Deceptive marks may include marks that falsely describe the material content of a product ( *see In re Intex Plastics Corp.*, 215 USPQ 1045, 1048 (TTAB 1982)) and marks that are geographically deceptive ( *see Stabilisierungsfonds fur Wein v. Peter Meyer Winery GmbH*, 9 USPQ2d 1073, 1076 (TTAB 1988); *In re House of Windsor, Inc.*, 221 USPQ 53, 57 (TTAB 1983), *recon. denied*, 223 USPQ 191 (TTAB 1984)). See [TMEP §§1210.05-1210.06\(b\)](#) regarding geographically deceptive marks.

However, marks containing a term identifying a material, ingredient, or feature should not be refused registration under §2(a) if the mark in its entirety would not be perceived as indicating that the goods contained that material or ingredient. For example, the mark COPY CALF was found not deceptive for wallets and billfolds of synthetic and plastic material made to simulate leather, because it was an obvious play on the expression "copy cat" and suggested to purchasers that the goods were imitations of items made of calf skin. *See A. F. Gallun & Sons Corp. v. Aristocrat Leather Prods., Inc.*, 135 USPQ 459, 460 (TTAB 1962). Note, however, the difference with such marks as TEXHYDE and SOFTHIDE, which were held deceptive as applied to synthetic fabric and imitation leather material, respectively. *See Intex Plastics*, 215 USPQ at 1048; *Tanners' Council of Am.*, 204 USPQ at 154-55.

In addition, formatives and other grammatical variations of a term may not necessarily be deceptive in relation to the relevant goods. For example, "silky" is defined, *inter alia*, as "resembling silk." *See The American Heritage® Dictionary of the English Language: Fourth Ed.* 2000. Thus, a mark containing the term SILKY would not be considered deceptive (but might be unregistrable under §2(e)(1)). Dictionary definitions of such terms should be carefully reviewed to determine the significance the term would have to prospective purchasers. For example, although the term GOLD would be considered deceptive for jewelry not made of gold, the term GOLDEN would not be deceptive.

### **1203.02(b) Elements of a §2(a) Deceptiveness Refusal**

The Court of Appeals for the Federal Circuit has articulated the following test for whether a mark consists of or comprises deceptive matter:

- (1) Is the term misdescriptive of the character, quality, function, composition or use of the goods?
- (2) If so, are prospective purchasers likely to believe that the misdescription actually describes the goods?
- (3) If so, is the misdescription likely to affect a significant portion of the relevant consumers' decision to purchase?

*In re Spirits Int'l, N.V.*, 563 F.3d 1347, 90 USPQ2d 1589 (Fed. Cir. 2009); *In re Budge Mfg. Co.*, 857 F.2d 773, 775, 8 USPQ2d 1259, 1260 (Fed. Cir. 1988), *aff'g* 8 USPQ2d 1790 (TTAB 1987).

### **1203.02(c) Distinction between Marks Comprising Deceptive Matter (§2(a)) and Deceptively Misdescriptive Marks (§2(e)(1))**

If the first two inquiries set forth by the Federal Circuit in *In re Budge Mfg. Co.*, 857 F.2d 773, 775, 8 USPQ2d 1259, 1260 (Fed. Cir. 1988) (i.e., whether a mark is misdescriptive of the goods/services and

whether prospective purchasers are likely to believe the misdescription) are answered affirmatively, the mark is deceptively misdescriptive of the goods/services under §2(e)(1). See [TMEP §1209.04](#) regarding deceptively misdescriptive marks.

The third inquiry, whether the misdescription is likely to affect the decision to purchase, distinguishes marks that are deceptive under §2(a) from marks that are deceptively misdescriptive under §2(e)(1). To be deceptively misdescriptive under §2(e)(1), the misdescription must concern a feature that would be relevant to the decision to purchase the goods or use the services. If the misdescription is more than simply a relevant factor that may be considered in purchasing decisions, but is a material factor, the mark would be deceptive under §2(a) of the Trademark Act, 15 U.S.C. §1052(a). See *In re White Jasmine LLC*, 106 USPQ2d 1385 (TTAB 2013); *In re Shniberg*, 79 USPQ2d 1309, 1313-14 (TTAB 2006). See [TMEP §1209.04](#) regarding establishing deceptive misdescriptiveness and [TMEP §1203.02\(d\)](#) regarding determining materiality.

If it is difficult to determine whether misdescriptive matter would materially affect a decision to purchase, the examining attorney should refuse registration under both §§2(a) and 2(e)(1). See, e.g., *Gold Seal Co. v. Weeks*, 129 F. Supp. 928, 105 USPQ 407 (D.D.C. 1955), *aff'd sub nom. S. C. Johnson & Son, Inc. v. Gold Seal Co.*, 230 F.2d 832, 108 USPQ 400 (D.C. Cir. 1956) (per curiam), *cert. denied*, 352 U.S. 829, 111 USPQ 467 (1956), *superseded by statute on other grounds as stated in Aktieselskabet AF 21. November 2001 v. Fame Jeans Inc.*, 525 F.3d 8, 86 USPQ2d 1527, 1532 (D.C. Cir. 2008). See also *R. Neumann & Co. v. Overseas Shipments, Inc.*, 326 F.2d 786, 140 USPQ 276 (C.C.P.A. 1964), and *Stabilisierungsfonds für Wein v. Peter Meyer Winery GmbH*, 9 USPQ2d 1073 (TTAB 1988), in which third parties filed oppositions based on both statutory sections. See [TMEP §1203.02\(e\)](#) regarding procedures for issuing deceptiveness refusals under §2(a).

Marks that are deceptive under §2(a) are unregistrable on either the Principal Register or the Supplemental Register, whereas marks that are deceptively misdescriptive under §2(e)(1) may be registrable on the Principal Register with a showing of acquired distinctiveness under §2(f), 15 U.S.C. §1052(f), or on the Supplemental Register, if appropriate.

See [TMEP §1210.05\(d\)](#) regarding the distinction between marks comprising deceptive matter under §2(a) and matter that is primarily geographically deceptively misdescriptive under §2(e)(3).

### **1203.02(d) Determining Materiality**

To establish a prima facie case of deceptiveness, the examining attorney must provide sufficient evidence that the misdescriptive quality or characteristic would be a material factor in the purchasing decision of a significant portion of the relevant consumers. To do so, the examining attorney must provide evidence that the misdescriptive quality or characteristic would make the product or service more appealing or desirable to prospective purchasers. *In re White Jasmine LLC*, 106 USPQ2d 1385, 1392 (TTAB 2013) (citing *In re Juleigh Jeans Sportswear Inc.*, 24 USPQ2d 1694, 1698-99 (TTAB 1992)). A product or service is usually more desirable because of objective standards or criteria that provide an objective inducement to purchase the goods and/or services beyond that of mere personal preference.

#### **1203.02(d)(i) Objective Criteria**

In assessing whether a misdescription would affect the decision to purchase, the following are examples (not a comprehensive list) of the type of objective criteria that should be used to analyze whether a term is a material factor. The evidence may often point to more than one characteristic, thereby strengthening the examining attorney's prima facie case. For example, the evidence may show that goods deemed "organic"

because they are produced in compliance with objective criteria can also be more costly, provide health benefits, and satisfy a social policy of reducing the impact on the environment by utilizing chemical-free growing practices. The evidence also must suffice to indicate that the misdescriptive quality or characteristic would affect the purchasing decision of a significant portion of the relevant consumers. *In re Spirits Int'l, N.V.*, 563 F.3d 1347, 1353, 90 USPQ2d 1489, 1493 (Fed. Cir. 2009). Generally, evidence of the objective inducement to purchase supports a presumption that a significant portion of the relevant consumers would likely be deceived.

*Superior Quality* - The evidence must support a finding that goods or services that contain or feature the misdescriptive term are superior in quality to similar goods and/or services that do not. For example, silk can be shown to be a more luxurious and expensive material because of the difficulty in making silk, its unique feel, and its breathability. Similarly, cedar wood can be shown to have superior durability and resistance to decay.

*Enhanced Performance or Function* - The evidence must support a finding that goods possessing the characteristic or feature at issue are superior to those that do not. For example, certain wood species are naturally resistant to termite attack or may be more durable than others. There might also be evidence of an increasing interest in reducing the potential leaching of chemicals from treated wood into the environment.

*Difference in Price* - Evidence of a price differential between items that do and those that do not possess the feature or characteristic described by the misdescriptive term may be enough to support a §2(a) refusal, depending upon the nature of the goods or services. It is also important to remember that because a difference in price is relative to the goods and/or services in a particular industry, a particular term may be deceptive for goods and services that are not typically thought of as luxury items.

*Health Benefit* - The evidence must establish a belief that the feature or characteristic provides a health benefit.

*Religious Practice or Social Policy* - The evidence must show that the religious practice or social policy has definable recognized criteria for compliance in order to support a finding of deceptiveness when the criteria are not adhered to by the applicant. For example, a body of Jewish law deals with what foods can and cannot be eaten and how those foods must be prepared and eaten. The term "kosher" refers to food prepared in accordance with these standards as well as to the selling or serving of such food. *See The American Heritage® Dictionary of the English Language: Fourth Ed.* 2000. Another example is the term "vegan," which is defined as someone who eats plant products only and who uses no products derived from animals, such as fur or leather. *Id.*

The evidence necessary to establish deceptiveness can come from the same sources used to show that the term is misdescriptive. Internet searches that combine the deceptive term with terms such as "desirable," "superior," "premium," "better quality," "sought after," "more expensive," or "established standards" may be useful in seeking evidence to support the second and third prongs of the test.

Applicant's own advertising - in the form of specimens, brochures, web pages, press releases, or product and service information sheets - may provide the best evidence of deceptiveness. Moreover, the examining attorney should make of record any instances where the applicant attempts to benefit from the potentially deceptive term and where the advertising includes false assertions related to the deceptive wording. Although

not a requirement for a deceptive refusal, proof of an actual intent to deceive may be considered strong evidence of deceptiveness.

### **1203.02(d)(ii) Mere Personal Preference**

The types of objective criteria discussed above can be contrasted with mere personal preferences for which the requisite evidentiary support generally cannot be found to establish materiality. For example, SPEARMINT for gum, LAVENDER for dish soap, and BLUE for bicycles refer to flavor, scent, and color features that, in those contexts, most likely reflect mere personal preferences which would not be considered material for purposes of a deceptiveness refusal.

Similarly, personal preferences regarding types of cuisine served at restaurants (e.g. , SEAFOOD or PIZZA) generally do not establish materiality absent evidence that the type of cuisine meets some objective criteria more in line with those listed above, such as for VEGAN or KOSHER.

Whether the requisite evidentiary support can be found to establish that the use of such terms in connection with goods/services that do not contain or feature the characteristic is deceptively misdescriptive under §2(e)(1) must be determined on a case-by-case basis.

### **1203.02(e) Procedures for Issuing §2(a) Deceptive Refusals**

#### **1203.02(e)(i) When the Mark is Clearly Misdescriptive**

If there is evidence in the record clearly indicating that the mark or a term(s) in the mark is misdescriptive (e.g. , the specimen or language in the identification indicates that the goods/services do not have the relevant feature or characteristic), the examining attorney must determine whether the misdescription is believable and material and do the following:

- If the misdescription would not be believable, no refusal under either §2(a) or §2(e)(1) should be made. If the application is otherwise in condition for publication, approve the mark for publication. Otherwise, issue an Office action containing all other relevant refusals and/or requirements.
- If the misdescription would be believable, but would not be material, issue a refusal under §2(e)(1) as deceptively misdescriptive (or disclaimer requirement if appropriate, i.e., if the term at issue is not part of a unitary expression), with supporting evidence, and all other relevant refusals and/or requirements.
- If the misdescription would be believable and material, issue a deceptiveness refusal under §2(a) with supporting evidence, an alternative refusal under §2(e)(1) as deceptively misdescriptive (or disclaimer requirement if appropriate), and all other relevant refusals and/or requirements.

#### **1203.02(e)(ii) When It is Not Clear Whether the Mark is Misdescriptive**

When a mark comprises or contains descriptive wording, but it is not clear whether the goods/services possess the relevant feature or characteristic, the examining attorney must first determine whether such feature or characteristic would be believable and material to the decision to purchase.

If the potential misdescription would not be believable, no refusal under either §2(a) or §2(e)(1) should be made. If the application is otherwise in condition for publication, the examining attorney should approve

the mark for publication. Otherwise, the examining attorney should issue an Office action containing all other relevant refusals and/or requirements.

If the goods possess the relevant feature or characteristic and the feature or characteristic referenced by the mark would be believable and material, the identification must include the feature or characteristic in order to resolve the ambiguity between the mark and the identification of goods/services. The identification must be amended even if the record indicates elsewhere that the goods/services contain the feature or characteristic. Therefore, if the application could otherwise be put in condition for approval for publication by an examiner's amendment ( *see* [TMEP §707](#)), to expedite prosecution, the examining attorney should:

- Attempt to contact the applicant to obtain authorization for a disclaimer, if appropriate (i.e., if the term at issue is not part of a unitary expression), and an amendment to the identification to include the feature or characteristic (if believable and material), and for any other amendments that would put the application in condition for approval for publication.
- If the applicant states that the goods/services do not possess the feature or characteristic, the examining attorney must so indicate in a Note to the File entered in the record, and must then issue a refusal under §2(e)(1) as deceptively misdescriptive (if believable but not material), or disclaimer requirement if appropriate, or a refusal under §2(a) as deceptive (if believable and material) and an alternative refusal under §2(e)(1), or disclaimer requirement if appropriate, as deceptively misdescriptive, and make all other relevant requirements.
- To ensure the completeness of the record in the event of an appeal, any Office action issued must also include an information request under 37 C.F.R. §2.61(b), asking whether the goods/services possess the feature or characteristic.

If the examining attorney is unable to reach the applicant or cannot obtain authorization for an examiner's amendment, or if an Office action is otherwise necessary to make substantive refusals or requirements that cannot be satisfied by examiner's amendment, the examining attorney must:

- Issue a refusal under §2(e)(1) as descriptive (or a requirement for a disclaimer, if appropriate, i.e., if the term at issue is not part of a unitary expression), based on the presumption that the goods/services possess the feature or characteristic; and
- Issue a requirement that the applicant amend the identification to include the feature or characteristic (if believable and material); and
- Issue an information request under 37 C.F.R. §2.61(b), asking whether the goods/services possess the feature or characteristic; and
- Issue any other relevant refusals and/or requirements.

If the applicant responds that the goods/services possess the feature or characteristic or amends the identification to include the feature or characteristic, the examining attorney must issue a final Office action, assuming that the application is otherwise in condition for final action, as to the descriptiveness refusal (or disclaimer requirement, if not provided), identification requirement (if applicable and not amended), and any other relevant refusals and/or requirements, as appropriate.

If the applicant responds that the goods/services do not possess the feature or characteristic, the examining attorney must withdraw the §2(e)(1) descriptiveness refusal (or disclaimer requirement), as well as the identification requirement (if applicable), and issue a subsequent nonfinal Office action dependent on whether the misdescription would be believable and material:

- If the misdescription would be believable but not material, the examining attorney must issue a refusal under §2(e)(1) as deceptively misdescriptive (or disclaimer requirement if appropriate), with supporting evidence, and maintain all other relevant refusals and/or requirements.
- If the misdescription would be believable and material, the examining attorney must issue a deceptiveness refusal under §2(a) with supporting evidence, an alternative refusal under §2(e)(1) as deceptively misdescriptive (or disclaimer requirement if appropriate), and maintain all other relevant refusals and/or requirements.

If the applicant does not respond to the information request and does not amend the identification to include the feature or characteristic, the examining attorney must:

- Issue a subsequent nonfinal Office action maintaining the descriptiveness refusal (or disclaimer requirement, if not provided), based on the presumption that the goods/services possess the feature or characteristic, as well as the identification requirement (if applicable), information request, and any other relevant refusals and/or requirements raised in the initial Office action, as appropriate; and
- If the misdescription would be believable and material, issue an alternative refusal under §2(a) as deceptive, based on the presumption that the goods/services do not possess the relevant feature or characteristic, and supported by evidence; and
- Issue an alternative refusal under §2(e)(1) as deceptively misdescriptive, or disclaimer requirement if appropriate, based on the presumption that the goods/services do not possess the relevant feature or characteristic.

*See, e.g., In re AOP LLC*, 107 USPQ2d 1644 (TTAB 2013) (holding AOP deceptive, deceptively misdescriptive, or, alternatively, merely descriptive for wine, after the applicant failed to fully respond to the examining attorney's inquiries regarding the origin and certification of applicant's goods); *In re Cheezwhse.com, Inc.*, 85 USPQ2d 1917 (TTAB 2008) (holding NORMANDIE CAMEMBERT primarily geographically descriptive or, in the alternative, primarily geographically deceptively misdescriptive for cheese; the applicant failed to respond to a 37 C.F.R. §2.61(b) information request as to the origin of the goods).

### **1203.02(f) Responding to a §2(a) Deceptiveness Refusal**

#### **1203.02(f)(i) Amending the Identification of Goods or Services**

Generally, an applicant may avoid or overcome a deceptiveness refusal by amending the identification of goods or services, if accurate, to include the potentially deceptive term. For deceptiveness refusals based on the material composition of the goods, if the applicant amends the identification to include the potentially deceptive term, the USPTO will rely on the presumption that the goods contain a sufficient amount of the material to obviate deceptiveness; there is no requirement to substantiate the amount or percentage of the material or feature in the goods. Thus, the applicant may amend "ties" to "silk ties," "milk and cheese" to "organic milk and cheese," and "jewelry" to "gold jewelry" or to "jewelry made in whole or significant part of gold."

The Office construes the wording "made in significant part of" as indicating that the goods contain a sufficient amount of the named ingredient/material composition to meet the standard for use of the term in the relevant industry. In the case of "coats made in significant part of leather," such wording would be construed to mean

that the "coats" contain a sufficient amount of leather to be called "leather coats" in the relevant industry. However, the wording "coats made in part of leather" is not acceptable because, although the goods may contain some leather, it may not be an amount sufficient for the goods to be called "leather coats" in the relevant industry.

Note, however, that amending the identification to exclude goods made from the named ingredient or material composition will not avoid or overcome a deceptiveness refusal.

Amending an identification of services to add "featuring" or "including" a material term (e.g., "restaurants featuring organic cuisine" and "retail furniture stores including leather furniture") generally is sufficient to obviate deceptiveness. For example, as long as the identification indicates that the restaurant provides organic cuisine, or the furniture store sells leather furniture, there is no deception even if other types of food or furniture are also available.

### **1203.02(f)(ii) Other Arguments**

Applicants may attempt to overcome a §2(a) refusal by providing evidence that applicant's advertising, or other means, would make consumers aware of the misdescription. Neither evidence regarding advertising, labeling, or extent of use, nor information found on the specimens, can negate the misdescriptiveness with regard to use of the mark in relation to the goods or services. In addition, an applicant's anecdotal or past practices and "explanatory statements in advertising or on labels which purchasers may or may not note and which may or may not always be provided" are of little value in the deceptiveness analysis. *See In re Budge Mfg. Co.*, 857 F.2d 773, 775-76, 8 USPQ2d 1259, 1261 (Fed. Cir. 1988).

However, in some cases, the applicant may be able to provide credible evidence that consumers would not expect goods sold under a certain mark to actually consist of or contain the feature or characteristic named in the mark. *See, e.g., In re Robert Simmons, Inc.*, 192 USPQ 331 (TTAB 1976)(holding that WHITE SABLE is not deceptive on artist's paint brushes).

The argument that there is no deception because consumers will immediately discern the true nature of the goods and/or services when they encounter them is not persuasive. Deception can attach prior to seeing or encountering the goods or services, for example, based on advertising over the radio or Internet or via word of mouth. *See In re ALP of S. Beach, Inc.*, 79 USPQ2d 1009, 1014 (TTAB 2006).

As noted above, marks that are deceptive under §2(a) are never registrable on either the Principal Register, even under §2(f) or the Supplemental Register. However, applicants may present evidence of a similar nature to what is often submitted for acquired distinctiveness, such as declarations regarding how the mark is perceived by consumers, as rebuttal evidence to the prima facie case, in an effort to overcome one or all of the prongs of the §2(a) test. *See In re Woolrich Woolen Mills Inc.*, 13 USPQ2d 1235, 1238 (TTAB 1989). Note that merely relying on the length of use, without providing other information or evidence, would never be sufficient to overcome a §2(a) refusal. Moreover, priority of use cannot overcome a deceptiveness refusal. *In re AOP LLC*, 107 USPQ2d 1644, 1650 n.6 (TTAB 2013).

The fact that only those knowledgeable in the relevant trade, and not average purchasers, would be deceived does not preclude a finding that a mark comprises deceptive matter. *In re House of Windsor, Inc.*, 223 USPQ 191, 192 (TTAB 1984).

### 1203.02(g) Deceptive Matter: Case References

In the following cases, proposed marks were determined to be deceptive, under §2(a): *In re Budge Mfg. Co.*, 857 F.2d 773, 8 USPQ2d 1259 (Fed. Cir. 1988), *aff'g* 8 USPQ2d 1790 (TTAB 1987) (holding LOVEE LAMB deceptive for seat covers not made of lambskin); *In re AOP LLC*, 107 USPQ2d 1644 (TTAB 2013) (holding AOP deceptive for wine, where the term is used by members of the European Union to designate a particular quality and geographical origin of wine, when applicant is not the entity that administers the designation and the goods do not necessarily originate in Europe); *In re White Jasmine LLC*, 106 USPQ2d 1385 (TTAB 2013) (holding the term WHITE in the proposed mark WHITE JASMINE deceptive for tea that did not include white tea, where the evidence established that consumers perceive that white tea has desirable health benefits); *In re E5 LLC*, 103 USPQ2d 1578 (TTAB 2012) (holding a mark consisting of the alpha symbol and letters “CU” deceptive for dietary supplements not containing copper, a common ingredient in dietary supplements, which evidence showed is referred to as CU); *In re ALP of S. Beach Inc.*, 79 USPQ2d 1009 (TTAB 2006) (CAFETERIA (stylized) held deceptive as used in connection with “restaurants providing full service to sit-down patrons, excluding cafeteria-style restaurants”); *In re Phillips-Van Heusen Corp.*, 63 USPQ2d 1047 (TTAB 2002) (holding SUPER SILK deceptive for “clothing, namely dress shirts and sport shirts made of silk-like fabric”); *In re Organik Technologies, Inc.*, 41 USPQ2d 1690 (TTAB 1997) (holding ORGANIK deceptive for clothing and textiles made from cotton that is neither from an organically grown plant nor free of chemical processing or treatment, notwithstanding applicant’s assertions that the goods are manufactured by a process that avoids the use of chemical bleaches, because the identification of goods was broad enough to include textiles and clothing manufactured with chemical processes or dyes); *In re Juleigh Jeans Sportswear Inc.*, 24 USPQ2d 1694 (TTAB 1992) (holding LONDON LONDON deceptive for clothing having no connection with London); *In re Perry Mfg. Co.*, 12 USPQ2d 1751 (TTAB 1989) (holding PERRY NEW YORK and design of New York City skyline deceptive for clothing originating in North Carolina, in view of the renown of New York City in the apparel industry); *Stabilisierungsfonds fur Wein v. Peter Meyer Winery GmbH*, 9 USPQ2d 1073, 1075 (TTAB 1988) (holding GOLDENER TROPFEN deceptive for wines, in view of evidence of the international renown of the Goldtropfchen vineyard of West Germany, the Board finding that the purchasing public would be likely to think, mistakenly, that applicant’s wines were produced from grapes grown there in accordance with German wine laws and regulations); *Bureau Nat’l Interprofessionnel Du Cognac v. Int’l Better Drinks Corp.*, 6 USPQ2d 1610, 1616 (TTAB 1988) (holding COLAGNAC deceptive for cola-flavored liqueur containing Spanish brandy, the Board concluding that purchasers were likely to believe that applicant’s goods contained COGNAC brandy); *In re Shapely, Inc.*, 231 USPQ 72 (TTAB 1986) (holding SILKEASE deceptive as applied to clothing not made of silk); *In re House of Windsor, Inc.*, 221 USPQ 53 (TTAB 1983), *recon. denied*, 223 USPQ 191 (TTAB 1984) (holding BAHIA deceptive as applied to cigars having no connection with the Bahia province of Brazil, the record indicating that tobacco and cigars are important products in the Bahia region); *Evans Prods. Co. v. Boise Cascade Corp.*, 218 USPQ 160 (TTAB 1983) (holding CEDAR RIDGE deceptive for embossed hardboard siding not made of cedar); *In re Intex Plastics Corp.*, 215 USPQ 1045 (TTAB 1982) (holding TEXHYDE deceptive as applied to synthetic fabric for use in the manufacture of furniture, upholstery, luggage, and the like); *Tanners’ Council of Am., Inc. v. Samsonite Corp.*, 204 USPQ 150 (TTAB 1979) (holding SOFTHIDE deceptive for imitation leather material); *In re Salem China Co.*, 157 USPQ 600 (TTAB 1968) (holding AMERICAN LIMOGES, used on dinnerware that was neither made in Limoges, France, nor made from Limoges clay, deceptive because of the association of Limoges with fine quality china); *Co. of Cutlers of Hallamshire in the Cnty. of York v. Regent-Sheffield, Ltd.*, 155 USPQ 597 (TTAB 1967) (holding SHEFFIELD, used on cutlery not made in Sheffield, England, deceptive because of the renowned status of Sheffield in relation to cutlery); *In re U.S. Plywood Corp.*, 138 USPQ

403 (TTAB 1963) (holding IVORY WOOD, for lumber and timber products, deceptive since the goods were not made of ivorywood nor did they contain an ivorywood pattern).

Marks were found not to be deceptive in the following cases: *Philip Morris Inc. v. Reemtsma Cigarettenfabriken GmbH*, 14 USPQ2d 1487 (TTAB 1990) (holding PARK AVENUE neither deceptive nor geographically deceptively misdescriptive as applied to applicant's cigarettes and smoking tobacco, the Board finding no goods/place association between Park Avenue in New York City, on which opposer's world headquarters was located, and tobacco products); *In re Woolrich Woolen Mills Inc.*, 13 USPQ2d 1235 (TTAB 1989) (holding WOOLRICH for clothing not made of wool not to be deceptive under §2(a)); *In re Fortune Star Prods. Corp.*, 217 USPQ 277 (TTAB 1982) (holding NIPPON, for radios, televisions, and the like, not deceptive in relation to the goods because, although the applicant was an American firm, the goods were actually made in Japan); *In re Sweden Freezer Mfg. Co.*, 159 USPQ 246 (TTAB 1968) (holding SWEDEN and design, for which registration was sought under §2(f) for external artificial kidney units, not deceptive, the Board finding the case to be in the category "where a geographical trademark may involve a degree of untruth but the deception may be perfectly innocent, harmless or negligible"); *A. F. Gallun & Sons Corp. v. Aristocrat Leather Prods., Inc.*, 135 USPQ 459 (TTAB 1962) (holding COPY CALF, for wallets and billfolds of synthetic and plastic material made to simulate leather, not deceptive, the Board noting that the mark, as an obvious play on the expression "copy cat," suggested to purchasers that the goods were imitations of items made of calf skin).

### **1203.03 Matter That May Disparage, Falsely Suggest a Connection, or Bring into Contempt or Disrepute**

Section 2(a) of the Trademark Act, 15 U.S.C. §1052(a), bars the registration on either the Principal or the Supplemental Register of a designation that consists of or comprises matter which, with regard to persons, institutions, beliefs, or national symbols, does any of the following: (1) disparages them; (2) falsely suggests a connection with them; (3) brings them into contempt; or (4) brings them into disrepute.

Section 2(a) is distinctly different from §2(d), 15 U.S.C. §1052(d), for which the relevant test is likelihood of confusion. In *Univ. of Notre Dame du Lac v. J.C. Gourmet Food Imps. Co.*, 703 F.2d 1372, 1375-76, 217 USPQ 505, 508-09 (Fed. Cir. 1983), *aff'g* 213 USPQ 594 (TTAB 1982), the Court of Appeals for the Federal Circuit noted as follows:

A reading of the legislative history with respect to what became §2(a) shows that the drafters were concerned with protecting the name of an individual or institution which was not a technical "trademark" or "trade name" upon which an objection could be made under §2(d)....

Although not articulated as such, it appears that the drafters sought by §2(a) to embrace concepts of the right to privacy, an area of the law then in an embryonic state (footnote omitted). Our review of case law discloses that the elements of a claim of invasion of one's privacy have emerged as distinctly different from those of trademark or trade name infringement. There may be no likelihood of such confusion as to the source of goods even under a theory of "sponsorship" or "endorsement," and, nevertheless, one's right of privacy, or the related right of publicity, may be violated.

The right to privacy protects a party's control over the use of its identity or "persona." A party acquires a protectible interest in a name or equivalent designation under §2(a) where the name or designation is unmistakably associated with, and points uniquely to, that party's personality or "persona." A party's interest in a name or designation does not depend upon adoption and use as a technical trademark or trade name.

*Univ. of Notre Dame du Lac*, 703 F.2d at 1375-77, 217 USPQ at 508-09; *Buffett v. Chi-Chi's, Inc.*, 226 USPQ 428, 429 (TTAB 1985). Section 2(a) protection is intended to prevent the unauthorized use of the

persona of a person or institution and not to protect the public. *In re MC MC S.r.l.*, 88 USPQ2d 1378, 1380 (TTAB 2008) (quoting *Bridgestone/Firestone Research Inc. v. Auto. Club De L'Quest De La France*, 245 F.3d 1359, 58 USPQ2d 1460 (Fed. Cir. 2001)).

Moreover, a mark does not have to comprise a person's full or correct name to be unregistrable; a nickname or other designation by which a person is known by the public may be unregistrable under this provision of the Act. *Buffett*, 226 USPQ at 430 (finding evidence of record "sufficient to raise a genuine issue of material fact as to whether the term 'MARGARITAVILLE' is so uniquely and unmistakably associated with opposer as to constitute opposer's name or identity such that when applicant's mark is used in connection with its [restaurant] services, a connection with opposer would be assumed").

See [TMEP § 1203.03\(b\)–1203.03\(b\)\(ii\)](#) regarding disparagement, bringing into contempt, and bringing into disrepute, and [TMEP § 1203.03\(c\)–1203.03\(c\)\(iii\)](#) regarding false suggestion of a connection.

*See Carson v. Here's Johnny Portable Toilets, Inc.*, 698 F.2d 831, 218 USPQ 1 (6th Cir. 1983), concerning the various forms of identity which have been protected under the rights of privacy and publicity.

## 1203.03(a) Definitions

### 1203.03(a)(i) "Persons"

Section 2(a) of the Trademark Act, 15 U.S.C. §1052(a), protects, *inter alia*, "persons, living or dead."

Section 45 of the Act, 15 U.S.C. §1127, defines "person" and "juristic person" as follows:

The term "person" and any other word or term used to designate the applicant or other entitled to a benefit or privilege or rendered liable under the provisions of this Act includes a juristic person as well as a natural person. The term "juristic person" includes a firm, corporation, union, association, or other organization capable of suing and being sued in a court of law.

The term "persons" in §2(a) refers to real persons, not fictitious characters. With respect to natural persons, they may be living or dead. However, §2(a) may not be applicable with regard to a deceased person when there is no longer anyone entitled to assert a proprietary right or right of privacy. *Lucien Piccard Watch Corp. v. Since 1868 Crescent Corp.*, 314 F. Supp. 329, 165 USPQ 459 (S.D.N.Y. 1970) (holding DA VINCI not to falsely suggest a connection with the deceased artist Leonardo Da Vinci); *In re MC MC S.r.l.*, 88 USPQ2d 1378 (TTAB 2008) (holding MARIA CALLAS did not falsely suggest a connection with deceased opera singer Maria Callas). See [TMEP §1203.03\(c\)\(i\)](#) regarding elements of a §2(a) false suggestion of a connection refusal.

In the case of a mark comprising the name of a deceased natural person, the "right to the use of a designation which points uniquely to his or her persona may not be protected under Section 2(a) after his or her death unless heirs or other successors are entitled to assert that right.... In order to possess rights, such person, or someone to whom those rights have been transferred, must exist." *In re MC MC S.r.l.*, 88 USPQ2d at 1380 (quoting *In re Wielinski*, 49 USPQ2d 1754, 1758 (TTAB 1998) (*overruled on other grounds by In re WNBA Enter., LLC*, 70 USPQ2d 1153 (TTAB 2003)); see *In re Jackson Int'l Trading Co. Kurt D. Bruhl GmbH & Co. KG*, 103 USPQ2d 1417, 1421 (TTAB 2012). A key consideration is "whether or not there is someone (this may be a natural person, estate, or juristic entity) with rights in the name." *Id.* Any doubt regarding the existence of heirs or successors with such rights must be resolved in favor of the applicant. *In re MC MC S.r.l.*, 88 USPQ2d at 1381.

In addition to natural persons, §2(a) includes juristic persons, that is, legally created entities such as firms, corporations, unions, associations, or any other organizations capable of suing and being sued in a court of law. *See Morehouse Mfg. Corp. v. J. Strickland & Co.*, 407 F.2d 881, 160 USPQ 715 (C.C.P.A. 1969); *Popular Merch. Co. v. "21" Club, Inc.*, 343 F.2d 1011, 145 USPQ 203 (C.C.P.A. 1965); *John Walker & Sons, Ltd. v. Am. Tobacco Co.*, 110 USPQ 249 (Comm'r Pats. 1956); *Copacabana, Inc. v. Breslauer*, 101 USPQ 467 (Comm'r Pats. 1954). Juristic persons do not have to be well known to be protected from the registration of a mark that falsely suggests a connection with or disparages them, or brings them into contempt or disrepute. *See generally Gavel Club v. Toastmasters Int'l*, 127 USPQ 88, 94 (TTAB 1960) (noting that §2(a) protection is not limited to large, well known, or nationally recognized institutions).

A juristic person's rights under §2(a) are extinguished when the juristic person ceases to exist. *In re Wielinski*, 49 USPQ2d at 1758 ( *overruled on other grounds, In re WNBA Enter., LLC*, 70 USPQ2d 1153 (TTAB 2003)).

Section 45 of the Act, 15 U.S.C. §1127, also defines "person" to include the United States and its agencies and instrumentalities, as well as any state:

The term "person" also includes the United States, any agency or instrumentality thereof, or any individual, firm, or corporation acting for the United States and with the authorization and consent of the United States. The United States, any agency or instrumentality thereof, and any individual, firm, or corporation acting for the United States and with the authorization and consent of the United States, shall be subject to the provisions of this Act in the same manner and to the same extent as any nongovernmental entity.

The term "person" also includes any State, any instrumentality of a State, and any officer or employee of a State or instrumentality of a State acting in his or her official capacity. Any State, and any such instrumentality, officer, or employee, shall be subject to the provisions of this Act in the same manner and to the same extent as any non-governmental entity.

It is well settled that the United States government is a "person" within the meaning of §2(a). 15 U.S.C. §1127; *FBI v. Societe: "M.Brill & Co."*, 172 USPQ 310, 313 (TTAB 1971). Therefore, the common names of, and acronyms for, United States government agencies and instrumentalities are considered persons. *See In re Peter S. Herrick P.A.*, 91 USPQ2d 1505, 1506-08 (TTAB 2009) (stating the statutory definition of "person" includes the United States and any agency or instrumentality thereof and concluding that "[t]he only entity the name 'U.S. Customs Service' could possibly identify is the government agency" formerly known as the United States Customs Service and now known as United States Customs and Border Protection); *NASA v. Record Chem. Co.*, 185 USPQ 563, 566 (TTAB 1975) (finding the National Aeronautics and Space Administration (NASA) is a juristic person); *FBI*, 172 USPQ at 313 (noting the Federal Bureau of Investigation (FBI) is a juristic person).

### **1203.03(a)(ii) "Institutions"**

The term "institution" has been broadly construed. *See In re Shinnecock Smoke Shop*, 571 F.3d 1171, 91 USPQ2d 1218, 1219 (Fed. Cir. 2009) ("[T]he ordinary meaning of 'institution' suggests the term is broad enough to include a self-governing Indian nation," quoting *Black's Law Dictionary* 813, 1133 (8th ed. 2004), which defines "institution" as "[a]n established organization," and defines "organization" as a "body of persons ... formed for a common purpose"); *In re White*, 73 USPQ2d 1713, 1718 (TTAB 2004) ("each federally recognized Apache tribe is necessarily either a juristic person or an institution"); *In re Urbano*,

51 USPQ2d 1776, 1779 (TTAB 1999) (“[T]he entire organization which comprises the Olympic Games, as a whole, qualifies as an ‘institution’ within the meaning of Section 2(a) of the Trademark Act.

In addition to qualifying as a person, United States government agencies and instrumentalities, as identified by their common names and acronyms therefor, also may be considered institutions within the meaning of §2(a). See *In re Peter S. Herrick P.A.*, 91 USPQ2d 1505, 1506 (TTAB 2009) (“Institutions, as used in Section 2(a), include government agencies.”); *In re Cotter & Co.*, 228 USPQ 202, 204-05 (TTAB 1985) (finding the United States Military Academy is an institution and West Point or Westpoint “has come to be solely associated with and points uniquely to the United States Military Academy”). The common names of, and acronyms and terms for, United States government programs may also be considered institutions, depending on the evidence of record. See *In re N. Am. Free Trade Ass’n*, 43 USPQ2d 1282, 1285-86 (TTAB 1997) (finding that the “NAFTA is an institution, in the same way that the United Nations is an institution,” the Board noted that the “legislative history ... indicates that the reference to an ‘institution’ in Section 2(a) was designed to have an expansive scope.”); *NASA v. Record Chem. Co.*, 185 USPQ 563, 565 (TTAB 1975) (finding NASA’s Apollo space program is an institution).

Institutions do not have to be large, well known, or “national” to be protected from the registration of a mark that falsely suggests a connection with or disparages them, or brings them into contempt or disrepute. *Gavel Club v. Toastmasters Int’l*, 127 USPQ 88, 94 (TTAB 1960).

While the §2(a) prohibition against the registration of matter that may disparage or falsely suggest a connection with institutions, or bring them into contempt or disrepute, may not be applicable to a particular designation, many names, acronyms, titles, terms, and symbols are protected by other statutes or rules. See [TMEP §1205.01](#) and [Appendix C](#) (setting forth a nonexhaustive list of United States statutes protecting designations of certain government agencies and instrumentalities).

### **1203.03(a)(iii) “National Symbols”**

A “national symbol” is subject matter of unique and special significance that, because of its meaning, appearance, and/or sound, immediately suggests or refers to the country for which it stands. *In re Consol. Foods Corp.*, 187 USPQ 63, 64 (TTAB 1975) (noting national symbols include the bald eagle, Statue of Liberty, designation “Uncle Sam” and the unique human representation thereof, the heraldry and shield designs used in governmental offices, and certain uses of the letters “U.S.”). National symbols include the symbols of foreign countries as well as those of the United States. *In re Anti-Communist World Freedom Cong., Inc.*, 161 USPQ 304, 305 (TTAB 1969).

“National symbols” cannot be equated with the “insignia” of nations, which are prohibited from registration under §2(b). As noted in *Liberty Mut. Ins. Co. v. Liberty Ins. Co. of Texas*, 185 F. Supp. 895, 908, 127 USPQ 312, 323 (E.D. Ark. 1960):

The Act ... does not put national symbols on a par with the flag, coat of arms, or other insignia of the United States, which may not in any event be made the subject matter of a trade or service mark. With regard to national symbols the statute provides merely that they shall not be disparaged or held up to contempt or disrepute, and shall not be used as falsely to suggest a connection between the holder of the mark and the symbol.

See [TMEP §1204](#) regarding insignia.

Trademark Act Section 2(a) does not prohibit registration of marks comprising national symbols; it only prohibits registration of matter that may disparage national symbols, falsely suggest a connection with them, or hold them up to contempt or disrepute. *Liberty Mut. Ins. Co.*, 185 F. Supp. at 908, 127 USPQ at 323 (finding marks comprising portion of the Statue of Liberty not to disparage, bring into contempt or disrepute, or falsely suggest a connection with the Statue of Liberty or the United States government, the Court “[a]ssuming without deciding” that the statue is a national symbol).

Designations have been held to be national symbols within the meaning of §2(a) in the following cases: *In re Anti-Communist World Freedom Cong.*, 161 USPQ 304 (holding a representation of a hammer and sickle to be a national symbol of the Union of Soviet Socialist Republics (U.S.S.R.)); *In re Nat'l Collection & Credit Control, Inc.*, 152 USPQ 200, 201 n.2 (TTAB 1966) (“The American or bald eagle with wings extended is a well-known national symbol or emblem of the United States”).

Designations have been held not to be national symbols in the following cases: *In re Consol. Foods Corp.*, 187 USPQ 63 (TTAB 1975) (holding OSS, the acronym for the Office of Strategic Services, not to constitute a national symbol); *W. H. Snyder & Sons, Inc. v. Ladd*, 227 F. Supp. 185, 140 USPQ 647 (D.D.C. 1964) (holding HOUSE OF WINDSOR not to be a national symbol of England, but merely the name of its present reigning family); *NASA v. Bully Hill Vineyards, Inc.*, 3 USPQ2d 1671 (TTAB 1987) (holding SPACE SHUTTLE not to constitute a national symbol on the evidence of record, the Board also finding “shuttle” to be a generic term for a space vehicle or system); *Jacobs v. Int'l Multifoods Corp.*, 211 USPQ 165, 170-71 (TTAB 1981), *aff'd on other grounds*, 668 F.2d 1234, 212 USPQ 641 (C.C.P.A. 1982) (“[H]istorical events such as the ‘BOSTON TEA PARTY’ ..., although undoubtedly associated with the American heritage, do not take on that unique and special significance of a ‘national symbol’ designed to be equated with and associated with a particular country.”); *In re Mohawk Air Serv. Inc.*, 196 USPQ 851, 854 (TTAB 1977) (stating MOHAWK is not immediately suggestive of the United States and, therefore, not a national symbol); *In re Gen. Mills, Inc.*, 169 USPQ 244 (TTAB 1971) (finding UNION JACK, which applicant was using on packages of frozen fish marked “English cut cod” and in its restaurant near representations of the British national flag, did not suggest a particular country, the Board noting that it could consider only the matter for which registration was sought).

The name of a country is not a national symbol within the meaning of §2(a) of the Trademark Act, *In re Sweden Freezer Mfg. Co.*, 159 USPQ 246, 248-49 (TTAB 1968), nor does use of the name of a country as a mark, by itself, amount to deception, disparagement, or a “false connection” under §2(a). *In re Fortune Star Prods. Corp.*, 217 USPQ 277, 277 (TTAB 1982).

The common names of, and acronyms for, government agencies and instrumentalities are not considered to be national symbols. *In re Consol. Foods*, 187 USPQ at 64 (OSS, acronym for the Office of Strategic Services, held not to be a national symbol, but merely to designate a particular (and long defunct) government agency, the Board contrasting national symbols with names and acronyms of government agencies: “National symbols’ ... are more enduring in time, ... and immediately conjure up the image of the country as a whole. Symbols of a country take on a special meaning and significance and are not so numerous as to dilute the special meaning and significance that each has.”)

“National symbols” cannot be equated with the “insignia” of nations. As noted in *Liberty Mut. Ins. Co.*, 185 F. Supp. at 908, 127 USPQ at 323:

The Act ... does not put national symbols on a par with the flag, coat of arms, or other insignia of the United States, which may not in any event be made the subject matter of a trade or service mark. With regard to national symbols the statute provides merely that they shall not be disparaged or held up to

contempt or disrepute, and shall not be used as falsely to suggest a connection between the holder of the mark and the symbol.

See [TMEP §1204](#) regarding insignia.

While the prohibition of §2(a) against the registration of matter that may disparage or falsely suggest a connection with national symbols, or bring them into contempt or disrepute, may not be applicable to a particular designation, many names, acronyms, titles, terms, and symbols are protected by other statutes or rules. See [TMEP §1205.01](#) and [Appendix C](#).

### **1203.03(b) Disparagement, Bringing into Contempt, and Bringing into Disrepute**

Section 2(a) prohibits the registration of a mark that consists of or comprises matter that may disparage, or bring into contempt or disrepute, persons, institutions, beliefs, or national symbols. See [TMEP §1203.03\(a\)\(i\)](#) regarding persons, [TMEP §1203.03\(a\)\(ii\)](#) regarding institutions, and [TMEP §1203.03\(a\)\(iii\)](#) regarding national symbols.

In sustaining an opposition on this ground, the Trademark Trial and Appeal Board stated as follows:

Disparagement is essentially a violation of one's right of privacy – the right to be “let alone” from contempt or ridicule. See, *Carson v. Here's Johnny Portable Toilets, Inc.*, 698 F.2d 831, 218 USPQ 1 (6th Cir. 1983). It has been defined as the publication of a statement which the publisher intends to be understood, or which the recipient reasonably should understand, as tending “to cast doubt upon the quality of another's land, chattels, or intangible things.” Restatement (Second) of Torts §629 (1977).

*Greyhound Corp. v. Both Worlds Inc.*, 6 USPQ2d 1635, 1639 (TTAB 1988).

#### **1203.03(b)(i) Elements of a §2(a) Disparagement Refusal**

The Board applies a two-part test in determining whether a proposed mark is disparaging:

- (1) What is the likely meaning of the matter in question, taking into account not only dictionary definitions, but also the relationship of the matter to the other elements in the mark, the nature of the goods or services, and the manner in which the mark is used in the marketplace in connection with the goods or services; and
- (2) If that meaning is found to refer to identifiable persons, institutions, beliefs or national symbols, whether that meaning may be disparaging to a substantial composite of the referenced group.

See *In re Tam*, 108 USPQ2d 1305 (TTAB 2013); *In re Lebanese Arak Corp.*, 94 USPQ2d 1215, 217 (TTAB 2010); *In re Squaw Valley Dev. Co.*, 80 USPQ2d 1264, 1267 (TTAB 2006); *Order Sons of Italy in Am. v. The Memphis Mafia, Inc.*, 52 USPQ2d 1364, 1368 (TTAB 1999); *Harjo v. Pro-Football Inc.*, 50 USPQ2d 1705, 1740-41 (TTAB 1999), *rev'd on other grounds*, 284 F. Supp. 2d 96, 68 USPQ2d 1225 (D.D.C. 2003).

The question of disparagement must be considered in relation to the goods or services identified in the application and the manner of use in the marketplace. The mere fact that a term has several meanings, even when many may be innocuous, does not foreclose the possibility that the term is disparaging. *In re Tam*, 108 USPQ2d at 1310. In *Squaw Valley*, the terms SQUAW and SQUAW ONE were found to be disparaging

when used in connection with clothing in Class 25 and retail store services in the field of sporting goods and equipment and clothing in Class 35, because the likely meaning of “Squaw” is an American Indian woman or wife, and the examining attorney’s evidence established prima facie that a substantial composite of Native Americans would consider the term to be offensive. However, these terms were found not to be disparaging when used in connection with ski-related equipment in Class 28, because the likely meaning of “Squaw” in relation to these goods was deemed to be applicant’s Squaw Valley ski resort. *In re Squaw Valley Dev.*, 80 USPQ2d at 1276-77, 1279, 1282.

In an ex parte case, the examining attorney must make a prima facie showing that a substantial composite of the *referenced group*, although not necessarily a majority, would find the proposed mark, as used on or in connection with the relevant goods or services, to be disparaging in the context of contemporary attitudes. See *In re Tam*, 108 USPQ2d at 1310; *In re Lebanese Arak*, 94 USPQ2d at 1218 (citing *In re Heeb Media LLC*, 89 USPQ2d 1071, 1074 (TTAB 2008)). *In Lebanese Arak*, the Board clarified that when the application of a mark to a product would offend the sensibilities of an ethnic or religious group, the proper ground for refusal is that the matter is disparaging to the members of that group. *In re Lebanese Arak*, 94 USPQ2d at 1217. Moreover, when religious beliefs or tenets are involved, the proper focus is on the group of persons that adhere to those beliefs or tenets. *Id.* The fact that an applicant has good intentions underlying its use of a term does not obviate the fact that a substantial composite of the referenced group would find the term objectionable. *In re Tam*, 108 USPQ2d at 1312 (citing *Heeb Media*, 89 USPQ2d at 1077). The prima facie showing shifts the burden to applicant for rebuttal. *Squaw Valley*, 80 USPQ2d at 1271.

### **1203.03(b)(ii) Disparagement, Bringing into Contempt, and Bringing into Disrepute: Case References**

Disparagement was found in the following cases: *In re Tam*, 108 USPQ2d 1305 (TTAB 2013) (finding THE SLANTS for live performances by a musical band to be disparaging to a substantial composite of people of Asian descent); *In re Lebanese Arak Corp.*, 94 USPQ2d 1215 (TTAB 2010) (finding KHORAN for wines to be disparaging because the public, in general, and Muslim Americans, in particular, would regard the mark as referring to the holy text of Islam, and given that Islamic authorities view alcohol as a prohibited substance, Muslims would find KHORAN used for wine as disparaging to themselves, their religion, and their beliefs); *In re Heeb Media LLC*, 89 USPQ2d 1071 (TTAB 2008) (finding HEEB for clothing and entertainment services to be disparaging since HEEB means a Jewish person, dictionary definitions unanimously support the derogatory nature of HEEB, evidence of record supports that a substantial composite of the referenced group, i.e., the Jewish community, will perceive HEEB as disparaging, and HEEB has no other meaning in relation to clothing or entertainment services); *Boston Red Sox Baseball Club Ltd. P'ship v. Sherman*, 88 USPQ2d 1581 (TTAB 2008) (finding SEX ROD to be disparaging because it is sexually vulgar and offensive and the public will associate it with opposer’s mark RED SOX); *In re Squaw Valley Dev. Co.*, 80 USPQ2d 1264 (TTAB 2006) (finding SQUAW and SQUAW ONE to be disparaging when used in connection with clothing in Class 25 and retail store services in the field of sporting goods and equipment and clothing in Class 35, because the likely meaning of “Squaw” in relation to these goods or services is an American Indian woman or wife, and the examining attorney’s evidence established prima facie that a substantial composite of Native Americans would consider the term to be offensive; however, these terms were found not to be disparaging when used in connection with ski-related equipment in Class 28, because the likely meaning of “Squaw” in relation to these goods was deemed to be applicant’s Squaw Valley ski resort); *Greyhound Corp. v. Both Worlds Inc.*, 6 USPQ2d 1635, 1639-40 (TTAB 1988) (finding design of dog defecating, for clothing, to disparage, and bring into contempt or disrepute, opposer’s running dog symbol, the Board finding the evidence of record “sufficient to show prima facie that this design [the running dog symbol] is, in effect, an alter ego of opposer which points uniquely and unmistakably to opposer’s persona.”); *In re Anti-Communist World Freedom Cong., Inc.*, 161 USPQ 304 (TTAB 1969)

(holding design of an “X” superimposed over a hammer and sickle to disparage, and hold in contempt and disrepute, a national symbol of the U.S.S.R.).

Disparagement was not found in the following cases: *Bd. of Trs. of Univ. of Ala. v. Pitts*, 107 USPQ2d 2001, 2030 (TTAB 2013) (finding HOUNDSTOOTH MAFIA and design for apparel not to be disparaging in view of the incongruous nature of the mark); *Boswell v. Mavety Media Grp. Ltd.*, 52 USPQ2d 1600 (TTAB 1999) (finding BLACK TAIL used on adult entertainment magazines, not to be disparaging of women in general, or African-American women in particular, nor to bring those groups into contempt or disrepute); *Order Sons of Italy in Am. v. Memphis Mafia Inc.*, 52 USPQ2d 1364 (TTAB 1999) (finding THE MEMPHIS MAFIA for entertainment services not to be matter that disparages Italian-Americans or bring them into contempt or disrepute); *In re In Over Our Heads Inc.*, 16 USPQ2d 1653, 1654 (TTAB 1990) (finding MOONIES and design incorporating a “buttocks caricature,” for dolls whose pants can be dropped, not to be disparaging matter that is unregistrable under §2(a), the Board finding that the mark “would, when used on a doll, most likely be perceived as indicating that the doll ‘moons,’ and would not be perceived as referencing members of The Unification Church.”).

### 1203.03(c) False Suggestion of a Connection

Section 2(a) prohibits the registration of a mark that consists of or comprises matter that may falsely suggest a connection with persons, institutions, beliefs, or national symbols. See [TMEP §1203.03\(a\)\(i\)](#) regarding persons, [TMEP §1203.03\(a\)\(ii\)](#) regarding institutions, [TMEP §1203.03\(a\)\(iii\)](#) regarding national symbols, and [TMEP §1203.03](#) for information about the legislative history of §2(a).

#### 1203.03(c)(i) Elements of a §2(a) False Suggestion of a Connection Refusal

To establish that a proposed mark falsely suggests a connection with a person or an institution, it must be shown that:

- 1 the mark is the same as, or a close approximation of, the name or identity previously used by another person or institution;
- 2 the mark would be recognized as such, in that it points uniquely and unmistakably to that person or institution;
- 3 the person or institution named by the mark is not connected with the activities performed by the applicant under the mark; and
- 4 the fame or reputation of the person or institution is such that, when the mark is used with the applicant’s goods or services, a connection with the person or institution would be presumed.

*In re Pedersen*, 109 USPQ 2d 1185, 1188-89 (TTAB 2013); *In re Jackson Int’l Trading Co. Kurt D. Bruhl GmbH & Co. KG*, 103 USPQ2d 1417, 1419 (TTAB 2012); *In re Peter S. Herrick, P.A.*, 91 USPQ2d 1505, 1507 (TTAB 2009); *In re MC MC S.r.l.*, 88 USPQ2d 1378, 1379 (TTAB 2008); *Association Pour La Def. et la Promotion de L’Oeuvre de Marc Chagall dite Comite Marc Chagall v. Bondarchuk*, 82 USPQ2d 1838, 1842 (TTAB 2007); *In re White*, 80 USPQ2d 1654, 1658 (TTAB 2006); *In re White*, 73 USPQ2d 1713, 1718 (TTAB 2004); *In re Nuclear Research Corp.*, 16 USPQ2d 1316, 1317 (TTAB 1990); *Buffett v. Chi-Chi’s, Inc.*, 226 USPQ 428, 429 (TTAB 1985); *In re Cotter & Co.*, 228 USPQ 202, 204 (TTAB 1985); *see Bd. of Trs. of Univ. of Ala. v. Pitts*, 107 USPQ2d 2001, 2025 (TTAB 2013); *see also Univ. of Notre Dame du Lac v. J.C. Gourmet Food Imps. Co.*, 703 F.2d 1372, 1375-77, 217 USPQ 505, 508-10 (Fed. Cir. 1983) (providing foundational principles for the current four-part test used to determine the existence of a false connection).

With regard to the first element, the fact that a term identifies both a particular group of people and the language spoken by some of the members of the group is not evidence that it fails to identify the group. *In re Pedersen*, 109 USPQ 2d at 1190 (Board rejected applicant's argument that because the term LAKOTA identifies a language, it does not approximate the name or identity of a people or institution).

The requirement that the proposed mark would be recognized as pointing uniquely and unmistakably to the person or institution does not mean that the term itself must be unique. Rather, the question is whether, as used on the goods or services in question, consumers would view the mark as pointing uniquely to petitioner, or whether they would perceive it to have a different meaning. *Hornby v. TJX Cos., Inc.*, 87 USPQ2d 1411, 1427 (TTAB 2008) (in granting the petition to cancel registration of the mark TWIGGY, Board found that, at the time of registration in 2000, the mark TWIGGY on children's clothing would be recognized as pointing uniquely and unmistakably to petitioner, who was recognized as a famous British model, and that consumers would presume an association with petitioner). In addition, unassociated third-party use of a term does not in and of itself establish that that the term does not point uniquely or unmistakably to a particular people or institution. *In re Pedersen*, 109 USPQ2d at 1196 (finding consumer exposure to third-party use of LAKOTA on products and services unrelated to applicant's insufficient to show that applicant's use of LAKOTA does not point uniquely to the Lakota people); *Hornby v. TJX Cos.*, 87 USPQ2d at 1427 (finding evidence of third-party registrations showing registration of the term "TWIGGY" for goods unrelated to children's clothing to have "no probative value").

A connection with an entity is established when the record establishes a specific endorsement, sponsorship, or the like of the particular goods and services, whether written or implied. *In re White*, 80 USPQ2d 1654, 1660-61 (TTAB 2006). In *In re Sloppy Joe's Int'l Inc.*, 43 USPQ2d 1350, 1353-54 (TTAB 1997), the Trademark Trial and Appeal Board held that Ernest Hemingway's friendship with the original owner of applicant's bar, his frequenting the bar, and his use of the back room as an office did not establish the kind of "connection" that entitled applicant to register a mark consisting in part of a portrait of Hemingway. Rather, a commercial connection, such as an ownership interest or commercial endorsement or sponsorship of applicant's services would be necessary to entitle the applicant to registration. *Id.*

If it is unclear whether the person or institution is connected with the goods sold or services performed by the applicant, the examining attorney must make an explicit inquiry under 37 C.F.R. §2.61(b).

A refusal on this basis requires, by implication, that the person or institution with which a connection is falsely suggested must be the prior user. *In re Nuclear Research*, 16 USPQ2d at 1317; *In re Mohawk Air Servs. Inc.*, 196 USPQ 851, 854-55 (TTAB 1977). However, it is not necessary that the prior user ever commercially exploit the name as a trademark or in a manner analogous to trademark use. *In re Pedersen*, 109 USPQ2d at 1193. A false suggestion of a connection may be found when the party's right to control the use of its identity is violated, even if there is no juristic entity having the authority to authorize use of the mark. *Id.*

Intent to identify a party or trade on its goodwill is not a required element of a §2(a) claim of false suggestion of an association with such party. *S & L Acquisition Co. v. Helene Arpels, Inc.*, 9 USPQ2d 1221, 1224 (TTAB 1987); *Consol. Natural Gas Co. v. CNG Fuel Sys., Ltd.*, 228 USPQ 752, 754 (TTAB 1985). However, evidence of such an intent could be highly persuasive that the public would make the intended false association. *Univ. of Notre Dame du Lac*, 703 F.2d at 1377, 217 USPQ at 509, *aff'g* 213 USPQ 594 (TTAB 1982); but *see Bd. of Trs. of Univ. of Ala. v. Pitts*, 107 USPQ2d at 2027 (finding the fact that applicants did

not incorporate the exact name or image of the target person into their mark diminished the significance of their admission that they intended the mark, in part, to reference that person).

### **1203.03(c)(ii) Government Agencies and Instrumentalities**

Registration of matter that may falsely suggest a connection with a United States government agency or instrumentality is prohibited under §2(a). See [TMEP §1203.03\(c\)\(i\)](#) (setting out the four-element test). Some names, acronyms, titles, terms, and symbols of United States government agencies or instrumentalities are also protected by separate statute. See [TMEP §1205.01](#) for information about statutorily protected matter and [Appendix C](#) for a nonexhaustive list of United States statutes protecting designations of certain government agencies and instrumentalities. However, if the mark references a United States government agency or instrumentality in such a manner that a connection with it would not be presumed, a refusal may not be necessary. Instead, a disclaimer may be required, if appropriate. See below for a discussion of situations in which a disclaimer is applicable.

Registration must be refused if the nature of the mark and the nature of the goods or services is such that a United States government agency or instrumentality would be presumed to be the source or sponsorship of the applicant's goods or services. *In re Peter S. Herrick, P.A.*, 91 USPQ2d 1505, 1507-08 (TTAB 2009) (finding "U.S. CUSTOMS SERVICE" is a close approximation of the former name of the government agency, United States Customs Service, which is now known as the United States Customs and Border Protection but which is still referred to as the U.S. Customs Service by the public and the agency itself, that the seal design in the proposed mark is nearly identical to the seal used by the former United States Customs Service, that the only meaning the "U.S. Customs Service" has is to identify the government agency, and that a connection between applicant's attorney services and the activities performed by the United States Customs and Border Protection would be presumed); *In re Nat'l Intelligence Acad.*, 190 USPQ 570, 572 (TTAB 1976) (stating NATIONAL INTELLIGENCE ACADEMY, for educational and instructional services in intelligence gathering for law enforcement officers, falsely suggests a connection with the United States government since intelligence gathering is a known function of a number of government agencies and "[a] normal outgrowth and development of such activities would be the training of officers in intelligence gathering"); *In re Teasdale Packing Co.*, 137 USPQ 482 (TTAB 1963) (holding U. S. AQUA and design unregistrable under §2(a) on the ground that purchasers of applicant's canned drinking water would be misled into assuming approval or sponsorship by the United States government in view of the nature of the mark, including a red, white, and blue shield design, and the nature of the goods, the Board noting a program for stocking emergency supplies of water in fallout shelters and the setting of standards for drinking water by United States government agencies).

The record must include evidence showing that the designation in the mark refers to the agency or instrumentality and that the goods or services are such that a connection with that agency or instrumentality would be presumed, particularly when it is not readily apparent that the wording or acronym in the mark refers to the agency or instrumentality. *Compare In re Mohawk Air Serv. Inc.*, 196 USPQ 851, 855 (TTAB 1977) (holding MOHAWK 298, for airplanes, to not falsely suggest a connection with the U.S. Army and the Army's use of the term "Mohawk" to identify one of its airplanes, since there was no evidence of record that the Army continuously used the term since 1958, that the public was aware of such use, or that the public would associate "Mohawk" named airplanes with the U.S. Army), *with In re U.S. Bicentennial Soc'y*, 197 USPQ 905, 906-07 (TTAB 1978) (holding U.S. BICENTENNIAL SOCIETY, for ceremonial swords, to falsely suggest a connection with the American Revolution Bicentennial Commission and the United States government, based on applicant's claims in the specimen of record and the fact that "swords have historically been presented by grateful sovereigns and governments to persons who have been honored by such gifts and that ceremonial swords are on display in the museum at Mt. Vernon").

Furthermore, the question of the registrability of a mark under §2(a) “is determined in each case by the nature of the goods or services in connection with which the mark is used and the impact of such use on the purchasers of goods or services of this type.” *NASA v. Record Chemical Co. Inc.*, 185 USPQ 563, 568 (TTAB 1975). Thus, the identified goods or services must be scrutinized in the context of the current marketplace to determine whether they are of the type to be offered by United States government agencies and instrumentalities. For instance, if the evidence supports a finding that it is commonplace for government agencies to sell or license the sale of consumer merchandise featuring agency names or acronyms, such as clothing, toys, key chains, and calendars, a false connection with a government agency would be presumed if that agency name or acronym is used in connection with those goods and, therefore, the mark should be refused registration under §2(a).

The examining attorney may contact the Trademark Law Library regarding resource materials relating to government agencies and instrumentalities. The examining attorney may also require the applicant to provide additional information about the mark and/or the goods or services, under Trademark Rule 2.61(b). 37 C.F.R. §2.61(b).

Disclaiming the name of, or acronym for, the United States government agency or instrumentality to which the mark refers generally will not overcome the §2(a) refusal. See [TMEP §1213.03\(a\)](#) regarding unregistrable components of marks. If the applicant is the government agency or instrumentality referenced in the mark, no disclaimer of the name or acronym of the agency or instrumentality is necessary because the agency or instrumentality retains the rights to its name or acronym, unless specifically prohibited by statute. A disclaimer of the relevant portion of the mark is required when (i) the applicant is not the government agency or instrumentality referenced in the mark, (ii) the nature of the goods or services is such that the government agency name or acronym is used in a descriptive manner to describe the identified goods or services, and (iii) the mark does not otherwise establish a false connection with the named government agency or instrumentality. For example, the wording “homeland security” in a mark may refer to the United States government agency responsible for handling terrorist threats on American soil or it may be used descriptively to describe actions taken to protect against terrorist attacks. The appropriateness of disclaiming “homeland security” will depend on examination of the mark as a whole in the context of the goods or services of record.

The §2(a) false connection of a suggestion refusal and the procedures stated above also apply to marks containing names of, and acronyms and terms for, United States government programs (e.g., Medicare), military projects (e.g., BigDog), and quasi-government organizations (e.g., Smithsonian Institution), even if such programs, projects, and organizations are not protected by separate statute.

### **1203.03(c)(iii) False Suggestion of a Connection: Case References**

False suggestion of a connection was found in the following cases: *In re Shinnecock Smoke Shop*, 571 F.3d 1171, 91 USPQ2d 1218 (Fed. Cir. 2009) (holding SHINNECOCK BRAND FULL FLAVOR and SHINNECOCK BRAND LIGHTS, both for cigarettes, falsely suggest a connection with the Shinnecock Indian Nation); *In re Sauer*, 27 USPQ2d 1073 (TTAB 1993), *aff'd per curiam*, 26 F.3d 140 (Fed. Cir. 1994) (finding registration of BO BALL for oblong shaped leather ball with white stitching properly refused under §2(a), since use of “Bo” would be recognized by purchasers as reference to football and baseball player Bo Jackson, and there was no connection between Jackson and applicant); *In re Jackson Int'l Trading Co. Kurt D. Bruhl GmbH & Co. KG*, 103 USPQ2d 1417 (TTAB 2012) (affirming §2(a) refusal to register the mark BENNY GOODMAN COLLECTION THE FINEST QUALITY (stylized) for fragrance and cosmetics because the mark falsely suggests a connection with the deceased musician Benny Goodman; the record showed that Benny Goodman's estate has a business representative that grants people the use of his name and/or persona); *In re Peter S. Herrick, P.A.*, 91 USPQ2d 1505 (TTAB 2009) (Board affirmed §2(a) refusal, finding U.S. CUSTOMS SERVICE and seal design for attorney services falsely suggests a connection

with the government agency formerly known as the United States Customs Service and now known as the United States Customs and Border Protection); *Hornby v. TJX Cos., Inc.*, 87 USPQ2d 1411 (TTAB 2008) (affirming refusal of registration of TWIGGY for children's clothing, on the ground that it would falsely suggest a connection with the internationally known British model and actress who was a major celebrity in the late 1960s, finding that she retained a sufficient degree of fame or reputation that a connection would still be presumed by consumers seeing the mark TWIGGY on children's clothing as of the date on which respondent's registration issued in 2000); *Association Pour La Def. et la Promotion de L'Oeuvre de Marc Chagall dite Comite Marc Chagall v. Bondarchuk*, 82 USPQ2d 1838 (TTAB 2007) (granting petition to cancel registration of MARC CHAGALL for vodka because the totality of the evidence of record established a false suggestion of a connection with the painter Marc Chagall); *In re White*, 80 USPQ2d 1654 (TTAB 2006) (affirming refusal of MOHAWK for cigarettes under §2(a), on the ground that it would falsely suggest a connection with the federally recognized tribe the St. Regis Band of Mohawk Indians of New York); *In re White*, 73 USPQ2d 1713 (TTAB 2004) (holding APACHE, for cigarettes, falsely suggests a connection with the nine federally recognized Apache tribes); *In re Urbano*, 51 USPQ2d 1776 (TTAB 1999) (holding SYDNEY 2000, used for advertising and business services and communication services, falsely suggests connection with Olympic Games, since general public would recognize phrase as referring unambiguously to Olympic Games to be held in Sydney, Australia, in 2000; entire organization that comprises Olympic games qualifies as "institution."); *In re N. Am. Free Trade Ass'n*, 43 USPQ2d 1282 (TTAB 1997) (holding NAFTA, used on "promotion of trade and investment" services, falsely suggests connection with North American Free Trade Agreement; NAFTA qualifies as institution because it encompasses treaty, supplemental agreements, and various commissions, committees and offices created by those documents); *In re Sloppy Joe's Int'l Inc.*, 43 USPQ2d 1350 (TTAB 1997) (holding use of mark SLOPPY JOE'S, with design that includes portrait of Ernest Hemingway, falsely suggests connection with deceased writer); *Bd. of Tr. of Univ. of Alabama v. BAMA-Werke Curt Baumann*, 231 USPQ 408 (TTAB 1986) (granting petition to cancel registration of BAMA, for shoes, slippers, stockings, socks, and insoles, and finding that the evidence of record indicated that BAMA points uniquely to the University of Alabama and thus falsely suggests a connection with the University); *In re Cotter & Co.*, 228 USPQ 202 (TTAB 1985) (holding WESTPOINT, for shotguns and rifles, to falsely suggest a connection with an institution, the United States Military Academy); *Buffett v. Chi-Chi's, Inc.*, 226 USPQ 428 (TTAB 1985) (denying applicant's motion for summary judgment since evidence of record supported an association of MARGARITAVILLE with the public persona of opposer Jimmy Buffett); *In re U.S. Bicentennial Soc'y*, 197 USPQ 905 (TTAB 1978) (holding U.S. BICENTENNIAL SOCIETY, for ceremonial swords, to falsely suggest a connection with the American Revolution Bicentennial Commission and the United States government); *In re Nat'l Intelligence Acad.*, 190 USPQ 570 (TTAB 1976) (holding NATIONAL INTELLIGENCE ACADEMY, for educational and instructional services in intelligence gathering for law enforcement officers, to falsely suggest a connection with the United States government); *In re Nat'l Collection & Credit Control*, 152 USPQ 200 (TTAB 1966) (holding the word "national" along with an outline representation of the United States or a representation of an eagle used for collection and credit services falsely suggests a connection with United States government).

False suggestion of a connection was not found in the following cases: *Univ. of Notre Dame du Lac v. J.C. Gourmet Food Imps. Co.*, 703 F.2d 1372, 1377, 217 USPQ 505, 509 (Fed. Cir. 1983), *aff'g* 213 USPQ 594 (TTAB 1982) (holding NOTRE DAME and design, for cheese, not to falsely suggest a connection with the University of Notre Dame. "As the Board noted, 'Notre Dame' is not a name solely associated with the University. It serves to identify a famous and sacred religious figure and is used in the names of churches dedicated to Notre Dame, such as the Cathedral of Notre Dame in Paris, France. Thus it cannot be said that the only 'person' which the name possibly identifies is the University and that the mere use of NOTRE DAME by another appropriates its identity."); *Bd. of Trs. of Univ. of Ala. v. Pitts*, 107 USPQ2d 2001, 2028 (TTAB 2013) (finding opposers failed to prove the mark HOUNDSTOOTH MAFIA, displayed on a houndstooth-patterned background, falsely suggests a connection with the University of Alabama or Coach

Bryant); *In re MC MC S.r.l.*, 88 USPQ2d 1378, 1381 (TTAB 2008) (reversing §2(a) refusal of MARIA CALLAS for jewelry and other goods, because the record contained contradictory evidence as to the existence of anyone currently possessing rights in the name “Maria Callas,” and resolving doubt in favor of applicant “removes the possibility that we might be denying registration to an applicant based on non-existent rights,” and because a person or entity claiming rights in a name or persona has recourse since §2(a) is not time barred); *In re Los Angeles Police Revolver & Athletic Club, Inc.*, 69 USPQ2d 1630 (TTAB 2004) (holding slogan TO PROTECT AND TO SERVE, used by applicant Los Angeles Police Revolver and Athletic Club, Inc., does not *falsely* suggest a connection with the Los Angeles Police Department, where evidence showed an actual longstanding commercial connection, publicly acknowledged and endorsed by both parties); *Internet Inc. v. Corp. for Nat’l Research Initiatives*, 38 USPQ2d 1435 (TTAB 1996) (holding cancellation petitioners failed to state claim for relief where they have not alleged, and cannot reasonably allege, that the term INTERNET points uniquely and unmistakably to their own identity or persona); *Ritz Hotel Ltd. v. Ritz Closet Seat Corp.*, 17 USPQ2d 1466, 1471 (TTAB 1990) (holding RIT-Z in stylized form, for toilet seats, not to falsely suggest a connection with opposer, the Board observing that there was “no evidence of record directed to showing a connection of applicant’s mark with opposer corporation, The Ritz Hotel Limited”); *In re Nuclear Research Corp.*, 16 USPQ2d 1316 (TTAB 1990) (holding NRC and design, for radiation and chemical agent monitors, electronic testers, and nuclear gauges, not to falsely suggest a connection with the U.S. Nuclear Regulatory Commission in view of applicant’s use of NRC long prior to the inception of that agency); *NASA v. Bully Hill Vineyards, Inc.*, 3 USPQ2d 1671, 1676 (TTAB 1987) (dismissing opposition to the registration of SPACE SHUTTLE for wines and finding “shuttle” to be a generic term for a space vehicle or system. “Where a name claimed to be appropriated does not point uniquely and unmistakably to that party’s personality or ‘persona,’ there can be no false suggestion.”); *In re Mohawk Air Serv. Inc.*, 196 USPQ 851 (TTAB 1977) (holding MOHAWK 298 to not falsely suggest a connection with the U.S. Army and the Army’s use of the term “Mohawk” to identify one of its airplanes, since there was no evidence of record that the Army continuously used that term since 1958, that the public is aware of such use, or that the public would associate “Mohawk” named airplanes with the Army); *NASA v. Record Chem. Co. Inc.*, 185 USPQ 563 (TTAB 1975) (dismissing opposition to registrations of APOLLO 8 for moth preventatives and mothproofing agent-air freshener because, while NASA is a juristic person and prior user of the terms APOLLO and APOLLO 8 for its space missions, it is unlikely that the average purchaser of applicant’s goods would assume NASA to be source or sponsorship of the goods or mistakenly believe that the goods are of NASA space exploration technology); *FBI v. Societe: “M.Brill & Co.”*, 172 USPQ 310 (TTAB 1971) (dismissing opposition to registration of FBI FABRICATION BRIL INTERNATIONAL for clothing since it is unreasonable that the public would assume applicant’s goods originate with, are sponsored or endorsed by, or associated with the Federal Bureau of Investigation, finding that “FBI” represents “Fabrication Brill International” and purchasers will see the entire composite mark on the goods and not just “FBI,” and noting that both the United States government and the Federal Bureau of Investigation are juristic persons); *In re Horwitt*, 125 USPQ 145, 146 (TTAB 1960) (holding U. S. HEALTH CLUB registrable for vitamin tablets. “Considering both the nature of the mark and the goods, it is concluded that the purchasing public would not be likely to mistakenly assume that the United States Government is operating a health club, that it is distributing vitamins, or that it has approved applicant’s goods.”); *Lucien Piccard Watch Corp. v. Since 1868 Crescent Corp.*, 314 F. Supp. 329, 165 USPQ 459 (S.D.N.Y. 1970) (holding DA VINCI not to falsely suggest a connection with the deceased artist Leonardo Da Vinci).

## **1204 Refusal on Basis of Flag, Coat of Arms, or Other Insignia of United States, State or Municipality, or Foreign Nation**

*15 U.S.C. §1052 (Extract)*

No trademark by which the goods of the applicant may be distinguished from the goods of others shall be refused registration on the principal register on account of its nature unless it ... (b) Consists of or comprises the flag or coat of arms or other insignia of the United States, or of any State or municipality, or of any foreign nation, or any simulation thereof.

Section 2(b) of the Trademark Act, 15 U.S.C. §1052(b), bars the registration on either the Principal Register or the Supplemental Register of marks that consist of or comprise (whether consisting solely of, or having incorporated in them) the flag, coat of arms, or other insignia of the United States, of any state or municipality, or of any foreign nation. Moreover, registration of all such official insignia is barred regardless of the identity of the applicant, that is, the statutory prohibition allows no exception even when the applicant is a government entity seeking to register its own flag, coat of arms, or other insignia. *In re City of Houston*, 731 F.3d 1326, 108 USPQ2d 1226 (Fed. Cir. 2013).

Section 2(b) also bars the registration of marks that consist of or comprise any simulation of such symbols. “Simulation” refers to “something that gives the appearance or effect or has the characteristics of an original item.” Whether a mark comprises a simulation must be determined from a visual comparison of the proposed mark vis-à-vis replicas of the flag, coat of arms, or other insignia in question. *In re Waltham Watch Co.*, 179 USPQ 59, 60 (TTAB 1973). Focus must be on the general recollection of the flag or insignia by purchasers, “without a careful analysis and side-by-side comparison.” *In re Advance Indus. Sec., Inc.*, 194 USPQ 344, 346 (TTAB 1977).

The incorporation in a mark of individual or distorted features that are merely suggestive of flags, coats of arms, or other insignia does not bar registration under §2(b). *See Knorr-Nahrmittel A.G. v. Havland Int’l, Inc.*, 206 USPQ 827, 833 (TTAB 1980) (holding flag designs incorporated in the proposed mark NOR-KING and design not recognizable as the flags of Denmark, Norway, and Sweden, the Board finding that “[a]ll that the record reflects is that the mark contains a representation of certain flags, but not the flag or flags of any particular nation”); *Advance Indus. Sec.*, 194 USPQ at 346 (finding proposed mark comprising a gold and brown triangular shield design with the words “ADVANCE SECURITY” predominately displayed in the upper central portion of the mark “creates an overall commercial impression distinctly different from the Coat of Arms”); *Waltham Watch Co.*, 179 USPQ at 60 (finding mark comprising wording with the design of a globe and flags not to be a simulation of the flags of Switzerland and Great Britain, the Board stating that “although the flags depicted in applicant’s mark incorporate common elements of flag designs such as horizontal or vertical lines, crosses or stars, they are readily distinguishable from any of the flags of the nations alluded to by the examiner.”).

Section 2(b) differs from the provision of §2(a) regarding national symbols ( *see* [TMEP §1203.03\(b\)](#)) in that §2(b) requires no additional element, such as disparagement or a false suggestion of a connection, to preclude registration.

## **1204.01 Flags and Simulations of Flags**

### **1204.01(a) Flags and Simulations of Flags are Refused**

Registration must be refused under §2(b) if the design sought to be registered includes a true representation of the flag of the United States, any state, municipality, or foreign nation, or is a simulation thereof. A refusal must be issued if the design would be perceived by the public as a flag, regardless of whether other matter appears with or on the flag. The examining attorney should consider the following factors, in regard to both color drawings and black-and-white drawings, to determine whether the design is perceived as a flag: (1) color; (2) presentation of the mark; (3) words or other designs on the drawing; and (4) use of the mark on the specimen(s).

Generally, a refusal should be made where a black-and-white drawing contains unmistakable features of the flag, contains features of the flag along with indicia of a nation, or is shown on the specimen in the appropriate colors of that national flag. For example, merely amending a "red, white, and blue" American

flag to a black-and-white American flag will not overcome a §2(b) refusal. However, black-and-white drawings of flags that consist only of common geometric shapes should not be refused unless there are other indicia of the country on the drawing or on the specimens. For example, a black-and-white drawing showing three horizontal rectangles would not be refused as the Italian or French flag unless there is something else on the drawing or on the specimen that supports the refusal.

*Examples of Situations Where Registration Should Be Refused.* The following are examples of situations where registration should be refused, because all significant features of the flag are present or a simulation of the flag is used with state or national indicia:

The wording "That's Italian" emphasizes that the banner design is a simulation of a flag.

**SWISS  
GUARD**

This design is refused because the word SWISS emphasizes that the design is intended to be a simulation of the Swiss flag.

This black-and-white mark is refused because the word Texas emphasizes that the design is intended to be the state flag of Texas.

See [TMEP §§1205.01\(d\)-1205.01\(d\)\(iii\)](#) regarding procedures for marks containing the Swiss Confederation coat of arms or flag.

### **1204.01(b) Stylized Flag Designs are not Refused under §2(b)**

Marks containing elements of flags in a stylized or incomplete form are not refused under §2(b). The mere presence of some significant elements of flags, such as stars and stripes (U.S. flag) or a maple leaf (Canadian flag), does not necessarily warrant a refusal.

If the flag design fits one of the following scenarios, the examining attorney should not refuse registration under §2(b):

- The flag design is used to form a letter, number, or design.
- The flag is substantially obscured by words or designs.
- The design is not in a shape normally seen in flags.
- The flag design appears in a color different from that normally used in the national flag.
- A significant feature is missing or changed.

*Examples.* The following are examples of stylized designs that are registrable under §2(b):

*Flag Forms Another Design, Number, or Letter - No §2(b) Refusal*

*Flag Is Substantially Obscured By Other Matter - No §2(b) Refusal*

*Flag Design Is Not In the Normal Flag Shape - No §2(b) Refusal*

*Significant Feature of the Flag Is In a Different Color - No §2(b) Refusal*

NOTE: Stripes in flag are red, white, and green.

Significant Feature Is Changed - No §2(b) Refusal

### 1204.01(c) Caselaw Interpreting "Simulation of Flag"

The Trademark Trial and Appeal Board found that no simulation of a flag existed in the following cases: *In re Am. Red Magen David for Israel*, 222 USPQ 266, 267 (TTAB 1984) ("As to the State of Israel, it is noted that the flag of that nation consists essentially of a light blue Star of David on a white background. In the absence of any evidence that the State of Israel is identified by a six-pointed star in any other color, we conclude that only a light blue six-pointed star would be recognized as the insignia thereof."); *In re Health Maint. Orgs., Inc.*, 188 USPQ 473 (TTAB 1975) (holding dark cross, with legs of equal length, having a

caduceus symmetrically imposed thereon sufficiently distinctive from Greek red cross and flag of Swiss Confederation).

#### **1204.01(d) Description of the Mark**

The description of the mark should make it clear that the design is a stylized version of the national flag, if accurate. For example, a statement that "the mark consists of the stylized American flag" or "the mark consists of the stylized American flag in the shape of the letters USA" are acceptable descriptions.

#### **1204.01(e) Flags Not Presently Used as National Flags**

Flags of former countries, states, or municipalities are not refused under §2(b). For example, the flags of now non-existent countries such as the German Democratic Republic (East Germany) or Yugoslavia are not refused. However, former flags of existing countries, states, or municipalities are refused under §2(b). For example, the original flag of the United States representing the 13 colonies should be refused.

### **1204.02 Government Insignia**

#### **1204.02(a) Designs that are Insignia Under §2(b) Must Be Refused**

Flags and coats of arms are specific designs formally adopted to serve as emblems of governmental authority. The wording "other insignia" should not be interpreted broadly, but should be considered to include only those emblems and devices that also represent governmental authority and that are of the same general class and character as flags and coats of arms.

The following are insignia of the United States for purposes of §2(b):

- Great Seal of the United States
- Presidential Seal
- Seals of Government Agencies

The Trademark Trial and Appeal Board has construed the statutory language as follows:

[T]he wording "or other insignia of the United States" must be restricted in its application to insignia of the same general class as "the flag or coats of arms" of the United States. Since both the flag and coat or [sic] arms are emblems of national authority it seems evident that other insignia of national authority such as the Great Seal of the United States, the Presidential Seal, and seals of government departments would be equally prohibited registration under Section 2(b). On the other hand, it appears equally evident that department insignia which are merely used to identify a service or facility of the Government are not insignia of national authority and that they therefore do not fall within the general prohibitions of this section of the Statute.

*In re U.S. Dep't of the Interior*, 142 USPQ 506, 507 (TTAB 1964) (finding logo comprising the words "NATIONAL PARK SERVICE" and "Department of the Interior," with depiction of trees, mountains, and a buffalo, surrounded by an arrowhead design, not to be an insignia of the United States). The Trademark Trial and Appeal Board reaffirmed this interpretation in *In re Peter S. Herrick, P.A.*, 91 USPQ2d 1505

(TTAB 2009), by affirming the §2(b) refusal since applicant's seal design was virtually identical to the seal used by the United States Department of the Treasury.

### **1204.02(b) Examples of Insignia That Should Be Refused**

*Examples:* The following are examples of insignia that should be refused under §2(b):

#### **Great Seal of the United States**

#### **Seal of The President of The United States**

**The Official Seal of a Government Agency****1204.02(c) Examples of Designs That Should Not Be Refused**

Designs that do not rise to the level of being "emblems of national authority" should not be refused. The following are examples of designs that are not barred from registration under §2(b):

Designs That Identify Governmental Departments - No §2(b) Refusal

Monuments, Statues, Buildings - No §2(b) Refusal

Objects Used By The Government - No §2(b) Refusal

*Words or Initials that Identify People or Departments in The Government - No §2(b) Refusal*

- U.S. Park Ranger
- U.S. Department of Transportation
- DOD - Department of Defense

### **1204.02(d) Caselaw Interpreting Insignia Under §2(b)**

The following cases provide examples of matter that was held *not* to be government insignia under §2(b):

- (1) *Department insignia that shows a service or facility of a federal department* are not refused registration under §2(b). See *In re United States Dep't of the Interior*, 142 USPQ 506, 507 (TTAB 1964) (finding insignia of the National Park Service registrable).
- (2) *Monuments, statues, or buildings associated with the United States such as the White House, Washington Monument, and Statue of Liberty*, are not refused registration under §2(b). See *Liberty Mut. Ins. Co. v. Liberty Ins. Co. of Texas*, 185 F. Supp. 895, 908, 127 USPQ 312, 323 (E.D. Ark. 1960) ("That the Statue of Liberty is not a part of the 'insignia of the United States' is too clear to require discussion.").
- (3) *Designs of objects used by the U.S. government* are not refused registration under §2(b). See *In re Brumberger Co., Inc.*, 200 USPQ 475 (TTAB 1978) (finding representation of the U.S. mailbox was not to be an insignia of the United States. However, the Board affirmed a refusal to register the mark under §2(a) because of a false connection with the United States Postal Service).
- (4) *Initials or words that identify people or departments of a government agency*. Letters that merely identify people and things associated with a particular agency or department of the United States government, instead of representing the authority of the government or the nation as a whole, are generally not considered to be "insignia of the United States" within the meaning of §2(b). See *U.S. Navy v. United States Mfg. Co.*, 2 USPQ2d 1254 (TTAB 1987) (finding USMC, the initials of the Marine Corps, which is part of the Navy, which itself is within the Department of Defense, cannot be construed as an "other insignia of the United States" under §2(b) of the Lanham Act). Note: As a result of the enactment of Public Law 98 525 on October 19, 1984, the initials, seal, and emblem of the United States Marine Corps are "deemed to be insignia of the United States," under 10 U.S.C.

§7881, pertaining to unauthorized use of Marine Corps insignia. However, “USMC” was not so protected when the applicant began using its stylized version of those letters as a mark. In view of the provision in Public Law 98-525 that the amendments adding Chapter 663 (10 U.S.C. §7881) shall not affect rights that vested before the date of its enactment, the majority of the Board found that enactment of the law did not adversely affect the mark’s registrability, stating that “opposer has not shown that applicant’s mark was an insignia of the United States prior to the law making it one, or that the law effectively bars registration to applicant.” *Id.* at 1260.

### 1204.03 Other Refusals May be Appropriate

Marks that are not barred by §2(b) may be refused if prohibited by other sections of the Trademark Act. For example, a design may not be an insignia under §2(b) but may be refused under §2(a). *See, e.g., In re Brumberger Co., Inc.*, 200 USPQ 475 (TTAB 1978) (finding representation of the U.S. mailbox was not an insignia under §2(b) but was properly refused under §2(a) because it falsely suggested a connection with the United States Postal Service). Likewise, §2(d) may be a bar to registering a stylized flag that is not prohibited under §2(b).

See also [TMEP §1205.01](#) and [TMEP Appendix C](#) regarding subject matter that is protected by statute.

### 1204.04 Responding to §2(b) Refusal

#### 1204.04(a) Absolute Bar to Registration

Because §2(b) provides an absolute bar to registration, a disclaimer of the prohibited flag or insignia or an amendment to seek registration under §2(f) or on the Supplemental Register will not overcome a refusal.

The statute does not list any exceptions that would allow for countries, states, or municipalities to register their own flags or insignia. Applications for marks that contain flags, coats of arms, or government insignia, even if filed by the relevant state, country, or municipality, must be refused.

#### 1204.04(b) Deletion of §2(b) Matter

*Section 1 Applications.* The deletion of the unregistrable §2(b) matter, which no party can have trademark rights in, will not be considered a material alteration if the matter is separable from the other elements in the mark, e.g., if the flag design is spatially separated from other matter in the mark or is used as a background for other words or designs. If the flag is deleted from the drawing, the specimen that shows the flag is still acceptable. The examining attorney must ensure that the design search codes are corrected whenever a change is made to the drawing.

No deletion is allowed if the flag design is integrated into the overall mark in such a way that deletion would significantly change the commercial impression of the mark.

An amendment to the drawing showing the outline of the flag design absent the interior material is not permitted. Amending the mark from a national, state, or municipal flag to a blank flag changes the commercial impression of how the mark is used, or intended to be used, in commerce.

*Section 44 Applications.* Amendments to the drawing to delete §2(b) matter are not permitted because the drawing must be a substantially exact representation of the mark as registered in the foreign country. [TMEP §1011.01](#).

*Section 66(a) Applications.* Amendments to the drawing to delete the §2(b) matter are not permitted because the Madrid Protocol does not permit the amendment of a mark in an international registration. [TMEP §807.13\(b\)](#).

### 1204.04(b)(i) Examples of Matter That May and May Not Be Deleted

*The Flag Design May Be Deleted If It Is A Separable Element:*

*The Flag May Not Be Deleted If It Is Integrated Into the Overall Design:*

## 1204.05 Resources

### *Internet Evidence*

Many useful websites present images of national and state flags, government insignia, and coats of arms:

#### *Flags of Foreign Nations:*

- <http://www.50states.com/flag/>

#### *Insignia:*

- Great Seal of the United States <http://www.greatseal.com/>
- Seal of the President of the United States  
[http://en.wikipedia.org/wiki/Seal\\_of\\_the\\_President\\_of\\_the\\_United\\_States](http://en.wikipedia.org/wiki/Seal_of_the_President_of_the_United_States)
- Seals of Government departments - see specific agency website

*Coat of Arms - Gallery of Coats of Arms:*

- [http://en.wikipedia.org/wiki/Coat\\_of\\_arms](http://en.wikipedia.org/wiki/Coat_of_arms)

*Non Registration Data: X-Search and TESS*

Article 6 *ter* of the Paris Convention provides for the notification of flags, coats of arms, and national insignia of member countries. When the USPTO receives notification under Article 6 *ter* from the IB, they are assigned serial numbers in the "89" series code, i.e., serial numbers beginning with the digits "89," and are sometimes referred to as "non-registrations." These designs may indicate whether the matter presented for registration in the application under review is a flag, coat of arms, or insignia of a foreign government. See [TMEP §1205.02](#).

## 1205 Refusal on Basis of Matter Protected by Statute or Convention

### 1205.01 Statutory Protection

Various federal statutes and regulations prohibit or restrict the use of certain words, names, symbols, terms, initials, marks, emblems, seals, insignia, badges, decorations, medals, and characters adopted by the United States government, including any agency or instrumentality thereof, or particular national and international organizations. These designations are reserved for the specific purposes prescribed in the relevant statute and must be free for use in the prescribed manner. See [Appendix C](#) for a nonexhaustive list of United States statutes protecting designations of certain government agencies and instrumentalities.

For example, Congress has created statutes that grant exclusive rights to use certain designations to federally created private corporations and organizations. Violation of some of these statutes may be a criminal offense, *e.g.*, 18 U.S.C. §§705 (regarding badges, medals, emblems, or other insignia of veterans' organizations); 707 (4-H Club); 711 ("Smokey Bear"); and 711a ("Woodsy Owl" and slogan, "Give a Hoot, Don't Pollute"). Other statutes provide for civil enforcement, *e.g.*, 36 U.S.C. §§153104 (National Society of the Daughters of the American Revolution); 30905 (Boy Scouts); 80305 (Girl Scouts); 130506 (Little League); and 21904 (The American National Theater and Academy).

The following are examples of the protection of words and symbols by statute:

- (1) The Copyright Act of 1976 includes provisions regarding the use of appropriate notices of copyright. 17 U.S.C. §§101-1332. These include provisions concerning the use of the letter "C" in a circle – ©, the word "Copyright" and the abbreviation "Copr." to identify visually perceptible copies (17 U.S.C. §401); the use of the letter "P" in a circle to indicate phonorecords of sound recordings (17 U.S.C. §402); and the use of the words "mask work," the symbol \*M\* and the letter "M" in a circle to designate mask works (17 U.S.C. §909). The Copyright Act designates these symbols to indicate that the user of the symbol is asserting specific statutory rights.
- (2) Red Cross Emblem or the designations "Red Cross" and "Geneva Cross": Under 18 U.S.C. §706, the use of the Red Cross emblem as well as the designations "Red Cross" and "Geneva Cross," or any imitation thereof, is prohibited except by the American National Red Cross, and by sanitary and hospital authorities of the armed forces of the United States. The statute carves out an exception for use of any such emblem, sign, insignia, or words that were lawfully used on or before June 25, 1948. See *In re Health Maint. Orgs., Inc.*, 188 USPQ 473 (TTAB 1975) (holding mark comprising a dark cross with legs of equal length on which a caduceus is symmetrically imposed (representation of

- caduceus disclaimed) registrable, the Board finding the mark readily distinguishable from the Greek red cross (on white background) and the Swiss confederation coat of arms (white cross on red background)). See [TMEP §§1205.01\(c\)–1205.01\(c\)\(iv\)](#) for further information.
- (3) False advertising or misuse of names to indicate a federal agency is proscribed by 18 U.S.C. §709. For example, this provision prohibits knowing use, without written permission of the Director of the Federal Bureau of Investigation, of the words “Federal Bureau of Investigation,” the initials “F.B.I.” or any colorable imitation, in various formats “in a manner reasonably calculated to convey the impression that such advertisement, ... publication, ... broadcast, telecast, or other production, is approved, endorsed, or authorized by the Federal Bureau of Investigation.” Thus, an examining attorney must refuse to register such matter, pursuant to 18 U.S.C. §709, if its use is reasonably calculated to convey an approval, endorsement, or authorization by the Federal Bureau of Investigation.
  - (4) Section 110 of the Amateur Sports Act of 1978, 36 U.S.C. §220506, protects various designations associated with the Olympics. The United States Supreme Court has held that the grant by Congress to the United States Olympic Committee of the exclusive right to use the word “Olympic” does not violate the First Amendment. *San Francisco Arts & Athletics, Inc. v. U.S. Olympic Committee*, 483 U.S. 522, 3 USPQ2d 1145 (1987) (concerning petitioner’s use of “Gay Olympic Games”). See [TMEP §§1205.01\(b\)–1205.01\(b\)\(vii\)](#) for information about marks comprising Olympic matter.
  - (5) In chartering the Blinded Veterans Association, Congress granted it the sole right to use its name and such seals, emblems, and badges as it may lawfully adopt. 36 U.S.C. §30306. This protection of its exclusive right to use “Blinded Veterans Association” does not extend to the term “blinded veterans,” which has been found generic. *Blinded Veterans Ass’n v. Blinded Am. Veterans Found.*, 872 F.2d 1035, 10 USPQ2d 1432 (D.C. Cir. 1989).
  - (6) *Red Crescent Emblem, Third Protocol Emblem, or the designations “Red Crescent” and “Third Protocol Emblem.”* Under 18 U.S.C. §706a, the use of the distinctive emblems the Red Crystal and the Red Crescent, as well as the designations “Third Protocol Emblem” and “Red Crescent,” or any imitation thereof, is prohibited, except by those authorized to wear, display, or use them under the provisions of the Geneva Conventions. The statute carves out an exception for use of any emblem, sign, insignia, or words which were lawfully used on or before December 8, 2005, if use of these would not appear in time of armed conflict to confer the protections of the Geneva Conventions of August 12, 1949. See [TMEP §§1205.01\(a\)–1205.01\(a\)\(vi\)](#) for further information.
  - (7) *Swiss Confederation Coat of Arms.* Under 18 U.S.C. §708, use of the Swiss Confederation coat of arms as a trademark or for any other commercial purpose is prohibited. Because the statute does not specify any authorized users, no one may lawfully use the coat of arms as a trademark or service mark in the United States, unless the mark was in use on or before August 31, 1948. See *In re Health Maint. Orgs., Inc.*, 188 USPQ 473 (TTAB 1975) (holding mark comprising a dark cross with legs of equal length on which a caduceus is symmetrically imposed (representation of caduceus disclaimed) registrable, the Board finding the mark readily distinguishable from the Greek red cross (on white background) and the Swiss confederation coat of arms (white cross on red background)). See [TMEP §§1205.01\(d\)–1205.01\(d\)\(iii\)](#) for further information.

Usually, the statute will define the appropriate use of a designation and will prescribe criminal penalties or civil remedies for improper use. However, the statutes themselves do not provide the basis for refusal of trademark registration. To determine whether registration should be refused in a particular application, the examining attorney should consult the relevant statute to determine the function of the designation and its appropriate use. If a statute provides that a specific party or government agency has the exclusive right to use a designation, and a party other than that specified in the statute has applied to register the designation, the examining attorney must refuse registration on the ground that the mark is not in lawful use in commerce, citing §§1 and 45 of the Trademark Act, 15 U.S.C. §§1051 and 1127, in addition to the relevant statute.

Depending on the nature and use of the mark, other sections of the Trademark Act may also bar registration and must be cited where appropriate. For example, it may be appropriate for the examining attorney to refuse registration under §2(a) of the Trademark Act, 15 U.S.C. §1052(a), on the ground that the mark comprises matter that may falsely suggest a connection with a person, institution, belief, or national symbol specified in the statute (e.g., the United States Olympic Committee). See [TMEP §§1203.03\(c\)–1203.03\(c\)\(iii\)](#). Other §2(a) bases for refusal could also apply. See [TMEP §§1203–1203.03\(c\)\(iii\)](#). It may be appropriate to refuse registration under §2(b), 15 U.S.C. §1052(b), for matter that comprises a flag, coat of arms, or other similar insignia. See [TMEP §1204](#). It may be appropriate to refuse registration under §2(d), 15 U.S.C. §1052(d), if the party specified in the statute owns a registration for a mark that is the same or similar.

In some instances, it may be appropriate for the examining attorney to refuse registration pursuant to §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127, on the ground that the subject matter would not be perceived as a trademark. For service mark applications, §3 of the Act, 15 U.S.C. §1053, must also be cited as a basis for refusal.

To determine what action is appropriate, the examining attorney should look to the particular use of a symbol or term by the applicant. For example, where it is evident that the applicant has merely included a copyright symbol in the drawing of the mark inadvertently, and the symbol is not a material portion of the mark, the examining attorney must indicate that the symbol is not part of the mark and require that the applicant amend the drawing to remove the symbol, instead of issuing statutory refusals of the types noted above.

Examining attorneys should also consider whether registration of matter comprised in whole or in part of designations notified pursuant to Article 6 *ter* of the Paris Convention and entered into the USPTO's search records may be prohibited by §§2(a) and 2(b) of the Trademark Act, 15 U.S.C. §§1052(a) and 1052(b). See [TMEP §1205.02](#).

### **1205.01(a) Examination Procedures for Marks Comprising a Red Crystal or Red Crescent on a White Background, or the Phrases “Red Crescent” or “Third Protocol Emblem”**

On December 8, 2005, the United States signed the Third Protocol Additional to the 1949 Geneva Conventions relating to the Adoption of an Additional Distinctive Emblem (the “Protocol”). The Protocol creates two new distinctive emblems: (1) the Third Protocol Emblem, composed of a red diamond on a white background (shown below); and (2) the Red Crescent, composed of a red crescent on a white background (shown below).

Effective January 12, 2007, Public Law 109-481, 120 Stat. 3666, created a new criminal statutory provision, 18 U.S.C. §706a, to prohibit the use of the distinctive emblems the Red Crystal and the Red Crescent, or any imitation thereof, as well as the designations “Third Protocol Emblem” and “Red Crescent,” except by those authorized to wear, display, or use them under the provisions of the Geneva Conventions. Geneva Distinctive Emblems Protection Act of 2006, Pub. L. No. 109-481, 120 Stat. 3666 (2007). The statute carves out an exception for use of any such emblem, sign, insignia, or words that were lawfully used on or before December 8, 2005, if use of these would not appear in time of armed conflict to confer the protections of the Geneva Conventions of August 12, 1949. *Id.* The provisions of 18 U.S.C. §706a closely mirror the existing provision in 18 U.S.C. §706 for the American National Red Cross ( [see TMEP §1205.01](#)).

#### **1205.01(a)(i) First Use After December 8, 2005**

If a party other than an authorized party (see [TMEP §1205.01\(a\)\(vi\)](#) for definition of authorized party) applies to register the Red Crescent, the Third Protocol Emblem, or the designation “Red Crescent” or “Third Protocol Emblem,” and claims a date of first use in commerce after December 8, 2005, the examining attorney must refuse registration under §2(a) of the Trademark Act, 15 U.S.C. §1052(a), on the ground that the mark comprises matter that may falsely suggest a connection with the International Federation of Red Cross and Red Crescent Societies and/or other authorized parties under the statute. *See* 18 U.S.C. §706a; [TMEP §1203.03\(e\)](#). The examining attorney must provide appropriate supporting evidence for the refusal. In addition, a refusal must also be made on the ground that the mark is not in lawful use in commerce, citing §§1 and 45 of the Trademark Act, 15 U.S.C. §§1051 and 1127.

When examining specimens of use for such designations, the examining attorney should also consider issuing a refusal under §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127, on the ground that the subject matter would not be perceived as a trademark or, in the case of services, §§1, 2, 3, and 45 of the Act, 15 U.S.C. §§1051, 1052, 1053, and 1127, as appropriate. *See* [TMEP §1202](#).

#### **1205.01(a)(ii) First Use On or Before December 8, 2005 – Grandfather Clause**

Registration of the Red Crescent, the Third Protocol Emblem, or the designation “Red Crescent” or “Third Protocol Emblem” need not be refused where, in an application under §1 of the Trademark Act, 15 U.S.C. §1051, the applicant claims a date of first use in commerce on or before December 8, 2005, if the goods and services would not appear in time of armed conflict to confer the protections of the Geneva Conventions. 18 U.S.C. §706a. However, registration should be refused under §2(a) and §§1 and 45 of the Act if the goods or services are of a type typically offered as emergency relief or assistance in times of armed conflict. Such goods or services may include, but are not limited to, medical or first-aid assistance, religious and charitable services, clothing, and food items. The refusals can be withdrawn if the applicant amends the identification to indicate that the goods/services are not offered as emergency relief or assistance in time of armed conflict.

When examining specimens of use for such designations, the examining attorney should also consider issuing a refusal under §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127, on the ground that the subject matter would not be perceived as a trademark or, in the case of services, §§1, 2, 3, and 45 of the Act, 15 U.S.C. §§1051, 1052, 1053, and 1127, as appropriate. See [TMEP §1202](#).

### **1205.01(a)(iii) Date of First Use Not Specified**

For applications filed under §1(b), §44, or §66(a) of the Trademark Act, 15 U.S.C. §1051(b), §1126, or §1141f(a), or for applications filed under §1(a) of the Trademark Act, 15 U.S.C. §1051(a), where the application fails to indicate the applicant's date of first use of the mark in commerce, the examining attorney should presume that the date of first use in commerce is or will be after December 8, 2005, unless the application record indicates otherwise.

Although applications based on §1(b), §44, or §66(a) need not initially show actual use of the mark in commerce, applicants filing under these bases must have a bona fide intent to use the mark in commerce.

See TMEP §§[1008](#), [1009](#), [1101](#), [1102](#), [1904.01\(c\)](#), [1904.01\(d\)](#). Because “use in commerce” under the Trademark Act means “lawful use in commerce,” any intended use of the mark serving as the basis for these types of applications must also be lawful. See *John W. Carson Found. v. Toilets.com, Inc.*, 94 USPQ2d 1942, 1948 (TTAB 2010); *In re Midwest Tennis & Track Co.*, 29 USPQ2d at 1386 n.2 (TTAB 1993); *Clorox Co. v. Armour-Dial, Inc.*, 214 USPQ 850, 851 (TTAB 1982); *In re Stellar Int'l, Inc.*, 159 USPQ 48, 50-51 (TTAB 1968); *CreAgri, Inc. v. USANA Health Sciences, Inc.*, 474 F.3d 626, 630 (9th Cir. 2007) (“It has long been the policy of the PTO’s Trademark Trial and Appeal Board that use in commerce only creates trademark rights when the use is lawful. . . . [W]e also agree with the PTO’s policy and hold that only lawful use in commerce can give rise to trademark priority.”) (citations omitted). With respect to a mark containing the Red Crescent, the Third Protocol Emblem, or the designation “Red Crescent” or “Third Protocol Emblem,” actual lawful use in commerce is not possible and thus there can be no bona fide intent to lawfully use the mark in commerce. See *John W. Carson Found.*, 94 USPQ2d at 1948. Therefore, it is appropriate to issue a refusal under §§1 and 45 for applications based on §1(b), §44, or §66(a) if the facts and available evidence support the conclusion that the mark contains the prohibited symbols or wording.

### **1205.01(a)(iv) Applicable Refusals**

The statute prohibiting use of the Red Crystal and Red Crescent symbols by unauthorized parties applies to “any sign or insignia made or colored in imitation thereof.” 18 U.S.C. §706a. If the mark includes a design element where the color red is claimed, and the design would be likely to be perceived as the Red Crystal symbol or the Red Crescent symbol, and it is not significantly altered, stylized, or merged with other elements in the mark, the examining attorney must refuse registration under §§1 and 45, because the mark is not in lawful use in commerce, and under §2(a), if any of the following conditions exist:

- the mark drawing or foreign registration shows the symbol in red;
- the mark drawing is not in color, but the specimen shows the symbol in red; or
- the mark drawing is not in color, but it includes the wording “Red Crescent” or “Third Protocol Emblem.”

See TMEP §§[1205.01\(a\)](#) and [1205.01\(a\)\(i\)](#). The refusals may be withdrawn if the applicant amends the mark drawing to a different, non-prohibited color scheme, or a non-color version of the mark drawing (i.e., a black-and-white or gray scale drawing) or submits a proper substitute specimen showing use of the mark in a color other than red. Cf. TMEP §§[1205.01\(d\)\(i\)\(D\)](#), [1205.01\(d\)\(ii\)\(D\)](#). However, a photocopy of the original specimen is not an acceptable substitute specimen.

A mark that includes a crescent or crystal design element will generally be considered registrable, and will not be refused under §§1 and 45, or under §2(a), if the applicant does not claim color as a feature of the mark and the specimen shows the symbol in a color other than red. In such cases, a statement that the mark is not used in the color red is unnecessary, and if submitted, must not be printed on the registration certificate.

Regarding the phrases “Red Crescent” and “Third Protocol Emblem,” the statute prohibiting use of these designations does not apply to variations or modifications of these words. Only marks that include the exact wording RED CRESCENT or THIRD PROTOCOL EMBLEM, with or without additional wording, must be refused under §2(a) and §§1 and 45.

For example, REDCRESCENTS would not be refused registration, but RED CRESCENT DONOR could be refused registration if the date of first use is after December 8, 2005, or the application otherwise fails to qualify for the grandfather clause described in [TMEP §1205.01\(a\)\(ii\)](#).

### **1205.01(a)(v) Amendments to Disclaim, Delete, or Amend the Unregistrable Symbol or Designation**

If the mark is unregistrable because it includes the Red Crescent or Third Protocol symbols or words, a disclaimer of the unregistrable matter will not render the mark registrable. Similarly, disclaimer of the color red is inappropriate, and will not obviate a refusal of registration.

On the other hand, if the unregistrable symbol or designation is deleted from the mark sought to be registered, the examining attorney should withdraw the refusal(s) based on the unregistrable symbol or designation, and, if necessary, refuse registration because the amendment to the mark is material. Deletions of matter determined to be unregistrable under §2(a) of the Act are sometimes permissible. See [TMEP §807.14\(a\)](#).

The examining attorney may also permit an amendment from a color drawing to a black-and-white drawing, to eliminate the claim of the color red, if such an amendment would not constitute a material alteration of the mark, and the amendment is supported by a proper specimen. See [TMEP §§807.14\(e\)-807.14\(e\)\(iii\)](#) regarding amendments to color features of marks, and [TMEP §1205.01\(a\)\(iv\)](#) regarding the situation where the applicant does not claim color as a feature of the mark, but the specimen shows use of the mark in red.

### **1205.01(a)(vi) Parties Authorized to use the Red Crescent and Third Protocol Emblem**

Under 18 U.S.C. §706a, the following parties are authorized to use the Red Crescent symbol and the Third Protocol Emblem on a white background and the designations “Red Crescent” and “Third Protocol Emblem:”

- (1) authorized national societies that are members of the International Federation of Red Cross and Red Crescent Societies, and their duly authorized employees and agents;
- (2) the International Committee of the Red Cross, and its duly authorized employees and agents;
- (3) the International Federation of Red Cross and Red Crescent Societies, and its duly authorized employees and agents; and
- (4) the sanitary and hospital authorities of the armed forces of State Parties to the Geneva Conventions of August 12, 1949.

If the applicant is not clearly authorized to use an emblem or designation, the examining attorney must refuse registration. The refusal may be withdrawn if the applicant or the applicant’s attorney submits a

statement that the applicant is an authorized party, and indicates the reason why the applicant is authorized (e.g., applicant is an authorized agent of the International Federation of Red Cross and Red Crescent Societies).

### **1205.01(b) Examination Procedures for Marks Comprising Matter Related to the United States Olympic Committee or the Olympics**

Following passage of the Amateur Sports Act of 1978, 36 U.S.C. §380, unauthorized use of words and symbols associated with the United States Olympic Committee (“USOC”) or the Olympics subjected the user to civil actions and remedies. In 1998, Congress amended the 1978 act to the Ted Stevens Olympic and Amateur Sports Act (“OASA”), 36 U.S.C. §220506. In the amended Act, Congress designated certain Olympic-related words and symbols as being the exclusive property of the USOC, subject to limited exceptions. 36 U.S.C. §220506.

The USOC has the exclusive right to use the name “United States Olympic Committee” and the words “Olympic,” “Olympiad,” “Citius Altius Fortius,” “Pan American,” “Paralympic,” “Paralympiad,” “America Espirito Sport Fraternalite,” or any combination of these words. 36 U.S.C. §220506(a). The statutory protection also extends to the International Olympic Committee’s symbol of five interlocking rings, the International Paralympic Committee’s symbol of three TaiGeuks, and the Pan-American Sports Organization’s symbol of a torch surrounded by concentric rings. *Id.* The statute permits the USOC to authorize its contributors and suppliers to use the enumerated Olympic-related words or symbols, 36 U.S.C. §220506(b), exempts certain pre-existing uses and geographic references, 36 U.S.C. §220506(d), and allows the USOC to initiate civil-action proceedings to address unauthorized use, 36 U.S.C. §220506(c).

Proposed marks that contain the designated Olympic-related words or symbols, or any combination thereof, cannot be registered on the Principal or Supplemental Register (nor can the matter be disclaimed) and must be refused registration on the ground that the mark is not in lawful use in commerce, citing §§1 and 45 of the Trademark Act, 15 U.S.C. §§1051 and 1127, for trademark applications or §§1, 3, and 45, 15 U.S.C. §§1051, 1053, and 1127, for service mark applications, as well as the OASA. Other statutory refusals under the Trademark Act may also bar registration, such as falsely suggesting a connection under 15 U.S.C. §§1052(a) and likelihood of confusion under 15 U.S.C. §§1052(d), and should be issued as appropriate. *See [TMEP §1205.01\(b\)\(ii\)](#).*

#### **1205.01(b)(i) Nature of the Mark**

Under 36 U.S.C. §220506(a), no applicant other than the USOC is capable of having lawful use in commerce of marks containing the designated Olympic-related words and symbols, or any combination thereof, and an applicant cannot obviate the spirit of the law by crafting a mark that combines a designated Olympic-related word or symbol with a non-designated word or symbol. *U.S. Olympic Comm. v. O-M Bread, Inc.*, 29 USPQ2d 1555, 1557-58 (TTAB 1993) (sustaining opposition to registration of OLYMPIC KIDS).

A refusal for unlawful use pursuant to §§1 and 45 of the Trademark Act, 15 U.S.C. §§1051 and 1127 or §§1, 3, and 45, 15 U.S.C. §§1051, 1053, and 1127, is required if the applicant’s mark contains the exact words or symbols, or any combination thereof, enumerated in the statute. *See, e.g., In re Midwest Tennis & Track, Co.*, 29 USPQ2d 1386, 1388 (TTAB 1993) (reversing the refusal to register OLYMPIAN GOLDE since the mark did not comprise any of the forbidden words themselves, or a combination of them, and the statute did not encompass “simulations” of the listed words); *U.S. Olympic Comm. v. Olymp-Herrenwaschfabriken Bezner GmbH & Co.*, 224 USPQ 497, 500 (TTAB 1984) (denying USOC’s

opposition because OLYMP was not the same as OLYMPIC or OLYMPIAD, or a combination thereof, and, therefore, USOC cannot claim exclusive right of use).

### **1205.01(b)(ii) Issuing Other Substantive Refusals**

Applications for marks comprising Olympic-related matter must also be analyzed for other substantive refusals in the same manner as any other application. The most common refusals that may accompany a refusal for unlawful use, or be issued by themselves or in combination, are a §2(a) refusal for deception or falsely suggesting a connection with the USOC or the Olympics and a §2(d) refusal for likelihood of confusion. 15 U.S.C. §1052(a) and (d). See TMEP [§§1203.02–1203.02\(f\)\(ii\)](#) regarding deceptive matter, [§§1203.03–1203.03\(f\)](#) regarding matter falsely suggesting a connection, and [§§1207–1207.04\(g\)\(i\)](#) regarding likelihood of confusion.

As to §2(a) refusals, the Board determined that “there are various international and national organizations pertaining to the Olympic Games” and that “the entire organization which comprises the Olympic Games, as a whole qualifies as an “institution” within the meaning of Section 2(a).” *In re Urbano*, 51 USPQ2d 1776, 1779-80 (TTAB 1999) (affirming the §2(a) refusal to register SYDNEY 2000 because the mark falsely suggested a connection with the Olympic Games held in Sydney, Australia in 2000; 15 U.S.C. §1052(a). Therefore, the United States Olympic Committee is part of the “institution” and entitled to protection under §2(a)). *See In re Midwest Tennis & Track, Co.*, 29 USPQ2d 1386, 1389 (TTAB 1993) (reversing the §2(a) refusal and finding that OLYMPIAN GOLDE had multiple connotations and did not point “uniquely and unmistakably to the USOC” as would be required under §2(a)); *In re Kayser-Roth Corp.*, 29 USPQ2d 1379, 1385 (TTAB 1993) (reversing the §2(a) refusal and noting “[t]he question is not whether the word ‘Olympic’ falsely suggests a connection with the persona or identity of the United States Olympic Committee’s but whether applicant’s mark OLYMPIC CHAMPION does ... [we cannot] say on the basis of the record before us that the mark OLYMPIC CHAMPION ‘points uniquely and unmistakably’ to the United States Olympic Committee inasmuch as that term may as likely point to a contestant representing a country other than the United States in the Olympic games.”); *U.S. Olympic Comm. v. Olymp-Herrenwaschefabriken Bezner GmbH & Co.*, 224 USPQ 497, 499 (TTAB 1984) (denying USOC’s §2(a) claims since there was no evidence presented to establish that OLYMP was deceptive of the clothing goods or that OLYMP falsely suggested a connection with USOC).

Factors that may be relevant to a §2(d) refusal for likelihood of confusion include the wide variety of goods and services in connection with which marks consisting of Olympic-related matter are often used, the channels of trade in which they are found, and the level of sophistication of consumers of such Olympic-related products as t-shirts, mugs, and pins. The Board has also upheld likelihood of confusion where an applicant other than the USOC used OLYMP or LYMPIC as part of its mark. *See Olymp-Herrenwaschefabriken* 224 USPQ at 498 (sustaining USOC’s opposition to registration of OLYMP based on likelihood of confusion with its OLYMPIC marks); *U.S. Olympic Comm. v. Org. for Sport Aviation Competition*, 2002 TTAB Lexis 195 (TTAB 2002) (granting summary judgment to the USOC on the issue of likelihood of confusion against the mark SKYLYMPICS for aviation sporting events).

In proposed marks identifying specific Olympic Games by city and year, the examining attorney should consider the marks unitary, with the primary significance being that of the Olympic Games event, and not issue substantive refusals for descriptiveness or geographic descriptiveness or requirements for disclaimers.

*Urbano*, 51 USPQ2d at 1779-80 (reversing the refusals under §§2(e)(1), 2(e)(2), and 2(e)(3) because the primary significance of the mark was as a reference to the Olympic Games).

### **1205.01(b)(iii) Amendments to Disclaim, Delete, or Amend the Unregistrable Wording or Symbol**

If the mark is unregistrable because it includes Olympic-related matter, a disclaimer of the unregistrable matter will not render the mark registrable. If the applicant submits an amendment deleting the unregistrable matter, the examining attorney must, if appropriate, refuse registration because the amendment to the mark is material and maintain the refusal(s) based on the unregistrable symbol or designation in the alternative.

### **1205.01(b)(iv) Consent to Register**

The USOC is permitted to authorize third parties to use and register the restricted Olympic-related words and symbols listed in the OASA. 36 U.S.C. §220506(b). If an applicant submits proof of consent from the USOC to both use and register the mark, the statutory requirement is satisfied.

### **1205.01(b)(v) First Use On or After September 21, 1950**

If a party other than the USOC applies to register Olympic-related matter designated in the OASA and claims a date of first use in commerce on or after September 21, 1950, the examining attorney must refuse registration on the ground that the mark is not in lawful use in commerce, citing §§1 and 45 of the Trademark Act, 15 U.S.C. §§1051 and 1127, for trademark applications or §§1, 3, and 45, 15 U.S.C. §§1051, 1053, and 1127, for service mark applications. The examining attorney must provide appropriate supporting evidence for the refusal. In addition, refusals may also be made on other relevant grounds. See [TMEP §1205.01\(b\)\(ii\)](#).

### **1205.01(b)(vi) First Use Before September 21, 1950 – Grandfather Clause**

Olympic-related matter enumerated in the OASA need not be refused registration where an applicant claims pre-existing use of the mark for any lawful purpose prior to September 21, 1950. 36 U.S.C. §220506(d)(1). An applicant making such a claim is permitted to continue lawful use of the mark for the same purpose and same goods or services. 36 U.S.C. §220506(d)(2).

Registration of a new mark that creates a materially different commercial impression than the earlier mark, even if that mark incorporates the grandfathered wording, is not permitted. *O-M Bread, Inc. v. U.S. Olympic Comm.*, 65 F.3d 933, 938-39, 36 USPQ2d 1041, 1045 (Fed. Cir. 1995) (sustaining opposition against registration of OLYMPIC KIDS for bakery products, even though applicant had grandfather rights in OLYMPIC for the same goods, and noting that OLYMPIC and OLYMPIC KIDS are not legal equivalents).

Expanding the use of a grandfathered mark to additional goods and services is generally not permissible, and should be construed very narrowly. See *In re Kayser-Roth Corp.*, 29 USPQ2d 1379, 1383-84 (TTAB 1993) (reversing the refusal to register OLYMPIC CHAMPION when applicant sought to expand use of the mark from various clothing goods to socks; finding that applicant had grandfather rights in the same

mark for certain apparel and noting that socks have “attributes in common with the other named [clothing] goods” that permitted this additional use by applicant).

### **1205.01(b)(vii) Date of First Use Not Specified**

For applications filed under §1(b), §44, or §66(a) of the Trademark Act, 15 U.S.C. §1051(b), §1126, or §1141f(a), or for applications filed under §1(a) of the Trademark Act, 15 U.S.C. §1051(a), where the application fails to indicate the applicant’s date of first use of the mark in commerce, the examining attorney should presume that the date of first use in commerce is or will be after September 21, 1950, unless the application record indicates otherwise.

Although applications based on §1(b), §44, or §66(a) need not initially show actual use of the mark in commerce, applicants filing under these bases must have a bona fide intent to use the mark in commerce. See TMEP §§[1008](#), [1009](#), [1101](#), [1102](#), [1904.01\(c\)](#), [1904.01\(d\)](#). Because “use in commerce” under the Trademark Act means “lawful use in commerce,” any intended use of the mark serving as the basis for these types of applications must also be lawful. See *John W. Carson Found. v. Toilets.com, Inc.*, 94 USPQ2d 1942, 1948 (TTAB 2010); *In re Midwest Tennis & Track Co.*, 29 USPQ2d at 1386 n.2 (TTAB 1993); *Clorox Co. v. Armour-Dial, Inc.*, 214 USPQ 850, 851 (TTAB 1982); *In re Stellar Int’l, Inc.*, 159 USPQ 48, 50-51 (TTAB 1968); *CreAgri, Inc. v. USANA Health Sciences, Inc.*, 474 F.3d 626, 630 (9th Cir. 2007) (“It has long been the policy of the PTO’s Trademark Trial and Appeal Board that use in commerce only creates trademark rights when the use is lawful. . . . [W]e also agree with the PTO’s policy and hold that only lawful use in commerce can give rise to trademark priority.”) (citations omitted). With respect to a mark containing the designated Olympic-related words or symbols, or any combination thereof, actual lawful use in commerce is not possible and thus there can be no bona fide intent to lawfully use the mark in commerce. See *John W. Carson Found.*, 94 USPQ2d at 1948. Therefore, it is appropriate to issue a refusal under §§1 and 45 for applications based on §1(b), §44, or §66(a) if the facts and available evidence support the conclusion that the mark contains the prohibited wording and/or symbols.

### **1205.01(b)(viii) Geographic-Reference Exception**

The OASA provides a narrow geographic-reference exception for use of the word OLYMPIC for businesses, goods, or services operated, sold, and marketed in the State of Washington west of the Cascade Mountain range. 36 U.S.C. §220506(d)(3). To qualify for the exception, the following requirements must be met: (1) the owner must not use the word OLYMPIC in combination with any of the other designated Olympic-related words or symbols; (2) it must be evident from the circumstances that use of the word OLYMPIC refers to the naturally occurring mountains or geographical region of the same name that were named prior to February 6, 1998, and not to the USOC or any Olympic activity; and (3) the goods or services offered under the OLYMPIC mark must be marketed and sold locally in Washington state west of the Cascade Mountain range, and not have substantial operations, sales, and marketing outside of this area. Since these requirements severely restrict the option of interstate commerce, which is regulated by Congress and a requirement under the Trademark Act, it is unlikely an applicant will be able to obtain a federal trademark registration under this exception.

### **1205.01(c) Examination Procedures for Marks Containing Greek Red Cross or the Phrases “Red Cross” or “Geneva Cross”**

Federal law prohibits anyone other than the American National Red Cross and its duly authorized employees and agents and the sanitary and hospital authorities of the armed forces of the United States from using the Greek red cross on a white ground or the words “Red Cross” or “Geneva Cross.” 18 U.S.C. §706. There is

an exception for use of any such emblem, sign, insignia, or words that were lawfully used on or before June 25, 1948.

### **1205.01(c)(i) Date of First Use is Before or After June 25, 1948**

Registration of the Greek red cross on a white ground or the words “Red Cross” or “Geneva Cross” need not be refused where, in an application under §1 of the Trademark Act, 15 U.S.C. §1051, the applicant claims a date of first use in commerce on or before June 25, 1948. However, if a party other than an authorized party applies to register the Greek red cross on a white ground, or the designation “Red Cross” or “Geneva Cross,” and claims a date of first use in commerce after June 25, 1948, the examining attorney must refuse registration under §2(a) of the Trademark Act, 15 U.S.C. §1052(a), on the ground that the mark comprises matter that may falsely suggest a connection with the American National Red Cross under the statute. *See* 18 U.S.C. §706; [TMEP §1203.03\(e\)](#). The examining attorney must provide appropriate supporting evidence for the refusal. In addition, a refusal must also be made on the ground that the mark is not in lawful use in commerce, citing §§1 and 45 of the Trademark Act, 15 U.S.C. §§1051 and 1127.

### **1205.01(c)(ii) Date of First Use Not Specified**

For applications filed under §1(b), §44, or §66(a) of the Trademark Act, 15 U.S.C. §1051(b), §1126, or §1141f(a), or for applications filed under §1(a) of the Trademark Act, 15 U.S.C. §1051(a), where the application fails to indicate the applicant’s date of first use of the mark in commerce, the examining attorney should presume that the date of first use in commerce is or will be after June 25, 1948, unless the application record indicates otherwise.

Although applications based on §1(b), §44, or §66(a) need not initially show actual use of the mark in commerce, applicants filing under these bases must have a bona fide intent to use the mark in commerce.

*See* TMEP §§[1008](#), [1009](#), [1101](#), [1102](#), [1904.01\(c\)](#), [1904.01\(d\)](#). Because “use in commerce” under the Trademark Act means “lawful use in commerce,” any intended use of the mark serving as the basis for these types of applications must also be lawful. *See John W. Carson Found. v. Toilets.com, Inc.*, 94 USPQ2d 1942, 1948 (TTAB 2010); *In re Midwest Tennis & Track Co.*, 29 USPQ2d at 1386 n.2 (TTAB 1993); *Clorox Co. v. Armour-Dial, Inc.*, 214 USPQ 850, 851 (TTAB 1982); *In re Stellar Int’l, Inc.*, 159 USPQ 48, 50-51 (TTAB 1968); *CreAgri, Inc. v. USANA Health Sciences, Inc.*, 474 F.3d 626, 630 (9th Cir. 2007) (“It has long been the policy of the PTO’s Trademark Trial and Appeal Board that use in commerce only creates trademark rights when the use is lawful. . . . [W]e also agree with the PTO’s policy and hold that only lawful use in commerce can give rise to trademark priority.”) (citations omitted). With respect to a mark containing the Greek red cross on a white ground, or the designation “Red Cross” or “Geneva Cross,” actual lawful use in commerce is not possible and thus there can be no bona fide intent to lawfully use the mark in commerce. *See John W. Carson Found.*, 94 USPQ2d at 1948. Therefore, it is appropriate to issue a refusal under §§1 and 45 for applications based on §1(b), §44, or §66(a) if the facts and available evidence support the conclusion that the mark contains the prohibited symbol or wording.

### **1205.01(c)(iii) Applicable Refusals**

The statute prohibiting use of the Greek red cross on a white ground, or the designation “Red Cross” or “Geneva Cross,” by unauthorized parties applies to “any insignia colored in imitation thereof.” 18 U.S.C. §706. If the mark includes a design element that would be likely to be perceived as the Geneva red cross, and it is not significantly altered, stylized, or merged with other elements in the mark, the examining attorney must refuse registration under §§1 and 45, because the mark is not in lawful use in commerce, and under §2(a), if any of the following conditions exist:

- the mark drawing or foreign registration shows the symbol in red;
- the mark drawing is not in color, but the specimen shows the symbol in red; or
- the mark drawing is not in color, but it includes the wording Red Cross or Geneva Cross.

See [TMEP §1205.01\(c\)](#). The refusals may be withdrawn if the applicant amends the mark drawing to a different, non-prohibited color scheme, or a non-color version of the mark drawing (i.e., a black-and-white or gray scale drawing) or submits a proper substitute specimen showing use of the mark in a color other than red. Cf. TMEP §§[1205.01\(d\)\(i\)\(D\)](#), [1205.01\(d\)\(ii\)\(D\)](#). However, a photocopy of the original specimen is not an acceptable substitute specimen.

A mark that includes a Greek cross will generally be considered registrable, and will not be refused as a red cross under §§1 and 45, or under §2(a), if the applicant does not claim color as a feature of the mark and the specimen shows the symbol in a color other than red. In such cases, a statement that the mark is not used in the color red is unnecessary, and if submitted, must not be printed on the registration certificate.

Regarding the phrases “Red Cross” and “Geneva Cross,” the statute prohibiting use of these designations does not apply to variations or modifications of these words. Only marks that include the exact wording RED CROSS or GENEVA CROSS, with or without additional wording, must be refused under §2(a) and §§1 and 45.

For example, RED CROSSES would not be refused registration, but RED CROSS DONOR could be refused registration if the date of first use is after June 25, 1948.

### **1205.01(c)(iv) Amendments to Disclaim, Delete, or Amend the Unregistrable Symbol or Designation**

If the mark is unregistrable because it includes the Greek red cross on a white ground, or the designation “Red Cross” or “Geneva Cross,” a disclaimer of the unregistrable matter will not render the mark registrable. Similarly, disclaimer of the color red is inappropriate, and will not obviate a refusal of registration.

On the other hand, if the unregistrable symbol or designation is deleted from the mark sought to be registered, the examining attorney should withdraw the refusal(s) based on the unregistrable symbol or designation, and, if necessary, refuse registration because the amendment to the mark is material. Deletions of matter determined to be unregistrable under §2(a) of the Act are sometimes permissible. See [TMEP §807.14\(a\)](#).

The examining attorney may also permit an amendment from a color drawing to a black-and-white drawing, to eliminate the claim of the color red, if such an amendment would not constitute a material alteration of the mark, and the amendment is supported by a proper specimen. See [TMEP §§807.14\(e\)-807.14\(e\)\(iii\)](#) regarding amendments to color features of marks, and [TMEP §1205.01\(c\)\(iii\)](#) regarding the situation where the applicant does not claim color as a feature of the mark, but the specimen shows use of the mark in red.

### **1205.01(d) Examination Procedures for Marks Containing the Swiss Confederation Coat of Arms or Flag**

The Trademark Act bars registration of trademarks or service marks containing the coat of arms or flag of the Swiss Confederation, commonly known as Switzerland. See 15 U.S.C. §§ 1052(a), 1052(b), 1052(e)(2), 1052(e)(3), 1127; Britannica.com, *Switzerland*, <http://www.britannica.com/EBchecked/topic/577225/Switzerland> (accessed Aug. 15, 2012); Cent.

Intelligence Agency, The World Factbook, *Switzerland*, <https://www.cia.gov/library/publications/the-world-factbook/geos/sz.html> (accessed Aug. 15, 2012).

The Swiss coat of arms consists of a white equilateral cross displayed upright on a red triangular shield and the Swiss flag consists of a white equilateral cross displayed upright on a red square. *See Swiss Fed. Inst. of Intellectual Prop., Frequently Asked Questions – Legislative Amendment “Swissness,”* <https://www.ige.ch/en/service/frequently-asked-questions/legislative-amendment-swissness/a-swiss-cross-and-the-swiss-coat-of-arms.html> (accessed Aug. 15, 2012) (indicating that “[t]he Swiss cross is a perpendicular, free-standing, white cross, each arm of which is one-sixth longer than it is wide on a red background” and that “[t]he Swiss coat of arms is a Swiss cross in a triangular shield”); Britannica.com, *Switzerland, flag of*, <http://www.britannica.com/EBchecked/topic/135532/Switzerland-flag-of/> (accessed Aug. 15, 2012); Cent. Intelligence Agency, The World Factbook, *Switzerland*, [https://www.cia.gov/library/publications/the-world-factbook/flags/flagtemplate\\_sz.html](https://www.cia.gov/library/publications/the-world-factbook/flags/flagtemplate_sz.html) (accessed Aug. 15, 2012).

Swiss Coat of Arms

Swiss Flag

The primary refusals that apply to marks containing the Swiss coat of arms, the Swiss flag, or simulations thereof, are the following:

- A refusal under Trademark Act §§1 and 45, because the mark is not in lawful use in commerce, based on the prohibition, under 18 U.S.C. §708, of the commercial use of the Swiss coat of arms. 15 U.S.C. §§1051, 1127; see also [TMEP §1205.01](#).

- A refusal under §2(b), because the mark consists of or comprises the flag or coat of arms of a foreign country, namely, Switzerland. 15 U.S.C. §1052(b); see also TMEP §§[1204–1204.01\(e\)](#), [1204.04](#).

### **1205.01(d)(i) Refusal Under Sections 1 and 45: Swiss Coat of Arms Not in Lawful Use**

Federal law prohibits anyone from using the Swiss Confederation coat of arms as a trademark or for any other commercial purpose. Specifically, the text of 18 U.S.C. §708 reads as follows:

Whoever, whether a corporation, partnership, unincorporated company, association, or person within the United States, willfully uses as a trade mark, commercial label, or portion thereof, or as an advertisement or insignia for any business or organization or for any trade or commercial purpose, the coat of arms of the Swiss Confederation, consisting of an upright white cross with equal arms and lines on a red ground, or any simulation thereof, shall be fined under this title or imprisoned not more than six months, or both. This section shall not make unlawful the use of any such design or insignia which was lawful on August 31, 1948.

The statute describes the coat of arms as “an upright white cross with equal arms and lines on a red ground.” 18 U.S.C. §708. Although the Swiss flag features this same type of white cross, the statute refers to the “coat of arms” and therefore is applied only to the Swiss coat of arms, which consists of a white equilateral cross displayed upright on a red triangular shield.

The text of 18 U.S.C. §708 does not specify any authorized users of the Swiss coat of arms. Accordingly, no one may lawfully use the coat of arms as a trademark or service mark in the United States, unless the mark was in use on or before August 31, 1948. See 18 U.S.C. §708. Thus, regardless of the identity of the applicant, any mark containing the Swiss coat of arms, or a simulation thereof, which was not in use on or before that date, must be refused under §§1 and 45 because the mark is not in lawful use in commerce.

Although applications based on §1(b), §44, or §66(a) need not initially show actual use of the mark in commerce, applicants filing under these bases must have a bona fide intent to use the mark in commerce. See TMEP §§[1008](#), [1009](#), [1101](#), [1102](#), [1904.01\(c\)](#), [1904.01\(d\)](#). Because “use in commerce” under the Trademark Act means “lawful use in commerce,” any intended use of the mark serving as the basis for these types of applications must also be lawful. See *John W. Carson Found. v. Toilets.com, Inc.*, 94 USPQ2d 1942, 1948 (TTAB 2010); *In re Midwest Tennis & Track Co.*, 29 USPQ2d at 1386 n.2 (TTAB 1993); *Clorox Co. v. Armour-Dial, Inc.*, 214 USPQ 850, 851 (TTAB 1982); *In re Stellar Int’l, Inc.*, 159 USPQ 48, 50-51 (TTAB 1968); *CreAgri, Inc. v. USANA Health Sciences, Inc.*, 474 F.3d 626, 630 (9th Cir. 2007) (“It has long been the policy of the PTO’s Trademark Trial and Appeal Board that use in commerce only creates trademark rights when the use is lawful. . . . [W]e also agree with the PTO’s policy and hold that only lawful use in commerce can give rise to trademark priority.”) (citations omitted). With respect to a mark containing the Swiss coat of arms, actual lawful use in commerce is not possible and thus there can be no bona fide intent to lawfully use the mark in commerce. *John W. Carson Found.*, 94 USPQ2d at 1948. Therefore, it is appropriate to issue a refusal under §§1 and 45 for applications based on §1(b), §44, or §66(a) if the facts and available evidence support the conclusion that the mark contains the Swiss coat of arms or a simulation thereof.

To properly support a refusal under §§1 and 45, based on a finding that the mark is not, or cannot be, in lawful use in commerce, there must be some indication that the mark features the Swiss coat of arms or a simulation thereof. A “simulation” refers to “something that gives the appearance or effect or has the characteristics of an original item.” *In re Waltham Watch Co.*, 179 USPQ 59, 60 (TTAB 1973) (citing

Webster's Third New Int'l Dictionary (unabridged ed. 1965)); *see* TMEP §1204. Whether particular matter is a simulation of the Swiss coat of arms is determined by a visual comparison of the matter and the coat of arms. *Id.*

The application record usually contains sufficient information to establish that the mark contains the Swiss coat of arms or a simulation thereof. For example, the drawing may show a white cross on a red triangular shield. Or, if the mark drawing is not in color, the specimen, color claim, or color description may indicate that these elements appear in the prohibited color scheme.

Even if the application record itself does not provide evidence of unlawful use, it may be appropriate in some instances to base a refusal under §§1 and 45 on extrinsic evidence of applicant's use of the mark. Examining attorneys are not required to search for extrinsic evidence. However, if the examining attorney locates relevant extrinsic evidence in the course of examining the mark, that evidence may be used to support the refusal.

### **1205.01(d)(i)(A) When a Refusal Under Sections 1 and 45 Must Be Issued**

The examining attorney must issue a "not in lawful use" refusal under §§1 and 45 if a mark contains an element composed of an upright equilateral cross on a triangular shield (or a simulation thereof) that is not significantly altered, stylized, or merged with other elements in the mark; the dates of use are after August 31, 1948 (or are not provided); and any of the following conditions exist:

- the mark drawing shows the cross in white and the triangular shield in red;
- the mark drawing is not in color, but (i) the color claim or mark description indicates the cross is white and the shield is red or (ii) the specimen shows the cross in white and shield in red; or
- the mark drawing is not in color, there is no color claim, the mark description does not reference color (or there is no mark description), and there is no specimen of record (because one has not been submitted or is not required), but the examining attorney has found extrinsic evidence indicating that the applicant actually uses the mark in the white cross/red shield color scheme.

If the dates of use provided do not clearly indicate that the mark was in use on or before August 31, 1948, it should be presumed that the first use occurred after that date. In applications based on §1(b), §66(a), or solely on §44, the use dates should be presumed to be after August 31, 1948. These procedures apply regardless of the application filing basis.

The basis for concluding that a mark containing the Swiss coat of arms is not in lawful use is 18 U.S.C. §708, but the basis for refusing registration of the mark is Trademark Act §§1 and 45. Thus, when refusing registration on the ground that the mark is not in lawful use in commerce, the examining attorney must cite §§1 and 45, 15 U.S.C. §§1051, 1127, in support of the refusal and explain that the finding of unlawful use is based on 18 U.S.C. §708. *See* [TMEP §1205.01](#). When issuing the refusal, the examining attorney should provide evidence showing the typical depiction of the Swiss coat of arms. *See* [TMEP §1205.01\(c\)](#).

For applications based on §1(a), the examining attorney must issue a requirement for additional information under Trademark Rule 2.61(b), 37 C.F.R. §2.61(b), if a mark contains an element composed of an upright equilateral cross on a triangular shield (or a simulation thereof), the dates of use are after August 31, 1948 (or are not provided), and all of the following conditions exist:

- the mark drawing is not in color;

- there is no color claim;
- the mark description does not reference color (or there is no mark description);
- the specimen of record shows the mark but is not in color (i.e., the specimen is a black-and-white or gray scale reproduction of a color specimen); and
- the examining attorney has found no extrinsic evidence indicating applicant actually uses the mark in the white cross/red shield color scheme.

The requirement for additional information should advise the applicant that the use of the Swiss coat of arms in the white and red color scheme is prohibited under 18 U.S.C. §708, and require the applicant to provide either a color version of the specimen of record or a statement that the cross-and-shield element in the mark, as used in the specimen of record, does not appear in the colors white and red. If, in response, the applicant submits a color version of the specimen and it shows that the cross-and-shield is displayed in colors other than white and red, no refusal under §§1 and 45 should issue. The statement that the cross-and-shield element, as used in the specimen of record, is not displayed in the prohibited color scheme may be submitted in a response to an Office action or entered by examiner's amendment. If the applicant submits this statement, no further inquiry is necessary. Although the statement will appear in the application record, it will not be printed on the registration certificate, should one issue.

### **1205.01(d)(i)(B) When an Advisory Should Be Provided**

If issuing an Office action for other reasons, the examining attorney should provide an advisory regarding the potential refusal under §§1 and 45 when all of the following conditions exist:

- the dates of use are after August 31, 1948 (or are not provided);
- the mark contains an upright equilateral cross on a triangular shield that is not significantly altered, stylized, or merged with other elements in the mark;
- the mark drawing is not in color;
- the application record does not contain a specimen or any indication of the colors that appear in the mark as it is actually used; and
- the examining attorney has found no extrinsic evidence that the applicant uses the cross-and-shield element in the prohibited color scheme (the examining attorney is not required to search for such extrinsic evidence).

If the dates of use provided do not clearly indicate that the mark was in use on or before August 31, 1948, it should be presumed that the first use occurred after that date. In applications based on §1(b), §66(a), or solely on §44, the use dates should be presumed to be after August 31, 1948.

If possible, the examining attorney should provide the advisory in the initial Office action. The advisory should indicate that a refusal under Trademark Act §§1 and 45 will issue if the specimen submitted with an allegation of use (for §1(b) applications) or a §8 or §71 affidavit or declaration of use (for §44 and §66(a) applications) shows the cross-and-shield element in a white and red color scheme. In addition, the applicant should be advised that a color version of the specimen showing a red cross on a white ground may result in a refusal on the ground that the mark is not in lawful use in commerce based on 18 U.S.C. §706 (see TMEP §§[1205.01\(c\)–\(c\)\(iv\)](#) regarding marks containing the Greek red cross and TMEP §[1205.01\(d\)\(iii\)](#)). Failure

to provide an advisory does not preclude a refusal of registration in a subsequent Office action or a refusal of a §8 or §71 affidavit or declaration of use. Cf. [TMEP §1202](#).

### **1205.01(d)(i)(C) When a Refusal Under Sections 1 and 45 Should Not Be Issued**

Even if the mark contains an element composed of an upright equilateral cross on a triangular shield, the examining attorney should not issue a refusal under §§1 and 45 if any of the following conditions exist:

- the applicant specifies that the mark was in use on or before August 31, 1948;
- the coat of arms shown in the mark is significantly altered, stylized, or merged with other elements in the mark, so as to create a different commercial impression from the actual Swiss coat of arms;
- the mark drawing is not in color, there is no color claim, the mark description has been omitted or does not reference color, and the application contains a color specimen that shows the relevant matter in a color scheme other than white and red; or
- the mark drawing is in color and shows the cross and triangular shield in a color scheme other than white and red. In this situation, a refusal should not issue, even if the color claim, mark description, or specimen indicates that the cross and shield appear in the prohibited color scheme. Instead, to address the discrepancy between the mark drawing and the other information in the application record, the examining attorney must require a corrected color claim, an amended mark description, and/or a matching specimen, as appropriate. In addition, the examining attorney should provide an advisory indicating that the use of the Swiss coat of arms in the white and red color scheme is prohibited by federal law and that, if the applicant amends the drawing to show the cross in white and the shield in red, the mark will be refused under Trademark Act §§1 and 45.

The refusal should not be issued even if the cross is white and the shield is red.

### **1205.01(d)(i)(D) Applicant's Response to Refusal**

If a mark is unregistrable under §§1 and 45 because it contains the Swiss coat of arms, disclaiming the coat of arms will not make it registrable, nor will claiming acquired distinctiveness under Trademark Act §2(f) or amending the application to the Supplemental Register. Cf. [TMEP §§1204.04\(a\)](#) and [1205.01\(a\)\(v\)](#). In addition, an applicant may not overcome the refusal under §§1 and 45 by disclaiming the colors that appear in the coat of arms. If registration is refused because the drawing or specimen actually shows the cross-and-shield element in white and red, the applicant may not overcome the refusal by merely providing a statement that the mark will not be used in the prohibited colors. (If the drawing contains a black-and-white depiction of the Swiss coat of arms, and the applicant provides a statement that the mark does not, or will not, appear in the colors white and red, the statement will remain in the application record but will not be printed on any registration certificate that may issue.)

For applications based on §1, applicants may overcome the refusal as follows:

- *Amending the Colors in the Mark Drawing.* If the mark is refused because the mark drawing shows the cross-and-shield element in the prohibited color scheme, a §1 applicant may overcome the refusal by submitting an amended mark drawing showing the cross-and-shield element in a different, non-prohibited color scheme, or by submitting a non-color version of the mark drawing (i.e., a black-and-white or gray scale drawing). Under these circumstances, these amendments to the drawing usually will not be considered a material alteration of the mark. Cf. [TMEP §1205.01\(a\)\(v\)](#). The color claim and color description must also be amended or deleted, as appropriate. If the application

is based on §1(a), the record must contain an acceptable matching specimen. Black-and-white or gray scale reproductions of specimens are not acceptable for this purpose; a color version of the specimen must be submitted.

- *Amending the Color Claim/Description; Substitute Specimen.* If the mark drawing is not in color, but registration is refused because the color claim or mark description indicates that the cross-and-shield element appears in white and red, a §1 applicant may overcome the refusal by amending the color claim or mark description to delete any reference to color. Likewise, if the original mark drawing is not in color, but registration was refused because the specimen showed the cross-and-shield element in the prohibited color scheme, the applicant may obviate the refusal by submitting a color specimen showing use of the mark in colors other than white and red.
- *Deleting the Coat of Arms from the Mark Drawing.* A §1 applicant may also overcome the refusal by deleting the coat of arms from the mark if the coat of arms is separable from the other elements in the mark and the remaining matter is registrable. Cf. [TMEP §1204.04\(b\)](#). Generally, the deletion of this matter will not be considered a material alteration of the mark. Furthermore, if the coat of arms is deleted from the drawing, any specimen showing the mark with the deleted matter should still be considered to match the drawing. Cf. [TMEP §1204.04\(b\)](#).

For applications based on §44 or §66(a), applicants generally may not make amendments to the mark. Therefore, the option to delete the Swiss coat of arms is not available in these types of applications. 37 C.F.R. §§2.51(c), 2.72(c)(1); [TMEP §§807.12\(b\), 1011.01, 1904.02\(j\)](#). However, if the mark in a §44 or §66(a) application is refused because the mark drawing presents the cross-and-shield element in the prohibited color scheme, but there is no corresponding color claim in the foreign or international registration, the applicant may overcome the refusal under §§1 and 45 by submitting a statement that no claim of color is made with respect to the foreign or international registration and amending the drawing to a black-and-white reproduction of the mark. See [TMEP §§1011.01, 1904.02\(k\)](#). In addition, the applicant must submit a statement confirming applicant's bona fide intent to use the mark lawfully (i.e., in colors other than white and red). This statement does not need to be verified.

### **1205.01(d)(i)(E) Refusals Based on Extrinsic Evidence**

If a §1(b), §44, or §66(a) application is refused based solely on extrinsic evidence of applicant's unlawful use of the Swiss coat of arms, the applicant may overcome the refusal by submitting a verified statement that the applicant has a bona fide intention to use the mark lawfully (i.e., in colors other than white and red). [TMEP §§804-804.01\(b\)](#). For a §1(a) application refused based on extrinsic evidence (or based on the specimen of record), the applicant may overcome the refusal by amending the application filing basis to §1(b), and need only submit the usual verified statement corresponding to that amendment (i.e., that the applicant has a bona fide intention to use the mark in commerce on or in connection with the goods or services, and that the applicant had this intention as of the application filing date). 15 U.S.C. §1051(b)(3)(B); 37 C.F.R. §2.34(a)(2); [TMEP §806.03\(c\)](#). If the specimen submitted with the applicant's subsequent allegation of use, or with an affidavit or declaration of use under §8 or §71, shows the mark is not in lawful use, the refusal must be reissued.

### **1205.01(d)(ii) Refusal Under Section 2(b): Swiss Flag or Swiss Coat of Arms**

Trademark Act §2(b) prohibits registration on the Principal Register or Supplemental Register of a mark that consists of or comprises the flag or coat of arms of a foreign nation. 15 U.S.C. §1052(b); see [TMEP §§1204-1204.05](#). In determining whether a mark must be refused under §2(b), the relevant question is whether consumers will perceive matter in the mark as a flag or coat of arms. See [TMEP §1204.01\(a\)](#).

Section 2(b) also prohibits registration of any simulation of a foreign nation's flag or coat of arms. 15 U.S.C. §1052(b); *see* [TMEP §1204.01\(a\)](#). As previously noted, a "simulation" refers to "something that gives the appearance or effect or has the characteristics of an original item." *In re Waltham Watch Co.*, 179 USPQ 59, 60 (TTAB 1973) (citing Webster's Third New Int'l Dictionary (unabridged ed. 1965)); *see* [TMEP §1204](#).

Whether particular matter is a simulation of a flag or coat of arms is determined by a visual comparison of the matter and the actual flag or coat of arms. *See In re Waltham Watch Co.*, 179 USPQ at 60; TMEP §1204. The focus of the analysis is on the relevant purchasers' general recollection of the flag or coat of arms, "without a careful analysis and side-by-side comparison." *In re Advance Indus. Sec., Inc.*, 194 USPQ 344, 346 (TTAB 1977). *See* [TMEP §1204.01\(a\)](#) for examples of flag simulations.

The examining attorney should consider the following factors when determining whether matter in a mark will be perceived as the Swiss coat of arms or Swiss flag:

- the colors, if any, that appear in the matter;
- the stylization of the matter and its relationship to other elements in the mark;
- the presence of any words or other designs on the drawing that might create or reinforce the impression that the matter is the Swiss flag or Swiss coat of arms; and
- the presentation and use of the mark on the specimen of record, if one is provided. *See* [TMEP §1204.01\(a\)](#).

The determination of whether a refusal under §2(b) must issue should be based on how the mark is displayed in the mark drawing, described in the application, or used in the specimen of record. Extrinsic evidence of applicant's use of the mark should not be considered.

### **1205.01(d)(ii)(A) When a Refusal Under Section 2(b) Must Be Issued**

The examining attorney must refuse registration under §2(b) if the mark contains an element composed of an upright equilateral cross on a square, a rectangle, or a triangular shield (or a simulation thereof) that is not significantly stylized, altered, or merged with other elements in the mark, and any of the following conditions exist:

- the mark drawing shows the cross in white and the square, rectangle, or triangular shield in red;
- the mark drawing is not in color, but (i) the color claim or mark description indicates the cross is white and the square, rectangle, or triangular shield is red, or (ii) the specimen shows the cross and square, rectangle, or triangular shield in the prohibited color scheme; or
- the mark drawing is not in color, but in addition to an upright equilateral cross on a square, a rectangle, or a triangular shield, the mark contains wording or other matter that creates or reinforces the impression that the cross and square/rectangle/shield design is the Swiss flag or Swiss coat of arms (e.g., "Switzerland," "Swiss," "Suisse," "Schweiz," "Swiss Confederation").

For applications based on §1(a), the examining attorney must issue a requirement for additional information based on Trademark Rule 2.61(b), 37 C.F.R. §2.61(b), if a mark contains an element composed of an upright equilateral cross on a square, a rectangle, or a triangular shield (or a simulation thereof) and all of the following conditions exist:

- the mark drawing is not in color;

- there is no color claim;
- the mark description is omitted or does not reference color;
- the mark does not contain wording or other matter that creates or reinforces the impression that the matter is the Swiss flag or Swiss coat of arms (e.g., “Switzerland,” “Swiss,” “Suisse,” “Schweiz,” “Swiss Confederation”); and
- the specimen of record shows the mark but is not in color (i.e., the specimen is a black-and-white or gray scale reproduction of a color specimen).

The requirement for additional information should advise that registration of the Swiss coat of arms or Swiss flag in the white-and-red color scheme is barred under Trademark Act §2(b) and require the applicant to provide either a color version of the specimen of record or a statement that the relevant matter in the mark, as used in the specimen of record, does not appear in the colors white and red. If, in response, the applicant submits a color version of the specimen and it shows that the relevant matter is displayed in colors other than white and red, a refusal under §2(b) should not be issued. The statement that the relevant matter, as used in the specimen of record, does not appear in the prohibited color scheme may be submitted in a response to an Office action or may be entered by examiner’s amendment. If the applicant submits this statement, no further inquiry is necessary. Although the statement will appear in the application record, it will not be printed on the registration certificate, should one issue.

When issuing the §2(b) refusal, the examining attorney must provide evidence supporting the conclusion that the matter in the mark is the official coat of arms or flag of the Swiss Confederation. *See, e.g.*, Swiss Fed. Inst. of Intellectual Prop., *Frequently Asked Questions – Legislative Amendment “Swissness,”* <https://www.ige.ch/en/service/frequently-asked-questions/legislative-amendment-swissness/a-swiss-cross-and-the-swiss-coat-of-arms.html> (accessed Aug. 15, 2012) (indicating that “[t]he Swiss cross is a perpendicular, free-standing, white cross, each arm of which is one-sixth longer than it is wide on a red background” and that “[t]he Swiss coat of arms is a Swiss cross in a triangular shield”); Britannica.com, *Switzerland, flag of*, <http://www.britannica.com/EBchecked/topic/1355532/Switzerland-flag-of/> (accessed Aug. 15, 2012); Cent. Intelligence Agency, *The World Factbook, Switzerland*, <https://www.cia.gov/library/publications/the-world-factbook/geos/sz.html> (accessed Aug. 15, 2012). In addition, if the refusal is based on the examining attorney’s conclusion that other wording or matter in the mark creates or reinforces the impression that the cross and square/rectangle/shield design is the Swiss flag or Swiss coat of arms, the examining attorney should provide evidence to support that conclusion.

When an examining attorney issues a §2(b) refusal because the mark features a cross-and-shield design that appears in, or is used in, the prohibited color scheme, the examining attorney must also issue a “not in lawful use” refusal under Trademark Act §§1 and 45. *See* **TMEP §1205.01(c)(i)**. Sometimes, however, a §2(b) refusal will be issued not because information in the application indicates that the cross-and-shield design appears in, or is used in, the prohibited color scheme, but because other Swiss indicia in the mark would lead to the impression that a non-color cross-and-shield design is the Swiss coat of arms. In these instances, a refusal under §§1 and 45 is not appropriate unless there is extrinsic evidence that, as used by the applicant, the coat of arms in the mark appears in the prohibited color scheme.

### **1205.01(d)(ii)(B) When an Advisory Should Be Provided**

If sending an Office action for other reasons, the examining attorney should provide an advisory regarding the potential refusal under §2(b) when all of the following conditions exist:

- the mark contains an upright equilateral cross on a square, a rectangle, or a triangular shield that is not significantly stylized, altered, or merged with other elements in the mark;
- the mark drawing is not in color;
- the application record does not contain a specimen or any other indication of the colors that appear in the mark as it is actually used; and
- there is no wording or other indicia in the mark that would create or reinforce the impression that the mark contains the Swiss flag or the Swiss coat of arms.

If possible, the examining attorney should provide the advisory in the initial Office action. The advisory should indicate that a refusal under Trademark Act §2(b) will issue if the specimen submitted with an allegation of use (for §1(b) applications) or a §8 or §71 affidavit or declaration of use (for §44 and §66(a) applications) shows the cross and square/rectangle/shield in a white and red color scheme. Failure to provide an advisory does not preclude a refusal of registration in a subsequent Office action or a refusal of a §8 or §71 affidavit or declaration. *Cf.* [TMEP §1202](#).

### **1205.01(d)(ii)(C) When a Refusal Under Section 2(b) Should Not Be Issued**

Even if the mark contains an upright equilateral cross on a square, a rectangle, or a triangular shield (or simulation thereof), a §2(b) refusal should not be issued if any of the following conditions exist:

- the flag or coat of arms shown in the mark is sufficiently altered, stylized, or merged with other elements in the mark, so as to create a distinct commercial impression;
- the mark drawing is not in color, there is no color claim, the mark description does not reference color (or there is no mark description), and the application contains a color specimen that shows the relevant matter in a color scheme other than white and red; or
- the mark drawing is in color and shows the cross and square/rectangle/shield in a color scheme other than white and red. In this situation, a refusal should not issue, even if the color claim, mark description, or specimen indicates that the cross and square/rectangle/shield appears in the prohibited color scheme. Instead, to address the discrepancy between the mark drawing and the other information in the application record, the examining attorney must require a corrected color claim, an amended mark description, and/or a matching specimen, as appropriate. In addition, the examining attorney should provide an advisory indicating that, under §2(b), the Swiss flag and Swiss coat of arms may not be registered as a trademark or service mark and that, if the applicant amends the drawing to show the cross in white and the square, rectangle, or shield in red, the mark will be refused under Trademark Act §2(b).

### **1205.01(d)(ii)(D) Applicant's Response to Refusal**

Section 2(b) provides an absolute bar to registration. *See* [TMEP §1204.04\(a\)](#). Thus, a disclaimer of the relevant matter will not overcome the refusal, nor will a claim of acquired distinctiveness under §2(f) or an amendment to the Supplemental Register. *Id.*

In addition, if registration is refused because the drawing or specimen actually shows the cross and square/rectangle/shield element in white and red, the applicant may not overcome the refusal by merely providing a statement that the mark will not be used in the prohibited colors. (If the drawing contains a black-and-white depiction of the Swiss flag or the Swiss coat of arms, and the applicant provides a statement

that the mark does not, or will not, appear in the colors white and red, the statement will remain in the application record but will not be printed on any registration certificate that may issue.)

For applications based on §1, an applicant may overcome a §2(b) refusal as follows:

- *Amending the Colors in the Mark Drawing.* If registration is refused because the mark drawing shows the relevant matter in the prohibited color scheme, amending the drawing to show the matter in another color scheme—either in different colors or in no particular colors (i.e., black and white or gray scale)—will usually be sufficient to overcome the refusal. However, amending to a non-color drawing showing the mark in black and white or gray scale will not overcome the refusal if there is other matter in the mark (e.g., wording such as “Swiss” or “Switzerland”) that creates or reinforces the impression that the cross and square/rectangle/shield design in the mark is the Swiss flag or the Swiss coat of arms.
- Generally, amending the colors in the cross and square/rectangle/shield element in a mark to overcome a §2(b) refusal will not result in a material alteration of the mark. If the colors in the drawing are changed, the color claim and color description must also be amended or deleted, as appropriate. If the application is based on §1(a), the record must contain an acceptable matching specimen. Black-and-white or gray scale reproductions of specimens are not acceptable for this purpose; a color version of the specimen must be submitted.
- *Amending the Color Claim/Description; Substitute Specimen.* If the mark drawing is not in color, but registration is refused because the color claim or mark description indicates that the relevant matter appears in white and red, a §1 applicant may overcome the refusal by amending the color claim or mark description to delete any reference to color. Likewise, if the original mark drawing is not in color, but registration was refused because the specimen showed the relevant matter in the prohibited color scheme, the applicant may obviate the refusal by submitting a color specimen showing use of the relevant matter in the mark in colors other than white and red.
- *Deleting the Coat of Arms or Flag from the Mark Drawing.* Section 1 applicants may also overcome a §2(b) refusal by deleting the unregistrable flag or coat of arms, but only if the matter is separable from other elements in the mark (e.g., the flag design is separated from, or is used as a background for, other matter in the mark) and the remaining matter is registrable. If the flag or coat or arms is deleted from the drawing, any specimen showing the mark with the deleted matter should still be considered to match the drawing. See [TMPEP §1204.04\(b\)](#).
- *Amending the Filing Basis to §1(b).* If registration of the mark is refused under §2(b) because the specimen of record shows the relevant matter in white and red, applicant may amend the application filing basis to §1(b), in which case the examining attorney should withdraw the refusal. However, the refusal must be reissued if the specimen submitted with applicant’s subsequent allegation of use shows the relevant matter in the prohibited color scheme.

For applications based on §44 or §66(a), applicants generally may not make amendments to the mark; thus, the option to delete the Swiss flag or Swiss coat of arms is not available. 37 C.F.R. §§2.51(c), 2.72(c)(1); TMPEP §§[807.12\(b\)](#), [1011.01](#), [1904.02\(j\)](#). However, if a §44 or §66(a) application presents the mark in color, but there is no corresponding color claim in the foreign or international registration, the applicant may submit a statement that no claim of color is made with respect to the foreign or international registration and amend the drawing to a black-and-white reproduction of the mark. See TMPEP §§[1011.01](#), [1904.02\(k\)](#). In this manner, the applicant may overcome the §2(b) refusal, provided there are no other Swiss indicia in the mark

that would create the perception that the black-and-white or gray-scale coat of arms or flag in the mark is the Swiss coat of arms or Swiss flag.

### **1205.01(d)(iii) Other Refusals**

If a mark containing matter that would be perceived as the Swiss coat of arms or Swiss flag also includes other Swiss indicia, such as the wording “Switzerland” or “Swiss,” or foreign equivalents, the examining attorney should consider whether the primary significance of the mark as a whole is geographic. If so, a refusal under Trademark Act §2(e)(2) (geographically descriptive) or §2(a)/§2(e)(3) (geographically deceptive/primarily geographically deceptively misdescriptive) may be appropriate, in addition to refusals under §§1 and 45 and/or §2(b). For detailed information regarding the examination procedures relating to geographic refusals, see [TMEP §§1210-1210.07\(b\)](#).

Like the Swiss coat of arms and the Swiss flag, the Red Cross features an upright equilateral cross and the colors red and white. However, the color scheme in the Red Cross is reversed, displaying the cross in red and the background in white. The Red Cross is also protected by federal statute, and marks containing this matter may be subject to refusals under Trademark Act §§1 and 45 (not in lawful use) and §2(a) (false suggestion of a connection with the American National Red Cross). *See* 18 U.S.C. §706. If the mark contains an equilateral cross, but the application does not provide a clear indication of the colors that appear in the mark, examining attorneys should consider whether a refusal on the basis that the mark appears to contain the Red Cross may be appropriate. For additional information, see [TMEP §1205.01](#).

Refusals for failure to function as a trademark or service mark, 15 U.S.C. §§1051, 1052, 1053, 1127 ( *see also* TMEP §§[1202](#), [1301.02\(a\)](#)), or for likelihood of confusion, 15 U.S.C. §1052(d), may also apply to these marks.

### **1205.01(d)(iv) Examples**

*Examples of Situations Where Registration Must (or Might) Be Refused* . In some of the following examples, a refusal under §§1 and 45, §2(b), or both must be issued because the drawing itself shows that the mark contains the Swiss coat of arms, the Swiss flag, or a simulation thereof. In the remaining examples, other information will dictate whether either or both refusals are appropriate.

*Mark:* The mark consists of the wording SWISS OVEN appearing on a banner that is positioned over a red triangular shield containing a white cross, with depictions of wheat appearing on both sides of the shield

*Analysis:* The mark contains a red triangular shield containing a white equilateral cross. The shield is partially obscured and the cross is proportionally larger than the cross in the Swiss coat of arms. Nonetheless, this matter is essentially a simulation of the Swiss coat of arms (regardless of the wording in the mark). Thus, refusals under §§1 and 45 and §2(b) must be issued.

*Mark:* The mark consists of the wording ZURICH SWISS appearing below a red square containing a white equilateral cross.

*Analysis:* The mark contains the Swiss flag: a white equilateral cross on a red square. Therefore, the mark must be refused under §2(b). The wording in the mark reinforces the impression that the matter is the Swiss flag and further supports the §2(b) refusal. A refusal under §§1 and 45 is not appropriate,

because this refusal applies only to the Swiss coat of arms. See [TMEP §1205.01\(d\)\(iii\)](#) regarding this mark's geographic significance.

*Mark:* The mark consists of an oval carrier featuring, among other things, a triangular shield containing an upright equilateral cross. Color is not claimed as a feature of the mark.

*Analysis:* A §2(b) refusal must be issued because, although the shield-and-cross element is not shown in color and is slightly different from the actual Swiss coat of arms, other Swiss indicia in the mark create the impression that the design is the Swiss coat of arms. A refusal under §§1 and 45 should not be issued based on the drawing alone, because the drawing does not show the relevant matter in a white-and-red color scheme. If, however, the specimen of use or extrinsic evidence shows that the cross-and-shield element is used in the prohibited color scheme, a refusal under §§1 and 45 would be appropriate. Otherwise, an advisory or a Rule 2.61(b) requirement for additional information may be appropriate,

*Mark:* The mark consists of a circular carrier containing a depiction of a mountain, a triangular shield containing an upright equilateral cross, and the wording SWISS GRILL and SWISS GOURMET FOOD. Color is not claimed as a feature of the mark.

*Analysis:* A §2(b) refusal must be issued in this case because, although the cross-and-shield element is not shown in color, other Swiss indicia in the mark will create the impression that the design is the Swiss coat of arms. A refusal under §§1 and 45 should not be issued based on the drawing alone, because the drawing does not show the relevant matter in a white-and-red color scheme. If, however, the specimen of record or extrinsic evidence shows that the cross-and-shield element is used in the prohibited color scheme, a refusal under §§1 and 45 would be appropriate. Otherwise, an advisory or a Rule 2.61(b) requirement for additional information may be appropriate.

*Mark:* The mark consists of the wording ADVANCED DERMATOLOGIC SOLUTIONS, LLC appearing above a rectangle containing an upright equilateral cross. Color is not claimed as a feature of the mark.

*Analysis:* A §2(b) refusal is appropriate if the color claim, mark description, or specimen of record indicates that the cross appears in white and the rectangle appears in red. A refusal under §§1 and 45 would not be appropriate, regardless of the colors these elements appear in, because this refusal applies only to the Swiss coat of arms. Otherwise, an advisory or a Rule 2.61(b) requirement for additional information may be appropriate.

*Mark:* The mark consists of a red background containing a white cross above the wording ANDREW CHRISTIAN, which is also in white.

*Analysis:* The red portion of the mark represents a red background, but not necessarily a red rectangular background. If the specimen of record shows the mark in a rectangular form, then the mark is essentially a simulation of the Swiss flag and a §2(b) refusal is appropriate. The inclusion of the wording immediately below the cross would not detract from this impression. A refusal under §§1 and 45 is not appropriate because this refusal applies only to the Swiss coat of arms.

*Mark:* The mark consists of a rectangle containing a white equilateral cross on a red square, all of which is bordered in black, and the wording REMOTE MEDICAL INTL.

*Analysis:* Because it is bordered in black, the cross-and-square element in the mark is slightly different from Swiss flag. However, it is sufficiently similar to be considered a simulation of the Swiss flag. Thus, a §2(b) refusal is appropriate. A refusal under §§1 and 45 is not appropriate because this refusal applies only to the Swiss coat of arms.

***Examples of Situations Where Refusal of Registration Is Not Appropriate*** . In the following examples, a refusal under §§1 and 45 or §2(b) is not appropriate for one or more of the following reasons: (1) the mark is displayed in a color scheme other than white and red; (2) the mark does not contain all of the characteristic elements of the Swiss coat of arms or the Swiss flag; or (3) the relevant matter in the mark is sufficiently altered, or merged with other design elements, to create a distinct commercial impression.

*Mark:* The mark consists of the word MCCORMACK in silver appearing above a white cross on a silver triangular background, all within a silver shield-shaped outline.

*Analysis:* Although the mark contains an upright equilateral cross on a triangular background, a refusal under §§1 and 45 is not appropriate because the relevant elements are not displayed in white and red. A refusal under §2(b) is not appropriate because the mark drawing and color claim indicate that the cross-and-shield design appear in the colors silver and white.

*Mark:* The mark consists of the word PROCARE, with the letters "PR" and "CARE" in blue and the letter "O" formed by a red circle containing a white cross.

*Analysis:* Although the mark features a design element composed of a white equilateral cross on a red background, a refusal under §§1 and 45 is not appropriate because the background shape is not a triangular shield. A §2(b) refusal is not appropriate because the relevant matter does not appear in the shape of the Swiss flag or Swiss coat of arms.

*Mark:* The mark consists of a red silhouette of a house containing a white equilateral cross.

*Analysis:* Although the mark contains an upright equilateral cross in white on a red background, this matter is integrated into a stylized silhouette of a house. As a result, the mark creates an impression of something entirely different from the Swiss flag or the Swiss coat of arms. Thus, a refusal under §§1 and 45 or §2(b) would not be appropriate.

*Mark:* The mark consists of a triangular shield containing an upright equilateral cross, appearing below the word REPEL and to the left of the wording ANTIMICROBIAL PROTECTED. The colors black, white, and gray are claimed as a feature of the mark.

*Analysis:* Although the mark contains an upright equilateral cross on a triangular shield, refusals under §§1 and 45 and §2(b) are not appropriate, because the mark drawing and color claim indicate that the cross-and-shield design appear in the colors black, white, and gray. These refusals should not issue, even if the specimen shows use of the cross-and-shield in the prohibited white-and-red color scheme. Instead, to address the discrepancy between the mark drawing and the specimen, the examining attorney must require a matching specimen that necessarily would not include the prohibited color scheme.

## 1205.02 Article 6ter of the Paris Convention

The United States is a member of the Paris Convention for the Protection of Industrial Property, as revised at Stockholm on July 14, 1967, the members of which constitute a Union for the protection of industrial property. Paris Convention for the Protection of Industrial Property art. 6ter, Mar. 20, 1883, [http://www.wipo.int/treaties/en/ip/paris/trtdocs\\_wo020.html](http://www.wipo.int/treaties/en/ip/paris/trtdocs_wo020.html).

Under Article 6 ter of the Paris Convention, the contracting countries have agreed to refuse or to invalidate the registration, and to prohibit the unauthorized use as trademarks or as elements of trademarks, of armorial bearings, flags, and other State emblems of the member countries, official signs and hallmarks indicating control and warranty adopted by member countries, and any imitation from a heraldic point of view. The provision applies equally to armorial bearings, flags, other emblems, abbreviations, and names of international intergovernmental organizations of which one or more countries of the Union are members, except for those that are already the subject of international agreements in force, intended to ensure their protection (e.g., “Red Cross” and emblems protected by the Geneva Convention of August 12, 1949).

Under Article 6 ter, each member country or international intergovernmental organization (IGO) may communicate armorial bearings, emblems, official signs and hallmarks indicating warranty and control, and names and abbreviations of IGOs to the IB, who will transmit the communications to the other member countries. Within twelve months from receipt of the notification, a member country may transmit its objections, through the IB.

When the USPTO receives notifications from the IB under Article 6 ter, the USPTO searches its records for conflicting marks, although the requests are not subjected to a full examination by an examining attorney or published for opposition. If the USPTO determines that a designation should be entered into the USPTO search records to assist USPTO examining attorneys, the designation is assigned a serial number in the “89” series code (i.e., serial numbers beginning with the digits “89,” sometimes referred to as “non-registrations”). Information about the designation should be discovered in an examining attorney’s search.

### *Refusal of Marks Notified Under Article 6ter*

Depending on the nature and use of the mark, §§2(a) and 2(b) of the Trademark Act, 15 U.S.C. §§1052(a) and 1052(b), may bar registration of marks comprised in whole or in part of designations notified pursuant to Article 6 ter and to which the United States has transmitted no objections. A refusal under §2(d) of the Trademark Act is not appropriate. The issue is not whether the marks are confusingly similar, but whether registration of the mark would violate §§2(a) or 2(b) of the Trademark Act.

For example, it may be appropriate for the examining attorney to refuse registration under §2(a) of the Act on the ground that the mark comprises matter that may falsely suggest a connection with a national symbol

of a member country or an international intergovernmental organization. See [TMEP §1203.03\(e\)](#). Other §2(a) bases for refusal could also apply. See [TMEP §§1203-1203.03\(f\)](#). It may be appropriate to refuse registration under §2(b) of the Act if the proposed mark comprises a flag, coat of arms, or other similar insignia. See [TMEP §1204](#). In some instances, it may be appropriate to refuse registration under §§1, 2 (preamble), and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127, on the ground that the subject matter would not be perceived as a trademark. For service mark applications, §3 of the Act, 15 U.S.C. §1053, should also be cited as a basis for refusal.

## **1206 Refusal on Basis of Name, Portrait, or Signature of Particular Living Individual or Deceased U.S. President Without Consent**

*15 U.S.C. §1052 (Extract)*

No trademark by which the goods of the applicant may be distinguished from the goods of others shall be refused registration on the principal register on account of its nature unless it ... (c) Consists of or comprises a name, portrait, or signature identifying a particular living individual except by his written consent, or the name, signature, or portrait of a deceased President of the United States during the life of his widow, if any, except by the written consent of the widow.

Section 2(c) absolutely bars the registration of these marks on either the Principal Register or the Supplemental Register. See 15 U.S.C. §§1052(c), 1052(f), 1091(a).

The purpose of requiring the consent of a living individual to the registration of his or her name, signature, or portrait is to protect rights of privacy and publicity that living persons have in the designations that identify them. *In re Hoefflin*, 97 USPQ2d 1174, 1176 (TTAB 2010); *see also Univ. of Notre Dame du Lac v. J.C. Gourmet Food Imps. Co.*, 703 F.2d 1372, 1376 n.8, 217 USPQ 505, 509 n.8 (Fed. Cir. 1983); *Canovas v. Venezia 80 S.R.L.*, 220 USPQ 660, 661 (TTAB 1983). See [TMEP §1203.03](#) for a discussion of the right to control the use of one's identity, which underlies part of §2(a) as well as §2(c).

Section 2(c) does not apply to marks that comprise matter that identifies deceased persons, except for a deceased president of the United States during the life of the president's widow. See 15 U.S.C. §1052(c); *In re Masucci*, 179 USPQ 829 (TTAB 1973) (affirming §2(c) refusal of a mark consisting of the name EISENHOWER, a portrait of President Dwight D. Eisenhower, and the words PRESIDENT EISENHOWER REGISTERED PLATINUM MEDALLION #13 on the ground that the mark comprised the name, signature, or portrait of a deceased United States president without the written consent of his living widow).

Whether consent to registration is required depends on whether the public would recognize and understand the mark as identifying a particular living individual. Specifically, a consent is required only if the individual will be associated with the goods or services, because the person is publicly connected with the business in which the mark is used, or is so well known that the public would reasonably assume a connection. See [TMEP §1206.02](#) for further information.

See [TMEP §1206.03](#) regarding when it is necessary for an examining attorney to inquire of the applicant as to whether a name, signature, or portrait in a mark identifies a particular living individual, and [TMEP §§813.01\(a\)-\(c\)](#) regarding the entry of pertinent statements in the record for printing in the *Official Gazette* and on a registration certificate.

### **1206.01 Name, Portrait, or Signature of Particular Living Individual**

Section 2(c) explicitly pertains to any name, portrait, or signature that identifies a particular living individual, or a deceased president of the United States during the life of the president's widow.

*Does Not Have to Be Full Name.* For purposes of §2(c), a “name” does not have to be the full name of an individual. Section 2(c) applies not only to full names, but also first names, surnames, shortened names, pseudonyms, stage names, titles, or nicknames, if there is evidence that the name identifies a specific living individual who is publicly connected with the business in which the mark is used, or who is so well known that such a connection would be assumed. See *In re Hoefflin*, 97 USPQ2d 1174, 1177-78 (TTAB 2010) (holding registration of the marks OBAMA PAJAMA, OBAMA BAHAMA PAJAMAS, and BARACK’S JOCKS DRESS TO THE LEFT barred under §2(c) in the absence of consent to register, because they create a direct association with President Barack Obama); *In re Sauer*, 27 USPQ2d 1073, 1074-75 (TTAB 1993) (holding registration of a mark containing BO, used in connection with a sports ball, barred under §2(c) in the absence of consent to register, because BO is the nickname of a well-known athlete and thus use of the mark would lead to the assumption that he was associated with the goods), *aff’d per curiam*, 26 F.3d 140 (Fed. Cir. 1994); *In re Steak & Ale Rests. of Am., Inc.*, 185 USPQ 447, 448 (TTAB 1975) (affirming a §2(c) refusal of the mark PRINCE CHARLES because the wording identifies a particular well-known living individual whose consent was not of record); *Laub v. Indus. Dev. Labs., Inc.*, 121 USPQ 595 (TTAB 1959) (sustaining a §2(c)-based opposition to registration of opposer’s surname, LAUB, for use on goods that opposer was associated with, because applicant had not obtained opposer’s written consent); *Reed v. Bakers Eng’g & Equip. Co.*, 100 USPQ 196 (PTO 1954) (holding registration of REED REEL OVEN barred by §2(c) in the absence of written consent to register from the designer and builder of the ovens, Paul N. Reed); *cf. Société Civile Des Domaines Dourthe Frères v. S.A. Consortium Vinicole De Bordeaux Et De La Gironde*, 6 USPQ2d 1205, 1209 (TTAB 1988) (“Section 2(c) does not apply to surnames except in those cases where a particular individual is known by a surname alone.”).

*Name Could Refer to More Than One Person.* The fact that a name appearing in a mark may be the name of more than one person does not negate the requirement for a written consent to registration if the mark identifies, to the relevant public, a particular living individual who is well known or is publicly connected with the business in which the mark is used, or a deceased United States president whose spouse is living. See *Steak & Ale Rests.*, 185 USPQ at 447 (“Even accepting the existence of more than one living ‘PRINCE CHARLES’, it does not follow that each is not a particular living individual.”).

*Portraits.* Cases involving portraits include *In re McKee Baking Co.*, 218 USPQ 287 (TTAB 1983) (involving a mark consisting of a sign on which the portrait of a young girl appears below the words LITTLE DEBBIE); *In re Masucci*, 179 USPQ at 829 (involving a mark containing the name and portrait of President Eisenhower); *Garden v. Parfumerie Rigaud, Inc.*, 34 USPQ 30 (Comm’r Pats. 1937) (involving marks containing the name and portrait of petitioner).

## 1206.02 Connection With Goods or Services

Whether consent to registration is required depends on whether the public would recognize and understand the mark as identifying a particular living individual. A consent is required only if the individual bearing the name in the mark will be associated with the mark as used on the goods or services, either because: (1) the person is so well known that the public would reasonably assume a connection between the person and the goods or services; or (2) the individual is publicly connected with the business in which the mark is used. See *In re Hoefflin*, 97 USPQ2d 1174, 1175-76 (TTAB 2010); *Krause v. Krause Publ’ns, Inc.*, 76 USPQ2d 1904, 1909-10 (TTAB 2005); *In re Sauer*, 27 USPQ2d 1073, 1075 (TTAB 1993), *aff’d per curiam*, 26 F.3d 140 (Fed. Cir. 1994).

The Trademark Trial and Appeal Board stated the following in *Martin v. Carter Hawley Hale Stores, Inc.*, 206 USPQ 931, 933 (TTAB 1979):

[Section] 2(c) was not designed to protect every person from having a name which is similar or identical to his or her name registered as a trademark. Such a scope of protection would practically preclude the registration of a trademark consisting of a name since in most cases there would be someone somewhere who is known by the name and who might be expected to protest its registration. Rather, the Statute was intended to protect one who, for valid reasons, could expect to suffer damage from another's trademark use of his name. That is, it is more than likely that any trademark which is comprised of a given name and surname will, in fact, be the name of a real person. But that coincidence, in and of itself, does not give rise to damage to that individual in the absence of other factors from which it may be determined that the particular individual bearing the name in question will be associated with the mark as used on the goods, either because that person is so well known that the public would reasonably assume the connection or because the individual is publicly connected with the business in which the mark is used.

An individual may be considered to be publicly connected with the business in which the mark is used if the record shows that the individual is associated in some manner with the applicant, is actually connected to the goods or services at issue, and/or is well known in the relevant field of goods or services. See *Krause v. Krause Publ'ns, Inc.*, 76 USPQ2d 1904, 1909-10 (TTAB 2005); *In re New John Nissen Mannequins*, 227 USPQ 569, 570 (TTAB 1985); *Reed v. Bakers Eng'g & Equip. Co.*, 100 USPQ 196, 199-200 (PTO 1954).

In *Krause*, the evidence of record showed, among other things, that the cancellation petitioner, Chester L. Krause, formed a sole proprietorship under the name "Krause Publications" for the purpose of publishing coin collecting publications; was subsequently associated for almost fifty years with the respondent Krause Publications Inc., a major publisher of hobby magazines, newspapers, and price guides, as its president and/or chairman; coauthored at least three publications in the field of the study and collecting of coins; conducted a number of lectures on this subject around the country; received awards from national coin- and car-collecting organizations in recognition of his contributions to those fields; was the founder of a car show and swap meet; and had his large collection of cars featured in a film by an organization dedicated to automotive history. 76 USPQ2d at 1907, 1908, 1910-11. The Board found that this evidence established that the petitioner was publicly connected with the fields of coin collecting, car collecting, and publishing activities relating thereto, such that a connection between petitioner and the mark KRAUSE PUBLICATIONS would be presumed by those who have an interest in such fields. *Id.* at 1910. Thus, as to the goods and services related to those fields, the Board granted the petition to cancel because the mark identified a particular living individual and there was no written consent to register. *Id.* at 1914. However, the petition to cancel the registration for "entertainment services in the nature of competitions and awards in the field of cutlery," was dismissed because petitioner had not demonstrated that he was publicly connected with the field of cutlery, or that he is so well known by the general public that a connection between petitioner and the mark would be presumed with respect to these services. *Id.* at 1910, 1911-12, 1914.

If no one with the name of the person identified in the mark is actually connected with the applicant or with the business in which the mark is used, and no person with the name in the mark is generally known such that a connection would be assumed, the mark generally would not be deemed to identify a particular person under §2(c), and consent would not be required. See *In re Morrison & Foerster LLP*, \_\_USPQ2d \_\_, Ser. No. 85263950 (TTAB Mar. 25, 2014) (holding no consent required because applicant's FRANKNDODD mark would be understood by the relevant consuming public as referencing and commenting on the Dodd-Frank Act, rather than as specifically identifying Congressman Barney Frank and Senator Chris Dodd); *Martin*, 206 USPQ at 933 (holding that §2(c) did not prohibit registration of NEIL MARTIN for men's shirts, where the individual, although well known in his own professional and social circles, failed to establish that he was so famous as to be recognized by the public in general, or that he is or ever was publicly connected or associated with the clothing field); *Brand v. Fairchester Packing Co.*, 84 USPQ 97 (Comm'r Pats. 1950) (affirming dismissal of a petition to cancel the registration of the mark ARNOLD BRAND for use with

fresh tomatoes because nothing in the record indicated that the mark identified the petitioner, Arnold Brand, an attorney specializing in patent and trademark matters, with the tomato business, or that use of the mark would lead the public to make such a connection). To support a refusal under §2(c) as to a particular class in an application, it is not necessary to demonstrate that the individual is publicly connected with all the goods or services listed in the class. It is enough to show that the individual is publicly connected with at least some of the goods/services in the class. *See Krause*, 76 USPQ2d at 1911.

### 1206.03 When Inquiry is Required

Generally, if a mark comprises a name, portrait, or signature that could *reasonably* be perceived as identifying a particular living individual, and the applicant does not state whether the name or likeness does in fact identify a living individual, the examining attorney must inquire whether the name or likeness is that of a specific living individual and advise the applicant that, if so, the individual's written consent to register the name or likeness must be submitted. If there is sufficient evidence that the name, portrait, or signature identifies a particular living individual, the examining attorney may exercise discretion regarding whether to issue a §2(c) refusal instead of an inquiry.

*Full Name.* If a mark comprises a full name, e.g., a first name/initial(s) and surname, the examining attorney must issue an inquiry as to whether the mark comprises the name of a living individual, unless it is clear from the record that the name is not that of a living individual. It is not necessary to establish that the individual is generally known or publicly connected with the business in which the mark is used before making the inquiry. If there is sufficient evidence that the individual is generally known or publicly connected with the business in which the mark is used, the examining attorney may, at his or her discretion, issue a §2(c) refusal rather than an inquiry.

*Example:* The mark is STEVEN JONES, the application is silent as to whether this name identifies a living individual, and there is no evidence that the individual is generally known or publicly connected with the business in which the mark is used. The examining attorney must inquire whether the name is that of a specific living individual and advise the applicant that, if so, the individual's written consent to register the name must be submitted.

*Portrait or Likeness.* Generally, if the mark comprises a portrait or likeness that could *reasonably* be perceived as that of a particular living individual, the examining attorney must issue an inquiry as to whether the mark comprises the likeness of living individual, unless it is clear from the record that the likeness is not that of a living individual. It is not necessary to establish that the individual is generally known or publicly connected with the business in which the mark is used before making the inquiry. If there is sufficient evidence that the individual is generally known or publicly connected with the business in which the mark is used, the examining attorney may, at his or her discretion, issue a §2(c) refusal rather than an inquiry.

*Fictitious Character.* The examining attorney should not make an inquiry if it is clear from the record, or from the examining attorney's research, that the matter identifies a fictitious character. For example, no inquiry is necessary as to whether "Alfred E. Neuman," "Betty Crocker," or "Aunt Jemima" is the name of a particular living individual because they are names of well-known fictitious characters. Likewise, no inquiry is necessary as to a design that is obviously that of a cartoon character.

*First Name, Pseudonym, Stage Name, Surname, Nickname, or Title.* If the mark comprises a first name, pseudonym, stage name, nickname, surname, or title (e.g., "Mrs. Johnson" or "Aunt Sally"), the examining attorney must determine whether there is evidence that the name identifies an individual who is generally known or is publicly connected with the business in which the mark is used (i.e., associated in some manner with the applicant, actually connected to the goods or services at issue, and/or well known in the relevant field of goods or services). [See TMEP §1206.02](#). This may be done through an Internet search. If there is such evidence, the examining attorney must inquire whether the name is that of a specific living individual

and advise the applicant that, if so, the individual's written consent to register the name must be submitted. If there is no evidence that the name identifies a living individual who is generally known or publicly connected with the business in which the mark is used, the examining attorney should not issue an inquiry or §2(c) refusal.

*Example:* The mark is DOCTOR JONES, and the application is silent as to whether this name identifies a living individual. Unless there is evidence that the name identifies an individual who is generally known or publicly connected with the business in which the mark is used, the examining attorney should not issue an inquiry or §2(c) refusal.

*Example:* The mark is JOE for cookies, and the application is silent as to whether this name identifies a living individual. Unless there is evidence that the name identifies an individual who is generally known or publicly connected with the business in which the mark is used, the examining attorney should not issue an inquiry or §2(c) refusal.

*Example:* The mark is LYNCH'S LIGHTING for lamps, and the application is silent as to whether this name identifies a living individual. Unless there is evidence that the name identifies an individual who is generally known or publicly connected with the business in which the mark is used, the examining attorney should not issue an inquiry or §2(c) refusal.

*Famous Deceased Person or Historical Character.* When it appears that the mark comprises the name or likeness of a famous deceased person or historical character, the examining attorney must obtain confirmation from the applicant that the person is in fact deceased, and require that the applicant submit a statement that the name or likeness shown in the mark does not identify a living individual. It is not necessary to print the statement. If the mark comprises a name that is distinctive and well known (e.g., Leonardo da Vinci), the examining attorney may consult with his or her manager regarding foregoing the inquiry. If there is clear evidence that the name, portrait, or signature identifies a particular living individual, the examining attorney may exercise discretion regarding whether to issue a §2(c) refusal instead of an inquiry. See [TMEP §§1206](#) and [1206.04\(a\)](#) regarding marks that consist of or comprise a name, portrait, or signature of a deceased U.S. president with a living widow.

*Statement of Record in Prior Registration.* If the applicant claims ownership of a valid registration for a mark comprised in whole or in part of the same name, portrait, or signature for any goods or services, and the prior registration includes a statement that the name, portrait, or signature is not that of a living individual, the examining attorney may enter the same statement in the record, even if applicant does not resubmit or reference the statement. It is not necessary to issue an inquiry in this situation. See [TMEP §§813.01\(b\)](#) and [1206.05](#).

## **1206.04 Consent of Individual or President's Widow**

### **1206.04(a) Consent Statement Must Be Written Consent to Registration**

*Must Be Personally Signed.* When a name, portrait, or signature in a mark identifies a particular living individual, or a deceased president of the United States during the life of his widow, the mark can be registered only with the written consent of the individual, or of the president's widow. 15 U.S.C. §1052(c). The consent must be a written consent to the registration of the identifying matter as a mark, and, in the case of a living individual, must be personally signed by the individual whose name, signature, or likeness appears in the mark. Where the name, signature, or likeness is that of a deceased president, the consent should be signed by the president's surviving spouse.

*Consent to Use is Not Consent to Registration.* Consent to use of a mark does not constitute consent to register. See *Krause v. Krause Pub'ns, Inc.*, 76 USPQ2d 1904, 1913 (TTAB 2005); *Reed v. Bakers Eng'g & Equip. Co.*, 100 USPQ 196, 199 (PTO 1954); *Garden v. Parfumerie Rigaud, Inc.*, 34 USPQ 30, 31 (Comm'r Pats. 1937) ("Permission to use one's name and portrait in connection with a specified item of merchandise falls far short of consent to register one's name and portrait as a trade mark for such merchandise

generally.”) Consent to *register* a mark that makes no reference to consent to *use* is acceptable; the USPTO has no authority to regulate use of a mark.

*Minors.* If the record indicates that the person whose name or likeness appears in the mark is a minor, the question of who should sign the consent depends on state law. If the minor can validly enter into binding legal obligations, and can sue or be sued, in the state in which he or she is domiciled, then the minor may sign the consent. Otherwise, the consent should be signed by a parent or legal guardian, clearly setting forth his or her status as a parent or legal guardian. If the record indicates that person whose name or likeness appears in the mark is a minor, the examining attorney must inquire as to whether the person can validly enter into binding legal obligations under the law of the state in which he or she is domiciled. If the minor cannot enter into binding legal obligations, the examining attorney must require consent by the parent or guardian. See [TMEP §803.01](#) regarding the filing of an application in the name of a minor.

### **1206.04(b) Consent May Be Presumed From Signature of Application**

When a particular individual identified in a mark is also the person who signed the application, his or her consent to registration will be presumed. *Alford Mfg. Co. v. Alfred Elecs.*, 137 USPQ 250, 250 (TTAB 1963) (“The written consent to the registration of the mark ‘ALFORD’ by Andrew Alford, the individual, is manifested by the fact that said person executed the application . . .”), *aff’d*, 333 F.2d 912, 142 USPQ 168 (C.C.P.A. 1964); *Ex parte Dallioux*, 83 USPQ 262, 263 (Comm’r Pats. 1949) (“By signing the application, the applicant here obviously consents. . .”). Consent may be presumed whenever the person identified has signed the application, even if the applicant is not an individual.

*Name of Signatory.* Consent to register is presumed if the application is personally signed by the individual whose name appears in the mark, e.g., if the mark is JOHN SMITH and the application is personally signed by John Smith. The examining attorney should not make an inquiry or require a written consent. The examining attorney must ensure that the consent statement is entered into the Trademark database. See [TMEP §§813.01\(a\) and \(c\)](#). The consent statement must be printed even if the name that appears in the mark is that of the applicant.

*Names Must Match.* Consent may be presumed only where the name in the mark matches the name of the signatory. If the names do not match, the examining attorney must issue an inquiry. For example, if the name in the mark is J.C. Jones, and the application is signed by John Jones, the examining attorney must inquire whether J.C. Jones is John Jones. If applicant states that J.C. Jones is John Jones, consent is presumed. The statement that J.C. Jones is John Jones may be entered by examiner’s amendment, if appropriate. In such cases, the examining attorney must ensure that the consent statement is entered into the Trademark database. See [TMEP §§813.01\(a\) and \(c\)](#).

*Likeness of Signatory.* Consent may also be presumed when the mark comprises the portrait or likeness of the person who personally signs the application. When the mark comprises a portrait, or a likeness that could *reasonably* be perceived as that of a particular living individual, the examining attorney must make an inquiry, unless the record indicates that the likeness is that of the person who signed the application. If the applicant responds by stating that the likeness is that of the person who signed the application, consent is presumed. No written consent is required, but the examining attorney must ensure that the consent statement is entered into the Trademark database. See [TMEP §§813.01\(a\) and \(c\)](#).

*Application Must be Personally Signed.* Consent may be presumed only where the individual whose name or likeness appears in the mark *personally* signs the application. If the application is signed by an authorized signatory, consent to register the name or likeness must be obtained from the individual. This is true even where the name or likeness that appears in the mark is that of the individual applicant.

*Section 66(a) Applications.* In a §66(a) application, the signed verification is part of the international registration on file at the IB and is not included with the request for extension of protection sent to the USPTO. 37 C.F.R. §2.33(e); [TMEP §1904.01\(c\)](#). The examining attorney is thus unable to determine who signed the verified statement. Therefore, the examining attorney must require a written consent to register, even where the name that appears in the mark is that of the applicant. If the verified statement in support of the request for extension of protection to the United States was personally signed by the individual whose name or likeness appears in the mark, the applicant may satisfy the requirement for a written consent to registration by submitting a copy of the verified statement that is on file with the IB.

### **1206.04(c) New Consent Not Required if Consent is of Record in Valid Registration Owned by Applicant**

An applicant does not have to submit a new consent if a consent to register is already part of the record in the file of a valid registration for a mark comprised in whole or in part of the same name, portrait, or signature for the *same* goods and/or services, or such goods and/or services as would encompass those in the subsequent application. See *In re McKee Baking Co.*, 218 USPQ 287, 288 (TTAB 1983). In this situation, the applicant only has to: (1) claim ownership of that existing registration; and (2) advise the examining attorney that the consent is of record therein. If the applicant provides the information that the consent is of record in the claimed registration by telephone or e-mail, the examining attorney must enter an appropriate Note to the File in the record. The examining attorney must ensure that the consent statement is entered into the Trademark database. See [TMEP §§813.01\(a\) and \(c\)](#).

If an applicant has submitted a consent to register in an application that has not matured to registration, a new consent is not required for pertinent co-pending applications, but the applicant must submit a copy of the consent for each pending application. See *In re McKee Baking Co.*, 218 USPQ at 288; 37 C.F.R. §2.193(g).

See [TMEP §§813.01\(b\)](#) and [1206.05](#) regarding statements that a name or likeness that could reasonably be perceived as that of a living individual is *not* that of a specific living individual.

### **1206.04(d) Implicit Consent**

Consent may sometimes be inferred from the actions of the individual. *In re D.B. Kaplan Delicatessen*, 225 USPQ 342, 344 (TTAB 1985) (finding consent to the use and registration of the mark D. B. KAPLAN'S DELICATESSEN implicit in the terms of a "buy-out" agreement that relinquished all property rights in the name and forbade its use by the named party in any subsequent business). However, the mere incorporation of a business or consent to the business's use of the mark does not constitute implied consent to the registration of the mark. *Krause v. Krause Publ'ns, Inc.*, 76 USPQ2d 1904, 1912 (TTAB 2005) (finding cancellation petitioner did not give implied consent to register when he incorporated a business utilizing his name, sold his stock in the business, and pledged the business's assets, including trademarks, to finance expansion and acquisitions, where there was no evidence that the individual expressly stated that the mark was the property of the corporation or agreed to refrain from use of the name in any subsequent business); *In re New John Nissen Mannequins*, 227 USPQ 569 (TTAB 1985) (finding consent to register JOHN NISSEN MANNEQUINS not implied from appearance of the name "John Nissen" in a deed of incorporation

of applicant's predecessor under the name "John Nissen Mannequins," nor from existence of foreign registrations for trademarks incorporating the name).

### **1206.05 Names and Likenesses That Do Not Identify a Particular Living Individual**

If it appears that a name, portrait, or signature in a mark may identify a particular living individual but, in fact, the applicant devised the matter as fanciful, or believes it to be fanciful, the applicant may be required to submit a statement to that effect. See [TMEP §1206.03](#) for information as to when an examining attorney should inquire as to whether a name or likeness is that of an individual.

The applicant should explain any additional relevant circumstances. For example, if the matter identifies a certain character in literature, or a deceased historical person, then a statement of these facts in the record may be helpful; however, this information will not be printed in the *Official Gazette* or on the registration certificate.

No statement should be printed unless the name or portrait might *reasonably* be perceived as that of a specific living individual. This is true even if the applicant submits an unsolicited statement that a particular name or portrait does not identify a living individual.

Generally, if the name or likeness is such that an inquiry would have been required as to whether it identifies a living individual ( *see* [TMEP §1206.03](#)), and the applicant states that the mark does not identify a living individual, then the statement that the name or likeness does not identify a living individual should be printed. *See* [TMEP §813.01\(b\)](#).

If the applicant owns a valid registration for a mark comprised in whole or in part of the same name, portrait, or signature for any goods or services, and the record for the registration contains a statement that the name or likeness is not that of a living individual, the applicant should claim ownership of the registration and advise the examining attorney that the statement is of record therein. The examining attorney may then enter the same statement in the record for the application, even if applicant does not resubmit or reference the statement. It is not necessary to issue an inquiry in this situation.

## **1207 Refusal on Basis of Likelihood of Confusion, Mistake, or Deception**

### *15 U.S.C. §1052 Extract*

No trademark by which the goods of the applicant may be distinguished from the goods of others shall be refused registration on the principal register on account of its nature unless it . . . (d) Consists of or comprises a mark which so resembles a mark registered in the Patent and Trademark Office, or a mark or trade name previously used in the United States by another and not abandoned, as to be likely, when used on or in connection with the goods of the applicant, to cause confusion, or to cause mistake, or to deceive. . . .

Section 2(d) of the Trademark Act, 15 U.S.C. §1052(d), is the statutory basis for a refusal to register due to likelihood of confusion with another mark. Section 2(d) applies regardless of whether registration of the mark is sought on the Principal Register or the Supplemental Register.

### **1207.01 Likelihood of Confusion**

In the *ex parte* examination of a trademark application, a refusal under §2(d) is normally based on the examining attorney's conclusion that the applicant's mark, as used on or in connection with the specified goods or services, so resembles a *registered* mark as to be likely to cause confusion. See [TMEP §1207.02](#) concerning application of the §2(d) provision relating to marks that so resemble another mark as to be likely

to deceive, and [TMEP §1207.03](#) concerning §2(d) refusals based on unregistered marks (which generally are not issued in ex parte examination).

The issue is not whether the respective marks themselves, or the goods or services offered under the marks, are likely to be confused but, rather, whether there is a likelihood of confusion as to the source or sponsorship of the goods or services because of the marks used thereon. *See, e.g., Paula Payne Prods. Co. v. Johnson's Publ'g Co.*, 473 F.2d 901, 902, 177 USPQ 76, 77 (C.C.P.A. 1973) (“[T]he question is not whether people will confuse the marks, but rather whether the marks will confuse people into believing that the goods they identify emanate from the same source.”); *In re Majestic Distilling Co.*, 315 F.3d 1311, 1316, 65 USPQ2d 1201, 1205 (Fed. Cir. 2003) (“[T]he...mistaken belief that [a good] is manufactured or sponsored by the same entity [as another good] ... is precisely the mistake that §2(d) of the Lanham Act seeks to prevent.”); *In re Shell Oil Co.*, 992 F.2d 1204, 1207, 26 USPQ2d 1687, 1689 (Fed. Cir. 1993) (“The degree of ‘relatedness’ must be viewed in the context of all the factors, in determining whether the services are sufficiently related that a reasonable consumer would be confused as to source or sponsorship.”); *In re Binion*, 93 USPQ2d 1531, 1534, 1535 (TTAB 2009); *In re Ass'n of the U.S. Army*, 85 USPQ2d 1264, 1267-68, 1270 (TTAB 2007); *Hilson Research Inc. v. Soc'y for Human Res. Mgmt.*, 27 USPQ2d 1423, 1429 (TTAB 1993) (“Although confusion, mistake or deception about source or origin is the usual issue posed under Section 2(d), any confusion made likely by a junior user's mark is cause for refusal; likelihood of confusion encompasses confusion of sponsorship, affiliation or connection.”).

The examining attorney must conduct a search of USPTO records to determine whether the applicant's mark so resembles any registered mark(s) as to be likely to cause confusion or mistake, when used on or in connection with the goods or services identified in the application. The examining attorney also searches pending applications for conflicting marks with earlier effective filing dates. See [TMEP §§1208-1208.03\(c\)](#) regarding conflicting marks. The examining attorney must place a copy of the search strategy in the record.

If the examining attorney determines that there is a likelihood of confusion between applicant's mark and a previously registered mark or marks, the examining attorney refuses registration of the applicant's mark under §2(d). Before citing a registration, the examining attorney must check the automated records of the USPTO to confirm that any registration that is the basis for a §2(d) refusal is an active registration. See [TMEP §716.02\(e\)](#) regarding suspension pending cancellation of a cited registration under §8 of the Act or expiration of a cited registration for failure to renew under §9 of the Act.

Also, if USPTO records indicate that an assignment of the conflicting registration has been recorded, the examining attorney must check the automated records of the Assignment Recordation Branch of the USPTO to determine whether the conflicting mark has been assigned to applicant.

In the seminal case involving §2(d), *In re E. I. du Pont de Nemours & Co.*, the U.S. Court of Customs and Patent Appeals discussed the factors relevant to a determination of likelihood of confusion. 476 F.2d 1357, 177 USPQ 563 (C.C.P.A. 1973). In setting forth the factors, the court cautioned that, with respect to determining likelihood of confusion, “[t]here is no litmus rule which can provide a ready guide to all cases.” *Id.* at 1361, 177 USPQ at 567. Not all of the factors are relevant and only those relevant factors for which there is evidence in the record must be considered. *Id.* at 1361-62, 177 USPQ at 567-68; *see also In re Mighty Leaf Tea*, 601 F.3d 1342, 1346, 94 USPQ2d 1257, 1259 (Fed. Cir. 2010) (“Not all of the *DuPont* factors are relevant to every case, and only factors of significance to the particular mark need be considered.”); *In re Majestic Distilling Co.*, 315 F.3d 1311, 1315, 65 USPQ2d 1201, 1204 (Fed. Cir. 2003) (citing *In re Dixie Rests., Inc.*, 105 F.3d 1405, 1406-07, 41 USPQ2d 1531, 1533 (Fed. Cir. 1997)); *Cunningham v. Laser Golf Corp.*, 222 F.3d 943, 946, 55 USPQ2d 1842, 1845 (Fed. Cir. 2000). Furthermore, the significance of a particular factor may differ from case to case. *See du Pont*, 476 F.2d at 1361-62, 177 USPQ at 567-68;

*Dixie Rests.*, 105 F.3d at 1406-07, 41 USPQ2d at 1533 (noting that “any one of the factors may control a particular case”).

Although the weight given to the relevant *du Pont* factors may vary, the following two factors are key considerations in any likelihood of confusion determination:

- The similarity or dissimilarity of the marks in their entireties as to appearance, sound, connotation and commercial impression.
- The relatedness of the goods or services as described in the application and registration(s). *See, e.g., Federated Foods, Inc. v. Fort Howard Paper Co.*, 544 F.2d 1098, 1103, 192 USPQ 24, 29 (C.C.P.A. 1976); *In re Iolo Techs., LLC*, 95 USPQ2d 1498, 1499 (TTAB 2010); *In re Max Capital Grp. Ltd.*, 93 USPQ2d 1243, 1244 (TTAB 2010); *In re Thor Tech, Inc.*, 90 USPQ2d 1634, 1635 (TTAB 2009).

The following factors may also be relevant in an ex parte likelihood-of-confusion determination and must be considered if there is pertinent evidence in the record:

- The similarity or dissimilarity of established, likely-to-continue trade channels.
- The conditions under which and buyers to whom sales are made, i.e., “impulse” vs. careful, sophisticated purchasing ( *see* [TMEP §1207.01\(d\)\(vii\)](#)).
- The number and nature of similar marks in use on similar goods ( *see* [TMEP §1207.01\(d\)\(iii\)](#)).
- The existence of a valid consent agreement between the applicant and the owner of the previously registered mark (*see* [TMEP §1207.01\(d\)\(viii\)](#)).

*See, e.g., du Pont*, 476 F.2d at 1362-63, 177 USPQ at 568-69; *In re Davey Prods. Pty Ltd.*, 92 USPQ2d 1198, 1203-04 (TTAB 2009); *In re Toshiba Med. Sys. Corp.*, 91 USPQ2d 1266, 1272-74 (TTAB 2009); *Ass’n of the U.S. Army*, 85 USPQ2d at 1271-73.

See [TMEP §1207.01\(d\)\(ii\)](#) regarding the “actual confusion” factor and [TMEP §1207.01\(d\)\(ix\)](#) regarding the “fame of the prior mark” factor.

As should be clear from the foregoing, there is no mechanical test for determining likelihood of confusion and “each case must be decided on its own facts.” *Du Pont*, 476 F.2d at 1361, 177 USPQ at 567. In some cases, a determination that there is no likelihood of confusion may be appropriate, even where the marks are similar and the goods/services are related, because these factors are outweighed by other factors, such as differences in the relevant trade channels of the goods/services, the presence in the marketplace of a significant number of similar marks in use on similar goods/services, the existence of a valid consent agreement between the parties, or another established fact probative of the effect of use. For example, in *In re Strategic Partners, Inc.*, 102 USPQ2d 1397 (TTAB 2012), the Board reversed a refusal to register the mark ANYWEAR (in stylized text), for “footwear,” finding no likelihood of confusion with the registered mark ANYWEAR BY JOSIE NATORI (and design), for “jackets, shirts, pants, stretch T-tops and stoles.” Given the similarity in the marks and the relatedness of the goods, the Board stated that “under usual circumstances” it would conclude that confusion is likely to occur; however, an “unusual situation” compelled the Board “to balance the similarities between the marks and goods against the facts that applicant already owns a registration for a substantially similar mark for the identical goods, and that applicant’s registration and the cited registration have coexisted for over five years.” *Id.* at 1399. Applicant’s prior registration of ANYWEARS for goods including footwear was substantially similar to the applied-for mark ANYWEAR for the same goods, and the registration had achieved incontestable status. *Id.* Basing its decision on the thirteenth *du Pont* factor, which “relates to ‘any other established fact probative of the effect of use,’” the

Board determined that this factor outweighed the others and confusion was unlikely. *Id.* at 1399-1400 (quoting *du Pont*, 476 F.2d at 1361, 177 USPQ at 567).

The decision in *Strategic Partners* may be applied and weighed against a §2(d) refusal in the limited situation where: (1) an applicant owns a prior registration for the same mark or a mark with no meaningful difference from the applied-for-mark; (2) the identifications of goods/services in the application and applicant's prior registration are identical or identical in relevant part; and (3) the applicant's prior registration has co-existed for at least five years with the registration being considered as the basis for the Section 2(d) refusal. See *Id.* at 1400.

The determination of likelihood of confusion under §2(d) in an intent-to-use application under §1(b) of the Trademark Act does not differ from the determination in any other type of application.

### **1207.01(a) Relatedness of the Goods or Services**

In assessing the relatedness of the goods and/or services, the more similar the marks at issue, the less similar the goods or services need to be to support a finding of likelihood of confusion. *In re Shell Oil Co.*, 992 F.2d 1204, 1207, 26 USPQ2d 1687, 1689 (Fed. Cir. 1993); *Gen. Mills, Inc. v. Fage Dairy Processing Indus. S.A.*, 100 USPQ2d 1584, 1597 (TTAB 2011); *In re Iolo Techs., LLC*, 95 USPQ2d 1498, 1499 (TTAB 2010); *In re Opus One Inc.*, 60 USPQ2d 1812, 1815 (TTAB 2001). If the marks of the respective parties are identical or virtually identical, the relationship between the goods and/or services need not be as close to support a finding of likelihood of confusion as would be required if there were differences between the marks. *Shell Oil*, 992 F.2d at 1207, 26 USPQ2d at 1689; *In re Davey Prods. Pty Ltd.*, 92 USPQ2d 1198, 1202 (TTAB 2009); *In re Thor Tech, Inc.*, 90 USPQ2d 1634, 1636 (TTAB 2009).

In some instances, because of established marketing practices, the use of identical marks on seemingly unrelated goods and services could result in a likelihood of confusion. See *In re Sloppy Joe's Int'l, Inc.*, 43 USPQ2d 1350, 1356 (TTAB 1997) (“[T]he licensing of the names and/or likenesses of well known persons for use on various goods and services is a common practice.”); *In re Phillips-Van Heusen Corp.*, 228 USPQ 949, 951 (TTAB 1986) (“The licensing of commercial trademarks for use on ‘collateral’ products (such as clothing, glassware, linens, etc.), that are unrelated in nature to those goods or services on which the marks are normally used, has become a common practice in recent years.”).

### **1207.01(a)(i) Goods or Services Need Not Be Identical**

In a §2(d) determination, the goods and/or services do not have to be identical or even competitive in order to find that there is a likelihood of confusion. *In re Iolo Techs., LLC*, 95 USPQ2d 1498, 1499 (TTAB 2010); *In re G.B.I. Tile & Stone, Inc.*, 92 USPQ2d 1366, 1368 (TTAB 2009). The issue is not whether the goods and/or services will be confused with each other, but rather whether the public will be confused as to their source. See *Recot Inc. v. M.C. Becton*, 214 F.3d 1322, 1329, 54 USPQ2d 1894, 1898 (Fed. Cir. 2000) “[E]ven if the goods in question are different from, and thus not related to, one another in kind, the same goods can be related in the mind of the consuming public as to the origin of the goods. It is this sense of relatedness that matters in the likelihood of confusion analysis.”; *In re Shell Oil Co.*, 992 F.2d 1204, 1207, 26 USPQ2d 1687, 1689 (Fed. Cir. 1993); *Safety-Kleen Corp. v. Dresser Indus., Inc.*, 518 F.2d 1399, 1403–04, 186 USPQ 476, 480 (C.C.P.A. 1975); *In re Ass'n of the U.S. Army*, 85 USPQ2d 1264, 1270 (TTAB 2007). It is sufficient that the goods and/or services of the applicant and the registrant are related in some manner or that the conditions surrounding their marketing are such that they are likely to be encountered by the same persons under circumstances that, because of the marks used in connection therewith, would lead to the mistaken belief that they originate from the same source. See, e.g., *On-line Careline Inc. v. America*

*Online Inc.*, 229 F.3d 1080, 56 USPQ2d 1471 (Fed. Cir. 2000) (holding ON-LINE TODAY for Internet connection services and ONLINE TODAY for an electronic publication likely to cause confusion); *In re Martin's Famous Pastry Shoppe, Inc.*, 748 F.2d 1565, 223 USPQ 1289 (Fed. Cir. 1984) (holding MARTIN'S for wheat bran and honey bread, and MARTIN'S for cheese, likely to cause confusion); *Weider Publ'ns, LLC v. D&D Beauty Care Co.*, 109 USPQ2d 1347 (TTAB 2014) (holding SHAPES for a variety of beauty salon, day spa, and health spa services likely to cause confusion with SHAPE for magazines where the services are of the type normally featured in the magazines); *Joel Gott Wines LLC v. Rehoboth Von Gott Inc.*, 107 USPQ2d 1424, 1433 (TTAB 2013) (holding GOTT LIGHT for various water beverages likely to cause confusion with GOTT and JOEL GOTT for wine); *Gen. Mills, Inc. v. Fage Dairy Processing Indus. S.A.*, 100 USPQ2d 1584, 1597 (TTAB 2011) (holding composite marks containing the word TOTAL for yogurt and other products likely to cause confusion with the mark TOTAL for ready-to-eat breakfast cereal); *In re Toshiba Med. Sys. Corp.*, 91 USPQ2d 1266 (TTAB 2009) (holding VANTAGE TITAN for MRI diagnostic apparatus, and TITAN for medical ultrasound device, likely to cause confusion); *L.C. Licensing, Inc. v. Berman*, 86 USPQ2d 1883 (TTAB 2008) (holding ENYCE for custom automotive accessories, and ENYCE for various urban lifestyle clothing items and accessories, likely to cause confusion); *In re Corning Glass Works*, 229 USPQ 65 (TTAB 1985) (holding CONFIRM for a buffered solution equilibrated to yield predetermined dissolved gas values in a blood gas analyzer, and CONFIRMCELLS for diagnostic blood reagents for laboratory use, likely to cause confusion).

Conversely, if the goods or services in question are not related or marketed in such a way that they would be encountered by the same persons in situations that would create the incorrect assumption that they originate from the same source, then, even if the marks are identical, confusion is not likely. *See, e.g., Coach Servs., Inc. v. Triumph Learning LLC*, 668 F.3d 1356, 1371, 101 USPQ2d 1713, 1723 (Fed. Cir. 2012) (affirming the Board's dismissal of opposer's likelihood-of-confusion claim, noting "there is nothing in the record to suggest that a purchaser of test preparation materials who also purchases a luxury handbag would consider the goods to emanate from the same source" though both were offered under the COACH mark); *Shen Mfg. Co. v. Ritz Hotel Ltd.*, 393 F.3d 1238, 1244-45, 73 USPQ2d 1350, 1356 (Fed. Cir. 2004) (reversing TTAB's holding that contemporaneous use of RITZ for cooking and wine selection classes and RITZ for kitchen textiles is likely to cause confusion, because the relatedness of the respective goods and services was not supported by substantial evidence); *Local Trademarks, Inc. v. Handy Boys Inc.*, 16 USPQ2d 1156, 1158 (TTAB 1990) (finding liquid drain opener and advertising services in the plumbing field to be such different goods and services that confusion as to their source is unlikely even if they are offered under the same marks); *Quartz Radiation Corp. v. Comm/Scope Co.*, 1 USPQ2d 1668, 1669 (TTAB 1986) (holding QR for coaxial cable and QR for various apparatus used in connection with photocopying, drafting, and blueprint machines not likely to cause confusion because of the differences between the parties' respective goods in terms of their nature and purpose, how they are promoted, and who they are purchased by).

### **1207.01(a)(ii) Goods May Be Related to Services**

It is well recognized that confusion may be likely to occur from the use of the same or similar marks for goods, on the one hand, and for services involving those goods, on the other. *See, e.g., In re Hyper Shoppes (Ohio), Inc.*, 837 F.2d 463, 6 USPQ2d 1025 (Fed. Cir. 1988) (holding BIGG'S (stylized) for retail grocery and general merchandise store services and BIGGS and design for furniture likely to cause confusion); *In re H.J. Seiler Co.*, 289 F.2d 674, 129 USPQ 347 (C.C.P.A. 1961) (holding SEILER's for catering services and SEILER'S for smoked and cured meats likely to cause confusion); *In re United Serv. Distribs., Inc.*, 229 USPQ 237 (TTAB 1986) (holding mark consisting of a design featuring silhouettes of a man and woman used in connection with distributorship services in the field of health and beauty aids and mark consisting of a design featuring silhouettes of a man and woman used in connection with skin cream likely to cause confusion); *In re Phillips-Van Heusen Corp.*, 228 USPQ 949 (TTAB 1986) (holding 21 CLUB for various items of clothing and THE "21" CLUB (stylized) for restaurant services likely to cause confusion); *In re*

*U.S. Shoe Corp.*, 229 USPQ 707 (TTAB 1985) (holding CAREER IMAGE (stylized) for retail women's clothing store services and CREST CAREER IMAGES (stylized) for uniforms likely to cause confusion); *Steelcase Inc. v. Steelcare Inc.*, 219 USPQ 433 (TTAB 1983) (holding STEELCARE INC. and design for refinishing of furniture, office furniture, and machinery and STEELCASE for office furniture and accessories, likely to cause confusion); *Corinthian Broad. Corp. v. Nippon Elec. Co., Ltd.*, 219 USPQ 733 (TTAB 1983) (holding TVS for transmitters and receivers of still television pictures and TVS for television broadcasting services likely to cause confusion).

### 1207.01(a)(ii)(A) Food and Beverage Products Versus Restaurant Services

While likelihood of confusion has often been found where similar marks are used in connection with both food or beverage products and restaurant services, there is no per se rule to this effect. See *Lloyd's Food Prods., Inc. v. Eli's, Inc.*, 987 F.2d 766, 768, 25 USPQ2d 2027, 2030 (Fed. Cir. 1993); *In re Opus One Inc.*, 60 USPQ2d 1812, 1813 (TTAB 2001). Thus, the relatedness of such goods and services may not be assumed and the evidence of record must show "something more" than that similar or even identical marks are used for food products and for restaurant services. *In re Coors Brewing Co.*, 343 F.3d 1340, 1345, 68 USPQ2d 1059, 1063 (Fed. Cir. 2003) (quoting *Jacobs v. Int'l Multifoods Corp.*, 668 F.2d 1234, 1236, 212 USPQ 641, 642 (C.C.P.A. 1982)); see also *In re Giovanni Food Co.*, 97 USPQ2d 1990, 1991 (TTAB 2011).

In *Coors*, the examining attorney introduced evidence from several sources discussing the practice of some restaurants to offer private label or house brands of beer; evidence that brewpubs who brew their own beer often feature restaurant services; and copies of several third-party registrations showing that a single mark had been registered for both beer and restaurants services. 343 F.3d at 1345, 68 USPQ2d at 1063. However, applicant countered with evidence that while there are about 1,450 brewpubs and microbreweries in the United States, there are over 800,000 restaurants, which means that brewpubs and microbreweries account for only about 18 one-hundredths of one percent of all restaurants. *Id.* at 1346, 68 USPQ2d at 1063. Noting that "[t]here was no contrary evidence introduced on those points," the court found that:

While there was evidence that some restaurants sell private label beer, that evidence did not suggest that such restaurants are numerous. And although the Board had before it a few registrations for both restaurant services and beer, the very small number of such dual use registrations does nothing to counter Coors' showing that only a very small percentage of restaurants actually brew their own beer or sell house brands of beer; instead, the small number of such registrations suggests that it is quite uncommon for restaurants and beer to share the same trademark. Thus, the evidence before the Board indicates not that there is a substantial overlap between restaurant services and beer with respect to source, but rather that the degree of overlap between the sources of restaurant services and the sources of beer is *de minimis*. We therefore disagree with the Board's legal conclusion that Coors' beer and the registrant's restaurant services are sufficiently related to support a finding of a likelihood of confusion.

*Id.* at 1346, 68 USPQ2d at 1063–64.

In the following cases, the Board found the "something more" requirement to be satisfied: *In re Accelerate s.a.l.*, 101 USPQ2d 2047, 2050-51 (TTAB 2012) (holding COLOMBIANO COFFEE HOUSE, for providing food and drink, likely to cause confusion with the registered certification mark COLOMBIAN, for coffee, given the inclusion of COFFEE HOUSE in applicant's mark, third-party registrations covering both restaurant or café services and coffee beverages, and because coffee houses specialize in coffee beverages); *In re Opus One Inc.*, 60 USPQ2d at 1814-16 (holding use of OPUS ONE for both wine and restaurant services likely to cause confusion, where the evidence of record indicated that OPUS ONE is a strong and arbitrary mark,

that it is common in the industry for restaurants to offer and sell private label wines named after the restaurant, and that registrant's wines were served at applicant's restaurant); *In re Comexa Ltda.*, 60 USPQ2d 1118, 1123 (TTAB 2001) (holding AMAZON and parrot design for chili sauce and pepper sauce and AMAZON for restaurant services likely to cause confusion, based on, inter alia, 48 use-based third-party registrations showing registration of the same mark for both sauces and restaurant services, and the determination that "of all food products[,] sauces . . . are perhaps the ones most likely to be marketed by the restaurants in which those items are served"); *In re Azteca Rest. Enters.*, 50 USPQ2d 1209, 1211 (TTAB 1999) (holding AZTECA MEXICAN RESTAURANT for restaurant services and AZTECA (with and without design) for Mexican food items likely to cause confusion, where the AZTECA MEXICAN RESTAURANT mark itself indicated that the relevant restaurant services featured Mexican food and the evidence showed that the goods at issue "are often principal items of entrees served by . . . Mexican restaurants"); *In re Golden Griddle Pancake House Ltd.*, 17 USPQ2d 1074 (TTAB 1990) (holding GOLDEN GRIDDLE for table syrup and GOLDEN GRIDDLE PANCAKE HOUSE for restaurant services likely to cause confusion, based on third-party registration evidence showing that entities offering restaurant services may also offer a variety of goods under the same mark, as well as findings that "restaurants frequently package certain of their products for retail sale" and that the GOLDEN GRIDDLE PANCAKE HOUSE mark itself suggests that the relevant restaurant services feature pancakes and pancake syrup); *In re Mucky Duck Mustard Co.*, 6 USPQ2d 1467, 1469 (TTAB) (holding use of applied-for mark, MUCKY DUCK and duck design, for mustard, and registered mark, THE MUCKY DUCK and duck design, for restaurant services, likely to cause confusion, in view of the substantial similarity of the marks and the "unique and memorable nature" of registrant's mark, and given that "mustard is . . . a condiment which is commonly utilized in restaurants by their patrons" and that "restaurants sometimes market their house specialties, including items such as salad dressings, through retail outlets"), *aff'd per curiam*, 864 F.2d 149 (Fed. Cir. 1988). *Cf. In re Giovanni Food Co.*, 97 USPQ2d at 1991 (finding the Office had not met its burden of proving likelihood of confusion where the marks were JUMPIN' JACKS for barbeque sauce and JUMPIN JACK'S for catering services, because evidence indicating that some restaurants also provide catering services and sell barbeque sauce was not sufficient to establish catering services alone are related to barbeque sauce); *Steve's Ice Cream v. Steve's Famous Hot Dogs*, 3 USPQ2d 1477, 1478 (TTAB 1987) (holding use of applicant's mark, STEVE'S and design comprising hot dog characters, for restaurants featuring hot dogs, and registrant's mark STEVE'S, for ice cream, not likely to cause confusion, where the marks differed and there was no evidence of record that applicant made or sold ice cream or that "any one business makes and sells ice cream under the same mark in connection with which it renders restaurant services").

### **1207.01(a)(iii) Reliance on Identification of Goods/Services in Registration and Application**

The nature and scope of a party's goods or services must be determined on the basis of the goods or services recited in the application or registration. *See, e.g., Stone Lion Capital Partners, L.P. v. Lion Capital LLP*, \_\_\_ F.3d \_\_\_, 110 USPQ2d 1157, 1162 (Fed. Cir. Mar. 26, 2014); *Coach Servs., Inc. v. Triumph Learning LLC*, 668 F.3d 1356, 1370, 101 USPQ2d 1713, 1722 (Fed. Cir. 2012); *Hewlett-Packard Co. v. Packard Press Inc.*, 281 F.3d 1261, 1267, 62 USPQ2d 1001, 1004 (Fed. Cir. 2002); *J & J Snack Foods Corp. v. McDonald's Corp.*, 932 F.2d 1460, 1463, 18 USPQ2d 1889, 1892 (Fed. Cir. 1991); *Octocom Sys., Inc. v. Houston Computer Servs., Inc.*, 918 F.2d 937, 942, 16 USPQ2d 1783, 1787 (Fed. Cir. 1990); *Canadian Imperial Bank of Commerce, N.A. v. Wells Fargo Bank*, 811 F.2d 1490, 1493, 1 USPQ2d 1813, 1815 (Fed. Cir. 1987); *Paula Payne Prods. Co. v. Johnson Publ'g Co.*, 473 F.2d 901, 902, 177 USPQ 76, 77 (C.C.P.A. 1973); *In re Giovanni Food Co.*, 97 USPQ2d 1990, 1991 (TTAB 2011); *In re Iolo Techs., LLC*, 95 USPQ2d 1498, 1500 (TTAB 2010).

If the cited registration describes goods or services broadly, and there is no limitation as to their nature, type, channels of trade, or class of purchasers, it is presumed that the registration encompasses all goods or services of the type described, that they move in all normal channels of trade, and that they are available to all classes

of purchasers. *See, e.g., Levi Strauss & Co. v. Abercrombie & Fitch Trading Co.*, 719 F.3d 1367, 1373, 107 USPQ2d 1167, 1173 (Fed. Cir. 2013); *In re Thor Tech, Inc.*, 90 USPQ2d 1634, 1638 (TTAB 2009) (“We have no authority to read any restrictions or limitations into the registrant’s description of goods.”); *In re Jump Designs, LLC*, 80 USPQ2d 1370, 1374 (TTAB 2006). Therefore, if the cited registration has a broad identification of goods or services, an applicant does not avoid likelihood of confusion merely by more narrowly identifying its related goods. *See, e.g., In re Linkvest S.A.*, 24 USPQ2d 1716 (TTAB 1992) (noting that, where registrant’s goods are broadly identified as “computer programs recorded on magnetic disks,” without any limitation as to the kind of programs or the field of use, it must be assumed that registrant’s goods encompass all such computer programs, including computer programs of the type offered by applicant, that they travel in the same channels of trade normal for such goods, and that they are available to all classes of prospective purchasers of those goods); *In re Diet Ctr., Inc.*, 4 USPQ2d 1975 (TTAB 1987) (noting that, although applicant had limited its identification to indicate that its goods were sold only through franchised outlets offering weight-reduction services, the cited registration’s identification contained no limitations as to trade channels or classes of customers and thus it must be presumed that registrant’s goods travel through all the ordinary channels of trade); *In re Uncle Sam Chem. Co.*, 229 USPQ 233 (TTAB 1986) (finding that although applicant’s cleaning preparations and degreasers were limited to those for industrial and institutional use, registrant’s liquid preparations for cleaning woodwork and furniture, as identified, were not restricted to any particular trade channels or classes of customers and thus could presumably be used for institutional and industrial purposes).

Similarly, there may be a likelihood of confusion where an applicant identifies its goods or services so broadly that the identification encompasses the goods or services identified in the registration of a similar mark. *See, e.g., In re Fiesta Palms LLC*, 85 USPQ2d 1360 (TTAB 2007) (holding CLUB PALMS MVP for casino services, and MVP for casino services offered to preferred customers identified by special identification cards, likely to cause confusion); *In re Equitable Bancorporation*, 229 USPQ 709 (TTAB 1986) (holding RESPONSE for banking services, and RESPONSE CARD for banking services rendered through 24-hour teller machines, likely to cause confusion). In addition, language seeking to limit otherwise identical, or highly similar, goods or services may not be sufficient to distinguish them so as to avoid a likelihood of confusion. *See Bd. of Regents, Univ. of Tex. Sys. v. S. Ill. Miners, LLC*, 110 USPQ2d 1182, 1190-93 (TTAB 2014) (finding that although opposer’s clothing items were limited by the wording “college imprinted” and the applicant’s identical or highly similar items were limited by the wording “professional baseball imprinted,” these restrictions did not distinguish the goods, their trade channels, or their relevant consumers in any meaningful way).

An applicant may not restrict the scope of its goods and/or the scope of the goods covered in the registration by extrinsic argument or evidence, for example, as to the quality or price of the goods. *See, e.g., In re La Peregrina Ltd.*, 86 USPQ2d 1645, 1647 (TTAB 2008); *In re Bercut-Vandervoort & Co.*, 229 USPQ 763, 764-65 (TTAB 1986).

In cases where the terminology in an identification is unclear or undefined, the Trademark Trial and Appeal Board has permitted an applicant to provide extrinsic evidence to show that the registrant’s identification has a specific meaning to members of the trade. *See, e.g., In re Thor Tech, Inc.*, 90 USPQ2d 1634, 1638 & n.10 (TTAB 2009) (noting that, although extrinsic evidence may not be used to limit or restrict the identified goods, it is nonetheless proper to consider extrinsic evidence in the nature of dictionary entries to define the terminology used to describe the goods); *In re Trackmobile Inc.*, 15 USPQ2d 1152, 1154 (TTAB 1990) (noting that, “when the description of goods for a cited registration is somewhat unclear . . . it is improper to simply consider that description in a vacuum and attach all possible interpretations to it

when the applicant has presented extrinsic evidence showing that the description of goods has a specific meaning to members of the trade.”)

### **1207.01(a)(iv) No “Per Se” Rule**

The facts in each case vary and the weight to be given each relevant *du Pont* factor may be different in light of the varying circumstances; therefore, there can be no rule that certain goods or services are *per se* related, such that there must be a likelihood of confusion from the use of similar marks in relation thereto. *See, e.g., In re White Rock Distilleries Inc.*, 92 USPQ2d 1282, 1285 (TTAB 2009) (regarding alcoholic beverages); *Info. Res. Inc. v. X\*Press Info. Servs.*, 6 USPQ2d 1034, 1038 (TTAB 1988) (regarding computer hardware and software); *Hi-Country Foods Corp. v. Hi Country Beef Jerky*, 4 USPQ2d 1169, 1171–72 (TTAB 1987) (regarding food products); *In re Quadram Corp.*, 228 USPQ 863, 865 (TTAB 1985) (regarding computer hardware and software); *In re British Bulldog, Ltd.*, 224 USPQ 854, 855-56 (TTAB 1984) (regarding clothing); *see also M2 Software, Inc. v. M2 Commc'ns, Inc.*, 450 F.3d 1378, 1383, 78 USPQ2d 1944, 1947–48 (Fed. Cir. 2006) (noting that relatedness between software-related goods may not be presumed merely because the goods are delivered in the same media format and that, instead, a subject-matter-based mode of analysis is appropriate).

### **1207.01(a)(v) Expansion-of-Trade Doctrine**

The expansion-of-trade doctrine has limited application in ex parte proceedings, and the Trademark Trial and Appeal Board has indicated that “[i]t is not necessary, . . . in the context of an ex parte proceeding, for the Office to show that the owner of the particular registration that has been cited against the application has expanded or will expand its goods or services.” *In re 1st USA Realty Prof’ls, Inc.*, 84 USPQ2d 1581, 1584 & n.4 (TTAB 2007); *see also In re Kysela Pere et Fils, Ltd.*, 98 USPQ2d 1261, 1266 (TTAB 2011).

The doctrine is typically applied in inter partes proceedings where an opposer claims that its priority of use of a mark with respect to its goods/services should be extended to include applicant’s goods/services because they are in the natural scope of expansion of opposer’s goods/services. *See 1st USA Realty Prof’ls*, 84 USPQ2d at 1584. However, in the ex parte context, the normal relatedness analysis is applied:

[W]e look at the question of the relatedness of the services identified in applicant's application and those in the cited registration based on whether consumers are likely to believe that the services emanate from a single source, rather than whether the Examining Attorney has shown that the registrant . . . has or is likely to expand its particular business to include the services of applicant.

*Id.*

To the extent the expansion-of-trade doctrine does apply in ex parte cases, it “is considered through a traditional relatedness of goods and services approach.” *Id.* at 1584 n.4.

### **1207.01(a)(vi) Evidence Showing Relatedness of Goods or Services**

The examining attorney must provide evidence showing that the goods and services are related to support a finding of likelihood of confusion. *See, e.g., In re White Rock Distilleries Inc.*, 92 USPQ2d 1282, 1285 (TTAB 2009) (finding Office had failed to establish that wine and vodka infused with caffeine are related goods because there was no evidence that vodka and wine emanate from a single source under a single mark or that such goods are complementary products that would be bought and used together). Evidence of relatedness might include news articles and/or evidence from computer databases showing that the relevant

goods/services are used together or used by the same purchasers; advertisements showing that the relevant goods/services are advertised together or sold by the same manufacturer or dealer; and/or copies of prior use-based registrations of the same mark for both applicant's goods/services and the goods/services listed in the cited registration. See [TMEP §1207.01\(d\)\(iii\)](#) and cases cited therein regarding the probative value of third-party registrations.

The identification of goods/services in the subject application and in the cited registration(s) may in itself constitute evidence of the relatedness of the goods or services. *Hewlett-Packard Co. v. Packard Press Inc.*, 281 F.3d 1261, 1267, 62 USPQ2d 1001, 1004 (Fed. Cir. 2002) (finding the Board erred in concluding that there was insufficient evidence of relatedness, because it "did not consider the important evidence already before it, namely the ITU application and [opposer's] registrations").

### **1207.01(b) Similarity of the Marks**

Under *In re E. I. du Pont de Nemours & Co.*, 476 F.2d 1357, 1361, 177 USPQ 563, 567 (C.C.P.A. 1973), the first factor requires examination of "the similarity or dissimilarity of the marks in their entireties as to appearance, sound, connotation and commercial impression." The test of likelihood of confusion is not whether the marks can be distinguished when subjected to a side-by-side comparison, but whether the marks are sufficiently similar that there is a likelihood of confusion as to the source of the goods or services. See *Midwestern Pet Foods, Inc., v. Societe Des Produits Nestle S.A.*, 685 F.3d 1046, 1053, 103 USPQ2d 1435, 1440 (Fed. Cir. 2012); *Edom Labs., Inc. v. Lichter*, 102 USPQ2d 1546, 1551 (TTAB 2012); *In re Iolo Techs., LLC*, 95 USPQ2d 1498, 1499 (TTAB 2010). When comparing the marks, "[a]ll relevant facts pertaining to appearance, sound, and connotation must be considered before similarity as to one or more of those factors may be sufficient to support a finding that the marks are similar or dissimilar." *Recot, Inc. v. M.C. Becton*, 214 F.3d 1322, 1329, 54 USPQ2d 1894, 1899 (Fed. Cir. 2000). In evaluating the similarities between marks, the emphasis must be on the recollection of the average purchaser who normally retains a general, rather than specific, impression of trademarks. E.g., *In re Cynosure, Inc.*, 90 USPQ2d 1644, 1645 (TTAB 2009) (citing *Sealed Air Corp. v. Scott Paper Co.*, 190 USPQ 106, 108 (TTAB 1975)).

The Court of Appeals for the Federal Circuit has provided the following guidance for evaluating the marks:

The basic principle in determining confusion between marks is that marks must be compared in their entireties and must be considered in connection with the particular goods or services for which they are used. It follows from that principle that likelihood of confusion cannot be predicated on dissection of a mark, that is, on only part of a mark. On the other hand, in articulating reasons for reaching a conclusion on the issue of confusion, there is nothing improper in stating that, for rational reasons, more or less weight has been given to a particular feature of a mark, provided the ultimate conclusion rests on consideration of the marks in their entireties. Indeed, this type of analysis appears to be unavoidable.

*In re Nat'l Data Corp.*, 753 F.2d 1056, 1058, 224 USPQ 749, 750-51 (Fed. Cir. 1985) (footnotes omitted) (citations omitted).

Where the goods or services are identical or virtually identical, the degree of similarity between the marks necessary to support a determination that confusion is likely declines. See *Bridgestone Americas Tire Operations, LLC v. Fed. Corp.*, 673 F.3d 1330, 1337, 102 USPQ2d 1061, 1064 (Fed. Cir. 2012); *In re Viterra Inc.*, 671 F.3d 1358, 1363, 101 USPQ2d 1905, 1908 (Fed. Cir. 2012); *In re Mighty Leaf Tea*, 601 F.3d 1342, 1348, 94 USPQ2d 1257, 1260 (Fed. Cir. 2010); *Century 21 Real Estate Corp. v. Century Life*

*of Am.*, 970 F.2d 874, 877, 23 USPQ2d 1698, 1701 (Fed. Cir. 1992); *In re Max Capital Grp. Ltd.*, 93 USPQ2d 1243, 1248 (TTAB 2010); *In re Ginc UK Ltd.*, 90 USPQ2d 1472, 1477 (TTAB 2007).

### **1207.01(b)(i) Word Marks**

The points of comparison for a word mark are appearance, sound, meaning, and commercial impression. *See Palm Bay Imps., Inc. v. Veuve Clicquot Ponsardin Maison Fondée en 1772*, 396 F.3d 1369, 1371, 73 USPQ2d 1689, 1691 (Fed. Cir. 2005) (citing *In re E. I. du Pont de Nemours & Co.*, 476 F.2d 1357, 1361, 177 USPQ 563, 567 (C.C.P.A. 1973)). Similarity of the marks in one respect – sight, sound, or meaning – will not automatically result in a determination that confusion is likely even if the goods are identical or closely related; rather, taking into account all of the relevant facts of a particular case, similarity as to one factor alone *may* be sufficient to support a holding that the marks are confusingly similar. *See In re Thor Tech, Inc.*, 90 USPQ2d 1634, 1635 (TTAB 2009); *In re White Swan Ltd.*, 8 USPQ2d 1534, 1535 (TTAB 1988).

### **1207.01(b)(ii) Similarity In Appearance**

Similarity in appearance is one factor to consider when comparing the marks. *See In re E. I. du Pont de Nemours & Co.*, 476 F.2d 1357, 1361, 177 USPQ 563, 567 (C.C.P.A. 1973). Marks may be confusingly similar in appearance despite the addition, deletion, or substitution of letters or words. *See, e.g., Weiss Assocs. Inc. v. HRL Assocs. Inc.*, 902 F.2d 1546, 14 USPQ2d 1840 (Fed. Cir. 1990) (finding TMM confusingly similar to TMS); *Canadian Imperial Bank of Commerce v. Wells Fargo Bank, N.A.*, 811 F.2d 1490, 1 USPQ2d 1813 (Fed. Cir. 1987) (affirming Board's holding that source confusion is likely where COMMCASH and COMMUNICASH are used in connection with identical banking services); *Ava Enters. v. Audio Boss USA, Inc.*, 77 USPQ2d 1783 (TTAB 2006) (finding AUDIO BSS USA and design similar in appearance to BOSS AUDIO SYSTEMS (stylized)); *In re Lamson Oil Co.*, 6 USPQ2d 1041 (TTAB 1987) (finding TRUCOOL and TURCOOL confusingly similar in appearance); *In re Pix of Am., Inc.*, 225 USPQ 691 (TTAB 1985) (finding NEWPORTS and NEWPORT to be essentially identical in appearance); *In re Pellerin Milnor Corp.*, 221 USPQ 558 (TTAB 1983) (finding MILTRON and MILLTRONICS (stylized) to be highly similar in appearance); *In re BASF A.G.*, 189 USPQ 424 (TTAB 1975) (finding difference between marks LUTEX and LUTEXAL insufficient to avoid source confusion).

### **1207.01(b)(iii) Comparing Marks That Contain Additional Matter**

Determining whether there is a likelihood of confusion requires careful consideration of the nature of the common elements of the marks at issue, as well as the overall commercial impression created by each mark.

Likelihood of confusion is not necessarily avoided between otherwise confusingly similar marks merely by adding or deleting a house mark, other distinctive matter, or a term that is descriptive or suggestive of the named goods or services; if the dominant portion of both marks is the same, then the marks may be confusingly similar notwithstanding peripheral differences. *See, e.g., Stone Lion Capital Partners, L.P. v. Lion Capital LLP*, \_\_\_ F.3d \_\_\_, 110 USPQ2d 1157, 1161 (Fed. Cir. Mar. 26, 2014) (affirming TTAB's finding that applicant's mark STONE LION CAPITAL incorporated the entirety of the registered marks LION CAPITAL and LION, and that the noun LION was the dominant part of both parties' marks); *In re Mighty Leaf Tea*, 601 F.3d 1342, 1347-48, 94 USPQ2d 1257, 1260-61 (Fed. Cir. 2010) (affirming TTAB's finding that applicant's mark, ML, is likely to be perceived as a shortened version of registrant's mark, ML MARK LEES (stylized), when used on the same or closely related skin-care products); *Palm Bay Imps., Inc. v. Veuve Clicquot Ponsardin Maison Fondée En 1772*, 396 F.3d 1369, 1372-73, 73 USPQ2d 1689, 1692 (Fed. Cir. 2005) (affirming TTAB's holding that contemporaneous use of appellant's mark, VEUVE ROYALE, for

sparkling wine, and appellee's marks, VEUVE CLICQUOT and VEUVE CLICQUOT PONSARDIN, for champagne, is likely to cause confusion, noting that the presence of the "strong distinctive term [VEUVE] as the first word in both parties' marks renders the marks similar, especially in light of the largely laudatory (and hence non-source identifying) significance of the word ROYALE"); *In re Chatam Int'l Inc.*, 380 F.3d 1340, 1343, 71 USPQ2d 1944, 1946 (Fed. Cir. 2004) ("Viewed in their entireties with non-dominant features appropriately discounted, the marks [GASPAR'S ALE for beer and ale and JOSE GASPAR GOLD for tequila] become nearly identical."); *Hewlett-Packard Co. v. Packard Press, Inc.*, 281 F.3d 1261, 1266, 62 USPQ2d 1001, 1004 (Fed. Cir. 2002) (finding that, even though applicant's mark PACKARD TECHNOLOGIES (with "TECHNOLOGIES" disclaimed) does not incorporate every feature of opposer's HEWLETT PACKARD marks, a similar overall commercial impression is created); *In re Max Capital Grp. Ltd.*, 93 USPQ2d 1243, 1248 (TTAB 2010) (holding applicant's mark, MAX with pillar design, and registrant's mark, MAX, likely to cause confusion, noting that the "addition of a column design to the cited mark . . . is not sufficient to convey that [the] marks . . . identify different sources for legally identical insurance services"); *In re Toshiba Med. Sys. Corp.*, 91 USPQ2d 1266, 1271 (TTAB 2009) (holding VANTAGE TITAN for MRI diagnostic apparatus, and TITAN for medical ultrasound device, likely to cause confusion, noting that the marks are more similar than they are different and that the addition of applicant's "product mark," VANTAGE, to the registered mark would not avoid confusion); *In re SL&E Training Stable, Inc.*, 88 USPQ2d 1216, 1219 (TTAB 2008) (holding SAM EDELMAN and EDELMAN, both for wallets and various types of bags, likely to cause confusion, noting that there are strong similarities between the marks because they share the same surname, and that consumers viewing the mark EDELMAN may perceive it as an abbreviated form of SAM EDELMAN because it is the practice in the fashion industry to refer to surnames alone); *In re Chica, Inc.*, 84 USPQ2d 1845, 1848-49 (TTAB 2007) (holding CORAZON BY CHICA with design, and CORAZON with design, both for jewelry, likely to cause confusion, noting that, "to many consumers, applicant's mark for the identical word 'Corazon' followed by the phrase 'BY CHICA' will simply be viewed as the identification of the previously anonymous source of the goods sold under the mark CORAZON"); *In re El Torito Rests. Inc.*, 9 USPQ2d 2002 (TTAB 1988) (holding MACHO COMBOS (with "COMBOS" disclaimed), and MACHO (stylized), both for food items as a part of restaurant services, likely to cause confusion); *In re Computer Sys. Ctr. Inc.*, 5 USPQ2d 1378, 1381 (TTAB 1987) (holding CSC ADVANCED BUSINESS SYSTEMS for retail computer store services and computer maintenance and repair services in connection therewith, and CSC for various computer-related services, likely to cause confusion, noting that "the inclusion of 'ADVANCED BUSINESS SYSTEMS' as a feature of applicant's mark is not likely to help customers . . . distinguish the source of each party's service"); *In re Equitable Bancorporation*, 229 USPQ 709, 711 (TTAB 1986) (holding RESPONSE and RESPONSE CARD (with "CARD" disclaimed), both for banking services, likely to cause confusion, noting that "the addition of descriptive matter to one of two otherwise similar, nondescriptive marks will not serve to avoid a likelihood of confusion"); *In re Apparel Ventures, Inc.*, 229 USPQ 225, 226 (TTAB 1986) (holding applicant's mark, SPARKS BY SASSAFRAS (stylized), for clothing, and registrant's mark, SPARKS (stylized), for footwear, likely to cause confusion, noting that "[t]hose already familiar with registrant's use of its mark in connection with its goods, upon encountering applicant's mark on applicant's goods, could easily assume that 'sassafras' is some sort of house mark that may be used with only some of the 'SPARKS' goods"); *In re Corning Glass Works*, 229 USPQ 65, 66 (TTAB 1985) (holding CONFIRM for a buffered solution equilibrated to yield predetermined dissolved gas values in a blood-gas analyzer, and CONFIRMCELLS for diagnostic blood reagents for laboratory use, likely to cause confusion, noting that the relevant consumers would view the "CELLS" portion of CONFIRMCELLS as merely descriptive); *In re U.S. Shoe Corp.*, 229 USPQ 707, 709 (TTAB 1985) (holding CAREER IMAGE (stylized) for clothing and retail women's clothing store services, and CREST CAREER IMAGES (stylized) for uniforms, likely to cause confusion, noting that CAREER IMAGE would be perceived by consumers as a shortened form of CREST CAREER IMAGES); *In re Energy Images, Inc.*, 227 USPQ 572, 573 (TTAB 1985) (holding SMART-SCAN (stylized) for optical line recognition and digitizing processors, and SMART for telemetry systems and remote-data gathering and control systems, likely to cause confusion, noting that, because of

the descriptive significance of the term “SCAN,” it would be the portion of applicant’s mark that consumers would least likely rely upon to distinguish applicant’s goods); *In re Denisi*, 225 USPQ 624, 624 (TTAB 1985) (holding PERRY’S PIZZA and PERRY’S, both for restaurant services, likely to cause confusion, noting that “where a newcomer has appropriated the entire mark of a registrant, and has added to it a non-distinctive term, the marks are generally considered to be confusingly similar”); *In re Riddle*, 225 USPQ 630, 632 (TTAB 1985) (holding RICHARD PETTY’S ACCU TUNE and design for automotive service stations, and ACCU-TUNE for automotive testing equipment, likely to cause confusion); *In re Collegian Sportswear, Inc.*, 224 USPQ 174, 176 (TTAB 1984) (holding COLLEGIAN OF CALIFORNIA and design (with “CALIFORNIA” disclaimed), and COLLEGIENNE, both for items of clothing, likely to cause confusion, noting that the addition of “OF CALIFORNIA” would not obviate confusion because consumers might believe that such wording denotes a new product line from the same source); *In re Pierre Fabre S.A.*, 188 USPQ 691, 692 (TTAB 1975) (holding PEDI-RELAX for foot cream with antiperspirant properties, and RELAX for antiperspirant, likely to cause confusion).

Additions or deletions to marks may be sufficient to avoid a likelihood of confusion if: (1) the marks in their entireties convey significantly different commercial impressions; or (2) the matter common to the marks is not likely to be perceived by purchasers as distinguishing source because it is merely descriptive or diluted.

*See, e.g., Citigroup Inc. v. Capital City Bank Group, Inc.*, 637 F.3d 1344, 1356, 98 USPQ2d 1253, 1261 (Fed. Cir. 2011) (affirming TTAB’s holding that contemporaneous use of applicant’s CAPITAL CITY BANK marks for banking and financial services, and opposer’s CITIBANK marks for banking and financial services, is not likely cause confusion, based, in part, on findings that the phrase “City Bank” is frequently used in the banking industry and that “CAPITAL” is the dominant element of applicant’s marks, which gives the marks a geographic connotation as well as a look and sound distinct from opposer’s marks); *Shen Mfg. Co. v. Ritz Hotel Ltd.*, 393 F.3d 1238, 1245, 73 USPQ2d 1350, 1356-57 (Fed. Cir. 2004) (reversing TTAB’s holding that contemporaneous use of THE RITZ KIDS for clothing items (including gloves) and RITZ for various kitchen textiles (including barbeque mitts) is likely to cause confusion, because, *inter alia*, THE RITZ KIDS creates a different commercial impression); *Safer, Inc. v. OMS Invs., Inc.*, 94 USPQ2d 1031, 1044-45 (TTAB 2010) (holding DEER-B-GON for animal repellent used to repel deer, other ruminant animals, and rabbits, and DEER AWAY and DEER AWAY PROFESSIONAL for repellent for repelling deer, other big game, and rabbits, not likely to cause confusion, noting that “DEER” is descriptive as applied to the relevant goods and thus has no source-indicating significance); *Bass Pro Trademarks, L.L.C. v. Sportsman’s Warehouse, Inc.*, 89 USPQ2d 1844, 1857-58 (TTAB 2008) (finding that, although cancellation petitioner’s and respondent’s marks were similar by virtue of the shared descriptive wording “SPORTSMAN’S WAREHOUSE,” this similarity was outweighed by differences in terms of sound, appearance, connotation, and commercial impression created by other matter and stylization in the respective marks); *In re Farm Fresh Catfish Co.*, 231 USPQ 495, 495-96 (TTAB 1986) (holding CATFISH BOBBERS (with “CATFISH” disclaimed) for fish, and BOBBER for restaurant services, not likely to cause confusion, because the word “BOBBER” has different connotation when used in connection with the respective goods and services); *In re Shawnee Milling Co.*, 225 USPQ 747, 749 (TTAB 1985) (holding GOLDEN CRUST for flour, and ADOLPH’S GOLD’N CRUST and design (with “GOLD’N CRUST” disclaimed) for coating and seasoning for food items, not likely to cause confusion, noting that, because “GOLDEN CRUST” and “GOLD’N CRUST” are highly suggestive as applied to the respective goods, the addition of “ADOLPH’S” is sufficient to distinguish the marks); *In re S.D. Fabrics, Inc.*, 223 USPQ 54, 55-56 (TTAB 1984) (holding DESIGNERS/FABRIC (stylized) for retail fabric store services, and DAN RIVER DESIGNER FABRICS and design for textile fabrics, not likely to cause confusion, noting that, because of the descriptive nature of

“DESIGNERS/FABRIC” and “DESIGNER FABRICS,” the addition of “DAN RIVER” is sufficient to avoid a likelihood of confusion); *see also* [TMEP §1207.01\(b\)\(viii\)](#).

### **1207.01(b)(iv) Similarity in Sound – Phonetic Equivalent**

Similarity in sound is one factor in determining whether the marks are confusingly similar. *See In re E. I. du Pont de Nemours & Co.*, 476 F.2d 1357, 1361, 177 USPQ 563, 567 (C.C.P.A. 1973); *In re White Swan, Ltd.*, 8 USPQ2d 1534, 1535 (TTAB 1988). For purposes of the §2(d) analysis, there is no “correct” pronunciation of a mark because it is impossible to predict how the public will pronounce a particular mark; therefore, “correct” pronunciation cannot be relied on to avoid a likelihood of confusion. *See, e.g., In re Viterra Inc.*, 671 F.3d 1358, 1367, 101 USPQ2d 1905, 1912 (Fed. Cir. 2012) (upholding the Board’s affirmance of a Section 2(d) refusal to register XCEED for agricultural seed based on a likelihood of confusion with the registered mark X-SEED and design, SEED disclaimed, for identical goods); *Centraz Indus. Inc. v. Spartan Chem. Co. Inc.*, 77 USPQ2d 1698, 1701 (TTAB 2006) (acknowledging that “there is no correct pronunciation of a trademark” and finding ISHINE (stylized) and ICE SHINE, both for floor finishing preparations, confusingly similar); *In re Lamson Oil Co.*, 6 USPQ2d 1041, 1042 n.3 (TTAB 1987) (“[C]orrect pronunciation as desired by the applicant cannot be relied upon to avoid a likelihood of confusion.”); *Kabushiki Kaisha Hattori Tokeiten v. Scutto*, 228 USPQ 461 (TTAB 1985) (holding SEYCOS and design for watches, and SEIKO for watches and clocks, likely to cause confusion); *In re Great Lakes Canning, Inc.*, 227 USPQ 483 (TTAB 1985) (holding CAYNA (stylized) for soft drinks, and CANA for, *inter alia*, canned and frozen fruit and vegetable juices, likely to cause confusion); *In re Energy Telecomms. & Elec. Ass’n*, 222 USPQ 350 (TTAB 1983) (holding ENTELEC and design for association services relating to telecommunications and other electrical control systems for use in the energy related industries, and INTELECT for promoting, planning, and conducting expositions and exhibitions for the electrical industry, likely to cause confusion); *In re Cresco Mfg. Co.*, 138 USPQ 401 (TTAB 1963) (holding CRESCO and design for leather jackets, and KRESSCO for hosiery, likely to cause confusion).

### **1207.01(b)(v) Similarity in Meaning**

Similarity in meaning or connotation is another factor in determining whether the marks are confusingly similar. *See In re E. I. du Pont de Nemours & Co.*, 476 F.2d 1357, 1361, 177 USPQ 563, 567 (C.C.P.A. 1973); *In re Cynosure, Inc.*, 90 USPQ2d 1644, 1645-46 (TTAB 2009). The focus is on the recollection of the average purchaser who normally retains a general, rather than specific, impression of trademarks. *E.g., In re Ass’n of the U.S. Army*, 85 USPQ2d 1264, 1267-68 (TTAB 2007); *In re Cont’l Graphics Corp.*, 52 USPQ2d 1374, 1375 (TTAB 1999); *see also In re M. Serman & Co., Inc.*, 223 USPQ 52 (TTAB 1984) (holding CITY WOMAN for ladies’ blouses, and CITY GIRL for female clothing, likely to cause confusion); *Gastown, Inc., of Del. v. Gas City, Ltd.*, 187 USPQ 760 (TTAB 1975) (holding GAS CITY (“GAS” disclaimed) for gasoline, and GASTOWN for gasoline, diesel fuel, kerosene, and vehicle supply and maintenance services, likely to cause confusion); *Watercare Corp. v. Midwesco-Enterprise, Inc.*, 171 USPQ 696 (TTAB 1971) (holding AQUA-CARE (stylized, with and without design) and WATERCARE (stylized), both for water-conditioning products, likely to cause confusion).

The meaning or connotation of a mark must be determined in relation to the named goods or services. Even marks that are identical in sound and/or appearance may create sufficiently different commercial impressions when applied to the respective parties’ goods or services so that there is no likelihood of confusion. *See, e.g., In re Sears, Roebuck & Co.*, 2 USPQ2d 1312, 1314 (TTAB 1987) (holding CROSS-OVER for bras and CROSSOVER for ladies’ sportswear not likely to cause confusion, noting that the term “CROSS-OVER” was suggestive of the construction of applicant’s bras, whereas “CROSSOVER,” as applied to registrant’s goods, was “likely to be perceived by purchasers either as an entirely arbitrary designation, or as being suggestive of sportswear which “crosses over” the line between informal and more formal wear . . . or the

line between two seasons”); *In re British Bulldog, Ltd.*, 224 USPQ 854, 856 (TTAB 1984) (holding PLAYERS for men’s underwear and PLAYERS for shoes not likely to cause confusion, agreeing with applicant’s argument that the term “PLAYERS” implies a fit, style, color, and durability suitable for outdoor activities when applied to shoes, but “implies something else, primarily indoors in nature” when applied to men’s underwear); *In re Sydel Lingerie Co.*, 197 USPQ 629, 630 (TTAB 1977) (holding BOTTOMS UP for ladies’ and children’s underwear and BOTTOMS UP for men’s clothing not likely to cause confusion, noting that the wording connotes the drinking phrase “Drink Up” when applied to men’s clothing, but does not have this connotation when applied to ladies’ and children’s underwear).

### **1207.01(b)(vi) Doctrine of Foreign Equivalents**

Under the doctrine of foreign equivalents, a foreign word (from a language familiar to an appreciable segment of American consumers) and the English equivalent may be held to be confusingly similar. *See, e.g., In re Thomas*, 79 USPQ2d 1021 (TTAB 2006) (holding MARCHE NOIR for jewelry, and BLACK MARKET MINERALS for retail jewelry and mineral store services, likely to cause confusion); *In re Am. Safety Razor Co.*, 2 USPQ2d 1459 (TTAB 1987) (holding BUENOS DIAS for soap, and GOOD MORNING and design for latherless shaving cream, likely to cause confusion); *In re Hub Distrib., Inc.*, 218 USPQ 284 (TTAB 1983) (holding EL SOL for clothing and footwear, and SUN and design for footwear, likely to cause confusion).

Whether an examining attorney should apply the doctrine of foreign equivalents turns upon the significance of the foreign mark to the relevant purchasers, which is based on an analysis of the evidence of record, including, for example, dictionary, Internet, and LexisNexis® evidence. If the evidence shows that the relevant English translation is literal and direct, and no contradictory evidence of shades of meaning or other relevant meanings exists, the doctrine generally should be applied by the examining attorney. *See, e.g., In re Ithaca Indus., Inc.*, 230 USPQ 702 (TTAB 1986) (holding LUPO for men’s and boys’ underwear, and WOLF and design for various clothing items, likely to cause confusion, because, *inter alia*, “LUPO” is clearly the foreign equivalent of the English word “wolf”).

If an examining attorney determines that the doctrine is applicable, the examining attorney must also consider all other relevant *du Pont* factors in assessing whether there is a likelihood of confusion. *See In re E. I. du Pont de Nemours & Co.*, 476 F.2d 1357, 1361, 177 USPQ 563, 567 (C.C.P.A. 1973); *In re L’Oreal S.A.*, 222 USPQ 925, 926 (TTAB 1984) (noting that “similarity [of the marks] in connotation must be viewed as but a single factor in the overall evaluation of likelihood of confusion”).

### **1207.01(b)(vi)(A) Background**

With respect to likelihood of confusion, “[i]t is well established that foreign words or terms are not entitled to be registered if the English language equivalent has been previously used on or registered for products which might reasonably be assumed to come from the same source.” *Mary Kay Cosmetics, Inc. v. Dorian Fragrances, Ltd.*, 180 USPQ 406, 407 (TTAB 1973).

Although words from modern languages are generally translated into English, the doctrine of foreign equivalents has evolved into a guideline, not an absolute rule, and is applied only when the “ordinary American purchaser” would “stop and translate” the foreign wording in a mark into its English equivalent. *Palm Bay Imps., Inc. v. Veuve Clicquot Ponsardin Maison Fondée en 1772*, 396 F.3d 1369, 1377, 73 USPQ2d 1689, 1696 (Fed. Cir. 2005) (reversing holding of likelihood of confusion where the marks were VEUVE ROYALE (the French equivalent of “Royal Widow”) and THE WIDOW, deeming it improbable that American purchasers would stop and translate “VEUVE” into “widow”). The “ordinary American

purchaser” includes “all American purchasers, including those proficient in a non-English language who would ordinarily be expected to translate words into English.” *In re Spirits Int’l, N.V.*, 563 F.3d 1347, 1352, 90 USPQ2d 1489, 1492 (Fed. Cir. 2009).

With respect to the likelihood of confusion determination, the doctrine has been applied generally in the situation where the wording in one mark is entirely in English and the wording in the other mark or marks is entirely in a foreign language. See, e.g., *In re Perez*, 21 USPQ2d 1075 (TTAB 1991); *In re Am. Safety Razor Co.*, 2 USPQ2d 1459 (TTAB 1987); *In re Hub Distrib., Inc.*, 218 USPQ 284 (TTAB 1983). This is the most common scenario in the case law.

The Board, however, has applied the doctrine where the wording in both marks being compared is in the same foreign language. See *In re Lar Mor Int’l, Inc.*, 221 USPQ 180, 181-83 (TTAB 1983) (noting that “[i]t seems to us that the fact that both marks may be comprised of foreign words should not mean that we can disregard their meanings” and translating the marks BIEN JOLIE and TRES JOLIE to compare their meanings, but concluding that confusion was not likely, despite their substantially similar meanings, because of, inter alia, the highly laudatory nature of the registered mark, BIEN JOLIE). In the *Lar Mor* case, the marks in question consisted of common French terms and, thus, it was perhaps more likely that the ordinary American purchaser would stop and translate such terms. Cf. *Palm Bay Imps.*, 396 F.3d at 1377, 73 USPQ2d at 1692, 1696 (noting that the doctrine of foreign equivalents will not be applied when it is unlikely that an American buyer will translate a foreign mark and agreeing with TTAB’s determination that purchasers were unlikely to translate applicant’s French mark VEUVE ROYALE and opposer’s French marks VEUVE CLICQUOT PONSARDIN and VEUVE CLICQUOT, but concluding that confusion was likely because, inter alia, the presence of the arbitrary term “VEUVE” as the first word in both parties’ marks renders the marks similar); *Brown Shoe Co. v. Robbins*, 90 USPQ2d 1752, 1756 (TTAB 2009) (determining that the relevant circumstances of the case did not warrant application of the doctrine where the parties’ respective marks were the Spanish terms PALOMITA and PALOMA, but concluding that confusion was likely because, inter alia, the marks were substantially similar in appearance, pronunciation, meaning, and commercial impression).

The Board has also applied the doctrine in an inter partes case where the wording in one of the marks was in a foreign language and the wording in the other mark or marks was in a different foreign language. See *Miguel Torres S.A. v. Casa Vinicola Gerardo Cesari S.R.L.*, 49 USPQ2d 2018 (TTAB 1998) (applying the doctrine and concluding that confusion was likely where the applicant’s mark featured the Italian wording DUE TORRI, meaning “two towers,” and the opposer’s marks featured the Spanish wording TORRES and TRES TORRES, meaning “towers” and “three towers” respectively), *vacated and remanded on other grounds*, 230 F.3d 1372 (Fed. Cir. 1999) (unpublished table decision). However, the Board has stated that, in general, it does not apply the doctrine where both marks are non-English words from two different foreign languages. *Brown Shoe Co.*, 90 USPQ2d at 1756; see also *Safeway Stores, Inc. v. Bel Canto Fancy Foods, Ltd.*, 5 USPQ2d 1980, 1982 (TTAB 1987) (“[T]his Board does not think it proper to take the French expression ‘bel air’ and the Italian expression ‘bel aria’ and then convert both into English and compare the English translations to determine whether there is similarity as to connotation . . .”). One reason for not applying the doctrine where the marks are in different foreign languages is that it is less likely that the ordinary American purchaser would be fluent in two or more foreign languages. In *Miguel Torres*, the Board noted that the relevant marks were of such a nature that it was unnecessary for those encountering the relevant marks to be fluent in both Spanish and Italian to understand the connotations of the marks, because, for instance, a purchaser who is fluent in Spanish and familiar with meaning of the mark TORRES may be able to discern the meaning of a mark containing the Italian wording DUE TORRI and a design of two towers. 49 USPQ2d at 2021. In any case, the doctrine may not be as relevant, and certainly not the sole determinative factor, in a situation such as the *Miguel Torres* case where the marks are also similar in other respects.

The Board has yet to apply the doctrine in a published decision where the wording in one or more of the marks being compared consists of a combination of English and foreign-language words or terms. In such a case, the issue would likely remain whether the ordinary American purchaser would stop and translate these combined-language marks. The sufficiency of the translation evidence, the nature of the combined foreign and English wording (i.e., whether the wording is arbitrary, suggestive, generic, etc.), and any other relevant facts and evidence should be considered in these cases.

### **1207.01(b)(vi)(B) When an Ordinary American Purchaser Would “Stop and Translate”**

Issues regarding the doctrine of foreign equivalents arise early in examination, that is, at the time of conducting a search for confusingly similar marks. The search of foreign words in an applied-for mark must include a search of their English translation to ensure that all possible conflicting registrations and prior-filed applications have been identified in the event that the doctrine applies. See [TMEP §§809.01-809.03](#) for information regarding how to ascertain the meaning of non-English wording in a mark and when a translation is required.

After conducting a complete search, an examining attorney must then assess whether a refusal under §2(d) may be warranted. If so, the examining attorney should research the English translation further using available resources, such as dictionaries, the Internet, and LexisNexis®, to ascertain whether there is sufficient evidence to support applying the doctrine.

As discussed below, if the evidence shows that the English translation is “literal and direct,” with no contradictory evidence of other relevant meanings or shades of meaning, then the doctrine should be applied, barring unusual circumstances. Further, if in its response to the application of the doctrine applicant argues that the foreign language is rare, obscure, or dead, then the examining attorney will need to provide evidence that the foreign language is a common, modern language.

#### *English Translations – Literal and Direct*

The Federal Circuit has stated that “[t]he test to be applied to a foreign word vis-a-vis an English word with respect to equivalency is not less stringent than that applicable to two English words.” *In re Sarkli, Ltd.*, 721 F.2d 353, 354, 220 USPQ 111, 113 (Fed. Cir. 1983).

Thus, the English translation evidence is a critical factor for the Board and the courts when determining whether to apply the doctrine. If the translation evidence shows that the English translation is unambiguously literal and direct, with no other relevant connotations or variations in meaning, the doctrine has generally been applied, and, therefore, should be applied by the examining attorney. See *In re La Peregrina Ltd.*, 86 USPQ2d 1645, 1648-50 (TTAB 2008) (holding LA PEREGRINA for jewelry, pearls, pearl jewelry, and precious stones, and PILGRIM for jewelry, likely to cause confusion, where dictionary evidence showed that “pilgrim” is an exact translation of “peregrina” and there was no other dictionary evidence to the contrary); *In re Thomas*, 79 USPQ2d 1021, 1024-25 (TTAB 2006) (holding MARCHE NOIR for jewelry, and BLACK MARKET MINERALS for retail jewelry and mineral store services, likely to cause confusion, where the evidence showed “MARCHE NOIR” is the exact French equivalent of the English idiom “Black Market”); *In re Ithaca Indus., Inc.*, 230 USPQ 702, 704 (TTAB 1986) (LUPO for men’s and boys’ underwear, and WOLF and design for various clothing items, likely to cause confusion, where there was no dispute that “LUPO” is the Italian equivalent of “wolf”); *In re Hub Distrib., Inc.*, 218 USPQ 284, 284-85 (TTAB 1983) (holding EL SOL for clothing, and SUN and design for footwear, likely to cause confusion, where “EL SOL” was determined to be the “direct foreign language equivalent” of the term “sun”); see also *Ex parte Odol-Werke Wien GmbH.*, 111 USPQ 286, 286 (Comm’r Pats. 1956) (finding the French language mark CHAT NOIR and its English language equivalent BLACK CAT confusingly similar because “CHAT

NOIR’ undoubtedly means, and is the same as, ‘Black Cat’ to a substantial segment” of the relevant purchasers).

When determining the appropriate English translation of the foreign wording in the mark, an examining attorney should view the translations in the context of any significant features in the mark, such as design or wording elements, the identified goods and/or services in the application, the relevant marketplace, and the specimen. *See, e.g., In re Perez*, 21 USPQ2d 1075, 1076-77 (TTAB 1991) (holding EL GALLO for fresh vegetables, and ROOSTER for fresh citrus fruit, likely to cause confusion, rejecting applicant’s argument that purchasers would ascribe other meanings to “gallo,” where “rooster” was the first English translation listed in a Spanish-English language dictionary entry for “gallo,” where “gallo” was the only listed Spanish translation in a dictionary entry for “rooster,” and where the design of a rooster on the specimen reinforced the translation of “GALLO”).

Where the evidence shows that the English translation is not exact, literal, or direct, the doctrine of foreign equivalents has generally not been applied to find the marks confusingly similar. *See Sarkli*, 721 F.2d at 354-55, 220 USPQ at 112-13 (holding REPECHAGE for various skin-care products, and SECOND CHANCE for face creams and other toiletries, not likely to cause confusion, where the evidence failed to show that the terms were direct foreign equivalents); *see also In re Buckner Enters.*, 6 USPQ2d 1316 (TTAB 1987) (holding DOVE (with design) for stoves and furnaces, and PALOMA for various forms of gas heating apparatus, not likely to cause confusion, because, *inter alia*, the Spanish word “paloma” and the English word “dove” are not exact synonyms in that “paloma” can be translated into either “dove” or “pigeon”). Thus, several translation dictionaries showing variations in the English meaning constitute evidence that the foreign word or term may not have a literal and direct translation, and the doctrine should not be applied.

#### *Common, Modern Foreign Languages*

The doctrine applies to words or terms from common, modern languages, which encompasses all but dead, obscure, or unusual languages. *See Palm Bay Imps., Inc. v. Veuve Clicquot Ponsardin Maison Fondée en 1772*, 396 F.3d 1369, 1377, 73 USPQ2d 1689, 1696 (Fed. Cir. 2005). Thus, an examining attorney should provide evidence to show that the foreign language is a common, modern language. The type of evidence will vary depending on the particular facts of the case but, if available, the examining attorney should provide evidence of the percentage or number of United States consumers who speak the language in question. For example:

- Census evidence provided by applicant, showing that only 0.6% of the American population speak French “very well” or “well,” was used by the Board against the applicant to find that French is a commonly spoken language and that, of the foreign languages with the greatest number of speakers in the United States, French was second only to Spanish. *Thomas*, 79 USPQ2d at 1024.
- Evidence showing that 706,000 Russian-speakers live in the United States was persuasive evidence to establish that a “significant portion of consumers” would understand the English meaning of the Russian mark for Russian vodka. *In re Joint Stock Co. “Baik,”* 80 USPQ2d 1305, 1310 (TTAB 2006).

Census evidence identifying the number of people who speak various foreign languages in the United States can be found at <http://www.census.gov/hhes/socdemo/language/>.

If such evidence is unavailable or unpersuasive, the examining attorney may instead provide other evidence that the language in question is a common, modern language by establishing, for example, that the foreign country where the language is spoken is a prominent trading partner of the United States or that the foreign

language is spoken by a sizeable world population. Such evidence may be obtained from the USPTO's Translations Branch, as well as the Internet, LexisNexis®, and any other relevant electronic or print resources.

If evidence shows that the language at issue is highly obscure or a dead language, the doctrine will generally not be applied. *See Palm Bay Imps.*, 396 F.3d at 1377, 73 USPQ2d 1689, 1696; *cf. In re Spirits Int'l, N.V.*, 563 F.3d 1347, 1351, 90 USPQ2d 1489, 1491 (Fed. Cir. 2009) (indicating that the doctrine of foreign equivalents does not require that terms from dead or obscure languages be literally translated for the purpose of determining descriptiveness). The determination of whether a language is “dead” is made on a case-by-case basis, based upon the meaning the word or term would have to the relevant purchasing public. For example, Latin is generally considered a dead language. However, if evidence shows that a Latin term is still in use by the relevant purchasing public (i.e., if the term appears in current dictionaries or news articles), then this Latin term would not be considered dead. The same analysis is applied to other words or terms from uncommon or obscure languages.

*Other Considerations: Alternate Meaning of Mark and Marketplace Circumstances of the Commercial Setting in Which the Mark is Used*

The Board may also review the evidence of record to determine the following:

- (1) Whether the foreign wording has a meaning in the relevant marketplace that differs from the translated meaning in English; and/or
- (2) Whether it is more or less likely that the foreign expression will be translated by purchasers because of the manner in which the term is encountered in the marketing environment as used in connection with the goods and/or services.

*See Thomas*, 79 USPQ2d at 1025-26; *see also In re Jos. Schlitz Brewing Co.*, 223 USPQ 45, 45-46 (TTAB 1983) (considering whether purchasers would be likely to translate the mark “KUHLEBRAU” into its merely descriptive English equivalent, “cool brew”). In making such determinations, the Board generally reviews evidence such as dictionary definitions, declarations, and specimens.

Typically, the doctrine will not be applied where the foreign wording has developed an alternate meaning in the relevant marketplace that is different from the translated meaning in English, and the evidence shows that the alternate meaning would be understood by the relevant purchasing public. *See La Peregrina*, 86 USPQ2d at 1649 (finding that if sufficient evidence had been provided to show that the Spanish-language mark LA PEREGRINA, which translates to mean “the pilgrim,” for goods including pearls and pearl jewelry, was viewed by the relevant purchasing public as the “name of a very famous and unique pearl,” such would be a situation “where purchasers would not translate the name”); *cf. Cont'l Nut Co. v. Le Cordon Bleu S.a.r.l.*, 494 F.2d 1395, 1396-97, 181 USPQ 646, 647 (C.C.P.A. 1974) (finding that applicant's ownership of a prior registration for “BLUE RIBBON” did not preclude opposer from asserting damage resulting from applicant's registration of the mark CORDON BLEU, (which literally translates to “blue ribbon”) because CORDON BLEU would not be translated by, or have the same significance to, an American purchaser in view of the adoption by the English language of the wording CORDON BLEU, as evidenced by American English dictionary entries indicating that such wording refers to a highly skilled cook).

The doctrine also typically will not be applied where the record indicates that it is unlikely purchasers would translate the mark because of “marketplace circumstances or the commercial setting in which the mark is used.” *La Peregrina*, 86 USPQ2d at 1648; *see also Thomas*, 79 USPQ2d at 1026 (finding “MARCHE NOIR” confusingly similar to “BLACK MARKET MINERALS,” but suggesting that a different conclusion might have been reached if the marketplace circumstances or commercial setting in which the mark was

used were such that it would be unlikely for purchasers to translate “MARCHE NOIR”); *In re Tia Maria, Inc.*, 188 USPQ 524, 525-26 (TTAB 1975) (holding TIA MARIA (which translates to “Aunt Mary”) for restaurant services, and AUNT MARY’S for canned fruits and vegetables, not likely to cause confusion, because, inter alia, a person dining at the TIA MARIA restaurant surrounded by its Mexican décor and Mexican food, would be likely to accept “TIA MARIA” as it is and not translate it into “AUNT MARY”).

### **1207.01(b)(vi)(C) Likelihood of Confusion Factors Still Apply When Assessing Whether Marks are Confusingly Similar**

If the examining attorney has sufficient evidence to show that foreign wording comprising a mark has a relevant, literal, and direct English translation such that the foreign wording has an English language equivalent, then the doctrine generally should be applied. However, applying the doctrine is only part of the process of determining whether the marks being compared are confusingly similar. Appearance, sound, meaning, and overall commercial impression are also factors to be considered when comparing marks. *See Palm Bay Imps. v. Veuve Clicquot Ponsardin Maison Fondée en 1772*, 396 F.3d 1369, 1371, 73 USPQ2d 1689, 1691 (Fed. Cir. 2005) (citing *In re E.I. du Pont de Nemours & Co.*, 476 F.2d 1357, 1361, 177 USPQ 563, 567 (C.C.P.A. 1973); *In re Ness & Co.*, 18 USPQ2d 1815, 1816 (TTAB 1991) (“[S]uch similarity as there is in connotation [between the foreign word mark and the English word mark] must be weighed against the dissimilarity in appearance, sound, and all other factors, before reaching a conclusion on likelihood of confusion as to source.” (quoting *In re Sarkli, Ltd.*, 721 F.2d 353, 354, 220 USPQ 111, 113 (Fed. Cir. 1983))).

Similarity of the marks in one respect – sight, sound, or meaning – does not automatically result in a finding of likelihood of confusion even if the goods are identical or closely related; rather, the rule is that, taking into account all of the relevant facts of a particular case, similarity as to one factor alone may be sufficient to support a holding that the marks are confusingly similar. *See In re Thor Tech, Inc.*, 90 USPQ2d 1634, 1635 (TTAB 2009); *In re White Swan Ltd.*, 8 USPQ2d 1534, 1535 (TTAB 1988); [TMEP §1207.01\(b\)\(i\)](#).

For example, if the English and foreign marks being compared are weak or highly suggestive, or have additional wording or matter that serves to distinguish the marks, then regardless of application of the doctrine and similarity in meaning, the marks may not be considered confusingly similar. *See Ness & Co.*, 18 USPQ2d at 1816 (holding GOOD-NESS for cheese and meats, and LABONTE (which translates to “the goodness”) for cheese, not likely cause confusion, because of the laudatory nature of the term “goodness,” the dissimilarity of the marks in appearance and sound, the slight differences in meaning of the marks, and the connotation of the mark GOOD-NESS in relation to applicant’s company name “Ness & Co.”); *In re L’Oreal S.A.*, 222 USPQ 925, 925-26 (TTAB 1984) (considering the English translation of the French mark HAUTE MODE (meaning “high fashion” in English), but concluding that contemporaneous use with the HI-FASHION SAMPLER was not likely to cause confusion, because of, *inter alia*, the “less than wholly arbitrary nature of the marks” and the differences in the marks, including the addition of the term SAMPLER in the English-language mark).

If both marks being compared are in a foreign language and have the same or a very similar meaning when translated, the following factors should also be assessed: (1) whether the English meaning of the marks is weak or highly suggestive with respect to the goods and/or services; and (2) whether the marks being compared are similar in sound and/or appearance in addition to having the same or similar meaning. If the marks are not weak or highly suggestive and are similar in meaning and sound, they may be found to be confusingly similar. *See Miguel Torres S.A v. Casa Vinicola Gerardo Cesari S.R. L.*, 49 USPQ2d 2018 (applying the doctrine and concluding that confusion was likely where the applicant’s mark featured the Italian wording DUE TORRI, meaning “two towers,” and opposer’s marks featured the Spanish wording TORRES and TRES TORRES, meaning “towers” and “three towers” respectively, because the marks were

similar not only in connotation but also in sound) , vacated and remanded on other grounds, 230 F.3d 1372 (Fed. Cir. 1999) (unpublished table decision); *In re Lar Mor Int'l, Inc.*, 221 USPQ 180 (translating the marks BIEN JOLIE and TRES JOLIE to compare their meanings, but concluding that confusion was not likely, despite the marks' substantially similar meanings, because of, *inter alia*, the highly laudatory nature of the wording "JOLIE," and the "obvious visual and phonetic differences" between the marks).

In addition, when comparing only foreign language marks, even if it is determined that the marks are not likely to be translated by purchasers, the marks may still be found confusingly similar for other reasons, such as similarity in sound and/or appearance. *See Palm Bay Imps.*, 396 F.3d at 1372-73, 1377, 73 USPQ2d at 1691, 1696 (agreeing with Board's finding that purchasers would not translate into English applicant's French mark VEUVE ROYALE and opposer's French marks VEUVE CLICQUOT PONSARDIN and VEUVE CLICQUOT, and upholding the Board's determination that confusion was nonetheless likely as to these marks, because, *inter alia*, "the presence of [the] strong distinctive term [VEUVE] as the first word in both parties' marks renders the marks similar, especially in light of the largely laudatory . . . significance of the word ROYALE").

See also TMEP §§ [1209.03\(g\)](#), [1210.05\(b\)](#), [1210.10](#), and [1211.01\(a\)\(vii\)](#) for additional information regarding the doctrine of foreign equivalents.

### **1207.01(b)(vii) Transposition of Terms**

Where the primary difference between marks is the transposition of the elements that compose the marks, and where this transposition does not change the overall commercial impression, there may be a likelihood of confusion. *See, e.g., In re Wine Soc'y of Am. Inc.*, 12 USPQ2d 1139, 1142 (TTAB 1989) (holding THE WINE SOCIETY OF AMERICA and design for wine club membership services including the supplying of printed materials, and AMERICAN WINE SOCIETY 1967 and design for newsletters, bulletins, and journals, likely to cause confusion); *In re Nationwide Indus., Inc.*, 6 USPQ2d 1882, 1884 (TTAB 1988) (holding RUST BUSTER (with "RUST" disclaimed) for rust-penetrating spray lubricant, and BUST RUST for penetrating oil, likely to cause confusion); *In re Gen. Tire & Rubber Co.*, 213 USPQ 870, 871 (TTAB 1982) (holding SPRINT STEEL RADIAL (with "STEEL" and "RADIAL" disclaimed) for pneumatic tires, and RADIAL SPRINT (with "RADIAL" disclaimed) for radial tires, likely to cause confusion).

However, if the transposed mark creates a distinctly different commercial impression, then confusion is not likely. *See, e.g., In re Best Prods. Co.*, 231 USPQ 988, 989-90 (TTAB 1986) (holding BEST JEWELRY and design (with "JEWELRY" disclaimed) for retail jewelry store services, and JEWELERS' BEST for bracelets, not likely to cause confusion).

### **1207.01(b)(viii) Marks Consisting of Multiple Words**

When assessing the likelihood of confusion between compound word marks, one must determine whether a portion of the word mark is dominant in terms of creating the commercial impression. The Court of Appeals for the Federal Circuit has noted that "in articulating reasons for reaching a conclusion on the issue of confusion, there is nothing improper in stating that, for rational reasons, more or less weight has been given to a particular feature of a mark, provided the ultimate conclusion rests on consideration of the marks in their entireties." *In re Nat'l Data Corp.*, 753 F.2d 1056, 1058, 224 USPQ 749, 750-51 (Fed. Cir. 1985). Although there is no mechanical test to select a "dominant" element of a compound word mark, consumers would be more likely to perceive a fanciful or arbitrary term, rather than a descriptive or generic term, as the source-indicating feature of the mark. *See, e.g., In re Dixie Rests., Inc.*, 105 F.3d 1405, 1407, 41 USPQ2d 1531, 1533-34 (Fed. Cir. 1997) (affirming TTAB's finding that "DELTA," not the disclaimed generic term

“CAFE,” is the dominant portion of the mark THE DELTA CAFE); *In re Binion*, 93 USPQ2d 1531, 1534 (TTAB 2009) (finding that “BINION’S,” not the disclaimed descriptive wording “ROADHOUSE,” is the dominant portion of the mark BINION’S ROADHOUSE). Accordingly, if two marks for related goods or services share identical or similar dominant features and the marks, when viewed in their entireties, create similar overall commercial impressions, then confusion is likely. *See, e.g., In re Cynosure, Inc.*, 90 USPQ2d 1644 (TTAB 2009) (holding CYNERGY for medical lasers for, *inter alia*, treatment of the face and skin, and SYNERGIE PEEL for medical devices for microdermabrasion, likely to cause confusion, noting that “SYNERGIE” is the dominant portion of the cited mark and “PEEL” is insufficient to distinguish the marks); *In re J.M. Originals Inc.*, 6 USPQ2d 1393 (TTAB 1987) (holding JM ORIGINALS (with “ORIGINALS” disclaimed) for various items of apparel, and JM COLLECTABLES for sport shirts, likely to cause confusion).

If the common element of two marks is “weak” in that it is generic, descriptive, or highly suggestive of the named goods or services, it is unlikely that consumers will be confused unless the overall combinations have other commonality. *See, e.g., In re Bed & Breakfast Registry*, 791 F.2d 157, 159 229 USPQ 818, 819 (Fed. Cir. 1986) (reversing TTAB’s holding that contemporaneous use of BED & BREAKFAST REGISTRY for making lodging reservations for others in private homes, and BED & BREAKFAST INTERNATIONAL for room booking agency services, is likely to cause confusion, because, *inter alia*, the descriptive nature of the shared wording weighed against a finding that the marks are confusingly similar); *U.S. Shoe Corp. v. Chapman*, 229 USPQ 74 (TTAB 1985) (holding COBBLER’S OUTLET for shoes, and CALIFORNIA COBBLERS (in typed and stylized forms) for footwear and women’s shoes, not likely to cause confusion); *In re Istituto Sieroterapico E Vaccinogeno, Toscano “SCLAVO” S.p.A.*, 226 USPQ 1035 (TTAB 1985) (holding ASO QUANTUM (stylized, with “ASO” disclaimed) for diagnostic laboratory reagents, and QUANTUM I for laboratory instruments for analyzing body fluids, not likely to cause confusion); *see also TMEP §§1207.01(b)(iii), (b)(ix)*.

However, while the public may rely more on the nondescriptive portions of marks to distinguish them, “this does not mean that the public looks only at the differences [between the marks], or that descriptive words play no role in creating confusion.” *Nat’l Data Corp.*, F.2d at 1060, 224 USPQ at 752.

### **1207.01(b)(ix) Weak or Descriptive Marks**

The Court of Appeals for the Federal Circuit and the Trademark Trial and Appeal Board have recognized that merely descriptive and weak designations may be entitled to a narrower scope of protection than an entirely arbitrary or coined word. *See Palm Bay Imps., Inc. v. Veuve Clicquot Ponsardin Maison Fondee en 1772*, 396 F.3d 1369, 1373, 73 USPQ2d 1689, 1693 (Fed. Cir. 2005); *Giersch v. Scripps Networks, Inc.*, 90 USPQ2d 1020, 1026 (TTAB 2009); *In re Box Solutions Corp.*, 79 USPQ2d 1953, 1957-58 (TTAB 2006); *In re Cent. Soya Co.*, 220 USPQ 914, 916 (TTAB 1984). However, even a weak mark is entitled to protection against the registration of a similar mark for closely related goods or services. *See King Candy Co. v. Eunice King’s Kitchen, Inc.*, 496 F.2d 1400, 1401 182 USPQ 108, 109 (C.C.P.A. 1974).

With respect to marks registered on the Supplemental Register, the Board stated the following in *In re Hunke & Jochheim*:

[R]egistration on the Supplemental Register may be considered to establish *prima facie* that, at least at the time of registration, the registered mark possessed a merely descriptive significance. This is significant because it is well established that the scope of protection afforded a merely descriptive or even a highly suggestive term is less than that accorded an arbitrary or coined mark. That is, terms falling within the former category have been generally categorized as “weak” marks, and the scope of

protection extended to these marks has been limited to the substantially identical notation and/or to the subsequent use and registration thereof for substantially similar goods.

185 USPQ 188, 189 (TTAB 1975) (citation omitted).

However, even marks that are registered on the Supplemental Register may be cited under §2(d). *In re Clorox Co.*, 578 F.2d 305, 308-09, 198 USPQ 337, 341 (C.C.P.A. 1978).

### **1207.01(b)(x) Parody Marks**

The fact that a mark is intended to be a parody of another trademark is not, by itself, sufficient to overcome a likelihood of confusion refusal, because “[t]here are confusing parodies and non-confusing parodies.” J. Thomas McCarthy, *McCarthy on Trademarks and Unfair Competition*, §31.153 (4th ed. 2010); *see also Nike, Inc. v. Maher*, 100 USPQ2d 1018, 1023 (TTAB 2011) (“[P]arody is not a defense if the marks would otherwise be considered confusingly similar.”). “A true parody actually decreases the likelihood of confusion because the effect of the parody is to create a distinction in the viewer’s mind between the actual product and the joke.” *Mutual of Omaha Ins. Co. v. Novak*, 648 F. Supp. 905, 910, 231 USPQ 963, 965 (D. Neb. 1986), *aff’d*, 836 F.2d 397, 5 USPQ2d 1314 (8th Cir. 1987). Thus, “[w]hile a parody must call to mind the actual product to be successful, the same success also necessarily distinguishes the parody from the actual product.” *Id.*

Cases involving a discussion of parody include the following: *Research in Motion Ltd. v. Defining Presence Mktg. Grp., Inc.*, 102 USPQ2d 1187, 1192 (TTAB 2012) (sustaining oppositions to applications for the mark CRACKBERRY, for a variety of online computer services and clothing items, on the bases of a likelihood of confusion and likelihood of dilution by blurring with the mark BLACKBERRY, for handheld devices, including smartphones, and related goods and services, noting that “likelihood of confusion will usually trump any First Amendment concerns”); *Starbucks U.S. Brands, LLC v. Ruben*, 78 USPQ2d 1741 (TTAB 2006) (holding contemporaneous use of applicant’s mark, LESSBUCKS COFFEE, and opposer’s marks, STARBUCKS and STARBUCKS COFFEE, for identical goods and services, likely to cause confusion, noting that “parody is unavailing to applicant as an outright defense and, further, does not serve to distinguish the marks”); *Columbia Pictures Indus., Inc. v. Miller*, 211 USPQ 816, 820 (TTAB 1981) (holding CLOTHES ENCOUNTERS for clothing, and CLOSE ENCOUNTERS OF THE THIRD KIND for t-shirts, likely to cause confusion, noting that the “right of the public to use words in the English language in a humorous and parodic manner does not extend to use of such words as trademarks if such use conflicts with the prior use and/or registration of the substantially same mark by another”); *see also Jordache Enters. v. Hogg Wyld Ltd.*, 828 F.2d 1482, 4 USPQ2d 1216, 1220, 1222 (10<sup>th</sup> Cir. 1987) (noting that “a parody of an existing trademark can cause a likelihood of confusion,” but affirming district court’s holding that contemporaneous use of LARDASHE and JORDACHE, both for jeans, is not likely to cause confusion).

### **1207.01(b)(xi) Color Marks**

When the marks at issue are both color marks, the test is not whether the marks can be distinguished when subjected to a side-by-side comparison, but rather whether the marks are sufficiently similar in terms of their appearance and overall commercial impression so that confusion as to the source of the goods/services offered under the respective marks is likely to result. *In re Cook Med. Tech. LLC*, 105 USPQ2d 1377, 1381 (TTAB 2012). In *In re Cook Med. Tech.*, the Board affirmed a refusal to register the color “teal” for “medical devices, namely, guiding sheaths for use in conjunction with access needles, wire guides, and dilators for providing access for diagnostic and interventional devices in vascular and non-vascular procedures,” finding the mark likely to cause confusion with a registered mark for the color “blue” applied to the tip and indwelling

length of catheters. *Id.*, 105 USPQ2d at 1385. Because registrant's "blue" mark was not limited to a particular shade of blue, it covered all shades of blue, including applicant's "teal." *Id.*, 105 USPQ2d at 1382. Further, the Board found that, in the context of the goods at issue, the marks were similar in color, noting that the original description of applicant's mark identified it as the color "blue/teal," and that the goods were complementary *Id.*, 105 USPQ2d at 1380, 82-83.

### 1207.01(c) Design Marks

When the marks at issue are both design marks, the similarity of the marks must be decided primarily on the basis of visual similarity. *E.g.*, *In re Vienna Sausage Mfg. Co.*, 16 USPQ2d 2044, 2047 (TTAB 1990). In this situation, consideration must be given to the fact that the marks usually will not be viewed side-by-side in the marketplace and a purchaser's recollection of design marks is often of a general, rather than specific, nature; thus the marks may be confusingly similar despite differences between them. *See, e.g.*, *In re United Serv. Distribs., Inc.*, 229 USPQ 237 (TTAB 1986) (holding mark consisting of a design featuring silhouettes of a man and woman, used in connection with distributorship services in the field of health and beauty aids, and mark consisting of a design featuring silhouettes of a man and woman, used in connection with skin cream, likely to cause confusion); *In re Steury Corp.*, 189 USPQ 353 (TTAB 1975) (holding mark consisting of three generally horizontal bars, for, *inter alia*, boats, campers, and travel trailers, and mark consisting of two generally horizontal bars, for, *inter alia*, boats, campers, and travel trailers, likely to cause confusion); *Matsushita Elec. Indus. Co. v. Sanders Assocs., Inc.*, 177 USPQ 720 (TTAB 1973) (holding mark consisting of a triangular arrow design within a square border, for various items of electrical and electronic equipment, and mark consisting of a triangular arrow design, for various items of electrical and electronic equipment, likely to cause confusion); *cf. Red Carpet Corp. v. Johnstown Am. Enters.*, 7 USPQ2d 1404 (TTAB 1988) (holding mark consisting of a highly stylized house design for use in connection with real estate property management, and mark consisting of a highly stylized house design for use in connection with real estate brokerage services, not likely to cause confusion); *Ocean Spray Cranberries, Inc. v. Ocean Garden Prods., Inc.*, 223 USPQ 1027 (TTAB 1984) (holding mark consisting of a circle containing three curved lines with rounded ends, for seafood, and mark consisting of a stylized breaking wave within an oval, for various food items including juices and fruits, not likely to cause confusion).

### 1207.01(c)(i) Legal Equivalents – Comparison of Words and Their Equivalent Designs

Under the doctrine of legal equivalents, which is based on a recognition that a pictorial depiction and equivalent wording are likely to impress the same mental image on purchasers, a design mark may be found to be confusingly similar to a word mark consisting of the design's literal equivalent. *See, e.g.*, *In re Rolf Nilsson AB*, 230 USPQ 141 (TTAB 1986) (holding applicant's mark consisting of a silhouette of a lion's head and the letter "L," for shoes, and registrant's mark, LION, for shoes, likely to cause confusion); *Puma-Sportschuhfabriken Rudolf Dassler KG v. Garan, Inc.*, 224 USPQ 1064 (TTAB 1984) (holding applicant's marks featuring a design of a mountain lion, for clothing items, and opposer's marks, a puma design and PUMA (with and without puma design), for items of clothing and sporting goods, likely to cause confusion); *In re Duofold Inc.*, 184 USPQ 638 (TTAB 1974) (holding mark consisting of a design of an eagle lined for the color gold, for sports apparel, and mark consisting of GOLDEN EAGLE and design of an eagle, for various items of clothing, likely to cause confusion).

Where, however, a pictorial representation in a mark is so highly stylized or abstract that it would not readily evoke in the purchaser's mind the wording featured in another mark, the marks may not be confusingly similar. *See, e.g.*, *In re Serac, Inc.*, 218 USPQ 340, 341 (TTAB 1983) (concluding that applicant's design mark was "so highly stylized that an image of a ram's head would not be immediately discerned and the

connection with [the registered mark] ‘RAM’s HEAD’ would not be readily evoked with the resulting generation of a likelihood of source confusion”).

### **1207.01(c)(ii) Composite Marks Consisting of Both Words and Designs**

Often, the examining attorney must determine whether a likelihood of confusion exists between composite marks that consist of a design element combined with words and/or letters. Frequently, the marks at issue are similar in only one element. Although it is not proper to dissect a mark, if one feature of a mark is more significant than another feature, greater weight may be given to the dominant feature for purposes of determining likelihood of confusion. *See, e.g., In re Viterra Inc.*, 671 F.3d 1358, 1362, 101 USPQ2d 1905, 1908 (Fed. Cir. 2012); *Giant Food, Inc. v. Nation’s Foodservice, Inc.*, 710 F.2d 1565, 1570-71, 218 USPQ 390, 395 (Fed. Cir. 1983); *see also* [TMEP §1207.01\(b\)\(iii\)](#). However, the fundamental rule in this situation is that the marks must be considered in their entireties. *See In re Shell Oil Co.*, 992 F.2d 1204, 1206, 26 USPQ2d 1687, 1688 (Fed. Cir. 1993); *Massey Junior Coll., Inc. v. Fashion Inst. of Tech.*, 492 F.2d 1399, 1402, 181 USPQ 272, 273-74 (C.C.P.A. 1974).

If a mark comprises both wording and a design, greater weight is often given to the wording, because it is the wording that purchasers would use to refer to or request the goods or services. *See, e.g., Viterra*, 671 F.3d at 1366, 101 USPQ2d at 1911; *In re Max Capital Grp. Ltd.*, 93 USPQ2d 1243, 1247 (TTAB 2010); *In re Appetito Provisions Co. Inc.*, 3 USPQ2d 1553, 1554 (TTAB 1987). The Court of Appeals for the Federal Circuit has cautioned, however, that “[t]here is no general rule as to whether letters or designs will dominate in composite marks; nor is the dominance of letters or design dispositive of the issue.” *In re Electrolyte Labs. Inc.*, 929 F.2d 645, 647, 16 USPQ2d 1239, 1240 (Fed. Cir. 1990).

The comparison of composite marks must be done on a case-by-case basis, without reliance on mechanical rules of construction. *See, e.g., Spice Islands, Inc. v. Frank Tea & Spice Co.*, 505 F.2d 1293, 184 USPQ 35 (C.C.P.A. 1974) (reversing TTAB’s holding that SPICE TREE with tree design, for garlic powder and minced onion, and SPICE ISLANDS with and without tree design, for seasoning herbs and spices, is not likely to cause confusion); *In re White Rock Distilleries Inc.*, 92 USPQ2d 1282 (TTAB 2009) (holding VOLTA for vodka infused with caffeine, and TERZA VOLTA and vine shoot design for wines, not likely to cause confusion); *In re Sun Supermarkets, Inc.*, 228 USPQ 693 (TTAB 1986) (holding applicant’s mark, SUN SUPERMARKETS with sun design, for retail supermarket services, and registrant’s marks, SUNSHINE and SUNRISE (both with sun designs), for retail grocery store services, likely to cause confusion).

### **1207.01(c)(iii) Comparison of Standard Character Marks and Special Form Marks**

If a mark (in either an application or a registration) is presented in standard characters, the owner of the mark is not limited to any particular depiction of the mark. *Cunningham v. Laser Golf Corp.*, 222 F.3d 943, 950, 55 USPQ2d 1842, 1847 (Fed. Cir. 2000); *In re Cox Enters.*, 82 USPQ2d 1040, 1044 (TTAB 2007). The rights associated with a mark in standard characters reside in the wording (or other literal element, e.g., letters, numerals, punctuation) and not in any particular display. *In re White Rock Distilleries Inc.*, 92 USPQ2d 1282, 1284 (TTAB 2009). A registrant is entitled to all depictions of a standard character mark regardless of the font style, size, or color, and not merely "reasonable manners" of depicting such mark. *See In re Viterra Inc.*, 671 F.3d 1358, 1364-65, 101 USPQ2d 1905, 1910 (Fed. Cir. 2012); *Citigroup Inc. v. Capital City Bank Group, Inc.*, 637 F.3d 1344, 1353, 98 USPQ2d 1253, 1259 (Fed. Cir. 2011). Therefore, an applicant cannot, by presenting its mark in special form, avoid likelihood of confusion with a mark that is registered in standard characters because the registered mark presumably could be used in the same manner of display. *See, e.g., In re RSI Sys., LLC*, 88 USPQ2d 1445, 1448 (TTAB 2008); *In re Melville Corp.*, 18 USPQ2d 1386, 1388 (TTAB 1991); *In re Pollio Dairy Prods. Corp.*, 8 USPQ2d 2012, 2015 (TTAB 1988). Likewise, the fact that an applied-for mark is presented in standard character form would not, by itself, be

sufficient to distinguish it from a similar mark in special form. *See, e.g., In re Mighty Leaf Tea*, 601 F.3d 1342, 1348, 94 USPQ2d 1257, 1260 (Fed. Cir. 2010); *Sunnen Prods. Co. v. Sunex Int'l, Inc.*, 1 USPQ2d 1744, 1747 (TTAB 1987); *In re Hester Indus., Inc.*, 231 USPQ 881, 882 n.6 (TTAB 1986).

See [TMPE §§807.03-807.04\(b\)](#) regarding standard character and special form drawings.

### **1207.01(c)(iv) Matter Depicted in Broken Lines**

In some cases, where the position of the mark on the goods (or on a label or container for the goods) is a feature of the mark, the applicant will submit a drawing that shows the placement of the mark by surrounding the mark with a proportionately accurate broken-line representation of the particular goods, packaging, or advertising on which the mark appears. 37 C.F.R. §2.52(b)(4); [TMPE §807.08](#).

The matter depicted in broken lines is not part of the mark and should not be considered in determining likelihood of confusion. *See In re Homeland Vinyl Prods., Inc.*, 81 USPQ2d 1378, 1382 (TTAB 2006).

### **1207.01(d) Miscellaneous Considerations**

#### **1207.01(d)(i) Doubt Resolved in Favor of Registrant**

If there is any doubt as to whether there is a likelihood of confusion, that doubt must be resolved in favor of the prior registrant. *See In re Shell Oil Co.*, 992 F.2d 1204, 1209, 26 USPQ2d 1687, 1691 (Fed. Cir. 1993); *In re Hyper Shoppes (Ohio), Inc.*, 837 F.2d 463, 464-65, 6 USPQ2d 1025, 1026 (Fed. Cir. 1988); *In re G.B.I. Tile & Stone, Inc.*, 92 USPQ2d 1366, 1372 (TTAB 2009).

#### **1207.01(d)(ii) Absence of Actual Confusion**

It is well settled that the relevant test is likelihood of confusion, not actual confusion; thus, it is unnecessary to show actual confusion to establish likelihood of confusion. *Herbko Int'l, Inc. v. Kappa Books, Inc.*, 308 F.3d 1156, 1165, 64 USPQ2d 1375, 1380 (Fed. Cir. 2002); *Weiss Assocs. Inc. v. HRL Assocs. Inc.*, 902 F.2d 1546, 1549, 14 USPQ2d 1840, 1842-43 (Fed. Cir. 1990); *In re Big Pig*, 81 USPQ2d 1436, 1439-40 (TTAB 2006).

#### **1207.01(d)(iii) Third-Party Registrations and Evidence of Third-Party Use**

Generally, the existence of third-party registrations cannot justify the registration of another mark that is so similar to a previously registered mark as to create a likelihood of confusion, or to cause mistake, or to deceive. *E.g., In re Max Capital Grp. Ltd.*, 93 USPQ2d 1243, 1248 (TTAB 2010); *In re Toshiba Med. Sys. Corp.*, 91 USPQ2d 1266, 1272 (TTAB 2009). However, third-party registrations may be relevant to show that a mark or a portion of a mark is descriptive, suggestive, or so commonly used that the public will look to other elements to distinguish the source of the goods or services. *See, e.g., In re Hartz Hotel Servs., Inc.*, 102 USPQ2d 1150, 1153-54 (TTAB 2012); *In re Melville Corp.*, 18 USPQ2d 1386, 1388 (TTAB 1991); *In re Dayco Products-Eagle Motive Inc.*, 9 USPQ2d 1910, 1911-12 (TTAB 1988); *Plus Prods. v. Star-Kist Foods, Inc.*, 220 USPQ 541, 544 (TTAB 1983). Properly used in this limited manner, third-party registrations are similar to dictionaries showing how language is generally used. *See, e.g., Tektronix, Inc. v. Daktronics, Inc.*, 534 F.2d 915, 917, 189 USPQ 693, 694-95 (C.C.P.A. 1976); *In re J.M. Originals Inc.*, 6 USPQ2d 1393, 1394 (TTAB 1987); *United Foods Inc. v. J.R. Simplot Co.*, 4 USPQ2d 1172, 1174 (TTAB 1987).

Third-party registrations that cover a number of different goods or services may have some probative value to the extent that they may serve to suggest that goods or services are of a type that may emanate from a single source, if the registrations are based on use in commerce. *In re Mucky Duck Mustard Co.*, 6 USPQ2d 1467, 1470 n.6 (TTAB), *aff'd per curiam*, 864 F.2d 149 (Fed. Cir. 1988); *see also In re Princeton Tectonics, Inc.*, 95 USPQ2d 1509, 1511 (TTAB 2010) (“While third-party registrations can play an important role in establishing that the types of goods at issue are related, examining attorneys must review the registrations carefully to ensure that each registration presented is probative and that the number of registrations is sufficient, along with other types of evidence, to establish that the types of goods at issue are related.”). Third-party registrations that are not based on use in commerce, such as those registered under §66 of the Trademark Act (15 U.S.C. §1141f(a)), or those registered solely under §44 of the Trademark Act (15 U.S.C. §1126(e)), and for which no §8 or §71 affidavits or declarations of continuing use have been filed (15 U.S.C. §1058), have very little, if any, persuasive value. *See Calypso Tech., Inc. v. Calypso Capital Mgmt., LP*, 100 USPQ2d 1213, 1221 n.15 (TTAB 2011); *In re 1st USA Realty Prof'ls, Inc.*, 84 USPQ2d 1581, 1583 (TTAB 2007); *In re Albert Trostel & Sons Co.*, 29 USPQ2d 1783, 1786 (TTAB 1993).

A list of registrations or a copy of a search report is not proper evidence of third-party registrations. *See, e.g., In re Promo Ink*, 78 USPQ2d 1301, 1304 (TTAB 2006); *In re Dos Padres, Inc.*, 49 USPQ2d 1860, 1861 n.2 (TTAB 1998); TBMP §1208.02. To make registrations of record, copies of the registrations or the electronic equivalent thereof (i.e., printouts or electronic copies of the registrations taken from the electronic database of the USPTO) must be submitted. *In re Ruffin Gaming, LLC*, 66 USPQ2d 1924, 1925 n.3 (TTAB 2002); *In re Smith & Mehaffey*, 31 USPQ2d 1531, 1532 n.3 (TTAB 1994); TBMP §1208.02; [TMEP §710.03](#).

Evidence of third-party use falls under the sixth *du Pont* factor – the “number and nature of similar marks in use on similar goods.” *In re E. I. du Pont de Nemours & Co.*, 476 F.2d 1357, 1361, 177 USPQ 563, 567 (C.C.P.A. 1973). If the evidence establishes that the consuming public is exposed to third-party use of similar marks on similar goods, it “is relevant to show that a mark is relatively weak and entitled to only a narrow scope of protection.” *Palm Bay Imps., Inc. v. Veuve Clicquot Ponsardin Maison Fondée en 1772*, 396 F.3d 1369, 1373-74, 73 USPQ2d 1689, 1693 (Fed. Cir. 2005).

### **1207.01(d)(iv) Collateral Attack on Registration Improper in Ex Parte Proceeding**

Section 7(b) of the Trademark Act, 15 U.S.C. §1057(b), provides that a certificate of registration on the Principal Register shall be prima facie evidence of the validity of the registration, of the registrant’s ownership of the mark, and of the registrant’s exclusive right to use the mark in commerce in connection with the goods or services specified in the certificate. During ex parte prosecution, an applicant will not be heard on matters that constitute a collateral attack on the cited registration (e.g., a registrant’s nonuse of the mark). *See In re Dixie Rests., Inc.*, 105 F.3d 1405, 1408, 41 USPQ2d 1531, 1534-35 (Fed. Cir. 1997); *In re Fiesta Palms, LLC*, 85 USPQ2d 1360, 1363 (TTAB 2007); *In re Peebles Inc.* 23 USPQ2d 1795, 1797 n.5 (TTAB 1992); *In re Pollio Dairy Prods. Corp.*, 8 USPQ2d 2012, 2014-15 (TTAB 1988).

It is also inappropriate for the applicant in an ex parte proceeding to place the burden of showing a likelihood of confusion on the owner of the cited registration. *In re Majestic Distilling Co.*, 315 F.3d 1311, 1318, 65 USPQ2d 1201, 1206 (Fed. Cir. 2003) (“It is the duty of the PTO and this court to determine whether there is a likelihood of confusion between two marks. . . . [I]t is no answer for the applicant to ask that the

application be passed to publication to see whether the owner of the cited mark will oppose the registration.” (quoting *Dixie Rests.*, 105 F.3d at 1408, 41 USPQ2d at 1535)).

### **1207.01(d)(v) Classification of Goods/Services**

The classification of goods and services has no bearing on the question of likelihood of confusion. See *Jean Patou, Inc. v. Theon Inc.*, 9 F.3d 971, 975, 29 USPQ2d 1771, 1774 (Fed. Cir. 1993). Rather, it is the manner in which the applicant and/or registrant have identified their goods or services that is controlling. See *Nat'l Football League v. Jasper Alliance Corp.*, 16 USPQ2d 1212, 1216 & n.5 (TTAB 1990).

### **1207.01(d)(vi) Prior Decisions of Examining Attorneys**

Each case must be decided on its own merits. E.g., *In re Binion*, 93 USPQ2d 1531, 1536 (TTAB 2009). Previous decisions by examining attorneys in approving other marks are without evidentiary value and are not binding on the agency or the Board. *In re Davey Prods. Pty.*, 92 USPQ2d 1198, 1206 (TTAB 2009); *In re Wilson*, 57 USPQ2d 1863, 1871 (TTAB 2001); *In re Sunmarks, Inc.*, 32 USPQ2d 1470, 1472 (TTAB 1994); *In re Nat'l Novice Hockey League, Inc.*, 222 USPQ 638, 641 (TTAB 1984).

### **1207.01(d)(vii) Sophisticated Purchasers**

The fact that purchasers are sophisticated or knowledgeable in a particular field does not necessarily mean that they are immune to source confusion. See *In re Shell Oil Co.*, 992 F.2d 1204, 1208, 26 USPQ2d 1687, 1690 (Fed. Cir. 1993) (indicating that “even sophisticated purchasers can be confused by very similar marks”); *Top Tobacco, LP v. N. Atl. Operating Co.*, 101 USPQ2d 1163, 1170 (TTAB 2011); *In re Total Quality Grp., Inc.*, 51 USPQ2d 1474, 1477 (TTAB 1999); *In re Decombe*, 9 USPQ2d 1812, 1814-15 (TTAB 1988); *In re Pellerin Milnor Corp.*, 221 USPQ 558, 560 (TTAB 1983); cf. *Stone Lion Capital Partners, L.P. v. Lion Capital LLP*, \_\_\_ F.3d \_\_\_, 110 USPQ2d 1157, 1163 (Fed. Cir. Mar. 26, 2014) (affirming that TTAB properly considered all potential investors for recited services, which included sophisticated investors, but that precedent requires TTAB decision to be based “on the least sophisticated potential purchasers.”) However, circumstances suggesting care in purchasing may tend to minimize the likelihood of confusion. See, e.g., *In re N.A.D., Inc.*, 754 F.2d 996, 999-1000, 224 USPQ 969, 971 (Fed. Cir. 1985) (concluding that, because only sophisticated purchasers exercising great care would purchase the relevant goods, there would be no likelihood of confusion merely because of the similarity between the marks NARCO and NARKOMED); *In re Homeland Vinyl Prods., Inc.*, 81 USPQ2d 1378, 1380, 1383 (TTAB 2006).

### **1207.01(d)(viii) Consent Agreements**

The term “consent agreement” generally refers to an agreement between parties in which one party (e.g., a prior registrant) consents to the registration of a mark by the other party (e.g., an applicant for registration of the same mark or a similar mark), or in which each party consents to the registration of an identical or similar mark by the other party.

An applicant may submit a consent agreement in an attempt to overcome a refusal of registration under §2(d) of the Act, or in anticipation of a refusal to register. However, an examining attorney may not solicit a consent agreement.

A consent agreement may take a number of different forms and arise under a variety of circumstances, but, when present, it is “but one factor to be taken into account with all of the other relevant circumstances

bearing on the likelihood of confusion referred to in §2(d).” *In re N.A.D. Inc.*, 754 F.2d 996, 224 USPQ 969, 971 (Fed. Cir. 1985).

“Naked” consent agreements (i.e., agreements that contain little more than a prior registrant’s consent to registration of an applied-for mark and possibly a mere statement that source confusion is believed to be unlikely) are typically considered to be less persuasive than agreements that detail the particular reasons why the relevant parties believe no likelihood of confusion exists and specify the arrangements undertaken by the parties to avoid confusing the public. *See In re E.I. du Pont de Nemours & Co.*, 476 F.2d 1357, 1362, 177 USPQ 563, 568 (C.C.P.A 1973) (noting that “[i]n considering agreements, a naked ‘consent’ may carry little weight,” but “[t]he weight to be given more detailed agreements . . . should be substantial”); *see also In re Donnay Int’l, S.A.*, 31 USPQ2d 1953, 1956 (TTAB 1994) (“[T]he more information that is in the consent agreement as to why the parties believe confusion to be unlikely, and the more evidentiary support for such conclusions in the facts of record or in the way of undertakings by the parties, the more we can assume that the consent is based on a reasoned assessment of the marketplace, and consequently the more weight the consent will be accorded.”); *In re Permagrain Prods., Inc.*, 223 USPQ 147 (TTAB 1984) (finding a consent agreement submitted by applicant did not alter the conclusion that confusion was likely, because the agreement was “naked” in that it merely indicated that each party would recognize, and refrain from interfering with, the other’s use of their respective marks and that the applicant would not advertise or promote its mark without its company name, but the agreement did not restrict the markets or potential customers for their goods in such a way as to avoid confusion); *cf. In re Wacker Neuson SE*, 97 USPQ2d 1408 (TTAB 2010) (finding an otherwise “thin consent” to be viable and reversing a §2(d) refusal, in view of the relationship of the parties, the provisions of a licensing agreement executed by the parties, and the fact that the goods and services offered under both parties’ marks were manufactured and sold by applicant).

If a consent agreement makes representations about both parties’ beliefs regarding the likelihood of confusion and/or indicates that both parties have agreed to undertake certain actions to avoid confusion, then it should be signed by both parties, or by individuals with legal authority to bind the respective parties. In some instances, however, a consent document might be signed only by the registrant, because only the registrant has provided its consent, agreed to take certain actions, or made representations as to the likelihood of confusion. The absence of applicant’s signature on the document in such cases does not necessarily render the document unacceptable, but, like any other consent document, its persuasive value should be determined in light of all other evidence in the record. *See, e.g., Donnay Int’l*, 31 USPQ2d at 1956-57 (finding that a consent letter signed only by the registrant and consisting merely of registrant’s consent to applicant’s registration and use of the applied-for mark was entitled to limited weight, but nonetheless concluding that it served to “tip the scales” in favor of reversing the §2(d) refusal, especially in view of the minimal evidence supporting the conclusion that confusion was likely); *In re Palm Beach Inc.*, 225 USPQ 785, 787-88 (TTAB 1985) (concluding there was no reasonable likelihood of confusion as to applicant’s and registrant’s marks, based on, *inter alia*, the different nature of the parties’ goods, two consent letters signed only by owners of the cited registration, and an affidavit of an officer of applicant’s subsidiary indicating that actual confusion had not occurred during the more than 45 years of the marks’ coexistence and that future likelihood of confusion was believed to be unlikely).

In the *In re E. I. du Pont de Nemours & Co.* decision, the Court of Customs and Patent Appeals stated as follows:

[W]hen those most familiar with use in the marketplace and most interested in precluding confusion enter agreements designed to avoid it, the scales of evidence are clearly tilted. It is at least difficult to maintain a subjective view that confusion will occur when those directly concerned say it won’t. A

mere *assumption* that confusion is likely will rarely prevail against uncontroverted evidence from those on the firing line that it is not.  
476 F.2d at 1363, 177 USPQ at 568.

Accordingly, the Court of Appeals for the Federal Circuit has indicated that consent agreements should be given great weight, and that the USPTO should not substitute its judgment concerning likelihood of confusion for the judgment of the real parties in interest without good reason, that is, unless the other relevant factors clearly dictate a finding of likelihood of confusion. *See In re Four Seasons Hotels Ltd.*, 987 F.2d 1565, 26 USPQ2d 1071 (Fed. Cir. 1993); *In re N.A.D. Inc.*, 754 F.2d 996, 224 USPQ 969 (Fed. Cir. 1985); *see also du Pont*, 476 F.2d at 1362-63, 177 USPQ at 568; *cf. In re Mastic Inc.*, 829 F.2d 1114, 4 USPQ2d 1292 (Fed. Cir. 1987) (affirming TTAB's holding that applicant's mark was barred by §2(d), because the provided consent to register was essentially a "naked" consent and all other relevant factors weighed in favor of a conclusion that confusion was likely).

Thus, examining attorneys should give substantial weight to a proper consent agreement. When an applicant and registrant have entered into a credible consent agreement and, *on balance*, the other factors do not dictate a finding of likelihood of confusion, an examining attorney should not interpose his or her own judgment that confusion is likely.

A consent agreement is not the same as a "concurrent use" agreement. The term "concurrent use" is a term of art that refers to a geographical restriction on the registration. See [TMEP §1207.04](#) regarding concurrent use.

### **1207.01(d)(ix) Fame of the Prior Registered Mark**

According to *In re E. I. du Pont de Nemours & Co.*, the "fame of the prior mark" is a factor to be considered in determining likelihood of confusion. 476 F.2d 1357, 1361, 177 USPQ 563, 567 (C.C.P.A. 1973). Because, in *ex parte* proceedings, the examining attorney is not expected to submit evidence regarding the fame of the cited mark, this factor is usually treated as neutral in such proceedings. However, this factor is usually considered more significant in *inter partes* proceedings. *See Bridgestone Americas Tire Operations, LLC v. Fed. Corp.*, 673 F.3d 1330, 102 USPQ2d 1061 (Fed. Cir. 2012); *Recot, Inc. v. M.C. Becton*, 214 F.3d 1322, 54 USPQ2d 1894 (Fed. Cir. 2000); *Research in Motion Ltd. v. Defining Presence Mktg. Grp., Inc.*, 102 USPQ2d 1187, 1192-93 (TTAB 2012); *In re Thomas*, 79 USPQ2d 1021, 1027 n.11 (TTAB 2006).

Famous marks are afforded a broad scope of legal protection because they are more likely to be remembered and associated in the public mind than a weaker mark. *Palm Bay Imps., Inc. v. Veuve Clicquot Ponsardin Maison Fondee en 1772*, 396 F.3d 1369, 1374, 73 USPQ2d 1689, 1694 (Fed. Cir. 2005); *Bose Corp. v. QSC Audio Prods. Inc.*, 293 F.3d 1367, 1371-76, 63 USPQ2d 1303, 1305-09 (Fed. Cir. 2002) (finding opposer's marks, ACOUSTIC WAVE and WAVE, to be famous and thus entitled to broad protection); *Recot*, 214 F.3d at 1327, 54 USPQ2d at 1897 (finding Board erred in limiting the weight accorded to the fame of opposer's FRITO-LAY mark); *Kenner Parker Toys Inc. v. Rose Art Indus., Inc.*, 963 F.2d 350, 353, 22 USPQ2d 1453, 1456 (Fed. Cir. 1992) (finding Board erred in discounting the significance of the fame of opposer's mark PLAY-DOH); *UMG Recordings, Inc. v. Mattel, Inc.*, 100 USPQ2d 1868, 1883 (TTAB 2011) (finding MOTOWN very famous in connection with musical recordings and musical entertainment, and noting that "a famous mark such as Motown can be expected to cast a long shadow and to be used in connection with numerous collateral goods").

When present, the fame of a mark is "a dominant factor in the likelihood of confusion analysis . . . independent of the consideration of the relatedness of the goods." *Recot*, 214 F.3d at 1328, 54 USPQ2d at 1898; *L'Oreal*

*S.A. v. Marcon*, 102 USPQ2d 1434, 1438 (TTAB 2012) (noting that “a finding that a mark enjoys significant fame expands the scope of protection which might be accorded a lesser-known mark” and that “the fame of a registered or previously used mark can never support a junior party”); *Starbucks U.S. Brands, LLC v. Ruben*, 78 USPQ2d 1741, 1750 (TTAB 2006) (“As the fame of a mark increases, the degree of similarity between the marks necessary to support a conclusion of likely confusion declines.”); *see also Nike, Inc. v. Maher*, 100 USPQ2d 1018, 1023 (TTAB 2011) (finding applicant’s mark JUST JESU IT, and opposer’s mark JUST DO IT similar for likelihood of confusion purposes “despite the potential differences in meaning, given the fame of opposer’s mark and the similarity of appearance, pronunciation and overall commercial impressions”).

However, like the other *du Pont* factors, the fame of a mark may be considered only if there is relevant evidence of record. *See* [TMEP §1207.01](#). Thus, a party who asserts that its mark is famous must submit evidence clearly establishing that its mark is viewed by relevant purchasers as a famous mark. *See, e.g., In re Hard Rock Cafe Licensing Corp. v. Elsea*, 48 USPQ2d 1400, 1409 (TTAB 1998). The fame of a mark may be shown by evidence of, *inter alia*, the quantity of sales of products bearing the mark, the amount of advertising expenditures relating to the mark, and the length of time such indications of commercial awareness have been evident. *See Bose*, 293 F.3d at 1371, 63 USPQ2d at 1305-06.

Because of the nature of the evidence required to establish the fame of a registered mark, the Board normally does not expect the examining attorney to submit evidence as to the fame of the cited mark in an ex parte proceeding. *See In re Thomas*, 79 USPQ2d 1021, 1027 n.11 (TTAB 2006). And, in an ex parte analysis of the *du Pont* factors for determining likelihood of confusion ( *see* [TMEP §1207.01](#)), the “fame of the mark” factor is normally treated as neutral when no evidence as to fame has been provided. *See id.*; *see also In re Davey Prods. Pty Ltd.*, 92 USPQ2d 1198, 1204 (TTAB 2009) (noting that the absence of evidence as to the fame of the registered mark “is not particularly significant in the context of an ex parte proceeding”).

### **1207.01(d)(x) Conflicting Marks Owned by Different Parties**

During the examination of an application, the examining attorney should consider separately each registration found in a search of the marks registered in the USPTO that may bar registration of the applicant’s mark under §2(d). If the examining attorney finds registrations that appear to be owned by more than one registrant, he or she should consider the extent to which dilution may indicate that there is no likelihood of confusion. However, the examining attorney must cite all the marks that are considered to be a bar to registration of the mark presented in the application, even if they are owned by different parties. The examining attorney should always explain the reason that the mark in each cited registration is grounds for refusal under §2(d).

### **1207.01(d)(xi) Family of Marks**

A family of marks is defined as “a group of marks having a recognizable common characteristic, wherein the marks are composed and used in such a way that the public associates not only the individual marks, but the common characteristic of the family, with the trademark owner.” *J & J Snack Foods Corp. v. McDonald’s Corp.*, 932 F.2d 1460, 1462, 18 USPQ2d 1889, 1891 (Fed. Cir. 1991). The common element may be a term, a phrase, or a component in the nature of a prefix or suffix.

The family of marks doctrine may be invoked by a plaintiff in inter partes proceedings relating to likelihood of confusion, but is not available to a defendant as a defense against an opposer’s or applicant’s intervening rights. *Baroid Drilling Fluids Inc. v. Sun Drilling Prods.*, 24 USPQ2d 1048 (TTAB), amended by 1992 TTAB LEXIS 27 (TTAB 1992).

Moreover, a family of marks argument is not available to an applicant seeking to overcome a likelihood of confusion refusal in an ex parte proceeding; instead, the focus of the likelihood of confusion analysis must be on the mark applicant seeks to register, not other marks applicant may have used or registered. *In re Cynosure, Inc.*, 90 USPQ2d 1644, 1645 (TTAB 2009); *see also In re Ald, Inc.*, 148 USPQ 520, 521 (TTAB 1965) (“[I]n view of the specific prohibition of Section 2(d) . . . , the fact that applicant may possess a ‘family’ of marks characterized by the term ‘ALD’ is of no particular significance herein if the mark for which applicant now seeks registration . . . is confusingly similar to the previously registered mark . . .”).

It has also been noted that, in ex parte proceedings, examining attorneys do not have access to the evidence and information needed to establish whether a family of marks exists. *In re Mobay Chem. Co.*, 166 USPQ 218, 219 (TTAB 1970). Therefore, examining attorneys should refrain from invoking the family of marks doctrine or from referring to a family of marks in a likelihood of confusion analysis. *See In re Hitachi High-Techs. Corp.*, 109 USPQ2d 1769, 1772 (TTAB 2014); *In re Mobay Chem. Co.*, 166 USPQ at 219.

### **1207.01(d)(xii) Pharmaceuticals or Medicinal Products**

When determining if a likelihood of confusion exists between marks used in connection with pharmaceuticals or medicinal products for human use, greater care must be taken to avoid confusion because mistakes in the selection and use of these goods may result in serious and harmful consequences. *See Clifton v. Plough, Inc.*, 341 F.2d 934, 934, 144 USPQ 599, 600 (C.C.P.A. 1965); *In re Cook Med. Tech. LLC*, 105 USPQ2d 1377, 1381-82 (TTAB 2012); *Schering Corp. v. Alza Corp.*, 207 USPQ 504, 509 (TTAB 1980); *Am. Home Prods. Corp. v. USV Pharm. Corp.*, 190 USPQ 357, 359-60 (TTAB 1976). Thus, in cases where confusion involving pharmaceuticals or medicinal products could result in harm or other serious consequences to consumers, the Trademark Trial and Appeal Board and its primary reviewing court have considered this an additional relevant factor and applied a stricter standard that may require a lesser degree of proof to establish likelihood of confusion. *See Glenwood Labs., Inc. v. Am. Home Prods. Corp.*, 455 F.2d 1384, 1386-87, 173 USPQ 19, 21-22 (C.C.P.A. 1972); *Schering Corp.*, 207 USPQ at 509; *Ethicon, Inc. v. Am. Cyanamid Co.*, 192 USPQ 647, 651-52 (TTAB 1976).

### **1207.02 Marks That Are Likely to Deceive**

In addition to referring to a mark that so resembles another mark as to be likely to cause confusion or mistake, §2(d) refers to a mark being likely “to deceive.” As a practical matter, this provision is rarely applied in examination, because deceptiveness involves intent and would be difficult to prove in an ex parte proceeding.

### **1207.03 Marks Previously Used in United States but Not Registered**

As a basis for refusal, §2(d) refers not only to registered marks but also to “a mark or trade name previously used in the United States by another and not abandoned.” Refusal on the basis of an unregistered mark or trade name has sometimes been referred to as refusal on the basis of a “known mark.” This provision is not applied in ex parte examination because of the practical difficulties with which an examining attorney is

faced in locating “previously used” marks, and determining whether anyone has rights in them and whether they are “not abandoned.”

## **1207.04 Concurrent Use Registration**

### **1207.04(a) Concurrent Use – In General**

Section 2(d) of the Trademark Act, 15 U.S.C. §1052(d), contains a proviso under which an eligible applicant may request issuance of a registration based on rights acquired by concurrent use of its mark, either with the owner of a registration or application for a conflicting mark or with a common-law user of a conflicting mark.

In a concurrent use application, the applicant normally requests a geographically restricted registration. *See* TBMP §§1101.01 and 1103.01(d)(2). The applicant seeks registration for a specified geographical area of the United States and lists one or more parties who concededly have rights in the mark in other geographical areas of the United States. *See* 15 U.S.C. §1051(a)(3)(D); 37 C.F.R. §2.42; TBMP §§1102.01 and 1103.01. These other parties may own applications or registrations, or they may have common law rights in a mark, but no application or registration. TBMP §1104.

There are two bases upon which a concurrent use registration may be issued: (1) a determination by the Trademark Trial and Appeal Board, in either a prior or to-be-instituted concurrent use proceeding, that the applicant is entitled to a concurrent registration; or (2) a final determination by a court of competent jurisdiction of the concurrent rights of the relevant parties to use the same or similar marks in commerce. *See* 15 U.S.C. §1052(d); 37 C.F.R. §2.99; TBMP §1102.02.

“Incontestable” registrations (i.e., where the registrant’s right to use the mark has become incontestable pursuant to 15 U.S.C. §1065) are subject to concurrent use registration proceedings. TBMP §1105; *see Holiday Inn v. Holiday Inns, Inc.*, 534 F.2d 312, 319-20, 189 USPQ 630, 636 (C.C.P.A. 1976); *Thriftmart, Inc. v. Scot Lad Foods, Inc.*, 207 USPQ 330, 334 (TTAB 1980).

Registrations and applications to register on the Supplemental Register and registrations under the Act of 1920 (*see* [TMEP §1601.05](#)) are not subject to concurrent use registration proceedings. 37 C.F.R. §2.99(g); TBMP §1105.

Concurrent use registration is requested by the applicant; it should not be suggested or initiated by the examining attorney.

### **1207.04(b) Filing Basis of Application Seeking Concurrent Use Registration**

In an application based on use in commerce under 15 U.S.C. §1051(a), the applicant may seek concurrent use registration at the time the application is filed or in a subsequent amendment. *See* 37 C.F.R. §§2.42 and 2.73.

In an application based on a bona fide intent to use the mark in commerce under 15 U.S.C. §1051(b), the applicant may not amend to seek concurrent use registration until the applicant files an acceptable allegation of use. 37 C.F.R. §§2.73 and 2.99(g).

Applications based solely on §44 or §66(a) of the Trademark Act are not subject to concurrent use registration proceedings. 37 C.F.R. §2.99(g).

### 1207.04(c) Criteria for Requesting Concurrent Use Registration

An applicant is eligible to request a registration subject to concurrent use if it meets one or more of the following criteria:

- (1) The concurrent use request is sought pursuant to a decree of a court of competent jurisdiction (or a decision by the Board in a prior concurrent use proceeding) reflecting a final determination of the rights of the concurrent user;
- (2) The owner of the registration consents to the grant of a concurrent use registration to the applicant; or
- (3) The applicant's date of first use in commerce is before the *filing date* of the pending applications or of any registrations issued under the Trademark Act of 1946. When a party specified as an excepted user does not own an application or registration, the applicant's date of first use in commerce is before the filing date of any application to register the mark that may be filed by the excepted user.

15 U.S.C. §1052(d); 37 C.F.R. §2.99(e). The applicant has the burden of proving that it is entitled to a concurrent use registration. 37 C.F.R. §2.99(e). *See Am. Best Franchising Inc. v. Abbott*, 106 USPQ2d 1540, 1548 (TTAB 2013) (citing *Over the Rainbow, Ltd. v. Over the Rainbow, Inc.*, 227 USPQ 879, 883 (TTAB 1985)).

### 1207.04(d) Requirements for All Concurrent Use Applications

An application for registration as a lawful concurrent user is generally examined in the same manner as any other application for registration. 37 C.F.R. §2.99(a). The examining attorney must examine the application to determine whether it complies with the relevant requirements for a non-restricted application. Additionally, the applicant must comply with the following requirements in a concurrent use application:

- (1) The applicant must specify the goods and the geographic area for which the applicant seeks registration of the mark. 15 U.S.C. §1051(a)(3)(D); 37 C.F.R. §2.42. The applicant must also set forth the mode of use. 37 C.F.R. §2.42.
- (2) The applicant must specify, to the extent of its knowledge, the exceptions to its claim of exclusive use, listing any concurrent use by others and the relevant goods, geographic areas, and periods of this use. 15 U.S.C. §1051(a)(3)(D); 37 C.F.R. §2.42.
- (3) The applicant must also list the names and addresses of the concurrent users, the registrations issued to or applications filed by them (if any), and the mode of such use. 37 C.F.R. §2.42.
- (4) The verification for a concurrent use application should be modified to indicate an exception, that no one else *except as specified in the application* has the right to use the mark. *See* 15 U.S.C. §1051(a)(3)(D); [TMEP §804.02](#).

The applicant does not have to insert the stated exceptions in the verification or declaration; the exceptions may be set forth anywhere in the application.

In addition to the requirements noted above, which apply to all applications for concurrent use registration, concurrent use applications must meet other conditions, depending on whether the application is subject to a concurrent use proceeding before the Board ( *see* [TMEP §§1207.04\(e\)-\(e\)\(i\)](#) ), pursuant to the decree of

a court ( *see* [TMEP §§1207.04\(f\)-\(f\)\(i\)](#) ), or based on a final decision by the Board in a prior concurrent use proceeding ( *see* [TMEP §§1207.04\(g\)-\(g\)\(i\)](#)).

### **1207.04(e) Applications Subject to Concurrent Use Proceeding Before the Trademark Trial and Appeal Board**

Ordinarily, the examining attorney should not require an applicant for concurrent use registration to submit evidence in support of its claim to concurrent rights. However, the examining attorney should refuse registration under §2(d) if the applicant has requested a concurrent use registration and information in the record suggests that the applicant has not met the basic requirements for concurrent use registration (e.g., if the application indicates that the applicant adopted and used the mark with knowledge of the superior rights of a person specified as an excepted user, or that actual confusion has resulted from the concurrent use of the marks of the parties in their respective geographic areas). *See Gray v. Daffy Dan's Bargaintown*, 823 F.2d 522, 526-27, 3 USPQ2d 1306, 1308-09 (Fed. Cir. 1987); *Am. Best Franchising Inc. v. Abbott*, 106 USPQ2d 1540, 1549 (TTAB 2013) (citing *In re Beatrice Foods Co.*, 429 F.2d 466, 166 USPQ 431,435-36 (CCPA 1970)); *In re Place for Vision, Inc.*, 196 USPQ 267, 269-70 (TTAB 1977).

If an application that seeks registration through a concurrent use proceeding before the Board complies with the relevant requirements and it appears that the applicant is otherwise entitled to registration but for the question of concurrent rights, the examining attorney will approve the application for publication subject to a concurrent use proceeding. *See* 15 U.S.C. §1062(a). The examining attorney must not issue a refusal under §2(d) as to any registration named by the applicant as an exception to its exclusive rights.

If, in response to a refusal under §2(d) or an advisory regarding an earlier-filed application, an application is amended to seek registration through a concurrent use proceeding and complies with the relevant requirements, and it appears that the applicant is otherwise entitled to registration but for the question of concurrent rights, the examining attorney will withdraw the previously issued refusal or advisory as to any registration or application named by the applicant as an exception to its exclusive rights and will approve the application for publication subject to a concurrent use proceeding.

#### **1207.04(e)(i) Preparing the Record for Publication**

When the examining attorney determines that the mark in an application that is subject to a concurrent use proceeding is ready for publication, the examining attorney should prepare the record as follows. The application must contain a concurrent use statement that will be printed in the *Official Gazette*. The statement may be submitted by the applicant or prepared by the examining attorney. The statement must be in the following form:

Subject to Concurrent Use Proceeding with \_\_\_\_\_ [specifying the application serial number(s) or registration number(s), if any, of each other party; otherwise, the name and address of each other party].

Applicant claims the exclusive right to use the mark in the area comprising \_\_\_\_\_ [specifying the area for which the applicant seeks registration].

After publication, if no opposition is filed, or if any opposition that is filed is dismissed or withdrawn, the Trademark Trial and Appeal Board will institute the concurrent use proceeding. *See* 37 C.F.R. §2.99; [TMEP §1506](#). The Board will consider and determine concurrent use rights only in the context of a concurrent use registration proceeding. 37 C.F.R. §2.99(h).

See TBMP Chapter 1100.

### 1207.04(f) Application for Concurrent Use Registration Pursuant to Court Decree

The USPTO may issue a concurrent use registration pursuant to the final determination of a court of competent jurisdiction that more than one person is entitled to use the same or similar marks in commerce. 15 U.S.C. §1052(d)(3). An applicant who seeks a concurrent use registration on the basis of a court determination does not have to be a prior user or obtain the consent of the owner of the involved mark. See *Holiday Inn v. Holiday Inns, Inc.*, 534 F.2d 312, 317-18, 189 USPQ 630, 633-34 (C.C.P.A. 1976); cf. *Alfred Dunhill of London, Inc. v. Dunhill Tailored Clothes, Inc.*, 293 F.2d 685, 690-94, 130 USPQ 412, 417-20 (C.C.P.A. 1961); TBMP §1103.03.

When examining an application for concurrent use registration pursuant to the decree of a court, the examining attorney must determine whether the application complies with the specific requirements for concurrent use applications ( see [TMEP §§1207.04\(d\)](#)) and the requirements that would apply to an unrestricted application.

In addition, under 37 C.F.R. §2.99(f), all of the following conditions must be met, or a concurrent use proceeding before the Board must be prepared and instituted:

- (1) The applicant is entitled to registration subject only to the concurrent lawful use of a party to the court proceeding;
- (2) The court decree specifies the rights of the parties;
- (3) A true copy of the court decree is submitted to the examining attorney;
- (4) The concurrent use application complies fully and exactly with the court decree; and
- (5) The excepted use specified in the concurrent use application does not involve a registration, or any involved registration has been restricted by the Director in accordance with the court decree.

If any of the conditions listed above are *not* satisfied, the examining attorney will approve the application for publication subject to a concurrent use registration proceeding before the Board ( see [TMEP §§1207.04\(e\) and \(e\)\(i\)](#)), rather than pursuant to the court decree. 37 C.F.R. §2.99(f).

#### 1207.04(f)(i) Preparing the Record for Publication

If the application complies with all the conditions listed in [TMEP §1207.04\(f\)](#) and all other relevant requirements, and is otherwise entitled to registration, the examining attorney will approve the application for publication of the mark. The examining attorney should prepare the record as follows:

The application must contain a concurrent use statement to be printed in the *Official Gazette*. The statement may be submitted by the applicant or prepared by the examining attorney. The statement will delineate the concurrent rights of the parties as determined by the court, in the following form:

Registration limited to the area comprising \_\_\_\_\_ [specifying the area granted to the applicant by the court and any other restriction designated by the court] pursuant to the decree of \_\_\_\_\_ [specifying the name of the court, proceeding number and date of the decree].

Concurrent registration with \_\_\_\_\_ [specifying the application serial number(s) or registration number(s), if any, of each other party; otherwise, the name and address of each other party].

After publication, if no opposition is filed, or if any opposition that is filed is dismissed or withdrawn, the application will mature into a registration.

### **1207.04(g) Application for Concurrent Use Registration Based on Final Board Decision in Prior Concurrent Use Proceeding**

A concurrent use registration may also be based on a final determination by the Trademark Trial and Appeal Board, in a prior concurrent use proceeding, that applicant is entitled to a concurrent use registration of its mark. TBMP §1103.02.

When examining an application for a concurrent use registration based on a final Board decision in a prior concurrent use proceeding, the examining attorney must determine whether the application complies with the specific requirements for concurrent use applications ( *see* [TMEP §1207.04\(d\)](#)) and all other requirements that would apply to an unrestricted application.

In addition, all of the following conditions must be met:

- (1) The applicant is entitled to registration subject only to the concurrent lawful use of a party or parties to the prior concurrent use proceeding;
- (2) The Board's prior decision specifies applicant's right to concurrent use registration;
- (3) A copy of the Board's prior decision is submitted to the examining attorney;
- (4) The concurrent use application complies with the Board's prior decision, in that it seeks registration for the same, or a more limited, geographic area or mode of use than granted to the applicant in the prior decision; seeks registration for substantially the same mark or one less confusingly similar to those of the other party or parties in the prior proceeding; and seeks registration for substantially the same goods and/or services as, or more limited goods and/or services than those listed in the Board's prior specification of the applicant's entitlement to concurrent registration; and
- (5) The excepted use specified in the concurrent use application does not involve a registration, or any involved registration has been restricted by the Director in accordance with the Board's prior decision.

If the conditions listed above are satisfied, the examining attorney must ensure that the appropriate concurrent use statement for registration based on a final determination by the Board in a *prior* concurrent use proceeding is entered in the database and approve the application for publication ( *see* [TMEP §§1207.04\(e\) and \(g\)\(i\)](#)).

If any of the conditions listed above are *not* satisfied, the examining attorney must ensure that the appropriate concurrent use statement for registration subject to a concurrent use registration proceeding before the Board is entered in the database and approve the application for publication ( *see* [TMEP §§1207.04\(e\) and \(e\)\(i\)](#)). TBMP §1103.02.

### **1207.04(g)(i) Preparing the Record for Publication**

If the application satisfies all the conditions listed in [TMEP §1207.04\(g\)](#), complies with all other relevant requirements, and is otherwise entitled to registration, the examining attorney will approve the application for publication of the mark. The application must contain a concurrent use statement to be printed in the *Official Gazette*. The statement may be submitted by the applicant or prepared by the examining attorney. The statement will delineate the concurrent rights of the parties as determined by the Board, in the following form:

Registration limited to the area comprising \_\_\_\_\_ [indicating the area specified in the Board's prior decision as the area for which applicant is entitled to registration and any other restriction designated by the Board] pursuant to Concurrent Use Proceeding No. \_\_\_\_\_ [specifying the number of the prior concurrent use proceeding].

Concurrent registration with \_\_\_\_\_ [specifying the application serial number(s) or registration number(s), if any, of each other party involved in the prior concurrent use proceeding; otherwise, the name and address of each other party].

After publication, if no opposition is filed, or if any opposition that is filed is dismissed or withdrawn, the application will mature into a registration.

## 1208 Conflicting Marks in Pending Applications

### *37 CFR §2.83 Conflicting marks.*

(a) Whenever an application is made for registration of a mark which so resembles another mark or marks pending registration as to be likely to cause confusion or mistake or to deceive, the mark with the earliest effective filing date will be published in the Official Gazette for opposition if eligible for the Principal Register, or issued a certificate of registration if eligible for the Supplemental Register.

(b) In situations in which conflicting applications have the same effective filing date, the application with the earliest date of execution will be published in the "Official Gazette" for opposition or issued on the Supplemental Register.

(c) Action on the conflicting application which is not published in the Official Gazette for opposition or not issued on the Supplemental Register will be suspended by the Examiner of Trademarks until the published or issued application is registered or abandoned.

### 1208.01 Priority for Publication or Issue Based on Effective Filing Date

In ex parte examination, priority among conflicting pending applications is determined based on the effective filing dates of the applications, without regard to whether the dates of use in a later-filed application are earlier than the filing date or dates of use of an earlier-filed application, whether the applicant in a later-filed application owns a registration of a mark that would be considered a bar to registration of the earlier-filed application, or whether an application was filed on the basis of use of the mark in commerce or a bona fide intent to use the mark in commerce. *See* 37 C.F.R. §2.83(a).

When two or more applications contain marks that are conflicting, the mark in the application that has the *earliest effective filing date* will be published for opposition if it is eligible for registration on the Principal Register, or will be registered if it is eligible for registration on the Supplemental Register. *Id.* *See* [TMEP §§206-206.03](#) regarding effective filing dates.

The examining attorney cannot refuse registration under §2(d) of the Trademark Act based on a conflicting mark in an earlier-filed application until the conflicting mark registers. *See* [TMEP §1207.01](#). Therefore, when the examining attorney has examined the later-filed application and determined that, but for the conflict between the marks, it is in condition to be approved for publication or issue, or in condition for a final refusal, the examining attorney will *suspend* action on the later-filed application until the earlier-filed application matures into a registration or is abandoned. 37 C.F.R. §2.83(c); [TMEP §§716.02\(c\)](#) and [1208.02\(c\)](#).

#### 1208.01(a) What Constitutes Conflict Between Pending Applications

Marks in applications filed by different parties are in conflict when the registration of one of the marks would be a bar to the registration of the other under §2(d) of the Trademark Act, 15 U.S.C. §1052(d). Therefore, the term "conflicting application" refers to an application to register a mark that so resembles the mark in another application as to be likely to cause confusion. *See* [TMEP §702.03\(b\)](#). *See* [TMEP](#)

[§§1207-1207.01\(d\)\(xi\)](#) regarding likelihood of confusion. There may be multiple conflicting pending applications.

### **1208.01(b) What Constitutes Effective Filing Date**

The *filing date* of an application under §1 or §44 of the Trademark Act is the date when all the elements designated in 37 C.F.R. §2.21(a) are received at the USPTO. TMEP §201. In an application under §66(a) of the Trademark Act, 15 U.S.C. §1141f(a), the filing date is: (1) the international registration date, if the request for extension of protection to the United States is made in an international application; or (2) the date that the subsequent designation was recorded by the IB, if the request for extension of protection to the United States is made in a subsequent designation. 15 U.S.C. §1141f(b); 37 C.F.R. §7.26; [TMEP §201](#).

While this is generally the *effective filing date* for purposes of determining priority among conflicting applications, in certain situations another date is treated as the effective filing date. See [TMEP §§206.01-206.03](#). For example, in an application claiming priority under §44(d) or §67 of the Trademark Act based on a foreign application, the effective filing date is the date the foreign application was first filed in the foreign country. [TMEP §206.02](#). In a §1(b) application that is amended to the Supplemental Register on the filing of an acceptable allegation of use, the effective filing date is the date of filing the allegation of use. 37 C.F.R. §2.75(b); [TMEP §206.01](#). However, the USPTO does not alter the original filing date in its automated records. [TMEP §206](#).

If two or more applications conflict, the application with the earliest effective filing date will be approved for publication for opposition or for issuance of a registration on the Supplemental Register, as appropriate. 37 C.F.R. §2.83(a); [TMEP §1208.01](#).

If conflicting applications have the same effective filing date, the application with the earliest date of execution will be approved for publication for opposition or for issuance of a registration on the Supplemental Register. 37 C.F.R. §2.83(b). An application that is unexecuted will be treated as having a later date of execution.

Occasionally, conflicting applications will have the same date of filing and execution. If this situation occurs, the application with the lowest serial number will have priority for publication or issuance. When determining which serial number is the lowest, the examining attorney should disregard the series code (e.g., “76,” “77,” “78,” “79,” or “85”) and look only to the six-digit serial number that follows.

### **1208.01(c) Change in Effective Filing Date During Examination**

If the effective filing date in an application containing a conflicting mark changes, the examining attorney should review all the application(s) involved to determine which application has the earliest effective filing date as a result of the change, and notify the examining attorney assigned to the application with the earliest effective filing date.

Whenever the effective filing date of an application changes to a date that is later than the original filing date, the assigned examining attorney must conduct a new search of the mark. See [TMEP §206.04](#).

### **1208.01(d) Examination of Conflicting Marks After Reinstatement or Revival**

When an abandoned application is revived or reinstated ( see TMEP §§[1712.01](#), [1713](#), and [1714](#)), the examining attorney must conduct a new search to determine whether any later-filed applications for conflicting marks have been approved for publication or registration, and place the search strategy in the record.

If a later-filed application has been approved, the examining attorney should inform the examining attorney who approved the later-filed application that the earlier-filed application has been revived. If the later-filed application has been published, the examining attorney handling that application should request jurisdiction ( see [TMEP §1504.04\(a\)](#)) and suspend the application pending disposition of the earlier-filed application that was revived or reinstated.

If a later-filed application for a conflicting mark has matured into registration, the examining attorney must refuse registration of the revived or reinstated application under §2(d), even though the application for the registered mark was filed after the revived or reinstated application. The USPTO does not have the authority to cancel the registration.

## **1208.02 Conflicting Applications Examination Procedure**

### **1208.02(a) Examination of Application with Earliest Effective Filing Date**

When the application with the earliest effective filing date is first reviewed for action, the examining attorney should approve the application for publication or for issuance of a registration on the Supplemental Register, if appropriate. 37 C.F.R. §2.83(a).

If the application with the earliest effective filing date is not in condition for publication or issue, the examining attorney should issue an Office action that includes all relevant refusals and requirements.

The USPTO does not notify applicants of potentially conflicting later-filed applications.

See TMEP §§[206-206.03](#) and [1208.01\(b\)](#) regarding what constitutes an effective filing date.

### **1208.02(b) Action on Later-Filed Application: Giving Notice of the Earlier Application or Applications**

If, when the later-filed conflicting application is first reviewed for action, it is not in condition for publication or issue, the examining attorney should, in addition to treating other matters, send with the Office action an electronic copy or a printout from the USPTO's automated search system of the information for the mark in each earlier-filed application. The examining attorney's letter should also advise the applicant that the earlier application, if and when it matures into a registration, may be cited against the applicant's later-filed application. The applicant should be notified of all conflicting applications with earlier effective filing dates.

See [TMEP §1208.02\(c\)](#) regarding suspension of later-filed conflicting applications that are otherwise in condition to be approved for publication or issue.

### **1208.02(c) Suspension of Later-Filed Application**

When the later-filed application is in condition for publication or issue except for the conflicting mark in an earlier-filed application, either because no action was necessary on the application as filed or because examination on other matters has been brought to a conclusion, the examining attorney must suspend the later-filed application until the mark in the earlier-filed application is registered or the earlier-filed application is abandoned. 37 C.F.R. §2.83(c); *see In re Direct Access Commc'ns (M.C.G.) Inc.*, 30 USPQ2d 1393, 1394 (Comm'r Pats. 1993). If the examining attorney discovers that a previously filed pending application was abandoned, but that a petition to revive is pending, the examining attorney should suspend the later-filed application pending disposition of the petition to revive.

Action on the later-filed application must also be suspended when the application is in condition for a final action but for the conflict with the earlier-filed application. The letter of suspension should repeat any outstanding issues, but these issues should not be made final. See [TMEP §716.02\(c\)](#) for further information about suspension and removal from suspension in this situation.

If the Office action informing the applicant of the suspension is the first action in the case, the examining attorney should include an electronic copy or a printout from the USPTO's automated search system of the information for the mark in each earlier-filed conflicting application.

### **1208.02(d) Action on Later-Filed Application upon Disposition of the Earlier Application or Applications**

If all conflicting earlier-filed applications have either matured into registrations or become abandoned, and there are no other grounds for suspension, the examining attorney should remove the later-filed application from suspension and take appropriate action as follows.

The examining attorney should cite the registration or registrations that issued from the earlier-filed conflicting application or applications, if there is a likelihood of confusion. This will be a first refusal under §2(d) of the Trademark Act, 15 U.S.C. §1052(d). Any other outstanding issues should be repeated at this time.

If all earlier-filed applications have become abandoned, the examining attorney should either approve the later-filed application for publication or issue, or repeat and make final any remaining issues, as appropriate.

If some, but not all of the earlier-filed conflicting applications have matured into registrations, the examining attorney will normally not issue a refusal of registration until the remaining conflicting application(s) are registered or abandoned, in order to avoid issuing piecemeal refusals. [TMEP §716.02\(c\)](#).

### **1208.02(e) Applicant's Argument on Issues of Conflict**

If an applicant with a later-filed application files a request to remove the later-filed application from suspension (*see* [TMEP §716.03](#)), arguing that there is no conflict in relation to the application with the earlier effective filing date, the examining attorney should consider the merits of that argument and determine whether or not the earlier-filed application constitutes a potential bar to registration under §2(d) of the Act.

If the examining attorney concludes that the earlier-filed application is not a potential bar, the examining attorney should remove the application from suspension and take appropriate action on any other outstanding issues.

However, if the examining attorney concludes that the earlier-filed application is a potential bar, the examining attorney should issue an action for the later-filed application (e.g., a new letter of suspension if there are no other issues that are not in condition for final action), in which the examining attorney explains why the applicant's arguments are not persuasive.

### **1208.02(f) Conflicting Mark Mistakenly Published or Approved for Issuance on the Supplemental Register**

If a later-filed conflicting mark is mistakenly published for opposition, it may be necessary for the assigned examining attorney to obtain jurisdiction of the application to take appropriate action. See [TMPEP §§1504.03-1504.04\(a\)](#) concerning obtaining jurisdiction of an application after publication.

The examining attorney has jurisdiction over an application forwarded for issuance on the Supplemental Register until the day of issuance of the registration.

### **1208.03 Procedure Relating to Possibility of Interference**

Section 16 of the Trademark Act, 15 U.S.C. §1066, states that, upon petition showing extraordinary circumstances, the Director may declare that an interference exists when application is made for the registration of a mark that so resembles a mark previously registered by another, or for the registration of which another has previously applied, as to be likely, when used on or in connection with the goods or services of the applicant, to cause confusion or mistake or to deceive. No interference shall be declared between an application and a registration that has become incontestable. These cases are extremely rare and are generally limited to situations where a party would be unduly prejudiced without an interference, such as where it would otherwise be required to engage in a series of opposition or cancellation proceedings involving substantially the same issue. See [TMPEP §1208.03\(b\)](#).

An interference will not be declared except upon petition to the Director. 37 C.F.R. §2.91(a). All petitions or requests for interference should be forwarded to the Office of the Deputy Commissioner for Trademark Examination Policy for decision. The examining attorney does not make a determination on a request for interference.

See TBMP Chapter 1000.

#### **1208.03(a) Procedures on Request for Interference**

The request for interference should be in a separate document in the form of a petition, and should be captioned as a petition. The petition fee indicated in 37 C.F.R. §2.6 should accompany the request. A petition to declare an interference should not be filed before the application has been examined and the mark has been found to be registrable but for the existence of one or more conflicting pending applications.

A request for interference does not make an application "special" or alter the normal order of examination.

See TBMP Chapter 1000.

### **1208.03(b) Decision on Request for Interference**

The Director will declare an interference only upon a showing of extraordinary circumstances that would result in a party being unduly prejudiced in the absence of an interference. 37 C.F.R. §2.91(a). The availability of opposition and cancellation procedures provides a remedy and ordinarily precludes the possibility of undue prejudice to a party. *Id.* The request for interference must show that there is some extraordinary circumstance that would make the remedy of opposition or cancellation inadequate or prejudicial to the party's rights. See *In re Family Inns of Am., Inc.*, 180 USPQ 332, 333 (Comm'r Pats. 1974). The potential need to file two notices of opposition that could be consolidated if the issues were sufficiently similar is not considered an extraordinary circumstance that will unduly prejudice a petitioner without an interference. The fact that an earlier-filed application based on §1(b), §44, or §66(a) has been cited against a later-filed application based on use in commerce under §1(a) also is not an extraordinary circumstance that warrants declaration of an interference. An opposition proceeding is the proper forum for determining priority between an applicant and another party. Priority for purposes of examination of an application is determined by filing date. 37 C.F.R. §2.83(a); [TMEP §1208.02\(a\)](#).

Although §16 of the Act permits the declaration of an interference between an application and a registration, the practice of declaring an interference in these cases has been discontinued because the applicant cannot obtain a registration if the interfering registration remains on the register; therefore, even if the applicant prevailed in the interference, the applicant would still have to petition to cancel the interfering registration. See *In re Kimbell Foods, Inc.*, 184 USPQ 172, 172 (Comm'r Pats. 1974); *Ex parte H. Wittur & Co.*, 153 USPQ 362, 362-63 (Comm'r Pats. 1966); 37 C.F.R. §2.96.

See TBMP Chapter 1000.

### **1208.03(c) Procedure When Interference Is to be Declared**

If the Director grants a petition requesting an interference, the examining attorney must determine that each mark is registrable but for the interfering mark before the interference will be instituted. 37 C.F.R. §2.92.

All marks must be published for opposition before interference proceedings are instituted. *Id.* If possible, the marks should be published simultaneously.

Each application that is to be the subject of an interference must contain the following statement to be printed in the *Official Gazette*:

This application is being published subject to declaration of interference with:

Serial No.:

Filed:

Applicant:

(Address, if there is no attorney)

Attorney and Address:

Mark:

The examining attorney should prepare the statement.

If an application that is published subject to interference is opposed by a party other than the applicant(s) in the interfering application(s), the opposition will be determined first. If still necessary and appropriate, the interference will be instituted. If an opposition is filed by the applicant in the interfering application, the rights of the parties will be determined in the opposition proceeding, and the interference proceeding will not be instituted.

If, during the pendency of an interference, another application appears involving substantially the same registrable subject matter, the examining attorney may request suspension of the interference for the purpose of adding that application. If the application is not added, the examining attorney should suspend further action on the application pending termination of the interference proceeding. 37 C.F.R. §2.98.

See TBMP Chapter 1000.

## 1209 Refusal on Basis of Descriptiveness

15 U.S.C. §1052 (Extract)

No trademark by which the goods of the applicant may be distinguished from the goods of others shall be refused registration on the principal register on account of its nature unless it .... (e) Consists of a mark which, (1) when used on or in connection with the goods of the applicant is merely descriptive or deceptively misdescriptive of them....

Matter that “merely describes” the goods or services on or in connection with which it is used is not registrable on the Principal Register. As noted in *In re Abcor Dev. Corp.*, 588 F.2d 811, 813, 200 USPQ 215, 217 (C.C.P.A. 1978):

The major reasons for not protecting such marks are: (1) to prevent the owner of a mark from inhibiting competition in the sale of particular goods; and (2) to maintain freedom of the public to use the language involved, thus avoiding the possibility of harassing infringement suits by the registrant against others who use the mark when advertising or describing their own products.

### 1209.01 Distinctiveness/Descriptiveness Continuum

With regard to trademark significance, matter may be categorized along a continuum, ranging from marks that are highly distinctive to matter that is a generic name for the goods or services. The degree of distinctiveness – or, on the other hand, descriptiveness – of a designation can be determined only by considering it in relation to the specific goods or services. *Remington Products, Inc. v. N. Am. Philips Corp.*, 892 F.2d 1576, 1580, 13 USPQ2d 1444, 1448 (Fed. Cir. 1990) (the mark must be considered in context, i.e. , in connection with the goods).

At one extreme are marks that, when used in relation to the goods or services, are completely arbitrary or fanciful. Next on the continuum are suggestive marks, followed by merely descriptive matter. Finally, generic terms for the goods or services are at the opposite end of the continuum from arbitrary or fanciful marks. As stated in *H. Marvin Ginn Corp. v. Int'l Ass'n of Fire Chiefs, Inc.*, 782 F.2d 987, 989, 228 USPQ 528, 530 (Fed. Cir. 1986), quoting *Weiss Noodle Co. v. Golden Cracknel & Specialty Co.*, 290 F.2d 845, 847, 129 USPQ 411, 413 (C.C.P.A. 1961), “[t]he name of a thing is in fact the ultimate in descriptiveness.”

Fanciful, arbitrary, and suggestive marks, often referred to as “inherently distinctive” marks, are registrable on the Principal Register without proof of acquired distinctiveness. See [TMEP §1209.01\(a\)](#).

Marks that are merely descriptive of the goods or services may not be registered on the Principal Register absent a showing of acquired distinctiveness under 15 U.S.C. §1052(f). See [TMPEP §1209.01\(b\)](#) regarding merely descriptive marks, and [TMPEP §§1212–1212.10](#) regarding acquired distinctiveness. Merely descriptive marks may be registrable on the Supplemental Register in applications under §1 or §44 of the Trademark Act. 15 U.S.C. §1091.

Matter that is generic for the goods or services is not registrable on either the Principal or the Supplemental Register under any circumstances. See [TMPEP §§1209.01\(c\)–\(c\)\(iii\)](#).

### **1209.01(a) Fanciful, Arbitrary, and Suggestive Marks**

Fanciful marks comprise terms that have been invented for the sole purpose of functioning as a trademark or service mark. Such marks comprise words that are either unknown in the language (e.g., PEPSI, KODAK, and EXXON) or are completely out of common usage (e.g., FLIVVER).

Arbitrary marks comprise words that are in common linguistic use but, when used to identify particular goods or services, do not suggest or describe a significant ingredient, quality, or characteristic of the goods or services (e.g., APPLE for computers; OLD CROW for whiskey). See, e.g., *Palm Bay Imports, Inc. v. Veuve Clicquot Ponsardin Maison Fondée En 1772*, 396 F.3d 1369, 1372, 73 USPQ2d 1689, 1692 (Fed. Cir. 2005) (VEUVE – meaning WIDOW in English – held to be “an arbitrary term as applied to champagne and sparkling wine, and thus conceptually strong as a trademark”); *Nautilus Grp., Inc. v. Icon Health & Fitness, Inc.*, 372 F.3d 1330, 1340, 71 USPQ2d 1173, 1180 (Fed. Cir. 2004) (defining an arbitrary mark as “a known word used in an unexpected or uncommon way”).

Suggestive marks are those that, when applied to the goods or services at issue, require imagination, thought, or perception to reach a conclusion as to the nature of those goods or services. Thus, a suggestive term differs from a descriptive term, which immediately tells something about the goods or services. See *In re George Weston Ltd.*, 228 USPQ 57 (TTAB 1985) (SPEEDI BAKE for frozen dough found to fall within the category of suggestive marks because it only vaguely suggests a desirable characteristic of frozen dough, namely, that it quickly and easily may be baked into bread); *In re The Noble Co.*, 225 USPQ 749 (TTAB 1985) (NOBURST for liquid antifreeze and rust inhibitor for hot-water-heating systems found to suggest a desired result of using the product rather than immediately informing the purchasing public of a characteristic, feature, function, or attribute); *In re Pennwalt Corp.*, 173 USPQ 317 (TTAB 1972) (DRI-FOOT held suggestive of anti-perspirant deodorant for feet in part because, in the singular, it is not the usual or normal manner in which the purpose of an anti-perspirant and deodorant for the feet would be described).

Incongruity is a strong indication that a mark is suggestive rather than merely descriptive. *In re Tennis in the Round Inc.*, 199 USPQ 496, 498 (TTAB 1978) (TENNIS IN THE ROUND held not merely descriptive for providing tennis facilities, the Board finding that the association of applicant's marks with the phrase “theater-in-the-round” created an incongruity because applicant's tennis facilities are not at all analogous to those used in a “theater-in-the-round”). The Board has described incongruity in a mark as “one of the accepted guideposts in the evolved set of legal principles for discriminating the suggestive from the descriptive mark,” and has noted that the concept of mere descriptiveness “should not penalize coinage of hitherto unused and somewhat incongruous word combinations whose import would not be grasped without some measure of imagination and ‘mental pause.’” *In re Shutts*, 217 USPQ 363, 364–5 (TTAB 1983) (SNO-RAKE held not merely descriptive of a snow-removal hand tool); see also *In re Vienna Sausage Mfg. Co.*, 156 USPQ 155, 156 (TTAB 1967) (FRANKWURST held not merely descriptive for wieners, the Board finding that although “frank” may be synonymous with “wiener,” and “wurst” is synonymous with “sausage,” the combination of the terms is incongruous and results in a mark that is no more than suggestive of the nature of the goods); *In re John H. Breck, Inc.*, 150 USPQ 397, 398 (TTAB 1966) (TINT TONE held suggestive for hair coloring,

the Board finding that the words overlap in significance and their combination is somewhat incongruous or redundant and does not immediately convey the nature of the product); *cf. In re Getz Found.*, 227 USPQ 571, 572 (TTAB 1985) (MOUSE HOUSE held fanciful for museum services featuring mice figurines made up to appear as human beings, the Board finding that the only conceivable meaning of “mouse house,” i.e., a building at a zoo in which live and/or stuffed mice are displayed, is incongruous).

Suggestive marks, like fanciful and arbitrary marks, are registrable on the Principal Register without proof of secondary meaning. *See Nautilus Grp., Inc. v. Icon Health & Fitness, Inc.*, 372 F.3d 1330, 1340, 71 USPQ2d 1173, 1180 (Fed. Cir. 2004). Therefore, a designation does not have to be devoid of all meaning in relation to the goods/services to be registrable. If, after conducting independent research, it is unclear to the examining attorney whether a term in a mark has meaning in the relevant industry, the examining attorney must make an inquiry of the applicant, pursuant to 37 C.F.R. §2.61(b). If the examining attorney determines that the term is arbitrary or fanciful, the examining attorney may enter a Note to the File in the record indicating that research was conducted regarding the meaning of the term in the relevant industry, without stating any legal opinions or conclusions.

### 1209.01(b) Merely Descriptive Marks

To be refused registration on the Principal Register under §2(e)(1) of the Trademark Act, 15 U.S.C. §1052(e)(1), a mark must be merely descriptive or deceptively misdescriptive of the goods or services to which it relates. A mark is considered merely descriptive if it describes an ingredient, quality, characteristic, function, feature, purpose, or use of the specified goods or services. *See In re Gyulay*, 820 F.2d 1216, 3 USPQ2d 1009 (Fed. Cir. 1987) (APPLE PIE held merely descriptive of potpourri); *In re Bed & Breakfast Registry*, 791 F.2d 157, 229 USPQ 818 (Fed. Cir. 1986) (BED & BREAKFAST REGISTRY held merely descriptive of lodging reservations services); *In re MetPath Inc.*, 223 USPQ 88 (TTAB 1984) (MALE-P.A.P. TEST held merely descriptive of clinical pathological immunoassay testing services for detecting and monitoring prostatic cancer); *In re Bright-Crest, Ltd.*, 204 USPQ 591 (TTAB 1979) (COASTER-CARDS held merely descriptive of a coaster suitable for direct mailing). Similarly, a mark is considered merely descriptive if it immediately conveys knowledge of a quality, feature, function, or characteristic of an applicant's goods or services. *In re Chamber of Commerce of the U.S.*, 675 F.3d 1297, 1300, 102 USPQ2d 1217, 1219 (Fed. Cir. 2012); *In re Bayer Aktiengesellschaft*, 488 F.3d 960, 963-64, 82 USPQ2d 1828, 1831 (Fed. Cir. 2007).

The determination of whether a mark is merely descriptive must be made in relation to the goods or services for which registration is sought, not in the abstract. *In re Chamber of Commerce*, 675 F.3d at 1300, 102 USPQ2d at 1219; *In re Bayer*, 488 F.3d at 964, 82 USPQ2d at 1831. This requires consideration of the context in which the mark is used or intended to be used in connection with those goods/services, and the possible significance that the mark would have to the average purchaser of the goods or services in the marketplace. *See In re Chamber of Commerce*, 675 F.3d at 1300, 102 USPQ2d at 1219; *In re Bayer*, 488 F.3d at 964, 82 USPQ2d at 1831; *In re Omaha Nat'l Corp.*, 819 F.2d 1117, 2 USPQ2d 1859 (Fed. Cir. 1987); *In re Abcor Dev. Corp.*, 588 F.2d 811, 200 USPQ 215 (C.C.P.A. 1978); *In re Venture Lending Assocs.*, 226 USPQ 285 (TTAB 1985). The mark need not describe all the goods and services identified, as long as it merely describes one of them. *See In re Stereotaxis Inc.*, 429 F.3d 1039, 1041, 77 USPQ2d 1087, 1089 (Fed. Cir. 2005) (“[T]he Trademark Office may require a disclaimer as a condition of registration if the mark is merely descriptive for at least one of the products or services involved.”)

It is not necessary that a term describe all of the purposes, functions, characteristics, or features of a product to be considered merely descriptive; it is enough if the term describes one significant function, attribute, or property. *In re Chamber of Commerce*, 675 F.3d at 1300, 102 USPQ2d at 1219; *In re Oppedahl & Larson LLP*, 373 F.3d 1171, 1173, 71 USPQ2d 1370, 1371 (Fed. Cir. 2004) (“A mark may be merely descriptive

even if it does not describe the ‘full scope and extent’ of the applicant’s goods or services,” citing *In re Dial-A-Mattress Operating Corp.*, 240 F.3d 1341, 1346, 57 USPQ2d 1807, 1812 (Fed. Cir. 2001)); *Gyulay*, 820 F.2d at 1218, 3 USPQ2d at 1010; *In re Positec Group Ltd.*, 108 USPQ2d 1161, 1171 (TTAB 2013) (“[I]f the mark is descriptive of some identified items – or even just one – the whole class of goods still may be refused by the examiner.”); *In re Cox Enters. Inc.*, 82 USPQ2d 1040 (TTAB 2007) *see also In re Omaha Nat’l Corp.*, 819 F.2d 1117, 1119, 2 USPQ2d 1859, 1861 (Fed. Cir. 1987) (rejecting argument that descriptiveness should be limited to a quality or characteristic of the service itself and holding that it includes a designation descriptive of the service provider).

A term also may be considered merely descriptive if the identified services fall within a subset of services indicated by the term. *See In re Amer. Soc’y of Clinical Pathologists, Inc.*, 442 F.2d 1404, 1406-07, 169 USPQ 800, 801 (C.C.P.A. 1971) (holding that REGISTRY OF MEDICAL PATHOLOGISTS was descriptive of certain claimed services that were implicitly subsumed within service of providing a registry of medical pathologists and of additional claimed services that were “supporting, ancillary or auxiliary to the primary function” of applicant’s registry services). *See also In re Chamber of Commerce of the U.S.*, 675 F.3d 1297, 1301-02, 102 USPQ2d 1217, 1220 (Fed. Cir. 2012) (NATIONAL CHAMBER held descriptive because “substantial evidence supports the TTAB’s determination that the designated business and regulatory data analysis services are within the scope of traditional chambers of commerce activities” of “promoting the interests of businessmen and businesswomen”).

The great variation in facts from case to case prevents the formulation of specific rules for specific fact situations. Each case must be decided on its own merits. *See In re Ampco Foods, Inc.*, 227 USPQ 331 (TTAB 1985); *In re Venturi, Inc.*, 197 USPQ 714 (TTAB 1977).

See [TMPEP §§1209.03–1209.03\(u\)](#) regarding factors that often arise in determining whether a mark is merely descriptive or generic.

See also [TMPEP §§1213–1213.11](#) concerning disclaimer of merely descriptive matter within a mark.

## 1209.01(c) Generic Terms

Generic terms are terms that the relevant purchasing public understands primarily as the common or class name for the goods or services. *In re Dial-A-Mattress Operating Corp.*, 240 F.3d 1341, 57 USPQ2d 1807, 1811 (Fed. Cir. 2001); *In re Am. Fertility Soc’y*, 188 F.3d 1341, 1346, 51 USPQ2d 1832, 1836 (Fed. Cir. 1999). These terms are incapable of functioning as registrable trademarks denoting source, and are not registrable on the Principal Register under §2(f) or on the Supplemental Register.

When a mark is comprised entirely of generic wording and some or all of the wording in the mark is the phonetic equivalent of the generic wording, the entire mark may not be disclaimed, even in the proper spelling, and approved for registration on the Supplemental Register. The disclaimer does not render an otherwise unregistrable generic mark registrable. *See* TMPEP §§[1213.06](#) and [1213.08\(c\)](#).

## 1209.01(c)(i) Test

There is a two-part test used to determine whether a designation is generic: (1) What is the genus of goods or services at issue? and (2) Does the relevant public understand the designation primarily to refer to that genus of goods or services? *H. Marvin Ginn Corp. v. Int’l Ass’n of Fire Chiefs, Inc.*, 782 F.2d 987, 990, 228 USPQ 528, 530 (Fed. Cir. 1986). The test turns upon the primary significance that the term would have to the relevant public.

The genus of the goods and/or services is often defined by an applicant's identification of goods and/or services. See *In re Cordua Rests. LP*, 110 USPQ2d 1227, 1229 (TTAB 2014) (citing *Magic Wand Inc. v. RDB Inc.*, 940 F.2d 638, 640, 19 USPQ2d 1551, 1552 (Fed. Cir. 1991)). The relevant public for a genericness determination refers to the purchasing or consuming public for the identified goods and/or services. *Sheetz of Del., Inc. v. Doctor's Assocs. Inc.*, 108 USPQ2d 1341, 1351 (TTAB 2013) (citing *Magic Wand Inc. v. RDB Inc.*, 940 F.2d at 641, 19 USPQ2d at 1553).

The examining attorney has the burden of proving that a term is generic by clear evidence. *In re Merrill Lynch, Pierce, Fenner & Smith Inc.*, 828 F.2d 1567, 4 USPQ2d 1141 (Fed. Cir. 1987). Evidence of the public's understanding of a term can be obtained from any competent source, including dictionary definitions, research databases, newspapers, and other publications. See *In re Northland Aluminum Products, Inc.*, 777 F.2d 1556, 227 USPQ 961 (Fed. Cir. 1985) (BUNDT, a term that designates a type of cake, held generic for ring cake mix, where the examining attorney cited cookbooks and food-related news articles); *In re Analog Devices Inc.*, 6 USPQ2d 1808 (TTAB 1988), *aff'd*, 871 F.2d 1097, 10 USPQ2d 1879 (Fed. Cir. 1989) (ANALOG DEVICES held generic for devices having analog capabilities, where the examining attorney cited dictionaries and Nexis® articles). Applicant's website and the websites of others are also proper sources of evidence as to the meaning of the proposed mark and the manner in which it is used in relation to the goods/services. *In re Reed Elsevier Properties Inc.*, 482 F.3d 1376, 82 USPQ2d 1378 (Fed. Cir. 2007) (In holding LAWYERS.COM generic for "providing an online interactive database featuring information exchange in the fields of law, legal news and legal services," the Board properly considered applicant's website and eight other websites containing "lawyer.com" or "lawyers.com" to determine the meaning of applicant's "information exchange about legal services.").

It is not necessary to show that the relevant public *uses* the term to refer to the genus. The correct inquiry is whether the relevant public would understand the term to be generic. *In re 1800Mattress.com IP LLC*, 586 F.3d 1359, 92 USPQ2d 1682, 1685 (Fed. Cir. 2009).

There can be more than one generic term for a particular genus of goods or services. Any term that the relevant public understands to refer to the genus is generic. *Id.* at 1364, 92 USPQ2d at 1685.

When a term consists of a compound word or a telescoped word, the examining attorney may establish that the term is generic by producing evidence that each of the constituent words is generic, and that the separate words retain their generic significance when joined to form the compound or telescoped word that has "a meaning identical to the meaning common usage would ascribe to those words as a compound." *In re Gould Paper Corp.*, 834 F.2d 1017, 1018, 5 USPQ2d 1110, 1111–12 (Fed. Cir. 1987) (SCREENWIPE held generic as applied to premoistened antistatic cloths for cleaning computer and television screens); *Frito-Lay N. Am., Inc. v. Princeton Vanguard, LLC*, 109 USPQ2d 1949, 1953 (TTAB 2014) (finding the term PRETZEL CRISPS, analyzed as a combined term, to be generic for "pretzel crackers," but conclusion would be the same if analyzed as a unified phrase, as the words strung together would be understood by the relevant public as generic for pretzel crackers); *In re Greenliant Sys. Ltd.*, 97 USPQ2d 1078, 1081 (TTAB 2010) (finding that consumers were likely to perceive the telescoped term NANDRIVE merely as a stylized version of the generic term "nand drive"); *In re Wm. B. Coleman Co., Inc.*, 93 USPQ2d 2019 (TTAB 2010) (Board held that ELECTRIC CANDLE COMPANY is the combination of two generic terms joined to create a compound).

However, the Court of Appeals for the Federal Circuit has expressly limited the holding in *Gould* to "compound terms formed by the union of words" where the public understands the individual terms to be generic for a genus of goods or services, and the joining of the individual terms into one compound word lends "no additional meaning to the term." *In re Dial-A-Mattress Operating Corp.*, 240 F.3d 1341, 57 USPQ2d 1807, 1810 (Fed. Cir. 2001) (citing *In re Am. Fertility Soc'y*, 188 F.3d 1341, 51 USPQ2d 1832,

1837 (Fed. Cir. 1999)). Where the mark is a phrase, the examining attorney cannot simply cite definitions and generic uses of the individual components of the mark, but must provide evidence of the meaning of the composite mark as a whole. In *Coleman*, however, the Board stated that *Am. Fertility Soc'y* cannot be read to suggest that an applicant can create a trademark by adding a clearly generic term to a non-source-identifying word, even in the absence of proof that others have used the composite. 93 USPQ2d 2019 at 2025.

In *Am. Fertility Soc'y*, the court held that evidence that the components “Society” and “Reproductive Medicine” were generic was not enough to establish that the composite phrase SOCIETY FOR REPRODUCTIVE MEDICINE was generic for association services in the field of reproductive medicine. The court held that the examining attorney must show: (1) the genus of services that the applicant provides; and (2) that the relevant public understands the proposed composite mark to primarily refer to that genus of services. 51 USPQ2d at 1836–37.

In *Dial-A-Mattress*, the court held that an alphanumeric telephone number “bears closer conceptual resemblance to a phrase than a compound word.” 57 USPQ2d at 1811. The court found that 1-888-M-A-T-R-E-S-S was not generic as applied to “telephone shop-at-home retail services in the field of mattresses,” because there was no evidence of record that the public understood the term to refer to shop-at-home telephone mattress retailers. Therefore, to establish that a mnemonic telephone number is generic, the examining attorney must show that the relevant public would understand the mark as a whole to have generic significance.

With respect to Internet domain names, even if the evidence shows that the individual components that make up the proposed mark are generic, one must determine whether joining the individual terms creates a composite that is itself generic. In very rare instances, the addition of a top-level domain indicator (“TLD”) to an otherwise generic term may operate to create a distinctive mark. In *In re Steelbuilding.com*, 415 F.3d 1293, 1299, 75 USPQ2d 1420, 1423 (Fed. Cir. 2005), the Federal Circuit reversed the Board’s determination that STEELBUILDING.COM is generic for “computerized on-line retail services in the field of pre-engineered metal buildings and roofing systems.” The Court criticized the Board for considering STEELBUILDING and .COM separately, stating that “[i]n this unusual case, the addition of the TLD indicator expanded the meaning of the mark to include goods and services beyond the mere sale of steel buildings. Specifically, the TLD expanded the mark to include internet services that include ‘building’ or designing steel structures on the website and then calculating an appropriate price before ordering the unique structure.”

The Court also criticized the Board for relying only on evidence that the separate terms “steel building” or “steel buildings” are generic, where the terms were joined together in the subject mark:

The record does not contain any examination of dictionary definitions or other sources that might have indicated that joining the separate words “steel” and “building” would create a word that, in context, would be generic. The Board merely cited evidence that showed that when customers or competitors talked about a steel building, they used the phrase “steel building.” That evidence shows that “steel building” is generic, but does not address directly the composite term STEELBUILDING.

415 F.3d at 1298–1299, 75 USPQ2d at 1423.

Thus, to establish that a proposed mark comprising an Internet domain name is generic, the examining attorney must show that the relevant public would understand the mark as a whole to have generic significance.

See *1800Mattress.com*, 586 F.3d at 1363, 92 USPQ2d at 1684 (affirming Board’s conclusion that MATTRESS.COM was generic for “online retail store services in the field of mattresses, beds, and bedding,”

where the Board considered each of the constituent words, “mattress” and “.com” and determined that they were both generic, then considered the mark as a whole and determined that the combination added no new meaning, relying on the prevalence of the term “mattress.com” in the website addresses of several online mattress retailers who provide the same services as the applicant); *In re Hotels.com, L.P.*, 573 F.3d 1300, 91 USPQ2d 1532 (Fed. Cir. 2009) (HOTELS.COM is generic for “providing information for others about temporary lodging; [and] travel agency services, namely, making reservations and bookings for temporary lodging for others by means of telephone and the global computer network,” based on various definitions of “hotel,” printouts from hotel reservation search websites showing “hotels” as the equivalent of or included within “temporary lodging,” as well as evidence from applicant’s website); *In re DNI Holdings Ltd.*, 77 USPQ2d 1435 (TTAB 2005) (SPORTSBETTING.COM held generic for “provision of casino games on and through a global computer network wherein there are no actual monetary wagers; provision of contests and sweepstakes on and through a global computer network; providing a website on and through a global computer network featuring information in the fields of gaming, athletic competition and entertainment...,” where the record included multiple examples of use of the terms “sports betting” as well as the jointed terms “sportsbetting” by both applicant and its competitors to refer to both sports wagering and providing information about sports wagering, and there was no indication of a realistic alternative connotation of the compound term. See also [TMEP §§1209.03\(m\)](#) and [1215.05](#) regarding domain names comprising generic matter.)

### 1209.01(c)(ii) Terminology

As specifically amended by the Trademark Law Revision Act of 1988, §14 of the Trademark Act provides for the cancellation of a registration of a mark at any time if the mark “becomes the generic name for the goods or services, or a portion thereof, for which it is registered...” 15 U.S.C. §1064(3). Previously, that provision had pertained to a mark that “becomes the common descriptive name of an article or substance...” Cases previously distinguished between generic names and “apt or common descriptive names,” which referred to matter that, while not characterized as “generic,” had become so associated with the product that it was recognized in the applicable trade as another name for the product, serving as a term of art for all goods of that description offered by different manufacturers rather than identifying the goods of any one producer. See *Questor Corp. v. Dan Robbins & Assocs., Inc.*, 199 USPQ 358, 364 (TTAB 1978), *aff’d*, 599 F.2d 1009, 202 USPQ 100 (C.C.P.A. 1979). In addition, the Trademark Law Revision Act of 1988 amended §15 of the Trademark Act to adopt the term “generic name” to refer to generic designations. 15 U.S.C. §1065(4). In view of the amendment of §§14 and 15, a distinction between “generic” names and “apt or common descriptive” names is inappropriate. Rather, the terminology of the Act must be consistently used, e.g., in refusals to register matter that is a generic name for the goods or services, or a portion thereof. See *In re K-T Zoe Furniture Inc.*, 16 F.3d 390, 29 USPQ2d 1787 (Fed. Cir. 1994).

Similarly, cases have distinguished between “generic” terms and terms that were deemed “so highly descriptive as to be incapable of exclusive appropriation as a trademark.” See *In re Harcourt Brace Jovanovich, Inc.*, 222 USPQ 820 (TTAB 1984) (LAW & BUSINESS held so highly descriptive as to be incapable of distinguishing applicant’s services of arranging and conducting seminars in the field of business law); *In re Industrial Relations Counselors, Inc.*, 224 USPQ 309 (TTAB 1984) (INDUSTRIAL RELATIONS COUNSELORS, INC. held an apt name or so highly descriptive of educational services in the industrial relations field that it is incapable of exclusive appropriation and registration, notwithstanding *de facto* source recognition capacity). Regarding current practice for refusing registration of such matter, the Trademark Trial and Appeal Board noted as follows in *In re Women’s Publ’g Co. Inc.*, 23 USPQ2d 1876, 1877 n.2 (TTAB 1992):

The Examining Attorney's refusal that applicant's mark is "so highly descriptive that it is incapable of acting as a trademark" is not technically a statutory ground of refusal. Where an applicant seeks registration on the Principal Register, the Examining Attorney may refuse registration under Section 2(e)(1) of the Act, 15 USC 1052(e)(1), on the basis that the mark sought to be registered is generic (citations omitted). Alternatively, an Examining Attorney may refuse registration under the same section if he or she believes that the mark is merely descriptive and that applicant's showing of acquired distinctiveness is unpersuasive of registrability.

In essence, the Board was merely emphasizing the need to use precise statutory language in stating grounds for refusal. While the decision does not explicitly bar the use of the terminology "so highly descriptive that it is incapable of acting as a trademark" under all circumstances, the case illustrates that the use of this terminology may lead to confusion and should be avoided. It is particularly important in this context to use the precise statutory language to avoid doctrinal confusion. *See generally* McLeod, *The Status of So Highly Descriptive and Acquired Distinctiveness*, 82 Trademark Rep. 607 (1992). Therefore, examining attorneys must not state that a mark is "so highly descriptive that it is incapable of acting as a trademark" in issuing refusals. Rather, in view of the amendments of the Trademark Act noted above, the terminology "generic name for the goods or services" must be used in appropriate refusals, and use of the terminology "so highly descriptive" must be discontinued when referring to incapable matter.

This does not mean that designations that might formerly have been categorized as "so highly descriptive" should not be regarded as incapable. The Court of Appeals for the Federal Circuit has specifically stated that "a phrase or slogan can be so highly laudatory and descriptive as to be incapable of acquiring distinctiveness as a trademark." *In re Boston Beer Co. L.P.*, 198 F.3d 1370, 1373, 53 USPQ2d 1056, 1058 (Fed. Cir. 1999) (THE BEST BEER IN AMERICA for beer and ale held to be "so highly laudatory and descriptive of the qualities of [applicant's] product that the slogan does not and could not function as a trademark to distinguish Boston Beer's goods and serve as an indication of origin").

The Court of Appeals for the Federal Circuit has also stated that "[t]he critical issue in genericness cases is whether members of the relevant public primarily use or understand the term sought to be registered to refer to the genus of goods or services in question." *H. Marvin Ginn Corp. v. Int'l Ass'n of Fire Chiefs, Inc.*, 782 F.2d 987, 989-990, 228 USPQ 528, 530 (Fed. Cir. 1986). Also, note that it is entirely appropriate to consider whether a particular designation is "highly descriptive" in evaluating registrability under §2(f), or in similar circumstances.

The expression "generic name for the goods or services" is not limited to noun forms but also includes "generic adjectives," that is, adjectives that refer to a genus, species, category, or class of goods or services. *See Sheetz of Del., Inc. v. Doctor's Assocs. Inc.*, 108 USPQ2d 1341 (TTAB 2013) (holding FOOTLONG generic for sandwiches, excluding hot dogs); *In re Reckitt & Colman, N. Am. Inc.*, 18 USPQ2d 1389 (TTAB 1991) (holding PERMA PRESS generic for soil and stain removers for use on permanent press products). Similarly, evidence showing that a term in singular form is generic typically will suffice to show that the plural also is generic. *See In re Hotels.com, L.P.*, 573 F.3d 1300, 91 USPQ2d 1532, 1535 (Fed. Cir. 2009) (dictionary and other evidence of meaning of "hotel" sufficed to show that the plural form in HOTELS.COM was generic for the information and reservation services at issue); *In re Cordua Rests. LP*, 110 USPQ2d 1227, 1232 (TTAB 2014) (finding that evidence established not only that the singular form is generic, but also that the plural form CHURRASCOS is generic for applicant's restaurant services).

### **1209.01(c)(iii) Generic Matter: Case References**

#### *Marks Held Generic*

In the following cases, the matter sought to be registered was found generic: *In re 1800Mattress.com IP, LLC*, 586 F.3d 1359, 92 USPQ2d 1682 (Fed. Cir. 2009) (MATTRESS.COM generic for “online retail store services in the field of mattresses, beds, and bedding”); *In re Hotels.com, L.P.*, 573 F.3d 1300, 91 USPQ2d 1532 (Fed. Cir. 2009) (HOTELS.COM generic for “providing information for others about temporary lodging; [and] travel agency services, namely, making reservations and bookings for temporary lodging for others by means of telephone and the global computer network”); *In re Reed Elsevier Properties Inc.*, 482 F.3d 1376, 82 USPQ2d 1378 (Fed. Cir. 2007) (LAWYERS.COM generic for “providing an online interactive database featuring information exchange in the fields of law, legal news and legal services”); *In re Boston Beer Co. L.P.*, 198 F.3d 1370, 53 USPQ2d 1056, 1058 (Fed. Cir. 1999) (THE BEST BEER IN AMERICA for beer and ale held to be “so highly laudatory and descriptive of the qualities of [applicant’s] product that the slogan does not and could not function as a trademark to distinguish Boston Beer’s goods and serve as an indication of origin”); *In re Gould Paper Corp.*, 834 F.2d 1017, 5 USPQ2d 1110 (Fed. Cir. 1987) (SCREENWIPE held generic as applied to premoistened antistatic cloths for cleaning computer and television screens); *In re Northland Aluminum Products, Inc.*, 777 F.2d 1556, 227 USPQ 961 (Fed. Cir. 1985) (BUNDT, a term that designates a type of cake, held generic for ring cake mix); *In re Cordua Rests. LP*, 110 USPQ2d 1227 (TTAB 2014) (CHURRASCOS held generic for a restaurant featuring churrasco steaks); *Sheetz of Del., Inc. v. Doctor’s Assocs. Inc.*, 108 USPQ2d 1341 (TTAB 2013) (FOOTLONG held generic for sandwiches, excluding hot dogs); *In re Greenliant Systems, Ltd.*, 97 USPQ2d 1078 (TTAB 2010) (NANDRIVE held generic for electronic integrated circuits that include high-speed solid state flash memory drives); *In re Wm. B. Coleman Co., Inc.*, 93 USPQ2d 2019 (TTAB 2010) (ELECTRIC CANDLE COMPANY held generic for “light bulbs; lighting accessories, namely, candle sleeves; lighting fixtures”); *In re Tires, Tires, Tires, Inc.*, 94 USPQ2d 1153 (TTAB 2009) (TIRES TIRES TIRES held generic for retail tire store services); *Stuart Spector Designs, Ltd. v. Fender Musical Instruments Corp.*, 94 USPQ2d 1549 (TTAB 2009) (product design configurations of “the body portion of a guitar” held generic for “guitar bodies”); *In re Noon Hour Food Products, Inc.*, 88 USPQ2d 1172 (TTAB 2008) (BOND-OST held generic for cheese); *In re Rosemount, Inc.*, 86 USPQ2d 1436 (TTAB 2008) (REDUCER generic for “flow meters used for measuring flow through pipes; vortex flow meters”); *In re Lens.com, Inc.*, 83 USPQ2d 1444 (TTAB 2007) (LENS held generic for “retail store services featuring contact eyewear products rendered via a global computer network”); *In re Active Ankle Sys., Inc.*, 83 USPQ2d 1532 (TTAB 2007) (DORSAL NIGHT SPLINT generic for “orthopedic splints for the foot and ankle”); *In re Int’l Bus. Machs. Corp.*, 81 USPQ2d 1677 (TTAB 2006) (ESERVER generic for “computer network access products, namely, computer hardware and operating software therefor that allow connectivity to and the administration of public and proprietary computer networks and the processing of information contained thereon”); *In re The Outdoor Recreation Grp.*, 81 USPQ2d 1392 (TTAB 2006) (OUTDOOR PRODUCTS generic for a class of goods worn and used by persons engaged in outdoor activities); *In re Rodale Inc.*, 80 USPQ2d 1696 (TTAB 2006) (NUTRITION BULLETIN held generic for “providing information in the field of health and diet via a web site on the Internet”); *In re DNI Holdings Ltd.*, 77 USPQ2d 1435 (TTAB 2005) (SPORTSBETTING.COM held generic for “provision of casino games on and through a global computer network wherein there are no actual monetary wagers; provision of contests and sweepstakes on and through a global computer network; [and] providing a web site on and through a global computer network featuring information in the fields of gaming, athletic competition and entertainment”); *In re Eddie Z’s Blinds & Drapery, Inc.*, 74 USPQ2d 1037 (TTAB 2005) (BLINDSANDDRAPERY.COM generic for retail store services featuring blinds, draperies, and other wall coverings, conducted via the Internet); *In re Candy Bouquet Int’l, Inc.*, 73 USPQ2d 1883 (TTAB 2004) (CANDY BOUQUET generic for “retail, mail, and computer order services in the field of gift packages of candy”); *In re Cell Therapeutics Inc.*, 67 USPQ2d 1795 (TTAB 2003) (CELL THERAPEUTICS INC. generic for pharmaceutical preparations and laboratory research and development services); *In re Am. Inst. of Certified Pub. Accountants*, 65 USPQ2d 1972 (TTAB 2003) (CPA EXAMINATION held generic for “printed matter, namely, practice accounting examinations; accounting exams; accounting exam information booklets; and prior accounting examination questions and answers”); *In re Am. Acad. of Facial Plastic & Reconstructive Surgery*, 64 USPQ2d 1748 (TTAB 2002) (FACIAL PLASTIC SURGERY held generic for

training, association, and collective membership services, where evidence showed that the phrase “facial plastic surgery” is a recognized field of surgical specialization); *In re A La Vieille Russie, Inc.*, 60 USPQ2d 1895 (TTAB 2001) (RUSSIANART generic for dealership services in the field of fine art, antiques, furniture, and jewelry); *Cont'l Airlines Inc. v. United Airlines Inc.*, 53 USPQ2d 1385 (TTAB 1999) (E-TICKET generic for computerized reservation and ticketing of transportation services); *In re Log Cabin Homes Ltd.*, 52 USPQ2d 1206 (TTAB 1999) (LOG CABIN HOMES generic for architectural design of buildings and retail outlets selling kits for building log homes); *In re Web Commc'ns*, 49 USPQ2d 1478 (TTAB 1998) (WEB COMMUNICATIONS generic for consulting services to businesses seeking to establish sites on a global computer network); *In re Cent. Sprinkler Co.*, 49 USPQ2d 1194 (TTAB 1998) (ATTIC generic for sprinklers installed primarily in attics); *In re Stanbel Inc.*, 16 USPQ2d 1469 (TTAB 1990), *aff'd*, 20 USPQ2d 1319 (Fed. Cir. 1991) (ICE PAK for reusable ice substitute for use in food and beverage coolers held generic); *In re The Paint Products Co.*, 8 USPQ2d 1863 (TTAB 1988) (PAINT PRODUCTS CO. for “interior and exterior paints and coatings, namely, alkyd, oil, latex, urethane and epoxy based paints and coatings” held so highly descriptive as to be incapable of becoming distinctive); *In re Analog Devices Inc.*, 6 USPQ2d 1808 (TTAB 1988), *aff'd*, 871 F.2d 1097, 10 USPQ2d 1879 (Fed. Cir. 1989) (ANALOG DEVICES held generic for devices having analog capabilities); *In re Mortg. Bankers Ass'n of Am.*, 226 USPQ 954 (TTAB 1985) (CERTIFIED MORTGAGE BANKER (“MORTGAGE BANKER” disclaimed) for “educational services, namely providing qualifying examinations, testing and grading in the field of real estate finance” held so highly descriptive as to be incapable of functioning as a mark notwithstanding evidence of acquired distinctiveness); *In re Half Price Books, Records, Magazines, Inc.*, 225 USPQ 219, 222 (TTAB 1984) (HALF PRICE BOOKS RECORDS MAGAZINES for retail book and record store services “is incapable of designating origin and any evidence of secondary meaning can only be viewed as ‘de facto’ in import and incapable of altering the inability of the subject matter for registration to function as a service mark”).

#### *Marks Held Not Generic*

In the following cases, the matter sought to be registered was found not to be generic: *In re Steelbuilding.com*, 415 F.3d 1293, 75 USPQ2d 1420 (Fed. Cir. 2005) (STEELBUILDING.COM not generic for “computerized on line retail services in the field of pre-engineered metal buildings and roofing systems,” but evidence submitted by applicant insufficient to establish acquired distinctiveness under §2(f)); *In re Dial-A-Mattress Operating Corp.*, 240 F.3d 1341, 57 USPQ2d 1807 (Fed. Cir. 2001) (1-888-M-A-T-R-E-S-S not generic for “telephone shop-at-home retail services in the field of mattresses”); *In re Am. Fertility Soc'y*, 188 F.3d 1341, 51 USPQ2d 1832 (Fed. Cir. 1999) (SOCIETY FOR REPRODUCTIVE MEDICINE not generic for association services in the field of reproductive medicine); *In re Merrill Lynch, Pierce, Fenner & Smith Inc.*, 828 F.2d 1567, 4 USPQ2d 1141 (Fed. Cir. 1987) (CASH MANAGEMENT ACCOUNT for “stock brokerage services, administration of money market fund services, and providing loans against securities services” held merely descriptive, rather than generic, and remanded to Board to consider sufficiency of §2(f) evidence); *H. Marvin Ginn Corp. v. Int'l Ass'n of Fire Chiefs, Inc.*, 782 F.2d 987, 228 USPQ 528 (Fed. Cir. 1986) (FIRE CHIEF not generic for publications); *Alcatraz Media, Inc. v. Chesapeake Marine Tours Inc.*, 107 USPQ2d 1750 (TTAB 2013) (ANNAPOLIS TOURS, with TOURS disclaimed, not generic for “conducting guided tours of historic districts and other areas of cities,” but cancellation granted on ground that mark was merely descriptive and had not acquired distinctiveness); *Baroness Small Estates, Inc. v. Am. Wine Trade, Inc.*, 104 USPQ2d 1224, 1229 (TTAB 2012) (CMS not generic acronym for “wine” made from the grape varieties cabernet, merlot, and syrah; the Board noted that “the fact that a term is derived from individual generic words or even a listing of generic words does not necessarily make the derived term generic”); *In re Tennis Indus. Ass'n*, 102 USPQ2d 1671 (TTAB 2012) (TENNIS INDUSTRY ASSOCIATION not generic for “association services, namely, promoting the interests of tennis facilities, tennis manufacturers, tennis retailers and tennis court contractors; providing market research services to track the economic vitality of the tennis industry,” but applicant failed to prove that the mark had acquired

distinctiveness); *In re Country Music Ass'n*, 100 USPQ2d 1824 (TTAB 2011) (COUNTRY MUSIC ASSOCIATION, with ASSOCIATION disclaimed, not generic for “association services, namely, promoting country music entertainers and the country music recording industry;” evidence submitted by applicant held sufficient to demonstrate acquired distinctiveness under §2(f)); *In re Am. Online, Inc.*, 77 USPQ2d 1618 (TTAB 2006) (INSTANT MESSENGER not generic for telecommunications services and computer services related to providing real time text messages; evidence submitted by applicant held sufficient to demonstrate acquired distinctiveness under §2(f)); *Zimmerman v. Nat'l Ass'n of Realtors*, 70 USPQ2d 1425 (TTAB 2004) (collective service marks REALTOR and REALTORS not generic for real estate brokerage, management, appraisal, and planning services); *In re Federated Dept. Stores Inc.*, 3 USPQ2d 1541 (TTAB 1987) (THE CHILDREN'S OUTLET (“OUTLET” disclaimed), while merely descriptive of applicant's “retail children's clothing store services,” held capable of functioning as a mark, with evidence submitted by applicant sufficient to establish acquired distinctiveness pursuant to §2(f)); *Hunter Publ'g Co. v. Caulfield Publ'g Ltd.*, 1 USPQ2d 1996 (TTAB 1986) (SYSTEMS USER for periodic trade journal held merely descriptive, rather than generic, and applicant's evidence held sufficient to establish acquired distinctiveness pursuant to §2(f)); *In re Failure Analysis Assocs.*, 1 USPQ2d 1144 (TTAB 1986) (FAILURE ANALYSIS ASSOCIATES, for “consulting services in the field of mechanical, structural, metallurgical, and metal failures, fires and explosions; engineering services in the field of mechanical design and risk analysis” and “consulting engineering services in the metallurgical field,” found to be merely descriptive of applicant's services rather than incapable of distinguishing them from those of others; evidence submitted by applicant held sufficient to demonstrate acquired distinctiveness under §2(f)).

## 1209.02 Procedure for Descriptiveness and/or Genericness Refusal

The examining attorney must consider the evidence of record to determine whether a mark is merely descriptive or whether it is suggestive or arbitrary. See *In re Noble Co.*, 225 USPQ 749, 750 (TTAB 1985). The examining attorney may request that the applicant submit additional explanation or materials to clarify the meaning of the mark or the nature of the goods or services. 37 C.F.R. §2.61(b); [TMEP §814](#); see *In re AOP LLC*, 107 USPQ2d 1644, 1650-51 (TTAB 2013). This would be especially appropriate for goods or services where the meaning of the mark or the nature of the goods or services would be readily apparent only to someone knowledgeable in that field. The examining attorney should also do any necessary research to determine the nature of the use of the designation in the marketplace. To the fullest extent possible, the examining attorney will examine §1(b) applications for registrability under §2(e)(1) according to the same procedures and standards that apply to any other application. See *In re Am. Psychological Ass'n*, 39 USPQ2d 1467, 1469 (Comm'r Pats. 1996); [TMEP §1102](#) and [1102.01](#). “[T]he fact that applicant has filed an intent-to-use application does not limit the examining attorney's evidentiary options, nor does it shield an applicant from producing evidence that it may have in its possession.” *In re Promo Ink*, 78 USPQ2d 1301, 1303 (TTAB 2006). If the examining attorney refuses registration, he or she must support the refusal with appropriate evidence. See generally *In re Stereotaxis Inc.*, 429 F.3d 1039, 77 USPQ2d 1087 (Fed. Cir. 2005) (finding a press release cited by the examining attorney relevant to show the public's perception of the goods in an intent-to-use application).

In all cases, the examining attorney should try to make the Office action as complete as possible, so that the applicant may respond appropriately.

### 1209.02(a) Descriptive Marks – Advisory Statement That Mark Appears to Be Generic

A designation that is merely descriptive must be refused registration under §2(e)(1) of the Trademark Act, 15 U.S.C. §1052(e)(1). The examining attorney must not initially issue a refusal in an application for registration on the Principal Register on the ground that a mark is a generic name for the goods or services, unless the applicant asserts that the mark has acquired distinctiveness under §2(f) in the application itself.

See [TMPEP §1209.02\(b\)](#). Even if it appears that the mark is generic, the proper basis for the initial refusal is §2(e)(1) descriptiveness. If there is strong evidence that the proposed mark is generic, a statement that the subject matter appears to be a generic name for the goods or services should be included in conjunction with the refusal on the ground that the matter is merely descriptive. It has been said that a generic term is “the ultimate in descriptiveness.” *H. Marvin Ginn Corp. v. Int’l Ass’n of Fire Chiefs, Inc.*, 782 F.2d 987, 989, 228 USPQ 528, 530 (Fed. Cir. 1986), quoting *Weiss Noodle Co. v. Golden Cracknel & Specialty Co.*, 290 F.2d 845, 847, 129 USPQ 411, 413 (C.C.P.A. 1961).

If, on the other hand, the mark appears to be capable, the examining attorney should provide appropriate advice concerning a possible amendment to the Supplemental Register or assertion of a claim of acquired distinctiveness. See [TMPEP §1102.03](#) concerning ineligibility of the proposed mark in a §1(b) application for the Supplemental Register prior to filing an acceptable amendment to allege use under 15 U.S.C. §1051(c) or statement of use under 15 U.S.C. §1051(d). The examining attorney should also advise the applicant regarding any incapable portion of the mark for which a disclaimer would be required in connection with an amendment to the Supplemental Register or assertion of a claim of acquired distinctiveness. If the applicant responds by amending to the Supplemental Register or asserting acquired distinctiveness, but does not submit the disclaimer, the examining attorney must issue a nonfinal Office action. Prior to the applicant’s amendment, information regarding the disclaimer requirement is merely advisory. Failure to submit the disclaimer thus would constitute a new issue requiring a nonfinal Office action.

If the record is unclear as to whether the designation is capable of functioning as a mark, the examining attorney must refrain from giving any advisory statement. In general, the examining attorney should make every effort to apprise applicants as early as possible of the prospects for registration through appropriate amendments, if feasible. *NOTE: A mark in a §66(a) application cannot be registered on the Supplemental Register under any circumstances. 15 U.S.C. § 1141h(a)(4); 37 C.F.R. §§2.47(c) and 2.75(c).*

If, in response to a first-action refusal under §2(e)(1), the applicant merely argues that the mark is registrable on the Principal Register without claiming acquired distinctiveness or amending to the Supplemental Register, the examining attorney must issue a final refusal under §2(e)(1), on the ground that the proposed mark is merely descriptive, if he or she is not persuaded by the applicant’s arguments.

### **1209.02(a)(i) Amendment to Supplemental Register in Response to Office Action**

If the applicant responds to a §2(e)(1) descriptiveness refusal by amending its application to the Supplemental Register, this amendment presents a new issue requiring consideration by the examining attorney (unless the amendment is irrelevant to the outstanding refusal). See [TMPEP §714.05\(a\)\(i\)](#). If the examining attorney determines that the designation is a generic name for the applicant’s goods or services, the examining attorney must then issue a nonfinal action refusing registration on the Supplemental Register. The statutory basis for such a refusal is §23 of the Trademark Act, 15 U.S.C. §1091. See [TMPEP §§815–816.05](#) concerning applications for registration on the Supplemental Register.

### **1209.02(a)(ii) Assertion of §2(f) in Response to Office Action**

If the applicant responds to a §2(e)(1) descriptiveness refusal by amending its application to assert acquired distinctiveness under §2(f), this also raises a new issue. See [TMPEP §§714.05\(a\)\(i\)](#) and [1212.02\(h\)](#). If the examining attorney determines that the designation is a generic name for the applicant’s goods or services, the examining attorney must issue a new nonfinal action refusing registration under §2(e)(1) on the basis that the mark is generic and stating that the claim of acquired distinctiveness is insufficient to overcome the refusal. The examining attorney must also maintain and continue, in the alternative, the refusal under §2(e)(1)

that the mark is merely descriptive and must separately explain why the showing of acquired distinctiveness is insufficient to overcome the descriptiveness refusal even if the mark is ultimately deemed not to be generic. As the Trademark Trial and Appeal Board noted in *In re Women's Publ'g Co. Inc.*, 23 USPQ2d 1876, 1877 n.2 (TTAB 1992):

The Examining Attorney's refusal that applicant's mark is "so highly descriptive that it is incapable of acting as a trademark" is not technically a statutory ground of refusal. Where an applicant seeks registration on the Principal Register, the Examining Attorney may refuse registration under Section 2(e)(1) of the Act, 15 USC 1052(e)(1), on the basis that the mark sought to be registered is generic. See, e.g., *In re Northland Aluminum Products Inc.*, 777 F.2d 1556, 227 USPQ 961, 962 (Fed. Cir. 1985), *Weiss Noodle Co. v. Golden Cracknel & Specialty Co.*, 290 F.2d 845, 129 USPQ 411, 413 (C.C.P.A. 1961), *In re Deutsche Airbus GmbH*, 224 USPQ 611 (TTAB 1984) and *Conde Nast Publ'ns Inc. v. Redbook Publ'g Co.*, 217 USPQ 356, 360 (TTAB 1983). Alternatively, an Examining Attorney may refuse registration under the same section if he or she believes that the mark is merely descriptive and that applicant's showing of acquired distinctiveness is unpersuasive of registrability.

If the examining attorney fails to separately address the sufficiency of the §2(f) evidence, this may be treated as a concession that the evidence would be sufficient to establish distinctiveness if the mark is ultimately found not to be generic. See *In re Country Music Ass'n*, 100 USPQ2d 1824, 1834 (TTAB 2011) (interpreting the examining attorney's silence on the sufficiency of the evidence submitted in support of applicant's claim of acquired distinctiveness "as a concession that, if the term is not generic, the record evidence is sufficient to show acquired distinctiveness under Section 2(f)"). Compare *In re Dietrich*, 91 USPQ2d 1622, 1625 (TTAB 2009), in which the Board held that an examining attorney had "effectively conceded that, assuming the mark is not functional, applicant's evidence is sufficient to establish that the mark had acquired distinctiveness," where the examining attorney rejected the applicant's §2(f) claim on the ground that applicant's bicycle wheel configuration was functional and thus unregistrable even under §2(f), but did not specifically address the sufficiency of the §2(f) evidence or the question of whether the mark would be registrable under §2(f) if it were ultimately found to be nonfunctional.

Therefore, the descriptiveness refusal must be maintained, in the alternative, in the event that the mark is ultimately determined not to be generic. See [TMEP §§1212–1212.10](#) regarding distinctiveness under §2(f), and [TMEP §1212.02\(i\)](#) regarding assertion of §2(f) claims with respect to generic matter. See, e.g., *In re Candy Bouquet Int'l Inc.*, 73 USPQ2d 1883 (TTAB 2004); *In re Am. Acad. of Facial Plastic & Reconstructive Surgery*, 64 USPQ2d 1748 (TTAB 2002); *In re A La Vieille Russie Inc.*, 60 USPQ2d 1895 (TTAB 2001).

### **1209.02(b) Descriptive and Possibly Generic Marks – Assertion of §2(f) in Application**

If the applicant asserts acquired distinctiveness under §2(f) in the original application and the examining attorney determines that the applied-for mark is a generic name for the applicant's goods or services, the examining attorney must issue a nonfinal action refusing registration under §2(e)(1) on the basis that the mark is generic and stating that the claim of acquired distinctiveness is insufficient to overcome the refusal. The examining attorney must also refuse registration under §2(e)(1), in the alternative, as merely descriptive and must separately explain why the showing of acquired distinctiveness is insufficient to overcome the descriptiveness refusal even if the mark is ultimately deemed not to be generic.

If the examining attorney ultimately issues a final refusal under §2(e)(1) on the ground that the mark is generic, the descriptiveness refusal, including an explanation of the insufficiency of any §2(f) evidence, must also be made final, in the alternative, in case the mark is ultimately determined not to be generic. See, e.g., *In re Candy Bouquet Int'l*, 73 USPQ2d 1883 (TTAB 2004); *In re Am. Acad. of Facial Plastic &*

*Reconstructive Surgery*, 64 USPQ2d 1748 (TTAB 2002); *In re A La Vieille Russie Inc.*, 60 USPQ2d 1895 (TTAB 2001).

If the examining attorney fails to separately address the sufficiency of the §2(f) evidence, this may be treated as a concession that the evidence would be sufficient to establish distinctiveness if the mark is ultimately found not to be generic. See *In re Country Music Ass'n*, 100 USPQ2d 1824, 1834 (TTAB 2011) (interpreting the examining attorney's silence on the sufficiency of the evidence submitted in support of applicant's claim of acquired distinctiveness "as a concession that, if the term is not generic, the record evidence is sufficient to show acquired distinctiveness under Section 2(f)"). Compare *In re Dietrich*, 91 USPQ2d 1622, 1625 (TTAB 2009), in which the Board held that an examining attorney had "effectively conceded that, assuming the mark is not functional, applicant's evidence is sufficient to establish that the mark had acquired distinctiveness," where the examining attorney rejected the applicant's §2(f) claim on the ground that applicant's bicycle wheel configuration was functional and thus unregistrable even under §2(f), but did not specifically address the sufficiency of the §2(f) evidence or the question of whether the mark would be registrable under §2(f) if it were ultimately found to be nonfunctional.

See [TMPEP §§1212–1212.10](#) regarding distinctiveness under §2(f), and [TMPEP §1212.02\(i\)](#) regarding assertion of §2(f) claims with respect to generic matter.

### **1209.03 Considerations Relevant to Determination of Descriptiveness or Genericness**

The following sections discuss factors and situations that often arise during a determination of whether a mark is descriptive or generic.

#### **1209.03(a) Third-Party Registrations**

Third-party registrations are not conclusive on the question of descriptiveness. Each case must stand on its own merits, and a mark that is merely descriptive must not be registered on the Principal Register simply because other such marks appear on the register. *In re theDot Commc'ns Network LLC*, 101 USPQ2d 1062, 1067 (TTAB 2011) (holding .music merely descriptive for, inter alia, on-line social networking services, domain registration services, interactive hosting services, electronic publishing, recording, and production services, online retail store and promotional services, and downloadable files and recordings despite the presence of third-party registrations for marks consisting of "dot \_\_\_\_" or ".\_\_\_\_"); *In re Scholastic Testing Serv., Inc.*, 196 USPQ 517, 519 (TTAB 1977) (holding SCHOLASTIC merely descriptive of devising, scoring, and validating tests for others despite the presence of other marks on the Register using the word "Scholastic"). The question of whether a mark is merely descriptive must be determined based on the evidence of record at the time registration is sought. See *In re Nett Designs Inc.*, 236 F.3d 1339, 57 USPQ2d 1564 (Fed. Cir. 2001) (holding ULTIMATE BIKE RACK merely descriptive of "bicycle racks" despite the presence of "ultimate" without a disclaimer in other marks on the Principal Register); *In re Sun Microsystems Inc.*, 59 USPQ2d 1084 (TTAB 2001) (holding AGENTBEANS merely descriptive of computer software

for use in software development and deployment where the Board found that changes in the vocabulary of the field reduced the relevance of third-party registrations).

### 1209.03(b) No Dictionary Listing

The fact that a term is not found in a dictionary is not controlling on the question of registrability if the examining attorney can show that the term has a well understood and recognized meaning. *See In re Orleans Wines, Ltd.*, 196 USPQ 516 (TTAB 1977) (BREADSPRED held merely descriptive of jellies and jams).

### 1209.03(c) First or Only User

The fact that an applicant may be the first and only user of a merely descriptive or generic designation does not justify registration if the only significance conveyed by the term is merely descriptive. *See In re Nat'l Shooting Sports Found., Inc.*, 219 USPQ 1018 (TTAB 1983) (SHOOTING, HUNTING, OUTDOOR TRADE SHOW AND CONFERENCE held apt descriptive name for conducting and arranging trade shows in the hunting, shooting, and outdoor sports products field). *See also* [TMEP §1212.06\(e\)\(i\)](#) and cases cited therein.

### 1209.03(d) Combined Terms

When two descriptive terms are combined, the determination of whether the composite mark also has a descriptive significance turns upon the question of whether the combination of terms evokes a new and unique commercial impression. If each component retains its descriptive significance in relation to the goods or services, the combination results in a composite that is itself descriptive. *Duopross Meditech Corp. v. Inviro Medical Devices, Ltd.*, 695 F.3d 1247, 103 USPQ2d 1753 (Fed. Cir. 2012) (SNAP SIMPLY SAFER merely descriptive for “medical devices, namely, cannulae; medical, hypodermic, aspiration and injection needles; medical, hypodermic, aspiration and injection syringes”); *In re Oppedahl & Larson LLP*, 373 F.3d 1171, 71 USPQ2d 1370 (Fed. Cir. 2004) (PATENTS.COM merely descriptive of computer software for managing a database of records that could include patents and for tracking the status of the records by means of the Internet); *In re Gould Paper Corp.*, 834 F.2d 1017, 1018, 5 USPQ2d 1110, 1111–1112 (Fed. Cir. 1987) (SCREENWIPE held generic as applied to premoistened antistatic cloths for cleaning computer and television screens); *In re Positec Group Ltd.*, 108 USPQ2d 1161 (TTAB 2013) (SUPERJAWS merely descriptive for a variety of machine and hand tools including jaws); *In re Petroglyph Games, Inc.*, 91 USPQ2d 1332 (TTAB 2009) (BATTLECAM merely descriptive for computer game software); *In re Carlson*, 91 USPQ2d 1198 (TTAB 2009) (URBANHOUSING merely descriptive of real estate brokerage, real estate consultation, and real estate listing services); *In re Paul Leonhardt*, 2008 TTAB LEXIS 46 (TTAB 2008) (BOBBLE POPS held merely descriptive for “candy,” which the record showed was a lollipop candy featuring a bobble head device); *In re Cox Enters. Inc.*, 82 USPQ2d 1040 (TTAB 2007) (THEATL – a compressed version of the term “THE ATL,” a recognized nickname for the city of Atlanta – held merely descriptive of printed matter of interest to residents of and tourists and visitors to Atlanta, Georgia); *In re King Koil Licensing Co. Inc.*, 79 USPQ2d 1048 (TTAB 2006) (THE BREATHABLE MATTRESS held merely descriptive of “beds, mattresses, box springs and pillows,” based on dictionary definitions of “breathable” and “mattress,” and excerpts of web pages that refer to “breathable mattresses” and “breathable bedding”); *In re Finisar Corp.*, 78 USPQ2d 1618 (TTAB 2006), *aff'd per curiam*, 223 Fed. App'x 984 (Fed. Cir. 2007) (SMARTSFP held merely descriptive of optical transceivers); *In re Tower Tech, Inc.*, 64 USPQ2d 1314 (TTAB 2002) (SMARTTOWER merely descriptive of “commercial and industrial cooling towers and accessories therefor, sold as a unit”); *In re Sun Microsystems Inc.*, 59 USPQ2d 1084 (TTAB 2001) (AGENTBEANS merely descriptive of computer software for use in development and deployment of application programs on global computer network); *In re Putman Publ'g Co.*, 39 USPQ2d 2021 (TTAB 1996) (FOOD & BEVERAGE ONLINE merely descriptive of news and information service for the food

processing industry); *In re Copytele Inc.*, 31 USPQ2d 1540 (TTAB 1994) (SCREEN FAX PHONE merely descriptive of “facsimile terminals employing electrophoretic displays”); *In re Entenmann’s Inc.*, 15 USPQ2d 1750 (TTAB 1990), *aff’d per curiam*, 928 F.2d 411 (Fed. Cir. 1991) (holding OATNUT merely descriptive of bread containing oats and hazelnuts); *In re Serv-A-Portion Inc.*, 1 USPQ2d 1915 (TTAB 1986) (SQUEEZE N SERV merely descriptive of ketchup and thus subject to disclaimer); *In re Wells Fargo & Co.*, 231 USPQ 95 (TTAB 1986) (EXPRESSERVICE merely descriptive of banking and trust services); *In re Uniroyal, Inc.*, 215 USPQ 716 (TTAB 1982) (STEELGLAS BELTED RADIAL merely descriptive of vehicle tires containing steel and glass belts); *In re Bright-Crest, Ltd.*, 204 USPQ 591 (TTAB 1979) (COASTER-CARDS merely descriptive of coasters suitable for direct mailing).

However, a mark comprising a combination of merely descriptive components is registrable if the combination of terms creates a unitary mark with a unique, nondescriptive meaning, or if the composite has a bizarre or incongruous meaning as applied to the goods. *See In re Colonial Stores Inc.*, 394 F.2d 549, 157 USPQ 382 (C.C.P.A. 1968) (SUGAR & SPICE held not merely descriptive of bakery products); *In re Shutts*, 217 USPQ 363 (TTAB 1983) (SNO-RAKE held not merely descriptive of a snow removal hand tool).

When there is evidence that the composite mark itself has been used together to form a phrase that is descriptive of the goods or services, it is unnecessary to engage in an analysis of each individual component. *In re Shiva Corp.*, 48 USPQ2d 1957, 1958 (TTAB 1998) (TARIFF MANAGEMENT merely descriptive of computer hardware and computer programs to control, reduce, and render more efficient wide area network usage).

The Trademark Trial and Appeal Board has held that the addition of the prefix “e” does not change the merely descriptive significance of a term in relation to goods or services sold or rendered electronically, where the record showed that the “e” prefix has become commonly recognized as a designation for goods or services sold or delivered electronically. *In re Int’l Bus. Machs. Corp.*, 81 USPQ2d 1677, 1679 (TTAB 2006) (“We see no difference in the meaning or connotation of ‘e-server’ and ‘eserver,’ and consider them both to be an abbreviated form of ‘electronic server.’”); *In re SPX Corp.*, 63 USPQ2d 1592 (TTAB 2002) (E-AUTODIAGNOSTICS merely descriptive of an “electronic engine analysis system comprised of a hand-held computer and related computer software”); *In re Styleclick.com Inc.*, 57 USPQ2d 1445 (TTAB 2000) (E FASHION merely descriptive of software used to obtain beauty and fashion information, and for electronic retailing services); *Cont’l Airlines Inc. v. United Airlines Inc.*, 53 USPQ2d 1385 (TTAB 1999) (E-TICKET generic for computerized reservation and ticketing of transportation services). Similarly, with appropriate evidence, the prefix “i” or “I” was held to be understood by purchasers to signify Internet, when used in relation to Internet-related products or services. *See In re Zanova, Inc.*, 59 USPQ2d 1300 (TTAB 2000) (ITOOL merely descriptive of computer software for use in creating web pages, and custom design of websites for others). In these situations, the examining attorney should provide evidence of use of the prefix “e” or “i” in relation to the goods or services.

The addition of an entity designator (e.g., Corporation, Corp., Co., Inc., Ltd., etc.) to a descriptive term does not alter the term’s descriptive significance, because an entity designation has no source-indicating capacity. *See Goodyear’s India Rubber Glove Mfg. Co. v. Goodyear Rubber Co.*, 128 U.S. 598, 602 (1888) (“The addition of the word ‘Company’ [to an otherwise generic mark] only indicates that parties have formed an association or partnership to deal in such goods . . .” and does not render the generic mark registrable); *In re Cell Therapeutics Inc.*, 67 USPQ2d 1795 (TTAB 2003) (CELL THERAPEUTICS INC. generic for pharmaceutical preparations and laboratory research and development services); *In re Taylor & Francis [Publishers] Inc.*, 55 USPQ2d 1213, 1215 (TTAB 2000) (“PRESS,” as applied to a printing or publishing establishment, “is in the nature of a generic entity designation which is incapable of serving a source-indicating function”); *In re Patent & Trademark Servs. Inc.*, 49 USPQ2d 1537 (TTAB 1998) (PATENT & TRADEMARK SERVICES INC. is merely descriptive of legal services in the field of intellectual property;

the term “INC.” merely indicates the type of entity that performs the services, and has no significance as a mark); *In re The Paint Products Co.*, 8 USPQ2d 1863, 1866 (TTAB 1988) (“‘PAINT PRODUCTS CO.’ is no more registrable for goods emanating from a company that sells paint products than it would be as a service mark for the retail paint store services offered by such a company.”); *In re E. I. Kane, Inc.*, 221 USPQ 1203, 1205 (TTAB 1984) (“The addition of the term ‘INC.’ does not add any trademark significance to the matter sought to be registered. The complete term ‘OFFICE MOVERS, INC.’ is so highly descriptive that it is incapable of distinguishing applicant’s services [which included “moving services, namely the moving of office facilities”].”). See [TMEP §1213.03\(d\)](#) regarding disclaimer of entity designators.

### 1209.03(e) More Than One Meaning

Descriptiveness must be determined in relation to the goods or services for which registration is sought. Therefore, the fact that a term may have a different meaning(s) in a different context is not controlling. See *In re RiseSmart Inc.*, 104 USPQ2d 1931, 1933 (TTAB 2012); *In re Chopper Indus.*, 222 USPQ 258, 259 (TTAB 1984); *In re Bright-Crest, Ltd.*, 204 USPQ 591, 593 (TTAB 1979); *In re Champion Int’l Corp.*, 183 USPQ 318, 320 (TTAB 1974). If a term has a primary significance that is descriptive in relation to at least one of the recited goods/services, and does not create any double entendre or incongruity, then the term is merely descriptive.

See [TMEP §1213.05\(c\)](#) regarding wording that constitutes a “double entendre.”

### 1209.03(f) Picture or Illustration

A visual representation that consists merely of an illustration of the goods, or of an article that is an important feature or characteristic of the goods or services, is merely descriptive under §2(e)(1) of the Act. See *In re Soc’y for Private & Commercial Earth Stations*, 226 USPQ 436 (TTAB 1985) (representation of satellite dish held merely descriptive of services of an association promoting the interests of members of the earth station industry); *In re Underwater Connections, Inc.*, 221 USPQ 95 (TTAB 1983) (pictorial representation of a compressed air gas tank held merely descriptive of travel tour services involving underwater diving). But see *In re LRC Products Ltd.*, 223 USPQ 1250 (TTAB 1984) (stylized hand design found not merely an illustration of the goods, i.e., gloves; thus not merely descriptive).

### 1209.03(g) Foreign Equivalents

The foreign equivalent of a merely descriptive English word is no more registrable than the English word itself. “[A] word taken from a well-known foreign modern language, which is, itself, descriptive of a product, will be so considered when it is attempted to be registered as a trade-mark in the United States for the same product.” *In re N. Paper Mills*, 64 F.2d 998, 1002, 17 USPQ 492, 493 (C.C.P.A. 1933). See *In re Tokutake Indus. Co.*, 87 USPQ2d 1697 (TTAB 2008) (AYUMI and its Japanese-character equivalent held merely descriptive for footwear where the evidence, including applicant’s own admissions, indicated that the primary meaning of applicant’s mark is “walking”); *In re Oriental Daily News, Inc.*, 230 USPQ 637 (TTAB 1986) (Chinese characters that mean ORIENTAL DAILY NEWS held merely descriptive of newspapers); *In re Geo. A. Hormel & Co.*, 227 USPQ 813 (TTAB 1985) (SAPORITO, an Italian word meaning “tasty,” held merely descriptive because it describes a desirable characteristic of applicant’s dry sausage).

Although words from modern languages are generally translated into English, the doctrine of foreign equivalents is not an absolute rule, but merely a guideline. The doctrine should be applied only when it is likely that the ordinary American purchaser would stop and translate the foreign word into its English equivalent. See *Palm Bay Imps., Inc. v. Veuve Clicquot Ponsardin Maison Fondée en 1772*, 396 F.3d 1369,

1377, 73 USPQ2d 1689, 1696 (Fed. Cir. 2005). “The “ordinary American purchaser” in this context refers to the ordinary American purchaser who is knowledgeable in the foreign language....[defining “ordinary American purchaser” as the “average American buyer”] would write the doctrine out of existence” *In re Thomas*, 79 USPQ2d 1021, 1024 (TTAB 2006). The “ordinary American purchaser” includes “all American purchasers, including those proficient in a non-English language who would ordinarily be expected to translate words into English.” *In re Spirits Int’l, N.V.*, 563 F.3d 1347, 1352, 90 USPQ2d 1489, 1492 (Fed. Cir. 2009).

While foreign words are generally translated into English for purposes of determining descriptiveness, foreign words from dead or obscure languages may be so unfamiliar to the American buying public that they should not be translated into English for descriptiveness purposes. See *Enrique Bernat F. S.A. v. Guadalajara Inc.*, 210 F.3d 439, 443, 54 USPQ2d 1497, 1499 (5th Cir. 2000), *reh’g denied* 218 F.3d 745 (2000); cf. *Gen. Cigar Co. v. G.D.M. Inc.*, 988 F. Supp. 647, 45 USPQ2d 1481 (S.D.N.Y. 1997). The determination of whether a language is “dead” must be made on a case-by-case basis, based upon the meaning that the term would have to the relevant purchasing public.

*Example:* Latin is generally considered a dead language. However, if evidence exists that the relevant purchasing public still uses a Latin term (e.g., if the term appears in current dictionaries or news articles), then that Latin term is not considered dead. The same analysis should be applied to other uncommon languages.

Note that marks comprised of a term from a foreign language used with an English term may be found registrable if the commercial impression created by the combination differs from that which would be created by two English words. See *In re Johanna Farms Inc.*, 8 USPQ2d 1408 (TTAB 1988) (LA YOGURT for yogurt registrable on Principal Register with a disclaimer of “YOGURT”); *In re Sweet Victory, Inc.*, 228 USPQ 959 (TTAB 1986) (GLACE LITE held not descriptive for ice creams, sherbets, frozen yogurts, and nondairy frozen desserts); *In re Universal Package Corp.*, 222 USPQ 344 (TTAB 1984) (LE CASE not merely descriptive of jewelry boxes and gift boxes and, therefore, registrable with a disclaimer of “CASE”).

See [TMPEP §§809–809.03](#) for information regarding how to determine the meaning of non-English wording in a mark. See also TMPEP §§[1207.01\(b\)\(vi\)–1207.01\(b\)\(vi\)\(C\)](#), [1210.10](#), and [1211.01\(a\)\(vii\)](#) regarding the doctrine of foreign equivalents.

### 1209.03(h) Acronyms

As a general rule, an acronym or initialism cannot be considered descriptive unless the wording it stands for is merely descriptive of the goods or services, and the acronym or initialism is readily understood by relevant purchasers to be “substantially synonymous” with the merely descriptive wording it represents. See *Modern Optics Inc. v. The Univis Lens Co.*, 234 F. 2d 504, 506, 110 USPQ 293, 295 (C.C.P.A. 1956); *Baroness Small Estates, Inc. v. Am. Wine Trade, Inc.*, 104 USPQ2d 1224, 1230-31 (TTAB 2012) (holding CMS not substantially synonymous with the grape varietals cabernet, merlot, and syrah and therefore not merely descriptive for wine); *In re Thomas Nelson, Inc.*, 97 USPQ2d 1712, 1715 (TTAB 2011) (holding NKJV substantially synonymous with merely descriptive term “New King James Version” and thus merely descriptive of bibles). A mark consisting of an abbreviation, initialism, or acronym will be considered substantially synonymous with descriptive wording if: (1) the applied-for mark is an abbreviation, initialism, or acronym for specific wording; (2) the specific wording is merely descriptive of applicant’s goods and/or services; and (3) a relevant consumer viewing the abbreviation, initialism, or acronym in connection with applicant’s goods and/or services will recognize it as an abbreviation, initialism, or acronym of the merely descriptive wording that it represents. See *In re Thomas Nelson, Inc.*, 97 USPQ2d at 1715-16 (citing *In re Harco Corp.*, 220 USPQ 1075, 1076 (TTAB 1984)). Thus, without additional evidence, an applicant’s proprietary use of an acronym is not sufficient to establish that the acronym is readily understood to be

substantially synonymous with the descriptive wording it represents. *Modern Optics*, 234 F.2d 504, 506, 110 USPQ 293, 295 (finding the record unconvincing that CV is a generally recognized term for multifocal lenses and lens blanks). *See also In re BetaBatt Inc.*, 89 USPQ2d 1152 (TTAB 2008) (DEC found to be routinely used as an abbreviation for “direct energy conversion”); *Capital Project Mgmt. Inc. v. IMDISI Inc.*, 70 USPQ2d 1172 (TTAB 2003) (TIA found to be substantially synonymous with “time impact analysis”); *In re The Yacht Exch., Inc.*, 214 USPQ 406 (TTAB 1982) (MLS held descriptive for multiple listing services for yachts and boats); *cf. In re Harco Corp.*, 220 USPQ 1075 (TTAB 1984) (record insufficient to establish that CPL would be commonly understood as no more than an abbreviation of “computerized potential log”).

### 1209.03(i) Intended Users

A term that identifies a group to whom the applicant directs its goods or services is merely descriptive. *See In re Planalytics, Inc.*, 70 USPQ2d 1453 (TTAB 2004) (GASBUYER merely descriptive of risk management services in the field of pricing and purchasing natural gas); *Hunter Publ'g Co. v. Caulfield Publ'g Ltd.*, 1 USPQ2d 1996 (TTAB 1986) (SYSTEMS USER found merely descriptive of a trade journal directed toward users of large data processing systems; evidence sufficient to establish distinctiveness under §2(f)); *In re Camel Mfg. Co., Inc.*, 222 USPQ 1031 (TTAB 1984) (MOUNTAIN CAMPER held merely descriptive of retail mail-order services in the field of outdoor equipment and apparel).

### 1209.03(j) Phonetic Equivalent

A slight misspelling of a word will not turn a descriptive or generic word into a non-descriptive mark. *See In re ING Direct Bancorp*, 100 USPQ2d 1681, 1690 (TTAB 2011) (holding PERSON2PERSON PAYMENT generic for direct electronic funds transfers including electronic payment services between individuals); *In re Carlson*, 91 USPQ2d 1198, 1203 (TTAB 2009) (holding URBANHOUSING, in standard character form, would be perceived by consumers as the equivalent of the descriptive term URBAN HOUSING, rather than as including the separate word ZING); *In re Ginc UK Ltd.*, 90 USPQ2d 1472, 1475 (TTAB 2007) (“The generic meaning of “togs” not overcome by the misspelling of the term as TOGGS. . .”); *In re Hubbard Milling Co.*, 6 USPQ2d 1239 (TTAB 1987) (holding MINERAL-LYX generic for mineral licks for feeding livestock); *C-Thru Ruler Co. v. Needleman*, 190 USPQ 93 (E.D. Pa. 1976) (holding C-THRU to be the equivalent of “see-through” and, therefore, merely descriptive of transparent rulers and drafting aids).

### 1209.03(k) Laudatory Terms

Laudatory terms, those that attribute quality or excellence to goods or services, are merely descriptive under §2(e)(1). *See Duopross Meditech Corp. v. Inviro Medical Devices, Ltd.*, 695 F.3d 1247, 103 USPQ2d 1753, 1759 (Fed. Cir. 2012) (finding SNAP SIMPLY SAFER merely descriptive for “medical devices, namely, cannulae; medical, hypodermic, aspiration and injection needles; medical, hypodermic, aspiration and injection syringes”); *In re Nett Designs Inc.*, 236 F.3d 1339, 57 USPQ2d 1564 (Fed. Cir. 2001) (finding THE ULTIMATE BIKE RACK to be merely descriptive and, therefore, subject to disclaimer); *In re Boston Beer Co. L.P.*, 198 F.3d 1370, 53 USPQ2d 1056 (Fed. Cir. 1999) (finding THE BEST BEER IN AMERICA so highly laudatory and descriptive as applied to beer and ale that it is incapable of acquiring distinctiveness); *In re Positec Group Ltd.*, 108 USPQ2d 1161, 1172 (TTAB 2013) (applying the guidance set forth in *In re Phillips-Van Heusen Corp.*, 63 USPQ2d 1047, 1052 (TTAB 2002), the Board found SUPERJAWS to be merely descriptive for a variety of machine and hand tools including jaws); *In re Phillips-Van Heusen Corp.*, 63 USPQ2d at 1052 (concluding that “if the word ‘super’ is combined with a word which names the goods or services, or a principal component, grade or size thereof, then the composite term is considered merely descriptive of the goods or services, but if such is not strictly true, then the composite mark is regarded as suggestive of the products or services.”); *In re Best Software Inc.*, 58 USPQ2d 1314 (TTAB 2001) (BEST

and PREMIER in mark BEST! SUPPORTPLUS PREMIER merely descriptive of computer consultation and support services and thus subject to disclaimer); *In re Dos Padres Inc.*, 49 USPQ2d 1860 (TTAB 1998) (QUESO QUESADILLA SUPREME merely descriptive of cheese); *Gen. Foods Corp. v. Ralston Purina Co.*, 220 USPQ 990 (TTAB 1984) (ORIGINAL BLEND merely descriptive of cat food).

### 1209.03(l) Telephone Numbers

If an applicant applies to register a designation that consists of a merely descriptive term with numerals in the form of an alphanumeric telephone number (e.g., 800, 888, or 900 followed by a word), the examining attorney must refuse registration under §2(e)(1). See *In re Page*, 51 USPQ2d 1660 (TTAB 1999) (888 PATENTS merely descriptive of patent-related legal services). The fact that a designation is in the form of a telephone number is insufficient, by itself, to render it distinctive.

If the relevant term is merely descriptive, but not generic, the mark may be registered on the Principal Register with a proper showing of acquired distinctiveness under §2(f), or on the Supplemental Register, if appropriate. See *Express Mortg. Brokers Inc. v. Simpson Mortg. Inc.*, 31 USPQ2d 1371, 1374 (E.D. Mich. 1994) (369-CASH held merely descriptive but shown to have acquired distinctiveness as applied to mortgage brokering and mortgage-related services). Of course, the designation must also be used in the manner of a mark. See [TMEP §§1202–1202.16](#) regarding use as a mark.

If the proposed mark is generic, the designation is unregistrable on either the Principal or the Supplemental Register. However, to support a refusal of registration on the ground that a telephone number is generic, the Court of Appeals for the Federal Circuit has held that it is not enough to show that the telephone number consists of a non-source-indicating area code and a generic term. The examining attorney must show evidence of the meaning the relevant purchasing public accords the proposed alphanumeric mark as a whole. *In re Dial-A-Mattress Operating Corp.*, 240 F.3d 1341, 57 USPQ2d 1807, 1811 (Fed. Cir. 2001). See also *Dial-A-Mattress Franchise Corp. v. Page*, 880 F.2d 675, 11 USPQ2d 1644 (2d Cir. 1989) (use of confusingly similar telephone number enjoined). *But see Dranoff-Perlstein Assocs. v. Sklar*, 967 F.2d 852, 857, 23 USPQ2d 1174, 1178 (3d Cir. 1992) (“[W]e decline to adopt the position espoused by the Second Circuit that telephone numbers which correlate to generic terms may be protectible as trademarks.... If telephone numbers that correlate to generic terms were granted protection, the first firm in a given market to obtain such a telephone number would, merely by winning the race to the telephone company, gain an unfair advantage over its competitors.”) (footnotes omitted); *800 Spirits Inc. v. Liquor By Wire, Inc.*, 14 F. Supp. 2d 675 (D.N.J. 1998) (800 SPIRITS generic for “gift delivery service of alcohol beverages”).

### 1209.03(m) Domain Names

A mark comprised of an Internet domain name is registrable as a trademark or service mark only if it functions as an identifier of the source of goods or services. Portions of the uniform resource locator (“URL”), including the beginning, (“http://www.”) and the top-level Internet domain name (“TLD”) (e.g., “.com,” “.org,” “.edu.”) indicate an address on the World Wide Web, and, therefore, generally serve no source-indicating function. See [TMEP §§1215–1215.10](#) for further information.

If a TLD has three or more characters, it is known as a “generic top-level domain” or “gTLD.” However “generic” in this term does not refer to genericness in the trademark sense. The gTLD typically signifies the type of entity using the domain name. For example, the gTLD “.com” signifies to the public that the user of the domain name constitutes a commercial entity, “.edu” signifies an educational institution, “.biz” signifies a business, and “.org” signifies a non-commercial organization. These types of gTLDs, which merely indicate the type of entity using the gTLD, must be treated as non-source-indicating. Further, as the

number of available gTLDs is increased by the Internet Corporation for Assigned Names and Numbers ("ICANN"), or if the nature of new gTLDs changes, the examining attorney must consider any potential source-indicating function of the gTLD and introduce evidence as to the significance of the gTLD. See [TMEP §§1215.02\(d\) 1215.02\(d\)\(iv\)](#) regarding marks comprised solely of gTLDs for domain-name registry operator and registrar services and [www.icann.org](http://www.icann.org) for information about gTLDs. Cf. *In re theDot Commc'ns Network LLC*, 101 USPQ2d 1062, 1067 (TTAB 2011) (finding “.music conveys the commercial impression of a top-level domain name similar to .com, .net, etc.,” and that consumers would understand it to be a TLD in the field of music based on the current marketing environment which included evidence of a concerted effort to obtain TLD status for .music).

Because gTLDs generally indicate the type of entity using a given domain name, and therefore serve no source-indicating function, their addition to an otherwise unregistrable mark typically cannot render it registrable. *In re 1800Mattress.com IP LLC*, 586 F.3d 1359, 92 USPQ2d 1682 (Fed. Cir. 2009) (MATTRESS.COM generic for “online retail store services in the field of mattresses, beds, and bedding,” and applicant “presented no evidence that “.com” evoked anything but a commercial internet domain”); *In re Hotels.com, L.P.*, 573 F.3d 1300, 91 USPQ2d 1532 (Fed. Cir. 2009) (HOTELS.COM generic for “providing information for others about temporary lodging; [and] travel agency services, namely, making reservations and bookings for temporary lodging for others by means of telephone and the global computer network”); *In re Reed Elsevier Properties Inc.*, 482 F.3d 1376, 82 USPQ2d 1378 (Fed. Cir. 2007) (LAWYERS.COM generic for “providing an online interactive database featuring information exchange in the fields of law, legal news and legal services”); *In re Oppedahl & Larson LLP*, 373 F.3d 1171, 71 USPQ2d 1370 (Fed. Cir. 2004) (PATENTS.COM merely descriptive of computer software for managing a database of records and for tracking the status of the records by means of the Internet); *In re Eddie Z's Blinds & Drapery, Inc.*, 74 USPQ2d 1037 (TTAB 2005) (BLINDSANDDRAPERY.COM generic for retail store services featuring blinds, draperies and other wall coverings, sold via the Internet); *In re Microsoft Corp.*, 68 USPQ2d 1195, 1203 (TTAB 2003) (“The combination of the specific term and TLD at issue, i.e., OFFICE and .NET, does not create any double entendre, incongruity, or any other basis upon which we can find the composite any more registrable than its separate elements. The combination immediately informs prospective purchasers that the software includes ‘office suite’ type software and is from an Internet business, i.e., a ‘.net’ type business.”); *In re CyberFinancial.Net, Inc.*, 65 USPQ2d 1789, 1792 (TTAB 2002) (“Applicant seeks to register the generic term ‘bonds,’ which has no source-identifying significance in connection with applicant’s services, in combination with the top level domain indicator “.com,” which also has no source-identifying significance. And combining the two terms does not create a term capable of identifying and distinguishing applicant’s services.”); *In re Martin Container, Inc.*, 65 USPQ2d 1058, 1061 (TTAB 2002) (“[N]either the generic term nor the domain indicator has the capability of functioning as an indication of source, and combining the two does not result in a compound term that has somehow acquired this capability.”).

However, there is no bright-line, per se rule that the addition of a gTLD to an otherwise descriptive mark will never, under any circumstances, operate to create a registrable mark. See *Oppedahl & Larson LLP*, 373 F.3d at 1175, 71 USPQ2d 1374. In rare instances, if the gTLD is capable of indicating a source, the addition of the source-indicating gTLD to an otherwise unregistrable mark may render it registrable.

*Example:* The addition of the TLD “.PETER” to CLOTHES to form the mark CLOTHES.PETER *would* create a registrable mark.

Cf. [TMEP §1215.02\(d\)](#). Additionally, the Federal Circuit has cautioned that in rare, exceptional circumstances, a term that is not distinctive by itself may acquire some additional meaning from the addition of a non-source-indicating gTLD such as “.com” or “.net.” *In re Steelbuilding.com*, 415 F.3d 1293, 1297, 75 USPQ2d 1420, 1422 (Fed. Cir. 2005) (STEELBUILDING.COM for “computerized on line retail services in the field of pre-engineered metal buildings and roofing systems” held highly descriptive, but not generic), citing *Oppedahl & Larson*, 373 F.3d at 1175–1176, 71 USPQ2d at 1373.

Thus, when examining domain-name marks, it is important to evaluate the commercial impression of the mark as a whole to determine whether the gTLD may be capable of source-indicating significance, and whether the composite mark conveys any distinctive source-identifying impression apart from its individual components. The examining attorney must introduce evidence as to the significance of the individual components, including the gTLD, but must also consider the significance of the composite to determine whether the addition of a gTLD has resulted in a mark that conveys a source-identifying impression. *See In re 1800Mattress.com*, 92 USPQ2d 1682 (affirming Board's conclusion that MATTRESS.COM was generic, where the Board considered each of the constituent words "mattress" and ".com" and determined that they were both generic, then considered the mark as a whole and determined that the combination added no new meaning, relying on the prevalence of the term "mattress.com" in the website addresses of several online mattress retailers who provide the same services as the applicant); *In re Hotels.com*, 91 USPQ2d 1532 (HOTELS.COM found generic, where the record contained various definitions of "hotel," printouts from hotel reservation search websites showing "hotels" as the equivalent of or included within "temporary lodging," as well as evidence from applicant's website); *In re DNI Holdings Ltd.*, 77 USPQ2d 1435 (TTAB 2005) (SPORTSBETTING.COM held generic for providing online gaming services and information about sports and gaming, with the Board finding that "applicant's own website uses the expression 'sports betting,' e.g., touting itself as 'the leader in online sports betting' and providing tips on 'sports betting' as a game of skill. Furthermore, as the Trademark Examining Attorney has demonstrated in this record, other entities competing with applicant also use the term 'sports betting' (and 'sportsbetting') in generic fashion in describing their wagering and information services").

See TMEP §§ [1215.04](#) and [1215.05](#) for further discussion of gTLDs combined with descriptive or generic terminology.

### **1209.03(n) "America" or "American"**

If "AMERICA" or "AMERICAN" appears in a phrase or slogan, the examining attorney must evaluate the entire mark to determine whether it is merely descriptive as laudatory or even incapable. *In re Boston Beer Co. L.P.*, 198 F.3d 1370, 53 USPQ2d 1056 (Fed. Cir. 1999) (THE BEST BEER IN AMERICA so highly laudatory and descriptive as applied to beer and ale that it is incapable of acquiring distinctiveness); *In re Carvel Corp.*, 223 USPQ 65 (TTAB 1984) (AMERICA'S FRESHEST ICE CREAM held incapable for ice cream); *In re Wileswood, Inc.*, 201 USPQ 400 (TTAB 1978) (AMERICA'S BEST POPCORN! and AMERICA'S FAVORITE POPCORN! merely descriptive of unpopped popcorn). Typically, these marks primarily extol the quality or popularity of the goods or services and secondarily denote geographic origin. The examining attorney must look at each mark to determine whether it is capable, considering all relevant circumstances and case law.

See [TMEP §1210.02\(b\)\(iv\)](#) and cases cited therein regarding use of terms such as "AMERICA," "AMERICAN," and "USA" in a way that is primarily geographically descriptive under 15 U.S.C. §1052(e)(2), primarily geographically deceptively misdescriptive under 15 U.S.C. §1052(e)(3), or deceptive under 15 U.S.C. §1052(a).

### **1209.03(o) "National," "International," "Global," and "Worldwide"**

The terms "NATIONAL" and "INTERNATIONAL" have been held to be merely descriptive of services that are nationwide or international in scope. *See In re Chamber of Commerce of the U.S.*, 675 F.3d 1297, 102 USPQ2d 1217 (Fed. Cir. 2012) (NATIONAL CHAMBER merely descriptive of nationwide online directory services featuring information regarding local and state chambers of commerce and business and regulatory data analysis services for nationally promoting the interests of businesspersons or industry); *In re Institutional Investor, Inc.*, 229 USPQ 614 (TTAB 1986) (INTERNATIONAL BANKING INSTITUTE

for organizing seminars for bank leaders of major countries held incapable); *In re Billfish Int'l Corp.*, 229 USPQ 152 (TTAB 1986) (BILLFISH INTERNATIONAL CORPORATION merely descriptive of corporation involved with billfish on an international scale); *In re Nat'l Rent A Fence, Inc.*, 220 USPQ 479 (TTAB 1983) (NATIONAL RENT A FENCE merely descriptive of nationwide fence rental services); *BankAmerica Corp. v. Int'l Travelers Cheque Co.*, 205 USPQ 1233 (TTAB 1979) (INTERNATIONAL TRAVELERS CHEQUE merely descriptive of financial consulting services that are international in scope); *Nat'l Fid. Life Ins. v. Nat'l Ins. Trust*, 199 USPQ 691 (TTAB 1978) (NATIONAL INSURANCE TRUST merely descriptive of services of handling administrative matters in locating suitable insurance coverage for attorneys); *Jefferson Bankshares Inc. v. Jefferson Sav. Bank*, 14 USPQ2d 1443, 1447 (W.D. Va. 1989) (NATIONAL BANK merely descriptive of banking services); *Nat'l Auto. Club v. Nat'l Auto Club, Inc.*, 365 F. Supp. 879, 180 USPQ 777 (S.D.N.Y. 1973), *aff'd*, 502 F.2d 1162 (2d Cir. 1974) (NATIONAL merely descriptive of auto club services).

The terms “GLOBAL” and “WORLDWIDE” are also considered to be merely descriptive of services that are global or worldwide in scope.

*Note:* A map of the world or a depiction of a globe generally is not considered the pictorial equivalent of the terms “INTERNATIONAL,” “GLOBAL,” or “WORLDWIDE.”

### **1209.03(p) Function or Purpose**

Terms that identify the function or purpose of a product or service may be merely descriptive under 15 U.S.C. §1052(e)(1) or generic. *See, e.g., In re Gould Paper Corp.*, 834 F.2d 1017, 5 USPQ2d 1110 (Fed. Cir. 1987) (SCREENWIPE held generic for an anti-static cloth used for cleaning computer and television screens); *In re Box Solutions Corp.*, 79 USPQ2d 1953 (TTAB 2006) (SOLUTIONS merely descriptive of the purpose of applicant's computer hardware – to resolve a problem – and must be disclaimed); *In re Hunter Fan Co.*, 78 USPQ2d 1474 (TTAB 2006) (ERGONOMIC held merely descriptive of ceiling fans); *In re Cent. Sprinkler Co.*, 49 USPQ2d 1194 (TTAB 1998) (ATTIC generic for sprinklers installed primarily in attics); *In re Reckitt & Colman, N. Am. Inc.*, 18 USPQ2d 1389 (TTAB 1991) (PERMA PRESS generic for soil and stain removers for use on permanent press products); *In re Wallyball, Inc.*, 222 USPQ 87 (TTAB 1984) (WALLYBALL held descriptive of sports clothing and game equipment); *In re Nat'l Presto Indus., Inc.*, 197 USPQ 188 (TTAB 1977) (BURGER held merely descriptive of cooking utensils); *In re Orleans Wines, Ltd.*, 196 USPQ 516 (TTAB 1977) (BREADSPRED held merely descriptive of jams and jellies).

### **1209.03(q) Source or Provider of Goods or Services**

Terms that identify the source or provider of a product or service may be merely descriptive under 15 U.S.C. §1052(e)(1) or generic. *See, e.g., In re Wm. B. Coleman Co., Inc.*, 93 USPQ2d 2019, 2027 (TTAB 2010) (ELECTRIC CANDLE COMPANY for lighting fixtures “incapable of identifying source for electric candles because it is a term a purchaser would understand and could use to refer to the type of company that sells electric candles, and must be left available for use by other such companies selling electric candles”); *In re Major League Umpires*, 60 USPQ2d 1059 (TTAB 2001) (MAJOR LEAGUE UMPIRE merely descriptive of clothing, face masks, chest protectors, and shin guards); *In re Taylor & Francis [Publishers] Inc.*, 55 USPQ2d 1213 (TTAB 2000) (PSYCHOLOGY PRESS merely descriptive of books in the field of psychology); *In re The Paint Products Co.*, 8 USPQ2d 1863 (TTAB 1988) (PAINT PRODUCTS COMPANY incapable for paint); *In re The Phone Co., Inc.*, 218 USPQ 1027 (TTAB 1983) (THE PHONE COMPANY merely descriptive of telephones). *See also In re Omaha Nat'l Bank*, 819 F.2d 1117, 1119, 2 USPQ2d 1859, 1861 (Fed. Cir. 1987) (rejecting argument that descriptiveness should be limited to a quality or characteristic of the good or service itself and holding that it includes a designation descriptive of the service provider); *cf. In re Chamber of Commerce of the U.S.*, 675 F.3d 1297, 1301-02, 102 USPQ2d 1217, 1220 (Fed. Cir. 2012)

(NATIONAL CHAMBER held descriptive of “traditional chambers of commerce activities” of “promoting the interests of businessmen and businesswomen”).

### 1209.03(r) Retail Store and Distributorship Services

A term that is generic for goods is descriptive of retail store services featuring those goods, when the goods are not a significant item typically sold in the type of store in question. *In re Pencils Inc.*, 9 USPQ2d 1410 (TTAB 1988) (PENCILS held merely descriptive of office supply store services). However, where the matter sought to be registered identifies the primary articles of a store or distributorship service, the term is considered generic. *See, e.g., In re Tires, Tires, Tires, Inc.*, 94 USPQ2d 1153, (TTAB 2009) (TIRES TIRES TIRES generic for retail tire store services); *In re Lens.com, Inc.*, 83 USPQ2d 1444 (TTAB 2007) (LENS generic for “retail store services featuring contact eyewear products rendered via a global computer network”); *In re Eddie Z’s Blinds & Drapery, Inc.*, 74 USPQ2d 1037 (TTAB 2005) (BLINDSANDDRAPERY.COM generic for retail store services featuring blinds, draperies, and other wall coverings, conducted via the Internet); *In re Candy Bouquet Int’l, Inc.*, 73 USPQ2d 1883 (TTAB 2004) (CANDY BOUQUET generic for “retail, mail, and computer order services in the field of gift packages of candy”); *In re A La Vieille Russie, Inc.*, 60 USPQ2d 1895 (TTAB 2001) (RUSSIANART generic for dealership services in the field of fine art, antiques, furniture, and jewelry); *In re Log Cabin Homes Ltd.*, 52 USPQ2d 1206 (TTAB 1999) (LOG CABIN HOMES generic for retail outlets selling kits for building log homes); *In re Bonni Keller Collections Ltd.*, 6 USPQ2d 1224 (TTAB 1987) (LA LINGERIE generic for retail stores specializing in the sale of lingerie); *In re Wickerware, Inc.*, 227 USPQ 970 (TTAB 1985) (WICKERWARE generic for mail order and distributorship services in the field of products made of wicker); *In re Half Price Books, Records, Magazines, Inc.*, 225 USPQ 219 (TTAB 1984) (HALF PRICE BOOKS RECORDS MAGAZINES generic for retail book and record store services).

The examining attorney, therefore, must “analyze the term in relation to the services recited in the application, the context in which it is used and the possible significance it would have to the recipient of the services.” *Pencils*, 9 USPQ2d at 1411.

### 1209.03(s) Slogans

Slogans that are considered to be merely informational in nature, or to be common laudatory phrases or statements that would ordinarily be used in business or in the particular trade or industry, are not registrable. *See In re Boston Beer Co. L.P.*, 198 F.3d 1370, 53 USPQ2d 1056 (Fed. Cir. 1999) (THE BEST BEER IN AMERICA so highly laudatory and descriptive as applied to beer and ale that it is incapable of acquiring distinctiveness). *See also* [TMEP §1202.04](#) and cases cited therein.

### 1209.03(t) Repetition of Descriptive or Generic Term

The mere repetition of a merely descriptive term does not negate the mere descriptiveness of the mark as a whole, unless the combination is such as to create a new and different commercial impression from that which is engendered by the separate components. *See In re Litehouse, Inc.*, 82 USPQ2d 1471 (TTAB 2007) (CAESAR! CAESAR! merely descriptive of salad dressing); *In re Disc Jockeys, Inc.*, 23 USPQ2d 1715 (TTAB 1992) (DJDJ merely descriptive of disc jockey services).

Likewise, a generic term may not be rendered non-generic simply by repeating the term. In finding TIRES TIRES TIRES generic for retail tire store services, the Board held that “[t] here is no valid reason to require an examining attorney to demonstrate that a designation composed solely of a repeating word has been used by others, when the examining attorney has demonstrated that the repeated term is generic and that the

repetition does not result in a designation with a different meaning.” *In re Tires, Tires, Tires, Inc.*, 94 USPQ2d 1153 (TTAB 2009).

### 1209.03(u) Punctuation

The use of a common punctuation mark is not sufficient to negate the mere descriptiveness of a term. *See Duopross Meditech Corp. v. Inviro Medical Devices, Ltd.*, 695 F.3d 1247, 103 USPQ2d 1753, 1757-58 (Fed. Cir. 2012) (finding SNAP!, with a broken exclamation point, merely descriptive of medical syringes using snap-off plungers); *In re Litehouse, Inc.*, 82 USPQ2d 1471 (TTAB 2007) (CAESAR! CAESAR! merely descriptive of salad dressing); *In re Vanilla Gorilla, L.P.*, 80 USPQ2d 1637 (TTAB 2006) (finding that the presence of a hyphen in the mark “3-0’s” does not negate mere descriptiveness of mark for automobile wheel rims); *In re Promo Ink*, 78 USPQ2d 1301, 1305 (TTAB 2006) (finding that the exclamation mark in the mark PARTY AT A DISCOUNT! “simply emphasize[d] the descriptive nature of the mark” for advertising services in the field of private party venues); *In re S.D. Fabrics, Inc.*, 223 USPQ 54 (TTAB 1984), *reopening denied* 223 USPQ 56 (1984) (finding that the presence of a slash in the mark DESIGNERS/FABRIC does not negate mere descriptiveness of mark for retail store services in field of fabrics); *In re Brock Residence Inns, Inc.*, 222 USPQ 920 (TTAB 1984) (FOR A DAY, A WEEK, A MONTH OR MORE! merely descriptive of hotel services); *In re Wileswood, Inc.*, 201 USPQ 400 (TTAB 1978) (AMERICA’S BEST POPCORN! and AMERICA’S FAVORITE POPCORN! merely descriptive of unpopped popcorn); *In re Samuel Moore & Co.*, 195 USPQ 237 (TTAB 1977) (SUPERHOSE! merely descriptive of hydraulic hose made of synthetic resinous material).

### 1209.04 Deceptively Misdescriptive Marks

Section 2(e)(1) of the Trademark Act, 15 U.S.C. §1052(e)(1), also prohibits registration of designations that are deceptively misdescriptive of the goods or services to which they are applied. The examining attorney must consider the mark in relation to the applicant’s goods or services to determine whether a mark is deceptively misdescriptive.

The examining attorney must first determine whether a term is misdescriptive as applied to the goods or services. A term that conveys an immediate idea of an ingredient, quality, characteristic, function, or feature of the goods or services with which it is used is merely descriptive. *See* [TMEP §1209.01\(b\)](#). If a term immediately conveys such an idea but the idea is false, although plausible, then the term is deceptively misdescriptive and is unregistrable under §2(e)(1). *See In re AOP LLC*, 107 USPQ2d 1644 (TTAB 2013) (AOP deceptive, deceptively misdescriptive, or, alternatively, merely descriptive for wine, after the applicant failed to fully respond to the examining attorney’s inquiries regarding the origin and certification of applicant’s goods); *In re Woodward & Lothrop Inc.*, 4 USPQ2d 1412 (TTAB 1987) (CAMEO deceptively misdescriptive of jewelry); *In re Ox-Yoke Originals, Inc.*, 222 USPQ 352 (TTAB 1983) (G.I. deceptively misdescriptive of gun cleaning patches, rods, brushes, solvents, and oils).

The Trademark Act does not prohibit the registration of misdescriptive terms unless they are deceptively misdescriptive, that is, unless persons who encounter the mark, as used on or in connection with the goods or services in question, are likely to believe the misrepresentation. *See Binney & Smith Inc. v. Magic Marker Indus., Inc.*, 222 USPQ 1003 (TTAB 1984) (LIQUID CRAYON held neither common descriptive name, nor merely descriptive, nor deceptively misdescriptive of coloring kits or markers).

As explained in the case of *In re Quady Winery Inc.*, 221 USPQ 1213, 1214 (TTAB 1984):

The test for deceptive misdescriptiveness has two parts. First we must determine if the matter sought to be registered misdescribes the goods. If so, then we must ask if it is also deceptive, that is, if anyone is likely to believe the misrepresentation. *Gold Seal Co. v. Weeks*, 129 F. Supp. 928 (D.D.C. 1955), *aff'd sub nom. S.C. Johnson & Son v. Gold Seal Co.*, 230 F.2d 832 (D.C. Cir.) ( *per curiam*), *cert. denied*, 352 U.S. 829 (1956), *superseded by statute on other grounds as stated in Aktieselskabet AF 21. November 2001 v. Fame Jeans Inc.*, 525 F.3d 8, 86 USPQ2d 1527, 1532 (D.C. Cir. 2008). A third question, used to distinguish between marks that are deceptive under Section 2(a) and marks that are deceptively misdescriptive under Section 2(e)(1), is whether the misrepresentation would materially affect the decision to purchase the goods. *Cf. In re House of Windsor, Inc.*, 221 USPQ 53 (TTAB 1983).

Thus, if the identification of goods/services does not include the wording in the mark, the examining attorney must make of record evidence demonstrating why the mark is misdescriptive. Specifically, the record must show the meaning of the wording at issue and that the identification indicates that the applicant's goods/services lack the feature or characteristic. Examples of such evidence are dictionary definitions, LexisNexis® articles, Internet websites, advertising material, product information sheets, hang tags, point-of-purchase displays, and trade journals. The applicant's admission regarding its goods/services may also satisfy the first prong of the test.

The examining attorney must then prove that the description conveyed by the mark is plausible by demonstrating that consumers regularly encounter goods or services that contain the features or characteristics in the mark. For example, to support the believability element as to the mark LOVEE LAMB for seat covers that were not made of lambskin, the examining attorney provided evidence that seat covers can be and are made from lambskin. *See In re Budge Mfg. Co. Inc.*, 857 F.2d 773, 775, 8 USPQ2d 1259, 1260 (Fed. Cir. 1988). Excerpts from a LexisNexis® search for the phrases “organic clothing,” “organic fabric,” “organically grown cotton,” and “organic cotton” were used to prove that consumers were familiar with clothing and textiles from organically grown plants or plants free of chemical processing or treatment. *See In re Organik Techs., Inc.*, 41 USPQ2d 1690, 1693–94 (TTAB 1997). Applicant's own hang tags, labels, advertising, and product information may also provide evidence of the believability of the misdescription. *See In re Shapely, Inc.*, 231 USPQ 72, 75 (TTAB 1986) (concluding that statements on hangtags can be used to show the materiality of the misrepresentation in the purchasing decision); *Evans Products Co. v. Boise Cascade Corp.*, 218 USPQ 160, 164–5 (TTAB 1983) (finding that applicant's advertising materials and affidavit indicated that it did attempt to “adopt a mark [CEDAR RIDGE] which conveyed the impression of authentic cedar”).

If the misdescription represented by the mark is material to the decision to purchase the goods or use the services, then the mark must be refused registration under §2(a) of the Trademark Act, 15 U.S.C. §1052(a). See [TMPEP §1203.02](#) regarding deceptive marks, [TMPEP §1203.02\(c\)](#) regarding the distinction between deceptive marks and deceptively misdescriptive marks, and [TMPEP §§1203.02\(d\)–1203.02\(d\)\(ii\)](#) regarding determining materiality.

The examining attorney should consider and make of record, or require the applicant to make of record, all available information that shows the presence or absence, and the materiality, of a misrepresentation. *See Glendale Int'l Corp. v. United States Patent & Trademark Office*, 374 F. Supp. 2d 479, 486, 75 USPQ2d 1139, 1144 (E.D. VA 2005) (TITANIUM deceptively misdescriptive of recreational vehicles that do not contain titanium, where the examining attorney made of record articles which showed that titanium is a lightweight metal, and discussed the use or potential use of titanium in the automotive industry).

The mere fact that the true nature of the goods or services is revealed by other matter on the labels, advertisements, or other materials to which the mark is applied does not preclude a determination that a

mark is deceptively misdescriptive. *See R. Neumann & Co. v. Overseas Shipments, Inc.*, 326 F.2d 786, 790, 140 USPQ 276, 279 (C.C.P.A. 1964) (DURA-HYDE held deceptive and deceptively misdescriptive of plastic material of leather-like appearance made into shoes regardless of the presence of tags stating that the material “outwears leather”); *In re Shniberg*, 79 USPQ2d 1309, 1313 (TTAB 2006) (SEPTEMBER 11, 2001 held deceptively misdescriptive of books and entertainment services which did not in any way cover the terrorist attacks of September 11, 2001; the fact that the nature of the misdescription would become known after consumers studied applicant’s books and entertainment services does not prevent the mark from being deceptively misdescriptive).

*See also In re ALP of South Beach Inc.*, 79 USPQ2d 1009 (TTAB 2006) (holding that pre-sale deception may occur without a sale taking place based on the deception); *Nw. Golf Co. v. Acushnet Co.*, 226 USPQ 240 (TTAB 1985) (finding deception unlikely given alternative meanings of the mark and that even cursory curiosity on the part of consumers would avoid any potential deception); *R.J. Reynolds Tobacco Co. v. Brown & Williamson Tobacco Corp.*, 226 USPQ 169 (TTAB 1985) (NEW LOOK not likely to deceive consumers into believing that “cigarettes” will actually offer anything like a “new look”); and *Am. Speech-Language-Hearing Ass’n v. Nat’l Hearing Aid Soc’y*, 224 USPQ 798 (TTAB 1984) (CERTIFIED HEARING AID AUDIOLOGIST held deceptive in that it implies the user of the mark is a certified audiologist) regarding the issue of deceptive misdescriptiveness.

Marks that have been refused registration pursuant to §2(e)(1) on the ground of deceptive misdescriptiveness may be registrable under §2(f) upon a showing of acquired distinctiveness, or on the Supplemental Register if appropriate. 15 U.S.C. §§1052(f) and 1091. Similarly, marks that contain registrable matter in addition to deceptively misdescriptive components can be registered with a disclaimer of the deceptively misdescriptive matter, when appropriate. *See* [TMEP §1213.03\(a\)](#). Marks that are deceptive under §2(a) are not registrable on either the Principal Register or the Supplemental Register under any circumstances.

## 1210 Refusal on Basis of Geographic Significance

### *15 U.S.C. §1052 (Extract)*

No trademark by which the goods of the applicant may be distinguished from the goods of others shall be refused registration on the principal register on account of its nature unless it—

(a) Consists of or comprises ... deceptive ... matter;... or a geographical indication which, when used on or in connection with wines or spirits, identifies a place other than the origin of the goods and is first used on or in connection with wines or spirits by the applicant on or after [January 1, 1996]...

(e) Consists of a mark which ... (2) when used on or in connection with the goods of the applicant is primarily geographically descriptive of them, except as indications of regional origin may be registrable under section 1054 of this title, (3) when used on or in connection with the goods of the applicant is primarily geographically deceptively misdescriptive of them....

Section 2(e)(2) of the Trademark Act, 15 U.S.C. §1052(e)(2), prohibits registration on the Principal Register of a mark that is primarily geographically descriptive of the goods or services named in the application. *See* [TMEP §1210.01\(a\)](#).

Section 2(e)(3) of the Trademark Act, 15 U.S.C. §1052(e)(3), prohibits registration of a mark that is primarily geographically deceptively misdescriptive of the goods or services named in the application. *See* [TMEP §1210.01\(b\)](#). Prior to the amendment of the Trademark Act on January 1, 1994, by the North American Free Trade Agreement (“NAFTA”) Implementation Act, Public Law 103-182, 107 Stat. 2057, the statutory basis for refusal to register primarily geographically deceptively misdescriptive marks was §2(e)(2).

Section 2(a) of the Trademark Act, 15 U.S.C. §1052(a), prohibits registration of a designation that consists of or comprises deceptive matter, as well as geographical indications which, when used on or in connection

with wines or spirits, identify a place other than the origin of the goods. See [TMPEP §§1210.01\(c\)](#) and [1210.08](#).

See [TMPEP §1210.05\(c\)](#) regarding the distinction between marks that are primarily geographically deceptively misdescriptive under §2(e)(3) and marks that are deceptive under §2(a).

## 1210.01 Elements

### 1210.01(a) Geographically Descriptive Marks – Test

To establish a prima facie case for refusal to register a mark as primarily geographically descriptive, the examining attorney must show that:

- (1) the primary significance of the mark is a generally known geographic location ( see [TMPEP §§1210.02–1210.02\(b\)\(iv\)](#));
- (2) the goods or services originate in the place identified in the mark ( see [TMPEP §1210.03](#)); and
- (3) purchasers would be likely to believe that the goods or services originate in the geographic place identified in the mark ( see [TMPEP §§1210.04–1210.04\(d\)](#)). *Note:* If the mark is remote or obscure, the public is unlikely to make a goods/place or services/place association ( see [TMPEP §1210.04\(c\)](#)).

### 1210.01(b) Geographically Deceptively Misdescriptive Marks – Test

To support a refusal to register a mark as primarily geographically deceptively misdescriptive, the examining attorney must show that:

- (1) the primary significance of the mark is a generally known geographic location ( see [TMPEP §§1210.02–1210.02\(b\)\(iv\)](#));
- (2) the goods or services do not originate in the place identified in the mark ( see [TMPEP §1210.03](#));
- (3) purchasers would be likely to believe that the goods or services originate in the geographic place identified in the mark ( see [TMPEP §§1210.04–1210.04\(d\)](#)). *Note:* If the mark is remote or obscure, the public is unlikely to make a goods/place or services/place association ( see [TMPEP §1210.04\(c\)](#)); and
- (4) the misrepresentation is a material factor in a significant portion of the relevant consumer’s decision to buy the goods or use the services ( see [TMPEP §§1210.05\(c\)–\(c\)\(ii\)](#)).

*In re Miracle Tuesday, LLC*, 695 F.3d 1339, 1343, 104 USPQ2d 1330, 1332 (Fed. Cir. 2012); *In re Spirits Int’l, N.V.*, 563 F.3d 1347, 1350–54, 90 USPQ2d 1489, 1490–95 (Fed. Cir. 2009); *In re Les Halles De Paris J.V.*, 334 F.3d 1371, 67 USPQ2d 1539 (Fed. Cir. 2003); *In re Cal. Innovations Inc.*, 329 F.3d 1334, 66 USPQ2d 1853 (Fed. Cir. 2003), *reh’g denied*, 2003 U.S. App. LEXIS 18883 (Fed. Cir. Aug. 20, 2003).

Prior to the amendment of the Trademark Act by the NAFTA Implementation Act, it was not necessary to show that the misrepresentation was likely to be a material factor in the consumer’s decision to buy the goods or use the services in order to establish that a mark was primarily geographically deceptively misdescriptive. However, in *California Innovations*, the Court of Appeals for the Federal Circuit held that in view of the NAFTA amendments, a showing of public deception is required to establish that a mark is unregistrable under §2(e)(3). *Cal. Innovations*, 329 F.3d at 1339, 66 USPQ2d at 1856.

See [TMPEP §1210.05\(c\)](#) for further information regarding the distinction between marks comprising deceptive matter under §2(a) and marks comprising primarily geographically deceptively misdescriptive matter under §2(e)(3), and [TMPEP §§1210.05\(c\)–1210.05\(c\)\(ii\)](#) regarding the showing that a misrepresentation of the origin of the goods or services is likely to affect the purchaser’s decision to buy the goods or use the services.

### 1210.01(c) Geographically Deceptive Marks – Test

As noted in [TMPEP §1210.05\(a\)](#), the test for determining whether a mark is primarily geographically deceptively misdescriptive under §2(e)(3) is the same as the test for determining whether a mark is deceptive under §2(a). To support a refusal of registration on the ground that a geographic term is deceptive under §2(a), the examining attorney must show that:

- (1) the primary significance of the mark is a generally known geographic location ( *see* [TMPEP §§1210.02–1210.02\(b\)\(iv\)](#));
- (2) the goods or services do not originate in the place named in the mark ( *see* [TMPEP §1210.03](#));
- (3) purchasers would be likely to believe that the goods or services originate in the geographic place identified in the mark ( *see* [TMPEP §§1210.04–1210.04\(d\)](#)). *Note:* If the mark is remote or obscure, the public is unlikely to make a goods/place or services/place association ( *see* [TMPEP §1210.04\(c\)](#)); and
- (4) the misrepresentation is a material factor in a significant portion of the relevant consumer’s decision to buy the goods or use the services ( *see* [TMPEP §§1210.05\(c\)–\(c\)\(ii\)](#)).

*In re Miracle Tuesday, LLC*, 695 F.3d 1339, 1343, 104 USPQ2d 1330, 1332 (Fed. Cir. 2012); *In re Spirits Int’l, N.V.*, 563 F.3d 1347, 1350–54, 90 USPQ2d 1489, 1490–95 (Fed. Cir. 2009); *Institut Nat’l des Appellations D’Origine v. Vintners Int’l Co., Inc.*, 958 F.2d 1574, 1580, 22 USPQ2d 1190, 1195 (Fed. Cir. 1992), *reh’g denied*, No. 91-1332, 1992 U.S. App. LEXIS 8514 (Fed. Cir. 1992); *In re House of Windsor, Inc.*, 221 USPQ 53 (TTAB 1983), *recon. denied*, 223 USPQ 191 (TTAB 1984). *See also In re Cal. Innovations Inc.*, 329 F.3d 1334, 66 USPQ2d 1853 (Fed. Cir. 2003), *reh’g denied*, 2003 U.S. App. LEXIS 18883 (Fed. Cir. Aug. 20, 2003).

See [TMPEP §1210.05\(a\)](#) for further information regarding the distinction between marks comprising deceptive matter under §2(a) and marks comprising primarily geographically deceptively misdescriptive matter under §2(e)(3), and [TMPEP §§1210.05\(c\)–\(c\)\(ii\)](#) regarding the showing that a misrepresentation of the origin of the goods or services is likely to affect the purchaser’s decision to buy the goods or use the services.

### 1210.02 Primarily Geographic Significance

The significance of a mark is primarily geographic if it identifies a real and significant geographic location and the primary meaning of the mark is the geographic meaning.

#### 1210.02(a) Geographic Locations

A geographic location may be any term identifying a country, city, state, continent, locality, region, area, or street.

*Region.* A particular, identifiable region (e.g. , “Midwest” or “Mid-Atlantic”) is a geographic location. *In re Pan-O-Gold Baking Co.*, 20 USPQ2d 1761 (TTAB 1991) (holding that the primary significance of “New England” is geographic). On the other hand, vague geographic terms (e.g. , “Global,” “National,”

“International,” or “World”) are *not* considered to be primarily geographic, though they may be merely descriptive or deceptively misdescriptive under §2(e)(1). See [TMEP §1209.03\(o\)](#).

*Nicknames.* A geographic nickname (e.g., “Big Apple” or “Motown”), or an abbreviation or other variant of the name of a geographic location, is treated the same as the actual name of the geographic location, if it is likely to be perceived as such by the purchasing public. See *In re Spirits of New Merced, LLC*, 85 USPQ2d 1614 (TTAB 2007) (holding that “Yosemite” – a well recognized and frequently used shorthand reference to Yosemite National Park and the Yosemite region in general – conveys a readily recognizable geographic significance); *In re Carolina Apparel*, 48 USPQ2d 1542 (TTAB 1998) (CAROLINA APPAREL primarily geographically descriptive of retail clothing store services, where the evidence showed that “Carolina” is used to indicate either the state of North Carolina or the state of South Carolina). *But see In re Trans Cont'l Records, Inc.*, 62 USPQ2d 1541 (TTAB 2002) (O-TOWN found to be a “relatively obscure term” that would *not* be perceived by a significant portion of the purchasing public as a geographic reference to Orlando, Florida).

*Adjectives.* The adjectival form of the name of a geographic location is considered primarily geographic if it is likely to be perceived as such by the purchasing public. See *In re Joint-Stock Co. “Baik,”* 80 USPQ2d 1305 (TTAB 2006) (BAIKALSKAYA – the Russian equivalent of “from Baikal” or “Baikal’s” – held primarily geographically descriptive of vodka); *In re Jack’s Hi-Grade Foods, Inc.*, 226 USPQ 1028 (TTAB 1985) (NEAPOLITAN held primarily geographically deceptively misdescriptive of sausage emanating from the United States, where the term is defined as “of or pertaining to Naples in Italy”); *In re BankAmerica Corp.*, 231 USPQ 873 (TTAB 1986) (BANK OF AMERICA held primarily geographically descriptive).

*Maps.* A map or outline of a geographic area is also treated the same as the actual name of the geographic location if it is likely to be perceived as such. See *In re Canada Dry Ginger Ale, Inc.*, 86 F.2d 830, 32 USPQ 49 (C.C.P.A. 1936) (map of Canada held to be the equivalent of the word “Canada”). *But see In re Texsun Tire & Battery Stores, Inc.*, 229 USPQ 227, 229 (TTAB 1986) (holding that if the depiction of a map is fanciful or so integrated with other elements of a mark that it forms a unitary whole, then the map should not be considered primarily geographically descriptive).

*Coined Locations.* The mere fact that a term may be the name of a place that has a physical location does not necessarily make that term geographic under §2(e)(2). For example, names of amusement parks, residential communities, and business complexes which are coined by the applicant, must not be refused. *In re Pebble Beach Co.*, 19 USPQ2d 1687 (TTAB 1991) (17 MILE DRIVE not a geographic term, where it refers to a specific location wholly owned by applicant, and was coined by applicant to refer both to applicant’s services and the place where the services were performed).

## 1210.02(b) Primary Significance

To support a refusal to register geographic matter, the Trademark Act requires that the mark be *primarily* geographic, that is, that its primary significance be that of a geographic location. 15 U.S.C. §§1052(e)(2) and (3). See, e.g., *In re Wada*, 194 F.3d 1297, 52 USPQ2d 1539 (Fed. Cir. 1999) (NEW YORK held to have primarily geographic significance; Court was not persuaded by assertions that the composite NEW YORK WAYS GALLERY evokes a gallery that features New York “ways” or “styles”); *In re Societe Generale des Eaux Minerales de Vittel S.A.*, 824 F.2d 957, 3 USPQ2d 1450 (Fed. Cir. 1987) (evidence insufficient to establish that public in United States would perceive VITTEL as the name of a place where cosmetic products originate; Vittel, France found to be obscure); *In re Cheezwhse.com, Inc.*, 85 USPQ2d 1917 (TTAB 2008) (NORMANDIE CAMEMBERT, with CAMEMBERT disclaimed, held primarily geographically descriptive of cheese because NORMANDIE is the French spelling for Normandy, consumers would recognize NORMANDIE as the equivalent of Normandy, the primary significance of Normandy is

a known geographic place in France, and CAMEMBERT is generic for applicant's goods; Board was not persuaded that the primary significance of NORMANDIE was the ocean liner SS Normandie); *In re Cotter & Co.*, 228 USPQ 202 (TTAB 1985) (the primary significance of WESTPOINT is as the name of the United States Military Academy rather than the town in New York).

The fact that the proposed mark has meaning or usage other than as a geographic term does not necessarily alter its primarily geographic significance. See [TMPEP §§1210.02\(b\)\(i\)–1210.02\(b\)\(i\)](#).

When a geographic term is combined with additional matter (e.g., wording and/or a design element), the examining attorney must determine the primary significance of the composite. See [TMPEP §§1210.02\(c\)–1210.02\(c\)\(iii\)](#).

See [TMPEP §1210.04\(c\)](#) regarding obscure or remote geographic marks.

### 1210.02(b)(i) Other Meanings

The fact that the mark has meaning or usage other than as a geographic term does not necessarily alter its primarily geographic significance. Thus, if a geographic term has another meaning, the examining attorney must determine whether the *primary* significance is geographic. If so, registration must be refused under §2(e)(2), §2(e)(3), or §2(a). See, e.g., *In re Opryland USA Inc.*, 1 USPQ2d 1409 (TTAB 1986) (THE NASHVILLE NETWORK held primarily geographically descriptive of television program production and distribution services, the Board finding that the primary significance of the term was Nashville, Tennessee, and not that of a style of music); *In re Cookie Kitchen, Inc.*, 228 USPQ 873, 874 (TTAB 1986) (the fact that MANHATTAN identifies an alcoholic cocktail does not alter the primary significance of that term as a borough of New York City); *In re Jack's Hi-Grade Foods, Inc.*, 226 USPQ 1028, 1029 (TTAB 1985) (finding that the fact that NEAPOLITAN identifies, among other things, a type of ice cream, does not alter the primary significance of that term as meaning "of or pertaining to Naples in Italy").

However, if the most prominent meaning or significance of the mark is not geographic, or if the mark creates a separate readily understood meaning that is not geographic, registration must not be refused under §2(e)(2), §2(e)(3), or §2(a). See *Hyde Park Clothes, Inc. v. Hyde Park Fashions, Inc.*, 93 USPQ 250 (S.D.N.Y. 1951), *aff'd*, 204 F.2d 223, 97 USPQ 246 (2d Cir. 1953), *cert. denied*, 346 U.S. 827, 99 USPQ 491 (1953) (holding that the primary significance of HYDE PARK for men's suits is to suggest that the product is stylish or of high quality rather than to provide information about geographic origin); *In re Int'l Taste Inc.*, 53 USPQ2d 1604, 1605–06 (TTAB 2000) (finding doubt as to the primary significance of HOLLYWOOD because of other prominent, significant meaning of HOLLYWOOD as referring to the entertainment industry in general, with the doubt resolved in favor of the applicant); *In re Urbano*, 51 USPQ2d 1776, 1780 (TTAB 1999) (finding the primary significance of SYDNEY 2000, used for advertising, business, and communication services, is as a reference to the Olympic Games, not to the name of a place); *In re Jim Crockett Promotions Inc.*, 5 USPQ2d 1455, 1456 (TTAB 1987) (finding that the primary significance of THE GREAT AMERICAN BASH for promoting, producing, and presenting professional wrestling matches, is to suggest something of desirable quality or excellence rather than to describe the geographic origin of the services); *In re Dixie Ins. Co.*, 223 USPQ 514, 516 (TTAB 1984) (DIXIE held not primarily geographically descriptive of property

and casualty underwriting services, where the examining attorney provided no evidence to show that the geographical significance of DIXIE was its primary significance).

### **1210.02(b)(i)(A) Surname Significance**

A term's geographic significance may not be its primary significance if the term also has surname significance. *See In re Hamilton Pharm. Ltd.*, 27 USPQ2d 1939, 1943 (TTAB 1993) (HAMILTON held primarily merely a surname, even though the term had some geographical connotations); *In re Colt Indus. Operating Corp.*, 195 USPQ 75 (TTAB 1977) (FAIRBANKS held not primarily merely a surname because the geographical significance of the mark was determined to be just as dominant as its surname significance).

### **1210.02(b)(ii) More Than One Geographic Location With Same Name**

The fact that the mark identifies more than one geographic location does not necessarily detract from the term's primary geographic significance. *See, e.g., In re Loew's Theatres, Inc.*, 769 F.2d 764, 226 USPQ 865 (Fed. Cir. 1985) (DURANGO held primarily geographically deceptively misdescriptive of chewing tobacco not grown in Durango, Mexico, where the evidence of record showed that tobacco is a crop produced and marketed in that area, even though there is more than one place named Durango); *In re Cambridge Digital Sys.*, 1 USPQ2d 1659, 1662 (TTAB 1986) (CAMBRIDGE DIGITAL and design held primarily geographically descriptive of computer systems and parts thereof, where applicant's place of business is Cambridge, Massachusetts, even though there is more than one Cambridge).

### **1210.02(b)(iii) Non-Geographic Characteristics of Goods or Services**

Geographic matter may serve to designate a kind or type of goods or services, or to indicate a style or design that is a feature of the goods or services, rather than to indicate their geographic origin. For example, the geographic components in terms such as "dotted swiss," "Boston baked beans," "Swiss cheese," "Early American design," and "Italian spaghetti" are not understood as indicating the geographic origin of the goods but, rather, a particular type or style of product (regardless of where the product is produced). *See Forschner Grp. Inc. v. Arrow Trading Co. Inc.*, 30 F.3d 348, 356, 31 USPQ2d 1614, 1619 (2d Cir. 1994), *aff'd*, 124 F.3d 402, 43 USPQ2d 1942 (2d Cir. 1997) (finding that SWISS ARMY KNIFE refers to a knife used by the Swiss Army, not an Army Knife from Switzerland); *Institut Nat'l des Appellations D'Origine v. Vintners Int'l Co., Inc.*, 958 F.2d 1574, 1580, 22 USPQ2d 1190, 1195 (Fed. Cir. 1992) (finding evidence showing that Chablis is the name of a region in France insufficient to establish that CHABLIS WITH A TWIST is geographically deceptive of wine under §2(a), where evidence showed that the term "Chablis" would be perceived by consumers in the United States as the generic name for a type of wine with the general characteristics of French chablis); *Hyde Park Clothes, Inc. v. Hyde Park Fashions, Inc.*, 93 USPQ 250 (S.D.N.Y. 1951), *aff'd*, 204 F.2d 223, 97 USPQ 246 (2d Cir. 1953), *cert. denied*, 346 U.S. 827, 99 USPQ 491 (1953) (primary significance of HYDE PARK for men's suits is to suggest that the product is stylish or of high quality rather than to provide information about geographic origin).

When geographic terms are used in circumstances in which it is clear that they are meant to convey some meaning other than geographic origin, registration must not be refused on the basis of geographical descriptiveness or misdescriptiveness. However, there may be some other basis for refusal; for example, the terms may be merely descriptive or deceptively misdescriptive of the goods or services under §2(e)(1) of the Act, 15 U.S.C. §1052(e)(1). *In re MBNA Am. Bank, N.A.*, 340 F.3d 1328, 67 USPQ2d 1778 (Fed. Cir. 2003), *reh'g denied*, 2004 U.S. App. LEXIS 2187 (Fed. Cir. Jan. 12, 2004) (MONTANA SERIES and PHILADELPHIA SERIES are merely descriptive of "credit card services featuring credit cards depicting scenes or subject matter of, or relating to" the places named in the marks); *In re Cox Enters. Inc.*, 82 USPQ2d

1040 (TTAB 2007) (applicant's mark, THEATL, is simply a compressed version of the term "THE ATL," which is a nickname for the city of Atlanta, and is merely descriptive of the subject matter of applicant's publications); *In re Busch Entm't Corp.*, 60 USPQ2d 1130 (TTAB 2000) (EGYPT merely descriptive of subject matter or motif of amusement park services). See [TMEP §§1209–1209.04](#) regarding marks that are merely descriptive or deceptively misdescriptive under §2(e)(1).

In rare circumstances, it may be unclear whether the primary significance of the term is geographic or merely descriptive or deceptively misdescriptive. In such cases, the examining attorney may refuse registration on both grounds, in the alternative.

### 1210.02(b)(iv) "America" or "American" and Similar Terms in Marks

When terms such as "AMERICA," "AMERICAN," and "USA" appear in marks, determining whether the term or the entire mark should be considered geographic can be particularly difficult. There is no simple or mechanical answer to the question of how to treat "AMERICA" or "AMERICAN" in a mark. The examining attorney must evaluate each mark on a case-by-case basis. The examining attorney must consider the entire context, the type of goods or services at issue, the geographic origin of the goods or services and, most importantly, the overall commercial impression engendered by the mark at issue. The following principles, developed in the case law, should provide guidance in reaching a judgment in a given case.

- (1) If "AMERICA" or "AMERICAN" is used in a way that primarily denotes the United States origin of the goods or services, then the term is primarily geographically descriptive. *See, e.g., Am. Diabetes Ass'n, Inc. v. Nat'l Diabetes Ass'n*, 533 F. Supp. 16, 214 USPQ 231 (E.D. Pa. 1981), *aff'd*, 681 F.2d 804 (3d Cir. 1982) (AMERICAN DIABETES ASSOCIATION held primarily geographically descriptive); *In re Monograms Am., Inc.*, 51 USPQ2d 1317 (TTAB 1999) (MONOGRAMS AMERICA primarily geographically descriptive of consultation services for owners of monogramming shops); *In re BankAmerica Corp.*, 231 USPQ 873 (TTAB 1986) (BANK OF AMERICA held primarily geographically descriptive); *Am. Paper & Plastic Products, Inc. v. Am. Automatic Vending Corp.*, 152 USPQ 117 (TTAB 1966) (AMERICAN AUTOMATIC VENDING held primarily geographically descriptive). One commentator refers to such marks as exhibiting an "unadorned" use of "AMERICA" or "AMERICAN." J. Thomas McCarthy, *McCarthy on Trademarks and Unfair Competition*, §14:11 (4th ed. 2006). Many service marks (e.g., association-type marks) fall squarely into this category. *See, e.g., In re U.S. Cargo, Inc.*, 49 USPQ2d 1702 (TTAB 1998) (U.S. CARGO primarily geographically descriptive of towable trailers carrying cargo and vehicles).
- (2) If a composite mark does not primarily convey geographic significance overall, or if "AMERICA" or "AMERICAN" is used in a nebulous or suggestive manner, then it is inappropriate to treat "AMERICA" or "AMERICAN" as primarily geographically descriptive. *See, e.g., Hamilton-Brown Shoe Co. v. Wolf Bros. & Co.*, 240 U.S. 251 (1916) (THE AMERICAN GIRL held not primarily geographically descriptive for shoes); *Am. Plan Corp. v. State Loan & Fin. Corp.*, 365 F.2d 635, 150 USPQ 767 (3d Cir. 1966), *cert. denied*, 385 U.S. 1011, 152 USPQ 844 (1967) (AMERICAN PLAN CORPORATION held not primarily geographically descriptive for insurance brokerage services); *Wilco Co. v. Automatic Radio Mfg. Co., Inc.*, 255 F. Supp. 625, 151 USPQ 24 (D. Mass. 1966) (ALL AMERICAN held not primarily geographically descriptive); *In re Jim Crockett Promotions Inc.*, 5 USPQ2d 1455 (TTAB 1987) (THE GREAT AMERICAN BASH held not primarily geographically descriptive of wrestling exhibitions). The introduction of a nuance, even a subtle one, may remove a mark from the primarily geographically descriptive category. This area calls for the most difficult analysis. The examining attorney must determine whether the overall commercial impression is something other than primarily geographic – for example, due to double meanings or shades of suggestive meanings.

- (3) If “AMERICA” or “AMERICAN” is used in virtually any manner with goods or services that are not from the United States, then the examining attorney should determine whether the term is primarily geographically deceptively misdescriptive under §2(e)(3) and/or deceptive under §2(a). *See, e.g., Singer Mfg. Co. v. Birginal-Bigsby Corp.*, 319 F.2d 273, 138 USPQ 63 (C.C.P.A. 1963) (AMERICAN BEAUTY held primarily geographically deceptively misdescriptive when used on Japanese-made sewing machines); *In re Biessecci S.p.A.*, 12 USPQ2d 1149 (TTAB 1989) (AMERICAN SYSTEM and design, with a disclaimer of AMERICAN, held deceptive for clothing manufactured in Italy). *Cf. In re Salem China Co.*, 157 USPQ 600 (TTAB 1968) (AMERICAN LIMOGES held deceptive under §2(a) when used on china not made in Limoges, France). In this situation, even marks that arguably convey a non-geographic commercial impression must be viewed with great skepticism.
- (4) If “AMERICA” or “AMERICAN” appears in a phrase or slogan, the examining attorney must evaluate the entire mark to determine whether it is merely descriptive as laudatory, or even incapable. *In re Boston Beer Co. L.P.*, 198 F.3d 1370, 53 USPQ2d 1056 (Fed. Cir. 1999) (THE BEST BEER IN AMERICA so highly laudatory and descriptive as applied to beer and ale that it is incapable of acquiring distinctiveness); *In re Carvel Corp.*, 223 USPQ 65 (TTAB 1984) (AMERICA’S FRESHEST ICE CREAM held incapable); *In re Wileswood, Inc.*, 201 USPQ 400 (TTAB 1978) (AMERICA’S BEST POPCORN! and AMERICA’S FAVORITE POPCORN! held merely descriptive of unpopped popcorn); *Kotzin v. Levi Strauss & Co.*, 111 USPQ 161 (Comm’r Pats. 1956) (AMERICA’S FINEST JEANS and AMERICA’S FINEST for overalls held not confusingly similar and incapable by inference). Typically these marks primarily extol the quality or popularity of the goods or services and secondarily denote geographic origin. See [TMEP §1209.03\(n\)](#) regarding use of terms such as “AMERICA” and “AMERICAN” in a way that is merely descriptive or generic.

### 1210.02(c) Geographic Terms Combined With Additional Matter

A geographic composite mark is one composed of geographic matter coupled with additional matter (e.g., wording and/or a design element). When examining such a mark, the examining attorney must determine the primary significance of the composite. *See In re Save Venice New York Inc.*, 259 F.3d 1346, 59 USPQ2d 1778 (Fed. Cir. 2001) (THE VENICE COLLECTION and SAVE VENICE INC. with an image of the winged Lion of St. Mark, for various goods, held primarily geographically deceptively misdescriptive of products that do not originate in Venice, Italy); *In re Wada*, 194 F.3d 1297, 52 USPQ2d 1539 (Fed. Cir. 1999) (NEW YORK WAYS GALLERY, with a disclaimer of NEW YORK, held primarily geographically deceptively misdescriptive of backpacks, handbags, purses, and similar items); *In re Bacardi & Co. Ltd.*, 48 USPQ2d 1031 (TTAB 1997) (HAVANA SELECT, HABANA CLASICO, OLD HAVANA, HAVANA PRIMO, and HAVANA CLIPPER primarily geographically deceptively misdescriptive of rum); *In re Perry Mfg. Co.*, 12 USPQ2d 1751 (TTAB 1989) (PERRY NEW YORK and design, with a disclaimer of NEW YORK, held deceptive for various items of clothing that originate in North Carolina, and have no connection with New York, because of the renown of New York in the apparel industry); *In re Biessecci S.p.A.*, 12 USPQ2d 1149 (TTAB 1989) (AMERICAN SYSTEM and design of running man, for clothing manufactured in Italy, held deceptive).

See [TMEP §§1210.06–1210.06\(b\)](#) regarding the procedure for examining geographic composites.

### 1210.02(c)(i) Two Geographic Terms Combined

When two geographic terms are combined in the same mark, the primary significance of the composite may still be geographic, if purchasers would believe that the goods/services originate from or are rendered in both of the locations named in the mark. *See In re Narada Productions, Inc.*, 57 USPQ2d 1801, 1803 (TTAB

2001) (CUBA L.A. primarily geographically deceptively misdescriptive of musical recordings and live musical performances that do not originate in Cuba or Los Angeles, the Board finding that purchasers would understand the composite as a reference to the two places named rather than to “some mythical place called ‘Cuba L.A.’”); *In re London & Edinburgh Ins. Grp. Ltd.*, 36 USPQ2d 1367 (TTAB 1995) (LONDON & EDINBURGH INSURANCE primarily geographically descriptive of insurance and underwriting services that are rendered or originate in the cities of London and Edinburgh).

Repeating a geographical term does not alter the geographical significance of that term. *In re Juleigh Jeans Sportswear Inc.*, 24 USPQ2d 1694 (TTAB 1992) (LONDON LONDON held deceptive for clothing having no connection with London, given the renown of London as a center for contemporary as well as traditional fashions).

### **1210.02(c)(ii) Geographic Terms Combined With Descriptive or Generic Matter**

Generally, the addition of a highly descriptive or generic term to the name of a geographic place does not alter its primarily geographic significance. *In re Cheezwhse.com, Inc.*, 85 USPQ2d 1917 (TTAB 2008) (NORMANDIE CAMEMBERT with CAMEMBERT disclaimed, held primarily geographically descriptive of cheese because Normandy, France was famous for cheese and the Board presumed that the goods would originate there since applicant failed to submit information about the origin of the goods); *In re JT Tobacconists*, 59 USPQ2d 1080 (TTAB 2001) (MINNESOTA CIGAR COMPANY primarily geographically descriptive of cigars); *In re Carolina Apparel*, 48 USPQ2d 1542 (TTAB 1998) (CAROLINA APPAREL primarily geographically descriptive of retail clothing store services); *In re Chalk’s Int’l Airlines Inc.*, 21 USPQ2d 1637 (TTAB 1991) (PARADISE ISLAND AIRLINES held primarily geographically descriptive of the transportation of passengers and goods by air, because the applicant’s services included flights to and from Paradise Island, Bahamas, even though the flights were not based there); *In re Wine Soc’y of Am. Inc.*, 12 USPQ2d 1139 (TTAB 1989) (THE WINE SOCIETY OF AMERICA held primarily geographically descriptive of wine club membership services); *In re Cal. Pizza Kitchen Inc.*, 10 USPQ2d 1704 (TTAB 1988) (CALIFORNIA PIZZA KITCHEN, with a disclaimer of PIZZA KITCHEN, held primarily geographically descriptive of restaurant services); *In re Cambridge Digital Sys.*, 1 USPQ2d 1659 (TTAB 1986) (CAMBRIDGE DIGITAL and design, with DIGITAL disclaimed, held primarily geographically descriptive of computer systems and parts thereof).

### **1210.02(c)(iii) Arbitrary, Fanciful, or Suggestive Composites**

If, when viewed as a whole, a composite mark would not be likely to be perceived as identifying the geographic origin of the goods or services (i.e., the mark as a whole is not primarily geographically descriptive, primarily geographically deceptively misdescriptive, or deceptive), then the mark is regarded as arbitrary, fanciful, or suggestive. *See In re Sharky’s Drygoods Co.*, 23 USPQ2d 1061 (TTAB 1992) (PARIS BEACH CLUB, applied to T-shirts and sweatshirts, not deceptive under §2(a), the Board reasoning that because Paris is not located on an ocean or lake, and does not have a beach, the juxtaposition of “Paris” with “Beach Club” results in an incongruous phrase which purchasers would view as a humorous mark, a take off on the fact that Paris is known for haute couture. Thus, purchasers would not expect T-shirts and sweatshirts to originate in the city of Paris).

### **1210.03 Geographic Origin of the Goods or Services**

The question of whether a term is primarily geographically descriptive under §2(e)(2), primarily geographically deceptively misdescriptive under §2(e)(3), or geographically deceptive under §2(a) depends on whether the mark identifies the place from which the goods or services originate. Goods or services may

be said to “originate” from a geographic location if, for example, they are manufactured, produced, or sold there. *See Fred Hayman Beverly Hills Inc. v. Jacques Bernier Inc.*, 38 USPQ2d 1691 (TTAB 1996) (RODEO DRIVE held primarily geographically deceptively misdescriptive of perfume, where opposer’s evidence showed that a significant number of Rodeo Drive retailers sell “prestige” fragrances, and that the public would be likely to make the requisite goods/place association between perfume and Rodeo Drive). *Cf. In re Jacques Bernier Inc.*, 894 F.2d 389, 13 USPQ2d 1725 (Fed. Cir. 1990) (RODEO DRIVE held not primarily geographically deceptively misdescriptive of perfume because of the lack of persuasive evidence of a goods/place association in the ex parte record).

A geographic designation for a large city (e.g., Washington, D.C., Boston, San Francisco) may include locations in the metropolitan area.

A wide variety of factors must be considered in determining the origin of a product or service. For example, a product might be found to originate from a place if the main component or ingredient is made in that place. *See In re Joint-Stock Co. “Baik,”* 80 USPQ2d 1305 (TTAB 2006) (BAIKALSKAYA – the Russian equivalent of “from Baikal” or “Baikal’s” – held primarily geographically descriptive of vodka, where the record showed that applicant was located in Irkutsk, Russia, a city near Lake Baikal, and that applicant’s vodka is made from the water of Lake Baikal). However, the fact that a product may have been produced in a geographic style under the direction of someone trained from that geographic place is not a sufficient connection to deem the goods originate from there. *See In re Compania de Licores Internacionales S.A.*, 102 USPQ2d 1841, 1850 (TTAB 2012) (holding OLD HAVANA primarily geographically deceptively misdescriptive for rum despite applicant’s arguments including that the rum was produced in a “Cuban” or “Havanese” style under the direction of someone trained in Cuba and that purchasers know the rum could not come from Cuba because of the embargo). The relevant inquiry is whether there is a connection between the goods and the place named in the mark. *See In re Miracle Tuesday, LLC*, 695 F.3d 1339, 1343, 104 USPQ2d 1330, 1332 (Fed. Cir. 2012) (holding that the fact that the designer of applicant’s products lived in Paris more than 25 years before was insufficient to establish that goods now marketed under JPK PARIS 75, and design, originated there).

Goods and services do not always originate in the applicant’s place of business. *See In re Mankovitz*, 90 USPQ2d 1246 (TTAB 2009) (THE MONTECITO DIET held *not* primarily geographically descriptive of printed publications, on-line journals, or information services in the fields of health, nutrition, illness prevention, detoxification, and diet and lifestyle choices, the Board finding that there was “no connection between Montecito and applicant’s goods and services other than applicant’s address”); *In re John Harvey & Sons Ltd.*, 32 USPQ2d 1451, 1455 (TTAB 1994) (HARVEYS BRISTOL CREAM not primarily geographically descriptive of cakes flavored with sherry wine, the Board finding that neither applicant’s sherry wines nor applicant’s cakes come from Bristol, England, where “the only connection appears to be that applicant’s headquarters are located there and that applicant’s sherry wine was bottled there at one time”); *In re Nantucket Allserve Inc.*, 28 USPQ2d 1144 (TTAB 1993) (NANTUCKET NECTARS held primarily geographically descriptive of soft drinks, even though the goods were manufactured elsewhere, where the record showed that applicant’s headquarters and research and development division were on Nantucket; the distributor of the goods was located on Nantucket; the goods were sold in the applicant’s store on Nantucket; and the specimens were labels that bore a picture of Nantucket, stated that the goods were “born” or “created” on Nantucket, and mentioned no other geographic location); *In re Chalk’s Int’l Airlines Inc.*, 21 USPQ2d 1637 (TTAB 1991) (PARADISE ISLAND AIRLINES held primarily geographically descriptive of the transportation of passengers and goods by air, because the applicant’s services included flights to and from Paradise Island, Bahamas, even though the flights were not based there); *In re Fortune Star Products Corp.*, 217 USPQ 277 (TTAB 1982) (NIPPON held not deceptive of, *inter alia*, radios and televisions because, although the applicant is an American corporation, the goods are made in Japan.)

When the goods or services may be said to originate both in the geographic place named in the mark and outside that place, registration will normally be refused on the ground that the mark is primarily geographically descriptive under §2(e)(2) of the Trademark Act. *In re Cal. Pizza Kitchen Inc.*, 10 USPQ2d 1704, 1706 n.2 (TTAB 1988) (CALIFORNIA PIZZA KITCHEN for restaurant services held primarily geographically descriptive, where the services were rendered both in California and elsewhere).

If it is unclear where the goods/services originate or will originate, the examining attorney may refuse registration under both §§2(e)(2) and 2(e)(3), in the alternative. The examining attorney must inquire where the goods/services originate or will originate, pursuant to 37 C.F.R. §2.61(b)) ( *see* [TMEP §814](#)). *See In re Cheezwhse.com, Inc.*, 85 USPQ2d 1917, 1919 (TTAB 2008), (affirming alternative refusals of NORMANDIE CAMEMBERT for cheese under both §§2(e)(2) and 2(e)(3), as well as a refusal based on the applicant's failure to comply with the examining attorney's requirement for information as to the geographic origin of the goods under 37 C.F.R. §2.61(b)). The Board stated that "our findings with respect to the substantive Section 2(e)(2) refusal include a presumption, unfavorable to applicant, that applicant's goods in fact originate or will originate in or from the place named in the mark. Similarly with respect to the alternative Section 2(e)(3) refusal, we alternatively presume, unfavorably to applicant, that applicant's goods do not or will not originate in or from the place named in the mark").

#### **1210.04 Goods/Place or Services/Place Association**

Refusal of registration under §2(e)(2), §2(e)(3), or §2(a) requires that there be a goods/place or services/place association such that the public is likely to believe that the goods or services originate in the place identified in the mark.

To show that there is a goods/place or services/place association, the examining attorney may provide such evidence as excerpts from telephone directories, gazetteers, encyclopedias, geographic dictionaries, the LexisNexis® database, or the results of an Internet search.

The examining attorney should also examine the specimen(s) and any other evidence in the record that shows the context in which the applicant's mark is used. *See In re Broyhill Furniture Indus., Inc.*, 60 USPQ2d 1511, 1517 (TTAB 2001) (finding that applicant's point of purchase display catalogs "foster a goods/place association between its furniture and Tuscany by referring to 'Europe's Mediterranean coast' and 'European sensibility'"); and *In re Nantucket Allserve Inc.*, 28 USPQ2d 1144, 1146 (TTAB 1993) (finding that applicant's product labels bore a picture of Nantucket, stated that the goods were "born" or "created" on Nantucket and "[embody] the wholesome quality of the Island whose name they bear," and mentioned no other geographic location). Note, however, that evidence other than the mark found on a specimen, which provides further information as to source, does not negate the geographic deceptive misdescriptiveness that may be conveyed by the mark itself. *In re Premiere Distillery, LLC*, 103 USPQ2d 1483, 1486-87 (TTAB 2012); *In re Compania de Licores Internacionales S.A.*, 102 USPQ2d 1841, 1848-49 (TTAB 2012) (finding the statements "brand," "Cuban Style Rum," and "Product of the USA" on applicant's label do not negate the primary geographically deceptive misdescriptiveness of the OLD HAVANA mark).

When the geographic significance of a term is its primary significance and the geographic place is neither obscure nor remote, for purposes of §2(e)(2), the goods/place or services/place association may ordinarily be presumed from the fact that the applicant's goods or services originate ( *see* [TMEP §1210.03](#)) in or near the place named in the mark. *In re Spirits of New Merced, LLC*, 85 USPQ2d 1614, 1621 (TTAB 2007) (YOSEMITE BEER held geographically descriptive of beer produced and sold in a brewpub in Merced, California, the Board stating that "[s]ince the goods originate at or near [Yosemite National Park], we can presume an association of applicant's beer with the park."); *In re Joint-Stock Co. "Baik,"* 80 USPQ2d 1305 (TTAB 2006) (BAIKALSKAYA – the Russian equivalent of from Baikal" or "Baikal's" – held primarily

geographically descriptive of vodka made from water piped from Lake Baikal, the Board presuming a goods/place association “because applicant is located near Lake Baikal, in the city of Irkutsk.”); *In re JT Tobacconists*, 59 USPQ2d 1080 (TTAB 2001) (MINNESOTA CIGAR COMPANY held primarily geographically descriptive of cigars); *In re U.S. Cargo, Inc.*, 49 USPQ2d 1702 (TTAB 1998) (U.S. CARGO primarily geographically descriptive of towable trailers carrying cargo and vehicles); *In re Carolina Apparel*, 48 USPQ2d 1542 (TTAB 1998) (CAROLINA APPAREL primarily geographically descriptive of retail clothing store services); *In re Chalk’s Int’l Airlines Inc.*, 21 USPQ2d 1637 (TTAB 1991) (PARADISE ISLAND AIRLINES held primarily geographically descriptive of the transportation of passengers and goods by air, because the applicant’s services included flights to and from Paradise Island, Bahamas, even though the flights were not based there); *In re Cal. Pizza Kitchen Inc.*, 10 USPQ2d 1704 (TTAB 1988) (CALIFORNIA PIZZA KITCHEN held primarily geographically descriptive of restaurant services that originate in California); *In re Handler Fenton Westerns, Inc.*, 214 USPQ 848 (TTAB 1982) (DENVER WESTERNS held primarily geographically descriptive of western-style shirts originating in Denver).

This presumption is rebuttable. See [TMPEP §1210.04\(c\)](#) regarding obscure or remote places, and [TMPEP §§1210.02–1210.02\(c\)\(iii\)](#) regarding the primary significance of a geographic term.

It is more difficult to establish a services/place association than a goods/place association when making a refusal under §§2(e)(3) and 2(a). *In re Les Halles De Paris J.V.*, 334 F.3d 1371, 1374, 67 USPQ2d 1539, 1542 (Fed. Cir. 2003). See [TMPEP §1210.04\(a\)](#) regarding establishment of a goods/place association, and [TMPEP §1210.04\(b\)](#) regarding establishment of a services/place association.

### **1210.04(a) Establishing Goods/Place Association**

To establish a goods/place association, it is not necessary to show that the place identified in the mark is well known or noted for the goods. *In re Les Halles De Paris J.V.*, 334 F.3d 1371, 1374, 67 USPQ2d 1539, 1541 (Fed. Cir. 2003) (“[T]he goods-place association often requires little more than a showing that the consumer identifies the place as a known source of the product.”). See *In re Miracle Tuesday, LLC*, 695 F.3d 1339, 1344, 104 USPQ2d 1330, 1333 (Fed. Cir. 2012) (JPK PARIS 75 and design held primarily geographically deceptively misdescriptive of fashion accessories that do not originate in Paris where it is undisputed that Paris is famous for such products); *In re Save Venice New York Inc.*, 259 F.3d 1346, 59 USPQ2d 1778 (Fed. Cir. 2001) (THE VENICE COLLECTION and SAVE VENICE INC. composite marks featuring an image of the winged Lion of St. Mark held primarily geographically deceptively misdescriptive of products that do not originate in Venice, Italy, where an encyclopedia and a gazetteer showed that Venice was a large metropolitan area where fine art objects, glassware, and decorative items had been made and sold for centuries, and a popular tourist destination); *In re Wada*, 194 F.3d 1297, 52 USPQ2d 1539 (Fed. Cir. 1999) (NEW YORK WAYS GALLERY held primarily geographically deceptively misdescriptive where manufacturing listings and Nexis® excerpts showed that handbags and luggage are designed and manufactured in New York); *In re Loew’s Theatres, Inc.*, 769 F.2d 764, 226 USPQ 865 (Fed. Cir. 1985) (finding evidence from a gazetteer and dictionary showing that tobacco is a crop produced and marketed in Durango, Mexico sufficient to establish a prima facie goods/place association); *In re Joint-Stock Co. “Baik,”* 80 USPQ2d 1305 (TTAB 2006) (BAIKALSKAYA held primarily geographically descriptive of vodka where record the showed that applicant is located in Irkutsk, Russia, a city near Lake Baikal and one of the main export regions of Russian vodka, applicant’s vodka is made from water piped directly from Lake Baikal, Lake Baikal is the world’s largest fresh water lake, and there are numerous references to “Baikal” in publications from various cities throughout the United States and in national publications); *In re Broyhill Furniture Indus., Inc.*, 60 USPQ2d 1511, 1516-17 (TTAB 2001) (finding evidence that Tuscany, Italy is an important industrial center that produces a variety of products including furniture, and that several businesses advertise the sale of furniture from Tuscany on the Internet, was sufficient to establish a goods/place association between Tuscany and furniture, even though Tuscany is not famous for its furniture); *In re Boyd*

*Gaming Corp.*, 57 USPQ2d 1944 (TTAB 2000) (HAVANA RESORT & CASINO and ROYAL HAVANA RESORT & CASINO held primarily geographically deceptively misdescriptive of wearing apparel, beauty products and perfume that do not come from Havana, Cuba, where the record showed that Havana produces a variety of goods, including clothing and cosmetic items); *In re Bacardi & Co. Ltd.*, 48 USPQ2d 1031 (TTAB 1997) (HAVANA SELECT, HABANA CLASICO, OLD HAVANA, HAVANA PRIMO, and HAVANA CLIPPER all held primarily geographically deceptively misdescriptive of rum that does not originate in Havana, Cuba, where the evidence showed that Havana is a major city and rum is a significant product).

In *Save Venice*, the court noted that in the modern marketing context, geographic regions that are noted for certain products or services are likely to expand from their traditional goods or services into related goods or services, and that this would be expected by consumers. Accordingly, the court held that “the registrability of a geographic mark may be measured against the public’s association of that region with both its traditional goods and any related goods or services that the public is likely to believe originate there.” 259 F.3d at 1355, 59 USPQ2d at 1784.

However, a showing that the geographic place is known to the public and could be the source of the goods or services may not be enough in itself to establish a goods/place or services/place association in all cases.

See *In re Mankovitz*, 90 USPQ2d 1246 (TTAB 2009) (THE MONTECITO DIET held *not* primarily geographically descriptive and the evidence of a goods/place or services/place association, consisting only of the fact that the applicant lived in Montecito, found insufficient, the Board stating that “it would be speculation on our part to reach the conclusion that the goods or services originate there or that the public would understand that there is a goods/place relationship”); *In re John Harvey & Sons Ltd.*, 32 USPQ2d 1451 (TTAB 1994) (HARVEYS BRISTOL CREAM not primarily geographically descriptive of cakes flavored with sherry wine, the Board finding evidence that applicant’s headquarters are located in Bristol, England and that applicant’s sherry wine was once bottled there insufficient to show that American consumers are likely to think that “Bristol” refers to a place from which the goods originate); *In re Gale Hayman Inc.*, 15 USPQ2d 1478 (TTAB 1990) (SUNSET BOULEVARD held not primarily geographically descriptive of perfume and cologne, the Board holding that the mere fact that applicant’s principal offices are in Century City, close to Sunset Boulevard does not mandate a finding that a goods/place association should be presumed, determining that the public would not make a goods/place association, and noting that there was no evidence that any perfume or cologne is manufactured or produced on Sunset Boulevard or that applicant’s goods are sold there); *Philip Morris Inc. v. Reemtsma Cigarettenfabriken GmbH*, 14 USPQ2d 1487 (TTAB 1990) (PARK AVENUE held neither deceptive nor geographically deceptively misdescriptive as applied to cigarettes and smoking tobacco, the Board finding no goods/place association between tobacco products and Park Avenue in New York City, on which opposer’s world headquarters was located); *In re Venice Maid Co., Inc.*, 222 USPQ 618, 619 (TTAB 1984) (VENICE MAID held *not* primarily geographically deceptively misdescriptive of canned foods, including, *inter alia*, lasagna and spaghetti, where the evidence of a goods/place association was found insufficient, the Board stating that “we are unwilling to sustain the refusal to register in this case simply on the basis that Venice is a large Italian city that could, conceivably, be the source of a wide range of goods, including canned foods”).

The question of whether there is a goods/place association is determined on a case-by-case basis, based on the evidence in the record. Compare *Fred Hayman Beverly Hills Inc. v. Jacques Bernier Inc.*, 38 USPQ2d 1691 (TTAB 1996) (RODEO DRIVE held primarily geographically deceptively misdescriptive of perfume, where opposer’s evidence showed that a significant number of Rodeo Drive retailers sell “prestige” fragrances, and that the public would be likely to make the requisite goods/place association between perfume and Rodeo Drive) with *In re Jacques Bernier Inc.*, 894 F.2d 389, 13 USPQ2d 1725 (Fed. Cir. 1990) (RODEO

DRIVE held not primarily geographically deceptively misdescriptive of perfume because of the lack of persuasive evidence of a goods/place association in the ex parte record).

### **1210.04(b) Establishing Services/Place Association**

It is more difficult, with respect to refusals under §§2(a) and 2(e)(3), to establish a services/place association than a goods/place association. The Court of Appeals for the Federal Circuit has provided the following guidance for refusals under §2(e)(3):

Application of the second prong of this test – the services-place association – requires some consideration. A customer typically receives services, particularly in the restaurant business, at the location of the business. Having chosen to come to that place for the services, the customer is well aware of the geographic location of the service. This choice necessarily implies that the customer is less likely to associate the services with the geographic location invoked by the mark rather than the geographic location of the service, such as a restaurant. In this case, the customer is less likely to identify the services with a region of Paris when sitting in a restaurant in New York.

[T]he services-place association operates somewhat differently than a goods-place association.... In a case involving goods, the goods-place association often requires little more than a showing that the consumer identifies the place as a known source of the product [citations omitted]. Thus, to make a goods-place association, the case law permits an inference that the consumer associates the product with the geographic location in the mark because that place is known for producing the product. [citation omitted] In the case of a services-place association, however, a mere showing that the geographic location in the mark is known for performing the service is not sufficient. Rather the second prong of the test requires some additional reason for the consumer to associate the services with the geographic location invoked by the mark. See *In re Mun. Capital Mkts., Corp.*, 51 USPQ2d 1369, 1370–71 (TTAB 1999) (“Examining Attorney must present evidence that does something more than merely establish that services as ubiquitous as restaurant services are offered in the pertinent geographic location.”). Thus, a services-place association in a case dealing with restaurant services ... requires a showing that the patrons of the restaurant are likely to believe the restaurant services have their origin in the location indicated by the mark. In other words, to refuse registration under section 2(e)(3), the PTO must show that patrons will likely be misled to make some meaningful connection between the restaurant (the service) and the relevant place.

For example, the PTO might find a services-place association if the record shows that patrons, though sitting in New York, would believe the food served by the restaurant was imported from Paris, or that the chefs in New York received specialized training in the region in Paris, or that the New York menu is identical to a known Parisian menu, or some other heightened association between the services and the relevant place....

*In re Les Halles De Paris J.V.*, 334 F.3d 1371, 1373–74, 67 USPQ2d 1539, 1541–42 (Fed. Cir. 2003) (LE MARAIS held not primarily geographically deceptively misdescriptive of restaurant services. Evidence that “Le Marais” was a fashionable Jewish area in Paris was insufficient to establish that the public would believe that “Le Marais” was the source of New York restaurant services featuring a kosher cuisine).

What constitutes a “heightened association” between the services and the place will vary depending on the nature of the services. There may be situations where the fact that the geographic location is known or famous for performing the service would be sufficient to establish a services/place association (e.g., “Texas” for cattle breeding services).

The burden is greater for restaurant services, due to their ubiquitous nature. *In re Consol. Specialty Rests., Inc.*, 71 USPQ2d 1921 (TTAB 2004) (COLORADO STEAKHOUSE and design held primarily geographically deceptively misdescriptive of restaurant services). In *Consol. Specialty Rests.*, the Board found that the examining attorney had established an “additional reason” why purchasers would mistakenly believe that the food served in the restaurant was from Colorado, where the record contained the following evidence: gazetteer and dictionary definitions of “Colorado” and “steakhouse;” a United States Department of Agriculture report on cattle inventory; stories excerpted from the LexisNexis® database; and Internet excerpts showing that Colorado was one of the 11 top cattle states in the United States, that Colorado was known for its steaks, that “Colorado steaks” are featured food items in restaurants outside the state, and that politicians from Colorado use “Colorado steaks” as the basis for wagers on sporting events. *Id.* at 1927-28.

### 1210.04(c) Obscure or Remote Geographic Marks

Geographic matter may be so obscure or remote that it would not be recognized as an indication of the geographic source of the goods or services. In such a case, the mark is treated as an arbitrary designation because its geographic meaning is likely to be lost on consumers. Thus, consumers will not perceive the geographic significance of the term as its primary significance and will not make a goods/place or services/place association. See *In re Brouwerij Nacional Balashi NV*, 80 USPQ2d 1820, 1827 (TTAB 2006) (finding Balashi, Aruba so obscure or remote that purchasers in the United States would not recognize it as indicating the geographical source of applicant’s beer); *ConAgra Inc. v. Saavedra*, 4 USPQ2d 1245 (TTAB 1987) (TAPATIO held not primarily geographically deceptively misdescriptive of meatless hot sauce, despite the fact that the mark is a Spanish term meaning “of or pertaining to Guadalajara, Mexico” and the goods did not originate from Guadalajara, the Board finding that the significance of the term is lost on the public because of its obscurity); *In re Bavaria St. Pauli Brauerei AG*, 222 USPQ 926 (TTAB 1984) (reversing examining attorney’s requirement for disclaimer of “JEVER” in application to register JEVER and design for beer originating in Jever, West Germany, where the sole evidence of a goods/place association was an entry from a 32-year-old geographic index); *In re Brauerei Aying Franz Inselkammer KG*, 217 USPQ 73 (TTAB 1983) (AYINGER BIER (“BIER” disclaimed) held not primarily geographically descriptive of beer emanating from Aying, West Germany, a hamlet of 500 inhabitants, where the examining attorney’s only evidence of a goods/place association was the specimen label identifying Aying as the place of origin).

Remoteness or obscurity is determined from the perspective of the average American consumer. See *In re Societe Generale des Eaux Minerales de Vittel, S.A.*, 824 F.2d 957, 3 USPQ2d 1450 (Fed. Cir. 1987) (VITTEL and design held not primarily geographically descriptive of cosmetic products because of lack of goods/place association between the goods and the applicant’s place of business in Vittel, France). However, the examining attorney does not necessarily have to show that the nationwide general public would associate the mark with the place. The significance of the term is determined not in the abstract, but from the point of view of the consumers of the particular goods or services identified in the application. *In re MCO Properties Inc.*, 38 USPQ2d 1154 (TTAB 1995) (FOUNTAIN HILLS held primarily geographically descriptive of real estate development services rendered in Fountain Hills, Arizona, where the record showed that Fountain Hills was the name of the town where the applicant was located and rendered its services, and that the purchasers who came in contact with the mark would associate that place with the services).

### 1210.04(d) Arbitrary Use of Geographic Terms

The name of a geographic location that has no significant relation to commercial activities or the production of the relevant goods or services, such as ALASKA for bananas, is treated as an arbitrary mark because it is unlikely that consumers would believe that the mark identifies the place from which the goods originate.

Often, names of mountains or rivers are arbitrary for goods because no commercial activity is performed there. For example, “Colorado River” for candy bars or “Mount Rushmore” for automobiles would be arbitrary. *See In re Nantucket, Inc.*, 677 F.2d 95, 105, 213 USPQ 889, 897 (C.C.P.A. 1982) (Nies, J., concurring) (“Thus, the names of places devoid of commercial activity are arbitrary usage. In this category are names of places such as ANTARCTICA, MOUNT EVEREST, or GALAPAGOS, at least when used for ordinary commercial products, such as beer and shoes. Names such as SUN, WORLD, GLOBE, MARS, or MILKY WAY are also arbitrary, not informational; competitors do not need to use the terms to compete effectively.”).

## 1210.05 Geographically Deceptive Marks

### 1210.05(a) Basis for Refusal

*Past Practice.* Prior to the amendment of the Trademark Act by the NAFTA Implementation Act, the test for determining whether a mark was primarily geographically deceptively misdescriptive under §2(e)(3) of the Trademark Act differed from the test for determining whether a mark was deceptive under §2(a) of the Act, 15 U.S.C. §1052(a). To establish that a mark was primarily geographically deceptively misdescriptive under §2(e)(3), the examining attorney had to show that the primary significance of the mark was geographic, that purchasers would be likely to believe that the goods or services originated in the place named in the mark, and that the goods or services did not originate in that place. *In re Nantucket, Inc.*, 677 F.2d 95, 213 USPQ 889 (C.C.P.A. 1982). An additional showing of “materiality” was required to establish that a mark was deceptive under §2(a), i.e., a showing that a goods/place or services/place association made by purchasers was “material” to the decision to purchase the goods or services. *Bureau Nat’l Interprofessionnel Du Cognac v. Int’l Better Drinks Corp.*, 6 USPQ2d 1610 (TTAB 1988); *In re House of Windsor, Inc.*, 221 USPQ 53 (TTAB 1983), *recon. denied*, 223 USPQ 191 (TTAB 1984).

*Current Practice.* The Court of Appeals for the Federal Circuit has held that with the NAFTA amendments, §2 of the Act “no longer treats geographically deceptively misdescriptive marks differently from geographically deceptive marks,” and that a showing of public deception is required to establish that a mark is unregistrable under §2(e)(3). *In re Cal. Innovations Inc.*, 329 F.3d 1334, 1339, 66 USPQ2d 1853, 1856 (Fed. Cir. 2003), *reh’g denied*, 2003 U.S. App. LEXIS 18883 (Fed. Cir. Aug. 20, 2003). Thus, the test for determining whether, post-NAFTA, a mark is primarily geographically deceptively misdescriptive under §2(e)(3) is now the same as the test for determining whether a mark is deceptive under §2(a). *Id.*, 329 F.3d at 1340, 66 USPQ2d at 1857.

### 1210.05(b) Elements of a §2(e)(3) Refusal

Accordingly, the elements of a refusal under Trademark Act §2(e)(3) are as follows:

- (1) The primary significance of the mark is a generally known geographic location;
- (2) The goods or services do not originate in the place identified in the mark;
- (3) Purchasers would be likely to believe that the goods or services originate in the geographic place identified in the mark; and
- (4) The misrepresentation would be a material factor in a significant portion of the relevant consumers’ decision to buy the goods or use the services.

*See In re Miracle Tuesday LLC*, 695 F.3d 1339, 1343, 104 USPQ2d 1330, 1332 (Fed. Cir. 2012); *In re Spirits Int’l, N.V.*, 563 F.3d 1347, 1350–54, 90 USPQ2d 1489, 1490–95 (Fed. Cir. 2009); *Cal. Innovations*, 329 F.3d at 1341; 66 USPQ2d at 1858.

The determination of whether the primary significance of the mark is a generally known geographic location can be made “by showing that the mark in question consists of or incorporates a term that denotes a geographical location which is neither obscure nor remote.” *In re Sharky's Drygoods Co.*, 23 USPQ2d 1061, 1062 (TTAB 1992). See TMEP §1210.06 regarding procedures for examining geographic composite marks and TMEP §1210.06(b) regarding primarily geographically deceptively misdescriptive and deceptive composites. Thus, the focus is on whether the term in question is primarily geographic in the context of the mark, rather than on whether the geographic reference dominates the mark.

Often, the record is clear that neither the applicant nor the goods/services originate from the place named in the mark. In other cases, although the applicant may not come from the place named, it is not clear whether the goods/service originate in that place. In either situation, after determining that the primary significance of the mark is a generally known geographic location, and that there is a goods/place or services/place association such that the public is likely to believe that the goods or services originate in the place identified in the mark, the examining attorney must then determine whether a geographically deceptively misdescriptive refusal would be warranted. At this point, the assessment turns on materiality – that is, whether a known or possible misdescription in the mark would affect a substantial portion of the relevant consumers’ decision to purchase the goods/services.

In cases under the doctrine of foreign equivalents, where the place name in the mark appears in a foreign language, the requirement that a substantial portion of the relevant consuming public would likely be deceived raises special issues. To make a determination about “a substantial portion” in such cases, the examining attorney must consider whether the foreign language place name would be recognizable as such to consumers who do not speak the foreign language, and/or whether consumers who speak the foreign language could constitute a substantial portion of the relevant consumers (e.g., because they are the “target audience”). *Spirits*, 563 F.3d at 1353, 90 USPQ2d at 1493; *see Corporacion Habanos, S.A. v. Guantanamera Cigars Co.*, 102 USPQ2d 1085, 1097 (TTAB 2012).

### **1210.05(c) Determining Materiality**

To establish that a geographic term is primarily geographically deceptively misdescriptive under 15 U.S.C. §1052(e)(3) or deceptive under §2(a), it must be shown that the goods/place or services/place association made by a consumer is material to the consumer’s decision to purchase those goods/services. *In re Cal. Innovations Inc.*, 329 F.3d 1334, 1340, 66 USPQ2d 1853, 1856 (Fed. Cir. 2003), *reh’g denied*, 2003 U.S. App. LEXIS 18883 (Fed. Cir. Aug. 20, 2003).

#### **1210.05(c)(i) Materiality In Cases Involving Goods**

In determining “materiality,” the Board has stated that it looks to evidence regarding the probable reaction of purchasers to a particular geographical term when it is applied to particular goods. *See In re House of Windsor, Inc.*, 221 USPQ 53, 56 (TTAB 1983), *recon. denied*, 223 USPQ 191 (TTAB 1984). Materiality may be established inferentially based on indirect evidence such as gazetteer entries and third-party websites. *See Corporacion Habanos, S.A. v. Guantanamera Cigars Co.*, 102 USPQ2d 1085, 1098 (TTAB 2012). If the evidence shows that the geographical area named in the mark is sufficiently known to lead purchasers to make a goods/place association, but the record does not show that the relevant goods are a principal product of that geographical area, the deception will most likely be found not to be material. If, however, there is evidence that the relevant goods, or related goods, are a principal product of the geographical area named by the mark, then the deception will most likely be found to be material.

Furthermore, evidence that a place is famous as a source of the goods at issue raises an inference in favor of materiality. *In re Compania de Licores Internacionales S.A.*, 102 USPQ2d 1841, 1850 (TTAB 2012); *see In re Les Halles De Paris J.V.*, 334 F.3d 1371, 1374, 67 USPQ2d 1539, 1542 (Fed. Cir. 2003). Such evidence supports a presumption that a substantial portion of the relevant consumers is likely to be deceived.

Thus, to establish the materiality element for goods, the evidence must show that:

- The place named in the mark is famous as a source of the goods at issue;
- The goods in question are a principal product of the place named in the mark; or
- The goods are, or are related to, the traditional products of the place named in the mark, or are an expansion of the traditional products of the place named in the mark.

*See Cal. Innovations*, 329 F.3d at 1340, 66 USPQ2d at 1857; *In re Save Venice N.Y., Inc.*, 259 F.3d 1346, 1355, 59 USPQ2d 1778, 1784 (Fed. Cir. 2001); *Compania de Licores Internacionales*, 102 USPQ2d at 1850; *House of Windsor*, 221 USPQ at 57.

Searches that combine the place name with the name of the goods and terms such as “famous,” “renowned,” “well-known,” “noted for,” “principal,” or “traditional” may be useful to establish materiality. *Compania de Licores Internacionales*, 102 USPQ2d at 1850.

Note that in *U.S. Playing Card Co. v. Harbro, LLC*, 81 USPQ2d 1537, 1542 (TTAB 2006), the Board held that the mark VEGAS was *not* primarily geographically deceptively misdescriptive of playing cards that do not originate in Las Vegas, finding that the opposer failed to establish that the misleading goods/place association would be a material factor in the customer’s decision to purchase the goods. The Board rejected opposer’s argument that it had met the materiality factor by proving that there is a market for cancelled casino cards from Las Vegas casinos, stating that “[a]lthough the evidence demonstrates that consumers are interested in obtaining cards that were used in casinos, the evidence does not establish that they are interested in purchasing playing cards that were manufactured or used in Las Vegas.” The Board also disagreed with opposer’s contention that the goods/place association between Las Vegas and playing cards was so strong that materiality could be presumed.

### **1210.05(c)(ii) Materiality In Cases Involving Services**

In a case involving services, a showing that the geographic location in the mark is known for performing the service is not sufficient, unless it rises to the level of fame. This is especially true for restaurant services because, having chosen a particular restaurant, a customer is aware of the geographic location of the service and is less likely to associate the services with the place named in the mark (e.g., a customer is less likely to identify restaurant services with a region of Paris when sitting in a restaurant in New York).

Therefore, before addressing materiality, the examining attorney must satisfy the services/place association prong by providing evidence of an additional reason for the consumer to associate the services with the geographic location invoked by the mark. For example, the examining attorney could provide evidence that a customer sitting in a restaurant in one location would believe that:

- The food came from the place named in the mark; or
- The chef received specialized training in the place identified in the mark; or
- The menu is identical to a known menu from the geographic location named in the mark.

*See In re Les Halles De Paris J.V.*, 334 F.3d 1371, 1374, 67 USPQ2d 1539, 1541–1542 (Fed. Cir. 2003); *In re Consol. Specialty Rests., Inc.*, 71 USPQ2d 1921, 1927 (TTAB 2004).

This heightened association between the services and geographic place named in the mark raises an inference of deception or materiality for a service mark. The Court of Appeals for the Federal Circuit has provided the following guidance regarding additional evidence that would be sufficient to satisfy the materiality element:

In any event, the record might show that customers would patronize the restaurant because they believed the food was imported from, or the chef was trained in, the place identified by the restaurant's mark. The importation of food and culinary training are only examples, not exclusive methods of analysis....

*Les Halles De Paris*, 334 F.3d at 1375, 67 USPQ2d at 1542.

In *Consol. Specialty Rests., Inc.*, the Board held COLORADO STEAKHOUSE and design primarily geographically deceptively misdescriptive of restaurant services. In the course of that holding, the Board found that a mistaken belief that the steaks served in applicant's restaurant were from Colorado would be material to the customer's decision to patronize the restaurant, where the record contained the following evidence: gazetteer and dictionary definitions of "Colorado" and "steakhouse;" a United States Department of Agriculture report on cattle inventory; stories excerpted from the LexisNexis® database; and Internet excerpts showing that Colorado was one of the 11 top cattle states in the United States, that Colorado was known for its steaks, that "Colorado steaks" are featured food items in restaurants outside the state, and that politicians from Colorado use "Colorado steaks" as the basis for wagers on sporting events. *Id.* at 1924-28. The Board stated that "an inference of materiality arises where there is a showing of a 'heightened association' between the services and the geographic place or, in other words, a showing of 'a very strong services-place association.'" *Id.* at 1928.

See also [TMEP §§1203.02–1203.02\(g\)](#) regarding deceptive marks, and [TMEP §1210.08](#) regarding geographical designations used on or in connection with wines or spirits that identify a place other than the origin of the goods.

### **1210.05(d) Procedures for Issuing Geographically Deceptive Refusals**

Although the test for determining whether a mark is primarily geographically deceptively misdescriptive under §2(e)(3) is now the same as the test for determining whether a mark is deceptive under §2(a), the statutory provisions with respect to registrability on the Supplemental Register and on the Principal Register under §2(f) are different:

- Under §23(a) of the Trademark Act, a mark that is primarily geographically deceptively misdescriptive may be registered on the Supplemental Register if the mark has been in lawful use in commerce since before December 8, 1993 (the date of enactment of the NAFTA Implementation Act), while a mark that is deceptive may not be registered on the Supplemental Register; and
- Under §2(f) of the Trademark Act, a mark that is primarily geographically deceptively misdescriptive may be registered if the mark became distinctive of the goods or services in commerce before December 8, 1993, while a mark that is deceptive may not be registered on the Principal Register even upon a showing of acquired distinctiveness.

Accordingly, because the statute expressly prohibits registration of deceptive marks on the Supplemental Register or on the Principal Register under §2(f), the examining attorney will proceed as follows.

### **1210.05(d)(i) Neither Applicant Nor Goods/Services Come from the Place Named**

To ensure that no geographically deceptively misdescriptive marks claiming use in commerce or acquired distinctiveness prior to December 8, 1993 are registered on the Supplemental Register or under §2(f) when it is clear that neither the applicant nor the goods/services come from the place named in the mark, the examining attorney must determine whether the misdescription would be material and follow the procedures outlined below:

- If the examining attorney determines that the misdescription would not be material to the decision to purchase, no refusal should be made. If the application is otherwise in condition for publication, the examining attorney should approve the mark for publication.
- If the examining attorney determines that the misdescription would be material to the decision to purchase, and the application claims use in commerce prior to December 8, 1993, the examining attorney must issue a nonfinal refusal under §2(a), supported by appropriate evidence.
- If the examining attorney determines that the misdescription would be material to the decision to purchase, and the application does not claim use prior to December 8, 1993, the examining attorney must issue nonfinal refusals under §§2(e)(3) and 2(a), supported by appropriate evidence.

Depending upon the applicant's response to a nonfinal refusal under §§2(e)(3) and 2(a), the examining attorney will ultimately issue a final refusal under either §2(e)(3) or §2(a):

- If the applicant's response does not claim use or acquired distinctiveness prior to December 8, 1993, the examining attorney must withdraw the §2(a) refusal and issue a final refusal under §2(e)(3), if otherwise appropriate.
- In the rare circumstance that the applicant responds by claiming use prior to December 8, 1993 and amends to the Supplemental Register, or establishes that the mark acquired distinctiveness under §2(f) prior to December 8, 1993, to ensure that a geographically deceptively misdescriptive mark will not be allowed to register, the examining attorney must withdraw the §2(e)(3) refusal and issue a final refusal under §2(a), if otherwise appropriate.

*In re S. Park Cigar, Inc.*, 82 USPQ2d 1507, 1509, n.3 (TTAB 2007). *See also Corporacion Habanos, S.A. v. Guantanamera Cigars Co.*, 86 USPQ2d 1473, 1475 (TTAB 2008) (Board considered only the §2(e)(3) claim in opposition based on both §§2(a) and 2(e)(3)); *In re Beaverton Foods, Inc.*, 84 USPQ2d 1253, 1257 (TTAB 2007) (“[W]here an applicant is seeking registration for a mark with a geographic term on the Principal Register under Section 2(f) based on a claim that the mark had acquired distinctiveness prior to December 8, 1993, a geographically deceptive mark is properly refused registration under Section 2(a). Nothing in the statute or legislative history dictates otherwise. Moreover, this analysis is consistent with the practice of the USPTO.”).

### **1210.05(d)(ii) It is Not Clear Whether the Goods/Services Originate From the Place Named**

If the applicant does not come from the place named in the mark, and the record does not indicate whether the goods/services originate in that place ( *see* [TMEP §1210.03](#)), the examining attorney must do the following:

(1) If (a) the entire mark would not be geographically descriptive (making disclaimer an option), (b) there are no other substantive refusals (making an examiner's amendment an option), and (c) the application could be put into condition for publication by examiner's amendment ( see [TMEP §707](#)), to expedite prosecution, the examining attorney should:

- Attempt to contact the applicant to determine whether the goods/services originate in the place named and, if so, to obtain authorization for a disclaimer and for any other amendments that would put the application in condition for approval for publication.
- If the applicant states that the goods/services do not originate in the place named, the examining attorney must so indicate by entering a Note to the File in the record. The examining attorney must then follow the appropriate procedure in [TMEP §1210.05\(d\)\(i\)](#).
- To ensure the completeness of the record in the event of an appeal, any Office action must also include an information request under 37 C.F.R. §2.61(b), asking whether the goods/services originate in the place named.

(2) If the examining attorney is unable to reach the applicant or cannot obtain authorization for an examiner's amendment, or if the applicant indicates that they do not know where the goods/services will originate, or if an Office action is otherwise necessary to make substantive refusals or requirements that cannot be satisfied by examiner's amendment, the examining attorney must proceed as follows:

- Issue a refusal under §2(e)(2) as geographically descriptive (or a requirement for a disclaimer, if appropriate), based on the presumption that the goods/services come from the place named in the mark; and
- If the misdescription would be material, issue alternative refusals, supported by evidence, under §§2(a) and 2(e)(3) as geographically deceptively misdescriptive, based on the alternative presumption that the goods do not come from the place named; and
- Issue any other relevant refusals and requirements; and
- Issue an information request under 37 C.F.R. §2.61(b), asking where the goods/services originate. This written request is made to ensure the completeness of the record in the event of an appeal.

*See In re Cheezwhse.com, Inc.*, 85 USPQ2d 1917 (TTAB 2008).

### **1210.05(e) Geographically Deceptive Matter: Case References**

*In re Miracle Tuesday LLC*, 695 F.3d 1339, 104 USPQ2d 1330 (Fed. Cir. 2012) (affirming the TTAB's refusal to register JPK PARIS 75 and design as primarily geographically deceptively misdescriptive for fashion accessories that did not originate in Paris); *In re Spirits Int'l, N.V.*, 563 F.3d 1347, 90 USPQ2d 1489 (Fed. Cir. 2009) (remanding case to Trademark Trial and Appeal Board to determine whether a substantial portion of the relevant consumers would translate and be materially deceived by the Russian term Moskovskaya for vodka); *In re Les Halles De Paris J.V.*, 334 F.3d 1371, 1375, 67 USPQ2d 1539, 1542 (Fed. Cir. 2003) (Court found that the record did not show that a diner at the restaurant in question would identify the region in Paris named in the mark as a source of the restaurant services or that a material reason for the choice of the restaurant was its identity with the region in Paris); *In re Cal. Innovations Inc.*, 329 F.3d 1334, 66 USPQ2d 1853 (Fed. Cir. 2003), *reh'g denied*, 2003 U.S. App. LEXIS 18883 (Fed. Cir. Aug. 20, 2003) (TTAB found to have applied an outdated standard of review under §2(e)(3), case remanded for application of new, post-NAFTA test); *In re Save Venice New York Inc.*, 259 F.3d 1346, 59 USPQ2d 1778 (Fed. Cir. 2001) (THE VENICE COLLECTION and SAVE VENICE INC. composite marks featuring an image of the winged Lion of St. Mark held primarily geographically deceptively misdescriptive of products that do not originate in Venice, Italy, where an encyclopedia and a gazetteer showed that Venice was a well known center for the manufacture of glass, lace, art objects, jewelry, cotton, and silk textiles); *In re Wada*, 194 F.3d 1297, 52 USPQ2d 1539 (Fed. Cir. 1999) (NEW YORK WAYS GALLERY held primarily

geographically deceptively misdescriptive where manufacturing listings and Nexis® excerpts showed that New York was well known as a place where leather goods and handbags are designed and manufactured); *In re Premiere Distillery, LLC*, 103 USPQ2d 1483 (TTAB 2012) (finding REAL RUSSIAN primarily geographically deceptively misdescriptive for vodka); *In re Compania de Licores Internacionales S.A.*, 102 USPQ2d 1841 (TTAB 2012) (finding OLD HAVANA primarily geographically deceptively misdescriptive for rum and applicant's claim of acquired distinctiveness insufficient); *Corporacion Habanos, S.A. v. Guantanamera Cigars Co.*, 102 USPQ2d 1085 (TTAB 2012) (finding GUANTANAMERA, a Spanish word meaning "girl from Guantanamo" or "of or from Guantanamo, Cuba," primarily geographically deceptively misdescriptive for cigars not from Cuba); *In re Jonathan Drew, Inc.*, 97 USPQ2d 1640 (TTAB 2011) (finding KUBA KUBA primarily geographically deceptively misdescriptive of cigars, tobacco, and related products that did not originate in Cuba nor would they be made from Cuban seed tobacco); *Corporacion Habanos, S.A. v. Anncas, Inc.*, 88 USPQ2d 1785 (TTAB 2008) (HAVANA CLUB found primarily geographically deceptively misdescriptive of cigars made from Cuban seed tobacco since Havana is world renowned for cigars and consumers would believe that the cigars originate in Havana when, in fact, they do not); *In re Cheezwhse.com, Inc.*, 85 USPQ2d 1917 (TTAB 2008) (NORMANDIE CAMEMBERT held primarily geographically descriptive of cheese because Normandy, France was famous for cheese and the Board presumed that the goods would originate there, and, in the alternative, primarily geographically deceptively misdescriptive for cheese, based on the presumption that the goods would not originate there, since applicant failed to submit information about the origin of the goods); *In re Beaverton Foods, Inc.*, 84 USPQ2d 1253 (TTAB 2007) (NAPA VALLEY MUSTARD CO. for mustard that did not originate in Napa Valley, California held deceptive, where the record contained printouts from various websites showing use of NAPA VALLEY in relation to mustard by third parties, evidence of a widely advertised annual Napa Valley Mustard Festival, evidence of the connection of Napa Valley to wineries and gourmet food, and copies of advertisements for applicant's goods which imply that the mustard originates in Napa Valley); *In re S. Park Cigar, Inc.*, 82 USPQ2d 1507 (TTAB 2007) (YBOR GOLD held primarily geographically deceptively misdescriptive of cigars and tobacco that do not come from the Ybor City area of Tampa, Florida, given the prominence of Ybor City as a current and historical source of cigars); *In re Consol. Specialty Rests., Inc.*, 71 USPQ2d 1921 (TTAB 2004) (Board found that patrons of applicant's restaurants, COLORADO STEAKHOUSE, would believe the steaks that were served would come from Colorado); *In re Juleigh Jeans Sportswear Inc.*, 24 USPQ2d 1694 (TTAB 1992) (LONDON LONDON held deceptive for clothing having no connection with London, given the renown of London as a center for contemporary as well as traditional fashions); *In re Sharky's Drygoods Co.*, 23 USPQ2d 1061 (TTAB 1992) (holding that the juxtaposition of "Paris" with "Beach Club" results in incongruous phrase, and purchasers, thus, will view PARIS BEACH CLUB as humorous mark in which "Paris" is used facetiously rather than as geographic reference); *In re Perry Mfg. Co.*, 12 USPQ2d 1751 (TTAB 1989) (PERRY NEW YORK and design, with a disclaimer of NEW YORK, held deceptive for various items of clothing that originate in North Carolina, and have no connection with New York, because of the renown of New York in the apparel industry); *In re House of Windsor, Inc.*, 221 USPQ 53 (TTAB 1983), *recon. denied*, 223 USPQ 191 (TTAB 1984) (BAHIA held deceptive of cigars that do not originate in the Bahia province of Brazil, where the evidence of record was "unequivocal" that tobacco and cigars are important products in the Bahia region).

## 1210.06 Procedure for Examining Geographic Composite Marks

A geographic composite mark is one composed of geographic matter coupled with additional matter (e.g., wording and/or a design element). When examining such a mark, the examining attorney must first determine the primary significance of the composite. See [TMEP §§1210.02\(c\)–1210.02\(c\)\(iii\)](#).

Composite marks present unique issues in regard to both geographically descriptive and misdescriptive refusals. When evaluating whether the mark's primary significance is a generally known geographic location, a composite mark must be evaluated as a whole. See *In re Save Venice New York Inc.*, 259 F.3d 1346,1352,

59 USPQ2d 1778, 1782 (Fed. Cir. 2001). In order to do so, the examining attorney may also consider the significance of each element within the mark. *Id.*

For example, the mark PARIS BEACH CLUB, for clothing, was held not to be perceived as primarily geographic. *In re Sharky's Drygoods Co.*, 23 USPQ2d 1061 (TTAB 1992). Because Paris is known for haute couture, is not located on an ocean or lake and does not have a beach, the Board found that the juxtaposition of PARIS with BEACH CLUB resulted in an incongruous phrase and that the word PARIS would be viewed as a facetious rather than a geographic reference. *Id.* at 1062. The mark NEW YORK WAYS GALLERY, however, was found to be geographically deceptive. *In re Wada*, 194 F.3d 1297, 52 USPQ2d 1539 (Fed. Cir. 1999). The Board determined that (1) NEW YORK was not an obscure geographical term; (2) NEW YORK was known as a place where the goods at issue were designed, manufactured, and sold; and (3) the primary geographic significance was not lost by the addition of WAYS GALLERY to NEW YORK. Likewise, in the case of the mark YBOR GOLD, the Board held that the mere addition of the word GOLD to the geographic designation YBOR did not result in an arbitrary, fanciful, or suggestive composite. *In re S. Park Cigar, Inc.*, 82 USPQ2d 1507 (TTAB 2007). The Board determined that GOLD connoted the high quality of the goods and thus did not detract from the geographic significance of YBOR or negate the primarily geographic significance of the mark as a whole. *Id.* at 1513.

Depending on the primary significance of the composite, the examining attorney will handle the geographic issue in a geographic composite mark in one of the following ways:

- (1) If the examining attorney finds that the mark, when viewed as a whole, is arbitrary, fanciful, or suggestive, he or she will approve the mark for publication without evidence that the mark has acquired distinctiveness under §2(f). However, examining attorneys must consult their senior or managing attorney before going forward when they have made a preliminary determination that the primary significance of the mark as a whole is *not* geographic. The senior or managing attorney will make the final determination or may seek guidance from the Office of Legal Policy, within the Office of the Deputy Commissioner for Trademark Examination Policy;
- (2) If the examining attorney finds that the mark is primarily geographically descriptive under §2(e)(2) without a showing of acquired distinctiveness, primarily geographically deceptively misdescriptive under §2(e)(3), or deceptive under §2(a), he or she will refuse registration of the mark as a whole;  
or
- (3) If the examining attorney finds that the geographic matter is a separable part of the mark, the examining attorney's action will depend on whether the matter is primarily geographically descriptive, primarily geographically deceptively misdescriptive, or deceptive. See [TMEP §1210.06\(a\)](#) regarding primarily geographically descriptive composites, and [TMEP §1210.06\(b\)](#) regarding primarily geographically deceptively misdescriptive and deceptive composites.

### **1210.06(a) Marks That Include Primarily Geographically Descriptive Terms Combined With Additional Matter**

If a composite mark comprises a geographic term that is primarily geographically descriptive of the goods or services under §2(e)(2), and the mark as a whole would be likely to be perceived as indicating the geographic origin of the goods or services, then the examining attorney must consider: (1) whether the geographic term is a separable element in the mark; and (2) the nature of the additional matter that makes up the composite mark.

If the geographic term is not a separable element or if none of the additional matter that makes up the composite mark is inherently distinctive (e.g., it is merely descriptive or incapable), then the examining attorney must refuse registration of the entire mark on the Principal Register pursuant to §2(e)(2).

If the geographic term is a separable element and the additional matter making up the mark is inherently distinctive as applied to the goods or services (i.e., coined, arbitrary, fanciful, or suggestive), the applicant may either: (1) register the mark on the Principal Register with a disclaimer of the geographic term; or (2) establish that the geographic term has acquired distinctiveness under §2(f).

A disclaimer is appropriate where the geographic component is a separable feature of the mark, and the composite mark includes an inherently distinctive, non-disclaimed component (e.g., coined, arbitrary, fanciful, or suggestive wording or design). The composite mark must include a non-disclaimed component because a mark cannot be registered if all the components have been disclaimed. See [TMEP §§1213-1213.11](#) regarding disclaimer.

When the examining attorney requires a disclaimer of primarily geographically descriptive matter, the applicant may seek to overcome the disclaimer requirement by submitting a showing that the geographic term has become distinctive under §2(f). See [TMEP §§1210.07\(b\)](#) and [1212.02\(f\)](#) regarding §2(f) claims as to a portion of the mark.

A term that is primarily geographically descriptive of the goods or services under §2(e)(2) may be registered on the Supplemental Register in an application under §1 or §44 of the Trademark Act, if it is not barred by other section(s) of the Act. See [TMEP §1210.07\(a\)](#).

To help ensure that determinations concerning the primary significance of composite marks are handled consistently, examining attorneys must consult their senior or managing attorney before going forward when they have made a preliminary determination that the primary significance of the mark as a whole is *not* geographic. The senior or managing attorney will make the final determination or may seek guidance from the Office of Legal Policy regarding such marks.

### **1210.06(b) Marks That Include Primarily Geographically Deceptively Misdescriptive and Deceptive Terms Combined With Additional Matter**

If a composite mark includes matter that is primarily geographically deceptively misdescriptive within the meaning of §2(e)(3) or deceptive under §2(a), and the mark as a whole would be likely to be perceived as indicating the geographic origin of the goods or services, the examining attorney must follow the procedures outlined above for refusing registration. See [TMEP §1210.05\(d\)](#).

Geographically deceptive and primarily geographically deceptively misdescriptive matter need not comprise the entire mark, or even the dominant portion of the mark. See Trademark Act §2(a) and (e)(3); 15 U.S.C. §1052(a) and (e)(3). A refusal under §2(a) or §2(e)(3) is appropriate if some portion of the applied-for mark is geographically deceptive or primarily geographically deceptively misdescriptive with respect to the goods and/or services in question. See e.g., *Am. Speech-Language-Hearing Ass'n v. Nat'l Hearing Aid Soc'y*, 224 USPQ 798, 808 (TTAB 1984).

A composite mark that is deceptive under §2(a) cannot be registered, even with a disclaimer of the geographic component. *In re Perry Mfg. Co.*, 12 USPQ2d 1751, 1751-52 (TTAB 1989). Similarly, a disclaimer of the geographic matter will not overcome a §2(e)(3) refusal, even if the mark was in use prior to December 8, 1993. *In re Wada*, 194 F.3d 1297, 52 USPQ2d 1539,1542 (Fed. Cir. 1999).

See [TMPEP §1210.05\(a\)](#) regarding the basis for refusal of marks that are primarily geographically deceptively misdescriptive, and [TMPEP §1210.05\(d\)](#) for procedures for issuing such refusals.

To help ensure that determinations concerning the primary significance of composite marks are handled consistently, examining attorneys must consult their senior or managing attorney before going forward when they have made a preliminary determination that the primary significance of the mark as a whole is *not* geographic. The senior or managing attorney will make the final determination or may seek guidance from the Office of Legal Policy regarding such marks.

## 1210.07 Supplemental Register and §2(f)

### 1210.07(a) Registrability of Geographic Terms on the Supplemental Register

*Primarily Geographically Descriptive Marks.* A term that is primarily geographically descriptive of the goods/services under §2(e)(2) may be registered on the Supplemental Register, if it is not barred by other section(s) of the Act. See [TMPEP §714.05\(a\)\(i\)](#). However, in certain circumstances, a primarily geographically descriptive mark may be considered incapable. See *In re Bee Pollen from Eng. Ltd.*, 219 USPQ 163 (TTAB 1983) (finding BEE POLLEN FROM ENGLAND incapable of distinguishing bee pollen from England); *Mineco, Inc. v. Lone Mountain Turquoise Mine*, 217 USPQ 466 (TTAB 1983) (finding LONE MOUNTAIN incapable of distinguishing turquoise from the Lone Mountain Mine).

*Primarily Geographically Deceptively Misdescriptive Marks.* A mark that is found to be primarily geographically deceptively misdescriptive under §2(e)(3) may not be registered on the Supplemental Register unless the mark has been in lawful use in commerce since before December 8, 1993, the date of enactment of the NAFTA Implementation Act. Section 23(a) of the Trademark Act, 15 U.S.C. §1091(a). If the applicant claims use prior to December 8, 1993 and seeks registration on the Supplemental Register, or amends to the Supplemental Register, the examining attorney must refuse registration under §2(a). See [TMPEP §1210.05\(d\)\(i\)](#).

*Geographically Deceptive Marks.* A mark that is deceptive under §2(a) may not be registered on the Supplemental Register. See *In re Juleigh Jeans Sportswear Inc.*, 24 USPQ2d 1694, 1696 (TTAB 1992).

*NOTE:* A mark in a §66(a) application cannot be registered on the Supplemental Register under any circumstances. 15 U.S.C. § 1141h(a)(4); 37 C.F.R. §§2.47(c) and 2.75(c).

### 1210.07(b) Registrability of Geographic Terms under §2(f)

*Primarily Geographically Descriptive Marks.* A term that is primarily geographically descriptive of the goods/services under §2(e)(2) may be registered on the Principal Register if it is shown to have acquired distinctiveness under §2(f). See [TMPEP §714.05\(a\)\(i\)](#) regarding a §2(f) claim submitted with an allegation of use in response to a refusal and [§§1212–1212.10](#) regarding §2(f).

*Primarily Geographically Deceptively Misdescriptive Marks.* A mark that is primarily geographically deceptively misdescriptive under §2(e)(3) may not be registered under §2(f) unless the mark became distinctive of the goods or services in commerce before December 8, 1993, the date of enactment of the NAFTA Implementation Act. See *In re Compania de Licores Internacionales S.A.*, 102 USPQ2d 1841, 1852 (TTAB 2012); *In re Boyd Gaming Corp.*, 57 USPQ2d 1944, 1947 (TTAB 2000); *Fred Hayman Beverly Hills Inc. v. Jacques Bernier Inc.*, 38 USPQ2d 1691, 1692 (TTAB 1996).

If the applicant claims that the mark acquired distinctiveness prior to December 8, 1993, the examining attorney must refuse registration under §2(a). See [TMEP §1210.05\(d\)\(i\)](#).

*Geographically Deceptive Marks.* A mark that is deceptive under §2(a) may not be registered on the Principal Register even under §2(f).

*Section 2(f) in Part.* An applicant may claim that a geographic component of a mark has acquired distinctiveness under §2(f). See [TMEP §1212.02\(f\)](#) regarding claims of acquired distinctiveness as to a portion of a mark. Thus, if the examining attorney requires a disclaimer of matter that is primarily geographically descriptive under §2(e)(2), the applicant may seek to overcome the disclaimer requirement by submitting a showing that the geographic component has acquired distinctiveness under §2(f). If the applicant is able to establish to the satisfaction of the examining attorney that the geographic component has acquired distinctiveness, the examining attorney will approve the mark for publication with a notation that there is a claim of distinctiveness under §2(f) as to the geographic component, if appropriate.

## 1210.08 Geographical Indications Used on Wines and Spirits

Section 2(a) of the Trademark Act, 15 U.S.C. §1052(a), prohibits the registration of a designation that consists of or comprises “a geographical indication which, when used on or in connection with wines or spirits, identifies a place other than the origin of the goods and is first used on or in connection with wines or spirits by the applicant on or after [January 1, 1996].” This provision was added by the Uruguay Round Agreements Act, implementing the Trade-Related Intellectual Property (“TRIPs”) portions of the General Agreement on Tariffs and Trade (“GATT”). This provision does not apply to geographic indications that were first used in commerce on or in connection with wines or spirits prior to January 1, 1996.

The term “spirits” refers to “a strong distilled alcoholic liquor” (e.g., gin, rum, vodka, whiskey, or brandy). *Random House Webster’s Unabridged Dictionary* 1839 (2nd ed. 1998). This provision does not apply to designations used on or in connection with beer, nor does it apply to goods that are not wines or spirits, but are partially composed of wines or spirits (e.g., wine vinegar, wine sauces, wine jelly, rum balls, bourbon chicken).

This provision of §2(a) applies if the applicant’s identification of goods: (1) specifically includes wines or spirits; or (2) describes the goods using broad terms that could include wines or spirits (e.g., alcoholic beverages).

Section 2(a) is an absolute bar to the registration of these geographical designations on either the Principal Register or the Supplemental Register. Neither a disclaimer of the geographical designation nor a claim that it has acquired distinctiveness under §2(f) can obviate a §2(a) refusal if the mark consists of or comprises a geographical indication that identifies a place other than the origin of the wines or spirits.

See [TMEP §1210.08\(a\)](#) regarding geographical indications used on wines and spirits that do not originate in the named place, [TMEP §1210.08\(b\)](#) regarding geographical indications used on wines and spirits that

originate in the named place, and [TMEP §1210.08\(c\)](#) regarding geographical indications that are generic for wines and spirits.

### **1210.08(a) Geographical Indications Used on Wines and Spirits That Do Not Originate in the Named Place**

In implementing the TRIPs Agreement through the Uruguay Round Agreements Act (“URAA”), Pub. L. No. 103-465, 108 Stat. 4809 (1994), Congress approved a Statement of Administrative Action (“SAA”) which provides, in part, that:

“Geographical indications” are defined in TRIPs Article 22.1 as “indications which identify a good as originating in the territory of a Member, or a region or locality in that territory, where a given quality, reputation or other characteristic of the good is essentially attributable to its geographical origin.” The Administration expects that this definition will be applied in the context of trademark registration and that a “geographical indication” as used in this provision will be interpreted to comprise only those areas which have a reputation for being associated with the specific goods at issue. *Obscure areas or those that do not have a reputation or other characteristics generally associated with wines or spirits should not be prohibited from registration (emphasis added).*

Statement of Administrative Action, Agreement on Trade-Related Aspects of Intellectual Property Rights, H.R. Doc. No. 103-316, §B.1.e (1994); 19 U.S.C. §§3511(a)(2) and 3512(d).

A designation is considered a *geographical indication* under §2(a) if it identifies the applicant’s wines or spirits as originating in a territory known for a given quality, reputation, or other characteristic associated with wines or spirits. A mark for wines or spirits that includes a geographical indication is unregistrable if: (1) purchasers would erroneously believe that the goods originate in the relevant geographic location; and (2) the quality, reputation, or characteristic associated with wines or spirits from that location would materially affect the purchaser’s decision to buy the goods.

To establish a prima facie case for refusal to register a mark under the “wines and spirits” provision of §2(a), the following is required:

- (1) The primary significance of the relevant term or design is geographic, e.g., a place name, abbreviation, nickname, or symbol; or an outline or map of a geographic area ( *see* [TMEP §§1210.02\(a\)–1210.02\(b\)\(iv\)](#));
- (2) Purchasers would be likely to think that the goods originate in the geographic place identified in the mark, i.e., purchasers would make a goods/place association ( *see* [TMEP §§1210.04–1210.04\(d\)](#));
- (3) The goods do not originate in the place identified in the mark ( *see* [TMEP §1210.03](#));
- (4) A purchaser's erroneous belief as to the geographic origin of the goods would materially affect the purchaser's decision to buy the goods ( *see* [TMEP §§1210.05\(c\)–1210.05\(c\)\(ii\)](#)); and
- (5) The mark was first used in commerce by the applicant on or after January 1, 1996.

Section 2(a) is an absolute bar to the registration of false geographical indications used on wines or spirits on either the Principal Register or the Supplemental Register. Neither a disclaimer of the geographic term or design nor a claim that it has acquired distinctiveness under §2(f) of the Trademark Act, 15 U.S.C. §1052(f), can obviate a §2(a) refusal if the mark consists of or includes a geographical indication that identifies a place other than the true origin of the wines or spirits.

### *Requirement for First Use On or After January 1, 1996*

For all applications filed under §1(b), §44, or §66(a) of the Trademark Act, 15 U.S.C. §1051(b), §1126, or §1141f(a), or for applications filed under §1(a) of the Trademark Act, 15 U.S.C. §1051(a), where the application fails to indicate the applicant's date of first use of the mark in commerce, the examining attorney should presume that the applicant's first use of the mark in commerce is or will be on or after January 1, 1996, unless the application record indicates otherwise.

If the examining attorney determines that a mark featuring a false geographical indication was in use *prior* to January 1, 1996, the examining attorney must refuse registration because the mark is primarily geographically deceptively misdescriptive under §2(e)(3) of the Trademark Act, 15 U.S.C. §1052(e)(3), and deceptive under §2(a). See [TMEP §1210.05\(a\)](#).

### **1210.08(b) Geographical Indications Used on Wines and Spirits That Originate in the Named Place**

If the wines or spirits originate in the identified place, and the primary significance of the mark is a generally known geographic location, the examining attorney should presume the requisite goods/place association, and refuse the mark under §2(e)(2) as geographically descriptive, or require disclaimer of the geographic term, as appropriate. See [TMEP §§1210.01\(a\)](#) and [1210.06\(a\)](#).

Sometimes, a geographic term is used to certify the geographic origin of wines or spirits. If the proposed mark is used to certify the goods, the applicant may convert the application to one for a certification mark of regional origin under §4 of the Trademark Act, 15 U.S.C. §1054. See [TMEP §1306.06\(f\)\(vi\)](#) regarding amendment to a different type of mark, and [TMEP §§1210.09](#) and [1306.02–1306.02\(c\)](#) regarding geographic certification marks.

### **1210.08(c) Geographical Indications That Are Generic for Wines and Spirits**

When a geographic term or design in the mark is generic for a type of wine or spirit, the examining attorney must refuse registration under §2(e)(1) on the Principal Register or §23 on the Supplemental Register, as appropriate, because the term or design is generic. See [TMEP §§1209.02-1209.02\(b\)](#). Or, if appropriate, the examining attorney must require a disclaimer of the generic term or design. See [TMEP §§1213–1213.11](#) regarding disclaimer.

A geographic term or design is considered generic if United States consumers view it as designating the genus of the goods, rather than their geographic origin. See [TMEP §§1209.01\(c\)–1209.01\(c\)\(iii\)](#). If a geographic term or design is used in connection with wines or spirits, the examining attorney may submit a search request to the Trademark Law Library to determine whether there is evidence indicating that the term or design is generic for the applicant's goods.

### **1210.09 Geographic Certification Marks**

Under certain circumstances, the name of the place from which goods or services originate may function as a certification mark. When geographic terms are used to certify regional origin (e.g., “Idaho” used to certify that potatoes are grown in Idaho), registration of certification marks should not be refused and, in applications to register composite certification marks, disclaimers of these geographic terms should *not* be required on the ground of geographical descriptiveness. See [TMEP §§1306.02–1306.02\(c\)](#) concerning procedures for registration of certification marks that certify regional origin.

When a geographical term used in a composite certification mark is not used to certify regional origin (e.g., “California” used to certify that fruit is organically grown), appropriate refusals pursuant to §§2(e)(2), 2(e)(3), or 2(a) should be made.

### 1210.10 Doctrine of Foreign Equivalents

Under the doctrine of foreign equivalents, foreign words from common, modern languages are translated into English to determine their geographic significance. Although the doctrine arises more often in cases involving likelihood of confusion, descriptiveness, and genericness, the doctrine also applies to issues involving geographic marks. *See, e.g., In re Spirits Int’l, N.V.*, 563 F.3d 1347, 1351, 90 USPQ2d 1489, 1491 (Fed. Cir. 2009) (applying doctrine in determining whether MOSKOVSKAYA, a Russian word meaning “of or from Moscow,” was primarily geographically deceptively misdescriptive for vodka not from Moscow); *Corporacion Habanos, S.A. v. Guantanamera Cigars Co.*, 102 USPQ2d 1085 (TTAB 2012) (holding GUANTANAMERA, a Spanish word meaning “girl from Guantanamo” or “of or from Guantanamo, Cuba,” primarily geographically deceptively misdescriptive for cigars); *In re Joint Stock Co. “Baik”*, 80 USPQ2d 1305 (TTAB 2006) (holding BAIKALSKAYA, a Russian word meaning “from Baikal,” primarily geographically descriptive of vodka from Lake Baikal).

Although words from modern languages are generally translated into English, the doctrine of foreign equivalents is not an absolute rule, but merely a guideline. The doctrine should be applied only when it is likely that the ordinary American purchaser would stop and translate the foreign word into its English equivalent. *See Palm Bay Imps., Inc. v. Veuve Clicquot Ponsardin Maison Fondee en 1772*, 396 F.3d 1369, 1377, 73 USPQ2d 1689, 1696 (Fed. Cir. 2005). The “ordinary American purchaser” includes “all American purchasers, including those proficient in a non-English language who would ordinarily be expected to translate words into English.” *Spirits Int’l*, 563 F.3d at 1352, 90 USPQ2d at 1492.

While foreign words are generally translated into English for purposes of determining geographic significance, foreign words from dead or obscure languages may be so unfamiliar to the American buying public that they should not be translated into English for descriptiveness purposes. *See Enrique Bernat F. S.A. v. Guadalajara Inc.*, 210 F.3d 439, 443, 54 USPQ2d 1497, 1499 (5th Cir. 2000) (noting that “one policy undergirding the doctrine is ‘the assumption that there are (or someday will be) customers in the U.S. who speak that foreign language.’” (quoting *Otokoyama Co. v. Wine of Japan Import, Inc.*, 175 F.3d 266, 270, 50 USPQ2d 1626, 1629 (2d Cir. 1999))); *cf. Gen. Cigar Co. Inc. v. G.D.M. Inc.*, 988 F. Supp. 647, 660, 45 USPQ2d 1481, 1492 (S.D.N.Y. 1997) (finding it doubtful that prospective purchasers would associate the mark with a word in a language spoken by the indigenous population of the Dominican Republic). The determination of whether a language is “dead” must be made on a case-by-case basis, based upon the meaning that the term would have to the relevant purchasing public.

*Example:* Latin is generally considered a dead language. However, if there is evidence that a Latin term is still in use by the relevant purchasing public (e.g., if the term appears in current dictionaries or news articles), then that Latin term is not considered dead. The same analysis should be applied to other uncommon languages.

See [TMPEP §§809–809.03](#) for information regarding how to ascertain the meaning of non-English wording in a mark. See also TMPEP §§[1207.01\(b\)\(vi\)–1207.01\(b\)\(vi\)\(C\)](#), [1209.03\(g\)](#), and [1211.01\(a\)\(vii\)](#) regarding the doctrine of foreign equivalents.

### 1211 Refusal on Basis of Surname

*15 U.S.C. §1052 (Extract)*

No trademark by which the goods of the applicant may be distinguished from the goods of others shall be refused registration on the principal register on account of its nature unless it ... (e) Consists of a mark which ... (4) is primarily merely a surname.

Under §2(e)(4) of the Trademark Act, 15 U.S.C. §1052(e)(4), a mark that is primarily merely a surname is not registrable on the Principal Register absent a showing of acquired distinctiveness under §2(f), 15 U.S.C. §1052(f). See [TMEP §§1212–1212.10](#) regarding acquired distinctiveness. Formerly §2(e)(3) of the Act, this section was designated §2(e)(4) when the NAFTA Implementation Act took effect on January 1, 1994. A mark that is primarily merely a surname may be registrable on the Supplemental Register in an application under §1 or §44 of the Trademark Act.

The Trademark Act, in §2(e)(4), reflects the common law that exclusive rights in a surname *per se* cannot be established without evidence of long and exclusive use that changes its significance to the public from that of a surname to that of a mark for particular goods or services. The common law also recognizes that surnames are shared by more than one individual, each of whom may have an interest in using his surname in business; and, by the requirement for evidence of distinctiveness, the law, in effect, delays appropriation of exclusive rights in the name. *In re Etablissements Darty et Fils*, 759 F.2d 15, 17, 225 USPQ 652, 653 (Fed. Cir. 1985).

The question of whether a mark is primarily merely a surname depends on the mark's *primary* significance to the purchasing public. *See, e.g., Ex parte Rivera Watch Corp.*, 106 USPQ 145, 149 (Comm'r Pats. 1955). Each case must be decided on its own facts, based upon the evidence in the record.

### 1211.01 “Primarily Merely a Surname”

The legislative history of the Trademark Act of 1946 indicates that the word “primarily” was added to the existing statutory language “merely” with the intent to exclude registration of names such as “Johnson” or “Jones,” but not registration of names such as “Cotton” or “King” which, while surnames, have a primary significance other than as a surname. *See Sears, Roebuck & Co. v. Watson*, 204 F.2d 32, 33-34, 96 USPQ 360, 362 (D.C. Cir. 1953); *Ex parte Rivera Watch Corp.*, 106 USPQ 145, 149 (Comm'r Pats. 1955).

The question of whether a term is primarily merely a surname depends on the primary, not the secondary, significance to the purchasing public. The Trademark Trial and Appeal Board has identified five factors to be considered in making this determination:

- (1) whether the surname is rare ( *see* [TMEP §1211.01\(a\)\(v\)](#));
- (2) whether the term is the surname of anyone connected with the applicant;
- (3) whether the term has any recognized meaning other than as a surname ( *see* [TMEP §§1211.01\(a\)–1211.01\(a\)\(vii\)](#));
- (4) whether it has the “look and feel” of a surname ( *see* [TMEP §1211.01\(a\)\(vi\)](#)); and
- (5) whether the stylization of lettering is distinctive enough to create a separate commercial impression ( *see* [TMEP §1211.01\(b\)\(ii\)](#)).

*In re Benthin Mgmt. GmbH*, 37 USPQ2d 1332, 1333-1334 (TTAB 1995). Where the mark is in standard characters, it is unnecessary to consider the fifth factor. *In re Yeley*, 85 USPQ2d 1150, 1151 (TTAB 2007).

If there is any doubt as to whether a term is primarily merely a surname, the Board will resolve the doubt in favor of the applicant. *Yeley*, 85 USPQ2d at 1151; *Benthin*, 37 USPQ2d at 1334.

### **1211.01(a) Non-Surname Significance**

Often a word will have a meaning or significance in addition to its significance as a surname. The examining attorney must determine the primary meaning of the term to the public.

#### **1211.01(a)(i) Ordinary Language Meaning**

If there is a readily recognized meaning of a term, apart from its surname significance, such that the primary significance of the term is not that of a surname, registration should be granted on the Principal Register without evidence of acquired distinctiveness. *See In re Isabella Fiore LLC*, 75 USPQ2d 1564 (TTAB 2005) (holding FIORE not primarily merely a surname where it is also the Italian translation of the English word “flower” and the non-surname meaning is not obscure); *In re United Distillers plc*, 56 USPQ2d 1220 (TTAB 2000) (holding the relatively rare surname HACKLER not primarily merely a surname, in light of dictionary meaning); *Fisher Radio Corp. v. Bird Elec. Corp.*, 162 USPQ 265 (TTAB 1969) (holding BIRD not primarily merely a surname despite surname significance); *In re Hunt Elecs. Co.*, 155 USPQ 606 (TTAB 1967) (holding HUNT not primarily merely a surname despite surname significance).

However, this does not mean that an applicant only has to uncover a non-surname meaning of a term to obviate a refusal under §2(e)(4). *See In re Nelson Souto Major Piquet*, 5 USPQ2d 1367 (TTAB 1987) (holding N. PIQUET (stylized) primarily merely a surname despite significance of the term “piquet” as “the name of a relatively obscure card game”). The mere existence of other non-surname meanings of a term does not preclude a finding that the term is primarily merely a surname. *Mitchell Miller, P.C. v. Miller*, 105 USPQ2d 1615, 1621 (TTAB 2013) (holding MILLER LAW GROUP primarily merely a surname for legal services despite other meanings of the term “miller”). “The question is not whether a mark having surname significance might also have a non-surname significance, but whether, in the context of the goods or services at issue, that non-surname significance is the mark’s primary significance to the purchasing public.” *Id.*; *see In re Harris-Intertype Corp.*, 518 F.2d 629, 631, 186 USPQ 238, 239 (C.C.P.A. 1975).

#### **1211.01(a)(ii) Phonetic Equivalent of Term with Ordinary Language Meaning**

A term may be primarily merely a surname even if it is the phonetic equivalent of a word that has an ordinary meaning (e.g., Byrne/burn; Knott/not or knot; Chappell/chapel). *See In re Pickett Hotel Co.*, 229 USPQ 760 (TTAB 1986) (holding PICKETT SUITE HOTEL primarily merely a surname despite applicant’s argument that PICKETT is the phonetic equivalent of the word “picket”); *cf. In re Monotype Corp. PLC*, 14 USPQ2d 1070, 1071 (TTAB 1989) (holding CALISTO not primarily merely a surname, the Board characterizing the telephone directory evidence of surname significance as “minimal” and in noting the mythological significance of the name “Callisto,” stating that it is common knowledge that there are variations in the rendering of mythological names transliterated from the Greek alphabet (distinguishing *Pickett Hotel Co.*, 229 USPQ 760)). Similarly, the fact that a word that has surname significance is also a hybrid or derivative of another word having ordinary language meaning is insufficient to overcome the surname significance, unless the perception of non-surname significance would displace the primary surname impact of the word. *See In re Etablissements Darty et Fils*, 759 F.2d 15, 225 USPQ 652 (Fed. Cir. 1985) (holding DARTY primarily merely a surname despite applicant’s argument that the mark is a play on the word “dart”);

*In re Petrin Corp.*, 231 USPQ 902 (TTAB 1986) (holding PETRIN primarily merely a surname despite applicant's argument that the mark represents an abbreviation of "petroleum" and "insulation").

### **1211.01(a)(iii) Geographical Significance**

A term with surname significance may not be primarily merely a surname if that term also has a well-known geographical meaning. *In re Colt Indus. Operating Corp.*, 195 USPQ 75 (TTAB 1977) (holding FAIRBANKS not primarily merely a surname because the geographical significance of the mark was determined to be just as dominant as its surname significance). However, the fact that a term is shown to have some minor significance as a geographical term will not dissipate its primary significance as a surname. *In re Hamilton Pharm. Ltd.*, 27 USPQ2d 1939 (TTAB 1993) (holding HAMILTON primarily merely a surname).

### **1211.01(a)(iv) Historical Place or Person**

A term with surname significance may not be primarily merely a surname if that term also identifies a historical place or person. See *Lucien Piccard Watch Corp. v. Since 1868 Crescent Corp.*, 314 F. Supp. 329, 331, 165 USPQ 459, 461 (S.D.N.Y. 1970) (holding DA VINCI not primarily merely a surname because it primarily connotes Leonardo Da Vinci); *In re Pyro-Spectaculars, Inc.*, 63 USPQ2d 2022, 2024 (TTAB 2002) (holding SOUSA for fireworks and production of events and shows featuring pyrotechnics not primarily merely a surname, where the evidence showed present-day recognition and continuing fame of John Philip Sousa as a composer of patriotic music, and the applicant's goods and services were of a nature that "would be associated by potential purchasers with patriotic events such as the Fourth of July, patriotic figures, and patriotic music"); *Michael S. Sachs Inc. v. Cordon Art B.V.*, 56 USPQ2d 1132, 1136 (TTAB 2000) (finding the primary significance of M. C. ESCHER to be that of a famous deceased Dutch artist); cf. *In re Pickett Hotel Co.*, 229 USPQ 760, 762 (TTAB 1986) (holding PICKETT SUITE HOTEL primarily merely a surname despite applicant's evidence that PICKETT was the name of a famous Civil War general); *In re Champion Int'l Corp.*, 229 USPQ 550, 551 (TTAB 1985) (holding McKINLEY primarily merely a surname despite being the name of a deceased president).

Evidence that an individual is famous in a particular field does not necessarily establish that he or she is a historical figure. *In re Binion*, 93 USPQ2d 1531 (TTAB 2009) (holding BINION and BINION'S primarily merely a surname; although there was evidence that applicant had played a significant role in the gaming industry in Las Vegas, his notoriety was not deemed so remarkable or so significant that he is a historical figure); *In re Thermo LabSystems Inc.*, 85 USPQ2d 1285 (TTAB 2007) (holding WATSON primarily merely a surname). Furthermore, the Board has held that a surname that would be evocative of numerous individuals, rather than one particular historical individual, does not qualify as a historical name and is merely a surname of numerous individuals with varying degree of historical significance. *Id.* at 1290.

### **1211.01(a)(v) Rare Surnames**

The rarity of a surname is an important factor to be considered in determining whether a term is primarily merely a surname. *In re Joint-Stock Co. "Baik,"* 84 USPQ2d 1921, 1924 (TTAB 2007) (finding the extreme rarity of BAIK weighed against surname refusal); *In re Benthin Mgmt. GmbH*, 37 USPQ2d 1332, 1333 (TTAB 1995) (finding the fact that BENTHIN was a rare surname to be a factor weighing against a finding that the term would be perceived as primarily merely a surname); *In re Sava Research Corp.*, 32 USPQ2d 1380, 1381 (TTAB 1994) (finding SAVA not primarily merely a surname, where there was evidence that the term had other meaning, no evidence that the term was the surname of anyone connected with applicant, and the term's use as a surname was very rare); *In re Garan Inc.*, 3 USPQ2d 1537 (TTAB 1987) (holding GARAN not primarily merely a surname). However, the fact that a surname is rare does not per se preclude

a finding that a term is primarily merely a surname. Even a rare surname may be held primarily merely a surname if its primary significance to purchasers is that of a surname. *See In re Etablissements Darty et Fils*, 759 F.2d 15, 225 USPQ 652 (Fed. Cir. 1985) (holding DARTY primarily merely a surname); *In re Rebo High Definition Studio Inc.*, 15 USPQ2d 1314 (TTAB 1990) (holding REBO primarily merely a surname); *In re Pohang Iron & Steel Co.*, 230 USPQ 79 (TTAB 1986) (holding POSTEN primarily merely a surname). Regardless of the rarity of the surname, the test is whether the primary significance of the term to the purchasing public is that of a surname.

An issue to be considered in determining how rarely a term is used is the media attention or publicity accorded to public personalities who have the surname. A surname rarely appearing in birth records may nonetheless appear more routinely in news reports, so as to be broadly exposed to the general public. *In re Gregory*, 70 USPQ2d 1792, 1795 (TTAB 2004).

### 1211.01(a)(vi) “Look and Feel” of a Surname

Some names, by their very nature, have only surname significance even though they are rare surnames. *See In re Industrie Pirelli Societa per Azioni*, 9 USPQ2d 1564, 1566 (TTAB 1988) (holding PIRELLI primarily merely a surname, the Board stated that “certain rare surnames look like surnames and certain rare surnames do not and ... ‘PIRELLI’ falls into the former category...”); *In re Petrin Corp.*, 231 USPQ 902 (TTAB 1986) (holding PETRIN primarily merely a surname). Conversely, certain surnames are so rare that they do not even have the appearance of surnames. In such cases, even in the absence of non-surname significance, a reasonable application of the “primary significance to the purchasing public” test could result in a finding that the surname, when used as a mark, would be perceived as arbitrary or fanciful. *In re United Distillers plc*, 56 USPQ2d 1220, 1222 (TTAB 2000) (finding HACKLER does not have the look and feel of a surname); *see also In re Joint-Stock Co. “Baik,”* 84 USPQ2d 1921, 1923 (TTAB 2007) (finding lack of other recognized meaning does not in itself imbue a mark with the “look and feel” of a surname).

### 1211.01(a)(vii) Doctrine of Foreign Equivalents

In determining whether a term is primarily merely a surname, the examining attorney must consider whether the term has any meaning in a foreign language. This determination is made from the point of view of American buyers familiar with the foreign language. *In re Isabella Fiore, LLC*, 75 USPQ2d 1564 (TTAB 2005) (holding FIORE – the Italian equivalent of “Flower” – not primarily merely a surname).

The doctrine of foreign equivalents is not an absolute rule, but merely a guideline, which should be applied only when it is likely that the ordinary American purchaser would stop and translate the foreign word into its English equivalent. *See Palm Bay Imps., Inc. v. Veuve Clicquot Ponsardin Maison Fondée en 1772*, 396 F.3d 1369, 1377, 73 USPQ2d 1689, 1696 (Fed. Cir. 2005). The “ordinary American purchaser” includes “all American purchasers, including those proficient in a non-English language who would ordinarily be expected to translate words into English.” *In re Spirits Int’l, N.V.*, 563 F.3d 1347, 1352, 90 USPQ2d 1489, 1492 (Fed. Cir. 2009). To support a refusal under §2(e)(4), the record must show that the surname significance is the *primary* significance. *See In re Picone*, 221 USPQ 93, 95 (TTAB 1984) (finding evidence that “PICON” is the name of a town and a mountain in Spain and that “piccone” is an Italian word meaning “pick” or “pickax” insufficient to overcome a refusal on the ground that PICONE is *primarily* merely a surname).

In *Fiore*, the Board noted that applicant had produced evidence that Italian is a popular language in the United States, such that the meaning of the term would be recognized by a wide variety of people; that “Fiore” is “listed as the only translation of the common English word ‘flower;’” that Italian is a major, modern

language, not an obscure language; and that the non-surname meaning of the term in Italian is not obscure. The Board found that FIORE “is the type of term that potential customers would stop and translate,” and that “there is no question of whether the term would be recognized in its current form as the Italian word for ‘Flower.’” 75 USPQ2d at 1569.

The fact that a term has no meaning in a foreign language may also be relevant to a determination of whether a term is primarily merely a surname. In holding that PIRELLI was primarily merely a surname, the Board noted that the term “has no ordinary meaning in the Italian language, as the Italian dictionary excerpt, made of record by the Examining Attorney, shows.” *In re Industrie Pirelli Societa per Azioni*, 9 USPQ2d 1564, 1566 (TTAB 1988).

See [TMPEP §§809–809.03](#) for information regarding how to ascertain the meaning of non-English wording in a mark.

See also TMPEP §§[1207.01\(b\)\(vi\)–1207.01\(b\)\(vi\)\(C\)](#), [1209.03\(g\)](#), and [1210.10](#) regarding the doctrine of foreign equivalents.

### **1211.01(b) Surname Combined with Additional Matter**

Often a mark will be comprised of a word that, standing by itself, would be primarily merely a surname, coupled with additional matter (e.g., letters, words, or designs). The question remains whether the mark sought to be registered as a whole would be perceived by the public primarily merely as a surname. *In re Hutchinson Tech. Inc.*, 852 F.2d 552, 554, 7 USPQ2d 1490, 1492 (Fed. Cir. 1988). See [TMPEP §§1211.01\(b\)\(i\)–1211.01\(b\)\(viii\)](#) for additional information about surnames combined with additional matter.

#### **1211.01(b)(i) Double Surnames**

A combination of two surnames is not primarily merely a surname, within the meaning of §2(e)(4), unless there is evidence of record showing that the combination would be perceived by the public primarily merely as a surname. *See In re Standard Elektrik Lorenz A.G.*, 371 F.2d 870, 873, 152 USPQ 563, 566 (C.C.P.A. 1967) (holding SCHAUB-LORENZ not primarily merely a surname, the Court noting that there was no evidence submitted that the mark sought to be registered was primarily merely a surname; that the only evidence of surname significance related to the individual “SCHAUB” and “LORENZ” portions of the mark; and that the mark must be considered in its entirety rather than dissected).

#### **1211.01(b)(ii) Stylization or Design Elements**

A mark comprised of a word that, standing by itself, would be considered primarily merely a surname, but which is coupled with a distinctive stylization or design element, is not considered primarily merely a surname. *In re Benthin Mgmt. GmbH*, 37 USPQ2d 1332, 1334 (TTAB 1995) (finding stylized display of term BENTHIN to be a factor weighing against a finding that the term would be perceived as primarily merely a surname). However, the addition of a nondistinctive design element or stylization to a term that, standing by itself, is primarily merely a surname does not remove the term from that category. The primary significance of the mark, in its entirety, would be merely that of a surname. *See In re Pickett Hotel Co.*, 229 USPQ 760, 763 (TTAB 1986) (holding PICKETT SUITE HOTEL primarily merely a surname despite the stylization of the lettering, which was considered “insignificant, in that it is clearly not so distinctive as to create any separate commercial impression in the minds of purchasers of appellant’s services”).

The display of a term in lower-case lettering does not detract from its surname significance. *In re Directional Mktg. Corp.*, 204 USPQ 675, 677 (TTAB 1979).

### **1211.01(b)(iii) Surname Combined with Initials**

A mark that consists of two or more initials preceding a surname will typically convey the commercial impression of a personal name and thus generally will not be primarily merely a surname. *In re P.J. Fitzpatrick*, 95 USPQ2d 1412, 1414 (TTAB 2010) (holding that the initials P.J. coupled with surname Fitzpatrick would be perceived as a given name and thus comprises an entire personal name, not merely a surname); *see In re Yeley*, 85 USPQ2d 1150, 1153 (TTAB 2007) (holding that the proposed mark J.J. YELEY was recognized as the full name of the well known NASCAR race driver and as such was perceived as a reference to a particular person and not primarily merely a surname); *Michael S. Sachs Inc. v. Cordon Art B.V.*, 56 USPQ2d 1132, 1136 (TTAB 2000) (finding that the primary significance of M.C. ESCHER was that of a famous deceased Dutch artist, commenting that “[t]he mark M.C. ESCHER would no more be perceived as primarily merely a surname than the personal names P.T. Barnum, T.S. Eliot, O.J. Simpson, I.M. Pei and Y.A. Tittle.”).

Although marks consisting of a single initial preceding a surname have been held to be primarily merely a surname, *In re I. Lewis Cigar Mfg. Co.*, 205 F.2d 204, 98 USPQ 265 (C.C.P.A. 1953), the Board has noted that no per se rule exists that a single initial preceding a surname must be deemed primarily merely a surname.

*P.J. Fitzpatrick*, 95 USPQ2d at 1413. The Board further opined that such a mark would not be perceived as primarily merely a surname where the record shows that the addition of a single initial to a surname creates the commercial impression of a personal name. *Id.* Therefore, applicants may attempt to overcome a surname refusal as to a mark consisting of a single initial preceding a surname by submitting evidence that the mark would likely be perceived as a personal name. For example, an applicant may provide evidence that consumers in general perceive a single initial preceding a surname as a personal name. Or, an applicant may show that such a mark is the name of an individual, such as the applicant or a signatory of the applicant, and evidence shows it would be recognized as such by the consuming public. In addition, if the applicant indicates that the name in the mark is that of a particular living individual, the applicant must provide written consent to register the mark from this individual. *See* TMEP §§[813](#), [813.01\(a\)](#), [1206.04\(a\)](#). However, when the name in the mark is identical to the name of the applicant or of a signer of the application (e.g., the mark is A. JONES and the applicant’s name or signatory is A. Jones), consent is not necessary. In such cases, consent is presumed, but the examining attorney must ensure that a consent statement is entered into the Trademark database. *See* TMEP §§[813](#), [813.01\(a\)](#), and [1206.04\(b\)](#).

### **1211.01(b)(iv) Surname Combined with Title**

A title, such as “Mr.,” “Mrs.,” “Mlle.,” “Dr.,” or “MD,” does not diminish the surname significance of a term; rather, it may enhance the surname significance of a term. *In re Rath*, 402 F.3d 1207, 74 USPQ2d 1174 (Fed. Cir. 2005) (affirming Board decision holding that DR. RATH was primarily merely a surname); *In re Giger*, 78 USPQ2d 1405 (TTAB 2006) (holding GIGER MD primarily merely a surname); *In re Revillon*, 154 USPQ 494 (TTAB 1967) (holding MLLE. REVILLON primarily merely a surname); *cf. In re Hilton Hotels Corp.*, 166 USPQ 216, 217 (TTAB 1970) (holding LADY HILTON not primarily merely a surname because it suggests a person or lady of nobility).

### **1211.01(b)(v) Surname in Plural or Possessive Form**

The surname significance of a term is not diminished by the fact that the term is presented in its plural or possessive form. *See In re Binion*, 93 USPQ2d 1531 (TTAB 2009) (holding BINION and BINION’S

primarily merely a surname); *In re Woolley's Petite Suites*, 18 USPQ2d 1810 (TTAB 1991) (holding WOOLLEY'S PETITE SUITES for hotel and motel services primarily merely a surname); *In re McDonald's Corp.*, 230 USPQ 304, 306 (TTAB 1986) (holding MCDONALD'S primarily merely a surname based on a showing of surname significance of "McDonald," the Board noting that "it is clear that people use their surnames in possessive and plural forms to identify their businesses or trades"); *In re Luis Caballero, S.A.*, 223 USPQ 355 (TTAB 1984) (holding BURDONS primarily merely a surname based in part on telephone listings showing surname significance of "Burdon"); *In re Directional Mktg. Corp.*, 204 USPQ 675 (TTAB 1979) (holding DRUMMONDS primarily merely a surname based on a showing of surname significance of "Drummond").

### **1211.01(b)(vi) Surname Combined with Wording**

The treatment of marks that include wording in addition to a term that, standing by itself, is primarily merely a surname, depends on the significance of the non-surname wording.

If the wording combined with the surname is incapable of functioning as a mark (i.e., a generic name for the goods or services), the examining attorney must refuse registration on the ground that the entire mark is primarily merely a surname under §2(e)(4). If the policy were otherwise, one could evade §2(e)(4) by the easy expedient of adding the generic name of the goods or services to a word that is primarily merely a surname. See *Mitchell Miller, P.C. v. Miller*, 105 USPQ2d 1615 (TTAB 2013) (holding MILLER LAW GROUP for legal services primarily merely a surname); *In re Hamilton Pharm. Ltd.*, 27 USPQ2d 1939 (TTAB 1993) (holding HAMILTON PHARMACEUTICALS for pharmaceutical products primarily merely a surname); *In re Cazes*, 21 USPQ2d 1796, 1797 (TTAB 1991) (holding BRASSERIE LIPP primarily merely a surname where "brasserie" is a generic term for applicant's restaurant services"); *In re Woolley's Petite Suites*, 18 USPQ2d 1810 (TTAB 1991) (holding WOOLLEY'S PETITE SUITES for hotel and motel services primarily merely a surname); *In re Possis Med., Inc.*, 230 USPQ 72, 73 (TTAB 1986) (holding POSSIS PERFUSION CUP primarily merely a surname, the Board finding that "[a]pplicant's argument that PERFUSION CUP is not a generic name for its goods ... is contradicted by the evidence the Examining Attorney has pointed to"); *In re E. Martinoni Co.*, 189 USPQ 589, 590-91 (TTAB 1975) (holding LIQUORE MARTINONI (stylized) for liqueur primarily merely a surname, with "liqueure" being the Italian word for "liqueur").

If the wording combined with the surname is capable of functioning as a mark (i.e., matter that is arbitrary, suggestive, or merely descriptive of the goods or services), the mark is not considered to be primarily merely a surname under §2(e)(4). However, if the additional wording is merely descriptive or the equivalent, and a disclaimer is otherwise proper, the examining attorney must require a disclaimer of the additional wording.

See *In re Hutchinson Tech. Inc.*, 852 F.2d 552, 555, 7 USPQ2d 1490, 1493 (Fed. Cir. 1988) (holding HUTCHINSON TECHNOLOGY for computer components not primarily merely a surname when the mark is considered as a whole, the Court remanding the case for entry of a disclaimer of "TECHNOLOGY" before publication).

Some wording may enhance rather than diminish the surname significance of the mark. See *In re Piano Factory Grp. Inc.*, 85 USPQ2d 1522, 1527 (TTAB 2006) (finding the addition of "& SONS" to the surname VOSE "serves only to emphasize or reinforce that 'VOSE' is the surname of the sons' parents."), and cases cited therein. See also [TMEP §1211.01\(b\)\(iv\)](#) regarding surnames combined with titles, [TMEP](#)

[§1211.01\(b\)\(iii\)](#) regarding surnames combined with initials, and [TMEP §1211.01\(b\)\(viii\)](#) regarding surnames combined with legal or familial business entity designations.

### **1211.01(b)(vii) Surname Combined with Domain Name**

A surname combined with a non-source-identifying top-level domain name (e.g., JOHNSON.COM) is primarily merely a surname under §2(e)(4). See [TMEP §1215.03](#).

### **1211.01(b)(viii) Surname Combined with Legal or Familial Entity Designation**

The addition of wording that merely indicates the legal entity of an applicant, such as “Corporation,” “Inc.,” “Ltd.,” “Company,” or “Co.,” or the family business structure of an applicant, such as “& Sons” or “Bros.,” does not diminish the surname significance of a term that is otherwise primarily merely a surname. See *In re I. Lewis Cigar Mfg. Co.*, 205 F.2d 204, 98 USPQ 265 (C.C.P.A. 1953) (holding S. SEIDENBERG & CO’S. primarily merely a surname); *In re Piano Factory Grp, Inc.*, 85 USPQ2d 1522 (TTAB 2006) (holding VOSE & SONS primarily merely a surname). In fact, adding the familial entity designation “& SONS” to a surname was found to emphasize or reinforce the surname significance of the mark. *Piano Factory Grp, Inc.*, 85 USPQ2d at 1527.

## **1211.02 Evidence Relating to Surname Refusal**

### **1211.02(a) Evidentiary Burden – Generally**

The burden is initially on the examining attorney to establish a prima facie case that a mark is primarily merely a surname. The burden then shifts to the applicant to rebut this showing. *In re Petrin Corp.*, 231 USPQ 902, 902-03 (TTAB 1986). The evidence submitted by the examining attorney was found insufficient to establish a prima facie case in the following decisions: *In re Kahan & Weisz Jewelry Mfg. Corp.*, 508 F.2d 831, 833, 184 USPQ 421, 422 (C.C.P.A. 1975) (finding six telephone directory listings insufficient to establish a prima facie case); *In re BDH Two Inc.*, 26 USPQ2d 1556, 1558 (TTAB 1993) (finding twenty-one telephone directory listings, eleven excerpts from a research database, primarily from foreign publications, and a dictionary page showing no listing for the proposed mark insufficient to establish a prima facie case); *In re Raivico*, 9 USPQ2d 2006, 2006-07 (TTAB 1988) (finding applicant’s statement that the mark is a surname and the specimens insufficient to establish a prima facie case); *In re Garan Inc.*, 3 USPQ2d 1537, 1540 (TTAB 1987) (finding six telephone directory listings, a reference in a television news program, and a dictionary page showing no listing for the proposed mark insufficient to establish a prima facie case).

There is no rule as to the kind or amount of evidence necessary to make out a prima facie showing that a term is primarily merely a surname. This question must be resolved on a case-by-case basis. See, e.g., *In re Monotype Corp. PLC*, 14 USPQ2d 1070 (TTAB 1989); *In re Pohang Iron & Steel Co.*, 230 USPQ 79 (TTAB 1986). The entire record is examined to determine the surname significance of a term. The following are examples of evidence that may be relevant: telephone directory listings; excerpted articles from computerized research databases; evidence in the record that the term is a surname; the manner of use on the specimen; dictionary definitions of the term and evidence from dictionaries showing no definition of the term. The quantum of evidence that is persuasive in finding surname significance in one case may be insufficient in another because of the differences in the names themselves. See *In re Etablissements Darty et Fils*, 759 F.2d 15, 17, 225 USPQ 652, 653 (Fed. Cir. 1985).

See TMEP §§[710–710.03](#) and [1211.02\(b\)–1211.02\(b\)\(vii\)](#) for additional information about evidence.

### **1211.02(b) Evidentiary Considerations**

In appropriate cases, the examining attorney may present evidence that may appear contrary to his or her position, with an appropriate explanation as to why, in view of other evidence presented, this evidence was not considered controlling. In some cases, this may foreclose objections from an applicant and present a more complete picture in the event of an appeal.

See [TMEP §§1211.02\(b\)\(i\)–1211.02\(b\)\(vii\)](#) regarding types of evidence that may be relevant to a refusal of registration under §2(e)(4).

#### **1211.02(b)(i) Telephone Directory Listings**

Telephone directory listings from telephone books or electronic databases are one type of credible evidence of the surname significance of a term. The Trademark Trial and Appeal Board has declined to hold that a minimum number of listings in telephone directories must be found to establish a prima facie showing that the mark is primarily merely a surname. *See, e.g., In re Petrin Corp.*, 231 USPQ 902, 903 (TTAB 1986); *In re Wickuler-Kupper-Brauerei KGaA*, 221 USPQ 469, 470 (TTAB 1983).

It is the American public's perception of a term that is determinative. Therefore, foreign telephone directory listings are not probative of the significance of a term to the purchasing public in the United States, regardless of whether the applicant is of foreign origin. *See, e.g., Société Civile Des Domaines Dourthe Frères v. S.A. Consortium Vinicole De Bordeaux Et De La Gironde*, 6 USPQ2d 1205, 1208 (TTAB 1988); *In re Stromsholmens Mekaniska Verkstad AB*, 228 USPQ 968, 969 (TTAB 1986); *In re Wickuler-Kupper-Brauerei*, 221 USPQ at 470 n.2.

#### **1211.02(b)(ii) LexisNexis® Research Database Evidence**

Excerpted articles from the LexisNexis® research database are one type of credible evidence of the surname significance of a term. There is no requirement that the examining attorney make of record every story found in a LexisNexis® search. However, the examining attorney is presumed to make the best case possible. *See In re Federated Dep't Stores Inc.*, 3 USPQ2d 1541, 1542 n.2 (TTAB 1987); *see also In re Monotype Corp. PLC*, 14 USPQ2d 1070, 1071 (TTAB 1989) (“We must conclude that, because the Examining Attorney is presumed to have made the best case possible, the 46 stories not made of record [the search yielded 48 stories] do not support the position that CALISTO is a surname and, indeed, show that CALISTO has non surname meanings.”) An Office action that includes any evidence obtained from a research database should include a citation to the research service and a clear record of the specific search that was conducted, indicating the libraries or files that were searched and the date of the search (e.g., LexisNexis®, News and Business, All News, Aug. 5, 2007). The electronic record or printout summarizing the search should be made a part of the record. Relevant information not included on the summary, such as the number of documents viewed, should be stated in narrative in the Office action. *See [TMEP §710.01\(a\)](#)*.

See [TMEP §710.01\(b\)](#) regarding evidence originating in foreign publications.

#### **1211.02(b)(iii) U.S. Census Database Evidence**

The Census Bureau (<http://www.census.gov/genealogy/www/data/2000surnames/index.html>) has a database of surnames taken from the most recent decennial census. The surnames are ordered by rank, and

the database lists the number of individuals in the country having each surname. Because the database reflects the number of individuals, rather than the number of households, with a particular name, search results from this database may be more persuasive evidence of surname frequency than results from telephone directory listings.

### **1211.02(b)(iv) Surname of Person Associated with Applicant**

The fact that a term is the surname of an individual associated with the applicant (e.g., an officer or founder) is evidence of the surname significance of the term. See *In re Etablissements Darty et Fils*, 759 F.2d 15, 17, 225 USPQ 652, 653 (Fed. Cir. 1985); *Mitchell Miller, P.C. v. Miller*, 105 USPQ2d 1615, 1620-21 (TTAB 2013); *In re Rebo High Definition Studio Inc.*, 15 USPQ2d 1314, 1315 (TTAB 1990); *In re Industrie Pirelli Societa per Azioni*, 9 USPQ2d 1564, 1566 (TTAB 1988); *In re Taverniti, SARL*, 225 USPQ 1263, 1264 (TTAB 1985), *recon. denied*, 228 USPQ 975 (TTAB 1985).

### **1211.02(b)(v) Specimens Confirming Surname Significance of Term**

The fact that a term appears on the specimen of record in a manner that confirms its surname significance is evidence of the surname significance of a term. See *Société Civile Des Domaines Dourthe Frères v. S.A. Consortium Vinicole De Bordeaux Et De La Gironde*, 6 USPQ2d 1205, 1208 (TTAB 1988) (holding DOURTHE primarily merely a surname, the Board noted applicant's references to "Dourthe" as the name of a particular family and found the surname significance of the term to be reinforced by the appearance on applicant's wine labels of the name and/or signature of an individual named Pierre Dourthe); *In re Taverniti, SARL*, 225 USPQ 1263, 1264 (TTAB 1985), *recon. denied*, 228 USPQ 975 (TTAB 1985) (holding J. TAVERNITI primarily merely a surname, the Board considered, among other factors, the presentation of the mark on the specimen in signature form); *In re Luis Caballero, S.A.*, 223 USPQ 355, 356-57 (TTAB 1984) (holding BURDONS primarily merely a surname, the Board weighted heavily the applicant's use of "Burdon" on the specimen as a surname, albeit of a fictitious character ("John William Burdon")).

### **1211.02(b)(vi) Negative Dictionary Evidence**

Negative dictionary evidence (i.e., evidence that a term is absent from dictionaries or atlases) may demonstrate the lack of non-surname significance of a term. See *In re Petrin Corp.*, 231 USPQ 902, 903 (TTAB 1986).

### **1211.02(b)(vii) Evidence of Fame of a Mark**

Evidence of the fame of a mark (e.g., evidence of consumer recognition of a mark, or expenditures made in promoting or advertising a mark) is not relevant unless registration is sought under §2(f). *In re McDonald's Corp.*, 230 USPQ 304, 307 (TTAB 1986) (holding McDonald's primarily merely a surname in spite of strong secondary meaning, with the Board stating that "the word 'primarily' refers to the primary significance of the term, that is, the ordinary meaning of the word, and not to the term's strength as a trademark due to widespread advertising and promotion of the term as a mark to identify goods and/or services."); see *In re Industrie Pirelli Societa per Azioni*, 9 USPQ2d 1564, 1565 (TTAB 1988); *In re Nelson Souto Major Piquet*, 5 USPQ2d 1367, 1368 (TTAB 1987).

## **1212 Acquired Distinctiveness or Secondary Meaning**

### *15 U.S.C. §1052(f)*

Except as expressly excluded in subsections (a), (b), (c), (d), (e)(3), and (e)(5) of this section, nothing herein shall prevent the registration of a mark used by the applicant which has become distinctive of the applicant's goods in commerce. The Director may accept as prima facie evidence that the

mark has become distinctive, as used on or in connection with the applicant's goods in commerce, proof of substantially exclusive and continuous use thereof as a mark by the applicant in commerce for the five years before the date on which the claim of distinctiveness is made. Nothing in this section shall prevent the registration of a mark which, when used on or in connection with the goods of the applicant, is primarily geographically deceptively misdescriptive of them, and which became distinctive of the applicant's goods in commerce before the date of the enactment of the North American Free Trade Agreement Implementation Act.

If a proposed mark is not inherently distinctive, it may be registered on the Principal Register only upon proof of acquired distinctiveness, or "secondary meaning," that is, proof that it has become distinctive as applied to the applicant's goods or services in commerce. If the applicant establishes, to the satisfaction of the examining attorney, that the matter in question has acquired distinctiveness as a mark in relation to the named goods or services, then the mark is registrable on the Principal Register under §2(f) of the Trademark Act, 15 U.S.C. §1052(f).

Within the context of the Trademark Act, §2(f) may be described as follows:

[U]nlike the first five sections of 15 U.S.C. §1052 which define the grounds upon which a trademark registration is to be refused, Section 2(f) serves as an exception to a rejection under the provisions of one of the other sections, Section 2(e) (citation omitted). Section 2(f) permits registration of marks that, despite not qualifying for registration in light of Section 2(e), have nevertheless "become distinctive of the applicant's goods in commerce." Thus, "Section 2(f) is not a provision on which registration can be refused," ... but is a provision under which an applicant has a chance to prove that he is entitled to a federal trademark registration which would otherwise be refused.

*Yamaha Int'l Corp. v. Hoshino Gakki Co.*, 840 F.2d 1572, 1580, 6 USPQ2d 1001, 1007 (Fed. Cir. 1988), quoting *In re Capital Formation Counselors, Inc.*, 219 USPQ 916, 917 n.2 (TTAB 1983).

The purpose and significance of secondary meaning may be described as follows:

A term which is descriptive . . . may, through usage by one producer with reference to his product, acquire a special significance so that to the consuming public the word has come to mean that the product is produced by that particular manufacturer. 1 Nims, *Unfair Competition and Trademarks* at §37 (1947). This is what is known as secondary meaning.

The crux of the secondary meaning doctrine is that the mark comes to identify not only the goods but the source of those goods. To establish secondary meaning, it must be shown that the *primary* significance of the term in the minds of the consuming public is not the product but the producer (citations omitted). This may be an anonymous producer, since consumers often buy goods without knowing the personal identity or actual name of the manufacturer.

*Ralston Purina Co. v. Thomas J. Lipton, Inc.*, 341 F. Supp. 129, 133, 173 USPQ 820, 823 (S.D.N.Y. 1972).

Three basic types of evidence may be used to establish acquired distinctiveness under §2(f):

- (1) A claim of ownership of one or more prior registrations on the Principal Register of the same mark for goods or services that are the same as or related to those named in the pending application ( *see* 37 C.F.R. §2.41(b); [TMEP §§1212.04–1212.04\(e\)](#));
- (2) A statement verified by the applicant that the mark has become distinctive of the applicant's goods or services by reason of substantially exclusive and continuous use in commerce by the applicant for the five years before the date when the claim of distinctiveness is made ( *see* 37 C.F.R. §2.41(b); [TMEP §§1212.05–1212.05\(d\)](#)); and

- (3) Actual evidence of acquired distinctiveness ( *see* 37 C.F.R. §2.41(a); [TMEP §§1212.06–1212.06\(e\)\(iv\)](#)).

The applicant may submit one or any combination of these types of evidence, which are discussed below. Depending on the nature of the mark and the facts in the record, the examining attorney may determine that a claim of ownership of a prior registration(s) or a claim of five years' substantially exclusive and continuous use in commerce is insufficient to establish a prima facie case of acquired distinctiveness. The applicant may then submit actual evidence of acquired distinctiveness.

### 1212.01 General Evidentiary Matters

Whether acquired distinctiveness has been established is a question of fact. *See In re Loew's Theatres, Inc.*, 769 F.2d 764, 769-70, 226 USPQ 865, 869 (Fed. Cir. 1985), and cases cited therein. The record must contain facts or evidence of acquired distinctiveness.

The burden of proving that a mark has acquired distinctiveness is on the applicant. *See Yamaha Int'l Corp. v. Hoshino Gakki Co.*, 840 F.2d 1572, 1578-79, 6 USPQ2d 1001, 1006 (Fed. Cir. 1988); *In re Meyer & Wenthe, Inc.*, 267 F.2d 945, 949, 122 USPQ 372, 375 (C.C.P.A. 1959).

The applicant may present any competent evidence to establish that a mark has acquired distinctiveness. Actual evidence of acquired distinctiveness may be submitted regardless of the length of time the mark has been used. *See Ex parte Fox River Paper Corp.*, 99 USPQ 173, 174 (Comm'r Pats. 1953).

The amount and character of evidence required to establish acquired distinctiveness depends on the facts of each case and particularly on the nature of the mark sought to be registered. *See Roux Labs., Inc. v. Clairol Inc.*, 427 F.2d 823, 829, 166 USPQ 34, 39 (C.C.P.A. 1970); *In re Hehr Mfg. Co.*, 279 F.2d 526, 528, 126 USPQ 381, 383 (C.C.P.A. 1960); *In re Gammon Reel, Inc.*, 227 USPQ 729, 730 (TTAB 1985).

Typically, more evidence is required where a mark is so highly descriptive that purchasers seeing the matter in relation to the named goods or services would be less likely to believe that it indicates source in any one party. *See, e.g., In re Bongrain Int'l Corp.*, 894 F.2d 1316, 1318, 13 USPQ2d 1727, 1729 (Fed. Cir. 1990); *Alcatraz Media, Inc. v. Chesapeake Marine Tours Inc.*, 107 USPQ2d 1750, 1767 (TTAB 2013); *In re Seaman & Assocs., Inc.*, 1 USPQ2d 1657, 1659 (TTAB 1986); *In re Packaging Specialists, Inc.*, 221 USPQ 917, 919 (TTAB 1984). Research showing that third parties in applicant's field or closely related fields use the same or substantially the same wording as the mark, or very similar wording as the mark, tends to indicate the mark is at least highly descriptive.

If the applicant has one or more prior federal registrations under §2(f) for a different depiction of the same mark (e.g., stylized vs. standard character) or a portion of the proposed mark, for the same goods/services, the examining attorney's review of the records to assess the probative value of the prior registrations may assist in resolving whether the mark in question has acquired distinctiveness, and thereby obviate the necessity of determining the issue on appeal. *In re Thomas Nelson, Inc.*, 97 USPQ2d 1712, 1713 (TTAB 2011).

Facts based on events that occurred subsequent to the filing date of the application may be considered. Whether acquired distinctiveness has been established is determined in view of the facts that exist at the time registrability is being considered. *McCormick & Co. v. Summers*, 354 F.2d 668, 674, 148 USPQ 272, 276 (C.C.P.A. 1966); *Gen. Foods Corp. v. MGD Partners*, 224 USPQ 479, 486 (TTAB 1984); *Kaiser*

*Aluminum & Chem. Corp. v. Am. Meter Co.*, 153 USPQ 419, 420 n.2 (TTAB 1967); *In re Hoffman House Sauce Co.*, 137 USPQ 486, 487 (TTAB 1963).

## 1212.02 General Procedural Matters

### 1212.02(a) Situations in Which a Claim of Distinctiveness under §2(f) Is Appropriate

A claim of distinctiveness by the applicant under §2(f) is usually made either in response to a statutory refusal to register or in anticipation of such a refusal. See [TMEP §714.05\(a\)\(i\)](#). A claim of distinctiveness is appropriately made in response to, or in anticipation of, only certain statutory refusals to register. For example, it is inappropriate to assert acquired distinctiveness to contravene a refusal under §§2(a), (b), (c), (d), or (e)(5), 15 U.S.C. §§1052(a), (b), (c), (d), or (e)(5). Furthermore, acquired distinctiveness may not be asserted to contravene a refusal under §2(e)(3), 15 U.S.C. §1052(e)(3), unless the mark became distinctive of the applicant's goods in commerce before December 8, 1993, the date of enactment of the NAFTA Implementation Act ( see [TMEP §1210.07\(b\)](#))). See [TMEP §§1210.05\(d\)–1210.05\(d\)\(ii\)](#) regarding procedures for refusing registration under §2(a) in response to a claim that a geographically deceptive mark acquired distinctiveness prior to December 8, 1993.

In *In re Soccer Sport Supply Co.*, 507 F.2d 1400, 1403 n.3, 184 USPQ 345, 348 n.3 (C.C.P.A. 1975), the Court of Customs and Patent Appeals noted as follows:

[T]he judicially developed concept of “secondary meaning,” codified by section 2(f) (15 U.S.C. 1052(f)), relates to descriptive, geographically descriptive, or surname marks which earlier had a primary meaning which did not indicate a single source and were, therefore, unregistrable because of section 2(e) (citation omitted). Additionally, section 2(f) has been applied to permit registration of a mark consisting solely of a design and, therefore, not within the purview of section 2(e).

### 1212.02(b) Section 2(f) Claim Is, for Procedural Purposes, a Concession That Matter Is Not Inherently Distinctive

For procedural purposes, a claim of distinctiveness under §2(f), whether made in the application as filed or in a subsequent amendment, may be construed as conceding that the matter to which it pertains is not inherently distinctive and, thus, not registrable on the Principal Register absent proof of acquired distinctiveness. See *The Cold War Museum, Inc. v. Cold War Air Museum, Inc.*, 586 F.3d 1352, 92 USPQ2d 1626, 1629 (Fed. Cir. 2009) (“Where an applicant seeks registration on the basis of Section 2(f), the mark's descriptiveness is a nonissue; an applicant's reliance on Section 2(f) during prosecution presumes that the mark is descriptive.”). For the purposes of establishing that the subject matter is not inherently distinctive, the examining attorney may rely on this concession alone. Once an applicant has claimed that matter has acquired distinctiveness under §2(f), the issue to be determined is not whether the matter is inherently distinctive but, rather, whether it has acquired distinctiveness.

See, e.g., *Yamaha Int'l Corp. v. Hoshino Gakki Co.*, 840 F.2d 1572, 1577, 6 USPQ2d 1001, 1005 (Fed. Cir. 1988); *In re Cabot Corp.*, 15 USPQ2d 1224, 1229 (TTAB 1990); *In re Prof'l Learning Ctrs., Inc.*, 230 USPQ 70, 71 (TTAB 1986); *In re Chopper Indus.*, 222 USPQ 258, 259 (TTAB 1984).

However, claiming distinctiveness in the alternative is *not* an admission that the proposed mark is not inherently distinctive. [TMEP §1212.02\(c\)](#).

See [TMPEP §1212.02\(d\)](#) regarding unnecessary §2(f) claims.

### 1212.02(c) Claiming §2(f) Distinctiveness in the Alternative

An applicant may argue the merits of an examining attorney's refusal and, in the alternative, claim that the matter sought to be registered has acquired distinctiveness under §2(f). Unlike the situation in which an applicant initially seeks registration under §2(f) or amends its application without objection, the alternative claim does not constitute a concession that the matter sought to be registered is not inherently distinctive. *See In re Thomas Nelson, Inc.*, 97 USPQ2d 1712, 1713 (TTAB 2011); *In re E S Robbins Corp.*, 30 USPQ2d 1540, 1542 (TTAB 1992); *In re Prof'l Learning Ctrs., Inc.*, 230 USPQ 70, 71 n.2 (TTAB 1986).

When an applicant claims acquired distinctiveness in the alternative, the examining attorney must treat separately the questions of: (1) the underlying basis of refusal; and (2) assuming the matter is determined to be registrable, whether acquired distinctiveness has been established. If the applicant has one or more prior registrations under §2(f) for a different depiction of the same mark (e.g., stylized vs. standard character) or a portion of the proposed mark, and for the same goods/services, the examining attorney's review of the records of the registrations would reveal whether the applicant previously conceded descriptiveness or whether the Board found the mark descriptive on appeal. *See Thomas Nelson*, 97 USPQ2d at 1713. Such an assessment of the probative value of the prior registrations might also assist in resolving whether the mark in question has acquired distinctiveness, thereby obviating the necessity of determining that issue on appeal as well. *Id.*

In the event of an appeal on both grounds, the Board will use the same analysis, provided the evidence supporting the §2(f) claim is in the record and the alternative grounds have been considered and finally decided by the examining attorney. *In re Harrington*, 219 USPQ 854, 855 n.1 (TTAB 1983). If the appeal results in a finding of descriptiveness, and also that the mark has acquired distinctiveness, then descriptiveness would be present, even though not conceded by the applicant. *Thomas Nelson*, 97 USPQ2d at 1713.

If the examining attorney accepts the §2(f) evidence, the applicant must be given the option of publication under §2(f) or going forward with the appeal on the underlying refusal. This should be done by telephone or e-mail, with a Note to the File in the record indicating the applicant's decision, wherever possible. If the applicant wants to appeal, or if the examining attorney is unable to reach the applicant by telephone or e-mail, the examining attorney must issue a written action continuing the underlying refusal and noting that the §2(f) evidence is deemed acceptable and will not be an issue on appeal.

Similarly, in an application under §1 or §44 of the Trademark Act, the applicant may seek registration on the Principal Register under §2(f) and, in the alternative, on the Supplemental Register. Depending on the facts of the case, this approach may have limited practical application. If the examining attorney finds that the matter sought to be registered is not a mark within the meaning of §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127 (e.g., is generic or purely ornamental), the examining attorney will refuse registration on both registers.

However, if the issues are framed in the alternative (i.e., whether the matter sought to be registered has acquired distinctiveness under §2(f) or, in the alternative, whether it is capable of registration on the Supplemental Register), and it is ultimately determined that the matter is a mark within the meaning of the Act (e.g., that the matter is merely descriptive rather than generic), then the evidence of secondary meaning will be considered. If it is determined that the applicant's evidence is sufficient to establish that the mark has acquired distinctiveness, the application will be approved for publication on the Principal Register under §2(f). If the evidence is determined to be insufficient, the mark may be registered on the Supplemental Register in an application under §1 or §44 of the Trademark Act.

Accordingly, the applicant may submit an amendment to the Supplemental Register, and continue to argue entitlement to registration on the Principal Register in an appeal.

If the applicant files a notice of appeal in such a case, the Board will institute the appeal, suspend action on the appeal and remand the application to the examining attorney to determine registrability on the Supplemental Register.

If the examining attorney determines that the applicant is entitled to registration on the Supplemental Register, the examining attorney must send a letter notifying the applicant of the acceptance of the amendment and telling the applicant that the application is being referred to the Board for resumption of the appeal. If the examining attorney determines that the applicant is not entitled to registration on the Supplemental Register, the examining attorney will issue a nonfinal action refusing registration on the Supplemental Register. If the applicant fails to overcome the refusal, the examining attorney will issue a final action, and refer the application to the Board to resume action on the appeal with respect to entitlement to registration on either the Principal or the Supplemental Register.

Rather than framing the issues in the alternative (i.e., whether the matter has acquired distinctiveness pursuant to §2(f) or, in the alternative, whether it is capable of registration on the Supplemental Register), the applicant may amend its application between the Principal and Supplemental Registers. 37 C.F.R. §2.75. See *In re Educ. Commc'ns, Inc.*, 231 USPQ 787, 787 (TTAB 1986); *In re Broco*, 225 USPQ 227, 228 (TTAB 1984).

See TMEP §§[816–816.05](#) and [1102.03](#) regarding amending an application to the Supplemental Register, and TBMP §1215 regarding alternative positions on appeal.

### **1212.02(d) Unnecessary §2(f) Claims**

If the applicant specifically requests registration under §2(f), but the examining attorney considers the entire mark to be inherently distinctive and the claim of acquired distinctiveness to be unnecessary, the examining attorney must so inform the applicant and inquire whether the applicant wishes to delete the statement or to rely on it.

In this situation, if it is necessary to issue an Office action about another matter, the examining attorney must state in the Office action that the §2(f) claim appears to be unnecessary, and inquire as to whether the applicant wants to withdraw it. If it is otherwise unnecessary to communicate with the applicant, the inquiry may be made by telephone or e-mail. If the applicant wants to delete the §2(f) claim, this may be done by examiner's amendment. If the applicant does not respond promptly to the telephone or e-mail message (applicant must be given at least a week), the examining attorney must enter a Note to the File in the record and approve the application for publication without deleting the §2(f) claim.

If the applicant specifically requests registration of the entire mark under §2(f), but the examining attorney believes that part of the mark is inherently distinctive, the examining attorney should give the applicant the option of limiting the §2(f) claim to the matter that is not inherently distinctive, if otherwise appropriate. See [TMEP §1212.02\(f\)](#) regarding claims of §2(f) distinctiveness as to a portion of a mark. However, if the applicant wishes, a claim of acquired distinctiveness under §2(f) may be made as to an entire mark or phrase that contains both inherently distinctive matter and matter that is not inherently distinctive. *In re Del E. Webb Corp.*, 16 USPQ2d 1232, 1234 (TTAB 1990).

If the application contains statements that seem to relate to acquired distinctiveness or §2(f) but do not actually amount to a request for registration under §2(f), and the examining attorney does not believe that

resorting to §2(f) is necessary, the examining attorney may treat the statements as surplusage. If it is necessary to communicate with the applicant about another matter, the examining attorney should inform the applicant that the statements are being treated as surplusage. If it is otherwise unnecessary to communicate with the applicant, the examining attorney should delete the statements from the Trademark database, enter a Note to the File in the record indicating that this has been done, and approve the application for publication. The documents containing the surplusage will remain in the record, but a §2(f) claim will not be printed in the *Official Gazette* or on the certificate of registration. See [TMEP §817](#) regarding preparation of applications for publication or issuance.

### **1212.02(e) Disclaimers in Applications Claiming Distinctiveness under §2(f)**

Section 6(a) of the Trademark Act, 15 U.S.C. §1056(a), states, in part, “The Director may require the applicant to disclaim an unregistrable component of a mark otherwise registrable.” *See In re Creative Goldsmiths of Wash., Inc.*, 229 USPQ 766, 768 (TTAB 1986) (“[W]e conclude that it is within the discretion of an Examining Attorney to require the disclaimer of an unregistrable component (such as a common descriptive, or generic, name) of a composite mark sought to be registered on the Principal Register under the provisions of Section 2(f).”).

### **1212.02(f) Section 2(f) Claim in Part**

#### **1212.02(f)(i) Standards for Establishing Acquired Distinctiveness for Claims of §2(f) in Part**

A claim of acquired distinctiveness may apply to a portion of a mark (a claim of §2(f) “in part”). The standards for establishing acquired distinctiveness are the same whether a claim of distinctiveness pertains to the entire mark or a portion of it. However, examining attorneys must focus their review of the evidence submitted on the portion of the mark for which acquired distinctiveness is claimed, rather than on the entire mark.

Three basic types of evidence may be used to establish acquired distinctiveness for claims of §2(f) in part:

- (1) A claim of ownership of one or more prior registrations on the Principal Register of the *relevant portion of the mark* for goods or services that are the same as or related to those named in the pending application ( *see* 37 C.F.R. §2.41(b); [TMEP §§1212.04–1212.04\(e\)](#));
- (2) A statement verified by the applicant that the *relevant portion of the mark* has become distinctive of the applicant’s goods or services by reason of substantially exclusive and continuous use in commerce by the applicant for the five years before the date when the claim of distinctiveness is made ( *see* 37 C.F.R. §2.41(b); [TMEP §§1212.05–1212.05\(d\)](#)); or
- (3) Actual evidence of acquired distinctiveness of the *relevant portion of the mark* ( *see* 37 C.F.R. §2.41(a); [TMEP §§1212.06–1212.06\(e\)\(iv\)](#)).

As with all claims of acquired distinctiveness, the amount and character of evidence required depends on the facts of each case and the nature of the mark sought to be registered. *See Roux Labs., Inc. v. Clairol Inc.*, 427 F.2d 823, 829, 166 USPQ 34, 39 (C.C.P.A. 1970); *In re Hehr Mfg. Co.*, 279 F.2d 526, 528, 126 USPQ 381, 383 (C.C.P.A. 1960); *In re Gammon Reel, Inc.*, 227 USPQ 729, 730 (TTAB 1985); [TMEP](#)

[§1212.01](#). Moreover, a determination regarding the acceptability of a §2(f) claim depends on the nature of the mark and/or the evidence provided by the applicant. See TMEP §§[1212.04\(a\)](#), [1212.05\(a\)](#), and [1212.06](#).

### **1212.02(f)(ii) Appropriate/Inappropriate Situations for Claiming §2(f) in Part**

When a claim of acquired distinctiveness applies to a portion of a mark, the applicant must clearly identify the portion of the mark for which distinctiveness is claimed.

Generally, the element that is the subject of the §2(f) claim must present a separate and distinct commercial impression apart from the other elements of the mark. That is, it must be a separable element in order for the applicant to assert that it has acquired distinctiveness as a mark. Consequently, if a mark is unitary for purposes of avoiding a disclaimer, a claim of §2(f) in part would generally not be appropriate since the elements are so merged together that they cannot be regarded as separable. If appropriate, the applicant can claim §2(f) as to the entire unitary mark.

See [TMEP §1212.09\(b\)](#) regarding claims of §2(f) in part in §1(b) applications, and [TMEP §1212.08](#) regarding claims of §2(f) in part in §44 and §66a applications.

See also [§1212.10](#) for information on printing §2(f) in part notations and limitation statements.

### **1212.02(f)(ii)(A) Appropriate Situations for Claiming §2(f) in Part**

#### *Descriptive Matter Combined with an Inherently Distinctive Element*

Claiming §2(f) in part should generally be reserved for those situations where descriptive matter is combined with an inherently distinctive element, such as arbitrary words or an inherently distinctive design, and where the descriptive matter presents a separate and distinct commercial impression apart from the other matter in the mark.

For example, if the mark is TASTY SNACKERS for potato chips and the applicant can show acquired distinctiveness as to the descriptive word TASTY, the applicant must limit the claim under §2(f) to the word TASTY (i.e., “2(f) in part as to TASTY”) since the term SNACKERS is inherently distinctive.

Similarly, if the mark is TASTY SNACKERS POTATO CHIPS for potato chips and the applicant can show acquired distinctiveness as to TASTY, the applicant must limit the claim under §2(f) to the word TASTY (i.e., “2(f) in part as to TASTY”) since the term SNACKERS is inherently distinctive. The applicant must also disclaim the generic wording POTATO CHIPS.

Moreover, if the mark is TASTY POTATO CHIPS combined with a design for potato chips and the applicant can show acquired distinctiveness as to the wording TASTY POTATO CHIPS, the applicant must limit the claim under §2(f) to the wording TASTY POTATO CHIPS (i.e., “2(f) in part as to TASTY POTATO CHIPS”). The applicant must also disclaim the generic wording POTATO CHIPS.

Alternatively, if the mark is TASTY POTATO CHIPS combined with an inherently distinctive design for potato chips and the applicant can only show acquired distinctiveness as to TASTY (e.g., because the applicant had not previously used the entire wording TASTY POTATO CHIPS), the applicant must limit the claim under §2(f) to the word TASTY (i.e., “2(f) in part as to TASTY”). The applicant must also disclaim the generic wording POTATO CHIPS.

*Geographically Descriptive Matter Combined with an Inherently Distinctive Element*

Claims of §2(f) in part are also appropriate when a mark is comprised of geographically descriptive matter combined with an inherently distinctive element, and the geographically descriptive matter presents a separate and distinct commercial impression apart from the other matter in the mark.

For example, if the mark is TEXAS GOLD for car-cleaning preparations and the applicant, who is based in Texas, can show acquired distinctiveness as to TEXAS, the applicant must limit the claim under §2(f) to the word TEXAS only (i.e., “2(f) in part as to TEXAS”) since the term GOLD is inherently distinctive.

Similarly, if the mark is TEXAS combined with an inherently distinctive design element for car-cleaning preparations and the applicant, who is again from Texas, can show acquired distinctiveness as to the wording in the mark, the applicant must limit the claim under §2(f) to the word TEXAS only (i.e., “2(f) in part as to TEXAS”).

See [TMEP §1210.07\(b\)](#) for further information regarding the registrability of geographic terms under §2(f) in part.

*Surname Combined with Generic Wording*

Applicants may also claim §2(f) in part for marks comprised of a surname combined with generic wording, when the applicant can show acquired distinctiveness only as to the surname.

For example, if the mark is JONES JEANS for pants and the applicant can only show acquired distinctiveness as to JONES (because the applicant had not previously used the entire wording JONES JEANS, for example), the applicant must limit the claim under §2(f) to the surname JONES only (i.e., “2(f) in part as to JONES”). The applicant must also disclaim the generic wording JEANS. However, this situation is rare, and the record must clearly reflect that the applicant can only show acquired distinctiveness as to the claimed portion of the mark. Note, by contrast, that if the applicant’s prior use is of the entire mark, JONES JEANS, a claim of §2(f) in part would be incorrect because the claim of acquired distinctiveness should apply to the entire mark. That is, in this example, the proper claim would be §2(f) as to JONES JEANS with a separate disclaimer of JEANS.

*As an Alternative to a Disclaimer*

A claim of §2(f) in part may be offered as an alternative to a disclaimer requirement, if it appears that the applicant can establish acquired distinctiveness in the relevant portion of the mark.

For example, if the mark is MOIST MORSELS combined with an inherently distinctive design for various food items, the applicant must enter a disclaimer of MOIST MORSELS or, if appropriate, a claim of §2(f) in part as to MOIST MORSELS.

Examining attorneys are not required to offer the applicant the option of claiming §2(f) in part when issuing a disclaimer requirement. However, it is not uncommon for an applicant to respond to a disclaimer requirement

with a claim of §2(f) in part instead of the required disclaimer, and this option may be offered in the first Office action, if appropriate.

### **1212.02(f)(ii)(B) Inappropriate Situations for Claiming §2(f) in Part**

#### *Claim Applies to Entire Mark*

When a mark is comprised of merely descriptive matter, geographically descriptive matter, or a surname combined with generic matter, and the applicant has made a prima facie case of acquired distinctiveness, the applicant's §2(f) claim should generally refer to the entire mark as used, with a separate disclaimer of any generic term(s).

For example, if the mark is NATIONAL CAR RENTAL for car-rental services and the applicant can show acquired distinctiveness as to the entire mark, the proper claim is §2(f) as to NATIONAL CAR RENTAL with a separate disclaimer of the generic wording CAR RENTAL. Similarly, if the mark is NATIONAL CAR RENTAL combined with an inherently distinctive design element, and the applicant can show acquired distinctiveness as to the entire wording, the proper §2(f) statement is §2(f) in part as to the wording NATIONAL CAR RENTAL with a separate disclaimer of CAR RENTAL. In these examples, it would be improper to limit the §2(f) statement to the word NATIONAL because the applicant is not claiming acquired distinctiveness as to NATIONAL, but rather as to the wording NATIONAL CAR RENTAL.

However, if the applicant can show acquired distinctiveness only as to the word NATIONAL (e.g., because the applicant had not previously used the entire wording NATIONAL CAR RENTAL), the applicant may claim §2(f) in part as to NATIONAL and must separately disclaim CAR RENTAL. Similarly, if the mark is NATIONAL CAR RENTAL combined with an inherently distinctive design element, and the applicant can show acquired distinctiveness only as to the word NATIONAL, the proper §2(f) statement is §2(f) in part as to the word NATIONAL with a separate disclaimer of CAR RENTAL. As noted above, this situation is rare, and the record must clearly reflect that the applicant can show acquired distinctiveness only as to the claimed portion of the mark.

If a §2(f) in part claim is improperly provided by the applicant when the record reflects that the §2(f) claim should apply to the entire mark, the examining attorney must issue a new requirement to correct the §2(f) claim.

#### *Inappropriate Alternative to a Disclaimer*

In some situations, §2(f) in part is not an acceptable alternative to a disclaimer requirement. Specifically, if an applicant's claim of distinctiveness applies to only part of a mark and the examining attorney determines that (1) the claimed portion of the mark is unregistrable (e.g., generic) and therefore the §2(f) claim is of no avail or (2) although the claimed portion is registrable, the applicant has failed to establish acquired distinctiveness, the examining attorney may require a disclaimer of that portion of the mark, assuming a disclaimer is otherwise appropriate. *See In re Lillian Vernon Corp.*, 225 USPQ 213 (TTAB 1985) (affirming requirement for disclaimer of PROVENDER in application to register PROVENDER and design for "mail order services in the gourmet, bath and gift item field," "provender" meaning "food" (claim of §2(f) distinctiveness in part held unacceptable)); *cf. In re Chopper Indus.*, 222 USPQ 258 (TTAB 1984) (reversing requirement for disclaimer of CHOPPER in application to register CHOPPER 1 and design for wood log splitting axes (claim of §2(f) distinctiveness in part held acceptable)).

#### *Relying on a Claim of Ownership of a Prior Registration*

In certain cases, an applicant may not rely on ownership of one or more prior registrations on the Principal Register of the relevant portion of the mark, for goods or services that are the same as or related to those named in the pending application, to support a claim of §2(f) in part.

First, if the term for which the applicant seeks to prove distinctiveness was disclaimed in the claimed prior registration, the prior registration may not be accepted as prima facie evidence of acquired distinctiveness. See *Kellogg Co. v. Gen. Mills, Inc.*, 82 USPQ2d 1766, 1771 n.5 (TTAB 2007); *In re Candy Bouquet Int'l, Inc.*, 73 USPQ2d 1883, 1889-90 (TTAB 2004); [TMEP §1212.04\(a\)](#). For example, if the mark is TASTY SNACKERS for potato chips and the applicant attempts to rely on a prior registration for the mark TASTY combined with an inherently distinctive design, with TASTY disclaimed, for the same goods, to support its claim of acquired distinctiveness as to the descriptive word TASTY, such evidence would not be sufficient since the word TASTY was disclaimed in the prior registration. Absent additional evidence to show acquired distinctiveness as to TASTY, the examining attorney must require the applicant to delete the claim of §2(f) in part, and instead provide a disclaimer of the term TASTY.

Second, when an applicant is claiming §2(f) in part as to only a portion of its mark, the mark in the claimed prior registration must be the same as or the legal equivalent of the portion of the mark for which the applicant is claiming acquired distinctiveness. A mark is the legal equivalent of a portion of another mark if it creates the same, continuing commercial impression such that the consumer would consider the mark to be the same as the portion of the other mark. See [TMEP §1212.04\(b\)](#) and cases cited therein.

#### *§2(f) in Part versus §2(f) Claim Restricted to Particular Goods, Services, or Classes*

A claim of §2(f) in part should not be confused with a §2(f) claim restricted to certain classes in a multiple-class application or to a portion of the goods/services within a single class. Such a restriction can be made *regardless* of whether the applicant is claiming §2(f) for the entire mark or §2(f) in part for a portion of the mark. See [TMEP §1212.02\(j\)](#).

### **1212.02(g) Examining Attorney's Role in Suggesting §2(f) or Appropriate Kind/Amount of Evidence**

In a first action refusing registration, the examining attorney should suggest, where appropriate, that the applicant amend its application to seek registration under §2(f). For example, this should be done as a matter of course, if otherwise appropriate, in cases where registration is refused under §2(e)(4) on the ground that the mark is primarily merely a surname, and the applicant has recited dates of use that indicate that the mark has been in use in commerce for at least five years.

If the examining attorney determines that an applicant's evidence is insufficient to establish that the mark has acquired distinctiveness, the examining attorney should suggest, where appropriate, that the applicant submit additional evidence. See *In re Half Price Books, Records, Magazines, Inc.*, 225 USPQ 219, 220 n.2 (TTAB 1984) (Noting that applicant was specifically invited to seek registration pursuant to §2(f) but, after amending its application to do so, was refused registration on the ground that the mark was incapable of acquiring distinctiveness, the Board stated that, in fairness to applicant, this practice should be avoided where possible).

The examining attorney should not "require" that the applicant submit evidence of secondary meaning. There would be no practical standard for a proper response to this requirement, nor would there be a sound basis for appeal from the requirement. See *In re Capital Formation Counselors, Inc.*, 219 USPQ 916, 917 n.2 (TTAB 1983) ("Section 2(f) is not a provision on which registration can be refused.").

The examining attorney should not specify the kind or the amount of evidence sufficient to establish that a mark has acquired distinctiveness. It is the responsibility of the applicant to submit evidence to establish that the mark has acquired distinctiveness. See [TMEP §1212.01](#). However, the examining attorney may make a suggestion as to a course of action, if the examining attorney believes this would further the prosecution of the application.

### **1212.02(h) Nonfinal and Final Refusals**

If an application is filed under §2(f) of the Trademark Act and the examining attorney determines that (1) the mark is not inherently distinctive, and (2) the applicant's evidence of secondary meaning is insufficient to establish that the mark has acquired distinctiveness, the examining attorney will issue a nonfinal action refusing registration on the Principal Register pursuant to the appropriate section of the Trademark Act (e.g., §2(e)(1)), and will separately explain why the applicant's evidence of secondary meaning is insufficient to overcome the underlying statutory basis for refusal. The examining attorney should suggest, where appropriate, that the applicant submit additional evidence. See [TMEP §1212.02\(g\)](#) concerning the examining attorney's role in suggesting a claim of distinctiveness under §2(f).

If an application is not filed under §2(f) and the examining attorney determines that the mark is not inherently distinctive, the examining attorney will issue a nonfinal action refusing registration on the Principal Register under the appropriate section of the Act (e.g., §2(e)(1)). The examining attorney should suggest, where appropriate, that the applicant amend its application to claim distinctiveness under §2(f).

Thereafter, if the applicant amends its application to seek registration under §2(f), a new issue is raised as to the sufficiency of the applicant's evidence of secondary meaning ( see [TMEP §714.05\(a\)\(i\)](#)). The underlying statutory basis for refusal remains the same (i.e., §2(e)(1)), but the issue changes from whether the underlying refusal is warranted to whether the matter has acquired distinctiveness. If the examining attorney is persuaded that a prima facie case of acquired distinctiveness has been established, the examining attorney will approve the application for publication under §2(f). If the examining attorney determines that the applicant's evidence is insufficient to establish that the matter has acquired distinctiveness, the examining attorney will issue a second nonfinal action repeating the underlying statutory basis for refusal (e.g., §2(e)(1)), and explaining why the applicant's evidence is insufficient to overcome the stated refusal.

The examining attorney cannot issue a final refusal on the underlying statutory basis of the original refusal, upon an applicant's initial assertion of a §2(f) claim. The mere assertion of distinctiveness under §2(f) raises a new issue. See *In re Educ. Commc'ns, Inc.*, 231 USPQ 787, 787 n.2 (TTAB 1986). Even if the applicant has submitted, in support of the §2(f) claim, a statement of five years' use that is technically defective (e.g., not verified or comprising incorrect language), the assertion of §2(f) distinctiveness still constitutes a new issue.

*Exception:* The examining attorney may issue a final refusal upon an applicant's initial assertion of a §2(f) claim if the amendment is irrelevant to the outstanding refusal. See [TMEP §714.05\(a\)\(i\)](#). See also [TMEP §§1212.02\(a\)](#) and [1212.02\(i\)](#) regarding situations where it is and is not appropriate to submit a claim of acquired distinctiveness to overcome a refusal.

After the examining attorney has issued a nonfinal action refusing registration on the Principal Register with a finding that the applicant's evidence of secondary meaning is insufficient to overcome the stated refusal, the applicant may elect to submit additional arguments and/or evidence regarding secondary meaning. If, after considering this submission, the examining attorney is persuaded that the applicant has established a prima facie case of acquired distinctiveness, the examining attorney will approve the application for

publication under §2(f). If the examining attorney is not persuaded that the applicant has established a prima facie case of acquired distinctiveness, and the application is otherwise in condition for final refusal, the examining attorney will issue a final refusal pursuant to the appropriate section of the Act (e.g., §2(e)(1)), with a finding that the applicant's evidence of acquired distinctiveness is insufficient to overcome the stated refusal. *See In re Capital Formation Counselors, Inc.*, 219 USPQ 916, 917 n.2 (TTAB 1983).

In any action in which the examining attorney indicates that the evidence of record is insufficient to establish that the mark has acquired distinctiveness, the examining attorney must specify the reasons for this determination. *See In re Interstate Folding Box Co.*, 167 USPQ 241, 243 (TTAB 1970); *In re H. A. Friend & Co.*, 158 USPQ 609, 610 (TTAB 1968).

### **1212.02(i) Section 2(f) Claim with Respect to Incapable Matter**

If matter is generic, functional, or purely ornamental, or otherwise fails to function as a mark, the matter is unregistrable. *See, e.g., In re Bongrain Int'l Corp.*, 894 F.2d 1316, 1317 n.4, 13 USPQ2d 1727, 1728 n.4 (Fed. Cir. 1990) (“If a mark is generic, incapable of serving as a means ‘by which the goods of the applicant may be distinguished from the goods of others’ ... it is not a trademark and can not be registered under the Lanham Act.”); *H. Marvin Ginn Corp. v. Int'l Ass'n of Fire Chiefs, Inc.*, 782 F.2d 987, 989, 228 USPQ 528, 530 (Fed. Cir. 1986), and cases cited therein (“A generic term ... can never be registered as a trademark because such a term is ‘merely descriptive’ within the meaning of §2(e)(1) and is incapable of acquiring *de jure* distinctiveness under §2(f). The generic name of a thing is in fact the ultimate in descriptiveness.”); *see also In re Melville Corp.*, 228 USPQ 970, 972 (TTAB 1986) (finding BRAND NAMES FOR LESS, for retail store services in the clothing field, “should remain available for other persons or firms to use to describe the nature of their competitive services.”).

It is axiomatic that matter may not be registered unless it is used as a mark, namely, “in a manner calculated to project to purchasers or potential purchasers a single source or origin for the goods in question.” *In re Remington Prods. Inc.*, 3 USPQ2d 1714, 1715 (TTAB 1987). *See, e.g., In re Melville Corp.*, 228 USPQ at 971 n.2 (“If matter proposed for registration does not function as a mark, it is not registrable in accordance with Sections 1 and 2 of the Act because the preambles of those sections limit registration to subject matter within the definition of a trademark.”); *In re Whataburger Sys., Inc.*, 209 USPQ 429, 430 (TTAB 1980) (“[A] designation may not be registered either as a trademark or as a service mark unless it is used as a mark, in such a manner that its function as an indication of origin may be readily perceived by persons encountering the goods or services in connection with which it is used.”).

Therefore, where the examining attorney has determined that matter sought to be registered is not registrable because it is not a mark within the meaning of the Trademark Act, a claim that the matter has acquired distinctiveness under §2(f) as applied to the applicant's goods or services does not overcome the refusal. *See, e.g., TrafFix Devices, Inc. v. Mktg. Displays, Inc.*, 532 U.S. 23, 33, 58 USPQ2d 1001, 1007 (2001) (“Functionality having been established, whether MDI'S dual spring design has acquired secondary meaning need not be considered.”); *In re R.M. Smith, Inc.*, 734 F.2d 1482, 1484-85, 222 USPQ 1, 3 (Fed. Cir. 1984) (“Evidence of distinctiveness is of no avail to counter a *de jure* functionality rejection.”); *Stuart Spector Designs, Ltd. v. Fender Musical Instruments Corp.*, 94 USPQ2d 1549, 1554 (TTAB 2009) (stating that a product design may become generic and, thus, cannot be registered, regardless of applicant's claim of acquired distinctiveness); *In re Tilcon Warren, Inc.*, 221 USPQ 86, 88 (TTAB 1984) (“Long use of a slogan which is not a trademark and would not be so perceived does not, of course, transform the slogan into a trademark.”); *In re Mancino*, 219 USPQ 1047, 1048 (TTAB 1983) (“Since the refusal ... was based on applicant's failure to demonstrate technical service mark use, the claim of distinctiveness under Section 2(f) was of no relevance to the issue in the case.”).

As discussed above, evidence of acquired distinctiveness will not alter the determination that matter is unregistrable. However, the examining attorney must review the evidence and make a separate, alternative, determination as to whether, if the proposed mark is ultimately determined to be capable, the applicant's evidence is sufficient to establish acquired distinctiveness. This will provide a more complete record in the event that the applicant appeals and prevails on the underlying refusal. The examining attorney must also consider whether the applicant's evidence has any bearing on the underlying refusal. See [TMPEP §§1209.02–1209.02\(b\)](#) regarding the procedure for descriptiveness and/or generic refusals.

If the examining attorney fails to separately address the sufficiency of the §2(f) evidence, this may be treated as a concession that the evidence would be sufficient to establish distinctiveness if the mark is ultimately found to be capable. *Cf. In re Dietrich*, 91 USPQ2d 1622, 1625 (TTAB 2009), in which the Board held that an examining attorney had “effectively conceded that, assuming the mark is not functional, applicant's evidence is sufficient to establish that the mark has acquired distinctiveness,” where the examining attorney rejected the applicant's §2(f) claim on the ground that applicant's bicycle wheel configuration was functional and thus unregistrable even under §2(f), but did not specifically address the sufficiency of the §2(f) evidence or the question of whether the mark would be registrable under §2(f) if it were ultimately found to be nonfunctional.

*See also In re Wakefern Food Corp.*, 222 USPQ 76, 79 (TTAB 1984) (finding applicant's evidence relating to public perception of WHY PAY MORE! entitled to relatively little weight, noting that the evidence is relevant to the issue of whether the slogan functions as a mark for applicant's supermarket services).

### **1212.02(j) Section 2(f) Claim Restricted to Particular Goods/Services/Classes**

An applicant may claim acquired distinctiveness as to certain classes in a multiple-class application, or as to only a portion of the goods/services within a single class. The applicant must clearly identify the goods/services/classes for which distinctiveness is claimed. The standards for establishing acquired distinctiveness are the same whether the claim of distinctiveness pertains to all or to only a portion of the goods/services.

If the examining attorney determines that a claim of distinctiveness as to a portion of the goods/services/classes is appropriate, the examining attorney must ensure that the “§2(f)” field in the Trademark database indicates that the §2(f) claim is restricted to certain goods/services/classes, and that those goods/services/classes are clearly identified in the restriction statement of record in the USPTO database. See the following example, where the applicant is claiming §2(f) for the entire mark, but only as to a portion of the goods/services:

#### **MISCELLANEOUS INFORMATION**

**SECTION 2F: YES**  
**Section 2F Restriction**  
**Statement:**

**SECTION 2F IN PART: NO**  
 The 2(f) claim is restricted to  
 class(es) <specify classes> as  
 to the <specify goods/services>.

See also the following example, where the applicant is claiming §2(f) in part (not as to the entire mark), restricted to a portion of the goods/services:

<b>MISCELLANEOUS INFORMATION</b>	
<b>SECTION 2F: NO</b>	<b>SECTION 2F IN PART: YES</b>
<b>Section 2F Restriction Statement:</b>	The 2(f) in part claim is restricted to class(es) <specify classes> as to the <specify goods/services>.

A separate limitation statement is also required for claims of §2(f) in part. See [TMEP §1212.10](#).

### 1212.03 Evidence of Distinctiveness under §2(f)

*37 CFR §2.41 Proof of distinctiveness under section 2(f).*

(a) When registration is sought of a mark which would be unregistrable by reason of section 2(e) of the Act but which is said by applicant to have become distinctive in commerce of the goods or services set forth in the application, applicant may, in support of registrability, submit with the application, or in response to a request for evidence or to a refusal to register, affidavits, or declarations in accordance with §2.20, depositions, or other appropriate evidence showing duration, extent and nature of use in commerce and advertising expenditures in connection therewith (identifying types of media and attaching typical advertisements), and affidavits, or declarations in accordance with §2.20, letters or statements from the trade or public, or both, or other appropriate evidence tending to show that the mark distinguishes such goods or services.

(b) In appropriate cases, ownership of one or more prior registrations on the Principal Register or under the Act of 1905 of the same mark may be accepted as prima facie evidence of distinctiveness. Also, if the mark is said to have become distinctive of applicant's goods by reason of substantially exclusive and continuous use in commerce thereof by applicant for the five years before the date on which the claim of distinctiveness is made, a showing by way of statements which are verified or which include declarations in accordance with §2.20, in the application may, in appropriate cases, be accepted as prima facie evidence of distinctiveness. In each of these situations, however, further evidence may be required.

“To establish secondary meaning, a manufacturer must show that, in the minds of the public, the primary significance of a product feature or term is to identify the source of the product rather than the product itself.” *Inwood Labs., Inc. v. Ives Labs., Inc.*, 456 U.S. 844, 851 n.11, 214 USPQ 1, 4 n.11 (1982).

### 1212.04 Prior Registrations as Proof of Distinctiveness

Trademark Rule 2.41(b), 37 C.F.R. §2.41(b), provides that the examining attorney may accept, as prima facie evidence of acquired distinctiveness, ownership by the applicant of one or more prior registrations of the same mark on the Principal Register or under the Act of 1905. See [TMEP §1212.04\(b\)](#) as to what constitutes the “same mark,” and [TMEP §§1212.09–1212.09\(b\)](#) concerning §1(b) applications.

The rule states that ownership of existing registrations to establish acquired distinctiveness “may” be considered acceptable in “appropriate cases,” and that the USPTO may, at its option, require additional evidence of distinctiveness. *In re Dial-A-Mattress Operating Corp.*, 240 F.3d 1341, 1347, 57 USPQ2d 1807, 1812 (Fed. Cir. 2001); *In re Loew's Theatres, Inc.*, 769 F.2d 764, 769, 226 USPQ 865, 869 (Fed. Cir. 1985).

The following are general guidelines regarding claiming ownership of prior registrations as a method of establishing acquired distinctiveness.

### 1212.04(a) Sufficiency of Claim Vis-à-Vis Nature of the Mark

The examining attorney has the discretion to determine whether the nature of the mark sought to be registered is such that a claim of ownership of a prior registration for the same or similar goods or services is enough to establish acquired distinctiveness. For example, if the mark sought to be registered is deemed to be highly descriptive or misdescriptive of the goods or services named in the application, the examining attorney may require additional evidence of acquired distinctiveness. *See In re Loew's Theatres, Inc.*, 769 F.2d 764, 769, 226 USPQ 865, 869 (Fed. Cir. 1985) (finding claim of ownership of a prior registration insufficient to establish acquired distinctiveness where registration was refused as primarily geographically deceptively misdescriptive).

If the term for which the applicant seeks to prove distinctiveness was disclaimed in the prior registration, the prior registration may not be accepted as prima facie evidence of acquired distinctiveness. *Kellogg Co. v. Gen. Mills, Inc.*, 82 USPQ2d 1766, 1771 n.5 (TTAB 2007); *In re Candy Bouquet Int'l, Inc.*, 73 USPQ2d 1883, 1889-90 (TTAB 2004).

### 1212.04(b) "Same Mark"

A proposed mark is the "same mark" as a previously registered mark for the purpose of 37 C.F.R. §2.41(b) if it is the "legal equivalent" of such a mark. "A mark is the legal equivalent of another if it creates the same, continuing commercial impression such that the consumer would consider them both the same mark." *In re Dial-A-Mattress Operating Corp.*, 240 F.3d 1341, 1347, 57 USPQ2d 1807, 1812 (Fed. Cir. 2001); *see also In re Brouwerij Bosteels*, 96 USPQ2d 1414, 1423 (TTAB 2010) (finding three-dimensional product packaging trade dress mark is not the legal equivalent of a two-dimensional design logo); *In re Nielsen Bus. Media, Inc.*, 93 USPQ2d 1545, 1547-48 (TTAB 2010) (finding THE BOLLYWOOD REPORTER is not the legal equivalent of the registered marks THE HOLLYWOOD REPORTER, THEHOLLYWOODREPORTER.COM, and THE HOLLYWOOD REPORTER STUDIO BLU-BOOK); *In re Binion*, 93 USPQ2d 1531, 1539 (TTAB 2009) (finding BINION and BINION'S are not the legal equivalents of the registered marks JACK BINION and JACK BINION'S); *Bausch & Lomb Inc. v. Leupold & Stevens Inc.*, 6 USPQ2d 1475, 1477 (TTAB 1988) ("The words GOLDEN RING, while they are used to describe the device, are by no means identical to or substantially identical to the gold ring device trademark."); *In re Best Prods. Co.*, 231 USPQ 988, 989 n.6 (TTAB 1986) ("[W]e infer in the instant case that the differences between the marks BEST & Des. and BEST JEWELRY & Des., and between the identifications of services in their respective registrations, were deemed to be immaterial differences."); *In re Loew's Theatres, Inc.*, 223 USPQ 513, 514 n.5 (TTAB 1984), *aff'd*, 769 F.2d 764, 226 USPQ 865 (Fed. Cir. 1985) ("We do not, however, agree with the Examining Attorney that a minor difference in the marks (i.e., here, merely that the mark of the existing registration is in plural form) is a proper basis for excluding any consideration of this evidence under the rule."); *In re Flex-O-Glass, Inc.*, 194 USPQ 203, 205-06 (TTAB 1977) ("[P]ersons exposed to applicant's registered mark ... would, upon encountering [applicant's yellow rectangle and red circle design] ..., be likely to accept it as the same mark or as an inconsequential modification or modernization thereof... [A]pplicant may 'tack on' to its use of the mark in question, the use of the registered mark ... and therefore may properly rely upon its registration in support of its claim of distinctiveness herein.").

*See, e.g., Van Dyne-Crotty, Inc. v. Wear-Guard Corp.*, 926 F.2d 1156, 1159, 17 USPQ2d 1866, 1868 (Fed. Cir. 1991) regarding the concept of "tacking" with reference to prior use of a legally equivalent mark.

When an applicant is claiming §2(f) in part as to only a portion of its mark, then the previously registered mark must be the legal equivalent of the portion for which the applicant is claiming acquired distinctiveness. See [TMEP §1212.02\(f\)](#) regarding claims of acquired distinctiveness as to a portion of a mark.

### **1212.04(c) Relatedness of Goods or Services**

The examining attorney must determine whether the goods or services named in the application are sufficiently similar to the goods or services named in the prior registration(s). If the relatedness is self-evident, the examining attorney can generally accept the §2(f) claim without additional evidence. This is most likely to occur with ordinary consumer goods or services where the nature of the goods or services is commonly known and readily apparent (e.g., a prior registration for hair shampoo and new application for hair conditioner). However if the relatedness is not self-evident, the examining attorney must not accept the §2(f) claim without evidence and an explanation demonstrating the purported relatedness between the goods or services. This is especially likely to occur with industrial goods or services where there may in fact be a high degree of relatedness, but it would not be obvious to someone who is not an expert in the field. See *Bausch & Lomb Inc. v. Leupold & Stevens Inc.*, 6 USPQ2d 1475, 1478 (TTAB 1988) (“Applicant’s almost total reliance on the distinctiveness which its gold ring device has achieved vis-à-vis rifle scopes and handgun scopes is simply not sufficient by itself to establish that the same gold ring device has become distinctive vis-à-vis binoculars and spotting scopes.”); *In re Best Prods. Co.*, 231 USPQ 988, 989 n.6 (TTAB 1986) (“[W]e infer in the instant case that the differences between the marks BEST & Des. and BEST JEWELRY & Des., and between the identifications of services in their respective registrations [‘mail order and catalog showroom services’ and ‘retail jewelry store services’], were deemed to be immaterial differences.”); *In re Owens-Illinois Glass Co.*, 143 USPQ 431, 432 (TTAB 1964) (holding applicant’s ownership of prior registration of LIBBEY for cut-glass articles acceptable as prima facie evidence of distinctiveness of identical mark for plastic tableware, the Board stated, “Cut-glass and plastic articles of tableware are customarily sold in the same retail outlets, and purchasers of one kind of tableware might well be prospective purchasers of the other.”); *In re Lytle Eng’g & Mfg. Co.*, 125 USPQ 308, 309 (TTAB 1960) (holding applicant’s ownership of prior registration of LYTLE for various services, including the planning, preparation, and production of technical publications, acceptable as prima facie evidence of distinctiveness of identical mark for brochures, catalogs, and bulletins).

### **1212.04(d) Registration Must Be in Full Force and Effect and on Principal Register or under Act of 1905**

Trademark Rule 2.41(b), 37 C.F.R. §2.41(b), states that ownership of a prior registration “on the Principal Register or under the Act of 1905” may be accepted as prima facie evidence of distinctiveness. Therefore, claims of acquired distinctiveness under §2(f) cannot be based on ownership of registrations on the Supplemental Register. See *In re Canron, Inc.*, 219 USPQ 820, 822n.2 (TTAB 1983).

Moreover, a claim of acquired distinctiveness cannot be based on a registration that is cancelled or expired. See *In re BankAmerica Corp.*, 229 USPQ 852, 853 (TTAB 1986). When an examining attorney considers a §2(f) claim based on ownership of one or more prior registrations, the examining attorney must confirm, in the records of the USPTO, that the claimed registrations were issued on the Principal Register or under the Act of 1905 and that they are in full force and effect.

### **1212.04(e) Form of §2(f) Claim Based on Ownership of Prior Registrations**

The following language may be used to claim distinctiveness under §2(f) on the basis of ownership of one or more prior registrations:

The mark has become distinctive of the goods and/or services as evidenced by ownership of U.S. Registration No(s). \_\_\_\_\_ on the Principal Register for the same mark for the same or related goods and/or services.

37 C.F.R. §2.41(b).

If the applicant is relying solely on its ownership of one or more prior registrations as proof of acquired distinctiveness, the §2(f) claim does not have to be verified. Therefore, an applicant or an applicant's attorney may authorize amendment of an application to add such a claim through an examiner's amendment, if otherwise appropriate.

### **1212.05 Five Years of Use as Proof of Distinctiveness**

Section 2(f) of the Trademark Act, 15 U.S.C. §1052(f), provides that “proof of substantially exclusive and continuous use” of a designation “as a mark by the applicant in commerce for the five years before the date on which the claim of distinctiveness is made” may be accepted as prima facie evidence that the mark has acquired distinctiveness as used with the applicant's goods or services in commerce. *See also* 37 C.F.R. §2.41(b).

The Trademark Act previously required that the relevant five-year period precede the filing date of the application. The Trademark Law Revision Act of 1988, Pub. L. No. 100-667, 102 Stat. 3935 (1988), revised §2(f) of the Act to provide for a prima facie showing of acquired distinctiveness based on five years' use running up to the date the claim is made. Under the revised provision, any five-year claim submitted on or after November 16, 1989, is subject to the new time period. This applies even if the application was filed prior to that date.

Section 2(f) of the Act and 37 C.F.R. §2.41(b) state that reliance on a claim of five years' use to establish acquired distinctiveness “may” be acceptable in “appropriate cases.” The USPTO may, at its option, require additional evidence of distinctiveness. Whether a claim of five years' use will be deemed acceptable to establish that the mark has acquired distinctiveness depends largely on the nature of the mark in relation to the specified goods or services.

The following are general guidelines regarding the statutorily suggested proof of five years' use as a method of establishing acquired distinctiveness.

#### **1212.05(a) Sufficiency of Claim Vis-à-Vis Nature of the Mark**

For most surnames, the statement of five years' use will be sufficient to establish acquired distinctiveness.

The amount of evidence necessary to establish secondary meaning varies – “the greater the degree of descriptiveness the term has, the heavier the burden to prove it has attained secondary meaning.” *In re Bongrain Int'l Corp.*, 894 F.2d 1316, 1317 n.4, 13 USPQ2d 1727, 1728 n.4 (Fed. Cir. 1990) (citing *Yamaha Int'l Corp. v. Hoshino Gakki Co.*, 840 F.2d 1572, 1581, 6 USPQ2d 1001, 1008 (Fed. Cir. 1988)).

Accordingly, for marks refused under §2(e)(1) or §2(e)(2), whether the statement of five years' use is sufficient in and of itself to establish acquired distinctiveness depends on the degree to which the mark is descriptive or misdescriptive. If the mark is highly descriptive or misdescriptive of the goods or services named in the application, the statement of five years' use alone will be deemed insufficient to establish acquired distinctiveness. *See Alcatraz Media, Inc. v. Chesapeake Marine Tours Inc.*, 107 USPQ2d 1750,

1766 (TTAB 2013) (“Given the highly descriptive nature of registrant’s mark [ANNAPOLIS TOURS], continuous use alone since 1992 would not be sufficient to establish acquired distinctiveness.”); *In re Noon Hour Food Prods., Inc.*, 88 USPQ2d 1172 (TTAB 2008) (finding, despite applicant’s claim of use in commerce for almost one hundred years, as well as an “inadvertently cancelled” seventy-year old registration for the mark BOND-OST for cheese, current evidence clearly showed the mark was generic for the goods, and assuming arguendo that BOND-OST is not generic, that applicant had failed to establish acquired distinctiveness of the highly descriptive mark); *In re Crystal Geysler Water Co.*, 85 USPQ2d 1374 (TTAB 2007) (holding applicant’s evidence of acquired distinctiveness, including a claim of use since 1990, sales of more than 7,650,000,000 units of its goods, and extensive display of its mark CRYSTAL GEYSER ALPINE SPRING WATER on advertising and delivery trucks and promotional paraphernalia, insufficient to establish that the highly descriptive phrase ALPINE SPRING WATER had acquired distinctiveness for applicant’s bottled spring water); *In re Kalmbach Publ’g Co.*, 14 USPQ2d 1490 (TTAB 1989) (holding applicant’s sole evidence of acquired distinctiveness, a claim of use since 1975, insufficient to establish that the highly descriptive, if not generic, designation RADIO CONTROL BUYERS GUIDE had become distinctive of applicant’s magazines); *In re Gray Inc.*, 3 USPQ2d 1558, 1559 (TTAB 1987) (“[T]o support registration of PROTECTIVE EQUIPMENT [for burglar and fire alarms and burglar and fire alarm surveillance services] on the Principal Register a showing considerably stronger than a prima facie statement of five years’ substantially exclusive use is required.”); *cf. In re Synergistics Research Corp.*, 218 USPQ 165 (TTAB 1983) (holding applicant’s declaration of five years’ use sufficient to support registrability under §2(f) of BALL DARTS for equipment sold as a unit for playing a target game, in view of lack of evidence that the term is highly descriptive (e.g., no dictionary evidence of any meaning of BALL DARTS and no evidence of use of the term by competitors or the public)).

For matter that is not inherently distinctive because of its nature (e.g., nondistinctive product design, overall color of a product, mere ornamentation, and sounds for goods that make the sound in their normal course of operation), evidence of five years’ use is not sufficient to show acquired distinctiveness. In such a case, actual evidence that the mark is perceived as a mark for the relevant goods or services would be required to establish distinctiveness. *See generally In re Owens-Corning Fiberglas Corp.*, 774 F.2d 1116, 227 USPQ 417 (Fed. Cir. 1985) (color pink as uniformly applied to applicant’s fibrous glass residential insulation); *In re R.M. Smith, Inc.*, 734 F.2d 1482, 222 USPQ 1 (Fed. Cir. 1984) (configuration of pistol grip water nozzle for water nozzles); *Nextel Commc’ns, Inc. v. Motorola, Inc.*, 91 USPQ2d 1393, 1401 (TTAB 2009) (noting that “the evidence required is in proportion to the degree of nondistinctiveness of the mark at issue” in relation to a sound mark emitted by cellular telephones in their normal course of operation); *In re ic! berlin brillen GmbH*, 85 USPQ2d 2021 (TTAB 2008) (configuration of an earpiece for frames for sunglasses and spectacles comprised of three “fingers” near the hinge); *In re The Black & Decker Corp.*, 81 USPQ2d 1841, 1844 (TTAB 2006) (finding applicant successfully established acquired distinctiveness for the design of a key head for key blanks and various metal door hardware, where evidence submitted in support thereof included twenty-four years of use in commerce and significant evidence regarding industry practice, such that the evidence showed that “it is common for manufacturers of door hardware to use key head designs as source indicators.”); *Edward Weck Inc. v. IM Inc.*, 17 USPQ2d 1142 (TTAB 1990) (color green for medical instruments); *In re Cabot Corp.*, 15 USPQ2d 1224 (TTAB 1990) (configuration of a pillow-pack container for ear plugs and configuration of a pillow-pack container with trade dress (white circle surrounded by blue border) for ear plugs); *In re Star Pharm., Inc.*, 225 USPQ 209 (TTAB 1985) (color combination of drug capsule and seeds therein for methyltestosterone); *In re Craigmyle*, 224 USPQ 791 (TTAB 1984) (configuration of halter square for horse halters).

### **1212.05(b) “Substantially Exclusive and Continuous”**

The five years of use does not have to be exclusive, but may be “substantially” exclusive. This makes allowance for use by others that may be inconsequential or infringing, which does not necessarily invalidate

the applicant's claim. *L.D. Kichler Co. v. Davoil, Inc.*, 192 F.3d 1349, 1352, 52 USPQ2d 1307, 1309 (Fed. Cir. 1999).

The existence of other applications to register the same mark, or other known uses of the mark, does not automatically eliminate the possibility of using this method of proof, but the examining attorney should inquire as to the nature of such use and be satisfied that it is not substantial or does not nullify the claim of distinctiveness. See *Levi Strauss & Co. v. Genesco, Inc.*, 742 F.2d 1401, 1403, 222 USPQ 939, 940-41 (Fed. Cir. 1984) ("When the record shows that purchasers are confronted with more than one (let alone numerous) independent users of a term or device, an application for registration under Section 2(f) cannot be successful, for distinctiveness on which purchasers may rely is lacking under such circumstances."); *Nextel Commc'ns, Inc. v. Motorola, Inc.*, 91 USPQ2d 1393, 1408 (TTAB 2009) (finding opposer's contemporaneous use of the mark in connection with services closely related to applicant's goods rose to the level necessary to rebut applicant's contention of substantially exclusive use); *Target Brands, Inc. v. Hughes*, 85 USPQ2d 1676, 1682-83 (TTAB 2007) (finding substantial use of mark by opposer's parent company and additional use of mark by numerous third parties "seriously undercuts if not nullifies applicant's claim of acquired distinctiveness."); *Marshall Field & Co. v. Mrs. Fields Cookies*, 11 USPQ2d 1355, 1357-58 (TTAB 1989) ("[T]he existence of numerous third party users of a mark, even if junior, might well have a material impact on the Examiner's decision to accept a party's claim of distinctiveness."); *Flowers Indus. Inc. v. Interstate Brands Corp.*, 5 USPQ2d 1580, 1588-89 (TTAB 1987) ("[L]ong and continuous use alone is insufficient to show secondary meaning where the use is not substantially exclusive.").

The use of the mark during the five years must be continuous, without a period of "nonuse" or suspension of trade in the goods or services in connection with which the mark is used.

### **1212.05(c) Use "as a Mark"**

The substantially exclusive and continuous use must be "as a mark." 15 U.S.C. §1052(f). See *In re Craigmyle*, 224 USPQ 791, 793 (TTAB 1984) (finding registrability under §2(f) not established by sales over a long period of time where there was no evidence that the subject matter had been used as a mark); *In re Kwik Lok Corp.*, 217 USPQ 1245, 1248 (TTAB 1983) (holding declarations as to sales volume and advertising expenditures insufficient to establish acquired distinctiveness. "The significant missing element in appellant's case is evidence persuasive of the fact that the subject matter has been used *as a mark.*").

### **1212.05(d) Form of the Proof of Five Years' Use**

If the applicant chooses to seek registration under §2(f), 15 U.S.C. §1052(f), by using the statutory suggestion of five years of use as proof of distinctiveness, the applicant should submit a claim of distinctiveness. For a trademark or service mark, the claim of distinctiveness should read as follows, if accurate:

The mark has become distinctive of the goods and/or services through applicant's substantially exclusive and continuous use in commerce for at least the five years immediately before the date of this statement.

For a certification mark, the claim of distinctiveness should read as follows, if accurate:

The mark has become distinctive of certifying goods and/or services through the substantially exclusive and continuous use of the mark in commerce by authorized parties for at least the five years immediately before the date of this statement.

For a collective membership mark, the claim of distinctiveness should read as follows, if accurate:

The mark has become distinctive of indicating membership in an organization through the substantially exclusive and continuous use of the mark in commerce by members for at least the five years immediately before the date of this statement.

For a collective trademark or service mark, the claim of distinctiveness should read as follows, if accurate:

The mark has become distinctive of the goods and/or services through the substantially exclusive and continuous use of the mark in commerce by members for at least the five years immediately before the date of this statement.

The claim of five years of use is generally required to be supported by an affidavit or declaration under 37 C.F.R. §2.20, signed by the applicant. *See* 37 C.F.R. §2.41(b). The affidavit or declaration can be signed by a person properly authorized to sign on behalf of applicant under 37 C.F.R. §2.193(e)(1). *See* [TMEP §611.03\(a\)](#).

The following are guidelines regarding the form and language appropriate for a claim of five years of use:

- (1) Use of the precise statutory wording is desirable, but variations may be accepted if they do not affect the essential allegations.
- (2) The wording “substantially exclusive and continuous use in commerce” is essential.
- (3) It must be clear from the record that the five years of use has been in commerce that may lawfully be regulated by Congress. *See Blanchard & Co. v. Charles Gilman & Son, Inc.*, 239 F. Supp. 827, 145 USPQ 62 (D. Mass. 1965), *aff’d*, 353 F.2d 400, 147 USPQ 263 (1st Cir. 1965).
- (4) The use of the mark must cover the five years before the date of the statement of five years’ use. Thus, wording that indicates that the use referred to is before the date of the statement is essential. Its omission can only be excused if the facts in the record clearly show that the use includes the five years before the date of the statement.
- (5) The affidavit or declaration should include a statement that the mark has become distinctive or that the applicant believes that the mark has become distinctive, but absence of this statement is not fatal. *See* [TMEP §1212.07](#) for examples of various ways in which an applicant may assert a §2(f) claim.
- (6) The affidavit or declaration must contain a reference to distinctiveness as applied to the applicant’s goods or services, or to use with the applicant’s goods or services, because the distinctiveness created by the five years’ use must relate to the goods or services specified in the application. If there is doubt that the distinctiveness pertains to either all or any of the goods or services specified in the application, the examining attorney must inquire regarding that issue. While a clarifying response does not have to be verified, a substitute statement must be verified, i.e., supported by an affidavit or a declaration under 37 C.F.R. §2.20, signed by the applicant.

## **1212.06 Establishing Distinctiveness by Actual Evidence**

Under Trademark Rule 2.41(a), 37 C.F.R. §2.41(a), an applicant may submit affidavits, declarations under 37 C.F.R. §2.20, depositions, or other appropriate evidence showing the duration, extent, and nature of the applicant’s use of a mark in commerce that may lawfully be regulated by Congress, advertising expenditures in connection with such use, letters, or statements from the trade and/or public, or other appropriate evidence tending to show that the mark distinguishes the goods or services.

Establishing acquired distinctiveness by actual evidence was explained as follows in *In re Owens-Corning Fiberglas Corp.*, 774 F.2d 1116, 1125, 227 USPQ 417, 422 (Fed. Cir. 1985):

An evidentiary showing of secondary meaning, adequate to show that a mark has acquired distinctiveness indicating the origin of the goods, includes evidence of the trademark owner's method of using the mark, supplemented by evidence of the effectiveness of such use to cause the purchasing public to identify the mark with the source of the product.

The kind and amount of evidence necessary to establish that a mark has acquired distinctiveness in relation to goods or services depends on the nature of the mark and the circumstances surrounding the use of the mark in each case. *Yamaha Int'l Corp. v. Hoshino Gakki Co.*, 840 F.2d 1572, 1581, 6 USPQ2d 1001, 1008 (Fed. Cir. 1988); *Roux Labs., Inc. v. Clairol Inc.*, 427 F.2d 823, 829, 166 USPQ 34, 39 (C.C.P.A. 1970); *In re Hehr Mfg. Co.*, 279 F.2d 526, 528, 126 USPQ 381, 383 (C.C.P.A. 1960); *In re Capital Formation Counselors, Inc.*, 219 USPQ 916, 918 (TTAB 1983).

Evidence that only shows a mark used in conjunction with other wording may be insufficient to show that the mark has acquired distinctiveness. See *In re Mogen David Wine Corp.*, 372 F.2d 539, 542, 152 USPQ 593, 595-96 (C.C.P.A. 1967) (finding evidence of a bottle design failed to prove secondary meaning where advertising depicting the bottle design always featured applicant's word mark); *In re Franklin Cnty. Historical Soc'y*, 104 USPQ2d 1085, 1093 (TTAB 2012) (noting none of applicant's evidence showed use of the proposed mark "CENTER OF SCIENCE AND INDUSTRY" without the acronym "COSI," while other evidence only used the acronym to refer to applicant's services).

In considering a claim of acquired distinctiveness, the issue is whether acquired distinctiveness of the mark in relation to the goods or services has in fact been established in the minds of the purchasing public, not whether the mark is capable of becoming distinctive. *In re Redken Labs., Inc.*, 170 USPQ 526, 528 (TTAB 1971); *In re Fleet-Wing Corp.*, 122 USPQ 335, 335 (TTAB 1959).

The following sections provide examples of different types of evidence that have been used, alone or in combination, to establish acquired distinctiveness. No single evidentiary factor is determinative. The value of a specific type of evidence and the amount necessary to establish acquired distinctiveness will vary according to the facts of the specific case.

### **1212.06(a) Long Use of the Mark in Commerce**

Long use of the mark in commerce is one relevant factor to consider in determining whether a mark has acquired distinctiveness. See *In re Uncle Sam Chem. Co.*, 229 USPQ 233, 235 (TTAB 1986) (finding §2(f) claim of acquired distinctiveness of SPRAYZON for "cleaning preparations and degreasers for industrial and institutional use" persuasive where applicant had submitted declaration of its president supporting sales figures and attesting to over eighteen years of substantially exclusive and continuous use); *In re Packaging Specialists, Inc.*, 221 USPQ 917, 920 (TTAB 1984) (finding evidence submitted by applicant insufficient to establish acquired distinctiveness of PACKAGING SPECIALISTS, INC., for contract packaging services, notwithstanding, *inter alia*, continuous and substantially exclusive use for sixteen years, deemed "a substantial period but not necessarily conclusive or persuasive").

To support a §2(f) claim, use of the mark must be use in commerce, as defined in 15 U.S.C. §1127. See [TMEP §§901–901.05](#) as to what constitutes use in commerce.

### 1212.06(b) Advertising Expenditures

Large-scale expenditures in promoting and advertising goods and services under a particular mark are significant to indicate the extent to which a mark has been used. However, proof of an expensive and successful advertising campaign is not in itself enough to prove secondary meaning. *Mattel, Inc. v. Azrak-Hamway Int'l, Inc.*, 724 F.2d 357, 361 n.2, 221 USPQ 302, 305 n.2 (2d Cir. 1983). See *In re Boston Beer Co. L.P.*, 198 F.3d 1370, 53 USPQ2d 1056 (Fed. Cir. 1999) (finding claim based on annual sales under the mark of approximately eighty-five million dollars, and annual advertising expenditures in excess of ten million dollars – two million of which were spent on promotions and promotional items which included the phrase THE BEST BEER IN AMERICA – insufficient to establish distinctiveness, in view of the highly descriptive nature of the proposed mark).

The ultimate test in determining whether a designation has acquired distinctiveness is applicant's success, rather than its efforts, in educating the public to associate the proposed mark with a single source. The examining attorney must examine the advertising material to determine how the term is being used, the commercial impression created by such use, and what the use would mean to purchasers. *In re Redken Labs., Inc.*, 170 USPQ 526, 529 (TTAB 1971) (holding evidence adduced by applicant pursuant to §2(f) insufficient to establish acquired distinctiveness of THE SCIENTIFIC APPROACH, for lectures concerning hair and skin treatment, notwithstanding ten years of use, over \$500,000 in promotion and sponsorship expenses, and the staging of over 300 shows per year). See *In re Chevron Intellectual Prop. Group LLC*, 96 USPQ2d 2026, 2031 (TTAB 2010) (finding evidence of acquired distinctiveness deficient in part because of the lack of advertisements promoting recognition of pole spanner design as a service mark); *Mag Instrument Inc. v. Brinkmann Corp.*, 96 USPQ2d 1701, 1723 (TTAB 2010) (finding absence of “look for” advertisements damaging to attempt to demonstrate acquired distinctiveness of proposed configuration mark); *Nextel Commc'ns, Inc. v. Motorola, Inc.*, 91 USPQ2d 1393, 1408 (TTAB 2009) (sustaining opposition on the ground that sound mark had not acquired distinctiveness in part because applicant failed to provide evidence corroborating that the mark was used in advertisements in such a way that it would be recognized as a source identifier for cellular telephones); *In re ic! berlin brillen GmbH*, 85 USPQ2d 2021, 2023 (TTAB 2008) (affirming refusal to register product configuration for spectacles and sunglasses, as the applicant had failed to prove acquired distinctiveness chiefly because of the “absence of evidence of the advertising and/or promotion by the applicant of the earpiece design as a trademark”); *In re E.I. Kane, Inc.*, 221 USPQ 1203, 1206 (TTAB 1984) (affirming refusal to register OFFICE MOVERS, INC., for moving services, notwithstanding §2(f) claim based on, *inter alia*, evidence of substantial advertising expenditures. “There is no evidence that any of the advertising activity was directed to creating secondary meaning in applicant's highly descriptive trade name.”); *In re Kwik Lok Corp.*, 217 USPQ 1245, 1247-48 (TTAB 1983) (holding evidence insufficient to establish acquired distinctiveness for configuration of bag closures made of plastic, notwithstanding applicant's statement that advertising of the closures involved several hundred thousands of dollars, where there was no evidence that the advertising had any impact on purchasers in perceiving the configuration as a mark); cf. *In re Haggart Co.*, 217 USPQ 81, 84 (TTAB 1982) (holding background design of a black swatch registrable pursuant to §2(f) for clothing where applicant had submitted, *inter alia*, evidence of “very substantial advertising and sales,” the Board finding the design to be, “because of its serrated left edge, something more than a common geometric shape or design”).

If the applicant prefers not to specify the extent of its expenditures in promoting and advertising goods and services under the mark because this information is confidential, the applicant may indicate the types of

media through which the goods and services have been advertised (e.g., national television) and how frequently the advertisements have appeared.

### 1212.06(c) Affidavits or Declarations Asserting Recognition of Mark as Source Indicator

Affidavits or declarations that assert recognition of the mark as a source indicator are relevant in establishing acquired distinctiveness. However, the value of the affidavits or declarations depends on the statements made and the identity of the affiant or declarant. *See In re Chem. Dynamics Inc.*, 839 F.2d 1569, 1571, 5 USPQ2d 1828, 1830 (Fed. Cir. 1988) (finding conclusionary declaration from applicant's vice-president insufficient without the factual basis for the declarant's belief that the design had become distinctive). Proof of distinctiveness also requires more than proof of the existence of a relatively small number of people who associate a mark with the applicant. *See In re The Paint Prods. Co.*, 8 USPQ2d 1863, 1866 (TTAB 1988) ("Because these affidavits were sought and collected by applicant from ten customers who have dealt with applicant for many years, the evidence is not altogether persuasive on the issue of how the average customer for paints perceives the words 'PAINT PRODUCTS CO.' in conjunction with paints and coatings."); *see also Mag Instrument Inc. v. Brinkmann Corp.*, 96 USPQ2d 1701, 1723 (TTAB 2010) (finding sixteen declarations of little persuasive value, as they were nearly identical in wording and only one of the declarants was described as an end consumer); *In re Gray Inc.*, 3 USPQ2d 1558, 1560 (TTAB 1987) (finding affidavit of applicant's counsel expressing his belief that the mark has acquired secondary meaning of "no probative value whatsoever" because, among other reasons, the statement is subject to bias); *In re Petersen Mfg. Co.*, 2 USPQ2d 2032, 2035 (TTAB 1987) (finding declarations from customers which stated that designs used by applicant indicate to the declarant that the applicant is the source of the goods, but which did not refer to or identify the designs with any specificity, not persuasive); *In re Bose Corp.*, 216 USPQ 1001, 1005 (TTAB 1983), *aff'd*, 772 F.2d 866, 227 USPQ 1 (Fed. Cir. 1985) (deeming retailer's statement that he has been in contact with many purchasers of loudspeaker systems of whom a substantial number would recognize the depicted design as originating with applicant competent evidence of secondary meaning); *In re Flex-O-Glass, Inc.*, 194 USPQ 203, 206 (TTAB 1977) ("[T]he fact that the affidavits may be similar in format and expression is of no particular significance ... since the affiants have sworn to the statements contained therein.").

### 1212.06(d) Survey Evidence, Market Research and Consumer Reaction Studies

Survey evidence, market research, and consumer reaction studies are relevant in establishing acquired distinctiveness and secondary meaning. *See Yankee Candle Co. v. Bridgewater Candle Co.*, 259 F.3d 25, 43, 59 USPQ2d 1720, 1730 (1st Cir. 2001) ("Although survey evidence is not required, 'it is a valuable method of showing secondary meaning.'" (quoting *I.P. Lund Trading ApS v. Kohler Co.*, 163 F.3d 27, 42, 49 USPQ2d 1225, 1235 (1st Cir. 1998))).

To show secondary meaning, the survey must show that the consuming public views the proposed mark as an indication of the source of the product or service. *See Nextel Commc'ns, Inc. v. Motorola, Inc.*, 91 USPQ2d 1393, 1402-03 (TTAB 2009) (finding survey did not provide evidence of acquired distinctiveness as it was unclear if respondents associated the sound mark with applicant's goods or opposer's services); *Boston Beer Co. L.P. v. Slesar Bros. Brewing Co.*, 9 F.3d 175, 183, 28 USPQ2d 1778, 1784 (1st Cir. 1993) (finding survey insufficient to establish acquired distinctiveness where survey demonstrated product-place association rather than product-source association). Moreover, the survey should reveal that the consuming public associates the proposed mark with a *single source*, and not that the applicant is the first among many parties associated with the designation. *See* J. Thomas McCarthy, *McCarthy on Trademarks and Unfair Competition* §15.42 (4th ed. 2013) (citing *Am. Flange & Mfg. Co. v. Rieke Corp.*, 80 USPQ2d 1397, 1415 (TTAB 2006), *withdrawn on other grounds*, 90 USPQ2d 1127 (TTAB 2009)); *see also British Seagull Ltd. v. Brunswick Corp.*, 28 USPQ2d 1197, 1202 (TTAB 1993), *aff'd*, 35 F.3d 1527, 32 USPQ2d 1120

(Fed. Cir. 1994) (finding survey does not provide convincing proof that respondents believe all black engines come from the same source).

The applicant must document the procedural and statistical accuracy of this type of evidence and carefully frame the questions contained therein. *In re Van Valkenburgh*, 97 USPQ2d 1757, 1767 (TTAB 2011) (finding “no basis on which to conclude that the survey is based on scientifically valid principles” where the survey consisted of questionnaires distributed to an unknown number of people who filled them out and mailed them back to applicant’s counsel); *see In re Steelbuilding.com*, 415 F.3d 1293, 1300, 75 USPQ2d 1420, 1424 (Fed. Cir. 2005) (deeming applicant’s Internet poll on name recognition unreliable, where the poll did not attempt to prevent visitors from voting more than once or to prevent interested parties such as friends or associates or employees of the applicant from voting multiple times, and the poll results did not indicate the number of actual participants); *In re Hotels.com, L.P.*, 87 USPQ2d 1100, 1109–10 (TTAB 2008), *aff’d*, 573 F.3d 1300, 91 USPQ2d 1532 (Fed. Cir. 2009) (finding applicant’s survey entitled to no probative weight as to the public’s perception of HOTELS.COM due to flaws including the order of the questions and an assumption that consumers understand the difference between a brand name and domain name); *In re E.I. Kane, Inc.*, 221 USPQ 1203, 1206 (TTAB 1984) (“[T]he survey asked the wrong question. The issue is not whether the term ‘Office Movers’ identifies a specific company. Rather, it is whether the term ‘OFFICE MOVERS, INC.’ identifies services which emanate from a single source.”); *Gen. Foods Corp. v. Ralston Purina Co.*, 220 USPQ 990, 994 n.7 (TTAB 1984) (“[W]here ... [reports of market research and consumer reaction studies] have been conducted for marketing reasons rather than directly to assist in resolving the issues in proceedings before us, their value will almost always depend upon interpretations of their significance by witnesses or other evidence.”); *Specialty Brands, Inc. v. Spiceseas, Inc.*, 220 USPQ 73, 74 n.4 (TTAB 1983) (finding testimony concerning survey results, unsupported by documentation, to be unreliable hearsay). Therefore, information regarding how a survey was conducted, the number of participants surveyed, and the geographic scope of the survey may assist the examining attorney in determining the probative weight of such evidence.

Evidence of secondary meaning may be sufficient if it shows that a substantial portion of the consuming public associates the proposed mark with a single source. *See Perini Corp. v. Perini Constr., Inc.*, 915 F.2d 121, 125, 16 USPQ2d 1289, 1292 (4th Cir. 1990) (quoting *Food Fair Stores, Inc. v. Lakeland Grocery Corp.*, 301 F.2d 156, 161, 133 USPQ 127, 131 (4th Cir. 1962)); J. Thomas McCarthy, *McCarthy on Trademarks and Unfair Competition* §§15.45, 32.190 (4th ed. 2013); *see also In re Owens-Corning Fiberglas Corp.*, 774 F.2d 1116, 1127, 227 USPQ 417, 424 (Fed. Cir. 1985) (noting “the results show a syndetic relationship between the color ‘pink’ and Owens-Corning Fiberglas in the minds of a significant part of the purchasing public”). As noted by the Court of Customs and Patent Appeals (the predecessor to the Court of Appeals for the Federal Circuit), “proof of distinctiveness requires more than proof of the existence of a relatively small number of people” who associate the proposed mark with the applicant. *Roselux Chem. Co. v. Parsons Ammonia Co.*, 299 F.2d 855, 862, 132 USPQ 627, 633 (C.C.P.A. 1962). Although all evidence must be reviewed on a case-by-case basis, generally, survey results showing less than 10% consumer recognition are insufficient to establish secondary meaning, and results over 50% are sufficient to establish secondary meaning. *See id.* (finding 10% insufficient to establish secondary meaning); *In re Owens-Corning Fiberglas Corp.*, 774 F.2d at 1127–28, 227 USPQ at 424–25 (finding 50% probative in establishing secondary meaning given the totality of the evidence); Thomas McCarthy, *McCarthy on Trademarks and Unfair Competition* §§15.45, 32.190 (4th ed. 2013). However, the probative value of a survey is significantly weakened, despite consumer recognition rates greater than 50%, if there are flaws in the way the survey is

conducted. *See Stuart Spector Designs Ltd. v. Fender Musical Instruments Corp.*, 94 USPQ2d 1549, 1569–71 (TTAB 2009).

### **1212.06(e) Miscellaneous Considerations Regarding Evidence Submitted to Establish Distinctiveness**

#### **1212.06(e)(i) First or Only User**

When the applicant is the only source of the goods or services, use alone does not automatically represent trademark recognition and acquired distinctiveness. *See, e.g., J. Kohnstam, Ltd. v. Louis Marx & Co.*, 280 F.2d 437, 440, 126 USPQ 362, 364 (C.C.P.A. 1960); *In re Mortg. Bankers Ass'n of Am.*, 226 USPQ 954, 956 (TTAB 1985); *In re Nat'l Shooting Sports Found., Inc.*, 219 USPQ 1018, 1020 (TTAB 1983); *In re Meier's Wine Cellars, Inc.*, 150 USPQ 475, 475 (TTAB 1966); *In re G. D. Searle & Co.*, 143 USPQ 220, 223 (TTAB 1964), *aff'd*, 360 F.2d 650, 149 USPQ 619 (C.C.P.A. 1966).

Similarly, evidence of intentional copying of a product design is not probative of acquired distinctiveness. “Where the proposed mark is a product design, the copier may be attempting to exploit a desirable product feature, rather than seeking to confuse customers as to the source of the product.” *In re Van Valkenburgh*, 97 USPQ2d 1757, 1768 (TTAB 2011).

#### **1212.06(e)(ii) State Trademark Registrations**

State trademark registrations are of relatively little probative value. *See, e.g., In re Vico Prods. Mfg. Co.*, 229 USPQ 364, 370 (TTAB 1985), *recon. denied*, 229 USPQ 716 (TTAB 1986) (“While applicant’s design may be registrable under the provisions of California trademark law, it is the federal trademark statute and the cases interpreting it by which we must evaluate the registrability of applicant’s asserted mark.”); *In re Craigmyle*, 224 USPQ 791, 794 (TTAB 1984) (finding California trademark registration not controlling with respect to federal registrability).

#### **1212.06(e)(iii) Design Patent**

The fact that a device is the subject of a design patent does not, without more, mean that it functions as a mark or has acquired distinctiveness. *In re Vico Prods. Mfg. Co.*, 229 USPQ 364, 370 (TTAB 1985), *recon. denied*, 229 USPQ 716 (TTAB 1986) (citing *In re R.M. Smith, Inc.*, 734 F.2d 1482, 1485, 222 USPQ 1, 3 (Fed. Cir. 1984)).

#### **1212.06(e)(iv) Acquiescence to Demands of Competitors**

Acquiescence to demands of competitors to cease use of a term can be equally viewed as simply a desire to avoid litigation. *See, e.g., In re Wella Corp.*, 565 F.2d 143, 144 n.2, 196 USPQ 7, 8 n.2 (C.C.P.A. 1977); *In re Consol. Cigar Corp.*, 13 USPQ2d 1481, 1483 (TTAB 1989).

### **1212.07 Form of Application Asserting Distinctiveness**

To base a registration on acquired distinctiveness under §2(f), 15 U.S.C. §1052(f), an applicant must indicate its intent to do so.

The indication of the applicant's intent to rely on §2(f) can take a variety of forms, for example, a statement that registration is requested under §2(f); a statement that the mark has become distinctive, or that the applicant believes the mark has become distinctive of the goods or services in commerce; the statement relating to five years' use in commerce as suggested in §2(f); or a statement that evidence is being submitted in support of acquired distinctiveness.

If it is unclear from the application whether a claim of distinctiveness under §2(f) has been made, the examining attorney must inquire whether the applicant is seeking registration under §2(f). See [TMEP §1212.02\(d\)](#) concerning unnecessary §2(f) claims.

If the statement requesting registration under §2(f) and the evidence submitted to establish acquired distinctiveness are in the application when filed, the §2(f) statement and proof are supported by the verification of the application.

If a claim of distinctiveness pursuant to §2(f) is submitted as an amendment, or if additional evidence is added in an amendment, the nature of the proof submitted to establish acquired distinctiveness determines whether a verification is necessary.

A claim of ownership of one or more prior registrations as proof of distinctiveness does not have to be verified. See [TMEP §1212.04\(e\)](#).

If the applicant claims that the mark has become distinctive of the applicant's goods and/or services through substantially exclusive and continuous use of the mark in commerce by the applicant for the five years before the date on which the claim of distinctiveness is made, the applicant must submit this claim in the form of an affidavit, or a declaration in accordance with 37 C.F.R. §2.20, signed by the applicant. 15 U.S.C. §1052(f); 37 C.F.R. §2.41(b); [TMEP §1212.05\(d\)](#). See 37 C.F.R. §2.193(e)(1) and [TMEP §611.03\(a\)](#) regarding persons properly authorized to sign on behalf of applicant.

If an application is amended to add a §2(f) claim relying on other types of evidence, there may be considerable flexibility as to form. While statements by the applicant regarding advertising or sales figures or other facts that may show acquired distinctiveness would normally be presented in the form of affidavits, or declarations under 37 C.F.R. §2.20, signed by the applicant, verification may not be required for other types of evidence. The examining attorney will determine whether the evidence relied on is of a nature that requires verification by the applicant.

### **1212.08 Section 44 and §66(a) Applications and Distinctiveness**

In applications based on §44(d), §44(e), or §66(a) of the Trademark Act, 15 U.S.C. §1126(d), §1126(e), or §1141f(a), registration may be sought under §2(f) as to the entire mark upon showing that the mark has acquired distinctiveness in commerce that may lawfully be regulated by Congress. See *In re Etablissements Darty et Fils*, 759 F.2d 15, 18, 225 USPQ 652, 654 (Fed. Cir. 1985). Similarly, registration may be sought under §2(f) in part upon showing that the *relevant part of the mark* has acquired distinctiveness in commerce that may lawfully be regulated by Congress. *Id.* The same standards for establishing acquired distinctiveness apply whether the application is based on §1(a), §44, or §66(a). Although dates of first use are not required in applications based solely on §44 or §66(a), reference to length of use in commerce or information as to specific dates of use in commerce, presented in support of the claim of acquired distinctiveness, is clearly relevant to a determination of the acceptability of the claim.

The applicant may not rely on use other than use in commerce that may be regulated by the United States Congress in establishing acquired distinctiveness. Evidence of use solely in a foreign country, or between two foreign countries, is not evidence of acquired distinctiveness in the United States. *In re Rogers*, 53 USPQ2d 1741, 1746 (TTAB 1999).

## **1212.09 Section 1(b) Applications and Distinctiveness**

### **1212.09(a) Section 2(f) Claim Requires Prior Use**

Section 2(f), 15 U.S.C. §1052(f), is limited by its terms to “a mark used by the applicant.” A claim of distinctiveness under §2(f) is normally not filed in a §1(b) application before the applicant files an allegation of use, because a claim of acquired distinctiveness, by definition, requires prior use.

However, an intent-to-use applicant who has used the mark on related goods or services may file a claim of acquired distinctiveness under §2(f) before filing an allegation of use, if the applicant can establish that, as a result of the applicant’s use of the mark on other goods or services, the mark has become distinctive of the goods or services in the intent-to-use application, and that this previously created distinctiveness will transfer to the goods and services in the intent-to-use application when use in commerce begins. *In re Dial-A-Mattress Operating Corp.*, 240 F.3d 1341, 1347, 57 USPQ2d 1807, 1812 (Fed. Cir. 2001).

The Trademark Trial and Appeal Board has set forth the requirements for showing that a mark in an intent-to-use application has acquired distinctiveness:

The required showing is essentially twofold. First, applicant must establish, through the appropriate submission, the acquired distinctiveness of the same mark in connection with specified other goods and/or services in connection with which the mark is in use in commerce. All of the rules and legal precedent pertaining to such a showing in a use-based application are equally applicable in this context.... Second, applicant must establish, through submission of relevant evidence rather than mere conjecture, a sufficient relationship between the goods or services in connection with which the mark has acquired distinctiveness and the goods or services recited in the intent-to-use application to warrant the conclusion that the previously created distinctiveness will transfer to the goods or services in the application upon use.

*In re Rogers*, 53 USPQ2d 1741, 1744 (TTAB 1999).

To satisfy the first element, the applicant must establish acquired distinctiveness as to the other goods or services by appropriate evidence, such as ownership of a prior registration for the same mark for related goods or services ( *see* [TMEP §§1212.04–1212.04\(e\)](#)), a prima facie showing of acquired distinctiveness based on five years’ use of the same mark with related goods or services ( *see* [TMEP §§1212.05–1212.05\(d\)](#)), or actual evidence of acquired distinctiveness for the same mark with respect to the other goods or services ( *see* [TMEP §§1212.06–1212.06\(e\)\(iv\)](#)). *See In re Nielsen Bus. Media, Inc.*, 93 USPQ2d 1545, 1547-48 (TTAB 2010) (finding applicant failed to meet the first requirement, because the intent-to-use mark THE BOLLYWOOD REPORTER was not deemed to be the “same” mark as the previously registered marks THE HOLLYWOOD REPORTER, THEHOLLYWOODREPORTER.COM, and THE HOLLYWOOD REPORTER STUDIO BLU-BOOK); *In re Binion*, 93 USPQ2d 1531, 1539 (TTAB 2009) (finding applicant failed to meet the first requirement, because the intent-to-use marks BINION and BINION’S were not deemed to be the “same” marks as the previously registered marks JACK BINION and JACK BINION’S).

To satisfy the second element, applicant must show “the extent to which the goods or services in the intent-to-use application are related to the goods or services in connection with which the mark is distinctive, and that there is a strong likelihood that the mark’s established trademark function will transfer to the related goods or services when use in commerce occurs.” *Rogers*, 53 USPQ2d at 1745.

The showing necessary to establish relatedness will vary from case to case, depending on the nature of the goods or services involved and the language used to identify them. There is no absolute rule that applicant must submit extrinsic evidence to support its contention that the goods are related in every case. *Kellogg Co. v. Gen. Mills, Inc.*, 82 USPQ2d 1766, 1771 (TTAB 2007) (deeming close relationship between cereal and food bars derived from cereal “self evident from the respective identifications of goods”).

The fact that a mark is famous in connection with certain goods or services does *not* necessarily lead to the conclusion that, upon use, distinctiveness will transfer to use of the mark in connection with unrelated goods or services in an intent-to-use application. In *Rogers*, the Board stated that:

The owner of a famous mark must still establish a strong likelihood of transference of the trademark function to the goods or services identified in the intent-to-use application. This factually-based determination will still involve establishing some degree of relationship between the goods or services for which the mark is famous and the goods or services in the intent-to-use application.

53 USPQ2d at 1745-1746.

An applicant whose application is based on use in commerce under §1(a), 15 U.S.C. §1051(a), may also base a claim of acquired distinctiveness under §2(f) on long use of the mark on related goods or services, if the applicant meets the requirements set forth above.

### **1212.09(b) Claim of §2(f) “in Part” in §1(b) Applications**

An intent-to-use applicant may assert a claim of acquired distinctiveness under §2(f) as to part of a mark prior to filing an acceptable allegation of use if the applicant has already used the relevant part of the mark in commerce on or in connection with the specified goods or services, or related goods or services. See [TMEP §1212.02\(f\)](#) regarding claims of §2(f) “in part.”

The requirements to support such a claim are twofold. First, the applicant must establish acquired distinctiveness of the relevant portion of the mark through the same methods required in a use-based application. See [TMEP §1212.02\(f\)\(i\)](#). Evidence in support of such a claim may consist of: (1) ownership of a prior registration on the Principal Register covering the relevant portion of the mark and the same or related goods or services ( see [TMEP §§1212.04–1212.04\(e\)](#)); (2) a prima facie showing of distinctiveness based on five years’ use of the relevant portion of the mark with the same or related goods or services ( see [TMEP §§1212.05–1212.05\(d\)](#)); or (3) actual evidence of acquired distinctiveness of the relevant portion of the mark with respect to the same or related goods or services ( see [TMEP §§1212.06–1212.06\(e\)\(iv\)](#)).

Second, if the relevant portion of the mark has been used with related, as opposed to identical, goods or services, the applicant must additionally show the extent to which the goods or services in the §1(b) application are related to the goods or services in connection with which the mark is distinctive, and a strong likelihood that the mark’s established trademark function will transfer to the related goods or services when use in commerce begins. *In re Rogers*, 53 USPQ2d 1741, 1745 (TTAB 1999). See [TMEP §1212.09\(a\)](#).

If the examining attorney determines that the applicant has established acquired distinctiveness as to the relevant portion of the mark, the examining attorney must withdraw any refusal related to the nondistinctive character of that part of the mark.

### **1212.10 Printing §2(f) Notations, §2(f) in Part Notations, and Limitation Statements**

Currently, when a mark is registered under §2(f), the USPTO prints a “2(f)” notation in the *Official Gazette* and on the certificate of registration. The examining attorney must ensure that the §2(f) claim has been entered into the Trademark database, so that it will be printed in the *Official Gazette* and on the certificate of registration. Similarly, when a claim of §2(f) in part is appropriate, the examining attorney must ensure that the record reflects that the §2(f) claim applies only to a portion of the mark and that the relevant portion is correctly identified in the limitation statement. See [TMEP §817](#) regarding preparation of an application for publication or registration.

For example, if the mark is SOFTSOAP for liquid soap and the applicant has successfully shown acquired distinctiveness, the examining attorney must ensure that the “§2(f)” field in the Trademark database reads as follows before approving the mark for publication:

#### **MISCELLANEOUS INFORMATION**

**SECTION 2F: YES**

**SECTION 2F IN PART: NO**

Similarly, if the mark is SOFTSOAP combined with an inherently distinctive design for liquid soap and the applicant has successfully shown acquired distinctiveness as to the wording in the mark, the examining attorney must ensure that the “§2(f)” field in the Trademark database reads as follows before approving the mark for publication:

#### **MISCELLANEOUS INFORMATION**

**SECTION 2F: NO**

**SECTION 2F IN PART: YES**

**2F Limitation  
Statement:**

as to “SOFTSOAP”

If the applicant has successfully shown acquired distinctiveness as to non-English wording in the mark, or as to non-English wording that has been transliterated from non-Latin characters, the examining attorney must ensure that the §2(f) claim is entered as shown in the following examples.

If the mark is KONE UNIPOWER for machine parts, the term KONE means “machine or engine,” and the applicant has successfully shown acquired distinctiveness as to the term KONE, the examining attorney must ensure that the “§2(f)” field in the Trademark database reads as follows before approving the mark for publication:

### MISCELLANEOUS INFORMATION

**SECTION 2F: NO**

**SECTION 2F IN PART: YES**

**2F Limitation  
Statement:**

as to “KONE”

Similarly, in the mark shown below, where the non-Latin characters transliterate to “ME-RI-LAND-HAN-IN-SI-MIN-HYUP-IIOY,” which means

“MARYLAND, KOREAN AMERICAN LEAGUE,” and the mark is used for organizing and conducting community service projects and programs to promote cultural and social awareness, if the applicant has successfully shown acquired distinctiveness as to the portion of the mark comprised of the non-Latin characters, the examining attorney must ensure that the “§2(f)” field in the Trademark database reads as follows before approving the mark for publication:

**MISCELLANEOUS INFORMATION****SECTION 2F: NO****SECTION 2F IN PART: YES****2F Limitation  
Statement:**as to the non-Latin characters  
that transliterate to "ME-RI-  
LAND-HAN-IN-SI-MIN-HYUP-  
IIOY"

In the past, the USPTO did not print §2(f) notations. Therefore, the absence of a “§2(f)” notation on an older registration does not necessarily mean that the mark was registered without resort to §2(f).

**1213 Disclaimer of Elements in Marks***15 U.S.C. §1056 Disclaimers.*

(a) The Director may require the applicant to disclaim an unregistrable component of a mark otherwise registrable. An applicant may voluntarily disclaim a component of a mark sought to be registered.

(b) No disclaimer, including those made under subsection (e) of section 1057 of this title, shall prejudice or affect the applicant's or registrant's rights then existing or thereafter arising in the disclaimed matter, or his right of registration on another application if the disclaimed matter be or shall have become distinctive of his goods or services.

A disclaimer is a statement that the applicant or registrant does not claim the exclusive right to use a specified element or elements of the mark in a trademark application or registration. A disclaimer may be included in an application as filed or may be added by amendment, e.g., to comply with a requirement by the examining attorney.

The purpose of a disclaimer is to permit the registration of a mark that is registrable as a whole but contains matter that would not be registrable standing alone, without creating a false impression of the extent of the registrant's right with respect to certain elements in the mark. As stated in *Horlick's Malted Milk Co. v. Borden Co.*, 295 F. 232, 234 (D.C. Cir. 1924) (citing *Estate of P. D. Beckwith, Inc. v. Comm'r of Pats.*, 252 U.S. 538, 544 (1920)):

[T]he fact that a mark contains descriptive words is not enough to warrant a refusal to register it. Unless it consists only of such words, it may not be refused a place on the registry of the Patent Office.

The significance of a disclaimer is conveyed in the following statement:

As used in trade mark registrations, a disclaimer of a component of a composite mark amounts merely to a statement that, in so far as that particular registration is concerned, no rights are being asserted in the disclaimed component standing alone, but rights are asserted in the composite; and the particular registration represents only such rights as flow from the use of the composite mark.

*Sprague Electric Co. v. Erie Resistor Corp.*, 101 USPQ 486, 486-87 (Comm'r Pats. 1954).

A disclaimer may be limited to pertain to only certain classes, or to only certain goods or services.

### **1213.01 History of Disclaimer Practice**

There was no statutory authority for disclaimer prior to 1946. As various court decisions were rendered, USPTO practice fluctuated from, first, registering the composite mark without a qualifying statement; later, requiring a statement in the application disclaiming the unregistrable matter in the mark; and, finally, requiring removal of the unregistrable matter from the mark on the drawing. This fluctuation ended with the decision of *Estate of P.D. Beckwith, Inc. v. Comm’r of Pats.*, 252 U.S. 538 (1920), in which the United States Supreme Court held that to require the removal of descriptive matter from a composite mark was erroneous, and commended the practice of a statement of disclaimer. Thus, the practice of disclaimer was established officially in the USPTO, although still without statutory support.

The Trademark Act of 1946 created a statutory basis for the practice of disclaimer in §6, 15 U.S.C. §1056.

#### **1213.01(a) Discretion in Requiring Disclaimer**

When first incorporated in the Trademark Act in 1946, §6 stated that the Director *shall* require unregistrable matter to be disclaimed. Under the impetus of the mandatory word “shall,” it became customary to require a disclaimer for every occurrence, in any type of combination, of every term or symbol which by itself might be refused registration in the first instance under the 1946 Act.

In 1962, §6 was amended to state that the Director *may* require the applicant to disclaim an unregistrable component of a mark otherwise registrable. The change from “shall” to “may” justifies the exercise of greater discretion by examining attorneys in determining whether a disclaimer is necessary.

Examining attorneys should keep in mind the basic purpose of disclaimers, which is to indicate in the record that a significant element of a composite mark is not being appropriated apart from the composite. The examining attorney must not require that an element of a mark be disclaimed when a disclaimer would be unnecessary, e.g., when the form or degree of integration of an element in the composite makes it obvious that no claim is being made in any element apart from the composite.

#### **1213.01(b) Refusal to Register Because of Failure to Disclaim**

Failure to comply with a requirement to disclaim was held to be a basis for refusal to register before the Act of 1946. *See In re Am. Cyanamid & Chem. Corp.*, 99 F.2d 964, 39 USPQ 445 (C.C.P.A. 1938). Failure to comply with a requirement to disclaim also was held to justify a refusal after the 1946 Act. *See In re Hercules Fasteners, Inc.*, 203 F.2d 753, 97 USPQ 355 (C.C.P.A. 1953). Even after amendment of the pertinent language of §6 of the 1946 Act to the discretionary wording “may require the applicant to disclaim,” registration may be refused if an applicant does not comply with a requirement for a disclaimer made by the examining attorney. *See In re Slokevage*, 441 F.3d 957, 78 USPQ2d 1395 (Fed. Cir. 2006); *In re Stereotaxis Inc.*, 429 F.3d 1039, 77 USPQ2d 1087 (Fed. Cir. 2005); *In re Omaha Nat’l Corp.*, 819 F.2d 1117, 2 USPQ2d 1859 (Fed. Cir. 1987); *In re Richardson Ink Co.*, 511 F.2d 559, 185 USPQ 46 (C.C.P.A. 1975); *In re Nat’l Presto Indus., Inc.*, 197 USPQ 188 (TTAB 1977); *In re Pendleton Tool Indus., Inc.*, 157 USPQ 114 (TTAB 1968).

If an applicant fails to comply with the examining attorney's requirement for a disclaimer, the examining attorney must make the requirement final if the application is otherwise in condition for a final action.

### **1213.01(c) Voluntary Disclaimer of Registrable or Unregistrable Matter**

Section 6(a) of the Trademark Act, 15 U.S.C. §1056(a), was amended in 1962 to add the sentence, "An applicant may voluntarily disclaim a component of a mark sought to be registered." Disclaimers volunteered by applicants generally should conform to the guidelines set forth in this Manual. See [TMEP §§1213.08–1213.08\(d\)](#).

In *In re MCI Commc'ns Corp.*, 21 USPQ2d 1534 (Comm'r Pats. 1991), the Commissioner held that §6(a) of the Act permits an applicant to disclaim matter voluntarily, regardless of whether the matter is registrable or unregistrable. The Commissioner specifically overruled all previous USPTO authority holding otherwise. *Id.* at 1539. (Previous practice prohibited the entry of disclaimers of registrable components of marks.) Therefore, if an applicant offers a disclaimer of any matter in a mark, the USPTO will accept the disclaimer.

The *MCI* decision states emphatically that the entry of a voluntary disclaimer does *not* render registrable a mark that is otherwise unregistrable under relevant sections of the Trademark Act, such as §2(d) or §2(e). *Id.* at 1538. The examining attorney must evaluate the entire mark, including any disclaimed matter, to determine registrability. *Id.* See *In re RSI Sys., LLC*, 88 USPQ2d 1445, 1448 (TTAB 2008) (finding voluntary disclaimer of "RSI" has no legal effect on the issue of likelihood of confusion because it is not a weak term). Furthermore, the *MCI* decision states that the applicant may not disclaim the entire mark. *MCI*, 21 USPQ2d at 1538. See [TMEP §1213.06](#).

An applicant may volunteer a disclaimer in the mistaken belief that a disclaimer would be required when, in fact, USPTO policy would not require a disclaimer. If this appears to be the case, the examining attorney must offer the applicant the opportunity to withdraw the disclaimer.

If it is necessary to communicate with the applicant about another matter, the examining attorney must state in the Office action that the disclaimer appears to be unnecessary, and inquire as to whether the applicant wants to withdraw the disclaimer. If the applicant does not respond to the inquiry regarding the unnecessary disclaimer, and the application is otherwise in condition for final action or approval for publication for opposition or registration, the examining attorney must enter a Note to the File regarding the disclaimer and issue the final action or approve the application for publication for opposition or registration, as appropriate, without deleting the disclaimer.

In applications under §1 or §44, if it is otherwise unnecessary to issue a first Office action, the inquiry may be made by telephone or e-mail. If the applicant wants to delete the disclaimer, this may be done by examiner's amendment. If the applicant does not respond promptly to the telephone or e-mail message (applicant should be given at least a week), the examining attorney must enter an appropriate Note to the File and approve the application for publication for opposition or registration without deleting the disclaimer.

In applications under §66(a), if it is otherwise unnecessary to issue a first Office action, the examining attorney should issue a "no-call" Examiner's Amendment informing the applicant that the disclaimer appears to be unnecessary and inquiring as to whether the applicant wants to withdraw the disclaimer. (This is meant only to provide information to the applicant and does not "amend" the application. An examiner's amendment may not be issued as a first Office action because the IB will not accept such amendments.) The examining

attorney should then approve the application for publication for opposition without deleting the disclaimer. It is not necessary to wait for the applicant to respond.

### **1213.01(d) Disclaimer Offered in the Alternative**

An applicant may argue the merits of an examining attorney's requirement for a disclaimer and, in the alternative, consent to entry of the disclaimer. In such circumstances, submission of the disclaimer does not constitute a concession that the matter sought to be registered is not inherently distinctive or registrable.

*See In re RiseSmart Inc.*, 104 USPQ2d 1931, 1932 (TTAB 2012). Thus, when an applicant submits a disclaimer in the alternative, while maintaining that the wording at issue is not descriptive, the disclaimer requirement is not moot. If the examining attorney finds the disclaimer acceptable, the applicant must be given the option of entering the disclaimer in the record or going forward with appeal of the underlying issue of whether the wording subject to the requirement is merely descriptive. This should be done by telephone or e-mail, with a Note to the File in the record indicating the applicant's decision, wherever possible. If the applicant wants to appeal, or if the examining attorney is unable to reach the applicant by telephone or e-mail, the examining attorney must maintain the requirement, or issue a final Office action requiring the disclaimer, as appropriate. *Id.* If the applicant elects to enter the disclaimer in the record and not appeal the requirement, then the disclaimer constitutes a concession that the matter is not inherently distinctive or registrable.

See **TMEP §1212.02(c)** regarding a claim, in the alternative, that matter sought to be registered has acquired distinctiveness under §2(f).

### **1213.02 “Composite” Marks**

A “composite” mark may consist of a word or words combined with a design or designs; it may consist solely of words, when there are separable word elements; or it may consist solely of separable design elements. An unregistrable component of a composite mark is subject to disclaimer. However, if a composite mark (or portion thereof) is “unitary,” an individual component of the mark (or of the unitary portion) that would otherwise be unregistrable need not be disclaimed. *See* **TMEP §§1213.05–1213.05(g)(iv)**.

The same principles apply to disclaimer of an unregistrable component of a composite mark, whether the mark is a combination of wording and designs or consists entirely of wording or entirely of designs.

### **1213.03 Disclaimer of Unregistrable Components of Marks**

#### **1213.03(a) “Unregistrable Components” in General**

*Estate of P.D. Beckwith, Inc. v. Comm’r of Pats.*, 252 U.S. 538 (1920), and other disclaimer decisions before the Trademark Act of 1946 dealt with disclaiming descriptive or generic matter. Section 6 of the Act referred initially to “unregistrable matter” and, since the 1962 amendment, now refers to “an unregistrable component.”

Typically, an unregistrable component of a registrable mark is the name of the goods or services, other matter that does not indicate source, matter that is merely descriptive or deceptively misdescriptive of the goods or services, or matter that is primarily geographically descriptive of the goods or services.

Office practice does not require disclaimer of a surname. *Ex parte Norquist Prods., Inc.*, 109 USPQ 399 (Comm’r Pats. 1956) (finding disclaimer of “NORQUIST” unnecessary in application to register mark

comprising “NORQUIST CORONET” on an oval background featuring a coronet, for tables and chairs). In that decision, the Commissioner stated as follows:

Section [2(e)(4)] of the statute does not contemplate the dissection of a composite mark to determine whether a word which constitutes an integral part of the mark is primarily merely a surname. Rather, it contemplates an examination of the mark in its entirety and an evaluation of the commercial impression created by the entire mark. A word which is primarily merely a surname may lose that significance when it appears in a distinctive composite.

*Id.* at 400. The addition of other registrable matter creates a composite mark with an overall impression that is not primarily merely that of a surname. If the additional matter is minimal or unregistrable, then the mark is primarily merely a surname and refusal under §2(e)(4) of the Act, 15 U.S.C. §1052(e)(4) (formerly §2(e)(3), 15 U.S.C. §1052(e)(3)), must be made. *See In re E. Martinoni Co.*, 189 USPQ 589, 590-91 (TTAB 1975) (holding LIQUORE MARTINONI (stylized) for liqueur primarily merely a surname, with “liqueure” being the Italian word for “liqueur”). *See* [TMEP §§1211.01\(b\)–1211.01\(b\)\(viii\)](#) regarding the combination of a surname with additional matter.

In cases where registration of a mark is barred under the Trademark Act (e.g., under §§2(a), 2(b), 2(c), 2(d), and 2(e)(3)), a disclaimer of an unregistrable component will not render the mark registrable. *See, e.g., Am. Speech-Language-Hearing Ass’n v. Nat’l Hearing Aid Soc’y*, 224 USPQ 798, 808 (TTAB 1984) (“While the disclaimer is appropriate to indicate that respondent claims no proprietary right in the disclaimed words, the disclaimer does not affect the question of whether the disclaimed matter deceives the public, since one cannot avoid the Section 2(a) deceptiveness prohibition by disclaiming deceptive matter apart from the mark as a whole.”). *See* [TMEP §1203.02](#) regarding disclaiming deceptive matter, [TMEP §1204.04\(a\)](#) about disclaiming flags or insignia, [TMEP §§1210.05\(d\)\(ii\)](#) and [1210.06\(a\)–\(b\)](#) regarding disclaimer of geographic terms in composite marks, and [TMEP §1213.10](#) concerning disclaimers with regard to likelihood of confusion.

### **1213.03(b) Generic Matter and Matter That Does Not Function as a Mark**

If a mark is comprised in part of matter that, as applied to the goods or services, is generic or does not function as a mark, the matter must be disclaimed to permit registration on the Principal Register (including registration under §2(f) of the Act) or on the Supplemental Register. If, however, matter that would otherwise be generic or would not function as a mark is part of a unitary mark or part of a separable unitary element of a mark, the examining attorney should not require a disclaimer of the matter. *See* [TMEP §§1213.05–1213.05\(g\)\(iv\)](#).

*See* [TMEP §1212.02\(e\)](#) regarding disclaimers of unregistrable components in applications to register marks on the Principal Register under §2(f). *See also In re Creative Goldsmiths of Wash., Inc.*, 229 USPQ 766, 768 (TTAB 1986) (“[I]t is within the discretion of an Examining Attorney to require the disclaimer of an unregistrable component (such as a common descriptive, or generic, name) of a composite mark sought to be registered on the Principal Register under the provisions of Section 2(f).”).

Regarding disclaimers of unregistrable components in applications to register marks on the Supplemental Register, as stated in *In re Water Gremlin Co.*, 635 F.2d 841, 845 n.6, 208 USPQ 89, 91 n.6 (C.C.P.A. 1980) (citing *In re Wella Corp.*, 565 F.2d 143, 196 USPQ 7 (C.C.P.A. 1977)), “Section 6 is equally applicable to the Supplemental Register.” *See Wella*, 565 F.2d 143, 196 USPQ 7 (finding mark comprising stylized lettering of BALSAM, with disclaimer of “BALSAM,” registrable on Supplemental Register for hair conditioner and hair shampoo); *In re Carolyn’s Candies, Inc.*, 206 USPQ 356, 360 (TTAB 1980) (“Section

6 of the Trademark Act of 1946, which provides for the disclaimer of ‘unregistrable matter’, does not limit the disclaimer practice to marks upon the Principal Register.”).

### **1213.03(c) Pictorial Representations of Descriptive Matter**

An accurate pictorial representation of descriptive matter is equivalent to the written expression and, therefore, must be disclaimed pursuant to the same rules applicable to merely descriptive wording. *See Thistle Class Ass’n v. Douglass & McLeod, Inc.*, 198 USPQ 504 (TTAB 1978) (finding thistle design synonymous to the word “thistle,” which is used in a descriptive sense to designate a class of sailboats).

A properly worded disclaimer would read as follows:

No claim is made to the exclusive right to use the design of \_\_\_\_\_ apart from the mark as shown.

No disclaimer of highly stylized pictorial representations of descriptive matter should be required because the design element creates a distinct commercial impression. *See In re LRC Prods. Ltd.*, 223 USPQ 1250, 1252 (TTAB 1984) (holding outline of two gloved hands arbitrary and fanciful), and cases cited therein.

*Note:* A map of the world or a depiction of a globe generally is not considered the pictorial equivalent of the terms “INTERNATIONAL,” “GLOBAL,” or “WORLDWIDE.”

### **1213.03(d) Entity Designations**

Words or abbreviations in a trade name designating the legal character of an entity (e.g., Corporation, Corp., Co., Inc., Ltd., etc.) or the familial business structure of an entity (e.g., “& Sons” or “Bros.”) must be disclaimed because an entity designation has no source-indicating capacity. *See In re Piano Factory Grp., Inc.*, 85 USPQ2d 1522 (TTAB 2006) (holding VOSE & SONS primarily merely a surname); *In re Taylor & Francis [Publishers] Inc.*, 55 USPQ2d 1213, 1215 (TTAB 2000) (finding “PRESS,” as applied to a printing or publishing establishment, “is in the nature of a generic entity designation which is incapable of serving a source-indicating function”); *In re The Paint Prods. Co.*, 8 USPQ2d 1863, 1866 (TTAB 1988) (“PAINT PRODUCTS CO.’ is no more registrable for goods emanating from a company that sells paint products than it would be as a service mark for the retail paint store services offered by such a company”); *In re Packaging Specialists, Inc.*, 221 USPQ 917, 919 (TTAB 1984) (“the element ‘INC.’ [in PACKAGING SPECIALISTS, INC.] being recognized, in trademark evaluation, to have no source indication or distinguishing capacity” (citing *In re E.I. Kane, Inc.*, 221 USPQ 1203 (TTAB 1984))). Further, such designations must also be disclaimed in marks seeking registration on the Principal Register under §2(f) or on the Supplemental Register.

The only exception to this practice is where the entity designation is used in an arbitrary manner (e.g., “THE LTD.” or “KIDS INC.” for clothing or CHUCKLE BROS. for a comic strip). In this case, the term has trademark significance and a disclaimer should not be required.

### **1213.04 Trade Names**

Unregistrable components of trade names or company names shall be disclaimed pursuant to the same rules that apply generally to trademarks. *See In re Martin’s Famous Pastry Shoppe, Inc.*, 221 USPQ 364 (TTAB 1984), *aff’d on other grounds*, 748 F.2d 1565, 223 USPQ 1289 (Fed. Cir. 1984) (affirming requirement for

disclaimer of PASTRY SHOPPE in application to register MARTIN'S FAMOUS PASTRY SHOPPE INC. and design for various baked goods).

## 1213.05 Unitary Marks

A mark or portion of a mark is considered “unitary” when it creates a commercial impression separate and apart from any unregistrable component. The test for unitariness inquires whether the elements of a mark are so integrated or merged together that they cannot be regarded as separable. *See In re EBS Data Processing*, 212 USPQ 964, 966 (TTAB 1981); *In re Kraft, Inc.*, 218 USPQ 571, 573 (TTAB 1983). The inquiry focuses on “how the average purchaser would encounter the mark under normal marketing of such goods and also ... what the reaction of the average purchaser would be to this display of the mark.” *Dena Corp. v. Belvedere Int'l, Inc.*, 950 F.2d 1555, 1561, 21 USPQ2d 1047, 1052 (Fed. Cir. 1991) (quoting *In re Magic Muffler Serv., Inc.*, 184 USPQ 125, 126 (TTAB 1974)). The Court of Appeals for the Federal Circuit has set forth the elements of a unitary mark:

A unitary mark has certain observable characteristics. Specifically, its elements are inseparable. In a unitary mark, these observable characteristics must combine to show that the mark has a distinct meaning of its own independent of the meaning of its constituent elements. In other words, a unitary mark must create a single and distinct commercial impression.

*Dena Corp.*, 950 F.2d at 1561, 21 USPQ2d at 1052. If the matter that comprises the mark or relevant portion of the mark is unitary, no disclaimer of an element, whether descriptive, generic, or otherwise, is required.

The examining attorney must consider a number of factors in determining whether matter is part of a single or unitary mark: whether it is physically connected by lines or other design features; the relative location of the respective elements; and the meaning of the terminology as used on or in connection with the goods or services. *Dena Corp.*, 950 F.2d at 1561, 21 USPQ2d at 1052.

The examining attorney should exercise discretion in determining whether a mark or portion of a mark is unitary, in which case a disclaimer of a nondistinctive component must not be required. Some considerations that may factor into an assessment of whether wording in a mark or portion of a mark is unitary are discussed in [TMEP §§1213.05\(a\)–\(b\)\(iii\)](#). Each consideration may not apply in every case, and a phrase may be found to be unitary or to constitute a slogan even where none apply if, for some other reason, the whole is something more than the sum of its parts. Furthermore, if a mark that includes a registrable unitary phrase or slogan also has other unregistrable components that are separable, the latter must be disclaimed.

## 1213.05(a) Compound Word Marks

A compound word mark is comprised of two or more distinct words (or words and syllables) that are represented as one word (e.g., BOOKCHOICE, PROSHOT, MAXIMACHINE, and PULSAIR).

If a compound word mark consists of an unregistrable component and a registrable component combined into a single word, no disclaimer of the unregistrable component of the compound word will be required. *See In re EBS Data Processing, Inc.*, 212 USPQ 964, 966 (TTAB 1981) (finding that “[a] disclaimer of a descriptive portion of a composite mark is unnecessary . . . if the elements are so merged together that they cannot be regarded as separable elements . . . for example, . . . by combining two words or terms, one of which would be unregistrable by itself . . .”).

If a composite mark consists of a compound word combined with arbitrary matter, and the compound word is unregistrable, a disclaimer of the compound word may be required. The form of the disclaimer of the compound word – that is, whether the disclaimed portion of the mark appears as one compound word or as two or more distinct words – should be consistent with the evidence of descriptiveness. If the compound word itself (with no spaces) is used descriptively, it should be disclaimed in that form. Otherwise, the disclaimed portion should appear as two or more distinct words, separated by spaces. See [TMEP §1213.08\(c\)](#) regarding disclaimer of misspelled words.

See [TMEP §807.12\(e\)](#) regarding drawings of compound word marks.

### **1213.05(a)(i) Telescoped Words**

A telescoped mark is one that comprises two or more words that share letters (e.g., HAMERICAN, ORDERRECORDER, SUPERINSE, VITAMINSURANCE, and POLLENERGY). See [TMEP §807.12\(e\)](#) regarding drawings for telescoped marks.

A telescoped word is considered unitary. Therefore, no disclaimer of an individual portion of a telescoped word is required, regardless of whether the mark is shown in a standard character or special form drawing.

However, if a telescoped word is itself unregistrable, a disclaimer of the telescoped word may be required. See *In re Omaha Nat'l Corp.*, 819 F.2d 1117, 2 USPQ2d 1859 (Fed. Cir. 1987) (affirming refusal to register FIRSTIER and design for banking services in the absence of a disclaimer of “FIRST TIER,” in view of evidence that the term describes a class of banks). See [TMEP §1213.08\(c\)](#) regarding disclaimers of misspelled words, in general.

### **1213.05(a)(ii) Compound Words Formed with Hyphen or Other Punctuation**

When a compound word is formed by hyphenating two words or terms, one of which would be unregistrable alone, no disclaimer is necessary. *“X” Labs., Inc. v. Odorite Sanitation Serv. of Balt., Inc.*, 106 USPQ 327, 329 (Comm’r Pats. 1955) (holding requirement for a disclaimer of “TIRE” unnecessary in application to register TIRE-X for a tire cleaner).

Word marks consisting of two terms joined by an asterisk (e.g., RIB\*TYPE), a slash (e.g., RIB/TYPE) or a raised period (e.g., RIB°TYPE) are analogous to hyphenated words. Therefore, no disclaimer of portions of marks formed by asterisks, slashes, or raised periods is necessary.

If a hyphenated term comprising part of a mark is unregistrable, then a disclaimer of the hyphenated term may be required. See [TMEP §1209.03\(d\)](#) regarding determinations of whether a composite comprising two descriptive terms is itself descriptive. In this situation, the examining attorney must require a disclaimer of the words in the correct spelling.

*Example 1:* If the mark includes the term SOFT-TOYS for stuffed animals, the applicant must disclaim the two separate words “SOFT TOYS” apart from the mark as shown.

*Example 2:* If the mark includes the term OVER-COAT for winter coats, the applicant must disclaim the compound word “OVERCOAT,” because this is how the term is commonly spelled.

## 1213.05(b) Unitary Phrases

A phrase is “a group of words that are used together in a fixed expression,” “two or more words in sequence that form a syntactic unit that is less than a complete sentence,” and “a sequence of two or more words arranged in a grammatical construction and acting as a unit in a sentence.” MacmillanDictionary.com, search of “phrase,” <http://www.macmillandictionary.com/dictionary/american/phrase> (Jan. 31, 2012); *The American Heritage Dictionary of the English Language* 1324 (4th ed. 2006); *Random House Webster’s Unabridged Dictionary* 1460 (2nd ed. 2001). Acting as a “single idea” or a “syntactical unit,” however, does not necessarily mean that a phrase is “unitary” in the trademark sense. A phrase qualifies as unitary in the trademark sense only if the whole is something more than the sum of its parts. *Dena Corp. v. Belvedere Int’l, Inc.*, 950 F.2d 1555, 1561, 21 USPQ2d 1047, 1052 (Fed. Cir. 1991) (finding EUROPEAN FORMULA and design for cosmetic products not unitary since the “elements are not so merged together that they cannot be regarded as separate” and the proximity of the words to the design feature “does not endow the whole with a single, integrated, and distinct commercial impression”).

Even where it includes an otherwise unregistrable component, a unitary phrase as a whole will have “some degree of ingenuity in its phraseology as used in connection with the goods; or [say] something a little different from what might be expected to be said about the product; or [say] an expected thing in an unexpected way.” *Ex parte Mooresville Mills, Inc.*, 102 USPQ 440, 441 (Comm’r Pats. 1954) (holding FROM FIBER TO FABRIC FOR THE STYLE CONSCIOUS MILLIONS for fabrics capable of registration on the Supplemental Register).

Phrases must be analyzed on a case-by-case basis to determine whether their meaning and commercial impression indicate an inseparable whole. As noted above, a unitary phrase derives its meaning when viewed as a whole, with the combination of the components having a distinct commercial impression that is independent of the constituent elements. *Dena Corp.*, 950 F.2d at 1561, 21 USPQ2d at 1052 (noting that the proximity of the words EUROPEAN FORMULA to the design feature “does not endow the whole with a single, integrated, and distinct commercial impression”). In some cases, in addition to the mark itself, the specific arrangement and placement of all the elements of the phrase and the manner of use and presentation on the specimen, on applicant’s website, in promotional materials, and in connection with other goods or services may all demonstrate how the phrase is presented to and perceived by consumers.

Some considerations for determining whether a phrase that comprises a mark or part of a mark is unitary are set forth below.

### 1213.05(b)(i) Slogans

A slogan is a type of phrase and is defined as “a brief attention-getting phrase used in advertising or promotion” and “a catch phrase used to advertise a product.” Merriam-Webster.com, search of “slogan,” <http://www.merriam-webster.com/dictionary/slogan> (Jan. 31, 2012); *Webster’s New World College Dictionary* (4th ed. 2010). A registrable slogan is one that is used in a trademark sense and functions as a trademark or service mark on the Principal or Supplemental Register, including the Principal Register under §2(f). *Roux Labs., Inc. v. Clairol Inc.*, 427 F.2d 823, 166 USPQ 34 (C.C.P.A. 1970) (holding that the mark HAIR COLOR SO NATURAL ONLY HER HAIRDRESSER KNOWS FOR SURE for hair tinting, dyeing, coloring preparations had become distinctive of the goods and was registrable); *In re The Hallicrafters Co.*, 153 USPQ 376 (TTAB 1967) (holding QUALITY THROUGH CRAFTSMANSHIP registrable for radio

receivers and transmitters, power supplies, and antennae). Slogans, by their attention-getting nature, are treated as unitary matter and must not be broken up for purposes of requiring a disclaimer.

However, if a mark consists entirely of a slogan that is generic, merely descriptive, merely informational, or that is otherwise not being used as a mark, registration must be refused. See *In re Carvel Corp.*, 223 USPQ 65 (TTAB 1984) (holding AMERICA'S FRESHEST ICE CREAM for flavored ices, ice cream, etc., incapable of distinguishing applicant's goods and unregistrable on the Supplemental Register); *In re Wakefern Food Corp.*, 222 USPQ 76 (TTAB 1984) (holding WHY PAY MORE! for supermarket services to be an unregistrable common commercial phrase); see [TMEP 1213.05\(b\)\(iii\)](#).

If an unregistrable slogan is a component of a mark with registrable matter, the examining attorney must require that the slogan be disclaimed.

### **1213.05(b)(ii) Grammar and Punctuation**

Grammatical structure and punctuation may play a part in the analysis of whether a phrase or slogan would be viewed as unitary. Such considerations serve as guidelines rather than dispositive factors and the weight to be given each depends upon the overall meaning and commercial impression of the mark.

#### **1213.05(b)(ii)(A) Verbs**

A verb expresses an action (e.g., play, run, and sing) or a state of being (e.g., is, are, seem, become, and happen). See Merriam-Webster.com, search of "verb," <http://www.merriam-webster.com/dictionary/verb> (Jan. 31, 2012). The presence of a verb may indicate that a mark or portion of a mark is a unitary phrase or slogan by linking a subject and an object, or by referring to something that is ongoing, thereby creating continuity of thought or expression. See Chicagomanualofstyle.org, search of "verb," [http://www.chicagomanualofstyle.org/16/ch05/ch05\\_sec096.html](http://www.chicagomanualofstyle.org/16/ch05/ch05_sec096.html) (Jan. 31, 2012).

*Example 1:* TIP YOUR HAT for "hats"

When linked with the phrase YOUR HAT, the verb TIP renders the mark as a unitary phrase that creates the commercial impression of touching or raising a hat as a greeting or polite gesture. No disclaimer of HAT is required.

*Example 2:* TRANSFORMING STATE GOVERNMENT for "providing information in the field of state governments"

The verb TRANSFORMING indicates an ongoing activity being performed on STATE GOVERNMENT, thereby unifying the terms so that they function as a unit. No disclaimer of STATE GOVERNMENT is required.

Some additional examples of phrases in which the verb renders the phrase unitary are:

FILING TAXES SO YOU DON'T HAVE TO for "tax preparation"

BOATS ARE FUN for "boats"

TAKE THIS MEDICINE for "cough syrup"

See [TMPEP §1213.05\(b\)\(ii\)\(B\)](#) for examples in which the combination of a verb and a preposition link the wording to create a unitary phrase.

### 1213.05(b)(ii)(B) Prepositional Phrases

A preposition is “a word that usually comes before a noun or a pronoun and shows its relation to another part of the sentence.” MacmillanDictionary.com, search of “preposition,” <http://www.macmillandictionary.com/dictionary/american/preposition> (Jan. 31, 2012). Examples of prepositions include *above, at, before, between, by, for, from, in, into, of, on, since, through, to, toward, until,* and *with*. Chicagomanualofstyle.org, search of “preposition,” [http://www.chicagomanualofstyle.org/16/ch05/ch05\\_sec170.html](http://www.chicagomanualofstyle.org/16/ch05/ch05_sec170.html) (Jan. 31, 2012). Moreover, a preposition “links an object and an antecedent to show the relationship between them.” Chicagomanualofstyle.org, search of “preposition,” [http://www.chicagomanualofstyle.org/16/ch05/ch05\\_sec169.html](http://www.chicagomanualofstyle.org/16/ch05/ch05_sec169.html) (Jan. 31, 2012). The relation or connection may be to indicate a spatial relationship, location, time, cause, means, or possession. Chicagomanualofstyle.org, search of “preposition,” [http://www.chicagomanualofstyle.org/16/ch05/ch05\\_sec174.html](http://www.chicagomanualofstyle.org/16/ch05/ch05_sec174.html) (Jan. 31, 2012). A prepositional phrase is the combination of the “preposition, its object, and any words that modify the object,” for example, “over the hill,” “in the sports car,” or “near her.” Chicagomanualofstyle.org, search of “prepositional phrase,” [http://www.chicagomanualofstyle.org/16/ch05/ch05\\_sec173.html](http://www.chicagomanualofstyle.org/16/ch05/ch05_sec173.html) (Jan. 31, 2012); *see* MacmillanDictionary.com, search of “prepositional phrase,” <http://www.macmillandictionary.com/dictionary/american/prepositional-phrase> (Jan. 31, 2012).

Wording in a mark that comprises a prepositional phrase is generally connected or unified by the preposition(s) in such a way that the elements would not be regarded as separable. In addition, marks comprised of prepositional phrases often have the commercial impression of a catch phrase or slogan. In some instances, however, marks contain distinctive matter followed by unitary prepositional phrases that are informational or descriptive, and these prepositional phrases are separable from the rest of the mark and must be disclaimed. Common examples include “of” followed by a geographic place name (e.g., “of Atlanta”) and “for” followed by a consumer designation (e.g., “for children”).

*Example 1:* MANGOS FOR THE EARTH for “fresh mangos”

The preposition FOR joins THE EARTH with MANGOS, indicating a relationship between the wording. MANGOS is not separable because the prepositional phrase modifying it brings all the wording in the mark together to convey something more than the individual components. No disclaimer of MANGOS is required.

*Example 2:* A DAY OF HOPE FOR HEART DISEASE for “conducting workshops relating to heart disease”

The prepositions OF and FOR create two prepositional phrases joined as a unit that could be viewed as a catch phrase. No disclaimer of HEART DISEASE is required.

*Example 3:* ESTEE LAUDER FOR MEN for “cologne”

The descriptive prepositional phrase FOR MEN appears separable from the rest of the mark and does not create a distinct meaning independent of the meaning of the separate elements. Disclaimer of FOR MEN is required.

Some additional examples of phrases in which the preposition renders the phrase unitary are:

TALES OF THE COCKTAIL for “conducting seminars in mixology”

MENTORS FOR COMPLETE TEACHING for “remedial tutoring program for children in the areas mathematics and science”

CHECK UP FROM THE NECK UP for “medical services”

LANGUAGE OF LOLLIPOPS for “candy”

DEPARTMENT OF THE NAVY for “newsletters in the field of military science”

A DIVISION OF XYZ INDUSTRIES for “construction of buildings”

In some cases, the combination of a verb and a preposition link the wording to create a unitary phrase. For example:

GET MORE FROM ENERGY for “providing nondownloadable software for computing energy savings”

CHANGING THE WORLD OF SUSHI for “restaurant services”

WOMEN WHO RUN FROM COMPUTERS for “computer education training using multisensoral methods, group process and drama to motivate those with computer anxiety or fear”

### 1213.05(b)(ii)(C) Punctuation

The use of punctuation, such as a question mark, exclamation point, colon, dash, or period, as well as the meaning of the punctuation itself, may be a factor weighing either in favor of or against a mark or a portion of a mark being a unitary phrase or slogan. Note, however, that the presence of punctuation in a mark comprising a slogan or phrase should not be confused with the significance of punctuation in a mark containing compound words that are formed using punctuation. See [TMEP §1213.05\(a\)\(ii\)](#). Punctuation may either unite or separate all or some of the words in the mark. Where punctuation unites all the words, the mark or phrase as a whole is likely unitary. Where punctuation separates some of the words, however, the result likely indicates a mark or phrase that is not unitary, requiring disclaimer or refusal of the unregistrable matter. Therefore, the punctuation in the mark must be considered in connection with an assessment of the specific arrangement of the words and the overall meaning and commercial impression of the slogan or phrase.

*Example 1:* CREATIVE NAILS? for “nail polish”

A question mark is generally used at the conclusion of a sentence to indicate a direct question. Merriam-Webster.com, search of “question mark,” <http://www.merriam-webster.com/dictionary/question+mark> (Jan. 31, 2012). Here, the question mark at the end of the phrase joins the terms so that they function as a unit, thereby changing the commercial impression. No disclaimer of NAILS is required.

*Example 2:* GO! PUZZLE for “computer games software”

An exclamation point is used after an interjection or exclamation to indicate a forceful utterance or strong feeling. Merriam-Webster.com, search of “exclamation point,” <http://www.merriam-webster.com/dictionary/exclamation+point> (Jan. 31, 2012). It is usually placed at the end of a thought and indicates the conclusion of that thought. Here, the exclamation point is in the middle of the mark and physically separates GO and PUZZLE. The exclamation point also conceptually separates GO from PUZZLE because it gives GO a commanding and urgent connotation not applied to PUZZLE. Since PUZZLE is outside of the exclamatory statement and is descriptive for the goods, it is not united with GO. Disclaimer of PUZZLE is required.

*Example 3:* COMFY. COZY. COTTON for “bed sheets and blankets”

In this example, the period after each term physically and conceptually separates the terms such that each stands alone. Therefore, the wording does not comprise a unitary mark and a disclaimer of COTTON is required.

*Example 4:* NAA – NATIONAL ASSOCIATION OF ACCOUNTANTS for “association services, namely, promoting the interests of accountants”

Here, the punctuation physically and conceptually separates the wording in the mark. Moreover, the phrase NATIONAL ASSOCIATION OF ACCOUNTANTS is descriptive and must be disclaimed.

*Example 5:* BONDS – THE FUTURE OF INVESTING for “financial planning”

The punctuation physically and conceptually separates the wording in the mark and a disclaimer of BONDS is required. Note, however, that THE FUTURE OF INVESTING is a unitary phrase, avoiding a disclaimer of INVESTING.

In some cases, the use of punctuation in combination with a verb and/or preposition may combine to create a unitary phrase or a mark with a distinct meaning independent of the meaning of the separate elements, as shown below:

HAVE YOU HAD YOUR MEDS TODAY? for “prescription pills for diabetics”

PAPER FOR YOUR OFFICE. TO YOUR OFFICE. for “retail store services featuring office products”

WHERE SNACKS LOVE TO DIP! for “dips”

GO FOR GOLD! for “gold jewelry”

### **1213.05(b)(ii)(D) Possessives**

Generally, the use of a possessive form of a word in a mark does not, by itself, merge the wording so as to create the commercial impression of a unitary phrase or slogan. However, if the mark contains the possessive form of a word as well as one of the considerations discussed above, this combination of the elements may result in a slogan or unitary phrase.

*Example 1:* BILL’S CARPETS for “retail carpet stores”

The possessive form of BILL’S alone is not sufficient to unite BILL’S with CARPETS such that the whole is more than the sum of its parts. Disclaimer of CARPETS is required.

*Example 2:* BILL’S IS CARPETS for “retail carpet stores”

The possessive BILL’S does not, by itself, unite BILL’S with CARPETS. However, the presence of the verb IS unites all the words to convey a complete thought that functions as a unit and expresses a fanciful state of being. No disclaimer of CARPETS is required.

Some other examples of wording in which the possessive does not create a unitary phrase and disclaimer of the descriptive wording is required are:

THE CHILDREN’S PLACE for “clothing”; “backpacks”; “retail stores” (disclaimer of CHILDREN’S required)

BARB’S BREAD BAKERY, INC. for “bakery services” (disclaimer of BREAD BAKERY, INC. required)

HUBER'S PREMIUM WORKWEAR for "clothing" (disclaimer of PREMIUM WORKWEAR required)

### 1213.05(b)(iii) Other Considerations

Even if none of the considerations discussed above apply, there may be something about the components of the mark that joins them together and transforms them into a unitary phrase or slogan. If other considerations, such as word pattern, double entendre, and incongruity (see [TMEP §§1213.05\(c\)-1213.05\(e\)](#)), or the context, rhetorical structure, or some other aspect of the mark creates a distinct meaning or commercial impression that is more than its constituent parts, the phrase should be deemed unitary for purposes of a disclaimer. For example, a descriptive word can be combined with nondescriptive wording in such a way that the descriptive significance of the word in relation to the goods is lost and the combination functions as a unit. This happens when the combination itself has a new meaning.

*Example 1:* BLACK MAGIC for "accessories for skateboards and snowboards, namely grip tape"

The wording "Black Magic" has a distinct meaning of its own as a whole. The word BLACK is not intended to have color significance in relation to the goods, and should not be disclaimed even if the mark is applied to goods that are black in color.

*Example 2:* NOT YOUR ORDINARY DINER for "restaurant services"

The combination formed by the familiar phrase NOT YOUR ORDINARY followed by a descriptive or generic term creates a unitary phrase. No disclaimer of DINER is required.

*Example 3:* CORPORATE FUEL for "business management and advisory services"

Here, the descriptive term CORPORATE and the arbitrary word FUEL combine to create a unitary phrase that is a play on actual types of fuel, like jet fuel or diesel fuel. No disclaimer of CORPORATE is required.

Note, however, that in the following examples, nothing about the components of the marks joins them together and transforms them into unitary phrases.

*Example 4:* SWEETER PEARS REGENCY ORCHARD for "pears"

The mark does not contain a verb, preposition, or punctuation. Except for REGENCY, all the terms are descriptive and inform about the goods, their nature, and the type of place where they are grown. That the arbitrary term REGENCY is in the middle does not connect all the words to create a unitary phrase. Therefore, SWEETER PEARS and ORCHARD must be disclaimed.

*Example 5:* AAMCO COMPLETE CAR CARE EXPERTS for "motor vehicle maintenance and repair services"

The arbitrary term AAMCO is not connected to the rest of the terms, since there is no verb, preposition, or punctuation. The wording COMPLETE CAR CARE EXPERTS, which is descriptive and a separable element from AAMCO, must be disclaimed.

### 1213.05(b)(iv) Unregistrable Unitary Phrases or Slogans

Although the determination that a mark or portion of a mark is unitary may provide an exception to the disclaimer requirement, when an entire unitary phrase or slogan is generic, descriptive, or merely informational, it remains unregistrable. To illustrate, "common laudatory phrases or statements that would

ordinarily be used in business or in the particular trade or industry” are unregistrable despite the fact that they may be unitary phrases or slogans. *See In re Boston Beer Co. L.P.*, 198 F.3d 1370, 53 USPQ2d 1056 (Fed. Cir. 1999) (THE BEST BEER IN AMERICA for beer and ale); *In re Remington Prods. Inc.*, 3 USPQ2d 1714 (TTAB 1987) (PROUDLY MADE IN USA for electric shavers); *In re Carvel Corp.*, 223 USPQ 65 (TTAB 1984) (AMERICA’S FRESHEST ICE CREAM for flavored ices); *In re Tilcon Warren, Inc.*, 221 USPQ 86 (TTAB 1984) (WATCH THAT CHILD for construction material); *see also* TMEP §§[1209.03\(s\)](#) and [1202.04](#). Therefore, unless a unitary phrase or slogan otherwise meets all requirements for registrability, it must be disclaimed or refused registration, as appropriate.

### 1213.05(c) Double Entendre

A “double entendre” is a word or expression capable of more than one interpretation. For trademark purposes, a “double entendre” is an expression that has a double connotation or significance *as applied to the goods or services*. The mark that comprises the “double entendre” will not be refused registration as merely descriptive if one of its meanings is not merely descriptive in relation to the goods or services.

A true “double entendre” is unitary by definition. An expression that is a “double entendre” should not be broken up for purposes of requiring a disclaimer. *See In re Kraft, Inc.*, 218 USPQ 571, 573 (TTAB 1983), where the Board found inappropriate a requirement for a disclaimer of “LIGHT” apart from the mark “LIGHT N’ LIVELY” for reduced calorie mayonnaise, stating as follows:

The mark “LIGHT N’ LIVELY” as a whole has a suggestive significance which is distinctly different from the merely descriptive significance of the term “LIGHT” per se. That is, the merely descriptive significance of the term “LIGHT” is lost in the mark as a whole. Moreover, the expression as a whole has an alliterative lilted cadence which encourages persons encountering it to perceive it as a whole.

*See also In re Symbra’ette, Inc.*, 189 USPQ 448 (TTAB 1975) (holding SHEER ELEGANCE for panty hose to be a registrable unitary expression; thus, no disclaimer of “SHEER” considered necessary).

The multiple interpretations that make an expression a “double entendre” must be associations that the public would make fairly readily, and *must be readily apparent from the mark itself*. *See In re RiseSmart Inc.*, 104 USPQ2d 1931, 1934 (TTAB 2012) (finding that TALENT ASSURANCE does not present a double entendre such that “the merely descriptive significance of the term [TALENT] is lost in the mark as a whole”); *In re The Place, Inc.*, 76 USPQ2d 1467, 1470 (TTAB 2005) (holding THE GREATEST BAR laudatory and merely descriptive of restaurant and bar services; the Board stating that “[i]f the alleged second meaning of the mark is apparent to purchasers only after they view the mark in the context of the applicant’s trade dress, advertising materials or other matter separate from the mark itself, then the mark is not a double entendre”); *In re Wells Fargo & Co.*, 231 USPQ 95, 99 (TTAB 1986) (holding EXPRESSERVICE merely descriptive for banking services, despite applicant’s argument that the term also connotes the Pony Express, the Board finding that, in the relevant context, the public would not make that association). *See also In re Ethnic Home Lifestyles Corp.*, 70 USPQ2d 1156, 1158 (TTAB 2003) (holding ETHNIC ACCENTS merely descriptive of “entertainment in the nature of television programs in the field of home décor,” because the meaning in the context of the services is home furnishings or decorations which reflect or evoke particular ethnic traditions or themes, which identifies a significant feature of applicant’s programs; viewers of applicant’s programs deemed unlikely to discern a double entendre referring to a person who speaks with a foreign accent).

If all meanings of a “double entendre” are merely descriptive in relation to the goods, then the mark comprising the “double entendre” must be refused registration as merely descriptive.

The following cases illustrate situations where marks were considered to be “double entendres” and, therefore, registrable unitary marks: *In re Colonial Stores Inc.*, 394 F.2d 549, 157 USPQ 382 (C.C.P.A. 1968) (SUGAR & SPICE for bakery products); *In re Tea and Sympathy, Inc.*, 88 USPQ2d 1062 (TTAB 2008) (holding THE FARMACY registrable for retail store services featuring natural herbs and organic products and related health and information services relating to dietary supplements and nutrition); *In re Simmons Co.*, 189 USPQ 352 (TTAB 1976) (THE HARD LINE for mattresses and bed springs); *In re Del. Punch Co.*, 186 USPQ 63 (TTAB 1975) (THE SOFT PUNCH for noncarbonated soft drink); *In re National Tea Co.*, 144 USPQ 286 (TTAB 1965) (NO BONES ABOUT IT for fresh pre-cooked ham).

### 1213.05(d) Incongruity

If two or more terms are combined in a mark to create an incongruity (e.g., URBAN SAFARI, MR. MICROWAVE, and DR. GRAMMAR), the mark is unitary and no disclaimer of nondistinctive individual elements is necessary. See [TMEP §1209.01\(a\)](#) regarding incongruity.

### 1213.05(e) Sound Patterns

Alliterative or repeated wording does not in itself make a mark unitary. *In re Ginc UK Ltd.*, 90 USPQ2d 1472, 1477 (TTAB 2007) (finding the rhyming quality of the words ZOGGS TOGGS “does not infuse TOGGS with any separate and distinct meaning apart from its generic meaning”); *In re Lean Line, Inc.*, 229 USPQ 781, 782 (TTAB 1986) (holding LEAN LINE *not* unitary; “there is nothing in the record to suggest that the mere fact that both words which form the mark begin with the letter ‘L’ would cause purchasers to miss the merely descriptive significance of the term ‘LEAN’ or consider the entire mark to be a unitary expression.”)

In rare cases, a rhyming pattern, alliteration, or some other use of sound that creates a distinctive impression may contribute to a finding that the mark is regarded as unitary and individual elements should not be disclaimed. See *In re Kraft, Inc.*, 218 USPQ 571, 573 (TTAB 1983) (finding LIGHT N’ LIVELY to be a unitary term not subject to disclaimer, because the mark as a whole “has a suggestive significance which is distinctly different from the merely descriptive significance of the term ‘LIGHT’ per se” and that “the merely descriptive significance of the term ‘LIGHT’ is lost in the mark as a whole.”). Other evidence, such as registrations of the mark for related goods and consumer recognition of the mark as a unitary expression, may also contribute to a finding that the mark is unitary. *Id.*

### 1213.05(f) Display of Mark

The visual presentation of a mark may be such that the words and/or designs form a unitary whole. In such a case, disclaimer of individual nondistinctive elements is unnecessary. See, e.g., *In re Texsun Tire & Battery Stores, Inc.*, 229 USPQ 227, 229 (TTAB 1986) (“[T]he portion of the outline of the map of Texas encircled as it is with the representation of a tire and surrounded by a rectangular border results in a unitary composite mark which is unique and fanciful.”); cf. *In re Slokevage*, 441 F.3d 957, 78 USPQ2d 1395 (Fed. Cir. 2006) (holding trade dress configuration of product design consisting of a label with the words “FLASH DARE!” in a V-shaped background, and cut-out areas located on each side of the label, with the cut-out areas consisting of a hole in a garment and a flap attached to the garment with a closure device not to be unitary where

applicant owned separate registrations for some of the elements and in view of the separate locations of the words and design elements).

### **1213.05(g) Marks with Design Elements Replacing Letters**

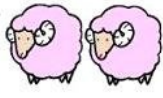

Generally, when a design element replaces one or more letters (or a portion of a letter or letters) in a word that is merely descriptive, generic, or geographically descriptive, this combination of word and design element does not create a “unitary mark” if the word remains recognizable. Accordingly, the examining attorney must require a disclaimer of the merely descriptive, generic, or geographically descriptive word in such cases. *See In re Clutter Control, Inc.*, 231 USPQ 588, 590 (TTAB 1986).

If the wording to be disclaimed is otherwise registrable (i.e., not generic), applicant may submit a claim of acquired distinctiveness as to that portion of the mark under Trademark Act §2(f). The examining attorney must always separately determine whether an applicant has adequately shown acquired distinctiveness. *See In re Venturi, Inc.*, 197 USPQ 714, 717 (TTAB 1977).

The examining attorney must also assess whether the proposed mark might be unitary for other reasons (such as a compound or telescoped mark).

### **1213.05(g)(i) Marks with a Distinctive Design Replacing a Letter in Descriptive or Generic Wording**

Marks with a distinctive design that replaces a letter or part of a letter are registrable on the Principal Register with a disclaimer of the merely descriptive, generic, or primarily geographically descriptive wording. For example:

**Jelly Bean**  
**W**  **L**

Principal Register – Disclaimer of “WOOL”

**Flapjack, Inc.**  
**A**  **imal Food**

Principal Register – Disclaimer of “INC.” and “ANIMAL FOOD”

NUMBSKULL  
CLTHING  
CO.

Principal Register – Disclaimer of “CLOTHING CO.”

H O T  
P A R I S

Principal Register – Disclaimer of “PARIS”

Principal Register – Disclaimer of “PONY”

# Fish Flips

Principal Register – Disclaimer of “FISH”

The logo for "KIDS" features the word in a colorful, stylized font. The letter 'K' is red, 'I' is blue, 'D' is green, and 'S' is orange. A blue silhouette of a child with arms raised is positioned between the 'I' and 'D'. A solid blue circle is at the end of the word.

Principal Register – Disclaimer of “KIDS”

The logo for "Lisa Corrado Nutrition" features the name "Lisa Corrado" in a light green, sans-serif font above the word "Nutrition" in a dark brown, sans-serif font. The letter 'o' in "Nutrition" is replaced by a green apple with a stem and leaf.

Principal Register – Disclaimer of “NUTRITION”

The logo for "Outdoor TOWELS" features the word "Outdoor" in a bold, black, sans-serif font above the word "TOWELS" in a larger, bold, black, sans-serif font. The letters in "TOWELS" have a white outline and a drop shadow effect.

Principal Register – Disclaimer of “TOWELS”

**Döggie  
Rewards**

Principal Register – Disclaimer of “DOGGIE”

**1213.05(g)(ii) Marks with Merely Descriptive or Primarily Geographically Descriptive Designs  
Replacing Letters within Descriptive or Primarily Geographically Descriptive Wording**

If the design that replaces a letter within descriptive or primarily geographically descriptive wording is itself merely descriptive or primarily geographically descriptive, or is otherwise nondistinctive, the examining attorney must require the applicant to amend to the Supplemental Register or seek registration on the Principal Register under §2(f) and to disclaim any generic wording. For example:

*NATIONAL BANKER\$  
A\$\$OCIATION*

Disclaim “BANKERS ASSOCIATION” on Principal Register under §2(f) or on Supplemental Register

**C  NNECTICUT  
Builders Association**

Disclaim “BUILDERS ASSOCIATION” on Principal Register under §2(f) or on Supplemental Register

***National  
Check  
Cashers***

Disclaim “CHECK CASHERS” on Principal Register under §2(f) or on Supplemental Register

**1213.05(g)(iii) Marks with Accurate Pictorial Representations Replacing Letters in Merely Descriptive and Primarily Geographically Descriptive Marks**

If the mark is otherwise merely descriptive or primarily geographically descriptive, and the design replacing a letter is an accurate pictorial representation of generic, merely descriptive, or geographically descriptive matter, the examining attorney must require the applicant to amend to the Supplemental Register or seek registration on the Principal Register under Trademark Act §2(f). The applicant must disclaim any generic wording or any accurate pictorial representation of generic matter. For example:

**BEST  
SOCCER  
BALLS**

Disclaim “SOCCER BALLS” and the pictorial representation of the soccer ball on the Principal Register under §2(f) or on the Supplemental Register

**1213.05(g)(iv) Unitary Marks with Design Elements Replacing Letters in Descriptive or Generic Wording**

If literal and design elements in a mark are so merged together that they cannot be divided or regarded as separable elements, these elements may be considered unitary. For example, where the design element replacing a letter is merely one part of a larger design, the mark may be unitary, and no disclaimer of the descriptive or generic wording is required:

### 1213.05(h) Unitary Marks: Case References

In the following cases, marks were considered unitary: *B. Kuppenheimer & Co., v. Kayser-Roth Corp.*, 326 F.2d 820, 822, 140 USPQ 262, 263 (C.C.P.A. 1964) (holding that KUPPENHEIMER and SUP-PANTS were combined so that they shared the double “P,” making “an indivisible symbol rather than two divisible words”); *In re Kraft, Inc.*, 218 USPQ 571, 573 (TTAB 1983) (finding that purchasers would regard LIGHT N’LIVELY as a unitary mark); *In re Hampshire-Designers, Inc.*, 199 USPQ 383, 384 (TTAB 1978) (holding DESIGNERS PLUS+ for sweaters unitary); *In re J.R. Carlson Labs., Inc.*, 183 USPQ 509, 511 (TTAB 1974) (holding E GEM unitary for bath oil containing vitamin E ).

In the following cases, marks were found not to be unitary: *In re Slokevage*, 441 F.3d 957, 963 78 USPQ2d 1395, 1400 (Fed. Cir. 2006) (holding not unitary trade dress mark for clothing consisting of a label with the words “FLASH DARE!” in a V-shaped background and cut-out areas located on each side of the label); *Dena Corp.*, 950 F.2d at 1561, 21 USPQ2d at 1052 (holding EUROPEAN FORMULA above a circular design on a dark square or background not unitary); *In re Ginc UK Ltd.*, 90 USPQ2d 1472, 1476 (TTAB 2007) (holding ZOGGS TOGGS for clothing not unitary and affirming requirement for disclaimer of “TOGGS”); *In re Brown-Forman Corp.*, 81 USPQ2d 1284, 1288 (TTAB 2006) (holding GALA ROUGE for wine not unitary and affirming requirement for disclaimer of “ROUGE”); *In re Lean Line, Inc.*, 229 USPQ 781 (TTAB 1986) (holding LEAN LINE for low calorie foods not unitary; requirement for disclaimer of “LEAN” held proper); *In re IBP, Inc.*, 228 USPQ 303 (TTAB 1985) (holding IBP SELECT TRIM for pork not unitary; refusal of registration in the absence of a disclaimer of “SELECT TRIM” affirmed); *In re Uniroyal, Inc.*, 215 USPQ 716 (TTAB 1982) (holding UNIROYAL STEEL/GLAS for vehicle tires not unitary; requirement for disclaimer of “STEEL/GLAS” deemed appropriate); *In re EBS Data Processing*, 212 USPQ at 966 (TTAB 1981) (holding PHACTS POCKET PROFILE, for personal medication history summary and record forms, not unitary; refusal to register in the absence of a disclaimer of “POCKET PROFILE” affirmed. “A disclaimer of a descriptive portion of a composite mark is unnecessary only where the form or degree of integration of that element in the composite makes it obvious that no claim other than

of the composite would be involved. That is, if the elements are so merged together that they cannot be regarded as separable elements, the mark is a single unitary mark and not a composite mark and no disclaimer is necessary.”); *In re Nat’l Presto Indus., Inc.*, 197 USPQ 188 (TTAB 1977) (holding PRESTO BURGER for electrical cooking utensils not unitary; requirement for disclaimer of “BURGER” affirmed).

### 1213.06 Entire Mark May Not Be Disclaimed

An entire mark may not be disclaimed. If a mark is not registrable as a whole, a disclaimer will not make it registrable. There must be something in the combination of elements in the mark, or something of sufficient substance or distinctiveness over and above the matter being disclaimed, that would make the composite registrable. See *In re Sadoru Group, Ltd.*, 105 USPQ2d 1484 (TTAB 2012) (finding the stylization of SADORU does not create a separate and inherently distinctive commercial impression apart from the word itself); *In re Carlson*, 91 USPQ2d 1198, 1203 (TTAB 2009); *In re Anchor Hocking Corp.*, 223 USPQ 85, 86 (TTAB 1984) (citing *In re Carolyn’s Candies, Inc.*, 206 USPQ 356, 360 (TTAB 1980)); *Ex parte Ste. Pierre Smirnoff Fls, Inc.*, 102 USPQ 415, 416 (Comm’r Pats. 1954). This includes marks that are comprised entirely of generic wording, and either the entire mark or some of the terms are the phonetic equivalent of the generic wording. Such marks cannot be disclaimed, even in the proper spelling, and approved for registration on the Supplemental Register. See [TMEP §1209.01\(c\)](#).

In *Dena Corp. v. Belvedere Int’l Inc.*, 950 F.2d 1555, 1560, 21 USPQ2d 1047, 1051 (Fed. Cir. 1991), the Court of Appeals for the Federal Circuit stated as follows:

[U]nder traditional disclaimer practice, an applicant could not disclaim all elements of a composite mark. Section 1056(a) codified this policy. A mark which must be entirely disclaimed has no ‘unregistrable component,’ but is instead entirely nonregistrable. In other words, a mark which must be entirely disclaimed has no ‘otherwise registrable’ parts. Therefore, such marks do not qualify as composite marks for which the Commissioner may require a disclaimer.

### 1213.07 Removal Rather Than Disclaimer

When it is not clear that matter forms part of a mark, the examining attorney must consider whether it is appropriate for the applicant to amend the drawing of the mark to remove the matter, rather than to disclaim it. See [TMEP §807.14\(a\)](#) regarding deletion of matter from the mark on a drawing. An applicant may not amend the drawing if the amendment would constitute a material alteration of the mark. 37 C.F.R. §2.72; [TMEP §§807.14–807.14\(f\)](#) .

There are circumstances under which the applicant may omit or remove matter from the mark shown in the drawing, if the overall commercial impression is not altered. See *Institut Nat’l Des Appellations D’Origine v. Vintners Int’l Co.* , 958 F.2d 1574, 1582, 22 USPQ2d 1190, 1197 (Fed. Cir. 1992); *In re Servel, Inc.*, 181 F.2d 192, 85 USPQ 257 (C.C.P.A. 1950). However, matter may not be omitted from the drawing if the omission would result in an incomplete representation of the mark, sometimes referred to as “mutilation.” See [TMEP §807.12\(d\)](#). In other words, the matter presented for registration must convey a single distinct

commercial impression. If a mark is not unitary in this sense, it cannot be registered. *See Dena Corp. v. Belvedere Int'l Inc.*, 950 F.2d 1555, 1561, 21 USPQ2d 1047, 1052 (Fed. Cir. 1991).

## 1213.08 Form of Disclaimers

### 1213.08(a) Wording of Disclaimer

#### 1213.08(a)(i) Standardized Printing Format for Disclaimer

Since November 9, 1982, disclaimers for marks published for opposition and those registered on the Supplemental Register are printed in a standardized form in the *Official Gazette*, regardless of the text submitted. Disclaimers are in the standardized format in certificates of registration on the Supplemental Register issued as of that date. Disclaimers are in the standardized format in certificates of registration on the Principal Register issued as of February 1, 1983. The disclaimed matter is taken from the disclaimer of record and inserted into the standardized disclaimer format for printing and database purposes. The standardized disclaimer text is as follows:

No claim is made to the exclusive right to use " \_\_\_\_\_ " apart from the mark as shown.

*See* 1022 OG 44 (Sept. 28, 1982). *See also In re Owatonna Tool Co.*, 231 USPQ 493, 495 (Comm'r Pats. 1983) (“[T]he use of the standardized form is solely for the purpose of printing and data base purposes, not for the limitation of registrant’s rights.”).

For the record only, examining attorneys will accept disclaimers with additional statements pertaining to reservation of common-law rights, although §6 of the Trademark Act of 1946 states that no disclaimer shall prejudice or affect the applicant’s or registrant’s rights then existing or thereafter arising in the disclaimed matter. Disclaimers with these additional statements can be entered by examiner’s amendment. The examining attorney must inform the applicant or attorney who authorizes the amendment that the disclaimer will be printed in the standardized format.

Where non-adjacent components of a mark, or adjacent components that do not form a grammatically or otherwise unitary expression must be disclaimed, the following format is suggested:

No claim is made to the exclusive right to use " \_\_\_\_\_ " and " \_\_\_\_\_ " apart from the mark as shown.

While the “and” connector is preferred, the USPTO will also accept a statement that “no claim is made to the exclusive right to use " \_\_\_\_\_ " or " \_\_\_\_\_ " apart from the mark as shown.”

See [TMEP §1213.08\(b\)](#) regarding the disclaimer of unregistrable matter in its entirety.

#### 1213.08(a)(ii) Unacceptable Wording for Disclaimer

Wording that claims matter, rather than disclaims it, is not acceptable. A disclaimer should be no more than a statement that identifies matter to which the applicant may not have exclusive rights apart from what is shown on the drawing.

Therefore, statements that the applicant “claims” certain matter in the association shown are not acceptable. The examining attorney must require correction of this wording and of variations that amount to the same thing. Likewise, a statement that the mark is “not claimed except in the association shown,” or similar wording, is not acceptable, and the examining attorney must require correction. See *Textron Inc. v. Pilling Chain Co.*, 175 USPQ 621, 621-22 (TTAB 1972), concerning an application which included the statement, “The mark is not to be claimed except in the setting presented.” The Board found this wording unacceptable, noting, “The alleged disclaimer filed by applicant is in such vague terms that it actually disclaims nothing.”

### **1213.08(a)(iii) Unacceptable Statements in Disclaimers**

A statement that purports to limit a mark by excluding color(s) or other features that do not appear in the mark is not appropriate for inclusion in a disclaimer. The issue most often arises where there are possible infringement issues involving a particular color, the applicant’s mark does not claim any color, but the applicant attempts to “disclaim” the color from the application with a statement such as: “No claim is made to the exclusive right to use the color purple within or as part of the (design element) apart from the mark as shown.”

Although applicants may include such restrictive statements in the application record, they are not appropriate for the registration certificate. Accordingly, if an applicant inserts any such limiting statement in a disclaimer, the examining attorney must ensure that it is deleted from the Trademark database so that it will not be printed on the registration certificate.

### **1213.08(b) Disclaimer of Unregistrable Matter in Its Entirety**

Unregistrable matter must be disclaimed in its entirety. For example, when requiring a disclaimer of terms that form a grammatically or otherwise unitary expression (e.g., “SHOE FACTORY, INC.”), the examining attorney must require that they be disclaimed in their entirety. See, e.g., *In re Med. Disposables Co.*, 25 USPQ2d 1801 (TTAB 1992) (finding MEDICAL DISPOSABLES to be a unitary expression that must be disclaimed as a composite); *Am. Speech-Language-Hearing Ass’n v. Nat’l Hearing Aid Soc’y*, 224 USPQ 798, 805 n.3 (TTAB 1984) (finding “CERTIFIED HEARING AID AUDIOLOGIST” to be “a unitary expression that should be disclaimed in its entirety”); *In re Surelock Mfg. Co.*, 125 USPQ 23, 24 (TTAB 1960) (holding proposed disclaimer of “THE” and “RED” and “CUP” unacceptable to comply with requirement for disclaimer of “THE RED CUP,” the Board concluding, “A disclaimer of the individual components of the term ‘THE RED CUP,’ under the circumstances, is meaningless and improper”); *In re Wanstrath*, 7 USPQ2d 1412, 1413 (Comm’r Pats. 1987) (denying petitioner’s request to substitute separate disclaimers of “GLASS” and “TECHNOLOGY” for the disclaimer of “GLASS TECHNOLOGY” in its registration of GT GLASS TECHNOLOGY in stylized form, the Commissioner finding “GLASS TECHNOLOGY” to be a unitary expression and noting, “Disclaimers of individual components of complete descriptive phrases are improper.”).

However, separate disclaimers of adjacent components of a mark may be accepted where they do not form a grammatically or otherwise unitary expression, and each component retains its separate descriptive

significance. *In re Grass GmbH*, 79 USPQ2d 1600 (TTAB 2006) (reversing requirement for unitary disclaimer of “SNAP ON 3000,” and accepting separate disclaimers of “SNAP ON” and “3000.”)

### **1213.08(c) Disclaimer of Misspelled Words**

Marks often comprise words that may be characterized as “misspelled.” For example, marks may comprise terms that are “telescoped” (see [TMEP §1213.05\(a\)\(i\)](#)) or terms that are phonetic equivalents of particular words but spelled in a manner that varies from the ordinary spelling of such words.

If a mark comprises a word or words that are misspelled but nonetheless must be disclaimed, the examining attorney must require disclaimer of the word or words in the correct spelling. See *In re Omaha Nat’l Corp.*, 819 F.2d 1117, 1119, 2 USPQ2d 1859, 1861 (Fed. Cir. 1987); *In re Carlson*, 91 USPQ2d 1198, 1203 (TTAB 2009); *In re Newport Fastener Co.*, 5 USPQ2d 1064, 1067 n.4 (TTAB 1987). However, the entry of a disclaimer does not render registrable a mark that is otherwise unregistrable. For example, if a mark is comprised entirely of generic wording and some or all of the wording in the mark is the phonetic equivalent of the generic wording, the entire mark may not be disclaimed, even in the proper spelling, and approved for registration on the Supplemental Register. See [TMEP §1209.01\(c\)](#).

If the examining attorney has not required any disclaimer of misspelled wording because a disclaimer is not necessary under USPTO policy, the applicant may provide a disclaimer of the wording as spelled in the mark or in its correct spelling voluntarily. In such a case, the examining attorney must offer the applicant the opportunity to withdraw the disclaimer. If it is necessary to communicate with the applicant about another matter, the examining attorney must state in the Office action that the disclaimer appears to be unnecessary, and inquire as to whether the applicant wants to withdraw the disclaimer. If it is otherwise unnecessary to communicate with the applicant, the inquiry may be made by telephone or e-mail. If the applicant wants to delete the disclaimer, this may be done by examiner’s amendment. If the applicant does not respond promptly to the telephone or e-mail message (applicant should be given at least a week), the examining attorney must enter an appropriate Note to the File in the record. Again, the disclaimer does not render an otherwise unregistrable mark registrable. The examining attorney must consider the entire mark, including the disclaimed matter, to determine whether the entire mark is registrable.

### **1213.08(d) Disclaimer of Non-English Words**

Non-English wording that comprises an unregistrable component of a mark is subject to disclaimer. See *Bausch & Lomb Optical Co. v. Overseas Finance & Trading Co.*, 112 USPQ 6, 8 (Comm’r Pats. 1956) (noting that “Kogaku,” the transliteration of the Japanese word for “optical,” was properly disclaimed).

If translated non-English wording must be disclaimed, the actual non-English wording must be disclaimed, not the English translation. The applicant must disclaim the wording that actually appears in the mark, not the translated version. For non-Latin characters, the following format is suggested:

No claim is made to the exclusive right to use the non-Latin characters that transliterate to “[specify Latin character transliteration]” apart from the mark as shown.

See [TMEP §§809–809.03](#) regarding translation and transliteration of non-English wording in marks.

### 1213.09 Mark of Another May Not Be Registered with Disclaimer

Normally, a mark that includes a mark registered by another person must be refused registration under §2(d) of the Trademark Act, 15 U.S.C. §1052(d), based on likelihood of confusion. A refusal of registration under §2(d) may not be avoided by disclaiming the mark of another. *Cf. In re Franklin Press, Inc.*, 597 F.2d 270, 201 USPQ 662 (C.C.P.A. 1979) (permitting disclaimer of informational phrase indicating that applicant's employees are represented by certain labor organizations). See [TMEP §1213.10](#) regarding disclaimer in relation to likelihood of confusion.

### 1213.10 Disclaimer in Relation to Likelihood of Confusion

A disclaimer does not remove the disclaimed matter from the mark. The mark must still be regarded as a whole, including the disclaimed matter, in evaluating similarity to other marks. *See In re Nat'l Data Corp.*, 753 F.2d 1056, 1059, 224 USPQ 749, 751 (Fed. Cir. 1985); *Specialty Brands, Inc. v. Coffee Bean Distribs., Inc.*, 748 F.2d 669, 672, 223 USPQ 1281, 1282 (Fed. Cir. 1984); *Giant Food, Inc. v. Nation's Foodservice, Inc.*, 710 F.2d 1565, 1570, 218 USPQ 390, 395 (Fed. Cir. 1983); *Schwarzkopf v. John H. Breck, Inc.*, 340 F.2d 978, 144 USPQ 433 (C.C.P.A. 1965); *In re MCI Commc'ns Corp.*, 21 USPQ2d 1534, 1538-39 (Comm'r Pats. 1991).

Typically, disclaimed matter will not be regarded as the dominant, or most significant, feature of a mark. However, since the Trademark Act permits an applicant to voluntarily disclaim registrable matter ( *see* [TMEP §1213.01\(c\)](#)), disclaimed matter may be dominant or significant in some cases. As noted in *MCI Commc'ns Corp.*, 21 USPQ2d at 1539, “Examining Attorneys will continue to consider the question of likelihood of confusion, under Section 2(d) of the statute, in relation to the marks as a whole, including any voluntarily disclaimed matter.”

### 1213.11 Acquiring Rights in Disclaimed Matter

*In Estate of P.D. Beckwith, Inc. v. Comm'r of Pats.*, 252 U.S. 538, 545 (1920), the United States Supreme Court stated, regarding registration of a mark with a disclaimer, that “the registrant would be precluded by his disclaimer from setting up in the future any exclusive right to the disclaimed part of it.” Subsequently, that principle was applied literally; registrants were prohibited from asserting that disclaimed matter had acquired secondary meaning. *See Shaler Co. v. Rite-Way Prods., Inc.*, 107 F.2d 82, 84, 43 USPQ 425, 427 (6th Cir. 1939).

The situation was changed by the Trademark Act of 1946, which provided that “disclaimer shall not prejudice or affect the applicant's or owner's rights then existing or thereafter arising in the disclaimed matter, nor shall such disclaimer prejudice or affect the applicant's or owner's rights of registration on another application of later date if the disclaimed matter has become distinctive of the applicant's or owner's goods or services.” 15 U.S.C. §1056 (1946), *amended by* 15 U.S.C. §1056(b) (1962). In 1962, the statutory provision was amended to read, “No disclaimer ... shall prejudice or affect the applicant's or registrant's rights then existing or thereafter arising in the disclaimed matter, or his right of registration on another application if the disclaimed matter be or shall have become distinctive of his goods or services.” 15 U.S.C. §1056(b).

It is now clear that, aside from generic matter, disclaimed matter is not forever barred from registration, and it can subsequently be considered for registration on either the Principal Register or the Supplemental Register. When an application is filed seeking registration of matter previously disclaimed, it must be

examined in the same manner as other applications. See *Quaker Oil Corp. v. Quaker State Oil Ref. Corp.*, 161 USPQ 547, 549 (TTAB 1969), *aff'd*, 453 F.2d 1296, 172 USPQ 361 (C.C.P.A. 1972); *Victor Tool & Mach. Corp. v. Sun Control Awnings, Inc.*, 299 F. Supp. 868, 875-76, 162 USPQ 389, 394 (E.D. Mich. 1968), *aff'd*, 411 F.2d 792, 162 USPQ 387 (6th. Cir. 1969).

Whether or not previously disclaimed matter has become eligible for registration depends on the circumstances and the evidence adduced in the examination process. See *Roux Distrib. Co. v. Duart Mfg. Co.*, 114 USPQ 511, 512 (Comm'r Pats. 1957); *Helena Rubinstein, Inc. v. Ladd*, 219 F. Supp. 259, 260, 138 USPQ 106, 107 (D.D.C. 1963), *aff'd*, 141 USPQ 623 (D.C. Cir. 1964).

## 1214 “Phantom” Elements in Marks

In some applications, the applicant seeks to register a “phantom” element (i.e., a word, alpha-numeric designation, or other component that is subject to change) as part of a mark. The applicant represents the changeable or “phantom” element by inserting a blank, or by using dots, dashes, underlining, or a designation such as “XXXX.”

Examples include marks incorporating a date (usually a year), a geographic location, or a model number that is subject to change. While these are some of the most common examples of the types of elements involved, there are many variations.

### 1214.01 Single Application May Seek Registration of Only One Mark

Where an applicant seeks registration of a mark with a changeable or “phantom” element, the examining attorney must refuse registration under §§1 and 45 of the Trademark Act, 15 U.S.C. §§1051 and 1127, on the ground that the application seeks registration of more than one mark. See *In re Int'l Flavors & Fragrances Inc.*, 183 F.3d 1361, 51 USPQ2d 1513 (Fed. Cir. 1999); *In re Primo Water Corp.*, 87 USPQ2d 1376 (TTAB 2008); *Cineplex Odeon Corp. v. Fred Wehrenberg Circuit of Theatres Inc.*, 56 USPQ2d 1538 (TTAB 2000).

In *International Flavors*, the applicant filed three applications to register the designations “LIVING xxxx,” “LIVING xxxx FLAVOR,” and “LIVING xxxx FLAVORS,” for essential oils and flavor substances. The applications indicated that “the ‘xxxx’ served to denote ‘a specific herb, fruit, plant or vegetable.’” *Int'l Flavors*, 183 F.3d at 1363-64, 51 USPQ2d at 1514-15. In upholding the refusal of registration, the Federal Circuit noted that under §22 of the Trademark Act, 15 U.S.C. §1072, registration serves as constructive notice to the public of the registrant’s ownership of the mark and, therefore, precludes another user from claiming innocent misappropriation as a trademark infringement defense. To make this constructive notice meaningful, the mark as registered must accurately reflect the mark that is used in commerce, so that someone who searches the register for a similar mark will locate the registration. The court stated that “phantom marks” with missing elements “encompass too many combinations and permutations to make a thorough and effective search possible” and, therefore, the registration of these marks does not provide adequate notice to competitors and the public. *Id.* at 1367-68, 51 USPQ2d at 1517-18.

In *Primo Water*, the Board affirmed a refusal of registration of a mark comprising the “placement and orientation of identical spaced indicia” on either side of the handle of a water bottle in inverted orientation, where the description of the mark indicated that the “indicia” can be “text, graphics or a combination of both.” *Primo Water*, 87 USPQ2d at 1377. The Board noted that the varying indicia must be viewed by consumers before they can perceive the repetition and inversion elements of the mark, and that marks with changeable or “phantom” elements do not provide proper notice to other trademark users. *Id.* at 1379-80. The Board also noted that the only issue on appeal was whether applicant seeks to register more than one mark, and that this issue is separate from the question of whether the proposed mark is distinctive and functions as a mark. *Id.* at 1380.

*See also In re Upper Deck Co.*, 59 USPQ2d 1688, 1691 (TTAB 2001) (finding hologram used on trading cards in varying shapes, sizes, contents, and positions constitutes more than one “device” as contemplated by §45 of the Trademark Act).

See [TMEP §807.01](#) regarding the requirement that an application be limited to one mark.

## **1214.02 Agreement of Mark on Drawing with Mark on Specimens or Foreign Registration**

Where an applicant seeks registration of a “phantom mark,” the examining attorney must also consider whether the mark on the drawing is a substantially exact representation of the mark as used on the specimen in a use-based application, or the mark in the home country registration in an application based on Trademark Act §44, 15 U.S.C. §1126. *See* [TMEP §§807.12–807.12\(e\)](#).

The applicant may amend the mark to overcome a refusal on the ground that the mark on the drawing does not agree with the mark as used on the specimen, or with the mark in the foreign registration, if the amendment is not a material alteration of the mark. *See* [TMEP §§807.14–807.14\(f\)](#) regarding material alteration.

## **1214.03 “Phantom Marks” in §1(b) Applications**

In an intent-to-use application for which no allegation of use has been filed, it may be unclear whether the applicant is seeking registration of a mark with a changeable element. If an intent-to-use application indicates that the applicant is seeking registration of a “phantom mark” (e.g., if the application includes a statement that “the blank line represents a date that is subject to change”), the examining attorney must issue a refusal of registration under §§1 and 45 of the Trademark Act, 15 U.S.C. §§1051 and 1127, on the ground that the application seeks registration of more than one mark, as discussed above. If it is unclear whether an applicant is seeking registration of a “phantom” mark, the examining attorney should advise the applicant that if the specimen filed with an amendment to allege use under §1(c) of the Trademark Act, 15 U.S.C. §1051(c), or a statement of use under §1(d) of the Act, 15 U.S.C. §1051(d), shows that applicant is seeking registration of a mark with a changeable element, registration will be refused on the ground that the application seeks registration of more than one mark. This is done strictly as a courtesy. If information regarding this possible ground for refusal is not provided before the applicant files an allegation of use, the USPTO is not precluded from refusing registration on this basis.

## **1214.04 “Phantom Marks” in §44 and §66(a) Applications**

The refusal must be made in applications under §§44 and 66(a) as well as §1 of the Trademark Act.

## **1215 Marks Composed, in Whole or in Part, of Domain Names**

### **1215.01 Background**

A domain name is part of a Uniform Resource Locator (“URL”), which is the address of a site or document on the Internet. A domain name is usually preceded in a URL by “http://www.” The “http://” refers to the protocol used to transfer information, and the “www” refers to World Wide Web, a graphical hypermedia interface for viewing and exchanging information.

In general, a domain name is comprised of a second-level domain, a “dot,” and a top-level domain (“TLD”). The wording to the left of the “dot” is the second-level domain. A TLD is the string of letters that follows the last “.” or “dot”.

*Example:* If the domain name is “ABC.com,” the term “ABC” is a second-level domain and the term “com” is a TLD.

*Generic TLDs.* If a TLD has three or more characters, it is known as a “generic top-level domain” or “gTLD.” The following are examples of gTLDs designated for use by the public:

.com	commercial, for-profit organizations
.edu	4-year, degree-granting colleges/universities
.gov	U.S. federal government agencies
.int	international organizations
.mil	U.S. military organizations, even if located outside the U.S.
.net	network infrastructure machines and organizations
.org	miscellaneous, usually non-profit organizations and individuals

Each of the gTLDs listed above is intended for use by a certain type of organization. For example, the gTLD “.com” is for use by commercial, for-profit organizations. However, the administrator of the .com, .net, .org, and .edu gTLDs does not check the requests of parties seeking domain names to ensure that such parties are a type of organization that should be using those gTLDs. On the other hand, .mil, .gov, and .int gTLD applications are checked, and only the U.S. military, the U.S. government, or international organizations are allowed in the respective domain space.

*Country-Code TLDs.* Country-code TLDs are for use by each individual country. For example, the TLD “.ca” is for use by Canada, and the TLD “.jp” is for use by Japan. Each country determines who may use its code. For example, some countries require that users of their code be citizens or have some association with the country, while other countries do not.

See [www.icann.org](http://www.icann.org) and [TMEP §§1215.02\(d\)\(i\) 1215.02\(d\)\(iv\)](#) for additional information about other gTLDs and [TMEP §1209.03\(m\)](#) about descriptiveness or genericness of marks comprising domain names.

## 1215.02 Use as a Mark

Generally, when a trademark, service mark, collective mark, or certification mark is composed, in whole or in part, of a domain name, neither the beginning of the URL (“http://www.”) nor the gTLD has any source-indicating significance. Instead, those designations are merely devices that every Internet site provider must use as part of its address. Advertisements for all types of products and services routinely include a URL for the website of the advertiser, and the average person familiar with the Internet recognizes the format for a domain name and understands that “http,” “www,” and a gTLD are a part of every URL.

However, in 2011, the Internet Corporation for Assigned Names and Numbers (“ICANN”) authorized the launch of a program to introduce new gTLDs. Some of the gTLDs under consideration may have significance as source identifiers. To the extent that some of the new gTLDs under consideration comprise existing registered trademarks or service marks that are already strong source identifiers in other fields of use, some of the premises mentioned above may no longer hold true for such gTLDs (e.g., a gTLD consisting of a coined mark is not an abbreviation of an entity type or class of intended user of domain space). Where the wording following the “.” or “dot” is already used as a trademark or service mark, the appearance of such marks as a gTLD may not negate the consumer perception of them as source indicators. Accordingly, in some circumstances, a gTLD may have source-indicating significance. See [TMEP §1215.02\(d\) 1215.02\(d\)\(iv\)](#) (mark consisting of a gTLD for domain-name registry operator and registrar

services, where the wording following the “.” or “dot” is already used as a trademark or service mark, may be registrable).

### 1215.02(a) Use Applications

A mark composed of a domain name is registrable as a trademark or service mark only if it functions as a source identifier. The mark, as depicted on the specimen, must be presented in a manner that will be perceived by potential purchasers to indicate source and not as merely an informational indication of the domain name address used to access a website. See *In re Roberts*, 87 USPQ2d 1474, 1479 (TTAB 2008) (finding that *irestmymcase* did not function as a mark for legal services, where it is used only as part of an address by means of which one may reach applicant’s website, or along with applicant’s other contact information on letterhead); *In re Eilberg*, 49 USPQ2d 1955, 1957 (TTAB 1998).

In *Eilberg*, the Trademark Trial and Appeal Board held that a term that only serves to identify the applicant’s domain name or the location on the Internet where the applicant’s website appears, and does not separately identify applicant’s services, does not function as a service mark. The applicant’s proposed mark was WWW.EILBERG.COM, and the specimen showed that the mark was used on letterhead and business cards in the following manner:

**WILLIAM H. EILBERG**  
ATTORNEY AT LAW  
820 HOMESTEAD ROAD, P.O. BOX 7  
**JENKINTOWN, PENNSYLVANIA 19046**  
215-855-4600  
FAX: 215-855-4603  
EMAIL WHE@EILBERG.COM  
  
PATENTS, TRADEMARKS  
AND COPYRIGHTS WWW.EILBERG.COM

(The specimen submitted was the business card of William H. Eilberg, Attorney at Law, 820 Homestead Road, P.O. Box 7, Jenkintown, Pennsylvania 19046, 215-855-4600, email whe@eilberg.com.)

The Board affirmed the examining attorney’s refusal of registration on the ground that the matter presented for registration did not function as a mark, stating that:

[T]he asserted mark, as displayed on applicant’s letterhead, does not function as a service mark identifying and distinguishing applicant’s legal services and, as presented, is not capable of doing so. As shown, the asserted mark identifies applicant’s Internet domain name, by use of which one can access applicant’s Web site. In other words, the asserted mark WWW.EILBERG.COM merely indicates the location on the Internet where applicant’s Web site appears. It does not separately identify applicant’s legal services as such. Cf. *In re The Signal Companies, Inc.*, 228 USPQ 956 (TTAB 1986).

This is not to say that, if used appropriately, the asserted mark or portions thereof may not be trademarks or [service marks]. For example, if applicant's law firm name were, say, EILBERG.COM and were presented prominently on applicant's letterheads and business cards as the name under which applicant was rendering its legal services, then that mark may well be registrable.

*Eilberg*, 49 USPQ2d at 1957.

The examining attorney must review the specimen in order to determine how the proposed mark is actually used. It is the perception of the ordinary customer that determines whether the asserted mark functions as a mark, not the applicant's intent, hope, or expectation that it does so. *See In re The Standard Oil Co.*, 275 F.2d 945, 947, 125 USPQ 227, 229 (C.C.P.A. 1960).

If the proposed mark is used in a way that would be perceived as nothing more than an Internet address where the applicant can be contacted, registration must be refused. Examples of a domain name used only as an Internet address include a domain name used in close proximity to language referring to the domain name as an address, or a domain name displayed merely as part of the information on how to contact the applicant.

*Example:* The mark is WWW.ABC.COM for online ordering services in the field of clothing. A specimen consisting of an advertisement that states "visit us on the web at www.ABC.com" does not show service mark use of the proposed mark.

*Example:* The mark is ABC.COM for financial consulting services. A specimen consisting of a business card that refers to the services and lists a telephone number, fax number, and the domain name sought to be registered does not show service mark use of the proposed mark.

If the specimen fails to show use of the domain name as a mark and the applicant seeks registration on the Principal Register, the examining attorney must refuse registration on the ground that the matter presented for registration does not function as a mark. The statutory bases for the refusals are §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127, for trademarks; and §§1, 2, 3, and 45, 15 U.S.C. §§1051, 1052, 1053, and 1127, for service marks.

If the applicant seeks registration on the Supplemental Register, the examining attorney must refuse registration under Trademark Act §23, 15 U.S.C. §1091.

### **1215.02(b) Advertising One's Own Products or Services on the Internet is not a Service**

Advertising one's own products or services is not a "service" under the Trademark Act. *In re Reichhold Chems., Inc.*, 167 USPQ 376 (TTAB 1970). *See* TMEP §§[1301.01\(a\)\(ii\)](#) and [1301.01\(b\)\(i\)](#). Therefore, businesses that create a website for the sole purpose of advertising their own products or services cannot register a domain name used to identify that activity. In examination, the issue usually arises when the applicant describes the activity as a registrable service, e.g., "providing information about [a particular field]," but the specimen of use makes it clear that the website merely advertises the applicant's own products or services. In this situation, the examining attorney must refuse registration because the mark is used to identify an activity that does not constitute a "service" within the meaning of the Trademark Act. The statutory basis for the refusal is Trademark Act §§1, 2, 3, and 45, 15 U.S.C. §§1051, 1052, 1053, and 1127.

### **1215.02(c) Agreement of Mark on Drawing with Mark on Specimens of Use**

In viewing a domain name mark (e.g., ABC.COM or HTTP://WWW.ABC.COM), consumers generally look to the second-level domain name for source identification, not to the generic top-level domain (gTLD) or the terms "http://www." or "www." Therefore, it is usually acceptable to depict only the second-level

domain name on the drawing page, even if the specimen shows a mark that includes a traditional gTLD (such as .COM) or the terms “http://www.” or “www.” However, if the mark depicted in the specimen includes a gTLD that serves a source-indicating function, the drawing of record must include such source-indicating gTLD. *Cf. Institut Nat’l des Appellations D’Origine v. Vintners Int’l Co.*, 958 F.2d 1574, 22 USPQ2d 1190 (Fed. Cir. 1992) (CHABLIS WITH A TWIST held to be registrable separately from CALIFORNIA CHABLIS WITH A TWIST as shown on labels); *In re Raychem Corp.*, 12 USPQ2d 1399 (TTAB 1989) (refusal to register TINEL-LOCK based on specimen showing “TRO6AI-TINEL-LOCK-RING” reversed). *See also* 37 C.F.R. §2.51(a)–(b), and [TMEP §§807.12–807.12\(e\)](#).

*Example:* The specimen shows the mark HTTP://WWW.ABC.COM. The applicant may elect to depict only the term “ABC” on the drawing.

Sometimes the specimen fails to show the entire mark sought to be registered (e.g., the drawing of the mark is HTTP://WWW.ABC.COM, but the specimen only shows ABC). If the drawing of the mark includes a gTLD, or the terms “http://www.” or “www.,” the specimen must also show the mark used with these terms. Trademark Act §1(a)(3)(C), 15 U.S.C. §1051(a)(3)(C).

*Example:* If the drawing of the mark is ABC.COM, a specimen that only shows the term ABC is unacceptable.

If, in an application in which the identification of services specifies or otherwise encompasses domain-name registry operator or registrar services, and the applied-for mark consists of or includes wording without a dot (“.”) before it, but the specimen provided shows use of the mark only with a “.” before the wording, or vice versa, the examining attorney must refuse the specimen on the grounds that the marks do not match because the commercial impression created by the applied-for mark differs from the commercial impression created by the mark shown in the specimen. Specifically, when used in connection with domain-name registry operator or registrar services, wording immediately preceded by a “.” will likely be viewed by consumers as a generic top-level domain (gTLD). On the other hand, the same wording, used in connection with the same services, but shown without the “.” would not give the impression of a gTLD and could be viewed as an indicator of source, such that the commercial impression created by the marks materially differs. Thus, in this context, the “.” does not constitute the type of “extraneous, nondistinctive punctuation” discussed in [TMEP §807.12\(a\)\(i\)](#) and the drawing may not be amended to add a “.” to, or delete a “.” from, the mark. *See* [TMEP §1215.08\(c\)](#).

*Example:* If the applied-for mark is TMARKIE for “domain-name registration services,” a specimen that shows the mark as .TMARKIE is unacceptable.

*See* [TMEP §§807.14–807.14\(f\)](#) and [1215.08–1215.08\(b\)](#) regarding material alteration.

## **1215.02(d) Marks Comprised Solely of gTLDs for Domain-Name Registry Operator and Registrar Services**

A “registry operator” maintains the master database of all domain names registered in each top-level domain, and also generates the “zone file,” which allows computers to route Internet traffic to and from top-level domains anywhere in the world, and a “registrar” is an entity through which domain names may be registered, and which is responsible for keeping website contact information records and submitting the technical information to a central directory (i.e., the “registry”). The terms “registry operator” and “registrar” refer to distinct services and are not interchangeable. Further, “registry operators” and “registrars” are distinguishable from re-sellers, which are entities that are authorized by registrars to sell or register particular Internet addresses on a given top-level domain. *See* Internet Corporation for Assigned Names and Numbers, Glossary, <http://www.icann.org/en/about/learning/glossary> (accessed March 19, 2014).

A mark composed solely of a gTLD for domain-name registry operator or registrar services fails to function as a trademark because consumers are predisposed to view gTLDs as merely a portion of a web address rather than as an indicator of the source of domain-name registry operator and registrar services. Therefore, registration of such marks must initially be refused under Trademark Act §§1, 2, 3, and 45, 15 U.S.C. §§1051, 1052, 1053, and 1127, on the ground that the gTLD would not be perceived as a mark. However, the applicant may, in some circumstances, avoid or overcome the refusal by providing evidence that the mark will be perceived as a source identifier. In addition, the applicant must show that: (1) it has entered into a currently valid Registry Agreement with the Internet Corporation for Assigned Names and Numbers (“ICANN”) designating the applicant as the Registry Operator for the gTLD identified by the mark and (2) the identified services will be primarily for the benefit of others.

If the gTLD merely describes the subject or user of the domain space, registration must be refused under Trademark Act §2(e)(1), 15 U.S.C. §1052(e)(1), on the ground that the gTLD is merely descriptive of the registry services.

### **1215.02(d)(i) Prior Registration(s) of the Same Mark for Goods or Services in the Same Field of Use**

The applicant must submit evidence that the gTLD shown in the mark is the subject of one or more prior U.S. registrations for goods/services that are related to the identified subject matter of the websites to be registered via the domain-name registry operator and registrar services by establishing:

- (1) Ownership of one or more currently active U.S. registrations on the Principal Register for the same mark, based on use in commerce under §1 of the Trademark Act, 15 U.S.C. §1051, or
- (2) Ownership of a U.S. registration on the Principal Register for the same mark, based on either a foreign registration under §44(e) of the Trademark Act, 15 U.S.C. §1126(e), for which an affidavit of use in commerce under §8 of the Trademark Act, 15 U.S.C. §1058, has been accepted, or a registration under §66(a) of the Trademark Act, 15 U.S.C. §1141(f)(a), for which an affidavit of use in commerce under §71 of the Trademark Act, 15 U.S.C. §1141k, has been accepted.

The prior U.S. registration(s) must show the same mark as that shown in the relevant application. However, the lack of a “.” or “dot” in the prior U.S. registration(s) is not determinative as to whether the mark in the registration is the same as the mark in the application. In addition, the prior registration may be registered pursuant to §2(f) of the Trademark Act, 15 U.S.C. §1052(f).

Because a consumer’s ability to recognize a gTLD in an application as a source-identifying mark is based, in part, on the applicant’s prior registration(s) for the same mark, the applicant must limit the “field of use” for the identified domain-name registry operator and registrar services to fields that are related to the goods/services listed in the submitted prior registration(s). For example, if the applicant submits prior registrations identifying its goods as “automobiles” and its services as “automobile dealerships,” the services in the application may be identified as “domain-name registry operator and registrar services for websites featuring automobiles and information about automobiles.” However, the applicant may not identify its services as, for example, “domain-name registry operator and registrar services for websites featuring information about restaurants” or merely as “domain-name registry operator and registrar services.”

If the applicant does not specify a field of use for the identified domain-name registry operator and registrar services, or specifies a field of use that includes goods/services not listed in the prior registration(s), the examining attorney must require the applicant to amend the identification of services so as to indicate only

a field of use that is related to goods/services that are the subject of the prior registration(s). In amending the identification, the applicant may not broaden its scope. 37 C.F.R. §2.71(a); [TMEP § 1402.06–1402.06\(b\)](#).

If the application is not amended, or cannot be amended, to specify a field of use that is related to the goods/services listed in the prior registration(s), the examining attorney must refuse registration under Trademark Act §§1, 2, 3, and 45, 15 U.S.C. §§1051, 1052, 1053, and 1127, because, absent a relevant prior registration, the gTLD would not be perceived by consumers as a mark.

### **1215.02(d)(ii) Additional Proof that the Mark Used as a gTLD Will Be Perceived as a Mark**

In addition to the prior registration(s), the applicant must also submit a significant amount of additional evidence relevant to the issue of whether the mark, with or without the “.” or “dot,” will immediately function to identify the source of the domain-name registry operator and registrar services rather than merely being perceived as a portion of an Internet domain name that can be acquired through applicant’s services. Because consumers are so highly conditioned, and may be predisposed, to view gTLDs as non-source-indicating, the applicant must show that consumers already will be so familiar with the wording as a mark that they will transfer the source recognition even to the domain-name registry operator and registrar services. The amount of additional evidence required may vary, depending on the nature of the wording set out in the gTLD. Relevant evidence may include, but is not limited to: examples of advertising and promotional materials that specifically promote the mark shown in the application, with or without the “.” or “dot,” as a trademark or service mark in the United States; dollar figures for advertising devoted to such promotion; and/or sworn consumer statements of recognition of the applied-for mark as a trademark or service mark.

### **1215.02(d)(iii) Registry Agreement/ICANN Contract**

If the applicant has not entered into a Registry Agreement with ICANN designating the applicant as the Registry Operator for the gTLD identified by the mark, consumers may be deceived by use of a particular gTLD as a mark. Consumers generally would believe that the applicant’s domain-name registry operator and registrar services feature the gTLD in the proposed mark, and would consider that material in the purchase of these services. Therefore, to avoid a deceptiveness refusal under §2(a) of the Trademark Act, 15 U.S.C. §1052(a); [TMEP §§1203, 1203.02–1203.02\(g\)](#), the applicant must: (1) submit evidence that it has entered into a currently valid Registry Agreement with ICANN, designating the applicant as the Registry Operator for the gTLD identified by the mark prior to registration and (2) indicate in the identification of services that the domain-name registry operator and registrar services feature the gTLD shown in the mark.

If the application does not include a verified statement indicating that the applicant has an active or currently pending application for a Registry Agreement with ICANN designating the applicant as the Registry Operator for the gTLD identified by the mark, the examining attorney must issue an Office action with an information request under Trademark Rule 2.61(b), 37 C.F.R. 2.61(b), that requires the applicant to submit a verified statement indicating: (1) whether the applicant has in place, or has applied for, such a Registry Agreement with ICANN and (2) if the applicant has so applied, the current status of such application. The examining attorney must include an advisory indicating that if the applicant does not have a currently active, or currently pending application for a Registry Agreement with ICANN designating the applicant as the Registry Operator for the gTLD identified by the mark, a deceptiveness refusal will be issued pursuant to §2(a). A currently pending application with ICANN avoids an immediate deceptiveness refusal, but as discussed below, the USPTO will not approve the trademark application for publication without proof of the award of the Registry Agreement.

If the applicant fails to respond to the information requirement, the examining attorney must maintain and continue the information requirement and issue a deceptiveness refusal under §2(a). If, in response to the information requirement, the applicant indicates that: (1) the applicant has not applied for a Registry Agreement with ICANN designating the applicant as the Registry Operator for the gTLD identified by the mark; (2) the applicant has applied for a Registry Agreement with ICANN designating the applicant as the Registry Operator for the gTLD identified by the mark, but that the application has not been approved and is no longer pending with ICANN; or (3) the applicant's previous Registry Agreement with ICANN is no longer valid, the examining attorney must issue a deceptiveness refusal under §2(a).

If the applicant indicates that it has a currently pending application before ICANN for a Registry Agreement for the gTLD identified by the mark and the applicant has otherwise demonstrated that the mark consisting of the gTLD in the application before the USPTO could function as a mark, the examining attorney may suspend the application until the resolution of the applicant's pending application with ICANN. See [TMEP § 716.02\(i\)](#).

### **1215.02(d)(iv) Legitimate Service for the Benefit of Others**

To be considered a service within the parameters of the Trademark Act, an activity must, inter alia, be primarily for the benefit of someone other than the applicant. See *In re Reichhold Chems., Inc.*, 167 USPQ 376, 377 (TTAB 1970); [TMEP §1301.01\(a\)\(ii\)](#). Therefore, the examining attorney must issue an information request pursuant to Trademark Rule 2.61(b), 37 C.F.R. 2.61(b), to ascertain the following information to determine if the domain-name registry operator and registrar services will be primarily for the benefit of others:

- Does the applicant intend to use the applied-for mark as a gTLD?
- Does the applicant intend to operate a registry for the applied-for mark as a new gTLD and sign a Registry Agreement with ICANN for such gTLD?
- To what entities and industries will the applicant's domain-name registry operator and registrar services be targeted?
- Does the applicant intend to register domain names for others using the gTLD identified by the applied-for mark and will there be any restrictions on to whom it will be available?

While operating a gTLD registry that is only available for the applicant's employees or for the applicant's marketing initiatives alone generally would not qualify as a service, registration for use by the applicant's affiliated distributors typically would.

If the applicant fails to indicate for the record that the applicant's domain-name registry operator and registrar services are, or will be, primarily for the benefit of others, the examining attorney must refuse registration pursuant to §§1, 2, 3, and 45 of the Trademark Act, 15 U.S.C. §§1051-1053, 1127. See [TMEP §1301.01\(a\)\(ii\)](#).

### **1215.02(e) Section 1(b) Applications**

A refusal of registration on the ground that the matter presented for registration does not function as a mark relates to the manner in which the asserted mark is used. Generally, in an intent-to-use application filed under §1(b) of the Trademark Act, a mark that includes a domain name will not be refused on this ground until the applicant has submitted specimen(s) of use *and* an allegation of use (i.e., either an amendment to allege use under 15 U.S.C. §1051(c) or a statement of use under 15 U.S.C. §1051(d)). The specimen provides a better record upon which to determine the registrability of the mark. However, the examining attorney

should include an advisory note in the first Office action that registration may be refused if the proposed mark, as used on the specimen, identifies only an Internet address. This is done strictly as a courtesy. If information regarding this possible ground for refusal is not provided to the applicant prior to the filing of the allegation of use, the USPTO is not precluded from refusing registration on this basis.

### **1215.02(f) Section 44 and §66(a) Applications**

If the record indicates that the proposed mark would be perceived as merely an informational indication of the domain name address used to access a website rather than an indicator of source, the examining attorney must refuse registration in an application under §44 or §66(a) of the Trademark Act, on the ground that the subject matter does not function as a mark. The statutory bases for the refusals are §§1, 2, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, and 1127, for trademarks; and §§1, 2, 3, and 45, 15 U.S.C. §§1051, 1052, 1053, and 1127, for service marks.

### **1215.03 Surnames**

If a mark is composed of a surname and a non-source-identifying gTLD, the examining attorney must refuse registration because the mark is primarily merely a surname under Trademark Act §2(e)(4), 15 U.S.C. §1052(e)(4), absent a showing of acquired distinctiveness under Trademark Act §2(f), 15 U.S.C. §1052(f). If the gTLD has no trademark significance, and the primary significance of a term is that of a surname, adding the gTLD to the surname does not alter the primary significance of the mark as a surname. *Cf. In re I. Lewis Cigar Mfg. Co.*, 205 F.2d 204, 98 USPQ 265 (C.C.P.A. 1953) (S. SEIDENBERG & CO'S. for cigars held primarily merely a surname); *In re Hamilton Pharms. Ltd.*, 27 USPQ2d 1939 (TTAB 1993) (HAMILTON PHARMACEUTICALS for pharmaceutical products held primarily merely a surname); *In re Cazes*, 21 USPQ2d 1796 (TTAB 1991) (BRASSERIE LIPP for restaurant services held primarily merely a surname where "brasserie" is a generic term for applicant's restaurant services). See also [TMEP §1211.01\(b\)\(vi\)](#) regarding surnames combined with additional wording.

### **1215.04 Descriptiveness**

If a proposed mark is composed of a merely descriptive term(s) combined with a non-source-identifying gTLD, in general, the examining attorney must refuse registration under Trademark Act §2(e)(1), 15 U.S.C. §1052(e)(1), on the ground that the mark is merely descriptive. This applies to trademarks, service marks, collective marks, and certification marks.

The gTLD will be perceived as part of an Internet address, and typically does not add source-identifying significance to the composite mark. *In re 1800Mattress.com IP LLC*, 586 F.3d 1359, 92 USPQ2d 1682 (Fed. Cir. 2009) (MATTRESS.COM generic for "online retail store services in the field of mattresses, beds, and bedding"); *In re Hotels.com, L.P.*, 573 F.3d 1300, 91 USPQ2d 1532 (Fed. Cir. 2009) (HOTELS.COM generic for "providing information for others about temporary lodging; travel agency services, namely, making reservations and bookings for temporary lodging for others by means of telephone and the global computer network"); *In re Reed Elsevier Proprs. Inc.*, 482 F.3d 1376, 82 USPQ2d 1378 (Fed. Cir. 2007) (LAWYERS.COM generic for "providing access to an online interactive database featuring information exchange in the fields of law, lawyers, legal news, and legal services"); *In re Oppedahl & Larson LLP*, 373 F.3d 1171, 71 USPQ2d 1370 (Fed. Cir. 2004) (PATENTS.COM merely descriptive of "computer software for managing a database of records and for tracking the status of the records by means of the Internet"); *In re DNI Holdings Ltd.*, 77 USPQ2d 1435 (TTAB 2005) (SPORTSBETTING.COM generic for "provision of casino games on and through a global computer network wherein there are no actual monetary wagers; provision of contests and sweepstakes on and through a global computer network; providing a web site on

and through a global computer network featuring information in the fields of gaming, athletic competition and entertainment”); *In re Eddie Z’s Blinds and Drapery, Inc.*, 74 USPQ2d 1037 (TTAB 2005) (BLINDSANDDRAPERY.COM generic for retail store services featuring blinds, draperies, and other wall coverings, sold via the Internet); *In re Microsoft Corp.*, 68 USPQ2d 1195 (TTAB 2003) (OFFICE.NET merely descriptive of various computer software and hardware products); *In re CyberFinancial.Net, Inc.*, 65 USPQ2d 1789 (TTAB 2002) (BONDS.COM generic for providing information regarding financial products and services and electronic commerce services rendered via the Internet); *In re Martin Container, Inc.*, 65 USPQ2d 1058 (TTAB 2002) (CONTAINER.COM generic for “retail store services and retail services offered via telephone featuring metal shipping containers” and “rental of metal shipping containers”).

However, there is no bright-line, per se rule that the addition of a non-source-identifying gTLD to an otherwise descriptive mark will never under any circumstances operate to create a registrable mark. The Federal Circuit has cautioned that in rare, exceptional circumstances, a term that is not distinctive by itself may acquire some additional meaning from the addition of a gTLD such as “.com” or “.net.” *In re Steelbuilding.com*, 415 F.3d 1293, 1297, 75 USPQ2d 1420, 1422 (Fed. Cir. 2005) (STEELBUILDING.COM highly descriptive, but not generic, for “computerized on-line retail services in the field of pre-engineered metal buildings and roofing systems,” noting that “the addition of the TLD can show Internet-related distinctiveness, intimating some ‘Internet feature’ of the item.”) (citing *Oppedahl & Larson*, 373 F.3d at 1175-1176, 71 USPQ2d at 1373).

Thus, when examining domain name marks, it is important to evaluate the commercial impression of the mark as a whole to determine whether the composite mark conveys any distinctive source-identifying impression apart from its individual components. The examining attorney must introduce evidence as to the significance of the individual components, including the gTLD, but must also consider the significance of the composite term (e.g., “Sportsbetting” in the mark SPORTSBETTING.COM) to determine whether the addition of the TLD has resulted in a mark that conveys a source-identifying impression.

See also [TMEP §§1209.03\(m\)](#), [1215.02\(d\)](#) [1215.02\(d\)\(iv\)](#), and [1215.05](#).

## 1215.05 Generic Refusals

Generally, a mark comprised of a generic term(s) combined with a non-source-identifying gTLD is generic and without trademark or service mark significance. *In re 1800Mattress.com IP LLC*, 586 F.3d 1359, 92 USPQ2d 1682 (Fed. Cir. 2009) (MATTRESS.COM generic for “online retail store services in the field of mattresses, beds, and bedding”); *In re Hotels.com, L.P.*, 573 F.3d 1300, 91 USPQ2d 1532 (Fed. Cir. 2009) (HOTELS.COM generic for “providing information for others about temporary lodging; travel agency services, namely, making reservations and bookings for temporary lodging for others by means of telephone and the global computer network”).

The Federal Circuit has noted that “[o]nly in rare instances will the addition of a [top level domain] indicator to a descriptive term operate to create a distinctive mark.” *1800Mattress.com*, 586 F.3d at 1364, 92 USPQ2d at 1685. However, there is no per se rule that the addition of a non-source-identifying gTLD to an otherwise generic term can never under any circumstances operate to create a registrable mark. The Court has held that in rare, exceptional circumstances, a term that is not distinctive by itself may acquire some additional meaning from the addition of a gTLD such as “.com” or “.net” that will render it “sufficiently distinctive for trademark registration.” *In re Steelbuilding.com*, 415 F.3d 1293, 1299, 75 USPQ2d 1420, 1423 (Fed. Cir. 2005) (citing *In re Oppedahl & Larson LLP*, 373 F.3d 1171, 1177, 71 USPQ2d 1370, 1373 (Fed. Cir. 2004)). In *Steelbuilding*, vacating the Board’s determination that STEELBUILDING.COM was generic for “computerized on-line retail services in the field of pre-engineered metal buildings and roofing systems,” the Court criticized the Board for considering STEELBUILDING and .COM separately, holding that “[i]n

this unusual case, the addition of the TLD indicator expanded the meaning of the mark to include goods and services beyond the mere sale of steel buildings. Specifically, the TLD expanded the mark to include internet services that include ‘building’ or designing steel structures on the web site and then calculating an appropriate price before ordering the unique structure.” 415 F.3d at 1299, 75 USPQ2d at 1423. The Court also criticized the Board for relying on evidence that “steel building” or “steel buildings” is generic, where there was an alternative meaning of the composite term STEELBUILDING as denoting the act of building steel structures. *Id.* at 1298, 75 USPQ2d at 1422. However, the Court held that the term STEELBUILDING.COM was highly descriptive and unregistrable on the Principal Register under §2(e)(1), absent “a concomitantly high level of secondary meaning.” *Id.* at 1301, 75 USPQ2d at 1424.

Thus, to establish that a mark comprising a generic term with a non-source-identifying gTLD is generic, the examining attorney must show that the relevant public would understand the mark as a whole to have generic significance. *See 1800Mattress.com*, 586 F.3d at 1363, 92 USPQ2d at 1684 (Board properly concluded MATTRESS.COM is generic for “online retail store services in the field of mattresses, beds, and bedding,” where the Board considered each of the constituent words, “mattress” and “.com” and determined that they were both generic, then considered the mark as a whole and determined that the combination added no new meaning, relying on the prevalence of the term “mattress.com” in the website addresses of several online mattress retailers who provide the same services as the applicant); *Hotels.com*, 573 F.3d at 1303, 91 USPQ2d at 1535 (HOTELS.COM generic for “providing information for others about temporary lodging; travel agency services, namely, making reservations and bookings for temporary lodging for others by means of telephone and the global computer network,” based on various definitions of “hotel,” printouts from hotel reservation search websites showing “hotels” as the equivalent of or included within “temporary lodging,” as well as evidence from applicant’s website); *In re Reed Elsevier Props. Inc.*, 482 F.3d 1376, 1379-80, 82 USPQ2d 1378, 1380-81 (Fed. Cir. 2007) (LAWYERS.COM generic for “providing access to an online interactive database featuring information exchange in the fields of law, lawyers, legal news, and legal services,” where the record included pages from applicant’s website showing that applicant’s services include providing information about lawyers and assistance in selecting a lawyer, and pages from eight other websites containing “lawyer.com” or “lawyers.com”); *In re DNI Holdings Ltd.*, 77 USPQ2d 1435, 1439-41 (TTAB 2005) (SPORTSBETTING.COM generic for “provision of casino games on and through a global computer network wherein there are no actual monetary wagers; provision of contests and sweepstakes on and through a global computer network; . . . providing a website on and through a global computer network featuring information in the fields of gaming, athletic competition and entertainment,” based on evidence of multiple examples of use of the terms “sports betting” and “sportsbetting,” by both applicant and its competitors, to refer to both sports wagering and providing information about sports wagering, and there was no indication of a realistic alternative connotation of the compound term). *See also In re Eddie Z’s Blinds and Drapery, Inc.*, 74 USPQ2d 1037 (TTAB 2005) (BLINDSANDDRAPERY.COM generic for retail store services featuring blinds, draperies, and other wall coverings, sold via the Internet); *In re CyberFinancial.Net, Inc.*, 65 USPQ2d 1789 (TTAB 2002) (BONDS.COM generic for providing information regarding financial products and services and electronic commerce services rendered via the Internet, where bonds was the name of one of the financial products offered under the mark); *In re Martin Container, Inc.*, 65 USPQ2d 1058 (TTAB 2002) (CONTAINER.COM generic for “retail store services and retail services offered via telephone featuring metal shipping containers” and “rental of metal shipping containers”).

It is not necessary to show that the relevant public *uses* the term to refer to the genus. The correct inquiry is whether the relevant public would *understand* the term to be generic. *1800Mattress.com*, 586 F.3d at 1364, 92 USPQ2d at 1685.

Marks comprised of generic terms combined with non-source-identifying gTLDs are not eligible for registration on the Supplemental Register under Trademark Act §23, 15 U.S.C. §1091, or on the Principal Register under Trademark Act §2(f), 15 U.S.C. §1052(f). This applies to trademarks, service marks, collective

marks, and certification marks. However, the examining attorney generally should not issue a refusal in an application for registration on the Principal Register on the ground that a mark is a generic name for the goods or services, unless the applicant asserts that the mark has acquired distinctiveness under §2(f) of the Trademark Act, 15 U.S.C. §1052(f). Absent a claim of acquired distinctiveness, the examining attorney must issue a refusal on the ground that the mark is merely descriptive of the goods or services under §2(e)(1), 15 U.S.C. §1052(e)(1), and provide an advisory statement that the matter sought to be registered appears to be a generic name for the goods or services. See [TMEP §§1209.02–1209.02\(b\)](#).

See [TMEP §1209.01\(c\)\(i\)](#) regarding the test for establishing that a term is generic. See also [TMEP §§1209.03\(m\)](#), [1215.02\(d\)](#) [1215.02\(d\)\(iv\)](#), and [1215.04](#).

## 1215.06 Marks Containing Geographical Matter

The examining attorney should examine marks containing geographic matter along with a gTLD in the same manner that any mark containing geographic matter is examined. See generally [TMEP §§1210–1210.10](#). Depending on the manner in which it is used on or in connection with the goods or services, a proposed domain name mark containing a geographic term may be primarily geographically descriptive under §2(e)(2) of the Trademark Act, 15 U.S.C. §1052(e)(2), primarily geographically deceptively misdescriptive under §2(e)(3) of the Trademark Act, 15 U.S.C. §1052(e)(3), deceptive under §2(a) of the Trademark Act, 15 U.S.C. §1052(a), and/or merely descriptive or deceptively misdescriptive under §2(e)(1) of the Trademark Act, 15 U.S.C. §1052(e)(1).

When a geographic term is used as a mark for services that are provided on the Internet, the geographic term sometimes describes the subject of the service rather than the geographic origin of the service. Usually this occurs when the mark is composed of a geographic term that describes the subject matter of information services (e.g., NEW ORLEANS.COM for “providing vacation planning information about New Orleans, Louisiana by means of the global computer network”). In these cases, the examining attorney must refuse registration under §2(e)(1) because the mark is merely descriptive of the services. See [TMEP §1210.02\(b\)\(iii\)](#).

## 1215.07 Disclaimers

Trademark Act §6(a), 15 U.S.C. §1056(a), provides for the disclaimer of “an unregistrable component of a mark otherwise registrable.” The guidelines on disclaimer discussed in [TMEP §§1213–1213.11](#) apply to domain name mark applications.

If a composite mark includes a domain name composed of unregistrable matter (e.g., a merely descriptive or generic term and a non-source-identifying gTLD), disclaimer is required.

If a disclaimer is required and the domain name includes a misspelled or telescoped word, the correct spelling must be disclaimed. See [TMEP §§1213.05\(a\)\(i\)](#) and [1213.08\(c\)](#).

A compound term composed of arbitrary or suggestive matter combined with a “dot” and a non-source-identifying gTLD is considered unitary, and, therefore, no disclaimer of the gTLD is required. See examples below and [TMEP §§1213.05–1213.05\(g\)\(iv\)](#) regarding unitary marks.

Mark	Disclaimer
ABC BANK.COM	BANK.COM
ABC FEDERALBANK.COM	FEDERAL BANK.COM
ABC GROCERI STOR.COM	GROCERY STORE.COM

Mark	Disclaimer
ABC.COM	no disclaimer
ABC.BANK.COM	no disclaimer
ABCBANK.COM	no disclaimer

## 1215.08 Material Alteration

Amendments may not be made to the drawing of the mark if the character of the mark is materially altered. 37 C.F.R. §2.72. In determining whether an amendment is a material alteration, the controlling question is always whether the new and old forms of the mark create essentially the same commercial impression. See [TMEP §§807.14–807.14\(f\)](#) regarding further information about material alteration. *In re Yale Sportswear Corp.*, 88 USPQ2d 1121 (TTAB 2008) ( mark on the specimen (UPPER 90°) not a substantially exact representation of the mark on the drawing (UPPER 90); *In re Innovative Cos., LLC*, 88 USPQ2d 1095 (TTAB 2008) ( proposed amendment of the drawing from FREEDOMSTONE to FREEDOM STONE not material alteration of the mark); *Paris Glove of Can., LTD, v. SBC/Sporto Corp.*, 84 USPQ2d 1856, 1862 (TTAB 2007) (in an application to renew a registration, the old and new specimens (AQUA STOP and AQUASTOP, both stylized) were deemed to be substantially the same because “mere changes in background or styling, or modernization, are not ordinarily considered to be material changes in the mark.”).

### 1215.08(a) Adding or Deleting TLDs in Domain Name Marks

Generally, an applicant may add or delete a non-source-identifying gTLD to/from the drawing of a domain name mark (e.g., COOPER amended to COPPER.COM, or COOPER.COM amended to COOPER) without materially altering the mark. Although a mark that includes a gTLD generally will be perceived by the public as a domain name, while a mark without a gTLD will not, if the gTLD merely indicates the type of entity using the domain name, the essence of the mark is created by the second-level domain name, not the gTLD. Thus, the commercial impression created by the second-level domain name usually remains the same whether the non-source-identifying gTLD is present or not. If the gTLD does function as a source indicator, its deletion from the domain name mark may constitute a material alteration of the mark.

*Example:* Amending a mark from PETER to PETER.COM would *not* materially change the mark because the essence of both marks is still PETER, a person’s name.

*Example:* Amending a mark from ABC.PETER to ABC would materially change the mark because the essence of the original mark is created by both the second-level domain and the gTLD.

Similarly, substituting one non-source-identifying gTLD for another in a domain name mark, or adding or deleting a “dot” or “http://www.” or “www.” to a domain name mark is generally permitted.

*Example:* Amending a mark from ABC.ORG to ABC.COM would *not* materially change the mark because the essence of both marks is still ABC.

*Example:* Amending a mark from ABC.COM to ABC.PETER would materially change the mark because the essence of the original mark was ABC and the proposed mark now includes a source-identifying gTLD.

### 1215.08(b) Adding or Deleting gTLDs in Other Marks

If a mark that is not used as an Internet domain name includes a gTLD, adding or deleting the gTLD may be a material alteration.

*Example:* Deleting the term .COM from the mark “.COM ” used on sports magazines would materially change the mark.

### **1215.08(c) Adding or Deleting “.” in Marks for Domain Name Registry Operator or Registrar Services**

When used in connection with domain name registry operator or registrar services, wording immediately preceded by a dot (“.”) will likely be viewed by consumers as a gTLD. On the other hand, the same wording, used in connection with the same services, but shown without the “.” would not give the impression of a gTLD and could be viewed as an indicator of source, such that the commercial impression created by the marks materially differs. Thus, the “.” in this context does not constitute the type of “extraneous, nondistinctive punctuation” discussed in [TMEP §807.12\(a\)\(i\)](#).

Accordingly, an applicant may not amend an application to add a “.” before wording in a mark for which the identification of services encompasses domain name registry operator or registrar services. Nor may an applicant amend a drawing to delete a “.” from the beginning of wording in a mark in these instances.

*Example:* Amending an applied-for mark from TMARKIE to .TMARKIE would materially change the commercial impression of the mark from that of a source-indicating mark to that of a gTLD.

### **1215.09 Likelihood of Confusion**

When analyzing whether a domain name mark is likely to cause confusion with another pending or registered mark, the examining attorney must consider the marks as a whole, but generally should accord little weight to a non-source-identifying gTLD portion of the mark. *Apple Computer v. TVNET.net, Inc.*, 90 USPQ2d 1393 (TTAB 2007). See [TMEP §1207.01\(b\)\(iii\)](#).

### **1215.10 Marks Containing the Phonetic Equivalent of a Generic Top-Level Domain**

Marks that contain the phonetic equivalent of a non-source-identifying gTLD (e.g., ABC DOTCOM) are treated in the same manner as marks composed of the gTLD itself. If a disclaimer is necessary, the disclaimer must be in the form of the gTLD and not the phonetic equivalent. See [TMEP §1213.08\(c\)](#) regarding disclaimer of misspelled words.

*Example:* The mark is INEXPENSIVE RESTAURANTS DOT COM for providing information about restaurants by means of a global computer network. Registration must be refused because the mark is merely descriptive of the services under 15 U.S.C. §1052(e)(1).

*Example:* The mark is ABC DOTCOM. The applicant must disclaim the gTLD “.COM” rather than the phonetic equivalent “DOTCOM.”

## **1216 Effect of Applicant’s Prior Registrations**

### **1216.01 Decisions Involving Prior Registrations Not Controlling**

Trademark rights are not static, and eligibility for registration must be determined on the basis of the facts and evidence of record that exist at the time registration is sought. *In re Morton-Norwich Prods., Inc.*, 671 F.2d 1332, 213 USPQ 9 (C.C.P.A. 1982); *In re Thunderbird Prods. Corp.*, 406 F.2d 1389, 160 USPQ 730 (C.C.P.A. 1969); *In re Sun Microsystems Inc.*, 59 USPQ2d 1084 (TTAB 2001); *In re Styleclick.com Inc.*, 58 USPQ2d 1523 (TTAB 2001); *In re Styleclick.com Inc.*, 57 USPQ2d 1445 (TTAB 2000).

Each case must be decided on its own facts. The USPTO is not bound by the decisions of the examiners who examined the applications for the applicant’s previously registered marks, based on different records.

*See In re Omega SA*, 494 F.3d 1362, 83 USPQ2d 1541 (Fed. Cir. 2007) (upholding examining attorney's requirement for amendment of the term "chronographs" in the identification of goods, notwithstanding applicant's ownership of several registrations in which this term appears without further qualification in the identification); *In re Merrill Lynch, Pierce, Fenner, & Smith Inc.*, 828 F.2d 1567, 4 USPQ2d 1141 (Fed. Cir. 1987) (incontestable registration of CASH MANAGEMENT ACCOUNT for credit card services did not automatically entitle applicant to registration of the same mark for broader financial services); *In re Loew's Theatres, Inc.*, 769 F.2d 764, 226 USPQ 865 (Fed. Cir. 1985) (examining attorney could properly refuse registration on ground that DURANGO for chewing tobacco is primarily geographically deceptively misdescriptive, even though applicant owned incontestable registration of same mark for cigars); *In re Rodale Inc.*, 80 USPQ2d 1696 (TTAB 2006) (NUTRITION BULLETIN generic for "providing information in the field of health and diet via a web site on the Internet," notwithstanding applicant's claims of ownership of six prior registrations on the Supplemental Register that included the term "bulletin" in the mark for related goods and services (e.g., "Weight-Loss Bulletin," "Sex Bulletin," "Muscle Bulletin," and "Nutrition Bulletin")); *In re Best Software Inc.*, 58 USPQ2d 1314 (TTAB 2001) (applicant's ownership of registration of BEST! did not preclude examining attorney from requiring disclaimer of "Best" in applications seeking registration of BEST! SUPPORTPLUS and BEST! SUPPORTPLUS PREMIER for the same and additional services); *In re Sunmarks Inc.*, 32 USPQ2d 1470 (TTAB 1994) (examining attorney not precluded from refusing registration of ULTRA for "gasoline, motor oil, automotive grease, general purpose grease, machine grease and gear oil," even though applicant owned registrations of same mark for "motor oil" and "gasoline for use as automotive fuel, sold only in applicant's automotive service stations"); *In re Medical Disposables Co.*, 25 USPQ2d 1801 (TTAB 1992) (disclaimer of the unitary term "MEDICAL DISPOSABLES" required, notwithstanding applicant's ownership of a prior registration in which a piecemeal disclaimer of the words "MEDICAL" and "DISPOSABLES" was permitted); *In re Perez*, 21 USPQ2d 1075 (TTAB 1991) (likelihood of confusion between applicant's EL GALLO for fresh tomatoes and peppers and the previously registered mark ROOSTER for fresh citrus fruit, notwithstanding applicant's ownership of an expired registration of the same mark for the same goods); *In re Lean Line, Inc.*, 229 USPQ 781 (TTAB 1986) (LEAN merely descriptive of low-calorie foods, even though applicant had registered the term for other goods and services and a third-party had registered the term "LEAN CUISINE" with no disclaimer); *In re McDonald's Corp.*, 229 USPQ 555 (TTAB 1985) (Board not bound to allow registration of APPLE PIE TREE for restaurant services merely because applicant had succeeded in registering the character and name as trademarks and the character as a service mark); *In re Harcourt Brace Jovanovich, Inc.*, 222 USPQ 820 (TTAB 1984) (LAW & BUSINESS incapable of distinguishing the services of arranging and conducting seminars in the field of business law, notwithstanding applicant's ownership of a registration on the Supplemental Register for the same mark for books, pamphlets, and monographs); *In re Local Trademarks, Inc.*, 220 USPQ 728 (TTAB 1983) (upholding refusal of registration on the ground that WHEN IT'S TIME TO ACT did not identify advertising services; Board not bound to allow registration simply because applicant owned registrations for identical services); *In re Pilon*, 195 USPQ 178 (TTAB 1977) (title of chapter or section of book not registrable, even though applicant owned prior registrations of marks comprising chapter titles). *See also In re Wilson*, 57 USPQ2d 1863 (TTAB 2001) ("reasoned decisionmaking" doctrine, which prohibits a federal agency from creating conflicting lines of precedent governing identical situations, did not entitle applicant to registration of PINE CONE BRAND for packaged fresh citrus fruit, even though USPTO issued registration for similar PINE CONE mark in 1933 despite then-existing registration for PINE CONE mark that was cited against applicant).

## 1216.02 Effect of "Incontestability" in Ex Parte Examination

Section 15 of the Trademark Act, 15 U.S.C. §1065, provides a procedure by which a registrant's exclusive right to use a mark in commerce on or in connection with the goods or services covered by the registration can become incontestable. See [TMEP §§1605–1605.06](#) for information about the requirements for filing an affidavit of incontestability under §15.

In *Park 'N Fly v. Dollar Park & Fly, Inc.*, 469 U.S. 189, 224 USPQ 327 (1985), the Supreme Court held that the owner of a registered mark may rely on incontestability to enjoin infringement, and that an incontestable registration, therefore, cannot be challenged on the ground that the mark is merely descriptive.

In *In re Am. Sail Training Ass'n*, 230 USPQ 879 (TTAB 1986), the Trademark Trial and Appeal Board held that an examining attorney could not require a disclaimer of "TALL SHIPS" in an application for registration of the mark RETURN OF THE TALL SHIPS, where the applicant owned an incontestable registration for the mark TALL SHIPS for the identical services. This would be a collateral attack on an incontestable registration. However, this applies only where both the marks and the goods or services are identical, and the identical part of the applied-for mark would not be considered generic. The Board noted that the matter required to be disclaimed was "identical to the subject matter of applicant's incontestable registration," and that "the services described in applicant's application are identical to those recited in the prior incontestable registration." *Id.* at 880.

For determining likelihood of confusion, "the fact that opposer's federally-registered trademark has achieved incontestable status means that it is conclusively considered to be valid, but it does not dictate that the mark is 'strong.'" *Safer, Inc. v. OMS Invs., Inc.*, 94 USPQ2d 1031, 1036 (TTAB 2010). Moreover, although "an incontestable registration may not be challenged as invalid for mere descriptiveness," incontestability does not preclude a finding that, in terms of conceptual strength, the mark is descriptive for purposes of determining the inherent strength of a mark as a factor relevant to likelihood of confusion. *Couch/Braunsdorf Affinity, Inc. v. 12 Interactive, LLC*, \_\_ USPQ2d \_\_, Cancellation No. 92051006 (TTAB Mar. 24, 2014).

Ownership of an incontestable registration does *not* give the applicant a right to register the same mark for different goods or services, even if they are closely related to the goods or services in the incontestable registration. See *In re Save Venice N.Y. Inc.*, 259 F.3d 1346, 1353, 59 USPQ2d 1778, 1782 (Fed. Cir. 2001) (applicant's ownership of incontestable registration of the word mark SAVE VENICE for newsletters, brochures, and fundraising services did not preclude examining attorney from refusing registration of a composite mark consisting of the phrases THE VENICE COLLECTION and SAVE VENICE INC. with an image of the winged Lion of St. Mark for different goods; "[a] registered mark is incontestable only in the form registered and for the goods or services claimed."); *In re Merrill Lynch, Pierce, Fenner, & Smith Inc.*, 828 F.2d 1567, 4 USPQ2d 1141 (Fed. Cir. 1987) (incontestable registration of CASH MANAGEMENT ACCOUNT for credit card services did not automatically entitle applicant to registration of the same mark for broader financial services); *In re Bose Corp.*, 772 F.2d 866, 873, 227 USPQ 1, 6-7 (Fed. Cir. 1985) (incontestable status of registration for one speaker design did not establish nonfunctionality of another speaker design with shared feature); *In re Loew's Theatres, Inc.*, 769 F.2d 764, 226 USPQ 865 (Fed. Cir. 1985) (examining attorney could properly refuse registration on ground that mark DURANGO for chewing tobacco is primarily geographically deceptively misdescriptive, even though applicant owned incontestable registration of same mark for cigars); *In re Best Software Inc.*, 63 USPQ2d 1109, 1113 (TTAB 2002) (applicant's ownership of incontestable registration for the mark BEST! did not preclude examining attorney from requiring disclaimer of "BEST" in applications seeking registration of BEST! IMPERATIV HRMS "for goods which, although similar, are nevertheless somewhat different"); *In re Best Software Inc.*, 58 USPQ2d 1314 (TTAB 2001) (applicant's ownership of incontestable registration for the mark BEST! did not preclude the examining attorney from requiring disclaimer of "BEST" in applications seeking registration of BEST! SUPPORTPLUS and BEST! SUPPORTPLUS PREMIER for the same and additional services); *In re Industrie Pirelli Societa per Azioni*, 9 USPQ2d 1564 (TTAB 1988) (examining attorney could properly refuse registration on the ground that a mark is primarily merely a surname even if applicant owned incontestable registration of same mark for unrelated goods); *In re BankAmerica Corp.*, 231 USPQ 873

(TTAB 1986) (examining attorney could refuse registration of BANK OF AMERICA under §§2(e)(1) and 2(e)(2), despite applicant's ownership of incontestable registrations of same mark for related services).

## 1217 Res Judicata, Collateral Estoppel, and Stare Decisis

A prior adjudication against an applicant may be dispositive of a later application for registration of the same mark on the basis of the same facts and issues, under the doctrine of res judicata, collateral estoppel, or stare decisis. Prior adjudications include decisions of the Trademark Trial and Appeal Board or any of the reviewing courts.

*Res Judicata.* Res judicata, or claim preclusion, protects against relitigation of a previously adjudicated claim between the same parties or their privies based on the same cause of action. *In re Bose Corp.*, 476 F.3d 1331, 81 USPQ2d 1748 (Fed. Cir. 2007) (stating that application for registration of speaker design is barred by Federal Circuit's 1985 decision affirming refusal of registration of the same mark for the same goods on the ground that the proposed mark was functional). A plaintiff is barred by res judicata from bringing a second action if: "(1) there is identity of parties (or their privies); (2) there has been an earlier final judgment on the merits of a claim; and (3) the second claim is based on the same set of transactional facts as the first." *Levi Strauss & Co. v. Abercrombie & Fitch Trading Co.*, 719 F.3d 1367, 1372, 107 USPQ2d 1167, 1171 (Fed. Cir. 2013) (quoting *Jet, Inc. v. Sewage Aeration Sys.*, 223 F.3d 1360, 1362, 55 USPQ2d 1854, 1856 (Fed. Cir. 2000)); *Sharp Kabushiki Kaisha v. ThinkSharp, Inc.*, 448 F.3d 1368, 1370, 79 USPQ2d 1376, 1378 (Fed. Cir. 2006); *Mayer/Berkshire Corp. v. Berkshire Fashions, Inc.*, 424 F.3d 1229, 1232, 76 USPQ2d 1310, 1312 (Fed. Cir. 2005); *Zachry Infrastructure, LLC v. Am. Infrastructure, Inc.*, 101 USPQ2d 1249 (TTAB 2011). A defendant in an earlier proceeding is precluded from bringing a later action if: "(1) the claim or defense asserted in the second action was a compulsory counterclaim that the defendant failed to assert in the first action, or (2) the claim or defense represents what is essentially a collateral attack on the first judgment." *Nasalok Coating Corp. v. Nylok Corp.*, 522 F.3d 1320, 1324, 86 USPQ2d 1369, 1372 (Fed. Cir. 2008) (finding that cancellation petitioner is barred from challenging the validity of the subject registration where the petitioner could have asserted, but did not assert, a claim of invalidity in an earlier infringement action, and noting that the cancellation petition amounted to a collateral attack on the district court's judgment).

*Identity of Parties.* The examining attorney should not invoke res judicata based on an inter partes case or a federal court proceeding involving the applicant, since there is no identity of parties. In this situation, the examining attorney may rely on stare decisis. *In re Alfred Dunhill Ltd.*, 224 USPQ 501, 503 n.7 (TTAB 1984); *In re Multivox Corp. of Am.*, 209 USPQ 627 (TTAB 1981); *In re Bordo Prods. Co.*, 188 USPQ 512 (TTAB 1975). Collateral estoppel may be invoked even where identity of parties is lacking, if the other prerequisites for applying the doctrine are met.

*Same Set of Transactional Facts.* Even when there is an identity of parties, a claim for trademark infringement is not the same as an inter partes claim for opposition or cancellation of the registration of a mark. The Court of Appeals for the Federal Circuit has warned that the USPTO should use caution in applying res judicata based on an infringement action, because infringement actions and Board proceedings are "different causes of action [that] may involve different sets of transactional facts, different proofs, different burdens and different public policies. Registrability is not at issue in infringement litigation, and although the likelihood of confusion analysis presents a 'superficial similarity,' differences in transactional facts will generally avoid preclusion." *Mayer/Berkshire*, 424 F.3d at 1232, 76 USPQ2d at 1313, citing *Jet*, 223 F.3d at 1364-65, 55 USPQ2d at 1857. See also *Nasalok*, 522 F.3d at 1324, 86 USPQ2d at 1372.

*Collateral Estoppel.* In the absence of res judicata, the related principle of collateral estoppel, or issue preclusion, can also bar relitigation of the same issue in a second action between the same parties or their

privies. Collateral estoppel applies where: "(1) a prior action presents an identical issue; (2) the prior action actually litigated and adjudged that issue; (3) the judgment in that prior action necessarily required determination of the identical issue; and (4) the prior action featured full representation of the estopped party." *Stephen Slesinger Inc. v. Disney Enter. Inc.*, 702 F.3d 640, 644, 105 USPQ2d 1472, 1474 (Fed. Cir. 2012). See also *Levi Strauss & Co. v. Abercrombie & Fitch Trading Co.*, 719 F.3d at 1371, 107 USPQ2d at 1171; *Mayer/Berkshire*, 424 F.3d at 1232, 76 USPQ2d at 1313; *Jet*, 223 F.3d at 1366, 55 USPQ2d at 1859; *In re Anderson*, 101 USPQ2d 1912, 1916 (TTAB 2012). In *Lukens Inc. v. Vesper Corp.*, 1 USPQ2d 1299, 1301 (TTAB 1986), *aff'd unpub. opin.*, 831 F.2d 306 (Fed. Cir. 1987), the Board applied collateral estoppel in an opposition proceeding based on a prior judgment in an ex parte proceeding in 1957, because the applicant had appealed the decision to federal district court and, as such, had the opportunity to introduce new evidence and had a "full and fair opportunity" to litigate the issue of functionality. On the other hand, in *Flowers Indus., Inc. v. Interstate Brands Corp.*, 5 USPQ2d 1580, 1584 (TTAB 1987), the Board refused to apply collateral estoppel, distinguishing *Lukens* and noting that "the absence of a prior resort to [trial de novo in federal court] in the present case weighs heavily against the application of issue preclusion." In *In re Anderson*, 101 USPQ2d at 1917, the Board found the doctrine of collateral estoppel to be applicable and to preclude registration in an ex parte proceeding based on a final judgment involving an identical likelihood-of-confusion issue entered in a prior inter partes proceeding involving the applicant and cited registrant, and in *Zachry Infrastructure, LLC v. Am. Infrastructure, Inc.*, 101 USPQ2d 1249 (TTAB 2011), the Board determined that the district court's finding that the term AMERICAN INFRASTRUCTURE had not acquired distinctiveness was binding on the parties and the Board under the doctrine of collateral estoppel, but declined to enter judgment on the genericness claims since the district court had not addressed the issue of genericness. In *Nextel Commc'ns, Inc. v. Motorola, Inc.*, 91 USPQ2d 1393, 1399 (TTAB 2009), the Board found issue preclusion and entered judgment in favor of opposer on the issue of whether applicant's 911 Hz chirp sound functioned as a mark for applicant's two-way radios, based on an earlier opposition proceeding involving the same parties and nearly the same proposed mark, but found issue preclusion inapplicable as to other goods that were not at issue in the earlier proceeding. In *Daimler Chrysler Corp. v. Maydak*, 86 USPQ2d 1945, 1950 (TTAB 2008), the Board held that it did not need to decide a collateral estoppel claim where a permanent injunction issued during civil litigation between the parties prohibits the applicant from using or registering the mark for any products or services, therefore, making its registration by the applicant "a legal impossibility."

*Stare Decisis.* Stare decisis provides that when a court has once laid down a principle of law as applicable to a certain set of facts, it will adhere to that principle, and apply it to all future cases, where the facts are substantially the same, regardless of whether the parties and properties are the same. *In re Johanna Farms Inc.*, 8 USPQ2d 1408, 1410 (TTAB 1988).

*Changed Circumstances.* All these doctrines are discretionary and will not be applied where circumstances relating to trademark use and consumer recognition have changed since the prior judgment was rendered. See *In re Honeywell Inc.*, 8 USPQ2d 1600, 1602–03 (TTAB 1988) (finding that res judicata did not preclude application for registration of a configuration of a circular thermostat cover based on prior decisions holding the design functional, where the marks were somewhat different, and the applicant presented evidence that conditions in the marketplace had changed in the seventeen years since the record in its prior application closed); *Johanna Farms*, 8 USPQ2d at 1411-12 (stating that stare decisis did not preclude registration of LA YOGURT for yogurt under §2(f) based on a prior decision holding the mark unregistrable on the Supplemental Register, where applicant submitted additional evidence in the nature of a survey and consumer letters dealing with the question of how purchasers perceive the proposed mark); *Flowers Indus.*, 5 USPQ2d at 1584 (finding that application for registration of HONEY WHEAT for bread under §2(f) is not precluded by a forty-year old Commissioner's decision affirming a refusal of registration of the same mark on the same grounds, because the applicant had now used the proposed mark for more than fifty years, whereas its predecessor had used it for only ten years at the time of the earlier decision); *Bordo Prods.*, 188 USPQ

at 514 (holding that application for registration of BORDO for pitted dates is not precluded by decision in an opposition by the owner of the cited registration against applicant's earlier application for the same mark for the same goods due to changed circumstances based on affidavits that the goods move through different channels of trade, evidence of contemporaneous use for over fifty years with no known actual confusion, and failure of the owner of the cited registration to take steps to enjoin applicant from using the mark).

In *Bose*, 476 F.3d at 1334, 81 USPQ2d at 1751, the applicant argued that facts and circumstances had changed since the prior decision in that: (1) the Court did not explicitly consider the "curved front edge" of the design in the prior decision; (2) there had been a change in the legal standard for functionality, in view of the Supreme Court's decision in *TrafFix Devices, Inc. v. Mktg. Displays, Inc.*, 532 U.S. 23, 58 USPQ2d 1001 (2001); and (3) applicant had "presented additional evidence, such as the absence of promotional material that 'touts' the utilitarian aspects of the mark." The Court rejected these arguments, noting that it had acknowledged in the prior decision that the design includes a "bowed front edge," and "bowed" is simply another term for "curved;" that *TrafFix* did not affect the prior functionality analysis and provides further support for finding that Bose's design is functional; and that the focus on advertising materials, which do not promote the utilitarian aspects of the curved front edge, is not relevant because the proposed mark is an entire pentagonal-shaped design and not merely the curved front edge, and the promotional advertisements submitted in the earlier case "did clearly promote the functional reason for the overall design." *Id.* at 1335-37, 81 USPQ2d at 1752-53.

Slight differences in a mark or in an identification of goods or services will not avoid application of these doctrines. *In re Orion Research Inc.*, 669 F.2d 689, 205 USPQ 688 (C.C.P.A. 1980); *Miller Brewing Co. v. Coy Int'l Corp.*, 230 USPQ 675 (TTAB 1986). See also *MasterCard Int'l Inc. v. Am. Express Co.*, 14 USPQ2d 1551, 1553 (TTAB 1990) (finding that applicant is barred by collateral estoppel from litigating the issue of descriptiveness or genericness of the proposed mark as used on the services that were the subject of the prior proceeding, but may go forward with respect to use of the mark on other services).

*Final Decision Required.* These doctrines should be invoked only after the time for further court review has expired and no such review has been sought or, if sought, the review action has been terminated. If a proceeding is pending, the examining attorney may suspend action on the application pending termination, once all other matters are in condition for publication or final refusal. See [TMEP §716.02\(d\)](#) regarding suspension.

*Examining Attorney Should Issue Appropriate Refusals.* The examining attorney should issue refusals based on res judicata, collateral estoppel, or stare decisis, as appropriate, but should not rely exclusively on such doctrines. Even if the examining attorney believes that registration is barred by one of these doctrines, he or she must also issue and provide full evidentiary support for any relevant substantive refusals.

    - 1306.09(c) Patent Licenses

## 1307 Registration as Correct Type of Mark

The Trademark Act of 1946 provides for registration of trademarks, service marks, collective trademarks, and service marks, collective membership marks, and certification marks. 15 U.S.C. §§1051, 1053, and 1054. The language of this Manual is generally directed to trademarks. Procedures for trademarks usually apply to other types of marks, unless otherwise stated. This chapter is devoted to special circumstances relating to service marks, collective marks, collective membership marks, and certification marks.

## 1301 Service Marks

Section 45 of the Trademark Act, 15 U.S.C. §1127, defines “service mark” as follows:

The term “service mark” means any word, name, symbol, or device, or any combination thereof--

- (1) used by a person, or
- (2) which a person has a bona fide intention to use in commerce and applies to register on the principal register established by this [Act],

to identify and distinguish the services of one person, including a unique service, from the services of others and to indicate the source of the services, even if that source is unknown. Titles, character names, and other distinctive features of radio or television programs may be registered as service marks notwithstanding that they, or the programs, may advertise the goods of the sponsor.

Therefore, to be registrable as a service mark, the asserted mark must function both to *identify* the services recited in the application *and distinguish* them from the services of others, and to *indicate the source* of the recited services, even if that source is unknown. The activities recited in the identification must constitute services as contemplated by the Trademark Act. See [TMEP §§1301.01 et seq.](#)

If a proposed mark does not function as a service mark for the services recited, or if the applicant is not rendering a registrable service, the statutory basis for refusal of registration on the Principal Register is §§1, 2, 3, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, 1053, and 1127.

See [TMEP §1303](#) concerning collective service marks.

### 1301.01 What Is a Service?

A service mark can only be registered for activities that constitute services as contemplated by the Trademark Act. 15 U.S.C. §§1051, 1052, 1053, and 1127. The Trademark Act defines the term “service mark,” but it does not define what constitutes a service. Many activities are obviously services (e.g., dry cleaning, banking, shoe repairing, transportation, and house painting).

#### 1301.01(a) Criteria for Determining What Constitutes a Service

The following criteria have evolved for determining what constitutes a service: (1) a service must be a real activity; (2) a service must be performed to the order of, or for the benefit of, someone other than the applicant; and (3) the activity performed must be qualitatively different from anything necessarily done in connection with the sale of the applicant’s goods or the performance of another service. *In re Canadian Pacific Ltd.*, 754 F.2d 992, 224 USPQ 971 (Fed. Cir. 1985); *In re Betz Paperchem, Inc.*, 222 USPQ 89

(TTAB 1984); *In re Integrated Resources, Inc.*, 218 USPQ 829 (TTAB 1983); *In re Landmark Communications, Inc.*, 204 USPQ 692 (TTAB 1979).

### 1301.01(a)(i) Performance of a Real Activity

A service must be a real activity. A mere idea or concept, e.g., an idea for an accounting organizational format or a recipe for a baked item, is not a service. Similarly, a system, process, or method is not a service.

*In re Universal Oil Products Co.*, 476 F.2d 653, 177 USPQ 456 (C.C.P.A. 1973); *In re Citibank, N.A.*, 225 USPQ 612 (TTAB 1985); *In re Scientific Methods, Inc.*, 201 USPQ 917 (TTAB 1979); *In re McCormick & Co., Inc.*, 179 USPQ 317 (TTAB 1973). See [TMEP §1301.02\(e\)](#) regarding marks that identify a system or process.

The commercial context must be considered in determining whether a real service is being performed. For example, at one time the activities of grocery stores, department stores, and similar retail stores were not considered to be services. However, it has long been recognized that gathering various products together, making a place available for purchasers to select goods, and providing any other necessary means for consummating purchases constitutes the performance of a service.

### 1301.01(a)(ii) For the Benefit of Others

To be a service, an activity must be primarily for the benefit of someone other than the applicant. While an advertising agency provides a service when it promotes the goods or services of its clients, a company that promotes the sale of its own goods or services is doing so for its own benefit rather than rendering a service for others. *In re Reichhold Chemicals, Inc.*, 167 USPQ 376 (TTAB 1970). See [TMEP §1301.01\(b\)\(i\)](#). Similarly, a company that sets up a personnel department to employ workers for itself is merely facilitating the conduct of its own business, while a company whose business is to recruit and place workers for other companies is performing employment agency services.

The controlling question is who *primarily* benefits from the activity for which registration is sought. If the activity is done primarily for the benefit of others, the fact that applicant derives an incidental benefit is not fatal. *In re Venture Lending Associates*, 226 USPQ 285 (TTAB 1985). On the other hand, if the activity primarily benefits applicant, it is not a registrable service even if others derive an incidental benefit. *In re Dr. Pepper Co.*, 836 F.2d 508, 5 USPQ2d 1207 (Fed. Cir. 1987) (contest promoting applicant's goods not a service, even though benefits accrue to winners of contest); *City Nat'l Bank v. OPGI Mgmt. GP Inc./Gestion OPGI Inc.*, 106 USPQ2d 1668, 1676 (TTAB 2013) (finding that intranet website was used solely for internal purposes and that respondent was primary beneficiary); *In re Alaska Northwest Publishing Co.*, 212 USPQ 316, 317 (TTAB 1981) (stating that "[t]he that the activities and operations associated with the production, advertising or sale of the product may be indirectly beneficial to purchasers of the product is immaterial to the question of registrability of the mark as a service mark").

Collecting information for the purpose of publishing one's own periodical is not a service, because it is done primarily for the applicant's benefit rather than for the benefit of others. See [TMEP §1301.01\(b\)\(iii\)](#).

Offering shares of one's own stock for investment is not a service, because these are routine corporate activities that primarily benefit the applicant. See [TMEP §1301.01\(b\)\(iv\)](#). On the other hand, offering a retirement income plan to applicant's employees was found to be a service, because it primarily benefits the employees. *American Int'l Reinsurance Co., Inc. v. Airco, Inc.*, 570 F.2d 941, 197 USPQ 69 (C.C.P.A. 1978), *cert. denied* 439 U.S. 866, 200 USPQ 64 (1978).

Licensing intangible property has been recognized as a separate service, analogous to leasing or renting tangible property, that primarily benefits the licensee. *In re Universal Press Syndicate*, 229 USPQ 638 (TTAB 1986).

### **1301.01(a)(iii) Sufficiently Distinct from Activities Involved in Provision of Goods or Performance of Other Services**

In determining whether an activity is sufficiently separate from an applicant's principal activity to constitute a service, the examining attorney should first ascertain the nature of the applicant's principal activity under the mark in question (i.e., the performance of a service or the provision of a tangible product). The examining attorney must then determine whether the activity identified in the application is in any material way a different kind of economic activity than what any provider of that particular product or service normally provides. *In re Landmark Communications, Inc.*, 204 USPQ 692, 695 (TTAB 1979).

For example, operating a grocery store is clearly a service. Bagging groceries for customers is not considered a separately registrable service, because this activity is normally provided to and expected by grocery store customers, and is, therefore, merely ancillary to the primary service.

Providing general information or instructions as to the purpose and uses of applicant's goods is merely incidental to the sale of goods, not a separate consulting service. See [TMEP §1301.01\(b\)\(v\)](#).

Conducting a contest to promote the sale of one's own goods or services is usually not considered a service, because it is an ordinary and routine promotional activity. See [TMEP §1301.01\(b\)\(i\)](#).

While the repair of the goods of others is a recognized service, an applicant's guarantee of repair of its own goods normally does not constitute a separate service, because that activity is ancillary to and normally expected in the trade. See [TMEP §1301.01\(b\)\(ii\)](#).

However, the fact that an activity is ancillary to a principal service or to the sale of goods does not in itself mean that it is not a separately registrable service. The statute makes no distinction between primary, incidental, or ancillary services. *In re Universal Press Syndicate*, 229 USPQ 638 (TTAB 1986) (licensing cartoon character found to be a separate service that was not merely incidental or necessary to larger business of magazine and newspaper cartoon strip); *In re Betz Paperchem, Inc.*, 222 USPQ 89 (TTAB 1984) (chemical manufacturer's feed, delivery, and storage of liquid chemical products held to constitute separate service, because applicant's activities extend beyond routine sale of chemicals); *In re Congoleum Corp.*, 222 USPQ 452 (TTAB 1984) (awarding prizes to retailers for purchasing applicant's goods from distributors held to be sufficiently separate from the sale of goods to constitute a service rendered to distributors, because it confers a benefit on distributors that is not normally expected by distributors in the relevant industry); *In re C.I.T. Financial Corp.*, 201 USPQ 124 (TTAB 1978) (computerized financial data-processing services rendered to applicant's loan customers held to be a registrable service, since it provides benefits that were not previously available, and is separate and distinct from the primary service of making consumer loans); *In re U.S. Home Corp. of Texas*, 199 USPQ 698 (TTAB 1978) (planning and laying out residential communities for others was found to be a service, because it goes above and beyond what the average individual would do in constructing and selling a home on a piece of land that he or she has purchased); *In re John Breuner Co.*, 136 USPQ 94 (TTAB 1963) (credit services provided by a retail store constitute a separate service, since extension of credit is neither mandatory nor required in the operation of a retail establishment).

The fact that the activities are offered only to purchasers of the applicant's primary product or service does not necessarily mean that the activity is not a service. *In re Otis Engineering Corp.*, 217 USPQ 278 (TTAB 1982) (quality control and quality assurance services held to constitute a registrable service even though the services were limited to applicant's own equipment); *In re John Breuner Co.*, *supra* (credit services offered only to customers of applicant's retail store found to be a service).

The fact that the services for which registration is sought are offered to a different class of purchasers than the purchasers of applicant's primary product or service is also a factor to be considered. *In re Forbes Inc.*, 31 USPQ2d 1315 (TTAB 1994); *In re Home Builders Ass'n of Greenville*, 18 USPQ2d 1313 (TTAB 1990).

Another factor to be considered in determining whether an activity is a registrable service is the use of a mark different from the mark used on or in connection with the applicant's principal product or service.

*See In re Mitsubishi Motor Sales of America Inc.*, 11 USPQ2d 1312 (TTAB 1989); *In re Universal Press Syndicate*, *supra*; *In re Congoleum Corp.*, *supra*; *In re C.I.T. Financial Corp.*, *supra*. However, an activity that is normally expected or routinely done in connection with sale of a product or another service is not a registrable service even if it is identified by a different mark. *In re Dr. Pepper Co.*, 836 F.2d 508, 5 USPQ2d 1207 (Fed. Cir. 1987); *In re Television Digest, Inc.*, 169 USPQ 505 (TTAB 1971). Moreover, the mark identifying the ancillary service does not have to be different from the mark identifying the applicant's goods or primary service. *Ex parte Handmacher-Vogel, Inc.*, 98 USPQ 413 (Comm'r Pats. 1953).

## **1301.01(b) Whether Particular Activities Constitute "Services"**

### **1301.01(b)(i) Contests and Promotional Activities**

It is well settled that the promotion of one's own goods is not a service. *In re Radio Corp. of America*, 205 F.2d 180, 98 USPQ 157 (C.C.P.A. 1953) (record manufacturer who prepares radio programs primarily designed to advertise and sell records is not rendering a service); *In re SCM Corp.*, 209 USPQ 278 (TTAB 1980) (supplying merchandising aids and store displays to retailers does not constitute separate service); *Ex parte Wembley, Inc.*, 111 USPQ 386 (Comm'r Pats. 1956) (national advertising program designed to sell manufacturer's goods to ultimate purchasers is not service to wholesalers and retailers, because national product advertising is normally expected of manufacturers of nationally distributed products, and is done in furtherance of the sale of the advertised products).

However, an activity that goes above and beyond what is normally expected of a manufacturer in the relevant industry may be a registrable service, even if it also serves to promote the applicant's primary product or service. *In re U.S. Tobacco Co.*, 1 USPQ2d 1502 (TTAB 1986) (tobacco company's participating in auto race held to constitute an entertainment service, because participating in an auto race is not an activity that a seller of tobacco normally does); *In re Heavenly Creations, Inc.*, 168 USPQ 317 (TTAB 1971) (applicant's free hairstyling instructional parties found to be a service separate from the applicant's sale of wigs, because it goes beyond what a seller of wigs would normally do in promoting its goods); *Ex parte Handmacher-Vogel, Inc.*, 98 USPQ 413 (Comm'r Pats. 1953) (clothing manufacturer's conducting women's golf tournaments held to be a service, because it is not an activity normally expected in promoting the sale of women's clothing).

Conducting a contest to promote the sale of one's own goods is usually not considered a service, even though benefits may accrue to the winners of the contest. Such a contest is usually ancillary to the sale of goods or services, and is nothing more than a device to advertise the applicant's products or services. *In re Dr. Pepper Co.*, 836 F.2d 508, 5 USPQ2d 1207 (Fed. Cir. 1987); *In re Loew's Theatres, Inc.*, 179 USPQ 126 (TTAB 1973); *In re Johnson Publishing Co., Inc.*, 130 USPQ 185 (TTAB 1961). However, a contest that

serves to promote the sale of the applicant's goods may be registrable if it operates in a way that confers a benefit unrelated to the sale of the goods, and the benefit is not one that is normally expected of a manufacturer in that field. *In re Congoleum Corp.*, 222 USPQ 452 (TTAB 1984).

A mark identifying a beauty contest is registrable either as a promotional service, rendered by the organizer of the contest to the businesses or groups that sponsor the contest, or as an entertainment service. *In re Miss American Teen-Ager, Inc.*, 137 USPQ 82 (TTAB 1963). See [TMEP §1402.11](#).

See [TMEP §1301.01\(b\)\(iii\)](#) regarding the providing of advertising space in a periodical.

### **1301.01(b)(ii) Warranty or Guarantee of Repair**

While the repair of the goods of others is a recognized service, an applicant's guarantee of repair of its own goods does not normally constitute a separate service, because that activity is ancillary to and normally expected in the trade. *In re Orion Research Inc.*, 669 F.2d 689, 205 USPQ 688 (C.C.P.A. 1980) (guarantee of repair or replacement of applicant's goods that is not separately offered, promoted, or charged for is not a service); *In re Lenox, Inc.*, 228 USPQ 966 (TTAB 1986) (lifetime warranty that is not separately offered, promoted, or charged for is not a service).

However, a warranty that is offered or charged for separately from the goods, or is sufficiently above and beyond what is normally expected in the industry, may constitute a service. *In re Mitsubishi Motor Sales of America, Inc.*, 11 USPQ2d 1312 (TTAB 1989) (comprehensive automobile vehicle preparation, sales, and service program held to be a service, where applicant's package included features that were unique and would not normally be expected in the industry); *In re Sun Valley Waterbeds Inc.*, 7 USPQ2d 1825 (TTAB 1988) (retailer's extended warranty for goods manufactured by others held to be a service, where the warranty is considerably more extensive than that offered by others); *In re Otis Engineering Corp.*, 217 USPQ 278 (TTAB 1982) (non-mandatory quality control and quality assurance services held to constitute a registrable service even though the services were limited to applicant's own equipment, where the services were separately charged for, the goods were offered for sale without services, and the services were not merely a time limited manufacturer's guarantee).

Providing warranties to consumers and retailers on power-operated outdoor products was held to be a registrable service where the warranty covered goods manufactured by applicant but sold under the marks of third-party retailers. Noting that none of applicant's trademarks appeared on the goods or identified applicant as the source of the goods, the Board found that the third-party retailers rather than applicant would be regarded as the manufacturer of the products. Because purchasers would make a distinction between the provider of the warranty and the provider of the goods, applicant's warranty service would not be regarded as merely an inducement to purchase its own goods. The Board also noted that applicant's activities constitute a service to the third-party retailers, because applicant's provision of warranties avoids the need of the retailer itself to provide a warranty. *In re Husqvarna Aktiebolag*, 91 USPQ2d 1436 (TTAB 2009).

When an applicant offers a warranty on its own goods or services, the identification of services must include the word "extended," or similar wording, to indicate that the warranty is "qualitatively different" from a warranty normally provided ancillary to the sale of the applicant's goods/services. When an applicant offers a warranty on third-party goods, the identification of services must so indicate. See *In re Omega SA*, 494 F.3d 1362, 83 USPQ2d 1541 (Fed. Cir. 2007) (affirming that the USPTO has the discretion to determine whether and how a trademark registration should include a more particularized identification of the goods for which a mark is used).

The identification of services must also specify the item(s) that the extended warranty covers, e.g., “providing extended warranties on television sets.” *Id.*

Extended warranty services are classified in Class 36.

### **1301.01(b)(iii) Publishing One’s Own Periodical**

The publication of one’s own periodical is not a service, because it is done primarily for applicant’s own benefit and not for the benefit of others. *In re Billfish Int’l Corp.*, 229 USPQ 152 (TTAB 1986) (activities of collecting, distributing, and soliciting information relating to billfishing tournaments for a periodical publication not a separate service, because these are necessary preliminary activities that a publisher must perform prior to publication and sale of publication); *In re Alaska Northwest Publishing Co.*, 212 USPQ 316 (TTAB 1981) (title of magazine section not registrable for magazine publishing services, because the activities and operations associated with designing, producing, and promoting applicant’s own product are ancillary activities that would be expected by purchasers and readers of any magazine); *In re Landmark Communications, Inc.*, 204 USPQ 692 (TTAB 1979) (title of newspaper section not registrable as service mark for educational or entertainment service, because collected articles, stories, reports, comics, advertising, and illustrations are indispensable components of newspapers without which newspapers would not be sold); *In re Television Digest, Inc.*, 169 USPQ 505 (TTAB 1971) (calculating advertising rates for a trade publication not a registrable service, because this is an integral part of the production or operation of any publication).

However, providing advertising space in one’s own periodical may be a registrable service, if the advertising activities are sufficiently separate from the applicant’s publishing activities. *In re Forbes Inc.*, 31 USPQ2d 1315 (TTAB 1994) (“providing advertising space in a periodical” held to be a registrable service, where the advertising services were rendered to a different segment of the public under a different mark than the mark used to identify applicant’s magazines); *In re Home Builders Ass’n of Greenville*, 18 USPQ2d 1313 (TTAB 1990) (real estate advertising services rendered by soliciting advertisements and publishing a guide comprising the advertisements of others held to be a registrable service, where advertising was found to be the applicant’s primary activity, and the customers who received the publication were not the same as those to whom the advertising services were rendered).

### **1301.01(b)(iv) Soliciting Investors**

Offering shares of one’s own stock for investment and reinvestment, and publication of reports to one’s own shareholders, are not services, because these are routine corporate activities that primarily benefit the applicant. *In re Canadian Pacific Ltd.*, 754 F.2d 992, 224 USPQ 971 (Fed. Cir. 1985). Similarly, soliciting investors in applicant’s own partnership is not a registrable service. *In re Integrated Resources, Inc.*, 218 USPQ 829 (TTAB 1983) (syndicating investment partnerships did not constitute a service within the meaning of the Trademark Act, because there was no evidence that the applicant was in the business of syndicating the investment partnerships of others; rather, the applicant partnership was engaged only in syndication of interests in its own organization). On the other hand, investing the funds of others is a registrable service that primarily benefits others. *In re Venture Lending Associates*, 226 USPQ 285 (TTAB 1985) (investment of funds of institutional investors and providing capital for management found to be a registrable service).

*In Canadian Pacific*, 224 USPQ at 974, the court noted that since shareholders are owners of the corporation, an applicant who offers a reinvestment plan to its stockholders is essentially offering the plan to itself and not to a segment of the buying public. The court distinguished *American Int’l Reinsurance Co., Inc. v. Aircor, Inc.*, 570 F.2d 941, 197 USPQ 69 (C.C.P.A. 1978), *cert. denied* 439 U.S. 866, 200 USPQ 64 (1978),

in which offering an optional retirement plan to applicant's employees was found to be a registrable service that primarily benefits the employees.

### **1301.01(b)(v) Informational Services Ancillary to the Sale of Goods**

Providing general information or instructions as to the purpose and uses of applicant's goods is merely incidental to the sale of goods, not a separate informational service. *In re Moore Business Forms Inc.*, 24 USPQ2d 1638 (TTAB 1992) (paper manufacturer who rates the recycled content and recyclability of its own products is merely providing information about its goods, not rendering a service to others); *In re Reichhold Chemicals, Inc.*, 167 USPQ 376 (TTAB 1970) ("promoting the sale and use of chemicals" is not a registrable service, where applicant is merely providing "technical bulletins" that contain information about its own products); *Ex parte Armco Steel Corp.*, 102 USPQ 124 (Comm'r Pats. 1954) (analyzing the needs of customers is not registrable as a consulting service, because it is an ordinary activity that is normally expected of a manufacturer selling goods); *Ex parte Elwell-Parker Electric Co.*, 93 USPQ 229 (Comm'r Pats. 1952) (providing incidental instructions on the efficient use of applicant's goods not a service). However, an applicant's free hairstyling instructional "parties" were found to be a service, because conducting parties goes beyond what a seller of wigs would normally do in promoting its goods. *In re Heavenly Creations, Inc.*, 168 USPQ 317 (TTAB 1971).

### **1301.02 What Is a Service Mark?**

Not every word, combination of words, or other designation used in the performance or advertising of services is registrable as a service mark. To function as a service mark, the asserted mark must be used in a way that identifies and distinguishes the source of the services recited in the application. Even if it is clear that the applicant is rendering a service ( *see* [TMEP §§1301.01 et seq.](#)), the record must show that the asserted mark actually identifies and distinguishes the source of the service recited in the application. *In re Advertising and Marketing Development Inc.*, 821 F.2d 614, 2 USPQ2d 2010 (Fed. Cir. 1987) (stationery specimen showed use of THE NOW GENERATION as a mark for applicant's advertising or promotional services as well as to identify a licensed advertising campaign, where the recited services were specified in a byline appearing immediately beneath the mark).

The fact that the proposed mark appears in an advertisement or brochure in which the services are advertised does not in itself show use as a mark. The record must show that there is a direct association between the mark and the service. *See In re Universal Oil Products Co.*, 476 F.2d 653, 177 USPQ 456 (C.C.P.A. 1973) (term that identifies only a process does not function as a service mark, even where services are advertised in the same specimen brochure in which the name of the process is used); *In re Duratech Industries Inc.*, 13 USPQ2d 2052 (TTAB 1989) (term used on bumper sticker with no reference to the services does not function as a mark); *Peopleware Systems, Inc. v. Peopleware, Inc.*, 226 USPQ 320 (TTAB 1985) (term PEOPLEWARE used within a byline on calling card specimen does not constitute service mark usage of that term, even if specimen elsewhere shows that applicant provides the recited services); *In re J.F. Pritchard & Co. and Kobe Steel, Ltd.*, 201 USPQ 951 (TTAB 1979) (proposed mark used only to identify a liquefaction process in brochure advertising the services does not function as a mark, because there is no direct association between the mark and the offering of services). *See* [TMEP §1301.04\(b\)](#).

The question of whether a designation functions as a mark that identifies and distinguishes the recited services is determined by examining the specimen(s) and any other evidence in the record that shows how the designation is used. *In re Morganroth*, 208 USPQ 284 (TTAB 1980); *In re Republic of Austria Spanische Reitschule*, 197 USPQ 494 (TTAB 1977). It is the perception of the ordinary customer that determines whether the asserted mark functions as a service mark, not the applicant's intent, hope, or expectation that it do so. *In re Standard Oil Co.*, 275 F.2d 945, 125 USPQ 227 (C.C.P.A. 1960). Factors that the examining

attorney should consider in determining whether the asserted mark functions as a service mark include whether the wording claimed as a mark is physically separate from textual matter, whether a term is displayed in capital letters or enclosed in quotation marks, and the manner in which a term is used in relation to other material on the specimen.

While a service mark does not have to be displayed in any particular size or degree of prominence, it must be used in a way that makes a commercial impression separate and apart from the other elements of the advertising matter or other material upon which it is used, such that the designation will be recognized by prospective purchasers as a source identifier. *In re C.R. Anthony Co.*, 3 USPQ2d 1894 (TTAB 1987); *In re Post Properties, Inc.*, 227 USPQ 334 (TTAB 1985). The proposed mark must not blend so well with other matter on specimen that it is difficult or impossible to discern what the mark is. *In re McDonald's Corp.*, 229 USPQ 555 (TTAB 1985); *In re Royal Viking Line A/S*, 216 USPQ 795 (TTAB 1982); *In re Republic of Austria Spanische Reitschule, supra*; *Ex parte Nat'l Geographic Society*, 83 USPQ 260 (Comm'r Pats. 1949). On the other hand, the fact that the proposed mark is prominently displayed does not in and of itself make it registrable, if it is not used in a manner that would be perceived by consumers as an indicator of source. *In re Wakefern Food Corp.*, 222 USPQ 76 (TTAB 1984). The important question is not how readily a mark will be noticed but whether, when noticed, it will be understood as identifying and indicating the origin of the services. *In re Singer Mfg. Co.*, 255 F.2d 939, 118 USPQ 310 (C.C.P.A. 1958).

The presence of the “SM” symbol is not dispositive of the issue of whether matter sought to be registered is used as a service mark. *In re British Caledonian Airways Ltd.*, 218 USPQ 737 (TTAB 1983).

See [TMPEP §1301.02\(a\)](#) for further information about matter that does not function as a service mark, [TMPEP §§1301.01](#) *et seq.* regarding what constitutes a service, and [TMPEP §§1301.04](#) *et seq.* regarding service mark specimens.

### **1301.02(a) Matter that Does Not Function as a Service Mark**

To function as a service mark, a designation must be used in a manner that would be perceived by purchasers as identifying and distinguishing the source of the services recited in the application.

Use of a designation or slogan to convey advertising or promotional information, rather than to identify and indicate the source of the services, is not service mark use. *See In re Standard Oil Co.*, 275 F.2d 945, 125 USPQ 227 (C.C.P.A. 1960) (GUARANTEED STARTING found to be ordinary words that convey information about the services, not a service mark for the services of “winterizing” motor vehicles); *In re Melville Corp.*, 228 USPQ 970 (TTAB 1986) (BRAND NAMES FOR LESS found to be informational phrase that does not function as a mark for retail store services); *In re Brock Residence Inns, Inc.*, 222 USPQ 920 (TTAB 1984) (FOR A DAY, A WEEK, A MONTH OR MORE so highly descriptive and informational in nature that purchasers would be unlikely to perceive it as an indicator of the source of hotel services); *In re Wakefern Food Corp.*, 222 USPQ 76 (TTAB 1984) (WHY PAY MORE found to be a common commercial phrase that does not serve to identify grocery store services); *In re Gilbert Eiseman, P.C.*, 220 USPQ 89 (TTAB 1983) (IN ONE DAY not used as source identifier but merely as a component of advertising matter that conveyed a characteristic of applicant’s plastic surgery services); *In re European-American Bank & Trust Co.*, 201 USPQ 788 (TTAB 1979) (slogan THINK ABOUT IT found to be an informational or instructional phrase that would not be perceived as a mark for banking services); *In re Restonic Corp.*, 189 USPQ 248 (TTAB 1975) (phrase used merely to advertise goods manufactured and sold by applicant’s franchisees does not serve to identify franchising services). *Cf. In re Post Properties, Inc.*, 227 USPQ 334 (TTAB 1985) (the designation QUALITY SHOWS, set off from text of advertising copy in extremely large typeface and reiterated at the conclusion of the narrative portion of the ad, held to be a registrable service mark for applicant’s real estate management and leasing services, because it was used in a way that made

a commercial impression separate from that of the other elements of advertising material upon which it was used, such that the designation would be recognized by prospective customers as a source identifier). See also [TMPEP §1202.04](#) regarding informational matter that does not function as a trademark.

A term that is used only to identify a product, device, or instrument sold or used in the performance of a service rather than to identify the service itself does not function as a service mark. See *In re Moody's Investors Service Inc.*, 13 USPQ2d 2043 (TTAB 1989) (“Aaa,” as used on the specimen, found to identify the applicant’s ratings instead of its rating services); *In re Niagara Frontier Services, Inc.*, 221 USPQ 284 (TTAB 1983) (WE MAKE IT, YOU BAKE IT only identifies pizza, and does not function as a service mark to identify grocery store services); *In re British Caledonian Airways Ltd.*, 218 USPQ 737 (TTAB 1983) (term that identifies a seat in the first-class section of an airplane does not function as mark for air transportation services); *In re Editel Productions, Inc.*, 189 USPQ 111 (TTAB 1975) (MINI-MOBILE identifies only a vehicle used in rendering services and does not serve to identify the production of television videotapes for others); *In re Oscar Mayer & Co. Inc.*, 171 USPQ 571 (TTAB 1971) (WIENERMOBILE does not function as mark for advertising and promoting the sale of wieners, where it is used only to identify a vehicle used in rendering claimed services).

Similarly, a term that only identifies a process, style, method, or system used in rendering the services is not registrable as a service mark, unless it is also used to identify and distinguish the service. See [TMPEP §1301.02\(e\)](#) and cases cited therein.

A term that only identifies a menu item does not function as a mark for restaurant services. *In re El Torito Restaurant Inc.*, 9 USPQ2d 2002 (TTAB 1988).

The name or design of a character or person does not function as a service mark, unless it identifies and distinguishes the services in addition to identifying the character or person. See [TMPEP §1301.02\(b\)](#) and cases cited therein.

A term used only as a trade name is not registrable as a service mark. See *In re The Signal Companies, Inc.*, 228 USPQ 956 (TTAB 1986) (journal advertisement submitted as specimen showed use of ONE OF THE SIGNAL COMPANIES merely as an informational slogan, where words appeared only in small, subdued typeface underneath the address and telephone number of applicant’s subsidiary). See [TMPEP §1202.01](#) for additional information about matter used solely as a trade name.

Matter that is merely ornamental in nature does not function as a service mark. See *In re Tad's Wholesale, Inc.*, 132 USPQ 648 (TTAB 1962) (wallpaper design not registrable as a service mark for restaurant services). See [TMPEP §§1202.03 et seq.](#) for additional information about ornamentation.

See [TMPEP §1202.02\(a\)\(vii\)](#) regarding functionality and service marks, and [TMPEP §1202.02\(b\)\(ii\)](#) regarding trade dress.

### **1301.02(b) Names of Characters or Personal Names as Service Marks**

Under 15 U.S.C. §1127, a name or design of a character does not function as a service mark, unless it identifies and distinguishes services in addition to identifying the character. If the name or design is used only to identify the character, it is not registrable as a service mark. *In re Hechinger Investment Co. of Delaware Inc.*, 24 USPQ2d 1053 (TTAB 1991) (design of dog appearing in advertisement does not function as mark for retail hardware and housewares services); *In re McDonald's Corp.*, 229 USPQ 555 (TTAB 1985) (APPLE PIE TREE does not function as mark for restaurant services, where the specimen shows use

of mark only to identify one character in a procession of characters); *In re Whataburger Systems, Inc.*, 209 USPQ 429 (TTAB 1980) (design of zoo animal character distributed to restaurant customers in the form of an iron-on patch not used in a manner that would be perceived as an indicator of source); *In re Burger King Corp.*, 183 USPQ 698 (TTAB 1974) (fanciful design of king does not serve to identify and distinguish restaurant services). See [TMEP §1202.10](#) regarding the registrability of the names and designs of characters in creative works.

Similarly, personal names (actual names and pseudonyms) of individuals or groups function as marks only if they identify and distinguish the services recited and not merely the individual or group. *In re Mancino*, 219 USPQ 1047 (TTAB 1983) (holding that BOOM BOOM would be viewed by the public solely as applicant's professional boxing nickname and not as an identifier of the service of conducting professional boxing exhibitions); *In re Lee Trevino Enterprises, Inc.*, 182 USPQ 253 (TTAB 1974) (LEE TREVINO used merely to identify a famous professional golfer rather than as a mark to identify and distinguish any services rendered by him); *In re Generation Gap Products, Inc.*, 170 USPQ 423 (TTAB 1971) (GORDON ROSE used only to identify a particular individual and not as a service mark to identify the services of a singing group).

The name of a character or person is registrable as a service mark if the record shows that it is used in a manner that would be perceived by purchasers as identifying the services in addition to the character or person. *In re Florida Cypress Gardens Inc.*, 208 USPQ 288 (TTAB 1980) (name CORKY THE CLOWN used on handbills found to function as a mark to identify live performances by a clown, where the mark was used to identify not just the character but also the act or entertainment service performed by the character); *In re Carson*, 197 USPQ 554 (TTAB 1977) (individual's name held to function as mark, where specimen showed use of the name in conjunction with a reference to services and information as to the location and times of performances, costs of tickets, and places where tickets could be purchased); *In re Ames*, 160 USPQ 214 (TTAB 1968) (name of musical group functions as mark, where name was used on advertisements that prominently featured a photograph of the group and gave the name, address, and telephone number of the group's booking agent); *In re Folk*, 160 USPQ 213 (TTAB 1968) (THE LOLLIPOP PRINCESS functions as a service mark for entertainment services, namely, telling children's stories by radio broadcasting and personal appearances).

See [TMEP §§1202.09\(a\)](#) *et seq.* regarding the registrability of the names and pseudonyms of authors and performing artists, and [TMEP §1202.09\(b\)](#) regarding the registrability of the names of artists used on original works of art.

### 1301.02(c) Three-Dimensional Service Marks

The three-dimensional configuration of a building is registrable as a service mark only if it is used in such a way that it is or could be perceived as a mark. Evidence of use might include menus or letterhead that show promotion of the building's design, or configuration, as a mark. See *In re Lean-To Barbecue, Inc.*, 172 USPQ 151 (TTAB 1971); *In re Master Kleens of America, Inc.*, 171 USPQ 438 (TTAB 1971); *In re Griffs of America, Inc.*, 157 USPQ 592 (TTAB 1968). Cf. *Fotomat Corp. v. Cochran*, 437 F. Supp. 1231, 194 USPQ 128 (D. Kan. 1977); *Fotomat Corp. v. Photo Drive-Thru, Inc.*, 425 F. Supp. 693, 193 USPQ 342 (D.N.J. 1977).

A three-dimensional costume design may function as a mark for entertainment services. See *In re Red Robin Enterprises, Inc.*, 222 USPQ 911 (TTAB 1984).

Generally, a photograph is a proper specimen of use for a three-dimensional mark. However, photographs of a building are not sufficient to show use of the building design as a mark for services performed in the

building if they only show the building in which the services are performed. The specimen must show that the proposed mark is used in a way that would be perceived as a mark.

See 37 C.F.R. §2.52(b)(2) and [TMPEP §807.10](#) regarding drawings of three-dimensional marks.

When examining a three-dimensional mark, the examining attorney must determine whether the proposed mark is inherently distinctive. See [TMPEP §1202.02\(b\)\(ii\)](#).

### **1301.02(d) Titles of Radio and Television Programs**

The title of a continuing series of presentations (e.g., a television or movie “series,” a series of live performances, or a continuing radio program), may constitute a mark for either entertainment services or educational services. However, the title of a single creative work, that is, the title of one episode or event presented as one program, does not function as a service mark. *In re Posthuma*, 45 USPQ2d 2011 (TTAB 1998) (term that identifies title of a play not registrable as service mark for entertainment services). The record must show that the matter sought to be registered is more than the title of one presentation, performance, or recording. See [TMPEP §§1202.08](#) *et seq.* and cases cited therein for further information regarding the registrability of the title of a single creative work.

Specimens that show use of a service mark in relation to television programs or a movie series may be in the nature of a photograph of the video or film frame when the mark is used in the program.

Service marks in the nature of titles of entertainment programs may be owned by the producer of the show, by the broadcasting system or station, or by the author or creator of the show, depending upon the circumstances. Normally, an applicant’s statement that the applicant owns the mark is sufficient; the examining attorney should not inquire about ownership, unless information in the record clearly contradicts the applicant’s verified statement that it is the owner of the mark.

### **1301.02(e) Process, System, or Method**

A term that only identifies a process, style, method, system, or the like is not registrable as a service mark. A system or process is only a way of doing something, not a service. The name of a system or process does not become a service mark, unless it is also used to identify and distinguish the service. *In re Universal Oil Products Co.*, 476 F.2d 653, 177 USPQ 456 (C.C.P.A. 1973) (term not registrable as service mark where the specimen shows use of the term only as the name of a process, even though applicant is in the business of rendering services generally and the services are advertised in the same specimen brochure in which the name of the process is used); *In re HSB Solomon Assoc. LLC*, 102 USPQ2d 1269, 1274 (TTAB 2012) (finding that the specimens show CEI identifying only a process and do not show a direct association between CEI and the applied-for services); *In re Hughes Aircraft Co.*, 222 USPQ 263 (TTAB 1984) (term does not function as service mark where it only identifies a photochemical process used in rendering service); *In re Vsesoyuzny Ordena Trudovogo Krasnogo Znameni Nauchnoissledovatel'sky Gorno-Metallurgichesky Institut Tsvetnykh Metallov “Vnitsvetmet”*, 219 USPQ 69 (TTAB 1983) (KIVCET identifies only a process and plant configuration, not engineering services); *In re Scientific Methods, Inc.*, 201 USPQ 917 (TTAB 1979) (term that merely identifies educational technique does not function as mark to identify educational services); *In re J.F. Pritchard & Co. and Kobe Steel, Ltd.*, 201 USPQ 951 (TTAB 1979) (term used only to identify liquefaction process does not function as mark to identify design and engineering services); *In re Produits Chimiques Ugine Kuhlmann Societe Anonyme*, 190 USPQ 305 (TTAB 1976) (term that merely identifies a process used in rendering the service does not function as service mark); *In re Lurgi Gesellschaft Fur Mineraloltechnik m.b.H.*, 175 USPQ 736 (TTAB 1972) (term that merely identifies process for recovery of

high-purity aromatics from hydrocarbon mixtures does not function as service mark for consulting, designing, and construction services); *Ex parte Phillips Petroleum Co.*, 100 USPQ 25 (Comm'r Pats. 1953) (although used in advertising of applicant's engineering services, CYCLOVERSION was only used in the advertisements to identify a catalytic treating and conversion process).

If the term is used to identify *both* the system or process *and* the services rendered by means of the system or process, the designation may be registrable as a service mark. See *Liqwacon Corp. v. Browning-Ferris Industries, Inc.*, 203 USPQ 305 (TTAB 1979), in which the Board found that the mark LIQWACON identified both a waste treatment and disposal service and a chemical solidification process.

The name of a system or process is registrable only if: (1) the applicant is performing a service (see [TMEP §§1301.01 et seq.](#)); and (2) the designation identifies and indicates the source of the service. In determining eligibility for registration, the examining attorney must carefully review the specimen, together with any other information in the record, to see how the applicant uses the proposed mark. The mere advertising of the recited services in a brochure that refers to the process does not establish that a designation functions as a service mark; there must be some association between the offer of services and the matter sought to be registered. *In re Universal Oil Products Co.*, *supra*; *In re J.F. Pritchard & Co.*, *supra*.

### 1301.02(f) Computer Software

A term that only identifies a computer program does not become a service mark, unless it is also used to identify and distinguish the service. *In re Walker Research, Inc.*, 228 USPQ 691 (TTAB 1986) (term that merely identifies computer program used in rendering services does not function as a mark to identify market analysis services); *In re Information Builders Inc.*, 213 USPQ 593 (TTAB 1982) (term identifies only a computer program, not the service of installing and providing access to a computer program); *In re DSM Pharmaceuticals, Inc.*, 87 USPQ2d 1623 (TTAB 2008) (term that merely identifies computer software used in rendering services does not function as a mark to identify custom manufacturing of pharmaceuticals). However, it is important to review the record carefully to determine the manner of use of the mark and the impression it is likely to make on purchasers. The Trademark Trial and Appeal Board has noted that:

[I]n today's commercial context if a customer goes to a company's website and accesses the company's software to conduct some type of business, the company may be rendering a service, even though the service utilizes software. Because of the ... blurring between services and products that has occurred with the development and growth of web-based products and services, it is important to review all the information in the record to understand both how the mark is used and how it will be perceived by potential customers.

*In re Ancor Holdings*, 79 USPQ2d 1218, 1221 (TTAB 2006) (INFOMINDER found to identify reminder and scheduling services provided via the Internet, and not just software used in rendering the services).

### 1301.03 Use of Service Mark in Commerce

#### 1301.03(a) Use of Service Mark in Advertising to Identify Services

In examining an application under 15 U.S.C. §1051(a), an amendment to allege use under 15 U.S.C. §1051(c), or a statement of use under 15 U.S.C. §1051(d), the examining attorney ordinarily should refuse registration if the record shows that the services advertised have not been rendered. For example, the use of a mark in the announcement of a future service does not constitute use as a service mark. *Aycock Eng'g, Inc. v. Airflite, Inc.*, 560 F.3d 1350, 90 USPQ2d 1301 (Fed. Cir. 2009) (holding that actual use of the mark in commerce

in connection with an existing service is required and that mere preparations to use a mark sometime in the future does not constitute use in commerce); *In re Port Auth. of N. Y.*, 3 USPQ2d 1453 (TTAB 1987) (finding advertising and promoting telecommunications services before the services were available insufficient to support registration); *In re Cedar Point, Inc.*, 220 USPQ 533 (TTAB 1983) (holding that advertising of a marine entertainment park, which was not yet open, was not a valid basis for registration); *In re Nationwide Mutual Ins. Co.*, 124 USPQ 465 (TTAB 1960) (holding that stickers placed on policies, bills, and letters announcing prospective name change is mere adoption, not service mark use).

Sometimes a service-mark specimen may show the wording “beta” being used in connection with the relevant services. This term is commonly used to describe a preliminary version of a product or service. Although some beta services may not be made available to consumers, others are. For example, a beta version of non-downloadable or downloadable software may be made available to the public for use even though the final version has not been released. Thus, the appearance of this term on a service-mark specimen does not, by itself, necessarily mean that the relevant services are not in actual use in commerce or that the specimen is unacceptable. However, if examination of the specimen indicates that the beta version is not in actual use in commerce, the examining attorney must refuse registration because applicant has not provided evidence of use of the applied-for mark in commerce. The statutory basis for refusal is 15 U.S.C. §§1051 and 1127. See [TMPEP §§904.03\(e\)](#) and [904.03\(i\)](#) regarding trademark specimens containing the term “beta.”

See [TMPEP §806.03\(c\)](#) regarding amendment of the basis to intent-to-use under 15 U.S.C. §1051(b) when a §1(a) basis fails; [TMPEP §1104.10](#) regarding withdrawal of an amendment to allege use, and [TMPEP §§1109.16-1109.16\(e\)](#) regarding the time limits for correcting deficiencies in a statement of use.

### **1301.03(b) Rendering of Service in Commerce Regulable by Congress**

In an application under §1(a) or §1(b) of the Trademark Act, 15 U.S.C. §1051(a) or §1051(b), the applicant must use the mark in commerce before a registration may be granted. Section 45 of the Act, 15 U.S.C. §1127, defines “commerce” as “all commerce which may lawfully be regulated by Congress.” See [TMPEP §§901.01](#) and [901.03](#).

The following are three examples of how a service may be rendered in commerce: (1) the applicant’s services are rendered across state lines; (2) customers come across state lines in response to advertising for the services; and (3) the applicant’s licensees or franchisees who use the mark are located in more than one state. See [TMPEP §901.03](#) and cases cited therein.

### **1301.04 Specimens of Use for Service Marks**

A service mark specimen must show the mark as actually used in the sale or advertising of the services recited in the application. 37 C.F.R. §2.56(b)(2). Acceptable specimens may include newspaper and magazine advertisements, brochures, billboards, handbills, direct-mail leaflets, menus (for restaurants), and the like. However, printer’s proofs for advertisements, press releases to news media, or printed articles resulting from such releases are not accepted because they do not show use of the mark by the applicant in the rendering or advertising of the services. See [TMPEP §1301.04\(b\)](#). Business documents such as letterhead and invoices may be acceptable service mark specimens if they show the mark and refer to the relevant services. See [TMPEP §1301.04\(c\)](#).

See 37 C.F.R. §2.59 and [TMEP §§904.05](#) and [904.07](#) *et seq.* regarding substitute specimens.

### 1301.04(a) Specimens Must Show Use as a Service Mark

To show service mark usage, the specimen must show use of the mark in a manner that would be perceived by potential purchasers as identifying the applicant's services and indicating their source. *In re Universal Oil Products Co.*, 476 F.2d 653, 177 USPQ 456 (C.C.P.A. 1973) (term that identified only a process held not registrable as service mark, even though applicant was rendering services and the name of the process appeared in the same brochure in which the services were advertised); *In re DSM Pharmaceuticals, Inc.*, 87 USPQ2d 1623 (TTAB 2008) (term that merely identifies computer software used in rendering services does not function as a mark to identify custom manufacturing of pharmaceuticals); *In re A La Vieille Russie, Inc.*, 60 USPQ2d 1895 (TTAB 2001) (RUSSIANART perceived as informational matter rather than as service mark for art dealership services, where the term was displayed inconspicuously in the specimen brochure, in the same size and font as other informational matter); *In re Moody's Investors Service Inc.*, 13 USPQ2d 2043 (TTAB 1989) ("Aaa," as used on the specimen, found to identify the applicant's ratings instead of its rating services); *In re McDonald's Corp.*, 229 USPQ 555 (TTAB 1985) (APPLE PIE TREE did not function as mark for restaurant services, where the specimen showed use of mark only to identify one character in a procession of characters, and the proposed mark was no more prominent than anything else on specimen); *In re Signal Companies, Inc.*, 228 USPQ 956 (TTAB 1986) (journal advertisement submitted as specimen showed use of ONE OF THE SIGNAL COMPANIES merely as an informational slogan, where the words appeared only in small, subdued typeface underneath the address and telephone number of applicant's subsidiary); *In re Republic of Austria Spanische Reitschule*, 197 USPQ 494 (TTAB 1977) (use of mark as one of many pictures in applicant's brochure would not be perceived as an indication of the source of the services); *Intermed Communications, Inc. v. Chaney*, 197 USPQ 501 (TTAB 1977) (business progress reports directed to potential investors do not show service mark use for medical services); *In re Restonic Corp.*, 189 USPQ 248 (TTAB 1975) (phrase used merely to advertise goods manufactured and sold by applicant's franchisees does not identify franchising services); *In re Reichhold Chemicals, Inc.*, 167 USPQ 376 (TTAB 1970) (technical bulletins and data sheets on which mark was used merely to advertise chemicals do not show use as a service mark for consulting services). *Cf. In re ICE Futures U.S., Inc.*, 85 USPQ2d 1664,1670 (TTAB 2008) (SUGAR NO. 11, SUGAR NO. 14 and COTTON NO. 2 functioned as service marks for futures exchange and related commodity trading services, where the specimens showed the marks directly with the wording "futures contract"; Board found that "the connection between the marks and services is evident and need not be stated explicitly....").

See [TMEP §1301.02\(a\)](#) regarding matter that does not function as a service mark.

### 1301.04(b) Association Between Mark and Services

Where the mark is used in *advertising* the services, the specimen must show an association between the mark and the services for which registration is sought. A specimen that shows only the mark, with no reference to the services, does not show service mark usage. *In re wTe Corp.*, 87 USPQ2d 1536 (TTAB 2008) (specimen comprising a packaging label affixed to boxes being mailed to customers, on which the proposed mark was used as part of a return address, held unacceptable because it did not show a connection between the mark and the services); *In re Adair*, 45 USPQ2d 1211 (TTAB 1997) (tags affixed to decorated Christmas tree that bear the mark "TREE ARTS CO. and design" and the applicant's location, but make no reference to services, fail to show use for "design services in the nature of designing handcrafted, permanently decorated Christmas and designer trees"); *In re Johnson Controls, Inc.*, 33 USPQ2d 1318 (TTAB 1994) (labels affixed to packaging of valves do not show use of mark for custom manufacture of valves); *In re Duratech Industries Inc.*, 13 USPQ2d 2052 (TTAB 1989) (bumper stickers showing only the mark do not show use to identify "association services, namely promoting the interests of individuals who censor the

practice of drinking and driving”); *In re Riddle*, 225 USPQ 630 (TTAB 1985) (cutouts showing mark with no reference to the services held unacceptable for automotive service center); *In re Whataburger Systems, Inc.*, 209 USPQ 429 (TTAB 1980) (iron-on transfer clothing patches in the form and shape of a cartoon animal mark, distributed as free promotional items to restaurant customers at counters, held insufficient to identify restaurant services). See also [TMEP §1301.04\(c\)](#) and cases cited therein.

A specimen that shows the mark as used in the course of *rendering or performing* the services is generally acceptable. Where the record shows that the mark is used in performing (as opposed to advertising) the services, a reference to the services on the specimen itself may not be necessary. *In re Metriplex Inc.*, 23 USPQ2d 1315 (TTAB 1992) (computer printouts showing mark GLOBAL GATEWAY found acceptable to show use of mark to identify data transmission services accessed via computer, because they show use of mark as it appears on computer terminal in the course of rendering the services); *In re Eagle Fence Rentals, Inc.*, 231 USPQ 228 (TTAB 1986) (photograph of rented fence held acceptable for rental of chain link fences, since it shows use of distinctive color scheme in the rendering services); *In re Red Robin Enterprises, Inc.*, 222 USPQ 911 (TTAB 1984) (photograph of costume worn by performer during performance of entertainment services held to be an acceptable specimen). In *Johnson Controls*, 33 USPQ2d at 1320, the Board distinguished *Metriplex* and *Eagle Fence*, noting that the labels were not used in the rendering of the services, as the custom manufacturing services were complete before purchasers ever see the mark.

In determining whether a specimen is acceptable evidence of service mark use, the examining attorney may consider applicant’s explanations as to how the specimen is used, along with any other available evidence in the record that shows how the mark is actually used. See *In re International Environmental Corp.*, 230 USPQ 688 (TTAB 1986), in which a survey distributed to potential customers of applicant’s heating and air conditioning distributorship services was held to be an acceptable specimen even though it did not specifically refer to the services, where the applicant stated that the sale of its services involved ascertaining the needs of customers serviced, and the record showed that the surveys were directed to potential customers and were the means by which applicant offered its distributorship services to the public.

### **1301.04(c) Letterhead**

Letterhead stationery, business cards, or invoices bearing the mark may be accepted if they create an association between the mark and the services. To create an association between the mark and the services, the specimen does not have to spell out the specific nature or type of services. A general reference to the industry may be acceptable. *In re Ralph Mantia Inc.*, 54 USPQ2d 1284 (TTAB 2000) (letterhead and business cards showing the word “Design” are acceptable evidence of use of mark for commercial art design services); *In re Southwest Petro-Chem, Inc.*, 183 USPQ 371 (TTAB 1974) (use of mark on letterhead next to the name SOUTHWEST PETRO-CHEM, INC. found to be sufficient to show use of the mark for “consulting and advisory services relating to the making and using of lubricating oils and greases,” when used for letters in correspondence with customers).

Letterhead or business cards that bear only the mark and a company name and address are not adequate specimens (unless the mark itself has a descriptive portion that refers to the service), because they do not show that the mark is used in the sale or advertising of the particular services recited in the application. *In re Monograms America, Inc.*, 51 USPQ2d 1317 (TTAB 1999) (letterhead specimen showing the mark MONOGRAMS AMERICA and the wording “A Nationwide Network of Embroidery Stores” held insufficient to support registration for consulting services for embroidery stores).

If the letterhead itself does not include a reference to the services, a copy of an actual letter on letterhead stationery bearing the mark is an acceptable specimen of use if the content of the letter indicates the field

or service area in which the mark is used. In *Monograms America*, the Board indicated that the letterhead specimen might have been accepted if the applicant had submitted a copy of a letter to a store owner describing the services. 51 USPQ2d at 1319.

### 1301.04(d) Specimens for Entertainment Services

For live entertainment services, acceptable specimens include a photograph of the group or individual in performance with the name displayed, e.g., the name printed on the drum of a band. For any entertainment service, advertisements or radio or television listings showing the mark may be submitted, but the specimen must show that the mark is used to identify and distinguish the services recited in the application, not just the performer. See *In re Ames*, 160 USPQ 214 (TTAB 1968) (advertisements for records show use of the mark for entertainment services rendered by a musical group, where the advertisements prominently feature a photograph of musical group and give the name, address, and telephone number of a booking agent).

A designation that identifies only the performer is not registrable as a service mark. See [TMEP §1301.02\(b\)](#) regarding the registrability of names of characters or personal names as service marks, and [TMEP §§1202.09\(a\)](#) *et seq.* regarding the registrability of names and pseudonyms of performing artists.

### 1301.05 Identification and Classification of Services

See [TMEP §§1402.11](#) *et seq.* regarding identification of services, and [TMEP §§1401](#) *et seq.* regarding classification.

## 1302 Collective Marks Generally

Section 45 of the Trademark Act, 15 U.S.C. §1127, defines “collective mark” as follows:

The term “collective mark” means a trademark or service mark--

- (1) used by the members of a cooperative, an association, or other collective group or organization, or
- (2) which such cooperative, association, or other collective group or organization has a bona fide intention to use in commerce and applies to register on the principal register established by this [Act], and includes marks indicating membership in a union, an association or other organization.

Under the Trademark Act, a collective mark must be *owned by* a collective entity even though the mark is *used by* the members of the collective. There are basically two types of collective marks: (1) collective trademarks or collective service marks; and (2) collective membership marks. The distinction between these types of collective marks is explained in *Aloe Creme Laboratories, Inc. v. American Society for Aesthetic Plastic Surgery, Inc.*, 192 USPQ 170, 173 (TTAB 1976), as follows:

A *collective trademark* or *collective service mark* is a mark adopted by a “collective” (i.e., an association, union, cooperative, fraternal organization, or other organized collective group) for use only by its members, who in turn use the mark to identify their goods or services and distinguish them from those of nonmembers. The “collective” itself neither sells goods nor performs services under a collective trademark or collective service mark, but the collective may advertise or otherwise promote the goods or services sold or rendered by its members under the mark. A *collective membership mark* is a mark adopted for the purpose of indicating membership in an organized collective group, such as a union, an association, or other organization. Neither the collective nor its members uses the collective

membership mark to identify and distinguish goods or services; rather, the sole function of such a mark is to indicate that the person displaying the mark is a member of the organized collective group.

See also *In re International Institute of Valuers*, 223 USPQ 350 (TTAB 1984). See [TMEP §1303](#) concerning collective trademarks and service marks; [TMEP §1304](#) concerning collective membership marks; and [TMEP §1305](#), which distinguishes collective trademarks or service marks from trademarks and service marks used by collective organizations.

### **1302.01 History of Collective Marks**

Section 4 of the Trademark Act of 1946, 15 U.S.C. §1054, provides for registration of both collective marks and certification marks, without distinguishing between them, but §45 of the Act, 15 U.S.C. §1127, defines collective marks and certification marks separately, as distinctly different types of marks. (See [TMEP §§1306 et seq.](#) regarding certification marks.)

A brief history will serve to put these sections in perspective. The earlier statutory provision, out of which §4 and the accompanying definitions in §45 grew, was the June 10, 1938 amendment of the Trademark Act of 1905. Under the Act of 1905, registration could be based only on a person's own use of a mark. The purpose of the 1938 amendment was to provide for registration of a mark by an owner who "exercises legitimate control over the use of a collective mark." "Collective marks," however, were not defined under the Act of 1905, as amended. Section 45 of the Act of 1946 defined the separate types of marks.

See [TMEP §1304.01](#) for additional history relating to collective membership marks.

## **1303 Collective Trademarks and Collective Service Marks**

Collective trademarks and collective service marks indicate commercial origin of goods or services, but as *collective* marks they indicate that the party providing the goods or services is a member of a certain group and meets its standards for admission. The mark is used by all members of the group; therefore, no one member can own the mark, and the collective organization holds the title to the collectively used mark for the benefit of all members of the group.

The collective organization itself neither sells goods nor performs services under the mark, but may advertise to publicize the mark and promote the goods or services sold by its members under the mark. For example, an agricultural cooperative of produce sellers does not sell its own goods or render services, but promotes the goods and services of its members.

A specimen of use of a collective trademark or service mark must show use of the mark by a member on the member's goods or in the sale or advertising of the member's services. 37 C.F.R. §2.56(b)(3); [TMEP §1303.02\(b\)](#).

### **1303.01 Use of Collective Trademark and Collective Service Mark Is By Members**

Applications for registration of collective trademarks and collective service marks are different in form from applications for registration of other trademarks and service marks, because of the difference in ownership and use of collective marks.

Under the definition of “collective mark” in §45 of the Trademark Act, 15 U.S.C. §1127, a collective mark must be owned by a collective entity. The use of a collective trademark or collective service mark is by members of the collective. Therefore, in an application based on use in commerce under §1(a) of the Trademark Act, 15 U.S.C. §1051(a), the applicant must assert that the applicant is exercising legitimate control over the use of the mark in commerce by its members.

In an application based on §1(b), §44, or §66(a) of the Act, 15 U.S.C. §1051(b), 15 U.S.C. §1126, or 15 U.S.C. §1141f(a), the applicant must assert that the applicant has a bona fide intention, and is entitled, to exercise legitimate control over the use of the mark in commerce by its members. In a §1(b) application, before the mark can register, the applicant must file an allegation of use (i.e., either an amendment to allege use under 15 U.S.C. §1051(c), or a statement of use under 15 U.S.C. §1051(d)), alleging that the applicant is exercising legitimate control over the use of the mark in commerce by its members.

In certain situations, notwithstanding the use of a collective trademark or collective service mark by the members of the collective, the collective itself may also use the same mark as a trademark for the goods or services covered by the collective trademark or service mark registration. See [TMEP §1305](#). The “anti-use-by-owner rule” of §4 of the Trademark Act, 15 U.S.C. §1054, does not apply to collective marks.

See *Roush Bakery Products Co. v. F.R. Lepage Bakery Inc.*, 4 USPQ2d 1401 (TTAB 1987), *aff'd*, 851 F.2d 351, 7 USPQ2d 1395 (Fed. Cir. 1988), *withdrawn, vacated and remanded*, 863 F.2d 43, 9 USPQ2d 1335 (Fed. Cir. 1988), *vacated and modified*, 13 USPQ2d 1045 (TTAB 1989). The Trademark Law Revision Act of 1988, which became effective on November 16, 1989, amended §4 to indicate that the “anti-use-by-owner rule” in that section applies specifically to certification marks.

The same mark may not be used both as a collective mark and as a certification mark. [TMEP §1306.05\(a\)](#).

## **1303.02 Examination of Collective Trademark and Collective Service Mark Applications**

The examination of applications to register collective trademarks and collective service marks is conducted in a manner similar to the examination of applications to register regular trademarks and service marks, using most of the same criteria of registrability. Thus, the same standards generally applicable to trademarks and service marks are used in considering issues such as descriptiveness or disclaimers. However, use and ownership requirements are slightly different due to the nature of collective marks. See [TMEP §§1303.02\(c\)](#) *et seq.* See [TMEP §§1304](#) *et seq.* regarding examination of applications to register collective membership marks.

### **1303.02(a) Classification of Goods and Services in Collective Trademark and Collective Service Mark Applications**

The goods and services recited in collective trademark and collective service mark applications are assigned to the same classes that are appropriate for those goods and services in general, according to the classification schedules set forth in 37 C.F.R. §§6.1 and 6.2. See [TMEP §§1401](#) *et seq.* regarding classification.

### **1303.02(b) Specimens of Use for Collective Trademark and Collective Service Mark Applications**

A specimen of use of a collective trademark or service mark should show use of the mark by a member on the member’s goods or in the sale or advertising of the member’s services. 37 C.F.R. §2.56(b)(3).

The specimen should show use of the mark to indicate that the party providing the goods or services is a member of a certain group. The manner of use required is similar to trademark or service mark use. For example, collective trademark specimens should show the mark used on the goods or packaging for the goods; collective service mark specimens should show the mark used in advertising for the services or in the rendering of the services.

The purpose of the mark must be to indicate that the product or service is provided by a member of a collective group. However, the specimen itself does not have to state that purpose explicitly. The examining attorney should accept the specimen if the mark is used on the specimen to indicate the source of the product or service, and there is no information in the record that is inconsistent with the applicant's averments that the mark is a collective mark owned by a collective group and used by members of the group.

### **1303.02(c) Special Elements of Collective Trademark and Collective Service Mark Applications**

#### **1303.02(c)(i) Manner of Control**

In addition to specifying and containing all elements that are applicable for trademarks, an application for registration of a collective mark under §1(a) of the Act must specify the class of persons entitled to use the mark, indicating their relationship to the applicant, and the nature of the applicant's control over the use of the mark. 37 C.F.R. §2.44(a).

In addition to specifying and containing all elements that are applicable for trademarks, an application for registration of a collective mark under §1(b), §44, or §66(a) of the Act must specify the class of persons intended to be entitled to use the mark, indicating what their relationship to the applicant will be, and the nature of the control the applicant intends to exercise over the use of the mark. *See* 37 C.F.R. §2.44(b).

The following language may be used for the above purpose:

Applicant controls (or, if the application is being filed under §1(b), §44, or §66(a), applicant intends to control) the use of the mark by the members in the following manner: [specify].

A statement that the applicant's bylaws or other written provisions specify the manner of control, or intended manner of control, will be sufficient.

#### **1303.02(c)(ii) Use by Members Indicated in Dates-of-Use Clause**

When setting out dates of use of a collective mark on goods or in connection with services, in either a §1(a) application or an allegation of use filed in connection with a §1(b) application, the applicant must state that the mark was first used by members (or a member) of the applicant.

### **1304 Collective Membership Marks**

#### **1304.01 History of Membership Marks**

Section 4 of the Trademark Act of 1946, 15 U.S.C. §1054, provides that collective marks shall be registrable by persons exercising legitimate control over their use, even though not possessing an industrial or commercial establishment, and the definition of a collective mark in §45, 15 U.S.C. §1127, encompasses marks that indicate membership in a union, association, or other organization.

The Trademark Act of 1905 prohibited registration by anyone of symbols of collective groups. The Act of 1946, however, contains no prohibition and thus permits registration by the owners of collective marks, including those used to indicate membership.

Membership marks are not trademarks or service marks in the ordinary sense; they are not used in business or trade, and they do not indicate commercial origin of goods or services. Registration of these marks fills the need of collective organizations who do not use the symbols of their organizations on goods or services but who wish to protect their marks to prevent their use by others. See *Ex parte Supreme Shrine of the Order of the White Shrine of Jerusalem*, 109 USPQ 248 (Comm'r Pats. 1956), regarding the rationale for registration of collective membership marks.

### **1304.02 Purpose of Membership Mark**

The sole purpose of a collective membership mark is to indicate that the user of the mark is a member of a particular organization. See *Constitution Party of Texas v. Constitution Ass'n USA*, 152 USPQ 443 (TTAB 1966) (holding cancellation of collective mark registration proper since mark was not being used to indicate membership in registrant).

### **1304.03 Use of Membership Mark Is by Members**

Registration of a membership mark is based on actual use of the mark by the members of a collective organization. The owner of the mark exercises control over the use of the mark; however, because the sole purpose of a membership mark is to indicate membership, use of the mark is by members. See *In re Triangle Club of Princeton University*, 138 USPQ 332 (TTAB 1963) (collective membership mark registration denied because specimen did not show use of mark by members). See also [TMEP §1304.08\(e\)](#).

Nothing in the Trademark Act prohibits the use of the same mark as a membership mark by members and, also, as a trademark or a service mark by the parent organization ( see [TMEP §1303.01](#)), but the same mark may not be used both as a membership mark and as a certification mark. [TMEP §1306.05\(a\)](#).

### **1304.04 Who May Apply to Register Membership Mark**

Application to register a membership mark must be made by the organization or person (including juristic persons) that controls or intends to control the use of the mark and, therefore, owns or is entitled to use the mark. 15 U.S.C. §1054; *In re Stencel Aero Engineering Corp.*, 170 USPQ 292 (TTAB 1971). Application may not be made by a mere member. Before a registration may be issued, however, the mark must have been used by members. See *American Speech-Language-Hearing Ass'n v. National Hearing Aid Society*, 224 USPQ 798, 806 (TTAB 1984); .

### **1304.05 Who May Own Membership Mark**

The owner of a collective membership mark is normally the collective organization whose members use the mark. The organization is usually an association, either incorporated or unincorporated, but is not limited to being an association and may have some other form.

A collective membership mark may be owned by someone other than the collective organization whose members use the mark, and the owner might not itself be a collective organization. An example is a business corporation who forms a club for persons meeting certain qualifications, and arranges to retain control of the group and of the mark used by the members of the group. The corporation that has retained control over

the use of the mark is the owner of the mark, and is entitled to apply to register the mark. *In re Stencel Aero Engineering Corp.*, 170 USPQ 292 (TTAB 1971).

### 1304.06 Nature of the Collective Group

Under the definition of “collective mark” in §45 of the Trademark Act, 15 U.S.C. §1127, only a “cooperative, an association or other collective group or organization” can become the owner of a collective mark. However, there is great variety in the organizational form of collective groups whose members use membership marks.

The terms “group” and “organization” are broad enough to cover all groups of persons who are brought together in an organized manner such as to justify their being called “collective.”

In order to apply to register a collective membership mark, the collective organization who owns the mark must be a person capable of suing and being sued in a court of law. *See* 15 U.S.C. §1127. *See* [TMEP §§803.01](#) *et seq.*

The persons who compose a collective group may be either natural or juristic persons.

### 1304.07 Character of the Mark

A collective membership mark may be a letter or letters, a word or words, a design alone, a name or nickname, or other matter that identifies the collective organization or indicates its purpose. A membership mark may, but need not, include the term “member” or the equivalent.

In addition to being printed (the most common form), a membership mark may consist of an object, such as a flag, or may be a part of articles of jewelry, such as pins or rings. *See* [TMEP §§1304.03](#) and [1304.08\(e\)](#) regarding use of membership marks and acceptable specimens.

### 1304.08 Examination of Collective Membership Mark

An application to register a collective membership mark on the Principal Register must meet all the criteria for registration of other marks on the Principal Register. 15 U.S.C. §1054. *See* 37 C.F.R. §2.46. Likewise, when determining the registrability of a collective membership mark on the Supplemental Register, the same standards are used as are applied to other types of marks. *See* 37 C.F.R. §2.47.

The examination of collective membership mark applications is conducted in the same manner as the examination of applications to register trademarks and service marks, using the same criteria of registrability.

Thus, the same standards generally applicable to trademarks and service marks are used in considering issues such as descriptiveness or disclaimers. *See* *Racine Industries Inc. v. Bane-Clene Corp.*, 35 USPQ2d 1832, 1837 (TTAB 1994); *In re Association of Energy Engineers, Inc.*, 227 USPQ 76, 77 (TTAB 1985). However, use and ownership requirements are slightly different due to the nature of collective membership marks.

#### 1304.08(a) Matter that Does Not Function as a Membership Mark

Whether matter functions as a collective membership mark is determined by the specimen and evidence of record. It is the use of the mark to indicate membership, rather than the character of the matter composing the mark, that determines whether a term or other designation is a collective membership mark. *See Ex parte Grand Chapter of Phi Sigma Kappa*, 118 USPQ 467 (Comm’r Pats. 1958), which held that Greek letter abbreviations are not collective membership marks indicating membership in Greek letter societies

simply because some people apply them to athletic jerseys, and *In re Mountain Fuel Supply Co.*, 154 USPQ 384 (TTAB 1967), which held that the design on a jewelry pin indicated longevity rather than membership in an organization. If a proposed mark does not function as a mark indicating membership, the examining attorney should refuse registration under §§1, 2, 4, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, 1054, and 1127. See [TMEP §1304.08\(a\)\(i\)](#) as to degrees or titles.

### **1304.08(a)(i) Degree or Title Designations Contrasted to Membership Marks**

Professional, technical, educational, and similar organizations often adopt letters or similar designations to be used by persons to indicate that the persons have passed certain tests or completed certain courses of instruction that are specified by the organization, or have demonstrated a degree of proficiency to the satisfaction of the organization. When such a symbol is used solely as a personal title or degree for an individual (i.e., it is used in a manner that identifies only a title or degree conferred on this individual), then it does not serve to indicate membership in an organization, and registration as a membership mark must be refused. *In re International Institute of Valuers*, 223 USPQ 350 (TTAB 1984) (registration properly refused where use of the mark on specimen indicated award of a degree or title, and not membership in collective entity). See also *In re National Society of Cardiopulmonary Technologists, Inc.*, 173 USPQ 511 (TTAB 1972). Cf. *In re Thacker*, 228 USPQ 961 (TTAB 1986); *In re National Ass'n of Purchasing Management*, 228 USPQ 768 (TTAB 1986); *In re Mortgage Bankers Ass'n of America*, 226 USPQ 954 (TTAB 1985).

If the proposed mark functions simply as a degree or title, the examining attorney should refuse registration under §§1, 2, 4, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, 1054, and 1127, on the ground that the matter does not function as a membership mark. See [TMEP §1304.08\(a\)](#).

### **1304.08(b) Likelihood of Confusion**

Likelihood of confusion may arise from the contemporaneous use of a collective membership mark on the one hand and a trademark or service mark on the other. The same standards used to determine likelihood of confusion between trademarks and service marks also apply to collective membership marks. See 15 U.S.C. §1052(d); *In re National Novice Hockey League, Inc.*, 222 USPQ 638 (TTAB 1984); *Allstate Life Ins. Co. v. Cuna Int'l, Inc.*, 169 USPQ 313 (TTAB 1971), *aff'd*, 487 F.2d 1407, 180 USPQ 48 (C.C.P.A. 1973); *Boise Cascade Corp. v. Mississippi Pine Manufacturers Assn.*, 164 USPQ 364 (TTAB 1969).

The finding of likelihood of confusion between a collective membership mark and a trademark or service mark is not based on confusion as to the source of any goods or services which happen to be provided by the members of the collective organization. Rather, the question is whether relevant persons are likely to believe that the trademark owner's goods or services emanate from, are endorsed by, or are in some way associated with the collective organization. *In re Code Consultants Inc.*, 60 USPQ2d 1699, 1701 (TTAB 2001).

### **1304.08(c) Classification in Membership Mark Applications**

*Section 1 and §44 Applications.* In applications under §§1 and 44 of the Trademark Act, collective membership marks are classified in Class 200. 37 C.F.R. §6.4. Class 200 was established as a result of the decision in *Ex parte Supreme Shrine of the Order of the White Shrine of Jerusalem*, 109 USPQ 248 (Comm'r Pats. 1956). Before this decision, there was no registration of membership insignia as such on the theory that all collective marks were either collective trademarks or collective service marks. Some marks that were actually membership marks were registered under the Act of 1946 as collective service marks, and a

few were registered as collective trademarks. That practice was discontinued upon the clarification of the basis for registration of membership marks and the creation of Class 200.

*Section 66(a) Applications.* In a §66(a) application (i.e., a request for extension of protection of an international registration to the United States under the Madrid Protocol), classification is determined by the International Bureau of the World Intellectual Property Organization (“IB”), in accordance with the *Nice Agreement Concerning the International Classification of Goods and Services for the Purposes of the Registration of Marks* (“*Nice Agreement*”). Class 200 comes from the old United States classification system ( see [TMEP §1401.02](#)) and is not included in the international classification system. In a §66(a) application, the international classification of goods/services cannot be changed from the classification given to the goods/services by the IB. See [TMEP §1401.03\(d\)](#). Accordingly, if the mark in a §66(a) application is identified as a collective membership mark, or appears to be a collective membership mark, the United States Patent and Trademark Office (“USPTO”) **will not** reclassify it into Class 200. However, the examining attorney must ensure that the applicant complies with all other United States requirements for collective membership marks, regardless of the classification chosen by the IB.

### **1304.08(d) Identifications in Membership Mark Applications**

An identification of goods or services is not appropriate in connection with a collective membership mark. The purpose of a collective membership mark is to indicate membership in an organization. Appropriate identification language would be, “indicating membership in an organization (association, club or the like) ...,” followed by a phrase indicating the nature of the organization or association, e.g., “indicating membership in an organization of computer professionals.”

The nature of an organization can be indicated by specifying the area of activity of its members (e.g., they may sell lumber, cosmetics, or food, or may deal in chemical products or household goods, or provide services as fashion designers, engineers, or accountants). If goods or services are not directly involved, the nature of an organization can be indicated by specifying the organization’s type or purpose (such as a service or social club, a political society, a trade association, a beneficial fraternal organization, or the like). Detailed descriptions of an organization’s objectives or activities are not necessary. It is sufficient if the identification indicates broadly either the field of activity as related to the goods or services, or the general type or purpose of the organization.

### **1304.08(e) Specimens of Use for Membership Marks**

The owner of a collective membership mark exercises control over the use of the mark but does not itself use the mark to indicate membership. Therefore, a proper specimen of use of a collective membership mark must show use by members to indicate membership in the collective organization. 37 C.F.R. §2.56(b)(4).

*In re International Ass’n for Enterostomal Therapy, Inc.*, 218 USPQ 343 (TTAB 1983); *In re Triangle Club of Princeton University*, 138 USPQ 332 (TTAB 1963). See also [TMEP §1304.03](#).

The most common type of specimen is a membership card. Membership certificates are also acceptable. The applicant may submit a blank or voided membership card or certificate.

For trade or professional associations, decals bearing the mark for use by members on doors or windows in their establishments, wall plaques bearing the mark, or decals or plates for use, e.g., on members’ vehicles, are satisfactory specimens. If the members are in business and place the mark on their business stationery to show their membership, pieces of such stationery are acceptable. Flags, pennants, and banners of various types used in connection with political parties, club groups, or the like could be satisfactory specimens.

Many associations, particularly fraternal societies, use jewelry such as pins, rings, or charms to indicate membership. See *In re Triangle Club of Princeton University*, *supra*. However, not every ornamental design on jewelry is necessarily an indication of membership. The record must show that the design on a piece of jewelry is actually an indication of membership before the jewelry can be accepted as a specimen of use. See *In re Institute for Certification of Computer Professionals*, 219 USPQ 372 (TTAB 1983) (in view of contradictory evidence in record, lapel pin with nothing more than CCP thereon was not considered evidence of membership); *In re Mountain Fuel Supply Co.*, 154 USPQ 384 (TTAB 1967) (design on pin did not indicate membership in organization, but merely showed length of service).

Shoulder, sleeve, pocket, or similar patches, whose design constitutes a membership mark and which are authorized by the parent organization for use by members on garments to indicate membership, are normally acceptable as specimens. Clothing authorized by the parent organization to be worn by members may also be an acceptable specimen.

A specimen that shows use of the mark by the collective organization itself, rather than by a member, is not acceptable. Collective organizations often publish various kinds of printed material, such as catalogs, directories, bulletins, newsletters, magazines, programs, and the like. Placement of the mark on these items by the collective organization represents use of the mark as a trademark or service mark to indicate that the collective organization is the source of the material. The mark is not placed on these items by the parent organization to indicate membership of a person in the organization.

### **1304.08(f) Special Elements of Applications for Collective Membership Marks**

#### **1304.08(f)(i) Exercise of Control**

An application to register a collective membership mark must accurately convey the use or intended use of the mark with appropriate language, as follows.

In an application based on use in commerce under §1(a) of the Trademark Act, the applicant must assert that the applicant is exercising legitimate control over the use of the mark in commerce by its members.

In an application based on §1(b), §44, or §66(a) of the Act, the applicant must assert that the applicant has a bona fide intention, and is entitled, to exercise legitimate control over the use of the mark in commerce by its members. In a §1(b) application, before the mark can register, the applicant must file an allegation of use alleging that the applicant is exercising legitimate control over the use of the mark in commerce by its members.

#### **1304.08(f)(ii) Manner of Control**

In addition to specifying and containing all elements that are applicable for trademarks, an application for registration of a collective mark under §1(a) of the Act must specify the class of persons entitled to use the mark, indicating their relationship to the applicant and the nature of the applicant's control over the use of the mark. 37 C.F.R. §2.44(a).

In addition to specifying and containing all elements that are applicable for trademarks, an application for registration of a collective mark under §1(b), §44, or §66(a) of the Act must specify the class of persons intended to be entitled to use the mark, indicating what their relationship to the applicant will be, and the nature of the control the applicant intends to exercise over the use of the mark. 37 C.F.R. §2.44(b).

The following language may be used for the above purpose:

Applicant controls (or, if the application is being filed under §1(b), §44, or §66(a), applicant intends to control) the use of the mark by the members in the following manner: [specify].

A statement that the applicant's bylaws or other written provisions specify the manner of control, or intended manner of control, will be sufficient.

### **1304.08(f)(iii) Use by Members Indicated in Dates-of-Use Clause**

When setting out dates of use of a collective membership mark, the application or allegation of use must state that the mark was first used by members of the applicant rather than by the applicant, and that the mark was first used on a specified date to indicate membership rather than first used on goods or in connection with services.

### **1305 Trademarks and Service Marks Used by Collective Organizations**

A collective organization may itself use trademarks and service marks to identify its goods and services, as opposed to collective trademarks and service marks or collective membership marks used by the collective's members. See *B.F. Goodrich Co. v. National Cooperatives, Inc.*, 114 USPQ 406 (Comm'r Pats. 1957) (mark used to identify tires made for applicant cooperative and sold by its distributors is a trademark, not a collective mark that identifies goods of applicant's associated organizations; applicant alone provides specifications and other instructions and applicant alone is responsible for faulty tires).

The examination of applications to register trademarks and service marks used or intended to be used by collective organizations is conducted in the same manner as for other trademarks and service marks, using the same criteria of registrability.

The form of the application used by collective organizations is the same as for those used or intended to be used by other applicants. The collective organization should be listed as the applicant, because it uses or intends to use the mark itself. The specimen submitted must be material applied by the collective organization to its goods or used in connection with its services.

### **1306 Certification Marks**

#### **1306.01 Definition of Certification Mark**

Section 4 of the Trademark Act, 15 U.S.C. §1054, provides for the registration of "certification marks, including indications of regional origin." Section 45 of the Trademark Act, 15 U.S.C. §1127, defines "certification mark" as follows:

The term "certification mark" means any word, name, symbol, or device, or any combination thereof--

- (1) used by a person other than its owner, or
- (2) which its owner has a bona fide intention to permit a person other than the owner to use in commerce and files an application to register on the principal register established by this [Act],

to certify regional or other origin, material, mode of manufacture, quality, accuracy, or other characteristics of such person's goods or services or that the work or labor on the goods or services was performed by members of a union or other organization.

A certification mark "is a special creature created for a purpose uniquely different from that of an ordinary service mark or trademark...." *In re Florida Citrus Commission*, 160 USPQ 495, 499 (TTAB 1968).

There are generally three types of certification marks. First, there are certification marks that certify that goods or services originate in a specific geographic region (e.g., ROQUEFORT for cheese). See *Community of Roquefort v. William Faehndrich, Inc.*, 303 F.2d 494, 133 USPQ 633 (2d Cir. 1962); *State of Florida, Department of Citrus v. Real Juices, Inc.*, 330 F. Supp. 428, 171 USPQ 66 (M.D. Fla. 1971) (SUNSHINE TREE for citrus from Florida); *Bureau Nat'l Interprofessionnel Du Cognac v. International Better Drinks Corp.*, 6 USPQ2d 1610 (TTAB 1988) (COGNAC for distilled brandy from a region in France). See [TMEP §§1306.02 et seq.](#)

Second, there are certification marks that certify that the goods or services meet certain standards in relation to quality, materials, or mode of manufacture (e.g., approval by Underwriters Laboratories). See *Midwest Plastic Fabricators Inc. v. Underwriters Laboratories Inc.*, 906 F.2d 1568, 15 USPQ2d 1359 (Fed. Cir. 1990) (UL certifies, among other things, representative samplings of electrical equipment meeting certain safety standards); *In re Celanese Corp. of America*, 136 USPQ 86 (TTAB 1962) (CELANESE certifies plastic toys meeting certifier's safety standards).

Third, certification marks may certify that the work or labor on the products or services was performed by a member of a union or other organization, or that the performer meets certain standards. See [TMEP §1306.03](#) and cases cited therein for further information.

There are two characteristics that differentiate certification marks from trademarks or service marks. First, a certification mark is not used by its owner and, second, a certification mark does not indicate commercial source or distinguish the goods or services of one person from those of another person. See [TMEP §1306.09\(a\)](#) for a discussion of the distinction between a certification mark and a collective trademark, collective service mark, or collective membership mark.

See *Holtzman, Certification Marks: An Overview*, 81 Trademark Rep. 180 (1991).

### **1306.01(a) Use Is by Person Other than Owner**

A certification mark may not be used, in the trademark sense of "used," by the owner of the mark; it may be used only by a person or persons other than the owner of the mark. That is, the owner of a certification mark does not apply the mark to his or her goods or services and, in fact, usually does not attach or apply the mark at all. The mark is generally applied by other persons to their goods or services, with authorization from the owner of the mark.

The owner of a certification mark does not produce the goods or perform the services in connection with which the mark is used, and thus does not control their nature and quality. Therefore, it is not appropriate to inquire about control over the nature and quality of the goods or services. What the owner of the certification mark does control is use of the mark by others on their goods or services. This control consists of taking steps to ensure that the mark is applied only to goods or services that contain the characteristics or meet the requirements that the certifier/owner has established or adopted for the certification. See [TMEP](#)

[§1306.06\(f\)\(ii\)](#) regarding submission of the standards established by the certifier to determine whether the certification mark may be used in relation to the goods and/or services of others.

### **1306.01(b) Purpose Is to Certify, Not to Indicate Source**

The purpose of a certification mark is to inform purchasers that the goods or services of a person possess certain characteristics or meet certain qualifications or standards established by another person. A certification mark does not indicate origin in a single commercial or proprietary source. In certifying, the same mark is used on the goods or services of many different producers.

The message conveyed by a certification mark is that the goods or services have been examined, tested, inspected, or in some way checked by a person who is not their producer, using methods determined by the certifier/owner. The placing of the mark on goods, or its use in connection with services, thus constitutes a certification by someone other than the producer that the prescribed characteristics or qualifications of the certifier for those goods or services have been met.

### **1306.02 Certification Marks that Are Indications of Regional Origin**

A geographical term may be used, either alone or as a portion of a composite mark, to certify that the goods originate in the geographical region identified by the term or, in some circumstances, from a broader region that includes the region identified by the term. See [TMEP §1306.02\(a\)](#). As noted in *Community of Roquefort v. William Faehndrich, Inc.*, 303 F.2d 494, 497, 133 USPQ 633, 635 (2d Cir. 1962):

A geographical name does not require a secondary meaning in order to qualify for registration as a certification mark. It is true that section 1054 provides that certification marks are “subject to the provisions relating to the registration of trademarks, so far as they are applicable....” But section 1052(e)(2), which prohibits registration of names primarily geographically descriptive, specifically excepts “indications of regional origin” registrable under section 1054. Therefore, a geographical name may be registered as a certification mark even though it is primarily geographically descriptive.

When a geographical term is used in a composite certification mark to certify regional origin, the examining attorney should not require a disclaimer or refuse registration of the composite mark on the ground that the mark is primarily geographically descriptive. However, when a geographical term used in a composite certification mark is not used to certify regional origin (e.g., “California” used to certify that fruit is organically grown), the examining attorney should refuse registration or require a disclaimer, as appropriate.

Marks that may be used to certify regional origin are not necessarily limited to terms that comprise precise geographical terminology. A distortion of a geographical term, an abbreviation of a geographical term, or a combination of geographical terms can be used as, or in, a certification mark indicating regional origin.

It is also possible for a term that is not technically geographical to have significance as an indication of origin solely in a particular region.

The issue in determining whether a designation is registrable as a regional certification mark is whether the public understands that goods bearing the mark come only from the region named in the mark, not whether the public is expressly aware of the certification function of the mark per se. If use of the designation in fact is controlled by the certifier and limited to products meeting the certifier’s standards of regional origin, and if purchasers understand the designation to refer only to products produced in the particular region and not to products produced elsewhere, then the designation functions as a regional certification mark. *Institut Nat’l Des Appellations D’Origine v. Brown-Forman Corp.*, 47 USPQ2d 1875 (TTAB 1998).

A mark that is geographically deceptive may not be registered as a certification mark of regional origin. See [TMEP §§1210.05](#) *et seq.* regarding geographically deceptive marks.

### **1306.02(a) Indicating the Region**

The examining attorney should examine the specimen of use and evidence in the record to determine whether the geographical term is being used as a certification mark to indicate the regional origin of the goods upon which it is used. If the record or other evidence available to the examining attorney indicates that the proposed mark has a principal significance as a generic term denoting a type of goods, registration should be refused. *In re Cooperativa Produttori Latte E Fontina Valle D'Acosta*, 230 USPQ 131 (TTAB 1986) (FONTINA held a generic name of a type of cheese rather than a certification mark indicating regional origin, in view of the fact that non-certified producers outside that region use the term to identify non-certified cheeses). However, a certification mark used to certify regional origin will be deemed to have become a generic term as applied to particular goods only if it has lost its significance as an indication of regional origin of those goods. *See Tea Board of India v. The Republic of Tea, Inc.*, 80 USPQ2d 1881 (TTAB 2006) (applicant failed to establish that the term DARJEELING had become generic due to opposer's alleged failure to control the use of the mark to certify origin in the Darjeeling region of India), and cases cited therein. The basis for refusal of registration on the Principal Register is 15 U.S.C. §§1052(e)(1), 1054, and 1127, and the basis for refusal of registration on the Supplemental Register is 15 U.S.C. §§1054, 1091, and 1127 ( *see* [TMEP §§1209.02](#) *et seq.*).

When a geographic term is being used as a certification mark to indicate regional origin, the application should define the regional origin that the mark certifies. The defined region in the certification statement should be limited to the place named in the mark if the named place is famous as a source of the goods or the goods are a principal product of that place.

The defined region in the certification statement may be broader than the place named in the mark as long as the place named in the mark is within the larger defined region and there is no evidence that it is famous as a source of the goods or they are a principal product of the place. If there is evidence that the narrower geographic area named in the mark is famous for the goods or they are a principal product of that place, and by virtue of the broader region identified in the certification statement the goods may not originate in the geographic location named in the mark, the examining attorney must refuse registration of the mark as geographically deceptive under §2(e)(3) of the Trademark Act. *See* §§1210.05-1210.05(e).

### **1306.02(b) Authority to Control a Geographical Term**

When a certification mark consists solely, or essentially, of a geographical term, the examining attorney should inquire as to the authority of the applicant to control the use of the term, if the authority is not obvious. Normally, the entity that has authority to exercise control over the use of a geographical term as a certification mark is a governmental body or a body operating with governmental authorization. The right that a private person can acquire in a geographical term is usually a trademark right, on the basis of exclusive use resulting in the term becoming distinctive of that person's goods. When, however, circumstances make it desirable or necessary for many or all persons in a region to use the name of the region to indicate the origin of their goods, there would be no opportunity for the name to become distinctive for only one person. The term would be used by all persons in the region, not as a trademark indicating commercial origin, but as a certification mark indicating regional origin.

When a geographical term is used as a certification mark, two elements are of basic concern: first, preserving the freedom of all persons in the region to use the term and; second, preventing abuses or illegal uses of the

mark that would be detrimental to all those entitled to use the mark. Normally, a private individual is not in the best position to fulfill these objectives. The government of a region would be the logical authority to control the use of the name of the region. The government, either directly or through a body to which it has given authority, would have power to preserve the right of all persons entitled to use the mark and to prevent abuse or illegal use of the mark.

### **1306.02(c) A Government Entity as Applicant for a Geographical Certification Mark**

The applicant may be the government itself (such as the government of the United States, a state, or a city), one of the departments of a government, or a body operating with governmental authorization that is not formally a part of the government. There may be an interrelationship between bodies in more than one of these categories and the decision as to which is the appropriate body to apply depends on which body actually conducts the certification program or is most directly associated with it. The examining attorney should not question the identity of the applicant, unless the record indicates that the entity identified as the applicant is not the certifier.

### **1306.03 Certification Marks Certifying that Labor Was Performed by Specific Group or Individual**

A certification mark may be used to certify that the work or labor on the goods or services was performed by a member of a union or other organization, or by a person who meets certain standards and tests of competency set by the certifier. 15 U.S.C. §1127. The certifier does not certify the quality of the work being performed, but only that the work was performed by a member of the union or group, or by someone who meets certain standards. *In re National Institute for Automotive Service Excellence*, 218 USPQ 744, 747 (TTAB 1983). *See also American Speech-Language-Hearing Ass'n v. National Hearing Aid Society*, 224 USPQ 798 (TTAB 1984). Used in this manner, the mark certifies a characteristic of the goods or services. Whether or not specific matter functions as a certification mark depends on whether the matter is used in connection with the goods or services in such a manner that the purchasing public will recognize it, either consciously or otherwise, as a certification mark.

Occasionally, it is not clear whether a term is being used to certify that work or labor relating to the goods or services was performed by someone meeting certain standards or by members of a union or other organization to indicate membership, or whether the term is merely being used as a title or a degree of the performer to indicate professional qualifications. Matter that might appear to be simply a title or a degree may function as a certification mark if used in the proper manner. *See In re Council on Certification of Nurse Anesthetists*, 85 USPQ2d 1403 (TTAB 2007) (CRNA functions as certification mark used to certify that anesthesia services are being performed by a person who meets certain standards and tests of competency); *In re Software Publishers Ass'n*, 69 USPQ2d 2009 (TTAB 2003) (CERTIFIED SOFTWARE MANAGER used on certificate merely indicates that holder of the certificate has been awarded a title or degree, and is not likely to be perceived as certification mark); *In re National Ass'n of Purchasing Management*, 228 USPQ 768 (TTAB 1986) (C.P.M. used merely as title or degree, not as certification mark); *In re National Ass'n of Legal Secretaries (Int'l)*, 221 USPQ 50 (TTAB 1983) (PROFESSIONAL LEGAL SECRETARY not used on the specimen in such a way as to indicate certification significance); *In re National Institute for Automotive Service Excellence*, supra (design mark not used simply as a degree or title, but to certify that the performer of the services had met certain standards); *In re Institute of Certified Professional Business Consultants*, 216 USPQ 338 (TTAB 1982) (CPBC not used as a certification mark for business consulting services, but only as a title or degree); *In re Professional Photographers of Ohio, Inc.*, 149 USPQ 857 (TTAB 1966) (CERTIFIED PROFESSIONAL PHOTOGRAPHER used only as the title of a person, not as a certification mark). *Cf. In re University of Mississippi*, 1 USPQ2d 1909 (TTAB 1987) (use of university seal on diplomas did not represent use as a certification mark).

See [TMEP §1306.09\(a\)](#) regarding the difference between a certification mark and a collective mark.

### 1306.04 Ownership of Certification Marks

The owner of a certification mark is the party responsible for the certification that is conveyed by the mark. The party who affixes the mark, with authorization of the certifier, does not own the mark; nor is the mark owned by someone who merely acts as an agent for the certifier, for example, an inspector hired by the certifier. The certifier, as owner, is the only person who may file an application for registration of a certification mark. See *In re Safe Electrical Cord Committee*, 125 USPQ 310 (TTAB 1960).

Certification is often the sole activity for the owner of a certification mark. However, a person is not necessarily precluded from owning a certification mark because he or she also engages in other activities, including the sale of goods or the performance of services. However, the certification mark may not be the same mark that the person uses as a trademark or service mark on goods or services. See [TMEP §1306.05\(a\)](#).

Examples of organizations which conduct both types of activities are trade associations and other membership or “club” types of businesses, such as automobile associations. These organizations may perform services for their members, and sell various goods to their members and others, as well as conduct programs in which they certify characteristics or other aspects of goods or services, especially of kinds which relate to the main purpose of the association.

Manufacturing or service companies that do not certify the goods or services of members may nonetheless engage in certification programs under proper circumstances. For example, a manufacturer of chemical wood preservatives might conduct a program certifying certain characteristics of wood or wood products that are treated and sold by others. Among the characteristics or circumstances certified could be the fact that a preservative produced by this manufacturer under a specified trademark was used in the treatment.

As another example, a magazine publisher may conduct a certification program relating to goods or services that are advertised in or have some relevance to the interest area of the magazine.

The certifier/owner determines the requirements for the certification. The standards do not have to be original with the certifier/owner, but may be standards established by another person, such as specifications promulgated by a government agency, or standards developed through research of a private research organization. See [TMEP §1306.06\(f\)\(ii\)](#) regarding the standards for certification. However, if the name of the organization that developed the standards is part of the mark, an issue could arise as to whether the mark is deceptively misdescriptive under 15 U.S.C. §1052(e)(1) ( see [TMEP §1209.04](#)) or falsely suggests a connection with persons, institutions, beliefs, or national symbols under 15 U.S.C. §1052(a) ( see [TMEP §1203.03\(e\)](#)).

### 1306.05 Characteristics of Certification Marks

The Trademark Act does not require that a certification mark be in any specific form or include any specific wording. A certification mark can be wording only, design only, or a combination of wording and design. In other words, there is no particular way that a mark must look in order to be a certification mark.

A certification mark often includes wording such as “approved by,” “inspected,” “conforming to,” “certified,” or similar wording, which is natural since certification (or approval) is practically the only significance the mark is to have when it is used on goods or in connection with services. However, this wording is not required, and a mark that entirely lacks this wording can perform the function of certification.

The examining attorney must look to the facts disclosed in the record to determine whether the mark is used in certification activity and is in fact a certification mark.

It is not necessary to show that the mark is instantly recognizable as a certification mark, or that the mark has already become well known to the public as a certification mark. However, it should be clear from the record that the circumstances surrounding the use or promotion of the mark will give certification significance to the mark in the marketplace. *See Ex parte Van Winkle*, 117 USPQ 450 (Comm'r Pats. 1958).

### **1306.05(a) Same Mark Not Registrable as Certification Mark and as Any Other Type of Mark**

Trademarks or service marks and certification marks are different and distinct types of marks, which serve different purposes. A trademark or service mark is used by the owner of the mark on his or her goods or services, whereas a certification mark is used by persons other than the owner of the mark. A certification mark does not distinguish between producers, but represents a certification regarding some characteristic that is common to the goods or services of many persons. Using the same mark for two contradictory purposes would result in confusion and uncertainty about the meaning of the mark and would invalidate the mark for either purpose.

Section 4 of the Trademark Act, 15 U.S.C. §1054, prohibits the registration of a certification mark “when used so as to represent falsely that the owner or a user thereof makes or sells the goods or performs the services on or in connection with which such mark is used;” and §14(5)(B) of the Act, 15 U.S.C. §1064(5)(B), provides for the cancellation of a registered certification mark where the registrant engages in the production or marketing of any goods or services to which the certification mark is applied. *See [TMEP §1306.07](#)* regarding §14(5) of the Act. Thus, if a party owns a registration as a trademark or service mark for any goods or services, he or she may not register the same mark as a certification mark for those goods or services. Conversely, a registration as a certification mark precludes registration of the same mark by its owner as a trademark or service mark for any goods or services to which the certification mark applies. The owner of a certification mark may seek registration of the same mark as a trademark or service mark for goods or services other than those to which the certification mark is applied. However, the application for a certification mark must be filed separately from the application for a trademark or service mark, because the purpose and use of a trademark or service mark differ from those of a certification mark as do the allegations and claims made in support of a certification mark.

The prohibition against registration both as a trademark or service mark and as a certification mark applies to marks that are identical or so similar as to constitute essentially the same mark. Variations in wording or design, even though small, can, if meaningful, create different marks. On the other hand, inconsequential differences, such as the style of lettering or the addition of wording of little importance, normally would not prevent marks from being regarded as the same. *See In re 88Open Consortium Ltd.*, 28 USPQ2d 1314 (TTAB 1993), in which the mark 88OPEN COMPATIBILITY CERTIFIED and design was found registrable as a certification mark even though applicant owned six registrations for the marks 88OPEN in typed and stylized form as trademarks, service marks, and collective membership marks. The Board noted that the words COMPATIBILITY CERTIFIED served to inform those seeing the mark that it is functioning as a

certification mark, and that the certification mark included a design feature not found in the previously registered marks. *See also* TMEP §§[1306.04](#), [1306.06\(c\)](#), and [1306.09](#).

### **1306.05(b) Cancellation of Applicant's Prior Registration Required by Change from Certification Mark Use to Trademark or Service Mark Use, or Vice Versa**

The nature of the activity in which the mark is used or intended to be used may change from use to certify characteristics of goods or services to use on the party's own goods or services, or on goods or services produced for the party by related companies. The change might also be the other way around, from trademark or service mark use to certification mark use.

If there is already a registration as one type of mark and the registrant files an application for registration of the mark as the other type, the applicant must surrender the previous registration under §7(e) of the Trademark Act, 15 U.S.C. §1057(e), before the examining attorney approves the new application for publication for opposition or issuance of a registration on the Supplemental Register. *See* 37 C.F.R. §2.172 and [TMEP §1608](#) regarding surrender. The registration certificate for the new application should not issue until the prior registration actually has been cancelled.

In examining the new application, the examining attorney must carefully review the application to ensure that the facts of record support the new application.

### **1306.06 Examination of Certification Mark Applications**

Except where otherwise specified herein, the same standards are used to determine the registrability of certification marks that are used for other types of marks. Thus, the standards generally applicable to trademarks and service marks are used in considering issues such as descriptiveness, disclaimers, and likelihood of confusion. (But see [TMEP §§1306.02](#) *et seq.* regarding certification marks indicating regional origin only.)

Regarding the application of §2(e) of the Trademark Act, 15 U.S.C. §1052(e), to certification marks, *see Community of Roquefort v. Santo*, 443 F.2d 1196, 170 USPQ 205 (C.C.P.A. 1971); *In re National Ass'n of Legal Secretaries (Int'l)*, 221 USPQ 50 (TTAB 1983).

Regarding the application of §2(d), 15 U.S.C. §1052(d), the test for determining likelihood of confusion is the same for certification marks – the *du Pont* analysis. *In re Accelerate s.a.l.*, 101 USPQ2d 2047, 2049 (TTAB 2012) (quoting *Motion Picture Ass'n of Am., Inc. v. Respect Sportswear, Inc.*, 83 USPQ2d 1555, 1559-60 (TTAB 2007)); *see In re E. I. du Pont de Nemours & Co.*, 476 F.2d 1357, 1361, 177 USPQ 563, 567 (C.C.P.A. 1973); *see also Procter & Gamble Co. v. Cohen*, 375 F.2d 494, 153 USPQ 188 (C.C.P.A. 1967); *Tea Bd. of India v. Republic of Tea, Inc.*, 80 USPQ2d 1881 (TTAB 2006); *Stabilisierungsfonds fur Wein v. Peter Meyer Winery GmbH*, 9 USPQ2d 1073 (TTAB 1988); *E.I. duPont de Nemours & Co. v. Yoshida Int'l, Inc.*, 393 F. Supp. 502, 185 USPQ 597 (E.D.N.Y. 1975).

However, because a certification mark owner does not use the mark itself, the likelihood-of-confusion analysis is based on a comparison of the mark as applied to the goods and/or services of the certification mark users, including the channels of trade and classes of purchasers. *In re Accelerate s.a.l.*, 101 USPQ2d at 2049 (quoting *Motion Picture Ass'n of Am. Inc. v. Respect Sportswear, Inc.*, 83 USPQ2d at 1559-60); *see also Jos. S. Cohen & Sons Co. v. Hearst Magazines, Inc.*, 220 F.2d 763, 765, 105 USPQ 269, 271 (C.C.P.A. 1955).

A refusal to register because the subject matter does not function as a certification mark is predicated on §§1, 2, 4, and 45 of the Trademark Act, 15 U.S.C. §§1051, 1052, 1054, and 1127. For example, educational or other degrees or titles awarded to individuals, and used only as personal titles or degrees, are not certification marks. So used, titles and degrees indicate qualifications or attainments of the person; they do not pertain to or certify services that have been performed by the person. See [TMEP §1306.03](#).

### **1306.06(a) The Mark on the Drawing**

The drawing in the application must include the entire certification mark, but it should not include anything that is not part of the mark. The examining attorney must refer to the specimen to determine what constitutes the mark. See *In re National Institute for Automotive Service Excellence*, 218 USPQ 744 (TTAB 1983).

In evaluating the drawing, the same standards used in relation to trademark and service mark drawings apply to certification marks ( see [TMEP §§807 et seq.](#)).

### **1306.06(b) Specimens of Use for Certification Marks**

A certification mark specimen must show how a person other than the owner uses the mark to certify regional or other origin, material, mode of manufacture, quality, accuracy, or other characteristics of that person's goods or services; or that members of a union or other organization performed the work or labor on the goods or services. 37 C.F.R. §2.56(b)(5). See *In re Council on Certification of Nurse Anesthetists*, 85 USPQ2d 1403 (TTAB 2007).

Although a certification mark performs a different function from a trademark or a service mark, it is used in a manner analogous to that of a trademark or a service mark (i.e., on a label, tag, or container for the goods, a display associated with the goods, or in the performance or advertising of services). Thus, materials that bear the mark, and are actually attached or applied to the goods or used in relation to the services by the persons authorized to use the mark, constitute proper specimens.

Sometimes, the owner/certifier prepares tags or labels that bear the certification mark and that are supplied to the authorized users to attach to their goods or use in relation to their services. See *Ex parte Porcelain Enamel Institute, Inc.*, 110 USPQ 258 (Comm'r Pats. 1956). These tags or labels are acceptable specimens.

The same standards used to evaluate the acceptability of trademark and service mark specimens also apply to certification marks. See [TMEP §§904 et seq.](#)

### **1306.06(c) Relation Between Certification Mark and Trademark or Service Mark on Specimens**

It is customary for trademarks or service marks to be placed on goods or used with services in conjunction with certification marks. However, it is also possible for a certification mark to be the only mark used on goods or with services. Some producers market their goods or services without using a trademark or service mark, yet these producers may be authorized to use a certification mark and, as a result, the certification mark would be the only mark on the goods or services. In these situations, the significance of the mark might not be readily apparent and the examining attorney should request an explanation of the circumstances to ascertain whether the mark is a certification mark rather than a trademark or service mark. See also [TMEP §1306.09](#).

When a trademark or a service mark appears on the specimen in addition to a certification mark, the certification mark can be on a separate label, or can be included on a single label along with the user's own trademark or service mark.

A composite certification mark may include a trademark or service mark, provided the composite mark functions to certify, with the trademark or service mark serving only to inform, or to suggest the certification program, rather than to indicate origin of the goods or services with which the mark is used. These situations usually are created when a company that produces goods or performs services wants to develop a program and a mark to certify characteristics of the goods or services of others that are related to the producer's own goods or services. See the examples in [TMEP §1306.04](#).

The trademark or service mark must be owned by the same person who owns the certification mark. A party may not include the trademark or service mark of another in a certification mark, even with a disclaimer. If the examining attorney believes that a trademark or service mark included in a certification mark is owned by another, the examining attorney should refuse registration of the certification mark.

### **1306.06(d) Classification of Goods and Services in Certification Mark Applications**

#### *Section 1 and §44 Applications*

In applications to register certification marks, all goods are classified in Class A and all services are classified in Class B. 37 C.F.R. §6.3. Both Classes A and B (but not any other classes) may be included in one application. See [TMEP §§1403](#) *et seq.* regarding multiple-class applications.

NOTE: When the Trademark Act of 1946 went into effect, the goods and services for which certification marks were registered were classified in the regular classes for goods and services. It was later concluded that this was not reasonable, because a certification mark is commonly used on a great variety of goods and services, and the specialized purpose of these marks makes it unrealistic to divide the goods and services into the competitive groups that the regular classes represent. The change to classification in Classes A and B for certification marks was made by amendment of the Trademark Rules on August 15, 1955.

#### *Section 66(a) Applications*

In a §66(a) application, classification is determined by the IB, in accordance with the *Nice Agreement*. Classes A and B come from the old United States classification system ( see [TMEP §1401.02](#)) and are not included in the international classification system. In a §66(a) application, the international classification of goods/services cannot be changed from the classification given to the goods/services by the IB. See [TMEP §1401.03\(d\)](#). Accordingly, if the mark in a §66(a) application is identified as a certification mark, or appears to be a certification mark, the USPTO will not reclassify it into Class A or B. However, the examining attorney must ensure that the applicant complies with all other United States requirements for certification marks, regardless of the classification chosen by the IB.

### **1306.06(e) Identification of Goods and Services in Certification Mark Applications**

The identification of goods or services in a certification mark application must describe the goods and/or services of the party who will receive the certification, not the activities of the certifier/owner of the certification mark. This is consistent with the requirement that the owner of a certification mark not produce the goods or perform the services in connection with which the mark is used. The certification activities of

the certifier are described in the certification statement, not in the identification of goods/services. For an explanation of the certification statement, *see* [TMEP §1306.06\(f\)\(i\)](#).

In a certification mark application, the goods or services that are certified may be identified less specifically than in an application for registration of a trademark or service mark. Ordinarily, it is only necessary to indicate general kinds of goods and services, such as food, agricultural commodities, electrical products, textile materials, printed material, insurance agency services, machinery repair, or restaurant services.

However, sufficient information must be provided to enable a comparison of goods/services and analysis of trade channels in regard to possible likelihood-of-confusion scenarios. If the certification program itself is limited to specific goods or services, for example, wine, wood doors, or bakery machinery, then the identification in the application must also reflect this limitation.

The terms “certification,” “certify,” or “certifies” should not be included in the identification, which should be limited to the goods or services, as in the following examples:

Building, construction, and safety materials and products, in International Class A

Medical services in the field of addiction medicine and treatment, in International Class B

## **1306.06(f) Special Elements of Certification Mark Applications**

### **1306.06(f)(i) Statement of What the Mark Certifies**

The application must contain a statement of the characteristic, standard, or other feature that is certified or intended to be certified by the mark. The statement should begin with wording, “The certification mark, as used (or intended to be used) by authorized persons, certifies (or is intended to certify) . . . .” *See* 37 C.F.R. §2.45.

All of the characteristics or features that the mark certifies should be included. A mark does not have to be limited to certifying a single characteristic or feature.

The characteristics or features that the mark certifies should be explained in reasonable detail, so that they are clear. The broad suggestive terms of the statute, such as quality, material, mode of manufacture, are generally not satisfactory by themselves, because they do not accurately reveal the nature of the certification.

How specific the statement should be depends in part on the narrowness or breadth of the certification. For example, “quality” would not inform the public of the meaning of the certification where the characteristic being certified is limited, for example, to the strength of a material, or the purity of a strain of seed.

The statement of certification in the application is printed on the registration certificate. For that reason, it should be reasonably specific but does not have to include the details of the specifications of the characteristic being certified. If practicable, however, more detailed specifications should be made part of the application file record.

The statement of what the mark certifies is separate from the identification of goods and/or services.

### **1306.06(f)(ii) Standards**

The applicant (certifier) must submit a copy of the standards established to determine whether others may use the certification mark on their goods and/or in connection with their services. 37 C.F.R. §2.45. For an intent-to-use application, under §1(b) of the Act, 15 U.S.C. §1051(b), the standards are submitted with the allegation of use (i.e., either the amendment to allege use or the statement of use). 37 C.F.R. §2.45(b).

The standards do not have to be original with the applicant. They may be standards established by another party, such as specifications promulgated by a government agency, or standards developed through research of a private research organization.

The standards must cover the full scope of the goods/services identified in the application. For example, if the goods are “olive oil,” but the standards are only for “extra virgin olive oil,” the examining attorney must require the applicant to submit standards that cover all types of olive oil or to amend the identification to “extra virgin olive oil.”

### **1306.06(f)(iii) Exercise of Control**

In an application based on use in commerce under §1(a) of the Trademark Act, the applicant must assert that the applicant is exercising legitimate control over the use of the certification mark in commerce. 37 C.F.R. §2.45(a).

In an application based on §1(b), §44, or §66(a) of the Act, the applicant must assert that the applicant has a bona fide intention, and is entitled, to exercise legitimate control over the use of the certification mark in commerce. *See* 37 C.F.R. §2.45(b). In a §1(b) application, before the mark can register, the applicant must file an allegation of use under 15 U.S.C. §1051(c) or 15 U.S.C. §1051(d), alleging that the applicant is exercising legitimate control over the use of the certification mark in commerce.

If there is doubt as to the existence or nature of such control by the applicant, the examining attorney should require an explanation and sufficient disclosure of facts, or the filing of appropriate documents, to support the applicant’s statement regarding the exercise of control over the use of the mark, pursuant to 37 C.F.R. §2.61(b).

### **1306.06(f)(iv) Use by Others Indicated in Dates-of-Use Clause**

When specifying the dates of first use, the applicant must indicate that the certification mark was first used under the authority of the applicant, or by persons authorized by the applicant, because a certification mark is not used by the applicant itself.

### **1306.06(f)(v) Statement that Mark is Not Used by Applicant**

The application must contain a statement that the applicant is not engaged in (or, if the application is filed under §1(b), §44, or §66(a) of the Act, will not engage in) the production or marketing of the goods or

services to which the mark is applied. *See* 37 C.F.R. §2.45. This statement does not have to be verified, and can, therefore, be entered by examiner's amendment.

### **1306.06(f)(vi) Amendment to Different Type of Mark**

If an application is filed to register a mark as a certification mark and the mark is actually another type of mark, or if an application is filed to register a mark as another type when it is actually a certification mark, the application may be amended to request registration as the proper type of mark. It is preferred that the applicant completely rewrite the application to provide a clean copy, rather than amend the original documents. Also, the application should be re-executed because some essential allegations differ for the different types of marks.

Applications for certification marks, collective marks, and collective membership marks cannot be filed using TEAS Plus. 37 C.F.R. §2.22(c). Therefore, in a TEAS Plus application, an additional TEAS Plus processing fee will be required if the mark is amended to a collective, collective membership, or certification mark. *See* [TMEP §819.01\(a\)](#).

### **1306.07 Relationship of §14 (Cancellation) to Examination of Certification Mark Applications**

*15 U.S.C. §1064 (Extract) Cancellation.*

A petition to cancel a registration of a mark, stating the grounds relied upon, may, upon payment of the prescribed fee, be filed as follows by any person who believes that he is or will be damaged, including as a result of a likelihood of dilution by blurring or dilution by tarnishment under section 1125(c) of this title, by the registration of a mark on the principal register established by this [Act], or under the Act of March 3, 1881, or the Act of February 20, 1905....

...

(5) At any time in the case of a certification mark on the ground that the registrant (A) does not control, or is not able legitimately to exercise control over, the use of such mark, or (B) engages in the production or marketing of any goods or services to which the certification mark is applied, or (C) permits the use of the certification mark for purposes other than to certify, or (D) discriminately refuses to certify or to continue to certify the goods or services of any person who maintains the standards or conditions which such mark certifies....

...

Nothing in paragraph (5) shall be deemed to prohibit the registrant from using its certification mark in advertising or promoting recognition of the certification program or of the goods or services meeting the certification standards of the registrant. Such uses of the certification mark shall not be grounds for cancellation under paragraph (5), so long as the registrant does not itself produce, manufacture, or sell any of the certified goods or services to which its identical certification mark is applied.

Section 14 of the Trademark Act, 15 U.S.C. §1064, provides for petitions to cancel registrations. Subsection (5) lists specific circumstances when petitions to cancel certification marks may be filed. The provisions of §14(5) are applicable in ex parte examination as follows:

*Subsection A:* In an application, the applicant states under oath or declaration that the applicant is exercising, or has a bona fide intention to exercise, legitimate control over the use of the certification mark. [TMEP §1306.06\(f\)\(iii\)](#). Such statement is accepted, unless the examining attorney has knowledge of facts indicating that it should not be accepted.

*Subsection B:* The applicant is required to state, as appropriate, that he or she is not engaged in, or will not engage in, the production or marketing of any goods or services to which the certification mark is applied. [TMEP §1306.06\(f\)\(v\)](#). Such statement is accepted, unless the examining attorney has knowledge of facts indicating the contrary.

*Subsection C:* This subsection concerns whether a party permits use of the certification mark for purposes other than to certify. No statements are required in the application specifically on this point.

The existence of unauthorized or illegal uses by others without the applicant's authorization is not within the examining attorney's province and cannot be used as a basis for refusal to register, provided that use authorized by the applicant, as supported by the record, is proper certification use.

*Subsection D:* This subsection relates to the obligation of the owner not to discriminately refuse to certify. This subject is not mentioned in §4 or §45, 15 U.S.C. §1054 or §1127. The Office has never undertaken to evaluate, in ex parte examination, whether the standards or characteristics which the mark certifies, as set out by the applicant, are discriminatory per se; nor is it in the province of ex parte procedure to investigate or police how the certification is practiced.

### **1306.08 Registration of Certification Mark on Basis of Foreign Registration**

A certification mark may be registered in the United States under §44 of the Trademark Act, on the basis of a foreign registration. However, whether a particular foreign registration is acceptable as the basis for a United States registration depends on the scope of the foreign registration.

A person may not obtain a registration in the United States that is broader in scope than the foreign registration on which the United States application is based. See *In re Löwenbräu München*, 175 USPQ 178 (TTAB 1972); [TMEP §1402.01\(b\)](#). Therefore, a registration as a certification mark in the United States may not be based on a foreign registration that is actually a trademark registration, i.e., a registration that is based on the registrant's placement of the mark on his or her own goods as a trademark. The scope of the registration, i.e., the nature of the registration right, would not be the same.

The scope and nature of the registration right is not always immediately apparent from a foreign registration certificate. Foreign registration certificates are not always labeled as pertaining to a trademark, service mark, collective mark, or certification mark and, when they are labeled, the significance of the term is not always clear. For example, the designation "collective" represents a different concept in some foreign countries than it does in the United States. Moreover, while a certificate printed on a standardized form may be headed with the designation "trademark," the body of the certificate might contain language to the contrary.

Since certification is an exception in the larger world of trademarks, an indication of certification in the registration certificate would normally represent a conscious decision that a certification situation exists. Therefore, if a foreign registration certificate has a heading that designates the mark as a certification mark, or if the body of the foreign certificate contains language indicating that the registration is for certification, the foreign registration normally may be accepted to support registration in the United States as a certification mark.

Whenever there is ambiguity about the scope or nature of the foreign registration, or whenever the examining attorney believes that the foreign certificate may not reflect the actual registration right, the examining attorney should inquire regarding the basis of the foreign registration, pursuant to 37 C.F.R. 2.61(b).

### **1306.09 Uncertainty Regarding Type of Mark**

When the facts in the application are insufficient to provide an adequate basis for determining whether the mark is functioning as a trademark or service mark or as a certification mark, the examining attorney should ask for further explanation as to the activities in which the mark is used and should require a sufficient disclosure of the facts to enable a proper examination to be made, pursuant to 37 C.F.R. §2.61(b). The manner in which the activities associated with a mark are conducted is the main factor that determines the

type of mark. The conduct of parties involved with the mark evidences the relationship between the parties, and the responsibilities of each to the goods or services and to the mark.

### **1306.09(a) Distinction Between Certification Mark and Collective Mark**

A collective trademark or collective service mark indicates origin of goods or services in the members of a group. A collective membership mark indicates membership in an organization. A certification mark certifies characteristics or features of goods or services. See *American Speech-Language-Hearing Ass'n v. National Hearing Aid Society*, 224 USPQ 798, 806-808 (TTAB 1984), for a discussion of the distinction between collective marks and certification marks.

Both collective marks and certification marks are used by more than one person, but only the users of collective marks are related to each other through membership in a collective group. The collective mark is used by all members and the collective organization holds the title to the collective mark for the benefit of all members.

A certification mark may be used to certify that the work or labor on the goods or services was performed by a member of a union or other organization. See [TMEP §1306.03](#). Used in this manner, the certification mark certifies not that the user is a member of an organization but that the labor on the user's goods or services was performed by a member of an organization.

An application to register a mark that is used or intended to be used by members of a collective group must be scrutinized carefully to determine the function of the mark. If the mark is used or intended to be used by the members as a trademark on goods they produce or as a service mark for services they perform, then the mark is a collective trademark or collective service mark. If the mark is used or intended to be used by members to indicate membership in an organization, then the mark is a collective membership mark. However, if use of the mark is or will be authorized only under circumstances designated by the organization to certify characteristics or features of the goods or services, the mark is a certification mark.

### **1306.09(b) Distinguishing Certification Mark Use from Related-Company Use of Trademark or Service Mark**

Sometimes, an application requests registration of a certification mark, but there is a contractual relationship in the nature of a franchise or license between the applicant and the user of the mark, whereby the applicant, as the franchisor or licensor, specifies the nature or quality of the goods produced (or of the services performed) under the contract. These situations require care in examination because they usually indicate trademark or service mark use (through related companies) rather than certification mark use, because the applicant, as franchisor or licensor, controls the nature of the goods or services and has the responsibility for their quality.

The key distinction between use of subject matter as a certification mark and use as a trademark or service mark through a related company is the purpose and function of the mark in the market place, and the significance that it would have to the relevant purchasing public. A trademark or service mark serves to indicate the origin of goods or services, whereas a certification mark serves to guarantee certain qualities or characteristics. See *In re Monsanto Co.*, 201 USPQ 864, 870 (TTAB 1978); *In re Celanese Corp. of America*, 136 USPQ 86 (TTAB 1962).

Furthermore, the owner of a certification mark must permit use of the mark if the goods or services meet the certifier's standard, whereas a trademark owner may, but is not obligated to, license use of its mark to third parties. *Monsanto*, 201 USPQ at 870.

### **1306.09(c) Patent Licenses**

Sometimes, the owner of a patent asserts ownership of the mark that is applied to goods that are manufactured under license from the patent owner, in accordance with the terms and specifications of the patent. In most cases, these marks have been registered as trademarks, on the basis of related-company use. Generally, the patent owner's purpose, in arranging for the application of a mark to the goods manufactured under his or her license, would be to identify and distinguish those goods whose nature and quality the patent owner controls through the terms and specifications of the patent. Therefore, registration as a trademark (on the basis of related-company use) rather than registration as a certification mark would be appropriate.

### **1307 Registration as Correct Type of Mark**

The examining attorney should take care to ascertain the correct type of mark during examination, and to require amendment if necessary. If a registration is issued for the wrong type of mark, it may be subject to cancellation. See *National Trailways Bus System v. Trailway Van Lines, Inc.*, 269 F. Supp. 352, 155 USPQ 507 (E.D.N.Y. 1965); *American Speech-Language-Hearing Ass'n v. National Hearing Aid Society*, 224 USPQ 798 (TTAB 1984).

# Chapter 1400 Classification and Identification of Goods and Services

---

<b>1401</b>	<b>Classification</b>
1401.01	Statutory Authority
1401.02	International Trademark Classification Adopted
1401.02(a)	Headings of International Trademark Classes
1401.02(b)	Short Titles for International Trademark Classes
1401.02(c)	International Alphabetical List
1401.03	Designation of Class
1401.03(a)	Designation of Class by Applicant Normally Initially Accepted in Applications Under §§1 and 44
1401.03(b)	Designation of Class by USPTO When Class Number Is Not Designated or Is Inaccurate in Application Under §1 or §44
1401.03(c)	Failure to Classify May Delay Action in Applications Under §§1 and 44
1401.03(d)	Classification Determined by World Intellectual Property Organization in §66(a) Applications
1401.04	Classification Determines Number of Fees
1401.04(a)	Prior United States Classification System
1401.04(b)	Limiting Goods and Services to the Number of Classes for Which Filing Fees Are Paid
1401.05	Criteria on Which International Classification Is Based
1401.05(a)	Identification and Classification of Kits, Gift Baskets, and Items Sold as a Unit
1401.05(b)	Medical vs. Non-Medical Goods
1401.05(c)	Classification and Plurality of Uses
1401.05(d)	Identification and Classification of “Systems”
1401.05(e)	Identification and Classification of “Food Additives”
1401.06	Specimen(s) as Related to Classification
1401.07	Specimen Discloses Special Characteristics
1401.08	Classification and the Identification of Goods and Services
1401.09	Changes in Practice Based on the Restructuring of International Class 42 in the 8th Edition of the Nice Agreement
1401.09(a)	Elimination of “Miscellaneous Class Designation”
1401.10	General Summary of Major Changes in Practice Based on the 9th Edition of the Nice Agreement
1401.10(a)	Legal Services Transferred to International Class 45
1401.10(b)	Goods Made of Precious Metal are Classified According to Their Function
1401.10(c)	Transfer of Aquaria and Related Items
1401.11	General Summary of Major Changes in Practice Based on the 10th Edition of the Nice Agreement
1401.11(a)	Electric/Electrothermic Goods
1401.11(b)	Amusement and Game-Playing Apparatus
1401.11(c)	Food Additives
1401.11(d)	Dietetic Substances and Meal Replacements
1401.11(e)	Marketing Services
1401.12	Implementation of Changes to the Nice Agreement
1401.13	Effective Date of Changes to USPTO ID Manual
<b>1402</b>	<b>Identification of Goods and Services</b>
1402.01	Specifying the Goods and/or Services - in General
1402.01(a)	General Guidelines for Acceptable Identifications of Goods or Services
1402.01(b)	Identification of Goods and Services in a §44 Application
1402.01(c)	Identification and Classification of Goods and Services in a §66(a) Application

1402.01(d)	Location of “Identification of Goods and Services”
1402.01(e)	Responsibilities of Examining Attorney as to Identification
1402.02	Entitlement to Filing Date With Respect to Identification of Goods and Services
1402.03	Specificity of Terms Used in Identifying Goods and Services
1402.03(a)	Inclusive Terminology
1402.03(b)	House Marks
1402.03(c)	Marks for a “Full Line of ...”
1402.03(d)	Identifying Computer Programs with Specificity
1402.03(e)	Identifying Publications with Specificity
1402.03(f)	Recognition of Industry Terms
1402.04	Acceptable Identification of Goods and Services Manual
1402.05	Accuracy of Identification
1402.05(a)	Goods That Are Components or Ingredients
1402.05(b)	Material Composition
1402.06	Amendments Permitted to Clarify or Limit Identification
1402.06(a)	Limiting the Identification of Goods and Services
1402.06(b)	Clarifying the Identification of Goods and Services
1402.07	Scope of Identification of Goods and Services for Purposes of Amendment
1402.07(a)	The “Ordinary-Meaning” Test
1402.07(b)	Ambiguous Identifications
1402.07(c)	Unambiguous Identifications
1402.07(d)	Permissible Scope of Identification Not Affected by Proposed Amendment That Is Unacceptable
1402.07(e)	Permissible Scope of Identification Affected by Proposed Amendment That Is Acceptable
1402.08	Moving Goods and Services Between Companion Applications
1402.09	Use of Marks Inappropriate in Identifications
1402.10	Identification of Goods and Services in Documents Filed in Connection with §1(b) Applications
1402.11	Identification of Services
1402.11(a)	Computer Services
1402.11(a)(i)	Services Classified in Classes 35, 36, 37, 39, 40, 41, 44, and 45
1402.11(a)(ii)	Content Providers
1402.11(a)(iii)	Provision of Telecommunications Connections to the Internet
1402.11(a)(iv)	Office-Function-Type and Computerized Web Traffic Services
1402.11(a)(v)	Computer Installation and Repair Services
1402.11(a)(vi)	Computer Retail Services
1402.11(a)(vii)	Computer Entertainment Services
1402.11(a)(viii)	Computer Design and Development Services
1402.11(a)(ix)	Database Services
1402.11(a)(x)	Online Publications
1402.11(a)(xi)	Electronic Storage, Hosting of Data, and Cloud Computing
1402.11(b)	Information Services
1402.11(c)	Association Services and “Promoting the Interest of” Services
1402.11(d)	Charitable Services, Other than Monetary
1402.11(e)	Consulting Services
1402.11(f)	Distribution of Videotapes, Audiotapes, Videodiscs, and Similar Items
1402.11(g)	Recorded Entertainment Services
1402.11(h)	Identification of “Bonus Programs”
1402.11(i)	Marketing Services and Advertising Services
1402.11(j)	Issuing Awards

- 1402.12                    Parentheses and Brackets Should Not be Used in Identifications of Goods and Services
- 1402.13                    Requirement for Amendment of Portion of Identification of Goods/Services
- 1402.14                    Identification of Goods/Services Must Conform to Rules and Policies in Effect at the Time Registration is Sought
- 1402.15                    Procedures for Processing Unacceptable Amendments to Identifications
- 1403                    Combined or Multiple-Class Application**
- 1403.01                    Requirements for Combined or Multiple-Class Application
- 1403.02                    Amendment of Combined or Multiple-Class Application
- 1403.02(a)                    Deletion of Classes
- 1403.02(b)                    Correction of Classification
- 1403.02(c)                    Addition of Classes
- 1403.03                    Dividing of Combined or Multiple-Class Application
- 1403.04                    Combined or Multiple-Class Marks in Official Gazette
- 1403.05                    Refusals and Oppositions as to Less Than All the Classes in a Multiple-Class Application
- 1403.06                    Fees for Action After Filing, Multiple Classes
- 1403.07                    Surrender or Amendment in Multiple-Class Registrations

## **1401 Classification**

### **1401.01 Statutory Authority**

Section 30 of the Trademark Act, 15 U.S.C. §1112, provides authority for establishing a classification system. That section states, in part, as follows:

The Director may establish a classification of goods and services, for convenience of Patent and Trademark Office administration, but not to limit or extend the applicant's or registrant's rights.

### **1401.02 International Trademark Classification Adopted**

As of September 1, 1973, the international classification of goods and services is the controlling classification used by the United States, and it applies to all applications filed on or after September 1, 1973, and their resulting registrations, for all statutory purposes. *See* 37 C.F.R. §2.85(a). Unless otherwise indicated, references in this manual to class refer to the international class.

Prior to September 1, 1973, the United States used its own classification of goods and services, which is different from the international classification. The prior United States classification continues to govern for all statutory purposes for trademark applications filed on or before August 31, 1973, and all registrations issued on the basis of an application filed on or before August 31, 1973, unless the owner of the registration amends the registration to adopt international classification. 37 C.F.R. §2.85(b).

If a registration issued under the United States classification system, the owner of the registration may voluntarily amend to reclassify under the international classification system, pursuant to §7(e) of the Trademark Act, 15 U.S.C. §1057(e), if the owner pays the required fee. 37 C.F.R. §§2.6 and 2.85(e)(3). *See* [TMEP §1609.04](#).

Classification schedules are set forth in Part 6 of the Trademark Rules of Practice. *See* 37 C.F.R. §6.1 for the international classification schedule for goods and services, 37 C.F.R. §6.2 for the prior United States

classification schedule for goods and services, 37 C.F.R. §6.3 for certification marks, and 37 C.F.R. §6.4 for collective membership marks.

### **1401.02(a) Headings of International Trademark Classes**

International trademark classification, and the headings of the international trademark classes, are established by the Committee of Experts of the Nice Union and set forth in the *International Classification of Goods and Services for the Purposes of the Registration of Marks* (Nice Classification) published annually by the World Intellectual Property Organization (“WIPO”) on its website. See [TMEP §1401.02\(c\)](#) for further information.

In 2013, the Committee of Experts began annual revisions to the Nice Classification. The annual revisions, which are published electronically and enter into force on January 1 each year, are referred to as versions and identified by edition number and year of the effective date (e.g., “Nice Classification, 10th edition, version 2013” or “NCL 10-2013”). Each annual version includes all changes adopted by the Committee of Experts since the adoption of the previous version. The changes consist of the addition of new goods and services to, and deletion of goods and services from, the Alphabetical List, and any modifications to the wording in the Alphabetical List, the class headings and the explanatory notes that do not involve the transfer of goods or services from one class to another. New editions continue to be published electronically and enter into force usually every five years, and include all changes adopted annually since the previous edition, as well as all amendments. Amendments consist of goods or services transferred from one class to another or new classes that are created.

The general remarks, class numbers, class headings, and explanatory notes for each international trademark class are as follows. (The word or words in parentheses following the class numbers are short titles for the classes that are used exclusively in the United States Patent and Trademark Office (“USPTO”) and are not part of the official text of the Nice Union classes. See [TMEP §1401.02\(b\)](#)).

#### **GENERAL REMARKS**

The indications of goods or services appearing in the class headings are general indications relating to the fields to which, in principle, the goods or services belong. The Alphabetical List should therefore be consulted in order to ascertain the exact classification of each individual product or service.

##### *Goods*

If a product cannot be classified with the aid of the List of Classes, the Explanatory Notes and the Alphabetical List, the following remarks set forth the criteria to be applied:

- (a) A finished product is in principle classified according to its function or purpose. If the function or purpose of a finished product is not mentioned in any class heading, the finished product is classified by analogy with other comparable finished products, indicated in the Alphabetical List. If none is found, other subsidiary criteria, such as that of the material of which the product is made or its mode of operation, are applied.
- (b) A finished product which is a multipurpose composite object (e.g., clocks incorporating radios) may be classified in all classes that correspond to any of its functions or intended purposes. If those functions or purposes are not mentioned in any class heading, other criteria, indicated under (a), above, are to be applied.

- (c) Raw materials, unworked or semi-worked, are in principle classified according to the material of which they consist.
- (d) Goods intended to form part of another product are in principle classified in the same class as that product only in cases where the same type of goods cannot normally be used for another purpose. In all other cases, the criterion indicated under (a), above, applies.
- (e) When a product, whether finished or not, is classified according to the material of which it is made, and it is made of different materials, the product is in principle classified according to the material which predominates.
- (f) Cases adapted to the product they are intended to contain are in principle classified in the same class as the product.

### *Services*

If a service cannot be classified with the aid of the List of Classes, the Explanatory Notes and the Alphabetical List, the following remarks set forth the criteria to be applied:

- (a) Services are in principle classified according to the branches of activities specified in the headings of the service classes and in their Explanatory Notes or, if not specified, by analogy with other comparable services indicated in the Alphabetical List.
- (b) Rental services are in principle classified in the same classes as the services provided by means of the rented objects (e.g., Rental of telephones, covered by Cl. 38). Leasing services are analogous to rental services and therefore should be classified in the same way. However, hire or lease-purchase financing is classified in Class 36 as a financial service.
- (c) Services that provide advice, information or consultation are in principle classified in the same classes as the services that correspond to the subject matter of the advice, information or consultation, e.g., transportation consultancy (Cl. 39), business management consultancy (Cl. 35), financial consultancy (Cl. 36), beauty consultancy (Cl. 44). The rendering of the advice, information or consultancy by electronic means (e.g., telephone, computer) does not affect the classification of these services.
- (d) Services rendered in the framework of franchising are in principle classified in the same class as the particular services provided by the franchisor (e.g., business advice relating to franchising (Class 35), financing services relating to franchising (Class 36), legal services relating to franchising (Class 45)).

## **GOODS**

### **CLASS 1**

#### **(Chemicals)**

Chemicals used in industry, science and photography, as well as in agriculture, horticulture and forestry; unprocessed artificial resins, unprocessed plastics; manures; fire extinguishing compositions; tempering and soldering preparations; chemical substances for preserving foodstuffs; tanning substances; adhesives used in industry.

#### *Explanatory Note*

Class 1 includes mainly chemical products used in industry, science and agriculture, including those which go to the making of products belonging to other classes.

*This Class includes, in particular:*

- compost;
- salt for preserving other than for foodstuffs;
- certain additives for the food industry (consult the Alphabetical List).

*This Class does not include, in particular:*

- raw natural resins (Cl. 2);
- chemical products for use in medical science (Cl. 5);
- fungicides, herbicides and preparations for destroying vermin (Cl. 5);
- adhesives for stationery or household purposes (Cl. 16);
- salt for preserving foodstuffs (Cl. 30);
- straw mulch (Cl. 31).

## **CLASS 2**

### **(Paints)**

Paints, varnishes, lacquers; preservatives against rust and against deterioration of wood; colorants; mordants; raw natural resins; metals in foil and powder form for painters, decorators, printers and artists.

*Explanatory Note*

Class 2 includes mainly paints, colorants and preparations used for the protection against corrosion.

*This Class includes, in particular:*

- paints, varnishes and lacquers for industry, handicrafts and arts;
- dyestuffs for clothing;
- colorants for foodstuffs and beverages.

*This Class does not include, in particular:*

- unprocessed artificial resins (Cl. 1);
- laundry blueing (Cl. 3);
- cosmetic dyes (Cl. 3);
- paint boxes (articles for use in school) (Cl. 16);
- insulating paints and varnishes (Cl. 17).

## **CLASS 3**

### **(Cosmetics and cleaning preparations)**

Bleaching preparations and other substances for laundry use; cleaning, polishing, scouring and abrasive preparations; soaps; perfumery, essential oils, cosmetics, hair lotions; dentifrices.

*Explanatory Note*

Class 3 includes mainly cleaning preparations and toilet preparations.

*This Class includes, in particular:*

- deodorants for human beings or for animals;
- room-fragrancing preparations;
- sanitary preparations being toiletries.

*This Class does not include, in particular:*

- chemical chimney cleaners (Cl. 1);
- degreasing preparations for use in manufacturing processes (Cl. 1);
- deodorants other than for human beings or for animals (Cl. 5);
- sharpening stones and grindstones (hand tools) (Cl. 8).

## **CLASS 4**

### **(Lubricants and fuels)**

Industrial oils and greases; lubricants; dust absorbing, wetting and binding compositions; fuels (including motor spirit) and illuminants; candles and wicks for lighting.

*Explanatory Note*

Class 4 includes mainly industrial oils and greases, fuels and illuminants.

*This Class does not include, in particular:*

- certain special industrial oils and greases (consult the Alphabetical List).

## **CLASS 5**

### **(Pharmaceuticals)**

Pharmaceutical and veterinary preparations; sanitary preparations for medical purposes; dietetic food and substances adapted for medical or veterinary use, food for babies; dietary supplements for humans and animals; plasters, materials for dressings; material for stopping teeth, dental wax; disinfectants; preparations for destroying vermin; fungicides, herbicides.

*Explanatory Note*

Class 5 includes mainly pharmaceuticals and other preparations for medical or veterinary purposes.

*This Class includes, in particular:*

- sanitary preparations for personal hygiene, other than toiletries;
- diapers for babies and incontinents;
- deodorants other than for human beings or for animals;
- dietary supplements, intended to supplement a normal diet or to have health benefits;
- meal replacements, dietetic food and beverages, adapted for medical or veterinary use;
- cigarettes without tobacco, for medical purposes.

*This Class does not include, in particular:*

- sanitary preparations being toiletries (Cl. 3);
- deodorants for human beings or for animals (Cl. 3);
- supportive bandages (Cl. 10);
- meal replacements, dietetic food and beverages not for medical or veterinary use (Cl. 29, 30, 31, 32 or 33).

## **CLASS 6**

### **(Metal goods)**

Common metals and their alloys; metal building materials; transportable buildings of metal; materials of metal for railway tracks; non-electric cables and wires of common metal; ironmongery, small items of metal hardware; pipes and tubes of metal; safes; goods of common metal not included in other classes; ores.

#### *Explanatory Note*

Class 6 includes mainly unwrought and partly wrought common metals as well as simple products made of them.

*This Class does not include, in particular:*

- bauxite (Cl. 1);
- mercury, antimony, alkaline and alkaline-earth metals (Cl. 1);
- metals in foil and powder form for painters, decorators, printers and artists (Cl. 2).

## **CLASS 7**

### **(Machinery)**

Machines and machine tools; motors and engines (except for land vehicles); machine coupling and transmission components (except for land vehicles); agricultural implements other than hand-operated; incubators for eggs; automatic vending machines.

#### *Explanatory Note*

Class 7 includes mainly machines, machine tools, motors and engines.

*This Class includes, in particular:*

- parts of motors and engines (of all kinds);
- electric cleaning machines and apparatus.

*This Class does not include, in particular:*

- certain special machines and machine tools (consult the Alphabetical List);
- hand tools and implements, hand-operated (Cl. 8);
- motors and engines for land vehicles (Cl. 12).

## **CLASS 8**

### **(Hand tools)**

Hand tools and implements (hand-operated); cutlery; side arms; razors.

*Explanatory Note*

Class 8 includes mainly hand-operated implements used as tools in the respective professions.

*This Class includes, in particular:*

- cutlery of precious metals;
- electric razors and clippers (hand instruments).

*This Class does not include, in particular:*

- certain special instruments (consult the Alphabetical List);
- machine tools and implements driven by a motor (Cl. 7);
- surgical cutlery (Cl. 10);
- side arms being firearms (Cl. 13);
- paper knives (Cl. 16);
- fencing weapons (Cl. 28).

## **CLASS 9**

### **(Electrical and scientific apparatus)**

Scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signalling, checking (supervision), life-saving and teaching apparatus and instruments; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity; apparatus for recording, transmission or reproduction of sound or images; magnetic data carriers, recording discs; compact discs, DVDs and other digital recording media; mechanisms for coin-operated apparatus; cash registers, calculating machines, data processing equipment, computers; computer software; fire-extinguishing apparatus.

*Explanatory Note*

*This Class includes, in particular:*

apparatus and instruments for scientific research in laboratories;  
apparatus and instruments for controlling ships, such as apparatus and instruments for measuring and for transmitting orders;  
protractors;  
punched card office machines;  
all computer programs and software regardless of recording media or means of dissemination, that is, software recorded on magnetic media or downloaded from a remote computer network.

*This Class does not include, in particular:*

the following electrical apparatus and instruments:(a) electromechanical apparatus for the kitchen (grinders and mixers for foodstuffs, fruit presses, electrical coffee mills, etc.), and certain other apparatus and instruments driven by an electrical motor, all coming under Class 7;  
(b) apparatus for pumping or dispensing fuels (Cl. 7);  
(c) electric razors, clippers (hand instruments) and flat irons (Cl. 8);  
(d) electrical apparatus for space heating or for the heating of liquids, for cooking, ventilating, etc. (Cl. 11);  
(e) electric toothbrushes and combs (Cl. 21);  
clocks and watches and other chronometric instruments (Cl. 14);  
control clocks (Cl. 14);  
amusement and game apparatus adapted for use with an external display screen or monitor (Cl. 28).

## **CLASS 10**

### **(Medical apparatus)**

Surgical, medical, dental and veterinary apparatus and instruments, artificial limbs, eyes and teeth; orthopedic articles; suture materials.

*Explanatory Note*

Class 10 includes mainly medical apparatus, instruments and articles.

*This Class includes, in particular:*

- special furniture for medical use;
- hygienic rubber articles (consult the Alphabetical List);
- supportive bandages.

## **CLASS 11**

### **(Environmental control apparatus)**

Apparatus for lighting, heating, steam generating, cooking, refrigerating, drying, ventilating, water supply and sanitary purposes.

*Explanatory Note*

*This Class includes, in particular:*

- air conditioning apparatus;
- bedwarmers, hot water bottles, warming pans, electric or non-electric;
- electrically heated cushions (pads) and blankets, not for medical purposes;
- electric kettles;
- electric cooking utensils.

*This Class does not include, in particular:*

- steam producing apparatus (parts of machines) (Cl. 7);
- electrically heated clothing (Cl. 9).

## **CLASS 12**

### **(Vehicles)**

Vehicles; apparatus for locomotion by land, air or water.

*Explanatory Note*

*This Class includes, in particular:*

- motors and engines for land vehicles;
- couplings and transmission components for land vehicles;
- air cushion vehicles.

*This Class does not include, in particular:*

- certain parts of vehicles (consult the Alphabetical List);
- railway material of metal (Cl. 6);
- motors, engines, couplings and transmission components other than for land vehicles (Cl. 7);
- parts of motors and engines (of all kinds) (Cl. 7).

## **CLASS 13**

### **(Firearms)**

Firearms; ammunition and projectiles; explosives; fireworks.

*Explanatory Note*

Class 13 includes mainly firearms and pyrotechnical products.

*This Class does not include, in particular:*

- matches (Cl. 34).

**CLASS 14****(Jewelry)**

Precious metals and their alloys and goods in precious metals or coated therewith, not included in other classes; jewellery, precious stones; horological and chronometric instruments.

*Explanatory Note*

Class 14 includes mainly precious metals, goods in precious metals not included in other classes and, in general jewellery, clocks and watches.

*This Class includes, in particular:*

- jewellery (i.e., imitation jewelry and jewelry of precious metal and stones);
- cuff links, tie pins.

*This Class does not include, in particular:*

- goods in precious metals classified according to their function or purpose, for example, metals in foil and powder form for painters, decorators, printers and artists (Cl. 2), amalgam of gold for dentists (Cl. 5), cutlery (Cl. 8), electric contacts (Cl. 9), pen nibs of gold (Cl. 16), teapots (Cl. 21), gold and silver embroidery (Cl. 26), cigar boxes (Cl. 34);
- objects of art not of precious metals (classified according to the material of which they consist).

**CLASS 15****(Musical Instruments)**

Musical instruments.

*Explanatory Note**This Class includes, in particular:*

- mechanical pianos and their accessories;
- musical boxes;
- electrical and electronic musical instruments.

*This Class does not include, in particular:*

- apparatus for the recording, transmission, amplification and reproduction of sound (Cl. 9).

**CLASS 16****(Paper goods and printed matter)**

Paper, cardboard and goods made from these materials, not included in other classes; printed matter; bookbinding material; photographs; stationery; adhesives for stationery or household purposes; artists' materials; paint brushes; typewriters and office requisites (except furniture); instructional and teaching material (except apparatus); plastic materials for packaging (not included in other classes); printers' type; printing blocks.

*Explanatory Note*

Class 16 includes mainly paper, goods made from that material and office requisites.

*This Class includes, in particular:*

- paper knives;
- duplicators;
- plastic sheets, sacks and bags for wrapping and packaging.

*This Class does not include, in particular:*

- certain goods made of paper and cardboard (consult the Alphabetical List);
- colours (Cl. 2);
- hand tools for artists (for example, spatulas, sculptors' chisels) (Cl. 8).

## **CLASS 17**

### **(Rubber goods)**

Rubber, gutta-percha, gum, asbestos, mica and goods made from these materials and not included in other classes; plastics in extruded form for use in manufacture; packing, stopping and insulating materials; flexible pipes, not of metal.

*Explanatory Note*

Class 17 includes mainly electrical, thermal and acoustic insulating materials and plastics, being for use in manufacture in the form of sheets, blocks and rods.

*This Class includes, in particular:*

- rubber material for recapping tyres;
- padding and stuffing materials of rubber or plastics;
- floating anti-pollution barriers.

## **CLASS 18**

### **(Leather goods)**

Leather and imitations of leather, and goods made of these materials and not included in other classes; animal skins, hides; trunks and travelling bags; umbrellas and parasols; walking sticks; whips, harness and saddlery.

*Explanatory Note*

Class 18 includes mainly leather, leather imitations, travel goods not included in other classes and saddlery.

*This Class does not include, in particular:*

- clothing, footwear, headgear (consult the Alphabetical List).

**CLASS 19****(Nonmetallic building materials)**

Building materials (non-metallic); non-metallic rigid pipes for building; asphalt, pitch and bitumen; non-metallic transportable buildings; monuments, not of metal.

*Explanatory Note*

Class 19 includes mainly non-metallic building materials.

*This Class includes, in particular:*

- semi-worked woods (for example, beams, planks, panels);
- veneers;
- building glass (for example, floor slabs, glass tiles);
- glass granules for marking out roads;
- letter boxes of masonry.

*This Class does not include, in particular:*

- cement preservatives and cement-waterproofing preparations (Cl. 1);
- fireproofing preparations (Cl. 1).

**CLASS 20****(Furniture and articles not otherwise classified)**

Furniture, mirrors, picture frames; goods (not included in other classes) of wood, cork, reed, cane, wicker, horn, bone, ivory, whalebone, shell, amber, mother-of-pearl, meerschaum and substitutes for all these materials, or of plastics.

*Explanatory Note*

Class 20 includes mainly furniture and its parts and plastic goods, not included in other classes.

*This Class includes, in particular:*

- metal furniture and furniture for camping;

- bedding (for example, mattresses, spring mattresses, pillows);
- looking glasses and furnishing or toilet mirrors;
- registration number plates not of metal;
- letter boxes not of metal or masonry.

*This Class does not include, in particular:*

- certain special types of mirrors, classified according to their function or purpose (consult the Alphabetical List);
- special furniture for laboratories (Cl. 9);
- special furniture for medical use (Cl. 10);
- bedding linen (Cl. 24);
- eiderdowns (Cl. 24).

## **CLASS 21**

### **(Housewares and glass)**

Household or kitchen utensils and containers; combs and sponges; brushes (except paint brushes); brush-making materials; articles for cleaning purposes; steelwool; unworked or semi-worked glass (except glass used in building); glassware, porcelain and earthenware not included in other classes.

#### *Explanatory Note*

Class 21 includes mainly small, hand-operated utensils and apparatus for household and kitchen use as well as toilet utensils, glassware and articles in porcelain.

*This Class includes, in particular:*

- utensils and containers for household and kitchen use, for example, kitchen utensils, pails, pans of iron, of aluminum, of plastics or of other materials, small hand-operated apparatus for mincing, grinding, or pressing;
- electric combs;
- electric toothbrushes;
- dish stands and decanter stands.

*This Class does not include, in particular:*

- certain goods made of glass, porcelain and earthenware (consult the Alphabetical List);
- cleaning preparations, soaps, etc. (Cl. 3);
- small apparatus for mincing, grinding, or pressing which are driven by electricity (Cl. 7);
- razors and shaving apparatus, clippers (hand instruments), metal implements and utensils for manicure and pedicure (Cl. 8);
- cooking utensils, electric (Cl. 11);
- toilet mirrors (Cl. 20).

## **CLASS 22**

**(Cordage and fibers)**

Ropes, string, nets, tents, awnings, tarpaulins, sails, sacks and bags (not included in other classes); padding and stuffing materials (except of rubber or plastics); raw fibrous textile materials.

*Explanatory Note*

Class 22 includes mainly rope and sail manufacture products, padding and stuffing materials and raw fibrous textile materials.

*This Class includes, in particular:*

- cords and twines in natural or artificial textile fibres, paper or plastics.

*This Class does not include, in particular:*

- certain nets, sacks and bags (consult the Alphabetical List);
- strings for musical instruments (Cl. 15).

**CLASS 23****(Yarns and threads)**

Yarns and threads, for textile use.

**CLASS 24****(Fabrics)**

Textiles and textile goods, not included in other classes; bed covers; table covers.

*Explanatory Note*

Class 24 includes mainly textiles (piece goods) and textile covers for household use.

*This Class includes, in particular:*

- bedding linen of paper.

*This Class does not include, in particular:*

- certain special textiles (consult the Alphabetical List);
- electrically heated blankets, for medical purposes (Cl. 10) and not for medical purposes (Cl. 11);
- table linen of paper (Cl. 16);
- horse blankets (Cl. 18).

**CLASS 25**

**(Clothing)**

Clothing, footwear, headgear.

*Explanatory Note*

*This Class does not include, in particular:*

- certain clothing and footwear for special use (consult the Alphabetical List).

**CLASS 26****(Fancy goods)**

Lace and embroidery, ribbons and braid; buttons, hooks and eyes, pins and needles; artificial flowers.

*Explanatory Note*

Class 26 includes mainly dressmakers' articles.

*This Class includes, in particular:*

- slide fasteners.

*This Class does not include, in particular:*

- certain special types of hooks (consult the Alphabetical List);
- certain special types of needles (consult the Alphabetical List);
- yarns and threads for textile use (Cl. 23).

**CLASS 27****(Floor coverings)**

Carpets, rugs, mats and matting, linoleum and other materials for covering existing floors; wall hangings (non-textile).

*Explanatory Note*

Class 27 includes mainly products intended to be added as furnishings to previously constructed floors and walls.

*This Class does not include, in particular:*

- wooden flooring (Cl. 19)

**CLASS 28**

**(Toys and sporting goods)**

Games and playthings; gymnastic and sporting articles not included in other classes; decorations for Christmas trees.

*Explanatory Note*

*This Class includes, in particular:*

- amusement and game apparatus adapted for use with an external display screen or monitor;
- fishing tackle;
- equipment for various sports and games.

*This Class does not include, in particular:*

- Christmas tree candles (Cl. 4);
- diving equipment (Cl. 9);
- electrical lamps (garlands) for Christmas trees (Cl. 11);
- fishing nets (Cl. 22);
- clothing for gymnastics and sports (Cl. 25);
- confectionery and chocolate decorations for Christmas trees (Cl. 30).

**CLASS 29****(Meats and processed foods)**

Meat, fish, poultry and game; meat extracts; preserved, frozen, dried and cooked fruits and vegetables; jellies, jams, compotes; eggs; milk and milk products; edible oils and fats.

*Explanatory Note*

Class 29 includes mainly foodstuffs of animal origin as well as vegetables and other horticultural comestible products which are prepared for consumption or conservation.

*This Class includes, in particular:*

- milk beverages (milk predominating).

*This Class does not include, in particular:*

- certain foodstuffs of plant origin (consult the Alphabetical List);
- baby food (Cl. 5);
- dietetic food and substances adapted for medical use (Cl. 5);
- dietary supplements (Cl. 5);
- salad dressings (Cl. 30);
- fertilised eggs for hatching (Cl. 31);
- foodstuffs for animals (Cl. 31);

- live animals (Cl. 31).

## **CLASS 30**

### **(Staple foods)**

Coffee, tea, cocoa and artificial coffee; rice; tapioca and sago; flour and preparations made from cereals; bread, pastry and confectionery; edible ices; sugar, honey, treacle; yeast, baking-powder; salt; mustard; vinegar, sauces (condiments); spices; ice.

#### *Explanatory Note*

Class 30 includes mainly foodstuffs of plant origin prepared for consumption or conservation as well as auxiliaries intended for the improvement of the flavour of food.

#### *This Class includes, in particular:*

- beverages with coffee, cocoa, chocolate or tea base;
- cereals prepared for human consumption (for example, oat flakes and those made of other cereals).

#### *This Class does not include, in particular:*

- certain foodstuffs of plant origin (consult the Alphabetical List);
- salt for preserving other than for foodstuffs (Cl. 1);
- medicinal teas and dietetic food and substances adapted for medical use (Cl. 5);
- baby food (Cl. 5);
- dietary supplements (Cl. 5);
- raw cereals (Cl. 31);
- foodstuffs for animals (Cl. 31).

## **CLASS 31**

### **(Natural agricultural products)**

Grains and agricultural, horticultural and forestry products not included in other classes; live animals; fresh fruits and vegetables; seeds; natural plants and flowers; foodstuffs for animals; malt.

#### *Explanatory Note*

Class 31 includes mainly land products not having been subjected to any form of preparation for consumption, live animals and plants as well as foodstuffs for animals.

#### *This Class includes, in particular:*

- raw woods;
- raw cereals;
- fertilised eggs for hatching;

- mollusca and crustacea (live).

*This Class does not include, in particular:*

- cultures of micro-organisms and leeches for medical purposes (Cl. 5);
- dietary supplements for animals (Cl. 5);
- semi-worked woods (Cl. 19);
- artificial fishing bait (Cl. 28);
- rice (Cl. 30);
- tobacco (Cl. 34).

## **CLASS 32**

### **(Light beverages)**

Beers; mineral and aerated waters and other non-alcoholic beverages; fruit beverages and fruit juices; syrups and other preparations for making beverages.

*Explanatory Note*

Class 32 includes mainly non-alcoholic beverages, as well as beer.

*This Class includes, in particular:*

- de-alcoholised beverages.

*This Class does not include, in particular:*

- beverages for medical purposes (Cl. 5);
- milk beverages (milk predominating) (Cl. 29);
- beverages with coffee, cocoa, chocolate or tea base (Cl. 30).

## **CLASS 33**

### **(Wines and spirits)**

Alcoholic beverages (except beers).

*Explanatory Note*

*This Class does not include, in particular:*

- medicinal beverages (Cl. 5);
- de-alcoholised beverages (Cl. 32).

## **CLASS 34**

**(Smokers' articles)**

Tobacco; smokers' articles; matches.

*Explanatory Note*

*This Class includes, in particular:*

- tobacco substitutes (not for medical purposes).

*This Class does not include, in particular:*

- cigarettes without tobacco, for medical purposes (Cl. 5);

**SERVICES****CLASS 35****(Advertising and business)**

Advertising; business management; business administration; office functions.

*Explanatory Note*

Class 35 includes mainly services rendered by persons or organizations principally with the object of:

- (1) help in the working or management of a commercial undertaking, or
- (2) help in the management of the business affairs or commercial functions of an industrial or commercial enterprise,

as well as services rendered by advertising establishments primarily undertaking communications to the public, declarations or announcements by all means of diffusion and concerning all kinds of goods or services.

*This Class includes, in particular:*

- the bringing together, for the benefit of others, of a variety of goods (excluding the transport thereof), enabling customers to conveniently view and purchase those goods; such services may be provided by retail stores, wholesale outlets, through mail order catalogues or by means of electronic media, for example, through websites or television shopping programmes;
- services consisting of the registration, transcription, composition, compilation, or systematization of written communications and registrations, and also the compilation of mathematical or statistical data;
- services of advertising agencies and services such as the distribution of prospectuses, directly or through the post, or the distribution of samples. This Class may refer to advertising in connection with other services, such as those concerning bank loans or advertising by radio.

*This Class does not include, in particular:*

- services such as evaluations and reports of engineers which do not directly refer to the working or management of affairs in a commercial or industrial enterprise (consult the Alphabetical List).

## **CLASS 36**

### **(Insurance and financial)**

Insurance; financial affairs; monetary affairs; real estate affairs.

#### *Explanatory Note*

Class 36 includes mainly services rendered in financial and monetary affairs and services rendered in relation to insurance contracts of all kinds.

#### *This Class includes, in particular:*

services relating to financial or monetary affairs comprise the following:(a) services of all the banking establishments, or institutions connected with them such as exchange brokers or clearing services;

(b) services of credit institutions other than banks such as co-operative credit associations, individual financial companies, lenders, etc.;

(c) services of “investment trusts,” of holding companies;

(d) services of brokers dealing in shares and property;

(e) services connected with monetary affairs vouched for by trustees;

(f) services rendered in connection with the issue of travellers’ cheques and letters of credit;

hire or lease-purchase financing;

services of realty administrators of buildings, i.e., services of letting or valuation, or financing;

services dealing with insurance such as services rendered by agents or brokers engaged in insurance, services rendered to insured, and insurance underwriting services.

## **CLASS 37**

### **(Building construction and repair)**

Building construction; repair; installation services.

#### *Explanatory Note*

Class 37 includes mainly services rendered by contractors or subcontractors in the construction or making of permanent buildings, as well as services rendered by persons or organizations engaged in the restoration of objects to their original condition or in their preservation without altering their physical or chemical properties.

#### *This Class includes, in particular:*

- services relating to the construction of buildings, roads, bridges, dams or transmission lines and services of undertakings specializing in the field of construction such as those of painters, plumbers, heating installers or roofers;
- services auxiliary to construction services like inspections of construction plans;
- services of shipbuilding;

- services consisting of hiring of tools or building materials;
- repair services, i.e., services which undertake to put any object into good condition after wear, damage, deterioration or partial destruction (restoration of an existing building or another object that has become imperfect and is to be restored to its original condition);
- various repair services such as those in the fields of electricity, furniture, instruments, tools, etc.;
- services of maintenance for preserving an object in its original condition without changing any of its properties (for the difference between this Class and Class 40 see the Explanatory Note of Class 40).

*This Class does not include, in particular:*

- services consisting of storage of goods such as clothes or vehicles (Cl. 39);
- services connected with dyeing of cloth or clothes (Cl. 40).

## **CLASS 38**

### **(Telecommunications)**

Telecommunications.

#### *Explanatory Note*

Class 38 includes mainly services allowing at least one person to communicate with another by a sensory means. Such services include those which:

- (1) allow one person to talk to another,
- (2) transmit messages from one person to another, and
- (3) place a person in oral or visual communication with another (radio and television).

*This Class includes, in particular:*

- services which consist essentially of the diffusion of radio or television programmes.

*This Class does not include, in particular:*

- radio advertising services (Cl. 35);
- telephone marketing (telemarketing) services (Cl. 35).

## **CLASS 39**

### **(Transportation and storage)**

Transport; packaging and storage of goods; travel arrangement.

#### *Explanatory Note*

Class 39 includes mainly services for the transport of people, animals or goods from one place to another (by rail, road, water, air or pipeline) and services necessarily connected with such transport, as well as services relating to the storing of goods in a warehouse or other building for their preservation or guarding.

*This Class includes, in particular:*

- services rendered by companies exploiting stations, bridges, rail-road ferries, etc., used by the transporter;
- services connected with the hiring of transport vehicles;
- services connected with maritime tugs, unloading, the functioning of ports and docks and the salvaging of wrecked ships and their cargoes;
- services connected with the packaging and parcelling of goods before dispatch;
- services consisting of information about journeys or the transport of goods by brokers and tourist agencies, information relating to tariffs, timetables and methods of transport;
- services relating to the inspection of vehicles or goods before transport.

*This Class does not include, in particular:*

- services relating to advertising transport undertakings such as the distribution of prospectuses or advertising on the radio (Cl. 35);
- services relating to the issuing of travellers' cheques or letters of credit by brokers or travel agents (Cl. 36);
- services relating to insurances (commercial, fire or life) during the transport of persons or goods (Cl. 36);
- services rendered by the maintenance and repair of vehicles, nor the maintenance or repair of objects connected with the transport of persons or goods (Cl. 37);
- services relating to reservation of rooms in a hotel by travel agents or brokers (Cl. 43).

## **CLASS 40**

### **(Treatment of materials)**

Treatment of materials.

#### *Explanatory Note*

Class 40 includes mainly services not included in other classes, rendered by the mechanical or chemical processing or transformation of objects or inorganic or organic substances.

For the purposes of classification, the mark is considered a service mark only in cases where processing or transformation is effected for the account of another person. A mark is considered a trade mark in all cases where the substance or object is marketed by the person who processed or transformed it.

*This Class includes, in particular:*

- services relating to transformation of an object or substance and any process involving a change in its essential properties (for example, dyeing a garment); consequently, a maintenance service,

although usually in Class 37, is included in Class 40 if it entails such a change (for example, the chroming of motor vehicle bumpers);

- services of material treatment which may be present during the production of any substance or object other than a building; for example, services which involve cutting, shaping, polishing by abrasion or metal coating.

*This Class does not include, in particular:*

- repair services (Cl. 37).

## **CLASS 41**

### **(Education and entertainment)**

Education; providing of training; entertainment; sporting and cultural activities.

#### *Explanatory Note*

Class 41 covers mainly services rendered by persons or institutions in the development of the mental faculties of persons or animals, as well as services intended to entertain or to engage the attention.

*This Class includes, in particular:*

- services consisting of all forms of education of persons or training of animals;
- services having the basic aim of the entertainment, amusement or recreation of people;
- presentation of works of visual art or literature to the public for cultural or educational purposes.

## **CLASS 42**

### **(Computer and scientific)**

Scientific and technological services and research and design relating thereto; industrial analysis and research services; design and development of computer hardware and software.

#### *Explanatory Note*

Class 42 includes mainly services provided by persons, individually or collectively, in relation to the theoretical and practical aspects of complex fields of activities; such services are provided by members of professions such as chemists, physicists, engineers, computer programmers, etc.

*This Class includes, in particular:*

- the services of engineers who undertake evaluations, estimates, research and reports in the scientific and technological fields;
- scientific research services for medical purposes.

*This Class does not include, in particular:*

- business research and evaluations (Cl. 35);
- word processing and computer file management services (Cl. 35);
- financial and fiscal evaluations (Cl. 36);
- mining and oil extraction (Cl. 37);
- computer (hardware) installation and repair services (Cl. 37);
- services provided by the members of professions such as medical doctors, veterinary surgeons, psychoanalysts (Cl. 44);
- medical treatment services (Cl. 44);
- garden design (Cl. 44);
- legal services (Cl. 45).

## **CLASS 43**

### **(Hotels and restaurants)**

Services for providing food and drink; temporary accommodation.

#### *Explanatory Note*

Class 43 includes mainly services provided by persons or establishments whose aim is to prepare food and drink for consumption and services provided to obtain bed and board in hotels, boarding houses or other establishments providing temporary accommodation.

#### *This Class includes, in particular:*

- reservation services for travellers' accommodation, particularly through travel agencies or brokers;
- boarding for animals.

#### *This Class does not include, in particular:*

- rental services for real estate such as houses, flats, etc., for permanent use (Cl. 36);
- arranging travel by tourist agencies (Cl. 39);
- preservation services for food and drink (Cl. 40);
- discotheque services (Cl. 41);
- boarding schools (Cl. 41);
- rest and convalescent homes (Cl. 44).

## **CLASS 44**

### **(Medical, beauty and agricultural)**

Medical services; veterinary services; hygienic and beauty care for human beings or animals; agriculture, horticulture and forestry services.

#### *Explanatory Note*

Class 44 includes mainly medical care, hygienic and beauty care given by persons or establishments to human beings and animals; it also includes services relating to the fields of agriculture, horticulture and forestry.

*This Class includes, in particular:*

- medical analysis services relating to the treatment of persons (such as x-ray examinations and taking of blood samples);
- artificial insemination services;
- pharmacy advice;
- animal breeding;
- services relating to the growing of plants such as gardening;
- services relating to floral art such as floral compositions as well as garden design.

*This Class does not include, in particular:*

- vermin exterminating (other than for agriculture, horticulture and forestry) (Cl. 37);
- installation and repair services for irrigation systems (Cl. 37);
- ambulance transport (Cl. 39);
- animal slaughtering services and taxidermy (Cl. 40);
- timber felling and processing (Cl. 40);
- animal training services (Cl. 41);
- health clubs for physical exercise (Cl. 41);
- scientific research services for medical purposes (Cl. 42);
- boarding for animals (Cl. 43);
- retirement homes (Cl. 43).

## **CLASS 45**

### **(Personal and legal)**

Legal services; security services for the protection of property and individuals; personal and social services rendered by others to meet the needs of individuals.

*Explanatory Note*

*This Class includes, in particular:*

- services rendered by lawyers to individuals, groups of individuals, organizations and enterprises;
- investigation and surveillance services relating to the safety of persons and entities;
- services provided to individuals in relation with social events, such as social escort services, matrimonial agencies, funeral services.

*This Class does not include, in particular:*

- professional services giving direct aid in the operations or functions of a commercial undertaking (Cl. 35);

- services relating to financial or monetary affairs and services dealing with insurance (Cl. 36);
- escorting of travellers (Cl. 39);
- security transport (Cl. 39);
- services consisting of all forms of education of persons (Cl. 41);
- performances of singers and dancers (Cl. 41);
- computer services for the protection of software (Cl. 42);
- services provided by others to give medical, hygienic or beauty care for human beings or animals (Cl. 44);
- certain rental services (consult the Alphabetical List and General Remark (b) relating to the classification of services).

### **1401.02(b) Short Titles for International Trademark Classes**

The USPTO associates the following word titles with the respective international trademark class numbers:

#### GOODS

1. Chemicals
2. Paints
3. Cosmetics and cleaning preparations
4. Lubricants and fuels
5. Pharmaceuticals
6. Metal goods
7. Machinery
8. Hand tools
9. Electrical and scientific apparatus
10. Medical apparatus
11. Environmental control apparatus
12. Vehicles
13. Firearms
14. Jewelry
15. Musical instruments
16. Paper goods and printed matter

17. Rubber goods
18. Leather goods
19. Non-metallic building materials
20. Furniture and articles not otherwise classified
21. Housewares and glass
22. Cordage and fibers
23. Yarns and threads
24. Fabrics
25. Clothing
26. Fancy goods
27. Floor coverings
28. Toys and sporting goods
29. Meats and processed foods
30. Staple foods
31. Natural agricultural products
32. Light beverages
33. Wines and spirits
34. Smokers' articles

#### SERVICES

35. Advertising and business
36. Insurance and financial
37. Building construction and repair
38. Telecommunications
39. Transportation and storage

40. Treatment of materials
41. Education and entertainment
42. Computer and scientific
43. Hotels and restaurants
44. Medical, beauty and agricultural
45. Personal and legal

These short titles are not an official part of the international classification. Their purpose is to provide a means to quickly identify the general content of numbered international classes. By their nature, these titles will not necessarily disclose the classification of specific items. The titles are not designed to be used for classification, but only as information to assist in the identification of numbered classes. To determine the classification of particular goods and services, it is necessary to refer to the Alphabetical List, the class headings of the international classes, and explanatory notes in the *International Classification of Goods and Services for the Purposes of the Registration of Marks* (Nice Classification), published annually by WIPO on its website. The full names of international classes are set forth in 37 C.F.R. §6.1.

The short titles are printed in the *Official Gazette* in association with the international class numbers under MARKS PUBLISHED FOR OPPOSITION, Sections 1 and 2; TRADEMARK REGISTRATIONS ISSUED, PRINCIPAL REGISTER, Section 1; TRADEMARK REGISTRATIONS ISSUED UNDER SECTION 1(d), Sections 1 and 2; and SUPPLEMENTAL REGISTER, Sections 1 and 2.

The international trademark classification was adopted by the United States as its system of classification as of September 1, 1973. See 911 TMOG 210 (June 26, 1973). The use of short titles was announced in a notice at 924 TMOG 155 (July 16, 1974).

### **1401.02(c) International Alphabetical List**

Additional general guidance concerning identifications may be found in the Alphabetical List of goods and services of the Nice Classification, available online at <http://www.wipo.int/classifications/nice/en/>, and published by the World Intellectual Property Organization. A French version of the Alphabetical List is also available online. Note: the paper publication of the Nice Classification was discontinued in 2011 with the publication of the 10th edition.

As the Alphabetical List was developed to *classify* goods and services and not to identify specific goods and services, most entries will not be sufficiently definite to use in an *identification* of goods and/or services.

If such entries are provided as identifications, the USPTO exercises its discretion to require greater particularity. See *In re Omega SA*, 494 F.3d 1362, 83 USPQ2d 1541 (Fed. Cir. 2007).

The USPTO's [Acceptable Identification of Goods and Services Manual](#) ("ID Manual") provides general guidance on whether an identification is sufficiently definite. See [TMEP §1402.04](#).

### **1401.03 Designation of Class**

In an application for registration of a mark, the applicant should designate the international class number(s) that are appropriate for the identified goods and/or services whenever the information is known. 37 C.F.R. §2.32(a)(7). See TMEP §[1401.02\(a\)](#) for the international classification schedule with explanatory notes.

In an application under §1 or §44, incorrect classification will be corrected by amendment. See [TMEP §1401.03\(b\)](#).

#### **1401.03(a) Designation of Class by Applicant Normally Initially Accepted in Applications Under §§1 and 44**

Sometimes, a product could be classified in more than one class. Some products are classified differently depending on the type of material of which the product is composed, or a particular use of the product. For example, plastic statuettes are in Class 20 while glass statuettes are in Class 21; reagents for research purposes are in Class 1 while reagents for medical use are in Class 5. Generally, in applications under §1 or §44 of the Trademark Act, prior to their assignment to an examining attorney, the USPTO retains the class number designated by the applicant, in the absence of any information clearly contradicting that classification. The applicant may be asked for further clarification for classification of goods of this type during the examination of the application. If the wording in the identification is broad enough to encompass more than one class, amendment will be required. See *In re Omega SA*, 494 F.3d 1362, 83 USPQ2d 1541 (Fed. Cir. 2007) ("chronographs" held indefinite because it includes both time recording devices in Class 9 and watches in Class 14). Also, if the examining attorney determines that the class designated by the applicant is incorrect, the examining attorney will require reclassification.

#### **1401.03(b) Designation of Class by USPTO When Class Number Is Not Designated or Is Inaccurate in Application Under §1 or §44**

In an application under §1 or §44 of the Trademark Act, if the applicant does not designate a class number(s), the USPTO will do so. If the class number(s) indicated by the applicant is clearly wrong (e.g., goods are classified in a service class), the USPTO will change the classification, either prior to or during examination.

Upon examination, the classification must be amended if the class numbers are incorrect. When the examining attorney requires or recommends an amendment of the identification of goods and/or services that would necessitate an amendment of the classification, the examining attorney should also require the applicant to amend the classification.

If an incorrect class number was designated by the Pre-Examination Section, and the examining attorney must issue an Office action, he or she must also inform the applicant of the correct class number for the identified goods and/or services, and require amendment of the classification. If it is unnecessary to issue an Office action, the examining attorney must ensure that the correct classification is entered into the electronic records of the USPTO.

The examining attorney may amend or correct classification through an examiner's amendment, without prior authorization by the applicant. *Groening v. Missouri Botanical Garden*, 59 USPQ2d 1601 (Comm'r Pats. 1999). See TMEP §[707.02](#).

Before approving an application for publication, the examining attorney must check to make sure that the properly assigned class is reflected in the electronic records of the USPTO.

### 1401.03(c) Failure to Classify May Delay Action in Applications Under §§1 and 44

The applicant should make an initial effort at classification, using the Alphabetical List of goods and services.

In an application under §1 or §44 of the Trademark Act, when an application and fee is filed for a single class, but the identification lists a large number of items that obviously involve many classes, the examining attorney will require the applicant to properly classify the items. Class designations must be determined and fees for multiple classes must be paid before an examining attorney does an extensive search in a large number of classes. See TMEP §[810.01](#).

### 1401.03(d) Classification Determined by World Intellectual Property Organization in §66(a) Applications

*37 CFR §2.85(d) Section 66(a) applications and registered extensions of protection.*

In an application under section 66(a) of the Act or registered extension of protection, the classification cannot be changed from the classification assigned by the International Bureau of the World Intellectual Property Organization, unless the International Bureau corrects the classification. Classes cannot be added, and goods or services cannot be transferred from one class to another in a multiple-class application.

In an application under §66(a) of the Trademark Act, 15 U.S.C. §1141f(a), i.e., a request for protection of an international registration to the United States pursuant to the Madrid Protocol, the International Bureau of the World Intellectual Property Organization (“IB”) controls classification. Article 3(2) of the Protocol.

The IB classifies the goods and services in the appropriate classes of the *International Classification of Goods and Services for the Purposes of the Registration of Marks* in effect at the time international registration is filed. Subject to the conformity of the international application with other applicable requirements, the international registration will be issued in accordance with the classification and grouping that the IB considers to be correct. Common Regulations under the Madrid Agreement and Protocol, Rule 12(9). The USPTO will be notified of the edition of the Nice Agreement used and it will be listed in the request for extension of protection.

The §66(a) application (and any resulting registration) remains part of the international registration, and a change of classification in the United States would have no effect on the international registration. Therefore, the international classification of goods and/or services in a §66(a) application **cannot be changed** from the classification given to the goods/services by the IB, even if the IB’s classification of goods/services in the §66(a) application is different from the classification set forth in the ID Manual. Classes cannot be added, and goods or services cannot be transferred from one class to another in a multiple-class application. 37 C.F.R. §2.85(d).

Accordingly, if the mark in a §66(a) application appears to be a certification or collective membership mark, the USPTO **will not** reclassify it into United States Class A, B, or 200. However, the applicant must comply with all other United States requirements for certification and collective membership marks, regardless of the classification chosen by the IB. See [TMEP §§1304 et seq.](#), regarding collective membership marks, [TMEP §§1306 et seq.](#) regarding certification marks, and [TMEP §1904.02\(d\)](#) regarding §66(a) applications for these types of marks. See also [TMEP §1904.02\(c\)\(v\)](#) regarding the effect of indicated classes in registered extensions of protection and published applications under §66(a).

For purposes of *identification* of goods or services, the examining attorney will examine a §66(a) application according to the same standards of specificity used in examining applications under §§1 and 44 of the Trademark Act. That is, the examining attorney must follow the procedures set forth in the TMEP and

identify the goods/services in accordance with the ID Manual whenever possible. See TMEP §§[1904.02\(c\)](#) *et seq.*

See also TMEP §[1402.01\(c\)](#) regarding the identification and classification of goods and services in a §66(a) application and [1904.02\(b\)](#) regarding the examination of classification of goods and services in a §66(a) application.

## 1401.04 Classification Determines Number of Fees

*15 U.S.C. §1112 (Extract)*

\*\*\* The applicant may apply to register a mark for any or all of the goods or services on or in connection with which he or she is using or has a bona fide intention to use the mark in commerce: Provided, That if the Director by regulation permits the filing of an application for the registration of a mark for goods or services which fall within a plurality of classes, a fee equaling the sum of the fees for filing an application in each class shall be paid, and the Director may issue a single certificate of registration for such mark.

Classification is the basis for determining the number of fees that must be paid. In an application under §1 or §44 of the Trademark Act, a fee is required for each class.

In an application under §1 or §44, if the application sets forth goods or services in more than one class and pays insufficient fees to cover all the classes, the applicant must either amend the application to restrict the goods or services to the number of classes for which the fee has been paid, or submit additional fees to cover all the goods or services set forth in the identification. The fees for multiple classes must be paid before an examining attorney does an extensive search in a large number of classes. See [TMEP §810.01](#).

If, with the original application, the applicant submits fees for more classes than are validly represented in the application, the fees that have been overpaid in error will be refunded. See [TMEP §405.04](#) regarding refunds.

In a §66(a) application, the amount of the filing fee will be determined by the IB, who will collect the fee and send it to the USPTO pursuant to the provisions of the Madrid Protocol and the *Common Regulations Under the Madrid Agreement Concerning the International Registration of Marks and the Protocol Relating to That Agreement* (“Common Regs.”). The examining attorney will not question the sufficiency of the filing fee in a §66(a) application. The classification in a §66(a) application cannot be changed, and classes cannot be added. See [TMEP §1401.03\(d\)](#) for further information.

### 1401.04(a) Prior United States Classification System

Prior to the adoption of the International Classification in 1973, the United States Classification was the controlling classification used in the USPTO. After adoption of the International Classification, the United States Classification became a secondary classification system. United States classes are still assigned to all applications by a computerized system. Each international class is coordinated with the United States classes that are most frequently associated with it. Neither examining attorneys nor any other USPTO personnel have the authority or capability of altering these automatically assigned secondary United States Classification designations.

### 1401.04(b) Limiting Goods and Services to the Number of Classes for Which Filing Fees Are Paid

An application may list, in connection with each international class number designated, only goods or services that fall within that class. An applicant may apply to register a mark for any or all of the goods

and/or services on or in connection with which the applicant is using or has a bona fide intent to use the mark in commerce, if the applicant submits a filing fee for each class. See 15 U.S.C. §1112; 37 C.F.R. §2.86(a). An application that includes more than one class of goods or services is called a combined or multiple-class application. See [TMEP §§1403](#) *et seq.*

The applicant should designate only the number of classes for which a filing fee is submitted and should limit the specified goods and services to those within the particular class(es) designated. Thus, if a single filing fee is submitted, the applicant should designate only one class and should limit the goods or services specified in the identification to items in that class.

The examining attorney must require any necessary amendments to ensure that the classification is correct for the specified goods or services. In an application under §1 or §44 of the Trademark Act, if the applicant identifies goods or services that are classified in a greater number of classes than the classes for which filing fees have been paid, the examining attorney must require that the applicant either: (1) pay the additional fees; or (2) amend the identification to restrict the application to the number of classes for which fees have already been paid. See [TMEP §§810.01](#) and [1403.02\(c\)](#).

In a §66(a) application, the amount of the filing fee will be determined by the IB, who will collect the fee and send it to the USPTO, pursuant to the provisions of the Madrid Protocol and the Common Regs. The examining attorney will not question the sufficiency of the filing fee in a §66(a) application. The classification in a §66(a) application cannot be changed, and classes cannot be added. See [TMEP §1401.03\(d\)](#).

## **1401.05 Criteria on Which International Classification Is Based**

The Alphabetical List of the Nice Classification contains information about the appropriate class for particular products and services. See [TMEP §1401.02\(c\)](#). See also the Explanatory Notes at the end of each class heading of goods or services. [TMEP §1401.02\(a\)](#). These notes explain the principles and differentiating lines on which the international classes are based.

The General Remarks of the Nice Agreement set forth general criteria for placing goods or services in the international classes. See [TMEP §1401.02\(a\)](#).

### **1401.05(a) Identification and Classification of Kits, Gift Baskets, and Items Sold as a Unit**

The USPTO permits registration of a kit or gift basket in a single international class, even if the identification of goods lists items that are classified in other classes. Generally, kits are identified and classified in two ways. If the kit is for the purpose of making a single object, it would be classified by the item it is intended to make (e.g., kits for making bird feeders would be classified in Class 21, even though the individual components would be classified in other classes). If the applicant is willing to call its kit a "hobby craft kit" and indicate its purpose (e.g., hobby craft kit for making pot holders), the item can be classified in Class 28 as a kind of toy or amusement product. In addition, although certain types of kits are deemed acceptable for identification and classification purposes without listing the individual components (e.g., face painting kits and teeth whitening kits in Class 3, and first aid kits and ovulation test kits in Class 5), in general, the identification must indicate the type of kit and the principal components.

If the kit is a combination of a number of items around a theme (e.g., nail care kits and student "survival" kits), the class that includes the majority of individual items in the kit controls the classification for the entire kit. Thus, a nail care kit comprising primarily nail polish, nail polish remover, and false nails is classified in Class 3 even if it also includes nail files (Class 8) and an instruction manual (Class 16). In such cases,

the identification must indicate the type of kit and list the components, with the items in the predominant class listed first. If the components of the kit do not appear to have a predominant class (e.g., the kit contains two or three items, each in a different class), the applicant may elect which class(es) the kit should be in, but the identification must still list the goods that control the class first in the list of components. A few specific types of kits are listed in the ID Manual; other kits are classified on a case-by-case basis.

The same criteria are applied to the classification of gift baskets.

Similarly, a product may comprise items that are sold as a unit and that, if sold separately, would be classified in different classes. The identification in such cases should include wording to indicate that the goods are “sold as a unit.” The predominant elements should be listed first and the item will be classified accordingly.

*Example* - Computer software is classified in Class 9. Instructional manuals are classified in Class 16. The item “Computer software for investment management and instructional manuals related thereto, sold as a unit” would be classified in Class 9. “Instructional manuals in the field of investment management and computer software relating thereto, sold as a unit” would be classified in Class 16.

### **1401.05(b) Medical vs. Non-Medical Goods**

It is sometimes difficult to determine whether certain pieces of apparatus are classified in Class 9 or Class 10. Class 9 goods include those used for scientific research or industrial purposes, while Class 10 goods are used for medical treatment or diagnostic purposes. This distinction may mean that the same goods could be classified in either class depending upon their use. However, even if the goods perform the same function, they are often different in nature, depending on whether they are for industrial or research use, or for medical treatment or diagnostic use. For example, a thermometer for medical use is in Class 10, while thermometers other than for medical use are in Class 9. While both items measure temperature, they are usually very different in nature.

Some goods are classified in Class 10 when they are for medical use and in another class when they are not for medical use. An item should be specified as being for medical use if it could be in a class other than Class 10 when not for medical use. For example, lasers for medical use are in Class 10, while lasers not for medical use are in Class 9. Items for use by invalids or handicapped individuals are also classified in Class 10. Thus, toilets adapted for handicapped persons are in Class 10, while toilets (without any further specification) are in Class 11. Finally, if an item is normally not classified in Class 10 ( *see* the Class 11 example above), it is not necessary to specify that it is not for medical use when it is classified in its normal class. When that item is used for medical purposes, the medical use must be specified in order to justify its classification in Class 10. If it is possible for an item to be commonly used for medical or non-medical purposes, its purpose must be specified in the identification in order for it to be classified appropriately ( *see* the example regarding lasers above).

### **1401.05(c) Classification and Plurality of Uses**

A product that has a plurality of uses or aspects is ordinarily classified in a single class. *Ex parte Schatz*, 87 USPQ 374 (Comm’r Pats. 1950). However, if it can be shown that a product has a plurality of uses or aspects so that two or more classes apply, multiple classification may be permissible. If a product is normally classified in a particular class, an applicant cannot obtain registration in another class merely by identifying an ultimate use of the product in goods that fall in the other class.

*Example* - Essential oils are classified in Class 3. This item cannot be classified in Class 1 with an indication that it is used in the manufacture of other finished products. Raw or unfinished materials that are used in the manufacture of other finished products may be classified in Class 1. However, an item like essential oils, which is always classified in Class 3 regardless of its ultimate use, cannot be transferred to Class 1 by adding Class 1 qualifying language.

When classification in multiple classes is appropriate, the identification must clearly indicate the basis for multiple classifications with language that is appropriate for the respective classes. Identical language cannot be used. For example, the USPTO will not accept the identification “clock radios,” because it is unclear what the goods are and in which class the goods fall - Class 9 for radios or Class 14 for clocks. However, the applicant may adopt either or both of the following identifications - “radios incorporating clocks” in Class 9 or “clocks incorporating radios” in Class 14.

Certain services may also be classified in multiple classes on the basis of the purpose for which the service activity is rendered. While services are in principle classified according to the branches of activities specified in the headings of the service classes and in their Explanatory Notes, if an activity is not specified by any class heading, the purpose may determine classification.

*Example* – Layout services are classified in Class 35 when specified to be “for advertising purposes” and are classified in Class 41 when specified to be “other than for advertising purposes.”

In an application under §1 of the Trademark Act, the specimen(s) should reflect acceptable use of the mark for each of the specified classes and the record must not indicate that the product has only one use or aspect.

*See The Procter & Gamble Co. v. Economics Laboratory, Inc.*, 175 USPQ 505 (TTAB 1972), *modified without opinion*, 495 F.2d 1360, 181 USPQ 722 (C.C.P.A. 1974); *In re International Salt Co.*, 166 USPQ 215 (TTAB 1970); *Mead Johnson Co. v. Watson*, 112 USPQ 284 (D.D.C. 1957), *aff’d* 253 F.2d 862, 117 USPQ 13 (D.C. Cir. 1958).

Where a single specimen supports multiple classes, the examining attorney need not require multiple copies of the specimen. *See* [TMEP §904.01](#).

Where a single product or service is classified in more than one class, the applicant must also comply with all other requirements for multiple-class applications. *See* [TMEP §1403.01](#).

### **1401.05(d) Identification and Classification of “Systems”**

In general, the USPTO will not accept identifications of goods described as “systems” because the terminology is considered indefinite. *See* [TMEP §§1402.01, 1402.01\(a\)](#). If the applicant submits an indefinite identification of goods described as “systems,” (e.g., lawn-care systems), the examining attorney must require an amendment to the identification. The amended identification must specify the nature, purpose, or use of the system and its primary parts or components. The system is classified in the same class as the primary parts or components. For example, lawn-care systems comprised of lawn mowers and herbicides are in Class 7, which is the same class as the lawn mowers; lawn-care systems comprised of herbicides, pesticides, and lawn sprinklers are in Class 5, which is the same class as the herbicides and pesticides.

Although USPTO policy generally requires further specificity of “systems,” the USPTO may accept this wording when the identification is a generic term for a particular category of goods classified in a single international class. For example, “brake systems for vehicles” is an acceptable identification in Class 12 because it is a generic term for a combination of goods functioning as a unit to brake the vehicle. The ID Manual also lists additional acceptable wording for specific types of systems.

### **1401.05(e) Identification and Classification of “Food Additives”**

Under the 10th edition of the Nice Agreement, identifications of goods in the nature of food additives must indicate the generic name of the product (e.g., lecithin, glucose, or pectin) as well as the purpose of the food additive. *See* [TMEP §1401.11\(c\)](#) for further explanation.

Proper classification may be based on purpose (e.g., industrial purpose as a raw ingredient for manufacturing food, medical purpose as a dietary supplement, or culinary purpose). In the case of food additives for culinary purposes, the particular characteristics of the substance(s) may affect classification. For example, “lecithin for culinary purposes” is classified in Class 29 because lecithin is a fat-like substance found in the cell membranes of plants and animals, and “edible fats” are in the Class 29 class heading. “Glucose for culinary purposes,” however, is classified in Class 30 because glucose is a sugar-like substance, and “sugar” is in the Class 30 class heading.

### **1401.06 Specimen(s) as Related to Classification**

As a general rule, the specimen(s) in an application under §1 of the Trademark Act helps to determine the correct classification. The examining attorney should carefully review the specimen to ensure that the identification and classification of the goods and/or services is accurate. If the information on the specimen and the wording of the identification differ, or if some significant characteristic shown in the specimen is omitted from the identification, the assigned class number may be incorrect. See [TMEP §1402.05](#). However, the examining attorney must remember that, generally, a specimen need only support use of the mark on one item in each class of goods or services set forth in an application. See [TMEP §904.01\(a\)](#).

### **1401.07 Specimen Discloses Special Characteristics**

The classification of goods could be affected if the specimen shows that the mark identifies a composition, an ingredient, or a part that exists in the market only as a component of another product, but the identification does not reveal that the item exists only as a component of a specified product.

If the specimen indicates that the goods are promoted for industrial use only, this should be reflected in the identification when it affects the designation of the correct class. For example, detergents for use in industrial and manufacturing processes are classified in Class 1, not in Class 3 where other detergents are classified.

If the specimen shows that the mark identifies a structural part of a machine, this should be reflected in the identification, because parts for machines are generally classified with the machine if the part has no applicability elsewhere.

If the mark is used or intended to be used on raw materials such as plastics or resins which may be marketed in a variety of forms (such as sheets, powders, or solutions, or as materials that may be either natural or synthetic), these facts should be indicated in the identification of the goods. This is important because some raw materials are classified in several international classes; for example, plastic in sheet form is in a different class from plastic in powder form, and synthetic materials are in a different class from those that are natural. Usually, a specimen will disclose these characteristics of raw materials.

If the specimen indicates that a product is made of a particular material, the identification should specify the material, because many finished products are classified on the basis of the material composition of the article. Generally, if a classification is dedicated to a particular type of goods, the material composition for those goods does not have to be indicated in the identification. For example, Class 20 is the proper class for furniture. This is true even when the furniture is made of metal. Metal furniture is not classified in Class 6 with other metal products because there is an acceptable class (Class 20) for all furniture regardless of material composition. On the other hand, ladders do not have a specifically designated class, and therefore

they are classified by material composition: metal ladders are in Class 6; wood or plastic ladders are in Class 20; and rope ladders are in Class 22.

### **1401.08 Classification and the Identification of Goods and Services**

The items listed in the identification of goods and services must be limited to those on or in connection with which the applicant uses or has a bona fide intention to use the mark in commerce. The entire contents of a class, as represented by the short title of the class, should not be set forth as the identification of goods or services. The short titles of the classes indicate the general scope of the classes and are generally too broad and inclusive to be used to identify particular goods or services.

### **1401.09 Changes in Practice Based on the Restructuring of International Class 42 in the 8th Edition of the Nice Agreement**

Effective January 1, 2002, the Nice Agreement Concerning the International Classification of Goods and Services for the Purposes of the Registration of Marks (“Nice Agreement”) was amended to add three new service classes (Classes 43 through 45). These new classes arose from the extensive restructuring of Class 42. In the course of that restructuring, many activities were removed from Class 42 and placed in one of the three new classes.

The purpose of the Nice Classification is to group, as much as possible, like goods or services in a single class. Generally, the system is successful in achieving that purpose. However, over the years, it became apparent that Class 42 included many disparate services. This was due in large part to the inclusion of the language “services that cannot be classified in other classes” in the class heading for Class 42. This language allowed services as different as “chemical research” and “horoscope casting” to be included in the class.

Therefore, after much study and discussion, the Committee of Experts for the Nice Agreement approved the restructuring of Class 42. The restructuring amended Class 42 by limiting the scope of the services included in this class to computer, scientific, and legal services, and created three additional classes that grouped services previously classified in Class 42 into new classes that kept like services grouped together.

See [TMEP §1401.02\(a\)](#); see also [TMEP §1401.10\(a\)](#) regarding later reclassification of legal services to Class 45.

Effective January 1, 2002, the language “services that cannot be classified in other classes,” which previously appeared in the class heading of Class 42, was eliminated. See [TMEP §1401.09\(a\)](#).

#### **1401.09(a) Elimination of “Miscellaneous Class Designation”**

Prior to January 1, 2002, the language “services that cannot be classified in other classes” appeared in the class heading of Class 42. Effective January 1, 2002, this language no longer appears in any of the class headings or explanatory notes of the Nice Agreement. The Committee of Experts found that the revision of the Nice Agreement created an adequate number of well-defined classes so that this language was no longer necessary. Services must now be identified with sufficient clarity and precision to allow for appropriate classification in one of the eleven service classes.

See [TMEP §§1402.11](#) *et seq.* for further information about the changes in identification and classification of services.

## **1401.10 General Summary of Major Changes in Practice Based on the 9th Edition of the Nice Agreement**

The requirements of the 9th edition of the Nice Agreement apply to applications filed on or after January 1, 2007. For applications filed on or after the effective date of the 10th edition (i.e., January 1, 2012), any changes in practice brought about by the 10th edition supersede the 9th edition to the extent any inconsistency exists. See [TMEP §§1401.11-1401.11\(e\)](#) for the general summary of changes in practice based on the 10th edition of the Nice Agreement.

The most notable changes under the 9th edition are: the transfer of all legal services from Class 42 to Class 45; the determination that items made of precious metals should be classified according to their function rather than in Class 14 merely because they are made of precious metal; and the transfer of aquaria and related items from Class 16 to Class 21. These changes are discussed below.

### **1401.10(a) Legal Services Transferred to International Class 45**

Effective January 1, 2007, legal services were transferred from Class 42 to Class 45. Class 42 is now limited to purely computer, scientific, technological, engineering, and design services.

In 2002, when the Nice Agreement was amended to add three new service classes, Class 42 was restructured, but legal services remained in Class 42. However, over the five-year revision period that led to the 9th edition, it became apparent that Class 42 was not the most appropriate class for these services. The ultimate decision to include these services in Class 45 was based on an item in the class heading for Class 45 - "security services for the protection of property and individuals." The Committee of Experts reasoned that legal services are an extension of the security services already in Class 45. Security services provide for the protection of property and individuals, and the enforcement of that security is in the hands of the legal profession.

### **1401.10(b) Goods Made of Precious Metal are Classified According to Their Function**

Class 14 went through the most extensive revision of all of the classes in the 9th edition of the Nice Agreement. The Committee of Experts decided that items made of precious metal that were classified in other classes based on their function when not made of precious metal, should also be classified in those classes. Goods made of precious metal that are not classified by function, but rather by material composition, e.g., statues, figurines, and key holders, are still classified in Class 14. This decision eliminated much of the confusion in this class caused by some goods being listed in Class 14 when made of precious metal and in other classes when not made of precious metal, while other goods were classified according to function without reference to any particular material composition. For example, nutcrackers were classified in Class 14 when made of precious metal and in Class 8 when not made of precious metal. However, cutlery, namely forks, knives, and spoons were classified only in Class 8, even if made of precious metal, even though it is

not uncommon for cutlery to be made of precious metal. The changes in the 9th edition were intended to eliminate this inconsistency.

### **1401.10(c) Transfer of Aquaria and Related Items**

Indoor aquaria, its related accessory aquarium hoods, and indoor terrariums [vivariums] were previously classified in Class 16 because they were considered educational. This may have been true when they were first introduced into the Nice Agreement list, but that is a minimal or secondary use today. Most often, these goods are found in homes or offices as hobby or decorative items. They are traditionally made of glass so that the contents are visible. Therefore, they were transferred to Class 21, the main class for other glass items. Other aquarium items with specific uses or functions remain in their 8th edition classes. These items include aerating pumps for aquaria in Class 7, aquarium gravel and sand in Class 19, and aquarium lights, heaters, and filtering apparatus in Class 11. However, large public aquaria that are, in fact, structures are classified in Class 19, since they are made primarily from nonmetallic materials. The aquaria transferred from Class 16 to Class 21 are those that may be found in homes or offices and would not be considered structures in the nature of a building.

### **1401.11 General Summary of Major Changes in Practice Based on the 10th Edition of the Nice Agreement**

A number of changes in the international classification of goods and services occurred in connection with the 10th edition of the Nice Classification System, which went into effect January 1, 2012. Thus, the requirements of the 10th edition apply only to applications filed on or after January 1, 2012. Several notable changes are discussed below. A comprehensive view of the changes and their impact on USPTO identification and classification policy can be found in the *International Classification of Goods and Services for the Purposes of the Registration of Marks* (10th ed. 2011), published by the World Intellectual Property Organization and available online at <http://www.wipo.int>, and the ID Manual, available via the USPTO website at <http://tess2.uspto.gov/netahtml/tidm.html>.

#### **1401.11(a) Electric/Electrothermic Goods**

Under the 10th edition, a number of electric/electrothermic goods that were previously in Class 9 are now classified in the same class as their non-electric or non-electrothermic counterparts. Electric/electrothermic goods transferred from Class 9 to Class 7 include vending machines, electric door openers, and electrodes for welding machines. Cigar lighters for automobiles were transferred from Class 9 to Class 12 (as a land vehicle part). Automatic turnstiles were deleted from Class 9 because they are considered building materials and thus are classified according to material composition, with metal turnstiles classified in Class 6 and non-metal turnstiles classified in Class 19. The ID Manual should be consulted for the identification and classification of other electric/electrothermic goods.

#### **1401.11(b) Amusement and Game-Playing Apparatus**

Under the 9th edition, “hand-held units for playing electronic games for use with external display screens or monitors” were classified in Class 9, and “hand-held units for playing electronic games other than those for use with external display screens or monitors” were classified in Class 28. Under the 10th edition, all

amusement and game-playing apparatus, whether for use with an external monitor or display screen or having a built-in monitor or display screen, is classified in Class 28.

### **1401.11(c) Food Additives**

Under the 10th edition Nice Alphabetical List, food additives are classified in Classes 1, 5, and 29-33 according to their particular purposes. Previously, the Nice Alphabetical List recognized only two types of food additives - those for medical purposes in Class 5 and those in the nature of raw materials in Class 1. The 9th edition was silent on the classification of food additives used as ingredients in cooking and/or baking for domestic purposes. Under the 10th edition, food additives for industrial purposes, including those for use in manufacturing food, are classified in Class 1. Additionally, food additives for medical purposes and for use as dietary supplements are classified in Class 5, and food additives for culinary purposes are classified in Classes 29-33, according to the particular nature of the food additive. The 10th edition also requires that the food additive be specifically named (e.g., “lecithin for culinary purposes” in Class 29). This requirement is especially important when the food additives are for culinary purposes because classification of such goods is determined by their nature.

### **1401.11(d) Dietetic Substances and Meal Replacements**

The 10th edition amended the Class 5 class heading to include “meal replacements, dietetic food and beverages, adapted for medical or veterinary use.” For classification in Class 5, these three items must be identified as being “adapted for medical use” (or include other language indicating that these items are adapted for a particular medical use) to make clear that their purpose and use are not as part of a regular diet for human beings or animals. The specific meal replacement, dietetic food, or dietetic beverage item must also be indicated.

The Class 5 class heading was also amended to exclude “meal replacements, dietetic food and beverages not for medical or veterinary consumption (Cl. 29, 30, 31, 32 or 33).” This specific exclusion is a corollary to the inclusion discussed above. Previously, all meal replacements were classified in Class 5, and the Nice Agreement was silent regarding how to classify dietetic food and beverages that were not for medical or veterinary purposes. Meal replacements and dietetic food and beverages that are not for medical or veterinary use must now be identified with adequate specificity to determine the particular food or beverages classes in which they should be classified.

### **1401.11(e) Marketing Services**

“Marketing” was added to the Nice Alphabetical List, in Class 35, under the 10th edition. The Nice Agreement was previously silent regarding marketing services. The addition of “marketing” reflects the recognition by the Committee of Experts that the most common use of the term “marketing” refers to promoting the goods and services of others.

## **1401.12 Implementation of Changes to the Nice Agreement**

When a new edition of the Nice Agreement is issued, any changes apply only to applications filed on or after the effective date of the change. 37 C.F.R. §2.85(e)(1). In a §1 or §44 application filed before the effective date of the change, the examining attorney may give the applicant the option of remaining in compliance with the edition of the Nice Agreement that was in effect on the application filing date or amending the application to comply with the requirements of the current edition. The applicant may, of its own accord, submit an amendment to its application that brings it into compliance with the current edition

of the Nice Agreement. However, if an applicant chooses to comply with the current edition, the applicant must comply with the current edition for all the goods and/or services in the application, and the applicant must pay the fees for any added class(es) resulting from changes in the current edition. 37 C.F.R. §2.85(e)(2). An applicant cannot choose to have some items comply with the current edition and other items comply with the requirements of a previous edition.

### **1401.13 Effective Date of Changes to USPTO ID Manual**

The “Effective Date” field in the ID Manual indicates the date on which the status (i.e., Added, Modified, or Deleted) of a particular entry went into effect. When the “effective date” field in the manual changes, the new requirements established by that particular entry apply only to applications filed on or after the date of the change. In a §1 or §44 application filed before the effective date of the change, the examining attorney may give the applicant the choice to either keep the existing identification and/or class or amend to the new identification and/or class. However, if an applicant chooses to comply with the new identification and/or class, the applicant must pay the fees for any added class(es) resulting from the change. 37 C.F.R. §2.6(a)(1). Therefore, if an Office action is issued before the effective date, and the action is inconsistent with the new or modified entry, the applicant may be given the choice to either keep the existing identification and/or class or amend to the new identification and/or class if a subsequent Office action is issued. However, if a first Office action is issued on or after the effective date, any *amendment* to the specific portion of the identification or classification that relates to a previously acceptable identification and/or classification must comply with the new or modified entry.

## **1402 Identification of Goods and Services**

### **1402.01 Specifying the Goods and/or Services - in General**

A written application must specify the particular goods and/or services on or in connection with which the applicant uses, or has a bona fide intention to use, the mark in commerce. 15 U.S.C. §§1051(a)(2) and 1051(b)(2); 37 C.F.R. §2.32(a)(6). To “specify” means to name in an explicit manner. The identification should set forth common names, using terminology that is generally understood. For products or services that do not have common names, the applicant should use clear and succinct language to describe or explain the item. Technical or esoteric language and lengthy descriptions of characteristics or uses are not appropriate.

The language used to describe goods and/or services should be understandable to the average person and should not require an in-depth knowledge of the relevant field. An identification may include terms of art in a particular field or industry, but, if these terms are not widely understood by the general population, the identification should include an explanation of the specialized terminology.

The identification of goods and/or services must be specific, definite, clear, accurate, and concise. *See In re Societe Generale des Eaux Minerales de Vittel S.A.*, 1 USPQ2d 1296 (TTAB 1986), rev’d on other grounds, 824 F.2d 957, 3 USPQ2d 1450 (Fed. Cir. 1987); *The Procter & Gamble Co. v. Economics Laboratory, Inc.*, 175 USPQ 505 (TTAB 1972), modified without opinion, 498 F.2d 1406, 181 USPQ 722 (C.C.P.A. 1974); *In re Cardinal Laboratories, Inc.*, 149 USPQ 709 (TTAB 1966); *California Spray-Chemical Corp. v. Osmose Wood Preserving Co. of America, Inc.*, 102 USPQ 321 (Comm’r Pats. 1954); *Ex parte The A.C. Gilbert Co.*, 99 USPQ 344 (Comm’r Pats. 1953).

The applicant must identify the goods and services specifically to provide public notice and to enable the USPTO to classify the goods and services properly and to reach informed judgments concerning likelihood of confusion under 15 U.S.C. §1052(d). The USPTO has discretion to require the degree of particularity

deemed necessary to clearly identify the goods and/or services covered by the mark. *In re Omega SA*, 494 F.3d 1362, 83 USPQ2d 1541 (Fed. Cir. 2007).

Terminology that includes items in more than one class is considered indefinite, even with such additional wording as “included in this class” at the end of the identification. *See id.* (“chronographs” held indefinite because it includes both time recording devices in Class 9 and watches in Class 14 and because merely classifying the goods in only one of the classes does not preclude a requirement for further specificity in the identification).

*Example:* “Blankets” is not acceptable without qualifying wording because it is not particular enough to identify the kind of blanket on which the mark is used, e.g., fire blankets (Class 9), electric blankets (Class 11), horse blankets (Class 18), and bed blankets (Class 24).

However, the conclusion that a term would clearly include items classified in more than one class should not be drawn unless reasonable, in light of the evidence of record. *See In re Thor Tech, Inc.*, 85 USPQ2d 1474 (TTAB 2007) (“park trailer” held to be an acceptable identification, where the applicant’s evidence showed that it is a term of art generally understood by those in the industry and by consumers as a designation for a type of recreational vehicle, which unambiguously places it in Class 12; Board was not persuaded by the examining attorney’s argument that the identification was indefinite because it could also encompass mobile homes in Class 19.).

The accuracy of identification language in the original application is important because the identification cannot later be expanded. *See* 37 C.F.R. §2.71(a); TMEP §§[1402.06](#) *et seq.* and [1402.07](#) *et seq.*; *In re M.V Et Associes*, 21 USPQ2d 1628 (Comm’r Pats. 1991).

See [TMEP §1306.06\(e\)](#) regarding the identification of goods and services in certification mark applications and [TMEP §1304.08\(d\)](#) regarding identification language in collective membership mark applications.

### **1402.01(a) General Guidelines for Acceptable Identifications of Goods or Services**

With few exceptions, an identification of goods and services will be considered acceptable if it:

- Describes the goods and/or services so that an English speaker could understand what the goods and/or services are, even if the grammar or phrasing is not optimal;
- Meets the *standards* (not necessarily the language) set forth in the ID Manual;
- Is not a class heading; and
- Is in the correct class, i.e., there is no language in the identification that makes classification difficult or ambiguous; each class lists goods or services that are clearly in a single class.

Deference should be given to the language set forth by the applicant in the original application.

If an identification contains spelling errors, the examining attorney must require correction. Obvious spelling errors in an identification may be corrected by examiner’s amendment without contacting the applicant.

*See* [TMEP §707.02](#). However, British variants of American spellings (e.g., colour, vapour, and organise) are acceptable and need not be changed.

In general, commas should be used in the identification to separate items within a particular category of goods or services. When the items are preceded by the word “namely,” a comma should always be used before and after that term. For example, “clothing, namely, hats, caps, sweaters, and jeans” is an acceptable identification of goods in Class 25 and shows proper use of commas.

Semicolons should generally be used to separate distinct categories of goods or services within a single class. For example, “cleaners, namely, glass cleaners, oven cleaners, and carpet cleaners; deodorizers for pets” is an acceptable identification in Class 3. In this example, the word “cleaners” names the category covering “glass cleaners, oven cleaners, and carpet cleaners.” The semicolon prior to “deodorizers for pets” indicates that the deodorizers are a separate category of goods from the cleaners. See *In re Midwest Gaming & Entm’t LLC*, 106 USPQ2d 1163, 1166 (TTAB 2013) (finding that, because a semicolon separated the two relevant clauses in registrant’s identification, its “restaurant and bar services” is a discrete category of services that stands alone and independently as a basis for likelihood-of-confusion analysis, and is not connected to nor dependent on the services set out on the other side of the semicolon).

Care should be taken to use commas and semicolons properly when identifying items that are part of a kit. In general, items that are to be sold together (e.g., as components of a system or kit) should be separated by commas. However, other goods within the same class that are to be sold independently of the kit or system should be separated by semicolons. This is an exception to the general rule regarding using semicolons to separate categories of goods. Here the semicolons are used to separate items that in a non-kit identification would be separated by commas. For example, an identification that includes kits comprised of several items, as well as other goods sold independently from the kits, should be punctuated as follows: “beauty supplies, namely, makeup kits comprised of makeup, lipstick, eye shadow, and applicator brushes; skin lotions; moisturizing soaps; and facial scrubs.” The use of “and” before “applicator brushes” indicates that they are the final items contained in the kit. The use of semicolons indicates that “skin lotions,” “moisturizing soaps,” and “facial scrubs” are separate items and are not included in the make-up kits.

Colons and periods should not be used as punctuation within the identification of goods and services.

### **1402.01(b) Identification of Goods and Services in a §44 Application**

The identification of goods and services in an application based on §44 of the Trademark Act, 15 U.S.C. §1126, must comply with the same standards that govern other applications. The applicant must identify the goods and services specifically, to enable the USPTO to classify the goods and services properly and to reach informed judgments concerning likelihood of confusion under 15 U.S.C. §1052(d).

Foreign registrations often include broad statements identifying the goods and services. In many cases, the identification is merely a repetition of the entire general class heading for a given class. These broad identifications are generally unacceptable in United States applications. The identification of goods and/or services in the United States application must be definite and specific even if the foreign registration includes an overly broad identification. See *In re Omega SA*, 494 F.3d 1362, 83 USPQ2d 1541 (Fed. Cir. 2007) (noting that the USPTO has discretion to require greater particularity than an entry in WIPO’s Alphabetical List of goods and services); *In re Fiat Grp. Mktg. & Corporate Commc’ns S.p.A.*, 109 USPQ2d 1593 (TTAB 2014); *In re Societe Generale des Eaux Minerales de Vittel S.A.*, 1 USPQ2d 1296, 1298 (TTAB 1986), *rev’d on other grounds*, 824 F.2d 957, 3 USPQ2d 1450 (Fed. Cir. 1987).

Furthermore, in an application based on §44 of the Trademark Act, the identification of goods and services covered by the §44 basis in the United States application may not exceed the scope of the goods and services identified in the foreign registration. *Marmark Ltd. v. Nutrexpa, S.A.*, 12 USPQ2d 1843 (TTAB 1989); *In re Löwenbräu München*, 175 USPQ 178 (TTAB 1972). However, if the applicant also relies on use in commerce under §1(a) or intent-to-use in commerce under §1(b) as a filing basis, the identification may include goods or services not listed in the foreign registration, if the applicant specifically limits the §44 basis to the goods and/or services covered by the foreign registration. 37 C.F.R. §2.32(a)(6). See [TMEP §§806.02 et seq.](#) regarding multiple-basis applications.

If a foreign registration in a single class includes a broad statement identifying the goods or services and the USPTO determines that the goods or services identified are in more than one class, the applicant may rely on the same foreign registration to cover the additional classes in the United States application, provided that the identification in the foreign registration encompasses all goods and/or services identified in the United States application and the applicant pays the fees to add the additional classes in the United States application. See [TMEP §§1403](#) *et seq.* regarding multiple-class applications.

### **1402.01(c) Identification and Classification of Goods and Services in a §66(a) Application**

The identification of goods and services in an application based on §66(a) of the Trademark Act, 15 U.S.C. §1141f(a), must comply with the same standards that govern applications under §1 or §44. The applicant must identify the goods and services specifically to provide public notice and to enable the USPTO to reach informed judgments concerning likelihood of confusion under 15 U.S.C. §1052(d).

The examining attorney will examine the identification of goods and/or services in a §66(a) application according to the same standards of specificity used in examining applications under §1 and §44 of the Trademark Act, 15 U.S.C. §§1051 and 1126. That is, the examining attorney must follow the procedures set forth in the TMEP and identify the goods and/or services in accordance with the principles set forth in the ID Manual, whenever possible. Thus, although international registrations often include broad statements identifying the goods and services, and in many cases use the entire class heading for a given class, these broad identifications are generally unacceptable in United States applications. The identification of goods and/or services in the request for extension of protection to the United States must be definite and specific even if the international registration includes an overly broad identification. *See In re Omega SA*, 494 F.3d 1362, 83 USPQ2d 1541 (Fed. Cir. 2007) (noting that the USPTO has discretion to require greater particularity than an entry in WIPO's Alphabetical List of goods and services).

When the original identification of goods and/or services in a §66(a) application is definite, but misclassified under United States standards, the examining attorney must accept the identification.

The international classification of goods and/or services in a §66(a) application **cannot be changed** from the classification assigned by the IB. If the IB's classification of goods or services in the §66(a) application is different from the classification set forth in the ID Manual, the examining attorney will not request an amendment of the classification. In addition, the goods or services cannot be moved to another class identified in the application. 37 C.F.R. §2.85(d); [TMEP §§1401.03\(d\)](#) and [1904.02\(b\)](#). The examining attorney should notify the Office of the Administrator for Trademark Classification Policy and Practice of each occurrence of definite, misclassified goods or services.

When a proposed amendment to the identification is definite, but describes goods and/or services in a class other than the original class assigned by the IB, the examining attorney will not accept it because the amended identification is outside the scope of the original goods and/or services. Because the international registration is limited to the class(es) assigned by the IB, any amendments to the identification of goods/services may only include goods or services that are properly within the scope of the class(es) set out in the §66(a) application. The inclusion of any goods and/or services outside of the scope of the IB-assigned class(es) in a §66(a) application would result in the lack of a basis for registration of such goods/services under U.S.

law. See also [TMPEP §§1904.02\(c\)](#) *et seq.* regarding the examination of the identification of goods and services in a §66(a) application.

### **1402.01(d) Location of “Identification of Goods and Services”**

*Paper Application.* If the applicant submits a separate drawing page in a paper application, this page is considered part of the written application and not a separate element. Any goods or services listed on the drawing page in a paper application will be considered part of the “identification of goods and services,” even if they do not appear within the body of the application.

There is no requirement that goods or services be listed in any particular place within the body of a written paper application. See *In re Atlantic Scientific Corp.*, 47 USPQ2d 1959 (Comm'r Pats. 1998). However, goods or services referenced only on the specimen(s) are not considered part of the identification.

*TEAS or TEAS Plus Application.* In a TEAS or TEAS Plus application, only goods and/or services listed in the proper field will be considered part of the identification.

*§66(a) Application.* In an application under §66(a), the listing of goods and/or services for which the holder of an international registration seeks protection in the United States is transmitted to the USPTO from the IB. The goods and/or services may be all of those listed in the international registration – the “basic goods/services.” Alternatively, the holder of an international registration may seek protection for less than all the goods/services listed in the international registration. In such cases, in addition to the “Basic Goods/Services,” the §66(a) application will contain “Limitation” details. The “limited” goods/services are the operative goods/services for the purposes of examination. Further limitations may be transmitted from the IB. Such limitations are processed by the Madrid Processing Unit (MPU) and examining attorneys are notified of changes as appropriate. See [TMPEP §1904.02\(e\)\(ii\)](#) regarding limitations.

### **1402.01(e) Responsibilities of Examining Attorney as to Identification**

It is the applicant’s duty and prerogative to identify the goods and services. However, the examining attorney may require amendment of the identification of goods and/or services to ensure that it is clear and accurate and conforms to the requirements of the statute and rules. The examining attorney should explain clearly and concisely the reason for requiring an amendment.

Under 37 C.F.R. §2.61(b), the examining attorney may require information and evidence, if necessary, to ascertain the nature of the goods and/or services or otherwise permit proper examination of the application.

See [TMPEP §814](#).

When requiring amendment to the identification, the examining attorney should advise the applicant that goods or services deleted by amendment may not be reinserted at a later point in prosecution. See [TMPEP §§1402.06\(a\)](#) and [1402.07\(e\)](#). Examining attorneys should take particular care to ensure that *pro se* applicants are aware of the restrictions on amendments to the identification of goods and services.

To determine proper classification and the acceptability of the language in an identification of goods and/or services, the examining attorney should refer to the resources provided by the USPTO relating to the principles of classification under the Nice Agreement and USPTO practices with regard to specificity of goods and services. After consulting these resources, if the examining attorney is uncertain as to the proper classification or acceptability of language in an identification, he or she should consult with a senior or managing attorney.

If the issue still remains unresolved, questions about policy and practice regarding the goods or services at issue may be referred to the Office of the Administrator for Trademark Classification Policy and Practice.

The examining attorney has the discretion to issue a final refusal based on a requirement to amend the identification of goods and/or services. Examining attorneys should make every effort to resolve these issues, and should suggest an acceptable identification, if possible. The Office of the Administrator for Trademark Classification Policy and Practice should be consulted, whenever necessary, to resolve identification and classification issues that are the subjects of appeals, and copies of appeal briefs that involve those issues should be sent to the Office of the Administrator for monitoring purposes.

See §§718.02(a) and 1402.13 for information regarding a requirement for an amendment of the identification of goods and/or services that is expressly limited to only certain goods/services.

## **1402.02 Entitlement to Filing Date With Respect to Identification of Goods and Services**

An application under §1 or §44 must include an identification of goods or services to receive a filing date. 37 C.F.R. §2.21(a)(4).

Effective October 30, 1999, any goods or services listed on the drawing page of a paper application are considered part of the “identification of goods and services.” However, only goods and/or services listed in the proper field on a TEAS or TEAS Plus application will be considered for determining whether the application meets the requirements for receipt of a filing date.

If the application does not identify any recognizable goods or services, the USPTO will deny a filing date. For example, a filing date will be denied if the identification of goods or services is blank or recites only the following:

- (1) the mark itself;
- (2) a class number;
- (3) wording such as “company name,” “corporate name,” or “company logo;”
- (4) “Internet services” or “e-commerce services;”
- (5) “business” or “business services;”
- (6) “miscellaneous” or “miscellaneous services;” or
- (7) “personal services.”

These examples fail to meet the minimum requirements necessary to receive a filing date under 37 C.F.R. §2.21(a)(4), because they do not provide adequate notice to third parties as to the nature of the goods or services.

In an application under §1 or §44, if an examining attorney finds that the application fails to specify any recognizable goods or services, the examining attorney should have the filing date cancelled for failure to specify recognizable goods or services, under 37 C.F.R. §2.21(a)(4).

If the identification language includes wording that would not be sufficient and other wording that, by itself, would be specific enough to entitle the application to a filing date, the USPTO will grant the application a filing date. However, any wording that would not otherwise be sufficient for a filing date will not be considered part of the application, and will be disregarded for the purpose of determining the scope of permissible amendments. For example, if the applicant uses “e-commerce services” along with definite language, such as “online retail store services featuring clothing,” the identification of services may only

be amended to identify services within the scope of the definite language, i.e., “online retail store services featuring clothing,” and may not include services within the scope of “e-commerce services.” Or, if the applicant uses “advertising and business,” the USPTO will disregard “business,” and the identification may only be amended to services within the scope of the term “advertising.” See [TMEP §§1402.07](#) *et seq.* regarding the scope of an identification for purposes of amendment.

The fact that goods or services are referenced on the specimen(s) does not satisfy the requirement for an “identification of goods or services.” In a paper application, the application documents themselves (i.e., the written application and/or separate drawing page) must contain a reference to the goods and/or services. In a TEAS or TEAS Plus application, the identification of goods and/or services must appear in the proper field. See [TMEP §1402.01\(d\)](#) regarding the location of the identification of goods and/or services.

The USPTO will not deny a filing date if the applicant uses the language of an international class heading or indicates that the mark is used on all goods or services in a certain class. However, the USPTO strongly discourages the use of the language of the international class headings or statements that the mark is used on all goods or services in a class to identify the goods or services for which registration of the mark is sought, and will require amendment of any such identification. See *In re Fiat Grp. Mktg. & Corporate Commc'ns S.p.A.*, 109 USPQ2d 1593, 1598 (TTAB 2014) (stating that “use of the words comprising a class heading as an identification in an application filed with the USPTO is not deemed to include all the goods or services in the established scope of that class”); [TMEP §1402.07\(a\)](#).

*Section 66(a) Applications.* Because the requirements for receipt of a filing date set forth in 37 C.F.R. §2.21 are specifically limited to applications under §1 and §44 of the Trademark Act, 15 U.S.C. §§1051, 1126, the USPTO does not apply these requirements to applications under §66(a) for “filing date” purposes. In an application under §66(a), the date of the international registration, or the effective date of a subsequent designation in which the holder of an international registration seeks extension of protection in the United States, is treated as the effective filing date.

Note also that an applicant is required to submit a verified statement that the applicant is either using the mark in commerce or has a bona fide intention to use the mark in commerce on or in connection with all the goods and/or services set forth in the identification. It is unlikely that any applicant is using or intends to use a mark on all goods or services within a certain class. If an applicant claims use or asserts a bona fide intention to use the mark on all goods/services in a particular class but only uses or intends to use the mark on some of those goods/services, the registration that results could be void. See *In re Bose Corp.*, 580 F.3d 1240, 91 USPQ2d 1938 (Fed. Cir. 2009); *Torres v. Cantine Torresella S.r.l.*, 808 F.2d 46, 1 USPQ2d 1483 (Fed. Cir. 1986).

### **1402.03 Specificity of Terms Used in Identifying Goods and Services**

Applicants frequently use broad terms to identify the goods or services in an application. In applications based solely on §1(a), 15 U.S.C. §1051(a), the applicant must have used the mark in commerce on all of the goods and/or services as of the application filing date. See *First Int'l Services Corp. v. Chuckles, Inc.*, 5 USPQ2d 1628 (TTAB 1987). In applications filed under §1(b), 15 U.S.C. §1051(b), and §44, 15 U.S.C. §1126, the applicant must assert a bona fide intent to use the mark in commerce on or in connection with the specified goods and/or services as of the application filing date. 37 C.F.R. §2.33(b)(2). In an application filed under §66(a), 15 U.S.C. §1141f(a), the verified statement is part of the international registration on file at the IB, and must allege that the applicant/holder has a bona fide intention to use the mark in commerce with the goods/services identified in the international application or subsequent designation. 37 C.F.R. §2.33(e)(1). The requirement for use or a bona fide intent to use is not necessarily violated by broad identifying terms. When a mark is used on a number of items that make up a homogeneous group, a term that identifies

the group as a whole would be understood as encompassing products of the same general type that are commercially related.

As long as a broad term identifies the goods or services that are intended to be covered with reasonable certainty, it will be reasonable, from a commercial viewpoint, to consider that the mark has been used for all the related goods or services that fall in the designated group. See *In re Dynamit Nobel AG*, 169 USPQ 499 (TTAB 1971) (“ammunition” permitted because its scope was assumed to be understood); *In re Port Huron Sulphite & Paper Co.*, 120 USPQ 343 (TTAB 1959) (“paper other than board papers” approved because of evidence of actual use on various types of paper).

Where an applicant has identified its goods or services very broadly but does not use the mark on a substantial number of related goods/services encompassed by the identification language, the USPTO may require further specificity.

The examining attorney must consider the following guidelines:

- (1) A term that clearly includes particular items that are classified in more than one class (e.g., “artists’ materials”) is not acceptable, even with such additional wording as “included in this class” at the end of the identification. See *In re Omega SA*, 494 F.3d 1362, 83 USPQ2d 1541 (Fed. Cir. 2007) (“chronographs” held indefinite because it includes both time-recording devices in Class 9 and watches in Class 14 and because merely classifying the goods in only one of the classes does not preclude a requirement for further specificity in the identification). Other examples are “blankets,” which include such diverse and differently classified types as bed blankets in Class 24, fire blankets in Class 9, and horse blankets in Class 18; “boxes,” which include set top boxes and junction boxes in Class 9, music boxes in Class 15, and boxes for holding things, which are classified according to their material compositions; and “sports equipment,” because the nature of the equipment will determine the class, i.e., a football helmet would be in Class 9; the football uniform would be in Class 25, and the football padding equipment in Class 28. However, the conclusion that a term would clearly include items classified in more than one class should not be drawn unless reasonable, in light of the evidence of record. See *In re Thor Tech, Inc.*, 85 USPQ2d 1474 (TTAB 2007) (“park trailer” held to be an acceptable identification, where the applicant’s evidence showed that it is a term of art generally understood by those in the industry and by consumers as a designation for a type of recreational vehicle, which unambiguously places it in Class 12; Board was not persuaded by the examining attorney’s argument that the identification was indefinite because it could also encompass mobile homes in Class 19). See [TMEP §1402.05\(b\)](#) regarding goods that may be classified in more than one class depending on their material composition.
- (2) Some terminology is sufficient for purposes of according a filing date but too indefinite to enable proper examination (e.g., “metallic parts”). For example, in *In re Societe Des Parfums Schiaparelli, S.A.*, 122 USPQ 349, 350 n.4 (TTAB 1959), clarification of the term “beauty products” was held to be necessary because the term does not have a particular commercial meaning. In such a situation the examining attorney may seek further information under 37 C.F.R. §2.61(b). See [TMEP §814](#).
- (3) In rare instances, an identification may include a term that has multiple, entirely different meanings. If the meaning of such a term can be understood when read in association with the title of the class in which it is placed, and if the term is otherwise satisfactory, the examining attorney need not require amendment to further qualify the term. For example, “mufflers” in the clothing class would not require further modification to indicate that articles of clothing are intended, rather than automotive mufflers. The limited number of items to which this applies, however, represents a narrow exception to the general rule that an identification must itself provide a clear indication of the nature of the goods or services, without reference to the class. See [TMEP §§1402.01](#) and

**1402.05(b).** The title of a class cannot be used to define the nature of the goods when the same item could be classified in more than one class depending on its function, material composition, or field of use. See *In re Omega SA*, 494 F.3d 1362, 83 USPQ2d 1541 (Fed. Cir. 2007) (“chronographs” held indefinite because it includes both chronographs that function as time recording devices in Class 9 and chronographs that function as watches in Class 14). For example, tools are classified in Class 7 if they are power driven or Class 8 if they are not power driven. The identification should include wording to assist in determining whether the tools should be classified in Class 7 or 8 (e.g., “powered,” “non-powered,” “hand tools, namely”).

- (4) The common understanding of words or phrases used in an identification determines the scope and nature of the goods or services. A basic and widely available dictionary should be consulted to determine the definition or understanding of a commonly used word.
- (5) Many goods are commonly understood to move in a particular channel of trade or have particular attributes. When those goods are classified in the class that is appropriate for that common understanding, often no further specification as to the nature of those goods is necessary. However, when the goods have a special use or attributes that are not typically associated with those particular goods that would cause it to be classified in a different class, that use or attribute should be indicated in the identification in order to justify the classification. For example, “skin lotion” usually refers to a cosmetic product - one that is not medicated. For that reason, it can be classified in Class 3 without further specification. However, a skin lotion that is medicated should be classified in Class 5, and the identification should indicate that the product is medicated in order to justify its classification in Class 5 rather than in the more commonly understood and assigned Class 3.

With broad identifications, as with any identification that includes more than one item, the amount of proof (normally by way of specimens) necessary to assure the examining attorney that the mark has been used on “all” the items in the application will vary. See **TMEP §904.01(a)**. The USPTO does not require specimens showing use of the mark for every item set forth in an application. However, if an identification is so broad that it encompasses a wide range of products or services, the applicant may be required to submit evidence that it actually uses the mark on a wide range of products or services to obtain registration. 37 C.F.R. §2.61(b). See *In re Air Products & Chemicals, Inc.*, 192 USPQ 84, *recon. denied* 192 USPQ 157 (TTAB 1976). See **TMEP §1402.05** regarding accuracy of the identification.

The examining attorney should consider the degree of commercial relationship between the products. For a closely related group, a specimen showing use of the mark on one item of the group is sufficient. As the closeness of the relationship becomes less certain, specimens of use on more than one item might be necessary to show generalized use. 37 C.F.R. §2.61(b). The nature of the mark may also be considered. “House” marks are placed on all the goods that a company produces, whereas a “product” mark that is appropriate only for a specific commodity is used only on that commodity. See **TMEP §1402.03(b)** regarding house marks, and **TMEP §1402.03(c)** regarding identifications that refer to “a full line of” a genre of products.

The appropriateness of any broad identification depends on the facts in the particular case. The examining attorney should permit applicants to adopt terms that are as broad as the circumstances justify.

### **1402.03(a) Inclusive Terminology**

The identification should state common names for goods or services, be as complete and specific as possible, and avoid indefinite words and phrases. The terms “including,” “comprising,” “such as,” “and the like,” “and similar goods,” “products,” “concepts,” “like services” and other indefinite terms and phrases are almost always unacceptable.

The terms “namely,” “consisting of,” “particularly,” and “in particular” are definite and are preferred to set forth an identification that requires greater particularity. The examining attorney will require that vague terminology be replaced by these terms (e.g., power tools, namely, drills in Class 7; needle point kits consisting of needles, thread, and patterns in Class 26; or projectors, particularly projectors for the entertainment industry in Class 9).

In limited situations for closely related goods, certain indefinite terms may be used in explanatory phrases that follow a definite term -- for example, “fabric suitable for making coats, suits, and the like.” *See Ex parte The A.C. Gilbert Co.*, 99 USPQ 344 (Comm’r Pats. 1953).

“Parts therefor,” as related to machinery, is acceptable when it follows a definite identification. “Accessories therefor” is usually considered indefinite, but it has been allowed in some cases, particularly in the toy field.

Identifications such as “dolls and accessories therefor” and “toy vehicles and accessories therefor” are acceptable because all goods that fall within that broad designation would be classified in Class 28 with the dolls or toy vehicles and could be the basis for a refusal of registration under 15 U.S.C. §1052(d). However, this phrase should only be used in a situation where it is clear that the goods encompassed by the phrase relate closely to the primary goods and would all be classified in the same class as the primary goods.

### **1402.03(b) House Marks**

House marks are marks used by an entity on a wide range of goods. Marks of this type are often used in the chemical, pharmaceutical, and food fields. A house mark is different from a product mark that is used on a specific item or closely related items. A product may bear both a product mark and a house mark.

Under certain limited circumstances, an applicant may apply to register a mark as a house mark. In an application for registration of a house mark, the identification of goods may include wording such as “a house mark for...” As with other applications, these applications must define the type of goods with sufficient particularity to permit proper classification and to enable the USPTO to make necessary determinations under §2(d) of the Trademark Act, 15 U.S.C. §1052(d).

In an application to register a mark as a house mark based on use in commerce, the applicant must demonstrate that the mark is, in fact, used as a house mark. Therefore, the examining attorney must require that the applicant provide catalogues, or similar evidence showing broad use of the mark, to substantiate this claim. *See* 37 C.F.R. §2.61(b).

An intent-to-use applicant who wishes to register a mark as a house mark must clearly indicate its intention to register the mark as a house mark during initial examination, and the circumstances must establish that the applicant’s proposed use of the mark as a house mark is credible. The nature of the mark and the capacity of the applicant to use the mark as asserted should be considered in determining whether the claim that the mark is to be used as a house mark is credible. If the applicant indicates such an intention, the examining attorney should advise the applicant that, upon filing of the allegation of use, the applicant will be required to provide evidence to substantiate use as a house mark. 37 C.F.R. §2.61(b). If the applicant cannot do so, the applicant will be required to amend the identification of goods to conform to the usual standards for specificity.

The USPTO will register a mark as a house mark only in the limited circumstances where the mark is actually used as a house mark. Therefore, if an applicant seeks to register a house mark in an application under §44 or §66(a) of the Trademark Act, the examining attorney must require evidence that the mark is in fact used as a house mark. This is not a requirement for specimens, but rather a requirement that applicant provide

evidence to substantiate the claim of use as a house mark. 37 C.F.R. §2.61(b). If the applicant cannot do so, the identification of goods must be amended to conform to the usual standards for specificity.

### **1402.03(c) Marks for a “Full Line of ...”**

In rare circumstances, the USPTO may accept an identification of goods that refers to “a full line of” a genre of products. To qualify for the use of such terminology, the line of products must be in one class. The most commonly accepted situation is “a full line of clothing.” While there may be some rare exceptions, all clothing is classified in Class 25. Another example would be pharmaceuticals, which are almost all classified in Class 5. Therefore, as long as the specimens and/or other evidence show use of the mark on virtually all of these goods, the “full line of” language may be used. See 37 C.F.R. §2.61(b). It may not be used in a situation such as “a full line of hand tools.” Even though Class 8 is the general class for hand tools, a number of items that might be considered hand tools are classified in other classes (e.g., a non-electric egg beater is in Class 21 but could be considered to fall within the broad category of “hand tools”).

The “full line of” language may be used only in appropriate situations and the circumstances and specimens or other evidence of record must be analyzed carefully to ensure that an applicant who does not in fact use a particular mark on a sufficient number or variety of products in its line does not receive a trademark registration that could potentially bar the registration of another applicant who uses a similar mark on different products. If the goods are a “full line of pharmaceuticals,” the examining attorney must require the applicant to provide evidence that it uses the mark in connection with pharmaceuticals to treat diseases or health problems in all chapters in the World Health Organization (“WHO”) International Statistical Classification of Diseases and Related Health Problems. See *In re Astra Merck Inc.*, 50 USPQ2d 1216 (TTAB 1999) (evidence of use on only three products does not justify registration of the mark for a full line of those products). See also [TMEP §904.01\(a\)](#).

Although the USPTO will accept “a full line of clothing” as a sufficient identification, because the applicant is committing to virtually all the goods described by the broad language and the validity of the registration depends on the applicant’s statement that it is using the mark on all the goods and the evidence of such use as a “full line,” the USPTO will not accept an identification of goods as merely “clothing.” In the latter situation, the applicant must identify the items of the clothing by their common commercial name since the applicant is not likely using the mark for all items of clothing and the registration should be limited to only those items of clothing on which the applicant is actually using the mark.

In some cases, it may be more appropriate to indicate that the applicant is providing a full line of a subset of a genre of products (e.g., “a full line of sports clothing” or “a full line of anti-viral and cardiovascular pharmaceuticals”). As with any identification that refers to a full line of a genre of products, all of the products must be classifiable in one class and the specimens and/or other evidence must show use of the mark on virtually all of the relevant goods.

An intent-to-use applicant who wishes to register a mark for a full line of a genre of products must clearly indicate an intention to register the mark for a full line during initial examination, and the circumstances must establish that the applicant’s proposed use of the mark for a full line of products is credible. The nature of the mark and the capacity of the applicant to use the mark as asserted should be considered in determining whether the claim that the mark is to be used for a full line of products is credible. If the applicant indicates such an intention, the examining attorney should advise the applicant that, upon filing of the allegation of use, the applicant will be required to provide evidence to substantiate use for a full line of products. 37 C.F.R. §2.61(b). If the applicant cannot do so, the applicant will be required to amend the identification of goods to conform to the usual standards for specificity.

The USPTO will register a mark for a “full line of” a genre of products only in the limited circumstances where the mark is actually used as such. If an applicant seeks to register a mark for a “full line of” a genre of products in an application under §44 or §66(a) of the Trademark Act, the examining attorney must require evidence to substantiate use for a full line of products. This is not a requirement for specimens, but rather a requirement that applicant provide evidence to substantiate the claim of use as a mark for a “full line of” a genre of products. 37 C.F.R. §2.61(b). For example, in the pharmaceutical context, proof of use in connection with pharmaceuticals to treat diseases or health problems in all categories in the WHO International Statistical Classification of Diseases and Related Health Problems reflects appropriate use to qualify for a “full line.” If the applicant cannot establish sufficient use for a “full line of” a genre of products, the identification of goods must be amended to conform to the usual standards for specificity.

### **1402.03(d) Identifying Computer Programs with Specificity**

Any identification of goods for computer programs must be sufficiently specific to permit determinations with respect to likelihood of confusion. The purpose of requiring specificity in identifying computer programs is to avoid the issuance of unnecessary refusals of registration under 15 U.S.C. §1052(d) where the actual goods of the parties are not related and there is no conflict in the marketplace. *See In re Linkvest S.A.*, 24 USPQ2d 1716 (TTAB 1992). Due to the proliferation and degree of specialization of computer programs, broad specifications such as “computer programs in the field of medicine” or “computer programs in the field of education” will not be accepted, unless the particular function or purpose of the program in that field is indicated. For example, “computer programs for use in cancer diagnosis” or “computer programs for use in teaching children to read” would be acceptable.

Typically, indicating only the intended users, field, or industry will not be deemed sufficiently definite to identify the nature of a computer program. However, this does not mean that user, field, or industry indications can never be sufficient to specify the nature of the computer program adequately. For example, “computer programs in the field of geographical information systems” would be acceptable. Geographical information systems, also known in the industry as GIS, are well-defined computer applications that do not need further definition. If the identification in the application does not adequately specify the nature of a computer program, further information may be requested. Any questions concerning the recognition of a term of art for a computer program should be discussed with senior attorneys, managing attorneys, or other examining attorneys who are knowledgeable in the computer field.

If an applicant asserts that the computer programs at issue serve a wide range of diverse purposes, the applicant must submit appropriate evidence and/or specimens to substantiate such a broad identification of goods. *See* 37 C.F.R. §2.61(b); [TMEP §§1402.03\(b\)–\(c\)](#).

Generally, an identification for “computer software” will be acceptable as long as *both* the function/purpose *and* the field are set forth. Some general wording is allowed. The following wording is acceptable:

- (1) *Computer game software.*
- (2) *Computer operating programs and computer operating systems:* Software under this category comprises master control programs that run the computer itself. They are the first programs loaded when the computer is turned on and set the standards for the application programs that run in the operating system or operating program.
- (3) *Computer utility programs:* These programs must be designed to perform maintenance work on a computer system or components thereof, such as file management (sorting, copying, comparing, listing, and searching files), as well as diagnostic and measurement routines that check the health

and performance of the computer system. Beware of identifications that read “Computer utility programs, namely, business software.” - This is **NOT** a utility program.

- (4) *Computer software development tools*: These programs are designed to create other computer programs. This is one of the few exceptions in which use of the term “tools” is acceptable.
- (5) *Database management software [if for general use, otherwise indicate specific field]*: Software that controls the organization, storage, retrieval, security, and integrity of data in a database (an electronically stored collection of data). Other examples:
  - General purpose database management software.
  - Computer software for use in database management.
  - Database management software for use by financial advisors.
  - Database management software in the field of baseball cards.
- (6) *Spreadsheet software [if for general use, otherwise indicate specific field]*: Software that simulates a paper spreadsheet, or worksheet, in which columns or individual cells of numbers are summed, subtracted, multiplied, or divided with the contents of other columns or cells for budgets and plans. Other examples:
  - General purpose spreadsheet software.
  - Computer software for use as a spreadsheet.
  - Spreadsheet software for use by budget analysts.
- (7) *Word processing programs [if for general use, otherwise indicate specific field]*: Software used to create text documents. Other examples:
  - Downloadable computer software for word processing.
  - Computer programs for word processing.
- (8) *Computer aided design (CAD) software [if for general use, otherwise indicate specific field]*: Computer Aided Design software is generally used to design products. CAD software is available for generic design or specialized uses, such as architectural, electrical, and mechanical design. Other examples:
  - Computer aided design (CAD) software for general use.
  - Computer aided design (CAD) software used for designing integrated circuits.
  - Computer aided design (CAD) software for architectural use.
- (9) *Computer aided manufacturing (CAM) software [if for general use, otherwise indicate specific field]*: Computer Aided Manufacturing software automates manufacturing systems and techniques, including numerical control, process control, robotics, and materials requirements planning. Other examples:
  - Computer aided manufacturing (CAM) software for general use.
  - Computer aided manufacturing (CAM) software used in the manufacture of airplane components.
  - Computer aided manufacturing (CAM) software for integrated circuits.
- (10) *CAD/CAM software [if for general use, otherwise indicate specific field]*: Computer Aided Design/Computer Aided Manufacturing software integrates functions of CAD and CAM software in that products designed by the CAD systems are directly inputted into the CAM systems for manufacture.

Examples of indefinite and unacceptable wording include the following:

- (1) Computer programs featuring multimedia (unless the applicant specifies the content, e.g., motion pictures in the field of [specify], recorded on computer media).
- (2) Computer firmware (unless the applicant specifies the function/purpose of the program, and, if the program is content or field specific, the field of use).
- (3) Computer devices (must specify the common commercial name therefor).
- (4) Computer accessories (must specify the common commercial name therefor).

See [TMEP §1402.11\(a\)](#) regarding identification and classification of computer services.

### **1402.03(e) Identifying Publications with Specificity**

When the goods are publications, the identification must indicate both the specific physical nature and the literary subject matter of the publication.

*Example* - "Magazine devoted to medicine" is acceptable.

*Example* - "Television programming newsletter" is acceptable.

In the case of publications of a specialized nature, the identification should describe the goods by specific names or wording that explains their specialized nature.

*Example* - "Children's storybooks" is acceptable.

Even if the mark itself indicates the subject of a publication, the identification must specify the subject matter.

As a general rule, "books" should be described by subject matter or class of purchasers (e.g., exercise books or children's books). In the case of a mark used by a publishing house on books, a general identification, such as "a house mark for books" or "a full line of books" is sufficient if supported by the record. However, if the goods are restricted to certain types of literature, such as science fiction, engineering, romance, or poetry, the identification should so indicate. The applicant may also indicate the channels of trade or groups of purchasers for the goods.

When the subject matter is not a significant aspect of a publication, such as with in-house newsletters, the identification may merely give an indication of the general character or type of the publication.

*Example* - "Employee newspaper" may be accepted.

See [TMEP §1402.11\(a\)](#) regarding online publications.

### **1402.03(f) Recognition of Industry Terms**

Industry terminology should be recognized as sufficient to identify the goods or services when supported by dictionary definitions or other authoritative references. Examples of acceptable terminology are "telecommunications services, namely, personal communications services" and "telecommunications services, namely, ISDN services." If the references or evidence submitted raise any doubt as to the widespread

recognition of the terminology, a brief explanation of the product or activity may be included in the identification, but the accepted industry terminology may remain part of the identification as well.

#### **1402.04 Acceptable Identification of Goods and Services Manual**

The USPTO maintains an ID Manual comprised of a listing of acceptable identifications of goods and services compiled by the Office of the Administrator for Trademark Identification, Classification and Practice.

The ID Manual contains identifications of goods and services and their classifications that are acceptable in the USPTO without further inquiry by an examining attorney (provided such identification and classification is supported by the specimens of record). This ID Manual is updated periodically, and the entries in it are more extensive and specific than the Alphabetical List under the Nice Classification that is published by WIPO. The listing is not exhaustive, but is intended to serve as a guide to examining attorneys in acting on applications and to the public in preparing applications.

Using identification language from the ID Manual enables trademark owners to avoid objections by examining attorneys concerning indefinite identifications of goods or services; however, applicants should note that they must assert actual use in commerce or a bona fide intent to use the mark in commerce for the goods or services specified. Therefore, even if the identification is definite, examining attorneys may inquire as to whether the identification chosen accurately describes the applicant's goods or services (see [TMEP §1402.05](#) regarding accuracy of identifications).

No listing could include all possible identifications for the multitude of products and services for which marks may be registered. Therefore, a primary use of the ID Manual's listings, in addition to indicating precise identifications that will be accepted, is to indicate by analogy and example the kinds of identifications that will be acceptable for products and services not covered by the existing listings.

Any identification of goods and services in the ID Manual that has a letter "T" in the Trilateral column indicates that the identification is acceptable in the USPTO, the Japanese Patent Office ("JPO"), and the European Trademark Office ("OHIM," the Office of Harmonization in the Internal Market). The Korean Intellectual Property Office ("KIPO") also accepts the majority of "T" entries.

In a TEAS Plus application, the application must include correctly classified goods and/or services, with an identification of goods and/or services taken directly from the ID Manual. 37 C.F.R. §2.22(a)(8); [TMEP §819.01\(g\)](#). In a TEAS application, the applicant may include correctly classified goods and/or services taken from the ID Manual or may create and enter a listing of recognizable goods and/or services. See [TMEP § 805](#) regarding listing particular goods or services in an application and designation of international class number(s) and [§1402.02](#) regarding entitlement to a filing date with respect to the identification of goods and services.

The ID Manual can be viewed and downloaded free of charge from the USPTO website at <http://www.uspto.gov>, and it is accessible from within TEAS.

#### **1402.05 Accuracy of Identification**

An identification is unacceptable if it is inconsistent with the goods or services indicated by the specimens, or if the ordinary meaning of the identification language is at variance with the goods or services evidenced by the specimens or any other part of the record.

The examining attorney may require an amendment of the identification language to accurately describe the goods or services. *In re Omega SA*, 494 F.3d 1362, 83 USPQ2d 1541 (Fed. Cir. 2007) (affirming decision that the examining attorney properly required amendment of the term “chronographs” in the identification of goods so that proper classification could be determined); *In re Faucher Indus. Inc.*, 107 USPQ2d 1355, 1361 (TTAB 2013) (finding that examining attorney properly questioned the nature of the goods and required that the identification of goods be amended to disclose the material composition of the goods so that proper classification could be determined). Moreover, the examining attorney must require an amendment to the identification language when it includes broad wording that would normally be acceptable, but the specimen(s) shows that the actual goods or services are a specialized type or are used only in a specialized trade channel. In this situation, the broad identification would be overly broad and misleading. The amended identification should specify the specialized characteristic or specialized trade channel to accurately describe the goods or services. *In re Petroglyph Games, Inc.*, 91 USPQ2d 1332, 1335 (TTAB 2009) (Board stating that “[t]he Office’s requirement that the examining attorney ensure the accuracy of the identification of goods is abundantly clear.”); *In re Water Gremlin Co.*, 635 F.2d 841, 208 USPQ 89 (C.C.P.A. 1980), *aff’g* 204 USPQ 261 (TTAB 1979) (examining attorney has discretion to require applicant to state whether goods are packaged in container to which mark refers); *Kiekhaefer Corp. v. Willys-Overland Motors, Inc.*, 236 F.2d 423, 111 USPQ 105 (C.C.P.A. 1956) (requirement to restrict identification to “outboard motors” considered proper); *The Procter & Gamble Co. v. Economics Laboratory, Inc.*, 175 USPQ 505, 509 (TTAB 1972), *modified without opinion*, 498 F.2d 1406, 181 USPQ 722 (C.C.P.A. 1974) (noting that, in view of specimens, greater specificity should have been required in identifying registrant’s detergent product); *In re Toro Mfg. Corp.*, 174 USPQ 241 (TTAB 1972) (noting that use on “grass-catcher bags for lawn-mowers” did not justify the broad identification “bags,” which would encompass goods diverse from and commercially unrelated to applicant’s specialized article); *Ex parte Consulting Engineer Publishing Co.*, 115 USPQ 240 (Comm’r Pats. 1957) (amendment of “periodical” to “monthly news bulletin” required).

In *Petroglyph Games*, 91 USPQ2d at 1336, the Board addressed the question of whether the identification “computer game software” was accurate for the mark BATTLECAM if the mark was being used only for a feature of a computer game. The Board found that the subsets of computer code identified by the mark, which the specimen indicated supported only particular aspects or features of the computer game, could also be accurately identified as “computer game software,” noting that although “there is a market for selling or distributing to computer game players all the software that allows a game to be played in its entirety, there may also be a market for computer game software related to only certain game features, perhaps among game developers or producers who might want to include a particular feature in a complete game, or perhaps among players seeking after-market add-ons or enhancements for existing games.” Therefore, it would not be inaccurate to identify such software simply as “computer game software.”

The wording of an identification cannot be amended to accurately describe the goods or services if the amendment would add to or expand the scope of the identification. See 37 C.F.R. §2.71(a); [TMEP §§1402.06 et seq.](#) and [1402.07 et seq.](#)

### **1402.05(a) Goods That Are Components or Ingredients**

When a mark is used to identify only a component or ingredient of a product, and not the entire product, the identification should precisely set forth the component or ingredient. In other words, when the specimen or other material in the record clearly indicates that the mark relates only to a distinguishable part, component, or ingredient of a composite or finished product, then the application should identify that component or ingredient as the goods. The identification should leave no doubt that the mark refers only to one part and not to the entire product. Also, the identification should indicate the types of finished products of which the identified components or ingredients form a part, e.g., “liposomes sold as an ingredient in face creams.”

See *Ex parte The Joseph & Feiss Co.*, 114 USPQ 463 (Comm’r Pats. 1957); *Ex parte Palm Beach Co.*,

114 USPQ 463 (Comm'r Pats. 1957); *Mercantile Stores Co., Inc. v. The Joseph & Feiss Co.*, 112 USPQ 298 (Comm'r Pats. 1957); *In re Libbey-Owens-Ford Glass Co.*, 75 USPQ 202 (Comm'r Pats. 1947).

If the mark does not pertain solely to a component or ingredient rather than the finished or composite product, the identification should not specify the component or ingredient as the goods.

When classifying component or ingredient marks, a distinction should be made between (1) marks that identify products sold as separate ingredients or components and ingredients for use in the manufacture of the finished product, and (2) marks that identify components or ingredients sold as part of the finished product. In the first situation, the goods are classified in the class of the component or ingredient since it has not yet been transformed into the finished product. In the second, the goods are classified in the class of the finished product, since the component or ingredient has now been incorporated into other finished goods. In these situations, the examining attorney should examine the specimen to determine whether it shows use of the mark to identify the separate component or ingredient or the finished product in its entirety.

*Example* – The identification of goods lists “balsam extracts.” The specimen shows use of the mark on a bottle of shampoo to identify a particular ingredient of the shampoo, while the shampoo itself is identified by a different mark. As the mark for which registration is sought identifies a component ingredient of a finished product and not a separate finished product, the identification must specify that the goods are “balsam extracts sold as a component ingredient of shampoos” and the proper classification is that of “shampoos,” namely, Class 3.

The same rules of language construction for purposes of amendment, as set forth in [TMEP §§1402.01 et seq.](#), [1402.06 et seq.](#), and [1402.07 et seq.](#), apply to amendments of identifications to indicate components or ingredients. Thus, whether an identification may be amended will depend on the particular circumstances of each application.

*Example* - The indefinite term “fabric” may be amended to the definite identification “fabric for use in the manufacture of slacks” but may not be amended to “slacks,” which is beyond the scope of the identification.

See [TMEP §1402.05](#) regarding accuracy of the identification.

### **1402.05(b) Material Composition**

If an identification of goods is specific, but the goods could be classified in more than one class depending on the material composition, then the material composition must be indicated in the identification of the goods.

*Example* - “Statues” refers to specific items; however, the classification depends on the material composition. “Statues of non-precious metal” are classified in Class 6; “statues of precious metal” are classified in Class 14; “statues of wax, wood, plaster, or plastic” are classified in Class 20; and “statues of glass or porcelain” are classified in Class 21.

However, in certain situations, because of the nature of the particular industry and the knowledge that the items are made out of different materials and are classified accordingly, an indication of the material composition in the identification may be unnecessary. See [TMEP §§1401.07](#) and [1402.03](#) for further explanation.

### **1402.06 Amendments Permitted to Clarify or Limit Identification**

Trademark Rule 2.71(a), 37 C.F.R. §2.71(a), restricts amendments to the identification of goods or services as follows, “The applicant may amend the application to clarify or limit, but not to broaden, the identification of goods and/or services.” This rule applies to all applications.

Section 7(c) of the Trademark Act, 15 U.S.C. §1057(c), provides that filing an application for registration on the Principal Register establishes constructive use and nationwide priority, contingent on issuance of the registration ( *see* [TMEP §201.02](#)). Therefore, the identification of goods and/or services in an application defines the scope of those rights established by the filing of an application for registration on the Principal Register.

### **1402.06(a) Limiting the Identification of Goods and Services**

As noted above, the rules permit amendments to limit the identification of goods and services.

Deletions from the identification of goods and services are also permitted. “Deletion” means the elimination of an existing item in an identification of goods and services in its entirety. If the applicant wishes to amend the identification of goods and services to delete one or more items, the examining attorney should accept the amendment, if it is timely and otherwise proper. However, once the applicant has expressly amended the identification of goods and services to delete an item, it may not be reinserted in a later amendment.

If the applicant wishes to amend the identification of goods and services to restrict one or more of the items by inserting qualifying language within the scope of the identification or substituting more specific language, the examining attorney should accept the amendment, if it is timely and otherwise proper. Qualifying language, however, may not be deleted from an identification.

*Example* - If the applicant initially identifies the goods as “publications,” the applicant may amend to substitute one or more terms that fall under the definition of publications. Likewise, if an applicant identifies its goods as “pamphlets,” the applicant may amend to include “brochures,” because these terms are generally equivalent and interchangeable. In either case, the applicant must specify the subject matter.

*Example* - If the applicant initially identifies the goods as “football uniforms,” the applicant may amend to indicate football uniforms in Class 25, football helmets in Class 9, and shoulder pads in Class 28. These goods are logically included within the initial identification. Footballs, however, could not be added, because this would add an item not logically included within the original identification.

*Example* - If the applicant initially identifies the services as “charitable services” and wishes to amend to “charitable fundraising” in Class 36 and “providing health care at no cost to underprivileged children” in Class 44, the amendment should be permitted. Both specific services are logically included under “charitable services.”

*Example* - If the applicant initially identifies the goods as “cooking utensils sold to restaurants,” the applicant cannot delete the language “sold to restaurants,” because this would broaden the identification.

If an applicant wishes to amend the identification of goods and services to insert an item that is equivalent to or logically encompassed by an item already included in the identification of goods and services, the examining attorney should permit the amendment, if it is timely and otherwise proper.

On the other hand, an applicant may not amend an identification of goods/services to add or substitute a term that is not logically included within the scope, or to add exclusionary language that falls outside the scope, of the terms originally identified or that is otherwise qualitatively different from the goods and services as originally identified.

*Example* - If the applicant identifies the goods as “computer programs,” the applicant may not add or substitute computers or other items of computer hardware to the listing.

*Example* - If the applicant initially identifies the goods as “hats,” the applicant may not add or substitute “scarves.” Likewise, the applicant may not add or substitute “shirts” for “slacks.”

*Example* - If the applicant identifies its services as “ophthalmologist’s services,” the applicant may not amend the identification to “medical services,” because the amendment would expand the identification to include services beyond the scope of those identified initially.

The scope of the goods and services, as originally identified or as amended by an express amendment, establishes the outer limit for any later amendments. *See* TMEP §§[1402.07](#) *et seq.*

Under 37 C.F.R. §2.71(a), there is no general prohibition against specific types of limitations in identifications of goods and services, such as the use of negatives, exceptions, or similar language. Limitations on identifications phrased in the negative or as exceptions are acceptable, if they are otherwise proper.

Because 37 C.F.R. §2.71(a) precludes additions to the identification, examining attorneys should not require or suggest unduly restrictive identifications. *See In re Sentry Chemical Co.*, 230 USPQ 556 (TTAB 1986).

Once the identification has been limited, it cannot be expanded later. *See In re Swen Sonic Corp.*, 21 USPQ2d 1794 (TTAB 1991); *In re M.V Et Associes*, 21 USPQ2d 1628 (Comm'r Pats. 1991). Also, when requiring amendments to the identification, examining attorneys must advise applicants that additions to the identification are not permitted.

### **1402.06(b) Clarifying the Identification of Goods and Services**

Under 37 C.F.R. §2.71(a), an applicant may amend “to clarify” the identification of goods and/or services. The applicant may clarify an identification that is indefinite or overly broad, to identify goods and/or services that are within the scope of the goods and services in the identification. As noted in [TMEP §1402.06](#), filing an application for registration on the Principal Register establishes a constructive date of first use in commerce, contingent on issuance of the registration. 15 U.S.C. §1057(c). Accordingly, the applicant may not expand those rights through an amendment that broadens the identification of goods and/or services.

Thus, the applicant may amend from the more general to the specific, but the applicant may not amend from the specific to the more general. The scope of the goods/services identified initially, or as limited by an express amendment, establishes the outer limit for permissible amendments. *See* [TMEP §§1402.07](#) *et seq.*

In an application under §1 or §44 of the Trademark Act, classification may provide some guidance in determining whether an amendment exceeds the scope of the goods/services identified initially, but it is not controlling. In an application under §1 or §44, the examining attorney may suggest and accept amendments to the identification that result in a change of class, if the amended identification does not exceed the scope of the original identification.

*Example* - If an applicant has erroneously identified its goods and services as “menus” but, in fact, the applicant intends to register the mark for restaurant services, the applicant may not amend the identification of goods to “restaurant services.” In such a case, the original identification, which is specific and narrow in scope, may not be expanded to services beyond the scope of that identification.

*Example* - If an applicant has erroneously identified its goods and services as “bottles for salad dressing” but, in fact, the applicant intends to register the mark for salad dressing, the applicant may not amend the identification to “salad dressing.” However, if an applicant identifies its goods and services as “bottles of salad dressing,” the applicant may amend the identification to “salad dressing.” As above, where the original language is specific and narrow in scope, the identification may not be expanded to goods beyond that scope.

*Example* - If an applicant has erroneously identified its goods and services either as “packaging and labels” or as “packaging and labels for toys” but, in fact, the applicant intends to register the mark for toys, the applicant may not amend to correct the identification, because “toys” is not within the scope of the initial identification.

In a §66(a) application, classification is assigned by the IB and cannot be changed. 37 C.F.R. §2.85(d). See TMEP §§[1401.03\(d\)](#), [1402.01\(c\)](#), and [1904.02\(b\) and \(c\)](#) regarding §66(a) applications.

## 1402.07 Scope of Identification of Goods and Services for Purposes of Amendment

### 1402.07(a) The “Ordinary-Meaning” Test

In applications under §1 or §44, for the purpose of determining the scope of an identification, the examining attorney should consider the ordinary meaning of the wording apart from the class number designation. The class number ( see [TMEP §§1401.03 et seq.](#)), whether inserted by the applicant or the USPTO, does not limit the scope of permissible amendments. 37 C.F.R. §2.85(f). If the applicant designates the class by number, this information may be weighed with other factors for the benefit of the applicant in determining the scope of permissible amendments.

However, if the applicant does not merely designate the class number, but expressly limits the goods or services recited to those that are within one or more classes, the applicant may not amend to specify items not in those classes.

In many cases, the identification is merely a repetition of the entire general class heading for a given class.

However, use of the words comprising a class heading as an identification of goods or services in an application filed with the USPTO or in a request for extension of protection notified under the Madrid Protocol is not deemed to include all the goods or services in the established scope of that class. *In re Fiat Grp. Mktg. & Corporate Commc'ns S.p.A.*, 109 USPQ2d 1593, 1598 (TTAB 2014). In this situation, the USPTO will look to the ordinary meaning of the words for the purposes of determining the scope of the identification. The USPTO will not permit the applicant to amend to include any item that falls in the class, unless the item falls within the ordinary meaning of the words in the heading, or to amend to items in other classes. *Id.* at 1597 (finding that the wording from the class heading, “business management services,” refers to services that are significantly different from and do not include “retail store services”). As noted in [TMEP §1402.01\(b\)](#), class headings are generally unacceptable to identify goods/services in United States applications, even if the class heading is used as the identification in the foreign registration.

In §66(a) applications, the classification assigned by the IB cannot be changed, so the scope of the identification for purposes of permissible amendments is limited by the class. 37 C.F.R. §2.85(f). See TMEP §§[1401.03\(d\)](#), [1402.01\(c\)](#), and [1904.02\(c\)](#).

### 1402.07(b) Ambiguous Identifications

An applicant may amend an ambiguous identification of goods or services (i.e., an identification that fails to indicate a type of goods or services) in order to specify definite goods or services within the scope of the indefinite terminology.

*Example* - “Food” is indefinite, and may be amended to “fresh fruit” (Class 31), or “processed fruit” (Class 29), or “dog food” (Class 31). However, “food” may not be amended to “whiskey” (Class 33).

*Example* - “Metallic parts” is indefinite, and may be amended to “metal thread fasteners” (Class 6), or “metal drive gears for machines” (Class 7). However, “metallic parts” may not be amended to “metal automobile chassis” (Class 12).

Likewise, if the applicant includes wording in an indefinite identification of goods or services that, in context, is obviously superfluous, the applicant may amend the identification to specify goods or services within

the scope of the indefinite terminology. In many cases, the superfluous wording will not restrict the range of permissible amendments.

*Example* - If the applicant begins an indefinite identification of goods with superfluous wording such as “sale of . . .,” “production of . . .,” “making of . . .” “manufacture of . . .,” (as long as it does not include the wording “custom” or “to the order and specification of others”), or similar wording, the applicant may amend to specify either goods or services within the scope of the existing identification. However, the specific terms used to preface the goods do establish some limitation as to scope. “Sale of” may justify an amendment to retail or mail order services for specific goods, or to the goods themselves, but not to custom manufacturing or advertising agency services related to those goods.

The policy permitting applicants to amend to specify *either* goods *or* services should be construed narrowly. The applicant should only be permitted to amend from goods to services, or vice versa, when the existing identification of goods and services fails to specify a definite type of goods or services *and* when the existing identification provides reasonable notice to third parties that the applicant may be providing *either* goods *or* services within the scope of the existing identification.

### 1402.07(c) Unambiguous Identifications

An applicant may amend an unambiguous identification of *goods* that indicates a specific type of goods to specify definite and acceptable identifications of *goods* within the scope of the existing terminology.

An applicant may amend an unambiguous identification of *services* that indicates a specific type of service to specify definite and acceptable identifications of *services* within the scope of the existing terminology.

*An applicant may not amend a definite identification of goods to specify services, or vice versa, except that if the goods are of a type that are available in more than one medium, and the applicant does not specify the medium in the identification of goods, the applicant will be allowed to amend to any medium, even if one of the mediums is classified as a service.*

*Example* - If the applicant specifies “newsletters in the field of accounting,” the applicant may amend to “printed newsletters in the field of accounting” (Class 16), “downloadable newsletters in the field of accounting” (Class 9), “providing online newsletters in the field of accounting” (Class 41), or “newsletters in the field of accounting, recorded on DVDs” (Class 9). See [TMPEP §1402.11\(a\)](#) regarding online publications.

*Example* - If the applicant specifies “computer programs in the field of accounting,” the applicant may only amend to specify computer programs within the scope specified, i.e., those programs concerning accounting. The applicant may not amend to any service, other than “providing temporary use of non-downloadable computer programs in the field of accounting.” The applicant may not amend from “providing temporary use of non-downloadable computer programs in the field of accounting” to “computer programs in the field of accounting,” because “computer programs” are broader in scope than “non-downloadable computer programs.” Nor may the applicant amend to any goods outside the scope of those already identified.

*Example* - If the applicant identifies the goods as “computer programs” without specifying the field, the applicant is limited to types of specific computer programs for the purposes of amendment. The applicant has identified a definite type of goods, but USPTO policy requires further specificity as to the purpose or function of the goods. An applicant who has identified its goods as “clothing” would likewise be limited to goods within the scope of the term “clothing.”

*Example* - If the applicant specified “retail store services,” the applicant would be limited to amendments within the scope of this service. Although USPTO policy requires further specificity as to field, the applicant has identified a definite type of service.

*Example* - If the applicant identifies its goods as “stationery,” “wine labels,” or “menus,” the applicant is restricted, in any amendments, to goods within the scope of the type indicated. The applicant could not amend to specify other types of goods or services, such as “wine” or “restaurant services.”

*Example* - If the applicant specified the service “television programming [scheduling],” the applicant would be limited to amendments within the scope of this service. This service does not refer to a series of programs. It is only a scheduling service.

#### **1402.07(d) Permissible Scope of Identification Not Affected by Proposed Amendment That Is Unacceptable**

If the applicant proposes an amendment to the identification of goods and services, and the examining attorney determines that the amendment is unacceptable, the examining attorney should refer to the identification of goods before the proposed amendment to determine whether any later amendment is within the scope of the identification. In such a case, the applicant is not bound by the scope of the language in the proposed amendment but, rather, by the language of the identification before the proposed amendment.

If the applicant submits an amendment to the identification of goods and services, and the examining attorney determines that it is unacceptable, in whole or in part, the examining attorney must advise the applicant of the item or items that are unacceptable. For those items which are unacceptable, the examining attorney should also advise the applicant that the previous items listed in the existing identification (not the unacceptable substitute) remain operative for purposes of future amendment. If portions of an amended identification are accepted, those items may not be further amended to exceed the scope of the accepted amendment. See [TMEP §1402.07\(e\)](#).

If the applicant submitted the amendment in response to a requirement, the examining attorney must issue a final requirement for amendment of the identification, if the proposed amendment raises no new issues and the application is otherwise in condition for a final action. See [TMEP §714.05\(a\)\(ii\)](#).

#### **1402.07(e) Permissible Scope of Identification Affected by Proposed Amendment That Is Acceptable**

Once an applicant amends the identification of goods and/or services in a manner that is acceptable to the examining attorney, the amendment replaces all previous identifications and restricts the scope of goods/services to that of the amended language. Further amendments that would add to or expand the scope of the recited goods or services, as amended, will not be permitted. *In re Swen Sonic Corp.*, 21 USPQ2d 1794 (TTAB 1991); *In re M.V Et Associes*, 21 USPQ2d 1628 (Comm’r Pats. 1991). This includes amendments to the identification submitted in an amendment to allege use, a statement of use, or a request for an extension of time to file a statement of use. 37 C.F.R. §§2.88(i)(2) and 2.89(f). See TMEP [§1104.10\(b\)\(iii\)](#) regarding submission of a response to Office action and amendment to allege use that contain different amendments to the identification of goods/services and TMEP §§[1108.02\(d\)](#) and [1109.13](#).

The only circumstance in which the applicant may reinsert goods or services that were omitted or deleted from the identification of goods or services is when before publication or within six months of the issuance of an examiner’s amendment (*see* [TMEP §§707 et seq.](#)), whichever is earlier, the applicant objects to an amendment of the identification of goods or services in the examiner’s amendment *on the ground that the examiner’s amendment does not reflect the agreement between the applicant and the examining attorney.*

#### **1402.08 Moving Goods and Services Between Companion Applications**

If an applicant has filed separate applications to register the same mark, the applicant may, in a limited situation, amend to move items of goods or services from one application to another, if the application from which the item is to be moved was filed on or before the filing date of the application to which it is to be moved. Such an amendment will be permitted only if some of the goods/services in one application should be classified in a different class and the companion application includes that class. If the companion

application does not include that class, the proper recourse is for the applicant to file a request to divide. See [TMEP §§1110-1110.11\(a\)](#).

Moving goods/services between applications in this way may only be done if neither of the marks involved has been approved for publication in the *Official Gazette*. Moreover, items of goods/services can be moved between applications only in applications filed under §1 or §44 of the Trademark Act. The applicant cannot amend to move items of goods/services to or from a §66(a) application.

The applicant must file a separate amendment for each application, that is, a request to delete specified goods/services in the application from which they are to be moved, specifying the serial number of the application to which they should be added, and an amendment in the application to which those goods/services are to be added, specifying the serial number of the application from which they are to be moved. The examining attorney(s) must ensure that the USPTO automated records are updated to reflect the changes in both applications.

An applicant may file a request to move all the goods/services from one application to another, if the applicant meets the requirements set forth above. The USPTO will construe such a request as a request to expressly abandon the application from which the goods/services are moved. If the request to move all the goods/services is granted, and no goods or services remain in the application from which the goods/services are moved, the USPTO will abandon the application. The USPTO will not refund the application filing fee. See [TMEP §718.01](#) regarding express abandonment.

### **1402.09 Use of Marks Inappropriate in Identifications**

If a mark that is registered to an entity other than the applicant is used in the identification of goods or services, the examining attorney must require that it be deleted and that generic wording be substituted. It is inappropriate to use a registered mark to identify a kind of product or a service, because such a mark indicates origin in only one party and cannot be used to define goods that originate in a party other than the registrant. *Camloc Fastener Corp. v. Grant*, 119 USPQ 264, 265 n.1 (TTAB 1958). In place of the mark, a generic term must be used.

Generally, an applicant should not use its own registered or unregistered mark in an identification of goods or services in its own application. If the applicant chooses to do so, however, the applicant should be careful to use the mark as an adjective modifying the generic name of the goods or services. In addition, the words “applicant” or “registrant” must not appear in the identification of goods or services. Before registration, use of the term “registrant” is inaccurate, and, after registration, use of the term “applicant” is inaccurate.

If the examining attorney issues a *nonfinal* action requiring amendment of the identification because it is indefinite, and the applicant responds with an amended identification that is definite but is unacceptable because it includes a registered mark, this is not considered a new issue, and the examining attorney must issue a final requirement for amendment of the identification. However, if the examining attorney issues a *final* action requiring amendment of the identification because it is indefinite, and the applicant responds with an amended identification that is definite but includes a registered mark, the examining attorney should treat the response as incomplete, and grant the applicant additional time to cure this deficiency, pursuant to 37 C.F.R. §2.65(b). See [TMEP §718.03\(b\)](#) for further information about granting an applicant additional

time to perfect an incomplete response. *Examining attorneys are encouraged to try to resolve this issue by examiner's amendment.*

## **1402.10 Identification of Goods and Services in Documents Filed in Connection with §1(b) Applications**

See [TMPEP §1104.09\(c\)](#) regarding examination of the identification of goods or services in an amendment to allege use; [TMPEP §1108.02\(d\)](#) regarding the identification of goods or services in a request for an extension of time to file a statement of use; and [TMPEP §1109.13](#) regarding examination of the identification of goods or services in a statement of use.

## **1402.11 Identification of Services**

This section addresses identifications of particular types of services.

The primary major requirements for an acceptable identification of services are: (1) the identification must be definite; (2) it must use the common name or terminology for the services, so as to be readily understandable; (3) it must accurately describe the services; and (4) it must constitute a service as contemplated by the Trademark Act, and not merely refer to collateral or related activities associated with rendering the service. See [TMPEP §§1301.01-1301.01\(b\)\(v\)](#) for information on what constitutes a service.

*Example* - Where a mark identifies checking account services, the identification "banking services in the nature of a checking account" is more accurate than the general identification "banking services," which is inclusive of services that may not be associated with the mark. The former identification is more definite, and clearly stated. On the other hand, if a service mark identifies a bank's many services, then the more general identification "banking services" would be appropriate. Thus, either of these identifications could be accepted depending on the particular circumstances, including the nature of the mark and its use or intended use. In both cases, the services would be classified in Class 36.

*Example* - "Radio broadcasting services" (Class 38) would be an appropriate identification when a radio station uses a mark, such as call letters, to indicate the source of its broadcasting services generally. On the other hand, if an applicant is using the name of a weekly comedy television show as a mark, "television broadcasting services" would not be appropriate because the mark does not serve to identify and distinguish the electrical transmission of the program. Instead, the applicant should identify the services as "television entertainment services in the nature of an ongoing series of comedy programs" (Class 41).

Generally, the identification of a service should not emphasize the method or manner by which the service is provided. However, in some circumstances, it may be helpful to include such information in a trailing phrase.

*Example* - "Accounting services" (Class 35) is an acceptable identification of services; thus, whether this type of service is rendered online or through other means need not be mentioned.

*Example* - "Dinner theaters" (Class 41) emphasizes the entertainment aspect associated with theater generally. The fact that dinner is also served at the theater performance is ancillary to the primary service of presenting the theatrical production.

A mark identifying a beauty contest is generally classified either as a promotional service rendered by the organizer of the contest to the businesses or groups that sponsor the contest, or as an entertainment service.

When the record shows that the primary purpose of conducting such a pageant is to promote the sale of goods or services of the sponsors, the service should be recited as "promoting the goods or services of others by means of a beauty contest," in Class 35. Where the beauty contest is presented primarily as entertainment for the general public, the service should be identified as, "entertainment services in the nature of beauty contests," in Class 41.

The activities recited in the identification must constitute services as contemplated by the Trademark Act. See [TMPEP §§1301.01 et seq.](#) as to what constitutes a registrable service. For example, "sales" cannot be

listed as the primary activity in an identification, because the sale of one's own goods or services is not a registrable service.

See also [TMEP §§1401.09](#) *et seq.* regarding the changes in the international classification of services effective January 1, 2002.

## 1402.11(a) Computer Services

### 1402.11(a)(i) Services Classified in Classes 35, 36, 37, 39, 40, 41, 44, and 45

Any activity consisting of a service that ordinarily falls in these classes (e.g., real estate agency services, banking services, dating services), and that happens to be provided over the Internet, is classified in the class where the underlying service is classified. For example, banking services are classified in Class 36 whether provided in a bank or online.

The following are examples of some acceptable identifications:

- “Internet advertising services in Class 35.”
- “Online banking services in Class 36.”
- “Providing information about automobiles for lease by means of the Internet, in Class 39.”
- “Online cosmetic skincare consultation services in Class 44.”
- “Internet-based dating, social introduction and social networking services, in Class 45.”

### 1402.11(a)(ii) Content Providers

The term “content provider” is generally used to indicate a person or entity that provides information or entertainment content for use on the internet or electronic media. Content-provider services may be classified in a variety of classes depending upon the nature of the activity provided. Thus, the activity provided must be specified in the identification. As discussed below, the subject matter of the services may also be required for appropriate classification.

#### *Information Provider Services*

The service of providing information via the Internet is classified in the class of the information subject.

Entities that provide these services by computer are considered to be “content providers,” that is, they provide the informational or substantive content of a website and/or home page. If an entity provides information in a wide variety of fields, the applicant must select the subject matter to be protected and classify the services accordingly (e.g., business information in Class 35, banking information in Class 36, home repair information in Class 37). See [TMEP §1402.11\(b\)](#) regarding information services.

Some acceptable identifications:

- “Providing business information via a website in Class 35.”
- “Providing a website *featuring information* in the field of banking, in Class 36.” This is purely an information provision service and should be treated accordingly.
- “Providing real-time information concerning vehicle parking space availability, in Class 39.”

### *Audiovisual Content*

Content-provider services involving the provision of online, non-downloadable videos are classified in Class 41 regardless of the subject matter of the videos. The subject matter of the videos must also be included in the identification to assist in likelihood of confusion determinations under 15 U.S.C. §1052(d). For additional information on identifying and classifying computer entertainment services, see [TMEP § 1402.11\(a\)\(vii\)](#).

### *Other Services Offered by Content Providers*

Businesses and individuals commonly provide content services in addition to other types of services. For example, Internet Service Providers (ISPs) often provide online content as well as Class 38 internet access services. For information about identifying telecommunications services provided by ISPs, see [TMEP § 1402.11\(a\)\(iii\)](#). Online audiovisual content providers may similarly offer both video-streaming services in Class 38 and online non-downloadable videos in Class 41. Content providers also may provide a variety of technological services, such as website hosting, in Class 42. Each service on or in connection with which the applicant uses, or has a bona fide intention to use, the mark in commerce should be set forth in the application. 15 U.S.C. §§1051(a)(2) and 1051(b)(2); 37 C.F.R. §2.32(a)(6). For multiple-class application requirements, see [TMEP §1403.01](#).

### **1402.11(a)(iii) Provision of Telecommunications Connections to the Internet**

Telecommunication connections, such as those provided by AT&T® and Verizon®, are the wired, or wireless, electronic means by which one telecommunications-enabled device, such as a telephone, smartphone, or computer, communicates with another telecommunications-enabled device. The Class 38 activities of a telecommunications connection provider do NOT include providing the computer hardware or software that enables the electronic transmission of the data. These telecommunications services connect the user's device to the internet via wired or wireless means.

Just because an applicant is conducting an internet-based activity or rendering a service that involves electronic transmission of data, the applicant's service is not automatically considered a telecommunications service in Class 38. For example, an applicant who merely provides a website featuring sports information is not providing "electronic transmission of messages and data in the field of sports," in Class 38. The telecommunications services providers, such as AT&T® and Verizon®, are providing the Internet connections for the actual transmissions; the applicant is merely making the information available.

"Online bulletin boards" and "chat rooms" are classified in Class 38 *regardless of the content or subject matter*. The rationale for this stems from the fact that these services allow individuals to communicate with each other, like other Class 38 services.

"Providing multiple-user access to the Internet," is classified in *Class 38*. *Note:* This identification covers those services provided by Internet Service Providers ("ISPs"), such as Cox®, AOL®, Comcast®, Verizon®, and AT&T®. ISPs provide the computer connection (often using the Class 38 telecommunications services of other entities) that enables a computer user to access the databases and websites of others via the Internet. These entities are considered "access providers" in that they provide the computer connection needed for a computer user to access a content provider. The word "access" should be limited to these services and should not be used in describing the services of a content provider.

*Some acceptable identifications:*

- “Providing telecommunications connections to the Internet or databases, in Class 38.”
- “Electronic mail services, in International Class 38.”
- “Broadcasting of video and audio programming over the Internet, in Class 38.”
- “Webcasting services, in Class 38.”
- “Web conferencing services, in Class 38.”
- “Providing online chat rooms for transmission of messages among computer users concerning topics of interest to teens, in Class 38.”
- “Providing multiple-user access to the Internet, in Class 38.” Many ISPs have expanded their services to encompass content-based services for their subscribers. The “providing multiple-user access” identification only covers the ISP services. If the applicant wishes to protect its “content-based” services, it must identify those services with specificity and pay any additional fees, as appropriate. For information on identifying and classifying content-provider services, see [TMEP § 1402.11\(a\)\(ii\)](#).

### **1402.11(a)(iv) Office-Function-Type and Computerized Web Traffic Services**

These services are essentially office function services (e.g., filing and record keeping) that happen to be conducted with the use of a computer:

- “Data processing services, in Class 35.”
- “Computer data entry services, in Class 35.”
- “Systemization of data in computer databases, in Class 35.”

Computerized web services include website-focused activities the primary function of which is to promote, advertise or market the websites of others by improving a website’s visibility in search engine results.

- “Website traffic optimization, in Class 35.”
- “Consulting services in the field of search engine optimization, in Class 35.”
- “Promoting the goods and services of others through search engine referral traffic analysis and reporting, in Class 35.”

### **1402.11(a)(v) Computer Installation and Repair Services**

As set forth in the Nice Alphabetical List, installation, maintenance, and repair of computer hardware are in Class 37, while installation, maintenance, and updating of computer software are activities in Class 42. The applicant must distinguish between computer *hardware* and computer *software*. For example:

- “Installation, maintenance, and repair of computer hardware systems, in Class 37.”
- “Installation, maintenance, and updating of computer software systems, in Class 42.”

If the installation and maintenance services refer to networking hardware, the service should be classified in Class 37. For example:

“Installation, maintenance, and repair of Ethernet and wireless networking hardware, in Class 37.”

If the applicant applies for “*technical support services*,” the examining attorney will require the applicant to further specify the nature of the services. Technical support services may include services classified in more than one class, including the following:

- “Installation and maintenance services in either Class 37 or 42 (depending on whether the subject matter is hardware or software);”
- “Technical support services, namely, repair of computer hardware, in Class 37;”
- “Technical support services, namely, providing technical advice related to the manufacture of {indicate goods being manufactured}, in Class 40;”
- “Technical support services, namely, troubleshooting of computer software problems, in Class 42;” and
- “Technical support services, namely, diagnosis of computer hardware and software problems in Class 42.”

### 1402.11(a)(vi) Computer Retail Services

Retail store, catalog, and ordering services are classified in Class 35 no matter how the services are conducted. Any of the following identifications is acceptable:

- “Computerized online retail store services in the field of [specify], in Class 35.”
- “Computerized on-line ordering services in the field of [specify], in Class 35.”
- “Providing a website used to place online orders in the field of [specify], in Class 35.”

Other types of retail services, including marketing, advertising, and promotion, are also classified in Class 35 regardless of how the services are conducted. For example:

- “Marketing, advertising, and promoting the retail goods and services of others through wireless electronic devices, in Class 35.”
- “Providing an Internet website portal featuring links to music-related merchandise for retail purposes, in Class 35.”

### 1402.11(a)(vii) Computer Entertainment Services

Generally, entertainment services are classified in Class 41. However, the type of entertainment activity the applicant is conducting must be specified. Therefore, the identification “providing a website featuring entertainment” is not acceptable. Instead, one of the following may be more appropriate:

If the services comprise an “*online game*:”

- “Entertainment services, namely, providing a multiple-user online computer game, in Class 41.”
- “Providing a computer game that may be accessed network-wide by network users, in Class 41.”

If the services involve “*chat rooms*:” “Providing online chat rooms for transmission of messages among computer users concerning [indicate field or subject of chat room], in Class 38.”

If the services involve providing *information*: “Providing a website featuring information in the field of computer gaming entertainment, in Class 41.” See [TMEP §1402.11\(b\)](#).

If the services involve providing *non-downloadable videos*: “Providing a website featuring non-downloadable videos in the field of [indicate field or subject matter of videos], in Class 41.”

If the services involve *providing a website from which a user can receive “webcasted” transmissions* over the Internet: “Broadcasting (radio programs, television programs, multimedia programming, etc.) via the Internet, in Class 38.”

If the services consist of *providing a particular online show “webcasted”* over the Internet: “Entertainment, namely a continuing [indicate type, e.g., variety, news, comedy] show broadcasted over the Internet, in Class 41.”

### 1402.11(a)(viii) Computer Design and Development Services

Generally, these services are in Class 42. It is important to remember that these services must be performed for the benefit of *others*. If an applicant is developing its own software, it is not engaging in a recognized service. (See [TMEP §§1301.01](#) *et seq.* regarding activities that do not constitute services.) If the services are identified as “computer design and development services,” the specimens must show that the applicant provides these services for other parties. Some acceptable identifications are:

- “Computer software design and development services for others, in Class 42.”
- “Computer services, namely, creating and maintaining websites for others, in Class 42.”
- “Duplication of computer programs, in Class 42.”

### 1402.11(a)(ix) Database Services

Prior to January 1, 2002, the service of providing an online database via the Internet was classified in Class 42 if the database included a wide variety of subject matter. However, effective January 1, 2002, the *subject matter or content of the online database* now governs the classification of the services. Applicants must now separate the subject matter or content of the databases into their appropriate individual international classes. Acceptable identifications include:

- “Providing an online electronic database on the Internet in the field of business evaluations of automobile companies, in Class 35.”
- “Providing an online electronic database on the Internet in the field of banking, in Class 36.”
- “Providing an online electronic database on the Internet in the field of computer programming, in Class 42.”
- “Providing an online electronic database on the Internet in the field of cosmetology, in Class 44.”

In determining whether the specimens support “database provision services,” look for the following clues:

- See if the specimens use words like “to access our database,” “our database includes...,” etc.
- Confirm that the information provided online is capable of being searched, sorted, re-arranged, and indexed like a traditional database.
- If the specimens consist of merely a series of web pages, this is NOT a database. A more appropriate identification would be “providing a website on the Internet featuring information in the fields of \_\_\_\_\_, in Class \_\_\_\_ (class dependent on the content).”

Other common database services include the following:

- “Database development services, in Class 42.”

- “Computerized database management services, in Class 35.”

See [TMEP §1402.11\(b\)](#) regarding information services.

### **1402.11(a)(x) Online Publications**

All online publications are classified in Class 41 *no matter what the subject matter*. An acceptable identification would be:

“Computer services, namely providing online [indicate specific nature of publications, e.g., magazines, newsletters, etc.] in the field of [indicate subject matter of publication], in Class 41.”

A column or section of an online publication would be identified as “computer services, namely, providing a [column or section] in an online [indicate type of publication] in the field of [indicate subject matter of publication],” in Class 41.

The examining attorney should verify from the specimens that the information is presented in a “publication” format. An online magazine in Class 41 must really look like and have the attributes of a magazine, i.e., contain monthly or periodic articles, sections, features, advertisements, credits, etc. If it does not, a more appropriate identification would be “providing a website on the Internet featuring information in the field of \_\_\_\_\_, in Class \_\_\_\_” (classification dependent on the content).

If an applicant identifies its goods as “publications, namely ...,” and it becomes apparent during examination that the goods are in fact online publications, the applicant may amend the identification to indicate that the goods are online publications in Class 41, since the term “publications” is broad enough to encompass both printed and online publications. On the other hand, if the applicant identifies its goods as “printed publications...,” the identification cannot be amended to indicate that the goods are “online publications,” because this would exceed the scope of the original identification. 37 C.F.R. §2.71(a).

### **1402.11(a)(xi) Electronic Storage, Hosting of Data, and Cloud Computing**

Electronic storage of data for others is considered a computer service as it requires the provision of technological means to conduct the activity and is classified in Class 42 as of the 10th edition, 2014 version of the Nice Classification system. Hosting of computer websites and other data, including software as a service, is also a computer service when conducted for third parties. The storage or hosting of one’s own data is not considered a service within the meaning of the Trademark Act. Some acceptable identifications are:

- “Electronic data storage, in Class 42.”
- “Electronic storage of documents and archived e-mails, in Class 42.”
- “Hosting of digital content on the Internet, in Class 42.”
- “Website hosting services, in Class 42.”

Cloud computing comprises a variety of Class 42 activities that must be further specified for purposes of examination on the basis of likelihood of confusion under §2(d), 15 U.S.C. §1052(d). Some acceptable identifications are:

- “Computer services, namely cloud hosting provider services, in Class 42.”
- “Providing virtual computer systems and virtual computer environments through cloud computing, in Class 42.”
- “Cloud computing featuring software for use [specify function and, if content- or field-specific, the field of use], in Class 42.”

### 1402.11(b) Information Services

Prior to January 1, 2002, the identification “providing information in a wide variety of fields” was an acceptable identification of services, particularly in the context of Internet websites. The only caveat was to make sure that the website or information services *did* provide information in a wide variety of fields.

Effective January 1, 2002, the “miscellaneous” phrase has been eliminated from the heading of Class 42 ( *see* [TMEP §1401.09\(a\)](#)). Therefore, the examining attorney must require that the applicant indicate the fields in which it is providing information so that the service can be accurately classified. The fields may be listed somewhat broadly, but with enough specificity to allow classification. “Bundling” of the fields of information (that is, listing all fields of information but allowing the dominant or most significant field to control the classification with the other fields simply “along for the ride”) is no longer acceptable.

Since information services must now be classified according to the subject matter of the information, the nature or subject matter of the information provided must be specified to allow for proper classification.

For example, “information in the field of automobiles” is not sufficiently definite to allow for proper classification. If the information pertains to purchasing an automobile, then the service is classified in Class 35. If the information pertains to the care and maintenance of automobiles, the service is classified in Class 37. If the service involves insurance or financing of automobiles, then Class 36 is the proper class. The best way to ensure that the information is classified correctly may be to identify the subject matter of the service. For example, “information in the field of automobile financing” is adequate to classify the service in Class 36. Another way to clarify the classification of information services is to characterize the information itself. Thus, “providing financing information in the field of automobiles” clearly puts the service in Class 36. As with many other service identifications that require an indication of the subject matter or field, the subject matter or field does not have to be as specific as would be required if the subject matter or field were the service itself. However, an indication of the nature of the information must be included, either by reference to the type of information or the subject matter of the information provided, to allow for proper classification of the activity.

An applicant is not required to register in all classes in which it provides information, but may instead choose to register only the classes of the fields that are most important to it. The examining attorney will ask the applicant to indicate the fields of information to assist in classification. The applicant must decide if it wishes to: (1) go forward and register the information services in all of the appropriate classes; or (2) choose the class(es) that are most important to its business, and amend the identification to delete reference to fields of information that fall into other classes. *See* [TMEP §1401.04\(b\)](#).

### 1402.11(c) Association Services and “Promoting the Interest of” Services

The classification of services rendered by associations was affected by the reorganization of Class 42 ( *see* [TMEP §§1401.09 et seq.](#)). Prior to January 1, 2002, the Explanatory Notes regarding this topic for the old Class 42 included the language “services (not included in other classes) rendered by associations to their own members.” This language in the old Class 42 allowed identifications of services such as “association

services, namely, promoting the interest of lawyers” to be accepted in Class 42. Effective January 1, 2002, there is no reference to “services rendered by an association” in the Class Heading or Explanatory Notes for any of the service classes.

Most activities rendered by associations are easily classified in other classes, e.g., business services (Class 35), insurance services (Class 36), travel arrangements (Class 39), training and entertainment (Class 41).

Effective January 1, 2002, lobbying services and activities related or similar to lobbying activities provided by an association are classified in Class 35, because they further the business interests of the group represented by the association. Even non-business interests such as those that promote reading skills or environmental protection have a “business interest” in promoting their concerns.

#### **1402.11(d) Charitable Services, Other than Monetary**

Prior to January 1, 2002, non-monetary charitable services were classified in Class 42, regardless of the type of service being provided by the charity. Effective January 1, 2002, services are classified by the nature of the service provided, e.g., “charitable services, namely, providing shelter for the homeless” are in Class 43, like other temporary accommodation services; “charitable services, namely, providing tutoring for underprivileged students” are classified in Class 41, like other educational services. See [TMEP §§1401.09 et seq.](#) regarding the changes in the international classification of services effective January 1, 2002.

#### **1402.11(e) Consulting Services**

Prior to January 1, 2002, all consulting services were classified in Class 42 except those relating to business (Class 35) and financial or insurance (Class 36). Effective January 1, 2002, consulting services are classified in the class of the subject matter of the service. This includes technical consulting services. Technical consulting is like any other consultation service, although it focuses primarily on how things work. Thus, the type of consultation or subject matter of the consultation must be set forth with adequate specificity to allow for accurate classification. It should be noted that “technology consulting” is in Class 42 because it encompasses consulting about the information technology related to the subject matter given.

##### *Some Acceptable Identifications:*

- “Consulting in the field of telecommunication services, namely, transmission of voice, data, and documents via telecommunications networks, in Class 38.”
- “Consulting in the field of telecommunications technology, in Class 42.”
- “Consulting in the field of maintenance and repair of telecommunications network hardware, apparatus, and instruments, in Class 37.”
- “Consulting in the field of environmental protection, namely, detection of contaminants in water, in Class 42.”
- “Technical consulting related to the installation of oil and gas equipment, control systems, and machinery, in Class 37.”
- “Technical consulting related to the manufacturing of oil and gas equipment, control systems, and machinery, in Class 40.”
- Technical consulting in the field of environmental science, in Class 42.”

See [TMPEP §§1401.09](#) *et seq.* regarding the changes in the international classification of services effective January 1, 2002.

### **1402.11(f) Distribution of Videotapes, Audiotapes, Videodiscs, and Similar Items**

The services of production and distribution of motion pictures and television programs are classified in Class 41. This service involves the actual creation of the motion picture or television program and the accompanying activity of distributing it to movie theatres and television stations for display to the public.

In this service, the ownership of the physical product does not leave the producer. The movie theatre or television stations "lease" (in a sense) the film or tape for a period of time and then return it to the producer.

This is not the case when distribution relates to videotapes, audiotapes, or other hard goods that result from the production of visual or audio entertainment. When these goods are distributed, it is the same as the distribution of any other kind of hard goods by any other manufacturer. The ownership of the physical product is transferred to the purchaser just as it is with clothing, toys, food products, or computers. For this reason, the identification "distribution of videotapes, audiotapes, videodiscs, etc." should not be accepted as a service even when the distribution is linked to the production of these goods. The production of the entertainment product is perfectly acceptable in Class 41; however, the distribution of the hard goods that result from that production is not a service in that class. It is possible that such distribution could be considered a distributorship service in Class 35, but that must be determined on a case-by-case basis.

Distribution of one's own goods is not a service; it is merely a necessary part of doing business. However, if the applicant distributes the videotapes, audiotapes, etc. of others as well as those it has produced, it may be identified as a distributorship service in Class 35.

See [TMPEP §§1301.01](#) *et seq.* regarding the criteria for determining whether an activity constitutes a service.

### **1402.11(g) Recorded Entertainment Services**

For entertainment services such as those rendered by a musical group, the performance must be live. The recording of a live concert or studio performance is not considered a service of the performing group.

Similarly, performances for the sole purpose of recording are not considered services. The production by another entity of a performance by a musical group for recordation would be a service, but an identification such as "live and recorded performances by a musical group" could not be accepted as a valid service identification unless the words "and recorded" were deleted.

Recorded entertainment usually takes the form of goods in Class 9, such as videotapes, audio cassettes, DVDs, CD-ROMs, etc. This is consistent with the treatment of "distribution" of these products as goods and not services as discussed in §1402.11(f).

See [TMPEP §§1301.01](#) *et seq.* regarding the criteria for determining whether an activity constitutes a service.

### **1402.11(h) Identification of "Bonus Programs"**

Many businesses offer "bonus programs" or "frequent patron programs" to encourage patronage of that business. However, promotion of one's own goods or services is not considered a service under the Lanham Act since the beneficiary of such an activity is the business itself and not a third party. See [TMPEP §1301.01\(b\)\(i\)](#). These special programs do confer some benefit to the customers who participate in the program, but this benefit flows directly from use of the trademark owner's goods or services. Thus, a frequent flyer program provided by an airline to encourage use of its own air transportation services would be identified as "air transportation services featuring a frequent flyer bonus program" and it would be

classified in Class 39. Similarly, a retail store that has a program through which patrons earn points that result in discounts on future purchases at that store would be identified as "retail store services in the field of [indicate field] featuring a frequent patron program in which points are accumulated to be used for discounts on future purchases." This service would be in Class 35 because it is primarily a retail store service. It should be noted that organizing and conducting a program of this type for a third party is a promotion/advertising service and would be classified in Class 35 and identified with language such as "promoting the goods and services of others by means of a point accumulation program with points used for discounts on future purchases of those goods and services" (or whatever the details of the program may be).

### **1402.11(i) Marketing Services and Advertising Services**

Effective January 1, 2012, "Marketing" was added to the Nice Alphabetical List. See [TMEP §1401.11\(e\)](#). As with "Advertising services," the entry is listed in the ID Manual as "Marketing services" to emphasize that the activity is a service (i.e., an activity done for the benefit of others) and to make clear that use of both terms is preferred.

However, if upon consideration of the entire application, including the specimen of use, other wording in the identification or other information in the application, the Examining Attorney determines that an applicant is actually promoting its own goods and/or services, a refusal may be issued on the basis that the record fails to identify a registrable service as contemplated by the Trademark Act. See [TMEP §§904.07\(b\)](#) and [1301.01-1301.01\(b\)\(v\)](#). Further, the unambiguous wording "marketing of [specific goods]" may not be clarified to identify only goods. For example, amendment of "marketing of shirts" to "shirts" would be beyond the scope of the original, acceptably definite identification.

### **1402.11(j) Issuing Awards**

Services that involve the issuance of awards are usually classified in Classes 35 and 41. Classification depends upon the purpose of the award program. If the award program is an employee incentive rewarding excellence in job-related performance that actually furthers the business of an employer (e.g., safety, quality, productivity, customer service), then the service is classified in Class 35. If the award program is to recognize excellence or achievement that may or may not be related to the participants' business or professional endeavors (e.g., achievements in community service, excellence in country music performance), then the service should be classified in Class 41. The distinction is that Class 35 award programs do further the business interests of an employer by encouraging positive business-related performance, while Class 41 award programs reward excellence for endeavors that do not further the business interests of an employer.

## **1402.12 Parentheses and Brackets Should Not be Used in Identifications of Goods and Services**

Generally, parentheses and brackets should not be used in identifications of goods and services. The Post Registration Section of the USPTO uses single brackets to indicate that goods/services have been deleted from a registration either by amendment under 15 U.S.C. §1057, filing of a partial affidavit of continued use under 15 U.S.C. §1058 or 15 U.S.C. §1141k, or filing of a partial renewal application under 15 U.S.C. §1059. The Post Registration Section also uses double parentheses to indicate that certain goods or services are not claimed in an affidavit of incontestability under 15 U.S.C. §1065. See [TMEP Chapter 1600](#) regarding affidavits of continued use or excusable nonuse, renewal applications, affidavits of incontestability, and amendment of registrations.

Therefore, to avoid confusion, applicants should not use parentheses and brackets in the identification of goods or services in an application. The only time parentheses may be used in an identification is when the parentheses merely explain or translate the matter preceding the parenthetical phrase in such a way that it does not affect the clarity of the identification.

For example, “bags (tote)” in Class 18 would not be an acceptable use of parentheses. If the identification were misinterpreted to mean that “tote” was no longer part of the identification of goods (due to an amendment of the goods, or filing of a partial affidavit of continued use or renewal application, the item would merely read “bags.” That would create an ambiguity within Class 18, since it could refer to any type of bag – from an all-purpose sports bag to an evening bag – and it would make a determination of likelihood of confusion difficult. Also, some bags are in classes other than Class 18. Without an indication of the type of bag, classification of the goods is problematic.

However, an identification of goods such as “obi (Japanese sash)” in Class 25 would be acceptable because the parenthetical phrase merely provides further information about the goods.

### **1402.13 Requirement for Amendment of Portion of Identification of Goods/Services**

If a requirement for an amendment of the identification of goods and/or services is expressly limited to only certain goods/services, and the applicant fails to file a response to the refusal or requirement, the application shall be abandoned only as to those particular goods/services, if it is otherwise in condition for approval for publication. 37 C.F.R. §2.65(a); [TMEP §718.02\(a\)](#). However, if the Office action includes an advisory stating that amendment would require the payment of additional fees because the fee paid is insufficient to cover all the classes, and the applicant fails to file a response, the entire application will be abandoned. [TMEP §718.02\(a\)](#).

Accordingly, when the identification of goods/services includes some terminology that is indefinite and some terminology that is acceptable, the examining attorney should specify which terminology is indefinite, suggest amended language if possible, and indicate that the rest of the identification is acceptable.

When an applicant fails to respond to a requirement to amend some terminology in an otherwise acceptable identification of goods/services, and the application is otherwise in condition for approval for publication, the examining attorney should issue an examiner’s amendment that clearly sets forth the changes that will be made to the identification of goods/services. No prior authorization from the applicant is needed to issue an examiner’s amendment in this situation. See [TMEP §707.02](#) regarding examiner’s amendments without prior authorization by the applicant.

### **1402.14 Identification of Goods/Services Must Conform to Rules and Policies in Effect at the Time Registration is Sought**

The question of whether an identification of goods/services is acceptable must be determined on the basis of the facts and evidence that exist at the time registration is sought, that is, at the time of filing. Cf. [TMEP §1216.01](#). The international classification system and USPTO policy on acceptable identifications change periodically (see, e.g., [TMEP §§1401.09](#) *et seq.* regarding the restructuring of international class 42). Therefore, the fact that an identification of goods or services was accepted in an earlier-filed application or prior registration does not necessarily mean it is controlling in a later-filed application. See *In re Omega SA*, 494 F.3d 1362, 83 USPQ2d 1541 (Fed. Cir. 2007) (examining attorney’s requirement for amendment

of the term “chronographs” in the identification of goods upheld, notwithstanding applicant’s ownership of several registrations in which this term appears without further qualification in the identification).

### **1402.15 Procedures for Processing Unacceptable Amendments to Identifications**

If an applicant submits an amendment to the identification of goods/services and the examining attorney determines that the amendment is unacceptable, the examining attorney must issue an action refusing to accept the amendment. If an unacceptable amendment was entered into the automated records of the USPTO, and an acceptable amendment was subsequently submitted, the examining attorney must ensure that the automated records are modified to reflect the acceptable identification prior to approving the mark for publication.

If the applicant later submits arguments in support of acceptance of the amendment and the examining attorney determines that the amendment is still unacceptable, the examining attorney must issue a final refusal of the amendment, if the application is otherwise in condition for final action.

### **1403 Combined or Multiple-Class Application**

*37 CFR §2.86 Application may include multiple classes.*

- (a) In a single application, an applicant may apply to register the same mark for goods and/or services in multiple classes. The applicant must:
  - (1) Specifically identify the goods or services in each class;
  - (2) Submit an application filing fee for each class, as set forth in §2.6(a)(1); and
  - (3) Include either dates of use ( *see* §§2.34(a)(1)(ii) and (iii)) and one specimen for each class, or a statement of a bona fide intention to use the mark in commerce on or in connection with all the goods or services specified in each class. The applicant may not claim both use in commerce and a bona fide intention to use the mark in commerce for the identical goods or services in one application.
- (b) An amendment to allege use under §2.76 or a statement of use under §2.88 must include, for each class, the required fee, dates of use, and one specimen. The applicant may not file the amendment to allege use or statement of use until the applicant has used the mark on all the goods or services, unless the applicant files a request to divide. *See* §2.87 for information regarding requests to divide.
- (c) The Office will issue a single certificate of registration for the mark, unless the applicant files a request to divide. *See* §2.87 for information regarding requests to divide.

### **1403.01 Requirements for Combined or Multiple-Class Application**

Goods and/or services that fall in more than one class may be included in one application, called a “combined” or “multiple-class” application.

A multiple-class application may be viewed as a group of applications for registration of a mark in connection with goods or services in each class, combined into one application. Each class of goods or services must be considered separately. *See G&W Laboratories, Inc. v. G W Pharma Ltd.*, 89 USPQ2d 1571 (TTAB 2009).

A multiple-class application may pertain to only one mark, and to only one register. A single certificate of registration will be issued, unless the application is divided. *See* [TMEP §§1110](#) *et seq.* regarding division of an application.

A multiple-class application must contain the following:

- (1) The class numbers for which registration is sought, and the goods or services appropriately classified in each class. The classes must be set forth in consecutive numerical order beginning with the lowest

- number, and the goods or services must be listed in association with their class numbers. Setting the classes and the goods or services out in tabulated form rather than narrative form is desirable because it usually adds clarity. 37 C.F.R. §§2.32(a)(6) and (7).
- (2) A filing fee for each class. 37 C.F.R. §§2.6(a)(1), 2.32(d), and 2.86(a)(2). See [TMEP §§810.01 and 1403.06](#).
  - (3) The dates of first use and first use in commerce for each class, in an application under §1(a) of the Act. 37 C.F.R. §2.86(a)(3). If the dates are the same for all classes, the dates may be stated once, with the statement that the mark was first used on said dates on the goods or services in all the classes. If the dates of use differ for different classes, the appropriate dates for each class must be specified separately. The dates may be set forth in separate clauses, sentences, or paragraphs, or in tabular form, whichever will give complete information in the clearest way under the circumstances.
  - (4) One specimen supporting use of the mark on goods or services in each class, in an application under §1(a) of the Act. 37 C.F.R. §2.86(a)(3). If a single specimen supports multiple classes, the applicant may so indicate, and the examining attorney need not require multiple copies of the specimen. The examining attorney should enter a Note to the File in the record, indicating which classes the specimen supports.
  - (5) Only one drawing may be included, because there may be only one mark per application. See [TMEP §807.01](#).

Prior to registration, an intent-to-use applicant must file an allegation of use under 15 U.S.C. §1051(c) or 15 U.S.C. §1051(d) which: states that the applicant is using the mark in commerce on or in connection with the goods or services; includes dates of use and a filing fee for each class; and includes one specimen evidencing use of the mark for each class. 37 C.F.R. §2.86(b). See 37 C.F.R. §2.76 and [TMEP §§1104 et seq.](#) regarding amendments to allege use, and 37 C.F.R. §2.88 and [TMEP §§1109 et seq.](#) regarding statements of use.

## **1403.02 Amendment of Combined or Multiple-Class Application**

An application under §1 or §44 of the Trademark Act may be amended during prosecution to delete, correct, or add classes, when appropriate.

In a §66(a) application, classes may be deleted, but classes cannot be added, and goods/services cannot be moved to another class. 37 C.F.R. §2.85(d). See [TMEP §§1401.03\(d\), 1402.01\(c\), and 1904.02\(b\) and \(c\)](#).

### **1403.02(a) Deletion of Classes**

An applicant may delete a class or classes and prosecute the application only in the remaining class or classes. Normally, the filing fee is not refunded when a class is deleted. 37 C.F.R. §2.209; [TMEP §§405.04 and 810.02](#).

If the applicant designates the classes incorrectly and there are actually no goods in one of the classes designated in a multiple class application, the fee for that class may be refunded.

### **1403.02(b) Correction of Classification**

In an application under §1 or §44 of the Trademark Act, improper classification can be corrected by switching goods/services by amendment from one to another of the classes originally set forth, or by changing the class designations, as long as the number of classes is not increased.

The examining attorney may correct classification through an examiner's amendment, without prior authorization by the applicant. See [TMEP §707.02](#). Correction of classification after publication for opposition does not require republication. See [TMEP §1505.03\(b\)](#).

When more than one item of goods or services is listed in a class, the specimen and dates of use given do not necessarily apply to all the items listed. If the item to which the specimen and/or dates pertain is removed from the identification by amendment, the applicant must submit a new specimen and/or dates of use for that class. If the new dates differ from the dates originally set forth, the additional dates must be supported by an affidavit or declaration by the applicant. 37 C.F.R. §2.71(c). See [TMEP §903.04](#) regarding permissible amendment of dates of use.

In a §66(a) application, classes cannot be added, and goods/services cannot be transferred from one class to another in a multiple-class application. 37 C.F.R. §2.85(d). See [TMEP §§1401.03\(d\)](#), [1402.01\(c\)](#), and [1904.02\(b\) and \(c\)](#).

### **1403.02(c) Addition of Classes**

In an application under §1 or §44 of the Trademark Act, class(es) may be added if any of the items originally recited are properly classified in class(es) not originally indicated. The applicant must pay an additional fee for each new class.

The amount of the fee varies depending on the method used to file the original application and the amendment adding classes, as follows:

- If the original application was filed through TEAS Plus and the amendment is filed through TEAS (either as a voluntary amendment or a response to an examining attorney's Office action) or entered by examiner's amendment, then the fee for adding a class is the same as the TEAS Plus application filing fee per class (37 C.F.R. §2.6(a)(1)(iii)).
- If the original application was not filed through TEAS Plus, and the amendment is filed through TEAS or entered by examiner's amendment, then the fee for adding a class is the same as the TEAS application filing fee per class (37 C.F.R. §2.6(a)(1)(ii)).
- If the amendment is filed on paper, then the fee for adding a class is the same as the fee per class for filing an application on paper (37 C.F.R. §2.6(a)(1)(i)), regardless of how the original application was filed.

The current fee schedule is available on the USPTO website at <http://www.uspto.gov>.

If dates of use for a class that is added are different from dates previously set forth, the applicant must submit an affidavit or declaration under 37 C.F.R. §2.20 to support the dates. 37 C.F.R. §2.71(c). See [TMEP §903.04](#) regarding permissible amendment of dates of use.

An additional specimen that is not identical to a specimen originally filed must be supported by an affidavit or declaration attesting to its use as of an appropriate date. 37 C.F.R. §2.59; [TMEP §904.05](#).

If an intent-to-use application is amended to add class(es), the applicant must submit, for each added class, the basic application fee *and* fees for the allegation of use (i.e., either the amendment to allege use or the statement of use), and any extension request(s) granted in the interim. This applies even if the classes are added after the amendment to allege use or statement of use is filed, or the extension request(s) is granted.

In a §66(a) application, classes cannot be added, and goods/services cannot be transferred from one class to another in a multiple-class application. 37 C.F.R. §2.85(d). See [TMEP §§1401.03\(d\), 1402.01\(c\), and 1904.02\(b\) and \(c\)](#).

### **1403.03 Dividing of Combined or Multiple-Class Application**

A delay in registration of one class in a multiple-class application will mean delay for the entire application. In such a situation, upon payment of the applicable fee, the applicant may file a request to physically divide the original application into separate applications. These new applications are assigned new serial numbers and cross-referenced with the original application. The additional separate applications are given the same filing date as the original application.

The following are examples of situations when an applicant may want to have class(es) divided out into one or more separate applications:

- (1) Registration is refused in less than all the classes;
- (2) A notice of opposition is filed against goods or services in less than all the classes; or
- (3) The applicant in a §1(b) application begins using the mark in commerce on goods or services in less than all the classes.
- (4) The applicant intends to respond to a refusal by amending to the Supplemental Register as to only certain goods/services/classes in the application. See [TMEP §§801.02\(b\) and 816.04](#).

When a multiple-class application is divided, the application is separated or divided into individual applications. See [TMEP §§1110 et seq.](#) for information about dividing an application.

### **1403.04 Combined or Multiple-Class Marks in *Official Gazette***

The marks in multiple-class applications appear in the *Official Gazette* in a separate section from the marks in single-class applications. Therefore, it is necessary to look in more than one place in the *Official Gazette* to make a complete review of published marks.

### **1403.05 Refusals and Oppositions as to Less Than All the Classes in a Multiple-Class Application**

A refusal to register or a requirement may be made for less than all the classes in an application. Whether it is appropriate to make a refusal or requirement with regard to less than all classes must be considered on a case-by-case basis.

When issuing a refusal or requirement pertaining to less than all the classes, the examining attorney must expressly state that the refusal or requirement that applies only to certain class(es), and indicate the class(es) to which the refusal or requirement pertains. If an applicant fails to file a complete response to a refusal or requirement that was expressly limited to certain class(es), the application shall be abandoned only as to those class(es) if it is otherwise in condition for approval for publication. However, if the Office action includes an advisory stating that amendment would require the payment of additional fees because the fee paid is insufficient to cover all the classes, and the applicant fails to file a response, the entire application will be abandoned. 37 C.F.R. §2.65(a). See [TMEP §718.02\(a\)](#).

When an opposition is sustained only as to some of the class(es) in a multiple-class application, the application is returned to the examining attorney. The examining attorney must perform the proper database transaction to ensure issuance of registration for only the proper class(es).

#### **1403.06 Fees for Action After Filing, Multiple Classes**

In a multiple-class application or registration, a fee for each class must be paid when filing an allegation of use or request for extension of time to file a statement of use for applications under §1(b) of the Trademark Act; ex parte appeal to the Trademark Trial and Appeal Board; affidavit or declaration under §8 or §71 of the Act; affidavit of incontestability under §15 of the Act; application for renewal of a registration under §9 of the Act, opposition, or petition for cancellation of a registration under §14 of the Act. 15 U.S.C. §§1051, 1058, 1059, 1063, 1064, 1065, and 1141k.

In these situations, when a party submits a fee that does not cover all the classes in the application or registration, the party should state that action is sought only for the number of classes equal to the number of fees submitted, and should specify the classes for which action is being sought. This may avoid an unnecessary inquiry by the USPTO.

See [TMEP §1403.02\(c\)](#) regarding the amount of the fee(s) for adding class(es) to an application.

#### **1403.07 Surrender or Amendment in Multiple-Class Registrations**

In a multiple-class registration, deletion of less than all the goods or services in a single class constitutes an amendment, whereas deletion of an entire class constitutes a surrender of the registration for cancellation as to the class deleted. 37 C.F.R. §2.172; [TMEP §1609.03](#).

## 1501 Appeal to Trademark Trial and Appeal Board

### *15 U.S.C. §1070*

An appeal may be taken to the Trademark Trial and Appeal Board from any final decision of the examiner in charge of the registration of marks upon the payment of the prescribed fee.

#### *37 CFR §2.141 Ex parte appeals from action of trademark examining attorney.*

(a) An applicant may, upon final refusal by the trademark examining attorney, appeal to the Trademark Trial and Appeal Board upon payment of the prescribed fee for each class in the application for which an appeal is taken, within six months of the date of issuance of the final action. A second refusal on the same grounds may be considered as final by the applicant for purpose of appeal.

(b) The applicant must pay an appeal fee for each class from which the appeal is taken. If the applicant does not pay an appeal fee for at least one class of goods or services before expiration of the six-month statutory filing period, the application will be abandoned. In a multiple-class application, if an appeal fee is submitted for fewer than all classes, the applicant must specify the class(es) in which the appeal is taken. If the applicant timely submits a fee sufficient to pay for an appeal in at least one class, but insufficient to cover all the classes, and the applicant has not specified the class(es) to which the fee applies, the Board will issue a written notice setting a time limit in which the applicant may either pay the additional fees or specify the class(es) being appealed. If the applicant does not submit the required fee or specify the class(es) being appealed within the set time period, the Board will apply the fee(s) to the class(es) in ascending order, beginning with the lowest numbered class.

An appeal from an examining attorney's action is taken to the Trademark Trial and Appeal Board ("Board"), not to a court. An appeal is taken by filing a notice of appeal and paying the appeal fee within six months of the date of issuance of the action from which the appeal is taken. 15 U.S.C. §1070; 37 C.F.R. §2.142(a).

See [Trademark Trial and Appeal Board Manual of Procedure](#) ("TBMP") §1202.03.

The Trademark Act gives applicants a right to appeal to the Board after a final action by an examining attorney. 15 U.S.C. §1070. Under 37 C.F.R. §2.141(a), a second refusal on the same grounds or a repeated requirement is considered a final action for purposes of appeal as long as all refusals or requirements are repeated in that action. Appeal from a first refusal or requirement, however, is premature.

The applicant must file the notice of appeal and appeal fee within six months of the date of issuance of the final refusal. 37 C.F.R. §2.142(a); TBMP §1202.02. To expedite processing, the United States Patent and Trademark Office ("USPTO") strongly recommends that applicants file notices of appeal through the Electronic System for Trademark Trials and Appeals ("ESTTA") at <http://estta.uspto.gov>. If filing on paper, the applicant may use a certificate of mailing or transmission to avoid lateness. See 37 C.F.R. §§2.197 and 2.198, and TMEP §§ [305.02](#) *et seq.*, [305.03](#), and [306.05](#) *et seq.* regarding certificate of mailing, "Express Mail," and certificate of transmission procedures. If the applicant does not timely file a notice of appeal and appeal fee, the application is abandoned. 15 U.S.C. §1062(b). If the applicant's failure to file a proper notice of appeal was unintentional, the applicant may file a petition to revive under 37 C.F.R. §2.66 ( *see* [TMEP §§1714](#) *et seq.*). *Note: The unintentional delay standard of 37 C.F.R. §2.66 does not apply to applications that are abandoned due to an **incomplete** response e.g., a request for reconsideration that is not accompanied by a notice of appeal.* See [TMEP §§715.03](#) *et seq.* regarding requests for reconsideration, and [TMEP §§1714.01\(f\)\(ii\)–1714.01\(f\)\(ii\)\(E\)](#) regarding situations where the unintentional delay standard does not apply.

In appropriate circumstances, after an appeal is filed either the applicant or the examining attorney can request a remand, or the Board may remand the application to the examining attorney. See TBMP §§1209 *et seq.* regarding remand during an appeal. See also [TMEP §§1504.05](#) *et seq.* for further information.

See, generally, 37 C.F.R. §§2.142 and 2.144 and TBMP Chapter 1200 for further information about ex parte appeals to the Board, and 15 U.S.C. §1071, 37 C.F.R. §2.145, and TBMP Chapter 900 regarding appeal to a court from a decision of the Board.

### **1501.01 Appealable Matter**

An applicant who wishes to contest a refusal based on a matter of substance (e.g., a matter arising under §§2, 3, 4, 5, 6, or 23 of the Act of 1946, 15 U.S.C. §§1052, 1053, 1054, 1055, 1056, or 1091), should file an appeal to the Board, not a petition to the Director.

If the only issue in dispute is a question regarding the applicant's compliance with a technical provision of the Trademark Act or Trademark Rules of Practice, the applicant may file a petition to the Director rather than an appeal. See 37 C.F.R. §§2.63 and 2.146. See also [TMEP §1704](#) and TBMP §1201.05 regarding petitionable matter versus appealable matter.

An examining attorney's requirement that is the subject of a petition decided on the merits by the Director may not subsequently be the subject of an appeal to the Board. 37 C.F.R. §2.63(b).

### **1501.02 Appeal Briefs**

#### **1501.02(a) Applicant's Appeal Brief**

The applicant must file an appeal brief within 60 days of the date of the appeal, or the Board may dismiss the appeal. 37 C.F.R. §2.142(b)(1). See *In re Live Earth Products Inc.*, 49 USPQ2d 1063 (TTAB 1998).

If the appeal is dismissed, the applicant may file a motion with the Board to set aside the dismissal and accept a late-filed brief. Applicant may also file a motion to accept a late-filed brief when the time for filing the brief has expired but the Board has not yet issued an order dismissing the appeal. If the Board denies the motion, the applicant may file a petition to the Director under 37 C.F.R. §2.146, asking the Director to review the Board's action. The Director will reverse the Board's action only if the Board clearly erred or abused its discretion. An applicant should not file a petition to the Director until it has *first* filed a request/motion to accept the late-filed brief with the Board, and the Board has denied the request/motion.

TBMP §1203.02(a). The applicant may not file a petition to revive under 37 C.F.R. §2.66 when an appeal is dismissed for failure to file a brief. [TMEP §1714.01\(f\)\(ii\)\(E\)](#).

The date of appeal for purposes of calculating the due date of the appeal brief is the date on which the notice of appeal and filing fee is received by the USPTO. If the applicant has also filed a request for reconsideration under 37 C.F.R. §2.64, the Board will acknowledge receipt of the appeal and request, suspend further proceedings (including applicant's time for filing its appeal brief), and remand the application to the examining attorney. See TBMP §§1203.02(a) and 1204 for further information. The filing of a request for reconsideration within six months of a final Office action will automatically result in a suspension of the appeal, and an applicant need not file either its appeal brief or a request for an extension of time to file the brief. See TBMP §1204.

The applicant's brief may not exceed twenty-five double-spaced pages in length, and should meet the requirements of 37 C.F.R. §2.126. 37 C.F.R. §2.142(b)(2); TBMP §1203.01. *See In re Thomas*, 79 USPQ2d 1021 (TTAB 2006) (Board refused to consider applicant's 29-page brief).

### **1501.02(b) Examining Attorney's Appeal Brief**

After the applicant's brief has been filed, the Board will send a notice to the examining attorney. The examining attorney has sixty days from the date of the Board's notice to file a responsive brief with the Board and send a copy to the applicant. 37 C.F.R. §2.142(b)(1). *See* TBMP §1203.02(b).

The examining attorney's appeal brief should be concise and contain a complete statement of reasons for the refusal(s) or requirement(s) and supporting facts.

Examining attorneys should use the format shown in Appendix A as a model when preparing an appeal brief. The purpose of this format is to promote consistency and to provide content guidelines. The substance of the appeal brief is a matter of individual discretion.

The brief may not exceed twenty-five double-spaced pages in length. 37 C.F.R. §2.142(b)(2); TBMP §1203.01. *See In re Thomas*, 79 USPQ2d 1021 (TTAB 2006) (Board refused to consider applicant's 29-page brief).

Because the record must be complete prior to appeal, the Board will normally not consider evidence submitted with the applicant's or examining attorney's brief. However, if the applicant does submit such evidence, the examining attorney should specifically object to such evidence if he or she does not want it to be considered.

If the examining attorney does not object to the evidence, and discusses it in his or her brief or elsewhere in the record, the Board will treat it as of record. 37 C.F.R. §2.142(d); TBMP §1207.03; [TMEP §710.01\(c\)](#). *See In re Broyhill Furniture Industries, Inc.*, 60 USPQ2d 1511, 1513 n.3 (TTAB 2001).

If, during the preparation of the appeal brief, the examining attorney determines that jurisdiction should be restored for further examination (e.g., to make a new refusal, to correct informalities, or to suspend), the examining attorney should submit a request for remand instead of an appeal brief. *See* [TMEP §1504.05](#). If the Board grants the examining attorney's request, the Board will stay further proceedings in connection with the appeal. If the Board denies the request, it will reset the time for submission of the examining attorney's appeal brief.

### **1501.02(c) Reply Briefs in Ex Parte Appeals**

The applicant may file a brief in reply to the examining attorney's appeal brief. Reply briefs must be filed within twenty days of the date of issuance of the examining attorney's brief. 37 C.F.R. §2.142(b)(1). The examining attorney may not file a written response to the reply brief. However, in the oral argument (if the applicant requests an oral argument), the examining attorney should respond to any significant issues raised in the applicant's reply brief.

### **1501.03 Withdrawal of Refusal or Requirement After Appeal**

If, after considering the applicant's brief or reply brief, the examining attorney believes that the requirement or refusal should be withdrawn, the examining attorney should withdraw the requirement or refusal and approve the application for publication or issue, if it is otherwise in condition for such action. The examining attorney should notify the applicant by telephone or e-mail that the requirement or refusal is withdrawn, and

should enter an appropriate Note to the File in the record. This may be done at any time before the Board's decision on appeal. It is not necessary to notify the Board that the refusal or requirement has been withdrawn.

If there is more than one ground of refusal and one ground should be withdrawn, that refusal should be withdrawn and the appeal should go forward on the remaining ground(s). The following language should be included in the examining attorney's brief, informing the applicant of the withdrawal of the refusal or requirement:

The examining attorney acknowledges receipt of the applicant's appeal brief. The examining attorney has withdrawn [specify the refusal or requirement].

#### **1501.04 Fee for Appeal**

When filing an ex parte appeal to the Board from the refusal of the examining attorney to register a mark, the applicant must pay a fee for each class in the application for which the appeal is taken. 37 C.F.R. §2.141(b).

The fee for at least one class of goods/services must be paid before expiration of the six-month statutory filing period, or the application is abandoned. If the fee filed with the appeal is sufficient for at least one class of goods/services but insufficient for all the classes in a multiple-class application, and the applicant has not specified the class(es) to which the fee applies, the Board will notify the applicant of the defect, and will set a time limit in which the applicant may either pay the additional fee(s), or limit the appeal to the number of classes for which the fee(s) have been paid. If the applicant does not submit the required fee(s) or specify the class(es) to which the fee applies within the time set in the notice, the fee submitted will be applied to the classes in ascending order, beginning with the lowest-numbered class and including the number of classes in the application for which sufficient fees have been submitted. See 37 C.F.R. §2.141(b); TBMP §1202.04.

#### **1501.05 Amendment During Appeal**

If the applicant files an amendment after filing a timely notice of appeal, the examining attorney may not act on it without authorization from the Board, because jurisdiction over the application is with the Board after a notice of appeal is filed. In appropriate cases, the Board may remand the case to the examining attorney to consider the matter presented in the document, with appropriate instructions to the examining attorney regarding consideration of the document and disposition of the case after such consideration. TBMP §1205.

If an application is remanded to the examining attorney to consider an amendment, and the examining attorney determines that the amendment places the application in condition for publication or issue, the examining attorney should notify the applicant by telephone or e-mail that the amendment has been entered, and that the amendment renders the appeal moot. It is not necessary to notify the Board.

#### **1501.06 Amendment After Decision on Appeal**

An examining attorney may not take action in an application after the Board has rendered a decision on appeal, because the examining attorney does not have jurisdiction over the application. See *In re U.S. Catheter & Instrument Corp.*, 158 USPQ 54, 55 n.3 (TTAB 1968). After a decision on appeal, the applicant may petition the Director under 37 C.F.R. §2.142(g) to reopen prosecution of the application. If the petition is granted, jurisdiction is restored to the examining attorney to take the specified action.

A petition to reopen prosecution of the application could be granted if the appeal involved the applicant's compliance with a requirement rather than a refusal based on the nature of the mark. See *In re Hickory Mfg. Co.*, 183 USPQ 789 (Comm'r Pats. 1974). However, the Director will deny a petition to reopen prosecution if granting the petition would require further examination (e.g., to consider a claim of acquired distinctiveness under 15 U.S.C. §1052(f) or an amendment to the Supplemental Register). See *In re Petite Suites Inc.*, 21 USPQ2d 1708 (Comm'r Pats. 1991); *In re Vycom Electronics Ltd.*, 21 USPQ2d 1799 (Comm'r Pats. 1986); *In re Mack Trucks, Inc.*, 189 USPQ 642 (Comm'r Pats. 1976). See also TBMP §1218 and cases cited therein.

### **1501.07 Examining Attorney's Request for Reconsideration**

In *In re Ferrero S.p.A.*, 22 USPQ2d 1800 (TTAB 1992), *recon. denied*, 24 USPQ2d 1061 (TTAB 1992), an augmented panel of the Board expressly overruled prior precedent and held that an examining attorney may request reconsideration of a Board decision reversing the examining attorney in an ex parte appeal.

The examining attorney's request must be filed within one month from the date of the Board's decision. 37 C.F.R. §2.144. No new evidence can be introduced with the request. The request should point out any errors of fact or law in the Board's decision.

To request reconsideration, the examining attorney must prepare a request and a supporting brief and submit the request to the managing attorney for concurrence in the decision to seek reconsideration. If the managing attorney concurs, the managing attorney will submit the request for reconsideration and brief to the Administrator for Trademark Policy and Procedure for approval.

If the Administrator approves the request, the examining attorney will file the request with the Board and send a copy to the applicant. The Board will set an appropriate time for the applicant to respond to the request. The examining attorney may not file a reply brief in response to the applicant's brief.

### **1502 Publication in *Trademark Official Gazette***

After examination of an application is completed and the examining attorney determines that the mark is entitled to registration on the Principal Register, the mark is published in the *Official Gazette* of the USPTO for opposition. 15 U.S.C. §1062; 37 C.F.R. §2.80. Any notice of opposition must be filed within thirty days after the date of publication, or within an extension of time granted by the Board for filing an opposition. 15 U.S.C. §1063(a); 37 C.F.R. §2.101(c); [TMEP §1503.03](#). See [TMEP §1503.01](#) for further information about filing a notice of opposition.

Marks that are found to be registrable on the Supplemental Register are registered when printed in the *Official Gazette*. Marks registered on the Supplemental Register cannot be opposed, but are subject to cancellation under 15 U.S.C. §1064. 15 U.S.C. §1094.

In addition, marks registered on the Principal Register under the intent-to-use provisions of §1(d) of the Act are printed in the *Official Gazette* on the date of issuance of the registration. These marks were previously

published for opposition, and are not subject to opposition again. See [TMEP §1105](#) regarding the publication of intent-to-use applications for opposition.

### **1502.01 Notification of Clerical Errors in Trademark Official Gazette**

To request correction a clerical error by the USPTO in the publication of a mark in the *Trademark Official Gazette*, the applicant or applicant's attorney must file a written request. This request should include the applicant's or attorney's telephone number and e-mail address, and should be e-mailed to [TMPostPubQuery@uspto.gov](mailto:TMPostPubQuery@uspto.gov). The request should be filed within one week after the date of publication in the *Official Gazette*.

Only purely clerical errors by the USPTO (e.g., a typographical error or omission, drawing printed upside down, or incorrectly stated data) can be corrected by a request(s) sent to this e-mail address. The paralegal specialists in the Office of the Deputy Commissioner for Trademark Examination Policy will review the applicant's request to verify the existence of the clerical error and determine whether the error can be corrected without jurisdiction being restored to the examining attorney or republication being required.

To request correction of typographical errors made by the applicant that appear in the USPTO Trademark databases after the mark has been approved for publication, use the Post-Publication Amendment form at <http://teas.uspto.gov/office/ppa/>.

See [TMEP §§1505](#) *et seq.* for information concerning post-publication amendments and when republication is required.

## **1503 Opposition**

### **1503.01 Filing a Notice of Opposition**

Any person who believes that he or she would be damaged by the registration of a mark on the Principal Register may oppose registration by filing a notice of opposition with the Board, and paying the required fee, within thirty days after the date of publication, or within an extension period granted by the Board for filing an opposition. See 15 U.S.C. §1063; 37 C.F.R. §§2.101 through 2.107; TBMP §§303 *et seq.*

The notice of opposition must include a concise statement of the reasons for the opposer's belief that the opposer would be damaged by the registration of the opposed mark, and must state the grounds for opposition. 37 C.F.R. §2.104(a); TBMP §§309.01 *et seq.*

A notice of opposition to an application based on §1 or §44 of the Trademark Act may be filed either on paper or through ESTTA at <http://estta.uspto.gov/>. 37 C.F.R. §2.101(b)(1). A notice of opposition to an application based on §66(a) of the Act *must* be filed through ESTTA. 37 C.F.R. §2.101(b)(2). See *In re Börlind Gesellschaft für kosmetische Erzeugnisse mbH*, 73 USPQ2d 2019 (TTAB 2005); TBMP §309.01.

A notice of opposition does not have to be verified, and it may be signed by either the opposer or the opposer's attorney. 37 C.F.R. §2.101(b); TBMP §309.02(b).

### 1503.02 Joining Persons in an Opposition

Two or more persons may join in an opposition. TBMP §303.06. Related companies are separate persons for the purpose of filing an opposition.

### 1503.03 Time for Opposing

An opposition must be filed within thirty days after the date of publication in the *Official Gazette*, or within an extension period granted by the Board. 15 U.S.C. §1063(a); 37 C.F.R. §2.101(c); TBMP §§306 *et seq*. The time within which to file an opposition is set by statute and may not be extended or waived. *In re Kabushiki Kaisha Hitachi Seisakusho*, 33 USPQ2d 1477 (Comm'r Pats. 1994); *In re Cooper*, 209 USPQ 670 (Comm'r Pats. 1980).

When a registration is issued, inadvertently, from an application that was the subject of a timely filed notice of opposition, the Board is without authority to cancel the registration and restore it to application status.

In this situation, the Board will refer the registration file to the Office of the Deputy Commissioner for Trademark Examination Policy for appropriate action. See TBMP §216. See also [TMEP §1609.10\(a\)](#) regarding correction of USPTO errors.

### 1503.04 Extension of Time to Oppose

Requests for extensions of time to oppose are handled by the Board. See TBMP Chapter 200.

A request for an extension of time must be filed within thirty days after the date of publication in the *Official Gazette*, or within an extension period granted by the Board. 15 U.S.C. §1063(a); 37 C.F.R. §2.102(c); TBMP §§202 *et seq*. The time within which to file a request for extension of time to oppose is set by statute and may not be extended or waived. *In re Kabushiki Kaisha Hitachi Seisakusho*, 33 USPQ2d 1477 (Comm'r Pats. 1994); *In re Cooper*, 209 USPQ 670 (Comm'r Pats. 1980).

A request for extension of time to oppose an application based on §1 or §44 of the Trademark Act may be filed either on paper or through ESTTA, at <http://estta.uspto.gov/>. 37 C.F.R. §2.102(a)(1). A request for extension of time to oppose a §66(a) application *must* be filed through ESTTA. 37 C.F.R. §2.102(a)(2). See *In re Börlind Gesellschaft für kosmetische Erzeugnisse mbH*, 73 USPQ2d 2019 (TTAB 2005).

For additional information regarding filing a request for an extension of time to oppose, see TBMP Chapters 200 and 300.

When a registration is issued, inadvertently, from an application that was the subject of an unexpired extension of time to oppose on the date of registration, the Board is without authority to cancel the registration and restore it to application status. See TBMP §216. In this situation, a request to have the registration cancelled

as inadvertently issued should be directed to the Office of the Deputy Commissioner for Trademark Examination Policy. See [TMEP §1609.10\(a\)](#) regarding correction of USPTO errors.

### 1503.05 Opposition to §66(a) Applications

Section 68(a)(2) of the Trademark Act, 15 U.S.C. §1141h(a)(2), provides that a request for extension of protection is subject to opposition under §13 of the Trademark Act, 15 U.S.C. §1063. The USPTO must notify the International Bureau of the World Intellectual Property Organization (“IB”) within 18 months of the date the IB sends the request for extension of protection to the USPTO of: (1) a notification of refusal based on the filing of an opposition; or (2) a notification of the possibility that an opposition may be filed after expiration of the 18-month period. 15 U.S.C. §1141h(c)(1)(B)-(C). See [TMEP §§ 1904.03 et seq.](#) and [1904.04](#).

An opposition to a §66(a) application, or a request for extension of time to oppose a §66(a) application, must be filed through ESTTA. 37 C.F.R. §§2.101(b)(2) and 2.102(a)(2). See *In re Börlind Gesellschaft für kosmetische Erzeugnisse mbH*, 73 USPQ2d 2019 (TTAB 2005).

Once filed, an opposition to a §66(a) application may not be amended to add to the grounds for opposition or to add to the goods or services opposed. 37 C.F.R. §2.107(b). The scope of the opposition is limited to those grounds designated, and those goods/services identified, on the ESTTA-generated opposition form. *CSC Holdings LLC v. SAS Optimhome*, 99 USPQ2d 1959, 1962 (TTAB 2011); *Hunt Control Sys., Inc. v. Koninklijke Philips Elec. N.V.*, 98 USPQ2d 1558, 1561-62 (TTAB 2011). See [TBMP §315](#).

## 1504 Jurisdiction over Application

### 1504.01 Jurisdiction of Examining Attorney

As a general rule, until publication of the mark in the *Official Gazette*, the examining attorney has jurisdiction over the application and can issue a refusal or a requirement without the approval of the Director. See [TMEP §1504.03](#) regarding action by the examining attorney after publication.

In addition, for applications under §1(b) of the Act, 15 U.S.C. §1051(b), the examining attorney has jurisdiction after issuance of the notice of allowance under §13(b) of the Trademark Act, 15 U.S.C. §1063(b). 37 C.F.R. §2.84(a). See [TMEP §1107](#) regarding amendment of a §1(b) application during the period between issuance of a notice of allowance and filing of a statement of use.

There is a time period during which an examining attorney cannot issue an action in an application because the USPTO is unable to withdraw the mark from its scheduled publication in the *Official Gazette*. The USPTO is generally unable to withdraw a mark within the twenty-day period before the scheduled publication date. See [TMEP §§1505 et seq.](#) regarding the processing of amendments filed during this period.

### 1504.02 Jurisdiction of Trademark Trial and Appeal Board

The Board has jurisdiction over an application upon the filing of the notice of appeal. The Board may, in response to an examining attorney’s request, on its own initiative, or upon request from the applicant, suspend the appeal and remand the application to the examining attorney. If an examining attorney wants to issue a new refusal or requirement during an appeal, the examining attorney must file a request for remand with the Board. 37 C.F.R. §2.142(f)(6). See [TBMP §§1209.01 and 1209.02](#); [TMEP §1504.05](#). See [TMEP](#)

[§715.04\(a\) and \(b\)](#) regarding the examining attorney's action when an application is remanded after the filing of an appeal.

The Board also has jurisdiction over any application in which a notice of opposition has been filed or a concurrent use proceeding has commenced. The Board will approve or disapprove any amendments proposed during an inter partes proceeding. See 37 C.F.R. §2.133; [TMEP §1505.01\(f\)](#); TBMP §§514 *et seq.*

In an application under §1 or §44 of the Act, if an examining attorney wants to issue a new refusal or requirement during an inter partes proceeding, the examining attorney must request that the Board suspend the proceedings and remand the application for further examination. 37 C.F.R. §2.130; TBMP §515. In a §66(a) application, the examining attorney may not request a remand during an opposition. [TMEP §1504.05\(a\)](#); TBMP §515.

A request for an extension of time to file an opposition does not vest jurisdiction in the Board. In this situation, any request by the examining attorney for jurisdiction should be addressed to the Director. See [TMEP §§1504.03](#) and [1504.04\(a\)](#).

The Board has no jurisdiction over a pending application that has been suspended pending disposition of the applicant's petition to cancel a registration cited under §2(d) of the Trademark Act ( see [TMEP §716.02\(a\)](#)), or disposition of the applicant's opposition to an earlier-filed application cited as a potential bar to registration under §2(d) ( see [TMEP §§716.02\(c\)](#) and [1208.02\(c\)](#)). In either situation, if the applicant wants to amend its pending application, or submit a consent agreement, the applicant must file the amendment or the consent agreement with the examining attorney, not with the Board. See TBMP §605.03(c) regarding filing an amendment or consent agreement in a pending application owned by the plaintiff pursuant to a settlement agreement between the parties in a Board proceeding.

### **1504.03 Action by Examining Attorney After Publication**

If it is found necessary (e.g., through internal quality review), for an examining attorney to refuse registration or to make a requirement after a mark has been published for opposition, jurisdiction over the application must be restored to the examining attorney.

With the exception of applications that are the subject of inter partes proceedings before the Board ( see [TMEP §1504.05\(a\)](#) ), the examining attorney can telephone an applicant and issue an examiner's amendment without restoration of jurisdiction. However, if the examining attorney issues an Office action, even if merely asking for additional information, the examining attorney must request jurisdiction, because the request for additional information is a "requirement."

If it is necessary to issue an Office action after publication, the examining attorney must check the status of the application to determine whether the Board has received a notice of opposition. If a request for an extension of time to file an opposition has been filed, the examining attorney should prepare a request to restore jurisdiction, directed to the Director. See [TMEP §1504.04\(a\)](#). If a notice of opposition has been filed, jurisdiction is with the Board, and the examining attorney should file a request for remand, directed to the Board. See [TMEP §1504.05](#).

When it is necessary to issue an Office action after publication in a §1(a) application, but it is too late to withdraw the application from issuance of a registration, the examining attorney should bring the matter to the attention of the Administrator for Trademark Policy and Procedure in the Office of the Deputy

Commissioner for Trademark Examination Policy (“Administrator”). After registration, the Administrator may restore the application to pendency and refer it to the examining attorney for appropriate action.

See [TMEP §§1505](#) *et seq.* regarding amendments proposed by applicants after publication.

#### **1504.04 Restoration of Jurisdiction to Examining Attorney by Director**

If it is necessary to refuse registration or to make a requirement after publication and prior to the filing of a notice of opposition or issuance of a notice of allowance, the examining attorney must request that the Director restore jurisdiction so that the examining attorney may take the specified action on the application. See [TMEP §1106.02](#) regarding action by the examining attorney after issuance of a notice of allowance.

Normally, the Director will restore jurisdiction to the examining attorney only if there has been a clear error ( *see* [TMEP §706.01](#) ) After publication of a mark, a restoration of jurisdiction to the examining attorney is possible only in the case of an application for registration on the Principal Register. A mark found registrable on the Supplemental Register is not published for opposition but is published only when it has registered.

The examining attorney does not have to request jurisdiction to act in a §1(b) application *after* issuance of the notice of allowance. If, after the notice of allowance issues, the examining attorney determines that he or she must issue a new refusal or requirement, the examining attorney must request cancellation of the notice of allowance. However, the examining attorney should not make a refusal or requirement that could or should have been made during initial examination of the application unless the initial failure to make the refusal or requirement was a clear error, and must consult with the managing attorney or senior attorney before taking the action. See [TMEP §706.01](#) regarding “clear error” and [TMEP §§1106.02](#) and [1106.03](#).

The provisions with respect to requesting jurisdiction over published §66(a) applications are similar to those for applications under §§1(a) and 44 of the Trademark Act. 37 C.F.R. §2.84. However, when deciding whether to grant requests for jurisdiction of §66(a) applications, the Director must consider the time limits for notifying the IB of a refusal of a §66(a) application, set forth in Article 5(2) of the Madrid Protocol and §68(c) of the Trademark Act, 15 U.S.C. §1141h(c). *See* [TMEP §1904.03\(a\)](#) for further information.

#### **1504.04(a) Request for Jurisdiction**

The examining attorney’s request for jurisdiction should be in the form of a memorandum to the Director, accompanied by the Office action that the examining attorney proposes to send to the applicant. The request should be signed by the examining attorney, the managing attorney, and the Administrator for Trademark Policy and Procedure.

In the Office action, the examining attorney should apologize for the untimeliness of the action because, at this point, except for possible opposition issues, the applicant is expecting issuance of a registration or notice of allowance. The action should provide a detailed explanation of the basis for the refusal or requirement, citing appropriate case law, even when addressing basic and well-established propositions.

#### **1504.05 Remand to Examining Attorney by Trademark Trial and Appeal Board**

The Board, on its own initiative or in response to a request, may remand an application to the examining attorney for consideration of specific facts or issues. When the Board initiates a remand, the examining

attorney must take action upon the remanded issue within thirty days of the Board's remand order. 37 C.F.R. §2.142(f)(1); TBMP §1209.01.

A request for remand made by the examining attorney should succinctly explain the specific reasons why remand is requested. That is, the request should be a brief statement of the reason for the request and an explanation of the action the examining attorney intends to take. On remand, the examining attorney may address only those issues for which the application was remanded. If the examining attorney identifies additional issues other than those for which the application was remanded, the examining attorney must request an expanded remand to consider the additional issues. TBMP §1209.02.

The following are examples of circumstances when the Board may remand an application to the examining attorney during an ex parte appeal:

- (1) When evidence that the applicant or the examining attorney wants to include in the record was not previously available (e.g., a recent article, newly issued registration, or recent decision).
- (2) When a new attorney for the applicant, or a new examining attorney, wants to supplement the record made by his or her predecessor.
- (3) When the applicant and the examining attorney agree to a remand.
- (4) When the examining attorney requests a remand to issue a new requirement or new ground for refusal of registration, or to reinstate a previously withdrawn requirement or refusal. 37 C.F.R. §2.142(f)(6). Prior to submission of such a request for remand, however, the examining attorney must bring the matter to the attention of the managing and senior attorneys, who must then bring it to the attention of the Administrator for Trademark Policy and Procedure in the Office of the Deputy Commissioner for Trademark Examination Policy ("Administrator"). See TBMP §1209.02 regarding an examining attorney's request for remand.

*See also* TBMP §1207.02.

A request for remand by the examining attorney to submit additional evidence must include a showing of good cause (which may take the form of a satisfactory explanation as to why the evidence was not filed prior to appeal), and be accompanied by the additional evidence sought to be introduced. *See* TBMP §1207.02. Absent a remand, no evidence should be submitted to the Board following a notice of appeal, except with or in response to an applicant's timely filed request for reconsideration. 37 C.F.R. §2.142(d); TBMP §1207.01. *See* TBMP §1207.04 and TMEP §715.03 regarding the submission of evidence with or in response to a request for reconsideration.

If the examining attorney finds it necessary to refuse registration or to make a requirement during an inter partes proceeding involving an application under §1 or §44 of the Trademark Act, the examining attorney must request the Board to remand the application. 37 C.F.R. §2.130. However, the examining attorney must bring the matter to the attention of the managing and senior attorneys, who must then bring it to the attention of the Administrator prior to submission of such a request for remand. In a §66(a) application, the examining attorney may not request a remand during an inter partes proceeding.

See TBMP §§1209 et seq. regarding remand during an appeal, and TBMP §515 regarding remand during an inter partes proceeding.

## **1505 Amendments Filed by Applicants After Publication**

Applicants sometimes submit amendments after publication. For processing purposes, an “amendment after publication” includes any amendment filed during the time period in which the USPTO is unable to withdraw a mark from its scheduled publication in the *Official Gazette*, or from the scheduled issuance of its registration. The USPTO is generally unable to withdraw a mark unless the amendment is received and processed at least twenty days before the scheduled publication date or registration issue date.

The following sections discuss the USPTO’s procedures and policies for the disposition of amendments after publication.

### **1505.01 Procedures for Processing Amendments Filed by the Applicant After Publication**

#### **1505.01(a) Form and Timing of Amendments**

All amendments filed after publication must be submitted in writing. Unless a notice of opposition has been filed, the Office prefers that amendments filed after publication but before issuance of a registration or notice of allowance be filed electronically. In TEAS, the Post-Publication Amendment form can be accessed at <http://www.uspto.gov>. If it is not possible to file the amendment electronically, it should be faxed to Post Publication Amendments/Corrections at 571-270-9007, unless the amendment includes a special form drawing. See 37 C.F.R. §2.195(d)(2) (prohibiting fax transmission of drawing). An amendment filed on paper that includes a special form drawing should be mailed to the following address:

Commissioner for Trademarks  
Petitions Office  
P.O. Box 1451  
Alexandria, Virginia 22313-1451

Requests to correct minor typographical errors entered by the USPTO, inquiries regarding the procedure for submitting a post-publication amendment, or questions regarding the status of a pending post-publication amendment can be e-mailed to [TMPostPubQuery@uspto.gov](mailto:TMPostPubQuery@uspto.gov).

Any amendment filed during the pendency of an inter partes opposition proceeding should be filed directly with the Board. See 37 C.F.R. §2.133 and [TMEP §1505.01\(f\)](#).

The USPTO cannot process any amendment filed during the time periods in which the mark cannot be withdrawn from publication in the *Official Gazette* or from issuance of a registration. If a request for amendment relates to a mark that cannot be withdrawn from publication, it will be processed in accordance with the procedures set forth in [TMEP §§1505.01\(b\)](#) through [1505.02\(f\)](#). If a request for amendment relates to a mark that cannot be withdrawn from issuance of a registration, or that has already registered, the applicant will be instructed to resubmit its request to the Post Registration Section as a request to amend or correct the registration under §7 of the Trademark Act. 15 U.S.C. §1057; 37 C.F.R. §§2.6, 2.173(a), 2.174, and 2.175.

See [TMEP §§1107](#) and [1107.01](#) regarding amendments to a §1(b) application filed between the issuance of a notice of allowance and the submission of a statement of use, and [TMEP §§1609](#) *et seq.* regarding amendment of a registration under §7(e) of the Trademark Act.

### **1505.01(b) Processing Amendments to §§1(a), 44, and 66(a) Applications in Cases Where No Opposition Has Been Filed and a Registration Certificate Has Not Yet Issued**

Amendments filed after publication will be reviewed by paralegal specialists in the Office of the Deputy Commissioner for Trademark Examination Policy. If necessary, the application will be withdrawn from issue to ensure that the mark does not register before the amendment has been considered. The paralegal specialists will consult with an attorney, if necessary.

#### **1505.01(b)(i) Acceptable Amendments**

If an amendment is acceptable and does not require republication of the mark, the paralegal specialist will enter the amendment and the mark will continue on to the scheduled issue date. See [TMEP §1505.03\(b\)](#) for examples of amendments that do not require republication.

If the amendment is acceptable and republication is required, the paralegal specialist must telephone or e-mail the applicant and inform the applicant that the amendment is acceptable, but requires republication of the mark. If the applicant wishes to pursue the request, the paralegal specialist must enter a Note to the File in the record that the proposed amendment has been accepted, that republication is required, and that the applicant has agreed to the republication. The paralegal specialist will then enter the amendment and set a new publication date. A new notice of publication will be issued. See [TMEP §1505.03\(a\)](#) for examples of amendments that require republication.

#### **1505.01(b)(ii) Unacceptable Amendments**

If the paralegal specialist determines that an amendment is unacceptable, the paralegal specialist must provide written notification to the applicant, explaining why the amendment is unacceptable and advising the applicant that: (1) the application will be returned to processing without entry of the requested amendment; and (2) applicant's only recourse is to file a petition to the Director requesting that jurisdiction be restored to the examining attorney to consider the merits of the amendment. 37 C.F.R. §§2.84 and 2.146. Any petition to the Director must be filed within six weeks of the publication date to ensure that it is timely processed. Thereafter, any request for amendment must be filed pursuant to §7 of the Trademark Act, 15 U.S.C. §1057.

### **1505.01(c) Processing Amendments to §1(b) Applications in Cases Where No Opposition Has Been Filed and No Notice of Allowance Has Issued**

Amendments filed after publication and before issuance of a notice of allowance will be reviewed by paralegal specialists in the Office of the Deputy Commissioner for Trademark Examination Policy. If necessary, the application will be withdrawn from issue to ensure that the notice of allowance does not issue before the amendment has been considered.

#### **1505.01(c)(i) Acceptable Amendments**

If the amendment is acceptable and republication is not required, the paralegal specialist will enter the amendment and schedule the mark for issuance of a notice of allowance. See [TMEP §1505.03\(b\)](#) for examples of amendments that do not require republication.

If the amendment is acceptable and republication is required, a paralegal specialist must telephone or e-mail the applicant and inform the applicant that the amendment is acceptable, but requires republication of the mark. If the applicant wishes to pursue the request, the paralegal specialist must enter a Note to the File in the record indicating that the proposed amendment has been accepted, that republication is required, and that the applicant has agreed to the republication. The paralegal specialist will then enter the amendment and set a new publication date. A new notice of publication will be issued. See [TMEP §1505.03\(a\)](#) for examples of amendments that require republication.

#### **1505.01(c)(ii) Unacceptable Amendments**

If the paralegal specialist determines that the amendment is unacceptable, the paralegal specialist must provide written notification to the applicant explaining why the amendment is unacceptable and advising the applicant that: (1) the request to amend the application may be resubmitted with the statement of use; or (2) the applicant may file a petition to the Director under 37 C.F.R. §§2.84 and 2.146 requesting that jurisdiction be restored to the examining attorney to consider the merits of the amendment.

See [TMEP §§1107](#) *et seq.* regarding amendments after issuance of the notice of allowance but before the filing of the statement of use.

#### **1505.01(d) Processing Amendments Filed Between Issuance of the Notice of Allowance and Filing of Statement of Use**

The only amendments that will be entered in a §1(b) application between the issuance of a notice of allowance and the submission of a statement of use are those outlined in [TMEP §1107](#). See 37 C.F.R. §2.77. All other amendments will be placed in the record for consideration by the examining attorney during examination of the statement of use. An applicant may file a petition to the Director under 37 C.F.R. §2.146 to waive 37 C.F.R. §2.77 to permit the examining attorney to examine the amendment prior to the filing of a statement of use. See [TMEP Chapter 1700](#) regarding petitions and [TMEP §§1107](#) *et seq.* for further information about amendments filed between the issuance of a notice of allowance and the submission of a statement of use.

#### **1505.01(e) Processing Amendments in Cases Where a Request for Extension of Time to Oppose Has Been Filed or Granted**

An amendment of an application that is under an extension of time to file an opposition should be processed in accordance with the procedures set forth in [TMEP §§1505.01\(b\) through \(d\)](#). The Director retains jurisdiction of such an application until an opposition is actually filed.

It is not necessary for the paralegal specialist to notify the Board of the action taken on the amendment.

The Board will not suspend the potential opposer's time to file a notice of opposition in this situation. See notice at 68 Fed. Reg. 55748, 55760 (Sept. 26, 2003).

#### **1505.01(f) Processing Amendments in Cases Where an Opposition Has Been Filed**

If the applicant files an amendment after a notice of opposition has been filed, the Board will act on the amendment under 37 C.F.R. §2.133. The Board has jurisdiction over any application in which an opposition

has been filed. See TBMP §§514 *et seq.* for further information about amendment of an application during an opposition.

## 1505.02 Types of Amendments After Publication

The following subsections discuss the most common types of amendments after publication. Note that there are some restrictions on amendments to §66(a) applications, as discussed below. In addition, only certain amendments are permitted in §1(b) applications between the issuance of the notice of allowance and filing of the statement of use. See 37 C.F.R. §2.77; [TMEP §§1107](#) and [1107.01](#) .

See [TMEP §1505.01\(a\)](#) regarding the form and timing of filing amendments after publication and [TMEP §1609](#) regarding amendment of a registration under §7(e) of the Trademark Act.

### 1505.02(a) Amendments to the Identification of Goods or Services

If an applicant proposes to amend the identification of goods/services after publication by *restricting* or *deleting* items in the existing identification, and the amendment is otherwise proper, the USPTO will approve the amendment, and the mark will not be republished. Amendments to add goods/services or to broaden the scope of an identification are not permitted at any time. See 37 C.F.R. §2.71(a); [TMEP §§1402.07](#) *et seq.* .

### 1505.02(b) Amendments to Classification

In an application under §1 or §44, if the applicant proposes to amend the classification after publication, and the amendment is consistent with the current version of the *Nice Agreement Concerning the International Classification of Goods and Services for the Purposes of the Registration of Marks* , the USPTO will approve the amendment. Republication is not required.

The international classification of goods/services in a §66(a) application cannot be changed from the classification given to the goods/services by the IB. 37 C.F.R. §2.85(d). See [TMEP §1401.03\(d\)](#) .

### 1505.02(c) Amendments to Marks

In an application under §1 or §44, if the applicant proposes to amend the mark after publication, the amendment is not a material alteration of the mark, and the specimen of record or foreign registration (if applicable) supports use of the mark as amended, the USPTO will approve the amendment and will not republish the mark. If the applicant proposes to amend the mark and the amendment represents a material alteration to the mark, the USPTO will not approve the amendment. See 37 C.F.R. §2.72; [TMEP §§807.13](#) *et seq.* . and [807.14](#) *et seq.* .

The mark in a §66(a) application cannot be amended. [TMEP §807.13\(b\)](#) .

### 1505.02(d) Amendments to the Dates of Use

If, in an application under §1(a), the applicant proposes to amend the dates of use to adopt a date of use that is after the filing date of the application, the USPTO will not approve the amendment. See 37 C.F.R. §2.71(c)(1). If, in an application under §1(a), the applicant proposes to amend the dates of use to adopt a date of use that is later than the date originally stated, but before the application filing date, the USPTO will approve the amendment and will republish the mark to provide notice to parties who may have commenced

use of a similar mark during the intervening period. If the applicant proposes to amend the dates of use to adopt a date that is before the date originally stated, the USPTO will approve the amendment and will not republish the mark. See [TMEP §903.04](#) for further information about amending the dates of use in a pending application, and [TMEP §1609.07](#) regarding amendment of the dates of use after registration.

### **1505.02(e) Amendments Adding or Deleting Disclaimers**

If an applicant proposes to amend an application after publication to insert a disclaimer, and the amendment is otherwise proper, the USPTO will approve the amendment and will not republish the mark. Likewise, if the USPTO requests the insertion of a disclaimer after publication and the applicant agrees to the disclaimer, the USPTO will enter the disclaimer and will not republish the mark.

If an applicant proposes to amend the application to delete a disclaimer after publication and before issuance of the notice of allowance or registration certificate, and the USPTO determines that the amendment is acceptable, the USPTO will approve the amendment in accordance with the procedures in [TMEP §1505.01\(c\)\(i\)](#), and will republish the mark. If the amendment deleting the disclaimer is unacceptable, the USPTO will follow the procedures in [TMEP §1505.01\(c\)\(ii\)](#). The applicant may then resubmit the amendment with the statement of use, or petition the Director to restore jurisdiction of the application to the examining attorney to consider the amendment. See 37 C.F.R. §2.84(a). If the examining attorney eventually approves the amendment, the USPTO will republish the mark.

Republishing is generally required when a disclaimer is deleted after publication (e.g., if printed through a clerical error or originally required by the examining attorney and later determined to be unnecessary).

Exception: If the applicant proposes to amend the mark after publication to delete matter that was the subject of a disclaimer (e.g., generic wording), the USPTO determines that the amendment is not a material alteration of the mark, and the applicant also requests that the disclaimer be deleted, the USPTO will approve the amendment and will not republish the mark.

### **1505.02(f) Amendment of the Basis**

In an application that is not the subject of an inter partes proceeding before the Board, if an applicant wants to add or substitute a basis after publication, the applicant must petition the Director to allow the examining attorney to consider the amendment. If the Director grants the petition, and the examining attorney accepts the added or substituted basis, the mark must be republished. 37 C.F.R. §2.35(b)(2); [TMEP §806.03\(j\)](#). See [TMEP §§806.03 et seq.](#) regarding amendment of the basis. See 37 C.F.R. §2.133(a) and TBMP §514 regarding the amendment of the basis of an application that is the subject of an inter partes proceeding before the Board.

In a §66(a) application, the applicant cannot change the basis, unless the applicant meets the requirements for transformation under §70(c) of the Act, 15 U.S.C. §1141j(c), and 37 C.F.R. §7.31. 37 C.F.R. §2.35(a). See [TMEP §§1904.09 et seq.](#) regarding transformation.

In a multiple-basis application, the applicant may delete a basis at any time prior to registration. 37 C.F.R. §2.35(b)(1). No petition is required. See [TMEP §806.04\(a\)](#) regarding the deletion of a §1(b) basis after publication or issuance of the notice of allowance.

### **1505.02(g) Amendments to the Applicant’s Name, Citizenship, or Entity Type**

If an applicant proposes to amend an application after publication to correct an inadvertent error in the manner in which its name, entity type, or citizenship is set forth, and the amendment is otherwise proper, the USPTO will approve the amendment and will not republish the mark. See [TMEP §1201.02\(c\)](#) for examples of correctable and non-correctable errors in identifying the applicant.

### **1505.03 Republication for Opposition**

The following sections list examples of post-publication amendments that require republication of the mark and those that do not require republication. If a mark that is the subject of a request for an extension of time to oppose will be republished, the paralegal specialist or the examining attorney who orders the republication must notify the Board that the mark will be republished. See TBMP §214 regarding the effect of republication on marks that are republished during the original thirty-day opposition period or within a granted extension period.

#### **1505.03(a) When Republication is Required**

Republication is required after entry of any acceptable post-publication amendment that expands the applicant’s rights or would otherwise require notice to third parties. The following list, though not exhaustive, provides examples of amendments that would require republication of the mark:

- Amendment adds or substitutes a basis (37 C.F.R. §2.35(b)(2));
- Unnecessary §2(f) claim is deleted;
- Unnecessary disclaimer is deleted;
- A product, service, or class was deleted by USPTO error and is reinserted into the application;
- A product, service, or class was deleted due to partial abandonment ( see [TMEP §718.02\(a\)](#) ) and is reinserted upon granting of petition to revive;
- Identification of goods/services is amended to an identification that is narrower in scope than the published identification, but results in a material difference in the nature of the goods or services (e.g., the mark published for “shoes” in Class 25 and the applicant then amends to “orthopedic shoes” in Class 10);
- An incorrect mark was published due to USPTO error;
- The effective filing date ( see [TMEP §§206 et seq.](#) ) changes to a later date;
- The priority filing date under §44(d) (see [TMEP §1003](#) ) is corrected to a later date;
- In a §1(a) application, either the date(s) of first use or the date(s) of first use in commerce is amended to a date(s) that is later than the date(s) stated (but earlier than the filing date of the application);
- In a §1(b) application for which an amendment to allege use has been filed, either the date(s) of first use or the date(s) of first use in commerce is amended to a date(s) that is later than the date(s) stated (but earlier than the filing date of the amendment to allege use);
- Application is amended to indicate which goods/services are based on §1(a) and which are based on §1(b) in a multiple-basis application that published without such an indication;
- Application is amended to the Principal Register from the Supplemental Register;
- Application is amended from a trademark or service mark to certification mark or vice versa;

- An application with a §44(e) basis is amended to rely on a different foreign registration after publication.

### **1505.03(b) When Republication is Not Required**

Republication is not required after entry of **acceptable** post-publication amendments in the following situations:

- The mark is amended, and the USPTO determines that the amendment is not a material alteration of the mark;
- A multiple-basis application is amended to delete a §1(b) basis;
- The priority filing date under §44(d) (see [TMEP §1003](#)) is corrected to an earlier date;
- Identification of goods/services is amended to adopt an identification that is narrower in scope than the published identification and there is no material difference in the nature of the goods or services (e.g., republication is not required if the mark published for “shoes” in Class 25 and the applicant amends to “shoes, namely, running shoes” in Class 25);
- An application that published on the Principal Register is amended to the Supplemental Register;
- The filing date ( see [TMEP §§206](#) *et seq.* ) is amended to an earlier date ( *Note* : The filing date change must be approved by the Office of the Deputy Commissioner for Trademark Examination Policy.);
- The date(s) of first use or date(s) of first use in commerce is amended to adopt a date(s) that is earlier than the date(s) originally stated;
- The goods/services were published in the wrong class;
- A disclaimer is added;
- A §2(f) claim is added;
- The applicant’s name, citizenship, or entity type is amended to correct an inadvertent error;
- In a §1(b) application for which a statement of use has been filed, either the date(s) of first use or the date(s) of first use in commerce is amended to a date(s) that is later than the date(s) stated (but earlier than the statutory deadline for filing the statement of use);
- An amendment to show the dates of use in one or more classes for a multiple-class application that published without the dates showing in those classes, when the dates of use appeared on the allegation of use and are the same as or earlier than those that published for the other classes.
- A statement of concurrent use is added.

### **1506 Concurrent Use Registration Proceeding**

A concurrent use registration proceeding is an inter partes proceeding in which the Board determines whether one or more applicants are entitled to concurrent registration. A concurrent registration is one with conditions and limitations, fixed by the Board, as to the mode or place of use of the applicant’s mark or the goods/services on or in connection with which the mark is used. The Board conducts these proceedings after the mark has been published, and the Board determines whether or not concurrent use registrations should issue. See TBMP Chapter 1100.

See [TMEP §§1207.04](#) *et seq.* regarding the procedure to be followed by examining attorneys in relation to concurrent use.

## 1507 Interference

An interference is a proceeding in which the Board determines which, if any, of the owners of conflicting applications (or of one or more applications and one or more registrations that are in conflict) is entitled to registration. *See* 15 U.S.C. §§1066 and 1068.

An interference can be declared only upon petition to the Director. However, the Director will grant such a petition only if the petitioner can show extraordinary circumstances that would result in a party being unduly prejudiced in the absence of an interference. 37 C.F.R. §2.91(a). The availability of an opposition or cancellation proceeding ordinarily precludes the possibility of undue prejudice to a party. Thus, a petitioner must show that there is some extraordinary circumstance that would make the remedy of opposition or cancellation inadequate or prejudicial to the party's rights. Interferences are generally limited to situations where a party would otherwise be required to engage in successive or a series of opposition or cancellation proceedings, and where the issues are substantially the same. *See In re Family Inns of America, Inc.*, 180 USPQ 332 (Comm'r Pats. 1974).

The following matters are not subject to interference: (1) registrations on the Supplemental Register; (2) applications for registration on the Supplemental Register; (3) registrations under the Act of 1920; and (4) registrations of marks that have become incontestable. 37 C.F.R. §2.91(b).

See [TMEP §§1208.03](#) *et seq.* and TBMP Chapter 1000 for more information about interferences.

# Chapter 1600 Registration and Post Registration Procedures

---

<b>1601</b>	<b>Types of Registrations</b>
1601.01	Registrations Now Being Issued
1601.01(a)	Certificate of Registration
1601.01(b)	Duplicate Certificate of Registration
1601.01(c)	Registered Extension of Protection of International Registration to the United States
1601.02	Repeal of Prior Acts
1601.03	Additional Registration Under Act of 1946
1601.04	1881 and 1905 Act Registrations
1601.05	1920 Act Registrations
1601.06	Registrations Issued Under Prior Classification Systems
1601.07	Form of Copies of Registrations
<b>1602</b>	<b>Duration and Maintenance of Registrations</b>
1602.01	Act of 1946
1602.02	Acts of 1881 and 1905
1602.03	Act of 1920
1602.04	Trademark Law Treaty Implementation Act Changes
<b>1603</b>	<b>Bringing Prior Act Registrations Under 1946 Act, §12(c)</b>
1603.01	Notification and Printing of Mark in Official Gazette
1603.02	Cancellation and Incontestability
1603.03	Affidavits or Declarations of Use in Commerce Required
<b>1604</b>	<b>Affidavit or Declaration of Use or Excusable Nonuse of Mark in Commerce under §8 of the Trademark Act</b>
1604.01	Registrations to Which §8 Affidavit or Declaration Pertains
1604.02	Notice of When Affidavit or Declaration Is Due
1604.03	Form for Filing §8 Affidavit or Declaration
1604.04	Time for Filing §8 Affidavit or Declaration
1604.04(a)	Premature Filing of §8 Affidavit or Declaration
1604.04(b)	Registrations in Twenty-Year Terms
1604.05	Requirements for §8 Affidavit or Declaration
1604.06	Fees for §8 Affidavit or Declaration
1604.06(a)	Filing Fee for Affidavit or Declaration
1604.06(b)	Grace Period Surcharge and Deficiency Surcharge
1604.06(c)	Processing Affidavit or Declaration Filed with Insufficient Fees
1604.07	Ownership and Who May File §8 Affidavit or Declaration
1604.07(a)	Affidavit or Declaration Must Be Filed by Owner
1604.07(b)	Establishing Ownership
1604.07(c)	Acceptance Notice Issued in Name of Owner of Record
1604.07(d)	Changes of Legal Entity
1604.07(e)	Changes of Name
1604.07(f)	Correction of Mistake in Setting Forth the Name of the Owner
1604.08	Execution of Affidavit or Declaration
1604.08(a)	Persons Who May Sign Affidavit or Declaration
1604.08(b)	Date of Execution of Affidavit or Declaration
1604.08(c)	Signature of Electronically Transmitted Affidavit or Declaration
1604.08(d)	Form and Wording of Verification
1604.09	Goods and/or Services Set Forth in §8 Affidavit or Declaration
1604.09(a)	Goods and/or Services Must Be Specified or Expressly Incorporated by Reference
1604.09(b)	Deletion of Goods and/or Services
1604.09(c)	Failure to List All Goods and/or Services Recited in Registration

- 1604.09(d) New Goods and/or Services Cannot Be Added
- 1604.10 Use in Commerce
- 1604.11 “Excusable Nonuse” of Mark
- 1604.12 Specimen Showing Current Use of Mark in Commerce
- 1604.12(a) Specimen for Each Class Required
- 1604.12(b) Specimens in Electronically Filed Affidavits or Declarations
- 1604.12(c) Substitute Specimens
- 1604.13 Differences in the Mark as Used on the Specimen and the Mark as Registered
- 1604.13(a) Possible Amendment of Mark in Registration
- 1604.14 Designation of Domestic Representative by Foreign Owner
- 1604.15 Office Actions and Notices Regarding Affidavit or Declaration
- 1604.16 Response to Office Action
- 1604.17 Correction of Deficiencies in §8 Affidavit or Declaration
- 1604.17(a) Correcting Deficiencies in Affidavits or Declarations Timely Filed Within the Periods Set Forth in §8(a) of the Act
- 1604.17(b) Correcting Deficiencies in Affidavits or Declarations Filed During the Grace Period
- 1604.17(c) Defects That Cannot be Cured After Expiration of the Grace Period
- 1604.18 Petition Under 37 C.F.R. §2.146
- 1604.18(a) Response to Examiner’s Refusal Required Before Petition
- 1604.18(b) Decision on Petition Is Final Action of the USPTO
- 1604.18(c) Request for Reconsideration of Denial of Petition
- 1604.18(d) Appeal to Federal Court
- 1604.19 Section 8 Affidavit or Declaration of Use or Excusable Nonuse Combined with Renewal Application
- 1605 Affidavit or Declaration of Incontestability Under §15 of the Trademark Act**
- 1605.01 Registrations to Which §15 Affidavit or Declaration Pertains
- 1605.02 Form for Filing Affidavit or Declaration of Incontestability
- 1605.03 Time for Filing Affidavit or Declaration of Incontestability
- 1605.04 Requirements for Affidavit or Declaration of Incontestability
- 1605.05 Combining §15 Affidavit or Declaration with §8 Affidavit or Declaration
- 1605.06 Section 14 Limitation is Independent of §15 Affidavit or Declaration
- 1606 Renewal of Registration Under §9 of the Trademark Act**
- 1606.01 Which Registrations Must Be Renewed Under §9
- 1606.01(a) Registrations Based on Applications Under §1 or §44 Must Be Renewed Under §9
- 1606.01(b) Section 9 Does Not Apply to Extensions of Protection of International Registrations to the United States
- 1606.01(c) Renewal of Registrations Issued Under Prior U.S. Trademark Acts Must Be Renewed Under §9
- 1606.02 Requirements for Renewal Under §9
- 1606.03 Time for Filing §9 Renewal Application
- 1606.03(a) Premature Filing of §9 Renewal Application
- 1606.04 Form for Filing §9 Renewal Application
- 1606.05 Fees for §9 Renewal Applications
- 1606.05(a) Fee for Filing Application for Renewal Under §9
- 1606.05(b) Grace Period Surcharge and Deficiency Surcharge
- 1606.05(c) Processing §9 Renewal Application Filed with Insufficient Fees
- 1606.06 Ownership and Who May File §9 Renewal Application
- 1606.07 Execution of §9 Renewal Application
- 1606.08 Goods and/or Services Set Forth in §9 Renewal Application

- 1606.08(a) Listing of Goods and/or Services Required Only for Partial Renewal
- 1606.08(b) No Goods or Services Listed
- 1606.08(c) Some Goods and/or Services Listed
- 1606.08(d) Goods and/or Services Not Listed in Registration May Not Be Listed in Renewal Application
- 1606.09 Affidavit of Use in Commerce or Excusable Nonuse Not Required
- 1606.10 Designation of Domestic Representative by Foreign Applicant for Renewal Under §9
- 1606.11 Office Actions and Notices Regarding §9 Renewal Application
- 1606.12 Response to Office Action
- 1606.13 Correction of Deficiencies in §9 Renewal Applications
- 1606.13(a) Correcting Deficiencies in §9 Renewal Applications Filed Within the Year Before the Expiration Date of the Registration
- 1606.13(b) Correcting Deficiencies in Renewal Applications Filed During the Grace Period
- 1606.13(c) Late Filing Cannot Be Cured

- 1614 Renewal of Registered Extension of Protection**
- 1615 Division of Registrations**
- 1615.01 Division of Registration Based on Application Under §1 or §44 of the Trademark Act
- 1615.02 Division of Registered Extension of Protection
- 1616 Replacement**

## 1601 Types of Registrations

### 1601.01 Registrations Now Being Issued

Currently, the United States Patent and Trademark Office (“USPTO”) issues registrations only under the Trademark Act of 1946, 15 U.S.C. §§1051 *et seq.* . These are either Principal Register registrations or Supplemental Register registrations. See [TMEP §801.02\(a\)](#) regarding the Principal Register, and [TMEP §801.02\(b\)](#) regarding the Supplemental Register.

#### 1601.01(a) Certificate of Registration

The USPTO issues registration certificates for all registrations resulting from applications based on §§1, 44, and 66(a) of the Trademark Act, 15 U.S.C. §§1051, 1126, and 1141f(a). The registration certificate includes the owner’s name and address, the mark, the goods/services, and the international class(es). The certificate is signed by the Director and issued under the seal of the USPTO. 15 U.S.C. §§1057(a) and 1093; 37 C.F.R. §2.151. See *Notice of Reformatted Trademark Registration Certificate* at [74 Fed. Reg. 34559](#) (July 16, 2009).

#### 1601.01(b) Duplicate Certificate of Registration

If the owner of the registration does not receive the original certificate of registration, or a corrected, amended, or new certificate of registration issued by the USPTO, the USPTO will issue a duplicate certificate if the owner files a written request *within one year of issuance*, stating that the certificate was never received.

Such requests should be faxed to the Post Registration Section at (571) 273-9500.

For registrations issued on or after September 15, 2009, if more than one year has passed since the date of issuance, the owner of the registration may request a duplicate certificate of registration by filing a petition to the Director under 37 C.F.R. §2.146(a)(3), accompanied by the fee required by 37 C.F.R. §2.6, and the Director may exercise supervisory authority to grant the request for good cause. See [TMEP §§1705.02, 1707](#). On September 15, 2009, changes were made to the format of the registration certificate that enable the USPTO to provide duplicates of certificates issued on or after that date. However, the USPTO is not able to provide duplicates of registrations issued before September 15, 2009.

The owner of a registration may obtain a certified copy of the registration from the Document Services Branch of the Public Records Division of the USPTO for a fee. See [TMEP §111](#).

### **1601.01(c) Registered Extension of Protection of International Registration to the United States**

Effective November 2, 2003, §66(a) of the Trademark Act, 15 U.S.C. §1141f(a), permits the holder of an international registration to file a request for extension of protection of the international registration to the United States. See [TMEP §§1904 et seq](#).

Unless the request for extension of protection is refused under §68 of the Trademark Act, 15 U.S.C. §1141h, the USPTO will issue a certificate of extension of protection and publish notice of such certificate in the *Official Gazette*. Section 69(a) of the Trademark Act, 15 U.S.C. §1141i(a). The certificate of registration will look the same as the certificates issued for registrations resulting from applications based on §§1 and 44 of the Act. From the date of issuance of the certificate, the extension of protection has the same effect and validity as a registration on the Principal Register, and the holder of the international registration has the same rights and remedies as the owner of a registration on the Principal Register. Section 69(b) of the Trademark Act, 15 U.S.C. §1141i(b).

Under §66(b), 15 U.S.C. §1141f(b), unless the extension of protection is refused, the proper filing of the request for extension of protection constitutes constructive use of the mark, conferring the same rights as those specified in §7(c) of the Trademark Act, 15 U.S.C. §1057(c), as of the earliest of the following:

- (1) The international registration date, if the request for extension of protection was made in the international application;
- (2) The date of recordal of the subsequent designation requesting an extension of protection to the United States, if the request for extension of protection to the United States was made in a subsequent designation; or
- (3) The date of priority claimed pursuant to §67 of the Trademark Act, 15 U.S.C. §1141g.

Upon registration, the USPTO will refer to an extension of protection to the United States as a “registration” or a “registered extension of protection.” 37 C.F.R. §7.25(c).

A registered extension of protection remains part of the international registration after registration in the United States. See 15 U.S.C. §1141j, 37 C.F.R. §7.30, and [TMEP §1904.08](#) for information about the dependence of the extension of protection on the underlying international registration. In this respect, the registered extension of protection differs from a registration issuing from a §44 application, which exists independent of the underlying foreign registration, pursuant to §44(f), 15 U.S.C. §1126(f).

See [TMEP §1609.01\(a\)](#) regarding amendment of registered extensions of protection under §7 of the Trademark Act, 15 U.S.C. §1057.

### **1601.02 Repeal of Prior Acts**

The Act of 1946 became effective on July 5, 1947. Most Acts relating to trademarks that existed prior to the Act of 1946 were repealed as of the effective date of the Act of 1946. Repealed Acts include the Act of 1881, the Act of 1905, the Act of 1920, and the amendment entitled “Act of June 10, 1938.” The repeal did

not affect the validity of registrations granted under prior Acts. Trademark Act §46(a), 15 U.S.C. §1051 note.

### **1601.03 Additional Registration Under Act of 1946**

Marks that were registered under any previous Act may be registered again, under the Act of 1946, if the mark meets the requirements of the Act of 1946. Trademark Act §46(b), 15 U.S.C. §1051 note.

However, the USPTO will not issue duplicate registrations for marks that are registered under the 1946 Act. §2.48. See [TMEP §703](#).

### **1601.04 1881 and 1905 Act Registrations**

Registrations that were issued under the Acts of 1881 and 1905 may be renewed under §9 of the Act of 1946, 15 U.S.C. §1059. These registrations are subject to, and entitled to the benefits of, the provisions of the Act of 1946 as though registered on the Principal Register of the Act, except with certain limitations that are set out in §46(b), 15 U.S.C. §1051 note. Some of these limitations can be removed if the registrant claims the benefits of the Act of 1946 under §12(c), 15 U.S.C. §1062(c). See [TMEP §1603](#).

Marks registered under the “10-year proviso” of §5 of the Act of 1905 are deemed to have become distinctive of the goods or services under §2(f) of the Act of 1946, 15 U.S.C. §1052(f). Trademark Act §46(b), 15 U.S.C. §1051 note.

See [TMEP §1602.02](#) regarding the duration of and requirements for maintaining registrations issued under the Acts of 1881 and 1905.

### **1601.05 1920 Act Registrations**

Registrations under the Act of 1920 are subject to, and entitled to the benefits of, the provisions of the Act of 1946 relating to marks registered on the Supplemental Register, and may not be renewed, unless renewal is required to support a foreign registration. Trademark Act §46(b), 15 U.S.C. §1051 note.

See [TMEP §1602.03](#) regarding the duration of and requirements for maintaining registrations issued under the Act of 1920.

### **1601.06 Registrations Issued Under Prior Classification Systems**

Prior to September 1, 1973, the United States used its own system for the classification of goods and services, which is different from the international classification system. For all registrations issued on the basis of an application filed on or before August 31, 1973, the classification under which the registration issued governs for all statutory purposes, including affidavits or declarations under §8, 15 U.S.C. §1058, and renewal applications under §9, 15 U.S.C. §1059. See 37 C.F.R. §§2.85(b) and 2.183(f).

As of September 1, 1973, the international system for classification of goods and services is the controlling classification system used by the United States, and it applies to all applications filed on or after September 1, 1973, and their resulting registrations, for all statutory purposes. See [TMEP §1401.02](#); 37 C.F.R. §2.85(a).

A registrant whose registration issued under the United States classification system may voluntarily amend the registration under §7 of the Trademark Act, 15 U.S.C. §1057, to adopt the international classification set forth in the current version of the *Nice Agreement Concerning the International Classification of Goods and Services for the Purposes of the Registration of Marks* (“Nice Agreement”). The registrant must pay the filing fee required for §7 amendments under 37 C.F.R. §2.6. See 37 C.F.R. §2.84(e)(3) and [TMEP §1609.04](#).

### **1601.07 Form of Copies of Registrations**

Before August 24, 1920, the name of the Act under which a registration was issued was not designated on the copy of the registration on file in the Trademark Search Library. Beginning with registrations issued on August 24, 1920, each registration includes in the heading either the words “Act of Feb. 20, 1905” or the words “Act of Mar. 19, 1920.” The first registrations under the Act of 1920 apparently were issued on August 24, 1920.

Registrations under the Act of 1881 range from Number 8,191, issued on May 17, 1881, through Number 44,357, issued on March 28, 1905. No registrations were issued between March 28, 1905, and July 4, 1905. On July 4, 1905, the first registration under the Act of 1905 was issued as Number 44,358.

The Act of 1946 provides that the certificates of registration for marks registered on the Supplemental Register shall be conspicuously different from certificates issued for marks registered on the Principal Register. Trademark Act §25, 15 U.S.C. §1093. Certificates issued under the 1946 Act are clearly marked either “Principal Register” or “Supplemental Register,” with the date the application was filed.

### **1602 Duration and Maintenance of Registrations**

The Trademark Act of 1946, 15 U.S.C. §§1051 *et seq.*, became effective on July 5, 1947, and as of that date the Trademark Acts of 1881, 1905, and 1920 were repealed insofar as they were inconsistent with the Act of 1946. Trademark Act §46(a), 15 U.S.C. §1051 note.

The duration of registrations has varied, depending upon the Act under which the registration was issued. See TMEP §§ [1602.01](#), [1602.02](#), [1602.03](#), and [1614](#).

#### **1602.01 Act of 1946**

##### *Registrations Resulting From Applications Under §§1 and 44*

The Trademark Law Revision Act of 1988, Pub. L. No. 100-667, 102 Stat. 3935, which took effect on November 16, 1989, amended §9 of the Trademark Act of 1946 to reduce both the duration of registration and the term of renewal from twenty to ten years. All registrations issued or renewed on or after November 16, 1989 are issued or renewed for a ten-year period.

Thus, registrations issued under the Act of 1946 on or after November 16, 1989, remain in force for ten years, provided that affidavits or declarations of use or excusable nonuse under §8 of the Act are filed. 37 C.F.R. §2.181(a)(2). See 37 C.F.R. §2.160(a) and [TMEP §1604.04](#) regarding the due dates for affidavits or declarations of use or excusable nonuse. Registrations issued under the Act of 1946 before November 16, 1989 remain in force for twenty years, provided that an affidavit or declaration of use or excusable nonuse was filed during the sixth year after the date of registration. 37 C.F.R. §2.181(a)(1). See [TMEP §§1604](#) *et seq.* regarding affidavits or declarations of use under §8 of the 1946 Act.

Effective November 16, 1989, registrations under the Act of 1946 may be renewed for periods of ten years from the end of the expiring period. 37 C.F.R. §2.181(a). Before November 16, 1989, registrations under the Act of 1946 were renewed for twenty-year periods. The applicable term for renewals that were processed during the transition depends on whether the registration was renewed before or after November 16, 1989. If the registration was renewed before November 16, 1989, the renewal term is twenty years; if the registration was renewed on or after November 16, 1989, the renewal term is ten years, regardless of the date on which the renewal application was filed. *In re Maytag Corp.*, 21 USPQ2d 1615 (Comm'r Pats. 1991). See [TMEP §§1606](#) *et seq.* regarding renewal under §9 of the 1946 Act.

#### *Registered Extensions of Protection*

Section 9 of the Trademark Act does not apply to registered extensions of protection of international registrations to the United States. Renewal of an international registration and its corresponding extension of protection to the United States must be made at the International Bureau of the World Intellectual Property Organization (“IB”), in accordance with Article 7 of the Madrid Protocol. 37 C.F.R. §7.41(a). See [TMEP §1614](#) for further information about renewal of international registrations.

Section 71 of the Act, 15 U.S.C. §1141k, requires the periodic filing of affidavits or declarations of use in commerce or excusable nonuse for registered extensions of protection. See [TMEP §1613](#) regarding due dates and requirements for §71 affidavits or declarations.

### **1602.02 Acts of 1881 and 1905**

Registrations under the Act of 1905 were issued for an original term of twenty years, and were renewable for twenty-year periods. Registrations under the Act of 1881 were issued for an original term of thirty years, and were renewable under the Act of 1905 for twenty-year periods.

Effective November 16, 1989, registrations issued under the 1905 Act and the 1881 Act are renewable under the 1946 Act for periods of ten years. Before November 16, 1989, registrations issued under the 1905 Act and the 1881 Act were renewable under the 1946 Act for periods of twenty years. Trademark Act §46(b), 15 U.S.C. §1051 note; 37 C.F.R. §2.181(b).

A registrant under the 1905 Act or the 1881 Act may file an affidavit or declaration under §12(c) of the Trademark Act, 15 U.S.C. §1062(c), to claim the benefits of the 1946 Act, without affecting the term of the registration. See [TMEP §1603](#). Under §8(a)(1) of the 1946 Act, 15 U.S.C. §1058(a)(1), if the registrant claims the benefits of the 1946 Act, the registrant must file an affidavit or declaration of use or excusable nonuse within the sixth year after publication of the notice of the §12(c) claim in the *Official Gazette*, to avoid cancellation. See [TMEP §§1604](#) *et seq.* regarding affidavits or declarations of use or excusable nonuse.

Section 8(a)(2) of the 1946 Act, 15 U.S.C. §1058(a)(2), requires that owners of marks registered under the Acts of 1905 and 1881 file affidavits or declarations of use or excusable nonuse at the end of each successive ten-year period following the date of registration, even if the registrant does not claim the benefits of the 1946 Act under §12(c) of the Act. However, this requirement does not apply to a registration renewed for

a twenty-year term (i.e., a registration renewed prior to November 16, 1989) until a renewal application is due. See [TMEP §1604.04\(b\)](#) .

### **1602.03 Act of 1920**

The Act of 1920 did not specify any term of registration. However, the Act of 1946 provided that 1920 Act registrations would expire six months after July 5, 1947 (the effective date of the 1946 Act), or twenty years from the date of registration, whichever was later. A 1920 Act registration may not be renewed, unless renewal is required to support a foreign registration. In that instance, the registration may be renewed on the Supplemental Register for a ten-year period, in the same manner as a registration issued under the 1946 Act. Trademark Act §46(b), 15 U.S.C. §1051 note; 37 C.F.R. §2.181(c). See [TMEP §§1606](#) *et seq.* regarding renewal.

The requirement that renewal be necessary to support a foreign registration applies to all renewals of a 1920 Act registration, not just the first renewal. *Ex parte U.S. Steel Corp.* , 157 USPQ 435 (Comm’r Pats. 1968).

The application for renewal of a 1920 Act registration should identify the foreign registration(s) that the renewal is needed to support, the country, the name of the present owner, the registration number, and the date of registration, and must show that the foreign registration(s) is currently in force.

Under §8(a)(2) of the 1946 Act, 15 U.S.C. §1058(a)(2), an affidavit or declaration of use or excusable nonuse under §8 is also required at the end of each successive ten-year period following the date of registration. However, this requirement does not apply to a registration renewed for a twenty-year term (i.e. , a registration renewed prior to November 16, 1989) until a renewal application is due. See [TMEP §1604.04\(b\)](#) .

### **1602.04 Trademark Law Treaty Implementation Act Changes**

The Trademark Law Treaty Implementation Act of 1998 (“TLTIA”), Pub. L. No. 105-330, 112 Stat. 3064, changed the requirements for filing affidavits or declarations of use or excusable nonuse under 15 U.S.C. §1058 (“§8 affidavits”), and renewal applications under 15 U.S.C. §1059 (“§9 renewal applications”), effective October 30, 1999. See *Post Registration: Changes to Requirements for Maintaining Trademark Registrations* , at [1228 TMOG 187](#) (Nov. 30, 1999), for a discussion of these changes.

TLTIA did not change the duration of registrations. See [TMEP §§1602](#) *et seq.* regarding the term of registrations.

### **1603 Bringing Prior Act Registrations Under 1946 Act, §12(c)**

Owners of marks registered under the Acts of 1905 or 1881 may claim the benefits of the Act of 1946, but are not required to do so. Trademark Act §12(c), 15 U.S.C. §1062(c). The 1946 Act refers to a “registrant” claiming the benefits of the Act. The term “registrant” includes both the original registrant and a person who has acquired ownership through proper transfer of title. See 15 U.S.C. §1127. The claim must be made by the person who owns the mark at the time the claim is made.

To claim the benefits of the Act of 1946, the owner of the registration must file an affidavit or a declaration under 37 C.F.R. §2.20. The affidavit or declaration must: (1) set forth those items listed in the registration on which the mark is currently in use in commerce; (2) state that the benefits of the Act of 1946 are claimed for the mark; (3) be accompanied by the fee required by 37 C.F.R. §2.6; and (4) be filed by the owner and signed by a person properly authorized to sign on behalf of the owner. 37 C.F.R. §2.153. No specimen is

required. Goods or services not listed in the affidavit or declaration will be deleted from the registration. The affidavit or declaration under §12(c) of the Act may be filed at any time during the life of the registration.

A claim of the benefits of the 1946 Act does *not* affect or alter the *term* of the 1905 or 1881 Act registration. These registrations still remain in force for the times indicated in [TMEP §1602.02](#), *subject to cancellation if acceptable affidavits or declarations of use or excusable nonuse are not filed under 15 U.S.C. §1058*. The deadline for *renewal* (and the affidavit or declaration of use or excusable nonuse required during the year before the end of every ten-year period after the date of the registration) is calculated from the date of issue of the registration, *not* from the date of publication of the notice of the registrant's claim of the benefits of the 1946 Act.

### **1603.01 Notification and Printing of Mark in Official Gazette**

If the affidavit or declaration claiming the benefits of the Act of 1946 is acceptable, the mark and accompanying notice of the claim of benefits of the 1946 Act are printed in the *Official Gazette* under the heading "Registrations Published Under Sec. 12(c)." 37 C.F.R. §2.154. The USPTO notifies the registrant of the printing of the mark in the *Official Gazette*, and also informs the registrant of the requirement for filing affidavits or declarations of use or excusable nonuse under 15 U.S.C. §1058. 37 C.F.R. §2.155.

If an affidavit or declaration claiming the benefits of the Act of 1946 is unacceptable, the USPTO notifies the registrant of the defect.

These marks are not subject to opposition on their appearance in the *Official Gazette*. 37 C.F.R. §2.156.

### **1603.02 Cancellation and Incontestability**

If the benefits of the Act of 1946 are claimed, registrants under the Acts of 1905 and 1881 may subsequently file affidavits or declarations under §15 of the Act of 1946, 15 U.S.C. §1064, whereby the marks shall be incontestable. See [TMEP §§1605](#) *et seq.*

Once the registrant claims the benefits of the Act of 1946, registrations under the 1905 and 1881 Acts are subject to cancellation under §14 of the Act of 1946, 15 U.S.C. §1064. See [TMEP §1607](#).

### **1603.03 Affidavits or Declarations of Use in Commerce Required**

After the benefits of the Act of 1946 are claimed for a registration issued under the Act of 1881 or the Act of 1905, the registrant must file an affidavit or declaration of use or excusable nonuse during the sixth year after the date of publication of the notice of the registrant's claim of the benefits of the 1946 Act in the *Official Gazette*, or within the six-month grace period after expiration of the sixth year, to avoid cancellation under §8(a)(1) and (a)(3) of the Act. 15 U.S.C. §§1058(a)(1) and (a)(3). An affidavit or declaration of use or excusable nonuse must also be filed within one year before the end of every ten-year period after the date of the registration, or within the six-month grace period thereafter. 15 U.S.C. §§1058(a)(2) and (a)(3). See [TMEP §§1604](#) *et seq.* for further information about affidavits or declarations of use or excusable nonuse under 15 U.S.C. §1058.

## **1604 Affidavit or Declaration of Use or Excusable Nonuse of Mark in Commerce under §8 of the Trademark Act**

*15 U.S.C. §1058 Duration, affidavits and fees.*

(a) Time Periods for Required Affidavits. Each registration shall remain in force for 10 years, except that the registration of any mark shall be canceled by the Director unless the owner of the registration files in the United States Patent and Trademark Office affidavits that meet the requirements of subsection (b), within the following time periods:

(1) Within the 1-year period immediately preceding the expiration of 6 years following the date of registration under this Act or the date of the publication under section 12(c).

(2) Within the 1-year period immediately preceding the expiration of 10 years following the date of registration, and each successive 10-year period following the date of registration.

(3) The owner may file the affidavit required under this section within the 6-month grace period immediately following the expiration of the periods established in paragraphs (1) and (2), together with the fee described in subsection (b) and the additional grace period surcharge prescribed by the Director.

(b) Requirements for Affidavit. The affidavit referred to in subsection (a) shall—

(1)(A) state that the mark is in use in commerce;

(B) set forth the goods and services recited in the registration on or in connection with which the mark is in use in commerce;

(C) be accompanied by such number of specimens or facsimiles showing current use of the mark in commerce as may be required by the Director; and

(D) be accompanied by the fee prescribed by the Director; or

(2)(A) set forth the goods and services recited in the registration on or in connection with which the mark is not in use in commerce;

(B) include a showing that any nonuse is due to special circumstances which excuse such nonuse and is not due to any intention to abandon the mark; and

(C) be accompanied by the fee prescribed by the Director.

(c) Deficient Affidavit. If any submission filed within the period set forth in subsection (a) is deficient, including that the affidavit was not filed in the name of the owner of the registration, the deficiency may be corrected after the statutory time period, within the time prescribed after notification of the deficiency. Such submission shall be accompanied by the additional deficiency surcharge prescribed by the Director.

(d) Notice of Requirement. Special notice of the requirement for such affidavit shall be attached to each certificate of registration and notice of publication under section 12(c).

(e) Notification of Acceptance or Refusal. The Director shall notify any owner who files any affidavit required by this section of the Director's acceptance or refusal thereof and, in the case of a refusal, the reasons therefor.

(f) Designation of Resident for Service of Process and Notices. If the owner is not domiciled in the United States, the owner may designate, by a document filed in the United States Patent and Trademark Office, the name and address of a person resident in the United States on whom may be served notices or process in proceedings affecting the mark. Such notices or process may be served upon the person so designated by leaving with that person or mailing to that person a copy thereof at the address specified in the last designation so filed. If the person so designated cannot be found at the last designated address, or if the owner does not designate by a document filed in the United States Patent and Trademark Office the name and address of a person resident in the United States on whom may be served notices or process in proceedings affecting the mark, such notices or process may be served on the Director.

Under 15 U.S.C. §1058, the owner of a registration must periodically file affidavits or declarations of use or excusable nonuse of the mark. The purpose of the affidavit or declaration of use or excusable nonuse (“§8 affidavit or declaration”) is to remove marks that are no longer being used in commerce from the register.

## 1604.01 Registrations to Which §8 Affidavit or Declaration Pertains

### *Registered Extensions of Protection*

Section 8 of the Trademark Act applies only to registrations resulting from applications under §1 or §44 of the Trademark Act. However, §71 of the Act, 15 U.S.C. §1141k, requires periodic affidavits or declarations of use or excusable nonuse in registered extensions of protection of international registrations to the United States. See [TMEP §§1613–1613.19](#) for further information about §71 affidavits or declarations.

### *Six-Year Section 8 Affidavits or Declarations for Registrations Resulting From Applications Under §1 or §44*

Under §§8(a)(1) and (a)(3) of the Trademark Act, an affidavit or declaration under §8 of the Act is required during the sixth year after the date of registration for registrations issued on either the Principal Register or the Supplemental Register or the date of publication under §12(c) for registrations issued under the Acts of 1881 and 1905 for which the owner has claimed the benefits of the Act of 1946 under §12(c), or within the six-month grace period after expiration of the sixth year. 15 U.S.C. §§1058(a)(1) and (a)(3); [TMEP §1603.03](#)

*Ten-Year Section 8 Affidavits or Declarations Required for All Registrations Resulting From Applications Under §1 or §44*

Section 8(a)(2) of the Trademark Act requires an affidavit or declaration of use or excusable nonuse at the end of each successive ten-year period following the date of registration, or within the six-month grace period after the end of the ten-year period. However, the provisions of §8(a)(2) of the Act, requiring the filing of a §8 affidavit or declaration at the end of each successive ten-year period after registration, do not apply to a registration issued or renewed for a twenty-year term until a renewal application is due. See [TMEP §1604.04\(b\)](#).

### 1604.02 Notice of When Affidavit or Declaration Is Due

A statement noting the requirement for filing the affidavits or declarations of use or excusable nonuse under §8 of the Act is included on each certificate of registration as originally issued. 15 U.S.C. §1058(d). This is the only notice that the USPTO provides regarding this requirement. The owner must file the affidavit or declaration within the time periods required by §8 of the Act regardless of whether the owner receives the notice. 37 C.F.R. §2.162. The USPTO does not provide any reminder of the due date(s) of the affidavits or declarations.

### 1604.03 Form for Filing §8 Affidavit or Declaration

To expedite processing, it is recommended that the owner file the §8 affidavit or declaration through the Trademark Electronic Application System (“TEAS”). See [TMEP §301](#) for more information about electronic filing. Forms for filing affidavits or declarations of use or excusable nonuse under §8, combined affidavits or declarations of use and incontestability under §§8 and 15 ( see [TMEP §1605.05](#) ), and §8 affidavits or declarations combined with renewal applications under §9 of the Act ( see [TMEP §1604.19](#) ) are available through TEAS at <http://www.uspto.gov>. Alternatively, the owner can call the Trademark Assistance Center at (571) 272-9250 or (800) 786-9199 to obtain a pre-printed form that can be filled out and mailed, faxed, or hand delivered to the USPTO.

See [TMEP §1604.04](#) regarding the deadline for filing the affidavit or declaration, and [TMEP §1604.05](#) regarding the requirements for filing the affidavit or declaration.

### 1604.04 Time for Filing §8 Affidavit or Declaration

*37 CFR §2.160(a)*

During the following time periods, the owner of the registration must file an affidavit or declaration of continued use or excusable nonuse, or the registration will be cancelled:

- (1) (i) For registrations issued under the Trademark Act of 1946, on or after the fifth anniversary and no later than the sixth anniversary after the date of registration; or
  - (ii) For registrations issued under prior Acts, on or after the fifth anniversary and no later than the sixth anniversary after the date of publication under section 12(c) of the Act; and
- (2) For all registrations, within the year before the end of every ten-year period after the date of registration.
- (3) The affidavit or declaration may be filed within a grace period of six months after the end of the deadline set forth in paragraphs (a)(1) and (a)(2) of this section, with payment of the grace period surcharge per class required by section 8(a)(3) of the Act and § 2.6.

Under §§8(a)(1) and (a)(2) of the Trademark Act, the owner of the registration must file an affidavit or declaration of use or excusable nonuse:

- (1) on or after the fifth anniversary and no later than the sixth anniversary of the date of registration or date of publication under §12(c) of the Act; *and*

- (2) within the year before the end of every ten-year period after the date of registration. 37 C.F.R. §2.160(a).

See [TMEP §1604.04\(b\)](#) regarding registrations in twenty-year terms.

Under §8(a)(3) of the Act, 15 U.S.C. §1058(a)(3), the owner may file the affidavit or declaration within a grace period of six months after the expiration of the deadlines set forth in §§8(a)(1) and (a)(2) of the Act, 15 U.S.C. §§1058(a)(1) and (a)(2), with an additional grace period surcharge.

Affidavits or declarations may be filed on the registration anniversary dates at the end of the fifth and sixth years, or at the end of the ninth and tenth years.

*Example* : For a registration issued on Nov. 1, 2005, a six-year affidavit or declaration may be filed as early as Nov. 1, 2010, and may be filed as late as Nov. 1, 2011, before entering the six-month grace period.

A §8 affidavit or declaration filed through TEAS is considered to have been filed on the date the USPTO receives the transmission, regardless of whether that date is a Saturday, Sunday, or Federal holiday within the District of Columbia. 37 C.F.R. §2.195(a)(2).

Section 8 affidavits or declarations filed on paper are considered timely if they are received in the USPTO by the due date or if they are mailed or transmitted by the due date with a certificate of mailing or facsimile transmission under 37 C.F.R. §2.197. See [TMEP §§305.02](#) and [306.05](#) for certificate of mailing and certificate of facsimile transmission procedures to avoid lateness.

If the owner of the registration does not file an affidavit or declaration of use or excusable nonuse before the end of the grace period, the registration will be cancelled. 37 C.F.R. §§2.160(a) and 2.164(b). See [TMEP §1604.07](#) regarding who may file a §8 affidavit or declaration.

The Director has no authority to waive the deadline for filing a proper affidavit or declaration of use of a registered mark under 15 U.S.C. §1058. See *Checkers Drive-In Restaurants, Inc. v. Commissioner of Patents and Trademarks*, 51 F.3d 1078, 1085, 34 USPQ2d 1574, 1581 (D.C. App. 1995), cert. denied 516 U.S. 866 (1995) (“[I]n establishing cancellation as the penalty for failure to file the required affidavit, Congress made no exception for the innocent or the negligent. Thus, the Commissioner had no discretion to do other than cancel Checkers’s service mark registration in this case.”); *In re Mother Tucker’s Food Experience (Canada) Inc.*, 925 F.2d 1402, 1405, 17 USPQ2d 1795, 1798 (Fed. Cir. 1991) (“It was not within the Commissioner’s discretionary authority to waive this requirement.”); cf. *In re Holland American Wafer Co.*, 737 F.2d 1015, 1018, 222 USPQ 273, 275 (Fed. Cir. 1984) (“Timeliness set by statute is not a minor technical defect which can be waived by the Commissioner.”).

### **1604.04(a) Premature Filing of §8 Affidavit or Declaration**

The affidavit or declaration cannot be filed before the periods specified in §8(a) of the Act. The purpose of the affidavit or declaration is to show that the mark is still in use in commerce within the relevant period, which cannot be done by an affidavit or declaration filed before that period. Cf. *In re Holland American Wafer Co.*, 737 F.2d 1015, 222 USPQ 273 (Fed. Cir. 1984). If an affidavit or declaration is filed before the period specified in §§8(a)(1) and (a)(2) of the Act, the USPTO will issue a notice advising the owner:

- (1) that the affidavit or declaration is premature;
- (2) of the appropriate time for filing the affidavit or declaration;
- (3) that the fee(s) submitted will be held;
- and (4) that the owner may file a new affidavit or declaration at the appropriate time or may request a refund at any time. There is no deficiency surcharge.

The prematurely filed affidavit or declaration will remain in the record for informational purposes only. The owner of the registration must file a newly executed affidavit or declaration before the end of the grace period, or the registration will be cancelled and the USPTO will refund the fees.

See [TMEP §1604.08\(b\)](#) regarding the date of execution of a §8 affidavit or declaration.

## 1604.04(b) Registrations in Twenty-Year Terms

As noted in [TMEP §1604.04](#), §8(a)(2) of the Trademark Act, 15 U.S.C. §1058(a)(2), requires an affidavit or declaration of use or excusable nonuse at the end of each successive ten-year period following the date of registration for all registrations. However, this requirement does not apply to a registration issued or renewed for a twenty-year term (i.e., a registration issued or renewed before November 16, 1989) until a renewal application is due. See notice at [1228 TMOG 187](#), 189 (Nov. 30, 1999).

*Example* : If a registration was issued or renewed on November 15, 1989, no §8(a)(2) affidavit or declaration is due between November 15, 1998 and November 15, 1999. Section 8(a)(2) of the Act does not apply until the renewal application is due, i.e., between November 15, 2008 and November 15, 2009.

## 1604.05 Requirements for §8 Affidavit or Declaration

### *37 CFR §2.161 Requirements for a complete affidavit or declaration of continued use or excusable nonuse*

A complete affidavit or declaration under section 8 of the Act must:

- (a) Be filed by the owner within the period set forth in § 2.160(a);
- (b) Include a statement that is signed and verified (sworn to) or supported by a declaration under § 2.20 by a person properly authorized to sign on behalf of the owner under § 2.193(e)(1), attesting to the use or excusable nonuse of the mark within the period set forth in section 8 of the Act. The verified statement must be executed on or after the beginning of the filing period specified in § 2.160(a).
- (c) Include the registration number;
- (d)(1) Include the fee required by § 2.6 for each class of goods or services that the affidavit or declaration covers;
- (2) If the affidavit or declaration is filed during the grace period under section 8(a)(3) of the Act, include the grace period surcharge per class required by § 2.6;
- (3) If at least one fee is submitted for a multi-class registration, but the class(es) to which the fee(s) should be applied are not specified, the Office will issue a notice requiring either the submission of additional fee(s) or an indication of the class(es) to which the original fee(s) should be applied. Additional fee(s) may be submitted if the requirements of § 2.164 are met. If the required fee(s) are not submitted and the class(es) to which the original fee(s) should be applied are not specified, the Office will presume that the fee(s) cover the classes in ascending order, beginning with the lowest numbered class;
- (e)(1) Specify the goods or services for which the mark is in use in commerce, and/or the goods or services for which excusable nonuse is claimed under § 2.161(f)(2);
- (2) If the affidavit or declaration covers less than all the goods or services, or less than all the classes in the registration, specify the goods or services being deleted from the registration;
- (f)(1) State that the registered mark is in use in commerce on or in connection with the goods or services in the registration; or
- (2) If the registered mark is not in use in commerce on or in connection with all the goods or services in the registration, set forth the date when use of the mark in commerce stopped and the approximate date when use is expected to resume; and recite facts to show that nonuse as to those goods or services is due to special circumstances that excuse the nonuse and is not due to an intention to abandon the mark;
- (g) Include one specimen showing current use of the mark for each class of goods or services, unless excusable nonuse is claimed under § 2.161(f)(2). When requested by the Office, additional specimens must be provided. The specimen must:
  - (1) Show the mark as actually used on or in connection with the goods or in the sale or advertising of the services. A photocopy or other reproduction of the specimen showing the mark as actually used is acceptable. However, a photocopy that merely reproduces the registration certificate is not a proper specimen;
  - (2) Be flat and no larger than 8.5 inches (21.6 cm.) wide by 11.69 inches (29.7 cm.) long. If a specimen exceeds these size requirements (a “bulky specimen”), the Office will create a facsimile of the specimen that meets the requirements of the rule (i.e., is flat and no larger than 8.5 inches (21.6 cm.) wide by 11.69 inches (29.7 cm.) long) and put it in the record. In the absence of non-bulky alternatives, the Office may accept an audio or video cassette tape recording, CD-ROM, or a specimen in another appropriate medium.
  - (3) Be a digitized image in .jpg or .pdf format, if transmitted through TEAS.
- (h) The Office may require the owner to furnish such information, exhibits, affidavits or declarations, and such additional specimens:
  - (1) As may be reasonably necessary to the proper examination of the affidavit or declaration under section 8 of the Act; or
  - (2) For the Office to assess the accuracy and integrity of the register.

(3) The provisions of paragraph (h)(2) of this section will no longer be applied after June 21, 2014.

## **1604.06 Fees for §8 Affidavit or Declaration**

### **1604.06(a) Filing Fee for Affidavit or Declaration**

Under 15 U.S.C. §1058(b) and 37 C.F.R. §2.161(d)(1), an affidavit or declaration of use or excusable nonuse must include the fee required by 37 C.F.R. §2.6 for each class of goods or services that the affidavit or declaration covers. See TMEP §§ [1401.02](#) , [1401.04](#) *et seq.*, and [1601.06](#) regarding use of international classification or prior United States classification to calculate fees due.

### **1604.06(b) Grace Period Surcharge and Deficiency Surcharge**

If the affidavit or declaration is filed during the grace period under §8(a)(3) of the Act, 15 U.S.C. §1058(a)(3), it must include the grace period surcharge per class required by 37 C.F.R. §2.6.

Section 8(c) of the Trademark Act, 15 U.S.C. §1058(c), requires a “deficiency surcharge” for correcting deficiencies in the affidavit or declaration after expiration of the deadlines specified in §8. See [TMEP §§1604.17](#) *et seq.* regarding the deadlines and surcharge for correcting deficiencies.

Only a single deficiency surcharge is required for correcting one or more deficiencies in a multiple-class registration. Similarly, only a single deficiency surcharge is required to correct several deficiencies within one §8 affidavit or declaration, or one combined filing under §§8 and 9. See [TMEP §1604.19](#) regarding combined filings under §§8 and 9.

The grace period surcharge applies only where no filing was made during the sixth year after the date of registration (or date of publication under §12(c) of the Act), or within the year before the end of any ten-year period after the date of registration. An owner who files within these periods, but corrects a deficiency after these periods have expired, will be subject to the deficiency surcharge only. On the other hand, someone who files during the grace period and cures deficiencies after expiration of the grace period will be subject to both the grace period surcharge (for the ability to file the affidavit during the grace period) *and* the deficiency surcharge (for the ability to correct a deficiency after the end of the grace period). H.R. Rep. No. 105-194, 105th Congress, 1st Sess. 17 (1997).

### **1604.06(c) Processing Affidavit or Declaration Filed with Insufficient Fees**

An affidavit or declaration that does not include a fee, or does not include sufficient fees for all the classes to which the affidavit or declaration pertains (and the grace period surcharge, where applicable), is deficient. Fee deficiencies may be cured before expiration of the deadlines set forth in §8 of the Act, 15 U.S.C. §1058, without payment of a deficiency surcharge, or after expiration of the deadlines set forth in §8 of the Act with the deficiency surcharge required by §8(c) of the Act. See [TMEP §§1604.17](#) *et seq.* for information about the procedures, deadlines, and surcharge for correcting deficiencies.

If the affidavit or declaration was filed without sufficient fee(s), but the affidavit or declaration included an authorization to charge deficient fees to a USPTO deposit account (37 C.F.R. §2.208), the required fee(s) (and grace period surcharge, where applicable) will be charged to the deposit account. If the deposit account authorization was included with the affidavit or declaration as filed, and the deposit account had sufficient funds to cover the fee(s) in question, there is no fee deficiency and no deficiency surcharge is required.

An authorization to charge fees to a deposit account with insufficient funds to cover the fee is regarded as a deficiency.

If a check submitted as payment of a filing fee for an affidavit or declaration of use or excusable nonuse is returned unpaid, or an electronic funds transfer (“EFT”) or credit card payment is refused or charged back by a financial institution, this is regarded as a deficiency. In addition to the deficiency surcharge (where applicable), there is a fee for processing the payment that was refused. 37 C.F.R. §2.6(b)(12). See [TMEP §405.06](#) for additional information.

If at least one fee is submitted for a multiple-class registration, but the class(es) to which the fee(s) should be applied are not specified, the Post Registration staff will issue an Office action requiring either the submission of additional fee(s) or an indication of the class(es) to which the original fee(s) should be applied.

If the owner does not submit the required fee(s) or specify the class(es) to which the original fee(s) should be applied, the USPTO will presume that the fee(s) cover the classes in ascending order, beginning with the lowest numbered class and will delete any unpaid class(es). 37 C.F.R. §2.161(d)(3). See [TMEP §1608](#) regarding surrender of the registration as to class(es) that are omitted from a §8 affidavit or declaration.

## **1604.07 Ownership and Who May File §8 Affidavit or Declaration**

### **1604.07(a) Affidavit or Declaration Must Be Filed by Owner**

The affidavit or declaration of use or excusable nonuse must be filed by the owner of the registration. Filing by the owner is a minimum requirement that must be met before the expiration of the deadlines set forth in §8(a) of the Act, 15 U.S.C. §1058(a), (i.e., during the sixth year after the date of registration or publication under §12(c) of the Trademark Act, or within the year before the end of every ten-year period after the date of registration), or within the six-month grace period after expiration of these deadlines. 37 C.F.R. §§2.160(a) and 2.161(a).

If it is unclear whether the party who filed the affidavit or declaration is the present owner, the Post Registration staff will issue an Office action requiring the party to establish its ownership. If the party who filed the affidavit or declaration was the owner of the registration at the time of filing, the owner may file evidence to establish ownership, even if the filing period set forth in §8 of the Act has expired. There is no deficiency, and no deficiency surcharge is required for providing evidence to establish ownership. See [TMEP §1604.07\(b\)](#).

If the affidavit or declaration was not filed in the name of the owner of the registration, and there is time remaining in the statutory filing period (which includes the grace period), the true owner may (1) submit, in response to an Office action, a correction of the name in the filing of record or (2) file a complete new affidavit or declaration, together with the filing fee per class required by 37 C.F.R. §2.6, and, if applicable, a specimen of use for each class. If a new affidavit or declaration is filed during the grace period, the owner must include the grace period surcharge per class with the new affidavit or declaration. If a correction is submitted, the owner must also confirm that the original affidavit or declaration was signed by a person properly authorized to sign on behalf of the true owner. 37 C.F.R. §2.193(e)(1); [TMEP §1604.08\(a\)](#). If the original affidavit or declaration was not signed by an authorized signatory, the owner must also submit a statement, signed and verified (sworn to) or supported by a declaration under 37 C.F.R. §2.20 by a person properly authorized to sign on behalf of the owner, that affirms the representations in the original affidavit or declaration. 37 C.F.R. §2.161(b).

If the affidavit or declaration was not filed in the name of the owner of the registration, and there is no time remaining in the grace period, the deficiency may be corrected within a prescribed time. 15 U.S.C. §1058(c). The Post Registration staff will issue an Office action notifying the party who filed the affidavit or declaration of the ownership issue and of the time period within which it must be corrected. The true owner may submit a correction to the filing of record within the prescribed time and must also include the deficiency surcharge. 37 C.F.R. §2.6(a)(20). If a correction is submitted, the owner must also verify that the original affidavit or declaration was signed by a person properly authorized to sign on behalf of the true owner. 37 C.F.R. §2.193(e)(1); [TMEP §1604.08\(a\)](#). If the original affidavit or declaration was not signed by an authorized signatory, the owner must also submit a statement, signed and verified (sworn to) or supported by a declaration under 37 C.F.R. §2.20 by a person properly authorized to sign on behalf of the owner, that affirms the representations in the original affidavit or declaration. 37 C.F.R. §2.161(b).

See also [TMEP §1604.07\(f\)](#) regarding mistakes in setting forth the name of the owner.

### **1604.07(b) Establishing Ownership**

When the affidavit or declaration is filed by someone other than the original owner of the registration, the USPTO cannot accept the affidavit or declaration unless there is a clear chain of title from the original owner to the party who filed the affidavit or declaration. 37 C.F.R. §3.73(b); [TMEP §502.01](#).

When the affidavit or declaration is filed, the Post Registration staff will check the records of the Assignment Recordation Branch of the USPTO, available at <http://assignments.uspto.gov/assignments>. If the records of the Assignment Recordation Branch show a clear chain of title in the party who filed the affidavit or declaration, no inquiry will be issued. The Post Registration staff will enter the change of ownership into the automated records of the Trademark Operation, if necessary.

If the records of the Assignment Recordation Branch do not show a clear chain of title in the party who filed the affidavit or declaration, the Post Registration staff will issue an Office action requiring the party to establish its ownership of the registration. To establish ownership, the party must: (1) record documents in the Assignment Recordation Branch of the USPTO that show each change of ownership, and include a statement in the response to the Office action that the documents have been recorded; or (2) submit documentary evidence of a chain of title from the original owner to the party who filed the affidavit or declaration. 37 C.F.R. §3.73(b)(1); [TMEP §502.01](#).

“Documentary evidence of a chain of title from the original owner to the assignee” (37 C.F.R. §3.73(b)(1)(i)) normally consists of the same type of documents that would be recorded in the Assignment Recordation Branch, e.g., assignment documents, certificates of merger, or certificates of change of name. In the alternative, an affidavit or declaration containing sufficient facts to support the transfer of title may be accepted.

The owner may submit evidence of ownership even if the filing period set forth in §8 of the Act has expired. If the party who filed the affidavit or declaration was the owner of the registration at the time of filing, there is no deficiency, and no deficiency surcharge is required for providing evidence to establish ownership.

See [TMEP §1604.07\(a\)](#) regarding an affidavit or declaration filed by a party who was not the owner of the registration at the time of filing.

### **1604.07(c) Acceptance Notice Issued in Name of Owner of Record**

The notification of acceptance of a §8 affidavit or declaration is issued in the name of the owner of record, as shown in the Trademark database.

When a party other than the original owner files a §8 affidavit or declaration, the USPTO will accept the affidavit or declaration if the new owner submits documentary evidence of the chain of title ( *see* [TMEP §1604.07\(b\)](#) ), even if the new owner does not record the documents of ownership in the Assignment Recordation Branch. 37 C.F.R. §3.73. However, the USPTO will not issue the notice of acceptance of the §8 affidavit or declaration in the name of the new owner unless the new owner: (1) records the appropriate document in the Assignment Recordation Branch; and (2) notifies the Post Registration staff that the document has been recorded. 37 C.F.R. §3.85.

See [TMEP §§504](#) *et seq.* regarding the circumstances in which the “Ownership” field in the Trademark database will be automatically updated after recordation of a document with the Assignment Recordation Branch, even if the new owner does not notify the Post Registration staff that the document has been recorded.

*See also* [TMEP §505.02](#) regarding requests to update ownership information after registration, [TMEP §609.02\(f\)](#) regarding correspondence after recordation of a change of ownership, [TMEP §502.01](#) regarding establishing ownership of a registration, and [TMEP §502.03](#) regarding issuance of a new certificate in the name of a new owner.

### **1604.07(d) Changes of Legal Entity**

The procedures for establishing ownership, as discussed in [TMEP §1604.07\(b\)](#) , also apply to changes of name and changes of legal entity. See [TMEP §1604.07\(e\)](#) regarding changes of name.

A change in the state of incorporation is a change of legal entity, creating a new party.

The death of a partner, or other change in the membership of a partnership, creates a change in legal entity unless the partnership agreement provides for continuation of the partnership and the relevant state law permits this.

A merger of companies into a new company normally constitutes a change of legal entity.

Affidavits or declarations may be accepted from trustees, executors, administrators, and the like, when supported by a court order or other evidence of the person’s authority to act on behalf of the present owner. If there is a court order, a copy of the order should be submitted.

### **1604.07(e) Changes of Name**

A mere change of the name of a party is not a change of entity and will not require an inquiry regarding ownership, if there is clear title in the party who filed the §8 affidavit or declaration. Therefore, if the owner records a change of name with the Assignment Recordation Branch and subsequently files the §8 affidavit or declaration in its former name, the USPTO will not issue an inquiry regarding ownership.

However, if it is unclear from the records of the Assignment Recordation Branch whether the party who filed the affidavit or declaration is the owner of record, the owner must either record evidence of the change of name in the Assignment Recordation Branch or submit proof of the change of name. See 37 C.F.R. §3.73(b) and [TMEP §1604.07\(b\)](#). For a corporation, this is done by recording or submitting a certificate of change of name issued by the Secretary of State (or other authorized body) of the state of incorporation.

See [TMEP §1604.07\(c\)](#) regarding issuance of the notice of acceptance of the affidavit or declaration in the name of the new owner.

### **1604.07(f) Correction of Mistake in Setting Forth the Name of the Owner**

If the affidavit or declaration was filed by the owner of the registration, but there is a mistake in the manner in which the name of the owner is set out, the mistake can be corrected. *In re Atlanta Blue Print Co.*, 19 USPQ2d 1078 (Comm'r Pats. 1990). No deficiency surcharge is required in this situation.

See [TMEP §1604.07\(a\)](#) regarding an affidavit or declaration mistakenly filed in the name of a person or existing legal entity who did not own the mark as of the filing date.

See [TMEP §1201.02\(c\)](#) for examples of correctable and non-correctable errors.

## **1604.08 Execution of Affidavit or Declaration**

### **1604.08(a) Persons Who May Sign Affidavit or Declaration**

Under 37 C.F.R. §2.161(b), the §8 affidavit or declaration must include a statement that is signed and verified (sworn to) or supported by a declaration under 37 C.F.R. §2.20 by a person properly authorized to sign on behalf of the owner. A “person who is properly authorized to sign on behalf of the owner” is: (1) a person with legal authority to bind the owner; (2) a person with firsthand knowledge of the facts and actual or implied authority to act on behalf of the owner; or (3) an attorney as defined in 37 C.F.R. §11.1 who has an actual written or verbal power of attorney or an implied power of attorney from the owner. 37 C.F.R. §2.193(e)(1).

Generally, the USPTO does not question the authority of the person who signs a verification unless there is an inconsistency in the record as to the signatory’s authority to sign. See [TMEP §611.03\(a\)](#).

### **1604.08(b) Date of Execution of Affidavit or Declaration**

Under 37 C.F.R. §2.161(b), the verified statement must be executed on or after the beginning of the relevant filing period specified in §8 of the Act, 15 U.S.C. §1058, (i.e., on or after the fifth anniversary of the date of registration or publication under §12(c), on or after the beginning of the one-year period before the end of each ten-year period after the date of registration, or during the available grace period). Because the purpose of the affidavit or declaration is to attest to the use or excusable nonuse of the mark within the time periods specified in §8 of the Act, the affidavit or declaration cannot be executed before these time periods begin.

An affidavit or declaration filed within the period specified in §8 of the Act, but executed before that period, is deficient. The owner of the registration will be required to submit a substitute or supplemental affidavit or declaration attesting to use in commerce (or excusable nonuse) on or in connection with the goods or services within the relevant period specified in §8 of the Act.

If the prematurely executed §8 affidavit or declaration was filed during the relevant period specified in §8(a) of the Act (i.e., during the sixth year after the date of registration or publication under §12(c) of the Trademark Act, or within one year before the end of any ten-year period after the date of registration), the substitute affidavit or declaration may be filed before expiration of the relevant period for no fee, or after expiration of the relevant period with the deficiency surcharge required under §8(c) of the Act. If the prematurely executed §8 affidavit or declaration was filed during the grace period, the substitute affidavit or declaration may be filed before expiration of the grace period for no fee, or after expiration of the grace period with the deficiency surcharge. See [TMEP §1604.04](#) regarding the deadlines for filing §8 affidavits or declarations, and [TMEP §§1604.17](#) *et seq.* for information about the procedures, deadlines, and surcharge for correcting deficiencies.

*Date of Execution Omitted* . If the §8 affidavit or declaration is signed, but the date of execution is omitted, the Post Registration staff must require that the owner of the registration set forth the date of execution for the record. If the affidavit or declaration was executed within the relevant filing period, no deficiency fee is required. If there are no other outstanding issues, the owner may provide the Post Registration staff with the date by telephone or e-mail and the Post Registration staff must enter a Note to the File in the record. If the affidavit or declaration was not executed within the relevant filing period, the affidavit or declaration is deficient, and the owner must submit a substitute or supplemental affidavit or declaration, as discussed above.

#### **1604.08(c) Signature of Electronically Transmitted Affidavit or Declaration**

See 37 C.F.R. §2.193(c) and [TMEP §611.01\(c\)](#) regarding signature of an affidavit or declaration filed through TEAS.

#### **1604.08(d) Form and Wording of Verification**

The format of the verification may be: (1) the classical form for verifying, which includes an oath (jurat) ( *see* [TMEP §804.01\(a\)](#) ); or (2) a declaration under 37 C.F.R. §2.20 or 28 U.S.C. §1746 instead of an oath ( *see* [TMEP §804.01\(b\)](#) ).

#### **1604.09 Goods and/or Services Set Forth in §8 Affidavit or Declaration**

##### **1604.09(a) Goods and/or Services Must Be Specified or Expressly Incorporated by Reference**

Under 15 U.S.C. §1058(b) and 37 C.F.R. §2.161(e)(1), the affidavit or declaration must specify the goods/services recited in the registration on or in connection with which the mark is in use in commerce, and/or the goods/services for which excusable nonuse is claimed. See [TMEP §1604.10](#) regarding use in commerce, and [TMEP §1604.11](#) regarding excusable nonuse. The affidavit or declaration may incorporate by reference the identification set forth in the registration certificate (e.g., “all goods/services listed in the registration” or “all goods/services listed in the registration except... [specifying the goods/services not covered by the affidavit or declaration]”). Incorporation by reference is recommended, to avoid inadvertent omissions.

If the owner is alleging use with respect to some of the goods/services and excusable nonuse for other goods/services, the owner must clearly indicate which goods/services are in use and which goods/services are not in use.

### **1604.09(b) Deletion of Goods and/or Services**

If the owner of the registration intends to delete goods/services from the registration, this should be expressly stated in the affidavit or declaration. 37 C.F.R. §2.161(e)(2). Once an owner expressly indicates an intention to delete goods, services, or classes from a registration, they may not be reinserted. For example, reinsertion is prohibited after the owner submits a TEAS §8 form indicating that certain goods, services, or classes are to be deleted, as the form states that the filing does not cover the deleted goods, services, or classes and that they are to be permanently deleted from the registration.

### **1604.09(c) Failure to List All Goods and/or Services Recited in Registration**

An affidavit or declaration that fails to list or incorporate by reference all the goods/services recited in the registration, and does not include a statement of intent to delete the omitted goods/services, is deficient.

The Post Registration staff will issue an Office action requiring the party to either file a substitute or supplemental affidavit or declaration that the mark was in use in commerce on or in connection with the omitted goods/services or state that the omitted goods/services should be deleted.

If the owner files a substitute or supplemental affidavit or declaration adding the omitted goods/services, the owner must verify that the mark was in use in commerce on or in connection with the goods/services during the relevant filing period specified in §8 of the Act, 15 U.S.C. §1058. This substitute affidavit or declaration may be filed before expiration of the relevant deadline set forth in §8 of the Act for no fee, or after expiration of the deadline set forth in §8 of the Act with the deficiency surcharge required by §8(c) of the Act. See [TMEP §§1604.17](#) *et seq.* for information about the procedures, deadlines, and surcharge for correcting deficiencies.

If the owner does not file a substitute or supplemental affidavit or declaration that the mark was in use in commerce on or in connection with the omitted goods/services within the period for response to the Office action ( *see* [TMEP §1604.16](#) ), the omitted goods/services will be deleted from the registration.

### **1604.09(d) New Goods and/or Services Cannot Be Added**

Goods and/or services that are not listed in the registration may not be set forth in the §8 affidavit or declaration.

## **1604.10 Use in Commerce**

The §8 affidavit or declaration must state that the mark is in use in commerce on or in connection with the goods and/or services listed in the registration, unless excusable nonuse is claimed. 37 C.F.R. §2.161(f)(1).

See [TMEP §1604.11](#) regarding excusable nonuse. The §8 affidavit or declaration does not have to specify the type of commerce (e.g., interstate) in which the mark is used. The USPTO presumes that someone who states that the mark is in use in commerce is stating that the mark is in use in a type of commerce that Congress can regulate, unless there is contradictory evidence in the record.

A §8 affidavit or declaration that does not state that the mark is in use in commerce is deficient. The owner must submit a substitute affidavit or declaration stating that the mark was in use in commerce on or in

connection with the goods and/or services listed in the registration during the relevant period specified in §8 of the Trademark Act, 15 U.S.C. §1058, as follows:

(1) If the §8 affidavit or declaration was filed during the sixth year after the date of registration or publication under §12(c) of the Act, the substitute affidavit or declaration must state that the mark was in use in commerce on or in connection with the goods/services before the expiration of the sixth year after the date of registration or publication under §12(c), if accurate; or

(2) If the §8 affidavit or declaration was filed within one year before the end of any ten-year period after the date of registration, the substitute affidavit or declaration must state that the mark was in use in commerce on or in connection with the goods/services within one year before the end of the ten-year period after the date of registration, if accurate; or

(3) If the §8 affidavit or declaration was filed during the grace period, the substitute affidavit or declaration must state that the mark was in use in commerce on or in connection with the goods/services before the expiration of the grace period, if accurate.

If the §8 affidavit or declaration was filed during the relevant period specified in §8(a) of the Act (i.e., during the sixth year after the date of registration or publication under §12(c) of the Act, or within one year before the end of any ten-year period after the date of registration), the substitute affidavit or declaration may be filed before expiration of the relevant period for no fee, or after expiration of the relevant period with the deficiency surcharge required under §8(c) of the Act. If the §8 affidavit or declaration was filed during the grace period, the substitute affidavit or declaration may be filed before expiration of the grace period for no fee, or after expiration of the grace period with the deficiency surcharge. See [TMEP §1604.04](#) regarding the deadlines for filing §8 affidavits or declarations, and [TMEP §§1604.17 et seq.](#) for information about the procedures, deadlines, and surcharge for correcting deficiencies.

While a substitute affidavit or declaration may be filed after the expiration of the period specified in §8 of the Act, the substitute affidavit or declaration must attest to use within the time period specified in §8 of the Act. Therefore, if the substitute affidavit or declaration does not state that the mark was in use in commerce on or in connection with the goods/services within the relevant period specified in §8 of the Act, the USPTO will not accept the §8 affidavit or declaration, and the registration will be cancelled.

## 1604.11 “Excusable Nonuse” of Mark

37 CFR §2.161 (Extract) A complete affidavit or declaration under section 8 of the Act must:

...

(f) ...

(2) If the registered mark is not in use in commerce on or in connection with all the goods or services in the registration, set forth the date when use of the mark in commerce stopped and the approximate date when use is expected to resume; and recite facts to show that nonuse as to those goods or services is due to special circumstances that excuse the nonuse and is not due to an intention to abandon the mark[.]

The purpose of Section 8 of the Trademark Act is to remove from the register those registrations that have become deadwood. See *Morehouse Mfg. Corp. v. J. Strickland & Co.*, 407 F.2d 881, 160 USPQ 715 (C.C.P.A. 1969). It is not intended, however, to cancel registrations because of a temporary interruption in the use of the mark due to circumstances beyond the control of the owner of the registration. *In re Moorman Mfg. Co.*, 203 USPQ 712 (Comm’r Pats. 1979). Thus, if the mark is not in use in commerce but the owner believes the registration should not be cancelled, the owner may file an affidavit or declaration showing that nonuse is due to special circumstances that excuse the nonuse, and is not due to any intention to abandon the mark. 15 U.S.C. §1058(b)(2). *Ex parte Kelley-How-Thomson Co.*, 118 USPQ 40 (Comm’r Pats. 1958).

### *Requirements for Affidavit or Declaration*

Since "showing" implies proof, merely stating that special circumstances exist and there is no intention to abandon the mark is not sufficient. *In re Conusa Corp.*, 32 USPQ2d 1857 (Comm'r Pats. 1993); *In re Moorman Mfg. Co.*, *supra*; *Ex parte Astra Pharm. Prod., Inc.*, 118 USPQ 368 (Comm'r Pats. 1958); *Ex parte Denver Chem. Mfg. Co.*, 118 USPQ 106 (Comm'r Pats. 1958). The affidavit or declaration must state when use in commerce stopped and give the approximate date when use is expected to resume. 37 C.F.R. §2.161(f)(2). If the mark was registered under §44(e) and the owner was unable to commence use due to special circumstances beyond the owner's control that excuse the nonuse, the owner should state that the mark was never in use and give the approximate date when use is expected to begin. Affidavits or declarations should also specify the reason for nonuse, the specific steps being taken to put the mark back in use, and any other relevant facts to support a finding of excusable nonuse.

Sufficient facts must be set forth to demonstrate clearly that nonuse is due to some special circumstance beyond the owner's control or "forced by outside causes." *In re Conusa Corp.*, *supra*; *In re Moorman Mfg. Co.*, *supra*; *Ex parte Kelley-How-Thomson Co.*, *supra*.

The goods/services for which excusable nonuse is claimed must be specified. See [TMEP §§1604.09](#) *et seq* . regarding proper specification of the goods and services in a §8 affidavit or declaration.

In a multiple-class registration, there must be a recitation of facts as to nonuse for each class to which the affidavit or declaration pertains, or it must be clear that the facts recited apply to all the classes.

#### *Presumption of Abandonment*

If the mark has not been in use for three consecutive years and the owner has done nothing to try to resume use of the mark, the Office may presume that the owner has abandoned the mark. 15 U.S.C. §1127. *See Imperial Tobacco Ltd. v. Phillip Morris Inc.*, 899 F.2d 1575, 14 USPQ2d 1390 (Fed. Cir. 1990); *Stromgren Supports Inc. v. Bike Athletic Co.*, 43 USPQ2d 1100 (TTAB 1997).

#### *Examples of Special Circumstances That Do and Do Not Excuse Nonuse*

In addition to a showing that there is no intention to abandon the mark, the owner must show that nonuse is due to special circumstances beyond the owner's control that excuse nonuse. The following examples provide general guidelines as to what is considered to be a special circumstance that excuses nonuse:

- *Business Decision*. Nonuse related to a business decision is not beyond the owner's control and does not excuse nonuse.
- *Decreased Demand*. Decreased demand for the product sold under the mark, resulting in its discontinuance for an indefinite period, does not excuse nonuse. The purpose of the requirement for an affidavit or declaration is to eliminate registrations of marks that are in nonuse due to ordinary changes in social or economic conditions. *See In re Conusa Corp.*, *supra*; *In re Parmalat S.p.A.*, 32 USPQ2d 1860 (Comm'r Pats. 1991); *Ex parte Astra Pharmaceutical Products, Inc.*, *supra*; *Ex parte Denver Chemical Mfg. Co.*, *supra*.
- *Trade Embargo or Other Circumstance Beyond Owner's Control*. Nonuse may be considered excusable where the owner of the registration is willing and able to continue use of the mark in commerce, but is unable to do so due to a trade embargo.
- *Sale of a Business*. Temporary nonuse due to the sale of a business might be considered excusable.
- *Retooling*. The mark might be out of use temporarily because of an interruption of production for retooling of a plant or equipment, with production possible again at a scheduled time. However, nonuse due to retooling is excusable only if the owner shows that the plant or equipment being

retooled was essential to the production of the goods and that alternative equipment was unavailable on the market. *In re New England Mutual Life Insurance Co.*, 33 USPQ2d 1532 (Comm'r Pats. 1991).

- *Orders on Hand* . If the product is of a type that cannot be produced quickly or in large numbers (e.g., airplanes), yet there are orders on hand and activity toward filling them, nonuse might be considered excusable.
- *Illness, Fire, and Other Catastrophes* . Illness, fire, and other catastrophes may create situations of temporary nonuse, with the owner being able to outline arrangements and plans for resumption of use. Such nonuse is often excusable. However, a mere statement that the owner is ill and cannot conduct his or her business will not in itself excuse nonuse; the owner must show that the business is an operation that could not continue without his or her presence. *New England Mutual Life Insurance, supra* .
- *Negotiations with Distributors* . A recitation of efforts to negotiate agreements that would allow for resumption of use of the mark, or a statement that samples of the goods have been shipped to potential distributors, may establish lack of intention to abandon the mark, but does not establish the existence of special circumstances that excuse the nonuse. *In re Parmalat, supra; In re Moorman, supra* .
- *Use in Foreign Country* . Use of the mark in a foreign country has no bearing on excusable nonuse of a mark in commerce that can be regulated by the United States Congress. *In re Conusa, supra* .
- *Use of Mark on Different Goods/Services* . Use of the mark on goods/services other than those recited in the registration does not establish either special circumstances or lack of intention to abandon the mark. *Ex parte Kelley-How-Thomson Co., supra* .
- *Use of Mark in Another Form* . Use of a mark as an essential part of a materially different composite mark does not excuse the failure to use the mark at issue. *In re Continental Distilling Corp.*, 254 F.2d 139, 117 USPQ 300 (C.C.P.A. 1958).

#### *Supplementary Evidence or Explanation of Nonuse*

If the USPTO determines that the facts set forth do not establish excusable nonuse, the owner may file supplementary evidence or explanation, within the response period set forth in the Office action. If the affidavit or declaration included a claim of excusable nonuse when filed, no deficiency surcharge will be required for supplementing this claim with additional evidence or an explanation.

#### *Substitute Affidavit or Declaration Claiming Use*

If the owner responds to the Office action by submitting a substitute affidavit or declaration with a claim of use, the USPTO will examine the substitute use affidavit or declaration.

## **1604.12 Specimen Showing Current Use of Mark in Commerce**

### **1604.12(a) Specimen for Each Class Required**

A §8 affidavit or declaration must include a specimen or facsimile showing current use of the mark for each class of goods or services, unless excusable nonuse is claimed. 15 U.S.C. §1058(b); 37 C.F.R. §2.161(g). When requested by the USPTO, additional specimens must be provided. 37 C.F.R. §2.161(g).

See [TMEP §§904.03](#) *et seq.* regarding trademark specimens, and [TMEP §§1301.04](#) *et seq.* regarding service mark specimens.

The specimen must show use of essentially the same mark as the mark shown in the registration, and must be used on or in connection with the goods/services listed in the registration. A specimen that shows use of a materially different mark ( *see* [TMEP §1604.13](#) ), or shows use of the mark on other goods or services, is unacceptable. An affidavit or declaration that does not include an acceptable specimen for each class of goods/services is deficient. *See* 37 C.F.R. §2.161(g).

If a single specimen supports multiple classes, the owner may so indicate, and the Post Registration staff need not require multiple copies of the specimen. The Post Registration staff should enter a Note to the File in the record indicating which classes the specimen supports.

Under 37 C.F.R. §2.161(g)(2), the specimen must be flat and no larger than 8½ inches (21.6 cm.) wide by 11.69 inches (29.7 cm.) long. If a specimen exceeds these size requirements, the USPTO will create a facsimile of the specimen that meets the requirements of the rule (i.e., is flat and no larger than 8½ inches wide by 11.69 inches long), put it in the record, and destroy the original bulky specimen. If the copy of the specimen created by the USPTO does not adequately depict the mark, the Post Registration staff will require a substitute specimen that meets the size requirements of the rule, and an affidavit or declaration verifying the use of the substitute specimen.

If the specimen is otherwise deficient, the Post Registration staff will require a substitute specimen, together with an affidavit or declaration that the substitute specimen was in use in commerce on or in connection with the goods or services during the relevant period specified in §8 of the Act. *See* 37 C.F.R. §2.164; *see* also [TMEP §1604.12\(c\)](#) regarding substitute specimens.

The USPTO will not return specimens filed with a §8 affidavit or declaration.

### **1604.12(b) Specimens in Electronically Filed Affidavits or Declarations**

If the owner files the §8 affidavit or declaration through TEAS, the owner must submit a digitized image in .jpg or .pdf format. 37 C.F.R. §2.161(g)(3).

Sometimes, no visible specimen is in the record due to a technical problem during submission of the affidavit or declaration. In this situation, the Post Registration staff should first send an e-mail to the TEAS mailbox to ask whether the problem can be fixed by uploading the file again. If it cannot, the Post Registration staff must ask the owner to submit: (1) the specimen (or a facsimile of the specimen) that was attached to the original electronically filed affidavit or declaration; and (2) a statement by the person who transmitted the affidavit or declaration to the USPTO that the specimen being submitted is a true copy of the specimen submitted with the electronically filed affidavit or declaration. This statement does not have to be verified.

Alternatively, the owner may submit a new specimen, together with an affidavit or declaration that the substitute specimen was in use in commerce on or in connection with the goods/services during the relevant period specified in §8 of the Act. No deficiency surcharge is required. *See* [TMEP §1604.12\(c\)](#) regarding the requirements for an affidavit or declaration supporting use of substitute specimens.

The Office prefers that the specimen, whether a true copy of the original or a substitute, be submitted electronically via the Trademark Electronic Application System (“TEAS”). In TEAS, the Response to

Office Action form can be accessed by clicking on the link entitled “Response Forms” at <http://www.uspto.gov> .

### 1604.12(c) Substitute Specimens

If a specimen for any class is omitted or is deficient, the owner must file a substitute specimen, together with an affidavit or declaration that the substitute specimen was in use in commerce on or in connection with the goods or services during the relevant period specified in §8 of the Act, 15 U.S.C. §1058, as follows:

(1) If the §8 affidavit or declaration was filed during the sixth year after the date of registration or publication under §12(c) of the Act, 15 U.S.C. §1062(c), the affidavit or declaration supporting use of the substitute specimen must state that the substitute specimen was in use in commerce before the expiration of the sixth year after the date of registration or publication under §12(c), if accurate; or

(2) If the §8 affidavit or declaration was filed within one year before the end of any ten-year period after the date of registration, the affidavit or declaration supporting use of the substitute specimen must state that the substitute specimen was in use in commerce within one year before the end of the ten-year period after the date of registration, if accurate; or

(3) If the §8 affidavit or declaration was filed during the grace period, the affidavit or declaration supporting use of the substitute specimen must state that the substitute specimen was in use in commerce before the expiration of the grace period, if accurate.

If the §8 affidavit or declaration was filed during the relevant period specified in §8(a) of the Act (i.e., during the sixth year after the date of registration or publication under §12(c) of the Trademark Act, or within one year before the end of any ten-year period after the date of registration), the substitute specimen may be filed before expiration of the relevant period for no fee, or after expiration of the relevant period with the deficiency surcharge required under §8(c) of the Act. If the §8 affidavit or declaration was filed during the grace period, the substitute specimen may be filed before expiration of the grace period for no fee, or after expiration of the grace period with the deficiency surcharge. See [TMEP §1604.04](#) regarding the deadlines for filing §8 affidavits or declarations, and [TMEP §§1604.17](#) *et seq.* for information about the procedures, deadlines, and surcharge for correcting deficiencies.

While a substitute specimen and supporting affidavit or declaration may be filed after the expiration of the period specified in §8 of the Act, the supporting affidavit or declaration must attest to use of the specimen within the time period specified in §8 of the Act. Therefore, if the affidavit or declaration supporting the substitute specimen does not state that the specimen was in use in commerce prior to the end of the relevant period specified in §8 of the Act, the USPTO will not accept the affidavit or declaration, and the registration will be cancelled as to any class for which no proper specimen was submitted.

See 37 C.F.R. §2.193(e)(1) and [TMEP §611.03\(a\)](#) regarding the proper person to sign an affidavit or declaration.

### 1604.13 Differences in the Mark as Used on the Specimen and the Mark as Registered

The mark to which the §8 affidavit or declaration pertains must be essentially the same as the mark that appears in the registration. Where the specimen reflects a change in the mark since the registration issued, acceptance of the affidavit or declaration will depend on the degree of change. A *material* alteration of the mark will result in refusal of the affidavit or declaration on the ground that the registered mark is no longer in use. *In re Int'l Nickel Co., Inc.*, 282 F.2d 952, 127 USPQ 331 (C.C.P.A. 1960); *In re Continental Distilling Corp.*, 254 F.2d 139, 117 USPQ 300 (C.C.P.A. 1958); *Ex parte Richards*, 153 USPQ 853 (Comm'r

Pats. 1967). *See also Torres v. Cantine Torresella S.r.l.*, 808 F.2d 46, 1 USPQ2d 1483 (Fed. Cir. 1986); *In re Holland American Wafer Co.*, 737 F.2d 1015, 222 USPQ 273 (Fed. Cir. 1984).

Mere changes in background or styling, or modernization, are not ordinarily considered to be material changes in the mark. *See Ex parte Petersen & Pegau Baking Co.*, 100 USPQ 20 (Comm'r Pats. 1953) (change in matter determined to be mere background and type face held not a material alteration of "PETER PAN" mark). Whether the change in a mark as used on the specimen is a material change is a question of fact that the Post Registration staff must determine on a case-by-case basis.

Generally, the standard used to determine whether a change is material under §8 is the same as the standard used to determine whether the mark in a registration may be amended under 15 U.S.C. §1057(e). If the mark could be amended under §7(e) because the character of the mark had not been materially altered, then the specimen filed with the §8 affidavit or declaration should be accepted. In determining whether a change constitutes a material alteration, the USPTO will always compare the mark in the specimen to the mark as originally registered. *See* TMEP §§ [807.14](#) *et seq.* and [1609.02\(a\)](#) for additional information about material alteration.

However, where the registered mark is currently used as one of several elements in a composite mark, the decision as to whether to accept the specimen requires consideration of whether the registered mark makes an impression apart from the other elements of the composite mark. If the display of the composite is such that the essence of the registered mark makes a separate impression, then the specimen may be sufficient for purposes of the §8 requirement. In many cases, word elements are severable from design elements, because words tend to dominate in forming a commercial impression. *In re DeWitt Int'l Corp.*, 21 USPQ2d 1620 (Comm'r Pats. 1991). If the mark, as used on the §8 specimen, creates a separate impression apart from any other material on the specimen, then the specimen may be accepted as evidence of current use of the registered mark.

If the USPTO determines that the mark on the specimen is a material alteration of the registered mark, the owner may file a substitute specimen. If the owner files a substitute specimen after expiration of the relevant filing period specified in §8 of the Act, the owner must pay the deficiency surcharge required by §8(c) of the Act, 15 U.S.C. §1058(c), and 37 C.F.R. §2.6. *See* [TMEP §1604.12\(c\)](#) regarding substitute specimens, and 37 C.F.R. §2.164 and [TMEP §§1604.17](#) *et seq.* regarding the procedures for correcting deficiencies in a §8 affidavit or declaration.

### **1604.13(a) Possible Amendment of Mark in Registration**

If the USPTO accepts the §8 affidavit or declaration, and there is a difference between the mark on the specimen filed with the affidavit or declaration and the mark in the registration, the mark as originally registered remains the mark of record. If the owner wants to change the mark in the registration to agree with the mark currently used, the owner must file a separate request for amendment under §7(e) of the Act, 15 U.S.C. §1057(e), and pay the fee required by 37 C.F.R. §2.6. *See Ex parte Petersen & Pegau Baking Co.*, 100 USPQ 20 (Comm'r Pats. 1953). *See* [TMEP §§1609.02](#) *et seq.* regarding amendment of a registered mark under §7(e).

However, amending the mark in a registration under §7(e) to agree with the mark as shown on a §8 specimen is not mandatory.

#### **1604.14 Designation of Domestic Representative by Foreign Owner**

Under 15 U.S.C. §1058(f), if the owner of the registration is not domiciled in the United States, the affidavit or declaration may include the name and address of a United States resident upon whom notices or process in proceedings affecting the registration may be served. The USPTO encourages parties who do not reside in the United States to designate domestic representatives. To expedite processing, the USPTO recommends that designations of domestic representative be filed through TEAS, at <http://www.uspto.gov>. See [TMEP §610](#).

The designation should be signed by the individual owner, someone with legal authority to bind a juristic owner (e.g., a corporate officer or general partner of a partnership), or a practitioner authorized to practice before the USPTO pursuant to 37 C.F.R. §11.14 (“qualified practitioner”). In the case of joint owners who are not represented by a qualified practitioner, all must sign. 37 C.F.R. §2.193(e)(8); [TMEP §611.03\(h\)](#).

#### **1604.15 Office Actions and Notices Regarding Affidavit or Declaration**

Upon receipt of a §8 affidavit or declaration, the USPTO updates the prosecution history of the registration in the Trademark database to indicate that the affidavit or declaration has been filed.

When a §8 affidavit or declaration is filed electronically, TEAS almost immediately displays a “Success” page that confirms receipt. This page is evidence of filing should any question arise as to the filing date of the affidavit or declaration, and it may be printed or copied-and-pasted into an electronic record for storage. TEAS also separately sends an e-mail acknowledgement of receipt, which includes a summary of the filed information.

If a §8 affidavit or declaration is filed on paper, no acknowledgment of receipt of the affidavit or declaration is sent before it is examined, unless the applicant includes a stamped, self-addressed postcard with the affidavit or declaration ( see [TMEP §303.02\(c\)](#) *et seq.* ).

If, upon examination, the USPTO determines that the affidavit or declaration is acceptable, the USPTO sends a notice of acceptance. If the affidavit or declaration is not acceptable, the USPTO issues an action stating the reasons for refusal. 37 C.F.R. §2.163.

Sometimes, it may be necessary for the USPTO to request additional information in order to properly examine the affidavit or declaration. In such cases, the USPTO will require the owner to furnish such additional information, specimens, exhibits, and affidavits or declarations as may be reasonably necessary to the proper examination of the §8 affidavit or declaration. 37 C.F.R. §2.161(h)-(h)(1).

The propriety of the original registration is not re-examined in connection with the affidavit or declaration under §8.

#### **1604.16 Response to Office Action**

*Deadline* . Under 37 C.F.R. §2.163(b), the owner must file a response to a refusal within six months of the issuance date of the Office action, or before the end of the relevant filing period set forth in §8(a) of the Act, whichever is later. If no response is received within that time, the registration will be cancelled, unless time

remains in the grace period under §8(a)(3) of the Act, 15 U.S.C. §1058(a)(3). If time remains in the grace period, the owner may file a complete new affidavit or declaration, with a new fee.

The owner may file a petition to the Director under 37 C.F.R. §§2.146(a)(5) and 2.148 to waive 37 C.F.R. §2.163(b) so that a late response to an Office action can be accepted. However, the Director will waive a rule only in an extraordinary situation, where justice requires and no other party is injured. See [TMEP §1708](#). The failure to receive an Office action has been found to be an extraordinary circumstance that warrants a waiver of 37 C.F.R. §2.163(b). The “unintentional delay” standard of 37 C.F.R. §2.66 does not apply to the failure to respond to an Office action issued in connection with a §8 affidavit or declaration. [TMEP §1714.01\(f\)\(ii\)\(D\)](#).

*Signature*. The response must be signed by a qualified practitioner, or by the owner of the registration or someone with legal authority to bind the owner. If the owner is represented by a qualified practitioner, the practitioner must sign. 37 C.F.R. §§2.193(e)(2)(i) and 11.18(a). If the owner is not represented by a qualified practitioner, the individual owner or someone with legal authority to bind a juristic owner must sign. 37 C.F.R. §§2.163(b) and 11.14(e); [TMEP §611.03\(b\)](#). In the case of joint owners who are not represented by a qualified practitioner, all must sign. 37 C.F.R. §2.193(e)(2)(ii). See [TMEP §§611.06 et seq.](#) for guidelines on persons with legal authority to bind various types of juristic entities, and [TMEP §§602 et seq.](#) regarding persons who are qualified to represent others before the USPTO in trademark cases.

When it appears that a response to an Office action is signed by an improper party, the Post Registration staff must treat the response as incomplete and follow the procedures in [TMEP §§611.05 et seq.](#)

*Correction of Deficiencies*. See [TMEP §§1604.17 et seq.](#) for information about the procedures, deadlines, and surcharge for correcting deficiencies.

## 1604.17 Correction of Deficiencies in §8 Affidavit or Declaration

*37 CFR §2.164 Correcting deficiencies in affidavit or declaration.*

(a) If the affidavit or declaration is filed within the time periods set forth in section 8 of the Act, deficiencies may be corrected after notification from the Office, as follows:

(1) Correcting deficiencies in affidavits or declarations timely filed within the periods set forth in sections 8(a)(1) and 8(a)(2) of the Act. If the affidavit or declaration is timely filed within the relevant filing period set forth in section 8(a)(1) or section 8(a)(2) of the Act, deficiencies may be corrected before the end of this filing period without paying a deficiency surcharge. Deficiencies may be corrected after the end of this filing period with payment of the deficiency surcharge required by section 8(c) of the Act and § 2.6.

(2) Correcting deficiencies in affidavits or declarations filed during the grace period. If the affidavit or declaration is filed during the six-month grace period provided by section 8(a)(3) of the Act, deficiencies may be corrected before the expiration of the grace period without paying a deficiency surcharge. Deficiencies may be corrected after the expiration of the grace period with payment of the deficiency surcharge required by section 8(c) of the Act and § 2.6.

(b) If the affidavit or declaration is not filed within the time periods set forth in section 8 of the Act, the registration will be cancelled.

### 1604.17(a) Correcting Deficiencies in Affidavits or Declarations Timely Filed Within the Periods Set Forth in §8(a) of the Act

If the affidavit or declaration is filed during the periods set forth in §8(a) of the Act (i.e., during the sixth year after the date of registration or publication under §12(c) of the Act, or within one year before the end of any ten-year period after the date of registration), deficiencies may be corrected, after notification from the Office, within the relevant period without paying a deficiency surcharge, or after the expiration of the relevant period with payment of the deficiency surcharge required by §8(c) of the Act, 15 U.S.C. §1058(c).

Any deficiency must be cured before the end of the relevant filing period set forth in §8 of the Act or within the set period for response to the Office action, whichever is later. 15 U.S.C. §1058(c). If no response is filed, or if the owner does not correct the deficient affidavit or declaration, within this time period, the

registration will be cancelled, unless time remains in the grace period under §8(a)(3) of the Act, 15 U.S.C. §1058(a)(3). If time remains in the grace period, the owner may file a complete new affidavit or declaration, with a new fee. See [TMEP §1604.16](#).

### **1604.17(b) Correcting Deficiencies in Affidavits or Declarations Filed During the Grace Period**

If the affidavit or declaration is filed during the six-month grace period under §8(a)(3) of the Act, 15 U.S.C. §1058 (a)(3), deficiencies may be corrected, after notification from the Office, before the expiration of the grace period without paying a deficiency surcharge, or after the expiration of the grace period with the deficiency surcharge required by §8(c) of the Act, 15 U.S.C. §1058(c).

Deficiencies must be cured within six months of the issuance date of the Office action. 37 C.F.R. §2.163(b). See [TMEP §1604.16](#).

### **1604.17(c) Defects That Cannot be Cured After Expiration of the Grace Period**

The registration will be cancelled if an affidavit or declaration of use or excusable nonuse is not filed within the time period set forth in §8 of the Act (including the grace period). 15 U.S.C. §1058(a). Untimely filing cannot be cured after expiration of the grace period, even with a deficiency surcharge. See [TMEP §1604.04](#) regarding the deadline for filing the affidavit or declaration.

### **1604.18 Petition Under 37 C.F.R. §2.146**

The action of the Post Registration staff on a §8 affidavit or declaration may not be appealed to the Trademark Trial and Appeal Board, but the owner may file a petition to the Director for review of the action under 37 C.F.R. §§2.146(a)(2) and 2.165(b). A petition fee is required by 37 C.F.R. §§2.6 and 2.146(c). See [TMEP Chapter 1700](#) regarding petitions.

#### **1604.18(a) Response to Examiner's Refusal Required Before Petition**

A response to the initial refusal to accept an affidavit or declaration is required before filing a petition, unless the Post Registration staff directs otherwise or there is no time remaining to respond to the refusal. 37 C.F.R. §2.165(a).

If the Post Registration staff continues the refusal to accept the affidavit or declaration, the owner may file a petition for review of the action under 37 C.F.R. §2.146(a)(2) within six months of the issuance date. If the owner does not file a petition within six months, the registration will be cancelled. 37 C.F.R. §2.165(b).

#### **1604.18(b) Decision on Petition Is Final Action of the USPTO**

The decision on a petition under 37 C.F.R. §2.146 is the final action of the USPTO. In the absence of a request for reconsideration ( see [TMEP §1604.18\(c\)](#) ), or an appeal to an appropriate court ( see [TMEP](#)

[§1604.18\(d\)](#) within two months of the issuance date of the decision on petition, the registration will be cancelled.

### **1604.18(c) Request for Reconsideration of Denial of Petition**

Under 37 C.F.R. §2.146(j), if a petition is denied, the petitioner may file a request for reconsideration within two months of the issuance date of the decision denying the petition. A second petition fee must be paid with the request for reconsideration. See [TMEP §1705.08](#) regarding requests for reconsideration of petition decisions.

### **1604.18(d) Appeal to Federal Court**

The owner of the registration may appeal to the United States Court of Appeals for the Federal Circuit or commence a civil action for review of the decision denying a petition. 15 U.S.C. §§1071(a)(1) and (b)(1); 37 C.F.R. §§2.145(a) and 2.145(c).

The deadline for filing an appeal or commencing a civil action is two months from the issuance date of the decision on petition. 15 U.S.C. §§1071(a)(2) and (b)(1); 37 C.F.R. §2.145(d)(1). Under 37 C.F.R. §2.145(d)(2), one day is added to any two-month period that includes February 28.

Under 37 C.F.R. §2.165(c), a decision on petition is necessary before the owner can file an appeal or commence a civil action in any court.

### **1604.19 Section 8 Affidavit or Declaration of Use or Excusable Nonuse Combined with Renewal Application**

A §8 affidavit or declaration and a §9 renewal application may be combined into a single document, if the document meets the requirements of both §§8 and 9 of the Act. 37 C.F.R. §2.166.

The filing fee for the combined §8 and §9 filing is the sum of the cost of the individual filings. For example, if the filing fee for the §8 affidavit or declaration is \$100 per class, and the filing fee for the renewal application is \$400 per class, then the filing fee for the combined §8 and §9 document is \$500 per class.

If the combined §8 and §9 document is filed during the grace period, the filing fees per class and the grace period surcharge per class must be paid for *both* the §8 affidavit or declaration and the §9 renewal application.

*Example:* The period for filing a §8 affidavit or declaration and §9 renewal application expires on November 19, 2009. A combined §8 and §9 document is filed November 21, 2009, during the six-month grace period. The proper fees are as follows: (1) filing fee for the §8 affidavit or declaration, per class; (2) grace period surcharge for the §8 affidavit or declaration, per class; (3) filing fee for the §9 renewal application, per class; and (4) grace period surcharge for the §9 renewal application, per class.

Failure to include the proper fees is a deficiency that may require a deficiency surcharge. See [TMEP §§1604.17 et seq.](#) and [1606.13 et seq.](#) for information about the procedures, deadlines, and surcharge for correcting deficiencies.

Only a single deficiency surcharge is required for curing one or more deficiencies in a combined §8 and §9 filing, even if both the §8 affidavit or declaration and the §9 renewal application are deficient. Similarly, only a single deficiency surcharge is required to correct several deficiencies within one document.

To expedite processing, it is recommended that the combined §8 and §9 filing be submitted through TEAS, at <http://www.uspto.gov>. When the combined filing is submitted electronically, TEAS almost immediately displays a “Success” page that confirms receipt. This page is evidence of filing should any question arise as to the filing date of the document, and it may be printed or copied-and-pasted into an electronic record for storage. TEAS also separately sends an e-mail acknowledgement of receipt, which includes a summary of the filed information.

Alternatively, the owner of the registration can call the Trademark Assistance Center at (571) 272-9250 or (800) 786-9199 to obtain a pre-printed form that can be filled out and mailed, faxed, or hand-delivered to the USPTO.

See [TMEP §1605.05](#) regarding a combined filing under §§8 and 15 of the Act.

### **1605 Affidavit or Declaration of Incontestability Under §15 of the Trademark Act**

Section 15 of the Trademark Act, 15 U.S.C. §1065, provides a procedure by which the exclusive right to use a registered mark in commerce on or in connection with the goods or services covered by the registration can become “incontestable,” if the owner of the registration files an affidavit or declaration stating that the mark has been in continuous use in commerce for a period of five years after the date of registration. To expedite processing, it is recommended that the owner file the §15 affidavit or declaration through TEAS, available at <http://www.uspto.gov>. See [TMEP §1605.02](#).

Under §33(b) of the Act, 15 U.S.C. §1115(b), if the right to use the mark has become incontestable under §15, then the registration is conclusive evidence of the validity of the registered mark and its registration, of the registrant’s ownership of the mark, and of the owner’s exclusive right to use the registered mark in commerce, subject to certain defenses and exceptions. Sections 15 and 33(b) apply only to registrations issued on the Principal Register.

Filing an affidavit or declaration of incontestability under §15 of the Trademark Act (“§15 affidavit or declaration”) is optional. An eligible registrant may choose to claim the benefits of incontestability and file an appropriate affidavit or declaration, or may elect to retain the registration without those benefits. The requirements for maintaining and renewing a federal registration are not affected.

The USPTO does not “accept” §15 affidavits or declarations. *Arman’s Systems, Inc. v. Armand’s Subway, Inc.*, 215 USPQ 1048, 1050 n.2. (TTAB 1982). Rather, the USPTO reviews the affidavit or declaration to determine whether it is consistent with the requirements of the statute and rules (e.g., whether it is signed, whether it was filed at an appropriate time, and whether the §15 claims are properly set forth).

When a §15 affidavit or declaration complies with the requirements of the statute and rules, the USPTO updates its records to acknowledge receipt of the affidavit or declaration and sends a notice of acknowledgment to the owner of the registration. Acknowledging receipt of the affidavit or declaration provides notice to the public that an affidavit or declaration of incontestability has been filed; it is not a determination by the USPTO that the registration is in fact incontestable. The question of whether the registration is incontestable arises and is determined by a court if there is a proceeding involving the mark.

If the §15 affidavit or declaration does not comply with the statute and rules, the USPTO issues a written action notifying the owner of any inconsistency or error, but does not require correction. If the §15 affidavit or declaration is filed alone, the owner is given six months from the issuance date of the Office action to file a response. If it is filed as part of a combined affidavit or declaration under §§8 and 15 or §§71 and 15,

and there are issues in the Office action relating to both parts of the combined filing, the owner must file a response within six months of the issuance date of the Office action, or before the end of the relevant filing period set forth in §8(a) or §71(a), whichever is later. *See* TMEP §§[1604.16](#), [1613.16](#). If the issues in the Office action relate only to the §15 affidavit or declaration, the owner is given six months from the issuance date of the Office action to file a response. If no response is received within the required time, the §15 affidavit or declaration will be abandoned. The USPTO does *not* update its records to acknowledge receipt of a noncompliant affidavit or declaration. The owner may file a new §15 affidavit or declaration, with a new filing fee.

A fee is required for each class in the registration to which the §15 affidavit or declaration pertains. 37 C.F.R. §§2.6 and 2.167(g). If insufficient fees are included with the affidavit or declaration, the Post Registration staff will issue an Office action allowing the owner additional time to submit the required fees. 37 C.F.R. §2.167(g).

An owner may abandon a timely filed §15 affidavit or declaration that contains an inaccuracy by filing a petition to the Director under 37 C.F.R. §2.146(a)(3). *See* TMEP §§[1605.03](#) and [1707](#).

The limitation of grounds that a third party can raise in a petition to cancel a registered mark under 15 U.S.C. §1064 filed more than five years from the date of registration does *not* depend on the filing of a §15 affidavit or declaration. [TMEP §1605.06](#).

See [TMEP §1605.05](#) regarding a combined affidavit or declaration under §§8 and 15 of the Act, and [TMEP §1216.02](#) regarding the effect of “incontestability” in ex parte examination.

### **1605.01 Registrations to Which §15 Affidavit or Declaration Pertains**

The provisions of §15 of the Trademark Act apply only to registrations issued on the Principal Register under the Act of 1946 and to registrations issued under the Acts of 1905 and 1881 that have been “published” under §12(c) of the Act, 15 U.S.C. §1062(c). See [TMEP §1603](#) regarding §12(c).

A §15 affidavit or declaration may be filed for a registered extension of protection of an international registration to the United States. Section 73 of the Trademark Act, 15 U.S.C. §1141m.

Section 15 affidavits or declarations may not be filed for marks registered on the Supplemental Register of the Act of 1946, marks registered under the Act of 1920, or marks registered under the Acts of 1905 and 1881 for which the benefits of the Act of 1946 have not been claimed under §12(c). If a §15 affidavit or declaration is filed for a registration that is not eligible for the benefits of §15, the USPTO will not review it and will refund the filing fee.

### **1605.02 Form for Filing Affidavit or Declaration of Incontestability**

To expedite processing, it is recommended that the owner file the §15 affidavit or declaration through TEAS, available at <http://www.uspto.gov>. When the affidavit or declaration is submitted electronically, TEAS almost immediately displays a “Success” page that confirms receipt. This page is evidence of filing should any question arise as to the filing date of the affidavit or declaration, and it may be printed or copied-and-pasted into an electronic record for storage. TEAS also separately sends an e-mail acknowledgement of receipt, which includes a summary of the filed information.

Alternatively, the owner can call the Trademark Assistance Center at (571) 272-9250 or (800) 786-9199 to obtain a pre-printed form that can be filled out and mailed, faxed, or hand-delivered to the USPTO.

### **1605.03 Time for Filing Affidavit or Declaration of Incontestability**

The owner may not file a §15 affidavit or declaration until the federally registered mark has been in continuous use in commerce for at least five consecutive years after the date of registration. This may be any five-year period after the date of registration for marks registered under the Act of 1946, or after the date of publication under §12(c) for marks registered under the Acts of 1905 and 1881.

The owner may file the affidavit or declaration within one year after the five-year period that is selected. 37 C.F.R. §2.167(f). The affidavit or declaration must be both executed and filed within that one-year period. If the affidavit or declaration is filed earlier than five years after the date of registration or the date of publication under §12(c), the USPTO will not review it and will refund the filing fee. The owner may file a new affidavit, with a fee, during the statutory filing period.

The USPTO does not review the validity of a claim of continuous use in commerce made in a §15 affidavit or declaration. Therefore, after timely filing a §15 affidavit or declaration, if the owner determines that the affidavit or declaration contained an inaccuracy, the owner may not request that the affidavit or declaration be withdrawn and the fee refunded. In such situations, the owner may file a petition to the Director under 37 C.F.R. §2.146(a)(3) requesting that the §15 affidavit or declaration be abandoned. See [TMEP §1707](#).

An affidavit or declaration filed through TEAS is considered to have been filed on the date the USPTO receives the transmission, regardless of whether that date is a Saturday, Sunday, or Federal holiday within the District of Columbia. 37 C.F.R. §2.195(a)(2).

Section 15 affidavits or declarations filed on paper are considered timely if they are received in the USPTO by the due date or if they are mailed or transmitted by the due date with a certificate of mailing or facsimile transmission under 37 C.F.R. §2.197. See [TMEP §§305.02](#) and [306.05](#) for certificate of mailing and certificate of facsimile transmission procedures to avoid lateness.

The USPTO will not acknowledge a §15 affidavit or declaration unless a §8 affidavit or declaration is pending or has been accepted by the Office. If a §15 affidavit or declaration is filed alone during the statutory period for filing the §8 affidavit or declaration, the Post Registration staff will notify the owner that the registration will be cancelled without an acceptable §8 affidavit or declaration. In response to such notification, the owner may request that the §15 affidavit or declaration be treated as a deficient §8 affidavit or declaration. See [TMEP §1604.04](#) regarding the deadline for filing a §8 affidavit or declaration and [TMEP §1604.05](#) regarding the requirements for filing a §8 affidavit or declaration.

See [TMEP §1605.05](#) regarding a combined affidavit or declaration under §§8 and 15 of the Act.

### **1605.04 Requirements for Affidavit or Declaration of Incontestability**

Section 15 of the Act refers to the affidavit or declaration merely as “setting forth” the specified information. See 15 U.S.C. §1065(3). Therefore, no showing or proof beyond the owner’s verified statement is required.

*Must be Filed by Owner.* In order to be effective, the §15 affidavit or declaration must be filed by the person who is the owner of the registration at the time the affidavit or declaration is filed. 37 C.F.R. §2.167(a).

If the affidavit or declaration was filed by the wrong party, the true owner may file a new affidavit or declaration, with a new filing fee.

*Fee.* A fee is required for each class in the registration to which the §15 affidavit or declaration pertains.

*See* 37 C.F.R. §§2.6 and 2.167(g). If insufficient fees are included with the affidavit or declaration, the Post Registration staff will issue an Office action allowing the owner additional time to submit the required fees. 37 C.F.R. §2.167(g).

*Goods/Services Must be Recited.* The §15 affidavit or declaration must specify the goods or services recited in the registration on or in connection with which the mark has been in continuous use for the five-year period after the date of registration or publication under §12(c), and is still in use in commerce. 15 U.S.C. §1065(3); 37 C.F.R. §2.167(c). More than one affidavit or declaration may be filed at different times for different goods/services in the same registration.

*Mark Must be in Use in Commerce.* Regardless of the basis for registration, the use on which the §15 affidavit or declaration is based must be use in commerce. This applies to both foreign and domestic registrants. It is not necessary to specify the type of commerce (e.g. , interstate) in which the mark is used. The USPTO presumes that someone who states that the mark is in use in commerce is stating that the mark is in use in a type of commerce that the United States Congress can regulate, unless there is contradictory evidence in the record. See [TMEP §§901](#) *et seq.* regarding use in commerce.

*No Adverse Decision or Pending Proceeding Involving Rights in the Mark.* The §15 affidavit or declaration must state that there has been no final decision adverse to the owner's claim of ownership of the mark for the goods or services, or to the owner's right to register the mark or to keep the mark on the register. It must also state that there is no proceeding involving these rights pending in the USPTO or in a court and not finally disposed of. 15 U.S.C. §§1065(1) and (2); 37 C.F.R. §§2.167(d) and (e). If the USPTO finds facts contrary to either of the foregoing statements, the USPTO will not acknowledge receipt of the §15 affidavit or declaration. *See* [TMEP §1605](#) . (The USPTO does not consider a proceeding involving the mark in which the owner is the plaintiff, where there is no counterclaim involving the owner's rights in the mark, to be a "proceeding involving these rights" that would preclude the filing or acknowledgment of a §15 affidavit or declaration.)

If the USPTO finds that there is a proceeding pending that involves the owner's right to register the mark or to keep the mark on the register, the USPTO will not acknowledge the affidavit or declaration, even if the proceeding was instituted after the owner filed the §15 affidavit or declaration but before the affidavit or declaration was reviewed by the USPTO. If a pending proceeding is later dismissed, the owner may file a new affidavit or declaration, with a new filing fee.

*Verification.* The §15 affidavit or declaration must be signed and verified (sworn to) or supported by a declaration under 37 C.F.R. §2.20 by the owner of the registration or a person properly authorized to sign on behalf of the owner of the registration. 37 C.F.R. §2.167(a). A "person who is properly authorized to sign on behalf of the owner" is: (1) a person with legal authority to bind the owner; (2) a person with firsthand knowledge of the facts and actual or implied authority to act on behalf of the owner; or (3) an attorney as defined in 37 C.F.R. §11.1 who has an actual written or verbal power of attorney or an implied power of attorney from the owner. 37 C.F.R. §2.193(e)(1). Generally, the USPTO does not question the authority of the person who signs a §15 affidavit or declaration, unless there is an inconsistency in the record as to the signatory's authority to sign. [TMEP §611.03\(a\)](#) .

See 37 C.F.R. §2.193(c) and [TMEP §611.01\(c\)](#) regarding signature of electronically filed affidavits or declarations.

### **1605.05 Combining §15 Affidavit or Declaration with §8 Affidavit or Declaration**

A §15 affidavit or declaration may be combined with a §8 affidavit or declaration, if the combined affidavit or declaration meets the requirements of both §§8 and 15.

The filing fee for a combined §8 and §15 affidavit or declaration is the sum of the cost of the individual filings. For example, if the filing fee for the §8 affidavit or declaration is \$100 per class, and the filing fee for the §15 affidavit or declaration is \$200 per class, then the filing fee for the combined affidavit or declaration under §§8 and 15 is \$300 per class.

If the combined §8 and §15 affidavit or declaration is filed during the §8 grace period, the grace period surcharge per class for the §8 affidavit or declaration must be paid. There is no grace period surcharge for a §15 affidavit or declaration.

If a combined §8 and §15 affidavit or declaration is filed, and the §8 affidavit or declaration is deficient, the deficiency may be corrected before expiration of the relevant deadline set forth in §8 of the Act for no fee, or after expiration of the relevant deadline with the deficiency surcharge required by §8(c) of the Act, 15 U.S.C. §1058(c). See [TMEP §§1604.17](#) *et seq.* for information about the procedures, deadlines, and surcharge for correcting deficiencies in a §8 affidavit or declaration. There is no deficiency surcharge for a §15 affidavit or declaration.

To expedite processing, it is recommended that the owner file the combined §8 and §15 affidavit or declaration through TEAS, available at <http://www.uspto.gov>. When the combined affidavit or declaration is submitted electronically, TEAS almost immediately displays a “Success” page that confirms receipt. This page is evidence of filing should any question arise as to the filing date of the affidavit or declaration, and it may be printed or copied and pasted into an electronic record for storage. TEAS also separately sends an e-mail acknowledgement of receipt, which includes a summary of the filed information. Alternatively, the owner can call the Trademark Assistance Center at (571) 272-9250 or (800) 786-9199 to obtain a pre-printed form that can be filled out and mailed, faxed, or hand-delivered to the USPTO.

See [TMEP §1613.19](#) regarding a combined filing under §§71 and 15 of the Act.

### **1605.06 Section 14 Limitation is Independent of §15 Affidavit or Declaration**

Section 14 of the Trademark Act, 15 U.S.C. §1064, limits the grounds that a third party can raise in a petition to cancel a mark registered on the Principal Register when the petition is filed more than five years from the date of registration or publication under §12(c). This limitation of grounds does *not* depend on the filing of a §15 affidavit or declaration. [Trademark Trial and Appeal Board Manual of Procedure](#) (“TBMP”) §307.02(b).

## **1606 Renewal of Registration Under §9 of the Trademark Act**

*15 U.S.C. §1059 Renewal of registration.*

(a) Subject to the provisions of section 8, each registration may be renewed for periods of 10 years at the end of each successive 10-year period following the date of registration upon payment of the prescribed fee and the filing of a written application, in such form as may be prescribed by the Director. Such application may be made at any time within 1 year before the end of each successive 10-year period for which the registration was issued or renewed, or it may be made within a grace period of 6 months after the end of each successive 10-year period, upon payment of a fee

and surcharge prescribed therefor. If any application filed under this section is deficient, the deficiency may be corrected within the time prescribed after notification of the deficiency, upon payment of a surcharge prescribed therefor.

(b) If the Director refuses to renew the registration, the Director shall notify the registrant of the Director's refusal and the reasons therefor.

(c) If the registrant is not domiciled in the United States the registrant may designate, by a document filed in the United States Patent and Trademark Office, the name and address of a person resident in the United States on whom may be served notices or process in proceedings affecting the mark. Such notices or process may be served upon the person so designated by leaving with that person or mailing to that person a copy thereof at the address specified in the last designation so filed. If the person so designated cannot be found at the address given in the last designation, or if the registrant does not designate by a document filed in the United States Patent and Trademark Office the name and address of a person resident in the United States on whom may be served notices or process in proceedings affecting the mark, such notices or process may be served on the Director.

## **1606.01 Which Registrations Must Be Renewed Under §9**

### **1606.01(a) Registrations Based on Applications Under §1 or §44 Must Be Renewed Under §9**

Section 9 of the Trademark Act, 15 U.S.C. §1059, requires that registrations resulting from applications based on §1 or §44 of the Trademark Act be renewed periodically. See [TMEP §§1606.02 et seq.](#) for information about the requirements for renewal under §9.

### **1606.01(b) Section 9 Does Not Apply to Extensions of Protection of International Registrations to the United States**

Section 9 of the Trademark Act does not apply to registered extensions of protection of international registrations to the United States. Renewal of international registrations must be made at the IB, in accordance with Article 7 of the Madrid Protocol. 37 C.F.R. §7.41(a). See [TMEP §1614](#) for further information about renewal of international registrations.

### **1606.01(c) Renewal of Registrations Issued Under Prior U.S. Trademark Acts Must Be Renewed Under §9**

An application for renewal of a registration issued under a prior Act, where required, must meet all the requirements of §9 of the Act and 37 C.F.R. §2.183. See [TMEP §1602.02](#) regarding the renewal of registrations issued under the Acts of 1881 and 1905, and [TMEP §1602.03](#) regarding the renewal of registrations issued under the Act of 1920.

## **1606.02 Requirements for Renewal Under §9**

### *37 CFR §2.183 Requirements for a complete renewal application*

A complete renewal application must include:

- (a) A request for renewal of the registration, signed by the registrant or the registrant's representative;
- (b) The fee required by §2.6 for each class;
- (c) The additional fee required by §2.6 for each class if the renewal application is filed during the six-month grace period set forth in section 9(a) of the Act;
- (d) If the renewal application covers less than all the goods or services in the registration, a list of the particular goods or services to be renewed.
- (e) If at least one fee is submitted for a multi-class registration, but the class(es) to which the fee(s) should be applied are not specified, the Office will issue a notice requiring either the submission of additional fee(s) or an indication of the class(es) to which the original fee(s) should be applied. Additional fee(s) may be submitted if the requirements of §2.185 are met. If the required fee(s) are not submitted and the class(es) to which the original fee(s) should be applied are not specified, the Office will presume that the fee(s) cover the classes in ascending order, beginning with the lowest numbered class.

(f) Renewals of registrations issued under a prior classification system will be processed on the basis of that system, unless the registration has been amended to adopt international classification pursuant to §2.85(e)(3).

### 1606.03 Time for Filing §9 Renewal Application

The application for renewal must be filed within one year before the expiration of the registration, or within the six-month grace period after the expiration of the registration with an additional grace period surcharge.

If no renewal application is filed before the end of the grace period, the registration will expire. 15 U.S.C. §1059(a); 37 C.F.R. §2.182. See [TMEP §§1602](#) *et seq.* as to the term of a registration.

A renewal application may be filed on the anniversary dates of the statutory period.

*Example* : For a registration issued on November 5, 1998, an application for renewal may be filed as early as November 5, 2007, and as late as November 5, 2008, before entering the six-month grace period.

Under 37 C.F.R. §2.195(a)(2), a renewal application filed through TEAS is considered to have been filed on the date the USPTO receives the transmission, regardless of whether that date is a Saturday, Sunday, or Federal holiday within the District of Columbia. When the renewal application is submitted electronically, TEAS almost immediately displays a “Success” page that confirms receipt. This page is evidence of filing should any question arise as to the filing date of the application, and it may be printed or copied-and-pasted into an electronic record for storage. TEAS also separately sends an e-mail acknowledgement of receipt, which includes a summary of the filed information.

An application for renewal of a registration filed on paper is considered timely if it is received in the USPTO by the due date or if it is mailed or transmitted by the due date with a certificate of mailing or facsimile transmission in accordance with 37 C.F.R. §2.197. See [TMEP §§305.02](#) and [306.05](#) for certificate of mailing and certificate of facsimile transmission procedures to avoid lateness.

The Director has no authority to waive the deadline for filing a proper §9 renewal application. See *In re Holland American Wafer Co.*, 737 F.2d 1015, 1018, 222 USPQ 273, 275 (Fed. Cir. 1984) (“Timeliness set by statute is not a minor technical defect which can be waived by the Commissioner.”). Cf. *Checkers Drive-In Restaurants, Inc. v. Commissioner of Patents and Trademarks.*, 51 F.3d 1078, 1085, 34 USPQ2d 1574, 1581 (D.C. App. 1995), *cert. denied* 516 U.S. 866 (1995) (“[I]n establishing cancellation as the penalty for failure to file the required affidavit [under 15 U.S.C. §1058], Congress made no exception for the innocent or the negligent. Thus, the Commissioner had no discretion to do other than cancel Checkers's service mark registration in this case”).

#### 1606.03(a) Premature Filing of §9 Renewal Application

A renewal application may not be filed before the period specified in §9 of the Act. *In re Holland American Wafer Co.*, 737 F.2d 1015, 222 USPQ 273 (Fed. Cir. 1984). If an application for renewal is filed more than one year before the expiration date of the registration, the USPTO will advise the registrant: (1) that the renewal application is premature; (2) of the appropriate time period for filing a renewal application; (3) that the fees submitted will be held; and (4) that the registrant may file a new renewal application at the appropriate time or may request a refund at any time. The prematurely filed renewal application will be placed in the record for informational purposes only. A timely renewal application must be filed before the end of the

grace period, or the registration will expire and the fees will be refunded. There is no deficiency surcharge for filing a timely substitute renewal application.

### **1606.04 Form for Filing §9 Renewal Application**

To expedite processing, it is recommended that the owner file the renewal application through TEAS.

Because the deadlines for filing renewal applications coincide with the deadlines for filing affidavits or declarations of use or excusable nonuse under 15 U.S.C. §1058(a)(2) at the end of each ten-year period following the date of registration, the USPTO has created a form for filing a §8 affidavit or declaration combined with a §9 renewal application. See [TMEP §1604.19](#) for more information about combined filings under §§8 and 9 of the Act.

The form for the combined filing is available through TEAS at <http://www.uspto.gov>. Alternatively, the owner can call the Trademark Assistance Center at (571) 272-9250 or (800) 786-9199 to obtain a pre-printed form that can be filled out and mailed, faxed, or hand-delivered.

The USPTO's §9 renewal form cannot be used to renew an international registration. See [TMEP §1614](#) for information about renewal of international registrations.

### **1606.05 Fees for §9 Renewal Applications**

#### **1606.05(a) Fee for Filing Application for Renewal Under §9**

A renewal application must include the fee required by 37 C.F.R. §2.6 for each class of goods/services for which renewal is sought. 15 U.S.C. §1059(a); 37 C.F.R. §2.183(b). See [TMEP §§ 1401.02](#) , [1401.04](#) , and [1601.06](#) regarding use of international classification or prior United States classification for calculation of fees due. See [TMEP §1606.05\(c\)](#) regarding renewal applications filed with insufficient fees.

#### **1606.05(b) Grace Period Surcharge and Deficiency Surcharge**

If the renewal application is filed during the six-month grace period, there is an additional grace period surcharge for each class for which renewal is sought. 15 U.S.C. §1059(a); 37 C.F.R. §§2.6 and 2.183(c).

Under §9(a) of the Trademark Act, a deficiency surcharge is required for correcting a deficiency after expiration of the relevant deadline specified in §9 of the Act. If the renewal application is filed within one year before the expiration of the registration, a deficiency surcharge is required for correcting deficiencies after the expiration date of the registration. If the renewal application is filed during the grace period, a deficiency surcharge is required for correcting deficiencies after expiration of the grace period. See [TMEP §§1606.13 et seq.](#) for further information regarding the procedures, deadlines, and surcharge for correcting deficiencies.

Only a single deficiency surcharge is required for correcting one or more deficiencies in a multiple-class registration. Similarly, only a single deficiency surcharge is required to correct several deficiencies within one renewal application or one combined filing under §§8 and 9. See [TMEP §1604.19](#) regarding combined filings under §§8 and 9.

The grace period surcharge applies only if no filing was made within the year before the expiration of the registration. Someone who files within one year before the expiration of the registration, but corrects a

deficiency after expiration of the registration, will be subject to the deficiency surcharge only. On the other hand, someone who files during the grace period and cures a deficiency after the grace period expires will be subject to both the grace period surcharge (for the ability to file the renewal application during the grace period) *and* the deficiency surcharge (for the ability to correct a deficiency after the expiration of the grace period). H.R. Rep. No. 105-194, 105th Congress, 1st Sess. 17 (1997).

### **1606.05(c) Processing §9 Renewal Application Filed with Insufficient Fees**

A §9 renewal application that does not include sufficient fees to cover the filing fee for all the classes to which the application pertains (and the grace period surcharge, where applicable), is deficient. If the renewal application is filed within one year before the expiration date of the registration, the deficiency may be corrected before the expiration date of the registration for no fee, or after the expiration date of the registration with the deficiency surcharge required by §9(a) of the Act, 15 U.S.C. §1059(a). If the renewal application is filed during the grace period, the deficiency may be corrected before expiration of the grace period for no fee, or after expiration of the grace period with the deficiency surcharge required by §9(a) of the Act. See [TMEP §§1606.13](#) *et seq.* for information about the procedures, deadlines, and surcharge for correcting deficiencies.

If the renewal application was filed without sufficient fee(s), but included an authorization to charge additional fees to a USPTO deposit account, the required fee (and grace period surcharge, where applicable) will be charged to the deposit account. If the deposit account authorization was included with the renewal application as filed, and the deposit account had sufficient funds to cover the fee(s) in question, there is no fee deficiency and no deficiency surcharge is required.

An authorization to charge fees to a deposit account with insufficient funds to cover the fee is regarded as a deficiency.

If a check submitted as payment of a filing fee for a renewal application is returned unpaid, or an EFT or credit card payment is refused or charged back by a financial institution, this is also regarded as a deficiency.

In addition to the deficiency surcharge (where applicable), there is a fee for processing the payment that was refused. 37 C.F.R. §2.6(b)(12). See [TMEP §405.06](#).

If at least one fee is submitted for a multiple-class registration, but the class(es) to which the fee(s) should be applied are not specified, the Post Registration staff will issue a notice requiring either the submission of additional fee(s) or an indication of the class(es) to which the original fee(s) should be applied. If the required fee(s) are not submitted and the class(es) to which the original fee(s) should be applied are not specified, the USPTO will presume that the fee(s) cover the classes in ascending order, beginning with the lowest numbered class and will delete any unpaid classes. 37 C.F.R. §2.183(e). See [TMEP §1608](#) regarding surrender of the registration as to class(es) that are omitted from a §9 renewal application.

### **1606.06 Ownership and Who May File §9 Renewal Application**

The Trademark Act and the Trademark Rules of Practice do not require that a renewal application be filed by the owner of the registration.

Therefore, if the renewal applicant is not the owner of record, the USPTO does not require that the renewal applicant show continuity of title from the original registrant.

However, registrations are renewed in the name of the party who is the owner of record of the registration, as shown in the Trademark database. The registration will be renewed in the name of a new owner only if the owner: (1) records an assignment or other document of title with the Assignment Recordation Branch; and (2) notifies the Post Registration staff at the time the renewal application is filed that the document has been recorded with the Assignment Recordation Branch. See [TMEP §§504 et seq.](#) regarding the circumstances in which the “Ownership” field in the Trademark database will be automatically updated after recordation of a document with the Assignment Recordation Branch, even if the new owner does not notify the Trademark Operation that the document has been recorded.

See [TMEP §502.03](#) regarding issuance of a new certificate in the name of a new owner.

### **1606.07 Execution of §9 Renewal Application**

Under 37 C.F.R. §2.183(a), a renewal application must be signed by “the registrant or the registrant’s representative.” Verification is not required.

Generally, the USPTO does not question the authority of the person who signs a renewal application, unless there is an inconsistency in the record as to the signatory’s authority to sign.

The Trademark Act and the Trademark Rules of Practice do not require that a renewal application be executed within any particular time period. Therefore, the USPTO will accept undated renewal applications, and will not issue any inquiry or requirement regarding the date of execution of a renewal application.

See [TMEP §1604.08\(b\)](#) regarding the date of execution of the §8 affidavit or declaration and [§1606.12](#) regarding signature of a response to an Office action issued in connection with a renewal application.

### **1606.08 Goods and/or Services Set Forth in §9 Renewal Application**

#### **1606.08(a) Listing of Goods and/or Services Required Only for Partial Renewal**

Neither the Trademark Act nor the Trademark Rules of Practice requires a listing of the goods/services in the registration, if the renewal application covers all the goods/services in the registration. However, if the

renewal application covers less than all the goods/services, the renewal application must include a list of the goods/services for which renewal is sought. 37 C.F.R. §2.183(d).

#### **1606.08(b) No Goods or Services Listed**

If no goods or services are specified in the renewal application, it will be presumed that renewal is sought for all the goods/services in the registration.

#### **1606.08(c) Some Goods and/or Services Listed**

If the renewal application lists only some of the goods/services set forth in the registration, it will be presumed that renewal is sought for only the goods/services listed, and the goods/services omitted from the renewal application will be deleted from the registration.

#### **1606.08(d) Goods and/or Services Not Listed in Registration May Not Be Listed in Renewal Application**

Goods/services that are not listed in the registration may not be listed in the renewal application.

#### **1606.09 Affidavit of Use in Commerce or Excusable Nonuse Not Required**

The Trademark Act does not require that a renewal application include an affidavit or declaration of use in commerce, a specimen of use, or a showing that any nonuse is due to special circumstances that excuse the nonuse, and not due to any intention to abandon the mark. *See* notice at [1228 TMOG 187](#) (Nov. 30, 1999).

*See* also [TMEP §§1604](#) *et seq.* regarding affidavits or declarations of use or excusable nonuse under 15 U.S.C. §1058.

#### **1606.10 Designation of Domestic Representative by Foreign Applicant for Renewal Under §9**

A renewal applicant who is not domiciled in the United States may set forth the name and address of a United States resident on whom notices or process in proceedings affecting the registration may be served. The USPTO encourages parties who do not reside in the United States to designate domestic representatives. 15 U.S.C. §1059(c). *See* [TMEP §610](#).

The designation should be signed by the individual registrant, someone with legal authority to bind a juristic registrant (e.g., a corporate officer or general partner of a partnership), or a qualified practitioner. In the case of joint owners who are not represented by a qualified practitioner, all must sign. 37 C.F.R. §2.193(e)(8); [TMEP §611.03\(h\)](#).

#### **1606.11 Office Actions and Notices Regarding §9 Renewal Application**

Upon receipt of a §9 renewal application, the prosecution history of the registration in the Trademark database is updated to show that the renewal application has been filed.

When a renewal application is filed electronically, TEAS almost immediately displays a “Success” page that confirms receipt. This page is evidence of filing should any question arise as to the filing date of the document, and it may be printed or copied-and-pasted into an electronic record for storage. TEAS also

separately sends an e-mail acknowledgement of receipt, which includes a summary of the filed information. For renewal applications filed on paper, no acknowledgment of receipt of the application is sent before it is examined.

If the renewal application is examined and found acceptable, the USPTO sends the registrant a notice that the registration is renewed. The USPTO does not issue an Updated Registration Certificate (“URC”) for renewed registrations.

If the renewal application is not acceptable, the USPTO issues an action stating the reasons for refusal. 15 U.S.C. §1059(b); 37 C.F.R. §2.184(a).

The propriety of the original registration is not re-examined on renewal.

## 1606.12 Response to Office Action

*Deadline* . If the renewal application is not acceptable, the USPTO will notify the renewal applicant of the reason(s) for refusal. 15 U.S.C. §1059(b); 37 C.F.R. §2.184(a). The registrant must file a response to a refusal of renewal within six months of the issuance date of the Post Registration Office action, or before the expiration date of the registration, whichever is later. If no response is filed within this time period, the registration will expire, unless time remains in the grace period under §9(a) of the Act, 15 U.S.C. §1059(a). If time remains in the grace period, the registrant may file a complete new renewal application, with a new fee. 37 C.F.R. §2.184(b)(1).

The registrant may file a petition to the Director under 37 C.F.R. §§2.146(a)(5) and 2.148 to waive 37 C.F.R. §2.184(b)(1) and accept a late response to an Office action. However, the Director will waive a rule only in an extraordinary situation, where justice requires and no other party is injured. See [TMEP §1708](#) . The failure to receive an Office action has been found to be an extraordinary circumstance that warrants a waiver of 37 C.F.R. §2.184(b). The “unintentional delay” standard of 37 C.F.R. §2.66 does not apply to a registrant’s failure to respond to an Office action issued in connection with a renewal application. [TMEP §1714.01\(f\)\(ii\)\(D\)](#) .

*Signature* . The response must be signed by a qualified practitioner, or by the registrant or someone with legal authority to bind the registrant. If the registrant is represented by a qualified practitioner, the practitioner must sign. 37 C.F.R. §§2.193(e)(2)(i) and 11.18(a). If the registrant is not represented by a qualified practitioner, the individual owner or someone with legal authority to bind a juristic owner must sign. 37 C.F.R. §§2.184(b)(2) and 11.14(e); [TMEP §611.03\(b\)](#) . In the case of joint registrants who are not represented by a qualified practitioner, all must sign. 37 C.F.R. §2.193(e)(2)(ii). See [TMEP §§611.06 et seq](#) . for guidelines on persons with legal authority to bind various types of juristic entities, and [TMEP §§602 et seq](#) . regarding persons who are qualified to represent others before the USPTO in trademark cases.

When it appears that a response to an Office action is signed by an improper party, the Post Registration staff must treat the response as incomplete and follow the procedures in [TMEP §§611.05 et seq](#) .

*Correction of Deficiencies* . The renewal applicant may correct deficiencies, if the requirements of 37 C.F.R. §2.185 are met. See [TMEP §§1606.13 et seq](#) . for information about the procedures, deadlines, and surcharge for correcting deficiencies.

## 1606.13 Correction of Deficiencies in §9 Renewal Applications

*37 CFR §2.185 Correcting deficiencies in renewal application.*

(a) If the renewal application is filed within the time periods set forth in section 9(a) of the Act, deficiencies may be corrected, as follows:

(1) Correcting deficiencies in renewal applications filed within one year before the expiration date of the registration. If the renewal application is filed within one year before the expiration date of the registration, deficiencies may be corrected before the expiration date of the registration without paying a deficiency surcharge. Deficiencies may be corrected after the expiration date of the registration with payment of the deficiency surcharge required by section 9(a) of the Act and §2.6.

(2) Correcting deficiencies in renewal applications filed during the grace period. If the renewal application is filed during the six-month grace period, deficiencies may be corrected before the expiration of the grace period without paying a deficiency surcharge. Deficiencies may be corrected after the expiration of the grace period with payment of the deficiency surcharge required by section 9(a) of the Act and §2.6.

(b) If the renewal application is not filed within the time periods set forth in section 9(a) of the Act, the registration will expire. This deficiency cannot be cured.

### **1606.13(a) Correcting Deficiencies in §9 Renewal Applications Filed Within the Year Before the Expiration Date of the Registration**

If the renewal application is filed within one year before the expiration date of the registration, deficiencies may be corrected before the expiration date without paying a deficiency surcharge, or after the expiration date with payment of the deficiency surcharge required by §9(a) of the Act. 37 C.F.R. §2.185(a)(1).

Any deficiency must be cured within the set period for response to the Office action, i.e., within six months of the issuance date of the action, or before the expiration date of the registration, whichever is later. If no response is filed within this time period, the registration will expire, unless time remains in the grace period.

If time remains in the grace period, the registrant may file a complete new renewal application, with a new fee. 37 C.F.R. §2.184(b). See [TMEP §1606.12](#).

### **1606.13(b) Correcting Deficiencies in Renewal Applications Filed During the Grace Period**

If the renewal application is filed during the grace period, deficiencies may be corrected before the expiration of the grace period without paying a deficiency surcharge, or after the expiration of the grace period with the deficiency surcharge required by §9(a) of the Act. 37 C.F.R. §2.185(a)(2).

Deficiencies must be cured within six months of the issuance date of the Office action. 37 C.F.R. §2.184(b).

See [TMEP §1606.12](#).

### **1606.13(c) Late Filing Cannot Be Cured**

If the renewal application is not filed within the statutory filing period (which includes the grace period), the registration will expire. Filing after the expiration of the grace period is not a deficiency that can be cured, even with a deficiency surcharge. 37 C.F.R. §§2.182 and 2.185(b).

### **1606.14 Petition Under 37 C.F.R. §2.146**

The action of the Post Registration staff on a §9 renewal application may not be appealed to the Trademark Trial and Appeal Board, but the registrant may file a petition to the Director for review of the action under 37 C.F.R. §§2.146(a)(2) and 2.186(b). A petition fee is required by 37 C.F.R. §§2.6 and 2.146(c). See [TMEP Chapter 1700](#) regarding petitions.

### **1606.14(a) Response to Examiner's Refusal Required Before Petition**

A response to the initial refusal to accept a renewal application is required before filing a petition, unless the Post Registration staff directs otherwise or there is no time remaining to respond to the refusal. 37 C.F.R. §2.186(a).

If the Post Registration staff continues the refusal of the renewal application, the registrant may file a petition for review of the action under 37 C.F.R. §2.146(a)(2), within six months of the issuance date of the action continuing the refusal. If the registrant does not file a petition within six months of the issuance date, the registration will expire. 37 C.F.R. §2.186(b).

### **1606.14(b) Decision on Petition is Final Action of the USPTO**

The decision on a petition under 37 C.F.R. §2.146 is the final action of the USPTO. In the absence of a request for reconsideration of the decision ( *see* [TMEP §1606.14\(c\)](#) ), or an appeal to federal court ( *see* [TMEP §1606.14\(d\)](#) ) within two months of the issuance date of the decision on petition, the registration will expire.

### **1606.14(c) Request for Reconsideration of Denial of Petition**

Under 37 C.F.R. §2.146(j), if a petition is denied, the petitioner may file a request for reconsideration within two months of the issuance date of the decision denying the petition. A second petition fee must be paid with the request for reconsideration. *See* [TMEP §1705.08](#) regarding requests for reconsideration of petition decisions.

### **1606.14(d) Appeal to Federal Court**

The registrant may appeal to the United States Court of Appeals for the Federal Circuit or commence a civil action for review of the decision on petition. 15 U.S.C. §§1071(a)(1) and (b)(1); 37 C.F.R. §§2.145(a) and 2.145(c).

The deadline for filing an appeal or commencing a civil action is two months from the issuance date of the decision on petition. 15 U.S.C. §§1071(a)(2) and (b)(1); 37 C.F.R. §2.145(d)(1). Under 37 C.F.R. §2.145(d)(2), one day is added to any two-month period that includes February 28.

Under 37 C.F.R. §2.186(c), a decision on petition is necessary before the registrant can file an appeal or commence a civil action in any court.

## **1606.15 Section 9 Renewal Application Combined with Affidavit or Declaration of Use or Excusable Nonuse**

A §9 renewal application and a §8 affidavit or declaration may be combined into a single document, if the document meets the requirements of both §§8 and 9 of the Act. 37 C.F.R. §2.166. *See* [TMEP §1604.19](#) for further information about combined filings under §§8 and 9.

## **1607 Cancellation of Registrations Under §§14 and 37 of the Trademark Act**

A petition to cancel a registration owned by another party may be filed with the Trademark Trial and Appeal Board under §14 of the Trademark Act, 15 U.S.C. §1064. *See* TBMP §§303, 307, 308, and 309, for the requirements and fees for filing a petition to cancel a registration. The cancellation petition can be filed through the Electronic System for Trademark Trials and Appeals (“ESTTA”) at <http://estta.uspto.gov/> .

*See* [TMEP §1608](#) regarding the voluntary surrender of one’s own registration for cancellation.

Registrations can also be cancelled under §37 of the Trademark Act, 15 U.S.C. §1119, pursuant to the final order of the court in an action involving a registered mark. The party who has prevailed in the civil action must submit a certified copy of the court order or decree to the Office of the Solicitor of the USPTO. See [TMEP §1610](#).

## **1608 Surrender of Registration for Cancellation**

The owner of a registration may voluntarily surrender his or her registration for cancellation, under §7(e) of the Trademark Act, 15 U.S.C. §1057(e). There is no fee.

A request to surrender a registration must be signed by the individual owner, someone with legal authority to bind a juristic owner (e.g., a corporate officer or general partner of a partnership), or a qualified practitioner. 37 C.F.R. §2.172. In the case of joint owners who are not represented by a qualified practitioner, all must sign. 37 C.F.R. §2.193(e)(6).

Filing a §8 affidavit or declaration, §71 affidavit or declaration, or §9 renewal application for fewer than the total number of classes in the registration is regarded as a surrender of the registration as to the class(es) that are omitted.

Unless the registration is the subject of a cancellation proceeding before the Trademark Trial and Appeal Board, a request for surrender is handled by the Post Registration Section. See TBMP §602.02(a) as to the voluntary surrender of a registration that is the subject of a cancellation proceeding before the Board; see also *Christiane E, LLC v. Int'l Expeditions, Inc.*, 106 USPQ2d 2042 (TTAB 2013) (finding that registrant's situation was not so extraordinary as to warrant a withdrawal of registrant's voluntary surrender of its registration).

If the registration is surrendered in its entirety, the USPTO updates its records accordingly, and sends the owner of record a notice that the registration is cancelled.

If fewer than all classes are surrendered, the USPTO enters a notation in the record, and updates the Trademark database to indicate that specified classes have been cancelled under §7(e) of the Act. A certified copy of the updated registration certificate may be obtained from the Document Services Branch of the Public Records Division for a fee. See [TMEP §111](#).

A request to surrender a registered extension of protection of an international registration to the United States may be filed either directly with the IB or with the USPTO. If it is filed with the USPTO, the USPTO will notify the IB of the cancellation of the request for extension of protection to the United States. See [TMEP §§1906.01 et seq.](#) regarding requests to record changes at the IB, and [TMEP §1906.01\(e\)](#) regarding renunciation, limitation, or cancellation of an international registration.

## **1609 Amendment and Correction of Registrations**

### **1609.01 Amendment of Registration - In General**

#### **1609.01(a) Limited Amendments to Registered Extension of Protection**

An extension of protection of an international registration remains part of (and dependent on) the international registration even after registration in the United States. 15 U.S.C. §1141j; 37 C.F.R. §7.30; [TMEP](#)

[§§1601.01\(c\)](#) and [1904.08](#) . All requests to record changes to an international registration must be filed at the IB.

Accordingly, the holder of a registered extension of protection may file a request for amendment under §7 of the Trademark Act with the USPTO only in limited circumstances, where the change will affect only the extension of protection to the United States. For example, a holder may request to amend the registered extension of protection to add a voluntary disclaimer, to amend the translation of the mark that was provided during examination in the USPTO, or to limit or partially surrender goods/services/classes. If the USPTO grants the §7 request, the USPTO will notify the IB of the change to the extension of protection to the United States.

The USPTO will not accept an amendment of a registered extension of protection involving the holder's name or address that has not been recorded with the IB. 37 C.F.R. §7.22; [TMEP §1906.01\(c\)](#) .

The mark in a registered extension of protection cannot be amended. See [TMEP §§1609.02](#) and [1906.01\(i\)](#) .

See [TMEP §§1904.13](#) *et seq.* regarding amendment and correction of registered extensions of protection, and [1906.01](#) *et seq.* regarding requests to record changes at the IB.

### **1609.01(b) Amendment of Registration Resulting from §1 or §44 Application**

Under §7(e) of the Trademark Act, a registration based on an application under §1 or §44 of the Trademark Act may be amended “for good cause.” Any request for amendment of a mark must be accompanied by the required fee. 15 U.S.C. §1057(e); 37 C.F.R. §§2.6 and 2.173(b)(1). Original certificates of registration are not required for requests for amendment under §7, and owners are strongly discouraged from submitting them. If original certificates are submitted, they will be scanned into TICRS and discarded. *See* notice at [69 FR 51362](#) (Aug. 19, 2004), removing the requirement that a section 7 request include the original certificate.

The request for amendment must be signed and verified (sworn to) or supported by a declaration under 37 C.F.R. §2.20 by the individual owner of the registration, someone with legal authority to bind a juristic owner (e.g., a corporate officer or general partner of a partnership), or a qualified practitioner. 37 C.F.R. §2.173(b)(2). In the case of joint owners who are not represented by a qualified practitioner, all must sign. 37 C.F.R. §2.193(e)(6). See [TMEP §§611.06](#) *et seq.* for guidelines on persons with legal authority to bind various types of juristic entities, and [TMEP §§602](#) *et seq.* regarding persons who are qualified to represent others before the USPTO in trademark cases.

Requests to amend registrations are handled by the Post Registration Section, unless the registration is the subject of an inter partes proceeding before the Trademark Trial and Appeal Board. 37 C.F.R. §2.173(a).

Requests to amend registrations that are the subject of inter partes proceedings before the Trademark Trial and Appeal Board are handled by the Board. *See* 37 C.F.R. §2.133; TBMP §§514 *et seq.* If a request to amend a registration that is the subject of an inter partes proceeding is filed with the Post Registration Section, the Post Registration staff will deny the request, and advise the owner to file a motion to amend pursuant to 37 C.F.R. §2.133. *See* TBMP §§502 *et seq.* for further information about filing motions with the Board.

If the request for amendment is granted, the USPTO sends an updated registration certificate showing the amendment to the owner of record, and updates USPTO records accordingly.

## 1609.02 Amendment of Mark

### *Mark in Registered Extension of Protection Cannot be Amended*

The holder of a registered extension of protection of an international registration to the United States cannot file a request to amend the mark under §7 of the Trademark Act. A registered extension of protection remains part of the international registration, and all requests to record changes to such a registration must be filed at the IB. However, the Madrid Protocol and the *Common Regulations Under the Madrid Agreement Concerning the International Registration of Marks and the Protocol Relating to That Agreement* (“Common Regs.”) do not permit amendment of the mark in an international registration. If the holder of the international registration wants to change the mark in any way, even slightly, the holder must file a new international application. The IB’s *Guide to the International Registration of Marks under the Madrid Agreement and the Madrid Protocol* (2008) (“*Guide to International Registration*”), Para. B.II.72.02, provides as follows:

[T]here is no provision for a mark that is recorded in the International Register to be amended in any way, either on renewal or at any other time. If the holder wishes to protect the mark in a form which differs, even slightly, from the mark as recorded, he must file a new international application. This is true even if the mark has been allowed to be changed in the basic application, the registration resulting from the basic application or the basic registration....

Therefore, the mark in a registered extension of protection cannot be amended.

Although the mark in a registered extension of protection cannot be amended, in some situations the holder of a registered extension of protection may file a request under §7 of the Trademark Act to add a standard character claim. If the international registration does not indicate that the mark is in standard characters, and the holder seeks to amend the registered extension of protection to add a standard character claim, the Post Registration staff must contact the Supervisor of the Madrid Processing Unit (“MPU”) via e-mail for instructions on how to proceed. The holder may not add a standard character claim unless the mark meets the United States requirements for a standard character claim, as set forth in 37 C.F.R. §2.52(a). See TMEP §§ [807.03\(a\)-\(b\)](#) .

### *Amendment of Mark in Registration Based on §1 or §44 Application*

Under 15 U.S.C. §1057(e), upon application by the owner and payment of the prescribed fee, a registration based on an application under §1 or §44 of the Trademark Act may be amended for good cause, if the amendment does not materially alter the character of the mark. 37 C.F.R. §2.173(d). See TMEP §§ [807.14 et seq.](#) and [1609.02\(a\)](#) regarding material alteration.

## 1609.02(a) Determining What Constitutes Material Alteration of Mark

Section 7(e) of the Trademark Act, 15 U.S.C. §1057(e), prohibits an amendment that materially alters the character of the mark. “Material alteration” is the standard for evaluating amendments to marks at all relevant stages of processing, both during examination of the application and after registration. See 37 C.F.R. §§2.72 and 2.173(d); [TMEP §§807.14 et seq.](#)

In determining whether a proposed amendment is a material alteration of a registered mark, the USPTO will always compare the proposed amendment to the mark *as originally registered*.

The general test of whether an alteration is material is whether, if the mark in an application for registration had been published, the change would require republication in order to present the mark fairly for purposes of opposition. If republication would be required, the amendment is a material alteration.

An amendment of a registered mark is acceptable if the modified mark contains the essence of the original mark (i.e., the mark as originally registered), and the mark as amended creates essentially the same impression as the original mark. *In re Umax Data System, Inc.*, 40 USPQ2d 1539 (Comm'r Pats. 1996). For example, in marks consisting of wording combined with a design, if the word is the essence of the mark and the design is merely background embellishment or display that is not integrated into the mark in any significant way, the removal or change of the design will not be a material alteration of the mark. *See Ex parte Petersen & Pegau Baking Co.*, 100 USPQ 20 (Comm'r Pats. 1953). On the other hand, if a design is integrated into a mark and is a distinctive feature necessary for recognition of the mark, then a change in the design would materially alter the mark. *See In re Dillard Department Stores, Inc.*, 33 USPQ2d 1052 (Comm'r Pats. 1993) (proposed deletion of highly stylized display features of mark "IN•VEST•MENTS" held to be a material alteration); *Ex parte Kadane-Brown, Inc.*, 79 USPQ 307 (Comm'r Pats. 1948) (proposed amendment of "BLUE BONNET" mark to delete a star design and to change the picture of the girl held a material alteration).

When a mark is solely a picture or design, an alteration must be evaluated by determining whether the new form has the same commercial impression as the original mark, i.e., whether the form as altered would be likely to be recognized as the same mark. *See Ex parte Black & Decker Mfg. Co.*, 136 USPQ 379 (Comm'r Pats. 1963) (proposed amendment to delete circle found to be a material alteration, where the circle was determined to be a prominent element of a design mark).

Marks entirely comprised of words can sometimes be varied as to their style of lettering, size, and other elements of form without resulting in a material alteration of the mark. *See Ex parte Squire Dingee Co.*, 81 USPQ 258, *recon. denied*, 81 USPQ 543 (Comm'r Pats. 1949) (amendment from block lettering to script not a material alteration). However, changing from special form to standard characters, or the reverse, may be a material alteration. [TMEP §807.03\(d\)](#).

A generic or purely informational term may be deleted if the essence of the mark in appearance or meaning is not changed, but a word or feature that is necessary to the significance of the mark may not be deleted.

Likewise, a unique or prominent design feature may not be deleted. *See In re Richards-Wilcox Mfg. Co.*, 181 USPQ 735 (Comm'r Pats. 1974), *overruled on other grounds*, *In re Umax Data System, Inc.*, 40 USPQ2d 1539 (Comm'r Pats. 1996) (proposed amendment to block lettering from mark comprising a diamond design surrounding the word "FYER-WALL" with an inverted channel bracket around the letters

“RW” held a material alteration). See also [TMEP §807.14\(a\)](#) regarding amendments deleting matter from a mark.

### **1609.02(b) New Drawing Required**

When applying for an amendment to a registration that involves a change in the mark, the owner of the registration must submit a new drawing displaying the amended mark. 37 C.F.R. §2.173(b)(3). See [TMEP §§807](#) *et seq.* regarding drawings.

### **1609.02(c) Supporting Specimens and Declaration**

The owner of the registration must submit a specimen showing use of the proposed mark as amended for each class of goods or services specified in the registration, and must include an affidavit or a declaration under 37 C.F.R. §2.20 stating that the specimen was in use in commerce at least as early as the date the §7 amendment was filed. 37 C.F.R. §2.173(b)(3). When requested by the USPTO, additional specimens must be provided. *Id.* If a single specimen supports multiple classes, the owner may so indicate by specifying which classes the specimen supports, and the Post Registration staff need not require multiple copies of the specimen. The Post Registration staff should make a Note to the File in the record indicating which classes the specimen supports.

A request to amend a registration under §7 must be signed and verified (sworn to) or supported by a declaration under 37 C.F.R. §2.20 by the individual owner of the registration, someone with legal authority to bind a juristic owner (e.g., a corporate officer or general partner of a partnership), or a qualified practitioner.

37 C.F.R. §2.173(b)(2); [TMEP §§611.03\(f\)](#) and [1609.01\(b\)](#). In the case of joint owners who are not represented by a qualified practitioner, all must sign. 37 C.F.R. §2.193(e)(6). If the affidavit or a declaration supporting use of the substitute specimen(s) is submitted in a separate document, it must be signed by a person properly authorized to sign a verification on behalf of the owner. See [TMEP §611.03\(a\)](#) as to persons properly authorized to verify facts on behalf of an owner.

One specimen per class showing use of the proposed mark as amended on or in connection with the goods or services is required, even if the mark originally registered based on a foreign registration under §44 of the Trademark Act, 15 U.S.C. §1126(e) or an extension of protection of an international registration to the United States under §66(a) of the Trademark Act, 15 U.S.C. §1141f(a). See [TMEP §1015](#) regarding the independence of a §44 registration from the underlying foreign registration.

Sometimes, it may be necessary for the USPTO to request additional information in order to properly examine the amendment. In such cases, the USPTO will require the owner to furnish such additional information, specimens, exhibits, and affidavits or declarations as may be reasonably necessary to the proper examination of the §7 amendment. 37 C.F.R. §2.173(b)(4).

See also [TMEP §§904](#) *et seq.* regarding specimens.

### **1609.02(d) Conforming Amendments**

If a registration includes a disclaimer, description of the mark, and/or other miscellaneous statement (e.g., lining or stippling statement ( *see* [TMEP §808.01\(b\)](#) ), translation, transliteration, or color claim), any request to amend the registration must also include a request to make any necessary conforming amendments to the disclaimer, description, and/or miscellaneous statement. 37 C.F.R. §2.173(f). For example, if the mark is “XYZ INC.,” with a disclaimer of the entity designator “INC.,” and the owner of the registration

proposes to amend the mark to remove “INC.,” the proposed amendment should also request that the disclaimer be deleted.

If a proposed amendment does not include all necessary conforming amendment(s), the Post Registration staff will issue an Office action requiring the amendment(s).

### **1609.02(e) Amendment of Black-and-White Drawing of Mark for Which Color is Claimed to Substitute Color Drawing**

Prior to November 2, 2003, the USPTO did not publish marks or issue registrations in color. An applicant who wanted to show color in a mark was required to submit a black-and-white drawing, with a statement describing the color(s). See [TMEP §807.07\(g\)](#). Effective November 2, 2003, the USPTO accepts color drawings. Black-and-white drawings with a color claim, or drawings that show color by use of lining patterns, are no longer permitted. Color drawings must be accompanied by a color claim naming the color(s) that are a feature of the mark, and a separate statement specifying where the color(s) appear(s) on the mark. 37 C.F.R. §2.52(b)(1); [TMEP §§807.07\(a\)](#) *et seq.*

In a registration based on an application filed before November 2, 2003, if the application included a black-and-white drawing with a statement claiming color, the owner may file a request under §7 of the Trademark Act to substitute a color drawing for the black-and-white drawing. The request must include: (1) a color drawing showing the same colors claimed in the registration; (2) a color claim naming the color(s) that are a feature of the mark; (3) a description of where the color(s) appear(s) in the mark; and (4) the fee required by 37 C.F.R. §2.6. 37 C.F.R. §2.173(a). No specimen is required if the owner is merely substituting a color drawing for a legally equivalent black-and-white drawing, and is not amending the mark.

### **1609.02(f) Amendment of Black-and-White Drawing to Color Drawing**

A special form drawing registered in black-and-white may be amended under §7(e) to include a claim of color, as long as the amendment does not constitute a material alteration. Requests to amend the mark to color must include: (1) a color drawing; (2) a color claim naming the color(s) that are a feature of the mark; (3) a statement specifying where the color(s) appear(s) in the mark; (4) a specimen showing the mark as depicted on the amended drawing; and (5) the fee required by 37 C.F.R. §2.6. 37 C.F.R. §2.173(b)(2). See [TMEP §§807.07](#) *et seq.* regarding requirements for color drawings, and [TMEP §§807.14\(e\)](#) *et seq.* regarding amendments to color features of marks.

### **1609.02(g) Amendment to Special Form Drawing Containing Black, White, and/or Gray**

When a mark shown in special form is amended under §7(e), and the mark shown on the new drawing page contains gray, or the description of the mark refers to black, white, and/or gray, the owner must clarify whether the mark is in color. Specifically, the record must contain either: (1) a statement that the mark is not in color; or (2) a statement that the colors black, white, and/or gray are features of the mark and a statement specifying the location of the colors. If not all are claimed as colors, the color location statement must specify that the black/white/gray is not claimed as color and represents background, outlining, shading, and/or transparent areas.

Likewise, if the §7(e) amendment includes a statement that color is claimed as a feature of the mark and the drawing contains black, white, and/or gray, the record must contain one of the following: (1) a statement that the color(s) black, white, and/or gray are features of the mark and statement specifying the location of the colors; or (2) a statement that the black/white/gray represents background, outlining, shading, and/or

transparent areas and is not a part of the mark. No statement regarding a white background is required if the background of the drawing is white and it is clear that the white background is not part of the mark.

See [TMEP §§807.07\(f\)](#) *et seq.* regarding requirements for drawings containing black, white, and/or gray.

### 1609.03 Amendment of Identification of Goods or Services

#### *Identification of Goods/Services in Registered Extension of Protection*

The identification of goods/services in a registered extension of protection of an international registration to the United States can be amended only in limited circumstances that will affect only the extension of protection to the United States. [TMEP §1609.01\(a\)](#). Specifically, the holder of a registered extension of protection may file a request with the USPTO to amend the registered extension of protection to limit or partially surrender goods and/or services. If the USPTO grants the §7 request, the USPTO will notify the IB of the change to the extension of protection to the United States. See [TMEP §1904.13\(a\)](#).

All requests to record changes to an international registration must be filed at the IB. See [TMEP §§1906.01 et seq.](#) regarding requests to record changes at the IB. Note that the IB does not permit amendments that expand the list of goods/services in an international registration. See [TMEP §1906.01\(i\)](#).

See also [TMEP §1904.15](#) regarding a notification of limitation in the list of goods/services in a registered extension of protection

#### *Amendment of Registration Based on §1 or §44 Application*

In registrations based on applications under §§1 and 44 of the Trademark Act, amendments may be made to the identification of goods/services to restrict the identification or otherwise to change it in ways that would not require republication of the mark. However, goods/services may not be added to a registration by amendment. See 37 C.F.R. §2.173(e). Changed circumstances (e.g., new technology) will not render acceptable an amendment that is not otherwise permissible. See *In re Capp Enterprises, Inc.*, 32 USPQ2d 1855 (Comm'r Pats. 1993); *In re Fortex Industries, Inc.*, 18 USPQ2d 1224 (Comm'r Pats. 1990); *In re Carter Hawley Hale Stores, Inc.*, 200 USPQ 179 (Comm'r Pats. 1978). For example, if the goods in the registration are identified as “phonograph records,” the identification of goods cannot be amended to “compact discs.”

In a multiple-class registration, deletion of less than all the goods or services in a single class constitutes an amendment, whereas deletion of an entire class constitutes a surrender of the registration for cancellation as to the class deleted. See 37 C.F.R. §2.172. See [TMEP §1608](#) regarding surrender.

### 1609.04 Amendment of Classification

#### *Classification of Goods/Services in Registered Extension of Protection Cannot be Amended Under §7*

The classification of goods/services in a registered extension of protection of an international registration to the United States cannot be amended under §7 of the Trademark Act. 37 C.F.R. §2.85(d); [TMEP §§1401.03\(d\)](#) and [1609.01\(a\)](#). However, the holder of a registered extension of protection may request to amend the registered extension of protection to surrender class(es). See [TMEP §1904.13\(a\)](#).

#### *Amendment of Registration Based on §1 or §44 Application*

In a registration that issued based on an application under §1 or §44 of the Trademark Act, the classification of the goods/services may be amended under §7 of the Trademark Act, if the requested international classification is consistent with the current version of the *Nice Agreement*. 37 C.F.R. §2.85(e)(3). In such a case, the USPTO will amend the international classification of goods/services and issue an updated registration certificate with the new classification noted.

The owner of a registration may reclassify registrations from multiple United States classes into a single international classification. For example, goods in United States classes 21 and 26 often fall into only International Class 9. Hence, an owner can request an amendment from United States classes 21 and 26 into International Class 9. If the owner reclassifies any of the goods/services in this manner, the owner must reclassify all the goods/services in the registration to the international classification system. 37 C.F.R. §2.85(e)(3).

The amendment must include the fee required by 37 C.F.R. §2.6 for §7 amendments.

### 1609.05 Disclaimer of Mark

A registered mark may be amended to disclaim part of the mark. 37 C.F.R. §2.173(a). However, no amendment seeking the elimination of a disclaimer will be permitted, unless deletion of the disclaimed portion of the mark is also sought. 37 C.F.R. §2.173(g). This exception to the general prohibition against amendments to delete disclaimers applies in the limited situation where the mark is amended to delete the disclaimed matter. See [TMEP §1609.02\(d\)](#) regarding conforming amendments.

An amended registration must still contain registrable matter, and the mark as amended must be registrable as a whole. 37 C.F.R. §2.173(c).

### 1609.06 Territorial Restrictions

A registration cannot be restricted territorially by amendment under §7(e) of the Act. *In re Forbo*, 4 USPQ2d 1415 (Comm'r Pats. 1984). Generally, a concurrent use restriction cannot be removed from a registration by an amendment under §7(e), except where an entity that was the *only* exception to the owner's right to exclusive use of its registered mark assigns its rights in the mark to the owner of the registration, so that all rights in the mark are merged in the owner. *In re Alfred Dunhill Ltd.*, 4 USPQ2d 1383 (Comm'r Pats. 1987); TBMP §§1101.02 and 1114.

### 1609.07 Dates of Use

The USPTO will accept a correction request changing the dates of use, even if the corrected dates are later than the dates originally set forth in the registration. *See In re Pamex Foods, Inc.*, 209 USPQ 275 (Comm'r Pats. 1980); *Grand Bag & Paper Co. v. Tidy-House Paper Products, Inc.*, 109 USPQ 395 (Comm'r Pats. 1956). However, the USPTO will not enter a correction if the corrected dates are later than the dates that would have been accepted during examination. Therefore, the USPTO will not enter the following corrections:

- If the application for the registration was based on use in commerce under 15 U.S.C. §1051(a), the registration cannot be corrected to specify a date of use that is later than the application filing date ( *see* 37 C.F.R. §2.71(c)(1));
- If the application for the registration was based on intent-to-use under 15 U.S.C. §1051(b) in which a statement of use was filed under 15 U.S.C. §1051(d), the registration cannot be corrected to specify a date of use that is later than the statutory deadline for filing the statement of use (i.e., within six

months of the issuance date of the notice of allowance or before the expiration of an extension of time for filing a statement of use) ( *see* 37 C.F.R. §2.71(c)(2));

- If the application for the registration was based on intent-to-use under 15 U.S.C. §1051(b) in which an amendment to allege use was filed under 15 U.S.C. §1051(c), the registration cannot be corrected to specify a date of use that is later than the filing date of the amendment to allege use ( *see* [TMEP §903.04](#) ); and
- The date of first use in commerce may not be earlier than the date of first use anywhere ( *see* [TMEP §903.03](#) ).

### **1609.08 Effect of Amendment of Registration on Limitation of Grounds for Cancellation of a Registration**

Section 14 of the Trademark Act, 15 U.S.C. §1064, limits the grounds that a third party can raise in a petition to cancel a mark registered on the Principal Register when the petition is filed more than five years after the date of registration.

Ordinarily, the five-year period runs from the date of the registration of the mark for a registration issued on the Principal Register under the Act of 1946, and from the date of publication under §12(c) of the Act for registrations issued under prior Acts and published under §12(c) of the Act of 1946, 15 U.S.C. §1062(c).

However, when a registration has been amended, the five-year period runs from the date of the amendment, to the extent that the amendment of the registration has in any way enlarged the owner's rights, as though the registration had issued on the date of the amendment. *See* TBMP §307.02(c)(2).

### **1609.09 Amendment from Supplemental to Principal Register Not Permitted**

A registration on the Supplemental Register may not be amended to the Principal Register. If the owner of a registration wishes to seek registration on the Principal Register of a mark for which it owns a registration on the Supplemental Register, the owner must file a new application. Under 15 U.S.C. §1062(a), a mark must be published for opposition before it can be registered on the Principal Register.

### **1609.10 Correction of Mistake in Registration**

The USPTO may make a correction to a registration in appropriate cases, upon written request by the owner of the registration. *See* §7(g) of the Trademark Act, 37 C.F.R. §2.174, and [TMEP §1609.10\(a\)](#) regarding correction of USPTO errors; and §7(h) of the Act, 37 C.F.R. §2.175, and [TMEP §1609.10\(b\)](#) regarding correction of errors by the owner of a registration. Original certificates of registration need not be submitted with requests for correction under §7, and owners are strongly discouraged from submitting them. If original certificates are submitted, they will be scanned into TIGRS and discarded. *See* notice at [69 FR 51362](#) (Aug. 19, 2004), removing the requirement that a section 7 request include the original certificate.

Requests for correction of registrations are handled by the Post Registration Section.

If the request for correction is granted, the USPTO sends an updated registration certificate to the owner of record, and updates USPTO records to show the correction.

### **1609.10(a) Correction of USPTO Error**

#### *Registered Extension of Protection*

If USPTO records show that a clerical error occurred through the fault of the USPTO, the USPTO will correct the error without charge. See [TMEP §1904.14](#) regarding a notification of correction in the international register with respect to a registered extension of protection.

#### *Registration Based on Application under §1 or §44*

If a clerical error occurred through the fault of the USPTO, the USPTO will correct the error without charge. 15 U.S.C. §1057(g); 37 C.F.R. §2.174. Section 7(g) gives the Director the discretion to issue a certificate of correction of the existing registration, or to issue a new certificate of registration without charge.

The owner of the registration should submit a written request, specifying the error to be corrected. This request should be signed by the individual owner of the registration, someone with legal authority to bind a juristic owner (e.g., a corporate officer or general partner of a partnership), or the owner's qualified practitioner, and directed to the Post Registration Section.

The USPTO will issue a certificate of correction if the change is non-material, such as a slight misspelling in the mark or the identification of goods/services, or an error in entering the owner's name or address.

A USPTO error in classification may be corrected if the requested classification is consistent with the current version of the *Nice Agreement*. Republication is not required.

If correction of a USPTO error would result in a material change such that republication is required (e.g., a material change of the mark because the wrong mark published or a broadening of the identification of goods/services because goods/services were deleted in error), the USPTO will not issue a certificate of correction under §7(g). Section 12(a) of the Trademark Act, 15 U.S.C. §1062(a), requires examination and publication prior to registration. Therefore, the error can be corrected only by canceling the registration as inadvertently issued and republishing the mark with the correct information. Depending on the circumstances, the USPTO may give the owner the option of either: (1) keeping the registration as issued; or (2) having the registration cancelled as inadvertently issued and republishing the mark. If the mark is republished, and registration is not successfully opposed, the USPTO will issue a new certificate of registration with a new registration date.

In some cases, further examination may be required to correct a USPTO error that would materially change the registration, e.g., where a proposed amendment to the mark or the identification of goods/services was filed prior to registration, but not timely made of record and reviewed by the examining attorney. In this situation, the registration will be cancelled as inadvertently issued and the application will be returned to examination. The examining attorney will examine the amendment using standard examination procedures.

If the examining attorney approves the amendment, the mark will be republished. If the amendment is not acceptable, the examining attorney will issue a non-final Office action with a six-month response clause.

A request to have a registration cancelled as inadvertently issued should be directed to the Office of the Deputy Commissioner for Trademark Examination Policy.

## **1609.10(b) Correction of Owner's Error**

### *Registered Extension of Protection*

Generally, all requests to record changes to an international registration must be filed at the IB, because an extension of protection of an international registration remains part of the international registration even after registration in the United States. However, in the limited circumstance where the holder of an international registration makes a mistake in a document filed during prosecution in the USPTO that affects only the extension of protection to the United States, the registrant may request correction of the error pursuant to 37 C.F.R. §2.175. See [TMEP §1904.13\(b\)](#).

See [TMEP §§1906](#) and [1906.01](#) *et seq.* regarding requests to record changes at the IB, and [TMEP §1904.14](#) regarding a notification of correction in the International Register with respect to a registered extension of protection.

### *Registration Based on Application under §1 or §44*

Under §7(h) of the Trademark Act, 15 U.S.C. §1057(h), if a mistake in a registration occurs in good faith through the fault of the owner of the registration, the Director may correct the error upon written request and payment of the fee required by 37 C.F.R. §2.6, *provided* the correction does not result in a change that would require republication of the mark.

The owner of the registration must file a written request specifying the error, explaining how the error occurred, and showing that it occurred in good faith. 37 C.F.R. §2.175(b)(1). The request must be signed and verified or supported by a declaration under 37 C.F.R. §2.20 by the individual owner, someone with legal authority to bind a juristic owner (e.g., a corporate officer or general partner of a partnership), or a qualified practitioner. 37 C.F.R. §2.175(b)(2). In the case of joint owners who are not represented by a qualified practitioner, all must sign. 37 C.F.R. §2.193(e)(6). The request for correction should be directed to the Post Registration Section. See [TMEP §§611.06](#) *et seq.* for guidelines on persons with legal authority to bind various types of juristic entities, and [TMEP §§602](#) *et seq.* regarding persons who are qualified to represent others before the USPTO in trademark cases.

As noted above, the owner of a registration cannot correct a mistake if the changes would require republication of the mark. 15 U.S.C. §1057(h); 37 C.F.R. §2.175(a). Thus, a correction cannot be made if it would materially alter the mark, or broaden the identification of goods/services. See [TMEP §§807.14](#) and [1609.02\(a\)](#) regarding material alteration, and [TMEP §1609.03](#) regarding changes to the identification of goods/services.

A registration can be corrected to cure an inadvertent error in the manner in which the owner's name is set forth. However, the registration cannot be corrected to substitute another entity as the owner. See [TMEP §1201.02\(c\)](#) for examples of correctable and non-correctable errors in identifying the owner of an application or registration.

Section 7(h) gives the Director the discretion to issue either a certificate of correction of the existing registration or a new certificate of registration. See *In re Pamex Foods, Inc.*, 209 USPQ 275, 277-78

(Comm'r Pats. 1980). In either case, if the mistake was made by the owner of the registration, a fee is required. See 15 U.S.C. §1057(h); 37 C.F.R. §§2.6 and 2.175(b)(3).

### **1609.11 Change of Owner's Address Can Be Filed Through TEAS**

It is not necessary to file a §7 amendment to change the address of the owner of a registration. This can be done through TEAS, at <http://www.uspto.gov>.

*Note: The owner's address often differs from the correspondence address. The correspondence address can also be changed through TEAS, using a different form. See [TMEP §609.02\(e\)](#) for information about changing the correspondence address after registration.*

### **1610 Court Orders Concerning Registrations**

The USPTO must rectify the register and make appropriate entry upon its records in response to a court order certified to the USPTO pursuant to 15 U.S.C. §1119. That section provides:

In any action involving a registered mark the court may determine the right to registration, order the cancellation of registrations, in whole or in part, restore cancelled registrations, and otherwise rectify the register with respect to the registrations of any party to the action. Decrees and orders shall be certified by the court to the Director, who shall make appropriate entry upon the records of the Patent and Trademark Office, and shall be controlled thereby.

Any such order affecting a registration must be *certified* to the USPTO, and should be addressed to the Office of the Solicitor, Mail Stop 8, Director of the United States Patent and Trademark Office, P.O. Box 1450, Alexandria, Virginia 22313-1450. 37 C.F.R. §1.1(a)(3)(iii). An uncertified copy of the court order is unacceptable. If the registration affected by the order is the subject of a pending or suspended inter partes proceeding at the Trademark Trial and Appeal Board, that fact should be noted in a cover letter to the Office of the Solicitor. Once the USPTO receives the certified order, appropriate action will typically be taken by the USPTO without the necessity of any submission by an interested party. However, if it would be helpful for purposes of determining the scope or effect of an order, the USPTO may, at the Director's discretion, issue a show cause order directing the registrant and parties to the action from which the order arose to respond and provide information or arguments regarding the order.

### **1611 Updating Automated Records to Show the Status of Registrations**

USPTO records will be automatically updated to indicate the status of registrations as follows:

- (1) When the owner of a registration timely files a §8 or §71 affidavit or declaration and/or §9 renewal application, USPTO records are updated to indicate receipt of the document and the action taken on it. This information appears in the Trademark database.
- (2) If no §8 or §71 affidavit or declaration is filed before the end of the grace period (see [TMEP §§1604.04](#) and [1613.04](#) regarding the deadlines for filing §8 and §71 affidavits or declarations), USPTO records are automatically updated to indicate that the registration is cancelled, and this information appears in the Trademark database. However, USPTO records are not updated to show that the registration is cancelled until 30 days *after* the expiration of the grace period.
- (3) If no §9 renewal application is filed before the end of the grace period (see [TMEP §1606.03](#) regarding the deadline for filing a renewal application), USPTO records are automatically updated to indicate

that the registration is expired, and this information appears in the Trademark database. However, USPTO records are not updated to show that the registration is expired until 30 days *after* the expiration of the grace period.

The reason the USPTO waits until 30 days *after* the expiration of the grace period before updating its records to show that the registration is cancelled or expired is to avoid inadvertent cancellation or expiration of a registration due to a delay in entering a timely filed §8 or §71 affidavit or declaration or §9 renewal application into USPTO records. If an examining attorney determines that 30 days have passed since the expiration of the grace period, but the Trademark database does not indicate that the registration is cancelled or expired, the examining attorney should contact the Supervisor of the Post Registration Section and request that the database be updated to show that the registration is cancelled or expired. If a party other than the examining attorney determines that 30 days have passed since the expiration of the grace period, but the Trademark database does not indicate that the registration is cancelled or expired, the party should contact the Trademark Assistance Center at (571) 272-9250 or (800) 786-9199 and request that the database be updated to show that the registration is cancelled or expired.

If the owner of a registration who has not timely filed a §8 or §71 affidavit or declaration or §9 renewal application wants to expedite cancellation or expiration of its own registration, the owner may request in writing that the USPTO expedite the processing of the cancellation or expiration of the registration. The request should be signed by the owner, someone with legal authority to bind the owner (e.g., a corporate officer or general partner of a partnership), or a qualified practitioner, and should specifically state that no §8 affidavit or declaration, §71 affidavit or declaration, or §9 renewal application was filed on or before the end of the grace period. Such a request should be directed to the Post Registration Section; if it is sent to the examining attorney, the examining attorney should forward it to the Supervisor of the Post Registration Section.

See [TMEP §716.02\(e\)](#) regarding suspension of an application for a conflicting mark pending cancellation of the cited registration under §8 or §71 of the Act or expiration of the cited registration for failure to renew under §9 of the Act.

## **1612 Powers of Attorney and Designations of Domestic Representative Filed After Registration**

To expedite processing, the USPTO recommends that powers of attorney, requests to revoke powers of attorney, requests to withdraw as attorney, and designations of domestic representative be filed through TEAS, at <http://www.uspto.gov>. When these documents are filed through TEAS, the data is automatically entered into the Trademark database.

The USPTO considers a power of attorney filed after registration to end when the mark is cancelled or expired or when ownership changes. See [TMEP §604.02](#).

When the owner of a registration files a new power of attorney or designation of domestic representative *on paper*, the USPTO scans an image of the power or designation into the record, but does not update the Trademark database unless the owner concurrently takes an action such as filing a §8, §12(c), §15, or §71 affidavit or declaration, §9 renewal application, or request to amend or correct a registration under §7 of the Trademark Act. Likewise, when the owner of a registration files a *paper* request to revoke a power of attorney, or a qualified practitioner files a request to withdraw, the USPTO scans an image of the document into the record but does not change the “Attorney” field in the Trademark database.

When the owner of a registration files a §8, §12(c), §15, or §71 affidavit or declaration, §9 renewal application, or request to amend or correct a registration through a qualified practitioner, the USPTO will update the Trademark database to indicate the name of the practitioner who filed the document, and any designation of domestic representative. If the owner does not have a qualified practitioner, the USPTO will update the Trademark database to indicate the owner's address as shown in the affidavit or declaration, renewal application, or amendment.

See [TMEP §605.04](#) regarding powers of attorney filed after registration, [TMEP §610](#) regarding designations of domestic representative by parties not domiciled in the United States, [TMEP §607](#) regarding withdrawal of attorney, and [TMEP §609.02\(e\)](#) regarding changes of correspondence address filed after registration.

## 1613 Affidavit or Declaration of Use in Commerce or Excusable Nonuse Under §71 of the Trademark Act

*15 U.S.C. §1141k Duration, affidavits and fees.*

(a) Time Periods for Required Affidavits. Each extension of protection for which a certificate has been issued under section 69 shall remain in force for the term of the international registration upon which it is based, except that the extension of protection of any mark shall be canceled by the Director unless the holder of the international registration files in the United States Patent and Trademark Office affidavits that meet the requirements of subsection (b), within the following time periods:

(1) Within the 1-year period immediately preceding the expiration of 6 years following the date of issuance of the certificate of extension of protection.

(2) Within the 1-year period immediately preceding the expiration of 10 years following the date of issuance of the certificate of extension of protection, and each successive 10-year period following the date of issuance of the certificate of extension of protection.

(3) The holder may file the affidavit required under this section within a grace period of 6 months after the end of the applicable time period established in paragraph (1) or (2), together with the fee described in subsection (b) and the additional grace period surcharge prescribed by the Director.

(b) Requirements for Affidavit. The affidavit referred to in subsection (a) shall—

(1)(A) state that the mark is in use in commerce;

(B) set forth the goods and services recited in the extension of protection on or in connection with which the mark is in use in commerce;

(C) be accompanied by such number of specimens or facsimiles showing current use of the mark in commerce as may be required by the Director; and

(D) be accompanied by the fee prescribed by the Director; or

(2)(A) set forth the goods and services recited in the extension of protection on or in connection with which the mark is not in use in commerce;

(B) include a showing that any nonuse is due to special circumstances which excuse such nonuse and is not due to any intention to abandon the mark; and

(C) be accompanied by the fee prescribed by the Director.

(c) Deficient Affidavit. If any submission filed within the period set forth in subsection (a) is deficient, including that the affidavit was not filed in the name of the holder of the international registration, the deficiency may be corrected after the statutory time period, within the time prescribed after notification of the deficiency. Such submission shall be accompanied by the additional deficiency surcharge prescribed by the Director.

(d) Notice of Requirement. Special notice of the requirement for such affidavit shall be attached to each certificate of extension of protection.

(e) Notification of Acceptance or Refusal. The Director shall notify the holder of the international registration who files any affidavit required by this section of the Director's acceptance or refusal thereof and, in the case of a refusal, the reasons therefor.

(f) Designation of Resident for Service of Process and Notices. If the holder of the international registration of the mark is not domiciled in the United States, the holder may designate, by a document filed in the United States Patent and Trademark Office, the name and address of a person resident in the United States on whom may be served notices or process in proceedings affecting the mark. Such notices or process may be served upon the person so designated by leaving with that person or mailing to that person a copy thereof at the address specified in the last designation so filed. If the person so designated cannot be found at the last designated address, or if the holder does not designate by a document filed in the United States Patent and Trademark Office the name and address of a person resident in the United States on whom may be served notices or process in proceedings affecting the mark, such notices or process may be served on the Director.

Under §71 of the Trademark Act, 15 U.S.C. §1141k, a registered extension of protection to the United States will be cancelled unless the holder of the international registration periodically files affidavits of use in commerce or excusable nonuse (“§71 affidavits or declarations”). The purpose of the §71 affidavit or declaration is to remove marks that are no longer being used in commerce from the register.

### 1613.01 Registrations to Which §71 Affidavit or Declaration Pertains

Section 71 of the Trademark Act applies only to registered extensions of protection of international registrations to the United States. However, §8 of the Act, 15 U.S.C. §1058, requires periodic affidavits or

declarations of use or excusable nonuse for registrations resulting from applications under §1 or §44 of the Trademark Act. See [TMEP §§1604 et seq.](#) for further information about §8 affidavits or declarations.

### 1613.02 Notice of When Affidavit or Declaration Is Due

A statement noting the requirement for filing the affidavits or declarations of use or excusable nonuse under §71 of the Act is included on each certificate of registration as originally issued. 15 U.S.C. §1141k(d). This is the only notice that the USPTO provides regarding this requirement. The holder must file the affidavit or declaration within the time periods required by §71 of the Act regardless of whether the holder receives the notice. 37 C.F.R. §7.38. The USPTO does not provide any reminder of the due date(s) of the affidavits or declarations.

### 1613.03 Form for Filing §71 Affidavit or Declaration

To expedite processing, it is recommended that the holder file the §71 affidavit or declaration through the Trademark Electronic Application System (“TEAS”). See [TMEP §301](#) for more information about electronic filing. Forms for filing affidavits or declarations of use or excusable nonuse under §71 are available through TEAS at <http://www.uspto.gov>. Alternatively, the holder can call the Trademark Assistance Center at (571) 272-9250 or (800) 786-9199 to obtain a pre-printed form that can be filled out and mailed, faxed, or hand delivered to the USPTO.

See [TMEP §1613.04](#) regarding the deadline for filing the affidavit or declaration, and [TMEP §1613.05](#) regarding the requirements for filing the affidavit or declaration.

### 1613.04 Time for Filing §71 Affidavit or Declaration

*37 CFR §7.36(b)*

During the following time periods, the holder of an international registration must file an affidavit or declaration of use or excusable nonuse, or the registered extension of protection will be cancelled under section 71 of the Act:

- (1) On or after the fifth anniversary and no later than the sixth anniversary after the date of registration in the United States; and
- (2) Within the year before the end of every ten-year period after the date of registration in the United States.
- (3) The affidavit or declaration may be filed within a grace period of six months after the end of the deadline set forth in paragraphs (b)(1) and (b)(2) of this section, with payment of the grace period surcharge per class required by section 71(a)(3) of the Act and §7.6.

Under §§71(a)(1) and (a)(2) of the Trademark Act, the holder of the international registration must file an affidavit or declaration of use or excusable nonuse:

(1) on or after the fifth anniversary and no later than the sixth anniversary of the date of registration in the United States; *and*

(2) within the year before the end of every ten-year period after the date of registration in the United States. 37 C.F.R. §7.36(b).

Under §71(a)(3) of the Act, 15 U.S.C. §1141k(a)(3), the holder may file the affidavit or declaration within a grace period of six months after the expiration of the deadlines set forth in §§71(a)(1) and (a)(2) of the Act, 15 U.S.C. §§1141k(a)(1) and (a)(2), with an additional grace period surcharge.

Affidavits or declarations may be filed on the U.S. registration anniversary dates at the end of the fifth and sixth years, or at the end of the ninth and tenth years.

*Example: For a registration issued on Nov. 1, 2005, a six-year affidavit may be filed as early as Nov. 1, 2010, and may be filed as late as Nov. 1, 2011, before entering the six-month grace period.*

A §71 affidavit or declaration filed through TEAS is considered to have been filed on the date the USPTO receives the transmission, regardless of whether that date is a Saturday, Sunday, or Federal holiday within the District of Columbia. 37 C.F.R. §2.195(a)(2).

Section 71 affidavits or declarations filed on paper are considered timely if they are received in the USPTO by the due date or if they are mailed or transmitted by the due date with a certificate of mailing or facsimile transmission under 37 C.F.R. §2.197. See [TMEP §§305.02](#) and [306.05](#) for certificate of mailing and certificate of facsimile transmission procedures to avoid lateness.

If the holder of the registration does not file an affidavit or declaration of use or excusable nonuse before the end of the grace period, the registration will be cancelled. 37 C.F.R. §§7.36(b) and 7.39(d). See [TMEP §1613.07](#) regarding who may file a §71 affidavit or declaration.

The Director has no authority to waive the deadline for filing a proper affidavit or declaration of use of a registered mark under 15 U.S.C. §1141k. See *Checkers Drive-In Restaurants, Inc. v. Commissioner of Patents and Trademarks*, 51 F.3d 1078, 1085, 34 USPQ2d 1574, 1581 (D.C. App. 1995), cert. denied 516 U.S. 866 (1995) (“[I]n establishing cancellation as the penalty for failure to file the required affidavit, Congress made no exception for the innocent or the negligent. Thus, the Commissioner had no discretion to do other than cancel Checkers's service mark registration in this case.”); *In re Holland American Wafer Co.*, 737 F.2d 1015, 1018, 222 USPQ 273, 275 (Fed. Cir. 1984) (“Timeliness set by statute is not a minor technical defect which can be waived by the Commissioner.”).

#### *Premature Filing of §71 Affidavit or Declaration*

The affidavit or declaration cannot be filed before the periods specified in §71(a) of the Act. The purpose of the affidavit or declaration is to show that the mark is still in use in commerce within the relevant period, which cannot be done by an affidavit or declaration filed before that period. Cf. *In re Holland American Wafer Co.*, 737 F.2d 1015, 222 USPQ 273 (Fed. Cir. 1984). If an affidavit or declaration is filed before the period specified in §§71(a)(1) and (a)(2) of the Act, the USPTO will issue a notice advising the holder: (1) that the affidavit or declaration is premature; (2) of the appropriate time for filing the affidavit or declaration; (3) that the fee(s) submitted will be held; and (4) that the holder may file a new affidavit or declaration at the appropriate time or may request a refund at any time. There is no deficiency surcharge. The prematurely filed affidavit or declaration will remain in the record for informational purposes only. The holder of the registration must file a newly executed affidavit or declaration before the end of the grace period or the registration will be cancelled and the USPTO will refund the fees.

See [TMEP §1613.08\(b\)](#) regarding the date of execution of a §71 affidavit or declaration.

## **1613.05 Requirements for §71 Affidavit or Declaration of Use or Excusable Nonuse**

*37 CFR §7.37 Requirements for a complete affidavit or declaration of use in commerce or excusable nonuse.*

A complete affidavit or declaration under section 71 of the Act must:

- (a) Be filed by the holder of the international registration within the period set forth in §7.36(b);
- (b) Include a statement that is signed and verified (sworn to) or supported by a declaration under §2.20 of this chapter by a person properly authorized to sign on behalf of the holder, attesting to the use in commerce or excusable nonuse of the mark within the period set forth in section 71 of the Act. The verified statement must be executed on or after the beginning of the filing period specified in §7.36(b). A person who is properly authorized to sign on behalf of the holder is:
  - (1) A person with legal authority to bind the holder; or
  - (2) A person with firsthand knowledge of the facts and actual or implied authority to act on behalf of the holder; or
  - (3) An attorney as defined in §11.1 of this chapter who has an actual written or verbal power of attorney or an implied power of attorney from the holder.
- (c) Include the U.S. registration number;
- (d)(1) Include the fee required by §7.6 for each class of goods or services that the affidavit or declaration covers;

(2) If the affidavit or declaration is filed during the grace period under section 71(a)(3) of the Act, include the grace period surcharge per class required by §7.6;

(3) If at least one fee is submitted for a multi-class registration, but the class(es) to which the fee(s) should be applied are not specified, the Office will issue a notice requiring either the submission of additional fee(s) or an indication of the class(es) to which the original fee(s) should be applied. If the required fee(s) are not submitted within the time period set out in the Office action and the class(es) to which the original fee(s) should be applied are not specified, the Office will presume that the fee(s) cover the classes in ascending order, beginning with the lowest numbered class;

(e)(1) Specify the goods or services for which the mark is in use in commerce, and/or the goods or services for which excusable nonuse is claimed under §7.37(f)(2);

(2) Specify the goods or services being deleted from the registration, if the affidavit or declaration covers less than all the goods or services or less than all the classes in the registration;

(f)(1) State that the registered mark is in use in commerce on or in connection with the goods or services in the registration; or

(2) If the registered mark is not in use in commerce on or in connection with all the goods or services in the registration, set forth the date when use of the mark in commerce stopped and the approximate date when use is expected to resume and recite facts to show that nonuse as to those goods or services is due to special circumstances that excuse the nonuse and is not due to an intention to abandon the mark; and

(g) Include a specimen showing current use of the mark for each class of goods or services, unless excusable nonuse is claimed under §7.37(f)(2). When requested by the Office, additional specimens must be provided. The specimen must meet the requirements of §2.56 of this chapter.

(h) The Office may require the holder to furnish such information, exhibits, affidavits or declarations, and such additional specimens:

(1) As may be reasonably necessary to the proper examination of the affidavit or declaration under section 71 of the Act; or

(2) For the Office to assess the accuracy and integrity of the register.

(3) The provisions of paragraph (h)(2) of this section will no longer be applied after June 21, 2014.

## 1613.06 Fees for §71 Affidavit or Declaration

### 1613.06(a) Filing Fee for Affidavit or Declaration

Under 15 U.S.C. §1141k(b) and 37 C.F.R. §7.37(d)(1), an affidavit or declaration of use or excusable nonuse must include the fee required by 37 C.F.R. §7.6 for each class of goods or services that the affidavit or declaration covers. See [TMEP §§1401.02](#) and [1401.04](#) *et seq.* regarding use of international classification to calculate fees due.

### 1613.06(b) Grace Period Surcharge and Deficiency Surcharge

If the affidavit or declaration is filed during the grace period under §71(a)(3) of the Act, 15 U.S.C. §1141k(a)(3), it must include the grace period surcharge per class required by 37 C.F.R. §7.6.

Section 71(c) of the Trademark Act, 15 U.S.C. §1141k(c), requires a “deficiency surcharge” for correcting deficiencies in the affidavit or declaration after expiration of the deadlines specified in §71. See [TMEP §§1613.17](#) *et seq.* regarding the deadlines and surcharge for correcting deficiencies.

Only a single deficiency surcharge is required for correcting one or more deficiencies in a multiple-class registration. Similarly, only a single deficiency surcharge is required to correct several deficiencies within one §71 affidavit or declaration.

The grace period surcharge applies only where no filing was made during the sixth year after the date of registration, or within the year before the end of any ten-year period after the date of registration. A holder who files within these periods, but corrects a deficiency after these periods have expired, will be subject to the deficiency surcharge only. On the other hand, someone who files during the grace period and cures deficiencies after expiration of the grace period will be subject to both the grace period surcharge (for the ability to file the affidavit or declaration during the grace period) *and* the deficiency surcharge (for the

ability to correct a deficiency after the end of the grace period). *See* H.R. Rep. No. 105-194, 105th Congress, 1st Sess. 17 (1997).

### **1613.06(c) Processing Affidavit or Declaration Filed with Insufficient Fees**

An affidavit or declaration that does not include a fee, or does not include sufficient fees for all the classes to which the affidavit or declaration pertains (and the grace period surcharge, where applicable), is deficient.

Fee deficiencies may be cured before expiration of the deadlines set forth in §71 of the Act, 15 U.S.C. §1141k, without payment of a deficiency surcharge, or after expiration of the deadlines set forth in §71 of the Act with the deficiency surcharge required by §71(c) of the Act. *See* [TMEP §§1613.17 et seq.](#) for information about the procedures, deadlines, and surcharge for correcting deficiencies.

If the affidavit or declaration was filed without sufficient fee(s), but the affidavit or declaration included an authorization to charge deficient fees to a USPTO deposit account (37 C.F.R. §2.208), the required fee(s) (and grace period surcharge, where applicable) will be charged to the deposit account. If the deposit account authorization was included with the affidavit or declaration as filed, and the deposit account had sufficient funds to cover the fee(s) in question, there is no fee deficiency and no deficiency surcharge is required.

An authorization to charge fees to a deposit account with insufficient funds to cover the fee is regarded as a deficiency.

If a check submitted as payment of a filing fee for an affidavit or declaration of use or excusable nonuse is returned unpaid, or an electronic funds transfer (“EFT”) or credit card payment is refused or charged back by a financial institution, this is regarded as a deficiency. In addition to the deficiency surcharge (where applicable), there is a fee for processing the payment that was refused. 37 C.F.R. §2.6(b)(12). *See* [TMEP §405.06](#) for additional information.

If at least one fee is submitted for a multiple-class registration, but the class(es) to which the fee(s) should be applied are not specified, the Post Registration staff will issue an Office action requiring either the submission of additional fee(s) or an indication of the class(es) to which the original fee(s) should be applied.

If the holder does not submit the required fee(s) or specify the class(es) to which the original fee(s) should be applied, the USPTO will presume that the fee(s) cover the classes in ascending order, beginning with the lowest-numbered class and will delete any unpaid class(es). 37 C.F.R. §7.37(d)(3). *See* [TMEP §1608](#) regarding surrender of the registration as to class(es) that are omitted from a §71 affidavit or declaration.

### **1613.07 Ownership and Who May File §71 Affidavit or Declaration**

#### **1613.07(a) Affidavit or Declaration Must Be Filed by Holder**

The affidavit or declaration of use or excusable nonuse must be filed by the holder of the international registration. Filing by the holder is a minimum requirement that must be met before the expiration of the deadlines set forth in §71(a) of the Act, 15 U.S.C. §1141k(a), (i.e., during the sixth year after the date of registration in the United States, or within the year before the end of every ten-year period after the date of registration in the United States), or within the six-month grace period after expiration of these deadlines. 37 C.F.R. §§7.36(b), 7.37(a).

If it is unclear whether the party who filed the affidavit or declaration is the present holder, the Post Registration staff will issue an Office action requiring the party to establish its ownership. *See* [TMEP §1613.07\(b\)](#).

If the affidavit or declaration was not filed in the name of the holder of the registration, and there is time remaining in the statutory filing period (which includes the grace period), the true holder may (1) submit, in response to an Office action, a correction of the name in the filing of record or (2) file a complete new affidavit or declaration, together with the filing fee per class required by 37 C.F.R. §7.6, and, if applicable, a specimen of use for each class. If a new affidavit or declaration is filed during the grace period, the holder must include the grace period surcharge per class with the new affidavit or declaration. If a correction is submitted, the holder must also confirm that the original affidavit or declaration was signed by a person properly authorized to sign on behalf of the true holder. 37 C.F.R. §§2.193(e)(1) and 7.37(b); [TMEP §1613.08\(a\)](#) . If the original affidavit or declaration was not signed by an authorized signatory, the holder must also submit a statement, signed and verified (sworn to) or supported by a declaration under 37 C.F.R. §2.20 by a person properly authorized to sign on behalf of the holder, that affirms the representations in the original affidavit or declaration. 37 C.F.R. §7.37(b).

If the affidavit or declaration was not filed in the name of the holder of the registration, and there is no time remaining in the grace period, the deficiency may be corrected within a prescribed time. 15 U.S.C. §1141k(c). The Post Registration staff will issue an Office action notifying the party who filed the affidavit or declaration of the ownership issue and of the time period within which it must be corrected. The true holder may submit a correction to the filing of record within the prescribed time and must also include the deficiency surcharge. 37 C.F.R. §7.6(a)(8). If a correction is submitted, the holder must also verify that the original affidavit or declaration was signed by a person properly authorized to sign on behalf of the true holder. 37 C.F.R. §§2.193(e)(1) and 7.37(b); [TMEP §1613.08\(a\)](#) . If the original affidavit or declaration was not signed by an authorized signatory, the holder must also submit a statement, signed and verified (sworn to) or supported by a declaration under 37 C.F.R. §2.20 by a person properly authorized to sign on behalf of the holder, that affirms the representations in the original affidavit or declaration. 37 C.F.R. §7.37(b).

*See also* [TMEP §1613.07\(e\)](#) regarding mistakes in setting forth the name of the holder.

### **1613.07(b) Establishing Ownership**

When the affidavit or declaration is filed by someone other than the original holder of the registration, the USPTO cannot accept the affidavit or declaration unless there is clear chain of title from the original holder to the party who filed the affidavit or declaration. [TMEP §502.01](#) .

If USPTO records do not show a clear chain of title in the party who filed the affidavit or declaration, the Post Registration staff will issue an Office action requiring the party to establish its ownership of the registration. Ownership can be established by recording the appropriate documents with the International Bureau of the World Intellectual Property Organization (“IB”). 37 C.F.R. §7.22; [TMEP §1904.06](#) . Actual evidence of a chain of title cannot be submitted to the USPTO to establish ownership of an extension of protection.

Because an extension of protection remains part of the international registration, assignments of extensions of protection to the United States must first be recorded at the IB. A holder cannot file an assignment (or other document transferring title) of an extension of protection to the United States directly with the Assignment Recordation Branch of the USPTO. The USPTO will record only those notifications received from the IB. The IB will notify the USPTO of any changes of the name of the holder or in ownership of the international registration recorded in the International Register, and the USPTO will automatically update its database to reflect the change(s). [TMEP §§501.07](#) and [1904.06](#) .

The holder should notify the Post Registration staff when Office records indicate that the change in the name or ownership has been received from the IB. The USPTO cannot recognize the party who filed the §71

affidavit or declaration as the current holder until notification is received from the IB that a change in name or ownership has been recorded. Therefore, the holder may wish to contact the IB at <http://www.wipo.int/madrid/en/contact.html> regarding the recordation of the appropriate documents. Additionally, a new holder can check TSDR to determine whether the Trademark database has been updated to reflect all changes received from the IB.

See [TMEP §1613.07\(a\)](#) regarding an affidavit or declaration filed by a party who was not the holder of the registration at the time of filing.

### **1613.07(c) Changes of Legal Entity**

The procedures for establishing ownership, as discussed in [TMEP §1613.07\(b\)](#), also apply to changes of name and changes of legal entity. See [TMEP §1613.07\(d\)](#) regarding changes of name.

A change in the country or other jurisdiction of incorporation is a change of legal entity, creating a new party.

The death of a partner, or other change in the membership of a partnership, normally creates a change in legal entity unless the partnership agreement provides for continuation of the partnership and the relevant law permits this.

A merger of companies into a new company normally constitutes a change of legal entity.

Affidavits or declarations may be accepted from trustees, executors, administrators, and the like, when supported by a court order or other evidence of the person's authority to act on behalf of the present holder. If there is a court order, a copy of the order should be submitted.

### **1613.07(d) Changes of Name**

A mere change of the name of a party is not a change of entity and will not require an inquiry regarding ownership, if there is clear title in the party who filed the §71 affidavit or declaration. Therefore, if the holder records a change of name with the IB and subsequently files the §71 affidavit or declaration in its former name, the USPTO will not issue an inquiry regarding ownership.

However, if it is unclear from USPTO records whether the party who filed the affidavit or declaration is the holder of record, the holder must record appropriate documentation of the change of name with the IB.

See 37 C.F.R. §7.22 and [TMEP §1613.07\(b\)](#). Actual evidence cannot be submitted to the USPTO to establish ownership of an extension of protection.

### **1613.07(e) Correction of Mistake in Setting Forth the Name of the Holder**

If the affidavit or declaration was filed by the holder of the registration, but there is a mistake in the manner in which the name of the holder is set out in the affidavit or declaration, the mistake can be corrected.

See *In re Atlanta Blue Print Co.*, 19 USPQ2d 1078 (Comm'r Pats. 1990). No deficiency surcharge is required in this situation.

See [TMEP §1613.07\(a\)](#) regarding an affidavit or declaration mistakenly filed in the name of a person or existing legal entity who did not own the mark as of the filing date.

See [TMEP §1201.02\(c\)](#) for examples of correctable and non-correctable errors.

## **1613.08 Execution of Affidavit or Declaration**

### **1613.08(a) Persons Who May Sign Affidavit or Declaration**

Under 37 C.F.R. §7.37(b), the §71 affidavit or declaration must include a statement that is signed and verified (sworn to) or supported by a declaration under 37 C.F.R. §2.20 by a person properly authorized to sign on behalf of the holder. A “person who is properly authorized to sign on behalf of the holder” is: (1) a person with legal authority to bind the holder; (2) a person with firsthand knowledge of the facts and actual or implied authority to act on behalf of the holder; or (3) an attorney as defined in 37 C.F.R. §11.1 who has an actual written or verbal power of attorney or an implied power of attorney from the holder. 37 C.F.R. §7.37(b).

Generally, the USPTO does not question the authority of the person who signs a verification unless there is an inconsistency in the record as to the signatory’s authority to sign. See [TMEP §611.03\(a\)](#).

### **1613.08(b) Date of Execution of Affidavit or Declaration**

Under 37 C.F.R. §7.37(b), the verified statement must be executed on or after the beginning of the relevant filing period specified in §71 of the Act, 15 U.S.C. §1141k, (i.e., on or after the fifth anniversary of the date of registration in the United States, on or after the beginning of the one-year period before the end of each ten-year period after the date of registration in the United States, or during the available grace period).

Because the purpose of the affidavit or declaration is to attest to the use or excusable nonuse of the mark within the time periods specified in §71 of the Act, the affidavit or declaration cannot be executed before these time periods begin.

An affidavit or declaration filed within the period specified in §71 of the Act, but executed before that period, is deficient. The holder of the registration will be required to submit a substitute or supplemental affidavit or declaration attesting to use in commerce (or excusable nonuse) on or in connection with the goods or services within the relevant period specified in §71 of the Act.

If the prematurely executed §71 affidavit or declaration was filed during the relevant period specified in §71(a) of the Act (i.e., during the sixth year after the date of registration in the United States or within one year before the end of any ten-year period after the date of registration in the United States), the substitute affidavit or declaration may be filed before expiration of the relevant period for no fee, or after expiration of the relevant period with the deficiency surcharge required under §71(c) of the Act. If the prematurely executed §71 affidavit or declaration was filed during the grace period, the substitute affidavit or declaration may be filed before expiration of the grace period for no fee, or after expiration of the grace period with the deficiency surcharge. See [TMEP §1613.04](#) regarding the deadlines for filing §71 affidavits and [TMEP §§1613.17 et seq.](#) for information about the procedures, deadlines, and surcharge for correcting deficiencies.

*Date of Execution Omitted*. If the §71 affidavit or declaration is signed, but the date of execution is omitted, the Post Registration staff must require that the holder of the registration set forth the date of execution for the record. If the affidavit or declaration was executed within the relevant filing period, no deficiency fee is required. If there are no other outstanding issues, the holder may provide the Post Registration staff with the date by telephone or e-mail and the Post Registration staff must enter an appropriate Note to the File in the record. If the affidavit or declaration was not executed within the relevant filing period, the affidavit or

declaration is deficient, and the holder must submit a substitute or supplemental affidavit or declaration, as discussed above.

### **1613.08(c) Signature of Electronically Transmitted Affidavit or Declaration**

See 37 C.F.R. §2.193(c) and [TMEP §611.01\(c\)](#) regarding signature of an affidavit or declaration filed through TEAS.

### **1613.08(d) Form and Wording of Verification**

The format of the verification may be: (1) the classical form for verifying, which includes an oath (jurat) ( *see* [TMEP §804.01\(a\)](#) ); or (2) a declaration under 37 C.F.R. §2.20 or 28 U.S.C. §1746 instead of an oath ( *see* [TMEP §804.01\(b\)](#) ).

## **1613.09 Goods and/or Services Set Forth in §71 Affidavit or Declaration**

### **1613.09(a) Goods and/or Services Must Be Specified or Expressly Incorporated by Reference**

Under 15 U.S.C. §1141k(b) and 37 C.F.R. §7.37(e)(1), the affidavit or declaration must specify the goods/services recited in the registration on or in connection with which the mark is in use in commerce, and/or the goods/services for which excusable nonuse is claimed. See [TMEP §1613.10](#) regarding use in commerce and [TMEP §1613.11](#) regarding excusable nonuse. The affidavit or declaration may incorporate by reference the identification set forth in the registration certificate (e.g., “all goods/services listed in the registration” or “all goods/services listed in the registration except... [specifying the goods/services not covered by the affidavit or declaration]”). Incorporation by reference is recommended to avoid inadvertent omissions.

If the holder is alleging use with respect to some of the goods/services and excusable nonuse for other goods/services, the holder must clearly indicate which goods/services are in use and which goods/services are not in use.

### **1613.09(b) Deletion of Goods and/or Services**

If the holder of the registration intends to delete goods/services from the registration, this should be expressly stated in the affidavit or declaration. 37 C.F.R. §7.37(e)(2). Once a holder expressly indicates an intention to delete goods, services, or classes from a registration, they may not be reinserted.

### **1613.09(c) Failure to List All Goods and/or Services Recited in Registration**

An affidavit or declaration that fails to list or incorporate by reference all the goods/services recited in the registration, and does not include a statement of intent to delete the omitted goods/services, is deficient.

The Post Registration staff will issue an Office action requiring the party to either file a substitute or supplemental affidavit or declaration that the mark was in use in commerce on or in connection with the omitted goods/services or state that the omitted goods/services should be deleted.

If the holder files a substitute or supplemental affidavit or declaration adding the omitted goods/services, the holder must verify that the mark was in use in commerce on or in connection with the goods/services during the relevant filing period specified in §71 of the Act, 15 U.S.C. §1141k. This substitute affidavit or declaration may be filed before expiration of the relevant deadline set forth in §71 of the Act for no fee, or

after expiration of the deadline set forth in §71 of the Act with the deficiency surcharge required by §71(c) of the Act. See [TMEP §§1613.17](#) *et seq.* for information about the procedures, deadlines, and surcharge for correcting deficiencies.

If the holder does not file a substitute or supplemental affidavit or declaration that the mark was in use in commerce on or in connection with the omitted goods/services within the period for response to the Office action ( see [TMEP §1613.16](#) ), the omitted goods/services will be deleted from the registration.

### **1613.09(d) New Goods and/or Services Cannot Be Added**

Goods and/or services that are not listed in the registration may not be set forth in the §71 affidavit or declaration.

### **1613.10 Use in Commerce**

The §71 affidavit or declaration must state that the mark is in use in commerce on or in connection with the goods and/or services listed in the registration, unless excusable nonuse is claimed. 37 C.F.R. §7.37(f)(1). See [TMEP §1613.11](#) regarding excusable nonuse. The §71 affidavit or declaration does not have to specify the type of commerce (e.g., interstate) in which the mark is used. The USPTO presumes that someone who states that the mark is in use in commerce is stating that the mark is in use in a type of commerce that Congress can regulate, unless there is contradictory evidence in the record.

A §71 affidavit or declaration that does not state that the mark is in use in commerce is deficient. The holder must submit a substitute affidavit or declaration stating that the mark was in use in commerce on or in connection with the goods and/or services listed in the registration during the relevant period specified in §71 of the Trademark Act, 15 U.S.C. §1141k, as follows:

- (1) If the §71 affidavit or declaration was filed during the sixth year after the date of registration in the United States, the substitute affidavit or declaration must state that the mark was in use in commerce on or in connection with the goods/services before the expiration of the sixth year after the date of registration, if accurate; or
- (2) If the §71 affidavit or declaration was filed within one year before the end of any ten-year period after the date of registration in the United States, the substitute affidavit or declaration must state that the mark was in use in commerce on or in connection with the goods/services within one year before the end of the ten-year period after the date of registration, if accurate; or
- (3) If the §71 affidavit or declaration was filed during the grace period, the substitute affidavit or declaration must state that the mark was in use in commerce on or in connection with the goods/services before the expiration of the grace period, if accurate.

If the §71 affidavit or declaration was filed during the relevant period specified in §71(a) of the Act (i.e., during the sixth year after the date of registration in the United States, or within one year before the end of any ten-year period after the date of registration in the United States), the substitute affidavit or declaration may be filed before expiration of the relevant period for no fee, or after expiration of the relevant period with the deficiency surcharge required under §71(c) of the Act. If the §71 affidavit or declaration was filed during the grace period, the substitute affidavit or declaration may be filed before expiration of the grace period for no fee, or after expiration of the grace period with the deficiency surcharge. See [TMEP §1613.04](#) regarding the deadlines for filing §71 affidavits or declarations, and [TMEP §§1613.17](#) *et seq.* for information about the procedures, deadlines, and surcharge for correcting deficiencies.

While a substitute affidavit or declaration may be filed after the expiration of the period specified in §71 of the Act, the substitute affidavit or declaration must attest to use within the time period specified in §71 of the Act. Therefore, if the substitute affidavit or declaration does not state that the mark was in use in commerce on or in connection with the goods/services within the relevant period specified in §71 of the Act, the USPTO will not accept the §71 affidavit or declaration, and the registration will be cancelled.

### 1613.11 “Excusable Nonuse” of Mark

37 CFR §7.37 (Extract)

A complete affidavit or declaration under section 71 of the Act must:

...

(f) ...

(2) If the registered mark is not in use in commerce on or in connection with all the goods or services in the registration, set forth the date when use of the mark in commerce stopped and the approximate date when use is expected to resume and recite facts to show that nonuse as to those goods or services is due to special circumstances that excuse the nonuse and is not due to an intention to abandon the mark[.]

The purpose of Section 71 of the Trademark Act is to remove from the register those registrations that have become deadwood. *See Morehouse Mfg. Corp. v. J. Strickland & Co.*, 407 F.2d 881, 160 USPQ 715 (C.C.P.A. 1969). It is not intended, however, to cancel registrations because of a temporary interruption in the use of the mark due to circumstances beyond the control of the holder of the registration. *See In re Moorman Mfg. Co.*, 203 USPQ 712 (Comm’r Pats. 1979). Thus, if the mark is not in use in commerce but the holder believes the registration should not be cancelled, the holder may file an affidavit or declaration showing that nonuse is due to special circumstances that excuse the nonuse, and is not due to any intention to abandon the mark. 15 U.S.C. §1141k(b)(2). *See Ex parte Kelley-How-Thomson Co.*, 118 USPQ 40 (Comm’r Pats. 1958).

#### *Requirements for Affidavit or Declaration*

Since "showing" implies proof, merely stating that special circumstances exist and there is no intention to abandon the mark is not sufficient. *See In re Conusa Corp.*, 32 USPQ2d 1857 (Comm'r Pats. 1993); *In re Moorman Mfg. Co.*, *supra*; *Ex parte Astra Pharmaceutical Products, Inc.*, 118 USPQ 368 (Comm’r Pats. 1958); *Ex parte Denver Chemical Mfg. Co.*, 118 USPQ 106 (Comm’r Pats. 1958). The affidavit or declaration must state when use in commerce stopped and give the approximate date when use is expected to resume. 37 C.F.R. §7.37(f)(2). If the holder was unable to commence use due to special circumstances beyond the holder’s control that excuse the nonuse, the holder should state that the mark was never in use and give the approximate date when use is expected to begin. The affidavit or declaration must also specify the reason for nonuse, the specific steps being taken to put the mark in use, and any other relevant facts to support a finding of excusable nonuse.

Sufficient facts must be set forth to demonstrate clearly that nonuse is due to some special circumstance beyond the holder's control or "forced by outside causes." *See In re Conusa Corp.*, *supra*; *In re Moorman Mfg. Co.*, *supra*; *Ex parte Kelley-How-Thomson Co.*, *supra*.

The goods/services for which excusable nonuse is claimed must be specified. See [TMEP §§1613.09](#) *et seq* . regarding proper specification of the goods and services.

In a multiple-class registration, there must be a recitation of facts as to nonuse for each class to which the affidavit or declaration pertains, or it must be clear that the facts recited apply to all the classes.

#### *Presumption of Abandonment*

If the mark has not been in use for three consecutive years and the holder has done nothing to try to resume use of the mark, the Office may presume that the holder has abandoned the mark. 15 U.S.C. §1127.

*See Imperial Tobacco Ltd. v. Phillip Morris Inc.*, 899 F.2d 1575, 14 USPQ2d 1390 (Fed. Cir. 1990); *Stromgren Supports Inc. v. Bike Athletic Co.*, 43 USPQ2d 1100 (TTAB 1997).

*Examples of Special Circumstances That Do and Do Not Excuse Nonuse*

In addition to a showing that there is no intention to abandon the mark, the holder must show that nonuse is due to special circumstances beyond the holder's control that excuse nonuse. The following examples provide general guidelines as to what is considered to be a special circumstance that excuses nonuse:

- *Business Decision*. Nonuse related to a business decision is not beyond the holder's control and does not excuse nonuse.
- *Decreased Demand*. Decreased demand for the product sold under the mark, resulting in its discontinuance for an indefinite period, does not excuse nonuse. The purpose of the requirement for an affidavit or declaration is to eliminate registrations of marks that are in nonuse due to ordinary changes in social or economic conditions. *See In re Conusa Corp.*, *supra*; *In re Parmalat S.p.A.*, 32 USPQ2d 1860 (Comm'r Pats. 1991); *Ex parte Astra Pharmaceutical Products, Inc.*, *supra*; *Ex parte Denver Chemical Mfg. Co.*, *supra*.
- *Trade Embargo or Other Circumstance Beyond Holder's Control*. Nonuse may be considered excusable where the holder of the registration is willing and able to continue use of the mark in commerce, but is unable to do so due to a trade embargo.
- *Sale of a Business*. Temporary nonuse due to the sale of a business might be considered excusable.
- *Retooling*. The mark might be out of use temporarily because of an interruption of production for retooling of a plant or equipment, with production possible again at a scheduled time. However, nonuse due to retooling is excusable only if the holder shows that the plant or equipment being retooled was essential to the production of the goods and that alternative equipment was unavailable on the market. *See In re New England Mutual Life Insurance Co.*, 33 USPQ2d 1532 (Comm'r Pats. 1991).
- *Orders on Hand*. If the product is of a type that cannot be produced quickly or in large numbers (e.g., airplanes), yet there are orders on hand and activity toward filling them, nonuse might be considered excusable.
- *Illness, Fire, and Other Catastrophes*. Illness, fire, and other catastrophes may create situations of temporary nonuse, with the holder being able to outline arrangements and plans for resumption of use. Such nonuse is often excusable. However, a mere statement that the holder is ill and cannot conduct his or her business will not in itself excuse nonuse; the holder must show that the business is an operation that could not continue without his or her presence. *See New England Mutual Life Insurance, supra*.
- *Negotiations with Distributors*. A recitation of efforts to negotiate agreements that would allow for resumption of use of the mark, or a statement that samples of the goods have been shipped to potential distributors, may establish lack of intention to abandon the mark, but does not establish the existence of special circumstances that excuse the nonuse. *See In re Parmalat, supra*; *In re Moorman, supra*.
- *Use in Foreign Country*. Use of the mark in a foreign country has no bearing on excusable nonuse of a mark in commerce that can be regulated by the United States Congress. *See In re Conusa, supra*.
- *Use of Mark on Different Goods/Services*. Use of the mark on goods/services other than those recited in the registration does not establish either special circumstances or lack of intention to abandon the mark. *See Ex parte Kelley-How-Thomson Co., supra*.

- *Use of Mark in Another Form*. Use of a mark as an essential part of a materially different composite mark does not excuse the failure to use the mark at issue. *See In re Continental Distilling Corp.*, 254 F.2d 139, 117 USPQ 300 (C.C.P.A. 1958).

#### *Supplementary Evidence or Explanation of Nonuse*

If the USPTO determines that the facts set forth do not establish excusable nonuse, the holder may file supplementary evidence or explanation, within the response period set forth in the Office action. If the affidavit or declaration included a claim of excusable nonuse when filed, no deficiency surcharge will be required for supplementing this claim with additional evidence or an explanation.

#### *Substitute Affidavit or Declaration Claiming Use*

If the holder responds to the Office action by submitting a substitute affidavit or declaration with a claim of use, the USPTO will examine the substitute use affidavit or declaration.

### **1613.12 Specimen Showing Current Use of Mark in Commerce**

#### **1613.12(a) Specimen for Each Class Required**

A §71 affidavit or declaration must include a specimen or facsimile showing current use of the mark for each class of goods or services, unless excusable nonuse is claimed. 15 U.S.C. §1141k(b); 37 C.F.R. §7.37(g). When requested by the USPTO, additional specimens must be provided. 37 C.F.R. §7.37(g).

See [TMEP §§904.03](#) *et seq.* regarding trademark specimens and [TMEP §§1301.04](#) *et seq.* regarding service mark specimens.

The specimen must show use of essentially the same mark as the mark shown in the registration, and must be used on or in connection with the goods/services listed in the registration. A specimen that shows use of a materially different mark ( *see* [TMEP §1613.13](#) ), or shows use of the mark on other goods or services, is unacceptable. An affidavit or declaration that does not include an acceptable specimen for each class of goods/services is deficient. *See* 37 C.F.R. §7.37(g).

If a single specimen supports multiple classes, the holder may so indicate, and the Post Registration staff need not require multiple copies of the specimen. The Post Registration staff should enter a Note to the File in the record indicating which classes the specimen supports.

The specimen should be flat and no larger than 8½ inches (21.6 cm.) wide by 11.69 inches (29.7 cm.) long.

If a specimen exceeds these size requirements, the USPTO will create a facsimile of the specimen that meets these requirements (i.e., is flat and no larger than 8½ inches wide by 11.69 inches long), put it in the record, and destroy the original bulky specimen. If the copy of the specimen created by the USPTO does not adequately depict the mark, the Post Registration staff will require a substitute specimen that meets these size requirements, and an affidavit or declaration verifying the use of the substitute specimen.

If the specimen is otherwise deficient, the Post Registration staff will require a substitute specimen, together with an affidavit or declaration that the substitute specimen was in use in commerce on or in connection with the goods or services during the relevant period specified in §71 of the Act. *See* 37 C.F.R. §7.39; see also [TMEP §1613.12\(c\)](#) regarding substitute specimens.

The USPTO will not return specimens filed with a §71 affidavit or declaration.

### **1613.12(b) Specimens in Electronically Filed Affidavits or Declarations**

If the holder files the §71 affidavit or declaration through TEAS, the holder should submit a digitized image in .jpg or .pdf format.

Sometimes, no visible specimen is in the record due to a technical problem during submission of the affidavit or declaration. In this situation, the Post Registration staff should first send an e-mail to the TEAS mailbox to ask whether the problem can be fixed by uploading the file again. If it cannot, the Post Registration staff must ask the holder to submit: (1) the specimen (or a facsimile of the specimen) that was attached to the original electronically filed affidavit or declaration; and (2) a statement by the person who transmitted the affidavit or declaration to the USPTO that the specimen being submitted is a true copy of the specimen submitted with the electronically filed affidavit or declaration. This statement does not have to be verified.

Alternatively, the holder may submit a new specimen, together with an affidavit or declaration that the substitute specimen was in use in commerce on or in connection with the goods/services during the relevant period specified in §71 of the Act. No deficiency surcharge is required. See [TMEP §1613.12\(c\)](#) regarding the requirements for an affidavit or declaration supporting use of substitute specimens.

The Office prefers that the specimen, whether a true copy of the original or a substitute, be submitted electronically via the Trademark Electronic Application System (“TEAS”). In TEAS, the Response to Office Action form can be accessed by clicking on the link entitled “Response Forms” at <http://www.uspto.gov>.

### **1613.12(c) Substitute Specimens**

If a specimen for any class is omitted or is deficient, the holder must file a substitute specimen, together with an affidavit or declaration that the substitute specimen was in use in commerce on or in connection with the goods or services during the relevant period specified in §71 of the Act, 15 U.S.C. §1141k, as follows:

(1) If the §71 affidavit or declaration was filed during the sixth year after the date of registration in the United States, the affidavit or declaration supporting use of the substitute specimen must state that the substitute specimen was in use in commerce before the expiration of the sixth year after the date of registration, if accurate; or

(2) If the §71 affidavit or declaration was filed within one year before the end of any ten-year period after the date of registration in the United States, the affidavit or declaration supporting use of the substitute specimen must state that the substitute specimen was in use in commerce within one year before the end of the ten-year period after the date of registration, if accurate; or

(3) If the §71 affidavit or declaration was filed during the grace period, the affidavit or declaration supporting use of the substitute specimen must state that the substitute specimen was in use in commerce before the expiration of the grace period, if accurate.

If the §71 affidavit or declaration was filed during the relevant period specified in §71(a) of the Act (i.e., during the sixth year after the date of registration in the United States, or within one year before the end of any ten-year period after the date of registration in the United States), the substitute specimen may be filed before expiration of the relevant period for no fee, or after expiration of the relevant period with the deficiency surcharge required under §71(c) of the Act. If the §71 affidavit or declaration was filed during the grace period, the substitute specimen may be filed before expiration of the grace period for no fee, or after expiration of the grace period with the deficiency surcharge. See [TMEP §1613.04](#) regarding the

deadlines for filing §71 affidavits or declarations and [TMEP §§1613.17](#) *et seq.* for information about the procedures, deadlines, and surcharge for correcting deficiencies.

While a substitute specimen and supporting affidavit or declaration may be filed after the expiration of the period specified in §71 of the Act, the supporting affidavit or declaration must attest to use of the specimen within the time period specified in §71 of the Act. Therefore, if the affidavit or declaration supporting the substitute specimen does not state that the specimen was in use in commerce prior to the end of the relevant period specified in §71 of the Act, the USPTO will not accept the affidavit or declaration, and the registration will be cancelled as to any class for which no proper specimen was submitted.

See 37 C.F.R. §2.193(e)(1) and [TMEP §611.03\(a\)](#) regarding the proper person to sign an affidavit or declaration.

### **1613.13 Differences in the Mark as Used on the Specimen and the Mark as Registered**

The mark to which the §71 affidavit or declaration pertains must be essentially the same as the mark that appears in the registration. Where the specimen reflects a change in the mark since the registration issued, acceptance of the affidavit or declaration will depend on the degree of change. A *material* alteration of the mark will result in refusal of the affidavit or declaration on the ground that the registered mark is no longer in use. See *In re Int'l Nickel Co., Inc.*, 282 F.2d 952, 127 USPQ 331 (C.C.P.A. 1960); *In re Continental Distilling Corp.*, 254 F.2d 139, 117 USPQ 300 (C.C.P.A. 1958); *Ex parte Richards*, 153 USPQ 853 (Comm'r Pats. 1967). See also *Torres v. Cantine Torresella S.r.l.*, 808 F.2d 46, 1 USPQ2d 1483 (Fed. Cir. 1986); *In re Holland American Wafer Co.*, 737 F.2d 1015, 222 USPQ 273 (Fed. Cir. 1984).

Mere changes in background or styling, or modernization, are not ordinarily considered to be material changes in the mark. See *Ex parte Petersen & Pegau Baking Co.*, 100 USPQ 20 (Comm'r Pats. 1953) (change in matter determined to be mere background and type face held not a material alteration of "PETER PAN" mark). Whether the change in a mark as used on the specimen is a material change is a question of fact that the Post Registration staff must determine on a case-by-case basis.

Generally, the standard used to determine whether a change is material under §71 is the same as the standard used to determine whether the mark in a registration based on an application under §1 or §44 of the Trademark Act may be amended under 15 U.S.C. §1057(e). If the mark could be amended under §7(e) because the character of the mark had not been materially altered, then the specimen filed with the §71 affidavit or declaration should be accepted. In determining whether a change constitutes a material alteration, the USPTO will always compare the mark in the specimen to the mark as originally registered. See [TMEP §§ 807.14](#) *et seq.* and [1609.02\(a\)](#) for additional information about material alteration.

However, where the registered mark is currently used as one of several elements in a composite mark, the decision as to whether to accept the specimen requires consideration of whether the registered mark makes an impression apart from the other elements of the composite mark. If the display of the composite is such that the essence of the registered mark makes a separate impression, then the specimen may be sufficient for purposes of the §71 requirement. In many cases, word elements are severable from design elements, because words tend to dominate in forming a commercial impression. See *In re DeWitt Int'l Corp.*, 21 USPQ2d 1620 (Comm'r Pats. 1991). If the mark, as used on the §71 specimen, creates a separate impression apart from any other material on the specimen, then the specimen may be accepted as evidence of current use of the registered mark.

If the USPTO determines that the mark on the specimen is a material alteration of the registered mark, the holder may file a substitute specimen. If the holder files a substitute specimen after expiration of the relevant filing period specified in §71 of the Act, the holder must pay the deficiency surcharge required by §71(c) of the Act, 15 U.S.C. §1141k(c), and 37 C.F.R. §7.6. See [TMEP §1613.12\(c\)](#) regarding substitute specimens, and 37 C.F.R. §7.39 and [TMEP §§1613.17 et seq.](#) regarding the procedures for correcting deficiencies in a §71 affidavit.

### **1613.13(a) Amendment of Mark in Registration**

If the USPTO accepts the §71 affidavit or declaration, and there is a difference between the mark on the specimen filed with the affidavit or declaration and the mark in the registration, the mark as originally registered remains the mark of record. The holder cannot file a request for amendment under §7(e) of the Act as the mark in a registered extension of protection cannot be amended. In some situations, however, the owner may file a request under §7(e) to add a standard character claim. See [TMEP §1609.02](#).

### **1613.14 Designation of Domestic Representative by Foreign Holder**

Under 15 U.S.C. §1141k(f), if the holder of the international registration of the mark is not domiciled in the United States, the affidavit or declaration may include the name and address of a United States resident upon whom notices or process in proceedings affecting the registration may be served. The USPTO encourages parties who do not reside in the United States to designate domestic representatives. To expedite processing, the USPTO recommends that designations of domestic representative be filed through TEAS, at <http://www.uspto.gov>. See [TMEP §610](#).

The designation should be signed by the individual holder, someone with legal authority to bind a juristic holder (e.g., a corporate officer or general partner of a partnership), or a practitioner authorized to practice before the USPTO pursuant to 37 C.F.R. §11.14 (“qualified practitioner”). In the case of joint holders who are not represented by a qualified practitioner, all must sign. 37 C.F.R. §2.193(e)(8); [TMEP §611.03\(h\)](#).

### **1613.15 Office Actions and Notices Regarding Affidavit or Declaration**

Upon receipt of a §71 affidavit or declaration, the USPTO updates the prosecution history of the registration in the Trademark database to indicate that the affidavit or declaration has been filed.

When a §71 affidavit or declaration is filed electronically, TEAS almost immediately displays a “Success” page that confirms receipt. This page is evidence of filing should any question arise as to the filing date of the affidavit or declaration, and it may be printed or copied-and-pasted into an electronic record for storage. TEAS also separately sends an e-mail acknowledgement of receipt, which includes a summary of the filed information.

If a §71 affidavit or declaration is filed on paper, no acknowledgment of receipt of the affidavit or declaration is sent before it is examined, unless the holder includes a stamped, self-addressed postcard with the affidavit or declaration ( see [TMEP §303.02\(c\)](#) et seq .).

If, upon examination, the USPTO determines that the affidavit or declaration is acceptable, the USPTO sends a notice of acceptance. If the affidavit or declaration is not acceptable, the USPTO issues an action stating the reasons for refusal. 37 C.F.R. §7.39.

Sometimes, it may be necessary for the USPTO to request additional information in order to properly examine the affidavit or declaration. In such cases, the USPTO will require the holder to furnish such additional information, specimens, exhibits, and affidavits or declarations as may be reasonably necessary to the proper examination of the §71 affidavit or declaration. 37 C.F.R. §7.37(h)-(h)(1).

The propriety of the original registration is not re-examined in connection with the affidavit or declaration under §71.

### 1613.16 Response to Office Action

*Deadline* . Under 37 C.F.R. §7.39(a), the holder must file a response to a refusal within six months of the issuance date of the Office action, or before the end of the relevant filing period set forth in §71(a) of the Act, whichever is later. If no response is received within that time, the registration will be cancelled, unless time remains in the grace period under §71(a)(3) of the Act, 15 U.S.C. §1141k(a)(3). If time remains in the grace period, the holder may file a complete new affidavit or declaration, with a new fee.

The holder may file a petition to the Director under 37 C.F.R. §§2.146(a)(5) and 2.148 to waive 37 C.F.R. §7.39(a) so that a late response to an Office action can be accepted. However, the Director will waive a rule only in an extraordinary situation, where justice requires and no other party is injured. See [TMEP §1708](#) . The failure to receive an Office action has been found to be an extraordinary circumstance that warrants a waiver of 37 C.F.R. §7.39(a). The “unintentional delay” standard of 37 C.F.R. §2.66 does not apply to the failure to respond to an Office action issued in connection with a §71 affidavit or declaration. [TMEP §1714.01\(f\)\(ii\)\(D\)](#) .

*Signature* . The response must be signed by a qualified practitioner, or by the holder of the registration or someone with legal authority to bind the holder. If the holder is represented by a qualified practitioner, the practitioner must sign. 37 C.F.R. §§2.193(e)(2)(i), 7.39(a), and 11.18(a). If the holder is not represented by a qualified practitioner, the individual holder or someone with legal authority to bind a juristic holder must sign. 37 C.F.R. §§7.39(a) and 11.14(e); [TMEP §611.03\(b\)](#) . In the case of joint holders who are not represented by a qualified practitioner, all must sign. 37 C.F.R. §2.193(e)(2)(ii). See [TMEP §§611.06 et seq](#) . for guidelines on persons with legal authority to bind various types of juristic entities, and [TMEP §602 et seq](#) . regarding persons who are qualified to represent others before the USPTO in trademark cases.

When it appears that a response to an Office action is signed by an improper party, the Post Registration staff must treat the response as incomplete and follow the procedures in [TMEP §§611.05 et seq](#) .

*Correction of Deficiencies* . See [TMEP §§1613.17 et seq](#) . for information about the procedures, deadlines, and surcharge for correcting deficiencies.

### 1613.17 Correction of Deficiencies in §71 Affidavit or Declaration

37 CFR §7.39(c)

If the affidavit or declaration is filed within the time periods set forth in section 71 of the Act, deficiencies may be corrected after notification from the Office, as follows:

(1) Correcting deficiencies in affidavits or declarations timely filed within the periods set forth in sections 71(a)(1) and 71(a)(2) of the Act. If the affidavit or declaration is timely filed within the relevant filing period set forth in section 71(a)(1) or section 71(a)(2) of the Act, deficiencies may be corrected before the end of this filing period without paying a deficiency surcharge. Deficiencies may be corrected after the end of this filing period with payment of the deficiency surcharge required by section 71(c) of the Act and § 7.6.

(2) Correcting deficiencies in affidavits or declarations filed during the grace period. If the affidavit or declaration is filed during the six-month grace period provided by section 71(a)(3) of the Act, deficiencies may be corrected before the expiration of the grace period without paying a deficiency surcharge. Deficiencies may be corrected after the expiration of the grace period with payment of the deficiency surcharge required by section 71(c) of the Act and § 7.6.

(d) If the affidavit or declaration is not filed within the time periods set forth in section 71 of the Act, the registration will be cancelled.

### **1613.17(a) Correcting Deficiencies in Affidavits or Declarations Timely Filed Within the Periods Set Forth in §71(a) of the Act**

If the affidavit or declaration is filed during the periods set forth in §71(a) of the Act (i.e., during the sixth year after the date of registration in the United States, or within one year before the end of any ten-year period after the date of registration in the United States), deficiencies may be corrected, after notification from the Office, within the relevant period without paying a deficiency surcharge, or after the expiration of the relevant period with payment of the deficiency surcharge required by §71(c) of the Act, 15 U.S.C. §1141k(c).

Any deficiency must be cured before the end of the relevant filing period set forth in §71 of the Act or within the set period for response to the Office action, whichever is later. 15 U.S.C. §1141k(c). If no response is filed, or if the holder does not correct the deficient affidavit or declaration, within this time period, the registration will be cancelled, unless time remains in the grace period under §71(a)(3) of the Act, 15 U.S.C. §1141k(a)(3). If time remains in the grace period, the holder may file a complete new affidavit, with a new fee. See [TMEP §1613.16](#).

### **1613.17(b) Correcting Deficiencies in Affidavits or Declarations Filed During the Grace Period**

If the affidavit or declaration is filed during the six-month grace period under §71(a)(3) of the Act, 15 U.S.C. §1141k(a)(3), deficiencies may be corrected, after notification from the Office, before the expiration of the grace period without paying a deficiency surcharge, or after the expiration of the grace period with the deficiency surcharge required by §71(c) of the Act, 15 U.S.C. §1141k(c).

Deficiencies must be cured within six months of the issuance date of the Office action. 37 C.F.R. §7.39(a). See [TMEP §1613.16](#).

### **1613.17(c) Defects That Cannot Be Cured After Expiration of the Grace Period**

The registration will be cancelled if an affidavit or declaration of use or excusable nonuse is not filed within the time period set forth in §71 of the Act (including the grace period). 15 U.S.C. §1141k(a). Untimely filing cannot be cured after expiration of the grace period, even with a deficiency surcharge. See [TMEP §1613.04](#) regarding the deadline for filing the affidavit or declaration.

### **1613.18 Petition Under 37 C.F.R. §2.146**

The action of the Post Registration staff on a §71 affidavit or declaration may not be appealed to the Trademark Trial and Appeal Board, but the holder may file a petition to the Director for review of the action under 37 C.F.R. §§2.146(a)(2) and 7.40(b). A petition fee is required by 37 C.F.R. §§2.6 and 2.146(c). See [TMEP Chapter 1700](#) regarding petitions.

### **1613.18(a) Response to Examiner's Refusal Required Before Petition**

A response to the initial refusal to accept an affidavit or declaration is required before filing a petition, unless the Post Registration staff directs otherwise or there is no time remaining to respond to the refusal. 37 C.F.R. §7.40(a).

If the Post Registration staff continues the refusal to accept the affidavit or declaration, the holder may file a petition for review of the action under 37 C.F.R. §2.146(a)(2) within six months of the issuance date. If the holder does not file a petition within six months, the registration will be cancelled. 37 C.F.R. §7.40(b).

### **1613.18(b) Decision on Petition Is Final Action of the USPTO**

The decision on a petition under 37 C.F.R. §2.146 is the final action of the USPTO. In the absence of a request for reconsideration ( *see* [TMEP §1613.18\(c\)](#) ), or an appeal to an appropriate court ( *see* [TMEP §1613.18\(d\)](#) ) within two months of the issuance date of the decision on petition, the registration will be cancelled.

### **1613.18(c) Request for Reconsideration of Denial of Petition**

Under 37 C.F.R. §2.146(j), if a petition is denied, the petitioner may file a request for reconsideration within two months of the issuance date of the decision denying the petition. A second petition fee must be paid with the request for reconsideration. See [TMEP §1705.08](#) regarding requests for reconsideration of petition decisions.

### **1613.18(d) Appeal to Federal Court**

The holder of the registration may appeal to the United States Court of Appeals for the Federal Circuit or commence a civil action for review of the decision denying a petition. 15 U.S.C. §1071(a)(1) and (b)(1); 37 C.F.R. §2.145(a) and (c).

The deadline for filing an appeal or commencing a civil action is two months from the issuance date of the decision on petition. 15 U.S.C. §1071(a)(2) and (b)(1); 37 C.F.R. §2.145(d)(1). Under 37 C.F.R. §2.145(d)(2), one day is added to any two-month period that includes February 28.

Under 37 C.F.R. §7.40(c), a decision on petition is necessary before the holder can file an appeal or commence a civil action in any court.

## **1613.19 Section 71 Affidavit or Declaration Combined with Section 15 Affidavit or Declaration**

A §71 affidavit or declaration may be combined with a §15 affidavit or declaration, if the combined affidavit or declaration meets the requirements of both §§71 and 15.

The filing fee for a combined §71 and §15 affidavit or declaration is the sum of the cost of the individual filings. For example, if the filing fee for the §71 affidavit or declaration is \$100 per class, and the filing fee for the §15 affidavit or declaration is \$200 per class, then the filing fee for the combined affidavit or declaration under §§71 and 15 is \$300 per class.

If the combined §71 and §15 affidavit or declaration is filed during the §71 grace period, the grace period surcharge per class for the §71 affidavit or declaration must be paid. There is no grace period surcharge for a §15 affidavit or declaration.

If a combined §71 and §15 affidavit or declaration is filed, and the §71 affidavit or declaration is deficient, the deficiency may be corrected before expiration of the relevant deadline set forth in §71 of the Act for no fee, or after expiration of the relevant deadline with the deficiency surcharge required by §71(c) of the Act, 15 U.S.C. §1141k(c). See [TMEP §§1613.17](#) *et seq.* for information about the procedures, deadlines, and

surcharge for correcting deficiencies in a §71 affidavit or declaration. There is no deficiency surcharge for a §15 affidavit or declaration.

## 1614 Renewal of Registered Extension of Protection

The holder of a registered extension of protection of an international registration to the United States must renew the international registration with the IB. 37 C.F.R. §7.41(a). Renewal of international registrations is governed by Article 7 of the Madrid Protocol and Rules 29 - 31 of the Common Regs. See [TMEP §1905](#).

Under §70(b) of the Trademark Act, 15 U.S.C. §1141j(b), and Article 3ter(2) of the Protocol, if the international registration is not renewed, the IB will notify the USPTO that the registration has expired. The corresponding extension of protection to the United States will expire as of the expiration date of the international registration. The USPTO will cancel the extension of protection.

Section 9 of the Trademark Act, 15 U.S.C. §1069, does not require renewal of a registered extension of protection with the USPTO. However, the holder must file affidavits or declarations of use or excusable nonuse under §71 of the Trademark Act, 15 U.S.C. §1141k. See [TMEP §1613](#).

## 1615 Division of Registrations

### *37 CFR §2.171(b) Partial change of ownership.*

(1) In a registration resulting from an application based on section 1 or section 44 of the Act, if ownership of a registration has changed with respect to some but not all of the goods and/or services, the owner(s) may file a request that the registration be divided into two or more separate registrations. The assignment or other document changing title must be recorded in the Office. The request to divide must include the fee required by §2.6(a)(8) for each new registration created by the division, and be signed by the owner of the registration, someone with legal authority to bind the owner (e.g., a corporate officer or general partner of a partnership), or a practitioner qualified to practice under §11.14 of this chapter, in accordance with §2.193(e)(2) of this chapter.

(2) (i) When the International Bureau of the World Intellectual Property Organization notifies the Office that an international registration has been divided as the result of a change of ownership with respect to some but not all of the goods or services, the Office will construe the International Bureau's notice as a request to divide. The Office will record the partial change of ownership in the Assignment Services Branch, and divide out the assigned goods/services from the registered extension of protection (parent registration), issue an updated certificate for the parent registration, and publish notice of the parent registration in the Official Gazette.

(ii) The Office will create a new registration number for the child registration, and enter the information about the new registration in its automated records. The Office will notify the new owner that the new owner must pay the fee required by §2.6 to obtain a new registration certificate for the child registration. It is not necessary for the new owner to file a separate request to divide.

(iii) The Office will not divide a registered extension of protection unless the International Bureau notifies the Office that the international registration has been divided.

A registration can be divided only if ownership of the registration has changed with respect to some, but not all, of the goods/services. 37 C.F.R. §2.171(b). Requests to divide registrations are processed in the Post Registration Section.

See [TMEP §1615.01](#) regarding division of registrations based on applications under §§1 and 44 of the Trademark Act, and [TMEP §1615.02](#) regarding division of registered extensions of protection.

## 1615.01 Division of Registration Based on Application Under §1 or §44 of the Trademark Act

If ownership of a registration has changed with respect to some but not all of the goods/services, the owner is strongly encouraged to file a request that a registration be divided into two or more separate registrations, to ensure that USPTO records will accurately reflect current ownership information.

A party requesting division of a registration must: (1) record the change of ownership with the Assignment Recordation Branch of the USPTO; (2) file a request to divide; and (3) pay the fee required by 37 C.F.R. §2.6(a)(8) for each new registration created by the division. 37 C.F.R. §2.171(b)(1).

The request must be signed by the individual owner of the registration, someone with legal authority to bind a juristic owner (e.g., a corporate officer or general partner of a partnership), or a qualified practitioner. 37 C.F.R. §2.171(b)(1) and 2.193(e)(2); [TMEP §611.03\(b\)](#). If the owner is represented by a qualified practitioner, the practitioner must sign. 37 C.F.R. §§2.193(e)(2)(i) and 11.18(a). If the owner is not represented by a qualified practitioner, the individual owner or someone with legal authority to bind a juristic (e.g., a corporate officer or general partner of a partnership) owner must sign. 37 C.F.R. §§2.193(e)(2)(ii) and 11.14(e). In the case of joint owners who are not represented by a qualified practitioner, all must sign. 37 C.F.R. §2.193(e)(2)(ii). If the request does not meet these requirements, the Post Registration staff will issue an Office action granting the party who filed the request six months in which to comply with the requirements of the rule. If there is no response, the request to divide will be dismissed.

A party who requests division of a registration issued under the old United States classification system ( *see* [TMEP §1401.02](#) ) must agree to adopt the international classification system for both the parent and child registration. See [TMEP §1609.04](#) regarding amendment of classification.

Once the registration is divided, the USPTO will: (1) create a new registration number for the child registration and update the information about the parent and child registration in its automated records; (2) issue a new registration certificate for the child registration and an amended registration certificate for the parent registration; (3) publish notice of both the parent and child registrations in the Official Gazette and scan both the child and amended parent registration certificates into TIGRS; and (4) send a registration certificate for the child registration to the new owner. The USPTO will not send an amended registration certificate for the parent registration to the owner of the parent registration unless the owner submits a request and pays the fee required by 37 C.F.R. §2.6(a)(8).

A registration may be divided more than once.

## **1615.02 Division of Registered Extension of Protection**

When ownership of an international registration changes with respect to some but not all of the goods/services for all designated Contracting Parties, the IB will create a separate new international registration for the goods/services that have been transferred, and notify the USPTO accordingly. *See the IB's Guide to International Registration*, Para. B.II.67.01.

When the IB notifies the USPTO of the division of an international registration resulting from a change of ownership with respect to some but not all of the goods/services, the USPTO will construe the IB's notice as a request to divide. The USPTO will record the partial change of ownership in the Assignment Recordation Branch, divide out the assigned goods/services from the registered extension of protection (parent registration), issue an updated certificate for the parent registration, and publish notice of the parent registration in the *Official Gazette*. 37 C.F.R. §2.171(b)(2)(i).

The USPTO will create a new registration number for the child, and enter the information about the new registration into the Trademark database. The USPTO will notify the new owner that the new owner must pay the fee required by 37 C.F.R. §2.6(a)(8) to obtain a new registration certificate for the child registration. It is not necessary for the new owner to file a separate request to divide. 37 C.F.R. §2.171(b)(2)(ii). If the new owner does not respond to the notice, the child registration will remain active, as long as the owner

files the necessary maintenance documents, but the USPTO will not issue a new registration certificate for the child registration, or publish notice of the child registration in the *Official Gazette* .

The USPTO will not divide a registered extension of protection to the United States unless the IB notifies the USPTO that the international registration has been divided. 37 C.F.R. §2.171(b)(2)(iii).

A registration may be divided more than once.

See [TMEP §1110.11](#) regarding division of a pending §66(a) application after ownership has changed with respect to some but not all of the goods/services, and [TMEP §501.07](#) regarding assignment of extensions of protection.

## **1616 Replacement**

If a United States national registration and a subsequently issued certificate of extension of protection of an international registration to the United States are (1) owned by the same person, (2) identify the same mark, and (3) list the same goods or services, the extension of protection shall have the same rights as those accrued to the United States national registration at the time the certificate of extension of protection issues. Section 74 of the Trademark Act, 15 U.S.C. §1141n; 37 C.F.R. §7.28(a); Article 4bis. See [TMEP §1904.12](#) for further information on requests to note replacement of a United States national registration with a registered extension of protection. All requests to note replacements should be directed to the Madrid Processing Unit.

# Chapter 1700 Petitions, Requests for Reinstatement, and Other Matters Submitted to Director

---

<b>1701</b>	<b>Statutory Authority of Director</b>
<b>1702</b>	<b>Petitions to the Director Under 37 C.F.R. §2.146 - In General</b>

## 1701 Statutory Authority of Director

The United States Patent and Trademark Office (“USPTO”) is led by the Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office (“Director”). The Commissioner for Trademarks oversees the staff and operations of the USPTO with regard to trademark matters. 35 U.S.C. §3(b)(2). See [TMEP §1709](#) regarding delegation of duties by the Director.

The Patent and Trademark Office Efficiency Act, Subtitle G of the American Inventors Protection Act of 1999, Pub. L. 106-113, 113 Stat. 1501A-572, amended Title 35 of the United States Code to reorganize the USPTO as a performance-based organization within the Department of Commerce. See *Reestablishment of the Patent and Trademark Office as the United States Patent and Trademark Office*, 1234 TMOG 41 (May 9, 2000). Section 4732(b)(1)(B) of the Patent and Trademark Office Efficiency Act, 113 Stat. 1501A-583, amended the Trademark Act of 1946, 15 U.S.C. 1051 *et seq.* (except for §17) to strike “Commissioner” in each place that it appears and substitute “Director.” Section 4741(b) of the Patent and Trademark Office Efficiency Act, 113 Stat. 1501A-586, provides that:

Any reference in any other Federal law, Executive order, rule, regulation, or delegation of authority, or any document of or pertaining to the Patent and Trademark Office-

- (1) to the Commissioner of Patents and Trademarks is deemed to refer to the Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office; [and]

\* \* \*

- (3) to the Assistant Commissioner for Trademarks is deemed to refer to the Commissioner for Trademarks.

Under 15 U.S.C. §1123 and 35 U.S.C. §2(b)(2), the Director may establish regulations for the conduct of proceedings in the USPTO.

Citation to decisions issued by the Director on petition on or after March 29, 2000 must include a parenthetical reference to “(Dir USPTO <specify year>).” Citation to decisions issued by the Commissioner for Patents and Trademarks prior to March 29, 2000 must reference “(Comm’r Pats. <specify year>).”

See [TMEP §1709](#) regarding delegation of the Director’s authority.

## 1702 Petitions to the Director Under 37 C.F.R. §2.146 - In General

### *37 CFR §2.146 Petitions to the Director.*

(a) Petition may be taken to the Director: (1) From any repeated or final formal requirement of the examiner in the ex parte prosecution of an application if permitted by §2.63(b); (2) in any case for which the Act of 1946, or Title 35 of the United States Code, or this Part of Title 37 of the Code of Federal Regulations specifies that the matter is to be determined directly or reviewed by the Director; (3) to invoke the supervisory authority of the Director in appropriate circumstances; (4) in any case not specifically defined and provided for by this Part of Title 37 of the Code of Federal Regulations; (5) in an extraordinary situation, when justice requires and no other party is injured thereby, to request a suspension or waiver of any requirement of the rules not being a requirement of the Act of 1946.

(b) Questions of substance arising during the ex parte prosecution of applications, including, but not limited to, questions arising under §§2, 3, 4, 5, 6 and 23 of the Act of 1946, are not considered to be appropriate subject matter for petitions to the Director.

(c) Every petition to the Director shall include a statement of the facts relevant to the petition, the points to be reviewed, the action or relief requested, and the fee required by §2.6. Any brief in support of the petition shall be embodied in or accompany the petition. The petition must be signed by the petitioner, someone with legal authority to bind the petitioner (e.g., a corporate officer or general partner of a partnership), or a practitioner qualified to practice under §11.14 of this chapter, in accordance with the requirements of §2.193(e)(5). When facts are to be proved on petition, the petitioner must submit proof in the form of affidavits or declarations in accordance with §2.20, signed by someone with firsthand knowledge of the facts to be proved, and any exhibits.

(d) A petition must be filed within two months of the date of issuance of the action from which relief is requested, unless a different deadline is specified elsewhere in this chapter.

(e)(1) A petition from the grant or denial of a request for an extension of time to file a notice of opposition must be filed within fifteen days from the date of issuance of the grant or denial of the request. A petition from the grant of a request must be served on the attorney or other authorized representative of the potential opposer, if any, or on the potential opposer. A petition from the denial of a request must be served on the attorney or other authorized representative of the applicant, if any, or on the applicant. Proof of service of the petition must be made as provided by §2.119. The potential opposer or the applicant, as the case may be, may file a response within fifteen days from the date of service of the petition and must serve a copy of the response on the petitioner, with proof of service as provided by §2.119. No further document relating to the petition may be filed.

(2) A petition from an interlocutory order of the Trademark Trial and Appeal Board must be filed within thirty days after the date of issuance of the order from which relief is requested. Any brief in response to the petition must be filed, with any supporting exhibits, within fifteen days from the date of service of the petition. Petitions and responses to petitions, and any documents accompanying a petition or response under this subsection must be served on every adverse party pursuant to §2.119.

(f) An oral hearing will not be held on a petition except when considered necessary by the Director.

(g) The mere filing of a petition to the Director will not act as a stay in any appeal or inter partes proceeding that is pending before the Trademark Trial and Appeal Board nor stay the period for replying to an Office action in an application except when a stay is specifically requested and is granted or when §§2.63(b) and 2.65 are applicable to an ex parte application.

(h) Authority to act on petitions, or on any petition, may be delegated by the Director.

(i) Where a petitioner seeks to reactivate an application or registration that was abandoned, cancelled or expired because documents were lost or mishandled, the Director may deny the petition if the petitioner was not diligent in checking the status of the application or registration. To be considered diligent, a petitioner must:

(1) During the pendency of an application, check the status of the application every six months between the filing date of the application and issuance of a registration;

(2) After registration, check the status of the registration every six months from the filing of an affidavit of use or excusable nonuse under section 8 or 71 of the Act, or a renewal application under section 9 of the Act, until the petitioner receives notice that the affidavit or renewal application has been accepted; and

(3) If the status check reveals that the Office has not received a document filed by the petitioner, or that the Office has issued an action or notice that the petitioner has not received, the petitioner must promptly request corrective action.

(j) If the Director denies a petition, the petitioner may request reconsideration, if the petitioner:

- (1) Files the request within two months of the date of issuance of the decision denying the petition; and
- (2) Pays a second petition fee under §2.6.

Applicants, registrants, and parties to inter partes proceedings before the Trademark Trial and Appeal Board (“Board”) who believe they have been injured by certain adverse actions of the USPTO, or who believe that they cannot comply with the requirements of the Trademark Rules of Practice (37 C.F.R. Parts 2, 3, 6, and 7) because of an extraordinary situation, may seek equitable relief by filing a petition under 37 C.F.R. §2.146.

Under 37 C.F.R. §2.146(a)(1), an applicant may file a petition to review an examining attorney’s formal requirement if permitted by 37 C.F.R. §2.63(b). Under 37 C.F.R. §2.63(b)(1), a petition from a requirement that is repeated but not made final is permitted if the subject matter of the requirement is appropriate for petition. Under 37 C.F.R. §2.63(b)(2), a petition from a final requirement is permitted only if the final action *is limited to* subject matter appropriate for petition. See [TMEP §1704](#) regarding petitionable subject matter. If a petition under 37 C.F.R. §2.146(a)(1) is denied, the applicant has six months from the issuance date of the Office action that repeated the requirement or made it final, or thirty days from the date of the decision on the petition, whichever is later, to comply with the requirement. 37 C.F.R. §2.63(b).

Under 37 C.F.R. §2.146(a)(2), a petition may be filed in any case for which the Trademark Act, Trademark Rules of Practice, or Title 35 of the United States Code specifies that the matter is to be determined directly or reviewed by the Director. This includes petitions to review the actions of the Post Registration staff under 15 U.S.C. §§1057, 1058, 1059, and 1141k.

Under 35 U.S.C. §2 and 37 C.F.R. §2.146(a)(3), the Director may invoke supervisory authority in appropriate circumstances. See [TMEP §1707](#).

Under 37 C.F.R. §2.146(a)(5), a party may petition the Director to suspend or waive any requirement of the rules that is not a requirement of the statute, in an extraordinary situation, where justice requires and no other party is injured thereby. See [TMEP §1708](#).

See [TMEP §1703](#) for a list of issues that often arise on petition, and [TMEP §§1705–1705.09](#) regarding petition procedure.

## 1703 Specific Types of Petitions

A variety of issues may be reviewed on petition. The following is a list of issues that commonly arise:

*Petitions to Restore an Application Filing Date.* See [TMEP §1711](#).

*Petitions to Make Special.* See [TMEP §1710](#).

*Petitions to Reverse an Examining Attorney’s Holding of Abandonment for Failure to File a Complete Response to an Office Action* are reviewed under 37 C.F.R. §2.146(a)(3). See [TMEP §1713](#).

*Petitions to Revive an Application Abandoned Due to Unintentional Delay in Responding to an Office Action or Notice of Allowance* are considered under 37 C.F.R. §2.66. See [TMEP §§1714–1714.01\(g\)](#).

*Petitions to Restore Jurisdiction to the Examining Attorney* may be filed by the applicant under 37 C.F.R. §2.84, when the examining attorney does not have jurisdiction to review an amendment to the application. See [TMEP §§1504–1504.05](#).

*Petitions to Review the Action of an Examining Attorney.* A petition to review an examining attorney’s formal requirement may be filed under 37 C.F.R. §§2.63(b) and 2.146(a)(1), if the requirement is

repeated or made final and the subject matter is appropriate for petition. See [TMEP §1704](#) regarding petitionable subject matter, and [TMEP §1706](#) regarding the standard of review.

*Petitions to Review the Action of the Post Registration Staff* may be filed if an affidavit of use or excusable nonuse is refused under 15 U.S.C. §1058 or §1141k, a renewal application is refused under 15 U.S.C. §1059, or a proposed amendment or correction is refused under 15 U.S.C. §1057. See 37 C.F.R. §§2.165, 2.176, 2.186; [TMEP §§1604.18, 1606.14](#).

*Petitions to Review the Refusal of the Madrid Processing Unit to Certify an Application for International Registration* are reviewed under 37 C.F.R. §2.146(a)(3). See [TMEP §1902.03\(a\)](#).

*Petitions to Reverse a Nonfinal Decision of the Trademark Trial and Appeal Board* (37 C.F.R. §2.146(e)(2)) are reviewed under the standard of clear error or abuse of discretion, if the subject matter is appropriate for consideration on petition. *Riko Enters., Inc. v. Lindsley*, 198 USPQ 480 (Comm'r Pats. 1977). See [Trademark Trial and Appeal Board Manual of Procedure](#) ("TBMP") §§901.02(a), 905.

*Petitions to Review a Decision to Deny or Grant a Request for an Extension of Time to Oppose* (37 C.F.R. §2.146(e)(1)) are reviewed to determine whether the Board correctly applied 37 C.F.R. §§2.101 and 2.102.

*Petitions to Add or Substitute a Basis After Publication* are reviewed under 37 C.F.R. §2.146(a)(2). See 37 C.F.R. §2.35(b)(2); [TMEP §§806.03\(j\)-806.03\(j\)\(iii\)](#).

See [TMEP §1607](#) and TBMP §§303, 307, 308, and 309 regarding petitions to cancel registrations under 15 U.S.C. §1064, which are handled by the Board.

## 1704 Petitionable Subject Matter

### *Ex Parte Examination*

Under 37 C.F.R. §2.63(b), an applicant may petition the Director to review an examining attorney's repeated or final requirement if the subject matter of the requirement is appropriate for petition. However, under 37 C.F.R. §2.146(b), "[q]uestions of substance arising during the ex parte prosecution of applications, including, but not limited to, questions arising under §§2, 3, 4, 5, 6 and 23 of the Act of 1946, are not considered to be appropriate subject matter for petitions..."

Procedural issues reviewable on petition include: whether a disclaimer was properly printed in standardized format; whether an examining attorney acted properly in suspending an application; whether an examining attorney acted properly in holding an application abandoned for failure to file a complete response to an Office action (see [TMEP §1713](#)); and whether it was premature for an examining attorney to issue a final action.

Substantive issues that arise in ex parte examination are not proper subject matter for petition, and may be reviewed only by the Trademark Trial and Appeal Board on appeal. See [TMEP §§1501–1501.07](#) regarding appeal procedure. For example, an examining attorney's requirement for a special form drawing that agrees with the mark shown on the specimen(s) of record may not be reviewed on petition, because it requires an analysis of the commercial impression of the mark. *In re Hart*, 199 USPQ 585, 587 (Comm'r Pats. 1978). An examining attorney's requirement for a disclaimer of a feature of a mark is also improper subject matter for petition. *Ex parte Florida Citrus Cannery Coop.*, 37 USPQ 463 (Comm'r Pats. 1938); *Ex parte Kleen-O-Dent Labs., Inc.*, 37 USPQ 232 (Comm'r Pats. 1938). The question of whether an amendment to a drawing is a material alteration of the mark is not petitionable, but the question of whether USPTO practice permits an applicant to correct an allegedly obvious typographical error on a drawing was found to be

reviewable on petition. *In re Tetrafluor Inc.*, 17 USPQ2d 1160 (Comm’r Pats. 1990). The determination of what is appealable and what is petitionable is made on a case-by-case basis.

Some issues that arise in ex parte examination may be reviewed by either petition or appeal. For example, the question of who is a proper signatory of a statement of use or other verification of facts on behalf of an applicant may be reviewed by either petition or appeal. *In re Dermahose Inc.*, 82 USPQ2d 1793, 1795, n.5 (TTAB 2007).

A requirement for amendment of an identification of goods/services may also be reviewed by either petition or appeal. *In re Stenographic Machs., Inc.*, 199 USPQ 313, 316 (Comm’r Pats. 1978). On the other hand, a requirement for amendment of the classification is a procedural matter that may only be reviewed on petition. *In re Tee-Pak, Inc.*, 164 USPQ 88, 89 (TTAB 1969).

If an applicant files a petition from an examining attorney’s formal requirement, the applicant may not subsequently appeal the requirement to the Board. 37 C.F.R. §2.63(b).

See TBMP §1201.05 for further information about appealable versus petitionable subject matter in examination.

### *Post Registration*

Trademark Rule 2.146(b) applies only to questions of substance that arise during ex parte examination of applications for registration. The Director considers questions of substance, such as whether a proposed amendment materially alters a registered mark or whether a specimen supports use of a registered mark, when reviewing the action of the Post Registration staff in connection with a proposed amendment filed under 15 U.S.C. §1057 (“§7 amendment”), or an affidavit of use under 15 U.S.C. §1058 or §1141k (“§8 affidavit” or “§71 affidavit”). The decisions of Post Registration staff under 15 U.S.C. §§1057, 1058, 1059, and 1141k may not be appealed to the Board.

An owner may petition the Director under Trademark Rule 2.146(a)(3), 37 C.F.R. §2.146(a)(3), to request that an affidavit or declaration of incontestability under §15 of the Trademark Act, 15 U.S.C. §1065, be abandoned if the owner determines, after timely filing the affidavit or declaration, that the affidavit or declaration contained an inaccuracy. See [TMEP §1605.03](#).

Cancellation of a registration for failure to file an affidavit or declaration under §8 or §71 of the Trademark Act (15 U.S.C. §§1058, 1141k), or expiration of a registration for failure to file a renewal application under §9 (15 U.S.C. §1059), does not constitute petitionable subject matter under the “unintentional delay” standard of 37 C.F.R. §2.66. See [TMEP §1714.01\(f\)\(ii\)\(D\)](#). Furthermore, a petition under 37 C.F.R. §2.146 requesting that the Director accept a late-filed §8 or §71 affidavit or declaration, or a §9 renewal application, will not be granted because the Director has no authority to waive the deadline for filing these documents. See [TMEP §§1604.04, 1606.03, 1707](#).

### *Inter Partes Proceedings Before Trademark Trial and Appeal Board*

In an inter partes proceeding before the Trademark Trial and Appeal Board, a party may petition the Director to review an order or decision of the Board that concerns a matter of procedure and does not put an end to the litigation before the Board. *See* TBMP §§901.02(a), 905.

## 1705 Petition Procedure

A petition should include a verified statement of the relevant facts, the points to be reviewed, the requested action or relief, and the fee required by 37 C.F.R. §2.6. 37 C.F.R. §2.146(c). The petition should be accompanied by a supporting brief and any evidence to be considered.

### 1705.01 Standing

A person must have standing to file a petition. *See Ex parte Lasek*, 115 USPQ 145 (Comm’r Pats. 1957).

There is no provision in the Trademark Act or Rules of Practice for intercession by a third party in an ex parte matter. Accordingly, petitions by third parties to review actions taken in ex parte matters are denied.

### 1705.02 Petition Fee

A petition must be accompanied by the fee required by 37 C.F.R. §2.6.

Any petition that is not accompanied by the required fee is incomplete. A staff attorney or paralegal in the Office of the Deputy Commissioner for Trademark Examination Policy will notify the petitioner in writing that the petition is incomplete and grant the petitioner 30 days to submit the fee. If the fee is not submitted within the time allowed, the petition is denied without consideration on the merits, because the petitioner has not met the requirements for filing a petition. *See* 37 C.F.R. §2.146(c).

A petition fee will be waived only in an extraordinary situation ( *see* [TMEP §1708](#)), or if the record clearly shows that the petition was the result of a USPTO error. When requesting waiver of a fee, it is recommended that the petitioner submit the fee, but include a request that the fee be refunded because the petition was the result of a USPTO error. This will expedite consideration of the petition if the request for waiver of the petition fee is denied.

If a check submitted as a petition fee is returned to the USPTO unpaid, or an electronic funds transfer or credit card is refused or charged back by a financial institution, the petitioner must resubmit the petition fee, along with a fee for processing the payment that was refused or charged back, before the petition will be considered on the merits. 37 C.F.R. §2.6(b)(12). *See* [TMEP §405.06](#).

### 1705.03 Evidence and Proof of Facts

A petition should include a statement of the relevant facts, and should be accompanied by any evidence to be considered. Under 37 C.F.R. §2.146(c), when facts are to be proved, the petitioner must submit proof in the form of an affidavit or declaration under 37 C.F.R. §2.20.

An affidavit or declaration supporting a petition should be based on firsthand knowledge. For example, if the petition arises from the loss or misplacement of a document submitted to the USPTO, it should be accompanied by the affidavit or declaration of the person who sent the document, attesting to the date of submission and identifying the document filed with the petition as a true copy of the document previously filed.

When a petition includes an unverified assertion that is not supported by evidence, a staff attorney or paralegal in the Office of the Deputy Commissioner for Trademark Examination Policy will notify the petitioner that an affidavit or declaration is required, and grant the petitioner 30 days to submit the necessary verification.

If the petitioner does not submit a verification within the time allowed, the petition will be denied, or, in appropriate cases, a decision on petition will be rendered based on the information in the record, without consideration of the unverified assertion.

This procedure is also followed with respect to physical evidence. If physical evidence is available, such as a postcard receipt that shows the date of actual receipt of a document in the USPTO ( *see* [TMEP §303.02\(c\)](#)), or a copy of a cancelled check that shows receipt of the filing fee for a missing document, the petitioner should include the evidence with the initial petition. However, if the evidence is omitted from the initial filing, the USPTO will give the petitioner an opportunity to supplement the petition within a specified time limit, normally 30 days.

### 1705.04 Timeliness

To avoid prejudicing the rights of third parties, petitions must be filed within a reasonable time after the disputed event. In many cases, deadlines for filing petitions are expressly stated in the rules. The following petition deadlines run from the issuance date of the action or order of which the petitioner seeks review:

- Denial of a request for an extension of time to file a notice of opposition -- 15 days (37 C.F.R. §2.146(e)(1));
- Interlocutory order of the Trademark Trial and Appeal Board -- 30 days (37 C.F.R. §2.146(e)(2));
- Final decision of the Trademark Trial and Appeal Board -- two months (37 C.F.R. §2.146(d));
- Denial of a request for an extension of time to file a statement of use -- two months (37 C.F.R. §2.89(g));
- Section 7 rejection -- six months from date of issuance of Office action refusing to enter an amendment or correction (37 C.F.R. §2.176);
- Section 8 rejection -- six months from date of issuance of Office action maintaining a refusal of the affidavit (37 C.F.R. §2.165(b); *see* [TMEP §§1604.18–1604.18\(a\)](#));
- Section 9 rejection -- six months from date of issuance of Office action maintaining a refusal of the renewal (37 C.F.R. §2.186(b); *see* [TMEP §§1606.14–1606.14\(a\)](#));
- Petition to revive -- two months from date of issuance of notice of abandonment or two months from the date of actual knowledge of the abandonment, if the applicant did not receive the notice of abandonment, and the applicant was diligent in checking the status of the application every six months in accordance with §2.146(i) (37 C.F.R. §2.66(a); *see* [TMEP §§1705.05, 1714–1714.01\(g\)](#));
- Petition to revive goods/services/classes deleted for failure to respond to a partial refusal or requirement - two months from date of issuance of the examiner’s amendment deleting (abandoning) the goods/services/classes to which the refusal or requirement pertained or two months from the date of actual knowledge of the issuance of the examiner’s amendment deleting (abandoning) the goods/services/classes to which the refusal or requirement pertained, if the applicant did not receive the examiner’s amendment and the applicant was diligent in checking the status of the application every six months in accordance with §2.146(i) (37 C.F.R. §2.66(a); *see* [TMEP §§718.02\(a\), 1705.05, 1714–1714.01\(g\)](#));
- Examining attorney’s formal requirement -- six months from date of issuance (15 U.S.C. §1062(b); 37 C.F.R. §§2.62, 2.63(b));
- Request for reconsideration of decision on petition -- two months from date of issuance (37 C.F.R. §§2.66(f)(1), 2.146(j)(1)).

If the rules do not provide an express deadline, the petition must be filed within two months of the date of issuance of the action from which relief is requested, under 37 C.F.R. §2.146(d).

If there is no “issuance of an action,” the two-month “catchall deadline” of 37 C.F.R. §2.146(d) runs from the date of actual knowledge, or the date of the phone call or other communication that prompts the filing of the petition. See [TMEP §1705.05](#) regarding diligence. The two-month deadline of 37 C.F.R. §2.146(d) also applies where the petition alleges that the petitioner did not receive the action that prompts the filing of the petition, running from the date of the petitioner’s actual knowledge of said action.

The time limits set forth in the rules are strictly enforced. Petitions filed after the expiration of the deadlines are denied as untimely. If the petitioner can show that extraordinary circumstances caused the delay in filing the petition, the petitioner may request waiver of these time limits, pursuant to 37 C.F.R. §§2.146(a)(5) and 2.148. See [TMEP §1708](#) regarding waiver of rules.

The petition fee is refunded when a petition is denied as untimely.

Petitions filed using the certificate of mailing and certificate of transmission procedures of 37 C.F.R. §2.197 will be considered timely if mailed or transmitted to the USPTO by the due date, with a certificate that meets the requirements of 37 C.F.R. §2.197(a)(1) ( see [TMEP §§305.02, 306.05–306.05\(d\)](#)).

See [TMEP §1705.05](#) regarding the duty to exercise due diligence in monitoring the status of pending matters.

## **1705.05 Due Diligence**

Applicants and registrants are responsible for tracking the status of matters pending before the USPTO. When a petitioner seeks to reactivate an application or registration that was abandoned, cancelled, or expired due to the loss or mishandling of documents sent to or from the USPTO, the USPTO may deny the petition if the petitioner was not diligent in checking the status of the application or registration, even if the petitioner can show that the USPTO actually received documents, or declares that a notice from the USPTO was never received by the petitioner. 37 C.F.R. §2.146(i).

The required showing of diligence is necessary to protect third parties who may be harmed by the removal and later reinsertion of an application or registration into the USPTO’s database. For example, a third party may have searched USPTO records and begun using a mark because the search showed no earlier-filed conflicting marks, or an examining attorney may have searched USPTO records and approved a later-filed application for a conflicting mark because the examining attorney was unaware of the earlier-filed application.

The USPTO generally processes applications, responses, and other documents in the order in which they are received. Since it is reasonable to expect some notice from the USPTO about a pending matter within six months of the filing or receipt of a document, a party who has not received the expected written action or telephone call from the USPTO within that time frame should be on notice that the filing may have been lost. The party awaiting notification has the burden of inquiring as to the cause of the delay, and requesting corrective action in writing when necessary.

To be considered diligent, a petitioner must:

- Check the status of a pending application every six months between the filing date of the application and issuance of a registration;

- Check the status of a registration every six months after filing an affidavit of use or excusable nonuse under §8 or §71 of the Trademark Act, or a renewal application under §9 of the Trademark Act (“§9 renewal application”), until the petitioner receives notice that the affidavit or renewal application has been accepted; and
- Promptly request corrective action in writing where necessary.

37 C.F.R. §2.146(i). See notice at 68 FR 55748 (Sept. 26, 2003).

Applicants and registrants should check the status on each six-month anniversary of the filing of an application for registration, §8 or §71 affidavit, or §9 renewal application to avoid abandonment or cancellation and to ensure that they meet the diligence requirement. For example, if an application was filed on October 1, 2009, the applicant should check the status on May 1, 2010, November 1, 2010, and on each six-month anniversary thereafter, until a registration is issued.

However, to provide applicants, registrants, and their attorneys with flexibility in docketing deadlines for both responses and status checks, an applicant or registrant will meet the diligence requirement if the applicant or registrant checks the status within six months of the filing or receipt of a document for which further action by the USPTO is expected.

Applicants and registrants can check the status of an application or registration through the Trademark Status and Document Retrieval (“TSDR”) database on the USPTO website at <http://tsdr.uspto.gov/>, which is available 24 hours a day, seven days a week. The party should print the TSDR screen and place it in the party’s own file, in order to have a record of the status inquiry and the information learned.

A party who does not have access to the Internet can call the Trademark Assistance Center at (571) 272-9250 or (800) 786-9199 to determine the status. After making a telephone status inquiry, a party should make a note in the party’s own file as to the date of the status inquiry and the information learned. No further documentation is required to establish that the status inquiry was made. Written status inquiries are discouraged, because they may delay processing of the application or registration.

If a status inquiry reveals that a document sent to the USPTO was not received, that an Office action or notice was issued but not received by the applicant or registrant, that an application has been abandoned or a registration cancelled or expired, or that some other problem exists, corrective action should be promptly requested in writing. 37 C.F.R. §2.146(i)(3). Petitions should be directed to the Office of the Deputy Commissioner for Trademark Examination Policy. Requests for reinstatement should be directed to the paralegals in the Office of the Deputy Commissioner for Trademark Examination Policy, the supervisory legal instruments examiner in the law office, or the supervisor of the ITU/Divisional Unit or Post Registration Section. See [TMEP §§1712](#) *et seq.* regarding requests for reinstatement.

Where a registrant has proof that a USPTO error caused a registration to expire or be cancelled due to failure to file a §8 affidavit, §71 affidavit, §9 renewal application, or a response to an examiner’s Office action refusing to accept an affidavit of use or excusable nonuse or a renewal application, the registrant may file a request for reinstatement. See [TMEP §1712.02\(a\)](#) regarding the types of proof of USPTO error that will support a request for reinstatement. Generally, where there is proof that a registration was cancelled solely due to a USPTO error, a request for reinstatement will not be denied solely because the registrant was not diligent in monitoring the status of the §8 affidavit or renewal application. However, if a registrant receives a written notice of cancellation, or has actual notice that a registration was cancelled, the USPTO will deny the request for reinstatement as untimely if it was not filed: (1) within two months of the issuance date of

the cancellation notice; or (2) within two months of actual notice of cancellation, if the registrant did not receive a written cancellation notice. 37 C.F.R. §2.146(d).

A request to reinstate an *application* abandoned due to USPTO error ( *see* [TMEP §1712.01](#)) must be timely ( *see* [TMEP §1705.04](#)) and may be denied if the applicant was not diligent in monitoring the status of the application. 37 C.F.R. §§2.66(a)(2), 2.146(i).

## **1705.06 Stay or Suspension of Pending Matters**

*37 CFR §2.146(g) (Extract)*

The mere filing of a petition ... will not act as a stay in any appeal or inter partes proceeding that is pending before the Trademark Trial and Appeal Board nor stay the period for replying to an Office action in an application except when a stay is specifically requested and is granted or when §§2.63(b) and 2.65 are applicable to an ex parte application.

Filing a petition does not stay the period for replying to an Office action, except when a stay is specifically requested and granted under 37 C.F.R. §2.146(g), or when 37 C.F.R. §§2.63(b) and 2.65 are applicable. Any request to stay a deadline for filing a response to an Office action or notice of appeal should be directed to the Office of the Deputy Commissioner for Trademark Examination Policy. If such a request is sent to the examining attorney, the examining attorney should forward it to the Office of the Deputy Commissioner for Trademark Examination Policy. If a stay has not been specifically requested and granted under 37 C.F.R. §2.146, the examining attorney must *not* suspend action on an application pending a decision on petition.

A request to suspend a proceeding before the Board pending a decision on petition should be directed to the Board. 37 C.F.R. §2.117(c); TBMP §510.03(a). See TBMP §§510–510.03(b), 1213 regarding suspension of Board proceedings.

Filing a petition to revive an application abandoned for failure to file a proper statement of use or request for an extension of time to file a statement of use does not stay the time for filing a statement of use or further extension request(s). *See* [TMEP §1714.01\(b\)\(i\)](#).

## **1705.07 Signature of Petition**

A petition to the Director under 37 C.F.R. §2.146 must be personally signed by the individual petitioner, someone with legal authority to bind a juristic petitioner (e.g., a corporate officer or general partner of a partnership), or a practitioner authorized to practice before the USPTO pursuant to 37 C.F.R. §11.14 (“qualified practitioner”). 37 C.F.R. §2.146(c). *See* [TMEP §602](#) regarding persons authorized to represent a party before the USPTO, and [TMEP §§611.06–611.06\(h\)](#) for guidelines on persons with legal authority to bind various types of legal entities.

Petitions to the Director under 37 C.F.R. §2.146 are often accompanied by separate verifications, signed by someone with firsthand knowledge of the facts to be proved on petition. *See* [TMEP §1705.03](#). However, the petition itself must be separately signed by a proper party. If the petitioner is represented by a qualified practitioner, the practitioner must sign the petition. 37 C.F.R. §§2.193(e)(5)(i), 11.18(a); [TMEP §611.03\(e\)](#). If the petitioner is not represented by a qualified practitioner, the petition must be signed by the petitioner or someone with legal authority to bind the petitioner. 37 C.F.R. §§2.146(c), 2.193(e)(5)(ii); [TMEP §611.03\(e\)](#). In the case of joint petitioners who are not represented by a qualified practitioner, all must sign. 37 C.F.R. §2.193(e)(5)(ii); [TMEP §611.03\(e\)](#).

Petitions to revive under 37 C.F.R. §2.66 ( *see* [TMEP §§1714–1714.01\(g\)](#)) must include a statement that the delay was unintentional, signed by someone with firsthand knowledge. 37 C.F.R. §§2.66(b)(2), (c)(2);

[TMPEP §1714.01\(e\)](#). Where a petition to revive under 37 C.F.R. §2.66 consists only of a statement that the delay was unintentional and/or that the applicant did not receive an Office action or notice of allowance, the petition may be signed by someone with firsthand knowledge, and no separate signature by the petitioner, someone with legal authority to bind the petitioner, or a qualified practitioner is required. However, any response to an Office action accompanying the petition ( *see* [TMPEP §§1714.01\(a\)\(i\)-\(ii\)](#)) must be signed by a proper party. 37 C.F.R. §§2.62(b), 11.18(a); [TMPEP §712](#).

If it appears that a petition (or a response accompanying a petition) was signed by an improper party, the staff attorney or paralegal reviewing the petition will follow the procedures in [TMPEP §§611.05–611.05\(c\)](#) for processing documents signed by unauthorized parties.

See also [TMPEP §611.01\(c\)](#) regarding signature of documents filed electronically.

### **1705.08 Request for Reconsideration of Denial of Petition**

Under 37 C.F.R. §2.146(j), if a petition is denied, the petitioner may request reconsideration by: (1) filing the request for reconsideration within two months of the issuance date of the decision denying the petition; and (2) paying a second petition fee under 37 C.F.R. §2.6.

If the petitioner presents new facts that warrant equitable relief, the request for reconsideration may be granted. Any request for reconsideration that merely reiterates or expands on arguments previously presented will be denied.

Since contested matters must be brought to a conclusion within a reasonable time, a second request for reconsideration of a decision on petition will be granted only in rare situations, when the petitioner presents significant facts or evidence not previously available. *In re Am. Nat'l Bank and Trust Co. of Chi.*, 33 USPQ2d 1535, 1537 (Comm'r Pats. 1993).

### **1705.09 Appeal to Federal Court**

Under 15 U.S.C. §§1071(a)(1), (b)(1) and 37 C.F.R. §§2.145(a), (c), a registrant who is adversely affected by the Director's decision regarding a §8 affidavit, §71 affidavit, or §9 renewal application may appeal to the United States Court of Appeals for the Federal Circuit or commence a civil action for review of the decision on petition. 15 U.S.C. §§1071(a)(1), (b)(1); 37 C.F.R. §§2.145(a), (c).

Other types of Director's decisions are not subject to appeal. *See In re Marriott-Hot Shoppes, Inc.*, 411 F.2d 1025, 1028, 162 USPQ 106, 109–110 (C.C.P.A. 1969).

The deadline for filing an appeal or commencing a civil action is two months from the issuance date of the decision. 37 C.F.R. §2.145(d)(1). Under 37 C.F.R. §2.145(d)(2), one day is added to any two-month period that includes February 28.

### **1706 Standard of Review on Petition**

The standard of review on petition depends on the particular section of the rules under which the petition is filed.

In review of an examining attorney's formal requirement under 37 C.F.R. §§2.63(b) and 2.146(a)(1), the standard of review is whether the examining attorney's judgment was correct, the same standard that the

Trademark Trial and Appeal Board would use if it were considering the requirement on appeal. *In re Du Pont Merck Pharm. Co.*, 34 USPQ2d 1778, 1781 (Comm'r Pats. 1995); *In re Stenographic Machs., Inc.*, 199 USPQ 313, 316 (Comm'r Pats. 1978). However, in review of an examining attorney's action under 37 C.F.R. §2.146(a)(3), the Director will reverse the examining attorney only where there has been clear error or an abuse of discretion. *In re GTE Educ. Servs.*, 34 USPQ2d 1478, 1479–1480 (Comm'r Pats. 1994); *In re Direct Access Commc'ns (M.C.G.) Inc.*, 30 USPQ2d 1393, 1394 (Comm'r Pats. 1993). See 37 C.F.R. §2.146(b) and [TMEP §1704](#) regarding petitionable subject matter.

The Director reviews the actions of the Post Registration staff on §8 affidavits, §71 affidavits, §9 renewal applications, and §7 amendments, to determine whether the judgment of the examiner was correct. See *In re Umax Data Sys., Inc.*, 40 USPQ2d 1539, 1541 (Comm'r Pats. 1996) (announcing change in standard of review of petitions to review Post Registration decisions on §7 amendments).

The Director will reverse an action of the Board on petition under 37 C.F.R. §2.146(a)(3) only for clear error or abuse of discretion. *Riko Enterprises, Inc. v. Lindsley*, 198 USPQ 480, 482 (Comm'r Pats. 1977).

The Director reviews the denial of an application filing date to determine whether the denial was correct. See [TMEP §204.02](#).

### **1707 Director's Supervisory Authority Under 37 C.F.R. §2.146(a)(3)**

Under 35 U.S.C. §2 and 37 C.F.R. §2.146(a)(3), the Director may exercise supervisory authority on petition in appropriate circumstances. As noted in [TMEP §1706](#), the Director may review the actions of an examiner or paralegal under 37 C.F.R. §2.146(a)(3) to determine whether there has been clear error or an abuse of discretion.

In some cases, the Director will exercise supervisory authority under 37 C.F.R. §2.146(a)(3) even where there has been no clear error or abuse of discretion, if a petitioner can show that it has substantially complied with the requirements of the statute or rules. See *In re Carnicon Dev. Co.*, 34 USPQ2d 1541, 1543 (Comm'r Pats. 1992) (holding that an assertion of verified date of first use, coupled with statement of current method of use, interpreted as substantially in compliance with minimum filing requirement of 37 C.F.R. §2.88(e)(3) for an allegation in a statement of use that the "mark is in use in commerce.").

The Director may also exercise supervisory authority under 37 C.F.R. §2.146(a)(3) to make changes to USPTO practice. See, e.g., *In re L.G. Lavorazioni Grafite S.r.l.*, 61 USPQ2d 1063, 1064 (Dir. USPTO 2001); *In re Slack*, 54 USPQ2d 1504, 1506 (Comm'r Pats. 2000); *In re Moisture Jamzz, Inc.*, 47 USPQ2d 1762, 1763–1764 (Comm'r Pats. 1997); *In re El Taurino Rest., Inc.*, 41 USPQ2d 1220, 1222 (Comm'r Pats. 1996); *In re Monte Dei Maschi Di Siena*, 34 USPQ2d 1415, 1416 (Comm'r Pats. 1995).

### **1708 Waiver of Rules**

Under 37 C.F.R. §§2.146(a)(5) and 2.148, the Director may waive any provision of the rules that is not a provision of the statute, when: (1) an extraordinary situation exists; (2) justice requires; and (3) no other party is injured.

All three of the above conditions must be satisfied before a waiver will be granted, and the burden is on the petitioner to show that the situation is extraordinary. Disasters like fires, hurricanes, and snowstorms are considered to be extraordinary situations. Extraordinary circumstances have also been found in certain cases

where a petitioner avers by affidavit or declaration that it did not receive an Office action issued regarding a §8 affidavit or §9 renewal application.

On the other hand, oversights and inadvertent errors that could have been avoided with the exercise of reasonable care are not considered to be extraordinary situations. *In re Universal Card Grp., Inc.*, 25 USPQ2d 1157, 1158 (Comm'r Pats. 1992) (finding that a docketing error not extraordinary situation); *In re Merck & Co., Inc.*, 24 USPQ2d 1317, 1318 (Comm'r Pats. 1992) (holding that inadvertent misidentification of serial number in request for extension of time to oppose not extraordinary situation); *In re Tetrafluor Inc.*, 17 USPQ2d 1160, 1162 (Comm'r Pats. 1990) (finding that a typographical error not extraordinary situation).

A change of attorneys is not considered to be an extraordinary situation, *In re Unistar Radio Networks, Inc.*, 30 USPQ2d 1390, 1392 (Comm'r Pats. 1993), nor is a misunderstanding or lack of awareness of the requirements of the Trademark Rules of Practice considered extraordinary. *In re Buckhead Mktg. & Distribution, Inc.*, 71 USPQ2d 1620, 1622–1623 (Dir USPTO 2004) (holding that an applicant's lack of knowledge of application filing fee increase not extraordinary situation); *B and E Sales Co. Inc. v. Andrew Jergens Co.*, 7 USPQ2d 1906, 1907–1908 (Comm'r Pats. 1988); *Gustafson v. Strange*, 227 USPQ 174 (Comm'r Pats. 1985). Errors by attorneys are imputed to the client and the client is bound by the consequences. *In re Sotheby's Inc.*, 18 USPQ2d 1969, 1970 (Comm'r Pats. 1989).

Mail delays are not considered extraordinary, because the Trademark Rules of Practice provide procedures designed to avoid lateness due to mail delay. *In re Sportco, Inc.*, 209 USPQ 671, 672 (Comm'r Pats. 1980); *In re Chicago Historical Antique Auto. Museum, Inc.*, 197 USPQ 289, 292 (Comm'r Pats. 1978). See 37 C.F.R. §2.197 regarding certificates of mailing.

A party will not be excused from compliance with the rules because the results in a particular case may be harsh. See *Buckhead*, 71 USPQ2d at 1623 (rejecting petitioner's argument that "justice requires" waiver of the filing date requirements of 37 C.F.R. §2.21 to prevent the loss of priority relative to a conflicting application).

The Director has no authority to waive or suspend the requirement of a rule that is also a requirement of the statute, such as the deadline for filing an affidavit or declaration under §8 or §71 (15 U.S.C. §§1058, 1141k), or a renewal application under §9 (15 U.S.C. §1059). See *Checkers Drive-In Rest., Inc. v. Comm'r of Patents and Trademarks*, 51 F.3d 1078, 1085, 34 USPQ2d 1574, 1581 (D.C. Cir. 1995), cert. denied 516 U.S. 866 (1995) ("[I]n establishing cancellation as the penalty for failure to file the required affidavit, Congress made no exception for the innocent or the negligent. Thus, the Commissioner had no discretion to do other than cancel Checkers's service mark registration in this case."); *In re Holland Am. Wafer Co.*, 737 F.2d 1015, 1018, 222 USPQ 273, 275 (Fed. Cir. 1984) ("Timeliness set by statute is not a minor technical defect which can be waived by the Commissioner.").

## 1709 Matters Delegated by Director

Pursuant to 35 U.S.C. §3(a) and (b), the Director has delegated the authority to the Commissioner for Trademarks to decide trademark-related petitions filed under 37 C.F.R. §§2.66 and 2.146, and to exercise supervisory authority in trademark-related matters pursuant to 35 U.S.C. §2.

Under 35 U.S.C. §3(b)(3)(B) and 37 C.F.R. §2.146(h), the Commissioner for Trademarks may delegate this authority to the Deputy Commissioner for Trademark Examination Policy or the Deputy Commissioner for Trademark Operations, who may further delegate the authority.

Authority to decide trademark-related petitions filed under 37 C.F.R. §2.146 has been delegated to the Deputy Commissioner for Trademark Examination Policy, who has further delegated authority to appropriate officials within the Office of Petitions.

## 1710 Petition to Make Special

The USPTO generally examines applications in the order in which they are received. A petition to make “special” is a request to advance the initial examination of an application out of its regular order.

A petition to make “special” must be accompanied by: (1) the fee required by 37 C.F.R. §2.6; (2) an explanation of why special action is requested; and (3) a statement of facts that shows that special action is justified. The statement of facts should be supported by an affidavit or declaration under 37 C.F.R. §2.20.

The petition is reviewed in the Office of the Deputy Commissioner for Trademark Examination Policy. The applicant should first file the application via the Trademark Electronic Application System (“TEAS”) at <http://www.uspto.gov>. The applicant should then submit a petition to make special that includes the newly assigned serial number. To ensure proper routing and processing, the Office prefers that the petition also be filed electronically. In TEAS, the Petition to Make Special form can be accessed by clicking on the link entitled “Petition Forms.”

Alternatively, the petition should be faxed to the attention of the Deputy Commissioner for Trademark Examination Policy at the following fax number: 571-273-0032. If the petition is submitted by mail, it should be submitted *separately* from the application, marked to the attention of the Deputy Commissioner for Trademark Examination Policy.

An application for registration of a mark that was the subject of a previous registration that was inadvertently cancelled or expired will be made “special” upon applicant’s request. No petition is required in this situation. See [TMEP §702.02](#) regarding the requirements and filing procedure for a Request to Make Special.

### 1710.01 Basis for Granting or Denying Petition

Invoking supervisory authority under 37 C.F.R. §2.146 to make an application “special” is an extraordinary remedy that is granted only when very special circumstances exist, such as a *demonstrable* possibility of the loss of substantial rights. A petition to make “special” is denied when the circumstances would apply equally to a large number of other applicants.

The fact that the applicant is about to embark on an advertising campaign is *not* considered a circumstance that justifies advancement of an application out of the normal order of examination, because this situation applies to a substantial number of applicants.

The most common reasons for granting petitions to make “special” are the existence of actual or threatened infringement, pending litigation, or the need for a registration as a basis for securing a foreign registration.

## 1710.02 Processing Petition

Each petition to make “special,” together with the petition decision, is made part of the record. If the petition is granted, the prosecution history of the application in the Trademark database will reflect that the petition for “special” handling has been granted.

## 1711 Review of Denial of Filing Dates

If an application is denied a filing date and the applicant wants the filing date restored, the usual procedure is to file a petition under 37 C.F.R. §2.146.

However, in the limited circumstances listed below, the applicant may request restoration of the filing date without a formal petition:

- (1) The USPTO has no record of receipt of the application, but the applicant presents proof that a complete application was filed through the Trademark Electronic Application System (“TEAS”), in the form of a copy of a TEAS “Success” page confirming receipt of the application ( *see* [TMEP §303.02\(a\)](#)) or a copy of an e-mail confirmation issued by the USPTO that includes the date of receipt and a summary of the TEAS submission.
- (2) The USPTO has no record of receipt of the application, but the applicant presents proof of actual receipt in the form of evidence that a USPTO employee signed for or acknowledged the envelope containing the application (e.g., a certified mail receipt that bears a USPTO date stamp or label, or the signature of a USPTO employee), accompanied by an affidavit or declaration under 37 C.F.R. §2.20 attesting to the contents of the envelope.
- (3) A filing date was denied, but the application itself clearly shows on its face that the applicant met all relevant filing date requirements on the filing date being requested. If the application was filed on paper, the applicant must resubmit any returned documents showing the cancelled filing date.
- (4) A filing date was denied to a paper application due to the omission of an element, such as a drawing, but the element was in fact included in the application as originally submitted, *and* the applicant submits *all* of the following: (a) a return postcard indicating that the USPTO specifically acknowledged receipt of the element in question ( *see* [TMEP §303.02\(c\)](#)); (b) a substitute to replace the lost element; (c) the application documents that were returned; *and* (d) a copy of the Notice of Incomplete Trademark Application.
- (5) Applicant provides evidence that applicant attempted to file the application through TEAS, but TEAS was unavailable due to technical problems (e.g., a computer screen printout showing receipt of a “Fatal Error - Access Denied” error message, or a copy of an e-mail message from the TEAS Help Desk stating that the TEAS application forms were temporarily unavailable). *See In re Henkel Loctite Corp.*, 69 USPQ2d 1638 (Dir USPTO 2003).

In the above situations, a staff attorney or paralegal in the Office of the Deputy Commissioner for Trademark Examination Policy may restore the original filing date without a formal petition or a petition fee. In all other circumstances, the applicant must file a formal petition, including the petition fee required by 37 C.F.R. §2.6.

*Procedure for Filing Request.* In any request to restore an application filing date, the applicant should first refile the application, with the application filing fee required by 37 C.F.R. §2.6(a)(1)(i), (ii), or (iii), as

appropriate. The USPTO prefers that the application be filed electronically via TEAS at <http://www.uspto.gov>. *The application filing fee must be included even if the applicant has not yet received a refund of the fee previously paid.*

After the applicant receives a new serial number, the applicant should submit a request to restore the original filing date. To ensure proper routing and processing, the Office prefers that the request also be filed electronically. In TEAS, the Request to Restore Filing Date form can be accessed by clicking on the link entitled "Petition Forms" at <http://www.uspto.gov>. Alternatively, the request should be faxed to the Office of the Deputy Commissioner for Trademark Examination Policy at 571-273-8950. The request should: (1) include the new serial number; (2) state the reason(s) why the applicant believes the filing date was denied in error; and (3) include a copy of any Notice of Incomplete Trademark Application received from the USPTO. See [TMEP §204.02](#).

*Time for Filing Request.* All requests to restore filing dates, whether made by formal petition or informal request, must be filed promptly. If the USPTO issues a notice advising the applicant of the denial or cancellation of the filing date, the request to restore the filing date must be filed within two months of the issuance date of the action, or it will be denied as untimely. 37 C.F.R. §2.146(d). Although applicants have two months from the issuance date of this notice to file a request to restore the original filing date, it is recommended that an applicant promptly refile the application, and file the request to restore the filing date immediately upon receipt of the new serial number, to minimize the delay in receiving a filing date, and to reduce the impact on third parties who may rely on the current filing date information in the Trademark database.

Furthermore, applicants must exercise due diligence in monitoring the status of applications. 37 C.F.R. §2.146(i); [TMEP §1705.05](#). To be considered diligent, an applicant must check the status of a pending application every six months between the filing date of the application and issuance of a registration. 37 C.F.R. §2.146(i)(1).

*Evidence of Missing Element Required.* If the USPTO denies a filing date due to the omission of an element required by 37 C.F.R. §2.21, and the applicant declares that the missing element was in fact included with the application as filed, the Director will not grant a petition to restore or reinstate the filing date unless: (1) the applicant provides evidence that the element was received in the USPTO on the requested filing date; or (2) there is an image of the element in the USPTO's Trademark Image Capture and Retrieval System ("TICRS") database.

The USPTO scans images of applications almost immediately after they are received in the USPTO and uploads these scanned images into TICRS. Because very little time passes between receipt of the application and creation of the scanned image, it is highly likely that the TICRS file of an application will be an exact copy of what was received in the USPTO. Accordingly, if TICRS does not include an image of a missing element that a petitioner declares was submitted with the application, the Director will not grant the petition unless there is evidence to corroborate the petitioner's declaration. An example of corroborating evidence is a postcard submitted with the original application that bears: (1) a USPTO date stamp; and (2) an itemized

list of materials submitted that includes the missing element. *In re Group Falck A/S*, 62 USPQ2d 1797, 1798 (Dir USPTO 2002).

## 1712 Reinstatement of Applications and Registrations

### 1712.01 Reinstatement of Applications Abandoned Due to Office Error

If an applicant has proof that an application was inadvertently abandoned due to a USPTO error, an applicant may file a request to reinstate the application, instead of a formal petition to revive. There is no fee for a request for reinstatement. To ensure proper routing and processing, the Office prefers that the request be filed electronically. In TEAS, the Request for Reinstatement form can be accessed by clicking on the link entitled “Petition Forms” at <http://www.uspto.gov>.

The following are examples of situations where the USPTO may reinstate an application that was held abandoned for failure to timely file a statement of use or response to an Office action or that was held abandoned in total after a partial refusal or requirement:

- (1) The applicant presents proof that a response to an Office action, statement of use, or request for extension of time to file a statement of use was timely filed through TEAS, in the form of a copy of a TEAS “Success” page confirming receipt of the application ( *see* [TMEP §303.02\(a\)](#)) or a copy of an e-mail confirmation issued by the USPTO that includes the date of receipt and a summary of the TEAS submission.
- (2) There is an image of the timely filed response, statement of use, or extension request in TIGRS.
- (3) The timely filed document is found in the USPTO.
- (4) The applicant supplies a copy of the document and proof that it was timely mailed to the USPTO in accordance with the certificate of mailing requirements of 37 C.F.R. §2.197 (for the specific requirements for providing proof, *see* [TMEP §305.02\(f\)](#)).
- (5) The applicant supplies a copy of the document and proof that it was timely transmitted to the USPTO by fax in accordance with the certificate of facsimile transmission requirements of 37 C.F.R. §2.197 (for the specific requirements for providing proof, *see* [TMEP §306.05\(d\)](#)).
- (6) The applicant presents proof of actual receipt in the USPTO in the form of a return postcard showing a timely USPTO date stamp or label, on which the applicant specifically refers to the document at issue ( *see* [TMEP §303.02\(c\)](#)).
- (7) The applicant presents proof of actual receipt in the USPTO in the form of evidence that a USPTO employee signed for or acknowledged the envelope (e.g., a certified mail receipt that bears a USPTO date stamp or label, or the signature of a USPTO employee), accompanied by an affidavit or declaration under 37 C.F.R. §2.20 attesting to the contents of the envelope.
- (8) The document that became lost was accompanied by a fee, and there is proof that the USPTO processed the fee (e.g., a cancelled check). The request for reinstatement must include an affidavit or declaration under 37 C.F.R. §2.20 that attests to the contents of the filing.
- (9) The USPTO sent an Office action or notice of allowance to the wrong address due to a USPTO error, i.e., the USPTO either entered the correspondence address incorrectly or failed to enter a proper notice of change of address filed *before* the issuance date of the action or notice. *See* [TMEP §609.03](#) regarding the applicant’s duty to notify the USPTO when the correspondence address changes.
- (10) An application is abandoned in total for failure to respond to an Office action or for an incomplete response to a final Office action when the Office action states that the refusal or requirement applies to only certain goods, services, and/or classes. *See* [TMEP §718.02\(a\)](#).

- (11) An application is abandoned in total after a refusal or requirement that applies to only certain goods, services, and/or classes is upheld on appeal or when the applicant withdraws or fails to prosecute an appeal of a refusal or requirement that applies to only certain goods, services, and/or classes to the Board. See [TMEP §718.02\(a\)](#).

A request for reinstatement must be filed within two months of the issuance date of the notice of abandonment or, if the applicant has not received a notice of abandonment, within two months of the date the applicant had actual knowledge that the application was abandoned. 37 C.F.R. §2.146(d).

If the applicant did not receive a notice of abandonment, the applicant must have been duly diligent in monitoring the status of the application, or the request for reinstatement may be denied. To be duly diligent, the applicant must check the status of a pending application every six months between the filing date of the application and issuance of a registration. 37 C.F.R. §2.146(i)(1); [TMEP §1705.05](#).

When an application is reinstated, a computer-generated notice of reinstatement is sent to the correspondence address of record and the Trademark database is updated accordingly.

If the applicant is not entitled to reinstatement, a request for reinstatement may be considered as a petition to revive. Any petition to revive must meet all the requirements of 37 C.F.R. §2.66. See [TMEP §§1714–1714.01\(g\)](#).

## **1712.02 Reinstatement of Registrations Cancelled or Expired Due to Office Error**

### **1712.02(a) Request for Reinstatement**

A registrant may file a request to reinstate a cancelled or expired registration if the registrant has proof that a USPTO error caused a registration to be cancelled or expired due to failure to file a §8 affidavit, §71 affidavit, §9 renewal application, or a response to an examining attorney's Office action refusing to accept an affidavit or renewal application. There is no fee for a request for reinstatement. To ensure proper routing and processing, the Office prefers that the request be filed electronically. In TEAS, the proper form to request reinstatement of a registration is the "Request for Reinstatement," which can be accessed by clicking on the link entitled "Petition Forms" at <http://www.uspto.gov/trademarks/teas/>.

The following are examples of situations where the USPTO may reinstate a cancelled or expired registration:

- (1) The registrant presents proof that a proper affidavit or renewal application was timely filed through TEAS, in the form of a copy of a TEAS "Success" page confirming receipt of the document ( see [TMEP §303.02\(a\)](#)) or a copy of an e-mail confirmation issued by the USPTO that includes the date of receipt and a summary of the TEAS submission.
- (2) There is an image of a timely filed affidavit, renewal application, or response to Office action in TICRS.
- (3) The timely filed affidavit, renewal application, or response to Office action is found in the USPTO.
- (4) The registrant supplies a copy of the affidavit, renewal application, or response to Office action, with proof that it was timely mailed to the USPTO in accordance with the certificate of mailing requirements of 37 C.F.R. §2.197 (for the specific requirements for providing proof, see [TMEP §305.02\(f\)](#)).
- (5) The registrant supplies a copy of the affidavit, renewal application, or response to Office action, with proof that it was timely transmitted to the USPTO by fax in accordance with the certificate of

transmission requirements of 37 C.F.R. §2.197 (for the specific requirements for providing proof, see [TMEP §306.05\(d\)](#)).

- (6) The registrant presents proof of actual receipt in the USPTO in the form of a return postcard showing a timely USPTO date stamp or label, on which the registrant specifically refers to the §8 affidavit, §71 affidavit, §9 renewal application, or response ( see [TMEP §303.02\(c\)](#)).
- (7) The registrant presents proof of actual receipt in the USPTO in the form of evidence that a USPTO employee signed for or acknowledged the envelope (e.g., a certified mail receipt that bears a USPTO date stamp or label, or the signature of a USPTO employee), accompanied by an affidavit or declaration under 37 C.F.R. §2.20 attesting to the contents of the envelope.
- (8) The document that became lost was accompanied by a fee, and there is proof that the USPTO processed the fee (e.g., a cancelled check). The registrant must submit an affidavit or declaration under 37 C.F.R. §2.20 attesting to the contents of the original filing.
- (9) The USPTO sent an Office action to the wrong address due to a USPTO error, i.e., the USPTO either entered the correspondence address incorrectly or failed to enter a proper notice of change of address filed *before* the issuance date of the action.

Generally, where there is proof that a registration was cancelled solely due to USPTO error, a request for reinstatement will not be denied solely because the registrant was not diligent in monitoring the status of the affidavit or renewal application. However, if a registrant receives a written notice of cancellation, or has actual notice that a registration was cancelled, the USPTO will deny the request for reinstatement as untimely if it was not filed: (1) within two months of the issuance date of the cancellation notice; or (2) within two months of actual notice of cancellation, if the registrant did not receive a written cancellation notice. 37 C.F.R. §2.146(d). See [TMEP §1705.04](#) regarding timeliness.

The Director has no authority to waive a statutory requirement, such as the deadline for filing a proper renewal application under 15 U.S.C. §1059 or affidavit of use of a registered mark under 15 U.S.C. §1058.

*Checkers Drive-In Rest's, Inc. v. Comm'r of Patents and Trademarks*, 51 F.3d 1078, 1085, 34 USPQ2d 1574, 1581 (D.C. App. 1995), *cert. denied* 516 U.S. 866 (1995); *In re Holland Am. Wafer Co.*, 737 F.2d 1015, 1018, 222 USPQ 273, 275 (Fed. Cir. 1984). Therefore, if the registrant did not timely file a §8 affidavit, §71 affidavit, or §9 renewal application, a request to reinstate a cancelled or expired registration will be denied, regardless of the reason for the delay.

### 1712.02(b) Formal Petition

If a registrant failed to timely respond to an examining attorney's Office action refusing to accept a §8 affidavit, §71 affidavit, or §9 renewal application due to an extraordinary situation, but the registrant does not have the proof of USPTO error that would support a request for reinstatement, the registrant may file a formal petition under 37 C.F.R. §§2.146(a)(3) and 2.146(a)(5) to waive a rule and accept a late response.

Pursuant to 37 C.F.R. §2.146(d), the petition must be filed within two months of the cancellation notice.

If the registrant did not receive the cancellation notice, or no cancellation notice was issued, the petition must be filed within two months of the date of actual notice of the cancellation, *and* the record must show that the registrant was diligent in monitoring the status of the registration, pursuant to 37 C.F.R. §2.146(i).

See [TMEP §§1705.04](#) and [1705.05](#) regarding timeliness and diligence.

The unintentional delay standard of 37 C.F.R. §2.66 does *not* apply to registered marks. [TMEP §1714.01\(f\)\(ii\)\(D\)](#). Under 37 C.F.R. §§2.146(a)(5) and 2.148, the Director may waive any provision of the rules that is not a provision of the statute, only when an extraordinary situation exists, justice requires, and no other party is injured. See [TMEP §1708](#). The failure to receive an Office action is considered an extraordinary situation that justifies a waiver of a rule. Therefore, if the registrant did not receive an

examining attorney's Office action refusing to accept an affidavit or renewal application, but the registrant does not have proof that non-receipt was due to USPTO error ( *see* [TMEP §1712.02\(a\)](#), paragraph 9), the registrant may file a formal petition under 37 C.F.R. §2.146.

As noted in [TMEP §1708](#), the Director has no authority to waive a statutory requirement, such as the deadline for filing a proper renewal application under 15 U.S.C. §1059 or affidavit of use of a registered mark under 15 U.S.C. §1058. Therefore, if the registrant did not timely file a §8 affidavit, §71 affidavit, §9 renewal application, a petition to extend or waive the statutory deadline will be denied, regardless of the reason for the delay.

If a registrant contends that a proper affidavit or renewal application was timely filed, but the registrant does not have proof that the affidavit or renewal application was received in the USPTO before the due date, the Director will not grant a petition to accept the affidavit or renewal application.

Similarly, if a registrant files a premature affidavit or renewal application, and does not file a newly executed affidavit or renewal application within the statutory filing period (which includes the grace period), the Director will not grant a petition to accept the premature affidavit or renewal application. *See* [TMEP §§1604.04\(a\)](#) and [1606.03\(a\)](#).

## **1713 Petition to Reverse Holding of Abandonment for Incomplete Response**

### **1713.01 Standard of Review**

Under 37 C.F.R. §2.65(a), an application may become abandoned when an applicant's response, although received within the six-month response period, is incomplete. *See* [TMEP §§718.03–718.03\(b\)](#) regarding incomplete responses.

When an examining attorney holds an application abandoned because the applicant's response is incomplete, the applicant may petition the Director to reverse the holding under 37 C.F.R. §2.146. *See* [TMEP §718.02\(a\)](#) regarding partial abandonment for failure to respond completely to a final refusal or final requirement that is expressly limited to only certain goods/services/class(es) and [TMEP §718.03\(a\)](#) for failure to respond completely in all other situations.

However, the Director will reverse the examining attorney's holding of abandonment only if there has been clear error or an abuse of discretion. *In re GTE Educ. Servs.*, 34 USPQ2d 1478 (Comm'r Pats. 1994); *In re Legendary, Inc.*, 26 USPQ2d 1478 (Comm'r Pats. 1992). *Note:* The "unintentional delay" standard for reviving abandoned applications pursuant to 37 C.F.R. §2.66(a) does *not* apply to applications held abandoned because a response was deemed incomplete under 37 C.F.R. §2.65(a). *See* [TMEP §1714.01\(f\)\(ii\)\(A\)](#).

### **1713.02 Failure to Respond to Notice of Incomplete Response or Denial of Request for Reconsideration with No Appeal Filed**

If an examining attorney issues an "Examiner's Non-Responsive Amendment" action, "Examiner's Action Continuing a Final Refusal – 30 day Letter" (or, if appropriate, "SU – Examiner's Action Continuing a Final Refusal – 30 day Letter"), or a "Request for Reconsideration Denied – No Appeal Filed - Time Remaining" (or, if appropriate, "SU - Request for Reconsideration Denied No Appeal Filed - Time Remaining") action, and the applicant does not receive the action or fails to timely respond due to some extraordinary circumstance, the applicant may file a petition to the Director to waive 37 C.F.R. §2.62(a) and permit a late response to be submitted under 37 C.F.R. §2.146(a)(5).

If the applicant submits the response with the petition and the petition is granted, the Director will instruct the examining attorney to review the response. If the applicant did not receive the action and does not submit a response with the petition and the petition is granted, the USPTO will re-issue the action and provide the applicant with a new 30-day period in which to respond.

However, if an examining attorney issues an Office action granting an applicant additional time to complete a response when it appears that a response is signed by an improper party, and the applicant fails to respond or to complete the response within the time granted or remaining, the examining attorney must issue an "Abandoned Due to Incomplete Response" action. See TMEP §§[715.03\(a\)\(2\)\(E\)](#), [718.03](#), [718.03\(b\)](#). If the applicant wishes to submit evidence that an authorized party signed the original response, the applicant may petition the Director to exercise supervisory authority and reverse the holding and reinstate the application under 37 C.F.R. §2.146(a)(3). If the evidence establishes that a proper party signed the response, the Director will grant the petition and instruct the examining attorney to review the response. If, however, the evidence establishes that the response was signed by an unauthorized party, the Director will find that (1) the application should have been abandoned for failure to respond, (2) the petition will be construed as a petition to revive under 37 C.F.R. §2.66, (3) revival based on unintentional delay is proper, and (4) a response signed by a proper party must be submitted. To expedite revival in this situation, a properly signed response should be submitted with the petition.

The granting of the petition does *not* extend the time for filing a notice of appeal or filing a petition to review the examining attorney's action under 37 C.F.R. §2.63(b). 15 U.S.C. §1062(b); 37 C.F.R. §2.142(a). Therefore, in most circumstances, if the response does not overcome all outstanding refusals or satisfy all outstanding requirements, the application will again be abandoned and an "Abandoned Due to Incomplete Response" notice will issue (but see TMEP §[1714.01\(a\)\(ii\)](#) regarding petition to revive for failure to respond to a final action).

## 1714 Petition to Revive Abandoned Application

### *37 CFR §2.66 Revival of abandoned applications.*

(a) The applicant may file a petition to revive an application abandoned because the applicant did not timely respond to an Office action or notice of allowance, if the delay was unintentional. The applicant must file the petition:

(1) Within two months of the date of issuance of the notice of abandonment; or

(2) Within two months of actual knowledge of the abandonment, if the applicant did not receive the notice of abandonment, and the applicant was diligent in checking the status of the application every six months in accordance with §2.146(i).

(b) The requirements for filing a petition to revive an application abandoned because the applicant did not timely respond to an Office action are:

(1) The petition fee required by §2.6;

(2) A statement, signed by someone with firsthand knowledge of the facts, that the delay in filing the response on or before the due date was unintentional; and

(3) Unless the applicant alleges that it did not receive the Office action, the proposed response.

(c) The requirements for filing a petition to revive an application abandoned because the applicant did not timely respond to a notice of allowance are:

(1) The petition fee required by §2.6;

(2) A statement, signed by someone with firsthand knowledge of the facts, that the delay in filing the statement of use (or request for extension of time to file a statement of use) on or before the due date was unintentional;

(3) Unless the applicant alleges that it did not receive the notice of allowance and requests cancellation of the notice of allowance, the required fees for the number of requests for extensions of time to file a statement of use that the applicant should have filed under §2.89 if the application had never been abandoned;

(4) Unless the applicant alleges that it did not receive the notice of allowance and requests cancellation of the notice of allowance, either a statement of use under §2.88 or a request for an extension of time to file a statement of use under §2.89; and

(5) Unless a statement of use is filed with or before the petition, or the applicant alleges that it did not receive the notice of allowance and requests cancellation of the notice of allowance, the applicant must file any further requests for extensions of time to file a statement of use under §2.89 that become due while the petition is pending, or file a statement of use under §2.88.

(d) In an application under section 1(b) of the Act, the Director will not grant the petition if this would permit the filing of a statement of use more than 36 months after the date of issuance of the notice of allowance under section 13(b)(2) of the Act.

(e) The Director will grant the petition to revive if the applicant complies with the requirements listed above and establishes that the delay in responding was unintentional.

(f) If the Director denies a petition, the applicant may request reconsideration, if the applicant:

(1) Files the request within two months of the date of issuance of the decision denying the petition; and

(2) Pays a second petition fee under §2.6.

Upon proper submission of a petition to revive, an abandoned application may be revived under 37 C.F.R. §2.66 if the delay in responding to an Office action or notice of allowance was unintentional. 15 U.S.C. §§1051(d)(4) and 1062(b). Petitions filed under 37 C.F.R. §2.66 are handled by the paralegals in the Office of the Deputy Commissioner for Trademark Examination Policy. See [TMEP §1709](#) regarding the delegation of authority to decide petitions.

To expedite processing, the USPTO recommends that all petitions to revive be filed through TEAS, at <http://www.uspto.gov/trademarks/teas/index.jsp>.

### **1714.01 Procedural Requirements for Filing Petition to Revive**

The procedural requirements for filing a petition to revive an application abandoned for failure to respond to an examining attorney's Office action are set forth in 37 C.F.R. §2.66(b). See [TMEP §§1714.01\(a\)–\(a\)\(ii\)](#).

The procedural requirements for filing a petition to revive an application abandoned for failure to timely file a statement of use or request for extension of time to file a statement of use are set forth in 37 C.F.R. §2.66(c). See [TMEP §§1714.01\(b\)–\(c\)](#).

When a petition does not meet the procedural requirements of 37 C.F.R. §2.66, a paralegal in the Office of the Deputy Commissioner for Trademark Examination Policy will notify the petitioner that the petition does not meet the requirements of the rule, and grant the petitioner 30 days to supplement the petition by submitting the missing element(s). If the petitioner does not submit the necessary information or fees within the time allowed, the petition will be denied.

If a petition to revive filed through TEAS is automatically granted by the electronic system and it is subsequently determined that the petition does not meet the procedural requirements of 37 C.F.R. §2.66, a paralegal in the Office of the Deputy Commissioner for Trademark Examination Policy will notify the petitioner that the granting of the petition has been rescinded because the petition does not meet the requirements of the rule. The petitioner will be granted 30 days to supplement the petition by submitting the missing element(s). If the petitioner does not submit the necessary information or fee(s) within the time allowed, the petition will be denied.

### **1714.01(a) Failure to Timely Respond to an Examining Attorney's Office Action**

To expedite processing, the USPTO recommends that all petitions to revive be filed through TEAS, at <http://www.uspto.gov/trademarks/teas/index.jsp>.

#### **1714.01(a)(i) Response to Nonfinal Office Action**

The procedural requirements for filing a petition to revive an application abandoned for failure to respond to an examining attorney's *nonfinal* Office action are listed in 37 C.F.R. §2.66(b). The petition must include all of the following:

- (1) The petition fee required by 37 C.F.R. §2.6;
- (2) A statement, signed by someone with firsthand knowledge of the facts, that the delay in filing the response on or before the due date was unintentional. The statement does not have to be verified; and
- (3) Unless the applicant alleges that it did not receive the Office action, the applicant's proposed response to the Office action.

If the petition states that applicant did not receive the Office action, and the petition is granted, the USPTO will issue a new Office action and provide the applicant with a new response period, or, if all issues previously raised remain the same, after reviving the application, the USPTO will send a notice to the applicant directing the applicant to view the previously issued Office action on the TSDR portal on the USPTO website at <http://tsdr.uspto.gov/>, and provide the applicant with a new six-month period in which to file a response.

### **1714.01(a)(ii) Response to Final Office Action**

The procedural requirements for filing a petition to revive an application abandoned for failure to respond to an examining attorney's *final* Office action are the same as listed in [TMEP §1714.01\(a\)\(i\)](#) above. *See* 37 C.F.R. §2.66(b). However, where a final action has issued, the petition must include a *proper* response, as defined in 37 C.F.R. §2.64(a).

In general, the only proper response to a final action is a notice of appeal to the Trademark Trial and Appeal Board ( *see* [TMEP §§1501–1501.07](#)), a petition to the Director if permitted under 2.63(b), or compliance with any requirement made by the examining attorney. 37 C.F.R. §2.64(a). *See* [TMEP §715.01](#). In some cases, after a final refusal of registration on the Principal Register, an amendment requesting registration on the Supplemental Register or registration under 15 U.S.C. §1052(f) may also be a proper response. *See* [TMEP §§714.05\(a\)\(i\)](#), [816.04](#), and [1212.02\(h\)](#). A request for reconsideration is not a proper response to a final action, unless it is accompanied by a notice of appeal to the Board, or satisfies all outstanding requirements and overcomes all outstanding refusals. *See* [TMEP §§715.03](#) and [1714.01\(f\)\(ii\)\(A\)](#).

If a petition does not include a proper response to a final action or claim that the final action was not received, the petition will be treated as incomplete. The applicant will be given an opportunity to perfect the petition by submitting the required response (e.g., a notice of appeal) or claim of non-receipt. If the applicant does not submit a proper response or claim of non-receipt within the time allowed, the petition will be denied.

If the petition states that applicant did not receive the final action, and the petition is granted, the USPTO will issue a new final action and provide the applicant with a new response period. If all issues previously raised remain the same, the USPTO will send a notice to the applicant directing the applicant to view the previously issued final action on the TSDR portal on the USPTO website at <http://tsdr.uspto.gov/>, and provide the applicant with a new six-month period in which to file a response.

If the applicant received the Office action, and no response was filed within the statutory response period, a late notice of appeal may be submitted with the petition.

Filing a request for reconsideration or incomplete response does *not* extend the time for filing a notice of appeal to the Board or petition to the Director under 37 C.F.R. §2.63(b)(2). 37 C.F.R. §2.64(b). *See* [TMEP §§715.03\(c\)](#) and [718.03\(b\)](#). Therefore, if the applicant timely filed a request for reconsideration or a response to the Office action that does not overcome all outstanding refusals and satisfy all outstanding requirements, a late appeal will *not* be accepted on petition.

The unintentional delay standard of 37 C.F.R. §2.66 does *not* apply to applications that are abandoned due to an incomplete response to an examining attorney's Office action. [TMEP §§1713](#) and [1714.01\(f\)\(ii\)](#).

See [TMEP §§1705.04](#) and [1714.01\(d\)](#) regarding petition timeliness, and [TMEP §1705.05](#) regarding due diligence in monitoring the status of an application.

### **1714.01(b) Failure to File a Statement of Use or Extension Request - Notice of Allowance Received**

To expedite processing, the USPTO recommends that all petitions to revive be filed through TEAS, at <http://www.uspto.gov>.

The procedural requirements for filing a petition to revive an application abandoned for failure to respond to a notice of allowance are listed in 37 C.F.R. §2.66(c). *If the applicant received the notice of allowance, the petition must include all of the following:*

- (1) The petition fee required by 37 C.F.R. §2.6;
- (2) A statement, signed by someone with firsthand knowledge of the facts, that the delay in filing the statement of use (or request for extension of time to file a statement of use) on or before the due date was unintentional (37 C.F.R. §2.66(c)(2)). The statement does not have to be verified;
- (3) Either a statement of use under 37 C.F.R. §2.88 or a request for an extension of time to file a statement of use under 37 C.F.R. §2.89 (37 C.F.R. §2.66(c)(4)); and
- (4) The required fees for the number of extension requests that the applicant should have filed if the application had never been abandoned (37 C.F.R. §2.66(c)(3)).

*Example 1:* If a notice of allowance was issued January 14, 2009, and the applicant did not file a statement of use or extension request by July 14, 2009, the application becomes abandoned. If a petition to revive is filed July 23, 2009, with a statement of use, the petition must include: (1) the fee for the statement of use; (2) the fee for the extension request that was due July 14, 2009; and (3) the petition fee.

*Example 2:* If a notice of allowance was issued January 14, 2009, and the applicant did not file a statement of use or extension request by July 14, 2009, the application becomes abandoned. If a petition to revive is filed January 23, 2010, without a statement of use, the petition must be accompanied by: (1) the second extension request that was due January 14, 2010, with the filing fee therefor; (2) the fee for the first extension request that was due July 14, 2009; and (3) the petition fee. If the petition is granted, a statement of use or third extension request will be due July 14, 2010.

Unless a statement of use is filed with or before the petition, the applicant must file any further requests for extension of time to file a statement of use that become due while the petition is pending, or file a statement of use (37 C.F.R. §2.66(c)(5)). See [TMEP §1714.01\(b\)\(i\)](#).

*Example:* If a notice of allowance was issued January 14, 2009, and the applicant did not file a statement of use or extension request by July 14, 2009, the application becomes abandoned. If a petition to revive is filed January 2, 2010, without a statement of use, the petition must include: (1) the first extension request that was due July 14, 2009, with the filing fee therefor; and (2) the petition fee. In addition, if the petition is pending, the applicant must submit by January 14, 2010 either: (1) a statement of use (with the required fee), or (2) a second extension request (with the required fee) before the petition can be granted.

The USPTO will *not* grant a petition to revive an intent-to-use application if granting the petition would extend the period for filing the statement of use beyond thirty-six months after the issuance date of the notice of allowance. 15 U.S.C. §§1051(d)(1) and (2); 37 C.F.R. §2.66(d). In these cases, the petition will be denied, and the petition fee will be refunded.

**NOTE: Multiple Basis Applications.** In a multiple-basis application, if in response to a notice of abandonment the applicant elects to delete the intent-to-use basis and only keep the basis or bases to which the notice of allowance does not pertain, then the applicant does not have to file a statement of use or extension request with the petition, or file any further extension requests while the petition is pending. Instead, applicant may submit with the petition a request to delete the intent-to-use basis and proceed to registration on the alternative basis for registration.

See TMEP §§ [1705.04](#) and [1714.01\(d\)](#) regarding petition timeliness, and [TMEP §1705.05](#) regarding due diligence in monitoring the status of an application.

### **1714.01(b)(i) Applicant Must File Statement of Use or Further Extension Requests During Pendency of a Petition**

Filing a petition to revive does not stay the time for filing a statement of use or further request(s) for extension of time to file a statement of use. When a petition is granted, the term of the six-month extension that was the subject of the petition runs from the date of the expiration of the previously existing deadline for filing a statement of use. 37 C.F.R. §2.89(g). Thus, a petitioner must either file a statement of use or file additional extension requests as they become due during the pendency of a petition.

If the applicant fails to file a statement of use or further request(s) for extension of time to file the statement of use while the petition is pending, the USPTO will give the applicant an opportunity to perfect the petition by paying the fees for each missed extension request and filing a copy of the last extension request, or statement of use, that should have been filed. *In re Moisture Jamzz, Inc.*, 47 USPQ2d 1762, 1764 (Comm'r Pats. 1997).

Please note that an applicant may file a petition to revive and an extension request through TEAS. However, if the applicant files a statement of use with the petition to revive form in TEAS, the TEAS form will require submission of the fee(s) for the missing extension request(s). See [TMEP §§1108–1108.05](#) regarding extension requests, and [TMEP §§1109–1109.18](#) regarding statements of use.

### **1714.01(c) Notice of Allowance Not Received**

To expedite processing, the USPTO recommends that all petitions to revive be filed through TEAS, at <http://www.uspto.gov>.

The procedural requirements for filing a petition to revive an application abandoned for failure to respond to a notice of allowance are listed in 37 C.F.R. §2.66(c). *If the applicant did not receive the notice of allowance*, the petition must include the following:

- (1) The petition fee required by 37 C.F.R. §2.6; and
- (2) A statement, signed by someone with firsthand knowledge of the facts, that the applicant did not receive the notice of allowance, and that the delay in filing the statement of use (or request for extension of time to file a statement of use) on or before the due date was unintentional. The statement does not have to be verified.

If the applicant did not receive the notice of allowance, it is not necessary to file a statement of use or request for an extension of time to file a statement of use, or the fees for the number of extension requests that would have been due if the application had never been abandoned. 37 C.F.R. §§2.66(c)(3) and (4). If the petition is granted, the USPTO will cancel the original notice of allowance and issue a new notice, giving the applicant a new six-month period in which to file a statement of use or extension request. However, if the petitioner files an extension request with a petition that alleges nonreceipt of the notice of allowance, the USPTO will presume that the applicant wants to maintain the issue date of the original notice of allowance and will process the extension request.

Similarly, if the petitioner files a statement of use and the required fees for any missing extension requests with a petition that alleges nonreceipt of the notice of allowance, the USPTO will presume that the applicant intends to maintain the issue date of the original notice of allowance and will process the statement of use.

If the petitioner files a statement of use with a petition that alleges nonreceipt of the notice of allowance but does not include the required fees for any missing extension requests, the USPTO will give the petitioner the option of: (1) having the notice of allowance cancelled and reissued, the statement of use not processed, and the filing fee for the statement of use refunded; or (2) paying the additional filing fees for the extension requests that would have been due if the application had never been abandoned, so that the statement of use can be processed. If the applicant files the statement of use with the petition to revive form in TEAS, the TEAS form will require submission of the fees for the missing extension requests.

### **1714.01(d) Timeliness and Diligence**

Under 37 C.F.R. §2.66(a), a petition to revive an abandoned application must be filed: (1) within two months of the issuance date of the notice of abandonment; or (2) within two months of actual knowledge of the abandonment, if the applicant did not receive the notice of abandonment, *and* the applicant was diligent in checking the status of the application. A petition to revive an application as to goods/services/classes deleted (abandoned) for failure to respond to a partial refusal or requirement must be filed: (1) within two months of the issuance date of the examiner's amendment setting forth the changes that will be made in the identification of goods/services; or (2) within two months of actual knowledge of the issuance of the examiner's amendment, provided the application has not registered, if the applicant did not receive the examiner's amendment *and* the applicant was diligent in checking the status of the application.

See [TMEP §718.02\(a\)](#) regarding partial abandonment, [§1705.04](#) regarding petition timeliness, and [TMEP §1705.05](#) regarding an applicant's duty to exercise due diligence in monitoring the status of an application.

If a petition is untimely, or if the applicant was not diligent, the USPTO will deny the petition and refund the petition fee. To be considered diligent, the applicant must check the status of a pending application every six months between the filing date of the application and issuance of a registration. 37 C.F.R. §§2.66(a)(2) and 2.146(i)(1).

The applicant may file a petition to revive before the applicant receives the notice of abandonment.

### **1714.01(e) Signed Statement that Delay Was Unintentional**

Under 37 C.F.R. §§2.66(b)(2), 2.66(c)(2), and 2.193(e)(4), a petition to revive must include a statement, signed by someone with firsthand knowledge of the facts, that the delay in responding to the Office action or notice of allowance was unintentional. Generally, it is not necessary to explain the circumstances that caused the unintentional delay and the statement does not have to be verified.

However, if the applicant is alleging that non-receipt of an Office action or notice of allowance caused the unintentional delay, this should be stated; no further explanation is necessary.

The USPTO will generally not question the applicant's assertion that the delay in responding to an Office action or notice of allowance was unintentional unless there is information in the record indicating that the delay was in fact intentional. An example of an intentional delay is when an applicant intentionally decides not to file a response or intent-to-use document because it no longer wishes to pursue registration of the mark, but later changes its mind and decides that it does wish to pursue registration.

The person signing the statement must have firsthand knowledge of the facts, but it is not necessary to specifically state in the petition that the signatory has firsthand knowledge. Generally, the USPTO will not question the signatory's authority to sign the statement. However, any response to an Office action accompanying the petition ( *see* [TMEP §1714.01\(a\)\(i\)-\(ii\)](#)) must be signed by a qualified practitioner, or by the individual applicant or someone with legal authority to bind a juristic applicant (e.g., a corporate officer or general partner of a partnership) if the applicant is not represented by a qualified practitioner. 37 C.F.R. §§2.62(b), 2.193(e)(2), and 11.18(a). See TMEP §§[611.03\(b\)](#) and [712-712.03](#) regarding signature of responses to Office actions, [TMEP §602](#) regarding persons authorized to represent a party before the USPTO, and [TMEP §§611.06-611.06\(h\)](#) for guidelines on persons with legal authority to bind various types of legal entities.

See also [TMEP §1705.07](#) regarding signature of petitions, and [TMEP §611.01\(c\)](#) regarding signature of documents filed through TEAS.

## **1714.01(f) Applicability of Unintentional Delay Standard**

### **1714.01(f)(i) Situations Where the Unintentional Delay Standard Applies**

The unintentional delay standard of Trademark Rule 2.66 applies only to the “failure” to respond to an examining attorney's Office action or a notice of allowance. *See* 15 U.S.C. §§1051(d)(4) and 1062(b).

This includes the failure to meet minimum filing requirements for a statement of use or request for an extension of time to file a statement of use.

The minimum filing requirements for a statement of use are listed in 37 C.F.R. §2.88(e): (1) the fee for at least a single class of goods or services; (2) at least one specimen or facsimile of the mark as used in commerce; and (3) a verification or declaration signed by the applicant stating that the mark is in use in commerce.

The minimum filing requirements for a request for extension of time to file a statement of use are listed in 37 C.F.R. §2.89(a): (1) a verified statement that the applicant has a continued bona fide intention to use the mark in commerce; (2) a specification of the goods or services on or in connection with which the applicant has a continued bona fide intention to use the mark in commerce; and (3) payment of the prescribed fee for at least one class of goods or services. *See also* [TMEP §1108.04](#) and *In re El Taurino Rest., Inc.*, 41 USPQ2d 1220, 1222 (Comm'r Pats. 1996).

An applicant who fails to meet the minimum filing requirements for a statement of use or request for an extension of time to file a statement of use has, in effect, not filed the statement of use or extension request.

Therefore, if the failure to meet the minimum filing requirements was unintentional, the applicant may file a petition to revive under 37 C.F.R. §2.66.

An applicant may also file a petition to revive under 37 C.F.R. §2.66 if the applicant timely files a notice of appeal from an examining attorney's final refusal, but unintentionally fails to include the appeal fee required by 15 U.S.C. §1070.

### **1714.01(f)(ii) Situations Where the Unintentional Delay Standard Does Not Apply**

The unintentional delay standard of Trademark Rule 2.66 applies only to the *failure* to respond to an examining attorney's Office action or a notice of allowance. 15 U.S.C. §§1051(d)(4) and 1062(b).

#### **1714.01(f)(ii)(A) Examining Attorney's Holding of Abandonment for Failure to File Complete Response to Office Action**

The unintentional delay standard of 37 C.F.R. §2.66 does *not* apply to an application that is abandoned for filing an incomplete response to an examining attorney's Office action. Incomplete responses to examining attorneys' Office actions are governed by 37 C.F.R. §2.65(b), which gives the examining attorney discretion to grant an applicant additional time to respond if the applicant's failure to file a complete response is inadvertent. If the examining attorney holds the application abandoned for failure to file a complete response to an Office action, the applicant may file a petition to the Director to review the examining attorney's action under 37 C.F.R. §2.146. The Director will reverse the examining attorney's action only if there is clear error or an abuse of discretion. See [TMEP §1713](#).

A request for reconsideration of a final refusal ( see [TMEP §§715.03–715.03\(c\)](#) ) that does not meet all legal requirements and is not accompanied by a proper notice of appeal will be treated as an incomplete response to the final Office action. If the examining attorney denies the request for reconsideration, the time for filing a notice of appeal runs from the issuance date of the final action. [TMEP §715.03\(c\)](#). If the time for appeal has expired and the application is abandoned for an incomplete response, the applicant may not file a petition to revive under 37 C.F.R. §2.66. The applicant may file a petition to the Director to review the examining attorney's action under 37 C.F.R. §2.146. See [TMEP §1713](#) regarding petitions to reverse a holding of abandonment for an incomplete response.

#### **1714.01(f)(ii)(B) Examining Attorney's Refusal of Registration on Ground That Applicant Did Not Meet Statutory Requirements Before Expiration of Deadline for Filing Statement of Use**

If the applicant unintentionally fails to meet the minimum requirements for *filing* a statement of use, as set forth in 37 C.F.R. §2.88(e), the applicant may file a petition to revive under 37 C.F.R. §2.66. However, the applicant may not file a petition to revive under 37 C.F.R. §2.66 if the applicant met the minimum filing requirements of 37 C.F.R. §2.88(e), but the examining attorney later refuses registration on the ground that the applicant failed to satisfy the statutory requirements for a *complete* statement of use (15 U.S.C. §1051(d); 37 C.F.R. §2.88(b)) on or before the statutory deadline (e.g., because the specimen is unacceptable or the dates of use are subsequent to the deadline for filing the statement of use). The applicant may appeal the examining attorney's refusal of registration to the Trademark Trial and Appeal Board. See [TMEP](#)

[§1109.16\(a\)](#) regarding the requirements that must be met within the statutory period for filing the statement of use.

### **1714.01(f)(ii)(C) Goods/Services Omitted from Statement of Use or Request for Extension of Time to File a Statement of Use**

If the applicant lists the goods/services in a statement of use or request for an extension of time to file a statement of use, and omits any goods or services that were listed in the notice of allowance, the USPTO will presume these goods/services to be deleted. The applicant may not thereafter request that the goods/services be reinserted in the application. 37 C.F.R. §§2.88(i)(2) and 2.89(f); [TMEP §§1108.02\(d\)](#) and [1109.13](#). In these situations, the applicant may not file a petition under 37 C.F.R. §2.66 claiming unintentional delay in filing a statement of use or extension request for the omitted goods/services.

### **1714.01(f)(ii)(D) Registered Marks**

Trademark Rule 2.66 applies only to abandoned applications, not to registered marks. If a registrant fails to timely respond to an Office action regarding a §8 affidavit, §71 affidavit, or §9 renewal application, the registrant may file a petition to the Director under 37 C.F.R. §§2.146(a)(5) and 2.148 to waive a rule and accept a late response. However, the Director will waive a rule only in an extraordinary situation, where justice requires, and no other party is injured. The Director has no authority to waive a statutory requirement. See [TMEP §1708](#) regarding the waiver of rules. Failure to receive the post registration Office action may be considered an extraordinary situation.

See [TMEP §§1712.02–1712.02\(b\)](#) regarding requests to reinstate cancelled or expired registrations.

### **1714.01(f)(ii)(E) Dismissal of Appeal for Failure to File a Brief**

An applicant cannot file a petition to revive under 37 C.F.R. §2.66 if an application is abandoned because the Board dismisses an appeal for failure to file a brief. In this situation, the applicant may file a motion with the Board to set aside the dismissal and accept a late-filed brief. See TBMP §1203.02(a). If the Board denies this motion, the applicant may file a petition to the Director under 37 C.F.R. §2.146, asking the Director to reverse the Board's order. The petition must be filed within thirty days of the issuance date of the Board's order. 37 C.F.R. §2.146(e)(2). The Director will reverse the Board's action only if the Board clearly erred or abused its discretion.

### **1714.01(g) Request for Reconsideration of Denial of Petition to Revive**

Under 37 C.F.R. §2.66(f), if a petition to revive is denied, the applicant may request reconsideration by: (1) filing the request for reconsideration within two months of the issuance date of the decision denying the petition; and (2) paying a second petition fee under 37 C.F.R. §2.6. See [TMEP §1705.08](#).

## **1715 Letters of Protest in Pending Applications**

A letter of protest is an informal procedure created by and existing at the discretion of the USPTO, whereby third parties may bring to the attention of the USPTO evidence bearing on the registrability of a mark. The letter of protest procedure applies only to pending applications and is intended to aid in examination without causing undue delay and without compromising the integrity and objectivity of the ex parte examination process. See *In re BPJ Enter's., Ltd.*, 7 USPQ2d 1375 (Comm'r Pats. 1988); *In re Pohn*, 3 USPQ2d 1700 (Comm'r Pats. 1987).

Letters of protest are reviewed in the Office of the Deputy Commissioner for Trademark Examination Policy (“Deputy Commissioner”) to determine whether the submitted information should be given to the examining attorney for consideration. To preserve the integrity and objectivity of the ex parte examination process, the letter of protest never becomes part of the application file and the Deputy Commissioner acts on the letter of protest without consulting with the examining attorney. The Deputy Commissioner considers only the record in the application and the evidence submitted by the protestor. *BPJ Enter’s.*, 7 USPQ2d at 1378.

If a third party attempts to contact an examining attorney regarding a letter of protest, the examining attorney will refer the third party to the Deputy Commissioner’s Office. If an examining attorney receives a letter of protest, the letter will be referred to the Deputy Commissioner’s Office for consideration. If the letter of protest is mistakenly entered in the record as a document received from the applicant, all evidence of that receipt will be expunged from the application record.

The Deputy Commissioner will accept a letter of protest filed before publication where it is determined that the evidence is relevant and supports any reasonable ground for refusal appropriate in ex parte examination. The Deputy Commissioner will accept a letter of protest filed after publication only if the protestor submits prima facie evidence supporting a refusal of registration, such that publication of the mark without consideration of the issue and evidence presented in the letter of protest was a clear error ( *see* [TMEP §706.01](#)) by the USPTO. *See* [TMEP §§1715.02](#) and [1715.03–1715.03\(e\)](#).

## **1715.01 Appropriate and Inappropriate Subjects to Be Raised in Letter of Protest**

It is inappropriate to use the letter of protest procedure to delay registration or to present purely adversarial arguments. The USPTO denies letters of protest that merely present adversarial arguments that registration should be refused. Adversarial arguments in letters of protest are not sent to the examining attorney. These objections to registration should be made in an opposition proceeding after publication or, in the case of the Supplemental Register, a cancellation proceeding after registration. The letter of protest procedure may not be used to circumvent the requirements for filing an opposition. The USPTO also denies letters of protest that do not include factual, objective evidence.

### **1715.01(a) Issues Appropriate as Subjects of Letters of Protest**

Appropriate subjects for letters of protest concern issues that the examining attorney has the authority and resources to pursue to a legal conclusion without further intervention by third parties. The following are examples of the most common areas of protest:

- (1) A third party files an objection to the registration of a term because it is allegedly generic or descriptive. The objection must be accompanied by *evidence* of genericness or descriptiveness. The evidence should be objective, independent, and factual evidence that the examining attorney may use to support the suggested refusal. Personal opinions are subjective and may be self-serving, and are not forwarded to the examining attorney. If the letter of protest is accepted, the examining attorney is informed that an objection to registration has been filed on the ground that the mark is generic or descriptive, and is given a copy of any factual evidence submitted with the letter of protest.
- (2) A third party notifies the USPTO of the existence of a federally registered mark or prior-pending application and alleges that there is a likelihood of confusion between this mark and the mark in the application that is the subject of the letter of protest. If the letter of protest is accepted, the examining attorney is notified that an objection to the registration of the mark has been made on the ground of an alleged likelihood of confusion with a registered mark or prior pending application, and is referred to the registration or application information as it appears in the automated records of the USPTO.

- (3) A third party files a request that prosecution of an application be suspended because of pending litigation claiming infringement based on the applicant's use of the applied-for mark. The litigation must be specifically identified and a copy of the relevant pleadings must be enclosed. The litigation must involve a federally registered mark or prior pending application of the protestor, and the protestor must allege that there is a likelihood of confusion between this mark and the mark in the application that is the subject of the letter of protest. Normally, a court proceeding is not considered relevant to the registrability of a mark unless the remedy requested in the proceeding is cancellation, abandonment, or amendment of the application that is the subject of the letter of protest. If the letter of protest is accepted, the examining attorney is informed that a request for suspension has been received based on an alleged likelihood of confusion with a registered mark or prior pending application that is the subject of pending litigation. Copies of the relevant pleadings are placed in the record.
- (4) A third party notifies the USPTO that registered marks are being used inappropriately in identifications of goods and services for particular applications. ( See [TMEP §1402.09](#).)
- (5) A third party notifies the USPTO of the existence of a subsequently filed U.S. application and alleges that the application contains a proper claim of priority under §44(d) to which the third party is entitled and that there is a likelihood of confusion between its mark and the mark in a prior-filed application that is the subject of the letter of protest. See TMEP §§[1003.05](#) and [1904.01\(e\)](#).
- (6) A third party notifies the USPTO of the existence of an application filed under §66(a) with an earlier filing date or a priority claim to which the third party is entitled and that there is a likelihood of confusion between its mark and the mark in the application that is the subject of the letter of protest, and the §66(a) application may not have been entered into the USPTO database at the time the application that is the subject of the letter of protest was examined. See TMEP §§[1904.01\(b\)](#) and [1904.01\(e\)](#).
- (7) A third party notifies the USPTO that the foreign application relied upon as the basis for a claim of priority under §44(d) is not the first application filed in a treaty country and provides evidence of the existence of an earlier-filed foreign registration or pending foreign application. See [TMEP §1003.01](#).

### **1715.01(b) Issues Inappropriate as Subjects of Letters of Protest**

The following are examples of issues that are *not* appropriate to raise in letters of protest:

- (1) A third party claims earlier common-law use of a trademark but does not have a federal registration or previously filed pending application for that mark. The examining attorney can only consider registrations and prior-pending applications when determining likelihood of confusion. Earlier common-law use, state registrations, and other claims based on evidence other than federal registrations and prior-pending applications for federal registration are not appropriate for presentation to examining attorneys during ex parte examination.
- (2) A third party claims that the applicant is not the proper owner of the mark. This issue requires proof that is beyond the scope of authority of an examining attorney to require during ex parte examination. *In re Apple Computer, Inc.*, 57 USPQ2d 1823 (Comm'r Pats. 1998).
- (3) Numerous third parties set forth the opinion that the mark should not register, but do not offer any evidence or legal reason to support the refusal. The letter of protest procedure should not be used as a means for expressing public opinion about a particular mark. The trademark registration process is governed by statutory laws and federal regulations. Public opinion may not be used to influence the application process; therefore, mass mailings by special-interest groups will not be made part of the record. Letters of protest that raise the same objection to registration submitted by five or more different parties will be considered a mass mailing.

- (4) A third party requests that prosecution of an application be suspended or refused because of pending litigation, but does not provide proof that the pending litigation includes grounds upon which the Office can suspend or refuse registration (e.g., the litigation does not involve a federally registered mark or prior-pending application of the protestor).
- (5) A third party claims that the applicant has committed fraud against the USPTO.

## **1715.02 Letter of Protest Filed Before Publication**

### **1715.02(a) Standard of Review for Letter of Protest Filed Before Publication**

The Deputy Commissioner will accept a letter of protest filed before publication in all cases where it is determined that the evidence is relevant and supports any reasonable ground for refusal appropriate in ex parte examination. The letter of protest will be reviewed and decided upon even if the examining attorney has not yet taken a first action in the application that is the subject of the letter of protest. Upon acceptance of a letter of protest, the Deputy Commissioner will forward the relevant evidence (but not the letter of protest itself) to the examining attorney. Letters of protest filed before publication will be denied if they merely present purely adversarial arguments, or are otherwise inappropriate.

A letter of protest filed before publication but reviewed by the Deputy Commissioner after publication will be reviewed under the pre-publication standard. See [TMEP §1715.02\(b\)](#).

A letter of protest filed before publication will be dismissed as moot when the issue raised has already been considered by the examining attorney unless: (1) the evidence provided by the protestor is significant additional evidence not currently of record in the application; or (2) the examining attorney clearly erred in his or her consideration of the issue and such error would result in the issuance of a registration in violation of the Trademark Act or applicable rules. See [TMEP §706.01](#) regarding clear error.

### **1715.02(b) Action by Examining Attorney Before Publication**

Under the standard for accepting a pre-publication letter of protest, the examining attorney is *not* required to issue a refusal as a result of the acceptance. The examining attorney is required only to consider the evidence and make an independent determination whether to issue the requirement or refusal requested in the letter of protest. The examining attorney need not inform the applicant that a letter of protest was accepted unless he or she is issuing a refusal based upon the information provided with the letter of protest. The prosecution history of the application will reflect the acceptance of a letter of protest and a memorandum accepting the letter of protest and all relevant evidence will become part of the official record. If the examining attorney decides against issuing the requirement or refusal, the prosecution history of the application in the Trademark database will be updated to indicate “LETTER OF PROTEST EVIDENCE REVIEWED.”

#### *Letters of Protest Filed Before Publication but Accepted After Publication*

In certain circumstances, a letter of protest filed before publication may not be reviewed by the Deputy Commissioner until after publication or during the period when the USPTO cannot withdraw the mark from publication. Such letters are reviewed under the pre-publication standard. If accepted and referred to the examining attorney after publication, the examining attorney is not required to issue a refusal or requirement as a result of the acceptance. However, the examining attorney must consult with his or her managing attorney to determine whether a refusal or requirement is warranted.

If it is determined that a refusal or requirement must be made after publication and prior to the filing of a notice of opposition or issuance of a notice of allowance, the examining attorney must request that the Director restore jurisdiction so that the examining attorney may take action on the application. See [TMEP §1504.04](#). If a notice of opposition has been filed, the examining attorney must request that the Board remand the application so that the examining attorney may take the specified action. See [TMEP §1504.05](#).

If the letter of protest concerns a mark in an intent-to-use application where a notice of allowance has issued, the examining attorney has jurisdiction over the application. 37 C.F.R. §2.84(a). If the examining attorney determines, after consulting with his or her managing attorney, that a refusal or requirement must be made, and a statement of use has not been filed, before issuing an Office action, he or she must contact the ITU/Divisional Unit to cancel the notice of allowance and refund any fees paid for requests for an extension of time to file a statement of use. See [TMEP §1106.03](#).

If the letter of protest concerns a mark for which a statement of use has been filed, the examining attorney has jurisdiction over the application. If the examining attorney determines, after consulting with his or her managing attorney, that a refusal or requirement must be made, and no action has been taken on the statement of use, he or she must review the statement of use and include any issues relevant to the statement of use in the Office action resulting from the letter of protest. If an Office action regarding the statement of use has already issued, the examining attorney must issue a supplemental action regarding the refusal(s) or requirement(s) resulting from the letter of protest and incorporating by reference or restating any other outstanding refusal(s) or requirement(s).

### **1715.03 Letters of Protest Filed on the Date of Publication or After Publication**

#### **1715.03(a) Standard of Review for Letters of Protest Filed on the Date of Publication or After Publication**

When a letter of protest is filed more than 30 days after the date of publication, the letter of protest will generally be denied as untimely. See [TMEP §1715.03\(b\)](#).

When a letter of protest is filed on the date of publication or within 30 days after the date of publication, the letter of protest will be accepted only where publication of the mark constituted clear error, because the evidence included with the letter of protest establishes a prima facie case for refusal of registration. *In re BPJ Enter's. Ltd.*, 7 USPQ2d 1375, 1379 (Comm'r Pats. 1988). If evidence is not included, the letter of protest will be denied. The USPTO also denies letters of protest that merely present adversarial arguments that registration should be refused. See [TMEP §706.01](#) regarding clear error and [TMEP §1715.04](#) regarding the nature of relevant evidence.

Letters of protest regarding applications that will issue on the Supplemental Register must be submitted as soon as possible after the filing of the application. If the subject application enters the phase where it cannot be withdrawn from issue while consideration of the letter of protest is pending, the protest will be dismissed as untimely. The Office cannot consider a letter of protest after registration.

#### **1715.03(b) Timely Filing of Letter of Protest**

The most appropriate time for filing a letter of protest is before publication of a mark, because the purpose of the letter of protest is to assist the USPTO in the examination of an application for registration by bringing to its attention evidence that may support a refusal of registration. Letters of protest filed more than 30 days after publication are generally denied as untimely, because a letter of protest filed after publication may

delay the registration process significantly. *In re BPJ Enter's. Ltd.*, 7 USPQ2d 1375, 1378 (Comm'r Pats. 1988). This applies to all applications, including intent-to-use applications under 15 U.S.C. §1051(b). *In re G. Heileman Brewing Co., Inc.*, 34 USPQ2d 1476, 1478 (Comm'r Pats. 1994).

Exceptions to the 30-day rule are made only in special circumstances. *In re Pohn*, 3 USPQ2d 1700, 1703 (Comm'r Pats. 1987). For example, where the protestor could not earlier have obtained the information provided, a letter of protest may be accepted. Special circumstances may be established upon a showing that all of the evidence provided in the letter of protest was not in existence prior to publication, but to justify accepting such a letter of protest, the evidence must establish a prima facie case for refusal. However, the fact that a specimen was not of record prior to publication would not by itself be considered a special circumstance that would support allowing a letter of protest more than 30 days after publication.

If a letter of protest is filed against an application that is the subject of a request for extension of protection of an international registration under Trademark Act §66(a), in addition to meeting the timeliness standards set forth above for all letters of protest, it must also satisfy the timeliness requirements for refusals under Trademark Act §68(c) and Article 5 of the Madrid Protocol. In essence, a letter of protest against a §66(a) application must be filed before the 18-month deadline after the application was transmitted to the USPTO from the IB. A letter of protest will be dismissed if it is more than 18 months from the date the IB transmitted the protested application to the USPTO. See [TMEP §1904.03\(a\)](#).

Filing a request for extension of time to oppose does not extend the 30-day deadline for filing a letter of protest.

The letter of protest procedure applies *only* to pending applications. The Director has no authority to cancel a registration in order to consider a letter of protest. Therefore, a letter of protest will be denied as untimely if the mark registers before issuance of the decision on the letter. Once the mark has registered, the protestor's remedy is to file a petition to cancel with the Board.

### **1715.03(c) Jurisdiction of Application when a Letter of Protest Is Accepted After Publication**

As a general rule, after publication, the examining attorney does not have jurisdiction to act on an application. [TMEP §1504.04](#). Therefore, upon acceptance of a letter of protest filed after publication and before issuance of the registration or notice of allowance, the Commissioner for Trademarks will restore jurisdiction of the application to the examining attorney. The Commissioner will also restore jurisdiction when a letter of protest is accepted and an extension of time to file an opposition has been filed. However, if an opposition has been instituted, the Board has jurisdiction over the application. [TMEP §1504.02](#). Therefore, upon request, the Board will generally restore jurisdiction and remand the application to the examining attorney. See TBMP §215 for further information concerning the effect of a letter of protest when an opposition or request for extension of time to oppose has been filed.

If the letter of protest concerns a mark in an intent-to-use application where a notice of allowance has issued, the examining attorney has jurisdiction. 37 C.F.R. §2.84(a). If the Deputy Commissioner determines that the letter of protest should be accepted and a statement of use has not been filed, the USPTO will cancel the notice of allowance and refund any fees paid for requests for an extension of time to file a statement of use. Formal restoration of jurisdiction by the Commissioner is unnecessary. [TMEP §1106.03](#). Furthermore, if a statement of use has been filed, the examining attorney has jurisdiction and must review the statement of use and include any issues relevant to the statement of use in the Office action resulting from the letter of protest. If an Office action regarding the statement of use has already issued, the examining attorney

must issue a supplemental action regarding the refusals or requirements resulting from the letter of protest and incorporating by reference or restating any other outstanding refusals or requirements.

### **1715.03(d) Action by Examining Attorney After Publication**

If the USPTO accepts a letter of protest filed on the date of publication or after publication, the examining attorney must issue the refusal or requirement, except in unusual circumstances. The examining attorney must inform the applicant that a letter of protest was accepted. If the notice of allowance was cancelled, the examining attorney must so inform the applicant. Before issuing the Office action with the refusal or requirement, the examining attorney must have the action reviewed by his or her managing attorney.

However, the acceptance of the letter of protest is not a final determination by the USPTO that registration must be refused. In unusual circumstances, the examining attorney may discover additional evidence that would justify approval of the application for registration after acceptance of a letter of protest, or the applicant may overcome the refusal or satisfy the requirement. If a letter of protest is accepted after publication and the examining attorney later determines that the mark should be approved for issuance of a registration or notice of allowance, the examining attorney must obtain permission from the Administrator for Trademark Policy and Procedure (“Administrator”) before approving the application for issue. After conferring with the Administrator, an appropriate Note to the File must be entered in the record.

### **1715.03(e) Letter of Protest Does Not Stay or Extend Opposition Period**

Filing a letter of protest does not stay or extend the opposition period. Therefore, a party who files a letter of protest after publication should also file a timely request(s) for extension of time to oppose under 15 U.S.C. §1063 with the Trademark Trial and Appeal Board. See TBMP §215 for further information. The Board will not suspend a potential opposer’s time to file a notice of opposition because a letter of protest has been filed. See notice at 68 Fed. Reg. 55748, 55760 (Sept. 26, 2003).

### **1715.04 Information for Parties Filing Letter of Protest**

Third parties who object to the registration of a mark in a pending application must never contact an examining attorney directly, either by telephone or in writing. Instead, they may submit a written request to the USPTO entitled “LETTER OF PROTEST.” A separate letter of protest, including relevant evidence, must be submitted for each application being protested. Each letter of protest must include the name and address of the protestor so that a response may be sent.

If the letter of protest is accepted, only evidence relevant to examination of the mark, or the registration numbers or pending application serial numbers raised as potential cites, are forwarded to the examining attorney. Therefore, the letter of protest should include only a simple statement of the proposed legal grounds for refusing registration or making a requirement, with succinct, factual, objective evidence to support the refusal or requirement, and should not include arguments. If the evidence is not included, the letter of protest will be denied.

Note that a letter of protest should not include information or evidence concerning prior use, actual confusion, or fraudulent activity. These are not appropriate grounds for refusing registration during ex parte examination and must be addressed in an inter partes proceeding before the Trademark Trial and Appeal Board or a civil court. See [TMEP §1715.01](#) for appropriate and inappropriate subjects to be raised in letter of protest.

The type of evidence relevant to the examination of the mark depends upon the nature of the objection raised. For example, if an objection is filed on the basis that a mark, or portion of a mark, is descriptive or generic, the protestor must submit factual, objective evidence, such as descriptive or generic use by others or excerpts from the dictionary showing the meaning of the mark. Merely submitting a list of web sites is not sufficient, and a letter of protest that only includes such a list will be denied. If third-party registrations are offered to show that the mark or a portion of the mark is descriptive, generic, or so commonly used that the public will look to other elements to distinguish the source of the goods or services, a mere list of the registrations or copy of a search report is not proper evidence of such registrations. Rather, copies of the registrations or the electronic equivalent thereof (i.e., printouts or electronic copies of the registrations taken from the electronic database of the USPTO) must be submitted. See [TMEP §1207.01\(d\)\(iii\)](#).

Generally, if an objection is based on a likelihood of confusion with existing federally registered marks or prior pending applications, and the goods and/or services are identical, third parties need only submit the relevant registration or application serial number(s). However, if there are multiple registration or application serial numbers that the protestor wants to be brought to the attention of the examining attorney, it is recommended that a chart listing the registration or serial numbers, the marks, and the goods and/or services be included. Such a chart must be provided on plain paper (not letterhead) or a PDF file with a plain background. To maintain the integrity of the ex parte examination process, the chart must not identify the protestor or its representatives or contain any arguments or persuasive language. If the goods and/or services are not identical, evidence of the relatedness of the goods and/or services must be included. Such evidence may include advertisements showing that the relevant goods/services are advertised together or sold by the same manufacturer or copies of registrations showing that such goods/services emanate from the same source. Note that a list of registration numbers, a chart containing the registration numbers and identified goods/services, or a copy of a search report is not proper evidence to show the relatedness of the goods or services in the registrations. Rather, copies of the registrations or the electronic equivalent thereof (i.e., printouts or electronic copies of the registrations taken from the electronic database of the USPTO) must be submitted. See [TMEP §1207.01\(d\)\(iii\)](#).

A separate itemized index must accompany any submission of evidence exceeding 75 pages or the letter of protest may not be considered. Moreover, the Office encourages the use of an index in all letters of protests that contain multiple forms of evidence as its aids in the consideration of the details of all the evidence provided by the protestor. The index must be provided on plain paper (not letterhead), or a PDF file with a plain background, and contain a concise factual description of each category or form of evidence included. To maintain the integrity of the ex parte examination process, the index must not identify the protestor or its representatives or contain any arguments or persuasive language.

### **1715.04(a) Submitting a Letter of Protest**

Because letters of protest are not part of the official application record, they must be properly designated and submitted to the USPTO. In order to ensure their proper routing and processing, the Office recommends that letters of protest be filed electronically via the Trademark Electronic Application System (“TEAS”). A separate letter of protest must be filed for each individual application that is being protested. In TEAS, the Letter of Protest form can be accessed by clicking on the link entitled “Petition Forms” at <http://www.uspto.gov/trademarks/teas/>. Otherwise, letters of protest should be faxed to the attention of the Deputy Commissioner for Trademark Examination Policy to the following fax number: 571-273-0032.

This is the only fax number that may be used. Letters of protest may not be submitted by e-mail. Failure to submit the letter of protest properly may result in it being considered untimely.

Letters of protest with significant amounts of evidence may be sent via the United States Postal Service as first class mail, and addressed as follows:

#### Letter of Protest

ATTN: Deputy Commissioner for Trademark Examination Policy  
600 Dulany Street  
Alexandria, VA 22314-5793

Duplicate copies of letters of protest regarding the same application should not be sent (e.g., once electronically and then by mail or fax). Submission of duplicate documents can delay processing.

Submissions relating to a letter of protest, including requests for copies of letters of protest ( *see* [TMEP §1715.05](#)), should not include a request for a return receipt. If a protestor hand delivers the letter of protest or uses a private courier service, the letter of protest must be delivered to the attention of the Deputy Commissioner for Trademark Examination Policy at the Trademark Assistance Center, James Madison Building - East Wing, Concourse Level, 600 Dulany Street, Alexandria, Virginia, and be clearly identified as a letter of protest.

#### **1715.04(b) Tracking of Letter of Protest by the Protestor**

A protestor will always receive a response from the Deputy Commissioner accepting, denying, or holding moot the letter of protest, and should generally receive the response within 60 days of filing the letter. The protestor should monitor the application status by checking the TSDR database at <http://tsdr.uspto.gov/> to determine whether an action accepting the letter of protest has been taken. This information will be in the public record only if the letter of protest is accepted. If a protestor has not received a response within six months of submitting a letter of protest, the protestor should contact the Petitions Office to confirm receipt of the letter of protest.

Protestors should continue to monitor the status of the application being protested because the application may be approved for publication, republication, or issuance of a registration even after a letter of protest is accepted. Ongoing monitoring will ensure protestors the opportunity to take other action (such as filing a notice of opposition) if the refusal or requirement raised as a result of the evidence referred by the letter of protest procedure is successfully overcome by the applicant. A protestor may file a second letter of protest after publication only if a substantially different basis for filing the letter of protest is raised or significant additional evidence is provided that clearly establishes a prima facie case for refusal of registration.

#### **1715.05 Requests for Copy of Letter of Protest**

Any party who requests a copy of a letter of protest should mail the request to the Office of the Commissioner for Trademarks, P.O. Box 1451, Alexandria, Virginia 22313-1451 or fax the request to 571-273-0032. All requests should be directed to the attention of the Deputy Commissioner for Trademark Examination Policy. Upon review of the letter of protest material, the Deputy Commissioner will usually forward a copy of the letter of protest and its attachment to the requester. The Deputy Commissioner will deny the request for a copy of the letter of protest only if the letter of protest itself or its attachments contain material that would potentially be exempt from disclosure under the Freedom of Information Act ("FOIA"). If, in the opinion of the Deputy Commissioner, any part of the letter of protest or its attachments should be exempt from

disclosure under FOIA, the matter will be forwarded to the Office of General Counsel of the USPTO for further review.

### **1715.06 Recourse After Denial of Letter of Protest**

If the Deputy Commissioner denies a letter of protest, the protestor may pursue remedies otherwise available, such as an opposition proceeding, if the protestor complies with all relevant requirements and deadlines. Filing a letter of protest does not stay or extend the time for filing a notice of opposition. [TMEP §1715.03\(b\)](#).

The protestor may not file a request for reconsideration of the denial of the letter of protest with the Deputy Commissioner, because the request would unduly delay final disposition of the application. *In re BPJ Enter's. Ltd.*, 7 USPQ2d 1375, 1378 (Comm'r Pats. 1988). However, the protestor may petition the Director to review the Deputy Commissioner's decision to deny the letter of protest under 37 C.F.R. §2.146(a)(3).

The Deputy Commissioner has broad discretion in determining whether to accept a letter of protest. In any petition to review the denial of a letter of protest, the Deputy Commissioner's action will be reversed only where there has been a clear error or abuse of this broad discretion. *In re Pohn*, 3 USPQ2d 1700, 1702 (Comm'r Pats. 1987).

The protestor may not present additional evidence with the petition. On petition, the Director will consider only the evidence that was properly before the Deputy Commissioner in acting on the letter of protest. *BPJ Enter's.*, 7 USPQ2d at 1378.

# Chapter 1800 Public Inquiries About Applications and Registrations

---

<b>1801</b>	<b>Office Personnel May Not Express Opinion on Validity of Registered Trademark</b>
1801.01	Office Personnel Cannot Testify
<b>1802</b>	<b>Congressional and Other Official Inquiries</b>
<b>1803</b>	<b>Freedom of Information Act Requests</b>
<b>1804</b>	<b>Inquiries from Members of the Press</b>
<b>1805</b>	<b>General Inquiries from the Public</b>
<b>1806</b>	<b>Contacts with Third Parties Regarding Ex Parte Matters</b>
<b>1807</b>	<b>United States Patent and Trademark Office World Wide Web Page</b>

## **1801 Office Personnel May Not Express Opinion on Validity of Registered Trademark**

A certificate of registration of a mark on the Principal Register is prima facie evidence of the validity of the registration. 15 U.S.C. §1057(b). Public policy demands that every employee of the United States Patent and Trademark Office (“USPTO”) refuse to express to any person any opinion as to the validity of any registered mark, except to the extent necessary to carry out inter partes proceedings at the Trademark Trial and Appeal Board in cancellation and similar proceedings authorized by law.

The question of the validity of a registered mark is otherwise exclusively a matter to be determined by a court. Members of the Trademark Examining Operation are cautioned to be especially wary of any inquiry from any person outside the USPTO, including an employee of another Government agency, the answer to which might indicate that a particular registration should not have been published or issued.

An employee of the USPTO, particularly a trademark examining attorney who examined an application, should not discuss or answer inquiries from any person outside the USPTO as to whether a certain registration or particular evidence was considered during the examination of the application, or whether a mark would have been published or registered if the registration or other evidence had been considered during the examination. Likewise, employees should not answer any inquiry concerning any entry in a registration file, including the extent of the field of search. The record of the file of a registration or inter partes proceeding before the Trademark Trial and Appeal Board must speak for itself.

Employees should refuse to discuss these matters with members of the public, and this refusal should not be considered discourteous. Practitioners should not make improper inquiries of members of the Trademark Examining Operation.

See [TMEP §1806](#) regarding contacts with third parties about ex parte matters.

### **1801.01 Office Personnel Cannot Testify**

#### **37 CFR Part 104**

#### **Subpart A--General Provisions**

*37 CFR §104.1 Definitions.*

Demand means a request, order, or subpoena for testimony or documents for use in a legal proceeding.

Director means the Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office ( *see* §1.9(j)).

Document means any record, paper, and other property held by the Office, including without limitation, official letters, telegrams, memoranda, reports, studies, calendar and diary entries, maps, graphs, pamphlets, notes, charts, tabulations, analyses, statistical or informational accumulations, any kind of summaries of meetings and conversations, film impressions, magnetic tapes, and sound or mechanical reproductions.

Employee means any current or former officer or employee of the Office.

Legal proceeding means any pretrial, trial, and posttrial stages of existing or reasonably anticipated judicial or administrative actions, hearings, investigations, or similar proceedings before courts, commissions, boards or other tribunals, foreign or domestic. This phrase includes all phases of discovery as well as responses to formal or informal requests by attorneys or others involved in legal proceedings.

Office means the United States Patent and Trademark Office, including any operating unit in the United States Patent and Trademark Office, and its predecessors, the Patent Office and the Patent and Trademark Office.

Official business means the authorized business of the Office.

General Counsel means the General Counsel of the Office.

Testimony means a statement in any form, including personal appearances before a court or other legal tribunal, interviews, depositions, telephonic, televised, or videotaped statements or any responses given during discovery or similar proceedings, which response would involve more than the production of documents, including a declaration under 35 U.S.C. 25 or 28 U.S.C. 1746.

United States means the Federal Government, its departments and agencies, individuals acting on behalf of the Federal Government, and parties to the extent they are represented by the United States.

*37 CFR §104.2 Address for mail and service; telephone number.*

(a) Mail under this part should be addressed to General Counsel, United States Patent and Trademark Office, P.O. Box 15667, Arlington, VA 22215.

(b) Service by hand should be made during business hours to the Office of the General Counsel, 10B20, Madison Building East, 600 Dulany Street, Alexandria, Virginia.

(c) The Office of the General Counsel may be reached by telephone at 571-272-7000 during business hours.

*37 CFR §104.3 Waiver of rules.*

In extraordinary situations, when the interest of justice requires, the General Counsel may waive or suspend the rules of this part, sua sponte or on petition of an interested party to the Director, subject to such requirements as the General Counsel may impose. Any petition must be accompanied by a petition fee of \$130.00.

*37 CFR §104.4 Relationship of this Part to the Federal Rules of Civil or Criminal Procedure.*

Nothing in this part waives or limits any requirement under the Federal Rules of Civil or Criminal Procedure.

## **Subpart B--Service of Process**

*37 CFR §104.11 Scope and purpose.*

(a) This subpart sets forth the procedures to be followed when a summons and complaint is served on the Office or on the Director or an employee in his or her official capacity.

(b) This subpart is intended, and should be construed, to ensure the efficient administration of the Office and not to impede any legal proceeding.

(c) This subpart does not apply to subpoenas, the procedures for which are set out in subpart C.

(d) This subpart does not apply to service of process made on an employee personally on matters not related to official business of the Office or to the official responsibilities of the employee.

*37 CFR §104.12 Acceptance of service of process.*

(a) Any summons and complaint to be served in person or by registered or certified mail or as otherwise authorized by law on the Office, on the Director, or on an employee in his or her official capacity, shall be served as indicated in §104.2.

(b) Any employee of the Office served with a summons and complaint shall immediately notify, and shall deliver the summons and complaint to, the Office of the General Counsel.

(c) Any employee receiving a summons and complaint shall note on the summons and complaint the date, hour, and place of service and whether service was by hand or by mail.

(d) When a legal proceeding is brought to hold an employee personally liable in connection with an action taken in the conduct of official business, rather than liable in an official capacity, the employee by law is to be served personally with process. *See* Fed. R. Civ. P. 4(e). An employee sued personally for an action taken in the conduct of official business shall immediately notify and deliver a copy of the summons and complaint to the General Counsel.

- (e) An employee sued personally in connection with official business may be represented by the Department of Justice at its discretion (28 CFR 50.15 and 50.16).
- (f) The Office will only accept service of process for an employee in the employee's official capacity.

## Subpart C--Employee Testimony and Production of Documents in Legal Proceedings

### *37 CFR §104.21 Scope and purpose.*

- (a) This subpart sets forth the policies and procedures of the Office regarding the testimony of employees as witnesses in legal proceedings and the production or disclosure of information contained in Office documents for use in legal proceedings pursuant to a demand.
- (b) Exceptions. This subpart does not apply to any legal proceeding in which:
- (1) An employee is to testify regarding facts or events that are unrelated to official business; or
  - (2) A former employee is to testify as an expert in connection with a particular matter in which the former employee did not participate personally while at the Office.

### *37 CFR §104.22 Demand for testimony or production of documents.*

- (a) Whenever a demand for testimony or for the production of documents is made upon an employee, the employee shall immediately notify the Office of the General Counsel at the telephone number or addresses in §104.2 and make arrangements to send the subpoena to the General Counsel promptly.
- (b) An employee may not give testimony, produce documents, or answer inquiries from a person not employed by the Office regarding testimony or documents subject to a demand or a potential demand under the provisions of this subpart without the approval of the General Counsel. The General Counsel may authorize the provision of certified copies not otherwise available under Part 1 of this title subject to payment of applicable fees under §1.19.
- (c)(1) Demand for testimony or documents. A demand for the testimony of an employee under this subpart shall be addressed to the General Counsel as indicated in §104.2.
- (2) Subpoenas. A subpoena for employee testimony or for a document shall be served in accordance with the Federal Rules of Civil or Criminal Procedure or applicable state procedure, and a copy of the subpoena shall be sent to the General Counsel as indicated in §104.2.
- (3) Affidavits. Except when the United States is a party, every demand shall be accompanied by an affidavit or declaration under 28 U.S.C. 1746 or 35 U.S.C. 25(b) setting forth the title of the legal proceeding, the forum, the requesting party's interest in the legal proceeding, the reason for the demand, a showing that the desired testimony or document is not reasonably available from any other source, and, if testimony is requested, the intended use of the testimony, a general summary of the desired testimony, and a showing that no document could be provided and used in lieu of testimony.
- (d) Failure of the attorney to cooperate in good faith to enable the General Counsel to make an informed determination under this subpart may serve as a basis for a determination not to comply with the demand.
- (e) A determination under this subpart to comply or not to comply with a demand is not a waiver or an assertion of any other ground for noncompliance, including privilege, lack of relevance, or technical deficiency.
- (f) Noncompliance. If the General Counsel makes a determination not to comply, he or she will seek Department of Justice representation for the employee and will attempt to have the subpoena modified or quashed. If Department of Justice representation cannot be arranged, the employee should appear at the time and place set forth in the subpoena. In such a case, the employee should produce a copy of these rules and state that the General Counsel has advised the employee not to provide the requested testimony nor to produce the requested document. If a legal tribunal rules that the demand in the subpoena must be complied with, the employee shall respectfully decline to comply with the demand....

### *37 CFR §104.23 Expert or opinion testimony.*

- (a)(1) If the General Counsel authorizes an employee to give testimony in a legal proceeding not involving the United States, the testimony, if otherwise proper, shall be limited to facts within the personal knowledge of the employee. Employees, with or without compensation, shall not provide expert testimony in any legal proceedings regarding Office information, subjects, or activities except on behalf of the United States or a party represented by the United States Department of Justice.
- (2) The General Counsel may authorize an employee to appear and give the expert or opinion testimony upon the requester showing, pursuant to §104.3 of this part, that exceptional circumstances warrant such testimony and that the anticipated testimony will not be adverse to the interest of the Office or the United States.
- (b)(1) If, while testifying in any legal proceeding, an employee is asked for expert or opinion testimony regarding Office information, subjects, or activities, which testimony has not been approved in advance in writing in accordance with the regulations in this subpart, the witness shall:
- (i) Respectfully decline to answer on the grounds that such expert or opinion testimony is forbidden by this subpart;
  - (ii) Request an opportunity to consult with the General Counsel before giving such testimony; and
  - (iii) Explain that upon such consultation, approval for such testimony may be provided.
- (2) If the tribunal conducting the proceeding then orders the employee to provide expert or opinion testimony regarding Office information, subjects, or activities without the opportunity to consult with the General Counsel, the employee shall respectfully refuse to provide such testimony....
- (c) If an employee is unaware of the regulations in this subpart and provides expert or opinion testimony regarding Office information, subjects, or activities in a legal proceeding without the aforementioned consultation, the employee shall, as soon after testifying as possible, inform the General Counsel that such testimony was given and provide a written summary of the expert or opinion testimony provided.
- (d) Proceeding where the United States is a party. In a proceeding in which the United States is a party or is representing a party, an employee may not testify as an expert or opinion witness for any party other than the United States.

### *37 CFR §104.24 Demands or requests in legal proceedings for records protected by confidentiality statutes.*

Demands in legal proceedings for the production of records, or for the testimony of employees regarding information protected by the confidentiality provisions of the Patent Act (35 U.S.C. 122), the Privacy Act (5 U.S.C. 552a), the Trade Secrets Act (18 U.S.C. 1905), or any other confidentiality statute, must satisfy the requirements for disclosure set forth in those statutes and associated rules before the records may be provided or testimony given.

## Subpart D--Employee Indemnification

### *37 CFR §104.31 Scope.*

The procedure in this subpart shall be followed if a civil action or proceeding is brought, in any court, against an employee (including the employee's estate) for personal injury, loss of property, or death, resulting from the employee's activities while acting within the scope of the employee's office or employment. When the employee is incapacitated or deceased, actions required of an employee should be performed by the employee's executor, administrator, or comparable legal representative.

### *37 CFR §104.32 Procedure for requesting indemnification.*

(a) After being served with process or pleadings in such an action or proceeding, the employee shall within five (5) calendar days of receipt, deliver to the General Counsel all such process and pleadings or an attested true copy thereof, together with a fully detailed report of the circumstances of the incident giving rise to the court action or proceeding.

(b)(1) An employee may request indemnification to satisfy a verdict, judgment, or award entered against that employee only if the employee has timely satisfied the requirements of paragraph (a) of this section.

(2) No request for indemnification will be considered unless the employee has submitted a written request through the employee's supervisory chain to the General Counsel with:

- (i) Appropriate documentation, including copies of the verdict, judgment, appeal bond, award, or settlement proposal;
- (ii) The employee's explanation of how the employee was acting within the scope of the employee's employment; and
- (iii) The employee's statement of whether the employee has insurance or any other source of indemnification.

## Subpart E--Tort Claims

### *37 CFR §104.41 Procedure for filing claims.*

Administrative claims against the Office filed pursuant to the administrative claims provision of the Federal Tort Claims Act (28 U.S.C. 2672) and the corresponding Department of Justice regulations (28 CFR Part 14) shall be filed with the General Counsel as indicated in §104.2.

### *37 CFR §104.42 Finality of settlement or denial of claims*

Only a decision of the Director or the General Counsel regarding settlement or denial of any claim under this subpart may be considered final for the purpose of judicial review.

It is the policy of the USPTO that its employees, including trademark examining attorneys, will not appear as witnesses or give testimony in legal proceedings, except under the conditions specified in 37 C.F.R. Part 104. Any employee who testifies contrary to this policy will be dismissed or removed.

Whenever an employee of the USPTO, including a trademark examining attorney, is asked to testify or receives a subpoena, the employee shall immediately notify the Office of the General Counsel. Inquiries requesting testimony should also be referred immediately to the Office of the General Counsel.

Trademark examining attorneys and other USPTO employees who perform or assist in the performance of quasi-judicial functions, are forbidden to testify as experts or to express opinions as to the validity of any registration.

Any individual desiring the testimony of an employee of the USPTO, including the testimony of a trademark examining attorney or other quasi-judicial employee, must comply with the provisions of 37 C.F.R. Part 104.

A request for testimony of an employee of the USPTO should be made to the Office of the General Counsel at least ten working days prior to the date of the expected testimony.

If an employee is authorized to testify, the employee will be limited to testifying about facts within the employee's personal knowledge. Employees are prohibited from giving expert or opinion testimony. *Fischer & Porter Co. v. Corning Glass Works*, 61 F.R.D. 321, 181 USPQ 329 (E.D. Pa. 1974). Likewise, employees are prohibited from answering hypothetical or speculative questions. *Shaffer Tool Works v. Joy Mfg. Co.*,

167 USPQ 170 (S.D. Tex. 1970) (deposition of examiner should be limited to matters of fact and must not go into hypothetical or speculative areas or the bases, reasons, mental processes, analyses, or conclusions of the examiner); *In re Mayewsky*, 162 USPQ 86, 89 (E.D. Va. 1969) (deposition of an examiner must be restricted to relevant matters of fact and must avoid any hypothetical or speculative questions or conclusions).

Employees will not be permitted to give testimony with respect to subject matter that is privileged. Several court decisions limit testimony with respect to quasi-judicial functions performed by employees. *U.S. v. Morgan*, 313 U.S. 409, 422 (1941) (improper to inquire into mental processes of quasi-judicial officer or to examine the manner and extent to which the officer considered an administrative record); *Western Electric Co., Inc. v. Piezo Technology, Inc.*, 860 F.2d 428, 8 USPQ2d 1853 (Fed. Cir. 1988) (patent examiner may not be compelled to answer questions that probe the examiner's technical knowledge of the subject matter of a patent); *In re Nilssen*, 851 F.2d 1401, 7 USPQ2d 1500 (Fed. Cir. 1988) (technical or scientific qualifications of examiners-in-chief are not legally relevant in appeal under 35 U.S.C. §134 since board members need not be skilled in the art to render obviousness decision); *McCulloch Gas Processing Co. v. Department of Energy*, 650 F.2d 1216, 1229 (Temp. Emer. Ct. App. 1981) (discovery of degree of expertise of individuals performing governmental functions not permitted); *Lange v. Commissioner*, 352 F. Supp. 116, 176 USPQ 162 (D.D.C. 1972) (technical qualifications of examiners-in-chief not relevant in Sec. 145 action).

In view of the discussion above, if an employee is authorized to testify in connection with the employee's involvement or assistance in a quasi-judicial proceeding that took place before the USPTO, the employee will not be permitted to give testimony in response to questions that seek:

- (1) Information about that employee's:
  - (A) Background.
  - (B) Expertise.
  - (C) Qualifications to examine or otherwise consider a particular patent or trademark application.
  - (D) Usual practice or whether the employee followed a procedure set out in any USPTO manual of practice (including the MPEP or TMEP) in a particular case.
  - (E) Consultation with another USPTO employee.
  - (F) Understanding of:
    - (i) A patented invention, an invention sought to be patented, or patent application, patent, reexamination or interference file.
    - (ii) Prior art.
    - (iii) Registered subject matter, subject matter sought to be registered, or a trademark application, registration, opposition, cancellation, interference or concurrent use file.
    - (iv) Any USPTO manual of practice.
    - (v) USPTO regulations.
    - (vi) Patent, trademark, or other law.
    - (vii) The responsibilities of another USPTO employee.
  - (G) Reliance on particular facts or arguments.
- (2) To inquire into the manner in and extent to which the employee considered or studied material in performing the quasi-judicial function.
- (3) To inquire into the bases, reasons, mental processes, analyses, or conclusions of that USPTO employee in performing the quasi-judicial function.

Any request for testimony addressed or delivered to the Office of the General Counsel must comply with 37 C.F.R. §104.22(c). All requests must be in writing. The need for a subpoena may be obviated where the request complies with 37 C.F.R. §104.22(c) only if the party requesting the testimony meets the following conditions:

- (1) The party requesting the testimony identifies the civil action or other legal proceeding for which the testimony is being taken. The identification shall include:

- (A) the style of the case,
  - (B) the civil action number,
  - (C) the district in which the civil action is pending,
  - (D) the judge assigned to the case, and
  - (E) the name, address, and telephone number of counsel for all parties in the civil action.
- (2) The party agrees not to ask questions seeking information that is precluded by 37 C.F.R. §104.23.
- (3) The party must comply with applicable provisions of the Federal Rules of Civil Procedure, including Rule 30, and give ten working days notice to the Office of the General Counsel prior to the date a deposition is desired. Fifteen working days notice is required for any deposition that is desired to be taken between November 15 and January 15.
- (4) The party agrees to notice the deposition at a place convenient to the USPTO. The Conference Room in the Office of the General Counsel is deemed to be a place convenient to the USPTO.
- (5) The party agrees to supply a copy of the transcript of the deposition to the USPTO for its records.

Absent a written agreement meeting the conditions specified in paragraphs (1) through (5), a party must comply with the specific terms of 37 C.F.R. §104.22(c), and the USPTO will not permit a deposition without issuance of a subpoena.

*See* notice at 1099 TMOG 44 (February 28, 1989).

### **1802 Congressional and Other Official Inquiries**

Correspondence and inquiries from the White House, Members of Congress, embassies, and heads of Executive departments and agencies normally are cleared by the USPTO's Office of Policy and International Affairs and/or the Office of Governmental Affairs.

Inquiries referred to in this section such as correspondence from embassies, the Office of the U.S. Trade Representative, and the Department of State must immediately be transmitted to the Administrator of the Office of Policy and International Affairs, and a staff member of that office must be notified by phone that such correspondence has been received at 571-272-9300. Inquiries referred to in this section such as correspondence from Congress or the White House must immediately be transmitted to the Director of the Office of Governmental Affairs, and a staff member of that office must be notified by phone that such correspondence has been received at 571-272-7300.

This procedure is used so that there will be uniformity in the handling of contacts from the indicated sources, and also so that compliance with directives of the Department of Commerce is attained.

### **1803 Freedom of Information Act Requests**

Freedom of Information Act ("FOIA") requests should be sent by e-mail to [efoia@uspto.gov](mailto:efoia@uspto.gov), or by mail to the following address:

USPTO FOIA Officer  
United States Patent and Trademark Office  
P.O. Box 1450  
Alexandria, Virginia 22313-1450

Such requests may be addressed to the attention of the Freedom of Information Act/Privacy Act Officer.

Copies of final agency decisions of the USPTO and our most frequently requested FOIA documents are available on the USPTO website at <http://www.uspto.gov>.

### **1804 Inquiries from Members of the Press**

Inquiries from members of the press should be directed to the Office of Public Affairs, at (571) 272-8400.

### **1805 General Inquiries from the Public**

USPTO employees will gladly answer questions about the procedures for obtaining and maintaining a registration. For general information, callers may telephone the Trademark Assistance Center at (571) 272-9250 or (800) 786-9199. See [TMEP §108.02](#).

However, USPTO employees cannot:

- Comment on the validity of registered marks ( see [TMEP §1801](#));

- Provide a legal opinion on whether a particular mark or type of mark is eligible for registration; or

- Offer legal advice or opinions about common law rights in a mark, state registrations, or trademark infringement claims.

For a legal opinion about a trademark matter, a party must consult a private trademark attorney. The USPTO cannot aid in the selection of an attorney. 37 C.F.R. §2.11. Private trademark attorneys are generally listed in the yellow pages under the heading “Lawyers, Patent and Trademark,” or “Lawyers, Trademark.”

See [TMEP §104](#) regarding trademark searches.

See [TMEP §1806](#) regarding contacts with third parties about ex parte matters.

### **1806 Contacts with Third Parties Regarding Ex Parte Matters**

An examining attorney or other USPTO employee may not discuss the merits of any particular application or registration with a third party. If a third party attempts to contact an examining attorney about an ex parte matter, either orally or in writing, the examining attorney should refer the third party to the Office of the Deputy Commissioner for Trademark Examination Policy. See [TMEP §§1715 et seq.](#) regarding letters of protest.

An examining attorney may contact those in the relevant trade to obtain generally available information about an industry and its marketing practices, but the inquiry must be limited to eliciting factual information.

It is inappropriate to discuss or request opinions about the registrability of a particular mark. See *In re Lutron Electronics Co. Inc.*, 8 USPQ2d 1701 (Comm'r Pats. 1988).

### **1807 United States Patent and Trademark Office World Wide Web Page**

The USPTO has a website at [www.uspto.gov](http://www.uspto.gov) that provides access to a wide variety of information about trademarks and offers electronic filing of trademark applications and other trademark documents. See [TMEP §102](#) for further information.

# Chapter 1900 Madrid Protocol

---

<b>1901</b>	<b>Overview of the Madrid System of International Registration</b>
<b>1902</b>	<b>International Application Originating from the United States</b>
1902.01	Who Can File
1902.02	Minimum Requirements for Date of Receipt of International Application in USPTO
1902.02(a)	Form of International Application
1902.02(b)	Basic Application or Registration Number
1902.02(c)	Name and Address of Applicant
1902.02(d)	Reproduction (Drawing) of Mark
1902.02(e)	Color Claim
1902.02(f)	Identification of Goods/Services
1902.02(f)(i)	House Marks and “Full Line of ...”
1902.02(f)(ii)	Providing a Website/Online Portal
1902.02(g)	Classification in International Applications
1902.02(g)(i)	Reclassifying Goods/Services
1902.02(g)(ii)	United States Classes A, B, and 200
1902.02(g)(iii)	Kits and Gift Baskets
1902.02(h)	List of Contracting Parties
1902.02(i)	Fees
1902.02(j)	Statement of Entitlement
1902.02(k)	Description of Mark
1902.02(l)	Indication of Type of Mark
1902.02(m)	E-Mail Address
1902.03	Certification of International Application by USPTO
1902.03(a)	Petition to Review Refusal to Certify
1902.04	Date of International Registration
1902.05	IB Requirements for Complete International Application
1902.06	Examination of Application by IB
1902.07	Irregularities in International Application
1902.07(a)	Irregularities that Must Be Remedied by the USPTO
1902.07(b)	Irregularities that Must Be Remedied by the Applicant – Applicant Must Respond Directly to the IB
1902.07(b)(i)	Fee Irregularities
1902.07(c)	Irregularities that Must Be Remedied by the Applicant – Applicant Must Respond Through the USPTO
1902.07(c)(i)	Classification of Goods/Services
1902.07(c)(ii)	Identification (Indication) of Goods/Services
1902.07(d)	Other Irregularities that Must Be Remedied by Applicant – Applicant May Respond Directly to the IB or Through the USPTO
1902.07(e)	Filing Response Directly With the IB
1902.07(f)	Responding to Notice of Irregularity Through the USPTO
1902.08	Subsequent Designation - Request for Extension of Protection Subsequent to International Registration
1902.08(a)	USPTO Requirements
1902.08(b)	Form for Filing Subsequent Designation Through the USPTO
1902.08(c)	Fees for Subsequent Designation
1902.08(d)	IB Requirements for Subsequent Designation
1902.08(e)	Irregularities in Subsequent Designation
1902.09	Dependence and “Central Attack”: Restriction, Abandonment, Cancellation, or Expiration of Basic Application or Registration During First 5 Years
1902.10	Transformation When the USPTO Is the Office of Origin
1902.11	Representative

1902.12	USPTO Must Notify IB of Division or Merger of Basic Application or Registration
<b>1903</b>	<b>Payment of Fees</b>
1903.01	Payment of USPTO Fees
1903.02	Payment of International Fees
<b>1904</b>	<b>Request for Extension of Protection of International Registration to the United States</b>
1904.01	Filing Request for Extension of Protection to United States
1904.01(a)	Section 66(a) Basis
1904.01(b)	Filing Date
1904.01(c)	Declaration of Intent to Use Required
1904.01(d)	Use Not Required
1904.01(e)	Priority
1904.01(f)	Filing Fee
1904.01(g)	Constructive Use
1904.01(h)	Cannot be Based on USPTO Basic Application or Registration
1904.02	Examination of Request for Extension of Protection to the United States
1904.02(a)	Examined as Regular Application
1904.02(b)	Examination of Classification of Goods/Services in §66(a) Applications
1904.02(c)	Examination of Identification of Goods/Services in §66(a) Applications
1904.02(c)(i)	Acceptable Identifications of Goods/Services
1904.02(c)(ii)	Indefinite Identification of Goods/Services with Acceptable Options Within the Scope of the Class
1904.02(c)(iii)	Indefinite Identification of Goods/Services that Does Not Include Any Goods/Services Within the Class
1904.02(c)(iv)	Examination of Proposed Amendments and Issuance of Final Requirements for an Acceptable Identification
1904.02(c)(v)	Effect of Indicated Classes – No Precedential Value on Later-Filed Applications
1904.02(d)	Certification and Collective Marks
1904.02(e)	Corrections and Limitations to the International Registration
1904.02(e)(i)	Corrections
1904.02(e)(ii)	Limitations
1904.02(e)(iii)	Limitations vs. Amendments
1904.02(f)	Mark Must Be Registrable on Principal Register
1904.02(g)	Refusal Must Be Made Within 18 Months
1904.02(h)	Office Actions and Responses
1904.02(i)	Correspondence Address
1904.02(j)	Mark Cannot Be Amended
1904.02(k)	Drawings and Descriptions of the Mark
1904.02(l)	Jurisdiction
1904.03	Notice of Refusal
1904.03(a)	Notice Must Be Sent Within 18 Months
1904.03(b)	Requirements for Notice of Refusal
1904.03(c)	§66(a) Applicant Must Respond to Notification of Refusal
1904.03(d)	Refusal Pertaining to Less than All the Goods/Services
1904.03(e)	Confirmation or Withdrawal of Provisional Refusal
1904.03(f)	Notification of Correction in the International Register with Respect to a Pending Request for Extension of Protection
1904.03(g)	Notification of Limitation of the List of Goods/Services with Respect to a Pending Request for Extension of Protection
1904.04	Opposition

1904.05	Certificate of Extension of Protection
1904.06	Assignment of Extension of Protection to the United States
1904.07	Invalidation of Protection in United States
1904.08	Cancellation of International Registration by IB
1904.09	Transformation to Application Under §1 or §44
1904.09(a)	Requirements for Transformation
1904.09(b)	Examination of Transformed Application
1904.10	Affidavits of Use or Excusable Nonuse Required
1904.11	Incontestability
1904.12	Replacement
1904.13	Amendment and Correction of Registered Extension of Protection to the United States
1904.13(a)	Limited Amendments to Registered Extension of Protection
1904.13(b)	Corrections to Registered Extensions of Protection
1904.14	Notification of Correction in the International Register with Respect to Registered Extension of Protection
1904.15	Notification of Limitation of the List of Goods/Services with Respect to Registered Extension of Protection
<b>1905</b>	<b>Renewal of International Registrations</b>
<b>1906</b>	<b>Communications with International Bureau Regarding International Registrations</b>
1906.01	Recording Changes in International Register
1906.01(a)	Change in Ownership of International Registration
1906.01(a)(i)	Requirements for Submitting Changes in Ownership of International Registration Through the USPTO
1906.01(a)(ii)	International Fees for Recording Changes of Ownership of International Registration
1906.01(a)(iii)	Effect of Change of Ownership of International Registration
1906.01(a)(iv)	Dividing an International Registration After Change of Ownership with Respect to Some but Not All of the Goods/Services
1906.01(b)	Restriction of Holder's Rights of Disposal
1906.01(c)	Change of the Holder's Name or Address
1906.01(d)	Change of Name or Address of Representative
1906.01(e)	Limitation, Renunciation, or Cancellation of International Registration
1906.01(f)	Correction of Errors in International Registration
1906.01(g)	Merger of International Registrations
1906.01(h)	License
1906.01(i)	Changes that Cannot Be Made to International Registration

The Protocol Relating to the Madrid Agreement Concerning the International Registration of Marks (“Madrid Protocol”) is an international treaty that allows a trademark owner to seek registration in any of the countries or intergovernmental organizations that have joined the Madrid Protocol by submitting a single application, called an international application. The international registration system is administered by the International Bureau (“IB”) of the World Intellectual Property Organization (“WIPO”), in Geneva, Switzerland.

The Madrid Protocol became effective in the United States on November 2, 2003. The Madrid Protocol Implementation Act of 2002, Pub. L. 107-273, 116 Stat. 1758, 1913-1921 (“MPIA”) amended the Trademark Act to provide that: (1) the owner of a United States application and/or registration may seek protection of its mark in any of the countries or intergovernmental organizations party to the Madrid Protocol by submitting a single international application to the IB through the United States Patent and Trademark Office (“USPTO”); and (2) the holder of an international registration may request an extension of protection of the international

registration to the United States. A notice of final rulemaking amending the Trademark Rules of Practice to incorporate the MPIA was published at 68 Fed. Reg. 55748 (Sept. 26, 2003).

The Madrid Protocol, *Common Regulations Under the Madrid Agreement Concerning the International Registration of Marks and the Protocol Relating to That Agreement* (“Common Regs.”), *Guide to the International Registration of Marks under the Madrid Agreement and the Madrid Protocol* (“Guide to International Registration”), *Administrative Instructions for the Application of the Madrid Agreement Concerning the International Registration of Marks and the Protocol Relating Thereto* (“Admin. Instrs.”) are available on the IB’s website, at <http://www.wipo.int/madrid/en/>. The Common Regs. are the procedures agreed to by the parties to the Madrid Protocol regarding the administration of the Madrid Protocol, pursuant to Madrid Protocol Article (“Article”) 10(2)(iii).

References below to the Common Regs., *Guide to the International Registration*, and Admin. Instrs. refer to the September 2009 editions.

## 1901 Overview of the Madrid System of International Registration

The Madrid system of international registration is governed by two treaties: the Madrid Agreement Concerning the International Registration of Marks, which dates from 1891, and the Protocol Relating to the Madrid Agreement, which was adopted in 1989, entered into force on December 1, 1995, and came into operation on April 1, 1996. The United States is party only to the Protocol, not to the Agreement.

The Madrid system is administered by the IB. To apply for an international registration under the Madrid Protocol, an applicant must be a national of, be domiciled in, or have a real and effective industrial or commercial establishment in one of the countries or intergovernmental organizations that are members of the Protocol (“Contracting Parties”). The application must be based on one or more trademark application(s) filed in, or registration(s) issued by, the trademark office of one of the Contracting Parties (“basic application(s)” or “basic registration(s)”). The international application must be for the same mark and include a list of goods/services that is identical to or narrower than the list of goods/services in the basic application and/or registration. The international application must designate one or more Contracting Parties in which an extension of protection of the international registration is sought.

The applicant must submit the international application through the trademark office of the Contracting Party in which the basic application and/or registration is held (“Office of Origin”). The Office of Origin must certify that the information in the international application corresponds with the information in the basic application and/or registration, and then forward the international application to the IB. If the IB receives the international application within two months of the date of receipt in the Office of Origin, the date of the international registration is the date of receipt in the Office of Origin. If the IB does not receive the international application within two months of the date it was received by the Office of Origin, the date of the international registration is the date on which the international application is received by the IB. See [TMEP §1902.04](#) for information regarding filing requirements that may affect the international registration date.

The international registration is dependent on the basic application and/or registration for five years from the international registration date. If the basic application and/or registration is abandoned, cancelled, or expired, in whole or in part, during this five-year period, the IB will cancel the international registration accordingly. See [TMEP §1902.09](#) for further information.

The holder of an international registration may request protection in additional Contracting Parties by submitting a subsequent designation. A subsequent designation is a request by the holder of an international registration for an extension of protection of the registration to additional Contracting Parties.

Each Contracting Party designated in an international application or subsequent designation will examine the request for extension of protection as a national trademark application under its domestic laws. Under Article 5 and Common Regs. 16 and 17, there are strict time limits (a maximum of 18 months) for the trademark office of a Contracting Party to refuse a request for extension of protection. If the Contracting Party does not notify the IB of a refusal within this time period, the mark is automatically protected. However, the extension of protection may be invalidated in accordance with the same procedures for invalidating a national registration, e.g., by cancellation.

The Madrid Protocol may apply to the USPTO in three ways:

- *Office of Origin.* The USPTO is the Office of Origin if an international application and/or registration is based on an application pending in or a registration issued by the USPTO. Common Reg. 1(xxvi). See [TMEP §§1902 et seq.](#)
- *Office of a Designated Contracting Party.* The USPTO is the office of a designated Contracting Party if the holder of an international registration requests an extension of protection of that registration to the United States. Common Regs. 1(xvi) and (xxv). See [TMEP §§1904 et seq.](#)
- *Office of the Contracting Party of the Holder.* If the holder of an international registration is a national of, is domiciled in, or has a real and effective industrial or commercial establishment in the United States, the holder can file certain requests with the IB through the USPTO, such as requests to record changes of ownership ( see [TMEP §1906.01\(a\)\(i\)](#)) and restrictions on the holder's right to dispose of an international registration ( see [TMEP §1906.01\(b\)](#)). The expression "Contracting Party of the Holder" includes the "Office of Origin," as well as any other Contracting Party in which a holder is a national, is domiciled, or has a real and effective industrial or commercial establishment. Common Reg. 1(xxvibis).

## 1902 International Application Originating from the United States

This section covers international applications and registrations *originating from* the United States, i.e., international registrations based on an application for registration on the Principal or Supplemental Register pending in the USPTO and/or a registration issued by the USPTO on the Principal or Supplemental Register. See [TMEP §§1904 et seq.](#) for information about requests for extension of protection *to* the United States by the holder of an international registration originating in another country. International applications originating from the United States are processed by the USPTO's Madrid Processing Unit ("MPU").

### 1902.01 Who Can File

Under 15 U.S.C. §1141a and Article 2(1), a qualified owner of a basic application for registration on the Principal or Supplemental Register pending in the USPTO or a qualified owner of a basic registration issued by the USPTO on the Principal or Supplemental Register may file an application for international registration through the USPTO. To qualify, the international applicant must:

- (1) Be a national of the United States;
- (2) Be domiciled in the United States; or
- (3) Have a real and effective industrial or commercial establishment in the United States.

If joint applicants file, each applicant must meet at least one of these requirements. Common Reg. 8(2).

## 1902.02 Minimum Requirements for Date of Receipt of International Application in USPTO

The minimum requirements for accordane of a date of receipt of an international application in the USPTO are set forth in 37 C.F.R. §7.11.

*37 CFR §7.11 Requirements for international application originating from the United States.*

(a) *The Office will grant a date of receipt to an international application that is either filed through TEAS, or typed on the official paper form issued by the International Bureau. The international application must include all of the following:*

(1) *The filing date and serial number of the basic application and/or the registration date and registration number of the basic registration;*  
 (2) *The name and entity of the international applicant that is identical to the name and entity of the applicant or registrant in the basic application or basic registration, and the applicant's current address;*

(3) *A reproduction of the mark that is the same as the mark in the basic application and/or registration and that meets the requirements of §2.52 of this title.*

(i) *If the mark in the basic application and/or registration is depicted in black and white and the basic application or registration does not include a color claim, the reproduction of the mark in the international application must be black and white.*

(ii) *If the mark in the basic application or registration is depicted in black and white and includes a color claim, the international application must include both a black and white reproduction of the mark and a color reproduction of the mark.*

(iii) *If the mark in the basic application and/or registration is depicted in color, the reproduction of the mark in the international application must be in color.*

(iv) *If the international application is filed on paper, the mark must be no more than 3.15 inches (8 cm) high by 3.15 inches (8 cm) wide, and must appear in the box designated by the International Bureau on the International Bureau's official form;*

(4) *A color claim as set out in §7.12, if appropriate;*

(5) *A description of the mark that is the same as the description of the mark in the basic application or registration, as appropriate;*

(6) *An indication of the type of mark if the mark in the basic application and/or registration is a three-dimensional mark, a sound mark, a collective mark or a certification mark;*

(7) *A list of the goods and/or services that is identical to or narrower than the list of goods and/or services in each claimed basic application or registration and classified according to the Nice Agreement Concerning the International Classification of Goods and Services for the Purposes of the Registration of Marks;*

(8) *A list of the designated Contracting Parties. If the goods and/or services in the international application are not the same for each designated Contracting Party, the application must list the goods and/or services in the international application that pertain to each designated Contracting Party;*

(9) *The certification fee required by §7.6;*

(10) *If the application is filed through TEAS, the international application fees for all classes, and the fees for all designated Contracting Parties identified in the international application (see §7.7);*

(11) *A statement that the applicant is entitled to file an international application in the Office, specifying that applicant: is a national of the United States; has a domicile in the United States; or has a real and effective industrial or commercial establishment in the United States. Where an applicant's address is not in the United States, the applicant must provide the address of its U.S. domicile or establishment; and*

(12) *If the international application is filed through TEAS, an e-mail address for receipt of correspondence from the Office.*

(b) *For requirements for certification, see §7.13.*

### 1902.02(a) Form of International Application

Trademark Rule 7.11(a), 37 C.F.R. §7.11(a), requires that an international application be filed either through the Trademark Electronic Application System ("TEAS"), or on the official paper form issued by the IB.

#### *TEAS Form*

TEAS will require the applicant to select between two different forms, a prepopulated form or a free-text form. The applicant should use the prepopulated form if: (1) the international application is based on a single basic application or registration; and (2) applicant's changes to the international application are limited to:

- Narrowing the list of goods or services;
- Changing the classification;
- Changing the applicant's address; and/or
- Attaching a color reproduction of the mark where the mark in the basic application or registration is in black and white with a color claim ( see [TMEP §§1902.02\(d\)](#) and [1902.02\(e\)](#)).

The prepopulated form will automatically display the exact information that is in the USPTO database for one specific U.S. serial number or registration number. However, if the international application is based on a newly filed application that has not yet been uploaded into the USPTO's automated records, the TEAS form will instruct the applicant to either wait for the USPTO to upload the data or use the free-text form. It normally takes 48 to 72 hours for the USPTO to upload a newly filed application. To determine whether the basic application data has been entered, the applicant should check the Trademark Status and Document Retrieval ("TSDR") database on the USPTO website at <http://tsdr.uspto.gov/>.

The applicant should use the free-text form if the applicant wishes to change other data in the international application, or if the international application is based on more than one basic application and/or registration.

### *Paper Form*

When filing on paper, applicants must submit the official international application form issued by the IB, the MM2 form, to the USPTO. This form is available on the IB website at <http://www.wipo.int/madrid/en/>.

The IB will not accept paper applications that are not presented on the official IB form. Article 3(1); Common Regs. 9(2)(a) and 11(4)(a)(i); Madrid Admin. Instr. §2. The form cannot be handwritten. Madrid Admin. Instr. §6(a). The applicant should complete the MM2 form online, print the completed form, and submit it to the USPTO by mail.

The applicant may mail the completed paper application form to the following address, using the First Class Mail Service of the United States Postal Service ("USPS"):

Madrid Processing Unit  
600 Dulany Street  
Alexandria, Virginia 22314-5793

37 C.F.R. §§2.190(e) and 7.4(b). Alternatively, the international applicant may deliver the application by hand or courier to the Trademark Assistance Center ("TAC"), at James Madison Building, East Wing, Concourse Level, 600 Dulany Street, Alexandria, Virginia, Attention: MPU. 37 C.F.R. §7.4(c). TAC is open 8:30 a.m. to 5:00 p.m., Eastern Time, Monday through Friday, except on Federal holidays within the District of Columbia.

If an international application is mailed to the USPTO via the Express Mail Service of the USPS, the USPTO will deem that the application was received in the USPTO on the day it was deposited with the USPS, provided that the applicant complies with the requirements of 37 C.F.R. §2.198 for correspondence sent by Express Mail. See [TMEP §305.03](#) regarding Express Mail. The certificate of mailing or transmission procedures of 37 C.F.R. §2.197 do not apply to international applications. 37 C.F.R. §§2.197(a)(2)(ii) and 7.4(e).

The IB's *Guide to International Registration* contains instructions for completing the international application form.

The applicant should include a self-addressed, stamped postcard with the international application. Upon receipt of the international application, the USPTO will place a control number and a label indicating the receipt date on the documents and return the postcard to the applicant. The applicant should reference the control number whenever contacting the USPTO about the application.

International applications cannot be filed by fax. 37 C.F.R. §§2.195(d)(5) and 7.4(d)(1).

### **1902.02(b) Basic Application or Registration Number**

The international application must include the filing date and serial number of the basic application, or the registration date and registration number of the basic registration. 37 C.F.R. §7.11(a)(1). The USPTO will not certify the international application if this information is incorrect or is omitted.

The international application must be based on an active application and/or registration. It cannot be based on an abandoned application, or on a cancelled or expired registration.

An international application may be based on multiple basic applications and/or basic registrations. The relevant dates and numbers of each application and/or registration must be included. The USPTO will not certify the international application if any of this information is incorrect or is omitted.

If a basic application and/or registration has been divided, each serial number and/or registration number must be identified. If, after the international application is filed, a basic application and/or registration has been divided, the USPTO will notify the IB of the serial number of the new child application and/or the registration number. See [TMEP §§1110](#) *et seq.* regarding division of U.S. applications, [TMEP §§1615](#) *et seq.* regarding division of U.S. registrations, and [TMEP §1902.12](#) regarding division or merger of basic application or registration.

### **1902.02(c) Name and Address of Applicant**

Only the owner of the basic application and/or registration can file an international application. 15 U.S.C. §1141a(a). The international application must include the name and current address of the applicant. The name and entity of the international applicant must be identical to the name and entity of the applicant/registrant in the basic application and/or registration. 37 C.F.R. §7.11(a)(2).

On the prepopulated TEAS form, the applicant's name cannot be changed, so the international applicant's name will always be identical to the name of the owner of record for the basic application and/or registration.

When the applicant submits a paper form or a free-text TEAS form, an MPU trademark specialist will check the Trademark database to verify that the name of the international applicant is identical to the name of the owner of the basic application and/or registration.

If the names are not identical, the trademark specialist will check the Assignment Recordation Branch's database to determine whether an assignment or other document affecting title that is not reflected in the Trademark database has been recorded. If assignment records do not show a clear chain of title to the international applicant, the USPTO will notify the applicant that the application cannot be certified. If the records of the Assignment Recordation Branch do show a clear chain of title, the trademark specialist will update the "Ownership" field in the Trademark database.

Because a delay in certifying and forwarding an international application to the IB may affect the date of the international registration, any request to record a change in ownership of a U.S. basic application and/or registration should be filed well in advance of the filing of the international application, to allow sufficient processing time. The USPTO strongly recommends use of the Electronic Trademark Assignment System ("ETAS"), at <http://etas.uspto.gov>. Assignments filed electronically are recorded much faster than assignments filed on paper. If there is an unrecorded change in ownership, and the international applicant

does not use ETAS to record the change, the USPTO may be unable to certify or forward the international application to the IB within two months after the application is received in the USPTO. In this situation, the date of the international registration will be the date of receipt of the application in the IB. See [TMEP §1902.04](#).

Applicants can search the Assignment Recordation Branch's database at <http://assignments.uspto.gov/assignments/?db=tm> to determine whether an assignment or other document of title has been recorded, and can search the TSDR database at <http://tsdr.uspto.gov/> to determine whether the ownership information in the Trademark databases has been updated. See [TMEP §§504](#) *et seq.* regarding automatic updating of ownership information in the Trademark database.

If an international applicant is relying on an assignment (or other document transferring title) that has recently been filed for recordation but has not yet been recorded by the Assignment Recordation Branch, the applicant should include a copy of the assignment with the international application.

If an international application is denied certification because the applicant is not the same party as the owner named in the basic application(s) and/or registration(s), the applicant may petition the Director to review the refusal to certify. See [TMEP §1902.03\(a\)](#) regarding petitions to review refusal to certify.

### **1902.02(d) Reproduction (Drawing) of Mark**

An international application must include a reproduction of the mark that (1) is the same as the mark in the basic application and/or registration; and (2) meets the requirements of 37 C.F.R. §2.52. 37 C.F.R. §7.11(a)(3).

For paper filers, the mark must appear no larger than 3.15 inches (8 cm) high by 3.15 inches (8 cm) wide and must be placed in the box designated by the IB on the MM2 form. 37 C.F.R. §§2.52(d) and 2.54(b); Common Reg. 9(4)(a)(v); *Guide to International Registration*, Paras. B.II.07.37 *et seq.* For international applications filed electronically, an image of the mark taken from the Trademark database will appear automatically on the prepopulated TEAS form. If an applicant uses the free-text TEAS form, the applicant must either type the mark in the appropriate field, or attach a digitized image of the mark that meets the requirements of 37 C.F.R. §2.53(c).

*Standard Character Reproductions.* If the mark in the basic application and/or registration is in standard characters, the reproduction of the mark in the international application must be in standard characters. To claim standard characters, an applicant must check the appropriate box on the IB's official application form MM2, or on the TEAS form. The applicant may not claim standard characters in the international application unless the mark in the basic application and/or registration is in standard character (or typed) format. See [TMEP §§807.03](#) *et seq.* for information about standard character drawings in applications for registration of marks in the United States. The USPTO's standard character chart is posted on the USPTO website at <http://teas.uspto.gov/standardCharacterSet.html>.

*Special Form Reproductions.* If the mark in the basic application or registration is in special form, the reproduction of the mark in the international application must be in special form. See [TMEP §807.04\(a\)](#) for characteristics of special form drawings in applications for registration of marks in the United States.

*Use of Color.* If the mark in the basic application or registration is depicted in black and white and does not include a color claim, the reproduction of the mark in the international application must be black and white. See [TMEP §1902.02\(e\)](#) regarding color claims. If the mark in the basic application or registration is in color, the reproduction of the mark in the international application must be in color. If the mark in the

basic application or registration is depicted in black and white, and the basic application or registration includes a color claim, the international application must include *both* a black-and-white reproduction of the mark *and* a color reproduction of the mark that meet the requirements of 37 C.F.R. §2.52. 37 C.F.R. §7.11(a)(3); Common Reg. 9(4)(a)(vii). For example, if the basic application and/or registration includes a color claim and a black-and-white drawing that depicts the color by the use of color lining or by a statement describing the color ( *see* Note in [TMEP §1902.02\(e\)](#) regarding color drawings in United States basic applications or registrations), the applicant must include *both* a color reproduction of the mark showing the claimed colors and a black-and-white reproduction of the mark that corresponds to the mark as it appears in the basic application and/or registration. See the note regarding color drawings in United States basic applications or registrations in [TMEP §1902.02\(e\)](#). If filing on paper, the applicant must place the drawings in the appropriate boxes designated by the IB on the MM2 form. If using the TEAS prepopulated form, the black-and-white drawing will automatically prepopulate the form, and the applicant must attach the color reproduction of the mark. For the TEAS free-text form, however, the applicant must attach a digitized image of *both* the black-and-white reproduction of the mark and the color reproduction of the mark. See [TMEP §§807](#) *et seq.* for general information about the requirements for drawings in applications for registration of marks in the United States.

### 1902.02(e) Color Claim

If color is claimed as a feature of the mark in the basic application and/or registration, the international application must include a statement that color is claimed as a feature of the mark, and set forth the same name(s) of the color(s) claimed in the basic application and/or registration. 37 C.F.R. §§7.11(a)(4) and 7.12(a).

If the basic application and/or registration includes a black-and-white reproduction of the mark with a description of the mark indicating that color is used on the mark, or a reproduction that is lined for color ( *see* Note below), the USPTO will presume that color is a feature of the mark, unless the basic application and/or registration includes a statement that “no claim is made to color” or “color is not a feature of the mark.” Thus, the basic application and/or registration will be presumed to have a color claim.

If color is not claimed as a feature of the mark in the basic application and/or registration, an applicant may not claim color as a feature of the mark in the international application. 37 C.F.R. §7.12(b).

*Note Regarding Color Drawings in United States Basic Applications or Registrations: Prior to November 2, 2003, the USPTO did not accept color drawings. An applicant who wanted to show color in a mark had to submit a black-and-white drawing, with a statement identifying the color(s) and describing where it/they appeared in the mark. Alternatively, the applicant could submit a black-and-white drawing that showed color by using a lining system that previously appeared in 37 C.F.R. §2.52 but was deleted from the rule effective October 30, 1999. See notice at [64 Fed. Reg. 48900](#), 48903 (Sept. 8, 1999) and 1226 TMOG 103, 106 (Sept. 28, 1999). It was presumed that color was claimed as a feature of the mark, unless the applicant specifically stated that no claim was made to color, or that color was not claimed as a feature of the mark. The USPTO began accepting color drawings on November 2, 2003. Effective November 2, 2003, the USPTO no longer accepts black-and-white drawings with a color claim, or drawings that show color by use of lining patterns. 37 C.F.R. §2.52(b)(1). See [TMEP §§807.07](#) *et seq.* regarding the current color requirements.*

### 1902.02(f) Identification of Goods/Services

An international application must include a list of goods/services that is identical to or narrower than the goods/services in the basic application and/or registration. 37 C.F.R. §7.11(a)(7). If the applicant lists any

goods/services that are broader in scope than the goods/services in the basic application or registration, the USPTO will not certify the international application.

The prepopulated TEAS form will include the listing of goods/services in the USPTO's electronic records for the basic application or registration as of the time the form is generated. An applicant may edit the list of goods/services by either deleting particular goods/services or revising the wording in the identification. On the MM2 paper form and the free-text TEAS form, the applicant must enter the goods/services manually and may omit goods or services, or revise the wording in the identification.

In general, semicolons should be used to separate distinct categories of goods/services within a class. *See* [TMEP §1402.01\(a\)](#). For example, “cleaners, namely, glass cleaners, oven cleaners, and carpet cleaners; deodorizers for pets” is an acceptable identification in Class 3. In this example, the word “cleaners” names the category covering “glass cleaners, oven cleaners, and carpet cleaners.” The semicolon prior to “deodorizers for pets” indicates that the deodorizers are a separate category of goods from the cleaners.

Similarly, commas should be used to separate items within a particular category of goods/services. For example, “clothing, namely, hats, caps, sweaters, and jeans” is an acceptable identification of goods in Class 25 and shows proper use of commas.

Colons and periods should not be used as punctuation within the identification of goods and services.

If the list of goods/services in an international application is not identical to the list of goods/services in the basic application and/or registration at the time the international application is reviewed, the MPU trademark specialist must determine whether the applicant has identified any goods/services that are broader than the goods/services covered in the basic application and/or registration.

When the MPU trademark specialist reviews an international application based on a basic application and/or registration that has been amended during the course of its examination, the list of goods/services in the international application must be within the scope of the goods/services in the basic application and/or registration as amended, and not as set forth in the original basic application and/or registration.

The IB provides a database of properly classified terms, the Madrid Goods and Services Manager (MGSM), at <http://www.wipo.int>. Applicants may refer to the MGSM to review the classification assigned by the IB to more than 40,000 goods and services as well as the translation of such goods/services into several languages.

### **1902.02(f)(i) House Marks and “Full Line of ...”**

It has been the practice in the United States to accept identifications of goods that include the wording “house mark for...” in certain limited circumstances. *See* [TMEP §1402.03\(b\)](#). Additionally, in rare circumstances, the USPTO may accept an identification of goods that refers to “a full line of” a genre of products. To qualify for the use of such terminology, the line of products must be in one class. *See* [TMEP §1402.03\(c\)](#).

If an international application includes the wording “house mark for” or “house mark for a full line of,” the IB will generally issue a notice of irregularity requiring the applicant to clarify or remove this wording. To avoid issuance of a notice of irregularity, an international applicant may set forth some or all of the goods

following the wording “house mark” in the listing of goods in the international application. Removal of the wording “house mark” will not result in denial of certification of the international application.

### **1902.02(f)(ii) Providing a Website/Online Portal**

Any activity consisting of a service that ordinarily falls in classes 35-37, 39, 41, 44, and 45 (e.g., real-estate agency services or banking services in Class 36 or dating services in Class 45), and that happens to be provided over the Internet, is classified in the class of the underlying service. See [TMEP §1402.11\(a\)](#). It is not classified in Class 42 merely because the services involve the use of a computer. Similarly, the service of providing information via the Internet is classified in the class of the subject matter of the information.

See [TMEP §1402.11\(b\)](#). Entities that provide these services by computer are considered to be “content providers,” that is, they provide the informational or substantive content of websites, homepages, or online portals.

If an international applicant identifies services with the introductory language “providing a website ...” or “providing an on-line portal ...,” regardless of the subject activities that follow, the IB is likely to issue a notice of irregularity requiring the applicant to clarify the nature of the services and possibly suggesting “hosting of a website ...” and/or reclassification to Class 42. To avoid issuance of a notice of irregularity by the IB, an international applicant may wish to set forth its services with the principal activity first and then indicate that such services are “provided by means of a website” or “provided through an online portal.”

For example, if the identification in the underlying application or registration is “providing an Internet website portal in the field of music” in Class 41, the services in the international application may be listed as “providing information in the field of music by means of an Internet website portal.” Note that the list of services in the international application must remain within the scope of the services in the basic application and/or registration or the MPU trademark specialist will deny certification.

### **1902.02(g) Classification in International Applications**

The goods/services should be classified according to the version of the *Nice Agreement Concerning the International Classification of Goods and Services for the Purposes of the Registration of Marks* (“Nice Agreement”) that is in effect as of the filing date of the international application. 37 C.F.R. §7.11(a)(7).

Both the prepopulated and the free-text TEAS forms will allow an applicant to change the classification of goods/services in an international application.

The MPU does not certify classification of the goods/services in an international application. Therefore, the owner of the United States application or registration need not classify the goods/services in the international application in the same class(es) in which they are classified in the United States basic application and/or registration. However, failure to properly classify goods or services in an international application according to the international classification system will result in issuance of a notice of irregularity from the IB. Because the final decision on the classification of the goods/services in an international application rests with the IB, the USPTO will not reclassify goods/services nor will USPTO employees give legal advice in response to specific inquiries regarding the reclassification of particular goods/services. The IB provides guidance on its website, at <http://www.wipo.int/classifications/en/>. See [TMEP §§1401.02](#) *et seq.* for

further information about the international classes, and [TMEP §§1902.07](#) *et seq.* for further information about irregularities in the international application.

### **1902.02(g)(i) Reclassifying Goods/Services**

If the goods or services in the basic application and/or registration are classified under the old U.S. classification system ( *see* [TMEP §1401.02](#)), it is advisable to reclassify the goods/services into international classes in the international application, to avoid issuance of a notice of irregularity by the IB. Applicants using the prepopulated TEAS form must reclassify such goods/services into international classes because the form does not recognize U.S. class designations.

See [TMEP §1902.02\(g\)\(ii\)](#) regarding reclassification of goods/services in U.S. Classes A, B, or 200.

It is also advisable to reclassify the goods when the identification of goods in the basic application and/or registration comprises kits or gift baskets. See [TMEP §1902.02\(g\)\(iii\)](#) for further information.

The IB provides a database of properly classified terms, the Madrid Goods and Services Manager (MGSM), at <http://www.wipo.int>. Applicants may refer to the MGSM to review the classification assigned by the IB to more than 40,000 goods and services as well as the translation of such goods/services into several languages.

### **1902.02(g)(ii) United States Classes A, B, and 200**

Classes A, B, and 200 are classes from the old United States classification system that are still used in the United States to classify certification marks for goods (Class A), certification marks for services (Class B), and collective membership marks (Class 200). These classes are not included in the international classes under the Nice Agreement. Therefore, an international application based on a U.S. application or registration in U.S. Classes A, B, or 200 should be reclassified based on the nature of the goods or services being certified or the area of activity of the members of the collective. If the applicant does not reclassify its goods or services into the proper international class, the IB will issue a notice of irregularity.

Amendment of the classification in the corresponding basic U.S. application and/or registration is not permitted.

#### *United States Classes A and B*

It has been the longstanding practice in the United States to accept identifications of goods or services for Classes A, B, and 200 that are broader than those that would be accepted in applications for goods/services in other classes. *See* [TMEP §§1304.08\(d\)](#) and [1306.06\(e\)](#). In many situations, it will be difficult to reclassify these broad identifications into appropriate international classes. For example, a goods certification mark in U.S. Class A for “remanufactured, refurbished and reconditioned electrical equipment” could include goods in International Classes 7, 9, and/or 11, and possibly others. In such situations, the U.S. applicant should specify the type of electrical equipment that is being certified, and either apply and pay the fees for all appropriate classes, or limit the specification of “electric equipment” to cover goods in one class only.

In some certification mark applications/registrations, the goods/services will be easily classified in one class of the international classification system. For example, a services certification mark for “testing laboratory and calibration laboratory accreditation services” would be classified in International Class 42. However, it is important to be aware that multiple classes may be required when reclassifying goods/services from U.S. Classes A and B.

*United States Class 200*

Class 200 presents a similar problem and a similar solution. A broad identification of the subject organization in a collective membership mark application or registration is difficult to reclassify. For example, the wording “indicating membership in a conservative youth organization” is too broad and vague for classification in an international class. On the other hand, “indicating membership in an organization of consulting communications engineers” is easily classified in International Class 42. As with the certification marks, an applicant may have to clarify, specify, or narrow the description of the organization in the international application in order to classify the organization in an international class.

**1902.02(g)(iii) Kits and Gift Baskets**

The USPTO policy regarding the identification and classification of kits and gift baskets differs from the policy of the IB regarding the classification of these goods.

The USPTO permits registration of a kit or gift basket in a single international class, even if the identification of goods lists items that are classified in other classes. The IB and most foreign countries will not accept an identification of goods in a particular class that includes a reference to goods that are classified in other classes. If an international application includes kits and/or gift baskets, and the identification of goods refers to items classified in more than one class, the IB is likely to issue a notice of irregularity requiring the applicant to separate the goods into their respective classes and to pay additional fees for added classes. To avoid issuance of a notice of irregularity by the IB, an international applicant may wish to either narrow the identification to refer only to items in a single international class, or submit additional fees for multiple international classes.

**1902.02(h) List of Contracting Parties**

An international application must list at least one Contracting Party (i.e., country or intergovernmental organization party to the Madrid Protocol) to which the applicant seeks an extension of protection of the international registration. If the goods/services in the international application are not the same for all designated Contracting Parties, the application must include a list of the goods/services in the international application that pertain to each designated Contracting Party. 37 C.F.R. §7.11(a)(8).

An international applicant designating the European Community for an extension of protection may claim seniority of one or more earlier registrations in or for a Member State of the European Community for the same mark covering the same goods or services in the international application. Common Reg. 9(5)(g)(i). See [TMEP §1902.05](#) for further information about “seniority.”

For international applications filed through TEAS, the online form enables applicants designating the European Community to claim seniority based upon registrations issued by Member States. The applicant must indicate: (1) the name of the Member State in or for which the earlier mark is registered; (2) the date from which the registration was effective; (3) the registration number; and (4) the goods and/or services covered by the earlier registration. Common Reg. 9(5)(g)(i).

For international applications filed on paper using form MM2, a claim of seniority must be presented on the IB’s official form, MM17, and annexed to the international application. Common Reg. 9(5)(g)(i). The applicant must complete both the MM2 and the MM17 forms, and mail them to the USPTO.

An international applicant may not designate the United States as a Contracting Party. 15 U.S.C. §1141e(b); Article 3 *bis*; [TMEP §1904.01\(h\)](#).

### **1902.02(i) Fees**

*USPTO Certification Fee.* An international application must include the USPTO certification fee for each class of goods/services for which international registration is sought, or it will not be certified. The certification fee per class increases if the international application is based on more than one basic application or registration. 37 C.F.R. §§7.6(a) and 7.11(a)(9).

*International Fees.* If an international application is submitted through TEAS, the international fees for all classes and all designated Contracting Parties must be paid at the time of submission. 37 C.F.R. §7.11(a)(10). International fees for paper applications must be paid directly to the IB, and may be paid either before or after the international application is submitted to the USPTO. 37 C.F.R. §7.7(c). However, international fees paid after the IB receives the international application could result in a notice of irregularity issued by the IB ( *see* [TMEP §1902.07\(b\)\(i\)](#)).

See also [TMEP §1903.02](#) regarding payment of international fees.

### **1902.02(j) Statement of Entitlement**

An international application must include a statement that the applicant is entitled to file an international application, specifying that the applicant: (1) is a national of the United States; (2) has a domicile in the United States; or (3) has a real and effective industrial or commercial establishment in the United States.

Where an applicant's address is not in the United States, the applicant must provide the address of the United States domicile or establishment. 15 U.S.C. §1141a; 37 C.F.R. §7.11(a)(11).

For joint applicants, the application must include a statement of entitlement for each applicant.

### **1902.02(k) Description of Mark**

If the basic application or registration includes a description of the mark, an international application must include the same description. 37 C.F.R. §7.11(a)(5). The applicant cannot include a description of the mark in the international application if the basic application or registration does not contain a description of the mark. *Guide to International Registration*, Para. B.II.07.54.

If an international application is based on more than one basic application and/or registration, any description of the mark must be the same in each basic application and/or registration. If the descriptions are not the same, certification will be denied. 37 C.F.R. §§7.11(a)(5) and 7.13(a).

If the basic application or registration has been amended during the course of its examination, the description in the international application must be identical to the description in the basic application or registration as amended, not as set forth in the original basic application or registration.

### **1902.02(l) Indication of Type of Mark**

If the mark in the basic application or registration is a three-dimensional mark, a sound mark, a collective mark, or a certification mark, the international application must include an indication of the type of mark.

37 C.F.R. §7.11(a)(6). Such an indication may be given only if it appears in the basic application or registration. Common Regs. 9(4)(a)(viii)-(x).

### **1902.02(m) E-Mail Address**

An international application must include an e-mail address for receipt of correspondence from the USPTO, if the international application is filed through TEAS. 37 C.F.R. §7.11(a)(12). Applicants submitting international applications on paper are encouraged to include an e-mail address on the form.

### **1902.03 Certification of International Application by USPTO**

If the information contained in an international application corresponds to the information in the basic application or basic registration, the USPTO will certify the international application and forward it to the IB. 15 U.S.C. §1141b.

If an applicant uses the prepopulated TEAS form without changing any of the information ( *see* [TMEP §1902.02\(a\)](#)), the international application will be certified and forwarded to the IB without review by the MPU. In all other cases, an MPU trademark specialist must review the data in the international application to determine whether such data corresponds to the basic application or basic registration.

Under Article 3(1) and Common Reg. 9(5)(d), the USPTO must sign the international application and certify:

- The date on which the USPTO received the international application (Common Reg. 9(5)(d)(i));
- That the mark in the international application is the same as the mark in the basic application or registration (Common Reg. 9(5)(d)(iv));
- That the applicant is the same person or entity listed as the owner of the basic application or registration (Common Reg. 9(5)(d)(ii));
- That the goods/services identified in the international application are covered by the basic application or registration (Common Reg. 9(5)(d)(vi));
- That the applicant is qualified to file an international application under §61 of the Trademark Act and Article 2(1);
- That, if the international application includes a description of the mark, the description is consistent with the basic application or registration (Common Regs. 9(4)(a)(xi) and 9(5)(d)(iii));
- That, if the international application indicates that the mark consists of a color or combination of colors, this indication is consistent with the basic application or registration (Common Regs. 9(4)(a)(vii) and 9(5)(d)(iii));
- That, if color is claimed as a feature of the mark in the basic application or registration, the same claim is included in the international application (Common Reg. 9(5)(d)(v));
- That, if the international application indicates that the mark is three-dimensional, this indication is consistent with the basic application or registration (Common Regs. 9(4)(a)(viii) and 9(5)(d)(iii));
- That, if the international application indicates that the mark is a sound mark, this indication is consistent with the basic application or registration (Common Regs. 9(4)(a)(ix) and 9(5)(d)(iii));
- That, if the international application indicates that the mark is a collective or certification mark, this indication is consistent with the basic application or registration (Common Regs. 9(4)(a)(x) and 9(5)(d)(iii)).

If the international application meets the requirements of 37 C.F.R. §7.11(a), the USPTO will certify the application and send it to the IB. 37 C.F.R. §7.13(a). The MPU will send a notice of certification to the applicant.

If the application does not meet the requirements of 37 C.F.R. §7.11(a), the USPTO will not certify the application or forward it to the IB. The USPTO will notify the applicant of the reason(s) why the application cannot be certified. The USPTO will refund any international fees paid through TEAS. The USPTO certification fee will not be refunded. 37 C.F.R. §7.13(b).

An applicant should periodically check the status of the international application online, using TSDR. If the applicant does not receive a notice of certification or refusal within two months of filing, the applicant should contact the MPU. However, once an international application is certified and forwarded to the IB, questions concerning the international application should be directed to the IB rather than the USPTO. See [TMEP §1906](#) for information on contacting the IB. The USPTO will update TSDR when the IB issues a certificate of international registration or a notice of irregularity concerning the international application. See [TMEP §1902.06](#) regarding the IB's examination of international registrations.

### **1902.03(a) Petition to Review Refusal to Certify**

If an applicant believes that a refusal to certify an international application was erroneous, the applicant may file a petition to the Director to review the refusal. The petition should refer to the USPTO control number, and include the petition fee required by 37 C.F.R. §2.6. If the denial of certification was due to USPTO error, the USPTO will grant the petition and refund the petition fee. In all other cases, whether the petition is granted or denied, the petition fee is not refundable, unless the petition is withdrawn before a decision issues. The petition should be filed immediately. If the international application is not certified within two months of the date of receipt of the application in the USPTO, the date of international registration will be affected. Article 3(4); Common Reg. 15. See [TMEP §1902.04](#).

The petition should be mailed using the First Class Service of the USPS to:

Madrid Processing Unit  
600 Dulany Street  
Alexandria, Virginia 22314-5793

37 C.F.R. §§2.190(e) and 7.4(b). If the applicant is paying the petition fee using a USPTO deposit account, the applicant may e-mail the request to [madridpetitions@uspto.gov](mailto:madridpetitions@uspto.gov), with an authorization to charge the petition fee to a deposit account. See [TMEP Chapter 1700](#) for further requirements for petitions to the Director.

Alternatively, the applicant may use a courier service or hand-deliver the petition to the Trademark Assistance Center at James Madison Building, East Wing, Concourse Level, 600 Dulany Street, Alexandria, Virginia, Attention MPU. TAC is open 8:30 a.m. to 5:00 p.m. Eastern Time, Monday through Friday, except on Federal holidays within the District of Columbia. 37 C.F.R. §7.4(c).

### **1902.04 Date of International Registration**

If the IB receives an international application within two months of the date of receipt in the USPTO, the date of the international registration is the date of receipt in the USPTO. If the IB does not receive the international application within two months of the date of receipt in the USPTO, the date of the international registration is the date of receipt in the IB. Article 3(4); Common Reg. 15.

Common Reg. 15 sets forth the IB's minimum requirements that may affect the date of the international registration:

- Adequate identification of the applicant, with sufficient information to contact the applicant or the applicant's representative;
- Reproduction of the mark;
- Indication of the goods or services; and
- Designation of Contracting Party or Parties for which extension of protection is sought.

If any of these elements is omitted from the international application, the IB will notify both the applicant and the USPTO. If the missing element(s) is received in the IB within two months of the date of receipt of the international application in the USPTO, the international registration will bear the date of receipt of the international application in the USPTO. If the missing element(s) is not received in the IB within two months of the date of receipt of the international application in the USPTO, the date of the international registration is the date of receipt of the last of the missing elements in the IB. In either case, the missing element(s) must be received in the IB on or before the deadline specified in the notice of irregularity. Article 3(4); Common Reg. 15(1).

See [TMEP §§1902.07](#) *et seq.* for information about correcting irregularities in an international application.

### 1902.05 IB Requirements for Complete International Application

The requirements for an international application are set forth in Article 3 and Common Reg. 9. If the application meets the minimum requirements set forth in 37 C.F.R. §7.11(a) ( *see* [TMEP §§1902.02](#) *et seq.*), the USPTO will certify the application and send it to the IB. *The USPTO will not examine the international application to determine whether it is complete.* Only the IB will examine it for completeness. The requirements for a complete international application originating from the United States are:

- *Name and Address.* The name and address of the applicant;
- *Basic Application(s) or Registration(s).* The serial number(s) and filing date(s) of the basic application(s), and/or the registration number(s) and registration date(s) of the basic registration(s). The international application may be based on more than one basic application or registration;
- *Entitlement to File.* An indication that the applicant: (1) is a national of the United States; (2) is domiciled in the United States; or (3) has a real and effective industrial or commercial establishment in the United States (Common Reg. 9(5)(b));
- *Fees.* The international application must include the basic filing fee charged by the IB; the supplementary fee for each class of goods or services beyond 3 classes; the complementary fee for designation of each country to which extension of the international registration is sought; and the transmittal fee that the USPTO charges to process the international application. Articles 8(1) and 8(2); Common Regs. 9(4)(a)(xiv), 10(2) and 34;
- *Goods/Services.* A list of the goods or services on or in connection with which the applicant seeks international registration (Article 3(2); Common Reg. 9(4)(a)(xiii));
- *Class(es).* The international class(es) of goods or services, if known (Article 3(2); Common Reg. 9(4)(a)(xiii));
- *Contracting Parties.* The name(s) of the Contracting Party or Parties in which an applicant seeks protection (Common Reg. 9(4)(a)(xv));
- *Declaration of Intent to Use.* A verified statement that applicant has a bona fide intention to use the mark in commerce on or in connection with the goods or services listed in the application, if any of the Contracting Parties designated in the international application require such a declaration (Common Reg. 9(5)(f)). Under Common Reg. 7(2), a Contracting Party may notify the IB that it requires a signed declaration of intention to use the mark;

- *Reproduction (Drawing) of Mark.* A clear reproduction of the mark that is no more than 8 cm high by 8 cm wide. Common Reg. 9(4)(a)(v). The mark must be the same as the mark in the basic application or registration. If the mark in the basic application or registration has color, the mark in the international application must be in color. If the mark in the basic application or registration is black and white, the mark in the international application must be in black and white. If the mark in the basic application or registration is depicted in black and white, but contains a claim of color as a feature of the mark ( see Note in [TMEP §1902.02\(e\)](#) regarding color drawings in United States basic applications or registrations), the applicant must submit *both*: (1) a black-and-white image that is the same as the mark in the basic application or registration; and (2) a color reproduction depicting the color(s) claimed. Common Reg. 9(4)(a)(vii);
- *Color.* If color is claimed as a distinctive feature of the mark in the basic application or registration, the international application must include an indication to that effect, and must set forth the name of the color(s) (Article 3(3); Common Reg. 9(4)(a)(vii)). If the mark in the basic application or registration consists of a color or a combination of colors, the international application must include a statement to that effect (Common Reg. 9(4)(a)(viii)) ( see [TMEP §§1202.05](#) *et seq.* regarding color as a mark);
- *Transliteration.* If the mark consists of or contains non-Latin characters or numerals other than Arabic or Roman numerals, a transliteration of that matter in Latin characters and Arabic numerals (Common Reg. 9(4)(a)(xii));
- *Signature.* The USPTO must sign the international application. The IB does not require the applicant's signature (Common Reg. 9(2)(b)) ( *Note*: Signature may be replaced with seal or other mode of identification determined by the IB ( see Admin. Instr. §7);
- *Three-Dimensional Mark.* If the mark is three-dimensional, the indication "three-dimensional mark" (Common Reg. 9(4)(a)(viii));
- *Sound Mark.* If the mark is a sound mark, the indication "sound mark" (Common Reg. 9(4)(a)(ix));
- *Collective or Certification Mark.* If the mark is a collective mark or a certification mark, an indication to that effect (Common Reg. 9(4)(a)(x));
- *Standard Characters.* If the mark is a standard character mark, an indication to that effect (Common Reg. 9(4)(a)(vi));
- *Description of Mark.* If there is a description of the mark in the basic application or registration, the international application must include the same description. 37 C.F.R. §7.11(a)(5) and Common Reg. 9(4)(a)(xi);
- *Language.* International applications originating from the United States must be in English. 37 C.F.R. §7.3; Common Regs. 6(1) and 6(2)(iii);
- *Indication of Second Language.* If an applicant designates the European Community as a Contracting Party, applicant is required to indicate a second language, in addition to the language in the international application (Common Reg. 9(5)(g)(ii)).

#### *Additional Elements That May Be Included in International Application*

The following elements may also be included, but are not mandatory under the Common Regulations:

- *Translation.* If the mark consists of or contains non-English wording, an English translation (Common Reg. 9(4)(b)(iii));
- *Citizenship/State of Incorporation or Organization (Common Regs. 9(4)(b)(i) and (ii)).* The citizenship of the applicant(s); or if the applicant is a juristic person, the state or nation under the laws of which the applicant is organized;
- *Disclaimer.* If an applicant wishes to disclaim any element of the mark, the applicant may do so (Common Reg. 9(4)(b)(v));

- *Representative.* See [TMEP §1902.11](#);
- *Priority.* An international applicant may claim a right of priority within the meaning of Article 4 of the Paris Convention if: (1) the international application contains a claim of priority; and (2) the filing date of the application that forms the basis of the priority claim (within the meaning of Article 4 of the Paris Convention) was not more than six months before the date of the international registration. Article 4(2); Common Regs. 9(4)(a)(iv) and 14(2)(i). The applicant must specify the serial number (if available), filing date, and country of the earlier filing. If the earlier filing does not relate to all the goods/services listed in the international application, the applicant must set forth the goods/services to which it does relate. *NOTE: If the applicant is claiming priority based upon the basic application, the applicant must list the United States application serial number and filing date in **both** the “Basic Application” and the “Priority Claimed” sections of the form;*
- *Seniority.* An applicant designating the European Community may claim seniority of one or more earlier registrations in or for a Member State of the European Community for the same mark covering the same goods or services in the international application by indicating the following four elements: (1) each Member State in or for which the earlier mark is registered; (2) the date from which the registration was effective; (3) the registration number; and (4) the goods/services covered by the earlier registration (Common Reg. 9(5)(g)(i)). For international applications submitted on paper using the IB’s official form MM2, this information must be submitted on the IB’s official MM17 form. The MM17 form should be annexed to the international application form.

## 1902.06 Examination of Application by IB

Upon certification, the USPTO forwards the international application to the IB. If the international application meets the applicable requirements for a complete international application ( see [TMEP §1902.05](#)), the IB will immediately register the mark and publish the registration in the *WIPO Gazette of International Marks*. The IB will send the certificate to the holder and notify the Office of Origin and the Offices of the designated Contracting Parties to which extension of the registration is sought. Article 3(4); Common Reg. 14(1). If an international application is unacceptable, the IB will notify both the applicant and the USPTO of the “irregularity” ( see [TMEP §§1902.07 et seq.](#))

## 1902.07 Irregularities in International Application

If an international application is unacceptable, the IB will notify both the applicant and the USPTO of the “irregularity.” Some types of irregularities must be remedied by the USPTO, some must be remedied by the applicant, and some may be remedied by either the applicant or the USPTO. See 37 C.F.R. §7.14 and Common Reg. 11.

The MPU trademark specialists review all incoming notices of irregularities. If the irregularity is one that must be remedied by the USPTO ( see [TMEP §1902.07\(a\)](#)), the trademark specialist will respond to the notice and send the applicant a copy of the response.

If the irregularity is not one that must be remedied by the USPTO, the USPTO will note receipt of the notice of irregularity in its automated records, but will not take any other action. The USPTO will not respond to the notice on behalf of the applicant. The USPTO will not send a copy of the notice to the applicant, because the IB has already notified the applicant of the irregularity. A copy of the notice will be placed in the electronic record of the international application. The notice can be reviewed using the Trademark Status and Document Retrieval (“TSDR”) system on the USPTO website, by entering the control number assigned to the international application by the USPTO.

Applicants must file responses to irregularities in classification and identification of goods/services through the USPTO ( *see* [TMEP §§1902.07\(c\)](#) *et seq.*). Fees for correcting irregularities in international applications must be paid directly to the IB in Swiss currency ( *see* [TMEP §1902.07\(b\)\(i\)](#)). Responses to all other types of irregularities may be filed either directly at the IB or through the USPTO.

**To be considered timely, responses to IB notices of irregularities must be received by the IB before the end of the response period set forth in the IB's notice. Receipt of the response in the USPTO does not satisfy this requirement.**

For responses to IB notices of irregularities that may be submitted through the USPTO, applicants may file the response either through TEAS or on paper. When correcting irregularities through the USPTO, the applicant should submit the response as soon as possible, and at least one month before the end of the response deadline set forth in the IB's notice. The USPTO will not process any response filed after the IB response deadline. 37 C.F.R. §7.14(e). See [TMEP §1902.07\(f\)](#) regarding responses to notices of irregularity submitted through the USPTO.

### **1902.07(a) Irregularities that Must Be Remedied by the USPTO**

The following irregularities must be remedied by the USPTO within three months of the date of notification of the irregularity:

- Application is not presented on the official form or is not typed;
- Omission of reproduction of mark;
- Omission of list of goods/services;
- Omission of designation of Contracting Party or Parties;
- Insufficient identification of applicant;
- Irregularities relating to the entitlement of the applicant to file an international application ( *see* [TMEP §1902.02\(j\)](#));
- Application not signed by USPTO ( *Note*: Signature may be replaced with seal or other mode of identification determined by the IB. *See* Admin. Instr. §7);
- Certification by USPTO is defective;
- Omission of date and number of basic application or registration.

Common Regs. 11(4) and 15(1); *Guide to International Registration*, Para. B.II.09.19.

If the USPTO does not cure the irregularity within three months, the international application is abandoned. Common Regs. 11(4)(b) and 11(5).

When responding to a notice of an irregularity that must be remedied by the USPTO, the MPU trademark specialist will send the applicant a copy of the response.

### **1902.07(b) Irregularities that Must Be Remedied by the Applicant – Applicant Must Respond Directly to the IB**

#### **1902.07(b)(i) Fee Irregularities**

Where international fees for the international application are insufficient, the IB will notify both the applicant and the USPTO of the deficiency. The USPTO will not respond to the notice on behalf of applicant even if the international application fees were paid through TEAS.

**Fees for correcting irregularities in an international application must be paid directly to the IB** in Swiss currency, even if the applicant is filing a response to correct other irregularities through the USPTO. 37 C.F.R. §7.14(c). If any fees for correcting irregularities are submitted to the USPTO, the USPTO will return the fees to the applicant. The USPTO will not forward the fees to the IB. If the fees are not received by the IB on or before the deadline set forth in the IB's notice of irregularity, the international application may be abandoned. See [TMEP §1903.02](#) for information about the payment of fees to the IB.

### **1902.07(c) Irregularities that Must Be Remedied by the Applicant – Applicant Must Respond Through the USPTO**

#### **1902.07(c)(i) Classification of Goods/Services**

If the IB finds an irregularity in classification, it will make a proposal and send it to both the applicant and the USPTO. The notice will state whether any additional fees are due. Common Reg. 12(1). The USPTO will neither respond to the notice on behalf of applicant nor advise the applicant as to how to reclassify the goods/services.

If an irregularity notice indicates that the failure to resolve the irregularity will result in the abandonment of the international application, the applicant must respond and/or pay the necessary fees to avoid abandonment. If the irregularity notice merely indicates that “if no response, WIPO proceeds,” the applicant need not respond if applicant agrees to the proposal by WIPO.

The applicant cannot send its response directly to the IB. The applicant must submit the response through the USPTO. The IB must receive the response within 3 months of the date of the IB notification. 37 C.F.R. §7.14(b); Common Reg. 12(2). See [TMEP §1902.07\(f\)](#) regarding responses to notices of irregularity submitted through the USPTO.

An MPU trademark specialist will review the applicant's response, but only to ensure that the response consists solely of an amendment to classification and that no amendments to the identification of the goods or services have been proposed. So long as the only proposed change is to classification, and such change in classification does not expand the listing of goods/services to exceed the scope of the underlying basic application or registration, the USPTO will forward it to the IB and notify the applicant accordingly. See [TMEP §1902.07\(c\)\(ii\)](#) regarding proposed amendments to the identification of goods/services.

If additional fees are due as a result of reclassification of goods/services, the applicant must pay the fees directly to the IB in Swiss currency. See [TMEP §1903.02](#) for further information about the payment of fees to the IB.

Under Article 3(2), the IB controls classification and has the final say on classification of goods/services. The IB may modify, withdraw, or maintain its proposal after reviewing the applicant's response. Common Reg. 12.

*See also* [TMEP §1401.03\(d\)](#).

### **1902.07(c)(ii) Identification (Indication) of Goods/Services**

If the IB determines that the identification of goods/services, referred to as the "indication of goods/services" by the IB, is too vague or is incomprehensible or linguistically incorrect, it will notify both the applicant and the USPTO. Common Reg. 13. The IB may include a suggested amendment in the notification. The USPTO will not respond to the notice on behalf of applicant or advise the applicant as to how to identify the goods/services.

The applicant cannot send a response directly to the IB. Any response regarding the identification of goods/services must be sent through the USPTO. The IB must receive the response within 3 months of the date of the IB notification. 37 C.F.R. §§7.14(a) and 7.14(b); Common Reg. 13(2). See [TMEP §1902.07\(f\)](#) regarding responses to notices of irregularity submitted through the USPTO.

The applicant's response to the IB's notice should separately address each irregularity pertaining to the identification of goods/services, specifying which goods/services are to be deleted or amended, and providing any explanation or arguments deemed necessary. To avoid any misunderstanding by the examiners at the IB, the response should also include a separate final listing of the goods/services as it will appear in the international registration. If the applicant omits any goods/services from the final listing that were previously included in the identification of goods/services, the IB may remove such goods/services from the international registration.

An MPU trademark specialist will review the applicant's response to ensure that the goods/services identified in the response are within the scope of the identification in the basic application and/or registration at the time the response is filed. If an amendment to the goods/services in the basic application and/or registration has been entered into the Trademark database since the date the international application was submitted to the USPTO, the goods/services in the response to the IB notice must be within the scope of the amended goods/services. If the goods/services in the response exceed the scope of the goods/services in the basic application and/or registration as amended, the trademark specialist will notify the applicant that the proposed amendment to the goods/services does not conform to the goods/services as identified in the basic application and/or registration and that the response will not be forwarded to the IB. If there is time remaining in the IB response period, the applicant may submit a corrected response. If the goods/services in the corrected response do not exceed the scope of the goods/services in the basic application or registration as amended, and the IB response period has not expired, the MPU will forward the response to the IB.

If no proposal acceptable to the IB for remedying the irregularity is made within 3 months, and all other requirements have been met, the IB will either: (1) include the term in the international registration with an indication that the IB considers the term to be unacceptable, provided that the class of the vague term

was specified in the application; or (2) if the class was not specified, delete the term and notify both the USPTO and the applicant accordingly. Common Reg. 13(2)(b).

### **1902.07(d) Other Irregularities that Must Be Remedied by Applicant – Applicant May Respond Directly to the IB or Through the USPTO**

Other irregularities to be remedied by applicant include, but are not limited to, insufficient information about the applicant's representative; missing transliteration; insufficient information about a priority claim; unclear reproduction of the mark; and color claim with no color reproduction. The applicant must remedy any irregularities within three months of the date of the notification, or the international application may be abandoned. Common Reg. 11(2)(b). *See Guide to International Registration*, Para. B.II.09.23, for further information.

An applicant may file the response to these irregularities either directly with the IB, or through the USPTO, either electronically or on paper. To be considered timely, responses to IB notices of irregularities must be received by the IB before the end of the response period set forth in the IB's notice. Receipt in the USPTO does not fulfill this requirement.

If the response is filed through the USPTO, the USPTO will not review the response to the irregularity but will forward the response to the IB, and notify the applicant accordingly. See [TMEP §1902.07\(f\)](#) for information about responding to a notice of irregularity through the USPTO.

### **1902.07(e) Filing Response Directly With the IB**

Information about filing responses directly with the IB is available on the WIPO website, currently at <http://www.wipo.int/madrid/en/>. An applicant may contact the IB by mail to 34 chemin des Colombettes, P.O. Box 18, 1211 Geneva 20, Switzerland; by telephone at 41 22 338 9111; by fax to 41 22 740 1429; or by e-mail to [intreg.mail@wipo.int](mailto:intreg.mail@wipo.int).

### **1902.07(f) Responding to Notice of Irregularity Through the USPTO**

Under Trademark Rule 7.14(e), 37 C.F.R. §7.14(e), an applicant may file a response to an IB notice of irregularity through the USPTO for forwarding to the IB before the IB's response deadline. The response may be filed electronically or on paper. **However, receipt in the USPTO does not fulfill the requirement that the response be received by the IB before the IB response deadline.** Therefore, applicants should submit responses to the USPTO as soon as possible, and at least one month before the end of the IB response period. The USPTO will not process any response received after the IB response deadline.

The IB does not have a form for responses to irregularity notices. Applicants are strongly encouraged to use the TEAS form for responses to notices of irregularity. Applicants submitting paper responses to the USPTO for forwarding to the IB should include with the response: (1) the USPTO control number (U.S. Reference No.) assigned to the international application; and (2) a copy of the IB's irregularity notice. The applicant may include a self-addressed, stamped postcard with the response. Upon receipt, the USPTO will place a label indicating the receipt date on the documents, and return the postcard to the applicant. However, to be considered timely, the response must be received by the IB before the end of the response period set forth in the IB's notice, and receipt in the USPTO does not fulfill the IB deadline requirement.

Applicants submitting responses on paper should mail the document to the following address, using the First Class Service of the USPS:

Madrid Processing Unit  
600 Dulany Street  
Alexandria, Virginia 22314-5793

37 C.F.R. §§2.190(e) and 7.4(b). Alternatively, the response may be delivered by hand or courier to the Trademark Assistance Center, at James Madison Building, East Wing, Concourse Level, 600 Dulany Street, Alexandria, Virginia, Attention: MPU. TAC is open 8:30 a.m. to 5:00 p.m. Eastern Time, Monday through Friday, except on Federal holidays within the District of Columbia. 37 C.F.R. §7.4(c). The certificate of mailing or transmission procedures of 37 C.F.R. §2.197 and Express Mail provisions of 37 C.F.R. §2.198 do not apply to responses to notices of irregularity. 37 C.F.R. §§2.197(a)(2)(ii), 7.4(b)(2), and 7.4(e).

Please note that fees for correcting irregularities in an international application must be paid directly to the IB in Swiss currency, even if the applicant is filing a response to correct irregularities through the USPTO. 37 C.F.R. §7.14(c). See [TMEP §1903.02](#) for further information about the payment of fees to the IB.

Responses to notices of irregularity cannot be filed by fax. 37 C.F.R. §§2.195(d)(5) and 7.4(d)(3).

The USPTO will not process any response filed after the IB response deadline. 37 C.F.R. §7.14(e).

## **1902.08 Subsequent Designation - Request for Extension of Protection Subsequent to International Registration**

A subsequent designation is a request by the holder of an international registration for an extension of protection of the international registration to additional Contracting Parties, made after the IB registers the mark. The requirements for a subsequent designation are set forth in Article 3<sup>ter</sup> (2) and Common Reg. 24. The holder may file the subsequent designation directly with the IB. There is a form for filing a subsequent designation, the MM4 form, on the IB website at <http://www.wipo.int/madrid/en/>.

A holder may file a subsequent designation through the USPTO if: (1) the international registration is based on a basic application filed with the USPTO and/or a basic registration issued by the USPTO; and (2) the holder is a national of, is domiciled in, or has a real and effective business or commercial establishment in the United States. 15 U.S.C. §1141d; 37 C.F.R. §§7.21(a) and (b).

### **1902.08(a) USPTO Requirements**

The minimum requirements for a date of receipt of a subsequent designation in the USPTO are set forth in 37 C.F.R. §7.21(b), and are reproduced below:

- The international registration number;
- The serial number of the U.S. application and/or the registration number of the U.S. registration that formed the basis of the international registration;
- The name and address of the holder of the international registration;
- A statement that the holder is entitled to file a subsequent designation through the USPTO, specifying that the holder: (1) is a national of the United States; (2) has a domicile in the United States; or (3) has a real and effective industrial or commercial establishment in the United States. If a holder's address is not in the United States, the holder must provide the address of its United States domicile or establishment;
- A list of goods/services that is identical to or narrower than the goods/services in the international registration;
- A list of the Contracting Parties designated for an extension of protection;

- The USPTO transmittal fee;
- The international fees required by the IB, if the subsequent designation is filed through TEAS; and
- An e-mail address for receipt of correspondence from the USPTO, if the subsequent designation is filed through TEAS.

See [TMEP §1902.08\(b\)](#) regarding the form for filing a subsequent designation through the USPTO, and [TMEP §1902.08\(c\)](#) regarding the international fees for a subsequent designation.

The USPTO does not certify subsequent designations. If a subsequent designation meets the requirements set forth in 37 C.F.R. §7.21(b), the USPTO will forward it to the IB. 37 C.F.R. §7.21(c). If the subsequent designation does not meet these requirements, the USPTO will not forward the subsequent designation, and will notify the holder of the reasons. The USPTO transmittal fee is nonrefundable. 37 C.F.R. §7.21(d).

If the subsequent designation meets the requirements of Common Reg. 24, the IB will record it and notify both the USPTO and the holder of the recordation. Common Reg. 24(8). The subsequent designation will bear the date of receipt in the USPTO, provided that the IB receives it within two months of that date. If the IB does not receive the subsequent designation within two months of the date of receipt in the USPTO, the subsequent designation will bear the date of receipt in the IB. Common Reg. 24(6)(b).

### **1902.08(b) Form for Filing Subsequent Designation Through the USPTO**

The holder of an international registration submitting a subsequent designation through the USPTO may file either through TEAS or on the official paper form issued by the IB. 37 C.F.R. §7.21(b).

When filing through TEAS, the holder must enter the required information in the data fields of the free-text TEAS form. Holders filing subsequent designations on paper through the USPTO should use the official IB form MM4 posted on the IB website at <http://www.wipo.int/madrid/en/>. The IB will not accept paper applications that are not presented on the official IB form. The form cannot be handwritten. Article 3 *ter*(2); Common Reg. 24(2)(b); Madrid Admin. Instrs. §§2 and 6(a). The holder should complete the MM4 form online, print the completed form, and submit it to the USPTO via mail, hand delivery or courier service.

The IB's *Guide to International Registration*, available on the IB's website at [www.wipo.int/madrid/en/](http://www.wipo.int/madrid/en/), contains instructions for completing the subsequent designation form, at B.II.37.01–37.22.

The subsequent designation form may be mailed to the USPTO at the following address, using the First Class Service of the USPS.

Madrid Processing Unit  
600 Dulany Street  
Alexandria, Virginia 22314-5793

37 C.F.R. §§2.190(e) and 7.4(b). Alternatively, subsequent designations may also be delivered by hand or courier to the Trademark Assistance Center, at James Madison Building, East Wing, Concourse Level, 600 Dulany Street, Alexandria, Virginia, Attention: MPU. TAC is open 8:30 a.m. to 5:00 p.m. Eastern Time, Monday through Friday, except on Federal holidays within the District of Columbia. 37 C.F.R. §7.4(c).

If a subsequent designation is mailed to the USPTO via the Express Mail Service of the USPS, the USPTO will deem that the subsequent designation was submitted on the day it was deposited as Express Mail, provided that the holder complies with the requirements for correspondence sent by Express Mail set forth in 37 C.F.R. §2.198. See [TMEP §305.03](#) regarding Express Mail. The certificate of mailing or transmission

procedures of 37 C.F.R. §2.197 do not apply to subsequent designations. 37 C.F.R. §§2.197(a)(2)(ii) and 7.4(e).

When submitting a paper subsequent designation, a holder should include a self-addressed, stamped postcard. Upon receipt of the subsequent designation, the USPTO will place a label indicating the receipt date on the documents, and return the postcard to the holder.

Subsequent designations cannot be filed by fax. 37 C.F.R. §§2.195(d)(5) and 7.4(d)(2).

### **1902.08(c) Fees for Subsequent Designation**

*USPTO Transmittal Fee.* The subsequent designation must include the USPTO transmittal fee, or the USPTO will not forward it to the IB. 37 C.F.R. §7.21(a)(7).

*International Fees.* If the subsequent designation is filed through TEAS, all international fees for the subsequent designation must be paid at the time of submission. 37 C.F.R. §7.21(b)(8). International fees for subsequent designations filed on paper must be paid directly to the IB in Swiss currency, either before or after submission of the subsequent designation. However, international fees paid after the IB receives the subsequent designation could result in a notice of irregularity issued by the IB.

See [TMEP §1903.02](#) regarding payment of international fees.

### **1902.08(d) IB Requirements for Subsequent Designation**

The requirements for a subsequent designation are set forth in Article 3 *ter* and Common Reg. 24. If the subsequent designation meets the minimum requirements for a date of receipt set forth in 37 C.F.R. §7.21(b) ( *see* [TMEP §1902.08\(a\)](#)), the USPTO will forward the subsequent designation to the IB. *The USPTO will not examine it to determine whether it is complete.* The IB will examine it for completeness.

If the subsequent designation meets the applicable requirements, the IB will record it in the International Register and notify the holder and the Offices of the designated Contracting Parties. The IB will also notify the USPTO, if the subsequent designation was submitted through the USPTO. Common Reg. 24(8).

### **1902.08(e) Irregularities in Subsequent Designation**

If a subsequent designation is sent to the IB through the USPTO, the IB will notify both the holder and the USPTO of any irregularity. Common Reg. 24(5)(a). Corrections of any irregularity in a subsequent designation must be sent directly to the IB, even if the subsequent designation was sent through the USPTO. 37 C.F.R. §7.21(e). The USPTO will make note of receipt of the notice of irregularity in its automated records, but will not take any other action.

## **1902.09 Dependence and “Central Attack”: Restriction, Abandonment, Cancellation, or Expiration of Basic Application or Registration During First 5 Years**

For a period of 5 years from the date of the international registration, the registration is dependent on the basic application or basic registration, including the child application or registration of a basic application or registration that has been divided or merged. Article 6(3); see [TMEP §1902.12](#) regarding division or merger of basic application or registration. Under §63 of the Trademark Act, 15 U.S.C. §1141c, and Article

6(4), the USPTO must notify the IB if the basic application and/or registration is restricted, abandoned, cancelled, or expired with respect to some or all of the goods/services listed in the international registration:

- (1) Within five years after the international registration date; or
- (2) More than five years after the international registration date if the restriction, abandonment, or cancellation of the basic application or basic registration resulted from an action that began before the end of the five-year period.

The IB will cancel (or restrict) the international registration accordingly. Article 6(4); Common Reg. 22(2)(b). This is sometimes called “central attack.”

The USPTO must notify the IB if there is an appeal, opposition, or cancellation proceeding (or a court proceeding, if the USPTO is aware of the proceeding) pending at the end of the five-year period. The USPTO must notify the IB of the final decision once the proceeding is concluded. Common Regs. 22(1)(b) and (c). The IB will record this notice in the International Register and notify the holder and the designated Contracting Parties.

In view of the above notification requirements, applicants and registrants are encouraged to exercise diligence in monitoring the status of their basic application and/or basic registration ( *see* [TMEP §1705.05](#)). Once the IB cancels or restricts an international registration, it cannot be reinstated. If a problem arises with the basic application and/or registration, or a status inquiry reveals that the basic application and/or registration has become improperly abandoned or cancelled, the applicant or registrant should promptly take corrective action. See [TMEP §§1712](#) *et seq.* for information regarding reinstatement of abandoned applications and cancelled registrations; and [TMEP §§1714](#) *et seq.* regarding petitions to revive abandoned applications.

### **1902.10 Transformation When the USPTO Is the Office of Origin**

If the IB cancels an international registration as a result of the cancellation or restriction of the USPTO basic application and/or USPTO basic registration under Article 6(4) ( *see* [TMEP §1902.09](#)), the holder may “transform” the international registration into national applications in the offices of the Contracting Parties that were designated for extension(s) of protection in the international registration. Transformation must be requested within three months from the date of cancellation of the international registration. Article 9 *quinquies*. The filing date for the new national application(s) that results from the transformation of an extension of protection will be the international registration date (or the date of recordal of the subsequent designation requesting an extension of protection to that Contracting Party).

The goods/services in the national application(s) must have been covered by the cancelled international registration. Transformation may be requested for some or all of the goods/services that are cancelled or restricted from an international registration. Transformation may not be requested for goods/services that exceed the scope of those cancelled or restricted from the international registration.

Transformation of an extension of protection may take place only if the IB cancels or restricts the international registration at the request of the USPTO, due to cancellation of the USPTO basic application or USPTO basic registration. It is not available if the international registration is cancelled at the request of the holder, or expires for failure to renew. Transformation is not available at the Office of Origin.

The request for transformation must be filed directly with the designated Contracting Party, and will be examined as a national application under the laws of that Contracting Party. The USPTO and the IB are not involved.

See [TMEP §§1904.09](#) *et seq.* regarding transformation of a request for extension of protection to the United States into an application under §1 or §44 of the Trademark Act.

### **1902.11 Representative**

An applicant for or holder of an international registration may appoint a representative to represent the applicant or holder before the IB by indicating the representative's name in the appropriate box on the international application or subsequent designation form. Common Reg. 3(2)(a). The applicant/holder may also appoint a representative in a subsequent communication submitted to the IB (*see* [TMEP §1906.01\(d\)](#)). Common Reg. 3(2)(b). Form MM12, for appointing a representative, may be found on the IB website at <http://www.wipo.int/madrid/en/>.

### **1902.12 USPTO Must Notify IB of Division or Merger of Basic Application or Registration**

Under Common Reg. 23, an Office of Origin must notify the IB if the basic application or registration is divided into several applications or registrations, or if several applications or registrations are merged into a single application or registration, within 5 years after the date of the international registration. See [TMEP §§1110](#) *et seq.* regarding division of a United States application and [TMEP §§1615](#) *et seq.* regarding division of a United States registration.

## **1903 Payment of Fees**

### **1903.01 Payment of USPTO Fees**

The fees required by the USPTO for processing correspondence relating to international applications and registrations under the Madrid Protocol are set forth in 37 C.F.R. §7.6. The USPTO charges a fee for processing the following Madrid-related documents:

- International applications under 37 C.F.R. §7.11;
- Subsequent designations under 37 C.F.R. §7.21;
- Requests to record assignments, restrictions, or release of restrictions of an international registration under 37 C.F.R. §§7.23 and 7.24;
- Notices of replacement under 37 C.F.R. §7.28; and
- Affidavits under §71 of the Act (*see* 37 C.F.R. §7.36).

These fees must be paid in United States dollars at the time of submission, regardless of whether the document is submitted electronically or on paper.

### **1903.02 Payment of International Fees**

In addition to the fees required by the USPTO, there are international fees for processing international applications and registrations required by the IB. For international applications, subsequent designations, and requests to record changes of ownership of international registrations that are filed through TEAS, fees may be paid either directly to the IB or through the USPTO. 37 C.F.R. §7.7(a). Applicants/holders filing on paper must pay all international fees directly to the IB in Swiss currency. 37 C.F.R. §7.7(c); *see* Common Regs. 34 to 38 regarding payment of fees. There is a fee calculator and a schedule of fees on the IB website at <http://www.wipo.int/madrid/en/>.

The IB will accept the following forms of payment:

- Debit to a current account established with the IB;
- Payment into the Swiss postal check account or to any of the specified bank accounts of the IB; and
- Credit card where, in the context of an electronic communication, an electronic interface for online payment has been made available by the IB.

*See Guide to International Registration*, Para. B.I.08.05. Admin. Instr. §19.

Effective January 1, 2008, the IB does not accept banker's checks as a mode of payment. *See Change in Practice Regarding Acceptance by USPTO of Bank Checks for Fees Payable to the International Bureau*, [1328 OG 199](#) (March 25, 2008). *See also* IB Information Notice No. 20/2007, on the IB website at [http://www.wipo.int/edocs/madrdocs/en/2007/madrid\\_2007\\_20.doc](http://www.wipo.int/edocs/madrdocs/en/2007/madrid_2007_20.doc).

The conditions for opening, using, and closing a current account with the IB are posted on the IB website at [http://www.wipo.int/madrid/en/guide/part\\_d/pdf/wipo\\_account.pdf](http://www.wipo.int/madrid/en/guide/part_d/pdf/wipo_account.pdf). The IB has introduced an e-payment service on its website for payment of fees notified in irregularity notices and other WIPO communications concerning the Madrid System. Users are invited to make payments by credit card (American Express,® Mastercard, ® Visa®) or through a WIPO Current Account. See the WIPO website at <https://webaccess.wipo.int/epayment/> for further information about e-payment.

Questions concerning payment of international fees should be directed to the IB by mail to the World Intellectual Property Organization, 34 chemin des Colombettes, P.O. Box 18, 1211 Geneva 20, Switzerland; by telephone at 41 22 338 9111; by fax to 41 22 740 1429; or by e-mail to [intreg.mail@wipo.int](mailto:intreg.mail@wipo.int). The USPTO cannot assist applicants/holders in calculating the appropriate international fees or in selecting a method of payment of fees to the IB.

Failure to send a fee to the IB before the IB receives a form could result in issuance of a notice of irregularity by the IB. *See* TMEP §§[1902.02\(i\)](#), [1902.08\(c\)](#), and [1906.01\(a\)\(ii\)](#).

## **1904 Request for Extension of Protection of International Registration to the United States**

### **1904.01 Filing Request for Extension of Protection to United States**

The holder of an international registration may file a request for extension of protection of that registration to the United States under §66(a) of the Trademark Act, 15 U.S.C. §1141f(a). The request for extension of protection to the United States may be included in the international application, or in a subsequent designation made after the IB registers the mark. The IB will transmit the request for extension of protection to the United States to the USPTO electronically. The USPTO refers to a request for extension of protection to the United States as a “§66(a) application.” 37 C.F.R. §7.25(b).

#### **1904.01(a) Section 66(a) Basis**

Section 66(a) of the Trademark Act provides a basis for filing in the United States. *See* 37 C.F.R. §2.34(a)(5). A basis under §66(a) cannot be combined with any other basis. 37 C.F.R. §2.34(b)(3). A §66(a) applicant may not change the basis unless the applicant meets the requirements for transformation under §70(c) of the Trademark Act, 15 U.S.C. §1141j(c). 37 C.F.R. §2.35(a). *See* [TMEP §1904.09](#) regarding transformation.

Section 66(a) requires transmission of a request for extension of protection by the IB to the USPTO and cannot be added or substituted as a basis in an application originally filed under §1 or §44.

### **1904.01(b) Filing Date**

If a request for extension of protection of an international registration to the United States is made in an international application, the filing date of the §66(a) application is the international registration date. If a request for extension of protection to the United States is made in a subsequent designation, the filing date of the §66(a) application is the date on which the subsequent designation was recorded by the IB. 15 U.S.C. §1141f(b); 37 C.F.R. §7.26.

### **1904.01(c) Declaration of Intent to Use Required**

Section 66(a) of the Trademark Act requires that a request for extension of protection to the United States include a declaration that the applicant has a bona fide intention to use the mark in commerce that can be controlled by the United States Congress. The declaration must include a statement that the person making the declaration believes the applicant to be entitled to use the mark in commerce; and that to the best of his/her knowledge and belief no other person, firm, corporation, or association has the right to use the mark in commerce, either in the identical form thereof or in such near resemblance thereto as to be likely, when used on or in connection with the goods/services of such other person, to cause confusion, or to cause mistake, or to deceive. 15 U.S.C. §1141(5).

The declaration must be signed by: (1) a person with legal authority to bind the applicant; (2) a person with firsthand knowledge of the facts and actual or implied authority to act on behalf of the applicant; or (3) an attorney authorized to practice before the USPTO under 37 C.F.R. §11.14 who has an actual written or verbal power of attorney or an implied power of attorney from the applicant. 37 C.F.R. §§2.33(a) and 2.193(e)(1).

The USPTO has provided the IB with wording for the declaration of the applicant's bona fide intention to use the mark in commerce, which is part of the official IB form for international applications and subsequent designations in which the United States is designated for an extension of protection (IB Form MM18). Instructions as to who is a proper party to sign the declaration have also been provided to the IB.

The IB will check to ensure that the MM18 form is annexed to the international application or subsequent designation in which there is a request for extension of protection to the United States, that the wording of the declaration has not been altered, and that the document has been signed before forwarding the request for extension of protection to the USPTO. The IB does not send the verified statement to the USPTO.

The verified statement remains part of the international registration on file at the IB. 37 C.F.R. §2.33(e). The examining attorney will not review the international registration to determine whether there is a proper declaration of intent to use, or issue any inquiry regarding the verification of the application on file with the IB. However, if the applicant voluntarily files a substitute declaration with the USPTO, it will be examined according to the same standards used for examining any other declaration. See [TMEP §804.05](#) for further information about declarations in §66(a) applications.

### **1904.01(d) Use Not Required**

Use in commerce prior to registration is not required. Section 68(a)(3) of the Trademark Act, 15 U.S.C. §1141h(a)(3). However, after registration, periodic affidavits of use or excusable nonuse are required to

maintain a registered extension of protection. Section 71 of the Trademark Act, 15 U.S.C. §1141k. See [TMEP §1613](#) for information about these affidavits.

### **1904.01(e) Priority**

A holder may claim a right of priority within the meaning of Article 4 of the Paris Convention if:

- (1) The request for extension of protection contains a claim of priority;
- (2) The request for extension of protection specifies the filing date, serial number, and country of the application that forms the basis for the claim of priority; *and*
- (3) The date of international registration or the date of the recordal of the subsequent designation requesting an extension of protection to the United States is not later than 6 months after the date of the first regular national filing (within the meaning of Article 4(A)(3) of the Paris Convention) or a subsequent application (within the meaning of Article 4(C)(4) of the Paris Convention).

Section 67 of the Trademark Act, 15 U.S.C. §1141g; Article 4(2). *See also* Paris Convention Article 4(D).

To be eligible for a claim of priority in a §66(a) application, the holder must file the request for extension of protection to the United States within 6 months of the date of the filing that forms the basis of the priority claim. If the United States is designated for an extension of protection in an international application, the international registration date cannot be later than 6 months after the date of the filing that formed the basis of the priority claim. If a request for extension of protection to the United States is made in a subsequent designation, the date of recordal of the subsequent designation cannot be later than 6 months after the date of the filing that formed the basis of the priority claim. The Office's electronic systems use the dates provided in the international registration to automatically calculate whether an application receives the benefit of a priority claim. If the "Priority Claimed" field indicates "YES," the "Priority Claimed Date" is to be treated as the effective filing date. See [TMEP §206.02](#) for information on claiming priority under §67, 15 U.S.C. §1141g.

### **1904.01(f) Filing Fee**

The filing fee for a §66(a) application will be sent to the USPTO by the IB. The examining attorney should not require additional filing fees during examination, except where the application is divided due to a change in ownership with respect to some but not all of the goods/services. See Article 8 and Common Regs. 34 through 38 regarding international fees, and [TMEP §1110.11](#) regarding dividing a §66(a) application.

### **1904.01(g) Constructive Use**

Under §66(b) of the Trademark Act, unless extension of protection is refused, the filing of the request for extension of protection constitutes constructive use of the mark, conferring the same rights as those specified in §7(c) of the Trademark Act, 15 U.S.C. §1057(c), as of the earliest of the following:

- (1) The international registration date, if the request for extension of protection to the United States was filed in the international application;
  - (2) The date of recordal of the subsequent designation requesting extension of protection, if the request for extension of protection to the United States was made after the international registration date;
- or

- (3) The date of priority claimed pursuant to §67 of the Trademark Act.

### **1904.01(h) Cannot be Based on USPTO Basic Application or Registration**

An international registration in which the United States is the Office of Origin (i.e., an international registration based on a basic application pending in the USPTO or a basic registration issued by the USPTO) cannot be used to obtain an extension of protection to the United States. 15 U.S.C. §1141e(b); Article 3 *bis*. The IB will not send a request for extension of protection to the United States if the international registration is based on a USPTO basic application and/or registration.

## **1904.02 Examination of Request for Extension of Protection to the United States**

### **1904.02(a) Examined as Regular Application**

Under §68(a) of the Trademark Act, a request for extension of protection will be examined under the same standards as any other application for registration on the Principal Register. 15 U.S.C. §1141h. It is unnecessary for the examining attorney to review the international registration on file at the IB, since the IB will forward all the necessary information with the request for extension of protection or in subsequent notifications, such as notices of correction, limitation, or change to the name or address of the holder or holder's representative.

Except for 37 C.F.R. §§2.22-2.23, 2.130-2.131, 2.160-2.166, 2.173, and 2.181-2.186, all rules in 37 C.F.R. Part 2 apply to a request for extension of protection of an international registration to the United States, including sections related to proceedings before the Trademark Trial and Appeal Board, unless stated otherwise. All rules in 37 C.F.R. Parts 10 and 11 relating to representation of others before the USPTO also apply to requests for extension of protection. 37 C.F.R. §7.25(a).

### **1904.02(b) Examination of Classification of Goods/Services in §66(a) Applications**

In a §66(a) application, the IB controls the classification. Article 3(2). The §66(a) application (and any resulting registration) remains part of the international registration, and a change of classification in the United States would have no effect on the international registration. Any classification change made during examination would ultimately be refused by the IB upon notification of the final grant of protection.

Therefore, in a §66(a) application, the following types of amendments are prohibited:

- Changing the classification of goods/services from the classification assigned by the IB;
- Adding a class to the application that is not the subject of the request for extension of protection to the United States; or
- Transferring goods/services between classes in a multiple-class application.

37 C.F.R. §2.85(d). See [TMEP §1401.03\(d\)](#).

The only instance in which classification in a §66(a) application can be altered is upon the receipt of a correction from the IB. See [TMEP §1904.02\(e\)\(i\)](#) regarding IB corrections.

If the classification of a §66(a) application is inadvertently changed during examination, the USPTO will issue corrections to the holder and to the IB.

### **1904.02(c) Examination of Identification of Goods/Services in §66(a) Applications**

Although the IB determines *classification* of the goods/services, for purposes of *identification*, the examining attorney will examine the identification of goods/services in a §66(a) application according to the same standards of specificity used in examining applications under §§1 and 44 of the Trademark Act, 15 U.S.C. §§1051 and 1126. Specifically, the examining attorney must follow the procedures set forth in the TMEP and identify the goods/services in accordance with the USPTO's *Acceptable Identification of Goods and Services Manual* ("USPTO ID Manual") whenever possible. However, with respect to requests for extension of protection to the U.S., the assigned classes define the scope of the goods/services for the purpose of determining the extent to which the identification may be amended in accordance with 37 C.F.R. §2.71.

When the IB is unable to determine if the classification assigned to particular goods/services by an applicant's Office of origin is correct, the IB will request clarification. If no clarification is provided, the IB will include the unclear wording from the international application in the international registration and will indicate, in parentheses, that the wording is "considered too vague for classification," "incomprehensible," or "linguistically incorrect." Although included in the listing of goods/services of the request for extension of protection, the parenthetical language is not part of the scope of the identification and must not be part of any application that is eventually approved for publication.

If the initial identification of goods/services in the §66(a) application is definite, but misclassified under United States standards, the examining attorney must accept the identification, and cannot change the classification. If the initial identification of goods/services is not definite, the classification cannot be changed and the scope of the identification for purposes of permissible amendment is limited by the IB-assigned classification. See TMEP §§[1401.03\(d\)](#), [1402.01\(c\)](#), and [1402.07\(a\)](#). Because the international registration is limited to those classes assigned by the IB, the identification includes only those products or services falling within the identified classes. To propose an amendment outside of the scope of the classes would result in the lack of a basis for registration of such goods/services under U.S. law.

If a §66(a) applicant wants to seek registration for goods, services, or class(es) which are included in the international registration but were not originally included in the request for extension of protection to the United States, the §66(a) applicant must file a subsequent designation with the IB. Article 3 *ter*(2); *Guide to International Registration*, B.II.32.03. To seek registration for good/services not within the scope of the international registration, the applicant may file a separate application for the same mark under §1 and/or §44.

The identification of goods/services must be specific, definite, clear, accurate, and concise. See [TMEP §1402.01](#) and cases cited therein. The USPTO has discretion to require the degree of particularity deemed necessary to clearly identify the goods or services covered by the mark. *In re Omega SA*, 494 F.3d 1363, 83 USPQ2d 1541 (Fed. Cir. 2007) (noting that the USPTO has discretion to require greater particularity than an entry in WIPO's Alphabetical List of Goods and Services). Even if the IB characterizes terms as "too vague," "incomprehensible," or "linguistically incorrect," the USPTO has discretion to consider them *de novo* based on established policies regarding specificity within the context of the class assigned.

Generally, there are three types of identifications: (1) acceptable identifications of goods/services; (2) indefinite identifications of goods/services with acceptable options within the scope of the class; and (3) indefinite identifications of goods/services that do not include any goods/services in the designated class.

### **1904.02(c)(i) Acceptable Identifications of Goods/Services**

When the identification of goods/services is definite in accordance with USPTO policies, the identification is acceptable, regardless of the class assigned. If the goods/services are classified in accordance with the current edition of the Nice Agreement, no further requirements are necessary.

An international registration may encompass goods/services that were classified under an earlier version of the Nice Agreement. If the IB's classification of goods/services in the §66(a) application is different from the classification currently set forth in the USPTO ID Manual, the examining attorney will not require amendment of the classification. However, the examining attorney should notify the Administrator for Trademark Classification Policy and Practice ("Administrator") of the serial number, using the internal TM Madrid ID/Class mailbox. The goods/services cannot be moved to another class identified in the application. 37 C.F.R. §2.85(d).

With respect to acceptable goods/services that appear to be misclassified, if the examining attorney determines that the class would be proper were the goods/services amended with further clarifying language, the examining attorney may require an amendment for further specificity to limit the identification to goods/services that are in the class indicated in the international registration.

#### *Examples:*

- The goods are identified as "footwear" in Class 25. The wording is definite and the IB has assigned the correct class. No action necessary.
- The services are identified as "legal services," but the IB has assigned Class 42. The wording is definite, but the class is not consistent with the current edition of the Nice Agreement. No action is necessary. The examining attorney should notify the Administrator of the serial number.
- The goods are identified as "tobacco," but the IB has assigned Class 35. The Alphabetical List of the Nice Agreement classifies such goods in Class 34. The examining attorney will accept the goods in the assigned class. The examining attorney should notify the Administrator of the serial number.
- The goods are identified as "pasta," but the IB has assigned Class 3. The Alphabetical List of the Nice Agreement classifies such goods in Class 30. The examining attorney will accept the goods in the assigned class, and notify the Administrator of the serial number.
- The goods are identified as "nutritional supplements as included in this class," but the IB has assigned Class 29. Even with the wording added to "nutritional supplements," the identification of goods remains definite, but the class is not consistent with the USPTO Identification and Classification of Goods and Services Manual. The examining attorney will accept the goods in the assigned class, and notify the Administrator of the serial number.

### **1904.02(c)(ii) Indefinite Identification of Goods/Services with Acceptable Options Within the Scope of the Class**

When the identification of goods/services is unacceptable as indefinite, and more specific language that identifies goods/services in the class can be suggested, the examining attorney must require amendment of the wording and advise the applicant that any proposed amendment must be within the scope of the class of the international registration. The examining attorney should suggest acceptable identification(s) within

the class. Any proposed amendment must *also* be within the scope of the wording of the identification as originally indicated (37 C.F.R. §2.71(a)).

*Examples:*

- The goods are identified as “headgear” in Class 25. A requirement for greater specificity is issued, offering suggestions for more narrowly identified goods in Class 25, such as “headgear, namely hats, beanies, bathing caps.” The examining attorney should not suggest items within the scope of “headgear” that are not in Class 25, such as “helmets” in Class 9 or “headgear for orthodontic appliances” in Class 10. The Office action must include an advisory that only goods within the scope of the IB-assigned class will be accepted.
- The services are identified as “consultation services” in Class 36. A requirement for more specificity is issued, offering suggestions for more narrowly recited services in Class 36, such as “banking consultation,” “credit consultation,” or “financial consultation.” The Office action must include an advisory that only services within the scope of the IB-assigned class will be accepted.
- The goods are identified as “video games” in Class 28. The examining attorney may suggest that the applicant adopt “hand held unit for playing video games,” “stand alone video game machines,” or “video game machines for use with televisions” in Class 28. A proposed amendment including goods in the nature of “video game software,” or “video game cartridges” (both of which are Class 9 items under the current edition of the Nice Agreement) would be outside of the scope of the goods covered by the international registration, and such an amendment must be refused. The Office action must include an advisory that amendments may only include goods within the scope of the class assigned by the IB.

### **1904.02(c)(iii) Indefinite Identification of Goods/Services that Does Not Include Any Goods/Services Within the Class**

In the rare situation where the identification is indefinite, and there appear to be no goods/services that are within the scope of the identification as presently worded that are properly classified in the indicated class, the examining attorney must nevertheless require the applicant to submit an acceptably definite identification.

To be acceptable, any submitted amendment must be within the scope of the wording of the original goods/services.

The examining attorney should explain that he/she is unable to suggest substitute wording. The examining attorney may offer the applicant the option of deleting the unacceptable language from the application, but must not issue a requirement for the applicant to do so.

*Examples:*

- The services are identified as “food services” in Class 36. The identification is too broad to be acceptable, yet does not encompass any services that currently would be properly classified in Class 36, as restaurant services and other similar food and beverage services are in Class 43. The examining attorney need not make any suggestions as to acceptable wording, but must require the applicant to amend the recitation within the scope of services properly classified in Class 36 in accordance with the current edition of the Nice Agreement, and notify the Administrator of the serial number.
- The goods are identified as “engine pumps” in Class 12. The identification is too broad to be acceptable, yet does not encompass any goods that currently would be properly classified in Class 12, as water and oil pumps for land vehicle engines are in Class 7. The examining attorney need not make any suggestions as to acceptable wording, but must require the applicant to amend the

identification within the scope of goods properly classified in Class 12 in accordance with the current edition of the Nice Agreement, and notify the Administrator of the serial number.

#### **1904.02(c)(iv) Examination of Proposed Amendments and Issuance of Final Requirements for an Acceptable Identification**

If, in response to the Office action, an applicant proposes an amendment that: (1) remains unacceptably indefinite; (2) is beyond the scope of the original wording; or (3) is beyond the scope of the class, the examining attorney must refuse to accept the amendment. If the proposed amendment raises no new issues and the application is otherwise in condition for a final action, the examining attorney must issue a final requirement for an acceptable identification.

The basis for refusing an unacceptably indefinite identification is the requirement for a list of “particular goods and services” in a complete application. 37 C.F.R. §2.32(a)(6). Trademark Rule 2.71(a) provides the basis for refusal of a proposed amendment that exceeds the scope of the originally identified goods/services, including wording beyond the scope of the class of the international registration. The applicant is not bound by the scope of the language in the unacceptable amendment but, rather, by the language of the identification before the proposed amendment. See [TMEP §1402.07\(d\)](#). The examining attorney should also advise the applicant that the previous items listed in the existing identification (not the unacceptable substitute) remain operative for purposes of future amendment. Once an applicant amends the identification of goods/services in a manner that is acceptable to the examining attorney, the amendment replaces all previous identifications, and thus restricts the scope of goods/services to that amended language.

See [TMEP §1402.07\(e\)](#).

The examining attorney may suggest – but must not require – that the applicant delete an unacceptable term or phrase or proposed goods/services entry that fall outside the scope of the class. If the application contains acceptable goods/services that can be approved for publication, and would otherwise be in condition for a partial abandonment advisory, the examining attorney should indicate that if an acceptable response is not received, the unacceptable goods/services will be abandoned and the application will proceed with the acceptable items only. See [TMEP §718.02\(a\)](#) regarding partial abandonment.

If deletion or abandonment of an unacceptable term or phrase would result in deletion of all goods/services from the §66(a) application, the examining attorney must not suggest that the applicant delete the unacceptable wording. Instead, the examining attorney must continue to require an acceptable amendment, making the requirement final if appropriate.

If it appears that there is an error in classification, the examining attorney may suggest the applicant contact the IB to request correction of or a limitation to the international registration. The USPTO will not suspend prosecution of the application unless the applicant requests suspension in a timely response to an Office action and supports the request with a copy of the request for correction filed with the IB. See [TMEP §716.02\(g\)](#). The applicant may also appeal the final identification requirement to the Trademark Trial and Appeal Board, or petition to the Director under 37 C.F.R. §2.146 to review the requirement, if permitted by 37 C.F.R. §2.63. See [TMEP §1501.01](#) regarding appealable matter and [TMEP §1704](#) regarding petitionable subject matter.

#### **1904.02(c)(v) Effect of Indicated Classes – No Precedential Value on Later-Filed Applications**

Article 3 of the Madrid Protocol requires the goods and services of the international application to be classified according to the Nice Agreement. The IB uses the edition of the Nice Agreement in effect at the

time international registration is sought to classify the goods and services. The opinion of the IB with respect to classification prevails over that of the applicant and the Office of origin in the event of disagreement. Article 3(2).

Because the IB, rather than the USPTO, determines classification assigned to goods and services encompassed by the international registration, and because registered extensions of protection may be based upon international registrations issued under previous editions of the Nice Agreement, the assigned classes in registered extensions of protection will not be considered as controlling in any later-filed U.S. applications to the extent such classification is contrary to USPTO policy. The classification of goods/services in registered extensions of protection and published applications under §66(a) is only relevant to the particular goods and services identified therein, and should not be relied upon in other applications to support classification or identification of goods or services that are otherwise unacceptable under current USPTO practice. See [TMEP §1402.14](#).

### **1904.02(d) Certification and Collective Marks**

Classes A, B, and 200 are classes from the prior United States classification system that are still used in the United States to classify certification marks for goods (Class A), certification marks for services (Class B), and collective membership marks (Class 200). These classes are not included in the international classification system under the Nice Agreement.

However, a §66(a) application may indicate that the mark is a “Collective, Certificate or Guarantee Mark.”

In such a case, the examining attorney will require the applicant to clarify for the record the type of mark for which it seeks protection. The examining attorney must also require the applicant to comply with the requirements for the particular type of mark, i.e., collective trademark, collective service mark, collective membership mark, or certification mark. See [TMEP §§1303](#) *et seq.* regarding collective trademarks and collective service marks, [TMEP §§1304](#) *et seq.* regarding collective membership marks, and [TMEP §§1306](#) *et seq.* regarding certification marks.

If a §66(a) applicant indicates that the mark is a certification mark or collective membership mark, the USPTO **will not** reclassify it into United States Class A, B, or 200. However, the examining attorney must ensure that the applicant complies with all other United States requirements for certification or collective membership marks. See [TMEP §§1304](#) *et seq.* and [§§1306](#) *et seq.*

### **1904.02(e) Corrections and Limitations to the International Registration**

#### **1904.02(e)(i) Corrections**

When the IB determines that there is an error concerning an international registration in the International Register, it corrects that error ex officio. Requests for correction may be submitted to the IB by the holder (i.e., a §66(a) applicant seeking protection in U.S.), the Office of Origin of the international application, or in some cases by the USPTO Administrator for Trademark Classification Policy and Practice.

Corrections that merely reclassify the originally identified goods/services may be accepted; however, any indefinite wording of the identification of such goods/services that was acceptably amended during the course of USPTO examination will remain as amended, that is, the amended wording is not affected or changed by the correction issued by the IB. When an applicant amends the identification of goods/services in a manner that is acceptable to the examining attorney, including voluntary deletion of goods/services, the

amendment replaces all previous identifications, and thus restricts the scope of goods/services to that amended language. See [TMEP §1402.07\(e\)](#).

### **1904.02(e)(ii) Limitations**

The holder of an international registration may record a limitation of the good/services, which may affect some or all of the designated Contracting Parties. Article 9 *bis*(iii). Upon recordation, the IB will notify the USPTO if the U.S. is affected by the limitation. The recording of a limitation does not remove the goods/services concerned from the international registration, but simply narrows the goods/services for which the holder seeks protection in the particular countries affected.

A limitation may set forth particular goods/services narrower in scope than the goods/services as identified in the international registration. For example, if the international registration covers “clothing,” the holder may limit the goods to “sweaters and pants” with respect to the U.S. Upon notification by the IB, if the examining attorney considers that the change requested is not in fact a limitation but an expansion of the list of goods/services, or is otherwise unacceptable, then the USPTO may declare that the limitation has no effect in the United States. Common Regs. 27(5)(a)-(c). For example, if the goods are identified as “clothing” in the international registration, and the limitation specifies “sweaters and hair bows,” the examining attorney must refuse to apply the “hair bows” portion of the limitation to the request for extension of protection to the United States because it expands, rather than limits, the scope of the goods of the international registration.

See [TMEP §1906.01\(e\)](#) regarding the filing of a request to record a limitation with the IB; [TMEP §1904.03\(g\)](#) regarding limitations in pending §66(a) applications; and [TMEP §1904.15](#) regarding limitations in registered extensions of protection to the United States.

### **1904.02(e)(iii) Limitations vs. Amendments**

To the extent that an amendment of the identification in a §66(a) application narrows or restricts the goods/services, an amendment is comparable to a limitation affecting only the United States. A limitation filed at the IB by the applicant clarifying the nature of the goods/services may render the identification of goods/services in the §66(a) application sufficiently definite. Nevertheless, if the examining attorney has issued an Office action requiring amendment of the identification of goods/services, a proper response to the Office action must be received in the allowed time period. Simply recording a limitation with the IB is not a response to an Office action. The applicant must file a response with the USPTO within six months of the date on which the USPTO issued the Office action, stating that the applicant has recorded a limitation that will resolve the outstanding issue(s).

See [TMEP §1906.01\(e\)](#) regarding the filing of a request to record a limitation with the IB; [TMEP §1904.03\(g\)](#) regarding limitations in pending §66(a) applications; and [TMEP §1904.15](#) regarding limitations in registered extensions of protection to the United States.

### **1904.02(f) Mark Must Be Registrable on Principal Register**

There is no provision in the Trademark Act for registration of a mark in a request for an extension of protection on the Supplemental Register. If the proposed mark is not registrable on the Principal Register, the extension of protection must be refused. 15 U.S.C. §1141h(a)(4); 37 C.F.R. §§2.47(c) and 2.75(c).

### **1904.02(g) Refusal Must Be Made Within 18 Months**

Under §68(c) of the Trademark Act and Article 5 of the Protocol, the USPTO must notify the IB of any refusal entered in a §66(a) application within 18 months of the date the IB transmits the request for extension of protection to the USPTO. See [TMEP §1904.03\(a\)](#).

The Trademark database tracks the period of time within which the USPTO must notify the IB of a refusal of protection. This information appears in the §66(a) International Registration data field “Auto Protection Date.” If a refusal is not received by the IB as of this date, the mark receives automatic protection under Article 5(5) of the Protocol.

### **1904.02(h) Office Actions and Responses**

The USPTO will send the first Office action in a §66(a) application to the IB. The first Office action is known as a provisional refusal and must be reviewed by the IB. If the provisional refusal meets the applicable requirements ( see [TMEP §§1904.03 et seq.](#)), the IB will process the refusal and send it to the holder (i.e., the §66(a) applicant). The IB notifies the USPTO of the date on which it processed the refusal, and the USPTO updates the Trademark database with this information. A response to the Office action must be sent to the USPTO, not the IB, and is due in the USPTO within six months of the date on which the USPTO sent the action to the IB, *not* the date on which the refusal was processed by the IB. 15 U.S.C. §1062(b); 37 C.F.R. §2.62(a); [TMEP § 1904.03\(c\)](#). Failure to respond to the Office action within the time provided will result in abandonment of the application. 15 U.S.C. §1062(b); 37 C.F.R. §2.65(a). See [TMEP § 711](#) regarding the deadline for response to an Office action and [TMEP §§ 718.02](#) and [718.03-718.03\(a\)](#) regarding abandonment for failure to respond or incomplete response to an Office action.

A priority action may be issued as a first Office action in a §66(a) application. However, an examiner’s amendment or a combined examiner’s amendment/priority action ( see [TMEP §§707 et seq.](#) and [708.05](#)) may not be issued as a first Office action because the IB will not accept such amendments. Examiner’s amendments and combined examiner’s amendments/priority actions may be issued as second and subsequent actions if authorized by the applicant, someone with legal authority to bind the applicant (e.g., a corporate officer or general partner of a partnership), or a practitioner authorized to practice before the USPTO pursuant to 37 C.F.R. §11.14 (“qualified practitioner”). See [TMEP §§602 et seq.](#) regarding persons who are authorized to represent applicants, registrants, and parties to proceedings before the USPTO.

The USPTO will send second and subsequent Office actions directly to the applicant, at the correspondence address set forth in the request for extension of protection to the United States, or to the correspondence

address provided in a subsequent communication filed in the USPTO. See [TMEP §§609.01\(a\)](#) and [1904.02\(i\)](#) regarding correspondence in §66(a) applications.

### **1904.02(i) Correspondence Address**

The address of the international registration holder's designated representative is treated as the correspondence address, unless a change of correspondence address is filed in the USPTO.

The USPTO will send second and subsequent Office actions, and other notices, directly to the §66(a) applicant's correspondence address of record.

In a §66(a) application or a registered extension of protection, the USPTO will accept a notice of change of the correspondence address, signed by the applicant or registrant, someone with legal authority to bind the applicant/registrant (e.g., a corporate officer or general partner of a partnership), or a qualified practitioner, and will send correspondence to the new address. See 37 C.F.R. §§2.18(b)(2) and 2.193(e)(9) and [TMEP §§609](#) *et seq.* regarding the procedures for establishing and changing the correspondence address in the USPTO.

A change of the correspondence address in the USPTO records will not affect the address of the holder's representative designated in the international registration, to which the IB sends correspondence. A request to record a change of the name or address of the representative designated in the international registration must be filed with the IB; it cannot be filed through the USPTO. See [TMEP §1906.01\(d\)](#). There are forms for changing the name or address of the representative on the IB website at <http://www.wipo.int/madrid/en/>. See also Common Reg. 36(i).

See [TMEP §§602.03](#) *et seq.* regarding foreign attorneys and agents, [TMEP §609.01\(a\)](#) regarding correspondence in §66(a) applications, and [TMEP §609.04](#) regarding correspondence with parties not domiciled in the United States.

### **1904.02(j) Mark Cannot Be Amended**

The Madrid Protocol and the Common Regulations do not permit amendment of a mark in an international registration. If the holder of the international registration wants to change the mark in any way, even slightly, the holder must file a new international application. The IB's *Guide to International Registration*, Para. B.II.72.02, provides as follows:

[T]here is no provision for a mark that is recorded in the International Register to be amended in any way, either on renewal or at any other time. If the holder wishes to protect the mark in a form which differs, even slightly, from the mark as recorded, he must file a new international application. This is true even if the mark has been allowed to be changed in the basic application, the registration resulting from the basic application or the basic registration, as the case may be....

Accordingly, because an application under §66(a) is a request to extend protection of the mark in an international registration to the United States, the Trademark Rules of Practice make no provision for amendment of the mark in a §66(a) application, and the USPTO will not permit such amendments. See 37 C.F.R. §2.72; [TMEP §807.13\(b\)](#). However, the applicant still must comply with the United States requirements regarding drawings and descriptions of the mark. See [TMEP §1904.02\(k\)](#).

In limited circumstances, an applicant may seek to amend a §66(a) application to add a standard character claim. See TMEP §[807.03\(g\)](#).

### **1904.02(k) Drawings and Descriptions of the Mark**

Though the mark in a §66(a) application cannot be amended, the applicant must comply with the United States requirements regarding drawings of the mark. 15 U.S.C. §1141h(a); 37 C.F.R. §§2.52 and 7.25(a).

If the drawing does not meet United States requirements (e.g., due to the improper inclusion of the federal registration symbol ® or the unacceptable reproductive quality of the image), the examining attorney will require a substitute drawing. Furthermore, if the reproduction of the mark in the international registration consists of multiple renditions of a three-dimensional mark, the applicant will be required to either: (1) comply with the United States requirement to depict the mark in a single rendition, 37 C.F.R. §2.52(b)(2); or (2) petition the Director to waive this requirement. See [TMEP Chapter 1700](#) regarding petitions, and [TMEP §807.10](#) regarding drawings of three-dimensional marks.

If the international registration contains no color claim, but there is a color drawing in the international registration, the applicant must either: (1) submit a claim of the color(s) featured in the mark and describe their location; or (2) state for the record that no claim of color is made with respect to the international registration, and submit a black-and-white reproduction of the same mark depicted in the international registration. See [TMEP §807.07\(b\)](#).

A §66(a) applicant must also comply with United States requirements regarding descriptions of the mark. 37 C.F.R. §§2.37, 2.52(b)(5), and 7.25(a).

With respect to sound marks and other non-visual marks, if the international registration contains a visual depiction of some kind, such as a musical staff corresponding to the notes of a sound mark, the applicant will be required to comply with the United States requirements for a detailed description of the mark. See [TMEP §807.09](#).

### **1904.02(l) Jurisdiction**

The provisions with respect to requesting jurisdiction over published §66(a) applications are similar to those for applications under §§1(a) and 44 of the Trademark Act. 37 C.F.R. §2.84. However, when deciding whether to grant a request to restore jurisdiction in a §66(a) application, the Director must also consider the time limits for notifying the IB of a refusal, set forth in Article 5(2) of the Protocol and §68(c) of the Trademark Act, 15 U.S.C. §1141h(c).

### **1904.03 Notice of Refusal**

#### **1904.03(a) Notice Must Be Sent Within 18 Months**

Within 18 months of the date the IB forwards a request for extension of protection, the USPTO must transmit:

- (1) A notification of refusal based on examination;
- (2) A notification of refusal based on the filing of an opposition; or
- (3) A notification of the possibility that an opposition may be filed after expiration of the 18-month period. If the USPTO notifies the IB of the possibility of opposition, it must send the notification

of refusal within 7 months after the beginning of the opposition period, or within one month after the end of opposition period, whichever is earlier.

Section 68(c) of the Trademark Act, 15 U.S.C. §1141h(c); Article 5.

If the USPTO does not send a notification of refusal of the request for extension of protection to the IB within 18 months, the request for extension of protection cannot be refused. Section 68(c)(4) of the Trademark Act; Article 5(5); Common Reg. 17(2)(iv). If the USPTO sends a notification of refusal, no grounds of refusal other than those set forth in the notice can be raised more than 18 months after the date on which the IB forwards the request for extension of protection to the USPTO. Section 68(c)(3) of the Trademark Act.

If upon re-examination the examining attorney determines a new ground of refusal exists, a second Office action raising this new ground may be issued only if time remains in the 18-month period. In such a case, the examining attorney must contact the MPU upon issuance of the Office action, so that a notification of the new ground of refusal can be sent to the IB.

### **1904.03(b) Requirements for Notice of Refusal**

A final decision is not necessary; a provisional refusal is sufficient to meet the 18-month requirement. Under Common Reg. 17, a notice of provisional refusal must be dated and signed by the USPTO and must contain:

- The number of the international registration, preferably accompanied by an indication of the mark;
- All grounds of refusal;
- If there is a conflicting mark, the filing date, serial number, priority date (if any), registration date and number (if available), name and address of the owner, reproduction of the conflicting mark, and list of goods/services;
- A statement that the provisional refusal affects all the goods/services, or a list of the goods/services affected;
- The procedures and time limit for contesting the refusal, i.e., period for response or appeal of the refusal, and the authority with which an appeal can be filed;
- If the refusal is based on an opposition, the name and address of the opposer.

Common Reg. 17(2).

The IB will record the provisional refusal in the International Register and transmit it to the holder of the registration. Article 5(3); Common Reg. 17(4).

### **1904.03(c) §66(a) Applicant Must Respond to Notification of Refusal**

A holder of an international registration who applies for an extension of protection to the United States will receive an initial notification of refusal through the IB. The holder must respond directly to the USPTO. The holder may be represented by an attorney, but only if such attorney meets the requirements of 37 C.F.R. §11.14 ( *see* [TMEP §§602 et seq.](#)). Standard examination procedures are used to examine §66(a) applications. 15 U.S.C. §1141h.

A foreign attorney who does not meet the requirements of 37 C.F.R. §11.14 cannot represent the applicant before the USPTO or sign a response to an Office action on behalf of the applicant. 37 C.F.R. §11.5(b)(2).

See TMEP §§[602.03](#) *et seq.*, [611.02](#), [712.01](#), and [712.03](#).

### **1904.03(d) Refusal Pertaining to Less than All the Goods/Services**

If a notification of refusal in a §66(a) application does not pertain to all the goods/services, the mark may be protected for the remaining goods/services, even if the holder does not respond to the notification of refusal. Sections 68(c) and 69(a) of the Trademark Act, 15 U.S.C. §§1141h(c) and 1141i(a), provide that an application under §66(a) of the Trademark Act is automatically protected with respect to any goods or services for which the USPTO has not timely notified the IB of a refusal by either *ex officio* examination or opposition.

Accordingly, 37 C.F.R. §2.65(a) provides that if a refusal or requirement is expressly limited to only certain goods/services and the applicant fails to file a complete response to the refusal or requirement, the application shall be abandoned only as to those particular goods/services. See [TMEP §718.02\(a\)](#) for further information about partial abandonment.

### **1904.03(e) Confirmation or Withdrawal of Provisional Refusal**

If the USPTO has sent a notice of provisional refusal, once the procedures regarding the refusal are complete, the USPTO must notify the IB that:

- (1) protection is refused for all goods/services;
- (2) the mark is protected for all goods/services; or
- (3) the mark is protected for some specified goods/services.

Common Reg. 17(5). The IB will record this notice and send it to the holder.

### **1904.03(f) Notification of Correction in the International Register with Respect to a Pending Request for Extension of Protection**

When the IB determines that there is an error concerning an international registration in the International Register, it corrects that error *ex officio*. The IB will also correct an error at the request of the holder or the Office of Origin. Common Reg. 28(1). If the IB notifies the USPTO of a correction with regard to an international registration, the USPTO may declare in a notification to the IB that protection cannot, or can no longer, be granted to the international registration as corrected. Such a declaration must be sent to the IB within 18 months of notification of the correction. This may be done where there are grounds for refusal of the international registration as corrected which did not apply to the international registration as originally notified to the USPTO. Common Reg. 28(3).

Unlike limitations, which affect only the listing of goods and/or services, a correction can involve any element of the international registration, including the mark for which registration is sought, the effective filing date, or the claim of priority. Corrections are not to be treated as amendments from the applicant. They are also not responses to Office actions and do not toll the statutory response period.

If the MPU determines that a correction does have effect in the United States and does not require review by the examining attorney, the correction will be entered into the USPTO's database. The MPU trademark

specialist will update the prosecution history in the Trademark database to reflect that the processing of the correction has been completed.

If the MPU determines that review by the examining attorney is required, the MPU will notify the examining attorney of the correction and the examining attorney will determine whether the correction raises any new grounds for refusal or basis for a new requirement. If the examining attorney determines that the correction raises new issues, he or she must issue an Office action refusing registration or making the necessary requirements and indicating the reasons why, supported by evidence, where appropriate. The examining attorney must also notify the MPU that a new Office action has been issued, and the MPU will ensure that the IB is notified of the new grounds for refusal. The applicant may argue against the refusal or requirement, and, if such refusal or requirement is made final, file an appeal to the Trademark Trial and Appeal Board or petition to the Director pursuant to 37 C.F.R. §2.146.

See also [TMEP §1904.14](#) regarding corrections to registered extensions of protection, and [TMEP §1906.01\(f\)](#) for information about filing requests for correction with the IB.

### **1904.03(g) Notification of Limitation of the List of Goods/Services with Respect to a Pending Request for Extension of Protection**

#### *Limitation Due to Partial Cancellation of International Registration*

When the USPTO receives notification from the IB that the international registration has been cancelled in part due to the ceasing of effect of the basic registration, the USPTO will partially cancel the pending request for extension of protection by limiting or removing the cancelled goods and/or services from the USPTO's Trademark database. 15 U.S.C. §1141j(a); 37 C.F.R. §7.30. The MPU trademark specialist will determine what, if any, goods and/or services remain extended to the United States and narrow the listing of goods and/or services accordingly.

#### *Voluntary Limitation by Holder of International Registration*

Upon receipt of notification from the IB that a voluntary limitation of the list of goods/services may affect an extension of protection to the United States, the USPTO may declare that the limitation has no effect. Such a declaration must be sent to the IB within 18 months of notification of the limitation. The USPTO will indicate the reasons why the limitation has no effect, the corresponding essential provisions of the law, and whether the declaration is subject to review or appeal. Common Regs. 27(5)(a)-(c).

If the MPU determines that a limitation does have effect in the U.S., the limitation shall be entered into the Trademark database with respect to the goods/services as identified at the time of receipt of the notification of limitation.

If the MPU determines that review by the examining attorney is required, the MPU will notify the examining attorney, and the examining attorney will determine whether the limited goods/services are within the scope of the identification of goods/services as originally identified in the §66(a) application. For example, if the request for extension of protection originally lists goods as "clothing" in International Class 25, and the applicant submits a response to an Office action proposing to amend such goods to "clothing, namely pants, shirts, and dresses," and the USPTO later receives a voluntary limitation that lists the goods as "clothing for women," the consideration of scope is against the original identification of "clothing." If it is determined that the limitation is not an expansion of the scope of the original listing, the limited goods/services will then be considered in light of any interim amendments proposed by the applicant during prosecution of the

application. In the example above, the proposed wording “clothing, namely, pants, shirts, and dresses” will be further limited to “clothing *for women*, namely, pants, shirts, and dresses.”

If the examining attorney determines that the limitation is not acceptable (e.g., because he or she determines that the change requested results in an extension rather than a limitation of the goods/services), he or she must issue an Office action refusing the limitation and indicating the reasons why the limitation is unacceptable. If the listing of goods/services is not an expansion of the original goods/services but is itself indefinite by USPTO standards (e.g., “clothing for women”), the examining attorney must issue a new requirement for a sufficiently definite identification and may supersede any previously issued requirement to the extent it remains outstanding at the time of examination of the limitation. If the examining attorney issues a new Office action relating to the limitation of goods/services, he/she must also notify the MPU, and the MPU will ensure that the IB is notified when a limitation is found to have no effect in the United States. The applicant may argue against the refusal of the limitation, and, if such refusal is made final, file an appeal to the Trademark Trial and Appeal Board or petition to the Director pursuant to 37 C.F.R. §2.63(b).

If an Office action requiring only that the identification be amended is outstanding, it is possible that a limitation notice processed before the end of the response period would resolve the issue. If the examining attorney determines that the identification proposed in the limitation is acceptable and puts the application in condition for approval for publication, the examining attorney may issue a no-call examiner’s amendment that acknowledges receipt of the limitation and states that the requirement for a more definite identification is satisfied and may then approve the application for publication.

If a limitation results in the deletion of all goods/services identified in the §66(a) application, the application will be abandoned.

See also [TMEP §1906.01\(e\)](#) for information about filing requests to record limitations with the IB, and [TMEP §1904.15](#) regarding limitations in the list of goods/services in registered extensions of protection.

## 1904.04 Opposition

Section 68(a)(2) of the Trademark Act, 15 U.S.C. §1141h(a)(2), provides that a request for extension of protection is subject to opposition under §13 of the Trademark Act. As noted above, the USPTO must notify the IB within 18 months of the date the IB sends the request for extension of protection to the USPTO of: (1) a notification of refusal based on the filing of an opposition; or (2) a notification of the possibility that an opposition may be filed after expiration of the 18-month period.

The notice must state the dates on which the opposition period begins and ends, if known. If the dates are unknown, the USPTO must communicate them to the IB “at the latest at the same time as any notification of a provisional refusal based on an opposition.” Common Reg. 16(1)(b).

Any notification of refusal on the basis of opposition must be received by the IB within 7 months after the beginning of the opposition period or within one month after the end of the opposition period, whichever is earlier. 15 U.S.C. §1141h(c)(2); Article 5(2)(c)(ii).

An opposition to a §66(a) application must be filed through the Electronic System for Trademark Trials and Appeals (“ESTTA”). 37 C.F.R. §2.101(b)(2). *In re Börlind Gesellschaft für kosmetische Erzeugnisse mbH*, 73 USPQ2d 2019 (TTAB 2005). Once filed, an opposition to a §66(a) application may not be amended to change or add to the grounds for opposition, or to add to the goods or services opposed. 37 C.F.R. §2.107(b). The scope of the opposition is limited to those grounds designated, and those goods/services identified, on

the ESTTA-generated opposition form. *CSC Holdings LLC v. SAS Optimhome*, 99 USPQ2d 1959, 1962-3 (TTAB 2011); *Hunt Control Sys., Inc. v. Koninklijke Philips Elec. N.V.*, 98 USPQ2d 1558, 1561-62 (TTAB 2011). The notice of opposition must also include all fees for each party opposer to oppose the registration in all classes specified in the opposition. 37 C.F.R. §2.101(d)(2).

*Request for Extension of Time to Oppose.* A request for extension of time to oppose a §66(a) application must be filed through ESTTA. 37 C.F.R. §2.102(a)(2).

No more than three requests to extend the time for filing an opposition may be filed. The time for filing an opposition may not be extended beyond 180 days from the date of publication. 37 C.F.R. §2.102(c).

See [TMEP §§1503](#) *et seq.* for further information about oppositions.

### **1904.05 Certificate of Extension of Protection**

If the mark in a §66(a) application is published for opposition and is not opposed, or survives all oppositions filed, the USPTO will issue a certificate of extension of protection and publish notice of such certificate in the *Official Gazette*. Section 69(a) of the Trademark Act, 15 U.S.C. §1141i(a). From the date of issuance of the certificate, the extension of protection has the same effect and validity as a registration on the Principal Register, and the holder of the international registration has the same rights and remedies as the owner of a registration on the Principal Register. Section 69(b) of the Trademark Act, 15 U.S.C. §1141i(b). The certificate of registration will look the same as the certificate issued for registrations resulting from applications under §§1 and 44 of the Trademark Act ( *see* [TMEP §1601.01\(a\)](#)).

Upon registration, the USPTO will refer to an extension of protection to the United States as a “registration,” “registered extension of protection,” or a “§66(a) registration.” 37 C.F.R. §7.25(c).

A registered extension of protection always remains part of and dependent upon the international registration. In this respect, a registered extension of protection differs from a §44 registration, which is independent from the underlying foreign registration, pursuant to 15 U.S.C. §1126(f).

See [TMEP §§1613](#) and [1904.10](#) regarding the requirement for an affidavit of use or excusable nonuse under §71 of the Trademark Act, 15 U.S.C. §1141k; [TMEP §1905](#) regarding renewal and expiration of international registrations in general; and [TMEP §1614](#) for information about renewal of registered extensions of protection.

### **1904.06 Assignment of Extension of Protection to the United States**

Under §72 of the Trademark Act, 15 U.S.C. §1141 *l*, an extension of protection to the United States may be assigned, together with the goodwill associated with the mark, only to a person who is a national of, is domiciled in, or has a bona fide and effective industrial or commercial establishment in a country that is either: (1) party to the Madrid Protocol, or (2) a member of an intergovernmental organization that is a party to the Madrid Protocol.

Because an extension of protection remains part of the international registration, assignments of extensions of protection to the United States must first be recorded at the IB. A holder or assignee cannot file an assignment (or other document transferring title) of an extension of protection to the United States directly with the Assignment Recordation Branch of the USPTO. The USPTO will record only those assignments (or other documents transferring title) that have been recorded with the IB. The IB will notify the USPTO

of any changes in ownership recorded in the International Register, and the USPTO will automatically update the Trademark database and the Assignment database to reflect the change(s). See [TMEP §501.07](#).

See [TMEP §§1906.01](#) *et seq.* regarding requests to record a change of ownership in the International Register.

Section 10 of the Trademark Act and 37 C.F.R. Part 3 do not apply to §66(a) applications or registered extensions of protection. 37 C.F.R. §7.22.

### **1904.07 Invalidation of Protection in United States**

An extension of protection to the United States may be invalidated in an administrative or judicial proceeding governed by United States law, such as a cancellation proceeding before the Trademark Trial and Appeal Board or a federal court proceeding. The USPTO must notify the IB if an extension of protection to the United States is invalidated. Article 5(6). The requirements for a notice of invalidation are set forth in Common Reg. 19.

### **1904.08 Cancellation of International Registration by IB**

If the IB notifies the USPTO that an international registration has been cancelled with respect to some or all of the goods/services, the USPTO will cancel the extension of protection of that international registration to the United States with respect to such goods/services as of the date on which the IB cancelled the international registration. 15 U.S.C. §1141j(a); 37 C.F.R. §7.30.

See [TMEP §1905](#) regarding renewal of international registrations in general, and [TMEP §1614](#) for information about renewal of registered extensions of protection to the United States.

### **1904.09 Transformation to Application Under §1 or §44**

An international registration is dependent on the basic application and/or basic registration for five years after the date of the international registration. Article 6(3). If the basic application or registration is restricted, abandoned, cancelled, or expired with respect to some or all of the goods or services listed in the international registration, the Office of Origin will notify the IB, and the IB will cancel, to the extent applicable, the international registration and notify the USPTO of the cancellation. Article 6(4). See [TMEP §1902.09](#).

Thus, an Article 6(4) cancellation is a cancellation, in whole or in part, of the international registration by the IB at the request of an Office of Origin. Thereafter, the USPTO will cancel in whole, or restrict in part, the corresponding §66(a) registered extension of protection, or abandon, in whole or in part, the corresponding §66(a) application.

In this situation, the holder of the international registration may “transform” the cancelled or restricted §66(a) registered extension of protection or abandoned §66(a) application into an application under §1 or §44 of the Trademark Act for registration of the same mark for any or all of the cancelled, restricted, or abandoned goods/services that were covered by the extension of protection. The effective filing date of the new §1 or §44 application is the international registration date, the date of recordal of the extension of protection if based on subsequent designation, or the date of priority of the request for extension of protection with the IB, whichever is applicable. 15 U.S.C. §1141j(c); Article 9 *quinquies*.

A request for transformation must be filed within three months after the date on which the Article 6(4) cancellation was processed by the IB. 15 U.S.C. §1141j(c); Article 9 *quinquies*(i). The deadline for filing a request for transformation is a statutory requirement. The Director cannot extend, suspend, or waive this

statutory requirement for any reason, even for an extraordinary situation. *See In re Mother Tucker's Food Experience (Can.) Inc.*, 925 F.2d 1402, 1405, 17 USPQ2d 1795, 1797-98 (Fed. Cir. 1991); *In re Media Cent. IP Corp.*, 65 USPQ2d 1637, 1639 (Dir USPTO 2002); [TMEP §§ 1604.04, 1708](#).

An extension of protection can be transformed only in the event of an Article 6(4) cancellation of the international registration, that is, at the request of the Office of Origin due to the cancellation of the basic application and/or registration. It is not available if the international registration expires for failure to renew, is cancelled, in whole or in part, at the request of the holder, or is cancelled, in whole or in part, for any other reason. 15 U.S.C. §1141j(c); 37 C.F.R. §7.31; Article 9 *quinquies*. See [TMEP §1904.09\(a\)](#) for the requirements for transformation.

### **1904.09(a) Requirements for Transformation**

A request for transformation must be filed within three months after the date on which the international registration was cancelled, in whole or in part. Article 9 *quinquies*(i); 15 U.S.C. §1141j(c). The request must include:

- (1) The serial number or registration number of the extension of protection to the United States (i.e., the §66(a) application or registered extension of protection);
- (2) The name and address of the holder of the international registration;
- (3) The domestic application filing fee required by 37 C.F.R. §2.6(a)(1) for at least one class of goods or services; and
- (4) An e-mail address for receipt of correspondence from the USPTO.

37 C.F.R. §7.31(a).

The holder must file the request for transformation directly with the USPTO, and the transformed application will be examined as a domestic application.

Under §70(c) of the Trademark Act, 15 U.S.C. §1141j(c), and Article 9 *quinquies*, transformation may take place only if the international registration is cancelled or restricted *at the request of the Office of Origin under Article 6(4), due to the cancellation of the basic application and/or registration*. It is not available if the international registration expires for failure to renew, is cancelled or restricted at the request of the holder, or is cancelled or restricted for any other reason.

The request for transformation should be mailed using the First Class Service of the USPS to the following address:

Madrid Processing Unit  
600 Dulany Street  
Alexandria, Virginia 22314-5793

37 C.F.R. §§2.190(e) and 7.4(b). Alternatively, the request may be delivered by hand or courier to the Trademark Assistance Center, at James Madison Building, East Wing, Concourse Level, 600 Dulany Street, Alexandria, Virginia, Attention: MPU. TAC is open 8:30 a.m. to 5:00 p.m. Eastern Time, Monday through Friday, except on Federal holidays within the District of Columbia. 37 C.F.R. §7.4(c). The certificate of mailing or transmission procedures of 37 C.F.R. §2.197 and Express Mail provisions of 37 C.F.R. §2.198 do not apply to requests for transformation. 37 C.F.R. §§2.197(a)(2)(ii), 7.4(b)(2), and 7.4(e).

Requests for transformation cannot be filed by fax. 37 C.F.R. §§2.195(d)(5) and 7.4(d)(6).

### **1904.09(b) Examination of Transformed Application**

A “transformed” application under §1 or §44 of the Trademark Act resulting from the transformation of a cancelled extension of protection must comply with all the requirements of the Trademark Act and Trademark Rules of Practice. 37 C.F.R. §7.31(c). The USPTO will assign a new serial number, and will link the prosecution history of the cancelled extension of protection to the new “transformed” application. A notation of the serial number to which the cancelled extension of protection is transformed appears in the electronic record of the cancelled extension of protection, under “Other Information” in the Trademark database (in the “Transformed To” field). Similarly, a notation of the serial number of the cancelled request for extension of protection appears in the Trademark database for the new transformed application (in the “Transformed From” field).

The “transformed” application will have the same filing date as the cancelled extension of protection, that is: (1) the international registration date, if the request for extension of protection to the United States was made in the international application; or (2) the date of recordal of the subsequent designation with the IB, if the request for extension of protection to the United States was made in a subsequent designation. If the extension of protection was entitled to priority under §67 of the Trademark Act, 15 U.S.C. §1141g, the new application is entitled to the same priority.

If an examining attorney has already searched USPTO records for conflicting marks, the examining attorney assigned to the transformed application does not have to conduct a new search, since the effective filing date will not change. The examining attorney must either ensure that a copy of the search statement is placed in the electronic record of the transformed application, or enter a Note to the File in the record, indicating the date on which the search was conducted and the serial number of the §66(a) application in which the search statement is of record.

The examining attorney must require the applicant to submit a verified statement in support of the application that relates back to the filing date of the transformed application. See [TMEP §804.02](#) regarding the essential allegations required to verify an application for registration of a mark under §1 or §44, and [TMEP §804.04](#) regarding persons properly authorized to sign a verification on behalf of an applicant.

If it is unclear from the transformation request, the examining attorney must require the holder to clarify whether the holder seeks registration for all of the goods/services that were covered by the cancelled extension of protection.

Even if the mark in the extension of protection was already published or registered, republication will be required, due to the substitution of a new basis for registration. 37 C.F.R. §2.35(b)(2).

Generally, in examining a “transformed” application where the extension of protection was published or registered, the USPTO will only issue requirements or refusals related to the new §1 or §44 basis. However, in some cases, where a significant length of time has elapsed since the initial examination of the request for

extension of protection, refusal of registration may be appropriate due to changed circumstances. For example, the mark may have become descriptive or generic as applied to the goods/services.

### 1904.10 Affidavits of Use or Excusable Nonuse Required

Under §71 of the Trademark Act, 15 U.S.C. §1141k, a registered extension of protection to the United States will be cancelled if the holder of the international registration fails to periodically file affidavits of use in commerce or excusable nonuse. See [TMEP §1613](#) for further information.

### 1904.11 Incontestability

Under §73 of the Trademark Act, 15 U.S.C. §1141m, if a holder files an affidavit that meets the requirements of §15 of the Trademark Act, a registered extension of protection to the United States may become “incontestable”. The period of continuous use on which an affidavit of incontestability may be based may begin no earlier than the date of issuance of the registered extension of protection, unless the holder owns a prior U.S. registration of the same mark for the same goods/services. 15 U.S.C. §1141m-n. See [TMEP §§1605](#) *et seq.* regarding the requirements for an affidavit of incontestability under §15 of the Trademark Act.

### 1904.12 Replacement

If a United States national registration and a subsequently issued certificate of extension of protection of an international registration to the United States are: (1) owned by the same person; (2) identify the same mark; and (3) list the same goods/services, then the extension of protection shall have the same rights as those accrued to the United States national registration at the time the certificate of extension of protection issues. Section 74 of the Trademark Act, 15 U.S.C. §1141n; 37 C.F.R. §7.28(a); Article 4 *bis*.

Legally, replacement takes place automatically, by operation of law. However, the USPTO will note the replacement in its records (and notify the IB accordingly) only if the holder of a registered extension of protection files a request that it do so. A request to note replacement of a United States national registration with a registered extension of protection must include:

- (1) The serial number or registration number of the extension of protection to the United States (i.e., the §66(a) application or registered extension of protection);
- (2) The registration number of the replaced United States registration; and
- (3) The fee required by 37 C.F.R. §7.6.

37 C.F.R. §7.28(b).

The holder cannot file the request to note replacement of the United States national registration until the registration based on the request for extension of protection issues. If the original United States national registration is active on the date the registration based on the request for extension of protection issues, the USPTO will accept a request to note replacement that is not filed until after the United States national registration is cancelled or expired. However, if the original United States national registration is in the grace period for filing an affidavit of continued use under Section 8 or a combined affidavit of continued use and renewal under Sections 8 and 9, 15 U.S.C. §§1058, 1059, at the time the registered extension of protection issues, the USPTO will not note replacement unless the required affidavit is filed and accepted.

“Replacement” does not invalidate the United States national registration. The United States national registration remains on the register, with all the rights attaching to such a registration, as long as the holder renews the registration under §9 of the Trademark Act and files the necessary affidavits of use or excusable nonuse under §8 of the Trademark Act. 37 C.F.R. §7.29. It is up to the holder to decide whether to maintain the replaced United States national registration.

### **1904.13 Amendment and Correction of Registered Extension of Protection to the United States**

All requests to record changes to an international registration and associated extensions of protection must be filed at the IB. Accordingly, the holder of a registered extension of protection of an international registration to the United States may file a request for amendment or correction under §7 of the Trademark Act with the USPTO only in limited circumstances, where the change will affect only the extension of protection to the United States. See TMEP §§[1609.01\(a\)](#), [1609.02](#), [1904.13\(a\)](#), and [1904.13\(b\)](#) for further information.

#### **1904.13(a) Limited Amendments to Registered Extension of Protection**

The holder of a registered extension of protection may request certain changes under §7 of the Trademark Act, 15 U.S.C. §1057, that will affect only the extension of protection in the U.S. For example, an applicant may request to amend the registered extension of protection to add a voluntary disclaimer, to amend the translation of the mark as provided during examination, or to limit or partially delete goods, services, or classes. [TMEP §1609.01\(a\)](#). If the USPTO grants the §7 request, the USPTO will notify the IB of the change to the extension of protection to the United States.

The USPTO will not accept an amendment of a registered extension of protection involving the holder’s name or address that has not been recorded with the IB. 37 C.F.R. §7.22; [TMEP §1906.01\(c\)](#).

The mark in a registered extension of protection cannot be amended. See [TMEP §§1609.02](#) and [1906.01\(i\)](#).

See also [TMEP §§1906.01](#) *et seq.* regarding requests to record changes at the IB.

#### **1904.13(b) Corrections to Registered Extensions of Protection**

Generally, all requests to record changes to an international registration must be filed at the IB, because an extension of protection of an international registration remains part of the international registration even after registration in the United States. However, in the limited circumstance where the holder of an international registration makes a mistake in a document filed during prosecution in the USPTO that affects only the extension of protection to the United States, the registrant may request correction of the error pursuant to 37 C.F.R. §2.175. For example, if there was a minor typographical error in an amendment to the identification of goods in a §66(a) application, and the mark registered with such an error, the owner of the registration could request correction. If the USPTO grants the request, the USPTO will notify the IB of the change to the extension of protection to the United States.

If a clerical error occurred through the fault of the USPTO, which is apparent from a review of USPTO records, the USPTO will correct the error without charge. See [TMEP §1609.10\(a\)](#) for procedures for requesting correction of a USPTO error and [§1609.10\(b\)](#) regarding correction of a registrant's error.

#### **1904.14 Notification of Correction in the International Register with Respect to Registered Extension of Protection**

When the IB determines that there is an error concerning an international registration in the International Register, it corrects that error *ex officio*. The IB will also correct errors at the request of the holder or the Office of Origin. Common Reg. 28(1). See [TMEP §1906.01\(f\)](#). If the IB notifies the USPTO of a correction of an international registration, the USPTO may declare in a notification to the IB that protection cannot, or can no longer, be granted to the international registration as corrected. This may be done where there are grounds for refusal of the international registration as corrected which did not apply to the international registration as originally notified to the USPTO. Common Reg. 28(3).

Upon receipt of a notification of correction in a registered extension of protection, the MPU shall determine whether the correction would require republication of the mark. If republication would not be required, the MPU will enter the correction in the Trademark database and ensure that a certificate of correction is issued to the holder.

When a notification of correction received from the IB prior to registration is not acted upon in sufficient time or is received too late to withdraw the application from issuance of a registration, the resulting registration generally will be treated as inadvertently issued. However, to the extent possible given the nature of the correction, the holder will be given the opportunity to keep the registration as issued and the USPTO will create a child application for any corrected goods/services/classes. The USPTO will notify the holder via the last correspondence address of record as to the receipt of the correction and the options for processing. To the extent a correction involves issues that cannot be handled by the creation of a child application, such as a material alteration of the mark, the registration will be cancelled as inadvertently issued and examined in accordance with Office policy and procedures.

When a notification of correction is received after the USPTO has issued a registered extension of protection, the correction will be reviewed in the MPU to determine if the registration may be corrected, as no republication would be required to implement the correction. When the correction would not trigger a requirement for republication, the MPU will make the correction and schedule the issuance of an updated registration certificate, as necessary.

If the MPU determines that entry of the correction would require further examination, the holder will be given the opportunity to keep the registration as issued and to divide any corrected goods, services, and/or classes affected into a child application pursuant to 37 C.F.R. §2.87. See [TMEP §§1110–1110.12](#). The holder may also request the entire file be restored to pendency and the application will be re-examined as corrected.

Upon receipt of a correction that would affect the rights deriving from the international registration, the USPTO is afforded a new period of 18 months within which to notify the IB of any newly arising grounds for refusal. To the extent any requirements or refusals are applicable to the corrected data, the examining attorney shall issue an Office action, which will be forwarded by the MPU to the IB, as required by Section 68(c)(1), 15 U.S.C. §1141h(c)(1), and Rule 28(e) of the Common Regulations. The examining attorney must contact the MPU upon issuance of such an action so that it will be forwarded as required.

See also [TMEP §1904.03\(f\)](#) regarding corrections to pending §66(a) applications, and [TMEP §1906.01\(f\)](#) for information about filing a request for correction with the IB.

## **1904.15 Notification of Limitation of the List of Goods/Services with Respect to Registered Extension of Protection**

### *Limitation Due to Partial Cancellation of International Registration*

When the USPTO receives notification from the IB that the international registration has been cancelled in part due to the ceasing of effect of the basic registration, the USPTO will partially cancel the registered extension of protection by updating the USPTO's Trademark database and issuing an updated registration certificate. 15 U.S.C. §1141j(a); 37 C.F.R. §7.30 The MPU will determine what, if any, goods and/or services remain extended to the United States and narrow the listing of goods and/or services accordingly.

### *Voluntary Limitation by Holder of International Registration*

Upon receipt of notification from the IB that a voluntary limitation of the list of goods/services affects the United States, the USPTO may declare that the limitation has no effect. Such a declaration must be sent to the IB within 18 months of notification of the limitation. The USPTO will indicate the reasons for which the limitation has no effect, the corresponding essential provisions of the law, and whether the declaration is subject to review or appeal. Common Regs. 27(5)(a)-(c).

If the MPU trademark specialist determines that the limitation has no effect in the United States (e.g., because he or she determines that the change requested results in an extension rather than a limitation of the goods/services), the MPU will forward the case to the Post Registration division to issue a post-registration Office action refusing the limitation as an unacceptable amendment of the registered extension of protection under Section 7. 15 U.S.C. §1057. See [TMEP §1609.03](#) regarding amendment of the identification of goods or services in a registered extension of protection. Once issued, the MPU will forward a copy of the Office action declaring the limitation to have no effect to the IB within 18 months of the date of the IB's notification of the limitation.

If the MPU trademark specialist determines that the limitation does have effect in the United States, the MPU trademark specialist will enter the limitation into the Trademark database and ensure that an updated registration certificate is issued to the holder.

If a limitation results in the deletion of all goods/services identified in the registered extension of protection, the registration will be cancelled.

See also [TMEP §1904.03\(g\)](#) regarding limitations of the goods/services in pending §66(a) applications, and [TMEP §1906.01\(e\)](#) for information about filing a request to record a limitation with the IB.

## **1905 Renewal of International Registrations**

The term of an international registration is ten years, and it may be renewed for ten years upon payment of the renewal fee. Articles 6(1) and 7(1). Renewal of international registrations must be made at the IB, in accordance with Article 7 and Common Regs. 29 - 31. There is a renewal form, form MM11, on the IB website at <http://www.wipo.int/madrid/en/>.

The USPTO will not process a request to renew an international registration nor forward it to the IB. 37 C.F.R. §7.41.

The USPTO does not issue inquiries to the owner of a §66(a) application or registered extension of protection as to whether an international registration has been renewed. Under §70(b) of the Trademark Act, 15 U.S.C. §1141j(b), and Article 3 *ter*(2) of the Protocol, if the international registration is not renewed, the IB will notify the USPTO that the registration has expired. The USPTO will then cancel the registered extension of protection or abandon the §66(a) application as of the expiration date of the international registration.

See [TMEP §1614](#) regarding renewal of a registered extension of protection to the United States.

## 1906 Communications with International Bureau Regarding International Registrations

Information about communicating directly with the IB is available on the WIPO website at <http://www.wipo.int/madrid/en/>. The IB can be contacted by mail to 34 chemin des Colombettes, P.O. Box 18, 1211 Geneva 20, Switzerland; by telephone at 41 22 338 9111; by fax to 41 22 740 1429; or by e-mail to [intreg.mail@wipo.int](mailto:intreg.mail@wipo.int).

### 1906.01 Recording Changes in International Register

The IB will record changes and other matters concerning international registrations in the International Register. Such requests are governed by Articles 9 and 9 *bis* and Common Reg. 25. Some of the changes that can be recorded in the International Register are:

- Change in ownership of the registration;
- Change of holder's name and address;
- Change in name or address of holder's representative;
- Limitation, renunciation, or cancellation of international registration.

Most requests to record changes must be filed with the IB on the IB's forms, available on the IB website at <http://www.wipo.int/madrid/en/>. There are only two limited situations in which a request to record a change may be filed with the IB through the USPTO:

- (1) an assignment that meets the requirements of 37 C.F.R. §7.23(a) ( *see* [TMEP §1906.01\(a\)\(i\)](#)); or
- (2) a security interest or other restriction of a holder's right to dispose of an international registration (or the release of such a restriction) that meets the requirements of 37 C.F.R. §§7.24(a) and (b) ( *see* [TMEP §1906.01\(b\)](#)).

37 C.F.R. §7.22.

#### 1906.01(a) Change in Ownership of International Registration

The IB will record a change in ownership by assignment, merger, court decision, or operation of law at the request of the holder, the Contracting Party of the holder, or an interested person. Article 9; Common Reg. 25(1)(a)(i). The change may relate to some or all of the goods/services in some or all of the designated Contracting Parties. A fee is required.

Most requests to record changes of ownership must be filed directly with the IB. 37 C.F.R. §§7.22 and 7.23. Form MM5 is available on the IB website at <http://www.wipo.int/madrid/en/> for that purpose. The IB does not require copies of assignments or other supporting documents. See [TMEP §1906.01\(a\)\(i\)](#) regarding the limited circumstances in which a request to record a change in ownership may be filed with the IB through the USPTO.

### **1906.01(a)(i) Requirements for Submitting Changes in Ownership of International Registration Through the USPTO**

The USPTO will accept for submission and forward to the IB a request to record a change of ownership only if *all* of the following conditions have been met:

- (1) the assignee cannot obtain the assignor's signature on the request to record the change;
- (2) the assignee is a national of, is domiciled in, or has a real and effective industrial or commercial establishment in the United States; and
- (3) the assigned goods/services applies to the designation to the United States.

37 C.F.R. §7.23.

No other requests to record changes of ownership can be filed through the USPTO. 37 C.F.R. §§7.22 and 7.23.

A request to record a change of ownership filed through the USPTO must also include:

- The international registration number;
- The name and address of the holder of the international registration;
- The name and address of the assignee of the international registration;
- A statement that the assignee: (i) is a national of the United States; (ii) has a domicile in the United States; or (iii) has a real and effective industrial or commercial establishment in the United States. Where an assignee's address is not in the United States, the assignee must provide the address of its United States domicile or establishment;
- A statement that the assignee could not obtain the assignor's signature for the request to record the assignment;
- An indication that the assignment applies to the designation to the United States;
- A statement that the assignment applies to all the goods/services in the international registration, or if less, a list of the goods/services in the international registration that have been assigned that pertain to the designation to the United States; and
- The USPTO transmittal fee required by 37 C.F.R. §7.6.

37 C.F.R. §7.23(a).

The USPTO currently does not have a TEAS form available for requests to record a change of ownership of an international registration. A holder must use the official IB form MM5 available on the IB website at <http://www.wipo.int/madrid/en/>. The IB will not accept paper requests that are not presented on the official IB form. The form cannot be handwritten. Comm Reg. 25(1)(a); Madrid Admin. Instr. §6(a). The holder should complete the form online, print the completed form and submit it to the USPTO by mail, hand delivery, or courier service.

The completed form submitted through the USPTO must be mailed using the First Class Service of the USPS to:

Madrid Processing Unit  
600 Dulany Street  
Alexandria, Virginia 22314-5793

37 C.F.R. §§2.190(e) and 7.4(b). Alternatively, requests to record changes of ownership may be delivered by hand or courier to the Trademark Assistance Center at James Madison Building, East Wing, Concourse Level, 600 Dulany Street, Alexandria, Virginia, Attention: MPU. TAC is open 8:30 a.m. to 5:00 p.m. Eastern Time, Monday through Friday, except on Federal holidays within the District of Columbia. 37 C.F.R. §7.4(c).

Requests to record changes of ownership cannot be filed by fax. 37 C.F.R. §§2.195(d)(5) and 7.4(d)(4).

If a request to record a change of ownership is mailed to the USPTO via the Express Mail Service of the USPS, the USPTO will deem that the request to record was submitted on the day it was deposited as Express Mail, provided that the holder complies with the requirements for correspondence sent by Express Mail set forth in 37 C.F.R. §2.198. See [TMEP §305.03](#) regarding Express Mail.

The holder should include a self-addressed, stamped postcard with the paper-filed request to record a change of ownership. Upon receipt, the USPTO will place a label indicating the receipt date on the postcard and return it to the holder.

If the request meets the requirements of 37 C.F.R. §7.23(a), the USPTO will forward it to the IB. 37 C.F.R. §7.23(b). If the request does not meet these requirements, the USPTO will not forward the request to the IB, and will notify the holder of the reasons. The USPTO will not refund the transmittal fee. 37 C.F.R. §7.23(c).

If the IB determines that a request to record a change sent through the USPTO is irregular, the IB will notify both the USPTO and the holder. Common Reg. 26(1). The holder must file a response to any notice of irregularity with the IB; the response cannot be filed through the USPTO. 37 C.F.R. §7.23(d).

Occasionally, extraordinary circumstances render the assignee of an international registration for which the USPTO was the Office of Origin unable to secure the signature of the holder of that registration. In that instance, the assignee may petition the Director to waive the requirements of 37 C.F.R. §§7.23(a)(6) and (7), pursuant to 37 C.F.R. §2.146. See [TMEP Chapter 1700](#) regarding petitions to the Director.

Section 10 of the Trademark Act and 37 C.F.R. Part 3 do not apply to assignments of an international registration. 37 C.F.R. §7.22.

### **1906.01(a)(ii) International Fees for Recording Changes of Ownership of International Registration**

The international fee for a request to record a change of ownership must be paid directly to the IB in Swiss currency, and may be paid either before or after submission of the request to record. 37 C.F.R. §7.7(c).

However, fees paid after the document is received by the IB could result in a notice of irregularity. See [TMEP §1903.02](#) regarding payment of international fees to the IB.

### **1906.01(a)(iii) Effect of Change of Ownership of International Registration**

The validity of a change in ownership with respect to a particular Contracting Party is governed by the law of that Contracting Party. The office of a designated Contracting Party may declare that a change in ownership has no effect in its territory. The declaration must be sent to the IB within 18 months of the date of IB's notification of the change. Common Reg. 27(4).

### **1906.01(a)(iv) Dividing an International Registration After Change of Ownership with Respect to Some but Not All of the Goods/Services**

When ownership of an international registration changes with respect to some but not all of the goods/services for all designated Contracting Parties, the IB will create a separate new international registration for the goods/services that have been transferred, and notify the USPTO accordingly. See the IB's *Guide to International Registration*, Para. B.II.67.01.

When the IB notifies the USPTO of the division of an international registration resulting from a change of ownership with respect to some but not all of the goods or services, the USPTO will construe the IB's notice as a request to divide. See 37 C.F.R. §§2.87(g) and 2.171(b)(2).

See [TMEP §1110.11](#) regarding division of a pending §66(a) application after a partial change of ownership, [TMEP §1615.02](#) regarding division of a registered extension of protection after a partial change of ownership, and [TMEP §501.07](#) regarding assignment of extensions of protection.

### **1906.01(b) Restriction of Holder's Rights of Disposal**

Under Common Reg. 20(1)(a), a holder of an international registration or a Contracting Party of the holder (i.e., a Contracting Party in which the holder is a national, is domiciled, or has a real and effective business or commercial establishment) may inform the IB that the holder's right to dispose of the international registration has been restricted in whole or in part. Also, under Common Reg. 20(1)(b), the office of any designated Contracting Party may inform the IB that the holder's right of disposal has been restricted in the territory of that Contracting Party. Examples of restrictions on the holder's right to dispose are security interests and court orders concerning the disposal of the assets of the holder.

The USPTO will accept for submission and forward to the IB a request to record a restriction of a holder's right to dispose of an international registration, or the release of such a restriction, *only if all of the following conditions have been met:*

- (1)(i) the restriction is the result of a court order; or (ii) the restriction is the result of an agreement between the holder of the international registration and the party restricting the holder's right of disposal, and the signature of the holder of the international registration cannot be obtained;
- (2) the party who obtained the restriction is a national of, is domiciled in, or has a real and effective industrial or commercial establishment in the United States;
- (3) the restriction or release applies to the holder's right to dispose of the international registration in the United States; and
- (4) the restriction or release applies to the designation to the United States.

37 C.F.R. §7.24(a).

All other requests to record restrictions must be filed with the IB. 37 C.F.R. §§7.22 and 7.24(a).

A request to record a restriction filed through the USPTO must include:

- The international registration number;
- The name and address of the holder of the international registration;
- The name and address of the party who obtained the restriction;
- A statement that the party who submitted the request: (i) is a national of the United States; (ii) has a domicile in the United States; or (iii) has a real and effective industrial or commercial establishment in the United States. Where a party's address is not in the United States, the party must provide the address of its United States domicile or establishment;
- A statement that (i) the restriction is the result of a court order, or (ii) where the restriction is the result of an agreement between the holder of the international registration and the party restricting the holder's right of disposal, a statement that the signature of the holder of the international registration could not be obtained for the request to record the restriction or release of the restriction;
- A summary of the main facts concerning the restriction;
- An indication that the restriction, or the release of the restriction, of the holder's right to dispose of the international registration applies to the designation to the United States; and
- The United States transmittal fee required by 37 C.F.R. §7.6.

37 C.F.R. §7.24(b).

A request to record a restriction or release submitted through the USPTO must be mailed using the First Class Service of the USPS to:

Madrid Processing Unit  
600 Dulany Street  
Alexandria, Virginia 22314-5793

37 C.F.R. §§2.190(e) and 7.4(b). Alternatively, requests to record restrictions or releases may be delivered by hand or courier to the Trademark Assistance Center, at James Madison Building, East Wing, Concourse Level, 600 Dulany Street, Alexandria, Virginia, Attention: MPU. TAC is open 8:30 a.m. to 5:00 p.m. Eastern Time, Monday through Friday, except on Federal holidays within the District of Columbia. 37 C.F.R. §7.4(c).

Requests to record restrictions or releases cannot be filed by fax. 37 C.F.R. §§2.195(d)(5) and 7.4(d)(5).

If a request to record a restriction or release is mailed to the USPTO via the Express Mail Service of the USPS, the USPTO will deem that the request was submitted on the day it was deposited as Express Mail, provided that the holder complies with the requirements for correspondence sent by Express Mail set forth in 37 C.F.R. §2.198. See [TMEP §305.03](#) regarding Express Mail.

If the request meets the requirements of 37 C.F.R. §7.24(b), the USPTO will forward it to the IB. 37 C.F.R. §7.24(c). If the request does not meet these requirements, the USPTO will refuse to forward the request to the IB, and will notify the holder of the reasons. The USPTO will not refund the transmittal fee. 37 C.F.R. §7.24(d).

If the IB determines that a request to record a restriction sent through the USPTO is irregular, the IB will notify both the USPTO and the holder. Common Reg. 26(1). The holder must file a response to any notice of irregularity with the IB; the response cannot be filed through the USPTO. 37 C.F.R. §7.24(e).

Section 10 of the Trademark Act and 37 C.F.R. Part 3 do not apply to restrictions of a holder's right to dispose of an international registration. 37 C.F.R. §7.22.

### **1906.01(c) Change of the Holder's Name or Address**

A request to record a change of the holder's name or address must be filed with the IB; it cannot be filed through the USPTO. 37 C.F.R. §7.22. Form MM9 is available for this purpose on the IB website at <http://www.wipo.int/madrid/en/>. Article 9 *bis*; Common Reg. 25(2).

### **1906.01(d) Change of Name or Address of Representative**

A request to record a change of the representative's name or address must be filed with the IB; it cannot be filed through the USPTO. 37 C.F.R. §7.22. Form MM10 is available for such requests on the IB website at <http://www.wipo.int/madrid/en/>. See also Common Reg. 36(i).

See [TMEP §§609.01\(a\)](#) and [1904.02\(i\)](#) regarding the correspondence address in a request for extension of protection to the United States.

### **1906.01(e) Limitation, Renunciation, or Cancellation of International Registration**

Requests to record a limitation, renunciation or cancellation of an international registration must be filed with the IB; they cannot be filed through the USPTO. 37 C.F.R. §7.22. There are forms for such requests on the IB website at <http://www.wipo.int/madrid/en/forms>. Under Article 9 *bis*, a holder may record the following restrictions:

- Limitation of the list of goods/services with respect to some or all of the designated Contracting Parties (Common Reg. 25(1)(a)(ii));
- Cancellation of the international registration with respect to all the designated Contracting Parties for some or all of the goods/services (Common Reg. 25(1)(a)(v));
- Renunciation with respect to some but not all of the designated Contracting Parties for all the goods/services (Common Reg. 25(1)(a)(iii)).

The office of a designated Contracting Party may declare that a limitation has no effect in its territory, e.g., because it determines that the change requested results in an extension rather than a limitation. Such declaration must be sent to the IB within 18 months of the date of the IB's notification of the limitation. Common Reg. 27(5).

See [TMEP §1904.03\(g\)](#) regarding limitations in pending §66(a) applications, and [TMEP §1904.15](#) regarding limitations in registered extensions of protection to the United States. *See also* [TMEP §1904.02\(e\)\(ii\)](#).

### **1906.01(f) Correction of Errors in International Registration**

The IB will correct errors in an international registration at the request of the holder or the Office of Origin. Common Reg. 28(1). Requests to correct errors in international registrations in which the USPTO was the Office of Origin must be filed directly with the IB, unless the error was made by the USPTO.

The office of a designated Contracting Party may declare in a notification of provisional refusal that protection can no longer be granted to an international registration as corrected. A new refusal period under Article 5 of the Protocol and Common Regs. 16-17 starts to run from the date of the correction, but only in respect to grounds that did not exist prior to the correction. Common Reg. 28(3).

See [TMEP §1904.03\(f\)](#) regarding corrections to §66(a) applications, and [TMEP §1904.14](#) regarding corrections to registered extensions of protection.

### **1906.01(g) Merger of International Registrations**

Where the same party is the holder of two or more international registrations of the same mark due to a partial change in ownership, that party may request the IB to record a merger of the registrations. Common Reg. 27(3). The request must be filed with the IB; it cannot be filed through the USPTO. 37 C.F.R. §7.22.

### **1906.01(h) License**

Under Common Reg. 20*bis* (1), a holder may file a request to record a license, a request for amendment of the recording of a license, or a request for cancellation of the recording of a license. Requests to record a license, or to cancel or amend the recording of a license, cannot be filed through the USPTO. 37 C.F.R. §7.22. There are forms for these requests on the IB website at <http://www.wipo.int/madrid/en/>. A designated Contracting Party may declare that the recording of a license has no effect in its territory. The declaration must be sent within 18 months of the IB's notification of recording of the license. Common Reg. 20 *bis*(5).

### **1906.01(i) Changes that Cannot Be Made to International Registration**

*Mark in International Registration Cannot Be Changed.* There is no provision for a mark to be amended in any way, at any time, even if the mark in the basic application or basic registration changes. *Guide to International Registration*, Para. B.II.72.02.

*Goods/Services in International Registration Cannot be Expanded.* It is not possible to expand the list of goods/services, even if the added goods/services were listed in the basic application or registration. *Guide to International Registration*, Para. B.II.72.03.

## Appendix A

### Examining Attorneys' Appeal Briefs

The following format should be used by examining attorneys when preparing an appeal brief in an appeal before the Trademark Trial and Appeal Board. The purpose of this format is to promote uniformity in the manner in which appeal briefs are presented and to suggest content guidelines. The substance of the appeal brief is a matter of individual effort within this format.

If, at the time an application file is sent to an examining attorney for preparation of the appeal brief, the examining attorney determines that jurisdiction should be restored to him or her for further examination (e.g., to make a new refusal, to correct informalities, or to suspend), this request should be submitted in lieu of the appeal brief. The request would usually be entitled "Request for Remand to Examining Attorney" and should be a brief statement of the reason for the request and an explanation of what action the examining attorney intends to take. A request for remand to submit additional evidence must include a showing of good cause (which may take the form of a satisfactory explanation as to why the evidence was not filed prior to appeal), and be accompanied by the additional evidence sought to be introduced. TBMP §1207.02. The filing of such a request should be approved by the managing attorney.

If the examining attorney's request is granted, the Trademark Trial and Appeal Board will stay further proceedings in connection with the appeal. If the request is denied, the Trademark Trial and Appeal Board will reset the time for submission of the examining attorney's appeal brief.

The brief may not exceed twenty-five (25) double-spaced pages. [TMPEP §1501.02](#).

Because the record must be complete prior to appeal, the Board will normally not consider evidence submitted with the applicant's or examining attorney's brief. If the applicant does submit such evidence, the examining attorney should specifically object to such evidence if he or she does not want it to be considered. If the examining attorney does not object to the evidence, and discusses it in his or her brief or elsewhere in the record, the Board will treat it as of record. *Id.*

#### EXAMINING ATTORNEY'S APPEAL BRIEF

The first paragraph should be an introduction, similar to the "Question Presented" section in a memo, e.g.:

The applicant has appealed the trademark examining attorney's refusal to register the trademark \_\_\_\_\_ on the ground that it is merely descriptive within the meaning of §2(e)(1) of the Trademark Act, 15 U.S.C. §1052(e)(1).

#### FACTS

This section should be a brief recital of the facts, such as what mark and goods were applied for, what refusal was made and the basis for it, summary of any evidence submitted by either party,

# TRADEMARK MANUAL OF EXAMINING PROCEDURE

etc. Since the examining attorney is an advocate at this stage of the proceeding, the appeal brief should be written in a style that will make his or her position convincing to the Board.

## ARGUMENT

The argument presented in this section should be complete. The examining attorney should clearly and concisely present each substantive argument in support of his or her position and address all of the applicant's arguments and distinguish any significant cases cited. Reference should not be made to earlier correspondence such as the final refusal. If appropriate, arguments that were made in earlier Office actions may be repeated in whole or in part in this section of the appeal brief.

The following format for organizing arguments under sub-headings is recommended:

- (1) A sub-heading or sub-headings should be used. If there is only one issue with one point, one sub-heading should be used, e.g.:

THE MARK IS MERELY DESCRIPTIVE BECAUSE IT DESCRIBES A CHARACTERISTIC OF THE GOODS.

- (2) If there is one issue with several points, use additional sub-headings, e.g.:

\_\_\_\_\_ IS LIKELY TO CAUSE CONFUSION WITH \_\_\_\_\_.

- (A) \_\_\_\_\_ is visually similar to \_\_\_\_\_.(argument)
- (B) \_\_\_\_\_ is phonetically similar to \_\_\_\_\_.(argument)
- (C) ETC.

- (3) If there is more than one issue, each issue should head a separate section, and be identified by Roman numerals, e.g.: ARGUMENTS

I. \_\_\_\_\_ IS LIKELY TO CAUSE CONFUSION . . . .

(See (2) for example)

II. \_\_\_\_\_ IS PRIMARILY MERELY A SURNAME.

(argument)

## CONCLUSION

Reiterate the main reasons, if necessary. If not, end with a sentence such as the following:

For the foregoing reasons, the refusal to register on the basis of §\_\_\_\_\_ of the Trademark Act, 15 U.S.C. §\_\_\_\_\_, for the reason that \_\_\_\_\_, should be affirmed.

Respectfully submitted,

\_\_\_\_\_  
Trademark Examining Attorney (\_\_\_\_\_, Managing Attorney)

Law Office \_\_\_\_\_

(571) 272-\_\_\_\_\_

\_\_\_\_\_ @uspto.gov

## Appendix B

### Members of International Trademark Agreements

The following is a list of members of international trademark agreements to which the United States is also a party.

**If there is a discrepancy between the expiration of a foreign registration as listed here and the date listed on the foreign registration, the date listed on the foreign registration will be controlling.**

#### Paris Convention for the Protection of Industrial Property

Under the Paris Convention, foreign applicants may seek U.S. registration, based on either (a) a valid registration, or (b) an application to register in any of the member countries listed below, with a right of priority if the United States application is filed within 6 months of the date of the first filing of the foreign application. For updates to the list below, see the World Intellectual Property Organization's home page at <http://www.wipo.int/treaties/en/ip/paris/index.html>.

Country	Term of Registration (in years)	Renewal Period (in years)
ALBANIA	10 (from date of application)	10

### **European Community Trademark**

On December 20, 1993, the European Council issued Regulation No. 40/94, establishing a single system of trademark registration, known as the Community Trade Mark (“CTM”), which is alternative to the various registration systems of each nation within the European Union (“EU”), formerly known as the European Community (EC) or European Economic Community (EEC). A foreign applicant may seek registration in the United States based on either (a) a valid CTM registration, or (b) a CTM application, with a right of priority if the United States application is filed within 6 months of the date of the first filing of the CTM application. European Union countries include all countries which are members of the European Union namely; Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, and the United Kingdom of Great Britain and Northern Ireland. A CTM is registered for a period of 10 years, running from the date of filing, and may be renewed for 10 years. CTM registrations are issued by the Office for Harmonization in the Internal Market (“OHIM”). For further information about the CTM, see OHIM’s website at <http://oami.europa.eu>.

For an updated listing of members of the EU, see the EU website at <http://userpage.chemie.fu-berlin.de/adressen/eu.html>.

### **World Trade Organization**

The World Trade Organization (“WTO”), established on January 1, 1995, is the embodiment of the results of the Uruguay Round trade negotiations and the successor to the General Agreement on Tariffs and Trade (“GATT”). Article 4 of the WTO Agreement on Trade-Related Aspects of Intellectual Property Rights (“TRIPs”) contains a most-favored-nation clause under which any advantage a member gives to the nationals of another member must normally be extended to the nationals of all members. Section 44(b) of the Trademark Act, 15 U.S.C. §1126(b), provides that any person whose country of origin is a party to any convention or treaty to which the United States is a member is entitled to the benefits of §44. Accordingly, foreign applicants may seek U.S. registration, based on either (a) a valid registration, or (b) an application to register in any of the member countries listed below, with a right of priority if the United States application is filed within 6 months of the date of the first filing of the foreign application. The WTO Agreement entered into force in the United States on January 1, 1996. The benefits accorded to nationals under this agreement by the United States date from January 1, 1996. The following is a list of WTO members who are not currently members of the Paris Convention. WTO members who are also members of the Paris Convention are not set forth in the list below because nationals from these countries have been able to base their U.S. registration on their home country application or registration since

## TRADEMARK MANUAL OF EXAMINING PROCEDURE

the date of the country's accession to the Paris Convention. For updates to the list of members below, see WTO's home page at <http://www.wto.org>.

<b>Country</b>	<b>Effective Date of Membership</b>	<b>Term of Registration (in years)</b>	<b>Renewal Period (in years)</b>
BRUNEI DARUSSALAM	Jan. 1, 1995	10 (from date of application)	10
EUROPEAN UNION	Jan. 1, 1995	10 (from date of application)	10
FIJI	Jan. 14, 1996	14 (from date of application)	14
HONG KONG	Jan. 1, 1995	10 (from date of registration)	10
KUWAIT	Jan. 1, 1995	10 (from date of application)	10
MACAO	Jan. 1, 1995	7 (from date of application)	7
MALDIVES	May 31, 1995	[There is no trademark law in effect in the Republic of Maldives, whose closest financial ties are with India. The only means of obtaining protection is by publishing a cautionary note in the English section of a Maldives newspaper. Trademarks Throughout the World (Anne-Laure Covin, 5th ed. 2008).]	
MYANMAR	Jan. 1, 1995	Unlimited (from date of first use)	
SOLOMON ISLANDS	July 26, 1996	Term dependent on United Kingdom registration	Renewal dependent on United Kingdom registration

### **Memorandum of Understanding Between United States and Taiwan**

On the basis of a Memorandum of Understanding signed on April 10, 1996, between the American Institute in Taiwan and the Taipei Economic and Cultural Representative Office in the United States, a foreign applicant may seek U.S. registration based on either (a) a valid registration, or (b) an application filed in Taiwan, and may claim a right of priority if the United States application is filed within 6 months of the date of the first filing of the application in Taiwan. *See* notice at 1186 TMOG 50 (May 7, 1996). A registration in Taiwan is valid for 10 years from the date of registration, and may be renewed for 10 years.

### **Other Countries Offering Reciprocal Registration Rights to United States Applicants**

Applicants from countries that are not members of international trademark agreements to which the United States is also a party may register in the United States based upon their home country registration if their home country provides reciprocal registration rights to U.S. applicants. Following is a partial list of such countries. A claim of priority based on a foreign-filed application (15 U.S.C. §1126(d)) is not usually available to these applicants.

## TRADEMARK MANUAL OF EXAMINING PROCEDURE

If the country is not on the following list, the examining attorney should require an English copy of the foreign trademark statute providing for reciprocal registration rights to U.S. applicants based on a U.S. registration.

<b>Country</b>	<b>Term of Registration (in years)</b>	<b>Renewal Period (in years)</b>
TUVALU	Term dependent on United Kingdom registration	Renewal dependent on United Kingdom registration

### **Additional Resources For Information About International Treaties and the Trademark Laws of Foreign Countries**

For further information about the trademark laws of foreign countries, see *Trademarks Throughout the World* (Anne-Laure Covin, 5th ed. 2008) and *World Trademark Law and Practice* (Ethan Horwitz, 2nd ed. 2008).

The United States Department of State puts out a list of members of treaties currently in force, available at <http://www.state.gov/s/l/treaty/tif/index.htm>.

Information about the United Nations treaty collection is available at <http://treaties.un.org/>.

There is a directory of intellectual property offices on the World Intellectual Property Organization's website at <http://www.wipo.int/directory/en/urls.jsp>.

There are links to websites of foreign countries at <http://www.uspto.gov/faq/other.jsp>.

## Appendix C

### Notes of Other Statutes

#### **SOME SECTIONS OF THE UNITED STATES CODE PROTECTING SPECIFIC NAMES, TERMS, INITIALS, ACRONYMS, AND MARKS**

This appendix provides a nonexhaustive list of names, terms, initials acronyms, and marks that are protected under the United States Code. Almost all of these sections protect symbols, emblems, seals, insignia, and badges, as well as the referenced name, term, initials, acronym, and mark, and some protect the names and/or designs of characters.

For information regarding other matter protected by statute, see the Index to the United States Code, especially under the terms “decorations, medals and badges,” “coats of arms,” “character,” “insignia,” “names,” “seals” and “symbols.” However, note that other sections also exist (e.g., District of Columbia Code) which are not indexed under these terms.

### **SOME SECTIONS OF THE UNITED STATES CODE (UCS) RELATING TO TRADEMARKS**

*(This is a partial list of sections relating to trademarks.)*

- 7 U.S.C. §136, The Federal Insecticide, Fungicide and Rodenticide Act, relating to the requirements for labeling of economic poisons.
- 7 U.S.C. §§1551-1610, The Federal Seed Act, relating to requirements for labeling of seeds in interstate commerce.
- 15 U.S.C. §1, Sherman Act (Sec. 1), as amended by Miller-Tydings Act, relating to restraint of trade.
- 15 U.S.C. §45, relating to unfair methods of competition.
- 15 U.S.C. §52, relating to false advertisements.
- 15 U.S.C. §68, The Wool Products Labeling Act, relating to the labeling of wool products.
- 15 U.S.C. §69, The Fur Products Labeling Act, relating to the labeling of fur and fur products.
- 15 U.S.C. §70, the Textile Fiber Products Identification Act, relating to the use of trademarks and names in the advertising or labeling of textile fiber products.
- 15 U.S.C. §297, relating to use of marks, trade names, words and labeling in connection with the importation, exportation or carriage in interstate commerce of merchandise made of gold or silver or their alloys.
- 15 U.S.C. §§1261-1273, relating to the labeling of hazardous substances.
- 15 U.S.C. §1511, relating to jurisdiction of Department of Commerce over Patent and Trademark Office.
- 15 U.S.C. §§5401 *et seq.*, relating to the recordation of insignia of manufacturers and private label distributors to ensure the traceability of a fastener to its manufacturer or private label distributor. ( *See* notice at 1192 TMOG 19 (Nov. 5, 1996)).
- 18 U.S.C. §701, relating to use of any badge, identification card, or other insignia, or any colorable imitation thereof, of departments, agencies, and independent offices of the United States.
- 18 U.S.C. §704, relating to the unauthorized use of any badge, decoration, or medal, or any colorable imitation thereof, of the armed forces of the United States.
- 18 U.S.C. §705, relating to the unauthorized use on merchandise of any badge, medal, emblem, or other insignia, or any colorable imitation thereof, of any veteran's organization incorporated by enactment of Congress or of any organization formally recognized by any such veteran's organization as an auxiliary thereof.
- 18 U.S.C. §709, relating to false advertising or misuse of names to indicate federal agency. Also, prohibitions against using certain terms and initials within the financial, insurance, agricultural, housing, protection, investigatory and other fields.
- 18 U.S.C. §709, relating to use, manufacture, or sale of any cremation urn of a design approved by the Secretary of Defense for use to retain the cremated remains of deceased members of the armed forces or an urn which is a colorable imitation of the approved design, except when authorized under regulation made pursuant to law.
- 18 U.S.C. §712, relating to misuse by collecting agencies or private detective agencies of names, emblems, and insignia to indicate federal agency.

## TRADEMARK MANUAL OF EXAMINING PROCEDURE

- 18 U.S.C. §713, relating to the use of likenesses of the great seal of the United States, and of the seals of the President and Vice President.
- 18 U.S.C. §1001, relating to statements, representations, writings or documents made to any department or agency of the United States.
- 18 U.S.C. §1158, relating to counterfeiting or imitating Government trademarks for Indian products.
- 18 U.S.C. §2320, relating to criminal penalties for trafficking in counterfeit goods and services.
- 19 U.S.C. §1337(a), Tariff Act of 1930, relating to unfair practices in import trade.
- 19 U.S.C. §1526(a), Tariff Act of 1930, barring importation into the United States of merchandise of foreign manufacture bearing a trademark registered in the Patent and Trademark Office by a person domiciled in the United States if copy of the registration certificate has been filed with the Secretary of the Treasury unless written consent of the trademark owner has been secured.
- 19 U.S.C. §2111 *et seq.*, providing authority for trade agreements and also annual reports to Congress on barriers to trade include the treatment of intellectual property rights among acts, policies, and practices that constitute barriers to trade.
- 19 U.S.C. §2411, relating to foreign countries' provision for adequate and effective protection of the intellectual property rights of U.S. nationals.
- 19 U.S.C. §2462(c), relating to the consideration of intellectual property rights as a factor for foreign countries to receive benefits under the Generalized System of Preferences (GSP).
- 21 U.S.C. §§603-623, The Meat Inspecting Act, relating to the inspection and labeling of meat and products.
- 21 U.S.C. §§301, 321-392, The Federal Food, Drug, and Cosmetic Act, relating to the requirements for labeling of food, drugs, and cosmetics; avoiding trademarks in establishing official names.
- 21 U.S.C. §457, Poultry Products Inspection Act, relating to requirements for labeling of poultry products in interstate commerce.

Stiftung	Liechtenstein	<i>Stiftung</i> . Trust.
td	Slovenia	<i>Tiha družba</i> . Sole proprietorship.
TLS	Turkey	<i>Türk Limited irketi</i> . Private Limited Liability Company.
Verein	Switzerland	<i>Verein</i> . Association.
VOF	Netherlands	<i>Vennootschap onder firma</i> . General partnership.
v.o.s.	Czech Rep	<i>Verejna Obchodni Spolecnost</i> . General partnership.

## TRADEMARK MANUAL OF EXAMINING PROCEDURE

<b>Abbr.</b>	<b>Country</b>	<b>Description</b>
YK	Japan	<i>Yugen Kaisha</i> . Limited company, similar to an American closely held corporation. Abolished in 2006 and replaced with the <i>Godo Kaisha</i> .

## Appendix E

### Countries That Have Standard Character Marks or the Equivalent

*Purpose:* The purpose of this appendix is to assist in determining for which countries it is unnecessary to inquire whether and/or confirm that the mark as registered in the foreign registration is in standard characters or the equivalent.

*Explanation:* The Office currently requires examining attorneys to inquire whether a mark in a foreign registration is in standard characters or the equivalent. [TMEP §807.03\(f\)](#). The following list is of countries that have been determined to register marks that are in standard characters or the equivalent. Please note that “country” refers to the country of the foreign registration upon which the applicant relies to obtain registration under §44(e). Thus, for countries on this list, provided that all letters and words in the mark in the foreign registration are in block capital or capital and lowercase Latin characters, all numerals are Roman or Arabic numerals, the mark includes only common punctuation or diacritical marks, and no stylization of lettering and/or numbers is claimed, the examining attorney need not inquire whether the registered mark in the foreign registration is in standard characters or the equivalent, unless the applicant has indicated that the mark is *not* standard characters or the equivalent.

If the applicant has indicated that the mark is *not in* standard characters or the equivalent, but the foreign registration is from a country on the list and the mark meets the standards set forth in the preceding paragraph, the examining attorney must inquire about the discrepancy. In response to the inquiry, the applicant must either amend the application to claim standard characters, or confirm that the mark is not in standard characters or the equivalent. If a particular country is not on this list, the examiner must inquire as to whether the mark in the foreign registration is for a mark in standard characters or the equivalent.
