)\(B\)](#)). *In re Arnold*, 105 USPQ2d at 1958.

### **1202.09(a)(ii)(A) Promotion and Recognition of the Name**

To show that the name of an author or performing artist has been promoted and is recognized as indicating the source of a series of written works, the applicant could submit copies of advertising that promotes the name as the source of a series, copies of third-party reviews showing others' use of the name to refer to a series of works, or evidence showing the name used on a web site associated with the series of works. *See In re First Draft*, 76 USPQ2d 1183, 1191 (TTAB 2005), citing *In re Scholastic Inc.*, 23 USPQ2d 1774, 1777 (TTAB 1992) (holding THE MAGIC SCHOOL BUS functions as a mark for a series of books, where the record contained evidence of use of the designation displayed prominently on many different book covers, as well as evidence that applicant promoted the term as a series title, that others used the designation in book reviews to refer to a series of books, and that purchasers recognized the designation as indicating the source of a series of books).

### **1202.09(a)(ii)(B) Control over the Nature and Quality of the Goods**

Alternatively, an applicant may show that the name of an author or performing artist functions as a source indicator by submitting documentary evidence that the author/performer controls the quality of his or her distributed works and controls the use of his or her name. Such evidence would include license agreements and other documentary or contractual evidence. *See In re Polar Music Int'l AB*, 714 F.2d 1567, 1572, 221 USPQ 315, 318 (Fed. Cir. 1983) (holding the name of the musical group ABBA functions as a mark for sound recordings where a license agreement showed that the owner of the mark, ABBA, controlled the quality of the goods, and other contractual evidence showed that the owner also controlled the use of the name of the group).

In *In re First Draft*, 76 USPQ2d 1183, 1191 (TTAB 2005), the Board found that the applicant failed to meet the *Polar Music* test, noting that:

[W]e have neither any evidence bearing on [the question of applicant's control over the quality of the goods] nor even any representations by counsel regarding such matters. This is in stark contrast to *Polar Music*, wherein there was detailed information and documentary (i.e., contractual) evidence regarding the relationship between the performing group ABBA and its "corporate entity," as well as evidence of the control such corporation maintained in dealings with a manufacturer and seller of its recordings in the United States.

If the applicant maintains control over the quality of the goods because the goods are published or recorded directly under the applicant's control, the applicant may submit a verified statement that "the applicant publishes or produces the goods and controls their quality." *In re Arnold*, 105 USPQ2d 1953, 1958 (TTAB 2013).

### **1202.09(a)(iii) Names of Authors and Performing Artists in §1(b), §44, and §66(a) Applications**

The issue of whether a proposed mark identifies only an author or performing artist is usually tied to use of the mark, as evidenced by the specimen. Therefore, generally, no refusal will be issued in an intent-to-use

application under §1(b) of the Trademark Act, 15 U.S.C. §1051(b), until the applicant has submitted specimen(s) with an allegation of use under §1(c) or §1(d) of the Trademark Act, 15 U.S.C. §1051(c) or (d).

In a §1(b) application for which no specimen has been submitted, if the examining attorney anticipates that a refusal will be made on the ground that the proposed mark identifies only an author or performing artist, the potential refusal should be brought to the applicant's attention in the first action issued by the USPTO. This is done strictly as a courtesy. If information regarding this possible ground for refusal is not provided to the applicant before the allegation of use is filed, the USPTO is not precluded from refusing registration on this basis. In cases where the record indicates that the mark identifies only an author or performing artist, the examining attorney may make the refusal prior to the filing of the allegation of use.

In an application under §44 or §66(a), where a specimen of use is not required prior to registration, it is appropriate for examining attorneys to issue the refusal where the record, even without a specimen, reflects that the proposed mark identifies only an author or performing artist. *Cf. In re Right-On Co.*, 87 USPQ2d 1152, 1156-57 (TTAB 2008) (noting the propriety of and affirming an ornamentation refusal, which is otherwise typically specimen based, in a §66(a) application).

### **1202.09(b) Names of Artists Used on Original Works of Art**

An artist's name or pseudonym affixed to an original work of art may be registered on the Principal Register without a showing that the name identifies a series. Original works of art includes paintings, murals, sculptures, statues, jewelry, and like works that the artist personally creates. In *In re Wood*, 217 USPQ 1345, 1350 (TTAB 1983), the Board held that the pseudonym YSABELLA affixed to an original work of art functioned as a mark. The Board has expressly limited this holding to cases involving original works of art, stating in *Wood* that “[I]f we be accused of painting with too broad a brush, we hold only that an artist's name affixed to an original work of art may be registered as a mark and that here applicant's name, as evidenced by some of the specimens of record [the signature of the artist on a work of art], functions as a trademark for the goods set forth in the application.” In *In re First Draft*, 76 USPQ2d 1183, 1190 (TTAB 2005), the Board again stated that “*Wood* is limited in its application to cases involving original works of art and there is nothing to indicate that the panel deciding that case considered novels to be encompassed by the phrase original works of art.”

### **1202.10 Names and Designs of Characters in Creative Works**

Marks that merely identify a character in a creative work, *whether used in a series or in a single work*, are not registrable. *In re Scholastic Inc.*, 223 USPQ 431, 431 (TTAB 1984) (holding THE LITTLES, used in the title of each book in a series of children's books, does not function as a mark where it merely identifies the main characters in the books). *Cf. In re Caserta*, 46 USPQ2d 1088, 1090-91 (TTAB 1998) (holding FURR-BALL FURCANIA, used as the principal character in a single children's book, does not function as a mark even though the character's name appeared on the cover and every page of the story); *In re Frederick Warne & Co.*, 218 USPQ 345, 347-48 (TTAB 1983) (holding an illustration of a frog used on the cover of a single book served only to depict the main character in the book and did not function as a trademark).

To overcome a refusal of registration on the ground that the proposed mark merely identifies a character in a creative work, the applicant may submit evidence that the character name does not merely identify the character in the work. For example, the applicant may submit evidence showing use of the character name as a mark on the spine of the book, or on displays associated with the goods, in a manner that would be perceived as a mark.

A refusal of registration on the ground that the mark merely identifies a character in a creative work can be made regardless of whether the creative work is the sole item in the identification of goods/services or is listed with other items. If the record contains information or if the examining attorney learns from another source that the mark identifies a character in a creative work and there are multiple items in the identification, the examining attorney should issue a partial refusal as to the relevant goods/services. A partial refusal is a refusal that applies only to certain goods/services, or to certain classes. See [TMEP §718.02\(a\)](#).

*Example:* An application for “children’s books, pencils, and coloring books” would be partially refused if the examining attorney determined, either from the application or from another source, that the mark identified a character in the children’s books. The use of the same mark on other non-creative matter such as the pencils and coloring books does not overcome the refusal.

## **1202.10(a) Names and Designs of Characters in Creative Works in §1(b), §44, or §66(a) Applications**

The issue of whether a proposed mark identifies only the name or design of a particular character is tied to use of the mark, as evidenced by the specimen. Therefore, unless the record, even without a specimen, reflects that the proposed mark identifies only the name or design of a character, generally no refusal will be issued in an intent-to-use application under §1(b) of the Trademark Act, 15 U.S.C. §1051(b), until the applicant has submitted specimen(s) with an allegation of use under §1(c) or §1(d) of the Trademark Act, 15 U.S.C. §1051(c) or (d). However, in a §1(b) application for which no specimen has been submitted, if the examining attorney anticipates that a refusal will be made on the ground that the proposed mark identifies only a particular character, the potential refusal should be brought to the applicant’s attention in the first action issued by the USPTO. This is done strictly as a courtesy. If information regarding this possible ground for refusal is not provided to the applicant before the allegation of use is filed, the USPTO is not precluded from refusing registration on this basis. In cases where the record indicates that the mark identifies only the name or design of a character, the examining attorney may make the refusal prior to the filing of the allegation of use.

In an application under §44 or §66(a), where a specimen of use is not required prior to registration, it is appropriate for examining attorneys to issue the refusal where the record indicates that the mark will identify only the name or design of a particular character. *Cf. In re Right-On Co.*, 87 USPQ2d 1152, 1156-57 (TTAB 2008) (noting the propriety of and affirming an ornamentation refusal, which is otherwise typically specimen-based, in a §66(a) application).

See [TMEP §1301.02\(b\)](#) regarding names of characters or personal names as service marks.

## **1202.11 Background Designs and Shapes**

Common geometric shapes and background designs that are not sufficiently distinctive to create a commercial impression separate from the word and/or design marks with which they are used, are not regarded as indicators of origin absent evidence of distinctiveness of the design alone. See *Bd. of Trs. of Univ. of Ala. v. Pitts*, 107 USPQ2d 2001, 2014 (TTAB 2013); *In re Benetton Group S.p.A.*, 48 USPQ2d 1214, 1215-16 (TTAB 1998); *In re Anton/Bauer, Inc.*, 7 USPQ2d 1380, 1381 (TTAB 1988); *In re Wendy’s Int’l, Inc.*, 227 USPQ 884, 885 (TTAB 1985); *In re Haggard Co.*, 217 USPQ 81, 83-84 (TTAB 1982). As stated in *In re Chem. Dynamics, Inc.*, 839 F.2d 1569, 1570, 5 USPQ2d 1828, 1829 (Fed. Cir. 1988) (citations omitted), “[a] background design which is always used in connection with word marks must create a commercial impression on buyers separate and apart from the word marks for the design to be protectible as a separate mark.’ In deciding whether the design background of a word mark may be separately registered, the essential question is whether or not the background material is or is not inherently distinctive.... If the background

portion is inherently distinctive, no proof of secondary meaning need be introduced; if not, such proof is essential .”

An applicant may respond to a refusal to register an application for a common geometric shape or background design by submitting evidence that the subject matter has acquired distinctiveness under §2(f) of the Trademark Act, 15 U.S.C. §1052(f). The examining attorney should scrutinize any submission that asserts distinctiveness solely on the basis of a statement of substantially exclusive and continuous use for five years to determine whether it truly establishes that the subject matter is perceived as a trademark by the purchasing public. The examining attorney may continue to refuse registration if he or she believes that the applicant’s assertion does not establish that the matter is perceived as a trademark. The applicant may submit additional evidence to establish distinctiveness. See [TMEP §§1212–1212.10](#) .

In the following cases, the evidence of distinctiveness was insufficient: *Bd. of Trs. of Univ. of Ala. v. Pitts*, 107 USPQ2d at 2014-20 (finding unregistered Houndstooth Pattern not inherently distinctive; evidence of acquired distinctiveness insufficient); *Benetton*, 48 USPQ2d at 1217 (holding green rectangular background design not inherently distinctive; evidence of acquired distinctiveness insufficient); *Anton/Bauer*, 7 USPQ2d at 1383 (holding parallelogram designs used as background for word marks not inherently distinctive; evidence of record insufficient to establish acquired distinctiveness pursuant to §2(f)); *In re Kerr-McGee Corp.*, 190 USPQ 204, 207 (TTAB 1976) (affirming refusals to register escutcheon design used as a frame or border for words, under §2(f)).

In the following cases, the evidence of distinctiveness was sufficient: *In re Schenectady Varnish Co.*, 280 F.2d 169, 171, 126 USPQ 395, 397 (C.C.P.A. 1960) (finding evidence of record sufficient to show acquired distinctiveness of the design alone as a trademark for synthetic resins where use of applicant’s design of a cloud and a lightning flash was always used as a background for the word “SCHENECTADY” ); *In re Raytheon Co.*, 202 USPQ 317, 319-20 (TTAB 1979) (finding light-colored oval within black rectangular carrier not inherently distinctive; evidence of record sufficient to establish acquired distinctiveness).

## 1202.12 Varietal and Cultivar Names (Examination of Applications for Seeds and Plants)

Varietal or cultivar names are designations given to cultivated varieties or subspecies of live plants or agricultural seeds. They amount to the generic name of the plant or seed by which such variety is known to the U.S. consumer. See, e.g., *In re Pennington Seed Co.*, 466 F.3d 1053, 80 USPQ2d 1758, 1761-62 (Fed. Cir. 2006). These names can consist of a numeric or alphanumeric code or can be a “fancy” (arbitrary) name. The terms “varietal” and “cultivar” may have slight semantic differences but pose indistinguishable issues and are treated identically for trademark purposes.

Subspecies are types of a particular species of plant or seed that are members of a particular genus. For example, all maple trees are in the genus *Acer*. The sugar maple species is known as *Acer saccharum*, while the red maple species is called *Acer rubrum*. In turn, these species have been subdivided into various cultivated varieties that are developed commercially and given varietal or cultivar names that are known to U.S. consumers.

A varietal or cultivar name is used in a plant patent to identify the variety. Thus, even if the name was originally arbitrary, it “describe[s] to the public a [plant] of a particular sort, not a [plant] from a particular [source].” *Dixie Rose Nursery v. Coe*, 131 F.2d 446, 447, 55 USPQ 315, 316 (D.C. Cir. 1942). It is against public policy for any one supplier to retain exclusivity in a patented variety of plant, or the name of a variety, once its patent expires. *Id.*; accord *Pennington Seed*, 80 USPQ2d at 1762.

Market realities and lack of laws concerning the registration of varietal and cultivar names have created a number of problems in this area. Some varietal names are not attractive or easy to remember by the public. As a result, many arbitrary terms are used as varietal names. Problems arise when trademark registration is sought for varietal names, when arbitrary varietal names are thought of as being trademarks by the public, and when terms intended as trademarks by plant breeders become generic through public use. These problems make this a difficult area for the examining attorney in terms of gathering credible evidence and knowing when to make refusals.

Whenever an application is filed to register a mark containing wording for live plants, agricultural seeds, fresh fruits, or fresh vegetables, the examining attorney must inquire of the applicant whether the term has ever been used as a varietal name, and whether such name has been used in connection with a plant patent, a utility patent, or a certificate for plant variety protection. *See* 37 C.F.R. §2.61(b). The examining attorney must also undertake an independent investigation of any evidence that would support a refusal to register, using sources of evidence that are appropriate for the particular goods specified in the application (e.g., laboratories and repositories of the United States Department of Agriculture, plant patent information from the USPTO, a variety name search of plants certified under the Plant Variety Protection Act listed at [www.ars-grin.gov/npgs/searchgrin.html](http://www.ars-grin.gov/npgs/searchgrin.html)).

If the examining attorney determines that wording sought to be registered as a mark for live plants, agricultural seeds, fresh fruits, or fresh vegetables comprises a varietal or cultivar name, then the examining attorney must refuse registration, or require a disclaimer, on the ground that the matter is the varietal name of the goods and does not function as a trademark under §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127. *See Pennington Seed*, 80 USPQ2d at 1761-62 (upholding the USPTO's long-standing precedent and policy of treating varietal names as generic, and affirming refusal to register REBEL for grass seed because it is the varietal name for the grass seed as evidenced by its designation as the varietal name in applicant's plant variety protection certificate); *Dixie Rose Nursery*, 55 USPQ at 316 (holding TEXAS CENTENNIAL, although originally arbitrary, has become the varietal name for a type of rose; *In re Hilltop Orchards & Nurseries, Inc.*, 206 USPQ 1034, 1035 (TTAB 1979) (affirming the refusal to register COMMANDER YORK for apple trees because it is the varietal name for the trees as evidenced by use in applicant's catalogue); *In re Farmer Seed & Nursery Co.*, 137 USPQ 231, 231-32 (TTAB 1963) (upholding the refusal to register CHIEF BEMIDJI as a trademark because it is the varietal name for a strawberry plant and noting that large expenditures of money does not elevate a mark to a trademark; *In re Cohn Bodger & Sons Co.*, 122 USPQ 345, 346 (TTAB 1959) (holding BLUE LUSTRE merely a varietal name for petunia seeds as evidenced by applicant's catalogs).

Likewise, if the mark identifies the prominent portion of a varietal name, it must be refused. *In re Delta & Pine Land Co.*, 26 USPQ2d 1157 (TTAB 1993) (affirming the refusal to register DELTAPINE, which was a portion of the varietal names Deltapine 50, Deltapine 20, Deltapine 105 and Deltapine 506).

### 1202.13 Scent, Fragrance, or Flavor

*Scent.* The scent of a product may be registrable if it is used in a nonfunctional manner. *See In re Clarke*, 17 USPQ2d 1238, 1239-40 (TTAB 1990) (holding that the scent of plumeria blossoms functioned as a mark for "sewing thread and embroidery yarn"). Scents that serve a utilitarian purpose, such as the scent of perfume or an air freshener, are functional and not registrable. *See TMEP §§1202.02(a)-1202.02(a)(viii)* regarding functionality. When a scent is not functional, it may be registered on the Principal Register under §2(f), or on the Supplemental Register if appropriate. The amount of evidence required to establish that a scent or fragrance functions as a mark is substantial. *See In re Pohl-Boskamp GmbH & Co.*, 106 USPQ2d 1042, 1052 (TTAB 2013) (finding that peppermint scent mark for "pharmaceutical formulations of nitroglycerin" failed to function as a mark and noting the insufficiency of applicant's evidence of acquired distinctiveness).

in light of evidence that the use of peppermint scent by others in the relevant marketplace (i.e., pharmaceuticals) tends to show that such scents are more likely to be perceived as attributes of ingestible products than as indicators of source)); *cf. In re Owens-Corning Fiberglas Corp.*, 774 F.2d 1116, 227 USPQ 417 (Fed. Cir. 1985) (requiring concrete evidence that the mark is perceived as a mark to establish distinctiveness).

*Flavor.* Just as with a scent or fragrance, a flavor can never be inherently distinctive because it is generally seen as a characteristic of the goods. *In re Pohl-Boskamp GmbH & Co.*, 106 USPQ2d at 1048 (finding that peppermint flavor mark for “pharmaceutical formulations of nitroglycerin” failed to function as a mark); *In re N.V. Organon*, 79 USPQ2d 1639 (TTAB 2006) (affirming refusal to register “an orange flavor” for “pharmaceuticals for human use, namely, antidepressants in quick-dissolving tablets and pills,” on the grounds that the proposed mark was functional under §2(e)(5) and failed to function as a mark within the meaning of §§1, 2, and 45 of the Trademark Act). The Board has observed that it is unclear how a flavor could function as a source indicator because flavor or taste generally performs a utilitarian function and consumers generally have no access to a product’s flavor or taste prior to purchase. *Id.* at 1650-51. Thus, an application to register a flavor “requires a substantial showing of acquired distinctiveness.” *In re Pohl-Boskamp GmbH & Co.*, 106 USPQ2d at 1051-52 (noting the insufficiency of applicant’s evidence of acquired distinctiveness in light of evidence that the use of peppermint flavor by others in the relevant marketplace tends to show that such flavors are more likely to be perceived as attributes of ingestible products than as indicators of source); *In re N.V. Organon*, 79 USPQ2d at 1650.

See [TMEP §807.09](#) regarding the requirements for submitting applications for non-visual marks.

## 1202.14 Holograms

A hologram used in varying forms does not function as a mark in the absence of evidence that consumers would perceive it as a trademark. *See In re Upper Deck Co.*, 59 USPQ2d 1688, 1692-93 (TTAB 2001), where the Board held that a hologram used on trading cards in varying shapes, sizes, and positions did not function as a mark, because the record showed that other companies used holograms on trading cards and other products as anti-counterfeiting devices, and there was no evidence that the public would perceive applicant’s hologram as an indicator of source. The Board noted that “the common use of holograms for non-trademark purposes means that consumers would be less likely to perceive applicant’s uses of holograms as trademarks.” 59 USPQ2d at 1693.

Therefore, in the absence of evidence of consumer recognition as a mark, the examining attorney should refuse registration on the ground that the hologram does not function as a mark, under §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127.

Generally, if a hologram has two or more views, the examining attorney should also refuse registration under §§1 and 45 of the Trademark Act, 15 U.S.C. §§1051 and 1127, on the ground that the application seeks registration of more than one mark. *In re Upper Deck*, 59 USPQ2d at 1690-91. *See* [TMEP §807.01](#).

## 1202.15 Sound Marks

A sound mark identifies and distinguishes a product or service through audio rather than visual means. Sound marks function as source indicators when they “assume a definitive shape or arrangement” and “create in the hearer’s mind an association of the sound” with a good or service. *In re Gen. Electric Broad. Co.*, 199 USPQ 560, 563 (TTAB 1978). Thus, sounds may be registered on the Principal Register when they are “arbitrary, unique or distinctive and can be used in a manner so as to attach to the mind of the listener and

be awakened on later hearing in a way that would indicate for the listener that a particular product or service was coming from a particular, even if anonymous, source.” *In re Vertex Grp. LLC*, 89 USPQ2d 1694, 1700 (TTAB 2009). Examples of sound marks include: (1) a series of tones or musical notes, with or without words; and (2) wording accompanied by music.

There is, however, a difference between unique, different, or distinctive sounds and those that resemble or imitate “commonplace” sounds or those to which listeners have been exposed under different circumstances, which must be shown to have acquired distinctiveness. *Gen. Electric Broad.* 199 USPQ at 563 (TTAB 1978). Examples of “commonplace” sound marks include goods that make the sound in their normal course of operation (e.g., alarm clocks, appliances that include audible alarms or signals, telephones, and personal security alarms). Therefore, sound marks for goods that make the sound in their normal course of operation can be registered only on a showing of acquired distinctiveness under §2(f). *In re Powermat Inc.*, 105 USPQ2d 1789, 1793 (TTAB 2013) (finding battery chargers that emit “chirp” sounds slightly increasing and decreasing in pitch not inherently distinctive, and applicant’s advertising only relevant in a showing of acquired distinctiveness); *Nextel Commc'ns, Inc. v. Motorola, Inc.*, 91 USPQ2d 1393 (TTAB 2009) (holding cellular telephones that emit a “chirp” sound fall into the category of goods that make the sound in their normal course of operation); *Vertex*, 89 USPQ2d at 1700, 1702 (holding personal security alarm clock products that emit a sound pulse fall into the category of goods that make sound in the normal course of operation).

See [TMEP §807.09](#) regarding the requirements for submitting applications for sound marks and [§904.03\(f\)](#) regarding specimens for sound marks.

## 1202.16 Model or Grade Designations

Model designations appear in connection with a wide variety of products, such as retaining rings, hand tools, and pens, to identify a specific style, type, or design of a product within a particular line of goods. See *In re Petersen Mfg. Co.*, 229 USPQ 466 (TTAB 1986) (noting that the following alphanumeric designations served as model numbers on the specimens, but finding the evidence of acquired distinctiveness under §2(f) sufficient for registration: 18R for a C clamp; 6LN for a locking plier with elongated jaw; 9LN for a locking plier with elongated jaw; 7CR for a locking plier with curved jaw; 6R for a C clamp; 20R for a chain clamp; 10CR for a locking plier with curved jaw; 7R for a locking plier with straight jaw; 10WR for a locking plier with wire cutter; 7WR for a locking plier with wire cutter; 5WR for a locking plier with wire cutter; RR for a locking specialty tool, namely, a pinch-off tool; 10R for a locking plier with straight jaw; 9R for a locking specialty tool, namely, a welding clamp; 8R for locking specialty tools, namely, metal clamping tools; and 11R for a C clamp); *In re Waldes Kohinoor, Inc.*, 124 USPQ 471 (TTAB 1960) (holding that 5131, 5000, and 5100 for retaining rings functioned only to differentiate one type of the applicant’s retaining rings from its other types and did not function as a trademark to distinguish the applicant’s goods from those of others); *Ex parte Esterbrook Pen Co.*, 109 USPQ 368 (Comm’r Pats. 1956) (holding that 2668 for pen points did not function as a mark because it was merely a style number for a particular pen point used to differentiate one pen point from other points in the product line).

Model designations also are commonly used to distinguish between different types of automobile parts within a single product line. See *In re Dana Corp.*, 12 USPQ2d 1748 (TTAB 1989) (holding that the following alphanumeric designations used in connection with vehicle parts functioned only as part numbers and not as trademarks: 5-469X; 5-438X; 5-510X; 5-515X; 5-407X; 5-279X; and 5-281X). In addition, model designations may serve the purpose of providing users with product compatibility information between goods and parts, accessories, and/or fittings for the goods. See *In re Otis Eng’g Corp.*, 218 USPQ 959, 960 (TTAB 1983) (noting that the fact that various pieces of applicant’s “X” equipment for oil wells are compatible with each other tends to support the position that “X” is a style or model designation, but finding that the

specimens, advertising brochures, and affidavits when considered together demonstrate that “X” also functions as a trademark). They also facilitate ordering and tracking of goods. *Id.* (noting that the use of the same designation on various goods that work together would enable purchasers to order compatible equipment).

Grade designations are used to denote that a product has a certain level of quality within a defined range. They may also indicate that a product has a certain classification, size, weight, type, degree, or mode of manufacturing. Mere grade designations are often used by competitors within an industry, or by the general public, and do not indicate origin from a single source because their principal function is to provide information about the product to a consumer. *See* 1 Anne Gilson LaLonde, *Gilson on Trademarks* §2.03(4)(a) (Matthew Bender 2011). (Note: the use of a grade designation in the context of a certification mark is not discussed herein.)

For example, the fuel industry utilizes grade designations in the form of particular numbers to delineate different octane ratings of fuel. *See In re Union Oil Co.*, 33 USPQ 43 (C.C.P.A. 1937) (affirming the decision of the Commissioner of Patents refusing to register 76 for gasoline because the term functioned merely as a grade or quality mark to indicate either the octane rating or the Baume gravity rating and did not indicate origin). Grade designations have also been used to signify the composition or strength of various types of steel. *See Jones & Laughlin Steel Corp. v. Armco Steel Corp.*, 139 USPQ 132 (TTAB 1963) (holding that the terms 17-4PH and 17-7PH originally served only as a grade designation for stainless steel based on the composition of chromium and nickel, but finding the evidence of secondary meaning sufficient for registration). The United States Department of Agriculture (USDA) assigns grades in connection with butter to delineate between different quality levels based on flavor, aroma, and texture. *See* Agric. Mktg. Serv., U.S. Dep’t of Agric., *How to Buy Butter* (Feb. 1995), <http://www.ams.usda.gov/AMSV1.0/getfile?dDocName=STELDEV3002487>. The USDA also assigns grades to other food products, such as eggs, meat, and poultry. *See* Agric. Mktg. Serv., U.S. Dep’t of Agric., *Egg - Grading Manual* (July 2000), <http://www.ams.usda.gov/AMSV1.0/getfile?dDocName=STELDEV3004502>; *Inspection & Grading of Meat and Poultry: What Are the Differences?*, U.S. Dep’t of Agric. (Aug. 22, 2008), [http://www.fsis.usda.gov/Fact\\_Sheets/Inspection\\_&\\_Grading/index.asp](http://www.fsis.usda.gov/Fact_Sheets/Inspection_&_Grading/index.asp).

### 1202.16(a) Examination of Marks with Model and Grade Designations

A trademark comprises a word, name, symbol, device, or combination thereof that is used to identify the goods of an applicant, to distinguish them from the goods of others, and to indicate the source of the goods. Trademark Act §§1-2, 45, 15 U.S.C. §§1051-1052, 1127; *see* [TMEP §1202](#). Similar to a trademark, a model or grade designation is generally comprised of numbers or letters, or a combination thereof. However, the manner of use, and resulting commercial impression imparted by the matter, differentiate a mere model or grade designation from that of a trademark (or a dual-purpose mark that is both a model or grade designation and a trademark). While letters, numbers, or alphanumeric matter may serve as both a trademark and a model or grade designation, matter used merely as a model or grade designation serves only to differentiate between different products within a product line or delineate levels of quality, and does not indicate source. *See Eastman Kodak Co. v. Bell & Howell Document Mgmt. Prods. Co.*, 994 F.2d 1569, 1576, 26 USPQ2d 1912, 1919 (Fed. Cir. 1993); *Neapco Inc. v. Dana Corp.*, 12 USPQ2d 1746, 1748 (TTAB 1989); 1 Anne Gilson LaLonde, *Gilson on Trademarks* §2.03(4)(a) (Matthew Bender 2011); J. Thomas McCarthy, *McCarthy on Trademarks and Unfair Competition* §11.36 (4th ed. 2011).

Even though a model or grade designation seems “arbitrary” in the sense that the combination of letters, numbers, or both does not immediately describe the goods, it often does not function as a trademark. *See* Gilson LaLonde, *supra*, §2.03(4)(a). Where the model or grade designation fails to distinguish the applicant’s goods from those of others or to identify the applicant as the source, the proposed mark must be refused

registration on the Principal Register under §§1, 2, and 45 for failure to function as a trademark. 15 U.S.C. §§1051-1052, 1127. However, if the mark both identifies a model or grade designation and serves as a trademark, no failure-to-function refusal should issue. *See Ex parte Eastman Kodak Co.*, 55 USPQ 361, 362 (Comm'r Pats. 1942) (“The fundamental question is not whether or not the mark as used by applicant serves to indicate grade or quality but rather whether it is or is not so used that purchasers and the public will recognize the mark as indicating the source of origin of the goods.”).

In addition, the examining attorney must also consider whether the proposed mark is merely descriptive, or even generic. Trademark Act §2(e)(1), 15 U.S.C. §1052(e)(1). Grade designations often become synonymous with (and thus merely descriptive of) a classification, value, size, weight, type, degree, mode of manufacturing, or level of quality of the goods. And, more infrequently, model designations can be used in a merely descriptive manner. *See Textron, Inc. v. Omark Indus., Inc.*, 208 USPQ 524, 527-28 (TTAB 1980) (holding that model numbers which have been used in the same manner by competitors for indicating the size of the saw chains as to pitch and gauge are merely descriptive and not registrable).

## **1202.16(b) Identifying Model and Grade Designations in Marks**

### **1202.16(b)(i) Model Designations**

Determining whether a proposed mark is used merely as a model designation is a question of fact. *See In re Petersen Mfg. Co.*, 229 USPQ 466 (TTAB 1986) (finding that purchasers recognized the designations as trademarks in addition to functioning as model designations based on the ex parte record presented). The factual finding focuses on whether the proposed mark, as used on the specimen (and any other evidence of record), also identifies the applicant as the source of the goods or distinguishes the applicant’s goods from the goods of others. Extrinsic evidence may also aid in determining whether the proposed mark functions as a source indicator. The following three considerations comprise guidelines for determining whether a proposed mark, as used on a specimen, serves merely as a model designation or whether it also functions as a source indicator.

#### **1202.16(b)(i)(A) Stylization of Display**

The stylization of display refers to the visual presentation or “look” of a proposed mark on the specimen, and takes into consideration such elements as font style and color as well as design features. In some cases, the stylization creates an impression separate and apart from that of a model designation, thereby making the designation more likely to be perceived as a trademark. In analyzing stylization of display, the examining attorney should consider whether the font or stylization of lettering in the proposed mark is unusual or relatively ordinary, and should also consider the degree of stylization. Where the stylization is minimal, the proposed mark may be more likely to be perceived as *merely* a model designation.

#### **1202.16(b)(i)(B) Size of Proposed Mark**

Size refers to the relative dimension of the proposed mark. If the proposed mark appears large in relation to any other matter, it may immediately catch the eye and make the proposed mark the focal point on the specimen. Therefore, the proposed mark would be less likely to be perceived as a mere model designation.

If the proposed mark is smaller than the other matter surrounding it, however, consumers would be more likely to perceive it as merely a model designation.

### **1202.16(b)(i)(C) Physical Location**

The physical location refers to the actual position of the proposed mark on a specimen. Although there is no prescribed location on a specimen where the proposed mark must be placed to qualify as a trademark, the physical location of matter on a specimen suggests how the mark would be perceived by consumers and whether such matter serves as a trademark or is merely a model designation. The display of a proposed mark in a prominent location on the goods themselves, or on the packaging or label, is a factor that may contribute to finding that it serves as a trademark. A proposed mark that appears in close proximity to generic or informational matter (such as the common or class name for the goods, net weight, bar code, or country of origin) is less likely to be perceived as a mark because it will be viewed together with the generic or informational matter as merely conveying information about the model of a particular product line.

### **1202.16(b)(ii) Grade Designations**

A grade designation often indicates a standard that is common to producers or manufacturers within an industry. Determining whether a proposed mark is used *merely* as a grade designation is a question of fact. *See In re Flintkote Co.*, 132 USPQ 295, 296 (TTAB 1961) (citing *Kiekhaefer Corp. v. Willys-Overland Motors, Inc.*, 111 USPQ 105 (C.C.P.A. 1956)); J. Thomas McCarthy, *McCarthy on Trademarks and Unfair Competition* §11.36 (4th ed. 2011). Thus, the examining attorney must supplement consideration of the application content (i.e., the drawing, the description of the mark, the identification of goods or services, and the specimen, if any), with independent research of the applicant's and competitors' websites, the Internet, and databases such as LexisNexis® to determine how the designation is used in the industry. Such research will assist in determining whether the proposed mark is used by others to convey a specific characteristic of the goods (such as value, size, type, degree, or level of quality) and, as such, has a publicly recognized meaning. For example, if the evidence shows that A, B, C, and D, or 1, 2, 3, and 4, are commonly used in an industry to represent a hierarchy of quality, a mark consisting of such a letter or number likely would not indicate source in any one producer or manufacturer. *See Shaw Stocking Co. v. Mack*, 12 F. 707, 711 (C.C.N.D.N.Y. 1882) ("It is very clear that no manufacturer would have the right exclusively to appropriate the figures 1, 2, 3, and 4, or the letters A, B, C, and D, to distinguish the first, second, third and fourth quality of his goods, respectively. Why? Because the general signification and common use of these letters and figures are such, that no man is permitted to assign a personal and private meaning to that which has by long usage and universal acceptance acquired a public and generic meaning."); 1 Anne Gilson LaLonde, *Gilson on Trademarks* §2.03(4)(a) (Matthew Bender 2011).

Where extrinsic evidence shows that matter in the proposed mark is used by competitors or members of the public to convey the same type of designation of quality, the resulting commercial impression is merely that of a grade designation with no source-identifying capability. The examining attorney should also analyze the specimen using the same considerations for model designations (i.e., stylization of display on the specimen, size of matter on the specimen, physical location on the specimen) to bolster a refusal based on a failure to function as a mark. A lack of extrinsic evidence of usage of the proposed mark as a grade designation does not necessarily foreclose a refusal, where the nature of applicant's use and the same

considerations for model designations (i.e., stylization of display on the specimen, size of matter on the specimen, physical location on the specimen) indicate a grade designation.

## **1202.16(c) Procedures for Handling Marks with Model and Grade Designations**

### **1202.16(c)(i) Evidentiary Considerations when Issuing Model or Grade Designation Refusals**

#### **1202.16(c)(i)(A) Model Designations**

To support a refusal to register a model designation for failure to function as a mark, the examining attorney must use the applicant's specimen, along with any other relevant evidence in the application, such as the identification of goods and mark description. If available, the examining attorney should also provide additional evidence that shows that the proposed mark would be perceived merely as a model designation, such as consumers referring to the applicant's proposed mark as a model or part number when ordering the goods. Evidence that other manufacturers use similar numbering systems to identify model numbers for their goods may be submitted to show that consumers are familiar with the use of alphanumeric designations as model numbers and are consequently less likely to perceive the applicant's use of the mark as source indicating.

#### **1202.16(c)(i)(B) Grade Designations**

A refusal or requirement (such as a disclaimer requirement) on the basis that a mark comprises or includes a grade designation must be supported by relevant evidence. Where extrinsic evidence is available to show that a proposed grade designation is used by competitors within an industry and/or members of the public to convey the same meaning, the examining attorney must attach the evidence to the Office action and explain its relevance to the refusal. For example, evidence demonstrating that other manufacturers use the same or similar grading systems to identify quality levels of their own goods may be submitted with an explanation that such evidence shows that the proposed mark does not indicate origin from a single source. If no extrinsic evidence is available, the examining attorney must use the applicant's specimen, along with any other relevant evidence of record, to support a grade designation refusal for failure to function as a mark. In such situations, the examining attorney must also issue a request for relevant information (such as fact sheets, instruction manuals, and/or advertisements depicting the applicant's use of the proposed mark, and evidence of any industry use of this designation or similar designations) pursuant to 37 C.F.R. §2.61(b).

### **1202.16(c)(ii) Entire Mark Consists of Model or Grade Designation in §1(a) Applications**

If the evidence shows that a proposed mark consists entirely of a mere model or grade designation, the examining attorney must refuse registration on the Principal Register under §§1, 2, and 45 because the proposed mark does not function as a trademark to identify and distinguish the applicant's goods from those of others and indicate the source of the goods. 15 U.S.C. §§1051-1052, 1127.

For such refusals, where appropriate, the examining attorney should advise the applicant of the various response options: (1) submitting a substitute specimen that shows the proposed mark being used as a trademark for the identified goods; (2) claiming acquired distinctiveness under §2(f) with actual evidence of distinctiveness that establishes recognition of the proposed mark as a trademark for the goods; or (3) amending the application to seek registration on the Supplemental Register. *See* Trademark Act §23, 15 U.S.C. §1091; *In re Petersen Mfg. Co.*, 229 USPQ 466, 468 (TTAB 1986) (finding letter-number combinations registrable under §2(f) for locking hand tools and stating, "there is no question that such model designations can, through

use and promotion, be perceived as marks indicating origin in addition to functioning as model designations.”); 37 C.F.R. §2.59(a); [TMEP §904.05](#).

For marks comprising grade designations, the examining attorney must determine whether to make an additional refusal on the grounds that the mark is also merely descriptive of the goods. Trademark Act §2(e)(1), 15 U.S.C. §§1052(e)(1). Grade designations can often become synonymous with (and thus merely descriptive of) a classification, value, size, weight, type, degree, mode of manufacturing, or level of quality of the goods. Grade designations that are also the generic name of the goods are not eligible for registration on the Principal Register under §2(f) or on the Supplemental Register because they are not capable of indicating the source of the goods and must remain available to identify the relevant characteristic possessed by goods meeting such criteria. In such cases, if the applicant responds by amending the application to seek registration on the Supplemental Register, the examining attorney must issue a generic refusal under §23. In the rare situation where the applicant is the sole user of a grade designation and where the mark appears capable, the applicant should be provided with the same response options identified above for applicable model designations.

### **1202.16(c)(iii) Composite Mark with Model or Grade Designation in §1(a) Applications**

Composite marks may comprise matter that is used as a model or grade designation in addition to other wording and/or design features. Such marks must be evaluated as a whole to determine whether they are registrable.

#### **1202.16(c)(iii)(A) Model or Grade Designations with Arbitrary and/or Suggestive Matter**

Terms used as model or grade designations that are combined with arbitrary and/or suggestive matter are generally not refused registration under Trademark Act §§1, 2, and 45, if the additional matter imparts trademark significance to the mark as a whole. Generally, no disclaimer of a portion that is a model designation need be required (unless there is evidence of descriptive or generic usage) because the composite mark creates a single unitary commercial impression and there is no need to preserve the availability of the applicant’s model designation for others. However, the portion of a mark that is a grade designation must generally be disclaimed in cases where there is evidence of descriptive or generic use, to clarify the availability of the grade designation for use by others in the industry. Standard USPTO disclaimer practices would apply in such cases, including considerations of unitariness. See [TMEP §§1213-1213.08\(d\)](#).

#### **1202.16(c)(iii)(B) Model or Grade Designations with Descriptive, Generic, and/or Informational Matter**

Terms used merely as model or grade designations that are combined with descriptive, generic, and/or informational matter are generally refused registration under Trademark Act §§1, 2, and 45 because this type of additional matter does not diminish the mark’s model or grade designation significance. In most instances involving model designations, claims of acquired distinctiveness under §2(f) and amendments to the Supplemental Register may be permissible. Additionally, in rare cases where there is no evidence of generic usage for grade designations, claims of acquired distinctiveness under §2(f) and amendments to the Supplemental Register may be permissible. In such cases, the examiner must consider standard USPTO

disclaimer practice to determine whether a disclaimer of the generic and/or informational matter may be necessary. See [TMEP §§1213-1213.08\(d\)](#).

### **1202.16(c)(iv) Drawing and Specimen Agreement Issues in §1(a) Applications**

Occasionally, the specimen will show a possible model or grade designation that is not included on the drawing and thus, the mark on the drawing and specimen will appear to disagree. See [TMEP §807.12\(d\)](#). When it is unclear whether the additional matter is a model or grade designation, the examining attorney must require the applicant to clarify whether this matter is part of the mark. See 37 C.F.R. §2.61(b); [TMEP §814](#). If the matter is not part of the mark and is merely used as a model or grade designation, the applicant may avoid an agreement issue by submitting the following: (1) a statement that the matter is merely a model or grade designation and (2) evidence showing use of the proposed mark with other similar notations or evidence clearly showing that the matter is merely a model or grade designation. See 37 C.F.R. §2.61(b); *In re Raychem Corp.*, 12 USPQ2d 1399, 1400 (TTAB 1989) (holding the mark TINEL-LOCK on the drawing to agree with the wording TR06AI-TINEL-LOCK-RING appearing on the specimen where the notation TR06AI was merely a part or stock number, as supported by a submitted brochure that explained that each letter and number in the notation represented a specific type, size, and feature of the part, and the term RING was generic for the goods); *In re Sansui Elec. Co.*, 194 USPQ 202, 203 (TTAB 1977) (holding the marks “QSE” and “QSD” on the drawing to agree with the wording “QSE-4” and “QSD-4” appearing on the specimens, where the notation “4” was merely a model number and the additional specimens showed use of the mark with various changing model numbers used to designate successive generations of equipment). In the alternative, the applicant may provide a substitute specimen showing the proposed mark depicted on the drawing. See 37 C.F.R. §2.59(a); [TMEP §904.05](#). In cases where the record clearly indicates that the notation on the specimen is a model or grade designation, no inquiry is needed. See *In re Raychem Corp.*, 12 USPQ2d at 1400.

### **1202.16(c)(v) Model or Grade Designation in §1(b), §44, or §66(a) Applications**

#### **1202.16(c)(v)(A) Model Designations**

In §1(b), 44, or 66(a) applications, marks that appear to be merely model designations (either wholly comprising the mark or used with descriptive/generic/informational matter) may be refused registration for failure to function as a mark only where the drawing and mark description are dispositive of the mark’s failure to function, or the record clearly and unequivocally indicates that the entire mark identifies only a model designation. Cf. *In re Right-On Co.*, 87 USPQ2d 1152, 1156-57 (TTAB 2008) (affirming an ornamentation refusal in a §66(a) application despite the lack of a specimen since the mark was decorative or ornamental on its face as depicted on the drawing page and described in the application). For those rare cases where a refusal issues in a §66(a) application, the examining attorney must not offer an amendment to the Supplemental Register. Applications filed under §66(a) are not eligible for registration on the Supplemental Register. 37 C.F.R. §§2.47(c), 2.75(c); [TMEP §816.01](#); see also 15 U.S.C. §1141h(a)(4). Otherwise, because of the lack of specimen of use, a failure-to-function refusal is inappropriate.

If upon initial examination of a §1(b) application, an examining attorney must issue an Office action for other reasons, and the proposed mark appears to be used or intended to be used merely as a model designation, the examining attorney should include a model designation failure-to-function advisory as a courtesy to the applicant. See [TMEP §1102.01](#). Regardless of whether an examining attorney issues an initial advisory

before the applicant files an allegation of use, the examining attorney must issue a refusal based on failure to function as a mark after the allegation of use is filed, if supported by the evidence of record. *Id.*

### **1202.16(c)(v)(B) Grade Designations**

The examining attorney must refuse registration based on a failure to function as a mark for a mark merely comprising a grade designation (or a grade designation with descriptive/generic/informational matter) in a §1(b), 44, or 66(a) application where the evidence shows the mark is used in the industry or by the public in such a way as to clearly and unequivocally show use merely to identify a specific quality or feature of the goods. For more information about evidence, see [TMEP §1202.16\(c\)\(i\)\(B\)](#). If the examining attorney can find no extrinsic evidence of such use, the procedures outlined for model designations in [TMEP §1202.16\(c\)\(v\)\(A\)](#) must be followed.

### **1202.17 Universal Symbols in Marks**

The term “universal symbol” refers to a design, icon, or image that is commonly used in an informational manner and conveys a widely recognized or readily understood meaning when displayed in its relevant context. *See Webster’s New World College Dictionary* 1356 (3rd ed. 1997) (defining “symbol” as “something that stands for, represents, or suggests another thing; esp., an object used to represent something abstract); *id.* at 1460 (defining “universal” as “used, intended to be used, or understood by all”). Universal symbols are typically available for use by anyone to quickly provide notice of a particular condition or to indicate a characteristic of an object or area. Thus, they appear in a variety of places, such as on road signs, near dangerous machinery, on medical apparatus, in hazardous locations, on product warning labels, or on materials connected with recycling activities. Usually, the context in which a universal symbol appears is crucial in determining the symbol’s significance.

Matter that is specifically protected by statute or registered as a mark should not be considered to be a universal symbol. *See* [TMEP §1205](#). For example, certain symbols that have a widely recognized meaning, such as the Red Cross, are subject to specific statutory protections restricting their use and may be refused under various provisions of the Trademark Act. *See* [TMEP §1205.01](#).

The following are examples of common universal symbols:

The recycling symbol typically designates materials that are recyclable or recycled, but may also indicate that goods or services involve recycling or are otherwise environmentally friendly. *See, e.g.*, About.com, *Recycling Symbols Made Easy*, [http://greenliving.about.com/od/recyclingwaste/tp/recycling\\_symbols.htm](http://greenliving.about.com/od/recyclingwaste/tp/recycling_symbols.htm) (accessed Aug. 24, 2012).

The international radiation symbol indicates proximity to a source of radiation or radioactive materials. *See, e.g.*, U.S. Dept. of Health & Human Servs., *Examples of Radiation Signs and Symbols for Work Areas, Buildings, Transportation of Cargo*, <http://www.remm.nlm.gov/radsign.htm> (accessed Aug. 24, 2012).

The biohazard symbol indicates the presence of pathogens or other matter that is potentially harmful or poses a health risk. *See, e.g.*, Graphic Products, *Biohazard Signs*, <http://www.graphicproducts.com/sign-printers/biohazard-signs.html> (accessed Aug. 24, 2012).

The universal prohibition symbol, which usually appears superimposed over another image or wording, is a visual representation of “no,” “not,” or “prohibited.” *See, e.g.*, Free Signage.com, *Prohibition Signs*, [http://www.freesignage.com/prohibited\\_signs.php](http://www.freesignage.com/prohibited_signs.php) (accessed Aug. 24, 2012).

### **1202.17(a) Relevance of Universal Symbols to Examination**

Universal symbols may appear as one element of a mark, or they may form an entire mark. The informational aspect of these symbols is often at odds with the functions of trademarks and service marks: to identify and distinguish one’s goods or services and indicate their source. Specifically, a universal symbol may fail to function as a mark because it only imparts information, conveys an informational message, or provides ornamentation. *See* 15 U.S.C. §§1051, 1052, 1053, 1127; TMEP §§[1202](#), [1202.03](#), [1202.04](#). In addition, a universal symbol may merely describe a feature, quality, function, purpose, or characteristic of goods or services. *See* 15 U.S.C. §1052(e)(1); TMEP §§[1209](#), [1209.01\(b\)](#). If a universal symbol in a mark creates a false impression about a characteristic or quality of an applicant’s goods or services, the mark may be deceptive or deceptively misdescriptive. *See* 15 U.S.C. §§1052(a), 1052(e)(1); TMEP §§[1203.02–1203.02\(g\)](#),

**1209.04.** As explained in [TMEP §1202.17\(b\)](#), however, registration of a universal symbol may be permissible in some instances.

## **1202.17(b) Reviewing Marks Containing Symbols**

For each application, the examining attorney must determine whether the mark contains a universal symbol. Some universal symbols, such as the recycling symbol, are immediately identifiable. Others may not be, and applications for marks containing a symbol do not always identify the symbol, explain its significance, or indicate whether it is shown in a stylized or unusual form.

### **1202.17(b)(i) Identifying Universal Symbols in Marks**

If a mark includes or consists of a symbol (or an unfamiliar symbol-like element), the examining attorney should review the application for any information the applicant may have provided about the symbol and ensure that an accurate description is included in the record. *See* [TMEP §§808.03, 808.03\(b\), 808.03\(d\)](#). The examining attorney may also use the mark's assigned design codes to determine the name of the symbol and to search the USPTO database for applications and registrations that describe the symbol. *See* [TMEP §104](#). If the design codes assigned to the mark do not accurately reflect the significant elements of the mark, the examining attorney should ensure that the design codes are updated so that the correct codes are listed. *See* [TMEP §808.03\(f\)](#). After identifying the symbol, the examining attorney may find additional information about it by using Internet search engines or symbol reference websites.

Even without the name of the symbol, the examining attorney may be able to find information about it by entering a textual description of it in an Internet search engine. For instance, one could find information about the recycling symbol, even without knowing the name of the symbol, by using the following textual description in a search engine query: "green curved arrows triangle." Additionally, the examining attorney could consult a symbol reference website that provides a means of searching based on a symbol's graphical characteristics. *See* Symbols.com, *Graphic Index*, <http://www.symbols.com/graphic-index/> (accessed Aug. 24, 2012).

In addition, the Trademark Law Library holds a number of reference books about symbols and their meaning, and its librarians are available to assist USPTO personnel in researching questions regarding the identity, significance, and use of symbols. Furthermore, under Trademark Rule 2.61(b), the examining attorney may require the applicant to provide additional information about an unfamiliar symbol in a mark. 37 C.F.R. §2.61(b).

The examining attorney's research may show that a symbol (or symbol-like element) in a mark is not a universal symbol. However, other symbols, symbol-like elements, and designs that are not universal symbols may nonetheless be perceived only as informational matter and thus fail to function as marks. In these instances, the examining attorney need not take any further action with respect to the universal symbol analysis, but should ensure that the application record contains a mark description that accurately describes the significant elements of the mark. [TMEP §§808.01, 808.02, 808.03\(b\)](#). The examining attorney should otherwise review the application according to standard USPTO practice and determine whether it complies with all applicable trademark statutes and rules.

### **1202.17(b)(ii) Marks Displaying an Unusual Depiction of a Universal Symbol**

If the mark contains a universal symbol, the examining attorney must determine whether the mark displays the symbol in the usual manner or otherwise features an accurate depiction of the symbol. This may be done

by comparing the symbol in the mark with any accurate depictions of the symbol the examining attorney finds while researching the symbol.

Generally, a universal symbol in a mark should be considered registrable matter if it is highly stylized, if it incorporates elements that are not usually in the symbol, or if it is integrated with other matter in the mark, and, as a result, a distinctive commercial impression separate and apart from the symbol's usual significance is created or a source-indicating unitary whole is formed. *Cf. In re LRC Prods. Ltd.*, 223 USPQ 1250, 1252 (TTAB 1984) (noting that “where designs or representations were more realistic and where the design left no doubt about the depiction of a central feature or characteristic of the goods or services,” the Board has found that such designs and representations are merely descriptive); [TMEP §1213.03\(c\)](#) (“No disclaimer of highly stylized pictorial representations of descriptive matter should be required[,] because the design element creates a distinct commercial impression.”); [TMEP §1213.05\(f\)](#) (“The visual presentation of a mark may be such that the words and/or designs form a unitary whole. In such a case, disclaimer of individual nondistinctive elements is unnecessary.”); [TMEP §1213.05\(g\)\(iv\)](#) (“If literal and design elements in a mark are so merged together that they cannot be divided or regarded as separable elements, these elements may be considered unitary.”). However, displaying an accurately depicted universal symbol as a replacement for a letter in a mark's literal element normally will not change the symbol's usual impression (or create a unitary whole), nor will minor alterations to the symbol, such as slight stylizations or nondistinctive changes to color scheme or proportions. *Cf. TMEP §§1213.03(c), 1213.05(g).*

### **1202.17(b)(iii) Marks Displaying an Accurate Depiction of a Universal Symbol**

If the mark displays the universal symbol in the usual manner, or otherwise features an accurate depiction of the symbol, the examining attorney must determine whether, in view of the identified goods or services, it is necessary to issue a refusal or disclaimer requirement based on failure to function, mere descriptiveness, deceptive misdescriptiveness, or deceptiveness grounds. See [TMEP §§1202.17\(c\)\(i\), 1202.17\(d\)\(i\)-\(d\)\(ii\)](#).

### **1202.17(c) Failure to Function**

The USPTO will not register a mark unless it functions as a mark. See 15 U.S.C. §§1051, 1052, 1053, 1127; *In re Bose Corp.*, 192 USPQ 213, 215 (C.C.P.A. 1976) (“Before there can be registration, there must be a trademark . . . .”); *In re Int'l Spike, Inc.*, 196 USPQ 447, 449 (TTAB 1977) (“Registration presupposes the existence of a trademark to be registered.”); [TMEP §1202](#). That is, the mark must serve as an indicator of the source of the goods or services, identifying and distinguishing them from those of others. See 15 U.S.C. §1127; [TMEP §1202](#). Not every designation that a party places on goods or packaging, or uses in connection with services, necessarily performs these source-indicating functions, regardless of the party's intentions when adopting the designation. *In re Eagle Crest, Inc.*, 96 USPQ2d 1227, 1229 (TTAB 2010); *In re Vertex Grp., LLC*, 89 USPQ2d 1694, 1701 (TTAB 2009) (“As is the case with any trademark, mere intent that a word, name, symbol or device function as a trademark or service mark is not enough in and of itself.”). Some designations can never serve as a source indicator. See *In re Eagle Crest, Inc.*, 96 USPQ2d at 1229; *Am. Velcro, Inc. v. Charles Mayer Studios, Inc.*, 177 USPQ 149, 154 (TTAB 1973).

### **1202.17(c)(i) Determining Whether a Universal Symbol Functions as a Source Indicator**

The determination as to whether a universal symbol in a mark functions as a source indicator involves considering the significance of the symbol, the nature of the symbol's use in the relevant marketplace, and the impression created when the mark is used in connection with the identified goods or services. See *In re Eagle Crest, Inc.*, 96 USPQ 1227, 1229 (TTAB 2010) (noting that, to determine how a designation would be perceived by the relevant public, the Board “look[s] to the specimens and other evidence of record showing

how the designation is actually used in the marketplace”); *In re Aerospace Optics, Inc.*, 78 USPQ2d 1861, 1862 (TTAB 2006) (“A critical element in determining whether matter sought to be registered is a trademark is the impression the matter makes on the relevant public. Thus . . . the critical inquiry is whether the asserted mark would be perceived as a source indicator. . . .”); *In re Volvo Cars of N. Am. Inc.*, 46 USPQ2d 1455, 1459 (TTAB 1998) (“In order to assess the commercial impact created by the designation . . . we look to the specimens and other materials which show how the mark is actually used in the marketplace.”).

Relevant evidence of a symbol’s significance and usual manner of use includes the resources referenced in [TMPEP §1202.17\(b\)\(i\)](#), any other competent materials indicating the meaning of the symbol, and Internet excerpts or trade matter showing the symbol being used in a particular field or context, or in connection with the relevant goods or services.

Weighing these considerations in view of the available facts and evidence may lead the examining attorney to the conclusion that the mark does not serve as a source indicator, but instead fails to function because it (1) imparts information about the goods or services, (2) conveys an informational message (though not necessarily about the goods or services themselves), or (3) serves only as ornamentation on the goods or services. See [TMPEP §§1202.17\(c\)\(i\)\(A\)-\(c\)\(i\)\(B\)](#).

### **1202.17(c)(i)(A) Informational Universal Symbols**

#### *Universal Symbols that Impart Information About the Goods or Services*

Merely informational matter is not registrable as a trademark or service mark. See [TMPEP §1202.04](#). When a universal symbol in a mark is used in its usual context or field, or with relevant goods or services, it will likely impart its generally recognized meaning and thus perform only an informational function, rather than serve to identify any single source of the goods or services. Cf. *In re Schwauss*, 217 USPQ 361 (TTAB 1983) (holding mark consisting of FRAGILE in a “jarred or broken” stylization failed to function as a trademark for labels and bumper stickers). For instance, because the biohazard symbol commonly appears on items to indicate the presence of hazardous materials, the symbol is unlikely to function as a trademark on goods such as containers for disposing of medical waste. See, e.g., *Graphic Products, Biohazard Signs*, <http://www.graphicproducts.com/sign-printers/biohazard-signs.html> (accessed Aug. 24, 2012).

In these circumstances, the symbol’s position, prominence, and surrounding context on the specimen of use will not be as significant in the analysis, because the symbol will function only as informational matter regardless of its manner of use on the specimen. Cf. *In re Volvo Cars of N. Am. Inc.*, 46 USPQ2d at 1460-61 (affirming refusal to register DRIVE SAFELY because “to grant exclusive rights to applicant in this ordinary and commonly used safety admonition would interfere with the rights of others in the automobile industry to freely use the familiar phrase . . . to promote safe driving and/or that purchasers can drive safely in their make of automobiles. . . .”); *In re Schwauss*, 217 USPQ at 362 (“[T]o allow registration [of stylized word FRAGILE for labels and bumper stickers] would achieve the absurd result of hampering others in their use of the common word ‘fragile’ on any label designed to be placed on any other object to indicate the fragility of said object.”). Nonetheless, the examining attorney should analyze how the mark (and the symbol in it) is used on the specimen because it may lend further support to the failure-to-function refusal.

Sometimes a symbol is applied to goods or services outside the symbol’s normal context and the symbol could therefore serve a source-indicating function. Thus, the biohazard symbol could function as a service mark for live musical-performance services, for example, because the symbol would not provide any relevant information about the services, even when encountered by someone who knows what the symbol usually means.

### *Universal Symbols that Convey an Informational Message*

Even if a mark does not directly impart information about goods or services, it may nonetheless fail to function if it conveys an informational message to others. *See In re Eagle Crest, Inc.*, 96 USPQ2d 1227, 1230-31 (TTAB 2010). For example, common phrases and slogans that are frequently displayed by many different parties on various goods are not likely to be viewed as source indicators, even if the matter is being used in a non-ornamental manner. *See id.* Instead, such goods would likely be purchased for the message the phrase or slogan conveys. *See id.* at 1230. See [TMEP §1202.04](#) regarding informational matter.

Likewise, when certain commonly used universal symbols appear on goods such as clothing, fashion accessories, and household items, they would likely be perceived as conveying an informational message and the goods featuring these symbols would likely be purchased for that reason. For example, evidence may show that when the recycling symbol appears on the upper-left chest area of a t-shirt, those encountering the shirt are likely to assume that it indicates support for recycling or environmental causes in general. Or evidence may support the conclusion that a peace symbol used on t-shirts or stickers likely will not function as mark, because even if it is not ornamental and does not necessarily provide any particular information about the goods themselves, it is informational in the sense that it conveys a message of supporting peace.

The examining attorney may support a failure-to-function refusal in these cases by providing evidence that indicates the widely recognized meaning of the symbol, establishes that the symbol is commonly used to convey particular information, and shows that the symbol commonly appears on the goods at issue or analogous goods. *See id.* Factors such as the symbol's position and prominence on the goods, as shown by the specimen of use, may also support the determination that the matter will be perceived only as conveying a message. *See id.* at 1230-31. As with any other substantive refusal, the amount, type, and nature of the evidence required to support a failure-to-function refusal will vary depending on the facts of the particular application.

Although this issue is more likely to arise when universal symbols are displayed on goods, it is also possible for a universal symbol to convey an informational message when used in connection with services.

### **1202.17(c)(i)(B) Ornamental Universal Symbols**

Matter that serves only as an ornamental feature of goods does not identify and distinguish the goods and, thus, does not function as a trademark. [TMEP §1202.03](#). Like any other design element, universal symbols may be used ornamentally on goods such as clothing, jewelry, fashion accessories, and household items. In these instances, the symbol's position, prominence, and surrounding context on the specimen are particularly significant in determining whether the matter serves as ornamentation. For more information on the relevant considerations, see [TMEP §§1202.03–1202.03\(d\)](#).

The examining attorney should not suggest the usual response options for an ornamental refusal (i.e., showing secondary source, claiming acquired distinctiveness, or amending to the Supplemental Register) unless the mark is capable of serving as a trademark and does not also fail to function because it imparts information or conveys an informational message. *See* [TMEP §1202.03](#).

### **1202.17(c)(ii) Mark Consists Entirely of a Universal Symbol that Fails to Function**

If a mark consists entirely of a universal symbol and the examining attorney determines that the universal symbol fails to function as a source indicator for the identified goods, the examining attorney must issue a refusal under Trademark Act Sections 1, 2, and 45. 15 U.S.C. §§1051, 1052, 1127; *see In re Aerospace*

*Optics, Inc.*, 78 USPQ2d 1861, 1863 (TTAB 2006) (“It is well established that the refusal of failure to function is properly based on Sections 1, 2 and 45 of the Act.”). For service marks, the refusal is based on Trademark Act Sections 1, 2, 3, and 45. 15 U.S.C. §§1051, 1052, 1053, 1127. For applications seeking registration on the Supplemental Register, the statutory basis for the failure-to-function refusal is Trademark Act Sections 23 and 45. 15 U.S.C. §§1091, 1127; see [TMEP §1202](#).

When issuing a failure-to-function refusal, the examining attorney must explain the particular reasons the mark does not function as a trademark or service mark and provide sufficient evidence in support of the explanation. See *In re Eagle Crest, Inc.*, 96 USPQ2d 1227, 1232 (TTAB 2010) (finding that the examining attorney had “shown prima facie that the slogan [ONCE A MARINE, ALWAYS A MARINE] would be perceived solely as informational matter rather than as a trademark and applicant [had] submitted no evidence to rebut that showing”); TMEP §§[1202](#), [1301.02\(a\)](#). See TMEP §§[1202.17\(b\)\(i\)](#) and [1202.17\(c\)\(i\)](#) for further discussion of evidence.

### **1202.17(c)(ii)(A) Applications Based on Sections 1(b), 44, or 66(a)**

Generally, the failure-to-function refusal is a specimen-based refusal. [TMEP §1202](#). However, the examining attorney may issue a failure-to-function refusal for applications based on §1(b), §44, or §66(a) if information in the application record or other available evidence is dispositive of the failure of the relevant matter to function as a mark. See [TMEP §1202](#); cf. *In re Right-On Co.*, 87 USPQ2d 1152, 1157 (TTAB 2008) (noting that, with respect to §66(a) applications, “it is appropriate for examining attorneys to issue an ornamentation refusal if the mark is decorative or ornamental on its face as depicted on the drawing page and described in the description of the mark”).

If the examining attorney is otherwise issuing an Office action and anticipates refusing a mark in a §1(b) application on failure-to-function grounds once the applicant submits a specimen with an allegation of use, the examining attorney should advise the applicant of the potential refusal. If possible, this should be done in the initial Office action. However, failure to provide an advisory does not preclude an examining attorney from later refusing registration. See [TMEP §1202](#).

### **1202.17(c)(ii)(B) Applicant’s Response to Refusal**

If a mark fails to function because it consists of a universal symbol that is informational or that conveys an informational message, the examining attorney should not suggest that the applicant respond by claiming acquired distinctiveness or amending the application to seek registration on the Supplemental Register. The relevant issue is not whether the mark is distinctive, but, instead, whether the matter in question even functions as a mark. See *In re Wakefern Food Corp.*, 222 USPQ 76, 79 (TTAB 1984) (agreeing with the examining attorney that “evidence of distinctiveness under Section 2(f) of the Act is irrelevant to the issue of whether the subject phrase [at issue] functions as a technical service mark”). Therefore, neither a claim of acquired distinctiveness under Trademark Act Section 2(f) nor an amendment to the Supplemental Register is a proper response to the refusal. See *In re Wakefern Food Corp.*, 222 USPQ at 79. Furthermore, allowing registration in these instances, either on the Principal Register under Section 2(f) or on the Supplemental Register, would inhibit others from using merely informational matter that should be freely available to use. See TMEP §1202.04; cf. *In re Volvo Cars of N. Am. Inc.*, 46 USPQ2d at 1460-61 (Affirming refusal to register DRIVE SAFELY because “to grant exclusive rights to applicant in this ordinary and commonly used safety admonition would interfere with the rights of others in the automobile industry to freely use the familiar phrase . . . to promote safe driving and/or that purchasers can drive safely in their make of automobiles. . . .”); *In re Schwauss*, 217 USPQ at 362 (“[T]o allow registration [of stylized word FRAGILE for labels and bumper stickers] would achieve the absurd result of hampering others in their use of the common word ‘fragile’ on any label designed to be placed on any other object to indicate the fragility of said object.”).

In addition, the examining attorney should not suggest that the applicant submit a substitute specimen or amend to an intent-to-use filing basis in these cases. If the mark is informational or conveys an informational message, the applicant likely will be unable to provide a specimen showing proper trademark or service mark use. The applicant may amend the application to an intent-to-use basis, but it likely will only temporarily overcome the refusal, given that a specimen showing proper trademark or service mark use is required before a registration may issue. See [TMEP §1103](#). The examining attorney must review any substitute specimen submitted to confirm that refusal remains warranted.

Finally, if a mark consisting of a universal symbol fails to function only because it is used in an ornamental manner on the specimen, and it is possible that the mark could function if used in a trademark manner, then all of the response options discussed immediately above should be suggested by the examining attorney, if otherwise appropriate.

### **1202.17(c)(iii) Mark Includes a Universal Symbol that Fails to Function**

If a universal symbol fails to function as a source indicator because it is informational or conveys an informational message, and it appears along with other non-source-indicating matter, the examining attorney must issue a failure-to-function refusal. See [TMEP §1202.17\(c\)\(ii\)](#).

If a universal symbol fails to function as a source indicator because it is informational or conveys an informational message, and it appears in a non-unitary manner with other registrable matter that is arbitrary, fanciful, suggestive, or otherwise source-indicating, the examining attorney must require a disclaimer of the universal symbol. See Trademark Act Section 6(a), 15 U.S.C. §1056(a); TMEP §§[1213](#), [1213.01\(b\)](#), [1213.02](#), [1213.03\(a\)](#). The examining attorney should not suggest that the applicant claim acquired distinctiveness in part as to the symbol. See [TMEP §1202.17\(c\)\(ii\)\(B\)](#).

An applicant may also delete a purely informational universal symbol that appears along with other registrable matter, provided the symbol is separable from the other matter and the deletion does not materially alter the commercial impression of the mark. See [TMEP §807.14\(a\)](#).

### **1202.17(d) Other Relevant Refusals**

The examining attorney should also consider the following potential grounds for refusal when reviewing a mark featuring a universal symbol. In addition to those discussed below, the examining attorney should determine whether there is a sufficient basis for any other relevant refusals (e.g., a §2(d) refusal).

#### **1202.17(d)(i) Merely Descriptive**

Often, when the examining attorney has determined that a universal symbol fails to function because it only provides information about the goods or services, the available evidence will also support a refusal (or a disclaimer requirement) under Trademark Act §2(e)(1), 15 U.S.C. §1052(e)(1), based on mere descriptiveness.

If a mark consists of a merely descriptive universal symbol and other descriptive, generic, or otherwise non-source-indicating matter, then the mark is merely descriptive in its entirety and the examining attorney must issue a refusal under §2(e)(1). If a mark consists of a merely descriptive universal symbol, along with other arbitrary, fanciful, or suggestive matter, the examining attorney must require a disclaimer of the universal symbol unless the composite mark creates a unitary commercial impression. See Trademark Act §6(a), 15 U.S.C. §1056(a); TMEP §§[1213](#), [1213.01\(b\)](#), [1213.02](#), [1213.03\(a\)](#).

When both a §2(e)(1) and a failure-to-function refusal are issued, the examining attorney should not suggest that the applicant claim acquired distinctiveness or amend to the Supplemental Register. For more information, see [TMEP §1202.17\(c\)\(ii\)\(B\)](#).

### **1202.17(d)(ii) Deceptive or Deceptively Misdescriptive**

The inclusion of a universal symbol in a mark may lead consumers to believe the goods or services have a particular characteristic or quality. For instance, evidence may show that a mark featuring the recycling symbol would lead to a perception that the goods to which the mark is applied are recyclable or are made of recycled materials.

If the relevant goods or services do not have the relevant characteristic or quality, then the mark may be deceptive under Trademark Act Section 2(a) or deceptively misdescriptive under Section 2(e)(1). In those instances, the examining attorney should follow the same procedures as would apply to any deceptive or deceptively misdescriptive mark. For more information, see TMEP §§[1203.02–1203.02\(g\)](#) and [1209.04](#).

### **1202.17(e) Universal Symbols Commonly Appearing in Marks**

The universal symbols discussed below frequently appear in applied-for marks. Some of these symbols are so widely used and well known that they will have only non-trademark significance when used with almost any good or service in any context or field. Others will fail to function as source indicators only when used with particular goods or services. Nonetheless, all of these symbols could function as source indicators if they are displayed in the mark in a way that creates a distinct commercial impression or forms a source-indicating unitary whole. See [TMEP §1202.17\(b\)\(ii\)](#). Like any design element, all of these symbols may be used in an ornamental manner on goods and, if so, should be refused accordingly. Finally, depending on the particular facts and available evidence, other grounds for refusal may apply to marks containing these symbols (e.g., Section 2(e)(1), Section 2(d), Section 2(a)).

#### **1202.17(e)(i) Awareness Ribbon Symbols**

The awareness ribbon symbol is a representation of a ribbon intended to signify and promote awareness of a particular cause. The specific cause represented depends on the color or color scheme displayed. See, e.g., *Support Store, Cause Awareness By Color*, <http://www.bumperstickermagnet.com/cause-awareness-by-color.html> (accessed Aug. 24, 2012). For example, the pink awareness ribbon is commonly associated with awareness of breast cancer and related causes. See *id.* Yellow ribbons are frequently used to indicate support of the armed forces. See *id.* And red ribbons are typically associated with awareness of HIV/AIDS or heart disease. See *id.*

Due to the widespread use of the awareness ribbon in various colors to indicate support for, or raise awareness of, a cause, the awareness ribbon shape by itself will not function as a source indicator. However, the examining attorney must evaluate an awareness ribbon symbol in a mark as a whole, including the color,

color scheme, pattern, or other matter inside of the ribbon, to determine whether it functions as a source indicator.

Some awareness ribbons have become so widely used and well known that they are unlikely to function as a mark when used in connection with almost any goods or services. These include ribbons in pink, yellow, red, and possibly others. The pink awareness ribbon, for example, has become the universal symbol of breast cancer awareness. This symbol appears in connection with the charity activities of numerous organizations and is used on a wide variety of products, including clothing, jewelry, sports equipment, and household items. Often, when it is used, it has informational or ornamental characteristics, or both. Thus, it is more likely that consumers, upon encountering the pink ribbon symbol on a product, would view it as informational or decorative regardless of the particular context or use. For instance, evidence may support the conclusion that, when a pink ribbon is displayed on the packaging for a household appliance, the ribbon would likely be viewed as indicating that the product has some connection to a breast cancer-related cause (e.g., some portion of the proceeds from the sale of the appliance would go towards breast cancer research). Or evidence may establish that the pink ribbon symbol displayed on a shirt would be viewed as conveying the message that the wearer is a supporter of breast cancer survivors or breast cancer causes in general. Even when an awareness ribbon symbol features a particular color, color scheme, or pattern that is not commonly used or widely recognized, the examining attorney should evaluate whether the symbol is inherently distinctive.

The actions an examining attorney will take when examining a mark featuring an awareness ribbon symbol depend on which of the following categories the awareness ribbon symbol falls under:

**Category 1:** The awareness ribbon symbol is not displayed in the mark in a way that creates a distinct commercial impression or forms a source-indicating unitary whole. The color, color scheme, pattern, or other matter inside the awareness ribbon shape is not inherently distinctive and the evidence shows that the symbol's use by various parties in that color, color scheme, or pattern is so widespread, and its meaning so widely understood, that it will likely be perceived as only providing information or conveying an informational message when used in connection with the goods or services.

This type of awareness ribbon symbol fails to function as a mark and the examining attorney must refuse registration if the symbol forms the entire mark or appears with only other non-source-indicating matter, or disclaim the symbol if it appears with registrable matter.

Awareness ribbon symbols in this category are incapable of functioning as a mark. Thus, if the mark consists entirely of this type of symbol, claiming acquired distinctiveness under §2(f) or amending the application to seek registration on the Supplemental Register will not overcome the refusal. Likewise, a claim of acquired distinctiveness in part will not obviate a disclaimer requirement.

Awareness ribbon symbols that do not contain inherently distinctive matter inside the ribbon, and are displayed in black and white, or gray scale, because they appear in non-color mark drawings, are incapable of functioning as a mark and would be subject to the same procedures set forth above.

Examples:

Pink ribbon

Yellow Ribbon

Black-and-White or Gray Scale Ribbon

**Category 2:** The awareness ribbon symbol is not displayed in the mark in a way that creates a distinct commercial impression or forms a source-indicating unitary whole. The color, color scheme, pattern, or other matter inside the awareness ribbon shape is not inherently distinctive, but there is no evidence that the awareness ribbon symbol shown in the mark is widely used by various parties or that its meaning is widely understood.

In these cases, the symbol is not inherently distinctive and fails to function as a mark because, given the widespread use of awareness ribbons in various colors and patterns generally, the symbol will not be perceived as a source indicator. Thus, the examining attorney must refuse registration if the symbol forms the entire mark (or appears with other non-source-indicating matter), or require a disclaimer of the symbol if the symbol appears with registrable matter. However, the applicant may overcome the refusal by showing acquired distinctiveness based on *actual evidence* establishing recognition of the proposed mark as a source indicator, or by amending the application to seek registration on the Supplemental Register. For awareness

ribbon symbols in this category, evidence of five years' use usually will not be sufficient to show that the mark has acquired distinctiveness. See [TMEP §§1212.06–1212.06\(e\)\(iv\)](#) for information on establishing acquired distinctiveness by actual evidence. A disclaimer requirement may be obviated by claiming acquired distinctiveness in part as to the symbol based on actual evidence.

Examples:

for "promoting public awareness of domestic violence, sexual assault and child abuse"

for "surgery; and medical services, namely, treatment of breast disease"

**Category 3:** The matter inside the awareness ribbon shape in the mark is inherently distinctive or otherwise registrable (e.g., non-descriptive/non-informational wording, registrable design elements) and there is no evidence that the awareness ribbon shown in the mark is widely used by various parties or that its meaning is widely understood.

No refusal (or disclaimer) is necessary, as long as the awareness ribbon is not used ornamentally on the specimen, because the ribbon shape and the matter within it create a registrable unitary whole.

Examples:

for “charitable fund raising, namely, raising funds for breast cancer research and treatment”

for “educational services, namely, conducting conferences, workshops, seminars, classes, and meetings in the field of autism and advocacy on behalf of autistic children and adults”

### **1202.17(e)(ii) Recycling Symbol**

The recycling symbol typically appears on materials to indicate that they are recyclable or made from recycled matter. *See, e.g.*, About.com, *Recycling Symbols Made Easy*, [http://greenliving.about.com/od/recyclingwaste/tp/recycling\\_symbols.htm](http://greenliving.about.com/od/recyclingwaste/tp/recycling_symbols.htm) (accessed Aug. 24, 2012). However, the symbol is also used in connection with a wide assortment of goods and services in a variety of fields to indicate that the goods or services involve recycling or are otherwise environmentally friendly. *See id.*

Because of the widespread use of the symbol and the resulting general recognition of the symbol’s significance, the symbol is not likely to function as a source indicator. Instead, the evidence will show consumers are likely to view it as merely providing information about the goods or services, in which case

a failure-to-function refusal is appropriate. Even when the symbol is displayed on clothing and fashion accessories in a manner that would normally be considered trademark use, evidence will likely show the mark will be perceived as conveying an informational message (e.g., that the wearer supports recycling or environmental awareness). See *In re Eagle Crest, Inc.*, 96 USPQ2d 1227, 1230 (TTAB 2010) (holding that consumers would not view the “old and familiar” slogan ONCE A MARINE, ALWAYS A MARINE as a trademark indicating the source of the applicant’s clothing because they would be accustomed to seeing it displayed on clothing from many different sources, and noting that “[i]t is clear that clothing imprinted with this slogan would be purchased by consumers for the message it conveys”). The symbol will usually also have descriptive significance as applied to the relevant goods or services.

### 1202.17(e)(iii) Caduceus, Rod of Asclepius, and Prescription Symbol

R<sub>x</sub>

The caduceus and the Rod of Asclepius are commonly used to indicate that goods or services are medical in nature or otherwise relate to the medical profession. See *Webster’s New World College Dictionary* 195 (3rd ed. 1997) (defining “caduceus” as “the staff of an ancient herald; esp., the winged staff with two serpents coiled about it . . . an emblematic staff like this with either one or two serpents, used as a symbol of the medical profession”); THEFREEDICTIONARY.COM, search of “Rod of Asclepius,” <http://medical-dictionary.thefreedictionary.com/Rod+of+Asclepius> (Aug. 24, 2012) (citing *Segen’s Medical Dictionary*) (defining “Rod of Asclepius” as “[t]he ‘correct’ symbol of medicine, which is a knarled [sic] wooden staff with a single encircling snake”). The prescription symbol is frequently used in connection

with prescription drugs or medicated goods, or with services relating to these items. *See Webster's New World College Dictionary* 1178 (3rd ed. 1997) (defining “Rx” as “symbol for PRESCRIPTION”). For any marks containing these symbols, the examining attorney should review the specimen, the relevant evidence, and the goods/services to determine if the mark functions as a source indicator or instead is merely informational. In those instances that the mark fails to function, there is likely also a valid basis for finding the symbol descriptive.

#### 1202.17(e)(iv) Religious Symbols

Religious symbols, such as the Latin cross and the Star of David, may be informational or have descriptive significance when used on a variety of goods and services. For example, evidence may support the conclusion that, as used in connection with media such as books or videos, the Star of David is likely to be perceived as providing information about or describing the media's content. Or evidence may show that a Latin cross used in an advertisement for services is likely to be viewed as conveying an informational message (i.e., indicating an affiliation with Christianity). Note that a mark containing a Greek cross (i.e., an upright equilateral cross) may be subject to other refusals. *See* [TMEP §1205.01](#).

#### 1202.17(e)(v) Currency Symbols

When used with financial services, such as currency exchange or banking, evidence will show currency symbols, such as the dollar sign or the euro symbol, will likely be informational and merely descriptive.

However, when used in connection with other types of goods or services, the evidence may show these symbols to be arbitrary or suggestive and otherwise function as a mark.

### 1202.17(e)(vi) Universal Prohibition Symbol

The universal prohibition symbol, which usually appears superimposed over another image or wording, is a visual representation of “no,” “not,” or “prohibited.” *See, e.g.*, Free Signage.com, *Prohibition Signs*, [http://www.freesignage.com/prohibited\\_signs.php](http://www.freesignage.com/prohibited_signs.php) (accessed Aug. 24, 2012). When the prohibition symbol is superimposed over other matter, the design as a whole is unitary; thus, no disclaimer of the prohibition symbol apart from the other matter is necessary. However, the examining attorney must consider whether evidence supports the conclusion that the design as a whole (i.e., the symbol and the image it is superimposed over) fails to function as a mark or is merely descriptive (or both) and thus must be refused or disclaimed.

### 1202.18 Hashtag Marks

The addition of the term HASHTAG or the hash symbol (#) to an otherwise unregistrable mark typically cannot render it registrable. *Cf.* [TMEP §1209.03\(m\)](#) and [§§1215-1215.10](#) regarding generic top-level domain names. A “hashtag” is a form of metadata comprised of a word or phrase prefixed with the symbol “#” (e.g., #chicago, #sewing, and #supremecourtdecisions). Hashtags are often used in social-networking sites to identify or facilitate a search for a keyword or topic of interest. *See* Dictionary.com, search of “hashtag,” <http://dictionary.reference.com/browse/hashtag> (June 19, 2013) (citing *Random House Dictionary*). When considering a proposed mark containing the hash symbol, careful consideration should be given to the overall context of the mark, the placement of the hash symbol in the mark, the identified goods and services, and the specimen of use, if available. If the hash symbol immediately precedes numbers in a mark (#29 JONES, THE #1 APP, # TWELVE, etc.), or is used merely as the pound or number symbol in a mark (e.g., ICHIBAN#), such marks should not necessarily be construed as hashtag marks. This determination should be made on a case-by-case basis.

A mark comprising or including the hash symbol (#) or the term HASHTAG is registrable as a trademark or service mark only if it functions as an identifier of the source of the applicant’s goods or services. Generally, the hash symbol and the wording HASHTAG do not provide any source-indicating function because they merely facilitate categorization and searching within online social media (i.e., social-media participants are directed to search a particular subject by typing, e.g., “hashtag ABC,” where ABC is the subject). *Cf. In re Hotels.com, L.P.*, 573 F.3d 1300, 1301, 1304, 91 USPQ2d 1532, 1533, 1535 (Fed. Cir. 2009) (finding that the addition of a generic top-level-domain to an otherwise unregistrable mark does not typically add any source-identifying significance); *Interactive Prods. Corp. v. a2z Mobile Office Solutions, Inc.*, 326 F.3d 687, 691, 66 USPQ2d 1321, 1327-28 (6th Cir. 2003) (finding that the post-domain path of a URL does not typically signify source); [TMEP §§1209.03\(m\)](#), [1215.01](#). Thus, if a mark consists of the hash symbol or the term HASHTAG combined with wording that is merely descriptive or generic for the goods or services, the entire mark must be refused as merely descriptive or generic.

Example:

#SKATER for skateboarding equipment is merely descriptive

A mark may be registrable with a disclaimer of the wording HASHTAG or the hash symbol in cases where they are separable from other registrable matter. Therefore, if a mark consists of the hash symbol or the term HASHTAG combined with wording that is distinctive for the goods or services, the hash symbol or the term HASHTAG should be disclaimed.

Example:

#INGENUITY for business consultation services is registrable with a disclaimer of the hash symbol

Cf. [TMEP §1215.07](#) for further information and analogous examples.

Note that when a mark containing the hash symbol or the term HASHTAG is unitary with other arbitrary or suggestive wording in the mark, (e.g., #SLUGGERTIME for clothing, #DADCHAT for counseling services, and HASHTAGWALKING for entertainment services), no descriptive or generic refusal or disclaimer is required. However, such marks must still be evaluated to ensure that they function as source indicators for the goods or services. If the specimen shows the hash symbol or the term HASHTAG in a proposed mark as merely a tag used to reference or organize keywords or topics of information to facilitate searching a topic, the relevant public will not view the hash symbol or the term HASHTAG in the mark as identifying the source of the goods or services. In such cases, registration must be refused under Trademark Act Sections 1, 2, and 45, 15 U.S.C. §§1051, 1052, 1127, for goods, and Trademark Act Sections 1, 2, 3, and 45, 15 U.S.C. §§1051-1053, 1127, for services. Cf. *In re Roberts*, 87 USPQ2d 1474 (TTAB 2008); *In re Eilberg*, 49 USPQ2d 1955 (TTAB 1998); [TMEP §1215.02\(a\)](#).

For example, if the proposed mark #SEWFUN for instruction in the field of sewing appears on a specimen comprising a screenshot of a social networking site used merely to organize users' comments about sewing classes applicant offers, the mark must be refused registration for failure to function as a service mark.

In unique cases, marks that consist solely of variants of the term HASHTAG or the hash symbol may function as a mark and should not be refused as descriptive or generic, nor should a disclaimer be required, especially if the mark will be used in connection with goods or services that do not relate to social networking. In such cases, the symbol and term HASHTAG do not create the commercial impression of being a metadata tag since they do not immediately precede other wording, and may be considered suggestive or arbitrary, depending on the associated goods and services (e.g., HASHTAG for use in connection with liquor or THE HASHTAG for providing office facilities). However, depending on the underlying goods or services, such marks may still be descriptive or generic (e.g., the mark HASHTAGS used in connection with "providing application service provider services in the field of social media information management").

## **1203 Refusal on Basis of Immoral or Scandalous Matter; Deceptive Matter; Matter which May Disparage, Falsely Suggest a Connection, or Bring into Contempt or Disrepute**

*15 U.S.C. §1052 (Extract)*

No trademark by which the goods of the applicant may be distinguished from the goods of others shall be refused registration on the principal register on account of its nature unless it—

(a) Consists of or comprises immoral, deceptive, or scandalous matter; or matter which may disparage or falsely suggest a connection with persons, living or dead, institutions, beliefs, or national symbols, or bring them into contempt, or disrepute; or a geographical indication which, when used on or in connection with wines or spirits, identifies a place other than the origin of the goods and is first used on or in connection with wines or spirits by the applicant on or after one year after the date on which the WTO Agreement (as defined in section 2(9) of the Uruguay Round Agreements Act) enters into force with respect to the United States.

\*\*\*\*\*

The provisions of 15 U.S.C. §1052(a) apply to both the Principal Register and the Supplemental Register.

### 1203.01 Immoral or Scandalous Matter

Section 2(a) of the Trademark Act, 15 U.S.C. §1052(a), is an absolute bar to the registration of immoral or scandalous matter on either the Principal Register or the Supplemental Register.

Although the words “immoral” and “scandalous” may have somewhat different connotations, case law has included immoral matter in the same category as scandalous matter. *See In re McGinley*, 660 F.2d 481, 484 n.6, 211 USPQ 668, 673 n.6 (C.C.P.A. 1981), *aff’g* 206 USPQ 753 (TTAB 1979) (“Because of our holding, *infra*, that appellant’s mark is ‘scandalous,’ it is unnecessary to consider whether appellant’s mark is ‘immoral.’ We note the dearth of reported trademark decisions in which the term ‘immoral’ has been directly applied.”)

The prohibition against the registration of marks that consist of or comprise immoral or scandalous matter was originally enacted as §5(a) of the Trademark Act of 1905, and was reenacted as part of §2(a) of the Act of 1946. There is little legislative history concerning the intent of Congress with regard to the provision; therefore, the term “scandalous” is interpreted by looking to “its ordinary and common meaning.” *In re Riverbank Canning Co.*, 95 F.2d 327, 328, 37 USPQ 268, 269 (C.C.P.A. 1938). The Court has noted, however, that the word “comprises” meant “includes” at the time of the statute’s enactment in 1905, and thus Congress extended the prohibition not only to marks that consist of scandalous matter, but also to marks that include scandalous matter.” *In re Fox*, 702 F.3d 633, 638, 105 USPQ2d 1247, 1250 (Fed. Cir. 2012) (holding scandalous a mark for rooster-shaped chocolate lollipops where, in the context of the goods, “a substantial composite of the general public perceives” a scandalous meaning, even though the mark had a non-scandalous meaning in relation to the goods as well). Moreover, there is no requirement in §2(a) that a mark’s vulgar meaning be the only relevant meaning, or even the most relevant meaning. *Id.* Thus, an examining attorney need only prove the existence of one vulgar meaning to justify a §2(a) refusal. *Id.* This may be established by referring to court decisions, decisions of the Trademark Trial and Appeal Board and dictionary definitions. *McGinley*, 660 F.2d at 485, 211 USPQ at 673.

In affirming a refusal to register a mark as scandalous under §2(a), the Court of Customs and Patent Appeals noted dictionary entries that defined “scandalous” as, *inter alia*, shocking to the sense of propriety, offensive to the conscience or moral feelings or calling out for condemnation. *McGinley*, 660 F.2d at 486, 211 USPQ at 673 (holding scandalous a mark comprising a photograph of a nude, reclining man and woman, kissing and embracing, for a “newsletter devoted to social and interpersonal relationship topics” and for “social club services”). The statutory language “scandalous” has also been considered to encompass matter that is “vulgar,” defined as “lacking in taste, indelicate, morally crude.” *In re Runsdorf*, 171 USPQ 443, 444 (TTAB 1971).

The meaning imparted by a mark must be determined in the context of the current attitudes of the day. *See In re Mavety Media Grp. Ltd.*, 33 F.3d 1367, 31 USPQ2d 1923 (Fed. Cir. 1994) (finding the evidence insufficient to establish that BLACK TAIL, used on adult entertainment magazines, comprises scandalous matter; noting that there were both vulgar and non-vulgar definitions of “tail,” and that the record was devoid of evidence demonstrating which of these definitions a substantial composite of the general public would choose in the context of the relevant marketplace); *In re Old Glory Condom Corp.*, 26 USPQ2d 1216 (TTAB 1993) (holding not scandalous OLD GLORY CONDOM CORP and design comprising the representation of a condom decorated with stars and stripes in a manner to suggest the American flag); *In re Thomas*

*Laboratories, Inc.*, 189 USPQ 50, 52 (TTAB 1975) (“[I]t is imperative that fullest consideration be given to the moral values and conduct which contemporary society has deemed to be appropriate and acceptable.”)

The determination of whether a mark is scandalous must be made in the context of the relevant marketplace for the goods or services identified in the application, and must be ascertained from the standpoint of not necessarily a majority, but a “substantial composite of the general public.” As long as a substantial composite of the general public would perceive the mark, in context, to have a vulgar meaning, “the mark as a whole ‘consists of or *comprises* . . . scandalous matter’” under §2(a). *In re Fox*, 702 F.3d at 638, 105 USPQ2d at 1250 (quoting 15 U.S.C. §1052(a) (emphasis added); *In re Boulevard Entm’t, Inc.*, 334 F.3d 1336, 1340, 67 USPQ2d 1475, 1477 (Fed. Cir. 2003); *McGinley*, 660 F.2d at 485, 211 USPQ at 673 (“[T]he Lanham Act does not require, under the rubric of ‘scandalous,’ any inquiry into the specific goods or services not shown in the application itself.”); *In re Star Belly Stitcher, Inc.*, 107 USPQ2d 2059 (TTAB 2013)(finding the evidence sufficient to establish prima facie that the term “aw shit” is scandalous or vulgar to the conscience of a substantial composite of the general public); *In re Luxuria s.r.o.*, 100 USPQ2d 1146 (TTAB 2011) (finding a mark consisting of a bottle in the shape of a hand with middle finger extended upwards comprised matter that would be considered vulgar by a substantial composite of the general public); *In re Wilcher Corp.*, 40 USPQ2d 1929 (TTAB 1996) (holding scandalous a mark for restaurant and bar services consisting of words DICK HEADS positioned directly underneath caricature of a human head composed primarily of graphic and readily recognizable representation of male genitalia, as it would be considered offensive by a substantial portion of the public); *Greyhound Corp. v. Both Worlds Inc.*, 6 USPQ2d 1635, 1639 (TTAB 1988) (holding scandalous a graphic design of a dog defecating, as applied to polo shirts and T-shirts, given the broad potential audience that may view applicant’s mark in sales establishments and “virtually all public places”); *In re Hepperle*, 175 USPQ 512 (TTAB 1972) (holding ACAPULCO GOLD not scandalous when used as a mark for suntan lotion even though the words might be a reference to marijuana).

Therefore, to support a refusal on the ground that a proposed mark is immoral or scandalous, the examining attorney must provide evidence that a substantial portion of the general public would consider the mark to be scandalous in the context of contemporary attitudes and the relevant marketplace. *Mavety Media*, 33 F.3d at 1371-72, 31 USPQ2d at 1925-26. This evidence could include dictionary definitions, newspaper articles, and magazine articles. The examining attorney should not rely solely on an earlier decision holding a term to be scandalous in support of a refusal. The Trademark Trial and Appeal Board has held that an earlier decision is insufficient to warrant the same finding in a future case. *In re Red Bull GmbH*, 78 USPQ2d 1375 (TTAB 2006) (rejecting examining attorney’s argument that the Board’s 1981 decision in *In re Tinseltown, Inc.*, 212 USPQ 863 (TTAB 1981) finding BULLSHIT to be scandalous is sufficient to warrant the same finding in a later case). Rather, the facts underlying the earlier decision must be looked at to determine, first, whether it has any relevance to the present case, and, if so, whether that earlier finding is equally applicable today, for example, by looking at other evidence such as recent dictionary definitions. *Red Bull*, 78 USPQ2d at 1381.

Dictionary definitions alone may be sufficient to establish that a proposed mark comprises scandalous matter, where multiple dictionaries, including at least one standard dictionary, all indicate that a word is vulgar, and the applicant’s use of the word is limited to the vulgar meaning of the word. *Boulevard Entm’t*, 334 F.3d at 1341, 67 USPQ2d at 1478 (holding 1-800-JACK-OFF and JACK OFF scandalous, where all dictionary definitions of “jack-off” were considered vulgar); *In re Star Belly Stitcher*, 107 USPQ2d 2059 at 2062 (stating that dictionary evidence showed that the terms “shit” and “aw shit” are vulgar terms); *Boston Red Sox Baseball Club Ltd. P’ship v. Sherman*, 88 USPQ2d 1581 (TTAB 2008) (sustaining an opposition and finding that SEX ROD was immoral and scandalous under §2(a) based on dictionary definitions designating the term “ROD” as being vulgar, and applicant’s admission that SEX ROD had a sexual connotation); *Red Bull*, 78 USPQ2d at 1381-82 (finding multiple dictionary definitions indicating BULLSHIT is “obscene,”

“vulgar,” “usually vulgar,” “vulgar slang,” or “rude slang” constitute a prima facie showing that the term is offensive to the conscience of a substantial composite of the general public).

“Whether applicant intended the mark to be humorous, or even whether some people would actually find it to be humorous, is immaterial.” *In re Luxuria, s.r.o.*, 100 USPQ2d at 1149 (quoting *Boston Red Sox Baseball Club*, 88 USPQ2d at 1588). A refusal is proper if the evidence shows that “the term would be perceived and understood as vulgar by a substantial portion of the purchasing public.” *Id.*; see also *Fox*, 702 F.3d at 634, 105 USPQ2d at 1248 (“a mark that creates a double entendre falls within the proscription of §1052(a) where, as here, one of its meanings is clearly vulgar”); *In re Star Belly Stitcher*, 107 USPQ2d at 2063 (“[T]here is no requirement in Section 2(a) that a mark’s vulgar meaning must be the only relevant meaning, or even the most relevant meaning.”).

It has been noted that the threshold is lower for what can be described as “scandalous” than for “obscene.” Refusal to register immoral or scandalous matter has been found not to abridge First Amendment rights, because no conduct is proscribed and no tangible form of expression is suppressed. Also, the term “scandalous” has been held sufficiently precise to satisfy due process requirements under the Fifth Amendment. *McGinley*, 660 F.2d at 484-85, 211 USPQ at 672.

The prohibition in §2(a) of the Act against the registration of scandalous matter pertains only to *marks* that are scandalous. The authority of the Act does not extend to goods that may be scandalous. See *In re Madsen*, 180 USPQ 334, 335 (TTAB 1973) (holding WEEK-END SEX for magazines not scandalous and observing that whether the magazine contents may be pornographic was not an issue before the Board).

The examining attorney may look to the specimen(s) or other aspects of the record for confirmation that a substantial composite of the general public would perceive the mark to be vulgar in the context of the goods or services at issue. See *McGinley*, 660 F.2d at 482 n.3, 211 USPQ at 670 n.3 (referring to excerpts from appellant’s newsletters pertaining to the sexual connotation of the subject matter).

To ensure consistency in examination with respect to immoral or scandalous matter, when an examining attorney believes, for whatever reason, that a mark may be considered to comprise such matter, the examining attorney must consult with his or her supervisor.

## 1203.02 Deceptive Matter

Section 2(a) of the Trademark Act, 15 U.S.C. §1052(a), is an absolute bar to the registration of deceptive matter on either the Principal Register or the Supplemental Register. Neither a disclaimer of the deceptive matter nor a claim that it has acquired distinctiveness under §2(f) can obviate a refusal under §2(a) on the ground that the mark consists of or comprises deceptive matter. See *Am. Speech-Language-Hearing Ass’n v. Nat’l Hearing Aid Society*, 224 USPQ 798, 808 (TTAB 1984); *In re Charles S. Loeb Pipes, Inc.*, 190 USPQ 238, 241 (TTAB 1975).

### 1203.02(a) Types of Deceptive Marks

A deceptive mark may be comprised of: (1) a single deceptive term; (2) a deceptive term embedded in a composite mark that includes additional non-deceptive wording and/or design elements ( see *In re White Jasmine LLC*, 106 USPQ2d 1385, 1391 (TTAB 2013)); (3) a term or a portion of a term that alludes to a deceptive quality, characteristic, function, composition, or use ( see *Am. Speech-Language-Hearing Ass’n v. Nat’l Hearing Aid Society*, 224 USPQ 798, 808 (TTAB 1984)); (4) the phonetic equivalent of a deceptive term ( see *In re Organik Technologies, Inc.*, 41 USPQ2d 1690, 1694 (TTAB 1997); *Tanners’ Council of*

*Am., Inc. v. Samsonite Corp.*, 204 USPQ 150, 154 (TTAB 1979); or (5) the foreign equivalent of any of the above ( *see, e.g., Palm Bay Imps., v. Veuve Clicquot Ponsardin Maison Fondee En 1772*, 396 F.3d 1369, 1377, 73 USPQ2d 1689, 1696 (Fed. Cir. 2005). Although there is no published Board or Federal Circuit decision regarding whether a mark consisting solely of a design can be deceptive, if there is evidence to support such a refusal, it should be issued.
